## **FOREWARD**

Public Law 100-656, the Business Opportunity Development Reform Act of 1988, amended the Small Business Act to emphasize acquisition planning. The law requires agencies to compile and make available projections of contracting opportunities that small businesses (including minority, women-owned, HUBZone, veteran-owned, and service-disabled veteran-owned) may be able to perform.

The Department of Homeland Security (DHS) *Forecast of Contract Opportunities* includes projections of all anticipated contract actions above \$100,000 that small businesses may be able to perform under direct contracts with DHS, or perform part of the effort through subcontract arrangements with the Department's large business prime contractors. For additional information on procurements not expected to exceed \$100,000, please contact the appropriate DHS Small Business Specialist for each Organizational Element.

Consistent with our mission, DHS will provide maximum practicable opportunities in our acquisitions to small business, veteran-owned small business, service-disabled veteran-owned small business, HUBZone small business, small disadvantaged business, and women-owned small business concerns. The DHS small business acquisition policy is a shared responsibility among all DHS employees involved in the acquisition process. Through a unified team approach involving senior management, small business personnel, acquisition personnel, and technical/program staff, we can support both our critical national mission and the important public policy objective of small business inclusion in our acquisition program.

The DHS purchases a wide variety of goods and services and we are committed to small business participation in our acquisition program. We hope that this forecast will assist you in doing business with DHS. By helping firms identify procurement opportunities as early in the acquisition process as possible, we hope to improve communication with industry and assist the small business community with its marketing efforts.

The procurements described in this forecast are expected to have a solicitation released in fiscal year 2005 and subsequent fiscal years as indicated for each action. The item descriptions are based on the best information available at the time of publication. Updates to the Forecast will be made on the DHS website at [www.dhs.gov/openforbusiness](http://www.dhs.gov/openforbusiness) and the hard-copy document when reprinted.

All projected procurements are subject to revision or cancellation. Final decisions on the extent of competition, small business participation, estimated value, or any aspect of the procurement action will not be made until each procurement is initiated. The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the Government to purchase the desired products and services.

The forecast is divided by DHS Organizational Elements and sorted by North American Industry Classification System (NAICS) Code. Actual solicitation notices will be posted on <http://www.fedbizopps.gov/>.
