Footnotes:

The \$89.525M reflects the amount required for Infrastructure and Security Activities for FY 2012. This is \$7.064M above stated in the Budget Appendix.
 The \$44.069M reflects the amount required for Homeland Secure Data Network for FY 2012. This is \$7.064M below stated in the Budget Appendix.

iii. Status of Congressionally Requested Studies, Reports, and Evaluation

**Department of Homeland Security
Departmental Management and Operations**

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2010	9/30/2010	House Report 111-298 p. 55 House Report 111-157 pp. 19-20	OCAO FY10 2nd Greenhouse Gas Report: The Committee still expects the Secretary to provide Congress, by September 30, 2009, with a detailed inventory of the Department's greenhouse gas emissions, and a plan for how the Department will reduce these emissions. The Committee expects a report every six months thereafter on the progress the Department has made in emission reductions.	Pending clearance.
2010	11/15/2010	House Report 111-298 p. 55	OCFO FY10 Q4 User Fees: The conferees direct the Secretary to report on actual fiscal year 2009 user fee collections and updated projections for fiscal year 2010 fee collections across all relevant DHS components. In addition, the Secretary shall provide a contingency plan for making up any shortfall between expected collections and budgeted amounts, by DHS component, no later than 60 days after the date of enactment of this Act, and quarterly thereafter.	Pending clearance.
2010	11/15/2010	House Report 111-298 p. 55	OCFO FY10 Q4 DHS Reception and Representation Expenses: see above	Pending clearance.
2010	1/15/2010	House Report 111-298 p. 59 House Report 111-157 p. 26	OCFO FY10 Guam and CNMI: The Committee therefore directs the Secretary to report to the Committee not later than January 15, 2010, on fiscal year 2010 resource requirements for carrying out the changes mandated in Public Law 110-229, including any required reprogramming or transfer of funds; acquisition or leasing of property; and relocation or hiring of additional personnel.	Pending clearance.
2010	1/5/2011	P.L. 111-83, Sec. 554 House Report 111-298 p. 39	OCFO FY10 Collections and Expenditures: That the Secretary shall provide a report to the Committees on Appropriations of the Senate and the House of Representatives not later than January 5, 2011, providing the level of collections and a summary by agency of the purposes and levels of expenditures for the prior fiscal year, and shall report annually thereafter.	Pending clearance.
2010	4/6/2010	House Rpt. 111-157 p. 28	OCIO FY10 IT Acquisitions Report: The Committee continues an existing requirement that the CIO report on all IT acquisitions financed directly or managed by the CIO.	Pending clearance.

2010	2/15/2010	House Report 111-298 p. 57 Senate Report 111-31 pp. 15-6	OCPO FY10 Q1 Major Acquisitions Report: In order to monitor the Department's acquisition review process, the Committee directs the Secretary to provide a quarterly status report on major acquisitions in excess of \$300,000,000. These reports shall include a description of each acquisition and whether it has been approved by the Acquisition Review Board [ARB], is currently being reviewed by the ARB, is scheduled for review or a follow-up review by the ARB, and whether the relevant DHS component has begun submitting monthly periodic reports and the results of the monthly updates. In addition, the report shall include information on acquisitions that are not meeting cost, schedule, or performance parameters, including an explanation of why, and corrective measures implemented or planned. These reports are also to address the extent to which the Department has sufficient personnel to execute the acquisition review process, and if not, its plans for fulfilling staffing requirements.	Pending clearance. OCPO is combined quarterly reports into one report.
2010	5/14/2010	House Report 111-298 p. 57 Senate Report 111-31 pp. 15-6	OCPO FY10 Q2 Major Acquisitions Report: see above	OCPO is combined quarterly reports into one report: see above.
2010	8/16/2010	House Report 111-298 p. 57 Senate Report 111-31 pp. 15-6	OCPO FY10 Q3 Major Acquisitions Report: see above	OCPO is combined quarterly reports into one report: see above.
2010	11/16/2010	House Report 111-298 p. 57 Senate Report 111-31 pp. 15-6	OCPO FY10 Q4 Major Acquisitions Report: see above	OCPO is combined quarterly reports into one report: see above.
2010 (Calendar Year)	1/31/2011	P.L. 109-90, Sec. 537 House Report 109-241, p. 37	OCSO 2010 Annual Sensitive Security Information (SSI) Report: That not later than January 31, 2006, the Secretary shall provide to the Committees on Appropriations of the Senate and the House of Representatives the title of all DHS documents that are designated as SSI in their entirety during the period October 1, 2005, through December 31, 2005: Provided further, That not later than January 31 of each succeeding year, starting on January 31, 2007, the Secretary shall provide annually a similar report to the Committees on Appropriations of the Senate and the House of Representatives on the titles of all DHS documents that are designated as SSI in their entirety during the period of January 1 through December 31 for the preceding year	Pending clearance.
2010	not specified	House Report 111-298 p. 56 House Report 111-157 p. 20	OCSO 2010 HSPD-12 Report: The Committee directs the Office of Security to provide a report on its progress in issuing new identity cards and remaining needs for additional infrastructure and materials needed to complete the project.	Pending clearance.

BUDGET REQUEST AND SUPPORTING INFORMATION

DEPARTMENTAL MANAGEMENT AND OPERATIONS OFFICE OF THE SECRETARY AND EXECUTIVE MANAGEMENT

I. Appropriation Overview

A. Mission Statement:

The Department of Homeland Security (DHS) Office of the Secretary and Executive Management (OSEM) supports the Department and all of its Components by providing leadership, direction, and management to the Department. OSEM establishes and implements policy and provides various support functions and oversight to all entities within the Department. The Department continues to work toward integration and consolidation of its resources and operations to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

B. Budget Activities:

OSEM is a separate appropriation within Departmental Management and Operations which provides resources for thirteen separate Programs, Projects and Activities (PPA's) including: Immediate Office of the Secretary, Immediate Office of the Deputy Secretary, Chief of Staff, Office of the Executive Secretary, Intergovernmental Affairs, Office of Policy, Office of Public Affairs, Office of Legislative Affairs, Office of the General Counsel, Office for Civil Rights and Civil Liberties, Office of the Citizenship and Immigration Ombudsman, Privacy Officer, and the Office of Counternarcotics Enforcement. Below are brief descriptive summaries of the thirteen PPA's.

Immediate Office of the Secretary: The Office of the Secretary's role is to provide executive leadership, management and direction, and oversight for the Department's Components. The Secretary represents the Department of Homeland Security to the President, Congress, and the general public.

Immediate Office of the Deputy Secretary: The Office of the Deputy Secretary supports the Secretary by providing leadership to the Department especially regarding internal management and direction.

Chief of Staff: The Chief of Staff is responsible for the coordination of policy initiatives and other actions of the Department's Components, directorates, and offices.

The Office of the Executive Secretary: The Office of the Executive Secretary (ESEC) supports the Office of the Secretary and Office of the Deputy Secretary with management of their correspondence, decision documents, and other written communications, including briefing books. The Office of the Executive Secretary is especially charged with ensuring that all materials presented to the Secretary and Deputy Secretary for signature have been thoroughly cleared with all relevant Components.

Office of Intergovernmental Affairs: The Office of Intergovernmental Affairs (IGA) is responsible for communicating and coordinating State, Local, Tribal, and Territorial (SLTT) government interactions

throughout the Department. IGA serves as the Secretary's primary point of contact for SLTT elected and appointed officials. IGA also communicates and liaises with the national associations that represent the SLTT officials to ensure there are open lines of communications between the Department and its homeland security partners.

Office of Policy: The Office of Policy's (PLCY) responsibilities include the coordination of Department-wide policies, programs, and planning to ensure consistency and integration of missions throughout the Department. This office strengthens the Department's ability to maintain policy and operational readiness needed to protect the homeland by providing a centralized coordination point for developing and communicating policies across the multiple internal and external Components of the Homeland Security network. In addition to DHS, the Office of Policy also interacts with other government entities, international counterparts, academics, and private stakeholders.

Office of Public Affairs: The Office of Public Affairs (OPA) is responsible for managing external and internal communications. The office responds to national media inquiries, maintains and updates the Department's website, writes speeches for senior department officials, and coordinates speaking events for Department officials. OPA fosters strategic communication throughout the Department and with external stakeholders through development and coordination of major DHS announcements and rollouts as well as setting common goals to promote "One DHS" objectives. The office manages the Department's organizational identity program, which includes usage of the DHS seal and related guidelines...Also, the office oversees the Department's employee communication activities, which include coordinating communications for department-wide initiatives, town hall meetings between management and employees, and the operation and management of an intranet site. Finally, per presidential directive, OPA's incident communications program guides overall federal incident communication activity and coordinates with state, local, and international partners to ensure accurate and timely information is provided to the public during a crisis.

Office of Legislative Affairs: The Office of Legislative Affairs (OLA) serves as the Department of Homeland Security's primary liaison to Capitol Hill. They advocate the policy interest of the Administration, the Secretary of the Department of Homeland Security (DHS), and ensure that all Components of DHS are actively engaged with Congress in their specific areas of responsibility. OLA articulates views on behalf of the Departmental Components legislative initiatives. OLA responds to requests and inquiries from Congressional committees, individual congressional members and their staffs. OLA also participates in the Senate confirmation process for all DHS Presidential Nominees.

Office of the General Counsel: The Office of the General Counsel (OGC) comprises lawyers within the Department of Homeland Security with dedicated attorneys operating at headquarters and Component organizations. The General Counsel is the Chief Legal Officer of the Department. In this role, the General Counsel is ultimately responsible for all of the Department's legal determinations and for overseeing all of its attorneys. The General Counsel is also the Department's Regulatory Policy Officer. In this capacity, OGC manages the rulemaking program and ensures that the Department of Homeland Security regulatory actions comply with relevant statutes and Executive Orders. Additionally, the General Counsel provides complete, accurate, and timely legal advice on possible courses of action for the Department; to ensure that Homeland Security policies are implemented lawfully, quickly, and efficiently; therefore protecting the rights and liberties of any Americans who come into contact with the Department. OGC facilitates quick responses to congressional requests for information as well as representing DHS in venues across the country, including in the immigration courts of the United States.

Office for Civil Rights and Civil Liberties: The Office for Civil Rights and Civil Liberties (CRCL) supports the Department as it secures the nation while preserving individual liberty, fairness, and equality under the law. CRCL is involved in all of the Department's missions and performs four key functions to integrate civil rights and civil liberties into departmental activities; these are:

1. Advising Department leadership, personnel, and partners about civil rights and civil liberties issues, ensuring respect for civil rights and civil liberties in policy decisions and in the implementation of those decisions.
2. Communicating with individuals and communities whose civil rights and civil liberties may be affected by DHS activities, informing them about policies and avenues of redress, and promoting appropriate attention within the Department to their experiences and concerns.
3. Investigating and resolving civil rights and civil liberties complaints filed by the public.
4. Leading the Department's equal employment opportunity programs and promoting personnel diversity and merit system principles.

Citizenship and Immigration Services Ombudsman: The Citizenship and Immigration Services Ombudsman (CISOMB) assists individuals and employers with resolving cases pending with the United States Citizenship and Immigration Services (USCIS). In addition, CISOMB, as required by statute, identifies common problems and obstacles experienced by individuals and employers when seeking USCIS services, and propose changes to mitigate identified problems. In accomplishing each of these missions, the CISOMB works impartially to improve the overall delivery of citizenship and immigration services.

Privacy Office: The DHS Privacy Office is the first statutorily-mandated Privacy Office within the Federal government. The Privacy Office protects the collection, use, and disclosure of Personally Identifiable Information (PII) and departmental information. It ensures that appropriate access to information is consistent with the vision, strategic mission, and core values of the Department, and implements the policies of the Department to defend and protect individual rights, liberties, and information interests of our citizens. The Privacy Office has oversight of all privacy and disclosure policy matters, including compliance with the Privacy Act of 1974, the Freedom of Information Act, and the completion of privacy impact statements on all new programs and systems, as required by the E-Government Act of 2002 and Section 222 of the Homeland Security Act.

Office of Counternarcotics Enforcement: As the principal advisor to the Secretary on counterdrug matters, the Counternarcotics Enforcement Director reviews and evaluates the effectiveness of DHS counterdrug activities. The Office of Counternarcotics Enforcement (CNE) coordinates departmental policy and operations, other Federal departments and agencies and State and local agencies with respect to stopping the entry of illegal drugs into the United States. The Office makes recommendations regarding the appropriate financial and personnel resources needed to ensure there are adequate resources so the Department can fulfill its responsibilities to stop the entry of illegal drugs into the United States. CNE also works closely with intelligence and law enforcement entities within DHS and across the federal government to assist in tracking and severing connections between drug trafficking and terrorism (known as the DTX Project).

C. Budget Request Summary:

The Office of the Secretary and Executive Management requests 713 positions, 709 FTE, and \$142,533,000 for the FY 2012 request. This request includes a program change of 8 positions, 4 FTE and an increase of \$1,071,000.

Base adjustments include:

- Increase – Annualization of prior-year part-year funding (\$3,233,000; 2 FTE);
- Increase – GSA rent (\$1,410,000);
- Increase – Non-pay and Working Capital Fund inflation excluding GSA rent (\$487,000);
- Increase – Working Capital Fund Assessment Adjustment (\$2,710,000);
- Increase – FY12 DHS Balanced Workforce Contractor Conversion (22 positions; 22 FTE);
- Increase – Right Size FTE and Positions (44 positions; 44 FTE);
- Decrease – Termination of one-time costs (\$8,878,000);
- Decrease – Working Capital Fund Assessment Adjustment (\$1,089,000);
- Decrease – Right Size FTE and Positions (8 positions; 8 FTE);
- Decrease – Efficiency Review Savings Adjustment (\$152,000);
- Decrease – Program Support Savings Adjustment (\$2,350,000); and
- Decrease – Administrative Savings Initiative (ASI) (\$1,727,000).

Requested program change increases in FY 2012 include:

- Office for Civil Rights and Civil Liberties (\$1,071,000; 8 positions; 4 FTE);

CURRENT SERVICES PROGRAM DESCRIPTION:

Immediate Office of the Secretary: The Secretary is appointed by the President and confirmed by the Senate to lead the Department of Homeland Security (DHS) and act as the principal adviser to the President on homeland security matters. The Secretary ensures a coordinated national effort to prevent terrorist attacks in the United States, reduce vulnerability of the United States to terrorism, and minimize the damage, as well as recover from attacks that do occur. The Secretary is a member of the Homeland Security Council. The Secretary serves as the principal spokesperson for the Administration when testifying before the House Homeland Security Committee, the Senate Homeland Security and Government Affairs Committee, and the House and Senate Appropriations Committees.

2012 Request	62	62	8,402

OSEM requests \$8.402 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of the Executive Secretary establishes effective and proficient protocols in the processing of all internal communication, decision management, briefings, liaison activity between the Department and its components, and external correspondence for the Immediate Office of the Secretary and all directorates.

FY 2010 Accomplishments

- Institutionalized policies and procedures established by the new Administration.
- Developed online training modules for Component Executive Secretariats to facilitate department-wide compliance with correspondence standards and foster a “One DHS” culture.
- Decreased prior year’s reliance on contractor support.
- Improved the processes for delivering the Secretary’s daily classified brief working with the Intelligence and Analysis Directorate and the Office of Operations Coordination.
- Improved the Department’s Management Directive development process with the Undersecretary for Management.

FY 2011 Planned Accomplishments

- Modify and streamline Executive Secretariat processes based on outcomes from the Secretary’s Efficiency Review initiatives.
- Eliminate reliance on contractors based on FY 2010 levels.
- Develop and field on-site training/standardization teams to assist Component Executive Secretariat in maintaining Departmental standards.
- Explore staffing options for assuming responsibility for the Department’s reports and testimony clearance.

FY 2012 Planned Accomplishments

- Complete a comprehensive DHS Correspondence and Style Guidance Handbook to be utilized by all Department Components promoting “One DHS” in our written correspondence and decision memoranda.

- Create a measurable customer focused approach to increase support of Executive Secretariat policies and procedures.
- Improve the distribution of tasks and daily dissemination of information by collaborating with Component Executive Secretariats to ensure appropriate security classifications are used.
- Develop a comprehensive ESEC 101 training course to be held once a quarter to train new Component Executive Secretariat staff.
- Identify best practices and enhance technology systems for effective task management and information sharing in order to create response time efficiencies.

OSEM requests \$2.908 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The mission of IGA is to act both as an advocate for the State, local, tribal and territorial officials within the Department and to operate as the primary liaison between those officials, the Secretary and senior DHS leadership.

The stakeholder community consists of over 500,000 non-Federal elected and appointed officials within the United States, including Governors, Homeland Security Advisors, Mayors, County Executives, State legislators, Leadership of the 564 Federally recognized Indian and Native Alaskan tribes, law enforcement officials, emergency managers, and the national associations that represent these officials.

IGA manages communications and coordinates activities across the spectrum of issues, initiatives, and programs confronting all agencies and Components of the Department. IGA also coordinates with counterpart Intergovernmental Affairs Offices within other Executive Branch agencies.

FY 2010 Accomplishments

- Lead the Department’s intergovernmental approach to the BP Deepwater Horizon Incident by working with interagency intergovernmental partners to develop the Government Affairs approach at the Unified Area Command.
- Coordinated timely, consistent and accurate Departmental guidance, information and policies to our SLTTs.
- Organized and hosted the 2nd Annual Homeland Security Terrorism Threat Conference for State Homeland Security Advisors and other key stakeholders.
- Organized the 3rd Annual Governor’s Homeland Security Advisory Council “DHS day.”
- Coordinated the departmental approach to the 2010/2011 Gubernatorial transitions by developing transition plans and related materials, and convening a DHS-wide Governor’s transition working group.
- Coordinated and consulted with tribal nations on the President’s Tribal Consultation Policy as well as increased awareness of tribal issues within the Department and formalized a tribal liaison program within the Department.

FY 2011 Planned Accomplishments

- Advise the Department on strategies, processes, procedures and other developments at the SLTT levels.
- Advise newly-elected State and local officials on the roles and functions of the Department.
- Raise and mediate policy positions taken by SLTT officials and the resources needed to carry out Departmental initiatives. Ensure that SLTTs have a seat at the table and are active participants in policy development.
- Coordinate timely, consistent and accurate departmental guidance, information and policies to SLTTs.
- Assist with Gubernatorial and Mayoral Transitions, and take lessons learned from the 2010/2011 transitions and apply them to any 2012 Gubernatorial and Mayoral Transitions.
- Continue coordination and consultation with tribal nations according to the Department's Consultation Policy, and increase awareness of tribal issues within the Department. Work with Components and DHS on issues related to tribal consultation and the impact of departmental policy on tribes.

FY 2012 Planned Accomplishments

- Advise the Department on strategies, processes, procedures and other developments at the SLTT levels.
- Advise newly-elected State and local officials on the roles and functions of the Department.
- Coordinate timely, consistent and accurate Departmental guidance, information and policies to our SLTTs partners.
- Assist with Gubernatorial and Mayoral Transitions, and take lessons learned from the 2010/2011 transitions and apply them to any 2012 Gubernatorial and Mayoral Transitions.
- Continue coordination and consultation with tribal nations according to the Department's Consultation Policy, as well as increase awareness of tribal issues within the Department. Work with Components and Offices on issues related to tribal consultation and the impact of DHS departmental policy tribes.
- Host the annual Governor's Homeland Security Advisor's Committee meeting and threat briefing, and host the Annual Homeland Security Terrorism Threat Conference.

PPA: OFFICE OF POLICY

	Perm Pos	FTE	Amount
2010 Actual	199	204	\$51,008

2012 Current Services	207	207	42,423
2012 Program Change	0	0	0
2012 Request	207	207	42,423

OSEM requests \$42.423 million for this activity. The Adjustment- to-Base decrease is a net result of the termination of one-time costs, Administrative Savings Initiative and Working Capital Fund adjustments.

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2010, the Office of Policy (PLCY) led a department-wide effort to establish a strategic framework Quadrennial Homeland Security Review (QHSR) and supporting budget for a secure homeland. In FY 2011, the principal foci of PLCY are two-fold: one, to build-out the strategic, policy, and programmatic requirements to support, implement, and accomplish the recommendations of the QHSR and BUR; and two, to provide analysis on sensitive national security priorities.

FY 2010 Accomplishments

- Developed a Global Supply Chain Security Strategy as required under the Security and Accountability for Every (SAFE) Port Act of 2006, identifying strategic requirements and critical capability gaps, in order to guide operations and resource allocation for intermodal supply chain security and resilience.
- Developed strategic requirements and identified critical capability gaps for air domain surveillance and intelligence integration (air domain awareness) as described in the National Strategy for Aviation Security, in order to guide joint capability development and enhance U.S. Government (USG) air domain awareness.
- Led an international effort to strengthen commitment to aviation security through a series of multi-lateral ministerial meetings and bi-lateral engagements. This resulted in a range of new security commitments that included strengthening aviation standards and practices.
- Released annual reports on immigrant flows (legal permanent residents, persons naturalizing, refugees, and asylees, and nonimmigrant admissions), and immigration enforcement actions.
- Updated the Watch Listing Guidance to address the vulnerabilities identified as a result of the December 25, 2009 attempted terrorist attack.
- Developed and distributed the DHS Virtual Private Sector Resources Catalog allowing stakeholders to access diverse training, publications, guidance, alerts, newsletters, programs, and services available to the private sector across the Department.

- Initiated Preventing and Combating Serious Crime (PCSC) Agreement negotiations with 11 Visa Waiver Programs (VWP) countries.

FY 2011 Planned Accomplishments

- Advance and expand bilateral and multilateral Homeland Security support with the U.S. government's principal international partners on terrorism and security issues.
- Draft for interagency consideration a framework for a national Anthrax Recovery Strategy to ensure and facilitate resilience to cities and communities following wide-area anthrax contamination.
- Develop and bolster rapid food trace-back capabilities for the highest risk food groups vulnerable to biological attacks.
- Lead efforts to construct our national approach to safeguarding lawful trade and travel, preventing the exploitation of lawful pathways, and ensuring systemic resilience.
- Launch, implement and advance a new vision for North American security based on a perimeter approach to border security between Canada and the United States.
- Contribute to the establishment of an Integrated land-air-sea Domain Awareness (IDA) and common situational awareness capability through strategic capability analysis and development of baseline strategy, architecture, and framework.
- Initiate development of the second of five QHSR mission strategies, on Securing and Managing our Borders.
- Continue DHS work with the U.S. State Department to evaluate requests for Temporary Protected Status.
- Complete the first of five QHSR mission strategies, the Department's first *National Strategy to Safeguard and Secure Cyberspace*. This strategy will establish the way the homeland security enterprise will ensure a safe, secure, and resilient cyberspace and will constitute the homeland security element of the U.S. government approach to cyber security.
- Ensure a "One DHS" approach to strategy, policy and resource planning.

FY 2012 Planned Accomplishments

- Develop the Terms of Reference, stakeholder engagement plan, analytic agenda, and build future world scenarios for use during the second QHSR.
- Continue to strengthen international relationships, partner civil-security capacity, information sharing, and law enforcement cooperation mechanisms to create the conditions for effective responses to transnational homeland security threats.
- Increase our national ability to prevent terrorism through effective coordination of efforts among DHS Components by using the Law Enforcement Policy Coordination Council and partnership with the national law enforcement community.
- Prevent terrorism by identifying and increasing the implementation of effective SLT law enforcement programs, initiatives, and actions that mitigate the development violent extremism.

- Expand coordination with travel and tourism sectors as part of DHS' security collaboration with international governments.
- Lead departmental drafting of interoperable emergency communications strategy.
- Conclude PCSC Agreements with all remaining pre-2008 countries VWP.

PPA: OFFICE OF PUBLIC AFFAIRS

	Perm Pos	FTE	Amount
2010 Actual	29	31	\$6,134
2011 Continuing Resolution	38	38	5,991

2012 Current Services	30	30	6,419
2012 Program Change	0	0	0
2012 Request	30	30	6,419

OSEM requests \$6.419 million for this activity. The Adjustment-to-Base increase covers Working Capital Fund adjustments.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Public Affairs (OPA) is responsible for managing external and internal communications. The office responds to national media inquiries, maintains and updates the Department’s website, writes speeches for senior department officials and coordinates speaking events for Departmental officials. OPA fosters strategic communication throughout the Department and with external stakeholders through development and coordination of major DHS announcements and rollouts, as well as setting common goals to promote “One DHS” objectives. The office manages the Department’s organizational identity program, which includes usage of the DHS seal and related guidelines. The office also oversees the Department’s employee communication activities, which include coordinating communications for department-wide initiatives, town hall meetings between management and employees, and the operation and management of an intranet site. Per the Presidential directive, OPA’s incident communications program guides overall federal incident communication activity and coordinates with state, local and international partners to ensure accurate and timely information is provided to the public during a crisis.

FY 2010 Accomplishments

- Employed the power of social networking to expand national prevention and resilience capacity, to include developing a broader national “See-Something, Say Something” capacity and community preparedness capability.
- Doubled the incident communications with Federal-State-Local communicators through the State Incident Communications Conference Line (SICCL).
- Coordinated communicators responding to over a dozen airline security incidents, the BP Deepwater Horizon oil spill, the Ft. Hood shooting, bombing attempts on an airliner on Christmas Day 2009, at Time Square in New York City.
- Initiated and conducted planning for the establishment of the National Joint Information Center (NJIC) to support Continuity of Operations (COOP) functions for the Office of Public Affairs in the event that a national crisis results in the implementation of a COOP.

- In coordination with the Open Government Directive, launched an iteration of Ideascale – an online public engagement tool – to collect public comments and feedback on the Department’s Open Government Plan.
- Launched Restorethegulf.gov supporting the BP Deepwater Horizon oil spill cleanup and recovery efforts to distribute a publishing model and governance capacity, with over 40 trained publishers from seven different government organizations. This represents the first instance of interagency publishing on a single shared site.
- Developed a framework to more effectively utilize social media channels to monitor and respond to incidents with timely public information.

FY 2011 Planned Accomplishments

- Continue daily 24/7 press operations and response to national and local media inquiries, strategic communications, public outreach, writing speeches for Department senior officials, incident communications, internal communications, and internet and website operation.
- Establish a fully operational NJIC, which will support the COOP/COG (Continuity of Government) functions for the OPA. The NJIC will serve as the coordination facility for public information and public messaging following a Presidential COG or COOP decision.
- Streamline customer access to DHS services online, improve DHS web content management, and reduce costs by establishing a modernized customer-focused communication strategy through consolidation and centralized hosting of DHS public-facing websites.
- Establish a DHS web governance framework, comprised of a Web Council and a Web Executive Steering Committee. Together these bodies will be responsible for the development and execution of: 1) a modernized, customer-focused, communication and content-management platform and unified strategy and 2) an enterprise Web-hosting solution for DHS public-facing Websites.
- Create a lasting foundation for the DHS social media efforts, to include a strategic plan, improvements in our social media registry and public directory system and clear procedures to assure social media properties at DHS are properly resourced and managed.

FY 2012 Planned Accomplishments

- Continue working with OCIO and Components to make DHS Connect the “go to” site for employees, to bring Components’ intranet sites into DHS Connect, to foster greater collaboration and to support the “One DHS” initiative.
- Complete department-wide employee communication plan and implement it in conjunction with Component internal communicators.

PPA: OFFICE OF LEGISLATIVE AFFAIRS

	Perm Pos	FTE	Amount
2010 Actual	29	33	\$6,744
2011 Continuing Resolution	31	31	6,797
2011 Adjustments-to-Base	0	0	(456)
2012 Current Services	31	31	6,341
2012 Program Change	0	0	0
2012 Request	31	31	6,341

OSEM requests \$6.341 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Legislative Affairs (OLA) serves as the Department of Homeland Security’s primary liaison to Capitol Hill. They advocate the policy interest of the President of the United States and the Secretary of the Department of Homeland Security (DHS) and ensure that all Components of DHS are actively engaged with Congress in their specific areas of responsibility. Similarly, OLA articulates the views of the Department and Components on Congressional legislative initiatives. OLA responds for the Department to requests and inquiries from Congressional committees, individual congressional members and their staffs. OLA also participates in the Senate confirmation process for all Presidential Nominees to the Department.

FY 2010 Accomplishments

- Developed and coordinated materials for the increasing number of hearings DHS witnesses are required to attend.
- Prepared an increasing number of witnesses for oral testimonies.

FY 2011 Planned Accomplishments

- Increase pro-active outreach with congressional committees of jurisdiction and their Members of DHS.
- Continue to promote priorities to Capitol Hill and work with Congress when legislation is needed to meet the Department’s mission.
- Increase transparency and openness with Capitol Hill regarding the activities of all programs at headquarters and Components.

FY 2012 Planned Accomplishments

- Facilitate productive engagement with Congress to ensure that the Office of Legislative Affairs represents all programs at headquarters and Components.
- Facilitate Congressional oversight and continue to promote department priorities with Congress when legislation is needed to meet the Department’s mission.
- Communicate the priorities of the Secretary to Congress.

PPA: OFFICE OF THE GENERAL COUNSEL

	Perm Pos	FTE	Amount
2010 Actual	140	124	\$23,699
2011 Continuing Resolution	86	86	24,028
2011 Adjustments-to-Base	24	24	(1,606)
2012 Current Services	110	110	22,422
2012 Program Change	0	0	0
2012 Request	110	110	22,422

OSEM requests \$22.422 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of the General Counsel (OGC) is responsible for all legal activities within the Department. In providing legal services, OGC facilitates full execution of the actions necessary for the Department to accomplish its mission and meet its statutory responsibilities. OGC provides legal counsel for all DHS offices (except those specifically excluded by statute). OGC legal services cover several legal areas such as the law of national security, immigration, transportation security, maritime security, cyber security, criminal and administrative law enforcement, appropriations, and the regulation of infrastructure security.

FY 2010 Accomplishments

- Communicated a clear strategic vision for OGC; promoted integration of the legal department into “One DHS” with a common set of core priorities and processes; and recruited, developed, and retained outstanding legal talent at all levels of the organization.
- Provided legal support to the Secretary and others as the Administration and Congress developed and considered immigration reform legislation.
- Continued to develop and improve relations with the GAO to address in a timely manner the oversight and other needs of the Congress.
- Provided aggressive legal support for cyber security operations and initiatives, including continuing to enhance legal staff capable of advising on complex cyber law matters.
- Developed agile structure for coordination of legal advice during the response to significant incidents implicating homeland security concerns.
- Provided legal advice relating to the Department’s review of the use of contractors and the maintenance of a federal workforce to perform inherently governmental functions.
- Built management and support infrastructure for legal offices in order to enhance efficiency and coordination.
- Worked closely with the Department of Justice in reviewing and preparing for potential litigation challenging the constitutionality of the recently enacted Arizona immigration law.

FY 2011 Planned Accomplishments

- Implement E-discovery system and protocols, including necessary equipment and system upgrades, to improve the Department's process for managing the production of E-discovery as required under applicable rules of civil and criminal procedures.
- Develop and implement an internal, electronic, web-based regulatory tracking system to better monitor the progress and timing of Departmental regulatory actions, facilitating real-time updates on the status of Departmental regulatory actions, and more efficiently identify obstacles to the timely promulgation of DHS regulations.
- Draft and review legislative proposals for comprehensive immigration reform that will ensure it is consistent with the President's goals for immigration reform.
- Continue to review issues related to the detainees at the Guantanamo Naval Station, which include: providing regular legal advice to principals, reviewing detainee cases for potential transfer, on-going litigation, and ensuring DHS issues are represented in the decision-making process.
- Continue to devote efforts to responding to GAO and OIG requests in a timely fashion.

FY 2012 Planned Accomplishments

- Continue to develop a Departmental E-discovery system; so that the Department can adequately respond to the requirement to locate, secure, and search with the intent of using information as evidence in a civil or criminal legal case.
- Implement an electronic system to manage the filing of yearly financial disclosure forms required under federal ethics requirements.

PPA: OFFICE FOR CIVIL RIGHTS AND CIVIL LIBERTIES

	Perm Pos	FTE	Amount
2010 Actual	79	77	\$20,689

2012 Program Change	8	4	1,071
2012 Request	114	110	24,613

OSEM requests \$24.613 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office for Civil Rights and Civil Liberties (CRCL): provides DHS with advice for the full range of civil rights and civil liberties issues; investigates complaints by the public about civil rights and civil liberties violations and offers recommendations to solve problems uncovered by those investigations. CRCL provides training and technical assistance to DHS personnel, and State, Local, tribal, and territorial partners; and conducts outreach and engagement with communities whose civil rights and civil liberties are affected by DHS activities. The Office acts as the DHS designated single point of contact for human rights treaties and complaints. CRCL also performs an operational role through its Incident Community Coordination Teams, which facilitate U.S. government-wide communication to community leaders after a security or other incident. CRCL makes available to the public information on the responsibilities and functions of and how to contact the Officer for Civil Rights and Civil Liberties, including how to file civil rights and civil liberties complaints. It conducts administrative adjudication of disability discrimination claims under Section 504 of the Rehabilitation Act of 1973. CRCL leads the Department’s Equal Employment Opportunity (EEO) and diversity programs and is responsible for DHS-wide policies, training, and complaint adjudication processes to promote EEO and diversity for all employees and applicants.

FY 2010 Accomplishments

- Undertook a comprehensive review of its system for handling complaints from the public, improved coordination methods with DHS Components, disseminated a new public complaints form, revamped communications with complainants, and implemented a new database.
- Initiated a Department-wide project to translate urgently needed DHS documents into a variety of foreign languages.
- Developed a plan to eliminate the backlog and improve future adjudication of EEO complaints, and prioritized adjudication of the oldest EEO complaints.
- Led DHS’s regular community engagement with leaders from the American Arab, Muslim, Sikh, South Asian, Middle Eastern, and Somali communities and non-profit organizations across the country, by hosting multiple roundtables.
- Reviewed hundreds of intelligence products, greatly improving awareness of and focus on civil rights and civil liberties issues arising in the context of I&A products.

- Partnered with USCIS and the DOJ on an Interagency Task Force on Verification Monitoring and Compliance to improve monitoring of employer abuse within the E-Verify program.
- Partnered with the ICE Office of Detention Policy and Planning to host two major Non-governmental Organization (NGO) and expert roundtables on (1) making civil detention more civil and (2) mental health care in immigration detention. Over 30 NGOs and experts participated in each of these events.
- Partnered with Department of State, I&A, and the Office of Privacy to support and continue to provide on-site, day-long rights and liberties training to the State and Local Fusion Center (SLFC) staff and liaison officers in multiple states around the country, building a cadre of officers at the state level to conduct training on these issues.

FY 2011 Planned Accomplishments

- Develop a range of new civil rights training modules to be integrated into existing DHS courses or offered as standalone training across DHS Components.
- Refine and scale training efforts relating to Countering Violent Extremism (CVE).
- Finalize and begin to implement a strategic outreach plan for Somali American communities, and will expand its community engagement program.
- Partner with FEMA to support its “whole of community” efforts, including working to ensure that eligible individuals with limited English proficiency have meaningful access to FEMA’s disaster related activities and services.
- Bolster civil rights protections relating to ICE’s partnerships with local law enforcement, for example in the Secure Communities program and under Section 287(g).
- Institutionalize the process for conducting Civil Rights and Civil Liberties impact assessments by developing governance procedures and enhancing oversight, and will continue to complete mandated and discretionary impact assessments on DHS programs and policies.
- Develop and implement precise measurement tools to enable deeper and more sophisticated analyses for identifying indicators and barriers to equal employment opportunity.
- Improve EEO complaint processing across DHS, through regular evaluations of the EEO process and by benchmarking the best practices among DHS Components.
- Eliminate the backlog of EEO complaints awaiting final agency decisions.
- Headquarters EEO program will mature the processes by which it handles specific EEO issues, especially regarding reasonable accommodations and harassment.
- Conduct civil rights and civil liberties assessments on DHS’s State and Local Fusion Center program, Future Attributes Screening Technology (FAST), and 2009 Directives concerning searches of electronic devices at the U.S. border.

FY 2012 Planned Accomplishments

- Improve civil rights oversight of state and local immigration enforcement under the 287(g) and Secure Communities programs. CRCL will provide policy advice, investigations, and training relating to ICE’s 287(g) and Secure Communities programs. Further, CRCL will participate in Immigration and Customs Enforcement’s (ICE) advisory committee, improve site audits of

287(g) programs, conduct sole and joint investigations, improve data-based and statistical oversight, review policies and procedures to ensure respect for civil rights and civil liberties, and provide training.

- Meet ongoing and increased training demands for civil and human rights and civil liberties training and institutionalize and refine the training efforts begun in 2010 and 2011.
- Partner with state and local law enforcement agencies to improve their cultural competency and community engagement capacity, by providing training and best-practices resources.
- Continue developing CRCL's community engagement program and expand its roundtables to new metropolitan areas.
- Continue to stand up an external anti-discrimination program by developing a framework for Title VI training, data collection, assurance processes, audits, and enforcement, for recipients of federal financial assistance from DHS.

PPA: CITIZENSHIP AND IMMIGRATION SERVICES OMBUDSMAN

	Perm Pos	FTE	Amount
2010 Actual	30	28	\$6,613
2011 Continuing Resolution	36	36	6,685
2011 Adjustments-to-Base	5	5	(349)
2012 Current Services	41	41	6,336
2012 Program Change	0	0	0
2012 Request	41	41	6,336

OSEM requests \$6.336 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The statutory mission of the Citizenship and Immigration Services Ombudsman (CISOMB) is to assist individuals and employers in resolving problems with United States Citizenship and Immigration Services (USCIS), identify areas in which individuals and employers have problems in dealing with USCIS, and propose changes to mitigate identified problems.

FY 2010 Accomplishments

- Assisted more than 3,000 individuals, employers, and their representatives to resolve problematic or complex cases pending with USCIS.
- Proposed administrative changes to USCIS to increase transparency, efficiency, and uniformity in a number of adjudication processes including Waivers of Inadmissibility, Emergent or Denied Refugee Applications, and Filed Labor Condition Applications (LCAs) for Certain H-1B Filings.
- Outreach and communications efforts expanded to include increasing numbers of national and community-based organizational stakeholders from diverse backgrounds. Outreach provided information about the Ombudsman’s services, and also allowed the Ombudsman to obtain insight and feedback from those who engage USCIS services on a regular basis.
- Served as an interagency liaison among various DHS Components and federal agencies charged with administering immigration law including the Department of State and the Department of Justice.
- Worked with the Federal Law Enforcement Training Center and the DHS Office for Civil Rights and Civil Liberties to develop a training module for law enforcement regarding the Violence Against Women Act (VAWA): Confidentiality and Immigration Remedies for the T and U visa categories for victims who assist with investigations, prosecution of human trafficking, and certain criminal activity.
- Initiated internal testing of expanded online services that will allow customers to electronically submit Form DHS-7001 (Case Problem Submission Worksheet) to the Ombudsman’s Office, and launched a limited pilot to customers in September, 2010.

FY 2011 Planned Accomplishments

- Assist individuals, employers, and their representatives to resolve problematic or complex cases pending with USCIS. Implement new protocols internally and seek increased cooperation with USCIS to meet the objective of reducing response times to USCIS customers, who seek assistance from the Ombudsman.
- Plan outreach to emerging immigrant communities in historically non-traditional regions by establishing and hosting regular roundtables for each of the humanitarian, family, and employment based stakeholders.
- Establish the first Ombudsman Advisory Council to provide advice and recommendations to the Secretary on matters relating to the effective and efficient service delivery.
- Serve as an interagency liaison among various DHS Components and federal agencies charged with administering immigration law, including Department of State and Department of Justice. Coordinate efforts within DHS to improve awareness and administration of remedies afforded under the Violence Against Women Act and the Victims of Trafficking and Violence Protection Act of 2000.
- Expand the pilot of new online capabilities that will allow customers to electronically submit DHS Form-7001 (Case Problem Submission Worksheet) to the Ombudsman's Office.
- Announce the deployment of one regional Ombudsman Liaison in a city that aligns with one of the four USCIS regions.

FY 2012 Planned Accomplishments

- Expand outreach efforts to continue throughout FY 2012.
- Continue to make recommendations to USCIS to improve services and address systemic issues experienced by individuals and employers in their dealings with USCIS.
- Continue implementation of the expanded online capabilities that will allow customers to electronically submit DHS Form-7001 to the Ombudsman's Office.

PPA: PRIVACY OFFICE

	Perm Pos	FTE	Amount
2010 Actual	40	37	\$8,142
2011 Continuing Resolution	36	34	7,971
2011 Adjustments-to-Base	7	9	1,000
2012 Current Services	43	43	8,971
2012 Program Change	0	0	0
2012 Request	43	43	8,971

OSEM requests \$8.971 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Privacy Office is responsible for protecting the Department’s collection, use and disclosure of Personally Identifiable Information (PII). The Office manages departmental responsibilities related to the Freedom of Information Act (FOIA) and the Privacy Act. These responsibilities include coordinating and implementing policy development and compliance government-wide for the FOIA, and Department-wide for the Privacy Act. The Office decides all appeals from denials by any Department Component of access to information under these two Acts. This Office demonstrates and encourages awareness of commitment to sound privacy policy and practice as currently accepted in the United States and internationally.

FY 2010 Accomplishments

- Reduced the FOIA request backlog by 40 percent, despite a nearly 30 percent increase in incoming requests. Coordinated the processing of approximately 160,000 requests.
- Significantly reduced the backlog of FOIA appeals, with 601 backlogged appeals remaining at the end of Fiscal Year 2010, in comparison to 2,747 appeal backlog at the end of Fiscal Year 2009 – a reduction of 78 percent.
- Completed 44 out of 72 reviews of designated fusion center privacy policies on behalf of the Program Manager-Information Sharing Environment (ISE).
- Issued a compliance and policy framework to address the privacy issues associated with the Department’s use of social media.
- Revised its *Privacy Impact Assessment Official Guidance*, which is designed to examine the various requirements of the E-Government Act and Homeland Security Act and to guide the process of completing a PIA. This seminal publication has become the model used by many other federal agencies.
- Initiated Privacy Incident Handling quarterly meetings to enhance privacy incident management, mitigation, and prevention across DHS Components.
- Reviewed nearly 1,000 Intelligence and Analysis analytical products and Homeland Intelligence Reports (HIR) and HIRs for privacy implications.
- Conducted a record number of privacy training and awareness events including:

- Classroom training of 150 headquarters staff per month;
- Conducted an annual “Boot Camp” that targeted 125 compliance professionals; and
- Traveled to 19 State and Local Fusion Centers to train 60 trainers.
- Lead a successful joint U.S.–European Union (EU) review of the Passenger Name Record (PNR) agreement.

FY 2011 Planned Accomplishments

- Complete reviews of 72 designated fusion center privacy policies on behalf of the Program Manager-Information Sharing Environment.
- Continue to provide privacy training for all DHS personnel newly assigned to fusion centers as well as state and local fusion center employees.
- Conduct a second Privacy Impact Assessment of the fusion center program.
- Conduct Privacy Compliance Reviews for the DHS-EU PNR Agreements and the Chief Privacy Officer will continue to support the Department’s PNR efforts.
- Develop a privacy training module on safeguarding Personally Identifiable Information for use throughout the Department.
- Continue to provide privacy subject matter expertise in support of the Department’s mission to engage in international information partnerships for such programs as Passenger Name Records and Preventing and Combating Serious Crime.
- Collaborate with other federal agencies and private sector organizations by identifying ways to leverage private sector identity validating mechanisms.
- Coordinate with NPPD Privacy Office and the Office of the Chief Information Security Officer to conduct a privacy review of the operation of elements of the Einstein cybersecurity program.
- Decrease DHS FOIA backlog by at least 15% while keeping up with processing the increasing volume of incoming FOIA requests.
- Host the first annual DHS-wide FOIA training workshop for Components and their staff to provide guidance on DHS-wide policies and to facilitate networking.
- Continue to improve outreach in the privacy and disclosure communities through meetings and public workshops.

FY 2012 Planned Accomplishments

- Support the Department’s National Fusion Center network through targeted training and policy guidance.
- Continue implementation of privacy policy guidance and compliance measures for DHS information sharing.
- Continue to support negotiation of international information sharing agreements including a binding agreement on privacy and law enforcement principles with the European Union.
- Continue to build the Department’s infrastructure of Component privacy officers through networking and targeted training.

- Enhance capabilities to conduct privacy compliance reviews, biennial System of Records Notices (SORN) reviews and tri-annual Privacy Impact Assessment (PIA) and Privacy Training & Awareness (PTA) reviews.

PPA: OFFICE OF COUNTERNARCOTICS ENFORCEMENT

	Perm Pos	FTE	Amount
2010 Actual	16	16	\$3,732
2011 Continuing Resolution	15	15	3,612

2012 Program Change	0	0	0
2012 Request	15	15	3,814

OSEM requests \$3.814 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Counternarcotics Enforcement (CNE) supports the Department and the national drug control program by coordinating policy and operations within DHS and between the Department and other Federal departments and agencies and between the Department and state and local agencies with respect to stopping the entry of illegal drugs into the United States. The Office ensures the adequacy of resources within the Department and recommends the appropriate financial and personnel resources necessary to help the Department better fulfill its responsibility to stop the entry of illegal drugs into the United States. CNE also works closely with intelligence and law enforcement entities within DHS and across the federal government to assist in tracking and severing connections between drugs and terrorism (known as the DTX Project). DTX activities to track and sever the connections between drug trafficking and terrorism are conducted within the Joint Terrorism Task Force (JTTF) construct.

FY 2010 Accomplishments

- Led a Department-wide effort to collect, assemble and promulgate a set of unifying principles that reflect the collective “best practices” of the Department’s counternarcotics Components.
- Established the Component Working Groups (CWGs) under the Counternarcotics Coordinating Council in order to realize a collaborative, strategic approach to the Department’s counternarcotics mission.
- Completed the U.S.-Mexico Bi-National Criminal Proceeds Study. The information garnered from this study will assist the United States Government and the Government of Mexico in dismantling and disrupting criminal organizations.
- Tracked the progress of the Components toward the accomplishment of the 34 DHS-related action items contained within the 2010 National Drug Control Strategy (NDCS).

FY 2011 Planned Accomplishments

- Facilitate and expand Drug Endangered Children (DEC) training through the Federal Law Enforcement Training Center to federal, state, local and tribal law enforcement entities.
- Coordinate, further develop, and mine the information gained from the U.S.-Mexico Bi-National Criminal Proceeds Study completed in 2010.

- Oversee a U.S.-Mexico Bi-National Southbound Arms-Trafficking Study to enhance intelligence and information related to weapons smuggling into Mexico. The information gathered will support efforts to stop narcotics-related violence in Mexico and potential spillover violence into the United States.
- Continue to improve the coordination of counternarcotics efforts among DHS Components. The Counternarcotics Coordinating Council (CCC) will be used to identify and address areas in which greater cooperation among DHS Components can improve the Department's support to national drug control programs and objectives.

FY 2012 Planned Accomplishments

- Provide Executive Agent oversight for implementing the *2011 National Southwest Border Counternarcotics Strategy*. CNE anticipates that the Director of the Office of National Drug Control Policy will request CNE to co-lead the interagency's efforts to complete and execute an Implementation Plan for the *2011 National Southwest Border Counternarcotics Strategy*.
- Continue working within DHS and with the Department's interagency law enforcement and intelligence partners to improve collaboration, information exchange, and knowledge sharing in order to enhance United States Government efforts to track and sever the connections between illegal drug trafficking and terrorism.
- Continue to improve the coordination of counternarcotics efforts among DHS Components. The Counternarcotics Coordinating Council (CCC) will be used to identify and address areas in which greater cooperation among DHS Components can improve the Department's support to national drug control programs and objectives. This coordination will ensure all Components are able to communicate their counternarcotics plans and priorities to senior Departmental leadership ensuring the efficacy of efforts among the DHS counternarcotics enterprise.

Adjustments-to-Base for OSEM**(\$6,356)**Strategic Goal(s) & Objectives: 5.1**Annualization of Prior Year Funding.....\$3, 233**

PPA Breakdown - Annualization of Prior Year Funding	FTE	Total (\$000)
Civil Rights and Civil Liberties	0	2,549
Office of Privacy	2	684
	2	\$3,233

Certain projects and programs for which resources were first provided in FY 2010 were funded for only part of the year. Additional funding and full-time equivalents (FTE) are required to provide full year resources.

Working Capital Fund\$3,031

PPA Breakdown – Working Capital Fund	Total (\$000)

The decrease of \$0.487 million represents cost attributed to 1.4% non-pay inflation.

Nonrecurring Initiative (\$8,878)

PPA Breakdown – Nonrecurring Initiative	Total (\$000)
Office of Policy	(7,511)
Office of the General Counsel	(1,367)
	(\$8,878)

The Office of Policy will non-recur the Intermodal Security Coordination Office in FY 2012 due to duplicative functions in other agencies and non-recur costs related to money spent on contracts in support of the Quadrennial Homeland Security Review.

The Office of General Counsel will non-recur costs related to money spent on unfulfilled interagency agreements for salaries and benefits for reimbursable attorneys and honors fellows.

Efficiency Review Savings..... (\$152)

PPA Breakdown – Efficiency Review Offset	Total (\$000)
Immediate Office of the Secretary	(5)
Immediate Office of the Deputy Secretary	(2)
Office of the Chief of Staff	(4)
Office of the Executive Secretary	(9)
Office of Intergovernmental Affairs	(4)
Office of Policy	(46)
Office of Public Affairs	(7)
Office of Legislative Affairs	(7)
Office of the General Counsel	(24)
Office for Civil Rights and Civil Liberties	(24)
Citizenship and Immigration Services Ombudsman	(7)
Privacy Office	(9)
Office of Counternarcotics Enforcement	(4)
	(\$152)

The decrease of \$0.152 million represents cost savings attributed to the Secretary’s Efficiency Review Initiative.

Program Support Adjustment..... (\$2,350)

PPA Breakdown – Program Support Reduction	Total (\$000)
Immediate Office of the Secretary	(37)
Immediate Office of the Deputy Secretary	(11)
Office of the Chief of Staff	(13)
Office of the Executive Secretary	(16)
Office of Intergovernmental Affairs	(15)
Office of Policy	(230)
Office of Public Affairs	(13)
Office of Legislative Affairs	(370)
Office of the General Counsel	(937)
Office for Civil Rights and Civil Liberties	(45)
Citizenship and Immigration Services Ombudsman	(596)
Privacy Office	(19)
Office of Counternarcotics Enforcement	(48)
	(\$2,350)

The decrease of \$2.350 million represents a program support adjustment. It is an adjustment to the following types of activities: advisory and assistance services and other contract services.

Administrative Savings Initiative..... (\$1,727)

PPA Breakdown – Administrative Savings Initiative	Total (\$000)
Immediate Office of the Secretary	(20)
Immediate Office of the Deputy Secretary	(20)
Office of the Chief of Staff	(35)
Office of the Executive Secretary	(98)
Office of Intergovernmental Affairs	(86)
Office of Policy	(577)
Office of Public Affairs	(85)
Office of Legislative Affairs	(64)
Office of the General Counsel	(33)
Office for Civil Rights and Civil Liberties	(487)
Citizenship and Immigration Services Ombudsman	(78)
Privacy Office	(105)
Office of Counternarcotics Enforcement	(39)
	(\$1,727)

The decrease of \$1.727 million represents cost savings attributed to the Administrative Savings Initiative (ASI) decreasing overall administrative expenses. The following types of activities are affected: advisory and assistance services; travel of people and things; printing and reproduction; and supplies.

IV. Program Justification of Changes

**Department of Homeland Security
Departmental Management and Operations
Office of the Secretary for Executive Management
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: CRCL Title VI Enforcement

Strategic Goal(s) & Objective(s):

Mission 2: Securing and Managing Our Borders.

Program Increase: Positions 3 FTE 2 Dollars \$0.377M

	FY 2010 Actuals			FY 2011 Continuing Resolution			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-				106	106	23,542
Program Increase							3	2	377
Budget Request	79	77	20,688	100	100	21,104	109	107.5	23,919

Description of Item

The Office for Civil Rights and Civil Liberties (CRCL) requests 2 FTE, 3 Positions and \$0.377 million for FY 2012. The program increase will allow CRCL to begin a DHS-wide Title VI program, which is necessary to comply with federal law and Executive Orders. A Department-level Title VI program to ensure and coordinate Title VI compliance activities across the Department and also to comply with the requirements of Executive Order 12250, which instructs federal departments and agencies that administer Federal financial assistance to make reports to and otherwise coordinate with the Department of Justice (DOJ).

Justification

The Department of Homeland Security has yet to establish a department-level Title VI program to ensure that its recipients of federal financial assistance do not discriminate on the basis of race, color, or national origin in the services or programs they provide. This mandate to federal agencies is set forth in Title VI of the Civil Rights Act of 1964 (Title VI) and related Executive Orders (including but not limited to Executive Order 13166, on *Improving Access to Services for Persons with Limited English Proficiency*) to prevent racial and related discrimination by recipients of DHS funding or other financial assistance. Although the FEMA, the largest DHS granting agency, has a small program in place to implement Title VI, this program is limited to FEMA's grants. As of yet, no such program exists for non-FEMA grant-making and other financial assistance from DHS.

CRCL is the office within DHS with the authority to oversee and manage a Department-wide Title VI program, under 6 U.S.C. § 345 and 42 U.S.C. § 2000ee-1, DHS Delegation No. 3095, and DHS Management Directive 3500. However, CRCL has not had the sufficient level of resources to appropriately exercise this authority.

At this time, CRCL has two employees who will on-board in the next several months to work on Title VI enforcement. New staff will assess Department-wide needs and collect information from each Component on current federal financial assistance programs and related processes; including any under Title VI, begin the process of moving from interim to final Title VI regulations, and begin to do training and compliance work.

The three positions requested for FY 2012 will allow CRCL to coordinate Title VI compliance activities across the Department and to ensure that DHS complies with reporting under Executive Order 12250, including biannual requests for information about complaints, pre- and post-award reviews, training and other measures. In addition, CRCL could over time begin other compliance activities such as a self-certification and desk audit program, which are a mainstay of established Title VI compliance activities across the Federal government.

Impacts on Performance

DHS' missions of *Ensuring Resilience to Disasters* and *Preventing Terrorism and Enhancing Security* can o be accomplished if DHS recipients comply with the non-discrimination prohibition of Title VI. Such compliance helps ensure that specific populations that have been historically underserved receive equal access to the programs and services supported by DHS.

This new program provides proper enforcement of Title VI. With the approval of funding for additional staff, CRCL will be able to begin a much-needed Department-wide Title VI program as mandated by statute and interim regulations. Recipients of the Department's \$14-\$15 billion dollar annual grant funding stream will be held accountable to Title VI as this program begins compliance work.

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Secretary for Executive Management
 Justification of Program Changes**
 (Dollars in Thousands)

Program Increase 2: CRCL 287 (g) and Secure Communities

Strategic Goal(s) & Objective(s):

Mission 3: Enforcing and Administering Our Immigration Laws

Program Increase: Positions 5 FTE 3 Dollars \$0.694M

	FY 2010 Actuals			FY 2011 Continuing Resolution			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-				106	106	23,542
Program Increase							5	3	694
Budget Request	79	77	20,688	100	100	21,104	111	108.5	24,236

Description of Item

The Office for Civil Rights and Civil Liberties (CRCL) requests 3 FTE, 5 Positions and \$0.694 million for FY 2012. The program increase will allow CRCL to provide policy advice, investigations, and training relating to ICE's 287(g) and Secure Communities programs. CRCL will participate in Immigration and Customs Enforcement's (ICE) advisory committee, improve ICE's site audits of 287(g) programs, conduct sole and joint investigations, improve data-based and statistical oversight, review policies and procedures to ensure respect for civil rights and civil liberties, and provide training. ICE's 287(g) and Secure Communities programs directly touch upon the civil rights and civil liberties of many thousands of people who are arrested or otherwise touched by local law enforcement, and include complex issues such as potential race-based policing, violations of the Fourth and Fifth Amendments to the Constitution, support to victims of crimes who are entitled to protection under the Immigration and Nationality Act, and compliance with international human rights treaties.

Justification

By 2013, the Department of Homeland Security (DHS) has set as a major priority 100% participation by state and local law enforcement agencies in the Secure Communities program, which automates biometric detection of known immigration offenders among those arrested. DHS has also continued to expand the 287(g) program, under which a joint Memorandum of Agreement delegates local law enforcement agencies certain enforcement authority under the Immigration and Nationality Act. CRCL is statutorily responsible to provide civil rights oversight for these two programs, but as the programs have rapidly expanded across the country, CRCL has not been able to adequately staff that oversight. In particular, CRCL has yet to establish a robust ability to investigate broad civil rights complaints against such programs, to work with 287(g) programs on systematic reporting and other compliance with Title VI of the Civil Rights Act of 1964 (which bans race and national origin discrimination), to establish Department-level Security Communities program training to assist

compliance with civil rights requirements while identifying, detaining and processing immigration offenders, or to engage with affected communities to educate them about the program, to lessen common misperceptions that may lead vulnerable community members not seeking law enforcement assistance, to identify complaint procedures, and to inform policy work to ensure respect for civil rights and civil liberties.

Current staff and an expert consultant are conducting statistical analysis of 287(g) and Secure Communities, and providing assistance to ICE on its 287(g) Office of Professional Responsibility (OPR) audit process. With the additional 2.5 FTE requested for FY2012, CRCL will hire 5 employees: (1) GS-14 Training Specialist, (1) GS-15 Statistician, (2) GS-14 Investigators and (1) GS-14 Policy Advisor. The additional staff will conduct pattern-or-practice type investigations, augment training (both live and web-based) provided to state and local law enforcement personnel that participate in the programs (and their supervisors), conduct sophisticated special and routine statistical analysis, provide civil rights and civil liberties policy advice, and engage with affected communities.

CRCL will also be able to increase collaboration efforts with both ICE and the U.S. Department of Justice (DOJ). ICE collaboration will include assistance in program development and evolution of policies, procedures, and activities to ensure appropriate protection for civil rights and civil liberties, to assist ICE's Office of Professional Responsibility (OPR) in its audits of 287(g) jurisdictions both through on-site participation and recommendations for better incorporating civil rights and civil liberties issues into its standardized audit procedures, and to provide civil rights and civil liberties training to ICE OPR auditors and to ICE 287(g) program managers. Equally important is further collaboration.

With ICE's Law Enforcement Support Center (LESC) to better survey and monitor the exercise of immigration authority by state and local law enforcement.

Further collaborative efforts with DOJ includes providing expert program assistance to DOJ attorneys and investigators on the relationship between state and local law enforcement of immigration law and potential civil rights and civil liberties violations, which will have an impact on the programs in particular communities (received through CRCL's engagement with affected communities), and on the responsibility of state and local law enforcement participating in the programs to comply with federal civil rights statutes and mandates.

Impact on Performance

The performance of this program will directly support DHS's mission of *Enforcing and Administering Our Immigration Laws*, which is enhanced by the 287(g) and Secure Communities programs. But it is crucial that these major programs proceed with sufficient regard for – and support, training, oversight related to – civil rights requirements. Approval of the request for additional FTE will allow CRCL to provide policy advice, investigations, and training relating to ICE's 287(g) and Secure Communities programs.

PPA Mission Statement

The Office of the Secretary provides central leadership, management and direction for the entire Department of Homeland Security. This Office provides oversight for all offices within the Departmental Operations function as well as all other entities of the Department. It is the Secretary's role to serve as the top representative of Homeland Security to the President, Congress and the general public.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Salaries and Benefits	\$1,572	\$1,904	\$1,904	---

Salaries and Benefits fund for compensation directly related to duties performed for the Executive Leadership and Direction by Federal civilian employees. The FY 2012 request includes funding for benefits and other mandatory personnel entitlements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Travel	\$2,170	\$2,000	\$2,012	\$12

Requested funds cover the travel costs of Executive Leadership and Direction's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2012 request includes an increase of \$32,000 for 1.4% non-pay inflation and a decrease \$20,000 for the Administrative Savings Initiative.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
GSA rent	\$335	\$377	\$377	---

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Communication, Utilities, and miscellaneous charges	\$9	\$151	\$153	\$2

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2012 request is \$153,000 to meet resource requirements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Printing	\$13	\$16	\$16	---

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Other Services	\$311	\$31	\$26	(\$5)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request reflects a decrease of \$5,000 due to an efficiency review reduction.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Purchase from Government Accounts	\$474	\$534	\$627	\$93

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and other government agencies including interagency service requirements. The FY 2012 request includes an increase of \$2,000 for 1.4% non-pay inflation, a \$128,000 increase for WCF assessment adjustment, and a program support reduction of \$37,000 to offset non-pay inflation.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Medical Care	\$1	\$1	\$1	---

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, DHS Shared Services assessment for the Federal Occupational Health Clinic is reflected in this object class.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Supplies & materials	\$70	\$44	\$45	\$1

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request is \$45,000 to meet resource requirements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Equipment	\$9	\$3	\$3	---

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

PPA Mission Statement

The Office of the Deputy Secretary directly supports the Office of the Secretary by providing leadership to the Department. This focuses on internal management and direction, which ensures that the Department will continue to operate efficiently and effectively in carrying out its mission. It is the Deputy Secretary's role to provide internal oversight to all Departmental Operations, which allows the Secretary to focus more on external matters concerning DHS.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Salaries and Benefits	\$869	\$728	\$728	---

Salaries and Benefits fund for compensation directly related to duties performed for the Executive Leadership and Direction by Federal civilian employees. The FY 2012 request includes funding for benefits, and other mandatory personnel entitlements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Travel	\$757	\$697	\$677	(\$20)

Requested funds cover the travel costs of Executive Leadership and Direction's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2012 request reflects a decrease of \$20,000 due to an Administrative Savings Initiative submitted by the Secretary.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
GSA rent	\$114	\$122	\$252	\$130

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request is \$252,000 due to an increase in occupancy agreements.

	2010	2011	2012	2011 to 2012

PPA Mission Statement

The Office of the Chief of Staff promotes the coordination of the agencies and directorates that have been consolidated into the Department of Homeland Security. The Office of the Chief of Staff is responsible for all operational functions that relate to the Immediate Office of the Secretary (budget, information technology, and personnel), and coordinates activities with the Department Headquarters continuity of operations. With the inherent challenges of a concurrent creation of a new Department, reorganization, consolidation, and several new offices, the Office of the Chief of Staff seeks to streamline, coordinate, and deliver highly effective initiatives and policies that will ensure our safety, response capacity, and our freedoms.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Salaries and Benefits	\$1,747	\$1,525	\$1,525	---

Salaries and Benefits fund for compensation directly related to duties performed for the Executive Leadership and Direction by Federal civilian employees. The FY 2012 request includes funding for benefits, and other mandatory personnel entitlements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Travel	\$299	\$380	\$351	(\$29)

Requested funds cover the travel costs of Executive Leadership and Direction's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2012 request includes an increase of \$6,000 due to 1.4% non-pay inflation and a decrease of \$35,000 due to the Administrative Savings Initiative.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
GSA rent	\$74	\$80	\$326	\$246

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request is \$326,000 due to increase in occupancy agreements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Printing	\$2	\$11	\$11	---

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Advisory and Assistance Services	\$0	\$128	\$130	\$2

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request includes \$2,000 due to 1.4% non-pay inflation which is offset by a \$13,000 reduction in Purchases from Government Accounts due to the Program Support Reduction.

	2010 Actuals	2011 Continuing Resolution	2012 Request	2011 to 2012 Change
Other Services	\$22	\$38	\$35	(\$3)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request includes \$1,000 for 1.4% non-pay inflation and a decrease of \$4,000 due to an efficiency review reduction.

	2010 Actuals	2011 Continuing Resolution	2012 Request	2011 to 2012 Change
Purchase from Government Accounts	\$269	\$377	\$365	(\$12)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and other government agencies including interagency service requirements. The FY 2012 request includes an increase of \$1,000 for 1.4% non-pay inflation and a decrease of \$13,000 due to a program support reduction.

	2010 Actuals	2011 Continuing Resolution	2012 Request	2011 to 2012 Change
Medical Care	\$2	\$2	\$3	\$1

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, DHS Shared Services assessment for the Federal Occupational Health Clinic is reflected in this object class. The FY 2012 request includes 1.4% non-pay inflation which is offset by a \$13,000 reduction in Purchases from Government Accounts due to Program Support Reduction.

	2010 Actuals	2011 Continuing Resolution	2012 Request	2011 to 2012 Change
Supplies & materials	\$28	\$49	\$50	\$1

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request is \$50,000 to meet resource requirements.

	2010 Actuals	2011 Continuing Resolution	2012 Request	2011 to 2012 Change
Equipment	\$4	\$5	\$6	\$1

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2012 request is \$6,000 to meet resource requirements.

PPA Mission Statement

The mission of the Office of Intergovernmental Affairs (IGA) is to act as an advocate for the State, local, tribal and territorial officials within DHS and to operate as the primary liaison between those officials and the Secretary and senior DHS leadership. IGA facilitates an integrated national approach to homeland security across a broad spectrum of issues confronting DHS by ensuring, coordinating, and advancing Federal interaction with State, local, tribal, and territorial governments.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Salaries and Benefits	\$1,637	\$1,852	\$1,852	---

Salaries and Benefits fund for compensation directly related to duties performed for the Executive Leadership and Direction by Federal civilian employees. The FY 2012 request includes funding for pay, benefits, and other mandatory personnel entitlements.

PPA Mission Statement

The Office of Policy is the primary coordinator of Department-wide policies, programs, and planning, which ensures consistency and integration of missions throughout the entire Department. It provides the Department with a central office to develop and communicate policies across multiple components of the homeland security network and it strengthens the Department's ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities. A central DHS policy office that bridges multiple, headquarter components and operating agencies improves communication among DHS entities, eliminate duplication of effort, and translate policies into timely action. It also creates a single point of contact for internal and external stakeholders that will allow for streamlined policy management across the Department.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Salaries and Benefits	\$26,390	\$28,252	\$28,252	---

Salaries and Benefits fund for compensation directly related to duties performed for the Office of Policy by Federal civilian employees.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Travel	\$1,354	\$1,494	\$1,494	---

Requested funds cover the travel costs of the Office of Policy's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Transportation of Things	\$52	\$91	\$71	(\$20)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of furniture and other household goods. The FY 2012 request reflects a decrease of \$20,000 for an adjustment as the result of the Efficiency Review.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
GSA rent	\$2,957	\$2,666	\$2,467	(\$199)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request reflects an adjustment of \$199,000 due to a WCF adjustment to properly reflect a decrease in occupancy agreements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Other Rent	\$0	\$26	\$26	---

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Communication, Utilities, and miscellaneous charges	\$0	\$74	\$48	(\$26)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2012 request reflects a decrease of \$26,000 for an adjustment as a result of the Efficiency Review .

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Printing	\$35	\$105	\$105	---

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Advisory and Assistance Services	\$2,615	\$6,053	\$1,879	(\$4,174)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request includes termination of one-time costs of \$4,061,000 and a decrease of \$113,000 as a result of the Administrative Savings Initiative to reduce overall administrative expenses.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Other Services	\$1,207	\$1,571	\$69	(\$1,502)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request includes a \$1,038,000 decrease for termination of one-time costs related to money spent on contracts in support of the Quadrennial Homeland Security Review and also taken to non-recur the Intermodal Security Initiative. Additionally the decrease includes \$464,000 taken for an adjustment as a result of reductions to professional services contract savings.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Purchase from Government Accounts	\$13,755	\$10,306	\$7,086	(\$3,220)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and, and other government agencies including intra-agency service requirements. The FY 2012 request includes a decrease of \$1,007,000 for WCF reductions in NCR Infrastructure and Data Center Services from Department of Justice and a \$2,412,000 decrease for termination of one-time costs related to money spent on contracts in support of the Quadrennial Homeland Security Review and also taken to non-recur the Intermodal Security Initiative.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Operation & maintenance of facilities	\$88	---	---	---

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Medical Care	\$20	---	---	---

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, DHS Shared Services assessment for the Federal Occupational Health Clinic is reflected in this object class.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Operation & Maintenance of equipment	\$2,000	\$16	\$16	---

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Supplies & materials	\$172	\$342	\$342	---

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Equipment	\$363	\$568	\$568	---

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

PPA Mission Statement

The Assistant Secretary for Public Affairs oversees all external and internal communications for Homeland Security. On a daily basis, the Office of Public Affairs (OPA) responds to national media inquiries, maintains and updates the Department's web site, and coordinates speaking events for Department officials across the country. OPA also develops and manages various public education programs. The Office of Public Liaison, within OPA, fosters strategic communication with the Department's external stakeholders. The Department's organizational identity, including the Homeland Security seal and wordmark, was designed and implemented by the Office of Public Affairs. OPA directs the Department's Incident Communications program that guides overall Federal incident communication activity and coordinates with state, local, and international partners to ensure accuracy and timely information to the public during a crisis.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Salaries and Benefits	\$3,730	\$3,886	\$3,886	---

Salaries and Benefits fund for compensation directly related to duties performed for OPA by Federal civilian employees.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Travel	\$83	\$200	\$163	(\$37)

Requested funds cover the travel costs of OPA's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2012 request includes an increase of \$3,000 for non-pay inflation of 1.4%, a decrease of \$7,000 due to an efficiency review, and a decrease of \$33,000 as a result of the Administrative Savings Initiative.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
GSA rent	\$0	\$648	\$679	\$31

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request is \$679,000 due to an increase in occupancy agreements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Printing	\$0	\$3	\$3	---

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Advisory and Assistance Services	\$344	\$28	\$28	---

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Purchase from Government Accounts	\$1,773	\$1,191	\$1,625	\$434

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF and DHS Shared Services. The FY 2012 request includes an increase of \$10,000 for non-pay inflation of 1.4%, an increase of \$489,000 for a WCF assessment adjustment, a decrease of \$13,000 for a program support reduction to offset the non-pay inflation, a decrease of \$32,000 as a result of the Administrative Savings Initiative, and a decrease of \$20,000 for the ASI in Professional Services Contracts.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Medical Care	\$4	\$5	\$5	---

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Supplies & materials	\$40	\$10	\$10	---

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Equipment	\$0	\$20	\$20	---

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

PPA Mission Statement

The mission of the Office for Civil Rights and Civil Liberties (CRCL) is to protect civil rights and civil liberties, to support DHS by providing policy advice on the full range of civil rights and civil liberties issues, and to serve as an information and communication channel with the public regarding all aspects of these issues. Section 705 of the Homeland Security Act provides that the Officer for Civil Rights and Civil Liberties shall: Review and assess information alleging abuses of civil rights, civil liberties, and racial and ethnic profiling by employees and officials of the Department; and make public through the internet, radio, television, or newspaper advertisements information on the responsibility and function of, and how to contact, the Officer. Submit to the President of the Senate, the Speaker of the House of Representatives, and the appropriate committees and subcommittees of Congress through the Secretary on an annual basis a report on the implementation of this section, including the use of funds appropriated to carry out this section, and allegations of abuses described under subsection (a)(1) and any actions taken by the Department in response to such allegations.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Salaries and Benefits	\$11,452	\$14,087	\$18,402	\$4,315

Salaries and Benefits fund for compensation directly related to duties performed for the Office for Civil Rights and Civil Liberties by Federal civilian employees. The FY 2012 request includes an increase of \$2,549,000 as a result of prior year part year funding and \$695,000 reallocated from other services to cover salaries and benefits for contractor conversions. It also includes an enhancement request of \$1,071,000 to fund 1.5 FTE for Title VI enforcement and 2.5FTE for 287 (g) and Secure Communities.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Travel	\$366	\$271	\$275	\$4

Requested funds cover the travel costs of CRCL's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2012 request includes a non pay inflation rate of 1.4% which has a corresponding offsetting reduction of \$4,000 taken in advisory and assistance services as a program support reduction.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
GSA rent	\$1,829	\$2,052	\$2,268	\$216

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request reflects an adjustment of \$216,000 for a WCF adjustment due to an increase in occupancy agreements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Communication, Utilities, and miscellaneous charges	\$5	\$5	\$5	---

Communications, utilities and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals and utility services.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Printing	\$27	\$37	\$28	(\$9)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2012 request reflects a decrease of \$9,000 for an efficiency review reduction.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Advisory and Assistance Services	\$704	\$494	\$457	(\$37)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request includes an increase of \$8,000 for non-pay inflation of 1.4% and a reduction of \$45,000 for program support reduction to meet fiscal guidance.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Other Services	\$2,704	\$1,359	\$199	(\$1,160)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request includes an increase of \$22,000 for 1.4% non-pay inflation, decrease of \$695,000 realigned to payroll and benefits for contractor conversion, and a decrease of \$487,000 for professional services contract savings.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Purchase from Government Accounts	\$2,733	\$2,409	\$2,583	\$174

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services. The FY 2012 request includes an increase of \$4,000 for 1.4% non-pay inflation, an increase of \$184,000 for a WCF Assessment Adjustment, and a decrease of \$14,000 due to an Efficiency Review reduction.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Supplies & materials	\$338	\$134	\$136	\$2

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2012 request is \$136,000 to meet resource requirements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Equipment	\$284	\$256	\$260	\$4

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2012 request is \$260,000 to meet resource requirements.

PPA Mission Statement

The mission of the Citizenship and Immigration Services Ombudsman (CISOMB) is to assist individuals and employers in resolving problems with the United States Citizenship and Immigration Service (USCIS). Section 452 of the Homeland Security Act of 2002 requires that CISOMB assist individuals and employers in resolving problems with the Bureau of Citizenship and Immigrations Services, identify areas in which individuals and employers have problems in dealing with USCIS, and to the extent possible, propose changes in the administrative practices of the USCIS to mitigate problems.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Salaries and Benefits	\$3,194	\$3,109	\$3,109	---

Salaries and Benefits fund for compensation directly related to duties performed for the Executive Leadership and Direction by Federal civilian employees. The FY 2012 request includes funding for pay, benefits, and other mandatory personnel entitlements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Travel	\$95	\$85	\$86	\$1

Requested funds cover the travel costs of CISOMB's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2012 request is \$86,000 to meet resource requirements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Transportation of Things	\$0	\$56	\$3	(\$53)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of furniture and other household goods associated with permanent change of station moves. The FY 2012 includes an increase of \$1,000 for 1.4% non-pay inflation and an administrative savings reduction of \$54,000.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
GSA rent	\$349	\$328	\$680	\$352

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. GSA Rent is paid centrally by Working Capital Fund. The FY 2012 request reflects an adjustment of \$352,000 due to an increase in occupancy agreements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Printing	\$12	\$47	\$38	(\$9)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2012 request reflects a decrease of \$9,000 due to a reduction for the Administrative Savings Initiative.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Advisory and Assistance Services	\$333	\$104	\$91	(\$13)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request reflects a decrease of \$13,000 due to a reduction for Professional Services Contract savings.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Other Services	\$1,061	\$1,195	\$609	(\$586)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request includes an increase of \$17,000 due to 1.4% non-pay inflation, a decrease of \$7,000 as a result of the Professional Services Contract savings submitted by the Secretary, and a program support reduction of \$596,000.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Purchase from Government Accounts	\$1,329	\$1,636	\$1,593	(\$43)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services. The FY 2012 request includes a \$13,000 increase for 1.4% no-pay inflation and a decrease of \$56,000 for a WCF assesment adjustment.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Supplies & materials	\$112	\$58	\$59	\$1

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2012 request is \$59,000 to meet resource requirements.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Equipment	\$0	\$67	\$68	\$1

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2012 request includes \$1,000 for 1.4% non-pay inflation which has a corresponding offsetting reduction of \$1,000 to meet resource requirements.

PPA Mission Statement

The Department of Homeland Security's Privacy Office protects the collection, use, and disclosure of personal and Departmental information. The Privacy Office ensures that appropriate access to information is consistent with the vision, mission, and core values of DHS, and implements the policies of the Department to defend and to protect the individual rights, liberties, and information interests of our citizens.

Through internal education outreach and the establishment of internal clearance procedures and milestones for program development, the Privacy Office is helping DHS components to consider privacy whenever developing new programs or revising existing ones. The Privacy Office is evaluating the use of new technologies to ensure that privacy protections are given primary consideration in the development and implementation of these new systems. In this process, DHS professionals have become educated about the need to consider – and the framework for considering – the privacy impact of their technology decisions.

The Chief Privacy Officer and the staff review Privacy Act system notices before they are sent forward and ensure that they collect only those records that are necessary to support DHS mission. The Privacy Office also guides DHS agencies in developing appropriate privacy policies for their programs and serves as a resource for any questions that may arise concerning privacy, information collection or disclosure.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Salaries and Benefits	\$5,072	\$5,686	\$6,370	\$684

Salaries and Benefits fund for compensation directly related to duties performed for the Office of Privacy by Federal civilian employees. The FY 2012 request includes funding for a pay raise, benefits, and other mandatory personnel entitlements and program increases. The FY 2012 request reflects an increase of \$684,000 for annualization of prior year part year funding.

	2010	2011	2012	2011 to 2012
	Actuals	Continuing Resolution	Request	Change
Travel	\$139	\$191	\$159	(\$32)

¹The Office of Intergovernmental Affairs was transferred from FEMA in FY 2010 and did incur WCF charges, however the WCF FY10 Enacted budget did not include this office.

K: DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS Component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance. Along with the statutory requirement to issue guidance to DHS Components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2013 budget.

OSEM requests 22 positions and 22 FTE for the FY 2012 DHS Balanced Workforce Strategy.

FY 2012 DHS Balanced Workforce Strategy

OSEM has identified a total of 22 contractor positions to be converted to full time federal employees in FY2012. OSEM will make the conversion at a no cost net change to the government. This change will begin during the final quarter of FY11 and all personnel will be on-board by the beginning of FY12. OSEM will bring closure to several contracts in order to make this change occur. Employees converted will continue in the same or similar positions as government employees.

BUDGET REQUEST AND SUPPORTING INFORMATION

I. Appropriation Overview

A. Mission Statement

The Management Directorate ensures delivery of effective and efficient business and management services throughout the Department, to enable the Department of Homeland Security (DHS) to lead the unified national effort to secure America.

The DHS Management Directorate provides the business framework that enables the Department of Homeland Security to achieve its mission. It does so by providing policy, guidance, operational oversight and support, and innovative solutions for the management needs of the entire Department.

B. Budget Activities

Immediate Office of the Under Secretary for Management (OUSM)

The Immediate Office of the Under Secretary for Management's primary mission is to deliver quality administrative support services providing leadership and oversight for all departmental management functions which include information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services.

Office of the Chief Administrative Officer (OCAO)

Establishes policy and procedures as well as provides both departmental leadership and oversight for all functional areas managed by the DHS Chief Administrative Officer (CAO) and Component Chief Administrative Officers. Functional areas include asset management (logistics, real estate, personal property, transportation, motor vehicle fleet, marine vessels), mail screening and delivery, occupational safety and health, environmental planning and management, historic preservation, energy management, record, directives, forms, library services, printing and graphics. In addition, OCAO also provides the day-to-day operational support for departmental headquarters and other components (National Protection and Programs Directorate, Office of Analysis and Operations (A&O), and Science and Technology Directorate).

DHS Nebraska Avenue Complex (NAC) Consolidation Project

Although the physical limitations of the NAC render it unsuitable as the permanent DHS headquarters, we plan to retain this property to house certain mission support functions that will not relocate to the new Consolidated DHS Headquarters Campus at St. Elizabeth's. Accordingly, DHS will need to continue to invest in this property to sustain our operational capabilities and use as one of the sites for DHS components that will not relocate to St. Elizabeth. The NAC investments will be leveraged as we realign the overall real estate portfolio to support DHS operations and integration in the National Capital Region.

Office of the Chief Human Capital Officer (OCHCO)

The Office of the Chief Human Capital Officer provides overall management and administration for the Department's human capital policies, programs and practices for attracting, retaining and developing the skilled workforce needed to protect and secure our Nation. The work of the OCHCO is critical to supporting and enabling the Secretary's Workforce Strategy for Fiscal Years 2011-2016, which centers around four key goals: 1) Building an effective, mission-focused, diverse and inspiring cadre of leaders; 2) Recruiting a highly qualified and diverse workforce; 3) Retaining an engaged workforce; and 4) Solidifying a unified DHS culture of mission performance, adaptability, accountability and results.

Human Resources Information Technology (HRIT)

The DHS Chief Human Capital Officer (CHCO) and Component Human Capital Executives in partnership with the Chief Information Officer (CIO) are currently redefining a long-term strategic plan for HRIT. The goal of the new strategy is to deliver an enterprise platform for a Title V environment that provides core HR functionality and data access across the DHS enterprise in a way that optimizes efficiency. An optimized solution must also address the system shortcomings and limitations of the National Finance Center's (NFC) Pay and Personnel System. While DHS currently operates four enterprise solutions, i.e., NFC Corporate (Payroll/Personnel), EmpowHR (Personnel), webTA (Time and Attendance); and the eOPF (Electronic Personnel Folders), there remains a critical need for enterprise solutions in areas such as staffing, learning management, performance management and personnel accountability for continued operation, in the event of a declared emergency.

Office of the Chief Procurement Officer (OCPO)

The Office of the Chief Procurement Officer is responsible for the overall management, administration, and oversight of department-wide procurement, acquisition program management, strategic sourcing, workforce development and competitive sourcing programs. The headquarters contracting activity, the Office of Procurement Operations (OPO), reports to the CPO and is funded through the Working Capital Fund. The Office of Selective Acquisitions (OSA), the headquarters contracting activity responsible for awarding and managing DHS's classified acquisitions, is funded through appropriated funds. While the Office of Small and Disadvantaged Business Utilization (OSDBU) officially reports to the Deputy Secretary, the funding for salaries and all management and administrative support is provided by OCPO. OCPO activities include: The Acquisition Program Management Division (APMD); the Cost Analysis Division (CAD); the Oversight and Strategic Support Division (OSS); the Policy and Acquisition Workforce (PAW); and the Office of Small and Disadvantaged Business Utilization (OSDBU).

Office of the Chief Security Officer

The mission of the Office of the Chief Security Officer (OCSO) is to secure the Department so the Department can secure the homeland. The OCSO implements security programs that safeguard DHS personnel, property, facilities, and information. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and provides security support to DHS components. The office manages operational security systems and HSPD-12 card issuance for the

Department. Additionally, the OCSO provides liaison support to the intelligence community on security matters affecting DHS and investigates security matters for DHS Headquarters.

C. Budget Request Summary

The Under Secretary for Management requests 971 positions, 941 FTE and \$249.058M for FY 2012. The total Adjustments-to-Base are 63 positions, 64 FTE and a decrease of \$21.136M to current services. The current services also include decreases resulting from the Department's efficiency review and administrative savings initiative.

III. Current Services Program Description by PPA

**Department of Homeland Security
Departmental Management and Operations
Under Secretary for Management
Program Performance Justification**
(Dollars in Thousands)

PPA: Immediate Office of the USM

	Perm. Pos	FTE	Amount
2010 Actual	15	13	2,844
2011 Continuing Resolution	15	14	2,864
2012 Adjustments-to-Base	-	1	(306)
2012 Current Services	15	15	2,558
2012 Program Change	-	-	5,000
2012 Total Request	15	15	7,558

The Immediate Office of the Under Secretary for Management (OUSM) requests 15 FTP, 15 FTE, and \$7.558M for FY 2012. This amount includes a \$5.0M enhancement to support a USM-led interagency analysis of icebreaking requirements in the polar regions.

CURRENT SERVICES PROGRAM DESCRIPTION

The Immediate Office of the Under Secretary for Management ensures the Under Secretary for Management offices function effectively and efficiently in support of the Department as a whole and the USM offices. The requested funding will allow the OUSM to manage the workload of the USM offices, respond quickly to queries from within and outside the Department, and further DHS efforts for functional integration.

PPA: Office of the Chief Administrative Officer

	Perm. Pos	FTE	Amount
2010 Actual	87	87	44,381
2011 Continuing Resolution	87	87	44,491
2012 Adjustments-to-Base	52	52	(1,243)
2012 Current Services	139	139	43,248
2012 Program Change	4	1	(2,000)
2012 Total Request	143	140	41,248

The Office of the Chief Administrative Officer requests \$41.248M for this activity, including 143 positions, 140 FTE.

CURRENT SERVICES PROGRAM DESCRIPTION

The Office of the Chief Administrative Officer's primary mission is to provide DHS-wide governance and management for administrative services. Functional areas include asset management (logistics, real estate, personal property, transportation, fleet, marine vessels), mail screening and delivery, occupational safety and health, environmental planning and management, historic preservation, energy management, record, directives, forms, library services, printing and graphics.

In addition, OCAO also provides the day to day operational support for departmental headquarters and other components (National Protection and Programs Directorate, Office of Analysis and Operations (A&O), and Science and Technology Directorate).

Significant Accomplishments in FY 2010

- Issued departmental program guidance for real property, personal property, and mobile asset programs to optimize processes while facilitating the integration and coordination between components and Headquarters.
- Implemented the department-wide real estate warrant program.
- Established the Asset Review Board to review major projects for consistency with asset and logistics management plans.
- Developed and implemented logistics training program that supported 70 employees, including Masters Degree Program for logistics management professionals.
- Led seven of the Secretary Efficiency Initiatives.
- Implemented a standard records management filing systems consistent with the Federal Enterprise Architecture.
- Consolidated four electronic library subscriptions providing cost avoidances.
- Reduced energy use by 13.6% from the 2003 baseline and purchased 4.1% of its electricity from qualified new renewable energy sources.
- Developed the first Strategic Sustainability Performance Plan to guide the department's sustainability actions.
- Exceeded Department of Labor Safety, Health and Return-to-Employment program goals for reducing employee injuries, with over 50 percent reductions in total injury and lost time injury rates.

FY 2011 Planned Accomplishments

- Implement departmental capital planning program to plan, budget and track capital costs and performance of assets in support of the DHS mission.
- Implement motor vehicle fleet lifecycle management plan for each component to improve accountability, reliability, performance, acquisition planning and cost management.
- Support implementation of Transformation and System Consolidation (TASC) asset management system.
- Increase oversight of sensitive assets by evaluating component processes and systems.
- Reduce energy consumption and increase use of renewable energy.
- Refine and update Strategic Sustainability Performance Plan, and oversee components implementation of their Operational Sustainability Performance Plans.
- Reduce DHS contribution to greenhouse gas emissions by 1%.

- Reduce DHS real property costs by \$60M.

FY 2012 Planned Accomplishments

- Reduce facility energy use by 18% from the FY 2003 baseline.
- Increase electricity from renewable sources by 5%. Continue to right-size the motor vehicle fleet, including use of hybrids and alternative fuel vehicles, matching vehicle technology to mission requirements and reducing fleet fossil fuel usage.
- Continue to verify and validate component data to accurately measure real property and sustainability performance.
- Improve controls over sensitive equipment.
- Provide leadership and manage the Headquarters Consolidation Project.
- Provide Operational support and services to Headquarters and Non-Legacy Components.

PPA: DHS HQ NAC Project

	Perm. Pos	FTE	Amount
2010 Actual	8,341
2011 Continuing Resolution	5,500
2012 Adjustments-to-Base	(102)
2012 Current Services	5,398
2012 Program Change
2012 Total Request	5,398

The DHS Headquarters Project at the Nebraska Avenue Complex (NAC) requests \$5.398 million in FY 2012.

CURRENT SERVICES PROGRAM DESCRIPTION

Although the physical limitations of the NAC render it unsuitable as the permanent DHS headquarters, we plan to retain this property to house certain mission support functions that will not relocate to the new Consolidated DHS Headquarters Campus currently at St. Elizabeths. Accordingly, DHS will need to continue to invest in this property to sustain our operational capabilities. The NAC investments will be leveraged as the overall real estate portfolio is realigned to support DHS operations and integration in the National Capital Region.

The NAC is the headquarters facility for DHS, and presence at the Complex continues to expand. The current facility at the NAC is an integral part of the Headquarters Consolidation Program. Current services investments will be leveraged for future use of the NAC to house certain mission support functions that do not relocate to St. Elizabeths.

Significant Accomplishments in FY 2010

- Completed campus-wide interior and exterior signage project.
- Completed reconfiguration for two floors of NAC 17 to increase efficiency of space utilization.
- Completed security upgrades in NAC 1 and NAC 5 for additional secure workspaces.
- Started construction of the Site Utility Upgrade Project (shared cost with GSA) to provide redundant campus electrical feeds and upgraded power supply.
- Started construction of the Perimeter Improvement Project that includes upgrade and replacement of existing perimeter fence, addition of sensors and cameras, new command and control center, new visitor intake center, vehicle crash barriers and other improvements.

FY 2011 Planned Accomplishments

- Continue work on the Perimeter Fence Improvement Project and the Site Utility Upgrade Project.
- Complete additional space reconfiguration projects at various locations to increase efficiency of space utilization.
- Start to replace and upgrade Heating, Ventilating, and Air Conditioning (HVAC) units and components to ensure mission operations, comfort of occupants and increase energy efficiency.

FY 2012 Planned Accomplishments

- Complete the Perimeter Fence Improvement Project and the Site Utility Upgrade Project.
- Complete mechanical, electrical and building upgrades, for more efficient and functional space to accommodate growth at the NAC.

PPA: Office of the Chief Human Capital Officer

	Perm. Pos	FTE	Amount
2010 Actual	108	92	25,350
2011 Continuing Resolution	108	108	25,473
2012 Adjustments-to-Base	10	10	(562)
2012 Current Services	118	118	24,911
2012 Program Change	22	12	3,250
2012 Total Request	140	130	28,161

The Office of the Chief Human Capital Officer requests \$28.161M for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of the Chief Human Capital Officer (OCHCO) provides overall management and administration of the Department’s human capital policies, programs and practices for

attracting, retaining and developing the skilled workforce needed to protect and secure our Nation.

The OCHCO is committed to supporting the Secretary's Workforce Strategy which ensures continued growth of DHS employees and the collective ability to prevent and respond to the threats facing America. Key strategies and action plans are:

Hiring Reform: Hiring reform continues to be a top priority and OCHCO is aggressively working with OPM and Components in pursuit of positive change. In alignment with the President's and OPM's hiring reform memorandums released in May 2010; DHS will train, engage and hold all hiring managers accountable for the effective and efficient hiring of talented individuals. In order to improve applicant satisfaction and attract top talent, DHS will streamline job opportunity announcements; create less burdensome application procedures; and notify applicants of their status at key points in the process. DHS will use category rating to provide managers with a larger pool of highly qualified applicants; and develop a consistent approach to collecting time-to-hire data needed to address barriers, improve hiring and enhance the applicant experience.

Balanced Workforce Strategy: Through the Balanced Workforce Strategy (BWS), OCHCO will coordinate and disseminate comprehensive guidance; develop and distribute an automated analytic survey tool; provide and oversee training for components; and assist components with the implementation and reporting requirements on workforce balance. These efforts are scheduled for FY 2011 through FY 2016.

The BWS will serve as the strategic underpinning for the DHS workforce planning model, which takes a long-term view of organizational needs and function changes as a result of evolving missions, priorities and environmental factors. In the near term, the BWS process is focused on assessing and eliminating potential over reliance on contractors, resulting in an appropriate balance of federal staff to contractors. Over time, BWS will dovetail with and be subsumed into the department's overall workforce planning model, including the identification, tracking and successful closing of competency gaps.

Leadership and Learning Development: Investing in future leaders at DHS is mission critical, and building a succession pipeline of leaders takes a commitment of time and resources. OCHCO will design and deliver comprehensive leadership and workforce training programs for all personnel throughout the Department. The programs further expand upon the development of decision-making and execution required to address the challenges, risks and complexities the Department faces on a daily basis. Ultimately, the programs will produce strong leaders who can attract, hire, retain and inspire personnel and a highly skilled workforce with the requisite competencies to advance the DHS mission, thereby contributing to employee satisfaction and morale while fostering a high-performing organization. The Department will ensure leader development is consistent to the greatest extent possible while growing future leaders and supporting the "*One DHS*".

Workforce Survey: Recruiting the right people and retaining a talented and motivated workforce is the key to accomplishing DHS's mission. One important indicator of the ability

to hire and retain the right people is the annual employee survey. Although DHS results for the 2010 Federal Employee Viewpoint Survey (FedView) were lower than government-wide averages, the results have steadily improved since 2006 when Department-led action planning began. DHS's four overarching areas of focus for improving employee satisfaction and engagement in FY 2011 and 2012, as articulated in the Federal Human Capital Survey Action Plan, include: 1) Developing Enhanced Leadership Capability; 2) Implementing Recruitment Improvements; 3) Initiating Retention Improvements; and 4) Enhancing Action Planning/Program Accountability across the Department. DHS will achieve a 60% or higher employee satisfaction rating on the Federal Employee Viewpoint Survey.

Work-life Initiatives: The Administration has emphasized work-life and employee engagement programs such as health and wellness, volunteer community service, telework, and other flexibilities to make the federal government a model employer. To that end, DHS is developing a work-life index designed to create a consistent, high level of service within work-life programs across the Department. Efforts include issuing a new directive on health and wellness and revising current directives on the employee assistance program, telework, and instituting a calendar of volunteer activities, all designed to promote work-life balance for our employees.

Pursuant to Executive Order 12564, OCHCO plans to roll out a Department-wide drug testing program. The program will involve testing employees in sensitive positions, those in positions requiring commercial driver's licenses, those in positions requiring the carrying of firearms, as well as pre-employment testing. Additionally, beginning in FY 2012, OCHCO will focus on pursuing a Department-wide contract for laboratory drug testing services.

Significant Accomplishments in FY 2010

- Finalized and submitted DHS Hiring Reform Action Plan to the Office of Personnel Management addressing seven initiatives outlined in the President's memorandum to agencies in May 2010.
- Established a Balanced Workforce Program Management Office to assess long-term organizational needs and eliminate over-reliance on contractors.
- Established the Diversity, Recruitment, and Veteran's Outreach (DRVO) Office to centralize outreach and recruitment efforts, ensuring that all segments of American society are represented in securing our Homeland.
- Established a Leader Development Program Management Office, which launched a DHS-wide Leader Development Working Group, to create a Leader Development Framework and DHS-specific competencies that reflect leadership skills with a homeland security focus.
- Established DHS Labor-Management Forum and Component-level forums in response to Executive Order 13522, includes representatives from Components, national labor unions, DHS unions, S-2 and CHCO.

FY 2011 Planned Accomplishments

- Continue to implement Hiring Reform initiatives to include providing training to hiring managers, developing valid occupational assessments, transitioning to the use of category

rating, developing systems to track time to hire, transitioning to resume-only application processes and continuing training to HR specialists on hiring reform initiatives.

- Continue the identification and closing of mission-critical competency gaps; concentrate efforts on closing competency gap for foreign language skills in DHS;
- Continue Balance Workforce Strategy efforts, collaborating with Components to develop and implement transition strategies to attain a balanced workforce.
- Develop and implement a comprehensive DHS-wide leader development program and cross-component/government-wide joint rotational opportunities to ensure consistent, core leadership development across the department.
- Establish DHS-wide leader development program, DHS Headquarters formal mentoring program, and cross-component and government-wide joint rotational opportunities to sustain institutional knowledge, enhance leadership skills, and ensure core leadership development across the department.
- Develop a comprehensive proposal for submission to the Office of Personnel Management to identify executive resource requirements for FY 2012 and FY 2013, creating a cadre of senior leaders to ensure mission success.

FY 2012 Planned Accomplishments

- Develop acquisition plan for an Automated Employee Performance Management and Appraisal tool that supplements the new 2011 Performance Management Program Policy.
- Continue Balance Workforce Strategy efforts, managing the implementation of transition strategies for attaining a balanced workforce and reporting of component Multi-sector Workforce Action Plans.
- Develop and execute a recruit and fill plan for newly allocated executive resources within DHS components; includes a recruitment strategy to ensure diversity is a major consideration in the selection process.
- Deploy a “report card” to components regarding the hiring of Veterans and persons with disabilities.

PPA: Human Resources Information Technology

	Perm. Pos	FTE	Amount
2010 Actual	2	2	16,701
2011 Continuing Resolution	25	25	17,131
2012 Adjustments-to-Base	7	7	...
2012 Current Services	32	32	16,407
2012 Program Change	2	1	279
2012 Total Request	34	33	16,686

The Human Resources Information Technology (HRIT) program requests 34 positions, 33 FTE and \$16.686M for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The strategy of HRIT is to deliver an enterprise platform for a Title V environment that provides core HR functionality and data access across the DHS enterprise in a way that optimizes efficiency. Our current enterprise environment includes ongoing support of OPM's implementation of USAJobs 3.0 as part of the President's hiring reform initiative, National Finance Center (NFC) Corporate (Payroll/Personnel), EmpowHR (Personnel), webTA (Time and Attendance), and eOPF (Electronic Personnel Folders) systems. Implementation of the new HRIT strategy will commence in FY 2011 upon completion of the Human Capital Segment Architecture Review, with full-fledged efforts in FY 2012 to move toward department-wide adoption/deployment and full, cross-system integration.

As outlined in the Office of the Inspector General's (OIG) report dated July 2010, improved management oversight and Component participation is required to complete the program mission of consolidation and modernization of HR systems. Several key challenges affect the successful execution of HRIT's mission, including: 1) Continual executive turnover at both DHS Headquarters and the Component level makes completing DHS-wide initiatives difficult; 2) Components act independently with varied systems, business processes, policies, and practices 3) Components are challenged with competing initiatives and focus on executing Component based missions; 4) Developing and reporting Performance Metrics is difficult because of a lack of insight into Component business processes, costs and systems 5) DHS HRIT program strategy uses Government Shared Services centers and Commercial-Off-The-Shelf (COTS) software packages to support enterprise requirements. While this approach has the advantages of leverage buying, it is slower to adapt to change and Component-unique requirements; and 6) HRIT governance process to-date is not in place to actively communicate to DHS components.

The Deputy Secretary has tasked the OCHCO and OCIO to "assemble an integrated project team to rationalize legacy HR processes and systems into a common, Department-wide HR architecture" by memo dated January 15, 2010. To do this, a cross-Departmental project team was established to develop a HR architecture and transition plan to guide transformation and investment toward a "One DHS" HR solution. Several key strategies and activities will support the HRIT mission.

Strategy 1: Improve Program Oversight: Enhance the DHS governance structure to include all Components.

- Continue DHS Executive Steering Committee (ESC) as the core oversight and advisory body for the program and all related projects and initiatives. The ESC is comprised of Component's CIO and CHCO executives.
- Continue an effective Change Management Strategy that includes people, processes and technology to ensure Components receive all required support before, during and after deployment of enterprise systems.
- Implement Segment Architecture Analysis initiatives, including all current processes, technology, and workflow within the HR Line of Business.

Strategy 2: Establish New Target Solution Areas: Using the OPM and DHS approved methodology for establishing Segment Architectures (Federal Segment Architecture

Methodology), develop a HQ and Component approved prioritization of areas for strategic improvements.

- Implement a transition plan based on a redefined HR architecture that guides business transformation and investment towards an end-state that optimizes core HR processes, workflow and technology.
- Produce findings, recommendations and target solutions.
- Identify opportunities to consolidate and modernize redundant, and or outdated existing systems across the enterprise.

Strategy 3: Enhance and continue deployment of existing enterprise systems.

- Continue rollout of ESC approved schedule for migration of all DHS components to the enterprise solution set.
- Continue support for USAJobs 3.0 government-wide collaboration with OPM to support Presidential hiring reform and DHS staffing automation and reporting requirements.
- Streamline the Federal hiring process; and improve the applicant experience by leveraging DHS lessons learned and requirements.

Significant Accomplishments in FY 2010

- Integration Tools and Processes: In partnership with the OCIO, began implementation of a new Enterprise Integration Environment (EIE) to provide a central mechanism for secure data interchanges and reporting between Enterprise HR applications. This improves data integrity and availability of aggregate workforce information.
- WebTA: Implemented a major release that improved functionality and created an archive database, which significantly improved overall system performance.
- EmpowHR: Implemented three new releases including functional enhancements supporting override codes, mass processing for positions and job codes; implemented history correction and reconciliation to reduce errors and manual processing; worked with NFC to create a repeatable training environment.
- Completed Data Synchronization (Reconciliation) Project, which stabilized the NFC Legacy and EmpowHR applications and significantly reduced overall errors and rework by automating the synchronization between the two systems.

FY 2011 Planned Accomplishments

- Continue existing enterprise rollouts: implement WebTA interface, a web-based, self-service reporting tool and two major releases; complete deployment of webTA to U.S. Citizenship and Immigration Services (USCIS); implement three major releases for EmpowHR to expand functionality and further automate reconciliation.
- Complete the Human Capital Segment Architecture Review, including the Business Case Analysis (BCA) for learning management systems, and develop an integrated transition plan for implementation.
- Complete build-out of the Human Capital Enterprise Integration Environment (production and development); and continue to integrate core enterprise systems.
- Complete Phase I and begin Phase II in continued support of OPM's USAJOBS 3.0 government-wide initiative to streamline and automate the hiring processes in support of Presidential hiring reforms.

- Obtain and begin initial deployment of an Enterprise-wide Personnel Accountability and Assessment System (PAAS).

FY 2012 Planned Accomplishments

- Continue existing enterprise rollouts: Complete deployment of webTA to CBP and implement two major releases enhancing interfaces by using web services; Implement EmpowHR (PeopleSoft) maintenance pack upgrades and three major releases expanding functionality; Migrate NFC servers to Denver’s secure site and test accordingly.
- Complete Phase II and begin Phase III in continued support of OPM’s USAJOBS 3.0 government-wide initiative to streamline and automate the hiring processes in support of Presidential hiring reforms.
- Legacy NFC: Participate as a pilot agency for NFC’s Payroll pilot project;
- Execute revised program baseline as a result of the Human Capital Segment Architecture Review as approved by the HRIT ESC.
- Continue deployment of enterprise-wide Personnel Accountability and Assessment System (PAAS).

PPA: Office of the Chief Procurement Officer

	Perm. Pos	FTE	Amount
2010 Actual	354	340	67,998
2011 Continuing Resolution	354	354	68,538
2012 Adjustments-to-Base	2,758
2012 Current Services	354	354	71,296
2012 Program Change	23	11	7,475
2012 Total Request	377	365	78,771

The Office of the Chief Procurement Officer (OCPO) requests \$78.771M in support of 377 positions/ 365 FTE in FY 2012.

CURRENT SERVICES PROGRAM DESCRIPTION

The OCPO establishes the acquisition regulations, policies and procedures for DHS. It oversees the Department’s acquisition programs and assists the acquisition community with implementing difficult and complex procurements to reduce risk and ensure success. OCPO is responsible for acquisition workforce planning, centralized acquisition workforce recruitment, and training. In support of this responsibility and to address the government-wide need for acquisition professionals, OCPO has implemented a centrally funded and managed Acquisition Professional Career Program (APCP) modeled after the highly successful Navy Intern Program. This program features three, single-year rotations through various components and

provides these interns with all the experience and training they need to become journeymen-level acquisition professionals.

The APCP program will reach its end strength goal of 300 participants, having successfully recruited, trained and placed 300 acquisition professionals throughout DHS, over the past three fiscal years. As these journeymen begin to gain valuable insight in to the DHS acquisition process, OCPO will continue to build on these successes as it identifies and fills additional mid-level career acquisition positions across DHS as part of the initiative to strengthen the Federal acquisition workforce. The Office of Selective Acquisitions (OSA) is OCPO's most recent addition continuing to strengthen and solidify DHS' sensitive acquisitions across the Department. The Acquisition Program Management Division (APMD) continues to provide senior oversight and guidance to the components relative to their major acquisition programs through Investment Review Boards (IRBs). APMD insures that guidance and oversight remains focused, sound and effective.

The FY 2012 budget request includes a program enhancement in the amount of \$1.7M to bolster DHS's life cycle cost estimate (LCCE's) capability across the Department employing OCPO's Cost Analysis Division (CAD). This initiative will allow the CAD to dedicate a cost analyst to each of the 8 major components for oversight and assistance; provide up to 10 Independent Cost Estimates per year (depending on program complexity); fulfill the more rigorous LCCE validation role in support of Acquisition Review Board decisions (approximately 12 to 18 in FY 2012); provide at least one dedicated cost analyst to each APCP cost analysis intern for on-the-job training and support until permanent placement at DHS program offices at the end of the 3 year training cycle.

Significant Accomplishments in FY 2010

- Grew the Acquisition Workforce through the Acquisition Career Professional Program.
- Completed major updates to the Homeland Security Acquisition Manual (HSAM) and the Homeland Security Acquisition Regulation (HSAR) to reflect new acquisition legislation, policies and procedures.
- Stood up the Office of Selective Acquisition (OSA) with 24 FTE; OSA assumed the role of handing DHS's classified acquisition by recruiting and hiring 24 highly qualified employees.
- Conducted 10 procurement oversight reviews and released 8 reports which highlighted areas where the components were doing well and what areas could use improvement.
- Released Directive 102-01 "Acquisition Management" on January 20, 2010.
- Conducted 26 Acquisition Review Boards (ARBs) of DHS's major programs.

FY 2011 Planned Accomplishments

- Continue to provide guidance to the acquisition workforce through policies, procedures and regulations.
- Conduct 8 Procurement Oversight Reviews.
- Conduct approximately 20 Acquisition Review Boards.

FY 2012 Planned Accomplishments

- Expand the acquisition workforce certification to include Test and Evaluation, Logistics, Systems Engineering, and business Cost Estimating and Financial Management.
- Implement and manage OMB’s Acquisition Workforce Initiative to support acquisition functions throughout the Department.
- Place the first graduating class of APCP participants in jobs throughout the Department.
- Continue to strengthen DHS’s cost estimating capability by funding 12 additional positions and by identifying gaps in the component’s cost analysis capabilities.
- Continue to provide guidance to the acquisition workforce through policies, procedures and regulations.
- Conduct approximately 8 Procurement Oversight Reviews.
- Conduct approximately 20 Acquisition Review Boards.

PPA: Office of the Chief Security Officer

	Perm. Pos	FTE	Amount
2010 Actual	207	207	89,886
2011 Continuing Resolution	259	259	90,193
2012 Adjustments-to-Base	(6)	(6)	(20,957)
2012 Current Services	253	253	69,236
2012 Program Change	9	5	2,000
2012 Total Request	262	258	71,236

The Office of the Chief Security Officer requests 262 FTP/258 FTEs and \$71.236M in FY2012.

CURRENT SERVICES PROGRAM DESCRIPTION

The mission of the Office of the Chief Security Officer (OCSO) is to lead a collaborative security program to safeguard the Department’s personnel, information, and property so the Department may secure the Homeland. Today’s complex security environment demands that security operations be effectively structured and integrated into all DHS operations. OCSO implements department-wide security programs, policies and standards to safeguard DHS personnel, property, facilities, and information. Priority initiatives include expediting background investigations and granting security clearances; conducting facility security risk assessments; providing security education and awareness training; managing operational security systems; managing HSPD-12 card issuance; and issuing guidance on topics ranging from installing physical security equipment to handling classified information. Additionally, the OCSO provides liaison support to the intelligence community on security matters affecting DHS and investigates security matters for DHS Headquarters.

The OCSO integrates all security disciplines in a manner that increases efficiency and enhances the overall security of the Department. The Office has seven activities that work

together to create an environment that promotes best practices and shares accountability. These activities are:

- Administrative Security - implements and oversees policies, programs, and standards necessary to ensure the protection of collateral classified and sensitive but unclassified information; creates self-inspection programs that ensure classified and sensitive information is protected; and safeguards information for DHS, State Fusion Centers, major metropolitan Police Departments and State Emergency Operations Centers.
- Internal Security and Investigations – administers security audits, inspections, and investigations involving alleged crimes against DHS or its employees, and allegations of illegal activities by DHS personnel; provides investigative and liaison support to the intelligence community on security matters affecting DHS; and investigates security matters for DHS headquarters.
- Special Security Programs - provides security policy oversight and programs for protecting Sensitive Compartmented Information (SCI) and information received from the intelligence community; administrative security; industrial security; counterintelligence; operation security; security education; and training.
- Physical Security - manages and implements physical security policies, programs, and standards for DHS facilities; access control; physical barriers; surveillance equipment; and contract security forces.
- Personnel Security - provides personnel security and suitability policies, programs, and standards, including procedures for granting, denying and revoking access to classified information; initiates and adjudicates personnel security and suitability. background investigations and periodic reinvestigations of applicants and appointees
- Systems Security – manages, supports, and coordinates the Office of the Chief Security Officer Technology systems and related processes, and collaborates with the OCIO to secure the OCSO proprietary operational systems.
- Identity Management – implements the Homeland Security Presidential Directive 12 (HSPD-12) requirement for a common identification standard for federal employees and contractors.

Significant Accomplishments in FY 2010

- Continued security support at State and Local Fusion Centers to ensure that data shared with state and local partners remains secure.
- Implemented nationwide deployment of HSPD-12 card issuance.
- Continued bolstering Security’s personnel adjudication process to meet increased Departmental needs.
- Supported staffing for a Special Access Program Control Office (SAPCO).
- Employed Balanced Workforce Strategy.

FY 2011 Planned Accomplishments

- Continue security support at State and Local Fusion Centers to ensure that data shared with state and local partners remains secure.
- Continue nationwide surge of HSPD-12 card issuance.
- Continue to bolster Security’s personnel adjudication process to meet increased Departmental needs.

- Continued Balanced Workforce Strategy.

FY 2012 Planned Accomplishments

- Maintain operational mode of nationwide HSPD-12 card issuance.
- Continue to bolster Security's personnel adjudication process to meet increased Departmental needs.

IV. Justification of Program Changes

**Department of Homeland Security
Departmental Management and Operations
Under Secretary for Management
Justification of Program Changes**
(Dollars in Thousands)

Program Increase #1: Icebreaking Acquisition Analysis
PPA: Immediate Office of the USM
Program Increase: Positions 0 FTE 0 Dollars \$5,000

Funding Profile

	FY 2010 Actual			FY 2011 Continuing Resolution			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	-
Program Increase	-	-	-	-	-	-	-	-	5,000
Total Request	-	-	-	-	-	-	-	-	5,000

Description of Item

The Immediate Office of the Under Secretary for Management (OUSM) is requesting \$5M to provide funding for the completion of an analysis for icebreaking requirements in the polar regions.

Justification

The funding will support an interagency working group to define Terms of Reference and the approach to be used for the analysis of icebreaking requirements in the polar regions. The working group will be under the direction of the USM.

Impact on Performance (Relationship of Increase to Strategic Goals)

From numerous existing and ongoing studies, consensus is building that the U.S. will need sustained icebreaking capacity once the Arctic opens up (some years or decades from now) and well into the 21st century. Because the design and construction of a new polar icebreaker may take 10-20 years, it is important that icebreaker requirements be assessed now. The requirements determination will prioritize all federal icebreaker needs and develop alternatives with respect to performance (e.g., light- to heavy-duty, range), operational capabilities (e.g., escort, research, and defense) and operational models (e.g., commercial, civilian or military crewing). Acquisition of 21st century icebreaking capability will be based on these final requirements. The Department will reach out to all agencies with prospective icebreaking needs in the polar regions (both Antarctica and Arctic).

Program Increase #2: Assets and Logistics Management Division
PPA: Office of the Chief Administrative Officer
Program Increase: Positions 7 FTE 4 Dollars \$1,100

Funding Profile

	FY 2010 Actual			FY 2011 Continuing Resolution			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	15	15	3,620
Program Increase	-	-	-	-	-	-	7	4	1,100
Total Request	15	15	3,620	15	15	3,620	22	19	4,720

Description of Item

The Assets and Logistics Management (ALM) Division currently maintains a portfolio that includes:

- 230,000 employees (including uniformed U.S. Coast Guard (USCG)) plus 210,000 contractors;
- Real estate 88 million sq. ft. (43 million sq. ft. owned, 45 million sq. ft. leased) with a portfolio value of \$24 billion;
- 34,000 total assets, building and structures;
- 49,000 vehicles with a portfolio value of \$500 million.

Departmental oversight and guidance for this portfolio is provided by the ALM Division within OCAO. ALM consists of Real Property, Personal Property and Mobile Assets. ALM currently maintains a small staff which focuses on policy and basic data consolidation and reporting.

Justification

This office does not have the capability to properly manage the ALM portfolio effectively, and lacks the ability to ensure executive guidance at DHS. With limited staffing the department is vulnerable to opportunities of waste and abuse. The Government Accountability Office (GAO) has identified Real Property as a High Risk item and the DHS Office of the Inspector General (OIG) has identified significant weakness in Departmental oversight of Sensitive Property such as firearms. The OIG identified risk was documented as a Material Weakness in the FY 2009 Annual Assurance Statement. Given the risks and the size of the portfolio compared to the resources requested, these positions will provide the critical steps to mitigate risks. For the assessment of policy, compliance and program effectiveness, these additional resources are requested.

Specifically these resources will:

- Perform management assessments to address the material weaknesses and areas of risk identified for the Department
- Provide feedback and recommendations for changes in policy and internal controls to Departmental Management
- Consolidate oversight information for the Department

Areas of Focus:

Mobile Assets Program and Business Process Assessment

- Determine Alternative Fuel and General Fuel Usage
- Confirm Vehicle Utilization
- Assess Adequacy of Maintenance programs
- Confirm use of performance metrics
- Assess mobile asset acquisition and disposition process

Personal Property Program and Business Process Assessment

- Review procedures for acquisition and disposal of Personal Property
- Review procedures for monitoring and managing Sensitive Assets
- Confirm use of Performance metrics

Real Property Program and Business Process Assessment

- Assess Data Quality
- Confirm use of performance metrics
- Confirmation of asset Utilization
- Confirm Condition Assessment process
- Review Asset Disposal process
- Review Lease acquisition process

Impact on Performance (Relationship of Increase to Strategic Goals)

Currently there is very limited capability to properly manage the Real, Mobile and Personal Property asset portfolio and the Department lacks the ability to ensure executive guidance or compliance with regulations at a component. These two conditions leave the department vulnerable to occurrences of waste and abuse or at the very least confirming how the Department is effectively managing its resources. With this additional staffing, OCAO will be able to mitigate the risk associated with federal regulations and Executive Orders; funding this program increase request will enable developing the capability to provide an oversight program for ALM functions and is in direct support to strategic goal number 5: Strengthening and Unifying DHS Operations and Management.

Program Increase #3: Leader Development Initiative
 PPA: Office of the Chief Human Capital Officer
 Program Increase: Positions 5 FTE 3 Dollars \$750

Funding Profile

	FY 2010 Actual			FY 2011 Continuing Resolution			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	6	6	1,280
Program Increase	-	-	-	-	-	-	5	3	750
Total Request	6	2	\$440	6	6	\$1,259	11	9	\$2,030

Description of Item

OCHCO is requesting five (5) positions, three (3) FTE and \$750K to design and implement a comprehensive DHS leader program.

The Leader Development program will deliver a continuum of competency-based leader training to support the 27,000 executives, managers, and supervisors at all levels of leadership within the Department. Major elements of this program will include 1) a spectrum of leadership development expectations and standards; 2) a Senior Executive Service Candidate Development Program (SES CDP), to standardize and institutionalize development and succession planning for a DHS-wide executive talent pool; 3) a Capstone program that will focus on developing effective leadership skills for SES members within the Department; and 4) a strategic SES succession plan to enhance the department's senior workforce development.

Justification

The DHS Secretary and the Deputy Secretary have launched an initiative to build an integrated, Department-wide DHS Leader Development program. The overall goal of the initiative is to build a cadre of more effective and efficient leaders, as well as to enhance the ability of leaders at all levels to lead performance and accomplish the department's missions without fail – to formulate and execute the needed strategies, to effectively manage complex programs and activities in a no-notice environment, and to motivate and lead employees to achieve organizational goals. The critical need for this initiative has been cited in several major reports, including the 2010 Federal Employee Viewpoint Survey, where only 38% of DHS employees believe that their leaders generate high levels of motivation and commitment in the workforce, and only 29% believe steps are taken to deal with a poor performer who cannot or will not improve.

Impact on Performance (Relationship of Increase to Strategic Goals)

The Leader Development program aligns with QHSR Goal 6, "Maturing and Strengthening the Homeland Security Enterprise", Objective 6.3, "Foster Unity of Effort" and DHS Workforce Strategy Goal 1, "Building an effective, mission-focused, diverse and inspiring cadre of leaders. In aligning with these goals, the Leader Development program equips senior leaders with the ability to accomplish the Department's missions without fail – to formulate and execute the needed strategies, to motivate and direct employees to contribute to organizational goals, and to effectively manage complex programs and mission support activities. Due to the projected growth of the DHS workforce, including the expected contractor conversions under the Balanced Workforce Strategy, a significant number of new leaders will require training. With this funding, the OCHCO will be able to deliver a comprehensive leadership program that will result in the development of a "DHS Leader cadre" for leadership positions today, and into the future.

Performance measures will include: 1) the number of leaders completing the required course of instruction; 2) an improvement in ratings in the Annual Employee Surveys; and 3) the number and duration of succession gaps among senior executives.

Program Increase #4: Balanced Workforce Strategy
 PPA: Office of the Chief Human Capital Officer
 Program Increase: Positions 3 FTE 2 Dollars \$500

Funding Profile

	FY 2010 Actual			FY 2011 Continuing Resolution			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	6	6	1,412
Program Increase	-	-	-	-	-	-	3	2	500
Total Request	6	3	\$682	6	6	\$1,387	9	8	\$1,912

Description of Item

OCHCO is requesting three positions, two FTE and \$500K to provide enhanced implementation and management support to the Balanced Workforce Program Management Office within the OCHCO.

The Under Secretary for Management assigned leadership for this effort to the Office of the Chief Human Capital Officer (OCHCO) in early 2010. The Balanced Workforce Strategy (BWS) serves as the strategic underpinning of the DHS workforce planning model that takes a long-term view of organizational needs, focusing on the changes in functions as a result of shifting missions, priorities, and environmental factors. In addition to examining the appropriate workforce best suited to meet mission needs, the strategy concludes with the necessary competencies and/or skills to deliver the mission.

Justification

The Quadrennial Homeland Security Review (QHSR) and the Bottom-Up Review (BUR) have both confirmed a critical need to balance the DHS workforce by ensuring strong federal control of all DHS work and reducing reliance on contractors. This critical need is further validated through GAO Report #GAO-08-142T on DHS, which concluded that risk assessment and enhanced oversight is needed to manage reliance on contractors. The GAO Report recommends that the DHS Secretary take specific action to establish strategic guidance for determining the appropriate mix of government and contractor employees, which forms the basis of the BWS. A balanced workforce ensures the success and sustainment of the Department's Homeland Security mission, while simultaneously minimizing mission risk.

Impact on Performance (Relationship of Increase to Strategic Goals)

The BWS program aligns with QHSR Goal 6, "Maturing and Strengthening the Homeland Security Enterprise". In aligning with this goal, the BWS program will include: (1) Creation, dissemination, and implementation of a department-wide, comprehensive guidance; (2) Training and communication on all aspects of the Balanced Workforce Strategy to Departmental and Component program officials, leaders, and Line of Business employees; and (3) Reliable, accurate, and timely reviews, analyses, and reporting of component Balanced Workforce Action Plans. This program increase will support the Department in achieving the

proper workforce balance of federal employees and contractors; addressing potential mission risk, achieving compliance with associated statues and regulations and providing justification for management decisions on work sourcing.

Program Increase #5: Workforce Training/Closing Competency Gaps

PPA: Office of the Chief Human Capital Officer

Program Increase: Positions 14 FTE 7 Dollars \$2,000

Funding Profile

	FY 2010 Actual			FY 2011 Continuing Resolution			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	-
Program Increase	-	-	-	-	-	-	14	7	2,000
Total Request	-	-	-	-	-	-	14	7	\$2,000

Description of Item

OCHCO is requesting fourteen positions, seven FTE and \$2.0 million to continue the design, development and delivery of workforce training programs that will significantly enhance employee development and interoperability.

The Workforce Training program will implement a comprehensive framework for identifying critical skill gaps and competencies for mission critical occupations and performing related competency assessments Department-wide. Major elements of this program will include: (1) Implementing a framework to identify critical skill gaps for mission critical occupations and perform related competency assessments; (2) Deploying a career paths program for mission critical occupations across Component lines (e.g., through training, the TSA screener can advance to become a CBP border patrol agent, who can subsequently advance to become a USSS special agent); (3) Implementing an enterprise and joint rotational assignments program to enhance skills and improve interoperability; and (4) Delivering new/enhanced training in key areas such as foreign languages, labor management, and employee preparedness.

Justification

The Quadrennial Homeland Security Review (QHSR) and the Bottom-Up Review (BUR) have both confirmed that since establishing DHS as a Federal agency, there remains a critical opportunity to enhance integration across the Department by strengthening training and career paths through emphasis on mobility and cross-disciplinary experiences. This critical opportunity is echoed by the 2010 Federal Employee Viewpoint Survey results, where only 50% of DHS employees believe their training needs are assessed and only 38% are satisfied with the opportunity to get a better job in their organization.

Impact on Performance (Relationship of Increase to Strategic Goals)

The Workforce Training program aligns with QHSR Goal 6, "Maturing and Strengthening the Homeland Security Enterprise", Objective 6.3, "Foster Unity of Effort" and DHS Workforce Strategy Goal 1, "Building an effective, mission-focused, diverse and inspiring cadre of leaders. In aligning with these goals, the Workforce Training program will implement a comprehensive framework for identifying critical skill gaps and competencies for mission critical occupations and performing related competency assessments Department-wide. OCHCO, working in collaboration with the Components, will identify training needs and gaps for their respective workforces and then build organizational training plans that will include developing career paths; enterprise and joint rotational assignments to enhance skills and improve interoperability; academic outreach and student programs; and delivering new/enhanced training in key areas such as foreign languages, labor management, and employee preparedness to close those gaps.

Performance measures include: 1) Percent of employees participating in career rotational programs; 2) Employee feedback related to satisfaction of rotational experiences; 3) Percent of positive responses to survey questions related to training and developmental programs; 4) Percent of employees on formal Individual Development Plans; 5) Progress against action plan for addressing competency gaps (especially in foreign language skills); 6) Number of entry level to senior employees who have participated in, or are products of our academic outreach efforts.

Program Increase #6: Acquisition Workforce
 PPA: Human Resources Information Technology (HRIT)
 Program Increase: Positions 2 FTE 1 Dollars \$279

Funding Profile

	FY 2010 Actual			FY 2011 Continuing Resolution			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	-
Program Increase	-	-	-	-	-	-	2	1	279
Total Request	-	-	-	-	-	-	2	1	\$279

Description of Item

Successful acquisition outcomes are the direct result of having the appropriate personnel with the requisite skills managing various aspects of the acquisition process. Between FY 2000 and FY 2008, acquisition spending by civilian agencies increased by 56% (in inflation-adjusted dollars). The Department of Homeland Security is working to ensure its major acquisitions are effectively managed to ensure that the Department maximizes the value of every homeland security dollar and that major programs are implemented in the most responsible and efficient manner possible. This includes having disciplined oversight processes and robust acquisition program management teams in place. DHS has assessed the current resident skills against a set

of core acquisition management skills: a program manager, a systems engineer, a life cycle logistician, a business/financial manager and a contracting officer's technical representative, and we have determined that many of our major acquisition programs are deficient in several of these areas.

The President's March 4, 2009 memorandum on Government Contracting required agencies to improve acquisition practices and performance by maximizing competition and value, minimizing risk, and reviewing the ability of the acquisition workforce to develop, manage, and oversee acquisitions appropriately. Subsequent guidance from the Office of Management and Budget, including memorandum M-09-25 *Improving Government Acquisition* issued July 29, 2009, and OFPP's Memorandum of October 27, 2009 *Acquisition Workforce Development Strategic Plan for Civilian Agencies- FY2010-2014*, provided guidance to agencies to strengthen the acquisition workforce and increase the civilian agency workforce by 5% to more effectively manage acquisition performance. These funds will help ensure the future programmatic growth requirements for training, recruitment, and retention activities while helping us to attract and hire qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act.

In support of the Administration's emphasis on strengthening the Federal acquisition workforce, the Office of the Chief Human Capital Officer requests \$279K to increase its acquisition workforce capacity and capabilities. The increase will mitigate the risks associated with gaps in either capacity or capability of the acquisition workforce and improve its effectiveness. The resources requested for OCHCO will be used to:

- Hire (1) GS-15 Logistician and (1) GS-14 Business and Financial Manager
- Increase the capability of the acquisition workforce by investing in training to close identified gaps in such areas as project management, negotiations, requirements development, contract management, and other key topics;
- Increase the effectiveness of the acquisition workforce by investing in improvements to systems that support the contracting function;

Impact on Performance (Relationship of Increase to Strategic Goals)

The FY 2012 funding request will help ensure:

- The future programmatic growth capacity for training, recruitment, and retention activities while attracting and hiring qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act. These funds allow DHS the ability to train, recruit, and retain at acceptable standards.
- The sustainability and availability of information technology systems and equipment in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

Program Increase #7: Acquisition Workforce
 PPA: Office of the Chief Procurement Officer
 Program Increase: Positions 11 FTE 5 Dollars \$5,775

Funding Profile

	FY 2010 Actual			FY 2011 Continuing Resolution			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	120	60	42,700
Program Increase	-	-	-	-	-	-	11	5	5,775
Total Request	120	60	\$16,600	120	60	\$22,500	131	65	\$48,475

FY 2011 President's Budget requested all FTP/FTE for the Acquisition Workforce program within this PPA; however the FY 2012 requests this initiative in the DHS Components. This PPA's request includes 11 positions and 5 FTE for OCPO's Acquisition Workforce in FY 2012.

Description of Item

Successful acquisition outcomes are the direct result of having the appropriate personnel with the requisite skills managing various aspects of the acquisition process. Between FY 2000 and FY 2008, acquisition spending by civilian agencies increased by 56% (in inflation-adjusted dollars). The Department of Homeland Security is working to ensure its major acquisitions are effectively managed to ensure that the Department maximizes the value of every homeland security dollar and that major programs are implemented in the most responsible and efficient manner possible. This includes having disciplined oversight processes and robust acquisition program management teams in place. DHS has assessed the current resident skills against a set of core acquisition management skills: a program manager, a systems engineer, a life cycle logistician, a business/financial manager and a contracting officer's technical representative, and we have determined that many of our major acquisition programs are deficient in several of these areas.

The President's March 4, 2009 memorandum on Government Contracting required agencies to improve acquisition practices and performance by maximizing competition and value, minimizing risk, and reviewing the ability of the acquisition workforce to develop, manage, and oversee acquisitions appropriately. Subsequent guidance from the Office of Management and Budget, including memorandum M-09-25 *Improving Government Acquisition* issued July 29, 2009, and OFPP's Memorandum of October 27, 2009 *Acquisition Workforce Development Strategic Plan for Civilian Agencies- FY2010-2014*, provided guidance to agencies to strengthen the acquisition workforce and increase the civilian agency workforce by 5% to more effectively manage acquisition performance. These funds will help ensure the future programmatic growth requirements for training, recruitment, and retention activities while helping us to attract and hire qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act.

Justification

In support of the Administration’s emphasis on strengthening the Federal acquisition workforce, the Office of the Chief Procurement Officer requests \$5.775M to increase its acquisition workforce capacity and capabilities. The increase will mitigate the risks associated with gaps in either capacity or capability of the acquisition workforce and improve its effectiveness. The resources requested for OCPO will be used to:

- Hire eight Cost Analysts to support the CAD within OCPO and two Systems Engineers and one Logistician to support the Transformation and Systems Consolidation (TASC) Program.
- Increase the capability of the acquisition workforce by investing in training to close identified gaps in such areas as project management, negotiations, requirements development, contract management, and other key topics;
- Increase the effectiveness of the acquisition workforce by investing in improvements to systems that support the contracting function;
- Conduct an assessment of options for creating systems to maintain comprehensive acquisition workforce data and selecting the appropriate system; and
- Increase the effectiveness of the Department’s centralized acquisition workforce training program comprised of certification and targeted/continuous learning developmental training opportunities.

Impact on Performance (Relationship of Increase to Strategic Goals)

The FY 2012 funding request will help ensure:

- The future programmatic growth capacity for training, recruitment, and retention activities while attracting and hiring qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act. These funds allow DHS the ability to train, recruit, and retain at acceptable standards.
- The sustainability and availability of information technology systems and equipment in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

Program Increase #8: Strengthening Cost Estimating
 PPA: Office of the Chief Procurement Officer
 Program Increase: Positions 12 FTE 6 Dollars \$1,700

Funding Profile

	FY 2010 Actual			FY 2011 Continuing Resolution			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	8	8	3,744
Program Increase	-	-	-	-	-	-	12	6	1,700
Total Request	-	-	-	-	-	-	20	14	\$5,444

Description of Item

The \$1.7M requested increase will fund 12 positions and 6 FTE and allow the Cost Analysis Division within OCPO to dedicate a Cost Analyst to each of the eight major Components for oversight and assistance; provide up to 10 Independent Cost Estimates per year (depending on program complexity); fulfill the more rigorous Life Cycle Cost Estimate (LCCE) validation role in support of Acquisition Review Board decisions from approximately 12 to 18; provide at least one dedicated Cost Analyst to each APCP Cost Analysis intern for on-the-job training and support until permanent placement at DHS program offices at the end of 3 year training; provide dedicated administrative support for the CAD Division; procure contractor support to initiate and oversee the development of a DHS-centric cost database including the data collection efforts and initial population in order to improve the accuracy of cost estimates.

Justification

Enhancing the CAD staff will allow a progressive increase in the number of Independent Cost Estimates (ICEs) developed for Level I Acquisitions at major decision points as well as provide the requisite staffing to increase the outreach, guidance and training concurrent with the establishment of component cost organizations. This initiative will utilize the cost analyst interns that will be trained and ultimately fill much needed cost positions within the component organizations. Once fully staffed, this initiative will allow the CAD to execute the following specific capabilities: develop five to 10 Independent Cost Estimates per year; review 10-15 Component Program Life Cycle Cost Estimate for validation per year; initiate Component Outreach and Training for 10-15 programs per year; Initiate the development and collection of data for five-10 programs per year to satisfy future estimating activities.

Impact on Performance (Relationship of Increase to Strategic Goals)

This initiative once funded will allow CAD to augment their staffing size incorporating mid-level grade positions beginning in FY 12. DHS Instruction Manual 102-01-001: Acquisition Management Instruction/Guidebook describes the role of CAD and CAD's CONOPS. This initiative ties to BUR initiative 41: Reduce Reliance on Contractors, and BUR Initiative 42: Increase Analytic Capability and Capacity, as well as High Priority Performance Goal 8: Maturing and Strengthening the Homeland Security Enterprise. All DHS components with Level I Acquisitions will be required to develop valid Program Office Life Cycle Cost Estimates (PLCCE) to support the acquisition life cycle process.

DHS has made significant improvements in acquisition oversight in the last two years however; the Department needs to continue to strengthen this process. Numerous Government Accountability Office and DHS Inspector General audits have highlighted significant program cost growth and the inadequacy of the cost estimating process across DHS. DHS has established a Cost Analysis Division (CAD) in the Office of the Chief Procurement Officer. As a next step in its acquisition oversight process, DHS will use these resources to increase CAD's capability to provide independent cost assessments of major programs at major milestone points. This capability will ensure program cost estimates are reasonable reflections of the program's requirements and can withstand the scrutiny of external reviews and audits. Reliable and credible independent cost estimates will increase the Department's capability for informed investment decision making, budget formulation, progress measurement and

accountability. Rigorous analyses of operational requirements, technology alternatives and disciplined testing and evaluation of technology acquisitions will be instituted to ensure investments yield intended mission improvements.

Program Increase #9: Classified National Security Information Program for State, Local, Tribal, and Private Sector Entities (SLTPS)
 PPA: Office of the Chief Security Officer
 Program Increase: Positions - 9 FTE - 5 Dollars - \$2,000

Funding Profile

	FY 2010 Actual			FY 2011 President's Budget			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	-
Program Increase	-	-	-	-	-	-	9	5	2,000
Total Request	-	-	-	-	-	-	9	5	2,000

Description of Item

The Office of the Chief Security Officer (OCSO) is requesting 9 FTP/ 5 FTE and \$2.0 million to begin executing the Secretary's responsibilities as Executive Agent (EA) pursuant to Executive Order (EO) 13549, "Classified National Security Information Program for State, Local, Tribal and Private Sector (SLTPS) Entities." Under the authority of EO 13549, a governance and oversight structure will be established to ensure the uniform application of security standards relative to security clearance management and the safeguarding of classified information at SLTPS locations while maintaining consistency with existing federal EOs, policy and standards.

The OCSO intends to establish a new Division dedicated specifically to the administration of the program. The Division will be called the State, Local, Tribal and Private Sector (SLTPS), Security Management Division (SMD). Of the amount requested, 5 FTP/ 3 FTE and \$684K will be utilized to fund personnel instrumental in the development and administration of these policies.

The remaining 4 FTP/ 2 FTE and \$1.316 million will allow the OCSO to establish the Information Technology Branch to coordinate, develop, implement, and manage information technology assets necessary to support the SLTPS program. These assets include a mechanism for documenting and tracking the final security clearance status of SLTPS personnel; a mechanism for centralizing and recording the facility security profiles of all SLTPS locations where classified information is stored; and web based solutions for the deployment of security education and awareness products. The \$1.316 million will be spent on personnel necessary to implement the requirements and responsibilities of this branch in support of the executive order.

Justification

The OCSO is requesting resources to establish and manage a governance and oversight structure designed to build a cohesive security foundation designed to assure the integrity of classified information shared with our SLTPS partners.

Pursuant to the EO, the Secretary of Homeland Security serves as the EA for the Program and has designated the OCSO to implement the requirements of the EO. These responsibilities include: certification, accreditation, periodic inspection, and monitoring of all facilities owned or operated by SLTPS entities. DHS will work in consultation with other government agencies to process, document, and track, to final status, all security clearance applications of SLTPS personnel sponsored by the agencies on a reimbursable basis. In addition, DHS will develop and maintain security profile of SLTPS facilities that have access to classified information and develop training for all SLTPS personnel who have been determined eligible for access to classified information.

The Classified National Security Information Program for SLTPS entities will ensure that security standards governing access to and safeguarding of classified material are applied in accordance with Executive Order (E.O.) 13526, "Classified National Security Information;" E.O. 12968, "Access to Classified Information;" E.O. 13467, "Reforming Processes Related to Suitability for Government, Fitness for Contractor Employees, and Eligibility for Access to Classified National Security Information;" and E.O. 12829, as amended, "National Industrial Security Program"

Impact on Performance (Relationship of Increase to Strategic Goals):

The need to share actionable and relevant classified information with our SLTPS partners in support of homeland security is a priority. While it is in the nation's best interest to form and sustain an active and robust information sharing environment for the defense of the homeland, we must still be mindful of the damage to our national security that could occur should information not be protected and safeguarded appropriately.

With the requested funding, OCSO will establish a new Division dedicated to the administration of security policies, processes, and procedures that will result in a unified and consistent program for the application of security clearance management and the safeguarding of classified information across the executive branch and in support of classified information sharing efforts with our partners in the SLTPS communities. Requested funding will also establish the Information Technology Branch to assist in the coordination, development, implementation, and management of information technology assets in support of the sharing of information with our SLTPS stakeholders.

Program Decrease #1: Enterprise Records Management System (ERMS)
 PPA: Office of the Chief Administrative Officer (OCAO)
 Program Decrease: Positions -3 FTE -3 Dollars -\$3,100

Total Request	3	3	3,100	3	3	3,100	-3	-3	-3,100

Description of Item

Nearly 100 percent of all DHS documents and records created by DHS headquarters, components, and field operations originate electronically and are managed through some type of information system. The current paper driven records management process is incomplete, labor intensive, highly inefficient, and does not meet organizational needs. The cohabitation of paper-driven processes, with modern technologies, invalidates gained efficiencies, effectiveness, and economies of scale. The implementation of an electronic records system to manage records is necessary to ensure that DHS personnel have access to timely, accurate, and sufficient information for making day-to-day and other critical decisions.

ERMS is intended to bring the Department in full electronic record management compliance with OMB Circular Number A-130 (Revised) and the Federal Records Act (NARA). The Department has informed Congress, Industry, Department Components, and the National Archives and Records Administration (NARA) that we are committed to an ERMS implementation.

The FY 2010 President’s Budget requested and received a program request of \$3.1M for the Enterprise Records Management System (ERMS). It was intended that the ERMS application would connect to and manage information contained within multiple information management systems and streamline document and email management across components and DHS headquarters operations. When fully implemented the ERMS system would manage all records management lifecycle through the creation, version control, user access, retention and proper disposal of the Departments records. It is projected there would be substantial cost savings after full implementation is achieved.

Justification

The CAO will take an interim reduction to ERMS in FY 2012 to fund higher level CAO needs during a constrained fiscal environment. OCAO, programs such as Asset Logistics Management (ALM), real estate management, and Fleet Service management will be primary in the OCAO mission. This focus, while coupled with additional cost savings being achieved

throughout the Department, requires that OCAO focus its priorities on Department critical missions.

Impact on Performance (Relationship of Increase to Strategic Goals)

While requesting the delayed implementation of ERMS, DHS Components will continue managing their own records. ERMS will continue in future fiscal years as the department continues to best manage the resources provided in a tight fiscal environment.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Departmental Management and Operations
Under Secretary for Management
Appropriation Language**

For necessary expenses of the Office of the Under Secretary for Management, as authorized by sections 701 through 705 of the Homeland Security Act of 2002 (6 U.S.C. 341 through 345), \$249,058,000, of which not to exceed \$3,000 shall be for official reception and representation expenses: Provided, That of the total amount, \$5,399,000, shall remain available until expended solely for the alteration and improvement of facilities, tenant improvements, and relocation costs to consolidate Department headquarters operations at the Nebraska Avenue Complex; and \$16,686,000, shall remain available until expended for the Human Resources Information Technology program: Provided further, That of the funds made available under this heading, \$6,054,000 is for strengthening the Department's acquisition workforce capacity and capabilities: Provided further, That, as related to the previous proviso, such funds shall be available for training, recruitment, retention, and hiring members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act, as amended (41 U.S.C. 401 et seq.): Provided further, That as it relates to the second proviso, such funds shall be available for information technology in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

PPA Mission Statement

The Immediate Office of the Under Secretary for Management (USM) ensures the Under Secretary for Management offices function effectively and efficiently in support of both the Department as a whole and the USM offices itself. The requested funding will allow the USM to manage the workload of the offices, respond quickly to queries from within and outside the Department, and further efforts for functional integration.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Salaries and Benefits	\$1,923	\$2,053	\$2,049	(\$4)

Salaries and Benefits includes costs for 15 FTEs. The FY2012 request includes a decrease of \$4,000 in salaries and benefits costs associated with flat-lining pay.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Travel	\$17	\$18	\$15	(\$3)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request includes a decrease of \$3,000 inline with reducing administrative costs in the area of travel.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
GSA rent	\$205	\$209	\$213	\$4

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request includes an increase of \$4,000 for rent related costs.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Printing	\$25	\$26	\$18	(\$8)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2012 request includes a decrease of \$8,000 to reduce administrative costs in the area of printing and reproduction.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Advisory and Assistance Services	\$374	\$258	\$5,024	\$4,766

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request includes an increase of \$4,766,000 for additional services required to continue management initiatives and the icebreaking acquisition analysis.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Other Services	\$26	\$26	\$22	(\$4)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request includes a decrease of \$4,000 in this area to stay inline with reducing administrative and professional services reliance.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Purchase from Government Accounts	\$158	\$158	\$114	(\$44)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2012 request includes a decrease of \$44,000 in costs.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Operation & maintenance of facilities	\$73	\$73	\$73	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2012 request does not include increased costs in this category.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Medical Care	\$1	\$1	\$1	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2012 request does not include increased costs in this category.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Operation & Maintenance of equipment	\$17	\$17	\$17	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2012 request does not include increased costs in this category.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Supplies & materials	\$25	\$25	\$12	(\$13)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request includes a decrease of \$13,000 in supplies and materials as part of the administrative savings initiative.

PPA Mission Statement

The mission of the Office of Chief Administrative Officer (OCAO) ensures USM offices function effectively and efficiently in support of the Department as a whole and in direct support of other USM offices.

Summary Justification and Explanation of Changes

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$14,281	\$20,839	\$27,310	\$6,471

Salaries and Benefits includes costs for FTEs. The FY 2012 request includes an increase in 52 FTEs from the DHS Balanced Workforce initiative; an increase of 4 FTEs for the ALMS initiative and a decrease of 3 FTEs for ERMS; along with a corresponding change in benefits.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$52	\$324	\$150	(\$174)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request anticipates decreasing travel requirements.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Transportation of Things	\$425	\$475	\$500	\$25

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The funding will be used to finance the transportation of furniture and other household goods associated with the rotation of overseas employees and the permanent change of station or relocation of domestically based DHS federal employees.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
GSA rent	\$2,463	\$4,101	\$4,231	\$130

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request includes an increase of \$130 for additional space requirements due to an increasing number of personnel.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Other Rent	\$137	\$150	\$140	(\$10)

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Communication, Utilities, and miscellaneous charge	\$70	\$100	\$100	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Printing	\$48	\$52	\$53	\$1

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Advisory and Assistance Services	\$18,299	\$13,837	\$4,210	(\$9,627)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request reflects a decrease in contractor personnel due to the DHS Balance Workforce Strategy, and the elimination of ERMS.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Other Services	\$2,825	\$459	\$532	\$73

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request does not include an increase in requirements.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Purchase from Government Accounts	\$5,262	\$3,966	\$3,831	(\$135)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Supplies & materials	519	188	191	\$3

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request does not include an increase in requirements.

PPA Mission Statement

The Office of the Chief Human Capital Officer (OCHCO) provides overall management and administration for the Department's human capital policies, programs and practices for attracting, retaining and developing the skilled workforce needed to protect and secure our Nation.

Summary Justification and Explanation of Changes

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$13,258	\$17,687	\$19,029	\$1,342

Salary and Benefit costs support 130 FTEs. The FY 2012 Request includes an increase of \$1,342,000 to support personnel compensation for 12 FTEs in program increases to support balanced workforce strategy, leader development and workforce training/closing contingency gaps initiatives.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$135	\$155	\$201	\$46

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2012 Request includes an increase of \$46,000 for increased needs within OCHCO and the 12 FTEs in program increases to support balanced workforce strategy, leader development and workforce training/closing contingency gaps initiatives.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
GSA rent	\$1,330	\$1,204	\$1,571	\$367

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request includes an increase of \$367,000 for GSA Rent inflation and projected increase in space requirements for additional FTEs in program increases to support balanced workforce strategy, leader development and workforce training/closing contingency gaps initiatives.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Printing	\$34	\$25	\$10	(\$15)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2012 request reflects a decrease of \$15,000 due to efficiencies and the administrative savings initiative.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Other Services	\$1,633	\$2,635	\$3,982	\$1,347

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 Request includes increases of \$1,347,000 for other services in support of program increases to support balanced workforce strategy, leader development and workforce training/closing contingency gaps initiatives.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Purchase from Government Accounts	\$3,503	\$3,603	\$3,185	(\$418)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. These costs represent OCHCO's costs for WCF/CAO Shared Services, excluding rent. The FY 2012 request reflects a decrease of \$418,000 due to a realignment of funds for federal salaries and benefits, WCF Shared Service and other personnel expenses.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Medical Care	\$5	\$7	\$8	\$1

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2012 request includes an increase of \$1,000 for anticipated shared services of medical care (FOH).

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Supplies & materials	\$300	\$157	\$175	\$18

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. PPA Mission Statement

The DHS Chief Human Capital Officer (CHCO) and Component Human Capital Executives in partnership with the Chief Information Officer (CIO) are currently redefining a long-term strategic plan for HRIT. The goal of the new strategy is to deliver an enterprise platform for a Title V environment that provides core HR functionality and data access across the DHS enterprise in a way that optimizes efficiency. An optimized solution must also address the system shortcomings and limitations of the National Finance Center's (NFC) Pay and Personnel System. While DHS currently operates four enterprise solutions, i.e., NFC Corporate (Payroll/Personnel), EmpowHR (Personnel), webTA (Time and Attendance); and the eOPF (Electronic Personnel Folders), there remains a critical need for enterprise solutions in areas such as staffing, learning management, performance management and personnel accountability for continued operation, in the event of a declared emergency.

Summary Justification and Explanation of Changes

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$68	\$3,359	\$3,966	\$607

Salaries and Benefits includes costs for 33 FTEs. The FY 2012 Request includes an increase of \$607,000 in personnel compensation to support an additional 7 FTEs as an adjustment to base and 1 FTE in program increases to support the Acquisition Workforce Initiative.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$0	\$10	\$20	\$10

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2012 Request includes an increase of \$10,000 for non-pay inflation, an increase of 7 FTEs as an adjustment to base and 1 FTE in program increases to support the Acquisition Workforce Initiative.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
GSA rent	\$440	\$479	\$626	\$147

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 Request includes a projected increase in space requirements for 7 FTEs as an adjustment to base and 1 FTE in program increases to support the Acquisition Workforce Initiative.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Other Services	\$13,059	\$11,893	\$10,849	(\$1,044)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 Request includes a decrease of \$1,044,000 due to a realignment of funds for WCF Shared Service and other personnel expenses.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Purchase from Government Accounts	\$1,062	\$1,365	\$1,199	(\$166)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2012 Request includes a decrease of \$166,000 due to a realignment of funds for federal salaries and benefits, WCF Shared Service and other personnel expenses.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Supplies & materials	\$0	\$25	\$26	\$1

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

PPA Mission Statement

Office of the Chief Procurement Officer (OCPO) establishes the acquisition regulations, policies and procedures for DHS. It oversees the Department's acquisition programs and assists the acquisition community with implementing difficult and complex procurements to reduce risk and ensure success. OCPO has implemented a centrally funded and managed Acquisition Professional Career Program modeled after the highly successful Navy Intern Program. This program features three, single year rotations through various components and provides these Interns with all the experience and training they need to become journeymen level acquisition professionals. Additionally, OCPO strategically sources common items across DHS to create more efficient procurements, manage DHS's competitive sourcing actions, and reports externally on DHS progress. OCPO in tandem with the Office of Human Resources sets forth responsibilities and procedures for implementing acquisition workforce planning, centralized acquisition workforce recruitment, and training, for the acquisition career field across the Department. OCPO is the lead executive element for the Office of Management and Budget's (OMB) Federal Acquisition Workforce initiative and it conducts Department-wide assessments to determine gaps in key acquisition disciplines.

Summary Justification and Explanation of Changes

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$28,538	\$39,335	\$46,810	\$7,475

Salaries and Benefits are estimated to be \$46,810,000 in FY 2012. Salaries and benefits are higher in FY 2012 to capture additional cost for the increased personnel associated with the OCPO's Acquisition Workforce enhancement and Cost Analysis Division enhancement.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$232	\$232	\$300	\$68

Travel funding requested is for all FTE and is sufficient for the travel needs of the OCPO for FY 2012. The OCPO requests an increase in Travel of \$68K to accommodate additional personnel requested.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
GSA rent	\$6,860	\$6,860	\$7,373	\$513

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 Request includes a projected increase in space requirements for FTE associated with the Acquisition Workforce Initiative and the Cost Analysis Division.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Communication, Utilities, and miscellaneous charges	\$100	\$100	\$100	\$0

Communications, utilities, and miscellaneous charges and payments for rental or lease of information technology equipment for OCPO in FY 2012 is estimated to be \$100,000 which is sufficient and the same level of requirement as the previous year.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Printing	\$24	\$24	\$21	(\$3)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2012 request is sufficient and does not change from the previous year.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Advisory and Assistance Services	\$1,900	\$1,000	\$1,000	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The OCPO FY2012 requested amount in this area stays the same as the previous year.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Other Services	\$17,492	\$17,421	\$17,600	\$179

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 Request includes an increase of \$179K to accommodate additional personnel and resources requested in FY2012 enhancements.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Purchase from Government Accounts	\$11,511	\$3,148	\$4,414	\$1,266

Purchases from Government Accounts include costs for purchases from other Federal Government agencies and represents our Federally Funded Research and Development Center Interagency Agreements with Science and Technology (S&T). The Acquisition Program Management Division uses the expertise from this contractual agreement in support their governance and oversight of DHS' major acquisition programs. To cover the estimated costs of CAD requirement for contractor support in FY 2012, OCPO requests an increase of \$1.266M.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Operation & maintenance of facilities	\$784	\$59	\$754	\$695

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Supplies & materials	\$557	\$359	\$399	\$40

Supplies and materials requests will be sufficient to cover allowances of expendables for all personnel to include purchase card purchases under the \$3,000 single purchase limit.

PPA Mission Statement

The mission of the Office of Security is to secure the Department so the Department can secure the homeland. The Office of Security implements security programs that safeguard DHS personnel, property, facilities, and information. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and provides security support to DHS Components. The office manages operational security systems and HSPD-12 card issuance for the Department. Additionally, the office investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

Summary Justification and Explanation of Changes

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$26,305	\$27,329	\$28,329	\$1,000

Salaries and Benefits includes costs for 258 FTEs. The FY 2012 Request for Salaries and Benefits includes a decrease of \$1,000,000 associated with the transfer of 6 FTP/FTEs to Analysis and Operations, the annualization of personnel received in the FY2010 enacted budget, and the enhancement of personnel support associated with EO 13549: Classified National Security Information Program for State, Local, Tribal, and Private sector entities

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$492	\$415	\$402	(\$13)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2012 Request includes a net decrease of \$13,000 associated with the transfer of personnel to A&O and the anticipated inflationary costs associated with travel for CSO employees.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Transportation of Things	\$0	\$425	\$425	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The funding will be used to finance the transportation of furniture and other household goods associated with the rotation of overseas employees and the permanent change of station or relocation of domestically based DHS federal employees.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
GSA rent	\$3,297	\$3,528	\$4,961	\$1,433

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 Request includes an increase of \$1,433,000 for increased space requirements for CSO.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Other Rent	\$78	\$78	\$78	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2012 Request remains the same.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Communication, Utilities, and miscellaneous charges	\$0	\$88	\$88	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Printing	\$1,779	\$59	\$59	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Advisory and Assistance Services	\$27,044	\$28,590	\$10,722	(\$17,868)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 Request includes a net decrease of \$17,868,000 due to a reduction in administrative contractual services related to HSPD-12 and an increase in technical contractual services associated with the policy development and IT branches of the SLTPS program enhancement.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Other Services	\$193	\$455	\$455	\$0

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included in this funding are costs for contract services such as widget handling, widget creation, widget deposit, and data entry into the DHS National Widget system; operations and maintenance on widget systems; widget office equipment contracts; contract staff to operate the widget production system used to produce widget cards and authorization documents.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Purchase from Government Accounts	\$24,085	\$25,380	\$21,871	(\$3,509)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2012 Request includes a net decrease of \$3,509,000 due to the non-recurring of HSPD-12.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Operation & maintenance of facilities	\$210	\$212	\$212	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Medical Care	\$16	\$16	\$16	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2012 Request has no change.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Operation & Maintenance of equipment	\$1,357	\$1,384	\$1,384	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Supplies & materials	\$435	\$284	\$284	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 Request

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Equipment	\$4,595	\$1,950	\$1,950	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement. Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2013 budget.

UNDER SECRETARY FOR MANAGEMENT requests \$0 and 52 FTE for the FY 2012 DHS Balanced Workforce Strategy.

Position Type	FY 2010 Actual		FY 2011 Pres. Budget		FY 2011 Annualization		FY 2011 Follow On		FY 2012 Increase		FY2010 – FY2012 DHS Balanced Workforce Strategy	
	Pos.	FTE	Pos.	FTE	Pos.	FTE	Pos.	FTE	Pos.	FTE	Pos.	FTE
OCAO (various positions)	-	-	-	-	-	-	-	-	52	52	52	52
OCHCO-HRIT (various positions)	-	-	25	25	-	-	-	-	-	-	-	-
OCSO (various positions)	-	-	72	72	-	-	-	-	-	-	-	-
Total	-	-	97	97	-	-	-	-	52	52	52	52

OCAO:

OACO has identified a total of 52 contractor positions to be converted to full time federal employees in FY 2012. OCAO will make this conversion at a no cost net change to the government. This change will occur during the final quarter of FY11 and all personnel will be on-board by the beginning of FY12. OCAO will bring closure to multiple contracts in order to make this change occur. Employees converted will continue in the same or similar positions as government employees.

BUDGET REQUEST AND SUPPORTING INFORMATION

DEPARTMENT OF HOMELAND SECURITY DEPARTMENTAL MANAGEMENT AND OPERATIONS OFFICE OF THE CHIEF FINANCIAL OFFICER

I. Appropriation Overview

	Perm Pos	FTE	Amount
2010 Actual	182	173	49,481
2011 Annualized C.R.	183	173	60,530
2012 Adjustments-to-Base	53	56	1,225
2012 Current Services	236	229	61,755
2012 Program Change	6	3	640
2012 Request	242	232	62,395

The Office of the Chief Financial Officer (OCFO) requests \$62.395 million for FY 2012.

A. Mission Statement for OCFO:

The mission of OCFO is to provide guidance and oversight of the Department's budget, financial management, and resource management systems to ensure that the funds necessary to carry out the Department's mission are obtained, allocated and expended in accordance with the Department's priorities and relevant law and policies.

The DHS CFO goals are to:

1. Provide timely, accurate, useful and actionable financial information to decision makers and stakeholders.
2. Provide assurance that internal controls are effective.
3. Provide efficient financial management services and operations.
4. Develop program plans and budgets that are well-justified and balanced to support DHS priorities.
5. Strengthen DHS financial management systems.
6. Recruit, develop and retain a talented workforce to achieve the CFO mission.
7. Strengthen financial assistance accountability.

B. Budget Activities:

Under OCFO, the following Divisions fulfill these functions:

Budget:

- Issue guidance to the Department's Components to ensure that all phases of budget formulation and execution are efficiently completed;
- Ensure technical accuracy of budget-related materials;
- Determine that sufficient resources are available to support activities of the appropriate fiscal year;

- Administer the Department's budget, appropriations and expenditures of funds;
- Work with Program Analysis & Evaluation (PA&E) and DHS Components to formulate annual budget submissions, assure these properly reflect the requirements of DHS, and assist in the presentation and defense of submissions to the Office of Management and Budget (OMB) and Congress;
- Coordinate and review budget execution for each Component and appropriation; conduct spend plan and execution reviews; and act on requests for modifications;
- Conduct special studies and analyses of execution of financial plans and recommend reprogrammings as necessary for effective funds utilization;
- Prepare budgetary reports as necessary or as required by OMB and Congress;
- Prepare the Secretary to testify on the budget request;
- Track and monitor status of reports to Congress required by appropriations bills;
- Ensure technical accuracy and consistency of Component budget materials in accordance with OMB or Congressional guidance;
- Manage and coordinate Components' input into the President's electronic on-line MAX (budget preparation) data system;
- Analyze budgetary impact of pending legislation, review reports to Congress, testimony and other documents; and
- Coordinate and review apportionments, reapportionments and allotments for all DHS appropriations.

Program Analysis and Evaluation (PA&E):

- Develop and perform analyses and evaluations of alternative plans, programs, personnel levels, and budget submissions for the Department in relation to United States homeland security objectives, projected threats, vulnerability assessments, estimated costs, resource constraints, and the most recent homeland security strategy;
- Provide guidance and oversee the development of the Future Years Homeland Security Program (FYHSP) of the Department;
- Lead the performance measurement and reporting for DHS mission-oriented programs;
- Oversee preparation of the DHS performance plan and other performance reporting;
- Integrate performance measurement into strategic planning, resource allocation, program evaluation, evaluation of management personnel, and the culture of DHS;
- Act as the Program Improvement Officer (PIO) in order to supervise performance management activities; provide advice on program performance goals; convene responsible parties to assess and improve program performance; and guide the use of performance measures in personnel performance appraisals;
- Provide leadership in developing and promoting improved analytical tools and methods for analyzing homeland security planning and the allocation of resources;
- Establish policies for, and oversee the integration of the planning, programming, and budgeting system of the Department; and
- Coordinate with and support the Office of Policy on DHS long-term strategic planning.

Financial Management:

- Develop and oversee Departmental financial management policy;
- Coordinate government-wide financial management initiatives in the Department;
- Prepare the Department's consolidated financial statements and other required financial information due to OMB and Treasury, including the Annual Financial Report at year end;

- Provide guidance and oversight to DHS Components on accounting and financial reporting requirements, and coordinate the annual audit of the Department's financial statements included in the Annual Financial Report; and
- Administer the DHS Bankcard (purchase, travel, and fleet) Program, develop and document bankcard policy, provide training and establish and maintain internal control to provide reasonable assurance that the goals and objectives of the Bankcard Program are met and safeguard against fraudulent, improper, abuse, and untimely payment is identified on a timely basis and appropriate corrective action is taken.

Internal Control Management Office:

- Implement the Federal Managers' Financial Integrity Act and its guidelines; OMB Circular A-123; *Management's Responsibility for Internal Control*; the Chief Financial Officers Act; the DHS Financial Accountability Act;
- Lead the Department's assessment of internal controls;
- Coordinate the development and implementation of Mission Action Plans to address material weaknesses and other significant conditions;
- Direct the Department's efforts to implement the Improper Payments Information Act;
- Issue guidance on, and coordinate preparation of, the Secretary's year-end Internal Control Assurance Statements; and
- Conduct reviews of key financial processes to ensure internal controls are operating effectively, with the goal of identifying weaknesses before they become problems.

Transformation and Systems Consolidation (TASC):

- Manage financial management system transformation projects to increase efficiencies, data reliability and financial transparency across DHS.
Serve as the Program Management Office providing day-to-day project management and communications with stakeholders; and lead the effort to provide an integrated financial, acquisition, and asset management system, facilitating clean audit opinions and yielding timely and accurate financial data.

Financial Assistance Policy and Oversight:

- Advise senior DHS leadership regarding the situation specific application of government-wide statutes, regulations, OMB circulars, Executive Orders and DHS Financial Assistance Policy as these relate to use of federal funds;
- Define the DHS Financial Assistance Line of Business, including streamlining and standardizing business models and business processes and developing supporting technology;
- Lead the development of a DHS-wide, end-to-end financial assistance (grants) management system that will ensure a transaction audit trail as well as improving financial assistance award reporting;
- Develop and distribute DHS Financial Assistance Policy for use across DHS to communicate legal requirements, regulation, circulars, Executive Directives, Comptroller General Decisions, and other legal issuances related to the use of federal funds;
- Provide oversight across DHS to ensure their compliance and recipient compliance with requirements regarding the use of federal funds;
- Assess OMB Circular A-133; *Audits of States, Local Governments and Non-Profit Organizations* high risk audit findings, resolve high risk findings backlog, and develop Cost Policy to assist recipients in avoiding repeat high risk findings;

- Gather award data across Components to meet the reporting requirements of the Federal Financial Accountability and Transparency Act of 2006;
- Increase the accuracy, timeliness and reliability of all DHS financial assistance award data; ensure any end-to-end system has auto reporting capabilities, including file transfer to public venues and robust ad hoc query capability; and
- Develop and maintain Grant Officer/Assistance Officer standards and qualifications;
- Articulate the steady state for an adequate centralized, DHS Financial Assistance Policy and Oversight function.

Financial Operations:

- Oversee all aspects of budget formulation and execution for Components under Title I of the DHS Appropriations Act, except for the Office of the Inspector General (OIG) and Analysis and Operations (A&O) appropriations;
- Provide budget execution, accounting, and financial management and reporting services for [Title I] Components, except OIG and A&O, including managing apportionments, allotments, funds certifications, invoice processing, general ledger, payroll reconciliations, bank card, and travel;
- Oversee and manage the DHS Working Capital Fund (WCF);
- Perform internal audits and audit follow-up for Title I Components; and
- Provide reasonable assurance on internal controls over financial reporting and internal controls over operations.

GAO and OIG Audit Liaison:

- Coordinate the Department's engagement in Government Accountability Office (GAO) and Office of the Inspector General (OIG) audits, including entrance and exit conferences, and the Department's response to audit reports and findings;
- Track audit recommendations and the Department's implementation of those recommendations; and
- Provide oversight and guidance to Component-level GAO and OIG audit liaison offices and to DHS employees involved in audits, investigations, and inspections.

Resource Management Transformation:

- Manage the E-Gov travel implementation for DHS; and
- Manage the DHS Treasury Information Executive Repository (TIER).

Workforce Development:

- Provide the training and tools to support excellence in personal performance, career path development, and to execute talent management initiatives to recruit the next generation of financial management leaders;
- Provide experiences and opportunities designed to establish a strong foundation in financial management disciplines to optimize career building at DHS; and
- Create a pipeline of strong candidates for senior financial management leadership roles at DHS, specifically the CFO and/or Deputy CFO positions.

C. Budget Request Summary:

OCFO requests 242 positions, 232 FTE, and \$62.395 million for FY 2012. The total adjustments-to-base are 56 FTE (DHS Balanced Workforce Strategy) and \$1.225 million. The total program changes are 6 positions, 3 FTE for the Special Access Program Control Office (SAPCO) and \$0.640 million.

OCFO requests \$62.395 million for FY 2012.

CURRENT SERVICES PROGRAM DESCRIPTION:

OCFO has made significant progress leading to improvements to financial management at DHS.

Key Accomplishments

In FY 2010, OCFO accomplished the following:

- Developed activities for the integrated financial, acquisition, and asset management system:
 - Formed the TASC Executive Steering Committee (ESC) which is a decision making body, chaired by the Under Secretary for Management (USM).
 - Conducted executive-level outreach to all DHS Components and agencies.
 - Received final approval to award a contract and first three task orders from the Department's Acquisition Review Board (ARB), chaired by the Deputy Secretary.
 - Aligned with OMB policy, including memorandum M-10-26 on financial systems information technology projects.
 - Presented the requirement for a standardized technical solution to OMB's Financial Systems Advisory Board on September 9, 2010 and received approval to proceed with awarding of indefinite delivery indefinite quantity (IDIQ) contract.
- Reduced the severity of control deficiencies at four cComponents and can now assert to more than 50 percent of the Department's total liabilities.
- Revised strategic performance measures aligned to the Quadrennial Homeland Security Review and expanded management performance measures to support resource requests.
- Performed targeted risk assessments to identify weaknesses in accounting and financial reporting at each component.
- Developed and implemented Component mission action plans to mitigate the risk of gaining new material weaknesses or deficiency conditions; as a result no new audit qualifications or material weaknesses occurred in FY 2010.
- Reduced the Department-wide material weaknesses to five following the execution of systematic changes to correct deficiencies within the United States Coast Guard (USCG).
- Established new procedures to improve internal controls over the bank card program by instituting monthly post-payment audits for the purchase and fleet card programs.

- In support of DHS's commitment to improve its relations with and responsiveness to GAO, the Department accomplished the following:
 - Developed a "One DHS" integrated approach to departmental audit tracking and will continue to evolve based on Component and Headquarters functionality requirements.
 - Revised the Department's Management Directive and Implementation Instruction on GAO relations, significantly strengthening relations with GAO and established Deputy Secretary oversight of audit activity to promote proactive corrective actions.
- Led the Fiscal Year 2012-2016 program resource and performance planning, including the Bottom-Up Review.
- Conducted independent program reviews in order to evaluate and assess issues such as true costs and benefits of programs within the Department.
- Co-led with the Office of Policy the development of the Quadrennial Homeland Security Review (QHSR) report.
- Prepared and updated Headquarters' financial management policies and procedures to improve overall financial management within the Department.
- Enhanced the DHS TIER system to reduce manual data entry, improve security, assure Department-wide compliance with regulations, and report on performance.
- Commenced integration of requirements for managerial cost accounting standards and concepts into current DHS financial management practices.
- Conducted budget execution training for all of the DHS Components.
- Worked with House and Senate Appropriations Committees to pass stand-alone legislation granting the USCG authority to make multiple \$100 million transfers from the Oil Spill Liability Trust Fund to continue critical response efforts in the Gulf. Absent this legislation, the USCG would not have been able to meet the oil spill response needs.
- Established a DHS-wide Common Government-wide Accounting Classification (CGAC).
- Implemented E-Gov travel at all remaining Components.
- Completed integration of each Component's data into the Budget Formulation and Execution Manager (BFEM) System for the Department's respective budget submissions.
- Continued to build on successes achieved in improving human capital capabilities through continuation of the mentorship program, the financial specialist intern program, and training for the Certified Government Financial Manager (CGFM) exam.

In FY 2011, OCFO plans to accomplish the following:

- Begin implementing a new integrated financial, asset, and acquisition system at the first DHS component:
 - Establish fully staffed and operational program office.
 - Award TASC contract and task orders for implementation.
 - Begin establishing and testing of the demonstration, development, testing and production environments for the TASC solution.
 - Conduct business and systems, including business processes analysis, functionality, interfaces, data, and reporting.
 - Ensure OCFO dedication and support to systematic in-depth business process analysis, data clean-up activities, financial policy updates, and reviews system and interface configurations.
- Obtain an audit opinion in the FY 2011 Consolidated Balance Sheet and Statement of Custodial Activity.
- Report on performance achievements related to the DHS strategic missions and goals defined by the Department's QHSR.
- Lead the Fiscal Year 2013-2017 program resource and performance planning.

- Conduct additional independent program reviews to evaluate and assess issues such as true costs and benefits of programs within the Department.
- Promulgate DHS Financial Assistance (grant) Policy to guide end-to-end financial assistance program implementation across the Department Directorates, Components and Field Offices.
- Work toward resolving the backlog of financial assistance (grant) recipient OMB Circular A-133 high risk audit findings.
- Work to ensure Directorate, Component and Field Office compliance with statute, regulation, circulars and DHS Financial Assistance Policies related to the use of federal funding.
- Properly account for, and report on, Headquarters' real property by establishing controls and operating procedures, including Construction in Progress, leasehold improvements, and internal use software.
- Develop and communicate Headquarters performance metrics and dashboard statistics monthly.
- Develop rigorous, transparent process and practices in support of the DHS Audit Resolution Official, as designated under OMB Circular A-50; *Audit Followup*, to ensure audit findings—at dispute between the Auditor and DHS Management—are resolved expeditiously and effectively.
- Engage the Resource Managers Forum in Headquarters' assessments of internal controls.
- Expand efforts to integrate and coordinate management's assessment of internal controls with the Department's Independent Auditor to support the internal control and financial statement audit.
- Integrate effectiveness and efficiency of operations internal control assessments with ongoing risk based financial reporting assessments.
- Improve outreach with DHS Component budget counterparts to better advocate for programs and address issues in a timely fashion.
- Enhance the use of the internal tracking system throughout the Department through consistent monitoring and training.
- Further build on successes achieved through DHS-wide training courses and programs.
- Develop a comprehensive web-based training program on the Anti-Deficiency Act for use across all Components.

In FY 2012, OCFO plans to accomplish the following:

- Develop activities for the integrated financial, acquisition, and asset management system:
 - Finalize the stand up of the demonstration, development, testing and production environments for the TASC solution.
- Continue updates and revisions to the Financial Management Policy Manual.
- Implement a new enterprise-wide tracking and reporting tool, to provide thousands of DHS Headquarters and Component users easy access to and visibility and status of numerous activities and reports related to financial, audit, internal controls and congressional reporting activities.
- Begin planning for new integrated financial, asset, and acquisition system implementation at next DHS component.
- Continue ongoing support and maintenance for TIER.
- Continue risk based internal control assessments to sustain compliance with OMB Circular No. A-123, *Management's Responsibility for Internal Control*.
- Align and report on performance achievements related to the DHS strategic missions and goals defined by the Department's QHSR.
- Lead the Fiscal Year 2014-2018 program resource and performance planning.
- Conduct additional independent program reviews to evaluate and assess issues such as true costs and benefits of programs within the Department.

- Finalize a rigorous, transparent process and practices in support of the DHS Audit Resolution Official, as designated under OMB Circular A-50, to ensure audit findings—at dispute between the Auditor and DHS Management—are resolved expeditiously and effectively.
- Define the key competencies for a grant management operations workforce series and a corresponding grant management certification program to be administered at the funding agency level.
- Establish a mandatory certification program within Headquarters financial services.
- Continue Headquarters financial process improvements to eliminate overpayments and improper payments.
- Work with DHS Components to improve the accuracy of projected outlays.
- Enhanced performance of the BFEM System to track changes on the budget by either or both houses of Congress and creation of budget sets that can be defined for maintaining distinct phases of the budget process.

IV. Justification of Program Changes

**Department of Homeland Security
Departmental Management and Operations
Office of the Chief Financial Officer
Justification of Proposed Changes
(Dollars in Thousands)**

Program Increase #1: CFO Special Access Program Control Office
PPA: Office of the Chief Financial Officer
Program Increase: Positions 6 FTE 3 Dollars \$640

Funding Profile

	FY 2010 Actual			FY 2011 Annualized C.R.			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	0
Program Increase							6	3	640
Total Request	0	0	\$0	0	0	\$0	6	3	\$640

Description of Item

Establish the CFO budgetary and financial management capability to support DHS Chief Procurement Officer (CPO) Office of Selective Acquisitions and the DHS Chief Security Officer (CSO) Special Access Programs Control Officer (SAPCO). The FY 2010 DHS OSA budget funded CSO and CPO divisions to manage the acquisitions for DHS Top Secret and Sensitive Compartmented Information (TS/SCI) and to create the Special Access Programs Control Officer. This request is to establish a base within CFO for critical support to DHS-wide SAPCO work and to the OSA.

Justification

DHS CFO does not currently have a way to systematically protect sensitive information throughout the budget and financial management process. CFO SAPCO will provide that capability through budget and finance personnel who have the appropriate clearances and understanding of the budgetary requirements to establish appropriate policies and procedures and internal controls for this sensitive program. The CFO requests \$0.640 million in FY 2012 to fund 6 positions, 3 FTE. While CFO SAPCO is located within OCFO, it provides budgetary and financial services that benefit the entire department, and will protect sensitive data in the budget and financial processes and support the classified Management Directive. By executing budgets within a secure infrastructure, CFO SAPCO will prevent DHS TS/SCI programs from being vulnerable to compromise. Critical DHS initiatives can be subject to improper execution or compromise if implemented in an unclassified environment. This funding will also provide for information technology modifications, secure telephones and General Services Administration (GSA) approved safes.

Impact on Performance (Relationship of Increase to Strategic Goals)

Increased financial and budgetary accountability for DHS OSA contract awards is crucial to meeting the DHS missions through financial support and oversight of the TS/SCI programs. With the high visibility and dollar amount of DHS OSA and SAPCO programs it is imperative that the CFO is properly resourced to ensure the financial policy and oversight. This office within OCFO fills a

significant gap at DHS. Tailored business support for classified programs, consolidated under Management, will ensure the integrity of the process and unify and strengthen DHS operations and management. Without these resources, the CFO will be unable to manage the DHS OSA and SAPCO functions across DHS, and these programs will be unable to function at DHS.

NOTE: \$11 million for DHS Improved Financial Systems carried was over to FY 2010 from FY2009.

PPA Mission Statement

The mission of the Office of Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department’s budget, financial management, investment review, and resource management systems to ensure funds necessary to carry out the Department’s mission are obtained, allocated, and expended in accordance with the Department’s priorities and relevant law and policies.

Summary Justification and Explanation of Changes

	2010	2011	2012
	Actual	Annualized C.R.	Request
Salaries and Benefits	\$23,362	\$25,132	\$26,972

Salaries and Benefits includes costs for 232 FTEs. The FY 2012 request includes an increase of 10 FTEs in annualization of the Fiscal Year 2010 initiative; an increase in 46 FTEs from the DHS Balanced Workforce initiative; an increase of 3 FTEs in support of SAPCO with a corresponding increase in benefits and a decrease of \$132,000 for efficiencies;

	2010	2011	2012
	Actual	Annualized C.R.	Request
Travel	\$125	\$239	\$133

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request includes a decrease due to administrative savings.

	2010	2011	2012
	Actual	Annualized C.R.	Request
GSA rent	\$2,117	\$2,463	\$3,741

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request includes an increase of \$1,278 for additional space requirements due to an increasing number of personnel for the DHS Balanced Workforce Strategy; and an increase in space requirements due to the SAPCO initiative.

	2010	2011	2012
	Actual	Annualized C.R.	Request
Printing	\$43	\$47	\$47

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2012 request does not anticipate an increase in requirements.

	2010	2011	2012
	Actual	Annualized C.R.	Request
Advisory and Assistance Services	\$17,775	\$46,642	\$20,752

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request reflects a decrease in contractor personnel due to the DHS Balance Workforce Strategy.

	2010	2011	2012
	Actual	Annualized C.R.	Request
Other Services	\$9	\$478	\$1,424

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request includes additional costs due to balanced workforce efforts and in support of the SAPCO initiative.

	2010	2011	2012
	Actual	Annualized C.R.	Request
Purchase from Government Accounts	\$5,748	\$6,920	\$8,900

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2012 request includes an increase for Working Capital Fund expenditures.

	2010	2011	2012
	Actual	Annualized C.R.	Request
Operation & maintenance of facilities	\$77	\$154	\$165

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2012 request includes an increase due to increased personnel in support of the Balanced Workforce Strategy.

	2010	2011	2012
	Actual	Annualized C.R.	Request
Supplies & materials	\$225	\$377	\$261

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request includes a decrease due to administrative savings

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of Federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS Component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or Federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with Federal employees to better realize the full potential of our total workforce – both contracted and Federal. A strong internal core of Federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS Components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for Federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2013 budget.

Position Type	FY 2010 Actual		FY 2011 Continuing Resolution		FY 2011 Annualization		FY 2011 Follow On		FY 2012 Increase		FY2010 – FY2012 DHS Balanced Workforce Strategy

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Office of the Chief Information Officer

I. Appropriation Overview

A. Mission Statement for the Office of the Chief Information Officer:

The Department of Homeland Security (DHS) Office of the Chief Information Officer (OCIO), in collaboration with the DHS Chief Information Officer Council, is responsible for implementing the necessary programs to align the Information Technology (IT) organization, including all of the systems and infrastructure, to support the missions and activities across the Department. Its mission is to provide DHS and its partners the IT services required to lead the unified national effort to prevent and deter terrorist attacks, as well as protect against and respond to threats and hazards to the Homeland.

The Department's goals and priorities will advance IT capabilities and services:

- Establish secure IT services and capabilities to protect the Homeland and enhance our Nation's preparedness, mitigation, and recovery capabilities.
- Strengthen and unify the Department's ability to share information and services internally and with Federal, State, local, tribal, international, and private industry partners.
- Improve transparency, accountability, and efficiencies of services and programs through effective governance and enterprise architecture.
- Develop and implement a comprehensive approach to IT employee recruitment, development, retention, and recognition to ensure excellence in IT delivery across the Department.

B. Budget Activities:

The OCIO activity functions are divided into four major programs as follows:

Salaries and Expenses

Salaries and Expenses is a crosscutting program that provides executive leadership, technology management, and supporting acquisition and financial functions to all offices within the OCIO. This Program, Project, and Activity (PPA) also covers payments for shared services consumed such as rent, mail services, contracting support, and financial management support received from other management chiefs' offices. It covers the IT security function which sets IT security policy, provides security architecture, certification and accreditation (C&A) remediation, Federal Information Security Management Act (FISMA) compliance and oversight, and IT awareness and training programs. This PPA also includes the Office of Accessible Systems and Technology (OAST), which provides guidance and oversight to all DHS Components on implementing and

maintaining initiatives to ensure that electronic and technological information is accessible to DHS employees and customers with disabilities. Salaries and Expenses also provide Operations and Maintenance (O&M) of legacy infrastructure, as well as O&M of new information technology infrastructure investments.

Information Technology Services

Information Technology Services supports development, implementation, and maintenance of IT functional services including enterprise architecture, enterprise data management, information sharing, IT strategic policy and planning, performance measurement, capital planning and investment control (CPIC), and portfolio management. It also covers geospatial technologies, application delivery, enterprise hosting, and portal consolidation.

Infrastructure and Security Activities (ISA)

ISA is a set of IT projects that provide the integration and protection of sensitive and collateral DHS information. In FY 2012, the DHS OCIO will continue its efforts to consolidate disparate data centers into two DHS Data Centers, establish disaster recovery capability for primary DHS systems, and consolidate multiple disparate networks into DHS OneNet. This PPA also provides funds to manage infrastructure support to include network services, data center services, and application support for DHS Component enterprise applications, maintain Trusted Internet Connection (TIC) capability, and move all network traffic behind the TIC. The DHS OCIO's immediate and long-term goal is to protect our IT resources from cyber threats, provide One DHS Infrastructure platform, and foster information sharing across the Department and with external stakeholders such as Federal, State, and local government agencies and their partners.

Homeland Secure Data Network (HSDN)

The Homeland Secure Data Network (HSDN) is a single program within DHS that enables agencies to collaborate and communicate effectively at a SECRET-classified level among Federal and State governments and supporting entities. With HSDN capabilities, DHS has the ability to collect, disseminate, and exchange both tactical and strategic SECRET-level information throughout DHS and DHS partners.

C. Budget Request Summary:

The OCIO requests \$277.973M and 303 FTP/291 FTE for the FY 2012 Budget. The total net Adjustment-to-Base is a decrease of \$92.674M, 22 FTP and 70 FTE. The Adjustments-to-Base are as follows:

- Annualization of 22 FTP and 70 FTE for the DHS Balanced Workforce Strategy.
- Decrease of \$1.777M due to Management and Technology Efficiencies.
- Decrease of \$8.204M for Administrative Savings Initiative.
- Decrease of \$85.291M for Data Center Migration completed segments.
- Decrease of \$0.343M for Efficiency Review Savings.

OCIO requests a net increase of \$32.253M for the following program changes in FY 2012:

- An increase of \$32.300M for Information Security and Infrastructure.
- An increase of \$1.000M for 5 FTP/ 3 FTE in the Office of Accessible Systems and Technology.
- An increase of \$2.700M for Enterprise-wide IT Governance and Program Management Support.
- An increase of \$5.000M for Information Security and FISMA Compliance.
- An increase of \$7.600M for Enterprise Data Management Office.
- An increase of \$0.253M for Acquisition Workforce Strategy Support.
- A decrease of (\$1.100M) for Applied Information Technology and Research Services.
- A decrease of (\$5.200M) for Infrastructure Operations.
- A decrease of (\$10.300M) for base resources.

II. Summary of FY 2012 Budget Estimates by Program/Project Activity (PPA)

**Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer**

Summary of FY 2012 Budget Estimates by Program/Project Activity
FY 2012 Request
(Dollars in Thousands)

Program/Project Activity	FY 2010 Actual		FY 2011 C.R.		FY 2012 Request		Increase (+) or Decrease (-) For FY 2012					
							Total Changes		Program Changes		Adjustments-to-Base	
	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT
Salaries and Expenses	110	93,453	140	86,912	291	105,578	151	18,666	4	(2,047)	147	20,713
Information Technology Services	30	49,669	72	51,417	---	38,800	(72)	(12,617)	---	9,100	(72)	(21,717)
Infrastructure and Security Activities	---	158,199	---	152,403	---	89,525	---	(62,878)	---	27,700	---	(90,578)

Homeland Secure Data Network	---	48,138	5	47,661	---	44,069	(5)	(3,592)	---	(2,500)	(5)	(1,092)
Subtotal, Enacted Appropriations and Budget Estimates	140	\$349,680	217	\$338,393	291	\$277,972	74	(\$60,421)	4	\$32,253	70	(\$92,674)
Less: Adjustments for Other Funding Sources:												
Net, Enacted Appropriations and Budget Estimates	140	\$349,680	217	\$338,393	291	\$277,972	74	(\$60,421)	4	\$32,253	70	(\$92,674)

Footnotes:

The \$89.525M reflects the amount required for Infrastructure and Security Activities for FY 2012. This is \$7.064M above stated in the Budget Appendix.

The \$44.069M reflects the amount required for Homeland Secure Data Network for FY 2012. This is \$7.064M below stated in the Budget Appendix.

III. Current Services Program Description by PPA

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer
Program Performance Justification

(Dollars in thousands)

PPA: Salaries and Expenses

	Perm		
	Pos	FTE	Amount
2010 Actual	130	110	\$93,453
2011 CR	195	140	86,912
2012 Adjustments-to-Base	101	147	20,713
2012 Current Services	296	287	107,625
2012 Program Change	7	4	(2,047)
2012 Request	303	291	105,578

The Office of the Chief Information Officer (OCIO) requests \$105.578M for this activity. The Adjustments-to-Base include Working Capital Fund increases and transfers associated with the consolidation of federal staff costs to a single PPA. In FY 2012, 147 FTE and funding are proposed to be realigned from CIO's Department-wide IT projects to Salaries and Expense as a result of the DHS Balanced Workforce Strategy.

CURRENT SERVICES PROGRAM DESCRIPTION:

Information Security Program

The Information Security Program provides oversight to ensure a secure and trusted computing environment that enables the Department to effectively share information in support of its mission. It also ensures compliance with the FISMA and National Institute of Standards and Technology (NIST) security policies and requirements. The services of the program are to develop and document Departmental information security requirements, develop enterprise security management tools, and oversee the implementation of information security for the information and systems that support the operations of the Department. Specifically, the program provides:

- **Security Policy** – Establishes and implements DHS information security policies and guidance to ensure the protection of DHS information resources, and incorporates new information security requirements and best practices promulgated by Congress, the Office of Management and Budget (OMB), Homeland Security Presidential Directives (HSPDs), and NIST.
- **Security Architecture/Strategy** -- Supports information sharing and interoperability by integrating information security architecture with the DHS Enterprise Architecture (EA), System Engineering Life Cycle (SELC), CPIC, and acquisition processes. The Security Architecture program develops enterprise procedures for dealing with cyber attacks,

incidents, and newly discovered vulnerabilities, including patch management. Additionally, the Security Architecture program assesses technologies that show the greatest promise for enhancing information sharing and security and that can be scaled for enterprise application.

- **Compliance and Oversight** – Comprises the management and oversight of the IT system inventory, the C&A process, Plans of Action and Milestones (POA&M), FISMA reporting, the implementation of security management tools, and assistance with Component compliance. The program also includes oversight of weakness remediation to resolve IT security weaknesses. This activity supports security metrics verification and enhancements to security tools to integrate functionality to improve FISMA compliance management and reporting.
- **DHS IT Security Awareness, Training, and Education** -- Ensures that DHS complies with all federal regulation, OMB guidance, and NIST guidance relating to IT Security Training and supports the standardization of security content development within the Department. The IT Security Training Program provides IT Security Awareness, role-based IT security training for personnel with significant security responsibilities, and provides role-based training to improve reporting for FISMA and related metrics.

FY 2010 Accomplishments

- Improved the Department's classified cyber threat information processing capability and improved the analytical capability by doubling the number of skilled analysts and developing formal relationships with key stakeholders in the broader cyber community (Department of Defense, Department of Justice, and the Intelligence Community).
- Conducted in-depth Technical Reviews for approximately 20% of the Department's IT systems to assess quality assurance and validate compliance with DHS security requirements.
- Implemented weakness remediation plans for operational systems by focusing on effective POA&M management.

FY 2011 Planned Accomplishments

- Continue to improve the Department's classified cyber threat information processing capability and improve the analytical capability to better understand and respond to sophisticated threats.
- Develop a comprehensive plan for implementing an OMB-mandated continuous monitoring capability.
- Continue the implementation of the Information Security Strategic Plan.
- Conduct in-depth Technical Reviews for an additional 20% of the Department's IT systems to assess quality assurance and validate compliance with DHS security requirements.

FY 2012 Planned Accomplishments

- Conduct Coordinated Focused Operations against the Advanced Persistent Threat from dedicated secure facility with improved tools.
- Fully implement a continuous monitoring capability to provide the full visibility required for tracking the progression of attacks to ensure mitigation and remediation.
- Improve governance and compliance for National Security Systems with integrated policy, improved architecture, and greater visibility.
- Conduct in-depth Technical Reviews for an additional 20% of the Department's IT systems to assess quality assurance and validate compliance with DHS security requirements.

Infrastructure Operations

Infrastructure Operations (IO) includes initiatives for IT security and continuity operations. These offices provide alternate sites with necessary IT communications capabilities to support emergency operations during periods of activation by the President or the DHS Secretary for Continuity of Operations (COOP).

It is critical that DHS and its Components ensure that the information residing, created, received, transmitted within, and shared by the Department is secured in a manner that complies with Federal Acts, Memorandums, Circulars, Executive Orders, and Presidential Directives. OCIO has a leadership role in meeting the requirements and using best practices to ensure the viability of systems that support the DHS business missions. This entails ensuring that systems and accompanying security controls and measures are functional and active. This is accomplished through the use of security software residing on the DHS network.

In accordance with Presidential Decision Directive 67, Federal Continuity Directive 1 (FCD1) and HSPD-20: National Continuity Policy, Federal agencies are mandated to develop COOP plans. A COOP facilitates the performance of, and is crucial to, the business continuity of the Department's critical systems and functions during an emergency or any other situation that may disrupt normal operation. It is essential to have business functions that continue the DHS mission of securing the Homeland.

As such, IT becomes a critical element of business continuity. It is the role of IT to ensure that the Department's defined Emergency Response Group (ERG) requirements are met and critical program data is available. The justification for availability of systems and data must be tied directly to a credible estimate of operational performance. This can be completed with an assessment of the Department's current state, which defines the risks associated with mission-critical systems and the political repercussion of those losses.

FY 2010 Accomplishments

- Renewed McAfee and Control Management Data Base Tool Suite Security Software.
- Maintained COOP site operations.
- Implemented C-LAN Disaster Recovery COOP.
- Built out connectivity, redundancy, and IT security at the Under Secretary for Management (USM) COOP site.
- Refreshed A-LAN, HSDN, and C-LAN workstations.

FY 2011 Planned Accomplishments

- Enhance COOP site capabilities and operations to comply with Federal directives and mandates.
- Complete first assessment of mitigation and capability for the Department's critical enterprise systems.
- Upgrade and improve CF1 at Site A in order to provide core enterprise services for ERG members in support of mission-essential functions.

FY 2012 Planned Accomplishments

- Develop a solid OCIO COOP plan and necessary assessments to mitigate the risks inherent in natural disaster, terrorist, and criminal threats.
- Implement a storage area network (SAN) to provide vital records and supplemental documentation in support of mission-essential functions for ERG members.

Applications Operations & Maintenance (AO&M)

The AO&M program maintains and oversees the Department's Private Cloud. Services in this environment include the development, test, and production infrastructure within both DHS enterprise data centers to support the efficient development and implementation of enterprise application services. The AO&M program also provides ongoing maintenance and operations of enterprise application services, and implements necessary controls and procedures to enable the cost effective delivery of secure services. These funds also provide operational support for the Department's first Public Cloud offering, Enterprise Content Delivery as a Service.

FY 2010 Accomplishments

- Established a secure private cloud development and test infrastructure within both enterprise data centers for development of enterprise application services, reducing the time to provision new infrastructure services from 6-12 months to less than one month.
- Developed and implemented the virtualization framework to enable rapid provisioning of secure development/test/production environments and reduced overall operational costs.
- Established SharePoint as a Service in both enterprise data centers, eliminating the U.S. Citizenship and Immigration Service's (USCIS) need to build a collaboration capability.
- Established the second DHS Public Cloud offering by hosting restorethegulf.gov in the Amazon Cloud hosting center.
- By the end of FY 2010, 70% of the DHS primary websites were using the Cloud Content Delivery Service.

FY 2011 Planned Accomplishments

- Deploy more than 250 virtual machines across both data centers.
- Establish the target Private Cloud, SharePoint as a Service, for all of DHS with Customs and Border Protection (CBP) as the first customer.
- Provide Testing as a Service within the DHS Private Cloud.

FY 2012 Planned Accomplishments

- Significantly increase the use of the DHS Private Cloud per the OMB 25 Point Implementation Plan to Reform Federal Information Technology Management by operating more than 500 virtual machines at the two DHS data centers.
- Provide quarterly updates to the Private Cloud System Development Kit.
- Achieve FISMA categorization of "high" for confidentiality/integrity/availability for production Private Cloud services.

Infrastructure Transformation Program (ITP) Operations

ITP is part of ongoing efforts to optimize the DHS IT infrastructure and increase the Department's effectiveness and efficiencies in information technology. The program is led by the CIO and each project, or domain, is led by a Component acting as a steward. The ITP represents an enterprise-wide transition toward developing, implementing, and managing cross organizational efforts. ITP's primary objective is to provide the IT infrastructure products and services that will enable DHS business units to accomplish mission objectives. IT Operations supports DHS's efforts to optimize IT infrastructure by providing Configuration Management support. ITP Operations also offsets increased O&M charges and previously funded ITP investments incurred while transforming and migrating seven wide area networks, consolidating component legacy data centers, and centralizing email and wireless services.

FY 2010 Accomplishments

- Provided for Directory Services and Exchange Services (DSES) at Martinsburg for Email Gateway Services. Email will be transitioned to the Data Centers in FY 2011.
- Supported core circuits and network connections that serve data centers and other central points of the DHS OneNet infrastructure.

FY 2011 Planned Accomplishments

- Develop and plan the integration and migration of a unified set of system management tools to provide configuration management and change management for the consolidated DHS IT infrastructure.
- Establish and manage a process for the systematic management of information related to the IT infrastructure components, such as documentation, hardware, software, and firmware assets.

FY 2012 Planned Accomplishments

- Operations of the DHS CM Tool Suite (Change Management Tool and CMDB), the key DHS-level repository of change management and configuration item data.
- Support for the facilitation and administration of the DHS CM Integrated Project Team; basic change request quality checking; and support of branch processes carried out using existing tools.

The Office of Accessible Systems & Technology (OAST)

The OAST program provides guidance, support, and compliance oversight to DHS Components regarding the implementation of Section 508 of the Rehabilitation Act (as amended). This is accomplished by ensuring that qualified individuals with disabilities have fair opportunity for employment and that these individuals have access to the information necessary to perform their jobs. OAST develops policies, training, and technical assistance approaches to ensure that all information technology (EIT) procured, developed, maintained, or used is accessible to those with disabilities.

Compliance activities include: Management and oversight of the Web Accessibility and Remediation Program (WARP), Section 508 Acquisition Audit Program, Trusted Agent FISMA (TAF) Section 508 Audit Program, and Section 508 Compliance Enterprise Architecture and Life Cycle Programs. Oversight involves conducting compliance reviews, assistance visits, and verifying and validating compliance with DHS Section 508 requirements. These efforts ensure the following: regular Web accessibility scans are completed and that OAST-approved testing methods are followed; acquisition audits for Section 508 compliance are conducted on a routine basis; IT system owners have appropriately input the required accessibility information into TAF and uploaded the requisite Section 508 artifacts; Enterprise Architecture Section 508 compliance reviews are conducted; and, Section 508 requirements for the DHS SELC are adhered to.

Service activities include: Management and oversight of Section 508 compliance for DHS IT Change Management and the Learning Management System (LMS) Accessibility Assessment Programs. Oversight involves conducting EIT accessibility assessments of software, Web, telecommunications, multimedia and video, self-contained and stand-alone products, and desktop and portable computers to determine Section 508 compliance. Oversight also requires a close working relationship with the Department's LMSs to ensure e-learning platforms and courses are Section 508 compliant when deployed.

Management activities include: Management and oversight of OAST operations, including contract management, strategic planning, and administrative support and operations. The program is also responsible for managing and operating the DHS Accessibility Help Desk, along with the training and outreach activities. The Accessibility Help Desk serves as a single point of

entry for disability-related services and technical assistance for the Department. The goal of the program is to work in concert with existing DHS and Component-level help desks to ensure seamless delivery of IT services for customers with disabilities, including the provision of reasonable accommodations. The training program provides Section 508 awareness with hands-on EIT accessibility testing training for personnel with significant development responsibilities. In addition, the program provides role-based training for relevant Section 508-related reporting and related metrics. The goal is to develop a knowledgeable workforce and culture in accordance with Section 508 accessibility requirements.

FY 2010 Accomplishments

- Established an initial enterprise-wide Accessibility Compliance Management System to track Section 508 and accessibility-related activities along with accomplishments.
- Piloted enhanced Section 508 compliance enterprise-class Web testing tools.
- Released new online introduction to Section 508 compliance e-learning course and developed new Program Manager's Section 508 course.
- Piloted IT Acquisition Review audit process to determine Section 508 compliance of IT acquisitions over \$2.5M.

FY 2011 Planned Accomplishments

- Enhance the EIT acquisition reviews by implementing auditing procedures.
- Enhance training delivery methods to increase access from remote locations.
- Release the DHS Section 508 periodic reporting scorecard based upon standard metrics.
- Complete the first of three-year data collection of Section 508 compliance of FISMA systems.
- Create a shared Section 508 compliance testing repository to reduce duplication of testing efforts.
- Assess DHS Section 508 compliance through the completion of the Department of Justice Section 508 survey.

FY 2012 Planned Accomplishments

- Continue integration of Section 508 compliance.
- Fully deploy an enterprise-wide Section 508 compliance Web assessment tool to standardize testing activities Department-wide, and increase efficiency of sharing results through the life cycle.
- Fully support IT governance activities, including IT acquisition review and audit, IT change control, and enterprise architecture review.
- Develop and release new training products to support compliance with updates to the Section 508 standards.

DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of Federal employees, supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house Federal employees and contractor support with proven experience, and other resources to balance the entire DHS workforce. Pursuant to section 736 of Division D from the Omnibus Appropriations Act, 2009, P.L. 111-8, DHS is required to provide guidelines to Component agencies in order to facilitate consistent and sound application of the statutory requirement.

The DHS Balanced Workforce Strategy ensures that only Federal employees perform work which is inherently governmental. Inherently governmental functions could include work that needs to be

reserved to the public sector to maintain control of and sustain agency operations, as well as obtain contract services when it is appropriate and cost-effective. After conducting a workforce planning assessment, the Department realigned contractor and Federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allowed managers to understand how contract employees are deployed throughout their organization, and integrated with Federal employees to realize the full potential of the total workforce. A strong internal core of Federal employees will build in-house capacity and institutional knowledge which is essential to effective government performance.

In FY 2012, the OCIO will have 209 positions on-board as a result of contractor conversions and program realignment. These positions stem from program realignments completed in FY 2009 and FY 2010.

PPA: Information Technology Services

	Perm Pos	FTE	Amount
2010 Actual	30	30	\$49,669
2011 CR	74	72	51,417
2012 Adjustments-to-Base	-74	-72	(21,717)
2012 Current Services	0	0	29,700
2012 Program Change	0	0	9,100
2012 Request*	0	0	38,800

The OCIO requests \$38.800M for Information Technology Services. The Adjustments-to-Base are a result of realignment of Departmental CIO priorities, professional service contract reductions, and a realignment of base program funds due to the CIO's Balanced Workforce Strategy. The OCIO requests a realignment of 72 FTE from this PPA to the Salaries and Expenses PPA.

CURRENT SERVICES PROGRAM DESCRIPTION:

Enterprise Architecture (EA)

Enterprise Architecture (EA) supports a "blueprint" for systematically and completely defining DHS's baseline environment, target environment, and transition plan to a common IT environment. The program establishes a Department-wide roadmap to improve mission effectiveness and efficiency, eliminate existing stovepipe systems, and increase interoperability and information sharing. The EA ensures the essential evolution of information systems and the development of a common IT environment.

FY 2010 Accomplishments

- Implemented a common methodology for analyzing segments of the Homeland Security Enterprise Architecture. Used the methodology to coordinate strategic planning, mission and business operations, and IT implementation for human resources information technology and critical infrastructure and key resources.
- Implemented an Identity, Credentialing, and Access Management (ICAM) architecture that defines identity and access requirements for all DHS programs.
- Used the Homeland Security Enterprise Architecture to guide the IT Portfolio Governance Reviews, resulting in more than \$449 million in savings potential.
- Implemented the Enterprise Architecture Information Repository to automate the management and tracking of DHS databases and information sharing agreements.

FY 2011 Planned Accomplishments

- Achieve cost avoidance and/or efficiency improvements of at least \$25 million by rationalizing the portfolio of IT applications and standardizing processes and technologies in four additional segments of the Homeland Security Enterprise Architecture.
- Implement a common Enterprise Architecture Data Model to enable better decision support capabilities for strategic planning, budgeting, and acquisition review of information technology and reduce the number of analytical tools used to make management decisions.
- Use the Enterprise Architecture to identify opportunities to use technology to close gaps in the Department's ability to meet its mission objectives.

- Deploy a formal enterprise architecture communications plan and training curriculum to meet stakeholders' needs.

FY 2012 Planned Accomplishments

- Demonstrate benefits of the DHS EA process for cost avoidance and/or efficiency improvements of at least \$25M as part of the ongoing role of enterprise architecture governance to improve efficiency.
- Implement an enhanced EA Information Repository to support IT portfolio planning and analysis.
- Complete Segment Architecture planning for four new segments of the Homeland Security EA as an enhancement to FY 2011.
- Document the transition to the DHS target architecture for 100% of all data center wide area network needs.

Enterprise Data Management

The Enterprise Data Management program provides the architecture and governance for the utilization of data assets within the Department. The Enterprise Data Management Office (EDMO) establishes the guidance and oversight to DHS for data policy, data management, and data stewardship. The program supports the development of the Department-wide roadmap for trusted and reliable data to improve mission effectiveness and efficiency, eliminate existing stovepipe data systems, increase interoperability, and information sharing. Data architecture is the key governance tool to assure mission needs drive technology investments. Additionally, through the use of data architecture practices and the use of the Data Reference Model (DRM), EDMO is expected to recommend realignment of IT investments or acquisitions through the identification of targets from an estimated reduction of \$10 million in annual IT costs by reducing the maintenance costs of existing systems or driving common requirements for the development of centralized services. The EDMO holds the primary responsibility for the adoption, training, and implementation of the National Information Exchange Model (NIEM) within the Department, focusing particularly on the enablement of information sharing, reuse of information, and management of information as an enterprise asset. The model is designed to develop, disseminate and support enterprise-wide information exchange standards and processes that can enable jurisdictions to effectively share critical information in emergency situations, as well as support the day-to-day operations of agencies throughout the nation. NIEM enables information sharing, focusing on information exchanged among organizations as part of their current or intended business practices. By focusing on NIEM, the EDMO accelerates the implementation of the Federal Enterprise Architecture (FEA) DRM at the enterprise level.

Since September 2008, the EDMO has been serving as the lead Program Management Office of the NIEM program for the U.S. Government and its State, local, tribal and private sector partners. Current challenges point to the reality that collaboration across the boundaries of units, organizations and sectors is difficult. The NIEM program has progressed to a level where it can act as the framework for establishing government-wide, cross-domain information exchanges. NIEM is the core standards process and framework for the counter-terrorism, homeland security, and weapons of mass destruction Information Sharing Environment. The EDMO is also driving a common vocabulary and processes for the development of national level information exchanges such as the nationwide Suspicious Activity Report standard.

In addition, NIEM was used as the basis for recipient reporting to support Recovery Act transparency requirements, due to the demand from State and local governments for standardization reporting. As of October 2010, NIEM has three Federal agencies – Department of Justice (DOJ), DHS, and Health

and Human Services (HHS) – which are strategic sponsors. In addition, ten other Cabinet Agencies or E-Gov Lines of Business have reported commitments to use, and another seven are evaluating. In December 2010, the NIEM Cyber domain was established to enhance cyber information sharing capabilities and improve the effectiveness of cyber incident response efforts.

The EDMO Federal staff is currently funded under the Salaries & Expenses PPA and will continue to be funded in this PPA in the future.

FY 2010 Accomplishments

- Developed the baseline to understand the “Total Cost of Data” (i.e., the total cost to maintain and store data) within the Department.
- Demonstrated cost avoidance of \$10M in the reduction of new development through discovery and re-use of existing assets, by use of the Data Asset Repository (DAR) and/or the NIEM implementation.
- Implemented a quarterly enterprise data management scorecard to assess data architecture, information sharing, data governance, and performance measures.
- Performed outreach and training to more than 16 external Federal agencies on best practices, key strategies, and reusable methodologies focusing on the use of NIEM and effective Enterprise Data Management within an agency’s enterprise architecture.

FY 2011 Planned Accomplishments

- Demonstrated \$10M cost avoidance as Department IT spending shifts from the O&M phase to the Design, Modernization and Enhancements (DME) phase through the discovery and re-use of data.
- Demonstrated \$4M cost savings in the DME phase due to increases in data architecture best practices such as the use of NIEM as the common vocabulary.
- Implement a formal NIEM Training Curriculum to the Department to meet the needs of Federal, State, local, tribal, territorial and private sector stakeholders.
- Increase the rate of NIEM adoption to 90% for all new development in the major DHS IT Level 1 and 2 Programs.

FY 2012 Planned Accomplishments

- Identification and governance for trusted authoritative data sources within three major target segment architectures (Screening, Law Enforcement, Intelligence).
- Develop platform for Data as a Service based on NIEM based standard exchanges.
- Develop an information dissemination program in support of the OMB Open Government Initiative Directive to institutionalize public dissemination of releasable information for all major DHS IT Level 1 and 2 Programs.
- Increase the rate of NIEM adoption and guidance for the sharing of personally identifiable information by integrating the DHS, DOJ, and HHS privacy architecture and frameworks into NIEM.

Geospatial Management Office (GMO)

The Geospatial Management Office (GMO) serves as the central point of coordination for the maturing geospatial investments across the Department by providing oversight and guidance to DHS Components for geospatial policy and technology matters. The GMO executes a comprehensive program that enables the effective, collaborative, and integrated application of geospatial capabilities. This enables Homeland Security stakeholders the ability to analyze and visualize their mission data from a mapping perspective. Such capabilities leverage base geographic data, mission specific

data/infrastructure, satellite imagery, geo-coding services and geo-analytical tools. DHS requires coordinated and, in some cases, consolidated enterprise geospatial solutions for emergency management, law enforcement, and other Homeland Security mission objectives to ensure efficient and cost-effective shared usage of geospatial assets. The GMO is also a participant in the Geospatial Platform interagency collaboration effort directed by OMB to offer a managed portfolio of common geospatial data, services, and applications. This portfolio is administered by trusted sources and hosted on a shared infrastructure.

FY 2010 Accomplishments

- Established an Enterprise Subscription Service for Microsoft Bing Maps imagery, geo-coding services, base maps, and street level traffic navigation and camera feeds.
- Enhanced the Geospatial Information Infrastructure (GII) support services to provide an infrastructure to meet both common and mission-specific geospatial requirements of DHS Components. The requirements included the ability to geo-code and view a Component's mission business data (e.g., critical infrastructure) on a map with a street side view of a facility and perform a perimeter buffer analysis in proximity to a Suspicious Activity Report.
- Achieved initial operating capability of the Positioning, Navigation and Timing (PNT) Incident Portal for collection of interference reports with standardized reporting format and automatic notification of incidents and updates.
- Completed the Federal Geospatial Concept of Operations (GEOCONOP) for catastrophic disaster scenarios.

FY 2011 Planned Accomplishments

- Renegotiate the enterprise agreement for the Environmental Systems Research Institute (ESRI) Smart-Buy investment from an acquisition and growth model to an O&M cost model.
- Establish an enterprise license for business data for the Department similar to the imagery subscription service accomplished in FY 2010. Implement shared enterprise services for aerial photography, streaming video, imagery feature functionalities and map services.
- Establish DHS commercial professional services contracts to provide remote sensing support for incident management missions including FEMA's disaster declarations and other emergency events.
- Lead the coordinated design, development, and deployment of the National Operations Center's Common Operating Picture (NOC/COP) in support of Operations Coordination and Planning. The NOC/COP initiative, coupled with the GMO's support to the Information Sharing Governance Board's COP Integrated Project Team will result in the development of the Department's COP Segment Architecture.
- Develop and prototype the enhanced Positioning, Navigation and Timing (PNT) Jammer Location (eJLOC) system for monitoring the Global Positioning System (GPS) signal and integrate the National Oceanic and Atmospheric Administration's 1400 Continuously Operating References Stations (CORS) for near real-time monitoring of interference; deliver geo-enabled GPS interference data feeds supplied by Patriot Watch, which is an integration of multiple systems to collect GPS signal interference data for the Homeland Security community through the Homeland Security Information Network (HSIN).

FY 2012 Planned Accomplishments

- Enhance the Geospatial Information Infrastructure (GII) to increase number of enterprise-wide services available for reuse including services for aerial photography, streaming video, imagery feature functionalities and map services.
- Outreach on the GEOCONOPS into national level response exercises and recovery planning and adoption by Federal, State, local, tribal, territorial and private sector partners.
- Deployment of a common framework for Enterprise COP/UDOP and increase of Geospatial Data as a Service (GeoDaaS).

Cyber Identity and Credentialing (Smartcard)

The Cyber Identity management function establishes the verification of user identity to ensure that they have appropriate access to data and systems that support their mission function. HSPD-12 requires the issuance of a “secure and reliable form of identification” based on sound criteria for verifying an individual’s identity. This identification must be strongly resistant to identity fraud, tampering, counterfeiting and terrorist exploitation, and should have the ability to be rapidly authenticated electronically for all employees and contractors. The prescribed identification credential that will meet these requirements is a Smartcard. Smartcard technology coupled with the required Public Key Infrastructure (PKI) provides a high assurance token to be used as the basis for logical access to Departmental IT systems. This approach supports the enablement of Single Sign-On (SSO), Attribute Based Access Control (ABAC), and federated access control solutions. The combination of these solutions offer a high level of security as well as efficient user access to the Department’s information systems while allowing information sharing with the Department’s outward facing partners including other Federal agencies and State, local and tribal governments.

FY 2010 Accomplishments

- Completed full operational capability for the Enterprise Identity Management System (EIMS) which supports the verification of user identities.
- Implemented usage of HSPD-12 Smartcards for logical access at DHS Headquarters and provided implementation guidance to other DHS Components.

FY 2011 Planned Accomplishments

- Complete the deployment of the Disaster Recovery System for Enterprise Identity Management Systems (EIMS).
- Finalize the planning for enterprise-wide implementation of role-based and attribute-based logical access control system in leveraging DHS’s Identity, Credential and Access Management (ICAM) Segment Architecture. The goal is to increase DHS’s ability to securely share and provide access to critical information to the people who need it when they need it.

FY 2012 Planned Accomplishments

- DHS will begin implementation of an enterprise-wide role-based, attribute-based logical access control system. A key building block of this effort will be to work with key authoritative identity source owners to develop an integrated Identity Attribute Data Store (IADS). This effort will enhance authentication capabilities from a username/password-based system to a more secure Personal Identity Verification (PIV)-enabled authentication environment for DHS employees and contractors.
- Implement the usage of HSPD-12 Smartcards for logical access to all DHS Components and domains.

- Issue agency-specific policies addressing the recognition of externally-issued credentials that shall follow the trust framework processes established by the Federal CIO Council.
- Implement guidance on how to consume external credentials and identity records.
- Pilot the enablement of public facing applications to accept third party credentials, as appropriate.

Enterprise Application Delivery (EAD)

DHS is aggressively moving to a Cloud-based, on-demand set of service offerings as part of our Data Center Migration and Defense-in-Depth strategies. The benefits to adopting Cloud-type architectures include but not limited to: reduction in the time to market for new capabilities, increased efficiencies by reusing existing capabilities (platforms, code, etc.), enhanced adoption of green technologies, and streamlined governance requirements. Enterprise Application Delivery (EAD) is leading the Transformation Through Innovation (TTI) approach in providing the planning and delivery of secure, high-quality enterprise application services for DHS customers as part of the DHS Private and Public Cloud initiative. FY 2012 funding would ensure that two the DHS CIO high priority initiatives are executed by establishing robust Cloud services and deploying a Department-wide service catalog to enhance the consumer experience for DHS services. These efforts will be executed as part of the DHS Applications Services Council, which consists of DHS Component CIO representatives, who will collaborate on establishing the capabilities and service level agreements (SLAs) required to achieve Cloud services.

FY 2010 Accomplishments

- Established and base-lined key enterprise platform and software services to reduce overall cost and timeframe associated with the development of enterprise and HQ applications.
- Deployed more than 20 applications across 100 virtual machines within the DHS Private Cloud, at both enterprise data centers.
- Established Phase One of the Application Lifecycle Management (ALM) service for end-to-end management of requirements and delivery of enterprise services. Established streamlined development standards and procedures that outlined common evaluation criteria for quality assurance. Established agile certification processes to accelerate certification of reusable platforms and services to reduce implementation delays.
- Implemented one of the largest intranets in the Federal government with over 200,000 daily users, providing a key information sharing capability for internal communications.

FY 2011 Planned Accomplishments

- Sunset the last of nine operational platforms and migrate to the DHS Private Cloud.
- Deploy WebSphere as a Service as part of the DHS Private Cloud.
- Deploy a pilot Mobile service offering as part of the DHS Private Cloud.
- Pilot Public Cloud Services for DHS public facing websites.

FY 2012 Planned Accomplishments

- Deploy highly secure, highly available production and staging infrastructure as part of the DHS Private Cloud. This environment will be able to support mission critical application hosting requirements.
- Consolidate 25% of the Components' Development and Test services into the target DHS Private Cloud environment.
- Establish a minimum of 25 services for re-use across the enterprise to reduce the time to market for new capabilities.

Program Management Support

The OCIO Program Management Support is responsible for Program Management (PM) services to the OCIO, DHS management, and Component programs to maximize DHS IT program productivity. The Enterprise Business Management Office (EBMO) provides strategic planning, performance measurement, resource management and analysis, enterprise portfolio governance, IT governance, and program management support services to all DHS programs. EBMO also provides Component advocacy support services as well as managing the DHS CPIC process to ensure effective resource allocation across the Department's IT investments. EBMO is responsible for the monthly updates to the Federal IT Dashboard. EBMO also manages the DHS e-Government, Paperwork Reduction Act, and Privacy Act initiatives across all DHS investments.

The EBMO Federal staff is currently funded under the Salaries & Expenses PPA and will continue to be funded in this PPA in the future.

FY 2010 Accomplishments

- The DHS CIO conducted reviews of 81 major DHS IT programs, evaluating scope, schedule, budget, risk, and other key program management issues. As a result of the reviews, the DHS CIO identified 22 DHS programs as underperforming.
- Held TechStat reviews on the three IT programs designated as high risk by OMB. As a result of the TechStat, FEMA National Flood Insurance Program Information Technology Systems and Services (NFIP ITSS) was terminated, saving \$28.8 million over a three-year period.
- Revised the existing DHS IT Strategic Plan in coordination with DHS and Component CIOs to identify the highest priority initiatives for supporting DHS IT strategic objectives.
- Stood up six Executive Steering Committees (ESCs) and three pilot Portfolio Steering Committees (PSCs) as part of the initiative to improve IT program and portfolio governance across the Department.

FY 2011 Planned Accomplishments

- Begin development of a Program Management Center of Excellence (PMCoE) to provide direct assistance services to DHS Programs for tailoring IT development and deployment consistent with Management Directive 102-01 and the SELC. The goal is to facilitate more effective and efficient program reviews with respect to enterprise architecture, functional portfolios, Management Directive 0007 for IT procurements, and Acquisition Decision Events.
- Initiate a customer advocacy function to assist DHS Components in conducting successful programs by assisting with planning, programming, budgeting, and program tailoring according to the SELC with the use of agile development methods, the migration to data centers, and the facilitation of program decision reviews.

FY 2012 Planned Accomplishments

- Provide improved Performance Management Services through performance assessments of IT investments by providing information and analyses regarding DHS-wide IT plans and expenditures through the measuring and monitoring the status and performance of programs, projects, and contracts.
- Manage the annual IT strategic planning process by coordinating IT strategic plans and tactical implementation of DHS CIO priorities with Components and Headquarters; the development of the IT Resource Allocation Process; the development of DHS OCIO performance measures and a

framework for measuring IT performance; and, the IT Performance and Reporting process for the common DHS IT Infrastructure and other enterprise programs and investments.

- Expand on the Department's current CPIC capacity by providing one-on-one training with Components to fully understand OMB's expectations on the Exhibit 300 and Exhibit 53 submission.
- Fully implement Component advocacy services through dedicated, focused advocacy to DHS Component and Headquarters entities by understanding their strategies and plans. Advocacy services will provide Components with advisory expertise on compliance with applicable regulations, policies, and directives in a consistent manner across DHS.

E-Gov Initiatives

This program supports enterprise-level information management services across the Department of Homeland Security under the OCIO EBMO. The Electronic Government (E-Gov) Program Management Office (PMO) works with OMB and various internal and external stakeholders to ensure the Department remains in compliance with E-Gov policies and mandates. The PMO seeks to drive progress through the use of Internet-based technologies to make it easier for citizens and businesses to interact with the Federal Government, save taxpayer dollars, and streamline citizen participation. In coordination with the Open Government directive, this program supports the commitment to increase transparency, participation, and collaboration through systems and web sites such as USAspending.gov.

FY 2010 Accomplishments

- Executed funding for 100% of DHS's contribution to the annual E-Government initiative and lines of business.
- Fulfilled 100% compliance with the OMB's E-Government requirements.
- Accomplished the goals of the DHS E-Gov initiatives and associated program management objectives.
- Completed the FEMA Disaster Assistance Improvement Program (DAIP) and Food For Florida site integration to help feed residents affected by disasters, customized content and forms to assist victims of the Gulf Coast Oil Spill to apply for assistance, and implemented a new mobile registration capability.

FY 2011 Planned Accomplishments

- Ensure E-Government initiative alignment to the DHS Segment Architecture Methodology.
- Provide guidance to strengthen project and program management practices to the initiatives.
- Work with OMB to improve the accuracy and efficiency of the initiative funding process.
- Execute funding for 100% of DHS's contribution to the annual E-Government initiative and lines of business.

FY 2012 Planned Accomplishments

- Ensure E-Government initiative alignment to the DHS Segment Architecture Methodology and Federal Segment Architecture Methodology.
- Ensure E-Government initiative alignment to the Program Management Center of Excellence standards and best practices, and Enterprise Portfolio Governance structure.
- Provide IT Business Information and Policy Services by creating and communicating IT Policies to facilitate compliance with the Paperwork Reduction, Electronic Government, and Federal Data Quality Acts. Provide guidance and interpretation of applicable laws, policies, regulations, and operating circulars across DHS Components and Headquarters organizations.

PPA: Infrastructure and Security Activities

	Perm Pos	FTE	Amount
2010 Actual	0	0	\$158,199
2011 CR Budget	0	0	152,403
2012 Adjustments-to-Base	0	0	(90,578)
2012 Current Services	0	0	61,825
2012 Program Change	0	0	27,700
2012 Request	0	0	89,525

The OCIO requests \$89.525M for this activity. The changes are due to the administrative savings initiative the DHS Balanced Workforce Strategy realignment, and non-recurring funds for Data Center migration. DHS HQ has completed migration of its applications to the two enterprise data centers.

CURRENT SERVICES PROGRAM DESCRIPTION:

Watch List

The Watch List program supports information sharing within the Terrorist Screening Center's database and provides technical integration and collaboration for disseminating data securely with key DHS stakeholders.

FY 2010 Accomplishments

- Provided Operation and Maintenance Support to DHS Watch List Services.
- Provided Training Curriculum and Support to DHS Watch List Services.

FY 2011 Planned Accomplishments

- Continue to provide O&M support to DHS Watch List Services.
- Provide training to components and DHS Headquarters offices including Offices of Intelligence and Analysis, Screening Coordination, Privacy, and Civil Rights and Civil Liberties.
- Update Training Curriculum.
- Review and update standard operating procedures for support of DHS Watch List Services.

FY 2012 Planned Accomplishments

- Provide Operation and Maintenance Support to DHS Watch List Services.
- Provide refresher training to current users and initial training to new users, based on updated training curriculum.
- Implement standard operating procedure updates for support of DHS Watch List Services.

Network Services

The Network Services domain will continue to provide a reliable, resilient, and secure DHS-wide data network that streamlines appropriate sharing and discovery of information within the Department and associated organizations, such as State and local law enforcement agencies. The core of this unified environment is the consolidation of legacy networks to one enterprise-wide, integrated network called "OneNet." Major services provided by Network Services include:

- DHS OneNet-Wide Area Network (WAN) Services
- Network and Security Operations Centers
- Traffic Modeling and Data Analysis
- IP Address Administration
- Network Management
- Access Controls

OneNet is comprised of two independent Multi-Protocol Label Switching (MPLS) networks, each provided by a separate vendor. Through physical line redundancy and first-tier vendor carrier delivery, the Wide Area Network (WAN) systematically provides continuity and network availability. DHS sites may be connected to the WAN via two physical connections, each terminating at a different vendor's MPLS network. Key features of the MPLS-based network employed by OneNet include increased flexibility, scalability, and security, as well as a lower total cost of ownership.

The Network Operations Centers/Security Operations Centers (NOC/SOC) centrally oversees DHS's infrastructure systems and network components. Incident response and detection is coordinated and escalated by the NOC/SOC within the network security and computing services groups depending on the nature of the breach or failure. This aids in availability management and capacity management by providing respective service groups with collected monitoring data.

Transitioning DHS Network Services (legacy and OneNet) to General Services Administration's (GSA) Network Contract achieved greater network functionality and telecommunications capabilities than with the previous GSA contract vehicle.

FY 2010 Accomplishments

- Transitioned Component Network Operations and consolidated major large program networks, such as Homeland Secure Data Network (HSDN), to OneNet Operations and Administration.
- Executed engineering enhancements and upgrades.
- Continued migration of all DHS Components' Internet, remote access, extranet, and application hosting services to the OMB-approved Trusted Internet Connections (TIC).
- Transitioned approximately 30 high-availability enterprise sites to the Network contract vehicle.
- Provided IPv6 Alignment support to align DHS with OMB objectives.
- Designed and built Policy Enforcement Points (PEP); these provide the next generation core of OneNet with increasingly needed cyber security enhancements.
- Completed the High Assurance Gateway (HAG) – the HAG provides the capability for DHS personnel to access Web sites that are otherwise restricted or blocked.
- Completed Public Facing Domain Name System Security (DNSSEC) that provides certificate authentication for domain names for added security. This satisfied Phase 1 of OMB's DNSSEC requirement.
- Operated NOC/SOC to detect and respond to Network security issues/anomalies.

FY 2011 Planned Accomplishments

- Implement policy enforcement points (PEP) trust zones to enable the DHS Components to migrate onto the DHS OneNet network.
- Enable Department's Trusted Internet Connection (TIC) Internet Protocol v6 (IPv6).

- Implement Reverse Proxy solution – the reverse proxy solution allows Components to migrate to the TIC, and in some cases, more expeditiously than physically relocating the application servers immediately.
- Migrate 50% of Components behind the PEP.
- Establish Technology Replacement/Enhancement for the Redundant Trusted Internet Connection (RTIC) and OneNet.
- Establish an Enterprise-LAB – a lab environment to test network solutions and changes prior to implementing them in a production environment. Complete testing is required before implementing a change in the production environment, therefore an E-Lab with systems that can simulate the production network environment for testing needs to be established and maintained.
- Complete the implementation of Verizon and AT&T backup NOC tools.
- Complete the capability of the DHS ticketing system to successfully interface with Verizon and AT&T ticketing systems.

FY 2012 Planned Accomplishments

- Migrate 100% of Components behind the PEP.
- Migrate all Component TIC services to the DHS TIC systems.
- Decommission DHS Common Network (DCN) rack pack network infrastructure.
- Operate and maintain the network PEPs, HAG and Reverse Proxy capabilities developed in fiscal years 2010 and 2011.
- Design/build additional IPv6 capabilities necessary for supporting internal IPv6 requirements in accordance with OMB's Milestone 2 requirement.

Active Directory and Exchange (ADEX)/Email Services

In FY 2009, the stewardship for Active Directory was transitioned from the U.S. Coast Guard (USCG) to DHS Headquarters to merge with the Application Authentication (AppAuth) Project. Email services will provide more effective communication between and within DHS. Email legacy systems will be consolidated within DHS to use an Email as a Service (EaaS) capability at the Enterprise Data Centers. Email Services will allow personnel to gain access to critical business communications and are designed to deliver greater security, availability and reliability.

Major services provided by the Email Services program include:

- Consolidated DHS-wide Global Address List (GAL)
- Standard email naming convention
- Delivery of a DHS-wide email platform

FY 2010 Accomplishments

- Established EaaS capability at the DHS enterprise data centers.
- Operated Email gateway. Ensured all DHS email was reviewed for malicious software, spam, phishing and other security concerns.
- Conducted Email translations from Components to enable unified DHS Global Address List.

FY 2011 Planned Accomplishments

- Complete additional Component migration of Email inboxes, including Email archiving capability to EaaS at the DHS enterprise data centers.
- Transition DHS Email gateways to the DHS TIC locations at both DHS enterprise data centers.

- Migration of the Email Security Gateway to each of the DHS enterprise data centers and turning off DSES at OSC Martinsburg.
- Development of advanced persistent threat security enhancements.

FY 2012 Planned Accomplishments

- Migration of all DHS Components to the DHS.GOV domain, thereby eliminating further translations.
- Email Security Gateway operations and maintenance expenditures.

Data Center Development

DHS is in the process of consolidating the Department's legacy data centers into two enterprise data centers (DC1 and DC2). Data center support services will provide management and control of data center hardware, operating systems software, and environmental systems. Both data centers will have the ability to continuously synchronize applications based upon mission requirements, thus providing seamless disaster recovery capability. The DHS data center capabilities will provide the personnel and tools to manage service delivery and support activities.

Major services provided by Data Center Services include:

- Capacity management
- Availability management
- System management and administration
- Hardware/software maintenance
- Facility monitoring, management and security
- Disaster recovery management and testing

The Data Center Development provides funding to consolidate and assist migrating data center environments to two enterprise data centers. The program will focus on continuing to build capabilities at both DHS data centers.

FY 2010 Accomplishments

- Completed HSDN migration to DC2.
- Completed Zone A/B remediation project at DC1 providing dual power paths for enhanced electrical infrastructure security.
- Completed interim 21MVA power line to enhance DC1 power infrastructure.
- Centrally managed and facilitated migration funding for Component migration efforts – coordinated and facilitated funding and contractual processes centrally from DHS HQ to prevent and mitigate process delays.

FY 2011 Planned Accomplishments

- Complete the migration of two FEMA data centers (Northern Virginia Commercial Center and Plano, TX Center).
- Continue to support and enable the Component transition and data center migration to the two enterprise data centers.
- Complete the Component (ICE, USCIS, US-VISIT) migration/transition from DOJ data centers to the DHS enterprise data centers.
- Complete the TSA Headquarters center migration.
- Complete the 32MVA power substation for the long-term power requirements at DC1.

FY 2012 Planned Accomplishments

- Continue to support and enable Component transition and data center migration to the enterprise data centers.
- Continue to address Component disaster recovery capabilities within and between the two enterprise data centers.
- Complete migration of FEMA from Denton, TX and decommission legacy space.
- Complete current phase work for DC1 infrastructure upgrades.

PPA: Homeland Secure Data Network

	Perm Pos	FTE	Amount
2010 Actual	0	0	48,138
2011 CR	5	5	47,661
2012 Adjustments-to-Base	-5	-5	(1,092)
2012 Current Services	0	0	46,569
2012 Program Change	0	0	(2,500)
2012 Request*	0	0	44,069

The OCIO requests \$44.069M for the HSDN activity. The Adjustments-to-Base are a result of decreased funding for professional service contracts, administrative efficiency savings, and a realignment of 5 FTE to the Salaries and Expenses PPA. The HSDN PPA has also reflects program changes in the Homeland Top Secret Network.

CURRENT SERVICES PROGRAM DESCRIPTION:

Homeland Secure Data Network (HSDN)

The Homeland Secure Data Network (HSDN) is a single program within DHS that enables agencies to collaborate and communicate effectively at a SECRET-classified level among Federal and State governments and supporting entities. With HSDN capabilities, DHS has the ability to collect, disseminate, and exchange both tactical and strategic SECRET-level information throughout DHS and DHS partners.

- HSDN has established 192 sites across the United States comprised of 3,536 workstations.
- HSDN has established user accounts for approximately 6,429 end users who currently log on and exchange information across HSDN in performing their daily missions.
- HSDN currently operates its system-wide core capabilities and infrastructure consisting of the NOC, SOC, four-tiered helpdesk, DC1, and system-wide telecommunications backbone on 24-hour operations in support of the mission requirements of its established end users.

FY 2010 Accomplishments

- Completed annual Operational Analysis periodic review and reporting process for identifying areas of improvement in costs and operational efficiencies and effectiveness.
- Transitioned Enterprise Portal to Operations – provides access to users via a centralized HSDN portal.
- Completed Level 3 circuits transition to OneNet (76 sites) to further move the Department toward a centrally managed wide area network (OneNet).
- Began Secure Mobile Environment Portable Electronic Devices (SME PED) deployment activities.
- Increased functionality of HSDN by increasing the number of DHS-approved applications.
- Continued technical refresh of site-specific aging equipment and Data Centers.
- Continued build-out of HSDN:
 - Installed HSDN at seven additional fusion centers.
 - Completed the successful relocation of one of the operational fusion centers.

FY 2011 Planned Accomplishments

- Complete annual Operational Analysis periodic review and reporting process for identifying areas of improvements in costs and operational efficiencies and effectiveness.

- Enhance user authentication security.
- Increase functionality by adding new applications.
- Complete the initial installation of HSDN at all authorized fusion center sites.
- Complete an infrastructure upgrade of the Secure Video Teleconference (SVTC) bridge.

FY 2012 Planned Accomplishments

- Complete annual Operation Analysis periodic review and reporting process for identifying areas of improvements in costs and operational efficiencies and effectiveness.
- Continue technology refresh of aging equipment.
- Enhance user authentication security to improve the Department's cyber security posture.
- Complete the relocation of operational fusion centers that are required to move to another facility.

Communications Security (COMSEC)

The Homeland Security COMSEC Central Office of Record (COR) was established in accordance with national policy as delineated in NSTISSI 4005. The DHS Management Directive 4300B provides guidance for administering the National Security Policies required to provide for accounting, safeguarding and management control over COMSEC keying material, Controlled Cryptographic Items (CCI) and secure communications equipment. The DHS COMSEC COR provides consolidated COMSEC accounting services, training and assists in providing acquisition and maintenance of COMSEC equipment for the Department. Additionally, the DHS COMSEC COR develops and publishes policy and procedures for the operation and use of COMSEC equipment and cryptographic keying material within DHS, ensuring compliance with National and Departmental COMSEC policies and procedures.

To comply with the joint DOD and NSA Crypto Modernization program, DHS continues to comply with migration of its legacy COMSEC accounting infrastructure to the Network-Centric Key Management Infrastructure (KMI), which is an emerging critical component of the Global Information Grid (GIG). This migration is essential to the success of the DHS Enterprise Architecture. The current legacy COMSEC accounting infrastructure supports over 105 accounts with well over 350 support personnel.

The migration to KMI affords DHS the opportunity to streamline, restructure and regionalize the COMSEC distribution and accounting infrastructure. This evolution will provide for more efficient use of the requested personnel and monetary resources. Regionalization will also establish a stronger core of subject matter experts within the DHS COMSEC community, resulting in the more efficient use of our most valuable resource, people.

FY 2010 Accomplishments

- Replaced legacy KG-175 IT data encryption devices and trained users on new in-line Network Internet Protocol (IP) Encryptors, KG-175D equipment.
- Procured new COMSEC equipment to replace obsolete equipment 18 months before the decertification dates.
- Provided updated COMSEC security policies and procedures for use by the Components and performed 30 audits of COMSEC accounts.
- Developed Electronic Key Management System (EKMS) Operation and Maintenance (O&M) contract.
- Deployed and validated security requirements for 114 Secure Telephone Equipment (STE) in support of State Governors and Emergency Operation Centers (EOCs).

- Trained 98 students on equipment and custodian administration.

FY 2011 Planned Accomplishments

- Develop infrastructure plan to support the transition of DHS accounts from EKMS to the NSA-mandated Key Management Infrastructure (KMI). This 5-7 year project will transition and replace all of the DHS COMSEC Key Accounting and Distribution Infrastructure.
- Deploy modern, easy-to-use Crypto Fill Device which provides a more user-friendly technology enabling proper security protocol.
- Perform NSA-mandated software upgrades to EKMS to prepare for transition to KMI.
- Procure additional Inline Network Encryptors to offset initial fielding cost of future KMI deployment.
- Prepare network certification and accreditation requirements in support of anticipated KMI to allow required and necessary network-centric capabilities to be deployed on DHS networks.
- Prepare DHS COMSEC Continuity of Operations for KMI Pilot Program.

FY 2012 Planned Accomplishments

- Finalize infrastructure plan to support the transition of DHS accounts from EKMS to the NSA-mandated KMI.
- Field new COMSEC equipment to replace obsolete COMSEC equipment.
- Recruit and train staff to assume COMSEC support functions.
- Provide annual update to COMSEC security policies and procedures for use by the Components.
- Conduct site visits to provide advice, assistance, and audits of COMSEC accounts.
- Develop the KMI acquisition and O&M contract.

IV. Program Justification of Changes

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Chief Information Officer
 Justification of Program Changes
 (Dollars in Thousands)**

Program Increase 1: Information Security and Infrastructure

Strategic Goal: Strengthen and Unify DHS Operations and Management

Strategic Objective: Improve Department Governance and Performance

PPA: Infrastructure and Security Activities

Program Increase: Positions 0 FTE 0 Dollars \$32,300

	FY 2010 Actual			FY 2011 CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							55,500
Program Increase							32,300
Total Request	\$60,308	\$67,775	87,800

Note: This program has taken base reductions for professional service contracts, administrative efficiencies, and workforce planning in order to fund higher level needs in a constrained fiscal environment.

Description of Item

The Information Security & Infrastructure (ISI) appropriation supports investment and investment-related O&M for the capabilities developed in the Enterprise Services Division (ESD) of the IT Services Office (ITSO). Specifically, the ISI appropriation funds development of capabilities in Network Services, ADEX/Email Services, and supports the management and oversight of the ITP.

Justification

The purpose of this request is to further strengthen the cyber security posture and information sharing capability at all levels of the DHS IT Enterprise. Through targeted investments, the \$32.300M increase requested in FY 2012 would facilitate, strengthen and unify DHS ISI operations, management, governance and performance by reducing vulnerability and improving security within the DHS IT Enterprise. This will be accomplished by solidifying the Department’s Policy Enforcement Points (PEPs) to improve system access and implementation of information sharing policies across the Department through centralized change management, as well as enable rapid access to systems and information for DHS users. In addition, this request will consolidate Component messaging systems into the DHS Enterprise Data Centers with the standup of a unified Email as a Service (EaaS) capability which will be hosted in the DHS Private Cloud with enhanced security capabilities. Finally, this request will strengthen technical controls and continued alignment within the cyber security infrastructure through the incorporation of Public Key Infrastructure (PKI) architecture.

Enhancement objectives include investment in:

Email \$20M - DHS will consolidate Component messaging systems into the DHS Stennis and EDS Data Centers with the standup of a unified Email as a Service (EaaS) capability. The requirements for the EaaS service offering have been jointly defined by representatives from each of the Components as selected by the CIO Council members. The Department will continue to manage the 12 non-standard email environments with little to no data recovery ability and varying degrees of security.

The funding would mitigate high risk areas within the DHS firewall by establishing PEPs across the DHS Network to reduce vulnerability and improve security within the DHS IT Enterprise. The improved DHS SOC remediation and forensics capabilities would counter threats and mitigate threat consequences by establishing robust, classified facilities with highly skilled analysts and migrating legacy connections behind the DHS TICs.

The funding would further reduce vulnerability at the perimeter by establishing a high assurance guard to support DHS mission requirements for accessing social networking sites and establish a DHS Email disaster recovery capability for 100% of all email traffic behind the two DHS TICs.

Single Sign-On (SSO) and Public Key Infrastructure (PKI) \$12.3M - SSO funding will leverage technologies to improve operator access to timely, secure access to mission applications for DHS employees and Federal, State, local and private sector partners.

SSO will minimize the number of distinct login credentials that users will need to log-in to their systems and applications with only a single set of credentials to access multiple applications. SSO will also provide the ability to manage usernames and passwords across potentially hundreds of applications throughout DHS. Ultimately, this will provide additional security and auditing to support the complex DHS IT infrastructure.

Information Sharing across the Department is key to successful integration of data resources. Further strengthening the cyber security posture and information sharing capability at all levels of the DHS IT Enterprise is critical through the successful implementation of the PEPs.

Impact on Performance (Relationship of Increase to Strategic Goals)

This increase supports the protection of DHS critical infrastructure. The Department is aligning infrastructure cyber security under a comprehensive IT security strategy that maintains an appropriate set of common enterprise controls to facilitate information sharing across all appropriate mission boundaries.

This increase also directly improves Department governance and performance by implementing a comprehensive, defense-in-depth IT security strategy that maintains an appropriate set of common enterprise controls to facilitate information sharing across all appropriate mission boundaries.

Program Increase 2:

Enterprise Data Management

Strategic Goal:

Strengthen and Unify DHS Operations and Management

Strategic Objective:

Improve Department Governance and Performance
Advanced Intelligence and Information Sharing

PPA:

Information Technology Services

Program Increase:

Positions 0 FTE 0 Dollars \$7,600

	FY 2010 Actual			FY 2011 CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							\$323
Program Increase							7,600
Total Request	\$2,000	\$1,972	\$7,923

Note: This program has taken base reductions for professional service contracts, administrative efficiencies, and workforce planning in order to fund higher level needs in a constrained fiscal environment.

Description of Item

Data Architecture/Data Management - \$1.359M of the \$7.6M requested for Enterprise Data Management (EDM) will allow the Enterprise Data Management Office (EDMO) to implement procedures and practices to strengthen access controls to address data protection while continuing to ensure that appropriate information is shared in support of the operational mission. Establishing data standards will result in lower development costs and significantly decreases Operations and Maintenance of data.

Data Standards for the Information Sharing Environment - \$2M of the \$7.6M requested will allow DHS to build data standards for the Information Sharing Environment. Such standards include Alerts and Warnings, Suspicious Activity, Terrorist Watch Lists, and Cargo/Trade Screening.

Support for State and Local participation in the Information Sharing Environment - \$4.250M of the \$7.6M requested will allow DHS to support the NIEM Program Management Office, including support state and local participation in the Information Sharing Environment through the tools, training and technical support for the NIEM program.

All of these initiatives will increase the success of the DHS goals for information sharing and increase the effectiveness of the DHS Terrorism Preparedness, Prevention, and Response Discretionary Grants program.

Justification

EDMO was able to document \$26M in cost avoidance using data architecture / data management practices. The additional \$7.6M funding will allow the Enterprise Data Management Office (EDMO) to implement additional policies and practices. These activities target performance increases for all major mission areas such as reduced time for detainee processing, increased usage of the Terrorist Watchlist, decreased time for adjudication of cases for U.S. citizenship, and increased capacity to

screen cargo for dangerous materials. This funding impacts the performance of all DHS Components that create, store, manage or share data.

The within-guidance funding for the EDMO includes limited work to be completed on core data architecture and data management initiatives which assist in setting architectural targets thus reducing the cost of IT systems and does not include improving mission function by increased information sharing. Without the increased funding, the EDMO not be able to fully fund both core data architecture and information sharing environment initiatives and therefore puts at risk the level of support for information sharing initiatives within DHS.

Impact on Performance (Relationship of Increase to Strategic Goals)

The increase of \$7.6M in funding will allow increase of data standardization enabling access of information by Federal, State, local, tribal and private sector partners for increased mission effectiveness.

- Full support in the development of strengthened access controls to address data protection while continuing to ensure that appropriate information is shared in support of the operational mission.
- Provides for training programs to educate the State, local and tribal workforce and make sure personnel are trained on the use of standards for the development of the Information Sharing Environment.

Program Increase 3: Information Security Program

Strategic Goal: Maturing and Strengthening the Homeland Security Enterprise

Strategic Objective: Mature the Department of Homeland Security

PPA: Salaries and Expenses

Program Increase: Positions 0 FTE 0 Dollars \$5,000

	FY 2010 Actual			FY 2011 CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							4,812
Program Increase							5,000
Total Request	0	0	\$18,360	0	0	\$18,360	\$9,812

Note: This program has taken base reductions for professional service contracts, administrative efficiencies, and workforce planning in order to fund higher level needs in a constrained fiscal environment.

Description of Item

The Information Security Program measures compliance with FISMA and current DHS information security policy. The program conducts an annual review of DHS’s information security and submits it to OMB, along with quarterly updates on security POA&Ms. The measure of effectiveness for the program is the percentage of systems within DHS that are compliant. The goal is to have 100% of DHS systems certified and accredited as compliant.

The Information Security Program also measures compliance with current information security policy as it relates to defense against cyber attacks. The measure of effectiveness for this portion of the initiative is the percentage of successful attack incidents. The goal is to have 100% of attacks identified, mitigated and remediated. At this point, the Department is only able to fully identify, track, mitigate and remediate a very small percentage of incidents related to the advanced persistent threat. The near-term goal is the capability to analyze and identify 100% of incidents related to advanced persistent threats, growing that capability to the full visibility required to track the progression of attacks to ensure mitigation and remediation of these incidents. Ultimately, the required capability is the full operational awareness that would fuse all source intelligence and real-time monitoring to respond to attacks at inception and prevent any adverse impact to the DHS information resources, thereby ensuring full DHS mission capability. This focused operations initiative also directly supports strengthened cyber security by providing resources necessary to identify threats and develop operating procedures and real-time responses to attacks.

Justification

The requested program increase is for the collection, validation and reporting of new systems, system interconnections, expanded reporting requirements, and increased system performance. These elements increase the quantity of information used for compliance reporting by an estimated 25% in both the unclassified and classified environments. In addition, the resources necessary to validate and report this increased capability must be developed to ensure the Department can adequately evaluate

the information security risks. This program increase will secure spaces and tools to deal with sophisticated and advanced threats to DHS information resources that are beyond the current ability to appropriately address. As these threats continually change and evolve, continuous active monitoring and analysis of the DHS infrastructure is essential. Activities will include: monitoring threats in order to mitigate risks and prevent unauthorized intrusions; reacting to incidents/attacks in order to minimize and remediate any damage that may have been done; and, identifying countermeasures to prevent future exploits.

The funding will allow DHS to ensure that systems meet the strict requirements of FISMA and reduce the dangers of a successful cyber attack on DHS. The funding will also provide the DHS Chief Information Security Officer (CISO) the ability to assist the Components and stakeholders in identifying potential threats to their infrastructure and systems, thereby increasing their ability to react appropriately. The increased capability ensures that DHS information security resources will have a secure and trusted computing environment based on risk management principles that enable the Department to effectively share information.

Impact on Performance (Relationship of Increase to Strategic Goals)

As the nation has become more dependent upon electronic information, it becomes increasingly necessary to take a proactive role in protecting the critical infrastructure, particularly with the proliferation of well-trained, well-funded “bad actors” and nation states. Because threats continually evolve, continuous active monitoring and analysis of the DHS infrastructure and potential threats is vital. Analysis focuses on two areas: 1) monitoring threats in order to mitigate risks and prevent unauthorized intrusions and 2) reacting to incidents in order to minimize and remediate any damage that may have been done, prevent further damage and potentially prosecute the responsible parties.

In addition, an internal cyber forensics capability is required to enhance continuous monitoring and focused operations. In compliance with FISMA, the program conducts an annual review of DHS’s information security program and submits to OMB along with quarterly updates on security POA&Ms.

Program Increase 4: Office of Accessible Systems & Technology - Salaries and Benefits

Strategic Goal: Maturing and Strengthening the Homeland Security Enterprise

Strategic Objective: Mature the Department of Homeland Security

PPA: Salaries and Expenses

Program Increase: Positions 5 FTE 3 Dollars \$1,000

	FY 2010 Actual			FY 2011 CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							4	4	\$794
Program Increase							5	3	\$1,000
Total Request	2	2	\$271	4	3	\$636	9	7	\$1,794

Description of Item

The OCIO requests 5 FTPs/3 FTEs and \$1.0M to support management of IT governance and compliance, technical assistance and accessibility helpdesk services, training development and delivery, and Components’ accessible systems and technology program guidance in response to increasing demand on the Office of Accessible Systems and Technology (OAST) services. Having Federal employees provide the oversight for decision-making activities as they relate to Section 508 compliance is critical for the Department to meet its obligation to provide equal access to information and data for people with disabilities.

Justification

OAST is experiencing a dramatic increase in demand for Section 508-related services including:

- Accessibility testing and evaluation of IT applications and reviewing applications and systems for conformance with Section 508 requirements in the DHS SELC.
- Section 508-related technical assistance to IT systems owners, program managers, project managers, and COTRs Department-wide.
- Monitoring and support of 14 Component-level Section 508 programs.
- Maintenance and operation of the DHS Accessibility Help Desk, and providing IT accessibility support for the more than 6,000 DHS employees with disabilities.

Over this past year, OAST has experienced a 35% increase in accessibility testing and evaluation of IT applications, a 60% increase in IT governance activities, a 75% increase in technical assistance activities, and a 125% increase in Accessibility Help Desk tickets. These numbers are expected to increase dramatically by FY 2012. Additional FTEs are required to help meet that demand.

The increased number of Federal employees will allow OAST to ensure that accessibility is addressed in the various lifecycle checkpoints and operational reviews that take place across DHS. Failing to do

this will lead to inaccessible IT, thus limiting the ability of persons with disabilities to effectively perform their job and mission. In addition, the greatly increased technical-assistance demands that OAST is delivering to the maturing Component-level Section 508 programs requires additional staff support. However, this additional support yields consistent improvement in Components' ability to address accessibility requirements in each of their varied IT environments and mission space.

Impact on Performance

The additional 3 FTE will help OAST in meeting the increased services identified above, and enhances OAST's ability to keep DHS in compliance with the Section 508 law. The resources will improve OAST's ability to manage the increased demands that come through the DHS Accessibility Help Desk and to fully integrate of the Accessibility Help Desk Department-wide. Further, the resources fully support DHS's ongoing drive to strengthen governance activities as they relate to accessibility by preventing potentially costly accessibility-related remediation of deployed technologies and the inability of employees and customers with disabilities to access and use electronic information and data in emergency and employment situations.

Program Increase 5: Program Management Support

Strategic Goal: Maturing and Strengthening the Homeland Security Enterprise

Strategic Objective: Mature the Department of Homeland Security

PPA: Information Technology Services

Program Increase: Positions 0 FTE 0 Dollars \$2,700

	FY 2010 Actual			FY 2011 CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							\$3,500
Program Increase							2,700
Total Request	0	0	\$8,756	0	0	\$8,756	\$5,200

Note: This program has taken base reductions for professional service contracts, administrative efficiencies, and workforce planning in order to fund higher level needs in a constrained fiscal environment.

Description of Item

The \$2.7M increase will enable the Enterprise Business Management Office (EBMO) to support the implementation of an enterprise governance model, providing the framework to drive interrelated, cross-Departmental programs to share common services, build interoperable systems, and integrate the management goals. The DHS CIO is assigned as the departmental lead for the Under Secretary for Management’s (USM) Enterprise Governance Transformation Initiative (EGTI). Establishing an enterprise governance model will allow DHS to implement mechanisms to improve resource alignment and integrate program management within broader portfolios targeted to achieve mission goals.

Through enterprise program governance, DHS will provide oversight and assistance to DHS programs with technical or management challenges, and guide implementation of best practices in portfolio and program management standards to improve overall execution.

Justification

Today, programs are governed as independent, discrete activities, resulting in a lack of ability to strategically manage resources across organizational boundaries in support of the Department’s mission, goals, and objectives. The existing program-by-program governance model does not provide the necessary framework to drive interrelated programs to share common services, build interoperable systems, and integrate management of supporting the goals of the overall enterprise.

Impact on Performance (Relationship of Increase to Strategic Goals)

Based on a strategy of integrated management of Department programs, the EGTI is comprised of two core management structures: Enterprise Portfolio Governance and Program Governance. The purpose

of the EGTI is to look across the initiatives in DHS Components and identify the linkages and strategic improvement opportunities. Furthermore, the new governance model enhances mission effectiveness, increases accountability by identifying alternative solutions to support strategic improvements, allows for selecting alternatives through trade-off analysis, and prioritizing initiatives based on objective business and technical criteria.

This approach will be managed through:

Enterprise Portfolio Governance – will serve as a robust and comprehensive approach for interoperability oversight and capability improvement across portfolios and organizational boundaries. OCIO is requesting resources to build and support all DHS Enterprise portfolio governing bodies and processes which will be responsible for the following key elements for their respective portfolios:

- As-is and to-be mission and business end states defined, architected, and governed.
- Transition strategies defined and tied to the annual budget process.
- Departmental resource decision-making processes tied to building and maintaining functional capabilities that support achieving the DHS mission.

Program Governance – will serve as a mechanism for placing major programs under broader governance oversight focused on mission capability and execution. The governance model shall be tailored to the type of program based on complexity, risk, relative importance to achieving strategic goals and degree of interdependency with other programs. OCIO is requesting resources to support the Program Governance bodies and processes as well as to create a Program Management Center of Excellence to provide best practices, tools, and technical program management capabilities, support and guidance for all DHS programs to ensure the following key objectives:

- Programs aligned with and managed by Enterprise Portfolio Governance.
- End-to-end visibility across the full Planning, Programming, Budgeting and Execution (PPBE) horizon.

Program Increase 6: Infrastructure Transformation Program (ITP) and IT Architecture - Acquisition Workforce

Strategic Goal: Maturing and Strengthening the Homeland Security Enterprise

Strategic Objective: Mature the Department of Homeland Security

PPA: Salaries and Expenses

Program Increase: Positions 2 FTE 1 Dollars \$253

	FY 2010 Actual			FY 2011 CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							2	1	253
Total Request	0	0			0		2	1	\$253

Description of Item

Successful acquisition outcomes are the direct result of having the appropriate personnel with the requisite skills managing various aspects of the acquisition process. Between FY 2000 and FY 2008, acquisition spending by civilian agencies increased by 56% (in inflation-adjusted dollars). The Department of Homeland Security is working to ensure its major acquisitions are effectively managed to ensure that the Department maximizes the value of every homeland security dollar and that major programs are implemented in the most responsible and efficient manner possible. This includes having disciplined oversight processes and robust acquisition program management teams in place. DHS has assessed the current resident skills against a set of core acquisition management skills: a program manager, a systems engineer, a life cycle logistician, a business/financial manager and a contracting officer’s technical representative, and determined that many of our major acquisition programs are deficient in several of these areas.

The President’s March 4, 2009 memorandum on Government Contracting required agencies to improve acquisition practices and performance by maximizing competition and value, minimizing risk, and reviewing the ability of the acquisition workforce to develop, manage, and oversee acquisitions appropriately. Subsequent guidance from the Office of Management and Budget, including memorandum M-09-25 *Improving Government Acquisition* issued July 29, 2009, and OFPP’s Memorandum of October 27, 2009 *Acquisition Workforce Development Strategic Plan for Civilian Agencies- FY 2010-2014*, provided guidance to agencies to strengthen the acquisition workforce and increase the civilian agency workforce by 5% to more effectively manage acquisition performance. These funds will help ensure the future programmatic growth requirements for training, recruitment, and retention activities while helping us to attract and hire qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act.

Justification

In support of the Administration's emphasis on strengthening the Federal acquisition workforce, OCIO requests \$253K to increase the acquisition workforce capacity and capabilities. The increase will mitigate the risks associated with gaps in either capacity or capability of the acquisition workforce and improve its effectiveness. The resources requested for OCIO will be used to:

- The two Management and Program Analyst positions will be in the Infrastructure Transformation Program and IT Architecture programs.
- Increase the capability of the acquisition workforce by investing in training to close identified gaps in such areas as project management, negotiations, requirements development, contract management, and other key topics;
- Increase the effectiveness of the acquisition workforce by investing in improvements to systems that support the contracting function;

Impact on Performance (Relationship of Increase to Strategic Goals)

The FY 2012 funding request will help ensure:

- The future programmatic growth capacity for training, recruitment, and retention activities while attracting and hiring qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act. These funds allow DHS the ability to train, recruit, and retain at acceptable standards.
- The sustainability and availability of information technology systems and equipment in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

Program Decrease 1: Applied Information Technology and Research Services

Strategic Goal: Strengthen and Unify DHS Operations and Management

Strategic Objective: Improve Department Governance and Performance

PPA: Salaries and Expenses

Program Decrease: Positions 0 FTE 0 Dollars (\$1,100)

	FY 2010 Actual			FY 2011 CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level						
Program Decrease							(1,100)
Total Request	\$1,017	\$1,100	(\$1,100)

Description of Item

Under this program, DHS funded enterprise access to commercial IT research and advisory services. These services provided IT personnel with world-class IT knowledge resource to select and manage technology and participate in development of standards for DHS specific applications.

Justification

This program will be phased out by DHS OCIO in FY 2011. Due to an IT efficiency review it was determined that this program's services could be procured at the DHS Component level without any impact on performance and service. Components are able to obtain IT research and advisory services from the same sources utilized by OCIO.

Impact on Performance (Relationship of Increase to Strategic Goals)

DHS Components will be able to procure IT research and advisory services as needed from the same or similar sources as presently provided by OCIO. Consequently, this decrease will not have an adverse impact DHS-wide.

Program Decrease 2: Infrastructure Operations (IO)

Strategic Goal: Strengthen and Unify DHS Operations and Management

Strategic Objective: Improve Department Governance and Performance

PPA: Salaries and Expenses

Program Decrease: Positions 0 FTE 0 Dollars (\$5,200)

	FY 2010 Actual			FY 2011 CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							\$31,919
Program Decrease							(5,200)
Total Request	\$35,484	\$33,705	\$26,719

Note: This program has taken base reductions for professional service contract and administrative efficiencies in order to fund higher level needs in a constrained fiscal environment.

Description of Item

IO program capabilities provide network, Email, internet, intranet, telecommunications infrastructure and end-user services including desktop computing, telecommunications, cell phones, Blackberry devices, printers, and peripheral equipment to users in DHS Headquarters Offices.

IO responds to changes that include increases in Headquarters personnel including moves and consolidations of office space, renovations of facilities, and the expansion of mission applications. IO also responds to infrastructure changes during periods of emergency, infrastructure disruption, and disasters by performing the necessary IT Contingency, IT Disaster, and business continuity planning as well as the IT/communications support for continuity purposes requiring a FEMA response. In addition, IO also provides two alternate sites with necessary IT/communications capabilities to support emergency operations during periods of activation by the President or Secretary for Continuity of Operations.

This program also provides IT Continuity Management which includes: performing periodic risk, interdependency and business impact assessments; developing recovery strategies; writing business continuity requirements; planning for incident response and escalation; creating network/system specific contingency plans; and, conducting test, training exercises of plans and capabilities to ensure the continuation of services and capabilities. Its Continuity of Operations (COOP) responsibilities include the management of the IT/communications services which are in support of the Components; preparation of exercises with more than 60 departments and agencies participating in efforts to test and improve their ability to perform essential government functions during threats and emergencies; and the development of supporting capabilities and plans within the Office of the CIO.

Justification

The funding program change will affect the capability of a disaster recovery (DR) program for the DHS HQ A- and C-LANs. The project implementation schedules will be elongated. However, in light of fiscal constraints, the CIO has reprioritized programs to achieve critical business needs.

Impact on Performance (Relationship of Increase to Strategic Goals)

OCIO will use existing base resources in the Salaries and Expenses PPA to cover the IO infrastructure and COOP capabilities associated with the \$5.2M program change.

Program Decrease 3: Salaries and Expenses

Strategic Goal: Strengthen and Unify DHS Operations and Management

Strategic Objective: Improve Department Governance and Performance

PPA: Salaries and Expenses

Program Decrease: Positions 0 FTE 0 Dollars (\$2,000)

	FY 2010 Actual			FY 2011 CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level
Program Decrease	(2,000)
Total Request	(\$2,000)

Description of Item

Salaries and Expenses is a crosscutting program that provides executive leadership, technology management, and supporting acquisition and financial functions to all offices within the OCIO. This PPA also covers payments for shared services consumed such as rent, mail services, contracting support, and financial management support received from other management chiefs’ offices. This PPA also: covers the IT security function which sets IT security policy; provides security architecture, certification and accreditation (C&A) remediation; Federal Information Security Management Act (FISMA) compliance and oversight; and, IT awareness and training programs. This PPA includes the Office of Accessible Systems and Technology (OAST), which provides guidance and oversight to all DHS Components on implementing and maintaining initiatives to ensure that electronic and technological information is accessible to DHS employees and customers with disabilities. Salaries and Expenses also provide Operations and Maintenance (O&M) of legacy infrastructure, as well as O&M of new information technology infrastructure investments.

Justification

The program change will be adjusted using \$2M in operation base funding from the Salaries and Expenses PPA.

Salaries and Expenses is a crosscutting program that provides executive leadership, technology management, and supporting acquisition and financial functions to all offices within the OCIO. Salaries and Expenses also provide O&M of legacy infrastructure, as well as O&M of new information technology infrastructure investments. The base program change in S&E elongates the disaster recovery efforts and O&M support of software applications.

Impact on Performance (Relationship of Increase to Strategic Goals)

OCIO will use existing base resources to cover the activities associated with the \$2.0M program change in the S&E PPA.

Program Decrease 4: Information Technology Services

Strategic Goal: Strengthen and Unify DHS Operations and Management

Strategic Objective: Improve Department Governance and Performance

PPA: Information Technology Services

Program Decrease: Positions 0 FTE 0 Dollars (\$1,200)

	FY 2010 Actual			FY 2011 CR			FY 2012 Request

Description of Item

Information Technology Services supports development, implementation, and maintenance of IT functional services including enterprise architecture, enterprise data management, information sharing, IT strategic policy and planning, performance measurement, capital planning and investment control (CPIC), and portfolio management. It also covers geospatial technologies, application delivery, enterprise hosting, and portal consolidation.

Justification

The program change will be adjusted using \$1.2M in operation base funding from the Information Technology Services PPA.

Impact on Performance (Relationship of Increase to Strategic Goals)

The reduction impacts the COMSEC Modernization program by delaying the implementation of the infrastructure plan in support of the transition of DHS accounts from the Electronic Key Management System (EKMS) to the National Security Agency mandated Key Management Infrastructure (KMI). However, OCIO will use existing base resources to cover the COMSEC Modernization activities associated with the \$1.2M program changes in the ITS PPA.

Program Decrease 5: Infrastructure and Security Activities

Strategic Goal: Strengthen and Unify DHS Operations and Management

Strategic Objective: Improve Department Governance and Performance

PPA: Infrastructure and Security Activities

Program Decrease: Positions 0 FTE 0 Dollars (\$4,600)

	FY 2010 Actual			FY 2011 CR			FY 2012 Request

Current Services Level
Program Decrease	(4,600)
Total Request	(\$4,600)

Description of Item

Infrastructure and Security Activities (ISA) is a set of IT projects that provide the integration and protection of sensitive and collateral DHS information. In FY 2012, the DHS OCIO will continue its efforts to consolidate disparate data centers into two DHS Data Centers, establish disaster recovery capability for primary DHS systems, and consolidate multiple disparate networks into DHS OneNet. This PPA also provides funds to manage infrastructure support to include network services, data center services, and application support for DHS Component enterprise applications, maintain Trusted Internet Connection (TIC) capability, and move all network traffic behind the TIC. The DHS OCIO’s immediate and long-term goal is to protect our IT resources from cyber threats, provide One DHS Infrastructure platform, and foster information sharing across the Department and with external stakeholders such as Federal, State, and local government agencies and their partners.

Justification

The program change will be adjusted using \$4.6M in operation base funding from the Infrastructure and Security PPA.

The ISA PPA provides funds to manage infrastructure support to include network services, data center services, and application support for DHS Component enterprise applications, maintain Trusted Internet Connection (TIC) capability, and move all network traffic behind the TIC. The I&SA PPA program changes will impact the Wide Area Network (WAN) enhancement, including elongating the time to refresh network equipment.

Impact on Performance (Relationship of Increase to Strategic Goals)

OCIO will use existing base resources to cover the WAN activities associated with the \$4.5M program change in the ISA PPA.

Program Decrease 6: Homeland Secure Data Network

Strategic Goal: Strengthen and Unify DHS Operations and Management

Strategic Objective: Improve Department Governance and Performance

PPA: Homeland Secure Data Network

Program Decrease: Positions 0 FTE 0 Dollars (\$2,500)

	FY 2010 Actual			FY 2011 CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level
Program Decrease	(2,500)
Total Request	(\$2,500)

Description of Item

The Homeland Secure Data Network (HSDN) is a single program within DHS that enables agencies to collaborate and communicate effectively at a SECRET-classified level among Federal and State governments and supporting entities. With HSDN capabilities, DHS has the ability to collect, disseminate, and exchange both tactical and strategic SECRET-level information throughout DHS and DHS partners.

Justification

The program change will be adjusted using \$2.5M in operation base funding from the Homeland Secure Data Network PPA.

HSDN is a single program within DHS that enables agencies to collaborate and communicate effectively at a SECRET-classified level among Federal and State governments and supporting entities. With HSDN capabilities, DHS has the ability to collect, disseminate, and exchange both tactical and strategic SECRET-level information throughout DHS and DHS partners.

Impact on Performance (Relationship of Increase to Strategic Goals)

The HSDN PPA program change will impact the Classified Local Area Network (CLAN) in terms of elongating the schedule for relocation of operational fusion centers. OCIO will use existing base resources to cover the CLAN activities associated with the \$2.5M program change in the HSDN PPA.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Departmental Management and Operations
Justification of Proposed Changes in the Office of the Chief Information Officer
Appropriation Language**

For necessary expenses of the Office of the Chief Information Officer, as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113), and Department-wide technology investments, **\$277,972,000**; of which **\$105,578,000** shall be available for salaries and expenses; and of which **\$172,394,000**, to remain available until expended, shall be available for development and acquisition of information technology equipment, software, services, and related activities for the Department of Homeland Security. *Provided*, That of the funds made available for salaries and expenses, **\$253,000** shall be for strengthening the capacity and capabilities of the acquisition workforce (as defined by the Office of Federal Procurement Policy Act, as amended (41 U.S.C. 401 et. seq.)), including the recruitment, hiring, training, and retention of such workforce and information technology in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

PPA Mission Statement

A crosscutting program that provides technology-management, shared services, acquisition strategy, executive leadership support, process development, and business transformation to several offices within the DHS Office of the CIO.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Salaries and Benefits	\$19,445	\$19,445	\$41,093	\$21,648

Salaries and Benefits increase of \$21,648,000 is a result of the DHS Balanced Workforce initiative and the realignment of FTE in the other OCIO PPAs. This realignment reflects the change in base program funding used to hire Federal staff in addition to converted contracts. This program change is to “right-size” the Office of the Chief Information Officer (OCIO) salaries and benefits account to reflect the balancing of Federal and contractor employees to match workloads critical to DHS IT transformation.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Travel	\$447	\$447	\$260	(\$187)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request includes a net decrease of \$187,000 due to CIO efficiency review.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Other Rent	\$38	\$38	\$38	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2012 request has no change.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Communication, Utilities, and miscellaneous charge	\$70	\$70	\$70	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Printing	\$8	\$8	\$8	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Advisory and Assistance Services	\$12,984	\$12,985	\$10,188	(\$2,797)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request includes a decrease of \$2,797,000 due to decreases in professional services and contract to federal employee conversions.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Other Services	\$433	\$433	\$433	\$0

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Purchase from Government Accounts	\$37,086	\$30,545	\$30,545	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. This object class includes GSA Rent and other Working Capital Fund assessment charges. The FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & maintenance of facilities	\$147	\$147	\$147	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2012 has no change-.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Medical Care	\$10	\$10	\$10	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & Maintenance of equipment	\$12,482	\$12,482	\$12,482	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Supplies & materials	\$577	\$577	\$577	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Equipment	\$9,077	\$9,077	\$9,077	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Land & Structures	\$650	\$650	\$650	\$0

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2012 request has no change.

PPA Mission Statement

A program which supports development, implementation, and maintenance of a comprehensive and integrated Enterprise Architecture, the information technology framework for the Department, geospatial technologies, and information sharing

Summary Justification and Explanation of Changes

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$4,175	\$10,250	\$0	(\$10,250)

The decrease in FY12 is related to Salaries and Benefits costs that will transfer to the Salaries and Expenses PPA in FY12 due to Workforce realignment.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$43	\$16	\$16	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Advisory and Assistance Services	\$25,969	\$19,894	\$15,606	(\$4,288)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request includes a net decrease of \$4,288,000. This is a result of the DHS Balanced Workforce follow on and decreases in professional services

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Other Services	\$319	\$319	\$319	\$0

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Purchase from Government Accounts	\$10,062	\$13,721	\$13,721	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & Maintenance of equipment	\$5,730	\$5,730	\$5,730	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Supplies & materials	\$0	\$37	\$37	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Equipment	\$1,441	\$4,441	\$1,441	(\$3,000)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2012 request includes a decrease of \$3,000,000 due to decreased available funds (FY11 spike caused by available).

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Land & Structures	\$1,930	\$1,930	\$1,930	\$0

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. PPA Mission Statement

A set of programs that provides for the integration and protection of sensitive DHS information.

Summary Justification and Explanation of Changes

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Advisory and Assistance Services	\$23,167	\$23,167	\$24,744	\$1,577

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. This decrease of \$1,577,000 is a result of decreased funding for professional service contracts and administrative savings.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Purchase from Government Accounts	\$71,518	\$84,054	\$1,266	(\$82,788)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2012 request decrease is due to base funding non-recurred for the Data Center Development program.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & Maintenance of equipment	\$63,300	\$63,300	\$63,300	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. This FY 2012 request has no change.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Equipment	\$215	\$215	\$215	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. This FY 2012 request has no change.

K: DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance. Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2013 budget.

OCIO requests \$0 and 2 FTE for the FY 2012 DHS Balanced Workforce Strategy.

NOTE: FY 2011 Follow on includes vacant positions as well as vacancies in the pipeline.

FY 2012 DHS Balanced Workforce Strategy

Provide additional details on the FY 2012 DHS Balanced Workforce including:

- In FY 2012 the amount of funding to hire Federal employees will be \$470,776 (2 FTP/1FTE) and the amount of the contract that will be terminated or reduced is also \$470,776. The implementation timeline will coincide with the end of the option period of the contract, and no contractor functions will be eliminated or absorbed by current federal employees and do not require additional new federal positions.

DHS Balanced Workforce Strategy Follow-On

Provide additional justification for FY 2010 and FY 2011 DHS Balanced Workforce Follow-On.

- The President's Budget projected an increase of 27 positions and 106 FTE for FY11 to include contract conversions and base position realignment. Due to the conversion rate in FY 2010, consideration of the FY11 CR, and contract option year schedules in FY11, the OCIO is now projecting 87 positions and 53 FTE as follow on during FY11. These FTEs will cost \$5,761,506 and are appropriated funded positions only. They do not include Working Capital Fund or Reimbursable positions.
- The majority of these conversions planned in FY 2011 are for IT Specialists for the Information Security Office of OCIO.

BUDGET REQUEST AND SUPPORTING INFORMATION

I. Appropriation Overview

A. Mission Statement for DHS Headquarters Consolidation Project:

The DHS Headquarters (HQ) Consolidation Project is responsible for the collocation of the Department through the lease consolidation and build out of the St. Elizabeths campus. The mission of the DHS HQ Consolidation Project is to Consolidate HQ and Component Executive Leadership, Operations Coordination, Policy and Program Management “Mission Execution” personnel requiring a secure setting at St. Elizabeths to enhance effectiveness. The program will also consolidate remaining “Mission Support” functions that do not relocate to St. Elizabeths from about 50 to about 7 locations to enhance efficiency. In addition, the program will manage exceptional employee growth through use of flexible workplace strategies (FWS) such as telework and alternate work schedule.

The DHS Management Directorate provides the coordination, planning, policy, guidance, operational oversight, and innovate solutions for the management needs of the entire Department for the “One DHS” campus.

The DHS HQ Consolidation provides the Department, the Office of Management and Budget (OMB), and Congress with improved visibility of the ongoing efforts for establishing a consolidated DHS Headquarters. Additionally, this appropriation allows the Department to facilitate better reporting and overall management of the program.

B. Budget Activities:

DHS Headquarters Consolidation – Mission Support

As part of the DHS National Capital Region Housing Master Plan, and in an effort to achieve a “One DHS” culture, the Department will consolidate existing leases of Components that provide mission support functions from over 50 locations to approximately seven to ten with the appropriate Interagency Security Committee (ISC) criteria. The project will reduce duplicate services, increase efficiency and right size the real estate portfolio. This project is very important to the overall plan as 92% of the existing leases are expiring before 2015.

DHS Headquarters Consolidation – St. Elizabeths

With facilities dispersed over more than 50 locations throughout the National Capital Region, many are with sub-optimal security protections. DHS will continue the development of the DHS Headquarters Consolidation at the St. Elizabeths Campus to house executive leadership, establish DHS Operations Centers with collocated Component operations centers, operations coordination, and policy and program management functions in a secure setting. This integrated approach will allow DHS to effectively communicate and engage in critical events as they occur and share such information to help secure America.

C. Budget Request Summary:

The Under Secretary for Management requests 0 positions, 0 FTE, and \$215.273M for FY 2012. The FY 2012 request includes base changes for the following projects:

- Support the consolidation of mission support elements not re-locating to the St. Elizabeths Campus. (0 positions, 0 FTE, and \$55.630M)
- Support the consolidation of DHS Headquarters to the St. Elizabeths campus. (0 positions, 0 FTE, and \$159.643M).

III. Current Services Program Description by PPA

**Department of Homeland Security
Departmental Management and Operations
DHS Headquarters Consolidation Project
Program Performance Justification**
(Dollars in Thousands)

PPA: HQ Consolidation - Mission Support

	Perm Pos	FTE	Amount
2010 Actual	-	-	-
2011 Continuing Resolution	-	-	0
2012 Adjustments-to-Base	-	-	0
2012 Current Services	-	-	0
2012 Program Change	-	-	55,630
2012 Request	-	-	55,630
Total Change 2011-2012	-	-	55,630

The Under Secretary for Management requests \$55.630M for the DHS HQ Consolidation Mission Support Project. This request will allow for the consolidation of leases for the Department in accordance with the “One DHS” culture.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Department of Homeland Security mission is to lead a unified national effort to secure America. Yet the Department’s legacy facilities are dispersed throughout the NCR with sub-optimal security protections and negatively impacting critical communication and coordination across DHS Components. The Department will consolidate the mission execution functions of executive leadership, operations coordination, policy development and program management in an Interagency Security Committee (ISC) Level 5 secure campus setting at St. Elizabeths and the remaining mission support functions off campus in facilities that achieve the appropriate ISC criteria. Mission support consolidation aims to foster a “one-DHS” culture by reducing the Department’s overall security risk, response capability and decrease the total number of locations from approximately 50 to 7-10. The projected total cost avoidance (30-year Net Present Value) is \$478.2M.

Significant Accomplishments in FY 2010

- With the General Services Administration (GSA), developed the procurement plan for leasing 1.1 million rentable square feet (RSF) of office space. This action consolidates 5,140 seats and 26 existing leases into one location.
- Received congressional approval for the prospectus.

FY 2011 Planned Accomplishments¹

- Continue the acquisition of the 1.1 million RSF leased space.
- Receive initial offers, review, evaluate, negotiate, and prepare for lease award.

FY 2012 Planned Accomplishments

- Complete the acquisition of the leased space with GSA awarding the lease contract.
- Begin design and construction for Phase 1 build-out (670,000 RSF) for occupancy in FY 2014.

¹ Planned accomplishments for FY 2011 are contingent upon the type of funding provided during FY 2011 via an enacted appropriation or continuing resolution(s). As a result; only some or all of the accomplishments may be realized. Therefore, delaying partial accomplishments into future fiscal years.

 (Dollars in Thousands)

PPA: HQ Consolidation - St. Elizabeths

	Perm Pos	FTE	Amount
2010 Actual	-	-	-
2011 Continuing Resolution	-	-	0
2012 Adjustments-to-Base	-	-	0
2012 Current Services	-	-	0
2012 Program Change	-	-	159,643
2012 Request	-	-	159,643
Total Change 2011-2012	-	-	159,643

The Under Secretary for Management requests \$159.643M for the DHS HQ Consolidation St. Elizabeths Project. This request will continue the build out of the St. Elizabeths campus.

CURRENT SERVICES PROGRAM DESCRIPTION:

The DHS mission is to lead a unified national effort to secure America. Our mission demands an integrated approach to all hazards. Yet the Department’s legacy facilities are dispersed over approximately 50 locations throughout the National Capital Region (NCR), sometimes with sub-optimal security protections and routinely adversely impacting critical communication and coordination cooperation across DHS Components. To support the incident management and command-and-control requirements of our mission, the Department will continue development of the DHS Consolidated Headquarters at St. Elizabeths Campus to house executive leadership, operations coordination, policy and program management functions in a secure setting. Consolidation will allow the strategic realignment of the portfolio to more effectively and efficiently support the mission as organizations mature and new program requirements develop. In addition, consolidation will contribute to reduced facility costs, provide quality work space and other amenities to attract and retain the best professional workforce. The full request continues the Phase 1 development of the United States Coast Guard (USCG) Headquarters and construction of the Phase 2A DHS Headquarters, and the National Operations Center and collocation of Component operations centers immediately adjacent to the USCG site.

Significant Accomplishments in FY 2010

The FY 2009 appropriations bill and the American Recovery and Reinvestment Act (ARRA), (which was a 2-year appropriation), initiated the execution phase of the St. Elizabeths development as the DHS Consolidated Headquarters Campus:

- For Phase 1A (USCG Headquarters):
 - Successfully concluded a Section 106 Memorandum of Agreement (MOA).
 - Received final design approval from the National Capital Planning Commission (NCPC) and commenced construction of the USCG Headquarters.
 - Supported sustainable development principles with the design of the USCG Headquarters approaching LEED Gold certification.
- Successfully obligated and reported on \$200 million DHS ARRA funds in accordance with ARRA requirements.
- Completed Government Accountability Office (GAO) Audit of ARRA execution with findings supporting continued funding in the FY 2011 budget request.
- Successfully executed a Section 106 MOA, received final design approval from NCPC and awarded construction contract for the Security Perimeter Improvements Project and the Phase 1B historic building reuse for the St. Elizabeths West Campus.
- Continued to support community outreach efforts with the White House Office of Management and Budget (OMB) led interagency effort on Neighborhood Revitalization/Innovation Clusters and extensive coordination with the Ward 8 Community to plan for DHS occupancy and potential jobs/economic opportunities that may be available.

FY11 Planned Accomplishments²

- Continue Phase 1A construction of USCG Headquarters toward completion in early FY 2013.
- Commence construction of Phase 1B adaptive reuse of certain historic buildings.
- Commence construction of Perimeter Security, the DHS Operations Centers (DOC) Facility and Phase 2A renovations/buildings.
- Complete the Final Master Plan Amendment and Final EIS/Record of Decision/4F Funding for the FEMA occupancy on the East Campus.
- Commence detailed design of Phase 2B Federal Emergency Management Agency (FEMA) Headquarters Building on the East Campus.
- Successfully complete the re-procurement of the St. Elizabeths Technology Integration Program (TIP) contract to support a common enterprise

² Planned accomplishments for FY 2011 are contingent upon the type of funding provided during FY 2011 via an enacted appropriation or continuing resolution(s). As a result; only some or all of the accomplishments may be realized. Therefore, delaying partial accomplishments into future fiscal years.

information technology infrastructure and architecture throughout the campus development.

- Award a National Capital Region (NCR) wide Outfitting contract to support the St. Elizabeths development and the Secretary's Efficiency Initiative to reduce costs through leveraging the Department's buying power (lowering costs) providing standardization, flexible/reconfigurable equipment, minimizing, spare parts, and access to contract by all NCR DHS organizations.

FY12 Planned Accomplishments

- Continue Phase 1A construction of USCG Headquarters toward completion in early FY 2013 and coordinate installation of Information Technology systems, outfitting and move-in plan
- Continue Phase 1B renovation of certain historic buildings for shared use functions and toward completion in early FY 2013 and coordinate information technology, outfitting installations and move plan
- Continue Phase 2A construction of the DOC Facility, and renovation of historic buildings for DHS Headquarters offices.

Total Request	-	-	-	-	-	-	-	-	55,600

Description of Item

The Department of Homeland Security (DHS) National Capital Region (NCR) Housing Master Plan was developed to provide the strategic vision for facilities that support a unified Department, organizational structure, operations and culture. The plan was submitted to Congress on October 25, 2006 as required by Public Law 109-295. The plan outlines priorities of implementation and addresses the mission fragmentation caused by the Headquarters (HQ) elements being located in over 46 locations throughout the NCR.

To meet the Component office space requirements through FY 2011 for Headquarters facilities, the Department will require about 8 million gross square feet (GSF) of office space in the NCR. While St. Elizabeths will accommodate the main Department and Component HQ mission execution functions, it does not have the capacity to accommodate all of the DHS mission support elements. The DHS NCR Housing Master Plan proposes to consolidate the mission support elements that are currently dispersed throughout the NCR to support functional integration, improving the effectiveness and efficient management of the real estate portfolio.

Justification

The DHS mission is to lead a unified national effort to secure America, and yet the Department's legacy facilities are dispersed throughout the National Capital Region (NCR) with sub-optimal security protections that negatively impact critical communication, coordination, and cooperation across DHS Components.

The Department will consolidate the mission execution functions of executive leadership, operations coordination, policy development and program management in an Interagency Security Committee (ISC) Level 5 secure campus setting at St. Elizabeths and the remaining mission support functions off campus in facilities that achieve the appropriate ISC criteria. Mission support consolidation will reduce the Department's overall security risk while improving response capability. It will also lower the total number of locations that house DHS Components from 46 to approximately eight and incorporate the fact that more than 82% of the existing leases are expiring before FY 2015. In the first phase of the new lease alone, DHS will consolidate 15 leases in 500,000 RSF housing 5,140 employees. It will reduce fragmenting of Component business units, standardize the work environment and improve communication and coordination across all DHS Headquarters. Consolidation aims to foster a "one DHS" culture to optimize prevention and response capabilities across the spectrum of operations. The Mission Support consolidation plan has the potential to achieve over \$400M Net Present Value (NPV) savings/cost avoidances. It minimizes vacancy risk, short term lease extensions and multiple move requirements and forms the basis of the FY 2012 budget request.

DHS currently has over 10 space requests pending with GSA to accommodate existing requirements within the NCR that already exceed the capacities of the department's real estate portfolio. These requests, coupled with the existing 46 locations, have the potential to further exacerbate the challenges to the effective and efficient management of the portfolio in support of operations and integration. Without consolidation, as organizations mature and new program requirements develop, space requests will continue to be addressed with limited opportunities for strategic realignments and result in the lease renewals in an uncoordinated manner at higher overall costs and miss the opportunity to leverage existing federally owned and occupied locations. It is beneficial to gain from the opportunity to replace the large volume of expiring leases in a coordinated manner with the St. Elizabeths effort that takes financial advantage of the current depressed real estate market.

DHS plans to lease 1.2 million RSF of space with a two phase implementation schedule in calendar years 2013 and 2014. In cooperation with DHS and OMB, a Mission Support Consolidation Prospectus for lease authority was submitted by GSA to Congress on October 18, 2009 that will address the Department's current housing needs through FY 2011. The prospectus is for leased office space and GSA will pass all costs to DHS and therefore, GSA will not request an appropriation. The FY 2012 request of \$55.6M funds the project for Phase 1. The current schedule developed by GSA for this initiative is:

- Advertise – March 2010
- Offers Due – May 2010
- Source Selection Evaluation – September 2010
- Lease Signatures – March 2011
- Final Lease Award – June 2011
- Phase 1 & 2 Design and Phase 1 Construction Complete – July 2013
- Phase 1 Move-In – August/September 2013
- Phase 2 Construction Complete – July 2014
- Phase 2 Move-In – August/September 2014

Phase 1 of the new lease will consolidate 15 leases in 500,000 RSF housing 5,140 employees; part of Citizen Immigration Services (CIS) (2,154 seats); elements of the Undersecretary for Management (USM) (2,357 seats); and all of Science and Technology (S&T) (629 seats). Phase 2 will house the remainder of CIS.

GSA's Pricing Guide requires tenant agencies to fully fund tenant improvements (TI). Tenant improvements are the finishes and fixtures that typically take space from the "shell" condition to a finished, usable condition. DHS will request the remaining funding in future year budgets to complete the phase 2 improvements and for procurement and installation of fixtures, furnishings, deployment costs and IT/Telecom equipment requirements.

The Mission Support consolidation will also contribute to a reduction in facility operation and maintenance costs and provide quality of life features, as well as other amenities to attract and retain the best professional workforce. It is a foundation for developing a culture of success for DHS to achieve its mission. All new leased space will achieve administration and DHS sustainability goals for Leadership in Energy and Environmental Design (LEED).

Impact on Performance (Relationship of Increase to Strategic Goals)

The status quo will continue to impact the effective communications and coordination among the headquarters and Components due to the increasingly scattered nature of the portfolio. Without the requested funds it will be more difficult for DHS to operate as an integrated organization, and responses to natural disasters or terrorist attacks will not be as coordinated because the facilities will not be aligned to support effective mission execution. Due to lack of existing funds, as organizations mature and new program requirements develop, space requests will continue to be addressed with limited opportunities for strategic realignments, further resulting in uncoordinated lease renewals at higher overall costs estimated at over \$400M on a net present value basis. The Department identified the implementation of the DHS National Capital Region Housing Master Plan and the creation of a unified departmental headquarters as one of the top initiatives critical to establishing a common identity, supporting teamwork and a unified culture. The joint funding of the Mission Support consolidation and the St. Elizabeths West Campus development will ensure the program is executed effectively.

Program Increase #2: DHS HQ Consolidation – St. Elizabeths Project
PPA: DHS HQ Consolidation Project – St. Elizabeths Project
Program Increase: Positions 0 FTE 0 Dollars \$159,643

Funding Profile

	FY 2010 Actual			FY 2011 Continuing Resolution			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	-
Program Increase	-	-	-	-	-	-	-	-	159,643
Total Request	-	-	-	-	-	-	-	-	159,643

Description of Item

The request of \$159.643M will continue the development of the DHS Consolidated Headquarters at St. Elizabeths and continue to be synchronized with the GSA funding request and performance. GSA Pricing Policy requires shared responsibility for federal office space development with the customer agencies responsible to fund specific tenant build out requirements, including outfitting and move costs.

Justification

The DHS mission is to lead a unified national effort to secure America. The mission demands an integrated approach to all hazards. Yet the Department’s legacy facilities are dispersed over more than 46 locations throughout the National Capital Region (NCR), sometimes with sub-optimal security protections and routinely impacting adversely critical communication and coordination across DHS Components. To support the incident management and command-and-control requirements of the DHS mission, the Department will continue development of the DHS Consolidated Headquarters at St. Elizabeths Campus to house executive leadership, operations coordination, policy and program management functions in a secure setting.

Consolidation will allow the strategic realignment of the portfolio to more effectively and efficiently support the mission as organizations mature and new program requirements develop. In addition, consolidation will contribute to reduced facility costs, provide quality work space and other amenities to attract and retain the best professional workforce.

The request of \$159.643M maintains the Phase 1 construction of the USCG Headquarters on target and initiates construction of the Phase 2A DHS Headquarters, and the National Operations/Collocation of Component Operations Centers immediately adjacent to the USCG site.

Phase 2A construction elements overlap with the Phase 1 site, requiring a seamless integration of this phase in order to avoid significant adverse impacts to costs and schedule between the phases due to site disturbances, conflicts, and loss of construction efficiency opportunities. At a funding level of \$159.643M, the DHS Consolidated

Headquarters 3-Phase development plan remains on schedule with Phase 1 occupancy (USCG) planned for FY 2013, Phase 2 occupancy (DHS HQ, NOC/Collocation of Component Operations Centers, FEMA) planned for FY 2014 and Phase 3 occupancy (TSA, CBP, ICE, USCIS, USSS, S&T, DNDO) planned for FY 2016.

Impact on Performance (Relationship of Increase to Strategic Goals)

This funding request directly supports the Department's strategic goal to Strengthen and Unify DHS Operations and Management. Continued development of the DHS Consolidated Headquarters at St. Elizabeths will allow the Department to enhance performance through improved communications and coordination across all DHS Headquarters units. Consolidating will foster a "one DHS" culture and optimize prevention and response capabilities across the spectrum of operations.

PPA Mission Statement

The DHS HQ Consolidation Project is responsible for the collocation of the Department through the lease consolidation and build out of the St. Elizabeths campus. The DHS Management Directorate provides the coordination, planning, policy, guidance, operational oversight, and innovate solutions for the management needs of the entire Department for the One DHS campus.

The Department is requesting a new and separate appropriation for this activity separate from the current appropriation for the Under Secretary for Management (USM). The DHS HQ Consolidation will provide the Department, the Office of Management and Budget (OMB), and Congress with improved visibility of the ongoing efforts for establishing a consolidated DHS Headquarters. Additionally, the new appropriation will allow the Department to facilitate better reporting and overall management of the program.

BUDGET REQUEST AND SUPPORTING INFORMATION

Working Capital Fund

I. Working Capital Fund Overview

A. Mission Statement for the Working Capital Fund (WCF):

To provide cost-effective support services throughout DHS, the WCF provides a mechanism for shared service costs to be distributed and recouped, and facilitates the delivery and oversight of shared services.

The WCF supports selected services, activities, and programs that benefit numerous DHS organizational Components. Furthermore, the WCF supports the funding for government-wide initiatives as well as DHS-crosscutting initiatives approved by the Office of Management and Budget (OMB) and Congress. The goal of the Under Secretary for Management is to maintain and operate a fund that promotes economy, efficiency, and accountability and to apply best practices from the public and private sectors for improving organizational performance, operational efficiencies, and ensure full cost recovery of goods and services for selected DHS agency-wide programs, activities, and services.

B. Budget Activities:

The key WCF activities are organized under the four activity categories listed below.

Fee for Service Activities

DHS WCF activity managers provide or coordinate delivery of a specific service or benefit to DHS Components. The benefit/cost for providing the WCF activity is tangible and is directly linked to a Component's use of services or products. An example of a fee for service activity is print and electronic access subscription services through the Library of Congress's FEDLINK. These WCF activities are reimbursed for the provision of services, and have characteristics typical of a business enterprise. The costs for operating the "business" are reimbursed by billing customers for the provision of goods and services at rates that are pre-approved by the Department's Chief Financial Officer and reviewed by component customers. Each fee for service activity is expected to recover its operational expenses, usually at a much lower cost as the Components benefit from economies of scale. Examples include: GSA rent and real estate services, IT and telecommunication services, human resource services, procurement operations, and financial management services.

Government-wide Mandated Service Activities

Government-wide Service Activities are Administration-sponsored initiatives that are managed by a designated Federal department to improve overall government performance. Other departments are assessed for the cost of supporting the activity. The activities should also provide a direct benefit to participating Components. Examples include the government-wide e-

Government initiatives and the OMB-sponsored Interagency Councils.

DHS Crosscutting Activities

The DHS crosscutting activities are Department-wide programs managed by a single office that yield some benefit to all DHS Components, such as Strategic Sourcing. The actual costs of the programs are recouped by redistributing the costs to the Components based on their share of the discretionary budget, staffing or some other fair and equitable pro-rata basis.

WCF Management Activity

The WCF Management Activity includes funding for the staff that develops WCF policy and procedures, formulates and executes the WCF budget and facilitates dispute resolution of issues between activity managers and customers.

C. Budget Request Summary:

The DHS WCF operating requirements for FY 2012 are estimated to be 574 FTE and \$752.041 million in reimbursable authority. This is a net increase of \$37.735 million increase and 167 positions and 160 FTE

In FY 2012, the WCF will continue all services and activities with the exception of the Tri-Bureau Service Activity. The FY 2012 net increase is attributable to a program increase of \$1.984 million for DHS Crosscutting Activities, increase of \$76.429 million for Fee for Service Activities, program increase of \$0.316 million for the Working Capital Fund Management, and decreases of \$37.977 million for the Tri-Bureau Service Activity and \$3.017 million for Government-wide Mandated Service Activities.

Fee for Service Activity Program Changes: \$76.429 million increase and 71 FTE increase

- National Capital Region Infrastructure Operations; \$26.695 million increase and 40 FTE – DHS will continue to realize an increased need for network storage and connectivity into FY 2012. Continuing technology refresh for the end user equipment will be joined by the refresh of the backbone network equipment.
- Consolidated Subscriptions (Library of Congress – FEDLINK); \$20.184 million increase – The Department has strived to reduce the costs of subscriptions, publications, electronic journals, data base subscriptions and books. As a result of the efficiency initiative, the scope and level of involvement in the FEDLINK program has expanded two-fold, resulting in overall efficiencies with the program being managed through the Working Capital Fund (WCF).

- Enterprise License Agreements; \$16.012 million – The FY 2012 increase is attributed to the fact that Components were currently paying for Adobe software licenses outside of the WCF. For FY 2012, this activity will continue to manage Microsoft licenses and add management of Adobe licenses.
- Infrastructure Transformation Program; \$5.112 million increase and 14 FTE – This increase will fund a limited technology refresh necessary to sustain capabilities of the enterprise services provided and accommodate network growth.
- Procurement Operations; \$4.860 million and 11 FTE increase – This funding request is to increase staff to reflect actual workload levels and resource needs. OPO will hire the staff necessary to meet its customers’ workload demands and increased costs for shared services managed by other Working Capital Fund activities.
- National Finance Center Payroll; \$3.656 million increase –This funding request includes operations and maintenance cost increases for NFC payroll and personnel systems including EmpowHR, and for increased hosting services for the Department’s time and attendance system, WebTA, due to population growth. This increase will support deploying EmpowHR to additional DHS Components in FY 2012 including FEMA.
- Financial Management Support (Financial Operations); \$0.816 million and 4 FTE increase - This increase supports increased assessments of internal controls over financial reporting and operations, and efforts to reduce improper payments for the Offices of the Secretary and Executive Management, Under Secretary for Management, and the Working Capital Fund.
- Flexible Spending Plan; \$0.644 million increase – The increase will support Flexible Spending Plan administration fee cost increases due to increased staffing levels and trend analysis of employee participation.
- DHS Executive Leadership; \$0.571 million and 2 FTE increase – The Executive Leadership Curriculum consists of two DHS-wide leadership development activities: the Secretary’s Senior Leadership Conference and the Senior Executive Service Candidate Development Program (SES-CDP). The increased funding and FTE reflect the growth in participation in these programs and the consolidation of multiple candidate development programs previously managed by the Components.
- HQ Human Capital Services; \$0.924 million increase - In FY 2012, the estimated HQ population assumes “full-service” capacity. An increase in funding request will provide continued operational oversight of all contracted services as well as provide more effective focus on customer support. This team has continued to be very efficient and operates seamlessly, thus keeping costs with a modest increase for supplies
- HQ Executive Leadership Development; \$0.006 million - Developing and maintaining a robust leadership development program is not only an incentive to attracting new talent and achieving a diverse and representative workforce, but also contributes to employee satisfaction and enhanced morale that greatly assists in creating “One DHS.”

- TIER/CFO Vision; \$0.200 million increase – The FY2012 program increase of \$0.200 million would cover operation and maintenance costs for this activity.
- HCBS Payroll Service; \$0.180 million increase - The FY 2012 program increase will support the anticipated increase in operation and maintenance costs for currently deployed enterprise-wide systems, resulting from planned improvements in system capabilities as specified by the user-community.
- GSA Rent; \$19.833 million increase - The FY 2012 budget increase includes GSA occupancy agreement updates, Federal Protective Service (FPS) rate increases, and rent for additional space that will be required in FY 2012.
- Employee Assistance Program; \$0.001 million - The Employee Assistance Program supports a mental and emotional healthy workplace. This program provides support services related to life and work issues. Additionally, it provides for quality services for managers or work groups that are dealing with stressful or potentially stressful organizational issues. The FY 2012 program increase is required to support current levels of the participating population.
- Financial Statement Audit; \$3.555 million - The Financial Statement Audit activity requests additional funding to cover increases in contractor costs and for travel costs for the OIG staff. The amount includes an increase for time and material costs for audit services. These services includes a Full Scope audit cost for Customs and Border Protection (CBP), Federal Law Enforcement Training Center (FLETC) Transportation Security Administration (TSA), Immigration and Customs Enforcement (ICE), and Citizenship and Immigration Services (CIS).

Program Offsets, reduction of \$26.819 million in Fee for Service Activities.

- \$18.415 million Data Center Consolidation
- \$4.875 million - Finance and Accounting Shared Services
- \$0.470 million - Bankcard Program
- \$3.059 million – Internal Control Audit

Tri-Bureau Services Activity Program Changes: \$37.977 million and 2 FTE decrease

This PPA is eliminated for FY 2012. In FY 2012 DHS will no longer require Data Center Services from the Department of Justice. This results in a program decrease of \$37.977 million and 2 FTE. All Data Center requirements will be met through DHS data centers.

Government-wide Mandated Service Activity Program Changes: \$3.017 million decrease

- Enterprise Human Resources Integration; \$0.800 million increase – This increase is to fund an additional 10,290 licenses for electronic official personnel folders due to anticipated staffing growth and increased maintenance expenses on existing licenses.

- Human Resources Line of Business (LOB); \$0.005 million increase - The increase is to fund operations and maintenance costs for this activity.
- Interagency Council Funding; \$0.311 million increase – The increase is to fund operations and maintenance costs for this activity.
- USA Jobs; \$0.035 million increase – The additional funds will support the USA Jobs system to deliver state-of-the-art on-line recruitment services to job seekers.
- E-Gov Benefits; \$0.217 million increase – The e-Gov Benefits activity provides a single point of access for citizens to locate and determine eligibility for government benefits and services, GovBenefits.gov. The increase in funding enables the activity to provide the same level of service from the previous fiscal year.
- Budget Formulation & Execution LoB; \$0.010 million increase - The increase is to fund operations and maintenance costs for this activity.
- Grants Management LoB; \$0.059 million increase - The objective of this initiative is to establish common solution and target architecture approaches that identify systems, best practices, migration strategies and key interfaces to develop common business process and system solutions.

Program Offset, reduction of \$4.452 million in Government-wide Mandated Service Activities

- \$0.245 million in e-Gov Disaster Management
- \$0.237 million in e-Integration Acquisition Environment
- \$0.319 million in e-Rulemaking
- \$0.286 million in e-Grant
- \$3.220 million in e-Training
- \$0.143 million in e-Financial Management LoB
- \$0.002 million in Geospatial LoB

DHS Crosscutting Activity Program Changes: \$1.984 million

- Chief Procurement Office Shared Reporting; \$2.465 million increase – This increase will fund increased system capability and functionality, cross-Component collaboration, and improved information technology security compliance.
- Capital Planning and Investment Control; \$0.202 million increase - This Activity provides services to support these efforts, including automated tools to assist with portfolio analyses, document preparation, and document review and scoring, formal training, informational briefings, and remedial coaching to improve business case quality.

Program Offset for DHS Crosscutting Activities

- \$0.683 million for Strategic Sourcing

Working Capital Fund Activity Program Changes: \$.316 million and 2 FTE

- DHS WCF requests additional funding for the WCF operations for technical support of the new WCF activities, existing and expanding WCF activities. This will enable the WCF ensure compliance with Congressional guidance and provide oversight to the increased number of WCF activities approved for the WCF. The WCF will continue to improve cost methodologies in determining customer assessments for products and services received.

Program Change	77	71	76,429
2012 Request	558	552	\$699,962

Working Capital Fund requests \$699.962 million and 552 FTE in FY 2012 for Fee for Service activities.

CURRENT SERVICES PROGRAM DESCRIPTION:

FEE FOR SERVICE ACTIVITY

GSA Rent – Fee for Service Activity

Description of Service: The General Services Administration (GSA) charges rent to over 100 Federal agencies, which is deposited into the federal buildings fund and used to operate the government's buildings and pay rent to the private sector for lease space. GSA provides workspace and related services for over 100 federal client agencies serving more than one million workers through the Public Buildings Service (PBS). Whenever possible, client agencies are located in existing government-owned space. If suitable space in the government inventory is not available, PBS acquires leased space in privately owned buildings.

GSA also provides related real estate services including the operation and maintenance of buildings and out-leasing programs. GSA's Computer Integrated Facility Management program uses cutting-edge technology to look at a building's life cycle. Real estate services provided to clients appear in Federal agencies' monthly electronic rent bills. GSA has simplified these bills so agencies have a clearer understanding of the costs they are charged for their workspace and services.

The Department has established a clearing account to expedite the payment of GSA rent billings for the Department of Homeland Security, excluding some of the major

Components. GSA bills the Department on a monthly basis for all GSA-controlled space that the Department occupies throughout the United States, including parking spaces allotted to the Department. Through this account, the Department entities have been billed based on the amount of space occupied multiplied by the average cost of rent per square foot, as averaged across all HQ space. For FY 2012, it has been proposed to use actual GSA rates for each particular building, instead of averaged rates. In the Washington, DC area, Components are also assessed rent surcharges on a per building basis. The rent surcharge is applied to all space types except warehouse and parking. The rent surcharge covers common costs including Federal Protective Service (building security), overtime utilities and antenna charges, as well as DHS-shared space. A computer-aided facility management system is being implemented to generate Component space assignments and billings.

Cost Allocation Methodology: The cost allocation methodology is the amount of occupied space for each Component in each building, multiplied by price per usable square feet for each building. The per building rentable square foot price is based on GSA rent, and includes Federal Protective Service (FPS), overtime utilities, antenna charges and DHS shared space.

Full Time Equivalent (FTE): This activity requires 5 FTE.

FEDLINK (Library of Congress) – Fee for Service Activity

Description of Service:-The Department of Homeland Security Library and Information Services' mission is to provide the DHS program managers and their end users with desktop access to mission critical, authoritative, timely, relevant commercial information content products and services. The activity was established in 2004 to implement DHS-wide information assets supporting decision making, enforcement, investigation, research and academic information gathering activities of the DHS workforce. The activity collaborates with the Library of Congress (LOC) FEDLINK program through which the LOC shares its expertise in information services and consolidates the buying power for Federal agencies.

Cost Allocation Methodology: The FY 2012 costing algorithm is based on three differing service types: enterprise-wide availability, account specific availability, and percentage of use. The percentage of use methodology is pending approval from the Working Capital Fund Governance Board.

Enterprise-wide Availability: Services available enterprise-wide are made available to the entire DHS population based on Internet Protocol (IP) authentication. The cost for these services is distributed to each Component based on FTE. Products received from these vendors consist of specific collections materials.

Account Specific Availability: Services available based on specific account availability are accessed using vendor provided user names and passwords. The cost for these

services is distributed based on the actual cost of the user subscription service including applicable FEDLINK fees.

Percentage of use: Services are accessed using user names and passwords. The cost for these services is distributed to each Component organization based on prior usage percentages related to the year product cost.

Full Time Equivalent (FTE): This activity requires 5 FTE.

Financial Management (Finance & Accounting Shared Services) – Fee for Service Activity

Description of Service: The DHS Office of the Chief Financial Officer (OCFO) provides authorization for financial systems in DHS and sponsors, sets policy, and manages the development, implementation, operation and maintenance of the departmental financial management systems and related business processes. DHS OCFO has determined that selected financial management services will be obtained from U.S. Immigration and Customs Enforcement (ICE), on a reimbursable basis.

Activities include:

- **Financial Policies and Procedures:** In conjunction with all involved parties, ICE will support the implementation of any new or modified financial management procedures for processing and reporting financial transactions. Further, ICE will work to establish appropriate policies, procedures and standards for business process activities.
- **Administration (including Customer Service):** Provide administrative tasks associated with ongoing management and resourcing of financial operations on behalf of the DHS customers and consistent with the management and execution of this Service Level Agreement (SLA). Examples of these activities include: Continuity of Operations Planning (COOP), SLA management and execution, customer outreach and evaluation of services, and financial management group meetings.
- **Financial Processing:** In collaboration with OCFO, ICE will maintain appropriate internal controls in order to provide reasonable assurance that financial information is reported in compliance with all applicable laws, regulation and accounting standards and policies established by DHS. Specifically, these activities include, but are not limited to:
 - Collections and Reimbursable Agreements
 - Disbursements
 - Payroll Processing
 - Budgetary Resources
- **Financial Analysis, Reporting, and Statements:** Provide financial statement reporting and issue resolution. ICE will maintain separate general ledger accounts within the Federal Financial Management System (FFMS) for the DHS customers and maintain the DHS customers' balances on the accrual basis of accounting and in conformance with the U.S.

Standard General Ledger (SGL) at the transaction level. Activities with respect to this function include, but are not limited to:

- General Ledger Maintenance
 - Fund Balance with Treasury
 - Financial Data Management
- External Reviews and Inquiries: Provide responses to financial management and reporting related questions and data requests from external sources, including independent auditors, the Office of the Inspector General (OIG), Government Accountability Office (GAO) and Congress.
 - Financial Systems: Provide financial system support tasks. These activities include, but are not limited to:
 - Hosting and maintenance of FFMS
 - Administration of contract for FFMS Training
 - FFMS and E-travel User Access
 - FFMS and E-travel Help Desk
 - Support of DHS systems modernization efforts
 - System updates and enhancements

Cost Allocation Methodology: The cost allocation methodology for this activity is based on the historical cost of providing seven categories of financial support to each participating Component. The seven categories of financial support services include the following: (1) financial reports, (2) obligations and payment processing, (3) system usage, (4) receipts, (5) payroll, (6) overhead, and (7) travel and cash management services.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Financial Statement Audit – Fee for Service Activity

Description of Service: The DHS OIG awards a contract to an independent Certified Public Accounting (CPA) firm to perform a financial statement audit functions. The costs include travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by tOIG as the Contracting Officer’s Technical Representative (COTR). Award will be made under a GSA schedule contract.

The Financial Statement Auditor is selected through contracting procedures by the OIG (with the Bureau of Public Debt (BPD) acting as the procurement office) and must stay independent from the DHS Components that are being audited. The selected auditor commences work immediately; entrance conferences are held within a short time after award of the financial statement audit contract.

The Office of the Chief Financial Officer coordinates and prepares the DHS consolidated financial statements and in this role acts as primary liaison for the auditors. All DHS departmental CFOs coordinate with the Director of Financial Management in the preparation of financial statements and completion of the audit.

The Office of the Inspector General is the COTR for the Financial Statement Audit contract. The WCF funds are used to support the departmental financial statement audits with the OIG having the following responsibilities:

- Contracting with an independent public accounting firm to perform the FY 2012 DHS financial statement audit.
- Providing oversight of the contract auditor.
- Providing estimated cost information that allows the OCFO to properly budget for audit costs.
- Notify the OCFO of any potential cost overruns and the related reasons.
- Review and approve invoices for payment.

Cost Allocation Methodology: The cost allocation methodology is the sum of the estimated auditor's billable hours multiplied by the hourly rate plus travel and incidental costs.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Internal Control Audit - Fee for Service Activity

Description of Service: The contract includes internal control audit services with the auditor providing the services through a time and materials contract. The cost includes travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by the OIG as the COTR. The award will be made under a GSA schedule contract.

The Internal Control Auditor is selected through contracting procedures by the OIG (with the Bureau of Public Debt (BPD) acting as the procurement office) and must stay independent from the DHS Components that are being audited. The auditor selected commences work immediately and entrance conferences are held within a short time after award of the financial statement audit contract.

The Office of the Chief Financial Officer (OCFO) coordinates the assessment process to support management's assertion and in this role acts as primary liaison for the auditors. All DHS departmental CFOs coordinate with the Director of Financial Management in the preparation of and completion of the independent audit, and the Director of the Internal Controls Program Management Office on management's assessment of internal controls.

Cost Allocation Methodology: The cost allocation methodology is the estimated auditor's billable hours per Component multiplied by the hourly rate plus travel and incidental costs.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Financial Management Support (Financial Operations) – Fee for Service Activity

Description of Service: The Office of Financial Operations (FO) is a line of business under WCF that provides financial management to the offices within the Office of the Secretary and Executive Management (OSEM), the Under Secretary for Management (USM), the Office of the Chief Financial Officer (OCFO), and the Office of the Chief Information Officer (OCIO). The WCF Financial Operations processes and manages the multiple types of financial documents and transactions for its customers, as well as FedTraveler Help Desk Support.

This funding provides the personnel and materials to perform the following budget execution activities:

- Procurement Requisition Operations and Management
- Invoice and IPAC Operations and Management
- Travel Operations Support and Management
- Payroll Reclassification, Reconciliation and Reporting Management
- Fiscal Year End Close Coordination and Support
- Travel Cards Operations and Management
- Purchase Card Operations Management

In FY 2012, an internal control function is added to assess entity-level controls and conduct A-123 process assessments of financial reporting processes for General Ledger Management and overseeing the reconciliation of the Fund Balance with Treasury for OSEM and USM offices. The internal control function will help FO meet the requirements of the Federal Managers Financial Integrity Act and provide the required annual internal control assurance to the Headquarters offices.

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the percent of each office within Office of Financial Operations' adjusted total FTE multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 36 FTE. In FY 2011, 17 FTE will be added under the DHS Balanced Workforce Initiative.

Bankcard Program - Fee for Service Activity

Description of Service: DHS has selected Customs and Border Protection (CBP) as the

servicing agent to provide for a centralized invoicing and payment system for Components within DHS. CBP has developed and implemented a system that supports the receipt of daily invoices for all of DHS from JP Morgan Chase.

This system assures payment of those invoices within one business day of receipt, and provides transmission of an electronic file containing transaction data to each Component's accounting system.

Cost Allocation Methodology: The cost allocation methodology for this activity is based on the percent of each Component's number of Bankcard transactions processed divided by the total number of Bankcard transactions processed for all participating Components multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Treasury Information Executive Repository (TIER) – Fee for Service Activity

Description of Service: OCFO is responsible for creating the Department-wide financial statements. As part of this process, two software packages are used to process the work. These two products are the Treasury Information Executive Repository (TIER) and CFO Vision Software. The Department has realized benefits from the use of these products through cost and resource savings and is able to produce financial statements in a timely manner. This has been beneficial given the accelerated timeframes for producing the Annual Financial Report.

Cost Allocation Methodology: The cost allocation methodology for this activity is average cost equally distributed to the Components.

Full Time Equivalent (FTE): This activity requires 0 FTE.

National Finance Center (NFC) Payroll/Services and Reporting – Fee for Service Activity

Description of Service: Department of Agriculture/National Finance Center (NFC) provides Payroll/Personnel services utilizing their legacy mainframe systems (payroll) and EmpowHR PeopleSoft application (personnel). In addition, NFC provides Payroll/Personnel policy supports and benefits reconciliation, tax reporting, and payroll problem resolution.

Cost Allocation Methodology: The FY2012 cost estimate is based on the following:

COST AREA	COST DRIVER
Postage-Earnings and Leave and Personal Benefits Statements	Pieces of mail
Treasury FMS Postage Charges for Single Address Checks	Checks mailed
USDA OIG Oversight of Non-USDA Payroll Processing	Avg # of employees paid
Payroll Operations Branch Support	Avg # of employees paid
Tax Reporting	Avg # of employees paid
Payroll Policy Support	Avg # of employees paid
e-Pay Policy Support	Avg # of employees paid
Benefits Reconciliation and Liaison Area	Avg # of employees paid
Debt Management	Receivables established
Claims	Claims processed
Payroll Accounting	Avg # of employees paid
Certification	Avg # of employees paid
Ad-Hoc reporting (based on CPU Minutes used)	CPU Minutes
Data Center Operations (Other than FOCUS)	Avg # of employees paid
Payroll/Personnel Baseline Services	Avg # of employees paid
3 rd Party Garnishment Processing	# of manual garnishment accounts & NFC labor cost

In addition to providing NFC Payroll/Personnel services and EmpowHR hosting, NFC also provides hosting services for the webTA (time and attendance) application.

NOTE: FEMA plans to migrate to EmpowHR in FY 2012.

Full Time Equivalent (FTE): This activity requires 0 FTE.

HQ Human Capital Services -Fee for Service Activity

Description of Service: The Human Capital (HC) Services team provides HQ Human Capital operational services. The team ensures that the personnel processes for HQ’s managers/employees and service providers, run efficiently and effectively. Examples of services provided include: Staffing and Recruitment; Position Classification/ Position Management; Performance Management; Payroll and Personnel Action Processing; Employee and Labor Relations Support; Retirements and Benefits Support; Time and Attendance Support.

The HC Services Team provides coordinated and prioritized services to all DHS customers; ensures timely and effective recruitment of staff; effectively manages the “on-board” staffing process (which includes security clearances and collaboration with the Personnel Security Office),; and, efficiently facilitates staff exiting out of DHS HQ.

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based

on the percent of each Component's number of FTE divided by the total number of participating Component's FTE multiplied by total estimated cost of the activity.

Full Time Equivalent: This activity requires 80 FTE. In FY 2010, 29 FTE were added to the program under the DHS Balanced Workforce Initiative.

Human Capital Business Systems (HCBS) – Fee for Service Activity

Description of Service: The mission of the HCBS is to design, develop, acquire, implement, maintain and support DHS enterprise-wide human capital business systems and reduce costs by consolidating the number and variety of DHS human capital systems maintained. The system capabilities meet the requirements specified by the user-community and provide services in a timely, user sensitive and cost-effective manner. HCBS continues its enterprise acquisition strategies on behalf of all of DHS Components, avoiding considerable duplicative costs if DHS Components proceed independently. HCBS offers several enterprise-wide systems to include: web-based Time & Attendance; Personnel and Payroll; and other enterprise HR services and applications to include supporting the Enterprise Integration Environment (EIE), which allows hosting and integration of enterprise application data. In each case, the Components are supported by the HCBS unit in a collaborative and leveraged approach.

Cost Allocation Methodology: Costs are based on three billable areas: (1) estimated FTE costs providing HCBS operational support; (2) operations and maintenance of WebTA; and (3) estimated costs for Operational Support and Reporting (contract labor hours). The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's FTE divided by total participating FTE multiplied by the total estimated cost of the activity. Customers will only be billed for the areas that they receive service.

Full Time Equivalent: This activity requires 25 FTE.

Flexible Spending Accounts (FSA) Administrative Costs – Fee for Service Activity

Description of Service: FSAs are employee-funded accounts which are used by the employee account holders to pay for medical expenses that are tax deductible, but not reimbursed by another source,.. Contributions to the accounts come from an employee's pre-taxed salary; the Federal government does not make a contribution. However, there is a fee that is charged by the administrator of these accounts; effective FY2008, agencies are required by law to pay these fees on behalf of their employees.

The costs for this program are charged based on actual invoices received in October and March of each calendar year. The March bill assesses a fee for employees of record as of January 1 of the calendar year. The October bill makes an adjustment for any new employees who have entered the program since January 1. The Human Capital Business Office manages the invoicing process with the FSA provider and charges the direct cost

of the fees to the Component based upon actual invoices received from the vendor.

Generally, the Department saves enough money in reduced payroll taxes to cover administrative fees. Administering the costs of these services through the WCF provides for greater efficiencies through centralized management.

Cost Allocation Methodology: The allocation methodology for the Component assumes the total cost times the transaction percentage - which is the Component's percentage of the population serviced (FTE).

Full Time Equivalent (FTE): This activity requires 0 FTE.

DHS Executive Leadership Development – Fee for Service Activity

Description of Service: The DHS Leadership Program is a key element in accomplishing the Secretary's goal of "One DHS." The Department is consolidating its multiple Senior Executive Service (SES) Candidate Development Programs (CDP), which will likely increase the size of each SES CDP cohort. The "One DHS" CDP will be the only CDP offered in the future. Previously, TSA, CBP, and USSS offered CDPs for mission critical employees. Candidates from across the Department will be exposed to a core training program, and will have the opportunity to participate in mentoring, developmental assignments, and other activities throughout the Department. Each candidate will be closely observed by an Executive Resources Board (ERB), either at DHS HQ or their operational Component. The staff will work with candidates, mentors, developmental assignment supervisors, and members of ERBs, to closely evaluate the progress of each candidate. These evaluations will ensure the candidate is taking maximum advantage of developmental opportunities and modify developmental activities as necessary.

The Secretary's Senior Leadership Conference is important as change management starts with top leadership. The purpose of this conference is to:

- Provide an opportunity for the Secretary to meet with DHS executives and for those executives to interact with each other;
- Broaden the perspective of DHS leadership by actively creating a forum for in-depth dialogue and discussion for crosscutting Departmental issues;
- Allow executives to learn about both key DHS-wide and Component-specific strategic and tactical initiatives for the coming year (which is predicated on strategic linkage of resources, performance and results); and,
- Provide perspective from the White House, Congress, and others on issues important to DHS.

The DHS Senior Executive Service Candidate Development Program serves as a cornerstone for sustaining a corporate leadership identity as directed in the DHS Strategic Plan, contributes to meeting the Department's succession planning goals, and creates a

high-quality SES leadership cadre. It is also a critical element in sustaining a “Green” rating on OMB’s Human Capital Scorecard.

This centralized program complements and enhances the strengths of existing Component leadership development initiatives across the Department and further facilitates succession planning opportunities. It provides the opportunity for participants to take advantage of developmental/rotational opportunities in other DHS Components, thereby increasing participant’s corporate DHS knowledge and experience. In addition, Components benefit from these rotational assignments by having a senior staff person working with them on real issues and offering different perspectives and/or business experiences.

Cost Allocation Methodology: The costs are allocated based on the percentage of SES slots a Component has relative to the total DHS SES (or SES equivalent) population excluding military.

Full Time Equivalent: This activity requires 5 FTE.

HQ Executive Leadership Development/General Workforce Training – Fee for Service Activity

Description of Service: The HQ Executive Leadership Development Program provides executive level training to close potential competency gaps in our DHS Headquarters leadership. Programs to support executive leadership are provided through the following programs: The Treasury Executive Institute (TEI); the SES Forum; and, the Individual Executive Development Training and General HQ Workforce training. In addition to TEI and the SES forum, training opportunities could include attending courses in the Management Development Center (Shepherdstown, WV) or the Federal Executive Institute.

Cost Allocation Methodology: The allocation methodology for the Components is the total cost divided by the total population serviced and then multiplied by the Component percentage of the population. This allocation excludes the OIG, per request.

Full Time Equivalent (FTE): This activity requires 0 FTE.

HQ Employee Assistance Program (EAP) — Fee for Service Activity

Description of Service: The Employee Assistance Programs (EAP) provides services designed to help employees, managers, and organizations meet life challenges and remain healthy, engaged, and productive.

EAP provides short-term counseling and referral for issues that are having an impact on an employee's ability to work. The EAP will either address the concerns during counseling sessions, or through referrals to appropriate community resources, counselors, and other supports. Issues addressed by the EAP include:

- Life changes – divorce, new job, new baby, aging parents, grief and loss, retirement
- Life challenges – drug and alcohol abuse, depression, eating disorders, mental illness
- Job stress and burnout
- Coping with difficult situations or difficult people

The EAP is mandated under 5 U.S.C. 7904, 42 U.S.C. 290dd-1(a), and 42 U.S.C. 290ee-1(a).

Cost Allocation Methodology: The cost allocation methodology for this activity is the total cost of the EAP program divided by the population serviced.

Full Time Equivalent (FTE): This activity requires 0 FTE.

CIO/DHS Infrastructure Transformation (ITP) Program – Fee for Service Activity

Description of Service: The DHS Consolidated ITP has served the majority of employees of the Department since its establishment on March 1, 2003. Since the IT infrastructure provides the foundation for effective operations of DHS systems and applications, including information sharing across Components, a reliable and robust infrastructure is critical to the success of the DHS mission. From a business perspective, the goal of the IT infrastructure transformation is for the Department to be able to share data from any point in DHS to any decision maker.

The program provides a robust platform on which to quickly launch new capabilities. For example, when DHS was created the Department supported numerous legacy IT programs, including: 15 separate targeting systems; 14 alerts and warnings systems and several identification and credentialing systems across 24 DHS run data centers; 7 wide area networks; and, multiple local area networks with overlapping system circuitry. These data centers contained over 12,000 servers. Contrasting acquisition strategies and IT infrastructure policies among Components further complicated the DHS environment and the ultimate goal of moving to One DHS-wide IT infrastructure in a consolidated IT data center operational environment.

The Infrastructure Transformation Program (ITP) has been chartered by the Deputy Secretary as a DHS Level 1 investment with the following project domain initiatives included in the scope of the transformation effort to provide the following services: Network, Email, Data Center, and Wireless.

ITP resides within the IT Services Office (ITSO) of the DHS CIO. ITP is managed by the ITSO Enterprise Services Division (ESD) and is led by the Director of ESD and a CIO Council member executive sponsor. Furthermore, ITP is supported by a senior executive steering group of CIOs, which is staffed by a team of technical experts hired by the Department HQ from the Components, several Components' working group members, and contractor support.

The OCIO is committed to building a strategic human capital planning capability that is supported by a structured total workforce approach; one that seeks efficiencies, cost effective performance improvements, and a more appropriate balance of in-house and contractor resources.

Cost Allocation Methodology: The FY 2012 cost allocation is based on the Components' contribution percentages to the Consolidated IT Infrastructure FY 2010 OMB Exhibit 300.

Full Time Equivalent (FTE): This activity requires 24 FTE.

National Capital Region Infrastructure Operations (NCRIO) – Fee for Service Activity

Description of Service: The NCRIO serves the DHS Headquarters, the Department's Components, and select field offices of the Department's major Components for network and internet/intranet access; infrastructure transformation and support; management and delivery of desktop computing applications and equipment, email, wireless communications, video (VTC), voice (phone) and messaging; communications security; and IT operations disaster planning and mitigation to ensure continuous operations. The NCRIO manages and maintains all deployed applications for full functionality and continuous availability on all DHS systems, as well as full functionality of file and data storage and retrieval, printing, and remote access. The NCRIO coordinates management and delivery of these services with build-out of new facilities and provides customer service through a 24/7 help desk.

In providing these services, the NCRIO adheres to and follows all applicable executive orders, Presidential directives, Federal laws, Federal orders management policies, handbooks, guidelines, processes, and procedures. The NCRIO continually monitors vendors' performance and technology to ensure that DHS HQ IT infrastructure services conform to specified standards for reliability, readiness, sustainability, supportability, availability, stability, security, flexibility, responsiveness and cost effectiveness. The NCRIO tracks workload data by functional service area to identify trends and statistical variations, and provides technical, logistical and financial forecasts for future years. The NCRIO conducts baseline assessments of its existing systems and infrastructure against industry standards for items such as configuration and performance metrics. Using the

results of baseline evaluations, the NCRIO maintains a program for the improvement of information technology services.

The NCRIO resides within ITSO of the DHS CIO. NCRIO is managed by the ITSO Customer Relationship Management Division. Cost and activity based analyses are conducted, and projections validated independent of NCRIO management by the ITSO Budget and Financial Management Division (BFMD). Senior executive management of the DHS HQ Directorate Components formed a review group to identify and resolve customer service issues in monthly meetings with the DHS CIO.

Cost Allocation Methodology: The FY 2012 WCF submission is allocated among the participating organizational Components based on seat counts as determined by the Global Address List (GAL).

Full Time Equivalent (FTE): This activity requires 86 FTE. 16 FTE will be added to the program as a result of the DHS Balanced Workforce Initiative in FY 2011.

Enterprise License Agreements (formerly Microsoft) – Fee for Service Activity

Description of Service: This service allows Components to consolidate license requirements into a single enterprise-wide procurement to leverage DHS buying power. The activity further helps to decrease costs, reduce paperwork and save time by eliminating the need for repetitive, individual purchases from vendors. The Department continues to pursue opportunities to benefit from economies of scale, moving from Component or office-specific software or hardware licenses to larger enterprise licenses for common services.

Microsoft:

In the spirit of the Federal Acquisition Streamlining Act (FASA), the Department of Homeland Security and Dell Marketing, L.P. decided to re-enter into a single Blanket Purchase Agreement (BPA) for a DHS-wide Microsoft Enterprise License Agreement to standardize office automation and communication applications across the Component agencies' existing IT environments. The account provides for the funding and management of the Microsoft Enterprise Agreement awarded in June 2009, which provides enterprise access to the Microsoft suite of products. The products include the software needed for individual desktops, laptops, and server platforms, such as MS Office, MS Project, MS Visio, MS Advanced Server, etc. This license agreement is utilized by all of DHS and this budget request reflects the contractual obligations of each of the Components.

Adobe:

The Secretary's Efficiency Review Board tasked the Office of the Chief Information Officer with establishing an Adobe Enterprise License Blanket Purchase Agreement (Adobe BPA) to provide DHS desktops and servers with the suite of Adobe products. Established in March 2010, the Adobe BPA will reduce costs, eliminate inconsistent

licensing, take advantage of economies of scale to ensure the best pricing and streamline the procedures required to procure all Adobe licenses for the Department. The Adobe BPA includes all Adobe products offered on the Adobe authorized resellers' GSA Schedule, and provides immediate Adobe Acrobat licensing for all DHS Components. This agreement is utilized by all of DHS. The request reflects the contractual obligations of each of the Components.

Enterprise License Agreements (ELA) resides within the IT Services Office of OCIO. ELA is managed by the ITSO Infrastructure Services Planning and Control Division (ISPC) and is led by the Director of ISPC with support by Components' working group members. Cost management and activity based analyses are conducted by the ITSO Budget and Financial Management Division.

The OCIO is committed to building a strategic human capital planning capability that is supported by a structured total workforce approach; one that seeks efficiencies, cost effective performance improvements, and a more appropriate balance of in-house and contractor resources. During FY2011, and with the FY 2012 request, the OCIO is implementing a DHS Balanced Workforce Strategy involving contractor conversions and the creation of additional personnel positions to provide greater government oversight and management of IT projects. The additional positions being requested in FY 2012 will be funded through the realignment of base resources.

Cost Allocation Methodology: The annual costs are based on the total number of existing licenses multiplied by the pre-negotiated cost of licenses plus an administrative fee.

Full Time Equivalent (FTE): This activity requires 6 FTE. Four FTE will be added to the program as a result of the DHS Balanced Workforce Initiative.

Procurement Operations – Fee for Service Activity

Description of Service: The DHS Office of Procurement Operations (OPO) provides full service acquisition support to OSEM, USM, S&T, USCIS, NPPD, OHA, OIG, A&O, DNDO, FEMA and USVISIT. In addition, OPO provides acquisition services for Department-wide acquisition initiatives identified by both the Chief Information Officer and the various commodity councils within DHS. Services provided include acquisition planning, training, execution, and administrative services.

Cost Allocation Methodology: The cost allocation algorithm for FY 2012 is the full cost of operations for each of OPO's 14 operational divisions such as NPPD, DNDO, and S&T to include all labor and non-labor costs. All direct-pooled costs and indirect costs are assigned to each of the eight direct divisions, those divisions that provide direct contracting services to their assigned customers, according to their consumption of those costs. The sum of the direct division's cost, assigned direct-pooled costs, and indirect costs is the full cost of support and is the amount of reimbursement charged to each direct division's assigned customer. In the case of the Department Operations

Acquisition Division (DOAD), the full cost is disaggregated and charged to its 17 customers according to their respective percentage of DOAD's total FY10 procurements.

Full Time Equivalent (FTE): This activity requires 281 FTE. There is an adjustment to base of 20 FTE for DHS Right Sizing to reflect the staffing level that can be funded at the current services level. The FY 2012 program increase requests funding and FTE for 11 positions which will increase the level to 281 FTE to reflect the anticipated workload requirements for this activity.

Data Center Consolidation – Fee for Service Activity

Description of Service: The budget request for the FY 2012 data center development will be managed through the WCF. The funds will be used to continue system and application migration to the two DHS Enterprise Data Centers for central DHS management in FY 2012. This includes: discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS Data Centers in FY 2012. As part of the migration transition efforts, the FY 2012 budget request also includes the purchase of new equipment for the DHS Data Centers, installation of equipment racks, build out of infrastructure, and transition of disaster recovery/backup/COOP capability to DHS Data Centers.

Data Center Consolidation (DCC) resides within the IT Services Office of the DHS CIO. DCC is managed by the ITSO Data Center Consolidation Division (DCCD) and is led by the Director of DCCD working closely with the Components, Customer Relations Managers, and vendors. Cost management and activity based analyses are conducted by the ITSO Budget and Financial Management Division.

Cost Allocation Methodology: DHS Components make payments into the Data Center Consolidation WCF activity in accordance with Congressionally appropriated Data Center Consolidation funding. This funding is coordinated with the approved consolidation schedule.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Department of Homeland Security
Working Capital Fund

CURRENT SERVICES PROGRAM DESCRIPTION:

GOVERNMENT-WIDE MANDATED SERVICE ACTIVITY

Interagency Council Funding - Government-wide Service activity

Description of Service: GSA provides oversight and administers the Interagency Council funds in consultation with the Chief Financial Officers Council, the Chief Information Officers Council, the Federal Acquisition Council and the Chief Human Capital Officers Council.

- **Chief Financial Officers (CFO) Council funding supports the following activities:**
 - Federal Audit Clearing House (FAC) - Disseminates audit information to Federal agencies and the public, supports OMB oversight and assessment of Federal award audit requirements, and assists Federal cognizant and oversight agencies in obtaining OMB Circular A-133 data and reporting packages.
 - Grants Streamlining – Is dedicated to implementing Public Law (P. L.) 106-107, the Federal Financial Assistance Management Improvement Act of 1999. It also proposes a standard format for Federal agency use in announcing discretionary grant and cooperative agreement funding opportunities.
- **Chief Information Officers (CIO) Council funding supports the following activities:**
 - A contract to support the Portfolio Management Office for the ongoing e-government initiatives efforts.
 - Federal Enterprise Architecture (FEA) — the FEA PMO will continue efforts to

identify and develop collaboration and consolidation opportunities across Federal agencies.

- Federal Acquisition Council (FAC) funding supports the following activities:
 - The Federal Competitive Sourcing Database (FCSD) is intended to facilitate comprehensive, consistent, and timely reporting of government actions related to competitive sourcing.
 - Acquisition Workforce Competency Development and Training - Agencies use the Acquisition Career Management Information System (ACMIS) database which provides workforce training data and OPM data to make strategic workforce decisions affect the agency training and certification requirements.
 - Government-wide Performance Measures for Socio-Economic Goals - Small business success is currently measured by meeting established statutory goals.
 - Procurement Center Representatives (PCRs) Online - In order to obtain the appropriate level of contributory review, and move the procurement along in a timely fashion, the PCRs facilitate the requirement of the agencies and SBA uses an online workload tool.
 - The Service Acquisition Reform Act (SARA), Acquisition Advisory Panel and Report to Congress - Section 1423 of SARA requires the Administrator of OMB/Office of Federal Procurement Policy to establish an advisory panel of recognized experts in acquisition law and policy to review laws and regulations regarding the use of commercial practices, performance-based contracting, the performance of acquisition functions across agency lines of responsibility, and the use of government-wide contracts.
 - Acquisition Center of Excellence - SARA mandates the development and maintenance of a Center of Excellence in Contracting for Services.

- Chief Human Capital Officers Council (CHCO) funding supports the following activities:
 - CHCO website - A critical component in advancing the Government-wide goals of this management innovation has been the development and maintenance of a high-quality, component rich web content delivery system. The creation of this site has provided a vehicle for sharing and exchanging information of interest to the Federal human resource management community. The system provides a forum for the exchange of information among members of the Council in both a public and private manner.

Cost Allocation Methodology: The cost allocation methodology for this activity is pro-rata share based on the percent of each Component's adjusted total budget divided by DHS's total adjusted budget (excluding grant funding) multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

USAJOBS (formerly Recruitment One-Stop) -Government-wide Service activity

Description of Service: The USAJOBS initiative is a government-wide initiative led by the Office of Personnel Management (OPM). All agencies fund their portion of this program (based on employment levels). Regulations contained in 5 CFR Parts 330, 333, and 335 implement section 4 of Public Law 1054-52 and authorizes OPM to charge fees to agencies in order to pay the cost of providing Federal employment information and services.

USAJOBS Federal Employment Information System delivers state-of-the-art on-line recruitment services to job seekers, simplifying the process of locating and applying for Federal jobs. It delivers a number of job seeker focused features including intuitive job searching; clean, concise, understandable and attractive job announcements; on-line resume submission; applicant data-mining; and on-line feedback on status and eligibility.

Managing Partner: OPM

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Equivalent (FTE) divided by the total DHS civilian FTE multiplied by the total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE are not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Training – Government-wide Service Activity

Description of Service: Provides enterprise approach to leveraging technology to support learning and development programs, initiatives, and capabilities. This includes an enterprise architecture approach to the modernization and reduction in complexity of DHS Learning Management Systems (LMS'), building enhanced capability through tools such as web conferencing, and closing existing and future gaps in structured learning opportunities by providing every DHS employee access to over 3,000 online courses and 12,000 online books. Government-wide accomplishments derived from this activity are:

- Centralized procurement of primary DHS LMS' in use, providing greater visibility to CFO's, CIO's, and all DHS management regarding costs
- Consistent, standardized delivery of all legislatively mandated training to all DHS employees (and contractors where appropriate), launched IT security courses mapped to the Government Information Security Reform Act (GISRA) and The National Institute of Standards and Technology requirements
- Providing 21st Century approach to training in critical areas such as Emergency Medical Technician training by assisting in the coordination of DHS Modeling and Simulation activity in regards to training
- Compliance with OPM and OMB requirements for reporting Enterprise Human Resources Integration (EHRI) training data for all DHS Federal civilian employees

Managing Partner: OPM

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Equivalent divided by DHS's total FTE (excluding military) multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 7 FTE. There is an adjustment-to-base of (1) FTE for DHS "Right Sizing" to reflect the staffing level that can be funded at the current services level.

Enterprise Human Resources Integration – Government-wide Service Activity

Description of Service: EHRI is a collaborative e-Government initiative designed to transform the way Federal HR Specialists and managers access human resource information and the way all Federal employees access their personnel file information. EHRI is in the process of replacing the current paper based Official Personnel Folder (OPF) with an electronic employee record for all executive branch employees, resulting in a comprehensive electronic personnel data repository covering the entire life cycle of Federal employment. In addition to streamlining personnel management actions, EHRI provides HR managers and specialists with powerful workforce analytic and planning capabilities.

Managing Partner: OPM

Cost Allocation Methodology: Costs for EHRI's products and services will be recovered by EHRI from all agencies on an equitable basis related to the size and usage of each participating agency. Charges to each agency will be established by distributing total EHRI costs to all clients on the basis of the number of OPFs or on the basis of actual cost, depending on the service.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Rulemaking – Government-wide Service Activity

Description of Service: e-Rulemaking is a collaborative, interagency activity designed to establish a common, automated and integrated approach to managing the Federal government's rulemaking function. The activity consolidates rulemaking systems at the various departments and agencies and is centrally managed through a web-based environment offering functionality such as one-stop access, search capabilities, and public commenting. e-Rulemaking activities include:

- Expanding public understanding of the rulemaking process
- Improving the quality of Federal rulemaking decisions
- Increasing the amount, breadth, and ease of citizen and intergovernmental

- participation in rulemaking
- Administering Regulations.gov, a cross-agency, front-end Web application that posts and allows comments on proposed Federal agency rules
 - Writing memoranda to the President's Management Council (PMC), directing agencies to include a link to Regulations.gov on agency homepages and in the synopsis of the notice of any regulatory action requesting public comment
 - Posting the dockets for nearly 300 Federal agencies, including DHS, on EPA's online system.

Managing Partner: Environmental Protection Agency

Cost Allocation Methodology: The cost allocation methodology for this activity is pro-rata share based on the percent of each participating Component's adjusted total budget divided by DHS's total adjusted budget (excluding grant funding) multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Grants – Government-wide Service Activity

Description of Service: e-Grants creates a single portal for all Federal grant customers to find, apply for, and manage grants on-line. The Grants.gov storefront provides electronic functionality for applicants and grantees and reduces the paper-based processes that previously challenged the Federal grants environment. The initiative is designed to reduce inefficiencies, meet e-Gov goals, and provide benefits to both citizens and the government. Specifically, the initiative enables the government to meet many of the streamlining activities required by Grants Policy Committee, Federal Financial Assistance Management Improvement Act, such as deploying a unified search/find capability for grant opportunities, standard data sets, and a common mechanism and processes for applying for Federal grants funds.

Managing Partner: Department of Health and Human Services

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the percent of each organization element's grant funding divided by DHS's total grant funding multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Human Resources Line of Business (HRLoB) – Government-wide Service Activity

Description of Service: Historically, the Federal government has taken an agency-centric approach to delivering human resources services to government employees. Agencies have their own human resources (HR) missions, HR staffs, HR management practices and technology. While it makes sense for agencies to maintain control of some HR

practices, it also makes sense that other HR practices – those that are transactional in nature and not clearly linked to agency missions – be taken out of the agency domain. This frees up agency resources to do the more valuable, strategic work of HR.

The Human Resources Line of Business (HR LOB) initiative has been launched to think through this fundamental business issue. This initiative has been tasked to consider business benefits and impacts and propose a service delivery model that preserves some HR functions at the agency level – where it makes sense – and that moves other HR functions to Federal HR service centers. Over time, as the Federal HR service centers evolve and expand their capabilities, more and more functions will shift to the service center delivery mode.

Managing Partner: Office of Personnel Management

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component’s Full Time Equivalent (FTE) divided by DHS’s total FTE multiplied by the total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Geospatial Line of Business (LoB)– Government-wide Service Activity

Description of Service: The Geospatial LoB is designed to further refine the opportunities for optimizing and consolidating Federal geospatial-related investments to reduce the cost of government and, at the same time, improve services to citizens. Cross-agency coordination of geospatial activities can identify, consolidate, and reduce or eliminate redundant geospatial investments. The Geospatial LoB will result in a more coordinated approach to producing, maintaining, and using geospatial data, and will ensure sustainable participation from Federal partners to establish a collaborative model for geospatial-related activities and investments.

Managing Partner: Department of Interior

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component’s adjusted total budget divided by DHS’s adjusted total budget (excluding grant funding) multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Integrated Acquisition Environment Loans And Grants– Government-wide Service Activity

Description of Service: The Federal Funding Accountability and Transparency Act of 2006 (FFATA) requires OMB to “ensure the existence and operation of a single searchable website, accessible by the public at no cost to access” that includes information on each Federal award. The law specifically requires a unique identifier for the entity receiving the award and of the parent entity of the recipient, should the entity be owned by another entity. Some contracts (and some grants) already require Data Universal Numbering System (DUNS) numbers. This will allow those areas to feed information into the FFATA portal.

Managing Partner: General Services Administration

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component’s FTE divided by DHS’s total FTE and multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Budget Formulation and Execution Line of Business (BFELoB) – Government-wide Service Activity

Description of Service: The focus of the Budget Formulation and Execution Line of Business (BFELoB) is to build a “budget of the future” by promoting information sharing across government agency budget offices and building a “community of practice.” With this collaboration, the budget community can start to identify best practices for all aspects of budget formulation and execution. The BFELoB strives to find solutions that link budget formulation, execution, planning, performance, and financial information. Areas of particular interest include technology, budget performance integration, data collection and tracking, financial management integration, and human capital.

Managing Partner: Department of Education

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component’s adjusted total budget divided by DHS’S adjusted total budget (excluding grant funding) multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Benefits – Government-wide Service Activity

Description of Service: The e-Gov Benefits activity provides a single point of access for citizens to locate and determine eligibility for government benefits and services, GovBenefits.gov. The site now offers links to 234 benefits programs, representing \$1.3 trillion in annual benefits. Programs benefits are a partner room with instructions how to become a partner of e-Gov Benefits and presentations about the project available to download, and a press room, with general information, press releases and biographies of

the management team. These enhancement goals to GovBenefits.gov are a direct response to citizen feedback that has been received about the site.

Managing Partner: Department of Labor

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's civilian Full Time Equivalent (FTE) divided by DHS's total civilian FTE multiplied by total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Grants Management Line of Business (GMLoB) – Government-wide Service Activity

Description of Service: The objective of this initiative is to establish common solution and target architecture approaches that identify systems, best practices, migration strategies and key interfaces to develop common business process and system solutions.

Managing Partner: Department of Housing and Urban Development

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the percent of each organization element's grant funding divided by DHS's total grant funding multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Financial Management Line of Business (FMLoB) – Government-wide Service Activity

Description of Service: The Financial Management Line of Business (FMLoB) goals are to define, analyze, and implement options that will enhance cost savings in the financial management systems, provide for standardization of business processes and data models, promote seamless data exchange between Federal agencies, and strengthen internal controls through integration of core financial and subsidiary systems. The FMLoB's current objective is to improve the cost, quality, and performance of financial management (FM) reducing the number of noncompliant systems by leveraging common standards, shared service solutions, and implementing other government-wide reforms that foster efficiencies in Federal financial operations.

Managing Partner: General Services Administration (GSA)

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's adjusted total budget, divided by

DHS's adjusted total budget (excluding grant funding) and multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Integrated Acquisition Environment – Government-wide Service Activity

Description of Service: The e-Gov Integrated Acquisition Environment (IAE) is a Presidential e-Government initiative managed by GSA. IAE supports and automates the procurement process through the use of shared systems which are required by regulation.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the average percentage of each Component's number of procurement transactions, dollar value of procurement transactions and number of procurement personnel.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Disaster Management – Government-wide Service Activity

Description of Service: Disaster Management is part of the e-Gov Act of 2002, Title II, and Section 214 "Enhancing Crisis Management Through Advanced Information Technology" and is described in OMB M-03-18, "Implementation Guidance for the e-Government Act of 2002." This initiative, which will support disaster assistance and "all hazards" response, is a joint effort involving 10 other Federal agencies that support disaster management. This initiative also supports many of the goals of the Initial National Response Plan dated October 2003.

The scope of the project covers all Federal agencies that are involved in disaster recovery, as well as state, local and tribal disaster recovery organizations and individuals. The value of this program is its contribution to improving disaster preparedness and its potential to reduce property damage and loss of life.

Managing Partners: FEMA and CIO

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's level of participation in Disaster Management divided by the total sum of all Component levels of participation in Disaster Management multiplied by total estimated cost of the activity. Levels of participation include measuring the active participation of sixteen elements of Disaster Management defined by Disaster Management e-Government Initiative Program Office, FEMA. The sixteen elements of Disaster Management include the following: (1) transportation, (2) communications, (3) public works and engineering, (4) firefighting/incident command system, (5) information and planning, (6) mass care, (7) resource support, (8) health and medical services, (9) search and rescue, (10) hazardous materials, (11) food, (12) energy, (13) warnings and alerts, (14) research and development, (15) emergency/domestic

preparedness, and (16) disaster relief. The sixteen elements are the cost drivers for each Component's assessment and because many Components are involved in various activities at different levels of participation, the cost for this activity is fairly uniform across the Components.

Full Time Equivalent (FTE): This activity requires 0 FTE.

The Working Capital Fund requests \$17.703 million and 5 FTE for DHS Cross-Cutting Activities in FY 2012.

CURRENT SERVICES PROGRAM DESCRIPTION:

DEPARTMENT OF HOMELAND SECURITY
CROSSCUTTING ACTIVITY

Capital Planning And Investment Control (CPIC) – DHS Crosscutting Activity

Description of Service: Capital Planning and Investment Control (CPIC) is run jointly by the CPO Acquisition Program Management Division (APMD) and the CIO (Portfolio Management) to carry out the Department’s responsibilities for the quality and performance of its investment projects. A CPIC process is required to comply with the budget preparation guidance provided by OMB Circular A-11, Preparing, Submitting and Executing the Budget, and the management guidance provided by OMB Circular A-130, Management of Federal Information Resources, under the legislative authorities and requirements in the Clinger-Cohen Act and the Homeland Security Act. Project management offices throughout the Components prepare business cases to demonstrate to OMB that they are on-track and ready to effectively use the additional funding requested.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each participating Component’s Exhibit 300’s total divided by the total DHS Exhibit 300’s multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Strategic Sourcing – DHS Crosscutting Activity

Description of Service: The Strategic Sourcing Program Office (SSPO) is responsible for implementing a Department-wide approach to acquiring goods and services. SSPO provides DHS stakeholders economic and performance benefits through collaboration, rigorous analysis, and enterprise planning for acquisition initiatives. The SSPO collaborates with stakeholders to develop, deploy, and maintain sourcing strategies that enhance mission performance, improve acquisition efficiency, and optimize commodity management.

Cost Allocation Methodology: FY 2012 WCF assessments will be allocated to Components proportional to the average of the following two factors: (1) FY 2010 savings on DHS-wide contract vehicles and (2) spend excluding simplified acquisition spend. Data from FPDS-NG was used to determine FY 2010 savings and spend by Component.

Full Time Equivalent (FTE): This activity requires 5 FTE. In FY 2010, 5 FTE were added to the program under the DHS Balanced Workforce Initiative.

CPO Shared Reporting – DHS Crosscutting Activity

Description of Services: The CPO Shared Reporting activity provides the DHS acquisition workforce with eProcurement systems and tools which leverage investment costs and promote competition, transparency, integrity and consistency.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the average percentage of each Component's number of procurement transactions, dollar value of procurement transactions and number of procurement personnel.

Full Time Equivalent (FTE): This activity requires 0 FTE.

CURRENT SERVICES PROGRAM DESCRIPTION:

WCF MANAGEMENT ACTIVITY

Working Capital Fund Operations – WCF Management Activity

Description of Service: The Working Capital Fund Operations provides policy, procedures, budget formulation, execution and customer dispute resolution services in managing the WCF. Services are provided to the activity managers as well as customer Components across DHS.

Budget Formulation Services:

- Oversee all budgets, make recommendations on all aspects of the WCF, and perform or direct all duties and responsibilities of financial management.
- Provide direction and assistance to program managers in the development of operating plans, budgets, and supporting documents relating to use of the WCF.
- In coordination with the Director of Financial Operations, make recommendations on operating plans, rate structures and activities to be supported by the fund.

Budget Execution Services:

- Review financial reports for conformance with program and financial plans, and inform senior management and program officials of trends and changes required in the financial plan.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-

rata share based on the percent of each Component's WCF assessment amount divided by the total WCF assessment multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 10 FTE.

IV. Program Justification of Changes

**Department of Homeland Security
Working Capital Fund
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: GSA Rent

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: Fee-For-Service Activity

Program Increase: Positions 0 FTE 0 Dollars \$19,833

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget

Current Services Level							5	5	\$75,606
Program Increase							0	0	\$19,833
Budget Request	4	4	\$65,440	5	5	\$75,606	5	5	\$95,439

Description of Item

The General Services Administration (GSA) provides workspace and related services for over 100 Federal client agencies serving more than one million workers through the Public Buildings Service (PBS). GSA also provides related real estate services including the operation and maintenance of buildings and out-leasing programs. GSA's Computer Integrated Facility Management Program uses cutting edge technology to look at the buildings life cycle. Real estate services provided to clients appear in Federal agencies monthly electronic rent bills.

The Department has established a clearing account to expedite the payment of WCF GSA rent billings for the Department of Homeland Security headquarters offices, excluding the major Components, which pay their rent expenses directly to GSA. The monthly WCF bills include all GSA-controlled space that the Department headquarters occupies, including parking spaces allotted to the Department.

Justification

The FY 2012 budget increase includes GSA occupancy agreement updates, Federal Protective Service (FPS) rate increases, and rent for additional space that will be required in FY 2012.

Impact on Performance

These facilities improve the delivery of support services to each DHS Component while reducing the cost of operations. The centralization of GSA Rent services for the Departmental Management and Operations is critical to the mission of the Department.

Program Increase 2: FEDLINK (Library of Congress)

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: Fee-For-Service Activity

Program Increase: Positions 0 FTE 0 Dollars \$20,184

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							5	5	\$11,203
Program Increase							0	0	\$20,184
Budget Request	3	3	\$10,052	5	5	\$11,203	5	5	\$31,387

Description of Item

The Department of Homeland Security (DHS) Library and Information Services' mission is to provide the DHS program managers and their end users with desktop access to mission critical, authoritative, timely, and relevant commercial information content products and services. The activity was established in 2004 to implement DHS-wide information assets supporting decision making, enforcement, investigation, research and academic information gathering activities of the DHS workforce. The activity collaborates with the Library of Congress (LOC) FEDLINK program through which the LOC shares its expertise in information services and consolidates the buying power for Federal agencies. In 2009 this activity became a Secretary's efficiency initiative, which expanded its scope within the working capital fund while reducing total costs paid individually by Components and Headquarters offices.

Justification

The Department of Homeland Security (DHS) Library and Information Services was established in 2004 to implement the functional integration of DHS-wide information assets supporting decision making, enforcement, investigation, research and academic information gathering activities for the DHS workforce. The Library and Information Services requires funding modifications for the fiscal year (FY) 2012 period due to the increased usage of services, account requests, inflationary adjustments, and fees exhibited during the fiscal year 2010 period. Projected growth in customer accounts and service requirements have a direct impact on the monetary resources needed to manage the DHS Library and Information Services program. Services requiring the largest amount of resources are directly reflective of those in high

demand. Services such as LexisNexis demonstrated significant user increases from FY 2009 to FY 2010. (LexisNexis active users in FY 2009 averaged 2276; LexisNexis active users in FY 2010 averaged 3479). The Library and Information Services program experiences an annual average inflationary product cost increase of 5 - 10% per year for the 27 vendor agreements historically managed by the program. Additionally, the program has planned for the products and services it acquires from other WCF activities. Maintenance of the Library and Information Services program requirements across the DHS Components has led to the requested resource adjustments.

Impact on Performance

The expansion of the FEDLINK activity has increased the efficiency of the Department. The consolidation effort of pooling subscriptions will enable the participating agencies to acquire better services from the providers and receive better rates due to the volume in numbers for the users. As a result of the consolidation, the activity now plays a larger role in supporting critical services.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 3: Financial Statement Audit

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: Fee-for-Service Activity

Program Increase: Positions: 0 FTE: 0 Dollars: \$3,555

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Program Increase							0	0	\$3,555
Budget Request	0	0	\$14,833	0	0	\$15,552	0	0	\$19,107

Description of Item

DHS awards a contract to an independent CPA firm to perform financial statement audit functions. The contract includes time and material for audit services with the auditor providing the services and billing the hours worked at billing rates commensurate with the audit position being billed. The cost include travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by the Office of the Inspector General (OIG) as the Contracting Officer Technical Representative (COTR).

Justification

The Financial Statement Audit activity requests a funding increase of \$3.555 million in contractor cost and for travel oversight costs for the OIG staff. The amount includes an increase for time and material costs for audit services. These services include a Full Scope audit cost for Customs and Border Protection (CBP), Federal Law Enforcement Training Center (FLETC) Transportation Security Administration (TSA), Immigration and Customs Enforcement (ICE), and Citizenship and Immigration Services (CIS).

Impact on Performance (Relationship of Increase to Strategic Goals)

This increase of \$3.555 million will enhance the audit requirements of DHS Components requesting Stand-Alone Full Scope audits in FY2012. The Components include CBP, FLETC, TSA, ICE and CIS.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 4: Financial Management Support (Financial Operations)

¹ There is an adjustment to base of 17 FTE and positions between FY 2010 and FY 2012 to reflect DHS Balanced Workforce Initiatives.

Description of Item

The Office of Financial Operations (FO) is a line of business under WCF that provides financial management to the offices within the Office of the Secretary and Executive Management (OSEM), the Under Secretary for Management (USM), the Office of the Chief Financial Officer (OCFO), and the Office of the Chief Information Officer (OCIO). The WCF Financial Operations processes and manages the processing of multiple types of financial documents and transactions for its customers as well as FedTraveler Help Desk Support and internal control assurance to the Secretary for Headquarters offices.

Justification

When DHS was established, the role and responsibilities of the CFO, like all the Headquarters management offices, were unclear. Since then the Office of the CFO has evolved into a dual purpose organization, with both an oversight role over the entire Department (DHS CFO role) and an operational role to serve Headquarters offices' financial operational and transactional needs (Component CFO role). Supporting this transition was the establishment of Financial Operations (FO) in October 2008. While the other divisions within OCFO support the DHS CFO role, FO performs the Component CFO role for Headquarters, providing financial support to the Office of the Secretary and Executive Management, (OSEM), and the offices of the Under Secretary for Management, (USM).

FO's predecessor, the Departmental Operations Branch, was responsible for internal control and financial reporting for OSEM and USM, but did not have the staff to work on these areas. Reporting deadlines were routinely not met. Internal control assessments and assessments of improper payments, required by law, could not be performed by FO and were instead performed by other OCFO offices or contractors. Audit findings were not addressed. Key policies and procedures did not exist. Adding internal control program to financial operations has allowed the office of financial operations to accomplish the following for the first time:

- Assessed Headquarters' susceptibility to significant improper payments, as required by the Improper Payments Information Act. Tested American Recovery and Reinvestment Act payments to make sure payments had been made properly.
- Conducted an assessment and test of FO's entity-level internal controls through interviews of FO management, using the GAO evaluation tool.
- Conducted tests on controls over two financial reporting processes – Fund Balance with Treasury, and Management of the General Ledger.
- Developed Mission Action Plans with corrective actions that addressed weaknesses in General Ledger Management and Governance of the Working Capital Fund.
- Coordinated the development and update of standard operating procedures for Payments Management, Budgetary Resource Management and General Ledger Management.
- Prepared the first FO Statement of Assurance on internal controls.

The additional 9 positions and 4 FTE and \$0.816 million will allow the Office of Financial Operations (OFO) meet the requirements of the Federal Managers' Financial Integrity Act and to provide the required annual internal control assurance to the Secretary for Headquarters offices.

This is comprised of: 1 GS-13 FTE and 3 GS-12 FTE

Impact on Performance

The additional funding and FTE for internal control and financial reporting support the Secretary's Goal 5: Strengthen and unify operations and management. The resources for financial reporting will help the objective to optimize processes and systems and as a result will:

- Enable FO to respond timely and completely to all financial reporting requirements.
- Ensure the integrity of the financial information and data submitted to OMB, Treasury and others.
- Ensure that real property and personal property, including leasehold improvements, internal use software, and leases, are reported accurately.
- Address weaknesses in General Ledger Management and Property Management that have been identified by independent auditors.

The resources for internal control for Headquarters offices will help meet the objective to develop DHS internal controls by:

- Expanding compliance with internal controls to OSEM offices.
- Institutionalizing OMB Circular A-123 assessments by transferring work performed by contractors to permanent staff.

With these resources, Headquarters will improve the timeliness of reporting and the quality of financial data submitted to OMB and Treasury. With these FTE and funding request, accounting for real and personal property will be improved and become more accurate. The additional personnel will enable the Headquarters offices to provide internal controls and strive to meet the Integrity Act and OMB requirements. A-123 assessments on financial reporting processes for Headquarters will be conducted by the FO staff and decrease the reliance of contractual support to perform the work.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 5: Treasury Information Executive Repository (TIER)/CFO

Strategic Goal(s) and Objective(s): Strengthen and unify DHS Operations and Management/Integration of hiring, retention, training and development, and performance programs.

PPA: Fee-For-Service Activity

Program Increase: Positions 0 FTE 0 Dollars \$200

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$722
Program Increase							0	0	\$200
Budget Request	0	0	\$700	0	0	\$722	0	0	\$922

Description of Item

The DHS CFO's office is responsible for creating the Department-wide financial statements. As part of this process, two software packages are used to process the work. These two products are the Treasury Information Executive Repository (TIER) and CFO Vision Software. The DHS use of TIER and CFO Vision has benefited the entire Department by the cost and resource savings involved in being able to produce financial statements in a timely manner. This has been beneficial given the accelerated timeframes for producing the Annual Financial Report.

Justification

The FY2012 program increase of \$0.200 million will cover operation and maintenance costs for this activity.

Impact on Performance

The program increase will continue delivering services to meet the requirements of our customers.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 6: National Finance Center (NFC) Payroll Services and Reporting

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: Fee-For-Service Activity

Program Increase: Positions 0 FTE 0 Dollars \$3,656

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$36,461
Program Increase							0	0	\$3,656
Budget Request	0	0	\$36,461	0	0	\$36,461	0	0	\$40,117

Description of Item

Department of Agriculture/National Finance Center (NFC) provides payroll/personnel services utilizing their legacy mainframe systems (payroll) and EmpowHR PeopleSoft application (personnel). In addition, NFC provides payroll/personnel policy support and benefits reconciliation, tax reporting, and payroll problem resolution, and hosting services for the webTA application.

Justification

NFC Services that DHS Components are billed for include:

COST AREA	COST DRIVER
Postage-Earnings and Leave and Personal Benefits Statements	Pieces of mail
Treasury FMS Postage Charges for Single Address Checks	Checks mailed
USDA OIG Oversight of Non-USDA Payroll Processing	Avg # of employees paid
Payroll Operations Branch Support	Avg # of employees paid
Tax Reporting	Avg # of employees paid
Payroll Policy Support	Avg # of employees paid
e-Pay Policy Support	Avg # of employees paid
Benefits Reconciliation and Liaison Area	Avg # of employees paid

Debt Management	Receivables established
Claims	Claims processed
Payroll Accounting	Avg # of employees paid
Certification	Avg # of employees paid
Ad-Hoc reporting (based on CPU Minutes used)	CPU Minutes
Data Center Operations (Other than FOCUS)	Avg # of employees paid
Payroll/Personnel Baseline Services	Avg # of employees paid

This request includes increased Operations and Maintenance (O&M) costs for NFC payroll, EmpowHR personnel systems and webTA hosting services based on population growth. The funding request increase is also a result of new O&M costs associated with the deployment of EmpowHR to additional DHS Components: FEMA in Fall 2011, and ICE in Spring 2012; WebTA deployments to CIS in FY 2011, CBP in FY 2012, and migration of OIG in Fall 2011.

Additionally, there is a requirement for hard drive replacements/upgrades for webTA, EmpowHR and the NFC mainframe. User Productivity Kit (UPK) license maintenance and data warehousing costs comprise the remainder of the program increase.

Impact on Performance

The activity directly supports the Secretary’s goal to Strengthen DHS O&M and other departmental efficiency initiatives, such as the Secretary’s Bottom-Up Review. HCBS is looking at increasing effectiveness from a business perspective with an enterprise-wide view to consolidate and modernize HRIT across the department. The goal of the program is to interface personnel and payroll systems across DHS to increase interoperability and reduce overall cost. As a result of these initiatives and programs, DHS is moving toward the objective of a standard architecture and final Shared Service Provider solution. This increase will allow for the deployment of key systems, along with the necessary O&M funds to sustain them.

Migrating DHS Components to EmpowHR will offer a more stable, modern technology platform to support DHS business needs and result in efficiencies for the Components, including:

- Reduction of duplicative personnel applications
- Cost savings
- Increased self-service capability
- Reduced processing cycle times
- Reduced processing errors
- Cost avoidance due to centralized management of enterprise solutions (Avoid redundant costs for managing Security, 508 compliance, infrastructure and contract management activities.)

Budget Request	55	55	7,608	51	51	\$14,324	80	80	\$15,248

¹ There is an adjustment to base of 29 FTE and positions between FY 2010 and FY 2012 to reflect DHS Balanced Workforce Initiatives.

Description of Item

The HQ Service Center provides coordination and oversight support for outsourced services supporting HQ Human Capital operational needs. The team ensures that the personnel processes for HQ's managers/employees and service providers runs efficiently and effectively. Examples of services include: Staffing and Recruitment; Position Classification/Position Management; Performance Management; Payroll and Personnel Action Processing; Employee and Labor Relations Support; Retirements and Benefits Support; Time and Attendance Support. It is imperative that we continue providing full-time, Federal employee oversight of these services.

Justification

In FY 2012, the estimated HQ population assumes "full-service" capacity. An increase in funding request will provide continued operational oversight of all contracted services as well as provide more effective focus on customer support. This team has continued to be very efficient and operates seamlessly, thus keeping costs with a modest increase for supplies.

Impact on Performance

With this funding, the HC Service Center can provide coordinated and prioritized personnel staffing services; ensure timely and effectively recruitment of staff; effectively manage the "on-board" staffing process (which includes security clearances and collaboration with the Personnel Security Office).

¹ There is an adjustment to base of 1 FTE and positions between FY 2011 and FY 2012 to reflect DHS Balanced Workforce Initiatives.

Description of Item

The DHS Chief Human Capital Officer (CHCO) and Component Human Capital Executives in partnership with the Chief Information Officer (CIO) are currently redefining a long-term strategic plan for Human Resources Information Technology (HRIT). The goal of the new strategy is to deliver an enterprise platform for a Title V environment that provides core HR functionality and data access across the DHS enterprise in a way that optimizes efficiency. An optimized solution must also address the system shortcomings and limitations of the National Finance Center's (NFC) Pay and Personnel System. While DHS currently operates four enterprise solutions, i.e., NFC Corporate (Payroll/Personnel), EmpowHR (Personnel), webTA (Time and Attendance); and the eOPF (Electronic Personnel Folders), there remains a critical need for enterprise solutions in areas such as staffing, learning management, performance management and personnel accountability for continued operation, in the event of a declared emergency. Implementation of the new strategy will commence in FY 2011, with full-fledged efforts in FY 2012 to move toward department-wide adoption/deployment and full, cross-system integration.

Justification

The FY 2012 request supports the anticipated increase in operation and maintenance costs associated with the purchase of additional WebTA licenses.

Impact on Performance

This program increase will allow HCBS to continuously deliver enterprise-wide support and solutions to meet the requirements of our customers, while eliminating unnecessary and duplicative costs through the consolidation of a variety of DHS legacy human capital systems

Program Increase 9: Flexible Spending Accounts (FSA) Administrative Costs

Strategic Goal(s) and Objective(s): Strengthen and unify DHS Operations and Management/Integration of hiring, retention, training and development, and performance programs.

PPA: Fee-For-Service Activity

Program Increase: Positions 0 FTE 0 Dollars \$644

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$2,128
Program Increase							0	0	\$644
Budget Request	0	0	\$2,210	0	0	\$2,128	0	0	\$2,772

Description of Item

The Flexible Spending Account Program (FSAFEDS) allows Federal employees to set aside pre-tax funds from their pay to cover health and dependent care costs that are not covered by any other source. The fees to administer employee accounts are paid by this Working Capital Fund (WCF) activity as required under The National Defense Authorization Act of 2004 (P.L. 108-136).

Justification

Actual costs are billed based on employee enrollment by Component. The Office of the Chief Human Capital Officer (OCHCO) receives two invoices a year for this activity, generally in November and March. Once the March invoice is received, OCHCO calculates the total cost for each customer for the year. In FY 2010, the FSA program required an additional of \$82,000 due to actual costs exceeding the enacted amounts. Given the continued growth in the Department resulting from the Balanced Workforce strategy initiative, the FY 2012 estimate is higher than current services. OCHCO is requesting a program increase of \$644K, which is calculated by performing a trend analysis on FY08-FY10 actual expenses. The table below reflects the result of the analysis.

FSA FEDS	FY08 (actuals)	FY09 (actuals)	FY10 (actuals)	FY12 (estimate)
FTE per billing notification	127,149	144,023	151,612	190,171
Actual FSA Participants	13,977	16,745	20,733	26,006
% participation	11%	12%	14%	14%
Total Cost	\$ 1,361,401	\$ 1,574,628	\$ 2,209,765	\$ 2,771,715
Cost/Person	\$ 97	\$ 94	\$ 107	\$ 107

Impact on Performance

The Flexible Spend Plan (FSP) Activity supports the Department's strategic goal to Strengthen and unify DHS operations and management. The \$644,000 increase will support FSP's estimated increase in participants and cost based on the trend analysis.

Department of Homeland Security

Justification of Program Changes
(Dollars in Thousands)

Program Increase 10: DHS Executive Leadership Development

Strategic Goal(s) and Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management.

PPA: Fee-For-Service Activity

Program Increase: Positions 3 FTE 2 Dollars \$571

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							2	2	\$973
Program Increase							3	2	\$571
Budget Request	2	2	\$207	2	2	\$973	5	4	\$1,544

Description of Item

The DHS Executive Leadership program requests three additional positions and FTE to develop, manage, coordinate, and evaluate all aspects of the “One DHS” Senior Executive Service (SES) Candidate Development Program (CDP).

Justification

In order to accomplish the Secretary’s goal of “One DHS,” the Department is consolidating its multiple SES CDPs. Going forward, the unified SES CDP will be the only program DHS offers, and programs currently administered by TSA, CBP, and USSS will be discontinued. Because of the larger cohort size of the unified CDP, the program requests two additional FTE and three positions. The request is for three positions and two FTE composed of one GS-12 and one GS-14. The additional staff is necessary to coordinate with each Component’s learning and development office, their Executive Resources Board (ERB), and other entities within the Office of the Chief Human Capital Officer, particularly the Diversity and Veterans Outreach staff. Previously these entities engaged in limited coordination of efforts. The additional staff will enable the program to increase the level of service to the candidates, their mentors, developmental assignment supervisors, and ERBs – offering each more time and more closely evaluating the candidates’ progress to ensure they are getting the most out of the program’s opportunities. The additional staff will also enable the program to conduct more thorough workforce analysis and manage a more effective placement program.

Impact on Performance

Leader Development is a top priority for the Secretary. At the requested level, DHS will strategically manage its SES CDP, which increases collaboration and integration across the Department. Candidates from all Components and offices will have the opportunity to participate in mentoring, developmental assignments, and other learning activities throughout the Department. Better workforce analysis will ensure that candidates have the right skills and competencies to fill the Department's SES leadership needs. More effective placement will "market" certified candidates to hiring managers to make sure that they know about this valuable resource for filling their Component's leadership positions. This will ensure that certified candidates take leadership positions within DHS and do not depart for opportunities elsewhere. Filling SES positions with diverse and highly qualified candidates through this program will enhance the Department's ability to accomplish its mission by developing a diverse, highly-skilled cadre of leaders prepared to assume critical positions, and reducing SES vacancies.

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	306
Program Increase							0	0	\$6
Budget Request	0	0	\$303	0	0	\$306	0	0	\$312

Description of Item

The HQ Executive Leadership Development (HQ ELD) program provides executive level training to close potential competency gaps in our DHS Headquarters leadership. The program provides a coherent, succession planning strategy which incorporates existing and new methods required to develop a more diverse and highly capable cadre of HQ leaders.

Justification

Developing and maintaining robust leadership development program is not only an incentive to attracting new talent and achieving a diverse and representative workforce; but also contributes to employee satisfaction and enhanced morale that greatly assists in creating "One DHS". The ELD program offers training through the following programs: Treasury Executive Institute (TEI), Senior Executive Service (SES) Forum, Individual Executive Development Training and general HQ Workforce Training to HQ Components. In addition to TEI and the SES forum training, the ELD program offers additional training opportunities/courses at the Management Development Center (Shepherdstown, WV) and the Federal Executive Institute (Charlottesville, VA). The ELD program is progressive in nature, offering learning and leader development training opportunities that support qualifications for higher-level management positions and ongoing refresher training to sustain current and relevant skill sets.

Impact on Performance

The HQ ELD program aligns with QHSR Goal 6, "Maturing and Strengthening the Homeland Security Enterprise" and DHS Workforce Strategy Goal 1, "Building an effective, mission-

focused, diverse and inspiring cadre of leaders”. In aligning with these goals, the ELD program will deliver a roadmap of expectations for learning and leader development opportunities at every level using existing and emerging HQ programs, as well as general workforce training programs to ensure continued development, recognition, and advancement of our current workforce.

Program Increase 12: HQ Employee Assistance Program (EAP)

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: Fee-For-Service Activity

Program Increase: Positions 0 FTE 0 Dollars \$1

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$61
Program Increase							0	0	\$1
Budget Request	0	0	\$51	0	0	\$61	0	0	\$62

Description of Item

The Employee Assistance Program supports a mental and emotional healthy workplace. This program provides support services related to life and work issues. Additionally, it provides for quality services for managers or work groups that are dealing with stressful or potentially stressful organizational issues.

The DHS utilizes the Employee Assistance Program for all DHS HQ employees and their immediate family members. "Immediate Family Members" is defined as members of the immediate household who are dependents, which may include children, elderly parents, and/or spouses/partners who share financial and family caretaking responsibilities.

These services are to be provided to all DHS HQ employees regardless of their function or post of duty. There is no cost to employees and eligible family members for EAP. EAP services will employ both unlimited telephonic access via a toll-free dedicated DHS telephone number and a website and will be available seven days a week, twenty-four hours a day. When services are required that are outside the scope of telephonic counseling services, DHS HQ personnel have access to six (6) face-to-face counseling at no charge to the DHS HQ personnel or their family members.

Justification

Employee Assistance Programs is provided for under these authorities:

- Management Directive 3060.2 establishes the policy, procedures and objectives for the Department of Homeland Security (DHS) Employee Assistance Program (EAP).
- Federal agencies are authorized by 5 U.S.C. § 7901 to establish health services for the promotion and maintenance of the physical and mental fitness of employees in the Federal Government. The Department of Homeland Security, Headquarters (DHS HQ) recognizes the importance of its employees and realizes its employees may experience a wide range of personal and professional issues from time to time, and that, usually, employees are able to cope successfully with these situations as they occur. In some cases, however, there may be instances when employees may desire assistance with personal and/or family issues, especially if these issues are persistent and/or if job performance is affected. Mental, emotional, professional and family wellness is vital for individual employees and their families, as well as, for the well being of the organization.

It is DHS HQ's policy to enhance the Department's work environment and improve job performance by providing its employees and their family members with access to an EAP that ensures that its employees have the resources to address: work-related problems, traumatic incidents, substance abuse, mental illness, and marital, financial or other family problems. It is the Department's policy to provide consultation and training to managers and supervisors seeking guidance in enhancing the work environment; improving employee job performance; and providing problem solving strategies to employees.

Impact on Performance

This program increase will allow the Employee Assistance Program to continuously provide the highest quality assessment, short-term counseling, referral and follow-up service to covered employees and their eligible family members, managers, and organizations. DHS will "Provide seamless, transparent and dedicated customer support services human resources and personnel to enable the people in frontline programs to accomplish the mission of the department effectively". This objective can only be accomplished through a well-integrated and fully-functional EAP program which offers available resources to cope with personal and work stresses, thereby allowing employees to effectively and efficiently perform their Departmental duties.

Program Increase 13: Infrastructure Transformation Program (ITP)

Strategic Goal(s) and Objectives: DHS Strategic Goal 3: “Protect Critical Infrastructure,” Strategic Objective 3.2: “to Ensure Continuity of Government Communications and Operations,” and DHS Strategic Goal 5: “Strengthen and Unify DHS Operations and Management.”

PPA: Fee-For-Service Activity

Program Increase: Positions 14 FTE 14 Dollars \$5,112

	FY 2010 Actual			FY 2011 CR			FY 2012 President’s Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							10	10	\$52,650
Program Increase							14	14	\$5,112
Budget Request	8	8	\$51,168	10	10	\$52,650	24	24	\$57,762

Description of Item

The Department of Homeland Security (DHS) continues to make significant progress towards integrating the Department. Critical to the success of DHS is the consolidation of the information technology (IT) infrastructure, which provides the foundation for information sharing and agile responses to threats against the homeland. The Infrastructure Transformation Program (ITP) is a group of interrelated initiatives designed to create a robust platform on which to quickly launch new capabilities. The program seeks to improve the Department's Information Technology (IT) infrastructure by unifying disparate Component information technology networks, platforms and services to provide a common IT infrastructure across the Department. The list of project domain initiatives included in the scope of the transformation effort is: Network Services, Email Services, Data Center Services, and Wireless Services.

Justification

The ITP funding will be used to deliver enhanced enterprise capabilities to DHS Components. The additional funding will be used to pay for maintenance activities that can no longer be deferred. The increase will fund a limited technology refresh necessary to sustain capabilities of the enterprise services provided and accommodate network growth. Without the modest technology refresh, DHS will not be able to adequately maintain and sustain the technical assets that enable the Department to serve homeland security “conduit,” facilitating appropriate sharing

of information useful to inform decision making by key Federal, state, local, tribal government officials in their jobs of securing the homeland.

Impact on Performance

The ITP is a DHS Level 1 investment with the objective of achieving “One Infrastructure” and is consistent with DHS’S Strategic Planning Priority #1, “Stronger Information Sharing and Infrastructure Protection.” This action also directly relates to DHS Strategic Goal 3: Protect Critical Infrastructure, Strategic Objective 3.2 to Ensure Continuity of Government Communications and Operations and DHS Strategic Goal 5: Strengthen and Unify DHS Operations and Management, Strategic Objective 5.1 Improve Department Governance and Performance.

Within DHS the following represent primary users of the investment:

1. All DHS personnel who utilize the DHS network including: Email, Internet, and Intranet service.
2. CBP, ICE and other DHS field personnel who require wireless capability for communications from remote locations.
3. DHS Chief Information Security Office and IT Security personnel who require OneNet/ITP-provided capability to monitor and manage the DHS IT security posture.
4. Agency Senior Management who rely on NOC and SOC capability to reduce network downtime and minimize impact to critical DHS missions.

Given the integrated nature of the ITP WCF and the broad base of primary users, the funding will optimize network infrastructure and move the Department, including Components, toward common services, while improving effectiveness and decreasing costs. The funding would help continue operations and maintenance of high risk areas within the DHS core network, including Policy Enforcement Points (PEPs), High Assurance Gateway (HAG) and Reverse Proxy, which help reduce vulnerabilities and improve security capabilities within the DHS IT Enterprise. In addition, there are a number of projects which require technology refreshment to support current and future capabilities. The projects, undertaken in FY2010, provide essential capabilities, but also increase the Operations and Maintenance Budget reflected in this WCF increase request. In approving funding, the Homeland Security Enterprise will be strengthened and reach a new level of maturity.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 14: National Capital Region Infrastructure Operations (NCRIO)

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: Fee-For-Service Activity

Program Increase: Positions 40 FTE 40 Dollars \$26,695

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level ¹							46	46	\$121,315
Program Increase							40	40	\$26,695
Budget Request	30	30	\$115,901	30	30	\$121,315	86	86	\$148,010

¹ There is an adjustment to base of 16 FTE and positions between FY 2011 and FY 2012 to reflect DHS Balanced Workforce Initiatives.

Description of Item

The NCRIO serves the majority of DHS Headquarters users for network, email, internet, intranet, and telecom infrastructure, as well as all end user desktop computing, telecom, and wireless services. The OCIO's IT Services Office coordinates management and deployment of infrastructure resources along with build-out of new facilities and provides continuous operations, help desk, vendor management, financial management, and technology evaluation.

Justification

With the continuing pace of user growth and demand that has been experienced in FY 2010 and projected for FY 2011, DHS continues to realize an increased need for network storage and connectivity into FY 2012. Also, continuing technology refresh for the end user equipment will be joined by the refresh of the backbone network equipment, much of which is obsolete and/or out of maintenance support by the vendor. DHS is slated to consolidate more systems as well as deployment of new systems; resources for build-out facilities will also require help desks, additional vendor management, and financial management. This effort will also require additional assistance for users at DHS Headquarters. This initiative will result in strengthened operations and management of the DHS network.

Impact on Performance

Network enhancements will help in achieving DHS'S objective of improved IT performance for system users. These user friendly enhancements also support the DHS strategic goal to Strengthen and unify DHS Operations and Management.

The program increase request will provide NCRIO with additional funding to enable three key infrastructure activities, including network and desktop refresh and seat growth. These activities are instrumental in the continued operations of the NCRIO. The infrastructure refresh effort is necessary, as much of our router, switch and server equipment is out of maintenance and requires significant costs to keep in operation. With the refresh, we will improve system availability, capacity and enable continued system growth. The desktop refresh will continue our drive to renew old and obsolete user computer hardware to newer models with adequate capabilities to support a Windows 7 operation. Finally, the continued seat growth in NCR requires an increase to fund the necessary services, such as Email as a Service (EaaS), shared storage, help desk, phone, and circuit costs.

Department of Homeland Security

Justification of Program Changes**
(Dollars in Thousands)

Program Increase 15: Enterprise License Agreements (formerly Microsoft)

Strategic Goal(s) & Objective(s): DHS Strategic Goal 3: “Protect Critical Infrastructure,” Strategic Objectives 3.2: “to Ensure Continuity of Government Communications and Operations,” and DHS Strategic Goal 5: Strengthen and Unify DHS Operations and Management.

PPA: Fee-For-Service Activity

Program Increase: Positions 0 FTE 0 Dollars \$16,012

	FY 2010 Actual			FY 2011 CR			FY 2012 President’s Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level ¹							6	6	\$46,474
Program Increase							0	0	\$16,012
Budget Request	0	0	51,713	2	2	46,474	6	6	\$62,486

¹ There is an adjustment to base of 4 FTE and positions between FY 2011 and FY 2012 to reflect DHS Balanced Workforce Initiatives.

Description of Item

The Enterprise License Agreement (ELAs) service allows Components to consolidate license requirements into a single enterprise-wide procurement to leverage DHS buying power. The activity further helps to decrease costs, reduce paperwork and save time by eliminating the need for repetitive, individual purchases from vendors. The Department continues to pursue opportunities to benefit from economies of scale, moving from component- or office-specific software licenses to larger enterprise licenses for common services.

Justification

The existing Microsoft Enterprise Software License Agreement provided for the funding and management of only the Microsoft Enterprise Software License Agreement, which provides enterprise access to the Microsoft suite of products. The products include the software needed for individual desktops, laptops, and server platforms, such as MS Office, MS Project, MS Visio, MS Advanced Server, etc. The increase in FY 2012 will include the Adobe Enterprise Software License Agreement. These Enterprise Software License Agreements are utilized by all of DHS and reflect the contractual obligations of each of the Components. In addition, it is envisioned that there would be future expansion of this WCF activity to include other Department-wide Enterprise Software and Hardware License Agreements.

The FY 2012 costs are higher than previous years due to the addition of the Adobe ELA, which includes maintenance costs on current software and support renewal. This expansion of the existing activity enables the Department to:

- More fully achieve the Federal Acquisition Streamlining Act (FASA) strategic goals and ensure a centralized funding and tracking mechanism for department wide software licenses.
- Enhance the WCF activity for ELAs that will allow DHS the ability to reduce the time and resources required to procure multiple license maintenance plans across the Department with multiple periods of performance.
- Negotiate more aggressive pricing on the purchase of software licenses and maintenance plans by leveraging all software spend across the Department.

Impact on Performance

This activity helps the agency to fulfill Federal Acquisition Streamlining Act (FASA) requirements. It also helps to ensure legal licensing of all desktops and servers deployed throughout the enterprise. In addition, it implements governance over the contract vehicle through which enterprise license are purchased by DHS Component organizations. Funding this program will enhance the ability to service users, gain efficiencies of scale, and maintain information sharing across DHS.

Budget Request	232	232	\$48,112	250	250	\$48,131	281	281	\$52,991

¹ There is an adjustment to base of 20 FTE and positions between FY 2011 and FY 2012 to reflect Right Sizing based upon the latest OPO workload projections.

Description of Item

The FY 2012 budget requests full funding to staff up to 281 FTE for the Office of Procurement Operations (OPO). The request of \$4,860 million is to fund the right sizing of salaries and benefits for the additional 11 FTE needed to adequately support the workload of this activity.

Justification

The Department of Homeland Security OPO has continued to grow and prosper since its inception in 2003. OPO exists today as an organization committed to the values of Teamwork, Integrity, Professionalism, Customer Service and Excellence. This commitment is shown in our approach to our work, our conduct at meetings with our customers, in the quality of our contracts and documents, and our respect, understanding, and commitment to our agency's mission. OPO is committed to providing world-class acquisition services to support effective mission delivery. Since the dawn of the new Administration, there has been an increased focus on government acquisitions and procurement. The departmental workload has increased in all areas of acquisitions and procurement operations to include oversight and management, data integrity, risk mitigation and quality assurance. Very specific initiatives have been implemented by the Administration to enhance competition, increase the use of small businesses, reduce high risk contracts, and achieve cost savings through more effective and efficient acquisition strategies. As a result, the Office of Procurement Operations requires 11 additional contracting/procurement professionals in FY 2012. Through the hiring of 11 additional Contracting Officers, Contract Specialists and Procurement Analysts, OPO will have the right level and type of personnel to

adequately support each of these initiatives. OPO's mission is to obtain the best value products and services for our DHS customers, using innovation and continuous process improvements for managing and implementing acquisitions; while supporting the mission, ensuring compliance and preserving the trust of the public. The office of Procurement Operations has established five essential goals to ensure it will fulfill its mission:

Goal 1: Develop the OPO Acquisition Workforce - Supports the Chief Procurement Officer's priority to hire and retain Quality People through early identification of staffing needs, training, and priorities.

Goal 2: Improve the Quality and Accuracy of Acquisition Documentation Submitted to OPO Supports the Chief Procurement Officer's priorities to execute Quality Contracting and Quality Acquisition Management through improved lead times, the utilization of Integrated Project Teams to enhance customer service, and strict adherence to statutes, regulations, and DHS directives.

Goal 3: Improve Customer Advance Acquisition Planning - Supports the Chief Procurement Officer's priorities to execute Quality Contracting and Quality Acquisition Management by increasing competition, ensuring greater participation by small businesses, and improving the quality and presentation of solicitation and contract documents.

Goal 4: Improve Contract Administration - Supports the Chief Procurement Officer's priorities to execute Quality Contracting and Quality Acquisition Management through the timely delivery of quality products and services to meet mission objectives.

Goal 5: Achieve Accuracy and Completeness of Data Contained in Procurement and Related Systems - Supports the Chief Procurement Officer's priorities to execute Quality Contracting and Quality Acquisition Management by ensuring timely and accurate reporting for all procurement actions, eliminating redundant reporting, and making data readily accessible to respond to data calls.

OPO processes over 10,000 transactions and obligates over \$4.5 billion each year. Considering the value and complexity of the acquisitions performed within the Office of Procurement Operations, the funding required is critical in order to meet the expectations and demands of our customers and the Administration.

Impact on Performance

The Office of Procurement Operations has been steadily performing while developing and implementing an actual cost allocation model that identifies all costs associated with each customer served by OPO. This increase will enable OPO to properly staff its organization and to continue cost allocation refinement within a sound Working Capital Fund rubric. It is imperative for OPO to have the right skills, at the right time, and in the right place to meet the mission-critical requirements of a diverse DHS customer-base. Moreover, the requested funding level supports congressional, (GA) and the OIG mandates to achieve adequate acquisition workforce and skills competencies levels to ensure appropriate oversight and execution of federal contracting. The acquisition management and support OPO provides to the Department aligns with the overall DHS Strategic Goal to "Strengthen and Unify DHS Operations and Management;" as OPO continues to perform as a Center of Excellence in Government Acquisitions, representing DHS as an outstanding leader in their industry.

Budget Request	0	0	\$946	0	0	\$1,192	0	0	\$1,227

Description of Item

OPM's USAJOBS Program Office has increased the content and navigation of Veterans-focused resources; incorporated a new one-stop information center; successfully implemented e-Authentication for Federal HR users; provided a more robust and meaningful online application status tracking mechanism for job seekers; added graphics to announcements and incorporated an applicant survey to provide feedback to agencies about the application process. This program operates on a fully reimbursable basis to pay the cost of providing Federal employment information and services.

In prior years, OPM's fee assessment was based on the number of Competitive Service employees within a given agency. Effective October 1, 2007, in accordance with CFR Title 5, Volume 1, Part 317.501(b)(2), those organizations with Executive Resource Service/Senior Executive Service positions which are required to be posted on USAJOBS must now pay a USAJOBS fee. In addition, similar per-capita staff and SES fees will be charged to excepted-service agencies which voluntarily elect to use USAJOBS. The DHS fee was calculated based upon the Department's total "on-board" employment levels for competitive, excepted service, and ERS positions.

Justification

USAJOBS Federal Employment Information System delivers state-of-the-art on-line recruitment services to job seekers including intuitive job searching, on-line resume submission, applicant data-mining, and on-line feedback on status and eligibility. The additional funds support the USAJOBS system to deliver state-of-the-art on-line recruitment services to job seekers. OPM's

plan for USAJOBS is to complete the migration of agency job search engines, enhance website tools, and expand agency implementation of integrated job application and status tracking. Due to the fact that the majority of Federal government job announcements are posted via USAJOBS, and most job-seekers are aware of this tool, DHS will continue to be a user of this system.

Impact on Performance

Access to USAJOBS supports the DHS Strategic Goal to strengthen and unify operations and management, as well as the DHS Human Capital Operations Plan goal to “Hire and Retain a Talented and Diverse Workforce.” The FY 2012 funding request will allow DHS to continue utilizing USAJOBS to reach out to Federal job seekers. DHS’s continued use of this valuable system will support DHS efforts to promote DHS as the workplace of choice.

Program Increase 19: Enterprise Human Resources Integration

Strategic Goal(s) and Objective(s): Strengthen and unify DHS Operations and Management/Integration of hiring, retention, training and development, and performance programs.

PPA: Government-wide Mandated Service Activity

Program Increase: Positions 0 FTE 0 Dollars \$800

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$3,763
Program Increase							0	0	\$800
Budget Request	0	0	\$3,763	0	0	\$3,763	0	0	\$4,563

Description of Item

Enterprise Human Resources Integration (EHRI) is one of OPM's five e-Government initiatives. When these initiatives are combined with the Retirement Systems Modernization initiative, OPM's vision is to have an interlocking enterprise system based on the employee lifecycle. These interrelated initiatives streamline and improve processes for moving Federal employees through the employment lifecycle. Collectively, these initiatives help make the Government more citizen-centered and result oriented in line with the President's Management Agenda.

The Office of Personnel Management's EHRI, through its own staff and in partnership with vendors, provides the following products and services to Federal agencies:

Electronic Personnel File (eOPF): EHRI provides electronic personnel file tools and services in compliance with OPM's *Guide to Personnel Recordkeeping* and official personnel file records management schedules, as documented through the National Archives and Records Administration (NARA). The purpose of the Electronic Employee Record is to provide a consolidated image and data view that digitally documents the employment actions and history of individuals employed by the Federal government.

EHRI Services: To support the implementation, training, and proper use of its products, EHRI provides a number of services to assist agencies in implementing and operating EHRI products. These services include:

- Arranging for “backfile conversion” of the agency’s existing paper Official Personnel Folders (OPFs) through an approved EHRI vendor, including folder preparation, document scanning, indexing, and loading into the agency’s eOPF system.
- Developing custom interfaces between EHRI systems and nonstandard agency systems, including requirements definition, development, testing, and implementation.
- Providing development, testing, training and implementation support for other agency-specific requirements that are within the bounds of EHRI.

Justification

Based on anticipated growth, DHS will need an additional 10,290 licenses in FY 2012. The FY2012 program increase of \$0.800 million would cover costs for the additional licenses and operation and maintenance for this activity.

Impact on Performance

With the additional licenses, OPM will have the capability of creating eOPF folders when new employees join the Federal government or when current employees transfer from other departments.

In addition, migrating DHS Components to the EHRI application will offer a more stable, modern technology platform to support DHS business needs and result in the following efficiencies for the Components:

- Reduction of duplicative HR applications
- Cost savings
- Increased standardization, transparency and accountability in the hiring process
- Increased self-service capability
- Reduced processing cycle times
- Reduced processing errors
- Cost avoidance due to centralized management of enterprise solutions (Avoid redundant costs for managing Security, Section 508 compliance, infrastructure and contract management activities.)
- Reduced help desk functions and associated labor
- More effective detailed and aggregate workforce management
- Enhanced quality, timeliness, accuracy and consistency of data and reports

Program Increase							0	0	\$5
Budget Request	0	0	\$261	0	0	\$266	0	0	\$271

Description of Item

The Human Resources Line of Business (HR LOB) provides the Federal Government with an infrastructure to support pay-for-performance systems, modernized HR systems, and the core functionality necessary for the strategic management of human capital.

Justification

The HR LOB offers a cost-effective, standardized, and interoperable HR solution which allows Federal departments and agencies to work more efficiently and effectively, while providing managers and executives with an improved means to meeting strategic objectives. The HR LOB initiative seeks to accomplish the following four goals: 1) Improved Management, 2) Operational Efficiencies, 3) Cost Savings/Avoidance, and 4) Improved Customer Service. By focusing on the strategic management of human capital and addressing duplicative HR systems and processes, the HR LOB initiative will enable faster decision-making and more informed policy-making capability; improved service ratio/response times and reduced cycle times; increased cost savings/avoidance through reducing duplicative software, hardware, and labor resources; and improved communication and responsiveness through enhanced quality, timeliness, accuracy and consistency.

Impact on Performance

The HR LOB proposes a service delivery model that preserves some HR functions at the agency level – where it makes sense – and moves other functions, transactional in nature and not clearly

linked to agency mission, to service center delivery mode. This frees up agency resources to accomplish more valuable, strategic work of HR. The FY2012 program increase of \$0.005 million would cover operation and maintenance costs for this activity.

Budget Request	0	0	\$95	0	0	\$97	0	0	\$107

Description of Item

The focus of the Budget Formulation and Execution Line of Business (BFELoB) is to build a “budget of the future” by promoting information sharing across government agency budget offices and building a “community of practice.” With this collaboration, the budget community can start to identify best practices for all aspects of budget formulation and execution. The BFELoB strives to find solutions that link budget formulation, execution, planning, performance, and financial information. Areas of particular interest include technology, budget performance integration, data collection and tracking, financial management integration, and human capital.

Justification

The FY2012 program increase of \$0.010 million would cover operation and maintenance costs for this activity.

Impact on Performance

This increase will allow the Budget Formulation and Execution LoB to sustain current operations and continue promoting information sharing across government agencies.

Program Increase 24: Capital Planning and Investment Control (CPIC)

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: DHS Crosscutting Activity

Program Increase: Positions 0 FTE 0 Dollars \$202

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$7,697
Program Increase							0	0	\$202
Budget Request	0	0	\$7,229	0	0	\$7,697	0	0	\$7,899

Description of Item

CPIC is run jointly by the CFO, CIO, and CPO to assist the Department in carrying out its responsibilities for the quality and performance of its investment projects by providing support services and training for the Project Management Offices throughout the Department's Components. The Project Management Offices are required to prepare business cases to demonstrate to OMB that they are on-track and ready to effectively use the additional funding that they are requesting in the DHS budget submission. This Activity provides services to support these efforts, including automated tools to assist with portfolio analyses, document preparation, and document review and scoring, formal training, informational briefings, and remedial coaching to improve business case quality. It supports the Project Management Offices in preparing decision packages for DHS investment review boards at key decision points in their projects' life cycle.

Justification

In FY2012 the CIO is leading an effort to improve DHS's integrated program management and reporting capability, the System for Management Analysis and Resource Tracking (SMART) efficiently. SMART will realize incremental improvements to the existing DHS CPIC architecture; establish interfaces to target DHS financial, acquisition, asset management, enterprise architecture, and human resources systems, and deploy an enterprise wide Business Intelligence solution to provide comprehensive program management analysis and forecasting capability for decision support services across the Department.

In FY 2012 the funding will enhance the CPIC periodic reporting function by integrating planning, budgeting and performance reporting at the project level on a monthly basis with corresponding financial, acquisition, asset management, DHS Enterprise Architecture (EA), and human resources information. SMART will provide centralized management information services for Components to manage programs and investments down to the project level and for DHS to track corresponding performance metrics at monthly intervals for tracking performance trends such as Earned Value Management (EVM) and identifying risks for early mitigation and resolution. Consolidation within SMART will save time for users by streamlining the DHS status reporting and review processes. It will improve the quality, standardization, and consistency of program performance data across the entire department as the program managers entering corresponding performance data will have a personal stake in the quality of the data. SMART will provide integration of DHS business information and provide implementation of analytic tools that support better tracking of program performance and better decision making by senior leadership in line with the EA. The budget increase will fund:

- Component Level Reporting roll out;
- Rollout of a workflow and Project Asset Library to store and route all required documentation for review and approval;
- Integration of project performance data with target financial, acquisition, asset management, and human resources systems of records; and
- Hardware software and support services to maintain the SMART architecture

Impact on Performance

The increase in funding reflects CPIC efforts to improve the number of DHS investments that perform within a 10 percent variance and reduce investment cost, schedule, and performance variances accordingly. It will also reduce overlap and duplication of investments; reduce reporting burdens on Components while improving data and information quality; increase alignment of DHS planning with program execution, and improve DHS Security Posture and information sharing capabilities.

(Dollars in Thousands)

Program Increase 25: CPO Shared Reporting

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: DHS Crosscutting Activity

Program Increase: Positions: 0 FTE: 0 Dollars: \$2,465

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$5,267
Program Increase							0	0	\$2,465
Budget Request	0	0	\$4,778	0	0	\$5,267	0	0	\$7,732

Description of Item

The CPO Shared Reporting Working Capital Fund activity provides the DHS acquisition workforce with eProcurement systems and tools which leverage investment costs and promote competition, transparency, integrity and consistency.

Justification

The Acquisition Systems Branch (ASB) has the fiduciary responsibility to provide the DHS acquisition workforce with systems and tools to efficiently and effectively perform their jobs. The CPO Shared Reporting activity supports the activities of the ASB and, more specifically, funds the DHS eProcurement Portfolio. Centralized funding and management of the Department's eProcurement Portfolio ensures comprehensive program management throughout the systems lifecycle and results in systems and tools that meet the needs of the entire DHS enterprise.

The increase in funding, beyond inflation, will be used to support the following:

- Refresh aging hardware and software for PRISM production at the Stennis Data Center and stand up additional software and hardware at the Clarksville Data Center. PRISM is the contract writing and management system used by the following DHS contracting activities: DHS Headquarters OPO, USCIS, ICE, and FLETC. Without the new hardware and software, system reliability will decrease, maintenance costs will increase, and additional

system functionality will be limited. Additionally, the mandate to move PRISM from the Glebe Road Data Center will not be met.

- Interface disparate Component contract writing systems to the Enterprise Reporting Application (ERA). ERA provides near real-time reporting, produces dashboard and quality control metrics and facilitates data analysis of DHS contract data down to individual contract line items. ERA is presently interfaced with the Federal Procurement Data System and PRISM. Without adequate funding, ERA deployment will cease and DHS will continue to rely on the manual, paper-based, labor intensive data call processes. ERA frees users of the onerous task of collecting data and allows them more time to analyze data which ultimately leads to data driven business decisions.
- Procurement of hardware and software and deployment support for the Electronic Contract Filing System (ECFS). ECFS provides electronic storage, retrieval and archival of contracts and related documents across the DHS contracting activities. Various methodologies are currently employed to manage contract files. However, these processes are largely paper based, manual and labor intensive. Various business conditions are driving automation of these processes to facilitate a virtual contract operations environment. These drives include: support of continuity of operations efforts; elimination of lost contract files; electronic search and retrieval capability 24/7; and reduction/elimination of paper storage systems.

Impact on Performance

With the funding level requested, ASB will be able to maintain existing systems, while increasing system capabilities and functionality associated with PRISM, ERA and ECFS. This will improve the procurement community's ability to efficiently and effectively support response and recovery operations and will produce a more resilient workforce. Additional performance enhancements include increased cross-Component collaboration and collection and analysis of enterprise procurement metrics and data; data driven business decisions, and improved information technology security compliance.

Description of Item

The WCF Management Activity includes funding for the staff that develops WCF policy and procedures, formulates and executes the WCF budget and facilitates dispute resolution of issues between activity managers and customers.

Justification

The WCF requests 3 additional positions and 2 FTE and \$316K to support the expansion of the Working Capital Fund. The three additional FTE will perform the following:

- Incorporate the WCF program into the DHS budget and FYHSP cycle
- Develop a robust review and oversight process to ensure activities funded by the fund are in compliance with applicable laws and regulations
- Develop and conduct training to DHS staff, activity managers and customers on revolving fund principles and procedures.

Impact on Performance

The additional 2 FTE and \$316K requested in FY 2012 will directly support the operation and continued development of the fund.

Program Decrease							0	0	(\$4,875)
Budget Request	0	0	\$26,017	0	0	\$30,084	0	0	\$25,209

Description of Item

The Department of Homeland Security (DHS) Office of the Chief Financial Officer (OCFO) has authority for financial systems in DHS and it sponsors, sets policy, and manages the development, implementation, operation and maintenance of the departmental financial management systems and related business processes. It has been determined by the DHS OCFO that selected financial management services will be obtained from U.S. Immigration and Customs Enforcement (ICE), hereafter referred to as ICE, on a reimbursable basis. Activities include financial policies and procedures, administration (including customer service), financial analysis, reporting, external reviews and inquiries and financial systems.

Justification

The cost allocation methodology for this activity is based on the historical cost of providing seven categories of financial support to each participating Component. The seven categories of financial support services include the following: (1) financial reports, (2) obligations and payment processing, (3) system usage, (4) receipts, (5) payroll, (6) overhead, and (7) travel and cash management services. The FY 2012 request is \$4.876 million less than the FY 2011 request due to a refinement of the cost model methodology, which is based on the actual number of transactions, contract costs, rent, administrative costs, plus overhead IT cost for each Component. Currently, the charges for Office of the Secretary and Executive Management/Under Secretary for Management (OSEM/USM) are distributed to internal offices on the basis of total budget authority. Additionally, in FY 2012 Operations Coordination and

Intelligence and Analysis will enter into a reimbursable agreement with FLETC for these services outside of the Working Capital Fund. Of the \$4.876 million decrease, this accounts for \$1.392 million.

Impact on Performance

There is no impact on performance.

Description of Item

The DHS Financial Accountability Act requires an audit opinion on the Department's Internal Controls over Financial Reporting. Due to the extent of material weaknesses, the Department's Inspector General conducts performance audits to assess the effectiveness of DHS corrective actions in effort to comply with the Act. The Internal Control Auditor is selected through contracting procedures by the Office of Inspector General (OIG) and must stay independent from the DHS Components that are being audited. The auditor selected commences work immediately and entrance conferences are held within a short time after award of the financial statement audit contract.

Justification

The decrease of \$3.059 million reflects efficiencies due to implementation of DHS corrective actions. DHS executed corrective actions and made progress on: resolving material weakness conditions, validating the effectiveness of internal controls over financial reporting and implementing the internal control audit provision of the DHS Financial Accountability Act.

Impact on Performance

With the funding level requested, DHS will be able to continue implementing corrective actions and continue to resolve material weaknesses.

	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$532
Program Decrease							0	0	(\$470)
Budget Request	0	0	\$0	0	0	\$532	0	0	\$62

Description of Item

DHS has selected Customs and Border Protection (CBP) as the servicing agent to provide for a centralized invoicing and payment system for Components within DHS. CBP has developed and implemented a system that supports the receipt of daily invoices for all of DHS from US Bank. This system assures payment of those invoices within one business day of receipt, and provides transmission of an electronic file containing transaction data to each Component's accounting system.

Justification

The decrease changes are in regards to Payment Audit, Merchant Category Code Reviews, and Payment Process, significantly impacted the cost and audit review process, thus causing a substantial decrease in the cost of this service.

Impact on Performance

The decrease is a result of decline in number of Bankcard transactions being processed on a daily basis. The efficiency of the activity is the prompt payment and separation of data transmission to each Components accounting system; therefore reducing the margin of error in procurement actions.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes

Description of Item

The DHS e-Training initiative is focused on strengthening and unifying DHS operations and management by taking an earned value approach to Information Technology Portfolio Management (IT PFM) in support of employee learning and development (L&D). Through consolidated systems and aligned business processes, the Advanced Distributed Learning Program Management Function (ADL PMF) within the Office of the Chief Human Capital Officer (OCHCO) serves to eliminate Department redundancies while increasing overall access to the highest quality ADL products and services. e-Training directly supports several government-wide initiatives as explained below. This activity benefits the Federal government, the Department, and the individual employee by:

- Reducing redundancies and achieving economies of scale in the purchase, deployment, and management of ADL technology infrastructure (e.g., Learning Management Systems (LMS), Learning Content Management Systems (LCMS) and/or other Information Technology (IT) hardware/software for Human Capital Performance Support (HCPS) tools), and the consolidation and/or sharing of hardware/software;
- Reducing redundancies and achieving economies of scale in the purchase and/or development of e-Learning courses and content (e.g., commercial-off-the-shelf (COTS) or custom-developed content to meet specific agency needs);
- Leveraging Components of existing learning systems (e.g., LMS, LCMS, IT hardware, or HCPS tools) where clear value propositions exist;
- Offering user-friendly, one-stop access to a robust and high-quality learning environment;

- Encouraging ADL investments as part of a strategic, systematic, and continuous development of DHS human capital; and
- Fostering communication between Federal Human Resources Development (HRD) practitioners government-wide to identify, prioritize and develop solutions to issues of interest within the community, and to share best practices and resources where synergies are evident.

Justification

FY 2012 requests funding for an expected stabilization of licensing support costs and an increase in dependency on centralized custom courseware development being managed by the ADL PMF.

e-Training directly supports the Department's strategic human capital management activity as defined in the Homeland Security Act (HR 5005), Title XIII, Section 1304 and academic training as described in Section 1331; the President's Management Agenda for e-Gov Initiatives; both the Office of Personnel Management's e-Training and Enterprise Human Resource Integration initiatives; and, specifically, Katrina Lessons Learned Recommendation 115.³

Impact on Performance

Although there's a decrease in funding, e-training will continue to support the following critical goals:

- Supporting the President's Management Agenda (PMA), the DHS Human Capital Operations Plan (HCOP), and the DHS Learning and Development Strategic Plan for Fiscal Years 2006-2010 (specifically Goal 4, Strategy 2, and Tactic 1 which is to implement the recommendations of the ADL Enterprise Architecture Study).
- Serving is a key enabling IT component to the DHS Chief Learning Officer's Strategy for establishing a Homeland Security University System.
- Further leveraging simplicity through reductions in Department-wide Information Technology (IT) infrastructure and redundancies in DHS-wide training needs.
- Direct support of Department Information Technology Portfolio Management goals

Benefits to be derived from e-Training include:

- Increased functionality through automation of the SF-182 process
- Automated Enterprise Human Resources Integration (EHRI) reporting of training to OPM
- Access to professional development, required training, and other enterprise content
- Anticipated integration of competency management capabilities
- Enterprise-leveraged course procurement (i.e., increased buying power)
- Enterprise-leveraged course management. Preliminary analysis showed approximately 75% in cost savings through enterprise licensing of commercial-off-the-shelf (COTS) courseware versus contracting by individual Components.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 7: e-Rulemaking

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: Government-wide Mandated Service Activity

Program Decrease: Positions 0 FTE 0 Dollars (\$319)

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$765
Program Decrease							0	0	(\$319)
Budget Request	0	0	\$646	0	0	\$765	0	0	\$446

Description of Item

The e-Rulemaking is a collaborative, interagency activity designed to establish a common, automated and integrated approach to managing the Federal government's rulemaking function. The activity consolidates rulemaking systems at the various departments and agencies and is centrally managed through a web-based environment offering such as one-stop access, search capabilities, and public commenting.

Justification

DHS will adjust the FY2012 level downward by \$0.319 million to reflect current year requirements.

Impact on Performance

There is no impact on performance from this decrease.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 8: e-Grants

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: Government-wide Mandated Service Activity

Program Decrease: Positions 0 FTE 0 Dollars (\$287)

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$620
Program Decrease							0	0	(\$287)
Budget Request	0	0	\$596	0	0	\$620	0	0	\$333

Description of Item

The e-Grants creates a single portal for all Federal grant customers to find, apply for, and manage grants on-line. The Grants.gov storefront provides electronic functionality for applicants and grantees and reduces the paper-based processes that previously challenged the Federal grants environment. The initiative is designed to reduce inefficiencies, meet e-Gov goals, and provide benefits to both citizens and the government. Specifically, the initiative enables the government to meet many of the streamlining activities required by Grants Policy Committee, Federal Financial Assistance Management Improvement Act, and called for in the President's Management Agenda, such as deploying a unified search/find capability for grant opportunities, standard data sets, and a common mechanism and processes for applying for Federal grants funds.

Justification

Currently, the E-Grants activity accounts for three items: e-Grants, e-Gov Benefits, and Grants Management Line of Business (GMLoB). This decrease realigns funds from e-Grants to e-Gov Benefits and GMLoB. This provides for clearer visibility and management of these three activities.

Impact on Performance

There is no impact on performance from this decrease. This decrease is offset by the two increases for e-Gov Benefits and GMLoB.

(Dollars in Thousands)

Program Decrease 9: Geospatial Line of Business

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: Government-wide Mandated Service Activity

Program Decrease: Positions 0 FTE 0 Dollars (\$3)

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$65
Program Decrease							0	0	(\$3)
Budget Request	0	0	\$62	0	0	\$65	0	0	\$62

Description of Item

The Geospatial LoB is designed to further refine the opportunities for optimizing and consolidating Federal geospatial-related investments to reduce the cost of government and, at the same time, improve services to citizens. Cross-agency coordination of geospatial activities can identify, consolidate, and reduce or eliminate redundant geospatial investments. The Geospatial will result in a more coordinated approach to producing, maintaining, and using geospatial data, and will ensure sustainable participation from Federal partners to establish a collaborative model for geospatial-related activities and investments.

Justification

DHS will adjust the FY2012 level downward by \$0.003 million to reflect current year requirements.

Impact on Performance

There is no impact on performance from this decrease.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 10: Financial Management Line of Business (FMLoB)

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: Government-wide Mandated Service Activity

Program Decrease: Positions 0 FTE 0 Dollars (\$143)

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$286
Program Decrease							0	0	(\$143)
Budget Request	0	0	\$143	0	0	\$286	0	0	\$143

Description of Item

The Financial Management Line of Business (FMLoB) goals are to define, analyze, and implement options that will enhance cost savings in the financial management systems, provide for standardization of business processes and data models, promote seamless data exchange between Federal agencies, and strengthen internal controls through integration of core financial and subsidiary systems.

Justification

The FMLoB's current objective is to improve the cost, quality, and performance of financial management (FM) reducing the number of noncompliant systems by leveraging common standards, shared service solutions, and implementing other government-wide reforms that foster efficiencies in Federal financial operations. DHS will adjust the FY2012 level downward by \$0.143 million to reflect current year requirements.

Impact on Performance

The decrease in funding is a result of the standardization, consolidation and optimization for the Financial Management Line of Business. This activity will continue to accomplish its objectives and goals of improving the cost, quality and performance of financial management and reducing the number of noncompliant systems.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 11: e-Integrated Acquisition Environment

Strategic Goal(s) and Objective(s): Strengthen and unify DHS Operations and Management/Integration of hiring, retention, training and development, and performance programs.

PPA: Government-wide Mandated Service Activity

Program Decrease: Positions 0 FTE 0 Dollars (\$238)

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$1,681
Program Decrease							0	0	(\$238)
Budget Request	0	0	\$1,680	0	0	\$1,681	0	0	\$1,443

Description of Item

The eGov Integrated Acquisition Environment (IAE) activity is a secure business environment that facilitates and supports cost-effective acquisition of goods and services in support of mission performance. IAE reimburses the General Services Administration (GSA), the eGov Portfolio Manager, for DHS'S share of costs associated with the IAE systems and program:

- Wage Determinations On-Line
- Online Representations and Certifications
- Federal Procurement Data System
- Federal Business Opportunities
- Electronic Subcontracting Reporting Systems
- Excluded Parties List System
- Central Contractor Registration
- Federal Agency Registration
- Dun and Bradstreet

- Managing Partner:
- Under Secretary for Management
- Office of the Chief Procurement Officer
- Office of Strategic Support
- Acquisition Systems Branch

Justification

With the funding decrease, e- Integrated Acquisition Environment (IAE) as the Presidentially-mandated e-Gov initiative charged with creating a government-wide "environment" of acquisition related systems will continue to support federal acquisition throughout all Federal agencies. It constitutes approximately 17 operational systems supporting federal buyers and their own contract writing system, which is PRISM for DHS. PRISM is directly dependent on the IAE, and interfaces with more than one of the IAE systems. DHS will adjust the FY2012 level downward by \$0.238 million to reflect current year requirements.

Impact on Performance

The decrease in funding will allow DHS to reimburse the General Services Administration (GSA), the eGov Portfolio Manager, for DHS'S share of actual costs associated with the IAE systems and program.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 12: e-Gov Disaster Management

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: Government-wide Mandated Service Activity

Program Decrease: Positions 0 FTE 0 Dollars (\$245)

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$12,515
Program Decrease							0	0	(\$245)
Budget Request	0	0	\$12,022	0	0	\$12,515	0	0	\$12,270

Description of Item

Disaster Management is part of the e-Gov Act of 2002, Title II, and Section 214 "Enhancing Crisis Management Through Advanced Information Technology" and is described in OMB M-03-18, "Implementation Guidance for the e-Government Act of 2002." This initiative, which will support disaster assistance and "all hazards" response, is a joint effort involving 10 other Federal agencies that support disaster management. This initiative also supports many of the goals of the Initial National Response Plan dated October 2003.

The scope of the project covers all Federal agencies that are involved in disaster recovery, as well as State, local and tribal disaster recovery organizations and individuals. The value of this program is its contribution to improving disaster preparedness and its potential to reduce property damage and loss of life.

Justification

DHS will adjust the FY2012 level downward by \$0.245 million to reflect current year requirements.

Impact on Performance

There is no impact on performance from this decrease.

**Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)**

Program Decrease 13: Strategic Sourcing

Strategic Goal(s) & Objective(s): DHS Strategic Goal: Strengthen and unify DHS Operations and Management, with a focus on integrating support systems.

PPA: DHS Crosscutting Activity

Program Decrease: Positions 0 FTE 0 Dollars (\$683)

	FY 2010 Actual			FY 2011 CR			FY 2012 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level ¹							5	5	\$2,755
Program (Decrease)							0	0	(\$683)
Budget Request	0	0	\$642	2	2	\$2,755	5	5	\$2,072

¹ There is an adjustment to base of 3 FTE and positions between FY 2011 and FY 2012 to reflect DHS Balanced Workforce Initiatives.

Description of Item

The Strategic Sourcing Program Office (SSPO) is responsible for implementing a Department-wide approach to acquiring goods and services. SSPO provides DHS stakeholders economic and performance benefits through collaboration, rigorous analysis, and enterprise planning for acquisition initiatives. The SSPO collaborates with stakeholders to develop, deploy, and maintain sourcing strategies that enhance mission performance, improve acquisition efficiency, and optimize commodity management.

Justification

The decreases in program costs are due to contractor conversions and a decrease in programmatic activity spending. As a result Strategic Sourcing has converted three contractors into government FTE in FY 2010 and anticipates hiring two additional FTE in FY2011. This action is consistent with the Workforce Assessment Management Action Directive issued through the DHS Secretary's Efficiency Review initiative. In addition, Strategic Sourcing has been able to reduce the costs to implement certain programmatic activities, such as the spend analysis tool. Although initial cost estimates were over \$1 million annually, Strategic Sourcing was able to implement the spend analysis tool for an annual cost of \$641,000.

Impact on Performance

With this decrease in funding, Strategic Sourcing will continue to implement a Department-wide approach to acquiring goods and services. Strategic Sourcing will continue to provide DHS stakeholders economic and performance benefits through collaboration, rigorous analysis, and enterprise planning for acquisition initiatives. Therefore, there will be no impact on performance.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Working Capital Fund
Justification of Proposed Changes in Department of Homeland Security
Appropriation Language**

SEC. 504. The Department of Homeland Security Working Capital Fund, established pursuant to section 403 of Public Law 103–356 (31 U.S.C. 501 note), shall continue operations as a permanent working capital fund for fiscal year 2012 and hereafter: Provided, That none of the funds appropriated or otherwise made available to the Department of Homeland Security may be used to make payments to the Working Capital Fund, except for the activities and amounts allowed in the President's fiscal year 2012 budget: Provided further, That funds provided to the Working Capital Fund shall be available for obligation until expended to carry out the purposes of the Working Capital Fund: Provided further, That all departmental components shall be charged only for direct usage of each Working Capital Fund service: Provided further, That funds provided to the Working Capital Fund shall be used only for purposes consistent with the contributing component: Provided further, That such fund shall be paid in advance or reimbursed at rates which will return the full cost of each service: Provided further, That the Working Capital Fund shall be subject to the requirements of section 503 of this Act.

Explanation of Changes:

The WCF mandate expires annually, and must be re-granted through appropriation language. This is atypical for government working capital funds. Continuity of DHS WCF operations is at risk due to the need for annual re-appropriation. As an example, the HHS and DOJ WCFs do not require annual appropriation language. DHS would like to request specific authorization language establishing the Fund “without fiscal year limitation” to reduce the continuity of operations risk. This permanence would establish a foundation for enhancing the institutional organization and management structures of the Fund.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of Federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS Component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or Federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with Federal employees to better realize the full potential of our total workforce – both contracted and Federal. A strong internal core of Federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS Components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for Federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2013 budget.

WORKING CAPITAL FUND requests 70 FTE for the FY 2012 DHS Balanced Workforce Strategy.

Financial Management Support - FY 2012 DHS Balanced Workforce Strategy

Provide additional details on the FY 2012 DHS Balanced Workforce including:

- Amount of funding needed to hire Federal employees: No Additional funding is required
- Amount of the Contract that will be terminated or reduced. During FY10, \$734,547 was placed on this contract.
- Implementation Timeline – *Do you expect any overlap of contractor and Federal employees (for training etc)? When will the contract end? The Financial Management Support activity does not expect any overlap of contractor and Federal employees.*
- Identify any contractor functions that will be eliminated or absorbed by current Federal employees and do not require additional new Federal positions. None.

Annualization of FY 2011 DHS Balanced Workforce Strategy

Identify funding for Annualization of FY 2011 DHS Balanced Workforce. No additional funding is required for annualization of FY2011 DHS Balanced Workforce.

DHS Balanced Workforce Strategy Follow-On

Provide additional justification for FY 2010 and FY 2011 DHS Balanced Workforce Follow-On.

- Any adjustments necessary to reflect any contractor conversion that occurred prior to FY 2012 that were not reflected in the corresponding year's budget request. \$434,042.00 for follow-on and vacant positions that will be hired within FY 2011

ELA - FY 2012 DHS Balanced Workforce Strategy

Provide additional details on the FY 2012 DHS Balanced Workforce including:

- Amount of funding needed to hire Federal employees: \$434,042.00
- Amount of the Contract that will be terminated or reduced. \$434,042
- Implementation Timeline – *Do you expect any overlap of contractor and Federal employees (for training etc)? When will the contract end? OCIO does not expect any overlap of contractor and Federal employees.*
- Identify any contractor functions that will be eliminated or absorbed by current Federal employees and do not require additional new Federal positions. None.

Annualization of FY 2011 DHS Balanced Workforce Strategy

Identify funding for Annualization of FY 2011 DHS Balanced Workforce. No additional funding is required for annualization of FY2011 DHS Balanced Workforce.

DHS Balanced Workforce Strategy Follow-On

Provide additional justification for FY 2010 and FY 2011 DHS Balanced Workforce Follow-On.

- Any adjustments necessary to reflect any contractor conversion that occurred prior to FY 2012 that were not reflected in the corresponding year's budget request. \$434,042.00 for follow-on and vacant positions that will be hired within FY 2011

HCBS - FY 2012 DHS Balanced Workforce Strategy

- Amount of funding needed to hire Federal employees: No additional position/funding is required for FY 2012 DHS Balanced Workforce Strategy.
- Amount of the Contract that will be terminated or reduced. Because the contract will be modified to address higher-priority Program requirements, the contract will not show a cost reduction.
- Implementation Timeline – *Do you expect any overlap of contractor and Federal employees (for training etc)? When will the contract end?* There is no requirement for contractor/Federal employee overlap.

Annualization of FY 2011 DHS Balanced Workforce Strategy

Identify funding for Annualization of FY 2011 DHS Balanced Workforce. As no positions have been requested, there is no funding required for the annualization of FY 2011 DHS Balanced Workforce.

DHS Balanced Workforce Strategy Follow-On

Provide additional justification for FY 2010 and FY 2011 DHS Balanced Workforce Follow-On.

- Not Applicable

HQ Human Capital Services - FY 2012 DHS Balanced Workforce Strategy

- Amount of funding needed to hire Federal employees: No additional funding is required for FY 2012 DHS Balanced Workforce Strategy, as these positions were converted in FY 2010.
- Amount of the Contract that will be terminated or reduced. The contractor positions were eliminated in FY2010. The contract is now expired.
- Implementation Timeline – *Do you expect any overlap of contractor and Federal employees (for training etc)? When will the contract end?* The Implementation Timeline was completed in FY 2010.

Annualization of FY 2011 DHS Balanced Workforce Strategy

As no positions have been requested, there is no funding required for the annualization of FY 2011 DHS Balanced Workforce.

DHS Balanced Workforce Strategy Follow-On

Provide additional justification for FY 2010 and FY 2011 DHS Balanced Workforce Follow-On.

- Not Applicable

NCRIO - FY 2012 DHS Balanced Workforce Strategy

Provide additional details on the FY 2012 DHS Balanced Workforce including:

- Amount of funding needed to hire Federal employees: N/A
- Amount of the Contract that will be terminated or reduced. N/A
- Implementation Timeline – *Do you expect any overlap of contractor and Federal employees (for training etc)? When will the contract end?* N/A
- Identify any contractor functions that will be eliminated or absorbed by current Federal employees and do not require additional new Federal positions. N/A

Annualization of FY 2011 DHS Balanced Workforce Strategy

Identify funding for Annualization of FY 2011 DHS Balanced Workforce. No additional funding is required for annualization of FY2011 DHS Balanced Workforce.

Note: NCRIO's activity has 30 positions and FTE during FY2011 CR. The FY12 President's Budget identifies 16 Workforce Balance positions and FTE's converted in FY11 and a program increase of 40 positions and FTE's in FY2012. This total 84 FTE's and positions for the NCRIO activity.

DHS Balanced Workforce Strategy Follow-On

Provide additional justification for FY 2010 and FY 2011 DHS Balanced Workforce Follow-On.

- Any adjustments necessary to reflect any contractor conversion that occurred prior to FY 2012 that were not reflected in the corresponding year's budget request. \$8,136,300.00. for follow-on and vacant positions that will be hired within FY 2011

Strategic Sourcing - FY 2012 DHS Balanced Workforce Strategy

Provide additional details on the FY 2012 DHS Balanced Workforce including:

- Amount of funding needed to hire Federal employees: \$1,444,985
- Amount of the Contract that will be terminated or reduced. : \$1,444,985
- Implementation Timeline –The contract for contract support services ended on September 28, 2010. Overlap of contractor and Federal employees was negligible.
- There are not contractor functions that will be absorbed by current Federal employees. All contractor functions required new Federal positions.

Annualization of FY 2011 DHS Balanced Workforce Strategy

Identify funding for Annualization of FY 2011 DHS Balanced Workforce. No additional funding is required for annualization of FY2011 DHS Balanced Workforce.

DHS Balanced Workforce Strategy Follow-On

Provide additional justification for FY 2010 and FY 2011 DHS Balanced Workforce Follow-On.

- Any adjustments necessary to reflect any contractor conversion that occurred prior to FY 2012 that were not reflected in the corresponding year's budget request. N/A

BUDGET REQUEST AND SUPPORTING INFORMATION
--

Salaries and Expenses

I. Appropriation Overview

A. Mission Statement:

The Analysis and Operations appropriation provides resources for the support of the Office of Intelligence and Analysis (I&A) and Office of Operations Coordination and Planning (OPS). This appropriation includes both National Intelligence Program (NIP) funds for I&A and non-NIP funds for OPS. Even though these two offices are different and distinct in their missions, they work closely together and collaborate with other departmental components and related Federal agencies, as well as State, local, tribal, foreign, and private-sector partners, to improve intelligence analysis, information sharing, incident management support, and situational awareness.

B. Budget Activities:

Office of Intelligence and Analysis (I&A) - As a member of the U.S. Intelligence Community (IC), I&A is the nexus between the nation's intelligence apparatus and DHS components and other State, Local, and Private Sector (SLP) partners. I&A ensures that information is gathered from all relevant DHS field operations and other SLP partners and that this information is shared with appropriate stakeholders to produce accurate, timely and actionable analytical intelligence products and services. The Under Secretary for Intelligence and Analysis (U/SIA) leads I&A, and is also the Department's Chief Intelligence Officer (CINT), responsible for managing the entire DHS Intelligence Enterprise, and the Department's Chief Information Sharing Officer, responsible for implementing the objectives of the Program Manager – Information Sharing Environment (PM-ISE) within DHS.

Office of Operations Coordination and Planning (OPS) - OPS plays a pivotal role in DHS's mission to lead the unified national effort to secure America by facilitating the Secretary's responsibilities across the full spectrum of incident management (prevention, protection, response and recovery). OPS provides situational awareness, assessments and operations coordination for the DHS Secretary and facilitates operational information sharing with all DHS components, as well as for Federal, State, local, tribal, private sector and international partners. In support of the Secretary's role as Principal Federal Official (PFO) for domestic incident management, OPS develops and coordinates Departmental and interagency strategic-level operations plans.

C. Budget Request Summary:

The Analysis and Operations account requests 1,103 positions, 1,017 FTE, and \$355,368,000 for FY 2012. Details regarding the adjustments-to-base and program increases can be found in the classified annex.

II. Summary of FY 2012 Budget Estimates by Program/Project Activity (PPA)

Department of Homeland Security
Analysis and Operations

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of Federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or Federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with Federal employees to better realize the full potential of our total workforce – both contracted and Federal. A strong internal core of Federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for Federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking.

BUDGET REQUEST AND SUPPORTING INFORMATION

Salaries and Expenses

I. Appropriation Overview

The Department of Homeland Security (DHS), Office of Inspector General (OIG) was established by the *Homeland Security Act 2002* (P.L. 107-296), by amendment to the *Inspector General Act of 1978*. The Inspector General (IG) has a dual reporting responsibility to the Secretary of DHS and to the Congress. The OIG serves as an independent and objective inspection, audit, and investigative body to promote economy, efficiency, and effectiveness in DHS programs and operations, and to prevent and detect fraud, waste, and abuse in such programs and operations. Based on the direction from the Department, for fiscal year (FY) 2012, the OIG received 683 positions, 676 full time equivalents (FTE) and \$144.3 million. This consists of an increase of \$4.0 million to OIG's Emergency Management Oversight operations, an increase of \$7.0 million for investigative services, and a \$4.5 million increase to stay on-course with the *9/11 Commission Audits*. The final settlement also includes reductions, of \$1.6 million for management and technology efficiencies, and \$0.7 million for the Administrative Savings Initiative. This fiscal year, as in FY 2011, DHS is funding Emergency Management Oversight disaster relief efforts in the OIG's base. Prior to FY 2011, these funds had been transferred from the Disaster Relief Fund (DRF).

A. Mission Statement:

The *Homeland Security Act of 2002* provided for the establishment of an Office of Inspector General (OIG) in the Department of Homeland Security (DHS) by amendment to the Inspector General Act of 1978. By this action, the Congress and the administration ensured independent and objective audits, inspections, and investigations of the operations of the DHS.

The OIG contributes to the agency's success by providing objective information to promote government management, decision making, and accountability. The OIG focuses on eliminating waste, fraud and abuse, and on identifying problems and recommendations for corrective actions by agency leadership. The OIG provides the agency and the Congress with objective assessments of opportunities to be more successful.

The OIG conducts and supervises audits, inspections, special reviews, and investigations of the Department's programs and operations, including program and financial management, contract and grant activity, and disaster relief efforts. The OIG conducts these reviews to offer recommendations for improving the economy, efficiency, and effectiveness of the Department's operations and activities, when necessary; and to deter, identify, and address fraud, waste, and abuse. The OIG annually publishes a schedule of audits, inspections, and investigations that will assist the Department in fulfilling its mission and goals, and report its findings to the Secretary, the Congress, and the public, when appropriate. The IG statements for the record and testimony may be accessed through our website at www.dhs.gov/xoig.

B. Budget Activities:

The OIG has one budget for audit, inspections, and investigations activity that consists of 676 FTE assigned to the following executive management and oversight teams:

The Executive Office consists of the Inspector General, the Deputy Inspector General, a Chief of Staff, and support staff. It provides executive leadership to the OIG. The office has 4 FTE.

The Office of Congressional and Public Affairs serves as primary liaison to members of the Congress and their staff, the White House and Executive Branch, the media, and to other Federal agencies and governmental entities involved in securing the Nation. The office staff responds to inquiries from the Congress, the White House and the media; notifies Congress about OIG initiatives, policies, and programs; and informs other governmental entities about OIG measures that affect their operations and activities. It also provides advice to the Inspector General and supports OIG staff as they address congressional, White House, and media inquiries. The office has 4 FTE.

The Office of Counsel to the Inspector General provides legal advice and guidance to the Inspector General and other management officials. The office interprets laws, rules and regulations and, reviews reports and correspondence, and further supports audits, inspections, and investigations by ensuring and conducting legal sufficiency reviews. Counsel represents the OIG in Equal Employment Opportunity (EEO), Merit Systems Protection Board (MSPB) actions, and claims filed under the Federal Torts Claims Act (FTCA); represents OIG investigators in conjunction with the Department of Justice (DOJ) in Bivens actions; and assists DOJ with Giglio requests. The office reviews all DHS management directives and delegations to ensure protection of OIG authorities and compliance of applicable laws and regulations. The office serves as the OIG's designated ethics office, manages the OIG's *Freedom of Information Act and Privacy Act* responsibilities, furnishes attorney services for the issuance and enforcement of OIG subpoenas, and provides legal advice on OIG operations. The office has 13 FTE.

The Office of Management provides critical administrative support functions, including OIG strategic planning; development and implementation of administrative directives; the OIG's information and office automation systems; oversight of the personnel, procurement, security systems and policy, travel, and accounting services provided to the OIG on a reimbursable basis by the Bureau of Public Debt. The office also prepares the OIG's annual performance plans and the semiannual reports to the Congress. The office has 63 FTE.

The Office of Audits conducts and coordinates audits and program evaluations of the management and financial operations of DHS. Auditors examine the methods employed by agencies, bureaus, grantees, and contractors in carrying out essential programs or activities. The office evaluates whether established goals and objectives are achieved and resources are used economically and efficiently; ensures whether intended and realized results are consistent with laws, regulations, and good business practice; and determines whether financial accountability is achieved and the financial statements are not materially misstated. The office will be conducting reviews on programs addressed in the *American Reinvestment and Recovery Act (ARRA)* in FY 2012 for program and fiscal management of funds allocated to DHS for fraud, waste, and abuse. The office has 168 FTE.

The Office of Information Technology (IT) Audits conducts audits and evaluations of DHS's information management, cyber infrastructure, and systems integration activities; and provides technical forensics assistance to OIG offices in support of the OIG's fraud prevention and detection mission. The office reviews the cost effectiveness of acquisitions, implementation, and management of major systems, and telecommunications networks across DHS. The office evaluates the systems and related architectures of DHS to ensure they are effective, efficient, and implemented according to applicable policies, standards, and procedures. The office assesses DHS's information security program as mandated by the *Federal Information Security Management Act* (FISMA). The office also provides technical forensics assistance to OIG offices in support of OIG's fraud prevention and detection program. The office has 55 FTE.

The Office of Inspections provides the Inspector General with a means to analyze programs quickly and to evaluate operational efficiency, effectiveness, and vulnerability. This work includes special review of highly visible or sensitive issues that arise suddenly, as well as congressional requests and mandates for studies that require immediate attention. The nature of this work requires timely reporting to high-level audiences, including the Secretary and Congress. The office examines all areas of the Department in an effort to strengthen and unify DHS operations and management systems and make recommendations, which can help ensure that Department programs function efficiently, effectively, and economically. The office also conducts special reporting on international affairs that involve DHS personnel, programs, and operations, civil rights and civil liberties, and science and technology. Additionally, the office is the lead organization in the OIG for monitoring DHS intelligence activities. DHS has two members of the Intelligence Community (IC), i.e., the US Coast Guard (USCG) and the Office of Intelligence and Analysis (I&A). The USCG is a long standing member of the IC, and began this role under the Department of Transportation. I&A assumed its membership in the IC at the inception of DHS. Because USCG and I&A represent DHS's connection to the IC, it is essential that we provide oversight of their intelligence activities. Our goal is ensure that the DHS intelligence enterprise conducts its operations according to law, that intelligence is appropriately shared among DHS Components, other Federal agencies, and State and local stakeholders, and initiatives such as fusion centers and protective security advisors operate effectively and efficiently. In this capacity, the office reports on the use of intelligence information within the Department, and coordinates the OIG's interaction with the multi-agency intelligence community. The office has 47 FTE.

The Office of Investigations conducts investigations into allegations of criminal, civil, and administrative misconduct involving DHS employees, contractors, grantees, and programs. These investigations can result in criminal prosecutions, fines, civil monetary penalties, and administrative sanctions and personnel actions. The office has broad investigative and oversight responsibilities and mirrors Departmental priorities in working to ensure the integrity of the Nation's immigration system, borders, ports of entry, and national transportation network. The Office of Investigations is committed to protecting the civil rights and liberties of all persons in the U.S. and investigates all referrals of detainee deaths involving unusual or suspicious circumstances, all on-duty incidents involving the discharge of a firearm by a DHS employee, and all credible allegations of criminal abuse of authority that result in the deprivation of rights or other serious criminal offense. Further, the Office of Investigations conducts investigations

into allegations of gross misuse of classified information, privacy or law enforcement information; and allegations of criminal misconduct in the administration of immigration benefits. In addition, the Office of Investigations oversees the integrity of programs which distribute DHS funds for routine operations; in response to disasters and disaster preparedness training; and in association with programs used in the development of technologies critical to combating terrorism. The Office of Investigations collects, analyzes and distributes data concerning fraud and misconduct through our national hotline operation and the National Center for Disaster Fraud. The Investigations Hotline Correspondence Unit continues improvements to its systems for receiving, routing, and responding to thousands of routine complaints each year which report allegations of criminal or administrative misconduct, theft of Departmental funds, corruption by DHS employees or other serious misconduct involving DHS employees, contractors, grantees, and programs. The unit also receives and responds to congressional and other official correspondence. The Office of Investigations, Federal Emergency Management Agency (FEMA) Support Unit maintains liaison with FEMA and continues support to the National Center for Disaster Fraud by improving information access and communications; ensuring complaints are referred for investigation; and that prosecutions, and recoveries are accurately tracked and documented. Additionally, the Office of Investigations continues to exercise important oversight responsibilities and monitors the investigative activity of DHS Component internal affairs units who are tasked with investigating administrative misconduct issues within the DHS. The office has 247 FTE.

The Office of Emergency Management Oversight (EMO) provides an aggressive and ongoing audit and investigative effort designed to ensure that disaster relief funds are being spent appropriately, while identifying fraud, waste, and abuse as early as possible. The office is an independent and objective means of keeping the Congress, the Secretary, the Administrator of FEMA and other Federal disaster relief agencies fully informed on problems and deficiencies relating to disaster operations and assistance programs, and progress regarding corrective actions. EMO's focus is weighed heavily towards prevention, including reviewing internal controls, and monitoring and advising DHS and FEMA officials on contracts, grants, and purchase transactions before they are approved. This allows the office to stay current on disaster relief operations and provide on-the-spot advice on internal controls and precedent-setting decisions. The office coordinates with other Federal Offices of Inspector General, meets with State and local officials on audit and investigative matters, and advises contractors and grantees on compliance requirements. The office has 75 FTE.

C. Budget Request Summary:

- The OIG requests 683 positions, 676 FTE and \$144,318,000 for FY 2012. The request consists of \$20,000,000 towards OIG's Emergency Management Oversight operations, which includes an increase of \$4,000,000 from the previous year's enacted budget. The request also includes a \$7,000,000 increase for the proportional growth of the investigations oversight function, an increase of \$4,465,000 for the *9/11 Commission Audits*, a decrease for adjustments-to-base of \$1,021,000, which includes annualization of 3 FTE, inflationary adjustments, a reduction for management and technology efficiencies, and the Administrative Savings Initiative. The request includes \$2.8 million for training and

\$455,000 in support of the Council of Inspectors General on Integrity and Efficiency (CIGIE).

OIG Initial Budget Request

- The Office of Inspector General (OIG) submitted an initial request of \$173.6 million in funding to DHS at the beginning of the FY 2012 budget process. The OIG requested 732 positions and 700 full time equivalents (FTE), which includes 64 new positions, 50 investigators and 14 auditors. Our \$40.8 million request for increase consists of two major Components: 1) \$32.8 million to increase our investigative, audit, and emergency management oversight capabilities, and 2) \$8 million to carry out the 9/11 Commission Act audits of the Department's emergency management grant programs. Specifically, the \$32.8 million will fund 64 new employees and support our Emergency Management Oversight Office. The 64 new employees' costs includes \$7.2 million in salaries; \$6.8 million in personal gear, training, services, and equipment; and \$6.8 million for field office space and systems infrastructure, and other services. Our Emergency Management Oversight Office's support requirements will cost an additional \$8 million. We also included an increase in GSA rent and adjustments to our base lease agreement of \$4 million.

2 Includes \$16.0 million to annualize funding levels for Emergency Management Oversight disaster relief activities, which in previous years had been transferred through DRF.

III. Current Services Program Description by PPA

**Department of Homeland Security
Office of the Inspector General
Audit, Inspections, and Investigations Program
Program Performance Justification**
(Dollars in thousands)

AUDIT, INSPECTIONS AND INVESTIGATIONS:

	Perm Pos	FTE	Amount
2010 Actual	662	628	\$132,794
2011 C.R.	668	665	129,874
2012 Adjustments-to-Base	0	3	(1,021)
2012 Current Services	668	668	128,853
2012 Program Change	15	8	15,465
2012 Request	683	676	144,318

- The Office of Inspector General requests \$144,318,000, 683 positions, and 676 FTE, which includes 15 new positions and 8 FTE for investigative services. The request consists of an increase of \$4,000,000 to OIG’s Emergency Management Oversight operations, a \$7,000,000 increase for the proportional growth of the investigations oversight function, and an increase of \$4,465,000 for the 9/11 Commission Audits. The program increase will allow the OIG to properly fulfill OIG’s statutory duty to provide oversight of the Department’s increasing activities in the areas of threat prevention and detection, border protection, immigration enforcement, cyber security, and corruption.
- Consistent with DHS Secretary’s efficiency review, OIG is applying Management and Technology Efficiencies cost savings of \$1,562,000. In addition, the OIG is applying Administrative Savings of \$715,000 to its Audit, Inspections and Investigation program in FY 2012.

CURRENT SERVICES PROGRAM DESCRIPTION:

Specifically, the OIG’s key legislated responsibilities are to:

- Promote economy, efficiency, and effectiveness in the management of the Department’s programs and supporting operations;
- Conduct and supervise audits, investigations, and inspections relating to the Department’s programs and support operations;
- Detect and prevent fraud, waste, and abuse;

- Review existing and proposed legislation and regulations and make appropriate recommendations;
- Maintain effective working relationships with other Federal, State, and local governmental agencies, and non-governmental entities regarding the mandated duties of the OIG's;
- Inform the Secretary of DHS and Congress of serious problems and recommend corrective actions and implementation strategies;
- Comply with the audit standards of the Comptroller General of the Government Accountability Office (GAO); avoid duplication of GAO activities; and
- Report violations of federal criminal law to the U.S. Attorney General.

Accomplishments in FY 2010 include:

- The OIG issued 124 management audit reports, which included 49 financial assistance grant reports. Due to these efforts, \$103.3 million of questioned costs were identified, of which \$28.4 million were determined to be unsupported. The OIG recovered \$15.1 million as a result of identifying disallowed costs in prior audit reports and investigations. In addition, the OIG identified \$65.8 million in funds that could be put to better use.
- DHS management concurred with 95 percent of the OIG's recommendations.
- OIG investigations resulted in 348 arrests, 276 indictments, 270 convictions, and 126 personnel actions. In addition, the Office of Investigations closed 1,151 investigations and 13,145 complaints, initiated 1,399 new investigations, and issued 915 reports.
- Investigative recoveries, fines, restitutions, and cost savings totaled \$124.3 million.

FY 2011 Planned Accomplishments:

- The Office of Audits plans to issue 77 program and financial audits in FY 2011. The OIG anticipates that it will complete approximately 34 of the FY 2010 carryover audits in FY 2011 and 43 new program and financial reports. The OIG will continue to work closely with DHS management and congressional oversight committees to identify potential audit work that will promote the economy, efficiency, and effectiveness of departmental programs and operations.
- The Office of Information Technology Audits (ITA) anticipates conducting 28 engagements. ITA will continue to evaluate the Department's progress in establishing a cost-effective and secure information technology infrastructure. The office anticipates conducting projects on evaluations and reviews on DHS-wide network consolidation and implementation of a standard IT platform, immigration systems modernization, and DHS efforts to protect the Nation's cyber infrastructure and privacy.

- The Office of Inspections anticipates initiating 20 new reviews and completing seven reviews started in FY 2010. In addition, the office continues to provide quarterly reports to the President's Intelligence Oversight Board on the Department's compliance regarding intelligence on U.S. persons. The office will continue to review and evaluate the quality of management direction and control exercised overseas at the Component level by inspecting DHS entities at various locations worldwide. The Office of Inspections is also the lead office within the OIG for responding to and executing congressional requests for reviews.

- The Office of Investigations, Inspections Division will conduct internal inspections of the following OIG Investigations offices: the Dallas Field Office, including the Baton Rouge Resident Office and New Orleans Sub-Office; the Tucson Field Office, and Yuma Sub-Office; the Seattle Field Office and Bellingham Sub Office; the McAllen Field Office including the Laredo Resident Office; and the Washington Field Office.

- The Office of Emergency Management Oversight (EMO) will continue its aggressive oversight of FEMA's disaster grant activity with the completion of 50 disaster grant audits to determine cost eligibility while making recommendations to improve grantee and sub-grantee accounting controls, acquisitions, and contracting practices. In addition, EMO plans to issue 14 management reports that promote the economy, effectiveness, and efficiency of FEMA's disaster relief operations and ensure that internal controls are in place and operating effectively to reduce opportunities for fraud, waste, and abuse.

Anticipated FY 2012 performance is described below:

- The Office of Audits plans to issue and start approximately 92 programmatic and financial audits. The issued audit reports will include nearly 25 FY 2011 carryover audits that include at least 18 financial and grant audits performed by a contractor with OIG oversight, and 49 new performance audits scheduled for completion in FY 2011. The OIG will continue to work closely with DHS management and congressional oversight committees to identify potential audit work that will promote the economy, effectiveness, and efficiency of departmental programs and operations.

- The Office of Information Technology Audits (ITA) will continue to evaluate the Department's progress in establishing a cost-effective and secure information technology infrastructure. The office anticipates conducting projects on evaluations and reviews on DHS-wide network consolidation and implementation of a standard IT platform, immigration systems modernization, and DHS's efforts to protect the Nation's cyber infrastructure and privacy. Additionally, ITA anticipates undertaking reviews of the Transportation Security Administration's Office of Security Network, DHS's blackberry security controls, DHS's implementation of the Federal Desktop Core Configuration, and disposal of classified media. As mandated by the *Federal Information Security Management Act (FISMA)*, the office assesses the Department's progress, action plans, and milestones, to ensure implementation of security policies,

procedures, and systems certification and accreditation for a cost-effective and secure information technology infrastructure. The Forensics Division continues to conduct forensic audits and contract fraud reviews and makes recommendations concerning DHS programs that are vulnerable to fraud, waste, and abuse. The Forensics Division anticipates 20 or more engagements during FY 2012.

- The Office of Inspections estimates that it will initiate 30 reviews in FY 2012. The office will continue to focus on matters dealing with the department's overseas interests, immigration enforcement, transportation, chemical, and border security, critical infrastructure protection, civil rights and civil liberties, science and technology, and intelligence.
- The Office of Investigations will continue to protect the personnel, property, and integrity of DHS by vigorously investigating all allegations of corruption involving personnel or programs and investigating the most serious allegations of program fraud and other employee criminal misconduct. The office will continue its emphasis on staffing the border offices while also seeking to ensure effective investigative coverage in areas where there is high volume of U.S. Citizenship and Immigration Services benefit processing.
- The Office of Emergency Management Oversight (EMO) plans to complete 15 management reviews of FEMA programs and operations and 75 reviews of FEMA grants. The office will deploy experienced staff to FEMA Headquarters and disaster locations to provide on-the-spot advice, assistance, and oversight to DHS, FEMA, State, and local officials after major natural or man-made events that are, or will likely become, Federally declared disasters.

IV. Program Justification of Changes

Program Increase 1: Emergency Management Oversight

PPA: Audit, Inspections and Investigations

Program Increase: Positions 0 FTE 0 Dollars \$4,000

	FY 2010 Actual			FY 2011 Continuing Resolution			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase							0	0	\$4,000
Total Request							0	0	\$4,000

Description of Item

The \$4.0 million requested increase will provide travel, training, rents, contract and supplies in support of the OIG's Emergency Management Oversight (EMO) program. The increase will improve the number and scope of audits performed on grantees and sub-grantees, focusing on grants with potential for problems and areas that are of interest to Congress and the Federal Emergency Management Agency (FEMA).

Justification

Funding will ensure the OIG has the appropriate level in support of FEMA, and will fund the completion of 75 disaster grant audits, as well as 15 management audits.

Impact on Performance

From year to year, it is difficult to predict the number of declared disasters that will take place, the type of disasters that will occur, or the scale of a disaster. Therefore, the most effective way to tackle disaster oversight is to be prepared to address all-hazards through a comprehensive focused oversight approach. The increase in the budget will allow us to effectively reach this goal. A factor not taken into consideration in funding disaster oversight is that disaster programs typically last years. When the President declares a state eligible for disaster assistance, various FEMA programs are authorized. Immediate response may include deploying emergency life saving teams, e.g., Urban Search and Rescue or Disaster Medical Assistance Teams, into the affected area. Once a disaster has been declared, FEMA activates the Individual Assistance Program, which provides disaster survivors with housing and other needs, clothing, furniture, transportation, etc. Shortly thereafter, the Public Assistance Program is activated, which provides funding to the State, local governments, tribes, and eligible private-non-profit organizations. Initial funding covers the extra costs incurred to protect lives and property and remove debris. Increase in funding provides the resources to accomplish 25 additional disaster grants audits and one management review audit of FEMA programs and operations.

Program Increase 2: Proportional Growth of DHS Oversight Function

PPA: Audit, Inspections and Investigations

Program Increase: Positions 15 FTE 8 Dollars \$7,000

	FY 2010 Actual			FY 2011 Continuing Resolution			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase							15	8	\$7,000
Total Request							15	8	\$7,000

Description of Item

The \$7.0 million requested increase will provide funding for 15 new positions, which convert to 8 full-time equivalents (FTE). The 15 new positions will be allocated to investigative services.

Increases in the number of investigators are accompanied by procurement of personnel gear, training, services and equipment directly related to the new employee. Among these cost factors are: telephones, Blackberry service, electronic equipment, travel for training, permanent change of station moves, training, background investigations, physical exams, testing, ammunition, furniture, desktop and laptop computers, uniforms, safety protective equipment, weapons and others. This increase includes the residual cost associated with upgrades and replacement of equipment.

Funding is also provided for GSA rent and adjustments to base lease agreements, field office space, systems infrastructure and services related to providing the proper workspace throughout OIG’s footprint.

Justification

Increases in the number of investigators are accompanied by procurement of personnel gear, training, services and equipment directly related to the new employees. Increase will also fund office space associated with the new positions. The 15 new positions will allow the OIG to address workload growth and program demands throughout the Department.

There is a direct correlation between number of DHS employees, and level of oversight required to sustain the focus on the Department’s priorities.

Impact on Performance

OIG Office of Investigations has broad investigative and oversight responsibilities and mirrors departmental priorities in working to ensure the integrity of the nation’s immigration system, borders, ports of entry, and national transportation network. The additional funding, will allow the office to properly fulfill its statutory duty to provide oversight over the Department’s increasing activities in the areas of threat prevention and detection, border protection, immigration enforcement, cyber security, and corruption.

Program Increase 3: 9/11 Commission Audits

PPA: Audit, Inspections and Investigations

Program Increase: Positions 0 FTE 0 Dollars \$4,465

	FY 2010 Actual			FY 2011 Continuing Resolution			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase							0	0	\$4,465
Total Request							0	0	\$4,465

Description of Item

OIG will accomplish 9/11 Commission Audits using both contracted and in-house auditors. Funding pays for contracted auditing services, as well as OIG in-house auditors’ expenses, which includes travel and supplies. OIG expects to perform compliance audits with contracted auditors, and the performance audits with in-house personnel.

Justification

The \$4.465 million increase will provide the necessary funds to stay on course to conduct 8 audits in FY 2012 of the 56 congressionally-mandated 9/11 commission audits by August 2014, including plans to re-audit two states, bringing the total to 58 audits.

Impact on Performance

The increase will enable OIG to comply with the original audit plan. OIG will be able to prioritize, schedule and execute pending *9/11 commission audits*, according to the timeline established by congress. Funding enables the OIG to design the right mix of contracted and in-house services, without stressing its core oversight functions or assets.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Office of Inspector General
Justification of Proposed Changes in Audit, Inspections, and Investigations
Appropriation Language**

For necessary expenses of the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978 (5 U.S.C. App.), \$144,318,000 of which not to exceed \$300,000 may be used for certain confidential operational expenses, including the payment of informants, to be expended at the direction of the Inspector General.

Explanation of Changes:

No substantive changes proposed.

Explanation:

¹ Includes enacted transfer of \$16.0 million from FEMA Disaster Relief Fund (DRF).

² Includes \$16.0 million to annualize funding levels for Emergency Management Oversight disaster relief activities, which in previous years had been transferred through DRF.

Office of Inspector General (OIG) - OIG is responsible for conducting and supervising audits, investigations and inspections relating to the programs and operations of DHS, recommending ways for the Department to carry out its responsibilities in the most effective, efficient, and economical manner possible. OIG serves as an independent body to deter, identify and address fraud, abuse, mismanagement, and waste in DHS programs and operations.

Summary Justification and Explanation of Changes

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$81,209	\$95,474	\$101,526	\$6,052

Salaries and Benefits includes costs for 676 FTEs. The FY 2012 request includes an increase for 15 new employees, and annualization of 3 additional FTE.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$4,668	\$6,463	\$6,335	(\$128)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request reflects the travel needs for OIG.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Transportation of Things	\$149	\$87	\$77	(\$10)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2012 request reflects the transportation of things need for OIG.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
GSA rent	\$13,954	\$13,915	\$14,187	\$272

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request reflects the anticipated rent related to the 15 new positions.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Other Rent	\$218	\$235	\$225	(\$10)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2012 request reflects the anticipated other rent needs for OIG.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Communication, Utilities, and miscellaneous charges	\$2,718	\$3,405	\$3,411	\$6

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2012 request reflects communication, utilities, and miscellaneous charges related to the 15 new positions.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Printing	\$42	\$288	\$252	(\$36)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2012 request reflects the anticipated printing needs for OIG.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Advisory and Assistance Services	\$4,287	\$1,965	\$1,297	(\$668)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request reflects the anticipated advisory and assistance services need for OIG.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Other Services	\$11,198	\$4,098	\$6,477	\$2,379

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request reflects other services need related to the 15 new investigators positions, and for the *9/11 Commission Audits*.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Purchase from Government Accounts	\$7,904	\$4,359	\$4,420	\$61

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2012 request reflects the anticipated purchase needs related to the 15 new positions.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & maintenance of facilities	\$135	\$139	\$139	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & Maintenance of equipment	\$339	\$423	\$348	(\$75)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2012 request reflects the anticipated operations and maintenance of equipment need for OIG.

Supplies & materials	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
	\$1,103	\$752	\$821	\$69

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request reflects the anticipated purchase of supplies and materials related to the 15 new positions and the *9/11 Commission Audits*.

Equipment	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
	\$3,015	\$5,107	\$4,503	(\$604)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2012 request reflects the anticipated equipment need for OIG.

Land and Structures	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
	1,709	1,010	---	(1,010)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease.

Unvouchered	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
	\$146	\$300	\$300	\$0

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement personnel to informants, which are not subject to detailed vouchering or reporting.

iii. Status of Congressional Requested Studies, Reports, and Evaluations

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2010	10/27/2010	Conference Report 111-298, Title I, p. 55 Senate Report 111-31, Title I, p. 13	LOST AND STOLEN PASSPORTS The Committee is concerned that the Department of Homeland Security has not taken all appropriate steps to interrupt terrorist and criminal travel through international border crossings. The Committee is aware that the Department currently tracks and reports on lost and stolen passports through the Forensic Document Laboratory and the Fraudulent Document Analysis Unit. The Committee directs the Secretary to submit a semiannual report to the Committees on Appropriations of the Senate and House of Representatives, the Committees on the Judiciary of the Senate and the House of Representatives, the Senate Committee on Homeland Security and Governmental Affairs, and the House of Representatives Committee on Homeland Security on the number of all lost and stolen passports reported to the Department, a detailed breakdown by issuing country, and the number intercepted by the Department at ports of entry. Also, the report should provide an analysis of any trends regarding lost and stolen passports.	Report is being reviewed in DHS.
2010	11/30/2010	Conference Report 111-298, Title II, p. 66 Senate Amendment HR 2892, Title II, p. 34	ANTIDUMPING AND COUNTERVAILING DUTY ENFORCEMENT The conferees have ensured that, within the amounts provided for in this account, there will be sufficient funds to administer the on-going requirements of section 754 of the Tariff Act of 1930 (19 U.S.C. 1675c), referenced in subtitle F of title VII of the Deficit Reduction Act of 2005 (Public Law 109-171, Stat. 154). The conferees direct CBP to continue to work with the Departments of Commerce and Treasury, and the Office of the United States Trade Representative (and all other relevant agencies) to increase collections, and to provide a public report on an annual basis, within 30 days of each year's distributions under the law. The report should summarize CBP's efforts to collect past due amounts and increase current collections, particularly with respect to cases involving unfairly traded U.S. imports from China. The report shall provide the amount of uncollected duties for each antidumping and countervailing duty order, and indicate the amount of open, unpaid bills for each such order. In that report, the Secretary, in consultation with the other relevant agencies, including the Secretaries of Commerce and Treasury, should also advise as to whether CBP can adjust its bonding requirements to further protect revenue without violating U.S. law or international obligations, and without imposing unreasonable costs upon importers. The conferees further direct the Secretary to work with the Secretary of Commerce to identify opportunities for the Department of Commerce to improve the timeliness, accuracy, and clarity of liquidation instructions sent to CBP. Increased attention and interagency coordination in these areas could help ensure that steps in the collection of duties are completed in a more expeditious manner.	Report is being drafted in CBP.
2008	12/24/2010	FY 2008 Omnibus Appropriations 110-497, Section 605	SEC. 605. PORT OF ENTRY TECHNOLOGY DEMONSTRATION PROGRAM. Not later than 1 year after the date of the enactment of this Act, and annually thereafter, the Secretary shall submit to the Committees on Appropriations of the Senate and the House of Representatives, the Senate Committee on Environment and Public Works, the Senate Committee on Homeland Security and Governmental Affairs, the House Committee on Transportation and Infrastructure, and the House Committee on Homeland Security a report on the activities carried out at each demonstration site under the technology demonstration program established under this section. The report shall include an assessment by the Commissioner of the feasibility of incorporating any demonstrated technology for use throughout U.S. Customs and Border Protection.	Report is being reviewed in CBP.
2008	1/31/2011	FY 2008 Omnibus Appropriations 110-497, Section 603 and 604	SEC. 603. PORT OF ENTRY INFRASTRUCTURE ASSESSMENT STUDY. Not later than January 31 of every other year, the Commissioner, in consultation with the Administrator of General Services shall: review the Port of Entry Infrastructure Assessment Study prepared by the U.S. Customs Service, the INS and the GSA and the nationwide strategy to prioritize and address the infrastructure needs at the land ports of entry prepared by DHS and GSA; update the assessment of the infrastructure needs of all United States land ports of entry; and submit an updated assessment of land port of entry infrastructure needs to Congress. SEC. 604. NATIONAL LAND BORDER SECURITY PLAN. Not later than January 31 of every other year, the Secretary, acting through the Commissioner, shall prepare a National Land Border Security Plan. In preparing the plan required, the Commissioner shall consult with other appropriate Federal agencies, State and local law enforcement agencies, and private entities that are involved in international trade across the northern or southern border. The plan shall include a vulnerability, risk, and threat assessment of each port of entry located on the northern border or the southern border. The Secretary, acting through the Commissioner, may establish one or more port security coordinators at each port of entry located on the northern border or the southern border to assist in conducting a vulnerability assessment at such port and to provide other assistance with the preparation of the plan. The plan shall include a description of activities undertaken during the previous year as part of the Secure Border Initiative and actions planned for the coming year as part of the Secure Border Initiative.	Report is being reviewed in CBP.

2009	2/14/2011	Public Law 110-329, HR 2638 Div D, pg 85; House Report 110-862, pg 50; Senate Report 110-396, pg	Annual LPOE Modernization 5-Year Plan (FY 2012 -- FY 2016) That for fiscal year 2010 and thereafter, the annual budget submission of U.S. Customs and Border Protection for 'Construction' shall, in consultation with the General Services Administration, include a detailed 5-year plan for all Federal land border port of entry projects with a yearly update of total projected future funding needs.	Report is being reviewed in CBP.
2010	2/28/2010	Conference Report 111-298, Title II, p. 67 Senate Report 111-31, Title II, p. 36	Conference Report 111-298: AUTOMATION MODERNIZATION ... In addition, CBP is directed to continue submitting quarterly reports to the Committees on progress in implementing ACE. Senate Report 111-31: EXPENDITURE PLAN The Committee is pleased with the level of detail and discipline which has been displayed in recent ACE expenditure plans. The Committee includes bill language making not less than \$167,960,000 available for development of ACE upon the submission of a comprehensive expenditure plan for the program. The Committee also expects to continue receiving the ACE quarterly reports.	ACE Q1 Report is being reviewed in CBP.
2010	3/31/2011	Conference Report 111-298, Title I, p. 56 Senate Report 111-31, Title I, p. 13	BORDER TUNNELS The Committee directs the Department to provide semiannual reports to the Committees on Appropriations of the Senate and the House of Representatives, the Committee on the Judiciary, and the Committee on Homeland Security and Governmental Affairs on the number of [border] tunnels discovered, their location and demolition, all activities undertaken to prosecute individuals under the Border Tunnel Prevention Act, funding requirements, and the progress made in developing and implementing detection methods used to discover new tunnels. Finally, the Committee directs the Department to designate a border tunnel coordinator to manage border tunnel activities, serve as liaison to State and local law enforcement, and advise Congress on border tunnel issues.	Report is being drafted in CBP.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Salaries and expenses:

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

U.S. Customs and Border Protection (CBP) has made and continues to make great strides in securing America's borders while safeguarding trade, international travel and ensuring the vitality of our economy. CBP is responsible for securing, controlling and managing U.S. borders. This includes protecting the sovereign borders of the United States at and between official ports of entry (POE). CBP is on the frontline protecting the American public against terrorists and instruments of terror and protecting economic security by regulating and facilitating the lawful movement of goods and persons across U.S. borders. CBP performs these missions with vigilance, integrity and professionalism.

CBP ensures all persons and cargo enter the United States legally and safely through CBP's official POEs. CBP officers prevent cross-border smuggling of contraband such as controlled substances, weapons of mass destruction and illegal or diseased plants and animals. CBP ensures that travelers and immigrants present appropriate approved documentation. On a typical day, CBP officers and Agriculture Specialists process more than 1 million international travelers and 60,000 cargo containers before they enter the country. CBP also strives to prevent the illegal export of U.S. currency or other monetary instruments, stolen goods such as vehicles and other illegal items.

CBP has a dual mission: to prevent terrorists and their weapons of mass destruction from entering the U.S. and to facilitate legitimate trade and travel while securing the global trade environment. CBP has found that by using a combination of advanced information, risk assessment, appropriate scanning and other technologies, and by partnering with Federal, state, local, tribal and foreign law enforcement agencies as well as private industry and international partners, these goals need not be mutually exclusive.

In support of this dual mission, CBP has instituted various programs and initiatives such as the Alliance to Combat Transnational Threats, also known as the "Arizona Surge"; a comprehensive multi-year plan to secure America's borders and reduce illegal migration; the Container Security Initiative, a program designed to help increase security for containerized cargo shipped to the United States from around the world and the Customs-Trade Partnership Against Terrorism, a joint government-business initiative to build cooperative relationships that strengthen overall supply chain and border security.

CBP's primary field occupations consist of CBP officers including import, entry and agriculture specialists, Border Patrol agents, Office of Air and Marine pilots, and marine agents. Its field organization is focused around 20 Border Patrol Sectors with 34 Border Patrol checkpoints and 93 tactical checkpoints between the POEs, 143 stations and substations. Port security is maintained at 20 field offices and 331 associated POEs, of which 15 are pre-clearance stations outside the United States. Personnel use a mix of non-intrusive technology such as large-scale X-rays and Radiation Portal Monitors, targeting systems, air and marine assets, and other forms of automation to ensure the

identification and apprehension of high-risk travelers and cargo and the facilitation of legitimate traffic into the United States. America's frontline border agency employs approximately 61,000 highly trained and professional personnel equipped with the latest homeland security technologies.

Mission Statement

We are the guardians of our Nation's borders.

We are America's frontline.

We safeguard the American homeland at and beyond our borders.

We protect the American public against terrorists and the instruments of terror.

We steadfastly enforce the laws of the United States while fostering our Nation's economic security through lawful international trade and travel.

We serve the American public with vigilance, integrity, and professionalism.

Core Values

Vigilance: Vigilance is how we ensure the safety of all Americans. We are continuously watchful and alert to detect, deter, and prevent threats to our Nation. We demonstrate courage and valor in the protection of our Nation.

Service to Country: Service to Country is embodied in the work we do. We are dedicated to defending and upholding the Constitution of the United States. The American people have entrusted us to protect the homeland and defend liberty.

Integrity: Integrity is our cornerstone. We are guided by the highest ethical and moral principles. Our actions bring honor to our agency and ourselves.

B. Budget Activities:

Headquarter Management and Administration

Headquarters Management and Administration provides critical policy and operational direction, mission support, including equipment, training, and technical expertise to CBP frontline personnel.

Border Security Inspections and Trade Facilitation at the Ports of Entry

The Inspections, Trade, and Travel Facilitation at the Ports of Entry program facilitates the flow of legitimate travel and trade across U.S. borders while ensuring that threats to the United States are not allowed entry. CBP accomplishes this by using technology, intelligence, risk information, targeting, and international cooperation in the screening of entering international cargo and travelers and departing export cargo and in targeted border areas, outbound activities. This program reduces the potential of terrorists' instruments of terror and contraband from entering the U.S. while facilitating the legal flow of people and trade by deploying CBP officers to the POEs. Additional attention to outbound travel along areas of the Southwest border also helps prevent the exit of money and weapons for illegal purposes. The goal of this program is to improve compliance with trade regulations and other mandatory import/export guidance while protecting the U.S. CBP has extended its zone of security beyond its physical borders through the use of bilateral and private-sector partnerships, targeting, and scrutinizing advance information on people and products coming into this country. CBP is cultivating "smart borders" through the use of technology, has established a layered defense strategy, and has created a unified, recognizable presence at the border to combine and capitalize on the authorities and skills of our diverse workforce.

Border Security and Control Between the Ports of Entry

The primary purpose of the Border Security and Control Between the Ports of Entry program is to establish and maintain effective control of U.S. borders by detecting, responding to, and interdicting border penetrations. A national strategy that consists of five objectives has been established to achieve the mission of this program: (1) Establish a substantial probability of apprehending terrorists and their weapons as they attempt to enter illegally between the POEs; (2) Deter illegal entries through improved enforcement; (3) Detect, apprehend, and deter smugglers of humans, drugs and other contraband; (4) Leverage Smart Border Technology to multiply the effect of enforcement personnel; and (5) Reduce crime in border communities and consequently improve the quality of life and economic vitality of targeted areas. The National Border Patrol Strategy requires increasing national security by augmenting enforcement resources along the Northern and Southwest Border. The proper balance in the deployment of personnel, equipment, intelligence, support, technology, and infrastructure is critical to border security. Reducing vulnerability to the entry of terrorists, illegal aliens and drugs by increasing personnel and resources, is the key to the successful implementation of this strategy.

CBP Air and Marine – Salaries

CBP Air and Marine Salaries support a staff of approximately 1,900 Air Interdiction agents/pilots, Marine Enforcement officers, operational support, and administrative positions. It provides funding to enhance skills and expertise to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the U.S.

C. Budget Request Summary:

CBP Salaries and Expense requests 51,770 positions, 51,590 FTEs, and \$8,725,555,000 for FY 2012. Program changes include an increase of 414 positions and 234 FTEs:

Program Increases

Data Center Migration - The \$33.385 million increase will provide funding for Department of Homeland Security (DHS) Data Center Consolidation. This increase supports the continuation of DHS efforts to migrate Component systems and applications to the two DHS Enterprise Data Centers. The Data Center consolidation efforts will standardize information technology (IT) resource acquisitions across Components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency.

Enhancement to Conduct and Integrity – The \$25.939 million increase is requested for polygraphs, background investigations and periodic re-investigations and other aspects of CBP's integrity programs. The increase will ensure CBP is able to exercise integrity oversight authority for CBP operations, personnel, facilities, as well as address the growing threats posed by Foreign Intelligence Services, terrorists, and foreign criminal organizations.

National Targeting Center-Passenger (NTC-P) -The increase of \$19.7 million (33 FTE) for the NTC-P will be used to hire additional staff, relocate existing staff and implement additional improvements in the targeting priorities and methodologies.

Expansion to Staff New POEs/Enhance POE Operations (Canine) - The increase of \$43.1 million (182 FTE) will allow CBP to fund CBP officers (CBPOs) to staff new and expanded POEs and would fund canine assets. The additional CBP officers will enhance CBP's ability to process legitimate travelers and cargo, reducing wait times at the expanded POE's. Working in tandem, the additional CBP officers and canines will increase our enforcement capabilities to prevent the entry of unlawful people and contraband.

Immigration Advisory Program (IAP) - The increase of \$7.5 million (6 FTE) will allow CBP to hire 11 CBP officers to expand the IAP in Paris, Abu Dhabi, Dubai and Amman. IAP is a part of CBP's layered risk-based approach to prevent terrorists from boarding commercial aircraft destined for the U.S., and reduce the number of improperly documented passengers traveling from or through a country to the U.S. Since its inception IAP has saved CBP \$17,419,115 in processing costs and saved airlines \$19,144,210 in immigration enforcement fines.

Global Supply Chain Security Strategy- The increase of \$7.5 million will allow CBP to conduct cargo screening pilot(s) to assess alternatives to the 100 percent maritime cargo scanning as mandated by the Security and Accountability for Every Port Act (P.L. 109-347; SAFE Port Act). Alternatives to 100 percent scanning extend the zone of security beyond the physical borders, strengthen global supply chain security, and enhance CBP's multi-layered security strategy.

Acquisition Workforce - In support of the administration's emphasis on strengthening the Federal acquisition workforce, CBP requests \$3.452 million (13 FTE) in FY 2012 to increase its acquisition workforce capacity and capabilities. The increase will mitigate the risks associated with gaps in either capacity or capability of the acquisition workforce and improve its effectiveness.

Program Decreases

CBP made a number of internal realignments and reductions in order to fully support the staffing level that has been achieved for all of the frontline officers and agents. The salaries and benefit cost across CBP has been rising at a rate higher than general inflation because of the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the low attrition rates; and an increased cost in workforce benefits, such as retirement and healthcare. These reductions/realignments include:

OFO Mission Support Reduction – To achieve a reduction of \$20 million, the Office of Field Operations (OFO) will cut mission support costs involving travel, training, contractual services and the acquisition of supplies that directly support CBP.

Professional Services Initiative - CBP is taking \$10.1 million in reductions associated with a department-wide initiative to curb non-essential professional service contract spending. Professional services contracts include a wide variety of services many of which deliver essential capabilities and services not resident in the CBP workforce. Many of these reductions will be achieved through delayed, deferred or forgone activities.

Pay Reform

Reform of CBP's personnel system is needed to address waste and other inefficiencies that resulted from the merger of employees from three different agencies into CBP. Prior to the establishment of DHS, these agencies had their own overtime systems and policies and the continuation of these different pay and benefit systems and policies hinders CBP's ability to integrate their workforce. CBP needs a uniform system that meets the agency's critical mission and encourages mobility across organizations. CBP proposes a uniform overtime system for its frontline enforcement officers that promotes efficiency while valuing the time and inconvenience to employees when overtime is needed to meet the Agency's critical mission. The standardization of CBP's overtime pay systems is necessary to achieve our mission integration objective. In order to effectively achieve this goal, CBP has drafted legislative changes in law. The legislation also brings all Law Enforcement Officer and Enhanced Customs and Border Protection Officer positions into the same retirement system and is projected to save approximately \$65 million. The proposed legislative language will be sent with the 2012 Budget.

Mission Support Funding Consolidation

Within the FY 2012 Salaries & Expenses President's Budget submission, CBP transferred funding in an effort to consolidate mission support funding across all CBP PPAs into the Headquarters Management and Administration PPAs. This includes human resource management, conduct and

integrity, information technology, administration, executive and business support and training. This effort was completed in order to better reflect where funding is being executed by function. The funding was previously being utilized to support mission offices and in the revised PPA alignment will continue to be utilized in support of the mission offices. This makes business sense because it will allow our mission support offices to operate more efficiently.

Within the Salaries & Expenses Appropriation, all of the Office of Technology funding, the Internal Affairs and finally the National Program funding for Human Resource Management will be consolidated within the Headquarters Management and Administration PPA. These cross organizational programs within Salaries & Expenses will no longer be funded out of multiple PPAs.

2012 Program Change	13	7	46,094
2012 Total Request	2,083	2,080	688,878

CBP requests \$688.878 million for Headquarters Management and Administration – At the Ports.
The request includes:

- Increase for the transfer of \$154.278 million for the consolidation of mission support funding across all CBP PPAs into Management and Administration and Training PPAs. This includes human resource management, conduct and integrity, information technology, administration, executive and business support and training. This transfer better reflects where funding is being executed by function.
- Increase of \$16.692 million for the FY 2012 Data Center Migration enhancements.
- Increase of \$14.853 million for OFO positions to staff new POEs.
- Increase of \$10.635 million to enhance conduct and integrity programs and ensure CBP’s workforce is properly vetted and cleared.
- Increase of \$4.022 million for annualization of 250 CBP officers for the FY 2010 Border Security Supplemental.
- Increase of \$2.638 million for the NTC-P Program.
- Increase of \$2.214 million for annualization for the FY2010 Border Security Supplemental – Integrity and Background Investigations.
- Increase of \$1.692 million for Enhancement to CBP Acquisition Workforce.
- Increase of \$836 thousand for new Field Operations canines to staff at POEs.
- Increase for transfer from BSFIT of \$430 thousand for additional legal services.

- Increase of \$1 thousand for Immigration Advisory Program.
- Decrease of \$13.527 million for the government-wide initiative to reduce administrative costs known as the Administrative Savings Initiative as well as reductions from the Efficiency Review.
- Decrease of \$13.300 million to terminate the one-time costs associated from the FY 2011 Data Center Migration enhancement.
- Decrease for transfer of \$9.456 million from the Facilities staff to the Construction and Facilities Management account.
- Decrease of \$2.059 million for the annualization of the President's initiative to freeze federal pay at the FY 2010 levels.
- Decrease of \$1.253 million for the DHS-wide decrease in Professional Services contracts to achieve efficiencies and apply savings towards the highest priority requirements.
- Decrease of \$393 thousand as a Technical Adjustment to the FY 2011 base.

Note: *Goals and accomplishments associated with the M&A, Border Security Inspections and Trade Facilitation PPA are included with the M&A, Border Security and Control between the Ports of Entry PPA.*

CBP requests \$738.462 million for Headquarters Management and Administration – Between the Ports. The request includes:

- Increase for the transfer of \$224.441 million for the consolidation of mission support funding across all CBP PPAs into Management and Administration and Training PPAs. This includes human resource management, conduct and integrity, information technology, administration, executive and business support and training. This transfer better reflects where funding is being executed by function.
- Increase of \$27.117 million due to annualization for FY 2010 Border Security Supplemental—1,000 Border Patrol agents.
- Increase of \$16.693 million for the FY 2012 Data Center Migration enhancements.
- Increase of \$15.304 million to enhance conduct and integrity programs and ensure CBP’s workforce is properly vetted and cleared.
- Increase of \$2.313 million for annualization of FY 2010 Border Security Supplemental—Integrity and Background Investigations.
- Increase of \$1.760 million for Enhancement to CBP Acquisition Workforce
- Increase of \$1.525 million for annualization of the FY 2010 Border Security Supplemental—UAS.
- Increase for transfer of \$618 thousand for legal support from Border Security Fencing Infrastructure and Technology (BSFIT) to Salaries and Expenses (S&E).
- Decrease of \$13.963 million for the government-wide initiative to reduce administrative costs known as the Administrative Savings Initiative as well as reductions from the Efficiency Review.
- Decrease for transfer of \$13.608 million for Office of Administration, Facilities Management and Engineering staff to Facilities.

- Decrease of \$13.300 million to terminate the one-time costs associated with the FY 2011 Data Center Migration enhancement.
- Decrease of \$2.307 million for the annualization of the President's initiative to freeze federal pay at the FY 2010 levels.
- Decrease of \$2.183 million as a Technical Adjustment to the FY 2011 base.
- Decrease of \$1.373 million for the DHS-wide decrease in Professional Services contracts to achieve efficiencies and apply savings towards the highest priority requirements.

CURRENT SERVICES PROGRAM DESCRIPTION:

Headquarters Management and Administration provides critical policy and operational direction, mission support, and technical expertise to CBP front-line personnel. This program is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

Headquarters Management and Administration is comprised of two main groupings: "Policy, Direction and Human Capital," and "Technology and National Support."

Policy, Direction and Human Capital

Office of the Commissioner

The Office of the Commissioner includes the Commissioner's direct staff and four offices; the Office of Chief Counsel, the Office of Trade Relations, the Office of Policy and Planning, and the Office of Diversity and Civil Rights.

Office of Chief Counsel

The Chief Counsel is the chief legal officer of CBP and reports to the General Counsel of the Department of Homeland Security through the Deputy General Counsel. The Chief Counsel serves as the Ethics Officer for the organization and is the principal legal advisor to the Commissioner of CBP and its officers. The Office of the Chief Counsel provides legal advice to, and legal representation of, CBP officers in matters relating to the activities and functions of CBP. The office is also responsible for reviewing proposed actions to ensure compliance with legal requirements, preparing formal legal opinions, preparing or reviewing responses in all court actions, civil or criminal, involving CBP, and developing, implementing, and evaluating nationwide programs, policies, and procedures within its functional areas. The Office of the Chief Counsel has both a Headquarters and a field structure. The Headquarters office is located in Washington, D.C. and its activities are divided broadly into three functional areas under the supervision of Associate Chief Counsels: Ethics, Labor and Employment; Enforcement; and Trade and Finance. The field structure consists of Associate and Assistant Chief Counsels located in major cities across the United States who advise CBP field managers in their geographic areas.

Office of Trade Relations

The Office of Trade Relations (OTR) is responsible for ensuring that accurate, timely, and consistent information is provided to the international trade community on CBP trade policy, as established by CBP. The Director is the Designated Federal Officer (DFO) for the Commercial Operations Advisory Committee of U.S. Customs and Border Protection (COAC). As such, OTR is responsible for

managing CBP's engagement with COAC and supporting the Commissioner in performing his duties as Co-Chair of the COAC. OTR determines the best, most effective and most efficient means of communicating policy matters to the trade community. OTR is responsible for organizing and presenting formal CBP outreach efforts to the trade community, such as the annual Trade Symposium. OTR is the primary point of contact for the international trade community (importers, exporters, carriers, customhouse brokers, forwarders, bond providers, trade associations and financial institutions) for resolution of issues that could not be resolved at the local level or by another Headquarters function.

Office of Policy and Planning (OPP)

The Office of Policy and Planning provides leadership, direction, and advice regarding CBP's overall policy development and implementation; assists and works on behalf of the Commissioner and Deputy Commissioner in defining and advancing CBP priorities through the effective development, review, and implementation of key policy initiatives in coordination with other CBP offices, DHS, and other governmental agencies. OPP serves as the principle advisor to the Commissioner and other senior officials on CBP's strategic planning and, in coordination with Office of Administration and Office of Information and Technology, on the integration of strategic-level planning and performance with resource allocation. OPP has developed and is responsible for implementing CBP's Strategic Management Framework (SMF), which is intended to fully integrate CBP's investment, resource and program management process and ensure that resources are used to maximize the return on investment on CBP's mission focused goals.

Office of Diversity and Civil Rights (DCR)

The Office of Diversity and Civil Rights (DCR), formerly the Office of Equal Opportunity, is responsible for ensuring diversity and inclusion, and compliance with civil rights and civil liberties statutes, regulations and policies. DCR provides leadership input in the formulation, implementation and evaluation of CBP's policies and programs in these aforementioned areas. In addition, DCR ensures diversity and inclusion in all CBP programs and activities; processes complaints of discrimination filed by applicants and employees; and allegations of civil liberties violations by members of the trade and traveling public and individuals detailed for law enforcement purposes.

Office of Intelligence and Operations Coordination (OIOC)

The Office of Intelligence and Operations Coordination (OIOC) collects, analyzes and disseminates intelligence in support of CBP missions, coordinates intelligence-driven special operations that requires collaboration between CBP offices and enhances CBP targeting efforts by facilitating targeting rules development and maintaining the Automated Targeting System. Through its three divisions (Intelligence & Situational Awareness, Automation & Targeting, and Mission Support), OIOC ensures that intelligence serves CBP operators, links closely with targeting and analysis efforts, and informs CBP leaders so that they can make the decisions.

OIOC provides CBP decision-makers with total situational awareness and facilitates operational responses for all crimes, threats, and hazards throughout the CBP area of responsibility. The office develops and disseminates common operating and intelligence pictures at all levels of decision-making and coordinates cross-organizational operations as well as CBP operations involving non-CBP elements. OIOC also conducts risk assessments of the large volume of regulatory and commercial data generated by commercial entities, states and other government agencies by verifying the identity of

businesses, cargo, and persons crossing our borders and identifying or eliminating risks in that cargo or passenger travel to or from the U.S. This allows CBP to facilitate the flow of legitimate passengers and cargo and the capability to detect and prevent terrorist threats. Finally, OIOC integrates all relevant operational, intelligence, targeting, and information sharing data, processes, mechanisms and programs.

Offices of Internal Affairs (IA)

The Office of Internal Affairs exercises oversight authority for all aspects of CBP operations, personnel, facilities, and the counterintelligence program, to include cyber security. IA's mission is to promote the integrity and security of the CBP workforce. IA performs and manages a wide variety of functions or programs comprising seven divisions: Personnel Security, Investigative Operations, Integrity Programs, Credibility Assessment, Operational Field Testing, Security Management, and Management Inspections.

IA conducts investigations of alleged criminal and serious non-criminal misconduct on the part of CBP employees. The office coordinates its internal investigative activity with DHS Office of Inspector General (OIG), U.S. Immigration and Customs Enforcement's Office of Professional Responsibility (ICEOPR), the Federal Bureau of Investigations (FBI) and numerous other Federal, state and local law enforcement authorities.

IA's Conduct and Integrity Oversight Initiative supports the Commissioner's objectives to strengthen employee and integrity assurance; implement a proactive anti-corruption investigative program within CBP; and ensure that allegations are investigated thoroughly, objectively and in a timely manner by CBP Special agents. Prior to establishing its own investigative cadre, CBP routinely received investigative reports from outside agencies that were over two years old. Now, CBP has implemented a 90 – 120 day goal for completing of misconduct investigations that are assigned to CBP Special agents.

CBP has implemented a Comprehensive Integrity Strategy, which integrates prevention, detection, and investigation capabilities to deter and respond to corruption and serious misconduct in the CBP workforce. The Comprehensive Integrity Strategy employs improved personnel security screening of prospective CBP employees, as well as polygraph examinations of certain law enforcement candidates, application of behavioral and analytical research tools to identify integrity indicators of corruption, and an intelligence-driven investigative response to integrity events. The Integrity Program Division conducts research (data) and analysis (behavior) designed to detect corruption, develops data/intelligence to drive the focus of integrity investigations, and applies "Insider Threat" methodologies for advanced detection of integrity threats.

Office of International Trade (OT)

The Office of International Trade (OT) is responsible for developing the national CBP trade policy and programs that facilitate legitimate trade and enforce trade laws. OT is able to leverage a diverse array of skill sets to develop a comprehensive trade strategy and action plans, focused on results-driven strategic initiatives addressing trade facilitation, administration and enforcement issues. By promoting trade facilitation through partnership programs, OT streamlines the flow of legitimate shipments and fosters corporate self-governance as a means of achieving compliance with trade laws and regulations. OT also directs national enforcement responses through effective targeting of goods crossing the

border as well as strict, swift punitive actions against companies participating in predatory trade practices, including textile transshipment and intellectual property rights (IPR) infringement. OT is the single source of trade related data for the agency and as such constructs large-scale trade data collection efforts, develops risk models, and monitors agency performance for a variety of critical program areas. A risk-based approach is used to conduct audits to assess compliance with trade laws and regulations. The audit function also supports trade facilitation, conducts supply chain security observations and responds to allegations of commercial fraud. OT provides the legal tools such as all regulation issuances, Federal Register notices, binding rulings and decisions, and informed compliance publications, to support and promote facilitation and enforcement of the United States trade and border security requirements. OT is also the business process owner for the development of entry summary functionality in the Automated Commercial Environment (ACE), CBP's automated trade system. OT has the lead in the modernization of trade policies, processes and procedures that will enable CBP to address the continuously changing trade environment.

Office of Human Resources (HRM)

The Office of Human Resources provides centralized human resources support to over 61,000 CBP employees. HRM is responsible for ensuring effective delivery of the following services: recruiting, providing employee services and benefits, processing personnel actions, improving business processes, and facilitating workforce effectiveness. HRM promotes and enables mission accomplishments through human capital planning and utilization, strategic leadership with regard to CBP employees, labor-management relations, training and employee safety.

Office of Training and Development (OTD)

The Office of Training and Development leads and directs CBP training programs. OTD ensures that all training efforts support the CBP mission and strategic goals, meet the needs of a diverse and geographically dispersed workforce, and contribute to measurable outcomes and results. OTD establishes standards for designing, developing, delivering, and evaluating training. The office directly executes career development programs; basic and advanced training to all occupations; and supervisory, management, and executive development programs via the annual agency-wide training plan.

As CBP's hub for centralized leadership programs and direction of all CBP training programs, OTD promotes achievement and a results-driven culture through effective operational and mission support training efforts and a strong leadership curriculum. OTD prepares employees to carry out the core missions of CBP and continues to evolve to meet the needs of the Department of Homeland Security. By working with all CBP components to develop and deliver mission critical training, OTD prepares employees to protect America's frontline. OTD links to CBP's strategic goals to shape the knowledge of agency employees and instill a law enforcement ethic that prepares them for the ever changing challenges of the field.

OTD addresses critical challenges of the CBP operating environment by focusing on consolidating information technology systems, achieving operational integration by developing a unified approach for CBP training, and developing a more robust evaluation and assessment process to measure training effectiveness and identify weaknesses.

Office of Congressional Affairs (OCA)

The Office of Congressional Affairs (OCA) acts as a conduit between DHS, CBP's internal components, and Congress. OCA performs the vital work of advancing CBP's core mission priorities in the legislative arena by facilitating effective and timely information exchange and analysis between its stakeholders in three critical areas: Enforcement, Trade and Agriculture, and Appropriations and Management.

Office of Public Affairs (OPA)

The Office of Public Affairs is responsible for communicating information regarding CBP's mission, regulations, accomplishments and challenges of securing America's borders. OPA disseminates timely, accurate, uniform and consistent information to the public as well as CBP employees, oversees the agency's media relations, public engagement, social media, branding, publications, still and video imagery production and web communications efforts. Additionally, OPA oversees the CBP History program and the CBP Info Center, which is responsible for responding to public inquiries and complaints.

Technology and National Support

Office of Information and Technology (OIT)

The Office of Information and Technology provides integrated, comprehensive technical support to carry out the mission of CBP, as well as the Department of Homeland Security. OIT is responsible for developing, acquiring, testing, and maintaining existing technology and engineering new technology solutions; for managing the CBP Modernization Program; for overseeing the forensic and scientific analyses in the CBP laboratory system; for designing, developing, maintaining and training personnel on CBP's automated systems; for overseeing the tactical wireless radio program; and for ensuring the reliable performance of our infrastructure. OIT also manages the computer security program; establishes automated interfaces between CBP, trade participants, and other government agencies; and provides reference library and electronic information resources.

OIT supports business processes with the design, development, programming, testing, implementation, training, and maintenance of CBP automated systems. OIT is responsible for the management of all CBP computer facilities and systems including the hardware, software, data, video and voice communications, and related financial resources as well as identifying and evaluating new technologies for application in support of CBP business processes.

OIT establishes requirements for computer-to-computer interfaces between CBP and various trade groups and government agencies. OIT represents CBP on matters related to automated import, export and interagency processing and systems development and provides centralized research, development, test, evaluation, acquisition, training, and maintenance services in support of enforcement and inspection technology for CBP process owners and core strategies. OIT also ensures the coordination of applied technology programs with other domestic and international law enforcement agencies and represents CBP on matters related to applied technology development. OIT provides direct technology assistance in support of operational field activities.

OIT directly supports the CBP Chief Information Officer (CIO) functions and is responsible for management, budget, and planning reviews impacting information technology programs. The office

serves as the scientific and technical arm of CBP and is responsible for management of the CBP laboratory system and providing scientific and technical opinions and sample analysis reports to CBP officers.

Office of Administration (OA)

The Office of Administration provides a multitude of mission-support products and services that enable CBP's operational personnel and other business partners to succeed at CBP's mission, as well as promoting the prudent use of agency resources. OA delivers services through customer involvement and modern, integrated financial systems in support of CBP's goal of developing and promoting more effective and efficient methods to obtain and manage financial data, resources, and capital assets, consistent with the needs of customers and stakeholders. OA provides financial management services, including budgeting, accounting, and investment analysis. In addition, OA is responsible for acquiring and effectively managing the assets needed to accomplish CBP's frontline mission. This is done in a manner that incorporates the development, implementation and sustainment of effective program management, acquisition excellence, and business transformation processes across CBP. This includes centralized requirements, planning and implementation of CBP's mail, uniform, personal property and fleet management programs. It also includes a consolidated facilities program account which allows the agency to strategically and consistently manage its complex facilities portfolio and operations and maintenance, including management of General Services Administration (GSA) rent costs.

CBP's FY 2010 accomplishments include:

- Opened the Tucson Intelligence Operations Coordination Center and stood up the Detroit Intelligence Coordination Team.
- Developed hiring plans and recruitment strategies for CBP to fill key occupations and improve diversity representation.
- Launched online Training and Learning Center which aligns journey, management and executive level career paths with educational, reading, and training resources to help employees remain current in their skills and support career growth.
- Launched a unified CBP Canine Program by incorporating best practices in canine training, instructor development, procurement, facilities management, breeding, veterinary care, and peer support.
- Received and processed more than 6,100 allegations of criminal corruption and non-criminal misconduct lodged against CBP employees. Initiated and investigated more than 700 investigations and closed more than 500 cases involving allegations of criminal and serious misconduct on the part of CBP employees.
- Provided operations and maintenance (O&M) of non-intrusive inspection (NII) large-scale X-ray and gamma-ray imaging systems currently deployed to our nation's land, sea and air POEs, as well as a variety of portable and handheld technologies, to include radiation detection technology.
- Provided integrated, comprehensive technical information technology (IT) data, voice, and wireless support to CBP's more than 60,000 users, ensuring that mission critical systems and information is continually available to CBP's front line personnel.
- Maintained eight (8) accredited forensics labs supporting 400 samples daily.
- Acquired more than 5,294 vehicles for use across CBP.

- Improved organizational efficiency by conducting two assessments of business practices in contract management and labor and employee relations at field sites-resulting in re-negotiations of existing IT contracts to achieve savings, and redistributing servicing assignments for field personnel to reduce travel costs.
- Completed 189 covert operational assessments, initiated the research and analysis of 417 projects and conducted 2,000 applicant screening polygraph examinations.
- Deployed CBP's first foreign intelligence liaison officer to the Secretaria de Seguridad Publica in Mexico City.
- Implemented initial operating capability of passenger simulation environment to improve passenger targeting.
- Procured \$3.5 billion of goods and services on over 273,000 actions.
- Reverse auctioned \$137 million of goods on 1,295 buys with a savings of \$16.2 million small business awards with reverse auctioning totaling \$121.2 million.
- Completed annual inventories for 317,000 assets valued at over \$5.2 billion.
- Led the CBP effort for the DHS Efficiency Initiative for the DHS-wide Blanket Purchasing Agreement (BPA) Team encompassing five DHS wide Strategic Sourcing initiatives. CBP estimates approximately \$40.4 million in savings related to travel, printing/publishing, training, and conference planning efficiencies.
- Implemented a CBP Acquisition Goal Achievement Scorecard, which includes a breakdown of goal achievement per Procurement Directorate and per CBP office to allow for increased accountability throughout CBP.

FY 2011 goals include:

- Enhance CBP targeting partnerships with colleagues in the international community enabling joint-development and implementation of processes to identify high-risk travelers and cargo.
- Develop and deploy a CBP Southwest Border Common Intelligence Picture as part of an enhanced intelligence indications and warning capability.
- Continue incorporation of other federal government agency data into Advanced Targeting System (ATS) to ensure real time situational awareness.
- Integrate additional analytical tools into ATS to improve targeting effectiveness.
- Continue Field Infrastructure Modernization and Data Center Migration.
- Ensure deployed NII technologies meet expected operational requirements of CBP.
- Facilitate the review, analysis and implementation of new efficiency topics such as contracting, in-sourcing and facilities management.
- Incorporate new methods for improving the integration of inspection results in the process for evaluating targeting concepts, rules, and lookouts.
- Expand the counterintelligence (CI) scope polygraph capabilities to test CBP employees detailed to high-risk overseas assignments.
- Complete development of and implement a Succession Management Career Development process that engages all CBP management levels to identify individual competencies and establish development plans for employees.
- Continue to refine and augment the CBP Contracting Officer's Technical Representative (COTR) Program targeting implementation of CBP-specific training, better COTR utilization within CBP, and a community of practice to proactively share knowledge and best practices.

- Enhance leadership development training through the development and delivery of a revised first line supervisor training program that instills a CBP leadership mindset/culture curriculum; the development and delivery of a training curriculum for second line supervisors under the Global Borders College; and continued delivery of Senior Executive Service (SES) and senior supervisory training programs to meet CBP's succession management requirements.
- Continue the development of strategic-level performance measures for CBP that align with DHS mission, goals and objectives as outlined in the Quadrennial Homeland Security Review, and provide greater insight into the impacts CBP investments have on operational performance.
- Establish and implement the DHS Balanced Workforce Strategy initiative which will include a robust process used to evaluate the work done by Federal employees and contractors. It will be used to assess the appropriate mix of Federal employees and contractors necessary to successfully achieve and sustain CBP missions.

CBP's FY 2012 goals include:

- Improve CBP intelligence officer professional development at the mid- and senior-levels.
- Improve performance integration and accountability by improving the use of performance measure information in key CBP business processes, fully integrating the Performance Management Framework into risk management, strategic planning, and resource allocation decision-making processes.
- Address critical challenges with the CBP operating environment, focusing on updating and consolidating courses and systems to allow more effective management of external inquiries, to enhance training efficiency and ensure that all training efforts meet CBP needs.
- Continue to build an infrastructure to streamline and re-engineer processes, create learning environments, and leverage its technology to provide better support to our staff and stakeholders.
- Continue to provide integrated, comprehensive technical IT data, voice, wireless, and support to CBP's more than 60,000 users, ensuring that mission critical systems and information is continuously available to CBP's frontline personnel.
- Conduct more than 4,000 applicant screening polygraph examinations while continuing to support the CBP Conduct and Integrity (CI) program and investigative missions.
- Ensure deployed NII technologies meet expected operational requirements of CBP.
- Strengthen Procurement Performance Management by completing gap analysis of current versus needed performance measures.
- Continue to develop and refine a Knowledge Management System site for current and potential sourcing initiatives, suggestions, and source items/services awarded by CBP or DHS.

2012 Total Request	-	-	483,749

CBP requests \$483.749 million for Rent. The request includes:

- Increase of \$75.493 million to fund increasing rent requirements as cost, inventory, and functionality of leased spaces increase.
- Increase of \$5.380 million for annualization of positions funded in the FY 2010 Emergency Border Security Supplemental Act and FY 2011 Intellectual Property Rights Enforcement initiative.
- Increase of \$2.303 million for new initiatives and increases including National Targeting Center, additional Field Operations Canine, and the opening of new POEs.
- Decrease of \$1.690 million as a Technical Adjustment to the FY 2011 base.

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP leases a substantial portion of its real property assets through GSA and also by direct lease delegation to non-federal sources. This PPA includes funds to support the rental of facilities, space, buildings, structures, and land along with rent-related building charges and services, including utilities and services provided by the Federal Protective Service (FPS). The Rent PPA supports the Office of Border Patrol, Office of Field Operations, Office of Air and Marine, and the Mission Support activities.

Note: Goals and accomplishments associated with the Rent PPA are included within the Congressional Justification for Construction and Facilities Management Account

- Increase of \$246.922 million as a Technical Adjustment to the FY 2011 base.
- Increase of \$44.407 million to adjust for increased Journeyman implementation and pay costs.
- Increase of \$39.810 million for prior year annualization to maintain 270 CBP officers – FY 2010 Border Security Supplemental.
- Increase of \$26.309 million for prior year annualization for 250 additional CBP officers -- FY 2010 Border Security Supplemental.
- Increase of \$20.692 million for 300 new CBP officers at new and expanded POEs.
- Increase of \$17.304.million for prior year pay annualization (Intellectual Property Rights enforcement, Combating Southbound positions, and additional CBPO staffing funding).
- Increase of \$11.820 million for annualization of 125 CBP officers – FY 2010 War Supplemental Combating Southbound Firearms and Currency Smuggling.
- Increase of \$8.170 million for annualization of 318 CBP officers.
- Increase of \$7.499 million to expand of IAP in four additional overseas locations.
- Increase of \$2.121 million to fund additional canine units at POEs.
- Decrease for the transfer of \$59.716 million for the consolidation of mission support funding across all CBP PPAs into Management and Administration and training PPAs. This includes human resource management, conduct and integrity, information technology, administration, executive and business support and training.
- Decrease for the transfer of \$55.000 million due to a shift from appropriated funding to fee funding in anticipation of additional revenue resulting from the proposed change to the COBRA user fee, which would eliminate the country exemptions for Canada, Mexico, and the Caribbean (please refer to the COBRA User Fee budget justification for more information).

This amount represents half of the estimated increase in revenue collections estimated from lifting the exemption.

- Decrease of \$20.000 million in non-pay mission support costs and a decrease in overtime of \$20.000 million. The funds will be realigned to salaries which are increasing because of the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the low attrition rates; and an increased cost in workforce benefits, such as retirement and healthcare.
- Decrease of \$19.368 million for the annualization of the President's initiative to freeze Federal pay at the FY 2010 levels.
- Decrease of \$5.970 million towards the government-wide initiative to reduce administrative costs known as the Administrative Services Initiative as well as reductions from the Efficiency Review.

CURRENT SERVICES PROGRAM DESCRIPTION:

This PPA supports the OFO Strategic Plan goal to ensure border security, prevent terrorism, strengthen international cooperation, and to expedite legitimate trade and travel.

CBP officers and agriculture specialists are multi-disciplined and perform the full range of inspection, intelligence analysis, examination, and law enforcement activities relating to the arrival and departure of persons, conveyances, and merchandise at POEs. CBP's primary responsibility is to identify potential terrorists and instruments of terror and to perform layered enforcement activities relative to counter-terrorism. These enforcement activities prevent the entry of terrorists and instruments of terror, harmful pests and diseases, illegal drugs and contraband, illegal aliens, and importations/exportations contrary to law and trade agreements, from entering/exiting the United States. CBP personnel enforce the laws and regulations of a broad range of Federal, state, and local agencies, relating to the admissibility of people, cargo, and conveyances.

Specific programs under Border Security Inspections and Trade Facilitation at the POEs are:

Western Hemisphere Travel Initiative (WHTI)

The Western Hemisphere Travel Initiative (WHTI) is the joint Department of State (DOS) and Department of Homeland Security (DHS) initiative implementing a key 9/11 Commission recommendation and the statutory mandates of the Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458; IRTPA). WHTI has established document requirements for travelers entering the United States who were previously exempt, including citizens of the United States and Canada. WHTI Air requirements went into effect in January 2007 and compliance continues to be high—well over 99 percent for U.S. and Canadian citizens. WHTI secure document requirements were successfully implemented on June 1, 2009 at all the Nation's POEs. The compliance rate remains high and continues to increase, averaging over 95 percent since implementation while the compliance rate on the Northern Border is over 98 percent.

In FY 2011, the WHTI program is primarily in a steady state investment (a program containing both acquisition and O&M components). CBP funded O&M at the 41 high volume ports where the WHTI hardware and software technical solution was deployed to ensure the ongoing optimal performance of the program. In an effort to achieve a 100 percent query rate against the national security and law

enforcement watch for all travelers, the WHTI program has reached a national query rate of 94.2 percent (98.9 percent on the Northern Border and 92.1 percent on the Southwest Border). The program has also witnessed steady growth in the use of Radio Frequency Identification (RFID) enabled travel documents with 25.7 percent of all law enforcement queries initiated through such documents.

In addition, CBP's goal is to capitalize on the initial success, foundation and investment of the WHTI program by implementing and expanding innovative technologies and processes to provide efficiencies at the land border. This goal will be attained by adopting an integrated approach that includes:

- Land Border Model Port – radical changes to infrastructure design, processes and technologies
- Pedestrian Reengineering – apply a hybrid WHTI solution to pedestrian processing.
- Outbound Strategy – develop a technical solution to support pulse and surge operations.
- Coordination and extension of WHTI technology to Border Patrol checkpoints.

Electronic System for Travel Authorization (ESTA)

Pursuant to the Implementing Recommendations of the 9/11 Commission Act of 2007 (P.L. 110-53; 9/11 Act), DHS and CBP are required to provide an automated electronic travel authorization process to screen Visa Waiver Program (VWP) travelers prior to their travel to the United States. To fulfill this requirement, CBP, in coordination with the DOS, has developed the Electronic System for Travel Authorization (ESTA), which allows CBP to screen applicants in advance of travel to determine their eligibility to travel to the United States under the VWP.

Originally, 27 nations were members of the VWP, but the program has since expanded to 36 nations. The most recent addition was Greece in April 2010. ESTA gives VWP travelers advanced authorization to travel to the U.S. and allows CBP to pre-screen VWP travelers, providing another tool for CBP to further secure U.S. borders by pushing the zone of security outward.

CBP has received almost 30 million applications, with an ESTA denial rate of approximately 0.30 percent. CBP began enforced compliance of the ESTA program, which has resulted in a 98 percent compliance rate. With the ESTA data and the Advanced Passenger Information provided by the airlines, CBP has been able to automate the collection of form I-94W data, resulting in a significant reduction in the use of the paper form, and provide electronic information available immediately. The \$14 for each ESTA authorization (\$10 for the Travel Promotion Act (P.L. 111-145) fee for the Commerce Department and \$4 for ESTA processing) went into effect, through an interim final rule published in the Federal Register, on Sept. 8, 2010.

Outbound Programs Division

To address the escalating violence in Mexico and to increase outbound operations throughout the United States, CBP created the Outbound Programs Division in March 2009. This division oversees current outbound operations and develops OFO's long-term national outbound strategy.

The Outbound Programs Division creates plans that:

- stem the illegal flow of firearms and currency out of the United States;
- increase the interdictions of stolen vehicles and fugitives who are attempting to flee the country; and
- augment the compliance of the Nation's export laws.

The Outbound Programs Division works to ensure that various layers of security are strengthened. These efforts include ensuring that CBP officers are trained to conduct outbound operations; CBP possesses adequate outbound facilities, equipment, and technology; CBP is working with international and other government law enforcement agencies; and CBP officers have adequate automated targeting assistance to identify violators. The Outbound Programs Division oversees outbound operations at all POEs, including land crossings, airports, international mail and express courier facilities, and seaports.

CBP has partnered with Immigration and Customs Enforcement (ICE) to support the multi-agency task forces established to identify, disrupt, and dismantle criminal organizations posing a significant threat to border security. CBP personnel are supporting these taskforces (known as Border Enforcement Security Taskforces) at all ten established Southwest land border sites.

CBP employs a “pulse and surge” strategy for outbound operations on the Southwest Border. “Pulse and surge” operations are short duration, periodic outbound inspections followed by periods without inspections. This allows for immediate stand-down of outbound inspections to manage traffic flow departing the POE.

CBP will continue to build on the current cooperative efforts with federal, state, local, and tribal law enforcement agencies. CBP officers along the Southwest Border have seized over \$21.4 million in bulk currency (in 538 incidents), 262 firearms, 855 firearms parts, and 79,700 rounds of ammunition. In addition, CBP officers have arrested 773 outbound fugitives and violators along the Southwest Border during joint operations with Mexican Customs, CBP has also seized over \$113,000 in currency, 5 stolen vehicles, and 23.75 kilograms of narcotics.

While CBP has seen an increase in the number of seizures affected due to increased southbound operations, it appears that criminal enterprises have adapted their procedures (i.e., smuggling smaller amounts of bulk currency at a time) to minimize the impact of CBP’s enforcement efforts. In FY 2009, CBP affected seven bulk currency seizures over \$1 million, while the largest southbound bulk currency seizure affected by CBP officers in FY 2010 was \$462,230.

CBP has also detailed additional CBP officers (approximately 120) to the Southwest Border POEs to support port operations, to include conducting 24/7 southbound operations. The intent of these temporary details is to utilize a collaborative enforcement approach that leverages the capabilities and resources of federal, tribal, state, and local law enforcement and public service agencies against individuals and criminal organizations that are involved in cross border activity. CBP will detail an additional 167 CBP officers to the Southwest Border, increasing the number of POEs that can conduct 24/7 southbound operations.

Additionally, CBP is also conducting the following activities:

Targeting

The National Targeting Center – Cargo (NTC-C) is conducting research on weapons shipments exported from the U.S. destined to legitimate entities in Mexico. Through the NTC-C, such shipments are being identified and examined at the U.S. port of export to verify contents and quantities. Confirmation is obtained from Mexican authorities regarding the shipments, orders and expected

delivery. These efforts help ensure the legitimacy of the shipments, and reduce the possibility of diversion.

Rail Inspections

All eight railroad crossings on the U.S.-Mexico border are conducting 100 percent scanning of outbound rail cars. Notification protocols have been developed with Mexican Customs for the inspection of suspect rail cars, since the cars themselves are on Mexican soil immediately after the U.S. NII scan. In FY 2010, CBP conducted a total of 611,648 outbound rail car examinations on the Southwest Border, including 416,839 laden rail cars and 194,809 empty rail cars. A total of 8,294 outbound trains were scanned in FY 2010 on the U.S./Mexico border with rail imaging technology.

Currency/Firearm Detection Canine Teams

The Southwest Border has 16 permanently assigned currency/firearm detector dog teams deployed to the POEs. CBP has plans to train an additional 10 teams in FY 2011.

Low Energy Mobile X-ray Units

CBP has identified low energy mobile NII imaging systems well-suited to scan outbound personally-owned conveyances for contraband. During pulse and surge operations, these systems can be moved from inbound usage to scan for contraband in conveyances leaving the country. There are currently 23 low energy mobile imaging systems deployed to the POEs along the Southwest Border.

License Plate Readers (LPRs)

In FY 2010, CBP initiated plans to improve technology along the Southwest Border to increase seizures of firearms and currency and the interdiction of stolen vehicles and fugitives. The 48 outbound LPRs currently installed at 16 Southwest Border crossing sites remain an invaluable enforcement tool in these efforts. However it is important to note that the LPR technology refresh is only one component of the total OFO Outbound Program solution which is comprised of many components. Other elements include NII imaging technology which can facilitate the search for hidden weapons and currency, the deployment of more K-Rails/Jersey barriers to funnel traffic; improved lighting for primary, secondary, waiting area, and under canopy area; port signage; examination tables; security cameras/video cameras (to include capturing driver images); waiting areas; detention space and permanent canopies to protect the officers from the elements; and Government Test Lane Facility (GTLF) reconfiguration to fully test all outbound operational and technology scenarios.

CBP has conducted site assessments to determine the best technology configurations for all the Southwest Border crossings. There are 62 Southwest Border outbound lanes that are not currently outfitted with outbound LPRs. License plate readers are considered a fundamental law enforcement tool allowing CBP to increase targeting and real time intelligence by linking inbound, outbound and checkpoint vehicle crossings.

Bi-lateral Operations

As part of CBP's efforts to address the threat posed by multi-national drug trafficking organizations operating along the Southwest Border, CBP is working with Mexican Customs (MXC) to push our borders (so smugglers no longer view the border ending at the U.S. border line) - to include

establishing MXC vetted units to coordinate enforcement activities (i.e., inbound and outbound) with the POE.

Bi-national intensified border enforcement conducted on both sides of the border will: maximize the number of locations covered, maximize the number of inspections conducted, reduce duplication of effort, maintain control of legitimate trade and travel; and reduce the possibility that travelers would be subjected to dual inspection. A total of twenty two operations were conducted in FY 2010 resulting in the seizure of over \$113,000 in currency, five stolen vehicles, and 23.75 kilograms of narcotics.

Office of Border Patrol Support

A total of 116 Border Patrol agents (not all deployed at once) continue to augment OFO's operations outbound operations at our POEs. The joint outbound operations have produced noticeable results by effectively combining the training and expertise of CBP officers and Border Patrol agents while maintaining an adequate staffing level in support of these operations.

Outbound Training

In FY 2010, CBP implemented the Outbound Enforcement Operations/Outbound Inspections National Training Program. The eight-day course provides comprehensive basic training in outbound enforcement operations for all port environments. During FY 2010, CBP has conducted eight courses at the CBP Advanced Training Center in Harpers Ferry, WV.

Immigration Advisory Program (IAP)

Under the IAP, CBP deploys officers overseas (London-Heathrow, Amsterdam, Tokyo, Frankfurt, Seoul, Madrid, Manchester, Warsaw, and London-Gatwick) to support CBP's goal of enhancing the security of air travel by preventing terrorists from boarding commercial aircraft destined for the U.S., and reducing the number of improperly documented passengers traveling from or through a country to the U.S.

IAP provides information to host countries, or appropriate authorities, regarding travelers of interest. It focuses on high-risk persons through the use of targeting and passenger analysis information or an assessment of the passenger's travel documentation. The goals of this effort are the interdiction and apprehension of criminals and persons of national security interest by host countries, the disruption of attempts to smuggle aliens, and the disruption of attempts to enter the U.S. with fraudulent documents.

Since IAP does not have enforcement authority in the host country, the program relies upon cooperation with the host country's immigration and/or control authority and the air carrier, to take appropriate actions to prevent persons of interest from boarding flights destined for the U.S. During FY 2010, IAP officers recommended that 3,056 passengers not board flights, including 51 with fraudulent documents; 607 who were confirmed NTC targets, including 167 passengers who were matches to Terrorist Screening Database (TSDB) records; and 13 passengers who matched the Transportation Security Agency's No Fly records. CBP estimates that the activities of IAP during FY 2010 has saved CBP approximately \$4.6 million dollars in processing costs and saved carriers approximately \$5.2 million dollars in carrier fines avoided.

In FY 2010, CBP built upon the IAP concept by launching the Joint Security Program (JSP) for Travelers in Mexico City, partnering with the Mexican government to identify air passengers linked to terrorism, narcotics, weapons and currency smuggling. JSP officers assisted their Mexican counterparts in intercepting 122 passengers with fraudulent documents; nine passengers who were known alien smugglers; confirmed 19 NTC targets, including one passenger who matched the No Fly list; intercepted 25 passengers who were wanted fugitives; and two passengers with narcotics.

Fraudulent Document Analysis Unit (FDAU)

The mission of the FDAU is to remove fraudulent travel documents from circulation and to prevent the use of these documents by *mala fide* travelers attempting to enter the United States. The FDAU performs in-depth analyses of documents seized by CBP officers nationwide and analyzes intelligence from fraudulent documents seized overseas to uncover global patterns and trends. This information is shared within CBP and DHS and with other U.S. and foreign government agencies.

The Fraud Prevention Program was established in 2005 to increase fraudulent document interceptions through the sharing of information within and outside of CBP. There are currently 146 CBP officers designated as Fraud Prevention officers (FPO). FPOs are located at POEs, international mail and cargo facilities, and preclearance locations. They conduct document examination training and work closely with CBP Headquarters on matters related to document examination and document fraud. In FY 2010, 104 Fraud Prevention Program reports were submitted by FDAU.

As the central location for analysis of fraudulent documents seized by CBP, the FDAU provides training and training materials regarding fraudulent use. The FDAU has worked with the CBP Academy and the Advanced Training Center to update their document training programs. Exemplars, training, and training material are provided to other CBP and DHS entities such as the Border Patrol, Transportation Security Administration (TSA), Citizenship and Immigration Services, and United States Coast Guard. In FY 2010, Fraud Prevention officers provided local document examination training to 18,146 officers nationwide.

The FDAU also manages the Carrier Liaison Program (CLP). The mission of the CLP is to enhance border security by increasing commercial carrier effectiveness in identifying improperly documented passengers destined to the United States. As of June 2010 the CLP trained 2,529 airline and security personnel in 14 countries throughout Asia, South America, Africa the Middle East in FY 2010. In addition, the program published, distributed, and posted to www.cbp.gov a Revised 2009 Carrier Information Guide. The guide was posted online in nine different languages. The revised guide includes information on WHTI, ESTA, and Trusted Traveler Programs, new Advanced Passenger Information System (APIS) information, and contains human trafficking information to highlight for the airlines the real threat to young victims around the world. Also published, disseminated and posted to www.cbp.gov for the maritime industry was the Vessel Inspection Guide. This guide includes the procedures, regulations and documentation for the processing of crew and passengers arriving in the United States. CBP publishes quarterly Travel Industry Bulletins dedicated to travel industry personnel to assist in facilitating legitimate and safe travel.

Admissibility Review Office (ARO)

The ARO provides CBP with a dedicated resource with institutional knowledge and a consistent approach in making determinations of admissibility under the Immigration and Nationality Act (P.L. 82-414 as amended; INA). The ARO works extensively with the DOS and other agencies to determine whether inadmissible aliens may be permitted to travel as non-immigrants with waivers. The ARO reviews applications submitted by aliens who have been determined by CBP officers or consular officers to be ineligible to be admitted to the United States because of one or more grounds of inadmissibility under section 212(a) of the INA. The ARO completed over 19,807 cases in FY 2010 and plans to complete approximately 20,400 cases in FY 2011.

The ARO currently processes and adjudicates all nonimmigrant waivers of inadmissibility recommended by DOS consular officers worldwide. It also adjudicates all nonimmigrant temporary and permanent waiver applications, Form I-192, and Form I-212 within the jurisdiction of CBP.

Canine Enforcement Program (CEP)

CEP plays a crucial role in CBP's anti-terrorism and interdiction efforts. The CEP remains an important component in CBP's ability to interdict illegal narcotics, concealed humans, prohibited agriculture products, firearms, and undeclared currency while facilitating legitimate trade and travel.

Through CEP, CBP has established and deployed world-class detector dog programs to augment existing technology while establishing cutting edge detection capabilities. Under these programs, the agency now provides a higher level of security and detection capability while emphasizing a seamless conduit between existing technology and the proven capabilities of detector dogs. The CEP will continue to advance and develop the anti-terrorism aspects of its mission while maintaining the traditional roles of narcotics interdiction. OFO's canine teams are strategically assigned to POEs around the United States and pre-clearance stations abroad. As their core mission, CBP officers use specially trained detector dogs in an interdiction role at the Nation's POEs, and they are also involved in specialized detection programs aimed at combating the terrorist threat at the Nation's borders, international airports, and seaports.

By the end of FY 2010, there were a total of 614 Canine Enforcement officers with assigned dogs. Among the dogs paired with an officer, 181 were Narcotics Detection Teams, 35 Currency Firearms Detection Teams and 289 Narcotics/Human Smuggling Detection Teams that were nearly 100 percent devoted to smuggling interdiction. Also included in the total were 109 Agricultural Teams. Six dog handlers did not have dogs due to recent canine retirements and extended leave/light duty assignments.

Trade Operations Division (TOD)

The TOD is responsible for coordinating, implementing, supporting, and monitoring trade enforcement initiatives in the field; collaborating with the OT on the development of national enforcement efforts; supporting CBP's trade discipline role in security and enforcement matters; managing the operational implementation of trade policy pertaining to import specialists, entry specialists, and drawback specialists; ensuring the implementation and operational accountability of field offices in their administration of trade programs; establishing efficient and effective mechanisms to conduct oversight

of trade programs; promoting uniformity through common measures and best practices; and developing mechanisms to identify operational deficiencies and provide a plan for resolution. TOD provides administrative and operational support to the Trade Integrated Planning & Coordination Cell (TIPCC) while also providing direct resource support to two TIPCC pilot initiatives: Centers of Excellence & Expertise (CEE) and the Account Executive (AE). TOD also supports the U.S. and Mexico Bilateral Strategic Plan by participation on the Bilateral Trade-Fraud Subgroup. TOD provides input to the Intellectual Property Enforcement Coordinator (IPEC) within the Executive Office of the President.

Agriculture Programs and Trade Liaison (APTL)

The APTL office provides leadership, expertise, and innovation to defend the U.S. from the threats of agro and bio-terrorism. APTL is also responsible for meeting the traditional goals of safeguarding and protecting American agriculture from the risks associated with the entry, establishment, or spread of plant pests and pathogens, noxious weeds, and foreign animal diseases. The specific activities conducted by CBP's APTL fall into five general areas:

1. The Agro/Bio-Terror Countermeasures (ABTC) Program mission is to prevent ag/bio-terrorists, their equipment, and weapons from entering the U.S. In partnership with scientific, regulatory, intelligence, and law enforcement agencies, the program assesses risks and obtains information to guide the development and implementation of specific targeting and inspection systems to protect people, agriculture, food, and the economy from ag/bio-terror attacks.
2. The Agriculture Operational Oversight (AOO) office is responsible for improving oversight of the agricultural mission across all CBP field offices by ensuring a more consistent application of agriculture inspection policy at all POE. The office is the primary point of contact for all stakeholder-related issues and the implementation of the Joint Agency Task Force Implementation Action Plans, including coordination with the Animal & Plant Health Inspection Service (APHIS), Department of Agriculture (USDA), DHS, and our agriculture industry stakeholders.
3. Agricultural Policy provides policy, planning, and guidance for CBP agriculture inspection programs in order to prevent the intentional and unintentional introduction of plant and animal pests and diseases.
4. Agricultural Safeguarding is responsible for the development, clarification, and interpretation of agricultural oversight policy and procedures. In addition, Agricultural Safeguarding is responsible for the application strategies for maritime cargo, air cargo, land border cargo, passenger processing (air, maritime, land border), and trade facilitation and related operations.
5. The Fines, Penalties, & Forfeitures (FP&F) Division is responsible for the oversight, policy initiation, and staffing of all 41 Fines, Penalties, and Forfeitures offices across the U.S. These 41 offices perform administrative legal processing of all enforcement actions performed by CBP officers, import specialists, entry specialists and ICE special agents. The FP&F Division is responsible for all aspects of the seized property process to ensure proper management control and accountability of all property that OFO seizes. The FP&F Division also adjudicates carrier fines assessed under the INA, all liquidated damages, penalty, and seizure cases initiated under the Tariff Act (P.L.71-361) (Customs violations) and certain agriculture penalties. This adjudication includes oversight of both administrative and judicial actions related to violations of law referred to headquarters for initiation as well as providing guidance to the field on carrier fines issues.

Adjustments to Base

Journeyman Increase

The budget request includes \$229.1 million in additional funding for the Journeyman pay adjustment. These additional funds will help CBP maintain its CBP officer staffing level on the Southwest Border and provide critical support for the expanding workload for CBP officers and agricultural specialists at POEs throughout the country.

Efficiency in Overtime

The proposed efficiency will require POE to reduce overtime spending during periods of increased workload, including, but not limited to, the annual peak summer seasons at our Nation's air and seaports.

FY 2010 accomplishments include:

- As of September 30, 2010, CBP deployed WHTI infrastructure and technology to 88 additional lanes – 44 lanes at low volume and new land POE, 12 lanes at ports where WHTI was previously deployed; nine stacked booth lanes at two POEs; and 23 commercial lanes with high/low booths to mitigate high wait times during non-commercial hours of operation;
- Successfully deployed the Ready Lane pilot, a lane dedicated to RFID-enabled documents, to Detroit/Ambassador Bridge resulting in faster processing times in designated lanes and an increase in Michigan's Enhanced Driver's License (EDL) applications;
- Built upon the IAP concept by launching the JSP for Travelers in Mexico City. JSP officers assisted their Mexican counterparts in intercepting 122 passengers with fraudulent documents; nine passengers who were known alien smugglers; confirmed 19 NTC targets, including one passenger who matched No Fly list; intercepted 25 passengers who were wanted fugitives; and two passengers with narcotics;
- Added Paris as an additional IAP location with TDY personnel to cover approximately 33 percent of all air traffic bound from the U.S. from non-Preclearance ports of embarkation. Approximately 40 percent of all TSDB matches travel through Paris to the U.S.;
- Implemented Enforced Compliance of the ESTA system and raised the compliance rate to 99 percent and a fee for service program in September 2010;
- Automated the I-94W, significantly reducing the use of the paper form;
- Enhanced the capabilities of the CEP to match the growing challenges related to narcotics smuggling and border violence, by increasing the number of Currency/Firearms teams deployed to the Southwest Border to interdict illicit drug proceeds and firearms that may be meant for drug trafficking organizations;
- Created the first version of a CBP agriculture specialist risk-based Resource Allocation and Optimization Model for assisting in determining deployment for CBP agriculture specialists and CBP agricultural canine resources at POEs. This model will be used as a tool in determining deployment of CBP Agricultural Specialists and CBP agriculture canine resources at our POEs;
- Deployed outbound equipment, officers, and overtime to increase outbound currency and firearm seizures along the Southwest land border which has resulted in the seizure of 278

firearms, \$27.4 million in undeclared currency and arrest of 880 violators destined to Mexico; and

- Since March 2009, CBP has conducted 11 Mobile Response Team (MRT) operations to support the Southwest Border surge. There of these MRT operations were in FY 2010.

FY 2011 goals include:

- Deliver a traffic management system (LED signage) to the high-volume land POEs, complete deployment of WHTI facilitative technology, maintain a secure border at the land POEs while facilitating legitimate trade and travel, and extend WHTI facilitative technology to other environments such as pedestrian processing, ferries, and rail;
- Identify and deploy primary lane optimization initiatives such as Ready Lane, a lane dedicated to RFID-enabled documents, to facilitate legitimate trade and travel at the land border POEs;
- Continue monitoring the canine needs along the Southwest Border, and deploy additional teams when necessary. Evaluate our Canine Training Program to ensure coursework relates to modern-day needs in the field and strengthen the Agriculture Canine Program's role and importance in accordance with its mission within CBP and USDA;
- Develop a risk based flight targeting system for agriculture in collaboration with scientists at APHIS in response to quality assurance reviews, Office of Inspector General (OIG) reports and Government Accountability Office (GAO) audits. This targeting system identified the high risk flights at each POE and will continue to be piloted at large airport POEs;
- Increase outbound enforcement efforts, hire and temporarily deploy additional CBP officers to conduct outbound operations, deploy outbound infrastructure up to twenty (20) Southwest Border crossings and wireless handheld devices; and install outbound license plate readers along the Southwest Border to increase the seizures of firearms and currency and the interdiction of stolen vehicles and fugitives; and
- Negotiate closure of the Warsaw, Poland IAP location with the Polish government.

FY 2012 goals include:

- Continue to monitor and evaluate canine requirements at the POEs to incorporate those requirements in our Canine Program and the USDA National Detector Dog Training Center, ensuring the changing threats to our nation are met with a reliable canine asset;
- Complete transition of the WHTI program to an O&M mode and achieve performance goals;
- Complete the development of standard operating procedures for utilization of CBP canine resources at International Mail, Express Consignment Operation (ECO) and Express Consignment Carrier Facility (ECCF);
- Establish an agriculture-based risk criteria in a cargo environment to accurately identify, isolate and target exams and processing of agriculture commodities; and
- Establish information sharing for CBP agriculture specialist as the risk-based flight targeting system continues to be implemented at medium airports.

**Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses:
Harbor Maintenance Fee Collection (Trust Fund)
Program Performance Justification
(Dollars in Thousands)**

PPA: Harbor Maintenance Fee Collection (Trust Fund)

	Perm. Pos	FTE	Amount
2010 Actual		-	3,226
2011 Annualized CR	-	-	3,226
2012 Adjustments-to-Base	-	-	48
2012 Current Services	-	-	3,274
2012 Total Request	-	-	3,274

CBP requests \$3.274 million for Harbor Maintenance Fee Collection (Trust Fund). The request includes:

- Increase of \$48 thousand as a Technical Adjustment to the FY 2011 base.
- Increase of \$32 thousand for the consolidation of mission support funding across all CBP PPAs into Management and Administration and training PPAs. This includes human resource management, conduct and integrity, information technology, administration, executive and business support and training.
- Decrease of \$32 thousand for the annualization of the President’s initiative to freeze federal pay at the FY 2010 levels.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Harbor Maintenance Fee is an Army Corps of Engineers (USACE) fee, which is collected for the operation and maintenance, as well as improvements, of U.S. channels and harbors. CBP is reimbursed for a portion of the costs associated with the collection of the fee for USACE.

2012 Total Request	181	181	68,757

CBP requests \$68.757 million for International Cargo Screening. The request includes:

- Increase of \$7.500 million to fund the implementation of pilots to test alternatives to the 100 percent scanning mandate established in the SAFE Port Act.
- Decrease of \$78.562 million as a Technical Adjustment to the FY 2011 base.
- Decrease for the transfer of \$20.956 million for the consolidation of mission support funding across all CBP PPAs into Management and Administration and training PPAs. This includes human resource management, conduct and integrity, information technology, administration, executive and business support and training.
- Decrease of \$438 thousand towards the DHS-wide decrease in professional service contracts to achieve efficiencies and apply saving towards the highest priority requirements.
- Decrease of \$398 thousand towards the government-wide initiative to reduce administrative costs known as the Administrative Savings Initiative as well as reductions from the Efficiency Review.
- Decrease for \$389 thousand for the annualization of the President's initiative to freeze pay at the FY 2010 levels.

CURRENT SERVICES PROGRAM DESCRIPTION:

This PPA supports the OFO Strategic Plan goal to ensure border security, prevent terrorism, and strengthen international cooperation.

This PPA includes Container Security Initiative (CSI) operations, which currently consists of 58 CSI ports, and two Secure Freight Initiative (SFI) ports. The CSI/SFI program will continue its mission to prevent terrorists and terrorist weapons from entering the U.S. while also facilitating the flow of legitimate trade.

The current core elements of CSI are:

- Identifying high-risk containers—CBP uses automated targeting tools to identify containers that pose a potential risk of terrorism, based on advance shipping information and strategic intelligence.
- Screening and evaluating containers before they are shipped—shipments are screened as early in the supply chain as possible, generally at the last port of lading.
- Using technology to scan high-risk containers to ensure that scanning can be done rapidly without impeding the movement of trade—this technology includes large-scale X-ray, gamma ray machines, and radiation detection devices.

Container Security Initiative

CSI is the only multinational program in the world protecting the primary system of global trade – maritime containerized shipping – from being exploited or disrupted by international terrorists. Currently CSI is operational in 58 ports and screens over 80 percent of the volume of maritime containers destined for the U.S. CBP has shifted from the initial CSI operating protocols (which were heavily dependent on the placement of U.S. personnel overseas) to a more technology based approach, relying on the NTC-C to conduct more bill review and targeting.

In FY 2012, CBP will close several ports and cease CSI operations in those ports. CBP will maintain CSI operations in a select number of ports of strategic importance that would prove the most beneficial towards high-risk maritime cargo.

Since CSI was unveiled in January 2002, it has been part of our government’s strategy to secure the nation from the potential terrorist threat of using maritime cargo containers. CSI will continue to foster partnerships with other countries and our trading partners in order to inspect high-risk shipments before they are loaded on vessels bound for the U.S. For the CSI ports that will remain operational, CBP will ensure effective coordination with host countries by conducting periodic risk evaluations of ports to assess the level of staffing and other resource needs. CBP will also encourage interagency cooperation by developing a capacity to collect and share information and trade data gathered from CSI ports.

Secure Freight Initiative

SFI incorporates a three-pronged approach to enhance supply chain security that includes the International Container Security (ICS) program, a regulation to require additional data elements for improved high-risk targeting, known as the Importer Security Filing (10+2), and initiatives to identify and acquire technology enhancements to strengthen cargo scanning and cargo risk assessment capabilities.

The ICS program uses an integrated scanning system, consisting of Radiation Portal Monitors (RPM) and NII imaging systems provided by CBP, to scan containers as they move through foreign ports. Through optical character recognition technology, data from these systems are integrated and provided to CBP officers at the NTC-C, who determine if the container should be referred to the host nation for secondary examination prior to lading. ICS provides CBP officers additional data points that are used in conjunction with advance manifest data, such as 24-hour rule information, Customs-Trade

Partnership Against Terrorism (C-TPAT) information, and the Automated Targeting System to assess the risk of each container coming to the U.S.

CBP has been focusing deployments of SFI scanning/imaging operations to a limited number of strategic locations where the additional scan data would prove the most beneficial towards enhancing CBP targeting for high-risk maritime cargo. Currently SFI is operational in Qasim, Pakistan and in a limited capacity in Salalah, Oman. In FY 2012, SFI will maintain operations in Qasim, Pakistan.

The Importer Security Filing and Additional Carrier Requirements - Section 203 of the SAFE Port Act - required DHS to develop a regulation that requires additional data elements for improved high-risk targeting, including appropriate security elements of entry data to be provided as advanced information prior to vessel lading. CBP's 'Importer Security Filing and Additional Carrier Requirements' regulation, also known as "10+2", became effective on January 26, 2009 as an Interim Final Rule. The "10+2" Interim Final Rule significantly increases the scope and accuracy of information gathered on the goods, conveyances and entities involved in the shipment of cargo to the U.S. via vessel by requiring importers to supply CBP with an electronic Importer Security Filing consisting of 10 trade data elements 24 hours prior to lading for cargo shipments that will be arriving into the United States by vessel. The ocean carriers are required to provide their vessel stow plans and container status messages to CBP electronically.

FY 2010 accomplishments include:

- Evaluated workload and staffing levels at all CSI ports to ensure staffing levels were consistent with workload.
- SFI ended the 100% scanning pilots in the ports of Busan, Puerto Cortes and Southampton and those ports reverted back to CSI protocols.

FY 2011 goals include:

- Maintain SFI operations in Qasim, Pakistan.
- Begin closing several ports and cease CSI operations in those ports while maintaining CSI operations in selected ports of strategic importance.
- Continue maintaining "10+2" data in the Automated Targeting System to enhance CBP's targeting efforts.

FY 2012 goals include:

- Continue efforts to close several ports and cease CSI operations in those ports while maintaining CSI operations in selected ports of strategic importance.
- Maintain SFI operations in Qasim, Pakistan.

PPA: Other International Programs

	Perm. Pos	FTE	Amount
2010 Actual	101	97	23,456
2011 Annualized CR	101	101	11,181
2012 Adjustments-to-Base	-	-	(483)
2012 Current Services	101	101	10,698
2012 Program Change	-	-	(14)
2012 Total Request	101	101	10,684

CBP requests \$10.684 million for Other International Programs. The request includes:

- Increase of \$66 thousand as a Technical Adjustment to the FY 2011 base.
- Decrease for the transfer of \$411 thousand for the consolidation of mission support funding across all CBP PPAs into Management and Administration and training PPAs. This includes human resource management, conduct and integrity, information technology, administration, executive and business support and training.
- Decrease for \$86 thousand for the annualization of the President’s initiative to freeze pay at the FY 2010 levels.
- Decrease of \$52 thousand towards the government-wide initiative to reduce administrative costs known as the Administrative Savings Initiative as well as reductions from the Efficiency Review.
- Decrease of \$14 thousand towards the DHS-wide decrease in professional service contracts to achieve efficiencies and apply saving towards the highest priority requirements.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of International Affairs (INA) administers several international programs that support the U.S. Government’s objectives in anti-terrorism, border security, export controls, non-proliferation and customs and immigration laws. CBP’s international programs serve as the conduit for CBP’s participation in international forums such as the World Customs Organization (WCO), and in regional bodies such as the Asia-Pacific Economic Cooperation (APEC) forum. These programs provide the platform for the negotiation of agreements, memoranda of understanding and letters of intent. CBP’s key objectives for its international programs are:

- Develop, promote, and implement CBP’s international strategy;

- Negotiate international agreements and other instruments for CBP;
- Advance CBP's international policy initiatives in international forums; and
- Develop and maintain strategic international relationships.

INA is also responsible for coordinating and supporting foreign initiatives, programs, and activities within CBP. INA strives to extend U.S. borders by implementing programs and initiatives that promote anti-terrorism, global border security, non-proliferation, export controls, immigration, capacity building, and facilitating legitimate trade. INA focuses on international cooperation and strengthening multi- and bi-lateral relationships to achieve international agreements and joint efforts that both facilitate and secure legitimate trade and travel. INA promotes expansion of the WCO Security and Facilitation in Global Environment (SAFE) Framework of Standards by providing targeted countries with training and advisory support through programs such as Capacity Building and Export Control and Border Security (EXBS). Additionally, INA identifies, develops, implements, and coordinates specialized training and developmental assistance programs for foreign customs and other law enforcement officials and organizations. INA provides in-country advisory support for broad-based customs reform and modernization and ensures CBP is represented at overseas posts and influencing policy throughout the world.

FY 2010 accomplishments included:

- Successfully adopted the U.S. Importer Security Filing (ISF) "10+2" data elements into the WCO SAFE Framework of Standards, thereby ensuring global consistency for advanced information requirements for supply chain security;
- Established a Capacity Building Task Force, which works to create a comprehensive and refined architecture for INA's capacity building efforts as a way to implement the work and principles of the WCO;
- Developed, proposed, and signed two separate memoranda of understanding to enhance coordination and communication with two key Chinese government agencies to further CBP's international objectives; and
- Developed, promoted, and signed Declaration of Principles to the Bilateral Strategic Plan for Mexico Customs that serves as a model for comparable agreements with other Mexican government agencies.

FY 2011 goals include:

- Successfully host the APEC Forum, as the U.S. is the host nation in 2011. CBP will need to take leadership activities over the body's Sub-Committee on Customs Procedures (SCCP).
- Negotiate and sign a Mutual Recognition Arrangement between the United States and the European Union establishing mutual recognition between the C-TPAT program and the European Union's Authorized Economic Operator program, following a series of joint validations.
- Continue to provide leadership in the Mexico Division and Integrated Planning and Coordination Cell (IPCC), which administers and oversees U.S. government technical assistance activities in Mexico.

FY 2012 goals include:

- Pursue, maintain, and establish international partnerships to share best practices, exchange information, and promote the facilitation of secure travel and trade and support implementation of the WCO SAFE Framework.
- Implement initiatives in support of an international immigration strategy to identify and interdict high-risk travelers.
- Increase the level of WCO-accredited expert training order to enhance CBP visibility internationally as an authoritative executive agency in customs capacity building.

2012 Program Change	-	-	(76)
2012 Total Request	207	207	44,979

CBP requests \$44.979 million for the C-TPAT. The request includes:

- Decrease of \$12.578 million as a Technical Adjustment to the FY 2011 base.
- Decrease for the transfer of \$4.025 million for the consolidation of mission support funding across all CBP PPAs into Management and Administration and training PPAs. This includes human resource management, conduct and integrity, information technology, administration, executive and business support and training.
- Decrease of \$599 thousand towards the government-wide initiative to reduce administrative costs known as the Administrative Savings Initiative as well as reductions from the Efficiency Review.
- Decrease of \$355 thousand for the annualization of the President's initiative to freeze federal pay at the FY 2010 levels.
- Decrease of \$76 thousand towards the DHS-wide decrease in professional services contracts to achieve efficiencies and apply savings towards the highest priority requirements.

CURRENT SERVICES PROGRAM DESCRIPTION:

This PPA supports CBP's goal to expedite legitimate trade and travel.

The C-TPAT program is CBP's premier trade security program. The purpose of C-TPAT is to partner with the trade community for the purpose of securing the U.S. and international supply chains from possible intrusion by terrorist organizations. C-TPAT requires the trade community participant to document and validate their supply chain security procedures in relation to existing C-TPAT criteria or guidelines as applicable. C-TPAT company participants develop an internal validation process to ensure the existence of security measures documented in their Supply Chain Security Profile and in

any supplemental information provided to CBP. As a part of the C-TPAT process, C-TPAT Supply Chain Security Specialists (SCSS) and the C-TPAT participants jointly conduct a validation of the company's supply chain security procedures. The validation process is essential to verify the company's commitment to C-TPAT.

C-TPAT's SCSS conduct C-TPAT validations, identify supply chain security vulnerabilities, and work to monitor company initiatives that address those vulnerabilities. Validations conducted by SCSS determine the accuracy and effectiveness of companies' security profiles as applied to their foreign and domestic supply chains.

To better secure and facilitate the flow of goods into the United States, CBP will continue to ensure that existing and new C-TPAT partners fulfill their commitments by verifying that agreed upon security measures have been implemented. CBP will also continue to work with C-TPAT partners to finalize minimum applicable supply chain security criteria and security best practices. C-TPAT teams travel around the globe to visit partners, their vendors, and vendors' plants to validate that supply chain security meets C-TPAT minimum security criteria. They also ensure that best practices and procedures used are reliable, accurate, effective, and meet the agreed upon security standards. CBP will continue to provide tools and create incentives for the private sector to join C-TPAT, which is a prerequisite for the Free and Secure Trade (FAST) program and other CBP expedited processing programs.

FY 2010 accomplishments include:

- Completed 3,218 validations;
- Integrated the Evaluations and Assessment Branch into the 2010 work plan and completed 95 evaluations;
- Instituted web based training for SCSS and conducted monthly courses to augment the formal annual training session;
- Accelerated the re-validation cycles for 76 Mexican manufacturers determined to be of high risk;
- Developed and implemented new policy to withhold FAST lane privileges for newly-certified Mexican highway carriers until a successful validation has been completed;
- Managed the program's participation in 74 outreach sessions including planning and implementing two large C-TPAT member conferences in California and New York;
- Increased the program's outreach materials and training tools (Risk Assessment Guide, C-TPAT video and specially designed trailer);
- Conducted a third round of Joint Validations with China Customs and provided subject matter expertise for a Supply Chain Security Memorandum with China;
- Conducted the field work necessary to mutually recognize Korea's Industry Partnership Program and advanced supply chain security capacity building with other customs administrations; and
- Planned and executed the 2010 C-TPAT Member Survey in coordination with the University of Virginia.

FY 2011 goals include:

- Complete validations in accordance with SAFE Port Act requirements;
- Identify large importers (top 100) not already in the C-TPAT and conduct outreach to explore suitability for the program;
- Conduct two formal annual training sessions for members as well as a comprehensive Highway Carrier training;
- Maintain 95 percent or higher compliance rates for C-TPAT members in terms of the ratio of suspensions/removals to overall number of certified/validated partners;
- Improve the process for the Annual Review of Security Profile;
- Further harmonize C-TPAT and the Canada Border Services Agency (CBSA) Partners in Protection (PIP) program;
- Evaluations and Assessment Branch will incorporate a random review factor into its work plan for key program processes;
- Update vetting standard operating procedures;
- Complete the field work necessary to thoroughly evaluate the European Union's Authorized Economic Operator Program;
- Conduct additional joint validations with China Customs; and
- Develop useful analytical products to improve information sharing within the program and with outside stakeholders, with particular emphasis on Post Incident Analysis and Validation Scorecard for Members.

FY 2012 goals include:

- Continue to complete validations in accordance with SAFE Port Act requirements;
- Continue to maintain 95 percent or higher compliance rates for C-TPAT members in terms of the ratio of suspensions/removals to overall number of certified/validated partners;
- Develop and implement the next version of the C-TPAT web portal system (Portal v. 2.0) which will provide enhanced functionality and member interaction;
- Conduct additional joint validations with China Customs;
- Expand the analytical capabilities of the program as resources permit to identify trends and specific high risk areas, which need to be validated; and
- Initiate the third survey of C-TPAT members to gauge their perceptions regarding the benefits, costs and motivations to join and remain with the program

2012 Program Change	-	-	(178)
2012 Total Request	-	-	6,311

CBP requests \$6.311 million for Trusted Traveler Programs. This request includes:

- Decrease for the transfer of \$4.367 million for the consolidation of mission support funding across all CBP PPAs into Management and Administration and training PPAs. This includes human resource management, conduct and integrity, information technology, administration, executive and business support and training.
- Decrease of \$409 thousand as a Technical Adjustment to the FY 2011 base.
- Decrease of \$178 thousand towards the DHS-wide decrease in professional services contracts to achieve efficiencies and apply savings towards the highest priority requirements.
- Decrease of \$9 thousand towards the government-wide initiative to reduce administrative costs known as the Administrative Savings Initiative as well as reductions from the Efficiency Review.

CURRENT SERVICES PROGRAM DESCRIPTION:

This PPA supports the OFO Strategic Plan goal to ensure border security, prevent terrorism, strengthen international cooperation, and to expedite legitimate trade and travel.

Trusted Traveler Programs

Since the terrorist attacks of September 11, 2001, CBP has placed great emphasis on developing and expanding TTP for passengers and commercial truck drivers at the land borders with Canada and Mexico and developing similar programs for international air passengers. TTP helps to identify low-risk, vetted travelers by the voluntary submission of an application and subsequent vetting using automated name and fingerprint based checks of law enforcement databases, fingerprint/name checks, and an interview with a uniformed officer. The programs continue to expand, and in FY 2010 for a

total of 843,535 members. Currently, CBP TTP has four programs – NEXUS, Secure Electronic Network for Travelers Rapid Inspection (SENTRI), Free and Secure Trade (FAST), and Global Entry (GE).

NEXUS Highway and Air

NEXUS is a joint US/Canada enrollment program at the Northern Border land POE and all Canadian preclearance ports that identifies low-risk travelers through a complete biographic check, an interview with a CBP officer and a Canada Border Security Agency officer, and a fingerprint check. Once an applicant is identified as low-risk they are enrolled in the NEXUS program and given an RFID-enabled card that is specific to the traveler. The RFID-enabled card allows the traveler to use specific primary lane(s) at the land border ports of entry that are reserved for NEXUS enrollee use. At the Canadian preclearance airports, passengers use kiosks instead of dedicated lanes, utilizing iris scans to identify low risk travelers rather than RFID-enabled cards. At the time of enrollment, travelers qualify for trusted traveler status in all modes of travel, e.g. air, sea, and land. The introduction of WHTI lane technology will provide local managers with the flexibility to add and subtract dedicated lanes to fit traffic demand. In 2010, CBP had approximately 460,000 NEXUS members; enrollment is expected to increase to 560,000 members in FY 2011.

Secure Electronic Network for Traveler's Rapid Inspection

The SENTRI program was first implemented at Otay Mesa, CA in 1995, and has grown to include 17 lanes at the ten largest southern border POEs along the U.S.-Mexico border including San Ysidro, Otay Mesa, Calexico, and Calexico East, California; Nogales and San Luis, Arizona; and El Paso, Laredo, Hidalgo, Anzalduas, and Brownsville, Texas. SENTRI pedestrian is at San Ysidro, Otay Mesa, and Calexico, California; and El Paso and Anzalduas, Texas. There are 233,758 SENTRI members and they account for 18% of the Southwest Border cross border traffic. In FY 2010, CBP had 229,172 SENTRI members, and in FY 2011, projects to have 258,783 members in this program. This estimate could increase if the San Diego Field Office is successful in their local drive to increase enrollments that will commence in January 2011.

Free and Secure Trade

FAST is the cargo equivalent of the SENTRI and NEXUS facilitative programs in the passenger environment. Through FAST, importers, commercial carriers, truck drivers, and manufacturers who enroll in the program and meet agreed upon security criteria, including participation in the C-TPAT, are entitled to expedited clearance at a POE. Using electronic data transmission and transponder technology, CBP expedites clearance of approved trade participants. The FAST program fosters more secure supply chains and enables CBP to focus security efforts and inspections where they are needed most – high-risk commerce. In FY 2010, CBP had 81,000 FAST members and assumes approximately the same membership total in FY 2011.

Global Entry

GE is a program operated by CBP to allow for the expedited clearance of pre-approved low-risk air travelers into the U.S. Through the use of automated kiosks placed in the Federal Inspection Services (FIS) area of each identified airport, a vetted, enrolled traveler is able to conduct the Passport Control Inspection without having to see a CBP officer. This program is of great benefit especially for travelers who frequently fly internationally.

Currently, GE is available at Atlanta, Boston, Dallas/Ft. Worth, Washington Dulles, Chicago, Detroit, Ft. Lauderdale, Honolulu, Houston, Las Vegas, Los Angeles, Miami, Newark, Chicago, New York (JFK), Orlando, Philadelphia, Sanford (FL), San Juan, San Francisco, and Seattle. Since April 2009, CBP has operated a joint pilot with the Government of the Netherlands that allows qualified U.S. citizens to join Privium, the Dutch equivalent to GE, and allow Dutch citizens to join GE. Participants in this pilot must pass each nation's security vetting requirements.

Global Entry applications and enrollments are growing quickly - CBP enrolled approximately 9,200 new members in December 2010. CBP had over 76,400 members enrolled and over 438,600 kiosk uses at the end of FY 2010. Total membership is expected to grow even more as CBP works with the Government of Mexico to allow qualified Mexican citizens to join GE as a part of a bi-lateral agreement. Participants in this pilot must pass each nation's security vetting requirements.

CBP is working with government representatives in Germany, the United Kingdom, Japan, and Korea to develop individual bilateral arrangements with CBP to enable trusted travelers from either country to receive expedited clearance when traveling to the other country.

CBP is extending Global Entry benefits to current Canadian NEXUS and Mexican SENTRI program members. The implementation occurred in December 2010, and has greatly increased the GE program membership and kiosk usage.

CBP is currently working with United States Visitor and immigrant Status Indicator (US-VISIT) on piloting the use of iris scan technology for use with TTPs. This technology will be used as a secondary biometric identifier or replace the existing one.

Global Enrollment System (GES)

CBP has developed GES for all CBP TTPs to be operational on the CBP national network. GES has integrated the independent CBP enrollment and validation processes into a single solution, and provides a more efficient platform to share data and perform real-time watch list and lookout checks.

GES also reduces the redundancy of maintaining several application processes, and allows for a quicker and more accurate applications process. CBP has developed a single online, paperless application process to support the GES and will allow a traveler to apply to multiple programs online. The on-line application Global On-Line Enrollment System (GOES) supports all TTP applications.

FY 2010 accomplishments include:

- Surpassed 800,000 members in the TTPs; and
- Surpassed 400,000 clearances at the GE kiosks.

FY 2011 goals include:

- Surpass one million trusted travelers;
- Improve the online application and allow applicants to select which bilateral programs they want to join;
- Pilot the use of iris scans as a secondary biometric to validate identity;
- Continue to implement bi-lateral international air trusted traveler programs with additional countries;

- Upgrade and increase the number of kiosks that can process GE members;
- Expand bi-lateral agreements with foreign governments to allow reciprocal expedited travel for pre-qualified low-risk travelers; and
- Improve GES to enable validation of certain applicant entered information.

FY 2012 goals include:

- Surpass 1.2 million trusted travelers;
- Surpass 500,000 clearances at the GE kiosks;
- Make available nationally iris scans as a secondary biometric for identification validation;
- Continue to implement bi-lateral international air trusted traveler programs with additional countries; and
- Continue to increase membership in TTPs memberships.

Salaries and Expenses:
Inspection and Detection Technology
Program Performance Justification**
(Dollars in Thousands)

PPA: Inspection and Detection Technology

	Perm. Pos	FTE	Amount
2010 Actual	-	-	133,727
2011 Annualized CR	-	-	153,563
2012 Adjustments-to-Base	-	-	1,525
2012 Current Services	-	-	155,088
2012 Program Change	-	-	(5,551)
2012 Total Request	-	-	149,537

CBP requests \$149.537 million for Inspection and Detection Technology. The request includes:

- Increase of \$1.530 million as a Technical Adjustment to the FY 2011 base.
- Increase for the transfer of \$7 thousand for the consolidation of mission support funding across all CBP PPAs into Management and Administration and training PPAs. This includes human resource management, conduct and integrity, information technology, administration, executive and business support and training.
- Decrease of \$5.551 million towards the DHS-wide decrease in professional services contracts to achieve efficiencies and apply savings towards the highest priority requirements
- Decrease of \$12 thousand towards the government-wide initiative to reduce administrative costs known as the Administrative Savings Initiative as well as reductions from the Efficiency Review.

CURRENT SERVICES PROGRAM DESCRIPTION

CBP has long recognized that an adversary can defeat any single system or device. For this reason, CBP cannot rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood that a nuclear or radiological weapon or elements of these weapons, and illegal aliens or other contraband being smuggled across the U.S. borders will be detected. NII technologies are viewed as force multipliers that enable CBP officers to screen or examine a larger portion of the stream of commercial traffic while maintaining the flow of legitimate trade, cargo, and travelers.

Since September 11, 2001, NII technology has been the cornerstone of CBP's multi-layered enforcement strategy. Technologies currently deployed at and between our Nation's POE include

large-scale X-ray and Gamma-ray imaging systems, as well as a variety of portable and handheld technologies, to include radiation detection technology.

CBP has 288 large-scale imaging systems deployed at and between our POEs. There are also a total of 6,120 small-scale NII units, 1,441 Radiation Portal Monitors (RPMs), 2,442 Radiation Isotope Identification Devices (RIIDs) and 20,803 Personal Radiation Detectors (PRDs) deployed nationwide.

Each year, a number of POEs undergo reconfigurations in which the lanes of traffic that contain NII equipment and/or RPMs are moved or altered. Additionally, a number of port expansions where new lanes of traffic requiring new technologies are added each year. Typically these reconfigurations and port expansions accounted for approximately 20 percent of deployment efforts.

O&M funding will ensure the deployed NII technologies meet the expected operational requirements of CBP as well as the requirements surrounding the Federal Information Systems Management Act (P.L. 107-347). Additionally, these funds will ensure mandated security and vendor upgrades are installed while providing CBP with the means to dispose of obsolete NII systems as mandated by Federal regulations. Funding will also support the RPM program to upgrade sites to be Port Radiation Inspection Detection and Evaluation (PRIDE) compliant.

O&M funds provide maintenance support at approximately 600 locations throughout the U.S. and its territories. O&M funds will also be used to support RPM systems that are reaching the end of their life cycle and to supplement the interdiction systems with ancillary equipment and components to enhance their capability.

FY 2010 accomplishments include:

- Tested and deployed 40 new (additional) and replacement large-scale NII systems (7 from FY 2007 funds and 33 from FY 2009/10 funds) with plans to test and deploy an additional 10 new large-scale NII systems (1 purchased with FY 2007 funds and 9 from FY 2010 funds) by the end of FY 2010, for a total of 277 systems deployed through FY 2010;
- Purchased 29 new large scale NII new (additional) systems from FY 2010 funding;
- Purchased 18 new large scale NII new (additional) and replacement systems from American Recovery and Reinvestment Act (P.L. 111-5; ARRA) funding;
- Purchased 15 new large scale NII new (additional) systems from FY 2010 funding;
- Continued to assess viable radiation/nuclear (rad/nuc) technology for the rail, break-bulk and roll-on and roll-off environments;
- Deployed 77 RPMs nationwide;
- Small-Scale NII purchased, tested, and deployed 85 baggage x-ray systems, 200 fiberscopes, 14 mobile support vehicles (tool trucks), and 20 mobile x-ray vans from FY 2010 funding identified in the Capital Investment Plan (CIP); and
- Continued operations and maintenance of NII technologies at 331 U.S. POEs, all U.S. mail facilities that processes international mail, and of the international airports.

FY 2011 goals include:

- Test and deploy 5 remaining new (additional) and replacement large-scale NII systems purchased in FY 2007 and 62 systems purchased in FY 2009/10 with annual/ARRA/War

Supplemental (P.L. 111-32) funding. With these deployments and replacements, the total systems deployed through FY 2011 will be 326 systems;

- Purchase 15 large scale NII new (5 additional for new/enhanced ports) and 10 replacement systems;
- Continue conducting thorough test and evaluation (T&E) of all large-scale NII commercial systems that are acquired before they are accepted and deployed for CBP operations;
- Continue efforts to incorporate all CBP NII inventory into a single office for O&M which allows cross utilization of CBP equipment to accomplish mission needs throughout the agency. This system will allow a centralized mechanism which will promote overall efficiency and cost savings;
- Continue to develop strategies and radiation detection systems for general aviation;
- Assess integration needs for deployed passive and active interrogation systems and implement solutions at POEs which are experiencing operational issues;
- Continue to work toward 100 percent scanning of radiation of all sea cargo containers at designated POEs by the end of calendar year 2012 and 100 percent scanning of radiation of all air cargo at designated airports by the end of calendar year 2015;
- Continued O&M of 1,441 RPMs at U.S. POEs, all U.S. mail facilities that processes international mail, and of the international airports;
- Deploy 224 additional RPMs nationwide;
- Pilot visualization systems which will be installed at POEs to back up primary systems and enhance situational awareness for the officers;
- Upgrade 32 RPM sites to PRIDE and upgrade interim connectivity lines to DHS1 Net for PRIDE deployments;
- Refurbish PVTs that are 10 years or older or at the end of their useful life;
- Begin to deploy RPMs with alternative neutron detection technology;
- Acquire additional mobile radiological/nuclear technology; and
- Purchase small-scale NII equipment, including 166 busters and 77 fiberscopes.

FY 2012 goals include:

- Purchase 10 large-scale NII new (4 additional for new/enhanced ports) and 6 replacement systems from FY 2012 funding identified in the CIP;
- Continue to conduct thorough T&E of all large-scale NII Commercial systems that are acquired before they are accepted and deployed for CBP operations. CBP conducts this level of testing on all NII systems to ensure that the vendor's product conforms to contractual requirements;
- Continue T&E efforts to assess and analyze new technology to determine its suitability for use in day-to-day CBP operations. This level of T&E has provided CBP with specific data to support their acquisition decisions and sustain any third party inquiries;
- Install pilot visualization systems which will be installed at POEs to back up primary systems and enhance situational awareness for the officers; and
- Purchase, test, and deploy small-scale NII, including 6 mobile x-ray vans, 10 baggage x-ray systems, 6 mobile support vehicles, 46 fiberscopes, 46 busters, 3 ramps, and 46 laser range finders.

PPA: Systems for Targeting

	Perm. Pos	FTE	Amount
2010 Actual	8	8	32,553
2011 Annualized CR	8	8	32,560
2012 Adjustments-to-Base	-	-	(86)
2012 Current Services	8	8	32,474
2012 Program Change	-	-	(1,074)
2012 Total Request	8	8	31,400

CBP requests \$31.400 million for Systems for Targeting. The request includes:

- Decrease of \$1.074 million towards the DHS-wide decrease in professional services contracts to achieve efficiencies and apply savings towards the highest priority requirements.
- Decrease of \$78 thousand as a Technical Adjustment to the FY 2011 base.
- Decrease of \$5 thousand towards the government-wide initiative to reduce administrative costs known as the Administrative Savings Initiative as well as reductions from the Efficiency Review.
- Decrease of \$3 thousand for the annualization of the President’s initiative to freeze pay at the FY 2010 levels.

CURRENT SERVICES PROGRAM DESCRIPTION:

At the core of CBP’s ability to achieve its critical border security objectives and maintain the flow of lawful commerce is the ability to identify high-risk travelers and goods for inspection while allowing law-abiding travelers and commerce to move without unnecessary delay. Legislation and regulatory action, such as the Trade Act of 2002 (P.L. 107-210), the 24-hour rule, the Aviation and Transportation Security Act of 2001 (P.L. 107-71), the Enhanced Border Security and Visa Entry Reform Act of 2002 (P.L. 107-173), the IRTPA, and the SAFE Port Act, have made it mandatory to provide advance information about conveyances, travelers and goods arriving in the United States. CBP uses computer technology and rule-based software to analyze the data provided on conveyances, travelers, and shipments arriving in the United States. CBP applies its targeting methods against the data to determine which conveyances, travelers or shipments need to be segregated for a closer look and possible intensive inspection.

The main platform used to perform this analysis is the Automated Targeting System (ATS). ATS allows CBP officers including those stationed overseas, to cross-check the passenger, crew and cargo manifests against subject lookouts, including those contained in the Terrorist Identities Datamart Environment, TECS, and the National Crime Information Center, and against databases such as the Automated Commercial System, the Advance Passenger Information System, the Border Crossing Information System, the Non-Immigrant Information System, and the Arrival and Departure Information System that provide advance notice of conveyances, travelers and goods arriving at U.S. POEs. The ATS Passenger (ATS-P) module also uses Passenger Name Record data from commercial airlines on arriving and departing passengers to identify high-risk travelers and to facilitate persons posing little to no risk.

Currently, ATS consists of six modules that focus on exports, imports, passengers and crews, private vehicles crossing at land borders, and import trends over time. The six modules are: ATS-Inbound which serves as the primary decision support tool for inbound targeting of cargo; ATS-Outbound which is used for targeting outbound cargo and assists in identifying exports which pose a high risk of containing goods requiring specific export licenses, narcotics, or other contraband; ATS-P which is used at all U.S. airports and seaports receiving international flights and voyages to evaluate passengers and crewmembers prior to arrival or departure; ATS-Land which provides analysis and rules-based risk assessment of private passenger vehicles crossing the nation's borders; ATS-Trend Analysis and Analytical Selectivity which improves CBP's ability to examine, locate, and target for action violators of United States laws, treaties, quotas, and policies regarding international trade; and ATS-International which provides foreign custom authorities with automated cargo targeting capabilities and provides a systematic medium for exchanging best practices and developing and testing targeting concepts.

Future targeting system enhancements will focus on increasing data collection from internal and external sources and improving geographical unit interface display capabilities.

FY 2010 Accomplishments included:

- In response to the December 25, 2009 attempted bombing, developed new targeting methodologies in support of the NTC-P for visa and pre-departure vetting;
- Expanded CBP traveler threshold targeting rules to support CBP and other agencies' border security and counterterrorism missions;
- Partnered with the Transportation Security Administration to develop a targeting program to screen all cargo carried on passenger aircraft, including those originating from a foreign location destined for the United States;
- Partnered with the US Coast Guard for sharing joint targeting roles for passenger and cargo screening;
- Developed cross platform targeting rules for terrorism, narcotics, and currency between ATS-P and ATS-L;
- Implemented User Defined Rule (UDR) functionality in support of Entry Summary targeting;
- Updated the Ocean National Security Weight Set to incorporate risk indicators present in importer security filing data; and

- Completed the Stow Plan viewer application that provides a graphic, visual representation of cargo containers aboard a vessel to assist in the identification of un-manifested containers and to provide critical information to support tactical enforcement operations.

FY 2011 Goals include:

- Assist CBSA in moving forward with scenario based targeting and system completion;
- Develop targeting rules for passengers arriving at land border;
- Develop UDR functionality for ATS-P and ATS-L;
- Continue support in the development, maintenance, and enhancement of the Advance Targeting Units in the sea environment;
- Enhance two-way flow of electronic communication with participating federal government agencies for the automated screening and vetting of watch list suspects;
- Acquire/incorporate new data sources/sets for cargo targeting to identify known/unknown targets;
- Complete and deploy a comprehensive update of the National Security Rules and Weight Set for Inbound Vessel Cargo to identify all risk indicators present in importer security filing data that has previously been identified in the bill of lading and entry data;
- Continue to update the National Security Weight Set Rules targeting inbound cargo within air, ocean, truck, and rail modules;
- Continue to update the Weapons of Mass Effect (WME) inbound cargo rules;
- Develop new methodologies for enhanced targeting of export shipments in ATS; and
- Conduct a pilot program to target inbound mail shipments through ATS in conjunction with the U.S. Postal Service.

FY 2012 Goals include:

- Manage narcotics and alien smuggling rules using ATS-L performance metrics;
- Develop a Federated Super Query to be utilized by all ATS Systems;
- Expand the use of advanced analytical tools for data management, entity resolution, link analysis, and pattern recognition;
- Incorporate expanded research capabilities and intelligence reports in CBP systems;
- Implement analytical tools for use in CBP intelligence, targeting, and entity encounter systems;
- Deploy a predictive analytics model developed through a machine learning application to identify significant violations for inbound truck cargo shipments in ATS-N;
- Develop and deploy a new application of ATS for participating government agencies to review and target inbound cargo shipments;
- Develop an automated methodology to provide timely analysis of UDRs and weight sets in conjunction with current ATS rules and weight sets;
- Continue to update the National Security Weight Set Rules targeting inbound cargo across all transportation modes;
- Continue to update the WME rules; and
- Develop new methodologies for enhanced targeting of export shipments in ATS.

2012 Total Request	283	251	46,950

CBP requests \$46.950 million for the National Targeting Center. The request includes:

- Increase of \$16.400 million to hire 45 CBP officers and 20 support personnel to enhance targeting efforts at the NTC-Passenger.
- Increase of \$9.972 million as a Technical Adjustment to the FY 2011 base.
- Decrease for the transfer of \$5.304 million for the consolidation of mission support funding across all CBP PPAs into Management and Administration and training PPAs. This includes human resource management, conduct and integrity, information technology, administration, executive and business support and training.
- Decrease of \$182 for the annualization of the President’s initiative to freeze pay at the FY 2010 levels
- Decrease of \$150 thousand towards the DHS-wide decrease in professional services contracts to achieve efficiencies and apply savings towards the highest priority requirements
- Decrease of \$141 thousand towards the government-wide initiative to reduce administrative costs known as the Administrative Savings Initiative as well as reductions from the Efficiency Review.

CURRENT SERVICES PROGRAM DESCRIPTION:

This PPA supports the OFO Strategic Plan goal to ensure border security, prevent terrorism, and strengthen international cooperation.

National Targeting Centers

The NTC was created in November 2001 in response to the terrorist attacks of September 11, 2001 to provide advanced targeting, research and coordination between numerous law enforcement and intelligence agencies in support of the CBP anti-terrorism mission. Originally set up to target both passengers and cargo, the operation was divided into two separate entities in FY 2007 to address passenger screening (NTC-P) and cargo screening (NTC-C). These centers provide around-the-clock tactical targeting and analytical research support for CBP antiterrorism efforts.

CBP officers, Border Patrol agents, and import specialists, all experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments, primarily staff both NTC facilities. In addition to using existing databases and information to identify potential targets, the NTC also develops tactical targets from raw intelligence in support of CBP's mission to detect and prevent terrorists and terrorist weapons from entering the U.S. While the vast majority of travelers and goods are legitimate, both NTC facilities are designed to carefully examine the small minority of shipments and/or travelers that may be connected to terrorism or other transnational crimes such as money laundering or narcotics smuggling.

NTC-P is a key part of the CBP layered approach strategy to homeland security by pushing U.S. borders outward and attempting to interdict possible terrorists and other *mala fide* travelers before they can board a conveyance destined to the United States. NTC-P does this through the Pre-Departure Targeting program, as well as providing 24-hour support for IAP officers posted at ten airports around the world, and conducting research and vetting on possible ESTA denials.

Targeting responsibilities for both centers continue to grow. The NTC-P is providing research and support for the ongoing expansion of the IAP, Pre-Departure and Outbound Targeting, U.S. visa re-vetting, the Refugee Processing Program, ESTA, the expansion of the INTERPOL Stolen Lost Travel Document (SLTD) initiative, public health, and information sharing initiatives with Canada, Mexico and the United Kingdom.

The NTC-C provides cargo research and analysis on positive TSDB passengers, responds to research requests from CBP domestic and CSI ports, and conducts cargo research for NTC-P and NTC-C liaisons. Additionally, the NTC-C conducts: national cargo sweeps in ATS; supports Intelligence Driven Special Operations (IDSOs); and conducts Weapons of Mass Destruction (WMD)/ Weapons of Mass Effect (WME), agro-terrorism, and bio-terrorism rules development. The NTC-C will continue to provide support to CSI and SFI. The NTC-C has dedicated staff to support and coordinate the International Container Security component of SFI. The program utilizes remote technology to facilitate near real time scanning and monitoring of cargo/containers destined to the U.S. from select foreign ports. Targeting decisions are made based on container images, radiation alarm profiles, and cargo descriptions provided from overseas.

Office of Alien Smuggling Interdiction (ASI)

CBP established ASI in 2006 to expand the nation's zone of security beyond physical U.S. borders by preventing the boarding of individuals traveling to the U.S. who may be inadmissible or traveling on

fraudulent or fraudulently obtained travel documents. ASI also reduces the threat to our nation's security by combating illegal migration, disrupting organized smuggling operations, and identifying and preventing clandestine terrorist travel. The office focuses on migratory trends, specifically human smuggling and trafficking related issues to deter, detect, and disrupt illegal migration to the United States and increase criminal prosecution of smugglers and human traffickers. In August 2010, ASI moved to the NTC-P, both in physical location as well as administrative oversight. ASI has fostered a stronger relationship with the NTC-P, and has coordinated efforts in identifying fraud as it pertains to human smuggling and trafficking, keeping in mind the ever present reality that many of the same organizations that are involved with human smuggling are connected to organizations that are of national security interest.

Prior to the merger with NTC-P, ASI managed CBP's Regional Carrier Liaison Groups (RCLGs) located at the international airports in New York (JFK), Miami and Honolulu. The RCLGs help to carry out the ASI mission by preventing passengers who may be inadmissible, or who possess fraudulent documents, from traveling to the U.S. RCLGs also work with carriers to facilitate boarding of bona-fide passengers and provide 24/7 assistance on immigration related issues. ASI/RCLG officers prevent fraudulently and improperly documented aliens from boarding U.S. bound aircraft through various targeting methods and by working with carriers and U.S. government representatives overseas. ASI/RCLG officers make recommendations to the carriers against boarding (offloading) suspect travelers and to refer these travelers to local authorities in all instances involving fraud. RCLGs provide a service to the travel industry by assisting carriers with boarding questions, and providing expert guidance on suspect passengers. The travel industry has come to rely on RCLGs as a means to navigate complicated immigration laws and as a resource for fraud prevention.

Since the December 25, 2009 attempted terrorist attack, the RCLGs have taken on a greater role as part of CBP's expanded Pre-Departure Screening program and in FY2010, RCLGs answered over 24,000 phone calls from air carriers and offloaded nearly 3,000 passengers bound for the United States, of which 240 were fraud related.

FY 2010 accomplishments include:

- Created the Pre-Departure targeting program which identifies travelers at overseas locations that do not have an IAP presence, who would otherwise be inadmissible, before they board a conveyance to the U.S. In FY 2010, over 87,000 records were reviewed and 1,145 *mala fide* passengers were denied boarding on flights to the United States;
- Continued 24x7 support of the IAP by pre-screening all flights departing from IAP locations overseas and referring subjects of interest to the IAP teams. In FY 2010, NTC-P reviewed 127,511 records and made 27,739 referrals to IAP teams that resulted in 459 *mala fide* passengers being denied boarding on flights to the United States;
- Implemented the Advanced Targeting Team (ATT) which concentrates on the outbound travel of subjects of interest related to weapons, narcotics, currency, terrorist associates, and National Crime Information Center (NCIC) hits. In FY 2010 the ATT was instrumental in the arrest of 98 outbound NCIC subjects and identified 138 previously unknown terrorist associates and participated in a multi-national operation designed to target and intercept drug couriers traveling in and outbound from the U.S. and the other partner countries. In FY 2010, 79 drug smugglers were apprehended as a result of this operation;

- Developed outbound targeting rules that help identify previously unknown terrorists and co-travelers or associated persons;
- Provided outreach training to over 500 CBP officers, Border Patrol agents and management representatives at POEs, Border Patrol sectors and the Air and Marine Operations Center (AMOC);
- Enhanced successful collaboration with the Government of Mexico through the NTC-C Fellowship program, which resulted in several large narcotic and precursor seizures;
- Significantly expanded creation and dissemination of advanced information on cargo shipments. Research resulted in the creation of vast amounts of TECS enforcement records, ATS rules and notes, Intelligence and Operations Framework System (IOFS) events, and memoranda of information received (MOIRs). The number of positive TSDB-connected business locations in the United States identified in FY 2010 was nearly triple that of FY 2009 – jumping from 676 to 1,686, with 135 foreign TSDB locations identified;
- Conducted expanded research in connection with various terrorist threats and incidents, including connections to the failed Christmas Day and Times Square bombers;
- Successfully identified several high-risk imports connected to TSDB subjects, their associates, and registered business links. Research identified multiple business fronts, including dollar stores, cellular telephone stores, retail stores, auto part sales organizations, food services, and online merchant businesses which may be used to collect, funnel, or launder illicit proceeds;
- Increased CSI/SFI bill review by more than 50 percent, resulting in seizures of al Qaeda computer hard drives, shipments from WMD sanctions violators, military armament (a tank/firearms), illegal fireworks, pre-Colombian cultural artifacts, counterfeit merchandise, and narcotics;
- Provided research leading to an 74 percent increase in the value of NTC-C related narcotics seizures – from \$41 million in FY 2009 to \$1.912 billion in FY 2010;
- Initiated Special Project Pillbox to target shipments of counterfeit and illegal pharmaceuticals in express consignment, international mail, and air cargo shipments;
- Enhanced participation in the NTC-C, Drug Enforcement Agency (DEA) Precursor Initiative with ICE to increase the number of precursor chemical seizures by more than 20 percent, and the value of precursor seizures by 96 percent;
- Improved screening of travelers whose visas have been revoked post the issuance of a valid visa to ensure that they do not board a flight destined to the U.S. by implementing the visa vetting program;
- Expanded communication with the National Risk Assessment Center (NRAC) to enhance sharing of cargo-related information; and
- Identified 107 incidents in ASI for travel from the European Union to the U.S. with fraudulent documents, of which 61 were offloaded prior to their departure. The fraudulent documents included counterfeit and altered documents, or documents presented by an impostor.

FY 2011 goals include:

- Develop a national Counter Terrorism Response Team (CTR) training program in an effort to standardize policies, coordination, and reporting requirements for field officers;
- Continue to develop and refine outbound targeting rules designed to identify the travel of previously unknown terrorists and co-travelers;
- Implement the ATS device to all IAP locations and JSP officers stationed in Mexico;

- Increase collaborative efforts between NTC-C, ICE and DEA to combat narcotic and precursor trafficking by enhancing data-sharing and liaison exchanges;
- Continue to work with TSA to provide expertise and specialized support for its No Fly list responsibilities;
- Provide support as needed for continued expansion of the Global Advance Passenger Information initiative and IAP to additional countries;
- Create a joint CBP/TSA Pre-departure Air Cargo Targeting program at the NTC-C. Air cargo manifests will be provided by air carriers with sufficient time for review of the data and for NTC-C to prepare a high risk assessment;
- Expand the NTC-C Fellowship program to include Mexico, the European Union, Canada, and the United Arab Emirates (UAE);
- Increase collaborative efforts between NTC-C, ICE and DEA to combat narcotic and precursor trafficking by enhancing data-sharing and liaison exchanges;
- Continue to work with TSA to provide expertise and specialized support for its efforts in targeting air cargo in the domestic environment through ATS and related systems; and
- Foster collaboration with U.S. Citizenship and Immigration Services (USCIS) and ICE to identify and interdict individuals smuggling/trafficking persons for sex industry purposes. The ICE Child Exploitation Unit will assign a liaison at the NTC-P, who will work with NTC-P and ASI in identifying individuals engaged in sex tourism.

FY 2012 goals include:

- Deploy ATS to Border Patrol checkpoints;
- Further develop links within the Intelligence Community (IC) and continue to participate in IC working groups whose main goal is to streamline and facilitate the sharing of information to ensure the continued safety of the U.S. commercial passenger environment;
- Develop tools and methodology to make use of IC data and products in an unclassified environment for passenger targeting and law enforcement purposes;
- Improve in and outbound passenger targeting and case management by updating computer systems such as ATS-P and the IOFS and by ensuring that targeting algorithms are valid;
- Further expansion of the Pre-Departure Air Cargo Targeting program
- Further expansion of the NTC-C Fellowship program;
- Maintain dedicated pursuit of regulatory improvements of export laws to improve the interdiction of illegal exports of U.S. military technology, counter-proliferation and dual-use goods;
- Continue to support enforcement and regulatory changes as needed requiring trade entities to provide 10+2 data level transmissions of export shipment information 24 hours prior to export in sea environments, and four hours prior to export in air, rail and truck environments; and
- Expand current Human Trafficking Awareness programs, such as the Blue Campaign, to include training for airline representatives and additional exposure through use of media sources.

**Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses:
Training at the Ports of Entry
Program Performance Justification**
(Dollars in Thousands)

PPA: Training at the Ports of Entry

	Perm. Pos	FTE	Amount
2010 Actual	-	-	23,049
2011 Annualized CR	-	-	24,778
2012 Adjustments-to-Base	-	-	17,582
2012 Current Services	-	-	42,360
2012 Program Change	-	-	(4,526)
2012 Total Request	-	-	37,834

CBP requests \$37.834 million for At the Ports Training. The request includes:

- Increase for the transfer of \$21.552 million for the consolidation of mission support funding across all CBP PPAs into Management and Administration and training PPAs. This includes training funding from various PPAs.
- Increase of \$2.290 million to Field Operations to staff new POEs.
- Increase of \$342 thousand to National Targeting Center-Passenger.
- Increase of \$342 thousand additional canine units at POEs.
- Decrease of \$7.500 million in CBP Training programs as part of the government-wide initiative to reduce administrative costs known as the Administrative Savings Initiative as well as reductions from the Efficiency Review. This reflects a reduced requirement for basic training as the officer population matures and training requirements shift to intermediate and advanced training.
- Decrease of \$3.970 million as a Technical Adjustment to the FY 2011 base.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Training and Development (OTD) leads and directs CBP's training programs that meet the needs of a diverse and geographically dispersed workforce, and contribute to measurable outcomes and results. OTD establishes standards for designing, developing, delivering, and evaluating training. The office executes career development programs; basic and advanced training to all occupations; and supervisory, management, and executive development programs.

As CBP's hub for centralized leadership programs and direction of all CBP training programs, OTD prepares employees to carry out the core missions of CBP and continues to evolve to meet the needs of

DHS. By working with all CBP components to develop and deliver mission critical training, OTD prepares employees to protect America's frontline. OTD links to CBP's strategic goals to instill a law enforcement ethic that prepares them for the ever changing challenges of the field.

Field Operations Academy (FOA)

The Field Operations Academy is located at the Federal Law Enforcement Training Center in Glynco, GA. The Academy is responsible for the development and delivery of mission critical training across the agency. The FOA prepares CBP trainees to safeguard the American homeland at and beyond our borders. This academy trains CBP employees from the Office of Field Operations, Office of Air and Marine, and the Office of International Trade to protect the American public against terrorists and the instruments of terror. The FOA educates CBP trainees to enforce the laws of the United States while fostering our Nation's economic security through lawful international trade and travel to serve the American public with vigilance, integrity and professionalism.

Advanced Training Center (ATC)

The Advanced Training Center is an emerging facility, designed to serve the specialized training needs of CBP. Located in Harpers Ferry, WV, ATC provides a learning environment that emulates the CBP operating environment and provides firearms and intermediate force training, advanced, and leadership training to CBP employees throughout the agency. The ATC complex includes facilities that are identical to the land, sea and air ports of entry, as well as open areas and water features found along the border between the ports of entry.

CBP Canine Program

The Canine Program, with locations in El Paso, TX and Front Royal, VA, furnishes certified training programs based upon internationally recognized standards. Throughout the nation, the Canine Center provides training and certification to CBP Canine Instructors, Canine Handlers, and Detection Canines and provides training for various other local, state and federal agencies. These valuable canine resources enhance the agency's ability to combat terrorism, interdict narcotics and other prohibited contraband while facilitating and processing legitimate trade and travel within the core operational processes of CBP.

OTD/Use of Force Policy Division (OTD/UFPD)

The OTD/Use of Force Policy Division is responsible for the development, articulation and implementation of CBP use of force policy and related equipment. The OTD/UFPD seeks to research, evaluate, and procure the best possible equipment while providing comprehensive asset and resource management for tactical equipment and body armor. The OTD/UFPD has developed appropriate controls, standards, training, best practices, and policies in order to enhance the safety and performance of CBP's uniformed law enforcement officers and agents.

OTD/Leadership and Organization Development Division (OTD/LODD)

The OTD/Leadership and Organization Development Division designs, develops, delivers, and evaluates training and development activities for CBP supervisors, managers, and executives. The OTD/LODD provides advanced leadership/supervisory/management courses to meet organization, occupation, and individual needs. The OTD/LODD is also initiating the establishment of a succession management and career development process.

OTD/Operations Division (OTD/OPS)

The OTD/Operations Division manages the financial resources, focuses planning and policy, and performs assessments and evaluations with links to the National Training Plan (NTP), also under Operations. The Division is also responsible for managing CBP's national programs including: CBP Tuition Assistance, New Employee Orientation, and Cross Occupational Training.

OTD/Training Production and Standards Division (OTD/TPSD)

The OTD/Training Production and Standards Division establishes and enforces a standardized instructional systems development process for delivering training throughout CBP. In coordination with CBP organization, OTD develops a variety of training courses and curriculum designed to meet the needs of the agency while adhering to instructional design standards. Training includes instructor-led training, on-the-job training programs, and distance learning through CBP's Virtual Learning Center and tracking through the TRAEN system.

Other Training

OTD sponsors other basic and specialized training programs for various occupations within CBP. These training programs are funded through the NTP but are often coordinated with other NTP Training Leads, CBP organizations, and program managers for scheduling, facilities, instructors, etc.

2012 Program Change	-	-	-
2012 Total Request	24,305	24,305	3,530,994

CBP requests \$3.531 billion for Border Security and Control. The request includes:

- Increase of \$191.459 million for annualization of FY 2010 Border Security Supplemental.
- Increase of \$184.717 million to adjust for journeyman implementation and pay costs.
- Increase of \$12.526 million for annualization of FY 2010 & FY 2011 initiatives; FY 2010 Combating Southbound Firearms & Currency Smuggling initiative (\$932 thousand) and FY 2011 Intelligence Analysts staffing (\$11.594 million).
- Increase of \$11.547 million as a Technical Adjustment to the FY 2011 base.
- Decrease for the transfer of \$350.309 million for the consolidation of mission support funding across all CBP PPAs into Management and Administration and training PPAs. This includes human resource management, conduct and integrity, information technology, administration, executive and business support and training.
- Decrease of \$31.49 million for the annualization of the President's initiative to freeze pay at the FY 2010 levels.
- Decrease of \$22.742 million in areas involving travel, training, the acquisition of supplies, equipment and Transportation contract towards the government-wide initiative to reduce the administrative costs known as the Administrative Savings Initiative as well as reductions from the Efficiency Review.

CURRENT SERVICES PROGRAM DESCRIPTION:

The National Border Patrol Strategy articulates one clear, strategic mission for the Border Patrol: To establish and maintain control of the border of the U.S. between the POEs. This strategy ensures that the Border Patrol deploys the appropriate mix of resources and employs appropriate tactics with the end state objective of consistently being able to detect, identify and classify, respond, and resolve all

illegal entries. The strategic goal includes interdicting illegal aliens, smugglers, narcotics and other contraband entering the U.S. Since the terrorist attacks of September 11, 2001, preventing terrorists and terrorist weapons from entering the U.S. was added to the Border Patrol's strategic goal.

The Border Patrol developed five objectives to support the national strategy. Each objective further identifies the intended mission outcome and focus of the Border Patrol's operational planning and execution. The objectives are: (1) Establish a substantial probability of apprehending terrorists and their weapons as they attempt to enter illegally between the POEs; (2) Deter illegal entries through improved enforcement; (3) Detect, apprehend, and deter smugglers of humans, drugs and other contraband; (4) Leverage Smart Border Technology to multiply the effect of enforcement personnel; and (5) Reduce crime in border communities and consequently improve the quality of life and economic vitality of targeted areas.

The Border Patrol works to deploy the appropriate mix of resources – personnel, tactical infrastructure and technology in order to gain operational control of the border. Operational requirements are developed by the field managers and are added into the Operational Requirements Based Budget Process (ORBBP) system, a budget projection tool which produces the output levels of required personnel, tactical infrastructure and technology to achieve and maintain control of the borders.

CBP reached a staffing level of 20,679 Border Patrol agents as of December 31, 2010 and plans to hire additional agents in 2011 to reach a level of 21,370. CBP also plans to continue to add to its inventory of permanent tactical infrastructure and technology deployments on the border in FY 2011. In addition, CBP will continue to deploy resources, such as sensors and cameras, to increase the Border Patrol's ability to detect illegal entries and to provide greater situational awareness. In addition, the Border Patrol will continue to explore new tactical infrastructure, such as fences and vehicle barriers, to further enhance the Border Patrol's ability to secure the border.

The Border Patrol also uses the Alliance to Combat Transnational Threats (ACTT), Surge Operations, Forward Operating Bases (FOBs), and Traffic Checkpoints to gain and maintain control of the border. These are described below:

Alliance to Combat Transnational Threats (ACTT)

In September 2009, the Border Patrol initiated ACTT as the next stage of border operations along the Arizona border. ACTT utilizes a collaborative, cooperative enforcement approach that leverages the capabilities and resources of the DHS agencies in partnership with other federal agencies, and state, local, and tribal governments. The purpose of this initiative is to achieve increased levels of border security, a secure and safe border environment, reduced crime rate in affected communities, and improved quality of life for residents in the border areas.

ACTT operations have targeted the Arizona/Sonora border area with the objective to deny criminal organizations from operating along approximately 80 miles of the Arizona border. To maintain control of this focus area, additional agents have been detailed into this focus area for increased border control. The enhanced agents are also working in cooperation with other agencies including ICE, the Arizona Department of Public Safety, and with other CBP officers.

In July 2010, ACTT efforts began along the El Paso/Ciudad Juarez border area. The efforts included coordinating law enforcement efforts with intelligence sharing towards disrupting transnational criminal organizations movement of money, arms, people and the location of their safe havens. In addition, the Border Patrol increased coordinated efforts with the Government of Mexico as a unified response against these criminal organizations.

In FY 2010, nine 45-day iterations of ACTT deployments were completed. The 45-day temporary duty deployments have continued into FY 2011, with over 500 BP agents deployed to the Tucson Sector during early FY 2011. Ultimately, permanent Border Patrol agent positions will replace the temporary surge force. Tucson Sector permanent agent staffing levels will increase to 4,194 in FY 2011 (up 859 positions). These efforts so far have contributed to a reduction of Border Patrol arrests in Tucson Sector to 212,202 in FY 2010 from 241,654 in FY 2009. These efforts have also contributed to a reduction of marijuana seized by the Border Patrol in Tucson Sector to 1,033,227 lbs. in FY 2010 from 1,203,100 lbs. in FY 2009.

Surge Operations

The Border Patrol authorizes the implementation of surge operations to gain and maintain effective control of the border through improved enforcement. The Border Patrol's strategy for implementing surge operations across the Southwest Border is based on threats, risks, vulnerabilities, and the resources of partner agencies. These operations increase the probability of preventing terrorists and their weapons from illegally entering the U.S. between the POEs. They also assist in the reduction of crime in border communities. Surge operations are implemented to proactively address intelligence, seasonal migration, and smuggling trends.

Forward Operating Bases

Use of FOBs began to address remote crossing points that have historically been very difficult for agents to patrol due to the vast distances and the time involved to access these areas. FOBs have proven to be very beneficial to the detection and deterrence of illegal entries in the areas in which they have been deployed and are now utilized in areas wherever the Border Patrol has a need to extend its reach.

The use of FOBs directly supports the Border Patrol's mission of gaining, maintaining, and expanding effective control of the Nation's borders. There are approximately 14 FOBs currently operating along the border. As the Border Patrol continues to gain control of the border, illegal migration activities and smuggler tactics shift in an attempt to identify and exploit vulnerabilities in border security measures, particularly in the more remote areas of the border. Strategically placed FOBs afford a distinct advantage in that they provide a cost effective, secure staging facility that allows agents to be forward deployed in close proximity to the border – thereby improving Border Patrol's capability to rapidly respond to and counter these shifts in illicit cross-border traffic.

Traffic Checkpoints

The Border Patrol is tasked with securing the Nation's borders between the POEs using a multi-tiered enforcement strategy. A major component of this strategy includes the strategic placement of

checkpoints in tactical locations that contributes significantly to gaining effective control of the Nation's borders.

Traffic checkpoints are critical components of the Border Patrol's enforcement-in-depth border security strategy. There are currently 34 permanent traffic checkpoints along the border. This strategy was developed to maximize resources and to increase the certainty of arrest of anyone posing a threat to the United States. Border Patrol checkpoints are strategically located on routes of egress leading away from the border, thus, greatly increasing the Border Patrol's detection and interdiction capabilities.

A complete border security model that includes enforcement-in-depth creates an environment that denies, degrades and disrupts the criminal elements ability to exploit the infrastructure needed to conduct operations.

The checkpoints' impact forces the criminal element to take risks that would otherwise not exist, thus raising their cost of doing business. In locations where checkpoint operations have been established, criminal organizations cannot engage in illegal activity in the border areas and then freely egress to their destination. They must instead utilize other tactics, such as using secondary staging areas and circumvention routes, which disrupt and degrade their operations and give the Border Patrol additional time and distance to detect, deter, and interdict them.

Border Patrol is successfully implementing this strategy in a variety of locations, such as the Interstate 19 (I-19) corridor, the major route of egress from the Nogales, Arizona area. As a result, the majority of illegal cross border activity that takes place in the Nogales area seeks to make its way to the corridor in an effort to exit the border area. The strategic value of a permanent checkpoint on I-19 cannot be overstated. A continuous checkpoint operation on Interstate 19 (I-19) creates an enforcement profile that denies, degrades, disrupts, and deters the criminal element from utilizing I-19 as a route of egress.

As demonstrated by the I-19 checkpoint, the overall effect of enforcement-in-depth, to include checkpoints, deters illegal activity and reduces cross-border traffic and the crime associated with it. Sustained checkpoint operations have shown to not only reduce crime in adjacent communities, but contribute significantly to an overall reduction in cross-border criminal activity in the areas south of the checkpoints.

Safe, efficient, and effective enforcement operations along the border and routes of egress, to include effective checkpoint operations, are essential to a complete enforcement strategy which will lead to increased border security and an improved quality of life in border communities.

The Border Patrol also establishes and maintains effective partnerships, formal and informal, with other Federal, state and local law enforcement agencies, as well as other federal agencies that have an interest in the border regions. Further, the Border Patrol maintains international partnerships to enhance border security primarily with agencies of the governments of Mexico and Canada. A number of these partnerships are described below.

Operation Streamline

Operation Streamline is a zero-tolerance, prosecution-based deterrence initiative that attaches a penalty to the act of illegally entering the U.S. Operation Streamline was envisioned to address three components: arrest, prosecution, and removal. Under the concept of the Operation, the sector's Chief Patrol agent designates a specific geographic area as a zero-tolerance zone and focuses his resources to ensure a high probability of apprehension and criminal prosecution.

With the cooperation of the U.S. Attorney's Office and the U.S. Marshals Service, virtually all undocumented aliens apprehended within the designated geographic location are criminally prosecuted for their illegal entry under 8 USC 1325. The deterrent effect of this program has had pronounced results on the number of aliens attempting illegal entry/re-entry. By reducing the volume of illegal entries, the Border Patrol has greater flexibility to focus resources on apprehending terrorists, terrorist weapons, and smugglers of humans, drugs, and other contraband illegally entering the U.S.

Operation Streamline has proven to be beneficial and is a key component to achieving significant ground and effective control of the border. Operation Streamline has been showcased to both Federal and state Senators and Representatives, along with the public, as a best practice and effective utilization of existing resources.

Special Operations Group (SOG)

SOG is under the direction of the Border Patrol's Special Operations Command (SOC), and has two component units: Border Patrol Tactical Unit (BORTAC) and the Border Patrol Search, Trauma and Rescue Unit (BORSTAR) – each responsible for a different skill set, but often working in close coordination with each other to adequately address an all threats mission profile, both nationally and internationally.

In 2007, the Border Patrol established, and continues to build upon, the SOG Headquarters element with full deployment capability on Biggs Army Airfield (AAF) in El Paso, Texas. Agents assigned to this office are routinely deployed throughout the U.S. in support of the Border Patrol National Strategy and are at the ready to address emergency support functions (ESFs) for national level incidents, as outlined in the National Response Framework. The SOG facility has classrooms, a new rappel tower, an obstacle course, and a live fire multi-building training complex located at McGregor Range, New Mexico.

BORTAC remains CBP's premier tactical response team. BORTAC is summoned for difficult and high-risk missions. BORTAC trained its active personnel on their Mission Essential Tasks List and hosted numerous advanced skills training sessions. BORTAC has performed joint SOG missions and worked in conjunction with multiple local, state and federal law enforcement agencies in both training and operational environments. In the future, BORTAC will continue to train its members to improve its readiness for response to threats of national security.

BORSTAR is comprised of Border Patrol agents with specialized and advanced skills and training for the tactical medical and search and rescue environments. In addition to proficiently conducting the primary duties of a Border Patrol agent, BORSTAR agents have additional training in search and

rescue, emergency medical treatment, rope rescue, water rescue, incident command management, communications, and tactical medical interventions. BORSTAR provides rapid response to search, rescue, and medical response to acts of terrorism, potential terrorism, and natural disasters throughout the U.S. and abroad. These duties are often in conjunction with local, county, state, and federal entities.

OBP SOG, in coordination with OIOC, has established Law Enforcement Technical Collection Centers (LETCS) to improve intelligence collection and dissemination capabilities among the 20 sectors that comprise the field headquarters element. By establishing best practices, the methodologies used to collect, analyze, and disseminate actionable intelligence will be streamlined and standardized.

The possibility of widespread bio-terrorism and other pandemic perils remains a paramount concern for CBP and other federal, state, and municipal entities. Border Patrol is a major participant/facilitator in the CBP Continuity of Operations Plan (COOP) and will continue to build on established partnerships in an effort to rapidly respond and mitigate the impact of a catastrophic incident, be it an act of terrorism or a natural disaster.

Border Patrol International Liaison Unit (ILU)

The ILU creates and maintains positive working relationships and to foster alliances with foreign counterparts in order to increase border security. The alliances established will maintain open communications and mutual respect with and between foreign and domestic law enforcement counterparts. The ILU builds partnerships and enhances border security awareness in support of the National Border Patrol Strategy.

The ILU also paved the way to programs like the Operation Against Smugglers Initiative on Safety and Security (OASISS). The OASISS program was developed to address the increasing amount of alien smugglers across the Southwest Border. The U.S. and Mexico established a bilateral, standardized prosecution program in 2005. The program allows for alien smugglers apprehended in the U.S. to be prosecuted by the Government of Mexico. This program is very effective in areas along the Southwest Border that are affected by guidelines that make it difficult to prosecute certain alien smuggling cases. OASISS has proven to be an invaluable tool to the Border Patrol. It also rewards the efforts of the agents by giving them another tool to be able to put criminals behind bars.

The liaison efforts with Mexican authorities that have occurred and continue to take place along the Southwest Border have essentially bridged the communication gap between the U.S. and Mexico. This is an extraordinary accomplishment when one considers the economic vitality of the region and the political sensitivities between the two countries.

Border Patrol National Native American Program

The mission of the Border Patrol National Native American Program is to facilitate new partnerships, improve relationships, and increase trust throughout the Native American Indian tribes that have a nexus to the U.S. border. The program champions partnerships between tribal law enforcement, various Native American organizations, and the Border Patrol to support the national strategy. The Border Patrol National Native American Program is operational in 12 of the Border Patrol sectors.

The program acts as a conduit between the Border Patrol and tribal, local, state and Federal law enforcement agencies, as well as tribal councils located along both the Southwest and Northern Borders.

The program was designed to support ongoing enforcement operations within the respective agencies, while enhancing the liaison between them. As the relationship solidified, contact and responses to illicit activity along the borders has increased, allowing for joint law enforcement support for both Border Patrol and tribal law enforcement. Routine communication and liaison between some sectors and tribal council officials has led to enhancing the security and safety of the agents who are working in dangerous areas along the border. Through the Border Patrol National Native American Program, information-sharing efforts have allowed the Border Patrol sectors to conduct All-Terrain Vehicle training, search and rescue training, advanced four-wheel-drive training, and vehicle stops.

The Border Patrol National Native American Program is working to standardize policies and procedures and is proactively developing performance measures for the program to evaluate and measure the effectiveness of its initiatives.

Borderlands Management Task Forces (BMTF)

These task forces were created to facilitate an intergovernmental forum for cooperative problem-solving on common issues related to the international border. The primary mission is to address border security, human safety, and natural and cultural resource protection through shared resources, information, communication, problem-solving, standardization, and training. The goals of the BMTF are the following:

- Create a positive, intergovernmental working relationship and foster support among agencies charged with border responsibilities;
- Create mutually beneficial solutions to resource management issues within the border area;
- Provide expertise, experience and information to address common border issues; and
- Educate our agencies and interested parties about border issues and recommendations for the implementation of possible solutions.

An integral part of the BMTF is the participation of the Sector Public Lands Liaison agents (PLLA).

The PLLA works to foster better communication, increase the interagency understanding of respective mission objectives and priorities, and serve as a central point of contact within the Border Patrol to facilitate the successful resolution of environmental issues at the local level.

Adjustments to Base

Journeyman Increase

The budget request includes an additional \$229.1 million for the journeyman pay adjustment, because the original estimate included in the FY 2011 enacted level did not include the cost of the additional positions authorized in FY 2009 or beyond. These additional funds will allow CBP to maintain a level

of 21,370 Border Patrol agents, sustain the Administration's commitment of agents on the Southwest and Northern Borders, as well as provide support to coastal areas and headquarters.

Conclusion

In FY 2012, the Border Patrol will continue to further its mission by using a variety of programs and initiatives to support strategic objectives. A major future objective of the Border Patrol is to ensure that its workforce is highly mobile so that it can rapidly adjust to changes in the border security environment. The Border Patrol will continue to reevaluate its existing programs and planned initiatives as the threats and vulnerabilities to border security change in response to newly deployed border enforcement resources.

The Border Patrol is committed to continuing the southbound land border enforcement efforts to combat the smuggling of firearms and currency to Mexico.

FY 2010 accomplishments include:

- Hired an additional 439 agents; and
- Increased the number of border miles under effective control from 939 miles to 1,007.

FY 2011 goals include:

- Maintain effective control of 1,007 miles of border;
- Continue to disrupt transnational criminal organizations operating along the border;
- Increase end of FY 2010 staffing by 859 agents to arrive at an end state level of 21,370 agents
- Develop and implement Mobile Response Team (MRT) concept and begin training and support of 500 MRT designated agents
- Maintain Border Patrol agent staffing level at 18,415 on the Southwest Border;
- Maintain 2,212 Border Patrol agents along the Northern Border;
- Apply the proper resourcing, in conjunction with ACTT operations, necessary to reduce apprehensions in Arizona by 50 percent by the end of Calendar Year 2011;
- Strengthen existing partnerships with local, state, and other federal agencies;
- Expand participation in ACTT along the Southwest Border;
- Establish Northern Border priority intelligence requirements; and
- Leverage personnel and technology accrued from applying resources more efficiently to reduce the flow of known, illegal cross-border traffic along other areas of the border.

FY 2012 goals include:

- Maintain effective control of 1,007 miles of border;
- Complete training of 500 MRT assigned agents and maintain a minimum deployable MRT force of 500 agents;
- Maintain 21,370 agents including 2,212 on the Northern Border and 18,415 on the Southwest Border through a mix of new hires and relocations;
- Increase and sustain certainty of arrest of those who enter illegally at and between the POEs, and to reduce smuggling, and crimes associated with smuggling, in the state of Arizona;
- Continue strengthening existing partnerships with local, state, and other federal agencies;
- Continue expanding participation in ACTT along the Southwest, Coastal and Northern Borders; and

- Continue leveraging personnel and technology accrued from applying resources more efficiently to reduce the flow of know, illegal cross-border traffic along other areas of the border.

**Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses:
Training Between the Ports of Entry
Program Performance Justification**
(Dollars in Thousands)

PPA: Training Between the Ports of Entry

	Perm. Pos	FTE	Amount
2010 Actual	130	125	52,085
2011 Annualized CR	80	80	51,751
2012 Adjustments-to-Base	-	-	36,859
2012 Current Services	80	80	88,610
2012 Program Change	-	-	-
2012 Total Request	80	80	88,610

CBP requests \$88.610 million for Between the Ports Training. The request includes:

- Increase for the transfer of \$59.653 million for the consolidation of training funding from across CBP PPAs.
- Increase of \$440 thousand for annualization of FY 2010 Border Security Supplemental.
- Decrease of \$15.472 as a Technical Adjustment to the FY 2011 base.
- Decrease of \$7.50 million in training programs towards the government-wide initiative to reduce the administrative costs known as the Administrative Savings Initiative as well as reductions from the Efficiency Review.
- Decrease of \$262 thousand for the annualization of the President’s initiative to freeze pay at the FY 2010 levels.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Training and Development leads and directs CBP’s training programs that meet the needs of a diverse and geographically dispersed workforce, and contribute to measurable outcomes and results. OTD establishes standards for designing, developing, delivering, and evaluating training. The office executes career development programs; basic and advanced training to all occupations; and supervisory, management, and executive development programs.

As CBP’s hub for centralized leadership programs and direction of all CBP training programs, OTD prepares employees to carry out the core missions of CBP and continues to evolve to meet the needs of DHS. By working with all CBP components to develop and deliver mission critical training, OTD prepares employees to protect America’s frontline. OTD links to CBP’s strategic goals to instill a law enforcement ethic that prepares them for the ever changing challenges of the field.

Border Patrol Academy

The Border Patrol Academy in Artesia, NM prepares CBP trainees to safeguard the American homeland by engaging in the delivery of training for Office of Border Patrol personnel, producing agents who are prepared to serve. The BPA provides Border Patrol Agents with the training necessary to enforce the laws of the United States and to serve the American public with vigilance, integrity and professionalism.

Advanced Training Center

The Advanced Training Center is an emerging facility, designed to serve the specialized training needs of CBP. Located in Harpers Ferry, WV, ATC provides a learning environment that emulates the CBP operating environment and provides firearms and intermediate force training, advanced, and leadership training to CBP employees throughout the agency. The ATC complex includes facilities that are identical to the land, sea and air ports of entry, as well as open areas and water features found along the border between the ports of entry.

CBP Canine Program

The Canine Program, with locations in El Paso, TX and Front Royal, VA, furnishes certified training programs based upon internationally recognized standards. Throughout the nation, the Canine Center provides training and certification to CBP Canine Instructors, Canine Handlers, and Detection Canines and provides training for various other local, state and Federal agencies. These valuable canine resources enhance the agency's ability to combat terrorism, interdict narcotics and other prohibited contraband while facilitating and processing legitimate trade and travel within the core operational processes of CBP.

OTD/Use of Force Policy Division

The OTD/ Use of Force Policy Division is responsible for the development, articulation, and implementation of CBP use of force policy and the related equipment. OTD/UFPD seeks to research, evaluate and procure the best possible equipment while providing comprehensive asset and resource management for tactical equipment and body armor. OTD/UFPD has developed appropriate controls, standards, training, best practices, and policies in order to enhance the safety and performance of CBP's uniformed law enforcement officers and agents.

OTD/Leadership and Organization Development Division

The OTD/Leadership and Organization Development Division designs, develops, delivers, and evaluates training and development activities for CBP supervisors, managers, and executives. OTD/LODD provides advanced leadership/supervisory/management courses to meet organization, occupation, and individual needs. The OTD/LODD is also initiating the establishment of a succession management and career development process.

OTD/Operations Division

The OTD/Operations Division manages the financial resources, focuses planning and policy, and performs assessments and evaluations with links to the National Training Plan, also under Operations. The Division is also responsible for managing CBP's national programs including: CBP Tuition Assistance, New Employee Orientation, and Cross Occupational Training.

OTD/Training Production and Standards Division

The OTD/Training Production and Standards Division establishes and enforces a standardized instructional systems development process for delivering training throughout CBP. In coordination with CBP organizations, OTD develops a variety of training courses and curriculum designed to meet the needs of the agency while adhering to instructional design standards. Training includes instructor-led training, on-the-job training programs, and distance learning through CBP's Virtual Learning Center and tracking through the TRAEN system.

Other Training

OTD sponsors other basic and specialized training programs for various occupations offered CBP-wide. These training programs are funded through the National Training Plan but are often coordinated with other NTP Training Leads, CBP organizations, and program managers for scheduling, facilities, instructors, etc.

2012 Program Change	-	-	-
2012 Total Request	1,919	1,919	287,901

CBP requests \$287.901 million for this activity. This request includes:

- Increase of \$6.648 million for annualization of FY 2010 Border Security Supplemental.
- Increase of \$829 thousand related to the on-going support of CBPs use of air and marine forces to secure the borders against terrorists, acts of terrorism, drug smuggling, and other illegal activity.
- Decrease of \$14.875 million for the consolidation of mission support funding across all CBP PPAs into Management and Administration and training PPAs. This includes human resource management, conduct and integrity, information technology, administration, executive and business support and training.
- Decrease of \$11.477 million as a Technical Adjustment to the FY 2011 base.
- Decrease of \$2.625 million for the annualization of the President's initiative to freeze pay at the FY 2010 levels.
- Decrease of \$228 thousand towards the government-wide initiative to reduce administrative costs known as the Administrative Savings Initiative as well as reductions from the Efficiency Review.

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP Office of Air and Marine (OAM) secures the borders against terrorists, acts of terrorism, drug smuggling, and other illegal activity by operating air and marine branches at strategic locations along the borders. Multi-mission aircraft with advanced sensors and communications equipment provide powerful interdiction and mobility capabilities directly in support of detecting, identifying and interdicting suspect conveyances, and apprehending suspect terrorists and smugglers. CBP OAM maximizes the capabilities

of air and marine assets through a cohesive joint air operations model for centralized command and control and a responsive and integrated control system for decentralized execution.

CBP OAM partners with numerous stakeholders in performing its missions throughout the continental United States and the Western Hemisphere. This includes domestic operations at the borders, source, transit and arrival zone operations, interior law enforcement support, and support to other agencies. Truly crosscutting within the Department and the Federal government as a whole, the unique capabilities of OAM serve as both a stand-alone entity and as a force multiplier.

In fulfilling the priority mission of CBP to protect the borders, CBP OAM's three main geographical mission Areas of Responsibilities (AOR) are: the Southwest, Northern, and Southeast/Coastal Borders (to include Caribbean corridors).

CBP continues protecting the American people and critical infrastructure by using an integrated and coordinated air and marine force of 1,919 personnel, including Air and Marine Interdiction Agents who patrol the skies, oceans, lakes, and rivers in some of the most demanding situations and conduct covert and overt operations to prevent illegal entry of weapons of terror, interdict illegal narcotics and prevent the illegal entry of undocumented aliens. Agents deploy to natural disaster areas to assist in nighttime operations and to fly low-level over adverse terrain. Agents also provide airspace security over national events including the Presidential Inauguration.

FY 2010 accomplishments include:

- Hired personnel to fill 24 new positions, bringing the total funded positions to 1,895. The new positions include program management personnel, headquarters operations planners and analysts, test and evaluation staff, engineers, and additional personnel for national air security operations in the field.

FY 2011 goals include:

- Continue to ensure that key headquarters personnel have the skills and technical background to support OAM programs and field offices; and
- Critical needs in key programs, like the Unmanned Aircraft Systems (UAS) Program, will be filled through internal position re-allocations and by managing attrition. As vacancies are created through retirements, OAM headquarters will determine if the position will be retained by the current branch/unit or re-allocated to fill higher priority needs.

FY 2012 goals include:

- Continue to ensure that key headquarters personnel have the skills and technical background to support OAM programs and field offices;
- Manage critical program and field operating branch/unit needs through position re-allocations and by managing attrition; and
- Continue to maintain 1,919 positions.

IV. Program Justification Changes

**Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes**
(Dollars in Thousands)

Program Increase #1: Data Center Migration
PPA: Headquarters Management and Administration
Program Increase: Positions: 0 FTEs: 0 Dollars \$33,385

Funding Profile

	FY 2010 Actual			FY 2011 Annualized CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	33,385
Total Request			9,700			26,600	-	-	33,385

Description of Item

CBP requests \$33.385 million for Data Center Consolidation that will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers for a central DHS management system in FY 2012.

Justification

The Data Center consolidation efforts will standardize IT resource acquisitions across components, and streamline maintenance and support contracts, allowing for less vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation include enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

FY 2012 data center development funding, to be managed through the DHS Working Capital Fund (WCF), will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers for central DHS management in FY 2012. The data center migration includes:

- Discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS Data Centers in FY 2011;
- Purchase of new equipment for placement in the DHS Data Centers as part of migration/transition efforts;
- Installation of equipment racks at the DHS Data Centers;
- Migration-related build-out of DHS Data Center infrastructure;

- Transition of disaster recovery/backup/COOP to DHS Data Centers; and
- Installation of infrastructure support as part of system migrations at the DHS Data Centers.

Impact on Performance (Relationship of Increase to Strategic Goals)

DHS Goal 3: Protect Critical Infrastructure

Objective 3.1: Protect and Strengthen the Resilience of the Nation's Critical Infrastructure and Key Resources

Objective 3.3: Improve Cyber Security

CBP Strategic Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel; Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of the appropriate mix of infrastructure, technology, and personnel; and Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders; Objective 2.1: Through the use of accurate advance information and modernized systems for cargo processing, expedite the processing of people, products, and conveyances at land border ports, airports, and seaports.

If funding is not provided, CBP will not have the additional capability to operate critical systems in multiple geographic locations during times of peace and national crisis, replicate and perform maintenance without impacting the mission, reduce our dependency on legacy architectures, or make our data more readily available to DHS and our intelligence partners.

Migration of CBP production systems to the DHS Data Centers will enable DHS to fulfill its mission, strategic goals and business objectives to create "One Network, One Infrastructure, and One DHS." Lack of migration will inflict a negative impact on CBP's ability to address DHS OIG findings related to CBP's disaster recovery posture, as outlined in *Disaster Recovery Planning for DHS Information Systems Needs Improvement*, OIG-IT-04-003, dated February 2005.

In alignment with DHS departmental goals to consolidate all component Data Centers into the DHS Data Centers, CBP plans to continue our transition leadership role to migrate as many systems as possible given the funding provided in FY 2012. This will help us to modernize and advance existing services, thus improving data and information sharing, as well as interoperability.

**Department of Homeland Security
U.S. Customer and Border Protection
Salaries and Expenses
Justification of Program Changes**
(Dollars in Thousands)

Program Increase #2: Enhancement to Conduct and Integrity
PPA: Headquarters, Management & Administration
Program Increase: Positions : 0 FTE : 0 Dollars : \$25,939

Funding Profile

	FY 2010 Actual			FY 2011 Annualized CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							3,600	3,600	1,348,862
Program Increase							-		25,939
Total Request	3,854	3,689	1,043,827	3818	3818	1,016,000	3,600	3,600	1,374,801

Description of Item

The \$25.939 million increase will provide funding for polygraphs, background investigations and periodic review investigations in addition to increasing integrity programs. CBP employs the largest federal law enforcement workforce in one of the highest threat environments. CBP's programs and initiatives sustain and improve the integrity of our law enforcement officers and weaken the power and influence of cartels and other transnational criminal organizations who attempt to infiltrate and otherwise corrupt our employees.

Justification

This increase will assist CBP in its ability to exercise oversight authority for all aspects of CBP operations, personnel, facilities, and the Counterintelligence Program, to include Cyber Security. IA's mission is to promote the integrity and security of the CBP workforce. IA conducts investigations of alleged criminal and serious non-criminal misconduct on the part of CBP employees, deploying a Comprehensive Integrity Strategy, which integrates prevention, detection, and investigation capabilities to deter and respond to corruption and serious misconduct in the CBP workforce. The Comprehensive Integrity Strategy employs improved personnel security screening of prospective CBP employees, as well as polygraph examinations of law enforcement candidates, application of behavioral and analytical research tools to identify integrity indicators of corruption, and an intelligence-driven investigative response to integrity events.

CBP anticipates nearly 6,300 periodic re-investigations will be performed in FY 2012.

Impact on Performance (Relationship of Increase to Strategic Goals):

The additional \$26 million will allow IA to make significant progress in the backlog of initiated periodic review investigations. The funding will also allow IA to maintain the out-year cost for the projected federally certified polygraph examiners and support staff to be hired during FY 2011 and FY 2012 to reach the goal of screening all CBP law enforcement applicants. Without the additional \$26 million CBP would be unable to maintain the current goals for research and analysis projects and investigative activities in support of the Commissioner's objectives to strengthen employee and integrity assurance; to implement a proactive anti-corruption investigative program within CBP; and to ensure that allegations are investigated thoroughly, objectively and in a timely manner. This activity is in direct support of DHS Strategic Mission 2: Securing and Managing Our Borders.

Description of Item

The CBP budget request includes an increase of \$19.7 million for the NCT-P. The requested resources will be used to hire 45 U.S. CBP officers and 20 support personnel, to support associated relocation and administrative expenses, and to make logistical and application enhancements to targeting efforts at the NTC-P. Below is an estimated cost break-out.

Staffing	\$7,848,517
Relocations	\$3,622,500
NTC-P Expansion Logistical Needs	\$2,047,183
Applications	\$2,781,800
Administrative expenses:	\$3,400,000
TOTAL Initiative costs	\$19,700,000

Justification

Since the attempted bombings of the Northwest Airlines flight #253 and Times Square, CBP targeting priorities and methodology have been re-engineered, and now address interdicting possible terrorists or other *mala fide* international travelers before they can board a flight destined to the United States. While these new targeting programs have been very effective, the re-structuring has caused a dramatic increase in the NTC-P workload leading to significantly increased overtime and temporary duty (TDY) staff augmentation costs.

NTC-P pre-departure vetting of passengers at foreign locations where CBP does not have an IAP presence keeps high-risk travelers from boarding flights to the United States. This program began in January 2010 and through close cooperation with the CBP Regional Carrier Liaison Groups, the airline

industry, as well as the local ICE and CBP Attachés, over 1,600 *mala fide* passengers have experienced 'refused boarding' on U.S. bound flights since the inception of the program.

NTC-P continues to provide 24/7 support for the expanded IAP program, which now has officers posted at ten airports in eight countries. Additionally, the new NTC-P ATT focuses on passengers departing from the United States. Since the outbound apprehension of the Times Square bomber and the increase in the number of watch-listed individuals, a new emphasis has been placed on outbound targeting operations.

The primary areas of concern are threats to civil aviation, subjects of the NCIC arrest warrants, and new efforts to identify previously unknown terrorists by their travel to remote areas where there are known terrorist training camps. The ATT is also involved in a joint international anti-narcotics smuggling operation that has resulted in the arrest of more than 80 cocaine and heroin couriers in the U.S., the U.K. and Nigeria since April 2010.

Other new NTC-P vetting initiatives include refinements to the General Aviation Hot List which targets high-risk travelers on private aircraft and increased support for the AMOC. NTC-P has also implemented the Visa Hot List for recurrent re-vetting of all recently issued U.S. non-immigrant visas against numerous law enforcement databases to identify persons who have become inadmissible to the United States subsequent to the issuance of the visa. Individuals with valid visas who match a record of interest are now referred to DOS for possible visa revocation. All of these new programs have been staffed by existing personnel and/or TDY staff augmentees. The requested funds are required to adequately address the 24/7 workload for these new targeting initiatives, as well as programs that previously existed.

Impact on Performance (Relationship of Increase to Strategic Goals):

The NTC-P is a 24/7 operation with the centralized mission of coordinating anti-terrorism targeting and supporting all CBP Anti-Terrorism activities. It provides research support and responds to inquiries from the field, conducts tactical targeting to identify actionable targets, develops ATS rules, and supports intelligence-driven special operations. NTC-P also coordinates inter-agency responses to emergent situations through the various on-site liaison officers and is in constant contact with the FBI Terrorist Screening Center. With greatly increased responsibilities since the Northwest Airlines incident and the attempted bombing in Times Square, the additional personnel requested are essential to ensure that all of the critical NTC-P targeting programs are sufficiently staffed.

CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

Description of Item

The \$43.1 million increase will increase staffing levels to accommodate new and expanded POEs, enhancing CBP’s ability to facilitate processing of legitimate travelers and cargo. In conjunction with the additional CBPOs, additional resources for canine operations will increase the seizures of unlawful items and help reduce wait times.

The CBP budget request includes an increase of \$39.7 million to hire 300 CBP officers. These officers will be assigned to new and expanded POEs that were constructed in accordance with CBP’s five-year modernization plan. The additional officers will provide much needed assistance to move closer to the CBPO staffing levels necessary at the new and expanded POEs.

The request includes an increase of \$3.4 million to hire 11 U.S. Customs and Border Protection Canine Enforcement officers (including one manager) and one support personnel, to support the CEP and provide assets and infrastructure upgrades. The requested funding will provide ten additional canine assets to the highest threat locations and support the associated infrastructure to maintain all existing OFO canine teams.

Justification

The five-year land-border POE modernization plan includes more than 30 new and/or expanded POEs at air, land, sea, preclearance and other locations which will require additional personnel beginning in 2012. For example, some of the facilities expected to open include the new North Terminal at the

Miami International Airport, the expansion of the World Trade International Bridge in Laredo, the new international terminal at the Atlanta International Airport, the expansion of the port in Blaine, Washington, the port renovation at the Detroit Windsor Tunnel and Donna, Texas and the Anzalduas, Texas Bridges. CBP must staff these new and expanded facilities in order to enhance the facilitation of legitimate travelers and cargo. Without additional personnel, the new POEs will have to be filled by reducing staff at existing locations where staffing is already declining, impacting the conduct of enforcement actions.

CBP officers are multi-disciplined and perform the full range of inspection, intelligence analysis, examination, and law enforcement activities relating to the arrival and departure of persons, conveyances, and merchandise at POEs. CBP's primary responsibility is to identify potential terrorists and instruments of terror and to perform layered enforcement activities relative to counter-terrorism. These enforcement activities prevent the entry of terrorists and instruments of terror, harmful pests and diseases, illegal drugs and contraband, illegal aliens, and importations/exportations contrary to law and trade agreements, from entering/exiting the United States. CBP personnel interpret the laws and regulations of a broad range of federal, state, and local agencies, relating to the admissibility of people, cargo, and conveyances.

The OFO Canine Program is the largest and most diverse law enforcement canine program in the country, with over 600 OFO canine teams working in land border environments, airports and seaports. OFO operates at 331 POEs which presents one of the greatest challenges for the Canine Program, to distribute the canine teams to the highest threat level areas.

The primary goal of the CBP Canine Program is terrorist detection and apprehension. The working CBP canine team is an invaluable tool, assisting in the detection and apprehension of persons attempting entry to organize and carry out acts of terrorism. The CBP Canine Program's secondary goal is detection and seizure of controlled substances and other contraband, often used to finance terrorist or criminal drug trafficking organizations. Another critical role for the CBP Canine Program is protecting America's food supply from the importation of food products that may contain harmful pests or disease. CBP canine teams also assist local law enforcement agencies when requested.

Supplementing the current number of teams will increase the canine presence in the highest threat level areas, adding both deterrent and detection capabilities to those locations, as well as the ability to respond rapidly to evolving threats. At this time additional canine resources are necessary to conduct searches both inbound and outbound, especially in high-risk areas such as our Southwest Border.

Enhancements to existing OFO canine infrastructure will also support construction modifications for kennel facilities, additional equipment and supplies, and providing for travel in times of urgent need.

Impact on Performance (Relationship of Increase to Strategic Goals):

This program increase will enable OFO to appropriately staff and maintain standard operations at existing and new POEs. Without an overall increase in CBP officers, OFO will need to realign staffing from other high priority areas to support the new and expanded facilities while managing a complex mission in critical high profile areas such as the Arizona and other Southwest Border target areas, the

National Targeting Centers, the Immigration Advisory Program, etc. The realignment of staff may impact CBP's goal of achieving reasonable wait times for travelers at POEs.

With only 600 canine teams to cover 331 POEs, it is imperative that CBP address the need for additional OFO canine resources to secure vulnerable areas at and beyond our borders. The POE program increase supports the following Goals and Objectives:

CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

Description of Item

The CBP budget request includes an increase of \$7.5 million to hire 11 CBP officers and pay the associated relocation and administrative expenses in order to expand the IAP in Paris, Abu Dhabi, Dubai and Amman.

Justification

The expansion of the IAP program will allow CBP officers to cover known individuals of interest (matches to the watchlist), and the unknown individuals identified through targeting and intelligence.

IAP is a part of CBP's layered risk-based approach to detect and prevent the entry of hazardous materials, goods, and instruments of terror into the United States. CBP launched the IAP in 2004 to enhance security by preventing potential terrorists and other high-risk passengers from boarding commercial aircraft destined for the United States. Today, the IAP significantly contributes to CBP's pre-departure screening efforts.

IAP is optimized in high volume or high target number locations where close coordination with the air carriers and host government is essential. Priority locations are airports where, due to the large number of security related targets TSDB hits, there is a strong need to have CBP officers on site. These locations are also most likely to be used by high risk passengers who are not watch-listed. Current IAP locations cover just over 32 percent of non-precleared passenger traffic and just over 31 percent of non-precleared passengers who are matches to TSDB records. Expansion to these additional four locations will increase IAP coverage by 2.6 percent to 35 percent of non-precleared passenger volume and will increase TSDB coverage by 26.2 percent to 57 percent of non-pre-cleared TSDB volume.

Impact on Performance (Relationship of Increase to Strategic Goals):

IAP enhances security by preventing terrorists and other high-risk passengers from boarding aircraft destined for the United States. The goal of the IAP is to protect air travel and improve national security. With this added security layer, CBP can reduce suspected overseas threats prior to the flight's departure, thereby avoiding delays, cancellations, or the diversion of flights destined for the United States. To carry out IAP, small CBP officer teams are deployed to work with foreign law enforcement and air carriers at key airports in host countries. IAP teams work collaboratively to identify high-risk passengers based on either advance targeting information or an assessment of a passenger's documents to provide air carriers with boarding recommendations. IAP extends the zone of security beyond the physical borders. This extended border strategy is essential to protecting our borders and implementing CBP's multi-layered security strategy. IAP supports the following Goals and Objectives:

DHS Strategic Goal: Protect our Nation from Dangerous People and Goods.

CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel

CBP Objective 1.2: Using a risk-based approach, deploy and employ the most effective inspection and scanning technology available at designated land border ports, airports, seaports, permanent Border Patrol traffic checkpoints, and international areas in which CBP operates to detect and prevent the entry of hazardous materials, goods, and instruments of terror into the United States.

Program Increase: #6 Maritime Security – Global Supply Chain Strategy
PPA: International Cargo Screening (CSI)
Program Increase: Positions: 0 FTE: 0 Dollars: \$7,500

Funding Profile

	FY 2010 Actual			FY 2011 Annualized CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							181	181	61,695
Program Increase							-	-	7,500
Total Request	189	182	145,477	181	185	162,000	181	181	\$69,195

Description of Item

The CBP requests an increase of \$7.5 million to conduct cargo screening pilot(s) to assess alternatives to the 100 percent maritime cargo containers originating outside the United States scanning mandate in the 9/11 Act and in the SAFE Act. The additional funding will enable CBP to better defend the country by implementing global supply chain security strategies to manage risks in the global supply chain system.

Justification

The national strategy for global supply chain security system hinges on three interrelated concepts – deterrence, protection, and resilience. The strategy addresses all modes of transportation; air, land and sea and builds upon the existing and ongoing supply chain security efforts of the U.S. government, our foreign partners, and the private sector.

The years since September 11, 2001, have witnessed numerous public and private sector approaches addressing these issues – such as the CSI, C-TPAT, the Megaports Initiative, and other U.S. efforts, as well as global initiatives such as the WCO’s SAFE Framework of Standards to secure and facilitate global trade (SAFE Framework), and the International Maritime Organization’s International Ship and Port Facility Security Code (ISPS).

The additional funding will be used to support activities to assess alternatives:

- Travel to conduct site assessments in foreign seaports of interest where there is currently not a U.S. Government (USG) presence to determine the security and infrastructure capabilities;

- Travel to engage foreign government officials, terminal operators and other private sector stakeholders on their willingness to partner with the U.S. Government on a pilot as an alternative to 100 percent scanning;
- Identifying weaknesses in the current movement of maritime cargo through the supply chain;
- Capacity building and training for willing partners;
- OIT enhancements to strengthen the current targeting systems and explore a regional hub concept to securing maritime cargo;
- Infrastructure enhancements/improvements and testing new scanning technology;
- Identifying specific opportunities for enhanced cooperation and collaboration with private sector stakeholders, foreign governments, and international organizations, to include international standard setting organizations; and
- Addressing the radiological and nuclear threat within the maritime cargo environment and consider linkages to similar supporting plans recommended for the air cargo environment.

Impact on Performance (Relationship of Increase to Strategic Goals):

Without the additional funding, CBP will have limited travel funds to conduct site assessments and meet with government officials and/or private entities regarding cargo screening. This may reduce partnership opportunities with foreign governments and CBP's ability to enhance targeting screening efforts. Additionally, it may reduce CBP's ability to develop capacity building and training with global foreign partners. Furthermore without the funding increase, CBP's capacity to identify potential areas of weakness within the maritime environment will be limited due to a curtailment of IT and infrastructure improvements. This would negatively impact CBP's ability to identify potential corrective action measures in the cargo screening environment

The cargo screening pilot program supports the following Goals and Objectives:

CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel

CBP Objective 1.2: Using a risk-based approach, deploy and employ the most effective inspection and scanning technology available at designated land border ports, airports, seaports, permanent Border Patrol traffic checkpoints, and international areas in which CBP operates to detect and prevent the entry of hazardous materials, goods, and instruments of terror into the United States.

Description of Item

Successful acquisition outcomes are the direct result of having the appropriate personnel with the requisite skills managing various aspects of the acquisition process. Between FY 2000 and FY 2008, acquisition spending by civilian agencies increased by 56 percent (in inflation-adjusted dollars). DHS is working to ensure its major acquisitions are effectively managed and that major programs are implemented in the most responsible and efficient manner possible. This includes having disciplined oversight processes and robust acquisition program management teams in place. DHS has assessed the current resident skills against a set of core acquisition management skills: a program manager, a systems engineer, a life cycle logistician, a business/financial manager and a contracting officer's technical representative, and determined that many of our major acquisition programs are deficient in several of these areas.

The President's March 4, 2009 Memorandum on Government Contracting required agencies to improve acquisition practices and performance by maximizing competition and value, minimizing risk, and reviewing the ability of the acquisition workforce to develop, manage, and oversee acquisitions appropriately. Subsequent guidance from the Office of Management and Budget, including memorandum M-09-25 *Improving Government Acquisition* issued July 29, 2009, and Office of Federal Procurement Policy's Memorandum of October 27, 2009 *Acquisition Workforce Development Strategic Plan for Civilian Agencies- FY2010-2014*, provided guidance to agencies to strengthen the acquisition workforce and increase the civilian agency workforce by 5 percent to more effectively manage acquisition performance. These funds will help ensure the future programmatic growth requirements for training, recruitment, and retention activities while helping us to attract and hire qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act.

In support of the administration’s emphasis on strengthening the Federal acquisition workforce, CBP requests \$3.452 million in FY 2012 to increase its acquisition workforce capacity and capabilities. The increase will mitigate the risks associated with gaps in either capacity or capability of the acquisition workforce and improve its effectiveness. The resources requested will be also be used to

- Increase the capability of the acquisition workforce by investing in training to close identified gaps in such areas as project management, negotiations, requirements development, contract management, and other key topics;
- Increase the effectiveness of the acquisition workforce by investing in improvements to systems that support the contracting function;
- Conduct an assessment of options for creating systems to maintain comprehensive acquisition workforce data and selecting the appropriate system; and
- Increase the effectiveness of the DHS’s centralized acquisition workforce training program comprised of certification and targeted/continuous learning developmental training opportunities.

The requested resources will also be used to add 26 positions critical acquisition professionals to several of the agency’s major acquisition program offices. By adding these personnel, CBP will ensure that each major program maintains a core cadre of experienced and competent systems engineers, logisticians, business and financial managers, senior cost analysts, and contracting officer’s technical representatives for effective contractor oversight. Below are the recommended positions:

Position	Positions	Program Office Supported
Systems Engineering	8	<ul style="list-style-type: none"> • Automated Commercial Environment (ACE) • Tactical Communications (TACCOM) • TECS Modernization • Border Patrol Facilities • Tactical Infrastructure • Fleet Management Program • Non-Intrusive Inspection Systems Program • Land POEs Modernization
Logisticians	9	<ul style="list-style-type: none"> • Automated Commercial Environment • Office of Technology Innovation & Acquisition (OTIA) • Strategic Air and Marine Program (StAMP) • Tactical Communications • TECS Modernization • Border Patrol Facilities • Tactical Infrastructure • Fleet Management Program • Land POEs Modernization
Business/Financial Managers	5	<ul style="list-style-type: none"> • Automated Commercial Environment • Tactical Communications • Border Patrol Facilities • Non-Intrusive Inspection Systems Program (NII) • Advance Passenger Information
Contracting Officer Technical Representative	2	<ul style="list-style-type: none"> • Office of Technology Innovation & Acquisition • CBP Component Acquisition Executive (CAE)
IT/Systems Architects	1	<ul style="list-style-type: none"> • Office of Technology Innovation & Acquisition supporting the Component Acquisition Executive
Cost Analysts	1	<ul style="list-style-type: none"> • Office of Technology Innovation & Acquisition supporting the Component Acquisition Executive
Total	26	

Justification

CBP recently participated in a department-wide of major program offices and Component Acquisition Executive organizations. This assessment identified both systemic and program-specific competency and skills gaps. The department is now addressing these gaps through a deliberative recruitment and training initiative to establish and maintain a “core” program management team, comprising the primary program management competencies identified in the table above, for all major programs and oversight offices. Development of the acquisition workforce mitigates risks associated with the current acquisition workforce gaps found in both the actual number of FTEs as well as necessary skill sets required to effectively manage our investment portfolio. These funds will help ensure the future programmatic growth requirements for training, recruitment, and retention activities while helping us to attract and hire qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act of 1974 (P.L. 93-400) 41 U.S.C. 423. Additionally, this increase addresses many of the major deficiencies identified by both the GAO and OIG regarding our acquisition workforce.

Impact on Performance (Relationship of Increase to Strategic Goals)

The FY 2012 funding request will help ensure:

- The future programmatic growth capacity for training, recruitment, and retention activities while attracting and hiring qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act. These funds allow CBP the ability to train, recruit, and retain at acceptable standards.
- The sustainability and availability of information technology systems and equipment in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

Description of Item

CBP requests \$20 million reduction OFO non-personnel mission support funds to ensure our highest priority capabilities are fully funded to achieve our core missions. The reduction is necessary to offset personnel costs increasing at a rate faster than general payroll inflation factors, for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and an increased cost in workforce benefits, such as retirement and healthcare.

Justification

The reduction will be made to non mission-critical expenses involving travel, training, contractual services and the acquisition of supplies which support areas such as the Southwest Border, outbound operations, and WHTI. These funding reductions will be targeted to selective operational areas in order to minimize the impact on critical border enforcement operations. Non mission-critical training and travel may be reduced and other cost reductions may include large-scale acquisitions of supplies in support of OFO’s mission.

Impact on Performance (Relationship of Increase to Strategic Goals):

The reduction in operating costs will enable OFO to support the highest priority of maintaining maximum agent at POEs. The sustainment of the officer workforce directly supports the DHS goals 2.1.1 for Securing and Managing Our Borders.

Program Decrease							-	-	(10,107)
Total Request	-	-	-	-	-	-	51,356	51,356	8,604,962

Description of Item

CBP is actively participating in the aggressive government-wide initiative to curb non-essential Professional Service contract spending. In accordance with this effort, the Salaries and Expenses appropriation account includes a reduction of \$10.107 million. The proposed reduction supports the President's message on fiscal discipline and spending restraint.

Justification

Professional services contracts include a wide variety of services many of which are mission critical and deliver core capabilities of the CBP workforce. These types of contracts help CBP deliver products on time, within cost and achieve effective results. These contract vehicles provide necessary skills not widely resident in CBP. While there are areas where we are bringing these skills in house, it is not good business practice in select areas, due to costs, workload fluctuations, etc.

Impact on Performance (Relationship to Strategic Goals)

In order to achieve the necessary savings, CBP will reduce usage of Professional Services contracts. Many of these reductions will be achieved through delayed, deferred or forgone activities. Specific service areas that may be impacted include Information Technology program management, performance of Reinvestigations, and finally diminished succession management and career development programs. To the greatest extent possible, CBP has avoided direct impacts to operations.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of laws relating to border security, immigration, customs, agricultural inspections and regulatory activities related to plant and animal imports; and transportation of unaccompanied minor aliens; purchase and lease of up to 8,000[4,500] (7,000 [4,000] for replacement only) police-type vehicles; and contracting with individuals for personal services abroad; [\$8,207,986,000]\$8,725,555,000, of which [\$3,274,000]\$3,274,000 shall be derived from the Harbor Maintenance Trust Fund for administrative expenses related to the collection of the Harbor Maintenance Fee pursuant to section 9505(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 9505(c)(3)) and notwithstanding section 1511(e)(1) of the Homeland Security Act of 2002 (6 U.S.C. 551(e)(1)); of which not to exceed \$45,000 shall be for official reception and representation expenses; of which not less than [\$298,152,000]\$287,901,000 shall be for Air and Marine Operations; of which such sums as become available in the Customs User Fee Account, except sums subject to section 13031(f)(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(f)(3)), shall be derived from that account; of which not to exceed \$150,000 shall be available for payment for rental space in connection with preclearance operations; of which not to exceed \$1,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security [; and of which not more than \$800,000 shall be for procurement of portable solar charging rechargeable battery systems]: Provided, That for fiscal year [2,011]**2012**, the overtime limitation prescribed in section 5(c)(1) of the Act of February 13, 1911 (19 U.S.C. 267(c)(1)) shall be \$35,000; and notwithstanding any other provision of law, none of the funds appropriated by this Act may be available to compensate any employee of U.S. Customs and Border Protection for overtime, from whatever source, in an amount that exceeds such limitation, except in individual cases determined by the Secretary of Homeland Security, or the designee of the Secretary, to be necessary for national security purposes, to prevent excessive costs, or in cases of immigration emergencies. **Provided further, That of the funds made available under this heading, \$3,451,510 shall be for strengthening the capacity and capabilities of the acquisition workforce (as defined by the Office of Federal Procurement Policy Act, as amended (41 U.S.C. 401 et seq.)), including the recruitment, hiring, training, and retention of such workforce and information technology in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.**

Note.--A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111-242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

Rent Mission Statement

CBP leases a substantial portion of its real property assets through GSA and also by direct lease delegation to non-federal sources. This PPA includes funds to support the rental of facilities, space, buildings, structures, and land along with rent-related building charges and services, including utilities and services provided by the Federal Protective Service (FPS). The Rent PPA supports the Office of Border Patrol, Office of Field Operations, Office of Air and Marine, and the Mission Support

Inspections, Trade & Travel Facilitation at POEs Mission Statement

The purpose of Inspections, Trade and Travel Facilitation at Ports of Entry (POEs) is to facilitate the flow of legitimate travel and trade across U.S. borders, while ensuring that threats to the United States are not allowed entry, using technology, intelligence and risk information, targeting, and international cooperation in the screening of entering international cargo and travelers and departing export cargo. This program reduces the potential of terrorists, instruments of terror, and contraband from entering our country, while facilitating the legal flow of people and trade by deploying CBP officers, agricultural specialists, and imports specialists to the ports of entry. The goal of this program is to improve compliance with trade regulations and other mandatory import/export guidance while increasing the security of the United States.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Salaries & Benefits	\$1,959,393	\$1,946,555	\$2,292,063	\$345,508

In FY 2012, salaries and benefits includes funding for 20,925 FTEs. In FY 2011, an increase of \$49,686,000 is FY 2010 carryover. In FY 2012, a decrease of -\$20,000,000 is an efficiency to Field Operations overtime. In FY 2012, an increase of \$9,179,000 is an annualization of the 2009 war supplemental for combating southbound. International Cargo Screening Mission Statement

International Cargo Screening (ICS), which includes CBP's Container Security Initiative (CSI) and Secure Freight Initiative (SFI), enhance the security of maritime containerized shipping from exploitation by terrorists. ICS's goal is three-fold: (1) to expand operations to new critical international seaports; (2) to secure and improve operations at existing ports; and (3) to encourage global efforts to enhance maritime container security through capacity building. Working with foreign administrations, CSI is designed to achieve a more secure maritime trade environment while ensuring the need for efficiency in global commerce. The three core elements of the program are: (1) establishing security criteria and identify high-risk containers; (2) scanning those containers identified as high-risk prior to arrival at U.S. ports; (3) using technology to quickly scan high-risk containers.

The SFI builds on the operational pillars of the DHS Container Security Initiative (CSI) and the Department of Energy Mega ports initiative to maximize radiological and nuclear screening of U.S. bound maritime containers in foreign ports of departure. It merges data from a next generation risk assessment screening program and an overseas integrated detection network with existing and new information regarding maritime containers transiting through the supply chain in order to create detailed records for CBP's risk management process to target maritime containers that pose a threat.

Other International Programs Mission Statement

The goal of Other International Programs is to extend the U.S. zone of security beyond U.S. Borders by promoting international border security and global standards. In this arena, CBP implements programs and initiatives that support the U.S. Government's objectives in anti-terrorism, border security, non-proliferation, export controls, immigration and capacity building. This program's efforts foster and facilitate legitimate international trade, increase compliance, build alliances to combat trans-national crime, reduce corruption, strengthen border controls, promote the rule of law and enhance economic stability throughout the world. This is accomplished through the development and maintenance of collaborative relations with foreign governments, the development of international strategies, and representation of CBP positions in various international forums, international technical assistance and training, and the negotiation of international agreements.

In FY 2012, CBP will pursue international partnerships to share best practices, exchange information and promote the facilitation of secure travel and trade; actively support implementation of the World Customs Organization framework; and implement initiatives to support an international immigration strategy to identify and interdict high risk travelers.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change

C-TPAT Mission Statement

The Customs-Trade Partnership Against Terrorism (C-TPAT) is a partnership between the Federal government and private industry. It is an effort that CBP has undertaken with the business community to secure the supply chain. The goal of C-TPAT is to develop and maintain a secure supply chain, from factory floor to port of entry, which enables CBP to facilitate trade and ensure safe and secure borders. C-TPAT is designed to use and enhance the security processes and procedures currently employed by the trade community and ensure that international shipments are not compromised or diverted by terrorists or their accomplices.

Trusted Traveler Program

CBP's trusted traveler programs enhance the agency's ability to expedite the process and facilitate known, low risk "trusted travelers" arriving into the United States by allowing CBP officers additional time to focus on higher risk, unknown travelers; develop and implement national policies related to trusted traveler programs; provide guidance to the field locations on the operation of trusted traveler programs; strategize the growth of current programs and the development and implementation of new programs; and respond to congressional and industry inquiries of trusted traveler program related matters.

Currently, CBP TTP has four programs – NEXUS, Secure Electronic Network for Travelers Rapid Inspection (SENTRI), Free and Secure Trade (FAST), and Global Entry.

Inspection and Detection Technology

The CBP reliance on Non-Intrusive Inspection (NII) technology to secure the borders has become more and more critical. In conjunction with CBP's many other initiatives (24-Hour and Trade Act rules, Automated Targeting System (ATS), Container Security Initiative (CSI), Customs-Trade Partnership Against Terrorism (C-TPAT) etc.), NII is part of a multi-layered approach which allows CBP to work smarter and faster in recognizing potential terrorist threats. These complementary layers enhance security and protect our nation.

CBP has long recognized that an adversary can defeat any single system or device. For this reason, CBP cannot rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood that a nuclear or radiological weapon, weapons grade material, illegal aliens or other contraband being smuggled across the United States borders will be detected. NII technologies are viewed as force multipliers that enable CBP officers to screen or examine a larger portion of the stream of commercial traffic while maintaining the flow of legitimate trade, cargo and travelers.

Since 9/11, NII technology has been the cornerstone of the CBP multi-layered enforcement strategy. Technologies currently deployed to our nation's land, sea and airports of entry include large-scale X-ray and gamma-ray imaging systems, as well as a variety of portable and handheld technologies, to include radiation detection technology.

Systems for Targeting

At the core of CBP's ability to achieve its critical border security objectives and maintain the flow of lawful commerce is CBP's ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law abiding travelers and commerce to continue to their destination without unnecessary delay. Legislation and regulatory action, such as the Trade Act of 2002 and the Safe Port Act, respectively, have made it mandatory to provide advance information about passengers and goods arriving in the U.S. CBP uses computer technology and rule-based applications to analyze the data provided on passengers and shipments arriving in the U.S. CBP applies its targeting methods against the data to determine which passengers or shipments need to be segregated for a closer look and possibly inspection.

The main platform CBP uses to analyze arriving passenger and shipment data is the Automated Targeting System (ATS). ATS is a web-based enforcement and decision support tool that is the cornerstone for all CBPs targeting efforts. ATS incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. In this way, ATS allows CBP officers to focus their efforts on cargo shipments and passengers that most warrant further attention. ATS standardizes names, addresses, ship names, and similar data so these data elements can be more easily associated with other business data to form a more complete picture of a passenger, import, or export in context with previous behavior of the parties involved. Every passenger and shipment processed through ATS is subjected to a real-time risk evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering.

National Targeting Center

The priority mission of the U.S. Customs and Border Protection's National Targeting Centers is to provide around-the-clock tactical targeting and analytical research support for CBP anti-terrorism efforts. The NTC facilities are primarily staffed by CBP officers, border patrol agents and field analysis specialists who are experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments. The NTC staff develops tactical targets from raw intelligence in support of the CBP mission to detect and prevent terrorists and terrorist weapons from entering the United States. NTC supports all CBP field elements, including CSI personnel stationed in countries throughout the world, with additional research assets for passenger and cargo examinations.

Training at Ports of Entry Mission Statement

The Office of Training and Development exists to develop and deliver basic, mid, and advanced level training programs for all CBP employees, especially mission critical occupations (e.g., CBP Officers, Agricultural Specialists, Imports Specialists, and Entry Specialists) at the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of combating terrorism, improving border security, improving inspection and control, and facilitating trade.

Border Security & Control Between POEs Mission Statement

The Office of Border Patrol (OBP) has been delegated with the authority and responsibility to deliver the Executive Branch Program for “Border Security and Control between the Ports of Entry.” The primary purpose of this program is to prevent the entry of terrorists and their instruments of terror, illegal immigrants, and contraband, while facilitating the legitimate flow of people, goods, and services on which the economy depends. The program will be accomplished through the judicious use of resources including personnel, surveillance technology, communications, transportation, facilities, and mission support activities.

Border Patrol agents deter uncontrolled entry into the interior of the U.S. by: the rapid detection, interception, and apprehension of illegal entrants at or near the border; interdicting or deterring illegal aliens, drug smugglers, potential terrorists and criminals from attempting illegal entry between ports-of-entry; and causing persons seeking admission into the U.S. to present themselves at designated ports for inspection.

Strategic issues and challenges evolve around integrating unique and broader enforcement authorities working to uncover systemic vulnerabilities that pose a threat to the Nation and its economy and work to eliminate vulnerabilities as quickly as possible. Through an array of investigative processes in the areas of smuggling, finance and national security, Border Patrol's OI is challenged to identify the people, materials, & funding essential to sustaining terrorist threats and criminal enterprises, and to disrupt and dismantle their operations.

The requested amount will help address Border Patrol's strategic challenges of disrupting terrorist threats and preventing potential terrorists and immigration violators from entering the country. More effective immigration enforcement will contribute to enhanced national security as well as greater deterrence.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Salaries & Benefits	\$2,788,220	\$2,979,102	\$3,142,753	\$163,651

In FY 2012, salaries and benefits includes funding for 24,305 FTEs. In FY 2011, an increase of \$70,214,000 is FY 2010 carryover. In FY 2012, an increase of \$904,000 is an annualization of the 2009 war supplemental for combating southbound. In FY 2012, an increase of \$10,000,000 is an annualization of the FY 2011 Intelligence Analyst Staffing enhancement. In FY 2012, an increase of \$176,964,000 is a technical increase required to meet Journeyman and pay costs increases. In FY 2012, a decrease of -\$152,574,000 is due to a transfer and consolidation of business support funding. In FY 2012, a decrease of -\$47,570,000 is an object class realignment. In FY 2012, an increase of \$139,197,000 is for the annualization of the FY 2010 Border Security Supplemental. In FY 2012, a decrease of -\$31,490,000 is an adjustment to compensate for the FY 2011 pay freeze. In FY 2012, an increase of \$138,434,000 as a technical adjustment to the FY 11 Base.

Training Between the Ports of Entry Mission Statement

The Office of Training and Development exists to provide core operational training for Border Patrol Agents whose primary responsibility lies between the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of safeguarding the borders of the United States. This training ensures that CBP is able to rapidly deploy a highly motivated, well-trained workforce, both on a temporary and permanent basis, who can quickly respond to potential terrorist threats, shifts in smuggling patterns and other national security threats.

Air and Marine Operations - Salaries Mission Statement

The purpose of Air and Marine Salaries is to apply the skills and expertise of CBP air and marine personnel to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States. Having aircraft and vessels along the borders reduces the quantity of drugs entering the U.S. and minimizes threat levels. The goal of this program is to deny the use of air, land and coastal waters for conducting acts of terrorism and other illegal activities against the United States.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Salaries & Benefits	\$267,191	\$275,872	\$282,125	\$6,253
<p>In FY 2012, salaries and benefits includes funding for 1,919 FTEs. In FY 2012, a decrease of -\$3,574,000 is due to a transfer and consolidation of business support funding. In FY 2012, an increase of \$6,647,000 is an object class realignment. In FY 2012, an increase of \$5,496,000 is an annualization of the FY 2010 Border Security Supplemental for unmanned aircraft systems. In FY 2012, a decrease of -\$2,625,000 is an adjustment to compensate for the FY 2011 pay freeze. In FY 2012, an increase of \$829,000 In FY 2012, a decrease of -\$520,000 as a technical adjustment to the FY 11 Base.</p>				
	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Travel	\$1,718	\$4,111	\$784	(\$3,327)
<p>In FY 2012, a decrease of -\$1,200,000 is due to a transfer and consolidation of business support funding. In FY 2012, a decrease of -\$330,000 is an object class realignment. In FY 2012, a decrease of -\$33,000 is for the Administrative Savings Initiative/Efficiency Review. In FY 2012, a decrease of -\$1,764,000 as a technical adjustment to the FY 11 Base.</p>				
	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Transportation of Things	\$979	\$1,848	\$1,695	(\$153)
<p>In FY 2012, a decrease of -\$46,000 is an object class realignment. In FY 2012, a decrease of -\$72,000 is for the Administrative Savings Initiative/Efficiency Review. In FY 2012, a decrease of -\$35,000 as a technical adjustment to the FY 11 Base.</p>				
	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
GSA rent	\$1	\$0	\$0	\$0
	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Other Rent	\$6	\$0	\$0	\$0
	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Communication, Utilities, and miscellaneous charges	\$277	\$305	\$137	(\$168)
<p>In FY 2012, a decrease of -\$7,000 is an object class realignment. In FY 2012, an increase of \$77,000 is an annualization of the FY 2010 Border Security Supplemental for unmanned aircraft systems. In FY 2012, a decrease of -\$238,000 as a technical adjustment to the FY 11 Base.</p>				

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Printing	\$24	\$28	\$0	(\$28)
In FY 2012, a decrease of -\$21,000 is due to a transfer and consolidation of business support funding. In FY 2012, a decrease of -\$7,000 as a technical adjustment to the FY 11 Base.				
	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Advisory and Assistance Services	\$1,925	\$1,316	\$0	(\$1,316)
In FY 2012, a decrease of -\$1,316,000 is a transfer for anticipated CR funding to reflect CBP's FY 2011 funding requirements				
	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Other Services	\$8,940	\$10,085	\$1,002	(\$9,083)
In FY 2012, a decrease of -\$4,669,000 is due to a transfer and consolidation of business support funding. In FY 2012, a decrease of -\$5,191,000 is an object class realignment. In FY 2012, a decrease of -\$43,000 is for the Administrative Savings Initiative/Efficiency Review. In FY 2012, an increase of \$904,000 is an annualization of the FY 2010 Border Security Supplemental for unmanned aircraft systems. In FY 2012, a decrease of -\$84,000 as a technical adjustment to the FY 11 Base.				
	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Purchase from Government Accounts	\$2,635	\$4,620	\$0	(\$4,620)
In FY 2012, a decrease of -\$1,635,000 is due to a transfer and consolidation of business support funding. In FY 2012, a decrease of -\$2,985,000 as a technical adjustment to the FY 11 Base.				
	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Research and Development	\$332	\$1,048	\$667	(\$381)
In FY 2012, a decrease of -\$25,000 is an object class realignment. In FY 2012, a decrease of -\$28,000 is for the Administrative Savings Initiative/Efficiency Review. In FY 2012, a decrease of -\$328,000 as a technical adjustment to the FY 11 Base.

1. FY 2010 Actuals reflects a transfer of Data Center Migration funding from CBP to DHS.				

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts are prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2013 budget.

Position Type	FY 2010 Actual		FY 2011 Pres. Budget		FY 2011 Annualization		FY 2011 Follow On		FY 2012 Increase		FY2010 – FY2012 DHS Balanced Workforce Strategy	
	Pos.	FTE	Pos.	FTE	Pos.	FTE	Pos	FTE	Pos.	FTE	Pos	FTE
IT Specialists (2210 Series)	256	179	0	0	0	0	656	536	800	656	800	656
General Administrative, Clerical, and Office Services (300-399 Series)	61	43	0	0	0	0	156	127	190	156	190	156
Other Series	3	2	0	0	0	0	8	7	10	8	10	8
Total	320	224	0	0	0	0	820	670	1,000	820	1,000	820

Note: CBP began OIT contractor conversions in FY 2011 and the additions of these new positions and FTE are reflected in the base.

FY 2012 DHS Balanced Workforce Strategy:

- No additional funding is required to hire Federal employees. OIT funds insourcing through re-alignment of contractor dollars to salaries expenses to effect an overall budget reduction
- The following amounts reflect cumulative planned reductions across all contracts affected:
 - \$4.3 million in FY 2010
 - \$29.8 million in FY 2011
 - \$38.0 million in FY 2012
- OIT insourcing efforts were initiated in FY 2009 with plans to insource 1,000 contractor positions by the end of FY 2012. With the implementation of the Balanced Workforce Strategy, as contracts are reviewed these numbers are subject to change.
- To date the focus has been on insourcing, not eliminations. Analysis continues as OIT implements its insourcing plans and incorporates the Balanced Workforce Strategy which may alter this focus moving forward.

Annualization of FY 2011 DHS Balanced Workforce Strategy

OIT funds insourcing through the object class code re-alignment of contractor dollars to affect overall budget reduction.

DHS Balanced Workforce Strategy Follow-On

No budget adjustments necessary at this time.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Border Security Fencing, Infrastructure, and Technology

I. Appropriation Overview

A. Mission Statement for Border Security Fencing, Infrastructure, and Technology (BSFIT):

The DHS border security mission, as outlined in the 2010 Quadrennial Homeland Security Review, is to prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful trade and commerce. This appropriation provides continued funding for the following initiatives:

- Establishing and managing comprehensive Tactical Infrastructure (TI) maintenance and repair activities to support fielded pedestrian and vehicle fencing, roads, tower sites, canal crossovers, ongoing vegetation removal and other similar efforts;
- Delivering detection and surveillance technology systems to gain situational awareness of activity at the border, and to provide law enforcement personnel tactical assistance in identifying and resolving illegal activity;
- Modernizing Tactical Communications (TACCOM) systems on the southwest border for improved operations and agent safety; and,
- Evaluating emerging technologies and innovative applications of existing technology for broad border security needs.

Reducing the flow of illegal traffic between the ports of entry depends on the appropriate combination of personnel, tactical infrastructure, and technology. Personnel are the most robust and adaptable of these resources, as Border Patrol agents conduct surveillance and respond to incursions. Tactical infrastructure, primarily focused on physical fencing, enhances the ability of personnel to respond by creating delays or by making it easier for agents to reach a particular area.

The Border Patrol primarily uses technology for detection and surveillance between ports of entry, enabling CBP to maximize its effectiveness in responding to and disrupting illicit activity. In other words, technology enhances situational awareness of the amount and types of illegal activity at the border, enabling officers to spend more of their time responding to incursions and less of their time detecting them.

The FY 2012 BSFIT request will fund acquisition, delivery, and sustainment of prioritized border security capabilities and services for the operational users, while responding to changing threats and evolving operational needs. Prior BSFIT appropriations were centered largely on the Secure Border Initiative Net (SBI*net*) program which focused on delivering an integrated surveillance and command and control system across the Southwest Border. The Department is implementing a more cost-effective mix of technology suited to the various geographical border regions of the Southwest Border. Although selected elements of the SBI*net* program are proving cost-effective for remote border

regions, the former “one-size-fits-all” strategy for the entire southwest border is no longer practicable or affordable.

The initial phase of the revised technology investment plan is focused on Arizona only (the Tucson, Yuma, and Casa Grande Border Patrol sectors); the Department is conducting further detailed analyses of the other Southwest Border regions and will submit the future plans when completed. The Department’s revised plan for Arizona technology leverages both previously procured American Recovery and Reinvestment Act (ARRA) investments for surveillance technologies, and FY 2011 continuing resolution funds. The FY 2012 appropriations request, therefore, is a continuation of the acquisition, delivery, and sustainment of the Arizona plan (projected to be completed in 3-4 years).

The following paragraphs amplify the Department’s FY 2012 BSFIT appropriations request for CBP’s major technology focus areas:

1. **Alternative (Southwest) Border Technologies.** This investment provides for border surveillance and related technologies prioritized for Southwest Border deployment, and implements initial DHS guidance for refocusing the *SBI_{net}* program. In January 2010, Secretary Napolitano ordered a quantitative, science-based assessment of CBP’s border security technology approach due to concerns over *SBI_{net}* Block 1 program delays and cost growth. Using the Analysis of Alternatives (AoA), the Office of Border Patrol (OBP) conducted an operational assessment of border surveillance technology in order to identify the appropriate mix of technologies required to gain situational awareness and manage the Arizona border area. The resultant Arizona technology investment plan is to acquire, deploy, and maintain a mix of agent-related technologies (e.g., night vision binoculars, etc.), mobile surveillance capabilities, integrated fixed tower sensor systems, as well as upgraded Border Patrol command centers with enhanced communications and situational awareness displays. FY 2012 funds will be used to deploy the first three (of five total) Integrated Fixed Tower (IFT) System deployments to Border Patrol stations’ areas of responsibility in Arizona.
2. **Other Technology Systems.** In addition to the Southwest Border technology investment, CBP will continue investment in Northern Border technologies to address prioritized security vulnerabilities, CBP will also continue to demonstrate and evaluate promising existing technology solutions to address operational requirements as they are identified.
 - **Northern Border Projects.** Requested FY 2012 funds will be invested in technology systems to address security needs for the Northern Border maritime and cold weather environment. It will also deploy proven, stand-alone technology that provides immediate operational benefits. In FY 2012, CBP will complete deployment and transition to sustainment of the four Air & Maritime Domain Awareness project deployments: 1) maritime radar deployment; 2) Ku band satellite backhaul; 3) aircraft video downlinks; and 4) low flying aircraft detection sets. It is also anticipated that FY 2012 funds will be directed towards new investments on the Northern Border that will involve the detection and tracking of priority threats such as low flying aircraft and vessels on the Great Lakes. CBP will be investing in additional technology to provide agents and officers with enhanced situational awareness both at and between ports of entry, as well as technology to assist in the collection and exploitation of intelligence information. FY 2012 expenditures will include new investments in communications interoperability with Canadian law

enforcement officials as well as continued support of integration efforts such as the Operational Integration Center in Detroit.

- **Innovative Technology Applications.** In addition to addressing operational needs with proven technology capabilities, CBP will use FY 2012 funds to demonstrate and evaluate Department of Defense and commercial capabilities through the Innovative Technology Pilot Program. CBP also invests in open architecture development and modeling and simulation programs to assist requirements analysis.

3. **P-25 Tactical Communications (TACCOM) Deployments.** TACCOM is upgrading tactical communications radio systems employed by CBP Border Patrol agents, Customs and Border Patrol officers, and Air and Marine Interdiction agents nationwide to provide a robust, open architecture Project 25 (P25) based system. This system provides expanded coverage, capacity to serve a growing number of agents, Advanced Encryption System (AES) protection for secure voice communications, and interoperability with neighboring Federal, state, local, and tribal law enforcement agencies. These modernized communications tools provide improved operations and agent safety. In FY 2012, CBP will complete deployments to Houlton, El Paso, and Rio Grande Valley, as well as complete design and initiate deployment in Laredo.

4. **Tactical Infrastructure.** Tactical Infrastructure (TI) consists of programs and projects that facilitate agent access and provide persistent impedance and deterrence of illicit cross-border activity. Key components of TI include pedestrian fencing, vehicle fencing, roads, lighting, low water crossings, bridges, drainage and grate systems, marine ramps, and vegetation/debris removal. BSFIT will continue to fund operations, maintenance, and repair of existing Tactical Infrastructure in FY 2012.

B. Budget Activities:

The BSFIT appropriation is comprised of three major investment accounts (or Program, Project, and Activities (PPAs): Development and Deployment, Operations and Maintenance, and Program Management.

- **Development and Deployment**

Development and Deployment funds provide engineering, development, testing, construction and fielding of surveillance and detection technologies, including sensor systems, radars, and day/night cameras to improve the ability of CBP operational forces to detect, identify, classify, and track illegal entries and items of interest (IOIs) across all border environments. These sensor systems are deployed on fixed towers, mobile platforms (wheeled vehicles and aircraft), and through agent portable systems.

Finally, Development and Deployment funds also provide for related activities, such as technical support, systems engineering services, prime contractor program management and systems engineering, advanced technology development, operational test and evaluation support, and environmental planning, assessment and mitigation activities associated with fielding technology and tactical infrastructure.

- **Operations and Maintenance (O&M)**

Operations and Maintenance funds provide logistics support – supply, maintenance, and training services – to operate and maintain all border surveillance technology deployments as well as legacy surveillance and communication systems. A combination of government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, critical property, spare parts storage, inventory records management, field services, and training.

In addition, O&M provides maintenance and repair (M&R) services for all types of TI, both legacy and newly constructed, to include maintenance and repair of fences, gates, roads, bridges, drainage structures, grates, lighting, and electrical systems; vegetation management and control; and debris removal. O&M also includes the development and implementation of a tracking system to capture and store data so that future maintenance work can be better scoped and planned.

- **Program Management**

Program Management funds provide for the necessary government and support personnel; salaries, benefits, and associated expenses such as travel, leases and utilities.

To better inform future operational and budgetary decisions, the Border Patrol, which currently utilizes a variety of measurements (such as apprehensions and drug seizures), will continue to expand on those measures to provide additional information about effectiveness in securing the border. Additional quantitative data that include measures of violence along the U.S.-Mexico border, disrupted operations of transnational criminal organizations (particularly with regard to smuggling illegal drugs, weapons and currency), interdictions of unlawful entry and exit of people and goods, and estimates of the total flow of such entries will provide an even more robust picture of effectiveness and of the impact of additional enforcement activities. These new measures will be developed in FY 2011 and used to inform future budget decisions.

C. Budget Request Summary:

CBP requests 192 full time positions and \$527.623 million for FY 2012. The total adjustments-to-base is a decrease of \$606.385 million. This includes non-recurring decrease of \$390.629 million which had been the Development and Deployment current services level for the *SBI*net program. The request includes a program increase of \$337.0 million in Development and Deployment for:

- Alternative Border Technology based on the results from the *SBI*net AoA and Operational Assessment to restructure *SBI*net: \$242.0 million.
- Other BSFIT technology investments: \$55.0 million.
- Tactical Communications: \$40.0 million.

II. Summary of FY 2012 Budget Estimates by Program/Project Activity (PPA)

Department of Homeland Security U.S. Customs and Border Protection Border Security Fencing, Infrastructure, and Technology Summary of FY 2012 Budget Estimates by Program/Project Activity (Dollars in Thousands)

2012 Current Services	-	-	0
2012 Program Change	-	-	337,000
2012 Request	-	-	337,000

CBP requests \$337 million for Development and Deployment.

- Non-recurring of \$508 million which was the FY 2011 annualized CR funding level.

The request amount of \$337 million includes the following three program requests:

- Alternative Border Technology: \$242 million
- Other BSFIT Technology: \$55 million
- Tactical Communications: \$40 million

CURRENT SERVICES PROGRAM DESCRIPTION:

Development and Deployment funds provide engineering, development, testing, construction and fielding of surveillance and detection technologies, including sensor systems, radars, and day/night cameras to improve the ability of CBP operational forces to detect, identify, classify, and track illegal entries and items of interest (IOIs) across all border environments. These systems are deployed on fixed towers, mobile platforms (wheeled vehicles and aircraft), and through agent portable systems.

Development and Deployment also provides for related activities, such as technical support, systems engineering services; prime contractor program management and systems engineering; advanced technology development, Operational Test & Evaluation support, and environmental planning, assessment and mitigation activities associated with fielding technology and tactical infrastructure.

Starting in FY 2012, all development and deployment funding will be requested as a program change.

2012 Program Change	-	-	(2,866)
2012 Request	-	-	133,248

CBP requests \$133.248 million for Operations and Maintenance.

- Increase of \$1.423 million for annualization for 2010 Supplemental.
- Decrease of \$60.309 million due to cancelled deployments of *SBI*net Block 1 in Arizona
- Decrease of \$5 million towards the Efficiency Review to reduce administrative costs.
- Decrease of \$2.866 million for the DHS-wide initiative to achieve efficiencies in professional services contracts and apply these savings towards the highest priority requirements.

CURRENT SERVICES PROGRAM DESCRIPTION:

O&M funds are required to support border surveillance technologies and tactical infrastructure acquired with previous funding. The BSFIT O&M funding requirements include:

- Fixed and mobile surveillance and detection systems for improved detection and identification capabilities across all border environments, including radars, cameras, sensors, as well as P-25 tactical communications upgrades;
- Physical infrastructure that has been built, to include maintenance of tactical infrastructure roads, vehicle and pedestrian fences, port of entry barriers, lights, bridges, etc; the towers for technology and surveillance also require regular recurring maintenance, including the maintenance of access roads;
- Command, control, communications and IT systems, to include the Common Operating Picture (COP), case processing, intelligence systems and applications, wireless communications, Network/Security Operations Center; and
- System support analysis, call center operations, asset management, critical property, spare parts storage, management and inventory records, field services, maintenance, overhaul, and training.

Department of Homeland Security
U.S. Customs and Border Protection
Border Security Fencing, Infrastructure, and Technology:
Program Management
Program Performance Justification
(Dollars in Thousands)

PPA: Program Management

	Perm. Pos	FTE	Amount
2010 Actual	200	200	77,473
2011 Annualized CR	200	200	92,000
2012 Adjustments-to-Base	-8	-8	(34,499)
2012 Current Services	192	192	57,501
2012 Program Change	-	-	(126)
2012 Request	192	192	57,375

CBP requests \$57.375 million for Program Management. The request includes:

- Technical Adjustment of \$22.827 million to reflect realignment of FY 2011 annualized continuing resolution.
- Transfer of \$1.048 million and 8 positions to Salaries & Expenses appropriation to fund additional requirements for legal counsel on behalf of the BSFIT program.
- Decrease of \$355,000 in program management support, which reflects efficiencies that have been achieved through in-sourcing of Program Management personnel.
- Decrease of \$10 million towards the Efficiency Review to reduce administrative costs.
- Decrease of \$269,000 for FY 2011 Pay Freeze Adjustment.
- Decrease of \$126,000 towards the DHS-wide initiative to achieve efficiencies in professional services contracts and apply these savings towards the highest priority requirements.

CURRENT SERVICES PROGRAM DESCRIPTION:

The BSFIT Program Management funds provide for government personnel salaries, benefits, and associated expenses such as leases, utilities, and office operations. Specifically, the FY 2012 request provides for all government personnel in the Office of Technology Innovation and Acquisition (OTIA)—including the program management offices for the Alternative (Southwest) Border Technology, the Northern Border technology, and other technical support capabilities—plus the Tactical Infrastructure program management office in CBP Facilities Management and Engineering (FM&E) division, and the procurement (contracting) office personnel assigned to service these programs. The OTIA office has successfully recruited additional government acquisition/program management professionals, and in so doing, has been able to reduce contracted professional support services. Overall, the net savings are reflected in the reduced program management budget request above.

Additionally, the Program Management account historically reserves funds—consistent with prior years of congressional action in the BSFIT appropriation—for environmental mitigation projects designed to address adverse effects to flora/fauna habitats and species resulting from CBP tactical infrastructure construction or technology deployments in border regions. FY 2011 is currently the last year for fence

construction, and accordingly, CBP believes that beginning in FY 2012 significantly less environmental funding will be required commensurate with decline in major construction. CBP is requesting \$3 million of environmental mitigation funds for FY 2012.

IV. Program Justification of Changes

**Department of Homeland Security
Customs and Border Protection
Border Security Fencing, Infrastructure, and Technology:**
(Dollars in Thousands)

Program Increase 1: Alternative Border Technology

PPA: Development and Deployment

Program Increase: Positions ____ FTE ____ Dollars \$242,000

	FY 2010 Actual			FY 2011 Annualized CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Program Increase							0	0	242,000
Total Request	0	0	508,000	0	0	508,000	0	0	242,000

Description of Item

The FY 2012 request for \$242 million is designed to support the Arizona deployment strategy for Alternative (Southwest) Border Technology resulting from the Department’s AoA.

Justification

Arizona Border Surveillance Technology Plan

In January 2010, Secretary Napolitano, ordered a quantitative, science-based assessment of CBP’s border security technology approach, due to concerns over SBI^{net} Block 1 program delays and cost growth. Using the AoA, OBP conducted an operational assessment of border surveillance technology in order to identify the appropriate mix of technologies required to gain situational awareness and manage the Arizona border area. The assessment involved a rigorous comparison of technologies and an analysis of operational judgments to consider both effectiveness and cost.

The initial phase of the assessment focused solely on the Arizona border environment. The AoA, which examined awareness of border activity through various surveillance and detection technology, concluded that there was no “one-size-fits-all” solution; the optimal solution depends on the specifics of a given area—such as terrain, population, concept of operations, and enforcement tactics. Therefore, mixing and matching technologies can increase overall cost effectiveness in any given area.

The operational assessment separated the Arizona border into four areas of focus, each with its own recommended mix of technology. For example, the AoA concluded that in areas of rolling/rugged terrain, dense vegetation and moderate egress, the effectiveness of integrated fixed towers is comparatively high. Conversely, in urban areas, lower cost technology provides adequate capability and is more cost-effective.

The operational assessment provides a comprehensive technology proposal that includes a mix of technologies tailored to the requirements of each focus area. The proposal includes the following technologies: integrated fixed towers, Mobile Surveillance Systems (MSS), Remote Video Surveillance Systems (RVSS), Thermal Imaging Devices, Agent-Portable Surveillance Systems, Imaging Sensors, Unattended Ground Sensors, as well as a description of the air support required by the OAM. The system of integrated fixed towers will consist of surveillance, detection, identification, classification, tracking, and communications capabilities that are derived from radar, camera and sensor components on fixed towers, which will leverage lessons learned from the *SBInet* Block 1 system.

CBP has determined that this mix of mobile and stationary technology, tailored to the distinct terrain and population density of each border region, will provide the most efficient and cost-effective solution. FY 2011 funds are being used to purchase existing, proven, and mobile technologies, as discussed above, for deployment in Arizona. Building from the FY 2011 plan, the FY 2012 request will allow CBP to purchase integrated fixed towers and complete three deployments in Arizona at the Nogales, Douglas and Casa Grande border patrol stations' areas of responsibility).

New performance measures, being developed in FY 2011, will be used to measure the impact of the FY 2011 and 2012 investments in technology and be used to inform future operational and budgetary decisions regarding the mix of personnel, technology, and infrastructure along the border.

Impact on Performance (Relationship of Increase to Strategic Goals)

This request will be used to respond to the operational needs of OBP by delivering awareness of border activity through surveillance and detection to facilitate apprehension.

**Department of Homeland Security
Customs and Border Protection
Border Security Fencing, Infrastructure, and Technology:**
(Dollars in Thousands)

Program Increase 2: Tactical Communications

PPA: Development and Deployment

Program Increase: Positions 0 FTE 0 Dollars \$40,000

	FY 2010 Actual			FY 2011 Annualized CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	40,000
Total Request	-	-	508,000	-	-	508,000	-	-	40,000

Description of Item

The submission includes funding of \$40 million for TACCOM. This includes sustaining capabilities that have been deployed and the design and development of Houlton, Laredo, El Paso, and Rio Grande Valley Border Patrol sectors.

Justification

The currently approved program provides for deploying a P25-based system to Yuma, Tucson, El Paso, Rio Grande Valley, and Laredo Border Patrol sectors on the southwest border and to Houlton Border Patrol sector on the northern border. FY 2012 funds will be used to:

- Sustain deployed capabilities
- Complete the design and initiate development for Laredo Border Patrol sector
- Complete development and deployment for El Paso, Rio Grande Valley, and Houlton Border Patrol sectors
- Provide for Wireless Systems Program Office (WSPO) support, such as staff salaries, supplies, leases, travel and etc.

Impact on Performance (Relationship of Increase to Strategic Goals)

The TACCOM program is upgrading tactical communications radio systems employed by CBP Border Patrol agents, Air Interdiction agents, Marine Interdiction agents, and CBP officers nationwide to provide a robust, open architecture P25-based system. This system provides expanded coverage, capacity to serve the growing number of agents, AES protection for secure voice communications, and interoperability with Federal, state, local, and tribal law enforcement agencies. These modernized communications tools provide improved operations and agent safety.

	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	55,000
Total Request	-	-	508,000	-	-	508,000	-	-	55,000

Description of Item

The submission includes the funding of \$55 million in Development and Deployment for Other Technology Systems, which includes investments in the Northern Border Projects and Innovative Technology Pilots.

Justification

Northern Border Projects

CBP continues to make progress in the development of a comprehensive DHS Northern Border Strategy. Current Northern Border Projects consists of three main ongoing elements: Increment 1 – Northern Border Surveillance Project; Increment 2 – Northern Border Integration Demonstration; and Increment 3 – Air and Maritime Domain Awareness projects.

For Increment 1, the Northern Border Surveillance Project, three MSS units, consisting of truck-mounted sensor suites of day and night cameras and a radar, were deployed to the Swanton, Detroit, and Buffalo Sectors in mid-2009. In addition, RVSSs – day and night cameras with remote control (pointing) from a Border Patrol station (command center) – were recently deployed to Buffalo and Detroit Border Patrol sectors. Five new RVSSs along the Niagara River in the Buffalo Border Patrol Sector were accepted by the government in February 2010 and are currently being utilized by the Border Patrol, augmenting four existing RVSSs in Buffalo to expand coverage. RVSS deployments in Detroit Border Patrol sector call for 11 systems to be deployed along the St. Clair River. The government accepted 10 of the 11 Detroit Border Patrol sector RVSSs in April 2010, and these units are currently operational. Land rights issues delayed construction and deployment of the 11th and final RVSS in Detroit Sector. Deployment and acceptance of this RVSS is scheduled for January-February 2011.

Increment 2, the Northern Border Integration Demonstration, supports and enhances border security in the Detroit Area of Operations. The threats of concern in the Detroit area are similar to those that CBP and their mission partners must contend with along the Southwest Border. The threats of interest include, but are not limited to, terrorist activity, drug smuggling, contraband smuggling, human smuggling, and mala fide travelers. These threats represent significant challenges to border security in the Northern Border areas where sightlines can be significantly shorter, urban and wilderness environments can limit access, and natural barriers are not as great a hindrance. Increment 2 will provide CBP and their mission partners improved means of meeting these challenges through enhancing operational integration between agencies, more effective resource deployment, and by providing new technical tools to support the planning and execution of operations.

Increment 2 implementation is underway and operations started in the first quarter of FY 2011. The goals of the project are to provide operational integration of border security efforts in the Detroit area, improve detection capabilities in the vicinity of the St. Clair River area, and enhance the situational awareness for the CBP and their mission partners in the region.

Operational integration will be improved by developing and sustaining an Operational Integration Center (OIC) at Selfridge Air National Guard (ANG) Base. This OIC will provide a collaborative work area and communications capabilities for representatives of all components of CBP, United States Coast Guard, and other DHS organizations, Federal law enforcement agencies, state and local law enforcement, and Canadian officials. The OIC will provide surge capabilities to support collaboration among more than 40 personnel from different agencies. This includes law enforcement intelligence coordination.

The detection capabilities will be improved, through the addition of sensors, consolidation, and display of video feeds from multiple sources, and by providing downlink of video from OAM assets. The situational awareness capabilities will be enhanced through the integration of multiple information feeds at the OIC. These information feeds include selectable radar, camera, and tunnel feeds, Federal Aviation Administration and Department of Defense radar information, blue force location, database query, enhanced communications, chat capabilities, remote sensors inputs, and many other information services. This system will provide customizable views at each of the OIC workstations, allowing partners to gather and consolidate the information required to plan and perform their mission in the operational environment.

CBP is also launching Increment 3, the Northern Border Air and Maritime Domain Awareness program, with FY 2010 enacted funding of \$40 million. The objective of Increment 3 is to make balanced investments in filling capability gaps against priority threats in high threat areas across the northern border. The planned use of FY 2010 funding for Increment 3 is to pursue improvements in Air and Maritime surveillance, such as:

- Planning and preparing for the development and deployment of an initial capability for providing Low Flying Aircraft Surveillance;
- Beginning technology investigations, improvements, and integration with Maritime Radar systems, a P-3 Airborne Early Warning Pilot Program, and an Aircraft Video Data Link;
- Continuing development and deployment of Law Enforcement Technical Collection (LETC) systems and technologies; and
- Continuing integrated sensor evaluation, integrated mission planning and operations through the Detroit (Selfridge ANG Base) Operational Integration Center.

Included within the FY 2012 request is \$20 million to be used to continue and enhance previous demonstrations and deployments throughout priority locations along the northern border. The Northern Border team determines requirements incrementally based upon mission needs, operator input and available funding.

Innovative Technology Pilot Program

In addition to addressing operational needs with proven technology capabilities, CBP continues to demonstrate and evaluate Department of Defense and commercial capabilities through the Innovative Technology Pilot Program. CBP also invests in open architecture development and modeling and simulation programs to assist requirements analysis.

Impact on Performance (Relationship of Increase to Strategic Goals)

Requested FY 2012 funds will be invested in technology systems to address security needs for the Northern Border maritime and cold weather environment. It will also deploy proven, stand-alone technology that provides immediate operational benefits. These demonstrations and deployments explore how best to integrate various sensors, border security organizations, and mission operations in order to optimize border security in this challenging environment.

Department of Homeland Security
U.S. Customs and Border Protection
Border Security Fencing, Infrastructure, and Technology
Justification of Program Changes
(Dollars in Thousands)

Program Decrease Professional Services Initiative
PPA: Operations & Maintenance and Program Management
Program Decrease: Positions - FTE - Dollars -\$2,992

Funding Profile

	FY 2010 Actual			FY 2011 Annualized CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							200	200	193,615
Program Decrease							-	-	(2,992)
Total Request	-	-	-	-	-	-	200	200	190,623

Description of Item

CBP is actively participating in this aggressive government-wide initiative to curb non-essential Professional Service contract spending. In accordance with this effort, the BSFIT appropriation account includes a reduction of \$2.992 million. The proposed reduction supports the President’s initiative on fiscal discipline and spending restraint.

Justification

Professional services contracts include a wide variety of services, many of which are mission critical and deliver core capabilities of the CBP workforce, such as major acquisitions in border security technology and services. These types of contracts help CBP deliver products on-time, within cost and achieve effective results. These contract vehicles provide necessary skills not widely resident in CBP or to supplement existing capabilities. While there are areas where we are bringing these skills in house, it is not efficient in select areas due to costs, workload fluctuations, etc.

In order to achieve the necessary savings, CBP will reduce usage of Professional Services contracts. Many of these reductions will be achieved through delayed, deferred or forgone activities, although specific efficiencies were identified. CBP is also currently looking to broaden their acquisition workforce competencies and critical skills. As part of this of initiative, CBP will reduce reliance on support contractors.

Impact on Performance (Relationship to Strategic Goals)

To the greatest extent possible, CBP has avoided direct impacts to operations.

PPA Mission Statement

Operations and Maintenance funds provide logistics support – supply, maintenance, and training services – to operate and maintain all SBInet deployments and legacy surveillance and communication systems. A combination of government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, critical property, spare parts storage, management and inventory records, field services, and training.

In addition, O&M provides maintenance and repair (M&R) services for all types of TI, both legacy and newly constructed, to include maintenance and repair of fences, gates, roads, bridges, drainage structures, grates, lighting, and electrical systems; vegetation management and control; and debris removal. It also includes the development and implementation of a tracking system to capture and store O&M data so that future maintenance work can be better scoped and planned.

PPA Mission Statement

Development and Deployment provides for surveillance and detection which consist of sensor systems, such as Unattended Ground Sensors (UGS), radars, and day/night cameras to improve CBP operational forces' ability to detect, identify, classify, and track illegal entries and items of interest (IOIs) across all border environments. These sensor systems are deployed on fixed and relocatable towers, mobile platforms (wheeled vehicles and aircraft), and on the ground. Examples include newly developed systems, such as SBInet Block 1, and existing systems, such as the Remote Video Surveillance System and Mobile Surveillance System.

Development and Deployment also provides for Command, Control, Communications, and Intelligence (C3I) which includes sensor control and data processing, tracking, identification and classification, friendly (blue) force tracking, enhanced intelligence collection and analysis/dissemination tools, and shared situational awareness, i.e., Common Operating Picture (COP). This integrated network relies on upgraded and interoperable digital field communications, improved Command and Control (C2) facilities, an enhanced wireless communications network such as P-25 Tactical Communications, and network and security operations.

Development and Deployment funds Tactical Infrastructure (TI), built to create persistent impedance against illicit cross-border activity. TI includes pedestrian and vehicle fencing, roads, bridges, brush removal, and lighting installed in relevant areas to support border enforcement activities.

Finally, Development and Deployment provides for related activities, such as technical support, systems engineering services, prime contractor program management and systems engineering, advanced technology development, Operational Test & Evaluation support, and environmental planning, assessment and mitigation activities associated with fielding technology and tactical infrastructure.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Automation Modernization

I. Appropriation Overview

A. Mission Statement for Automation Modernization:

The continued modernization of U.S. Customs and Border Protection's (CBP) automated systems is critical to achieving CBP's mission of securing our nation's borders, while facilitating the flow of legitimate trade. CBP's automation regime comprises two large information technology structures: the Automated Commercial Environment (ACE) and the Critical Operations Protection and Processing Support (COPPS).

ACE represents the most ambitious automation effort CBP has undertaken. It has been developed and deployed in phases that have already yielded tangible benefits to CBP, other government agencies and the trade community. As ACE functionality is introduced, the associated segments of ACS will be replaced. Given the wide-ranging functions that ACE will automate, future phases will be designed to provide a useful segment of capability. As each segment is completed, users will have more robust, easy-to-use and accessible tools to aid in securing U.S. borders and targeting illicit goods.

CBP is also managing the operational availability of its infrastructure via COPPS, which provides nearly all the CBP information technology (IT) infrastructure necessary to operate and maintain mission-critical IT systems required to secure the borders while facilitating legitimate trade and travel. As part of COPPS, the Traveler Enforcement Compliance System (TECS) provides critical border enforcement and Port of Entry (POE) processing capabilities. These capabilities will be modernized through a multi-year project, TECS Modernization. TECS modernization will enhance CBP's passenger screening mission capabilities by developing and deploying a more effective TECS. Terrorism Prevention Systems Enhancement (TPSE) focuses on enhancing our system infrastructure and the supporting enterprise services that enhance our continuity of operations.

B. Budget Activities:

Automated Commercial Environment (ACE)/ International Trade Data System (ITDS)

ACE is an initiative designed to reengineer trade business processes and modernize the IT systems that support them. Initially, ACE was created in response to the Title VI of the North American Free Trade Agreement Implementation Act, (commonly referred to as the Modernization Act (Mod Act) of December 1993), to focus on import processing. Later, this would be followed by the inclusion of other elements of customs modernization, such as enforcement. An overarching goal of the Mod Act was to place a greater responsibility upon the trade community to comply with import requirements.

The terrorist attacks on September 11, 2001, changed ACE's focus from a multi-year modernization effort, to an initiative that would enhance national border security and expedite lawful trade by

allowing for unprecedented integration of information and communication between CBP, other participating government agencies (PGAs), and the trade community. This change in direction incorporated ITDS into the ACE initiative. ITDS assists PGAs in making use of ACE to support their border security, national safety, and international trade missions. Specifically, ITDS is the program that assists the PGAs as they prepare for, integrate their business requirements into, deploy, and sustain ACE. Additionally, ITDS provides guidance on the legal implications of PGA integration into ACE and serves as a forum for agency issues. Through ITDS, ACE will provide a “single window” for filing and facilitating the exchange of trade and transportation information to improve business operations and facilitate lawful trade. A total of 46 government agencies are currently participating in the ACE/ITDS initiative.

CBP has also aligned ACE with the DHS 2010 Quadrennial Homeland Security Review Mission 2: Securing and Managing our Borders. ACE will help reduce our Nation’s vulnerability to changing threats without diminishing economic security, by providing threat awareness, prevention, and protection for the homeland. Specifically, ACE will provide DHS personnel with more automated up-to-date tools and information to decide, before a shipment reaches U.S. borders, what cargo should be targeted because it poses a potential risk and what cargo should be expedited because it complies with U.S. laws.

Critical Operations Protection & Processing Support

The COPPS PPA provides funds for COPPS IT infrastructure, TECS modernization, and Terrorism Prevention Systems Enhancements (TPSE). COPPS provides nearly all the CBP IT infrastructure to operate and maintain mission-critical IT systems requisite to securing the borders while facilitating legitimate trade and travel. The infrastructure provides the support necessary for maintaining a reliable trade management system that maximizes compliance with the law, moves legitimate cargo efficiently, targets high risk shipments, helps secure our borders, facilitates movement of international travel and protects the public from contraband.

TECS Modernization is a multi-year project that will enhance CBP’s mission capabilities by developing and deploying a modernized TECS. TECS provides critical border enforcement and POE processing capabilities and is a key tool for the sharing of data information on inadmissible individuals. TPSE focuses on enhancing our system infrastructure and the supporting enterprise services that enhance our continuity of operations. TPSE will enable 24x7x365 systems operational availability to meet the future processing and storage/backup requirements for passenger screening while enhancing the existing systems.

C. Budget Request Summary:

CBP requests \$364,030,000 , 63 positions and 63 FTE for the FY 2012 Automation Modernization account. The request includes a \$20 million program increase to support the design and development of Cargo Release functionality in ACE. This funding, combined with \$15 million from carryover funds, will allow a useful segment to be completed providing ACE users with a new operational capability. This funding will facilitate faster cargo processing by providing CBP officers with security screening results and streamlining the process of separating high-risk cargo from low-risk cargo. It will also provide new cargo status querying capabilities, giving trade partners visibility into cargo screening

results and other government agency data requirements.

Both the PGAs and trade community have emphasized the importance of delivering Cargo Release.

Cargo Release functionality will incorporate the informational and operational requirements of more than 40 federal agencies into ACE via the ITDS initiative. It facilitates faster cargo processing by providing CBP officers with security screening results in ACE, streamlining the process of separating high-risk cargo from low-risk cargo. It will also provide new cargo status querying capabilities, giving trade partners visibility into cargo screening results, hold status and other government agency data requirements. It will also provide new electronic messages for other government agency data requirements, allowing the elimination of paper forms.

II. Summary of FY 2012 Budget Estimates by Program/Project Activity

**Department of Homeland Security
Customs and Border Protection
Automation Modernization**

Summary of FY 2012 Budget Estimates by Program/Project Activity
(Dollars in Thousands)

Program/Project Activity	FY 2010 Actuals		2011 Annualized CR		FY 2012 Request		Increase (+) or Decrease (-) For FY 2012					
	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	Total Changes		Program Changes		Adjustments-to-Base	
							FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT
ACE/ITDS	62	\$201,811	62	\$227,960	62	\$169,755	---	-\$58,205	---	16,764	---	-\$74,969
COPPS	1	\$213,363	1	\$194,485	1	\$194,275	---	-\$210	---	(3,165)	---	\$2,955
Subtotal, Enacted Appropriations and Budget Estimates	63	\$415,174	63	\$422,445	63	\$364,030	---	(\$58,415)	---	13,599	---	(\$72,014)
Less: Adjustments for Other Funding Sources:	---	---	---	---	---	---	---	---	---	---	---	---
Net, Enacted Appropriations and Budget Estimates	63	\$415,174	63	\$422,445	63	\$364,030	---	(\$58,415)	---	13,599	---	(\$72,014)

III. Current Services Program Description by PPA

Department of Homeland Security
U.S. Customs and Border Protection
Automation Modernization
Program Performance Justification
(Dollars in thousands)

PPA: ACE/ITDS

	<u>Perm Pos.</u>	<u>FTE</u>	<u>Amount</u>
2010 Actual	62	62	201,811
2011 Annualized CR	62	62	227,960
2012 Adjustment to Base	---	---	(74,969)
2012 Current Services	62	62	152,991
2012 Program Change	---	---	16,764
2012 Request	62	62	169,755

CBP requests \$169.755 million for ACE/ITDS. The request includes:

- Increase of \$20 million for design and development of cargo release functionality that will modernize import processing, including facilitating faster cargo processing and providing new cargo status querying capabilities.
- Increase of \$130 thousand as a transfer to reflect anticipated realignment of FY 2011 annualized CR funding.
- Decrease of \$3.236 million towards the DHS-wide decrease in professional services contracts to achieve efficiencies and apply savings towards the highest priority requirements.
- Decrease of \$89 thousand for the annualization of the President's initiative to freeze federal pay at the FY 2010 levels.
- Decrease of \$10 thousand towards the government-wide initiative to reduce administrative costs known as the Accountable Government Initiative.
- Decrease of \$75 million due to planned move to Operations and Management only phase.

CURRENT SERVICES PROGRAM DESCRIPTION:

ACE is a CBP program designed to reengineer agency business processes and modernize the IT systems to support them. The goal of ACE is to allow and assist importers to institute reasonable care in fulfilling requirements as outlined in the Customs Modernization Act (MOD Act) of 1993, and to facilitate efficiencies in processing for both Federal agencies and the trade community.

ACE benefits include:

- Enhanced cargo control business processes for imports and exports

- Reduction of costly labor and paper intensive activities
- Trade data reporting to multiple agencies via a single, secure, Internet based portal
- Enhanced revenue collection capability
- Ability to view and manage trade activity from a national account perspective
- Through ITDS, ACE will provide a “single window” for the collection and dissemination of trade data

In addition to CBP, ACE allows other Government agencies to better fulfill the mandate set forth under the Security and Accountability for Every Port Act of 2006, which requires agencies with licensing and admissibility requirements to participate in the ITDS. ITDS is the mechanism for coordinating intergovernmental involvement with ACE. A total of 46 government agencies are currently participating in the ACE/ITDS initiative. Once fully utilized, ITDS will provide unprecedented interagency coordination and information sharing, ultimately making ACE the “single window” for the collection and dissemination of trade data. This capability reduces Government and private sector costs through the elimination of unnecessary paperwork while enabling electronic processing of trade documentation.

Capabilities Delivered:

To date, ACE has deployed 11 drops of functionality, which are strengthening national security, facilitating the flow of legitimate trade, and providing industry with new tools that save them money and help them comply with U.S. laws.

Delivered Capabilities – 11 Successful Releases	
ACE Foundation, Account Creation, Periodic Payment, e-Manifest: Trucks, Screening Foundation, Targeting Framework, Advanced Targeting, Enhanced Accounts, Reference Data, Initial Entry Summary Types, Remaining Entry Summary Types (Anti-Dumping and Countervailing Duties (AD/CVD))	
Anti-Terrorism/Import Safety	Trade Facilitation
<ul style="list-style-type: none"> • Targets new information 	<ul style="list-style-type: none"> • Enables quicker processing
<ul style="list-style-type: none"> • Links information on all entities 	<ul style="list-style-type: none"> • Fosters efficiency in the primary booth
<ul style="list-style-type: none"> • Sends enforcement alerts 	<ul style="list-style-type: none"> • Provides trade partner savings
<ul style="list-style-type: none"> • Uses business rules-based engine 	<ul style="list-style-type: none"> • Expands Participating Government Agency (PGA) involvement
<ul style="list-style-type: none"> • Allows end users to define and maintain rules 	<ul style="list-style-type: none"> • Provides trade community access to import data
<ul style="list-style-type: none"> • Provides access to external intelligence data sources 	<ul style="list-style-type: none"> • Increases communication between CBP and trade partners
<ul style="list-style-type: none"> • Increases efficiency between CBP and PGAs 	<ul style="list-style-type: none"> • Eliminates filing of routine paper forms
<ul style="list-style-type: none"> • Provides enhanced targeting of all entry summaries via the Automated Targeting System (ATS) 	<ul style="list-style-type: none"> • Enables approximately 99 percent of entry summaries to be filed via ACE
<ul style="list-style-type: none"> • Focused targeting increases referrals to secondary 	<ul style="list-style-type: none"> • Provides new ACE portal and Electronic Data Interchange (EDI) capabilities specific to AD/CVD entries and AD/CVD case management

ACE Secure Data Portal gives CBP and the trade community an account-based view of data, enabling companies to proactively monitor compliance issues and gives CBP a broader, national view of trade activities. Overall, there are more than 18,300 unique ACE portal accounts.

The Periodic Monthly Statement allows importers and brokers with ACE accounts to centralize payment processing and to utilize Periodic Monthly Statement and payment capabilities through

Automated Clearinghouse Credit and Debit. It also provides an initial customer account-based subsidiary ledger to interface with the CBP general ledger, for financial transaction processing and an expanded account view into account activity logs and exam findings. Other benefits include cash flow benefits through payment of duties and fees on a monthly basis, online tracking of trade activities through customized account views, and access to more than 100 customizable reports that can be used to track compliance and monitor daily operations. On average, 55 percent of duties and fees are paid via Periodic Monthly Statement, representing approximately \$1.6 billion dollars per month.

The e-Manifest: Trucks includes an automated truck manifest system that expedites information processing and brings the ACE portal interface to CBP officers. This enhanced security facilitates the clearance of trucks entering the country by providing CBP officers with access to shipment, crew, and conveyance data before the truck reaches the border. E-Manifest: Trucks enables targeting of illicit goods that require scrutiny and allows the free flow of legitimate trade. This capability is now operational at all land border POEs. ACE has reduced truck processing times by 24 percent, enabling CBP officers to dedicate more time to border security activities.

The Screening and Targeting is comprised of Targeting Framework and Advanced Targeting. The Screening and Targeting performs automated screening and targeting of inbound and outbound cargo across the borders of the United States and also provides the framework for all U.S. Government agencies involved in security, economic, and safety missions to leverage advanced risk assessment information and automated targeting systems. This framework provides a modernized system with National Targeting Center analyst workflow, case management, and single sign-on capability. Through the Targeting Framework, the National Targeting Center has the ability to initiate activities, foster collaboration among analysts, and access past activity logs and external data sources for additional intelligence.

The Advanced Targeting capability extends the risk-management life cycle with increasing analysis and feedback into targeting effectiveness. This functionality combines Screening Foundation and Automated Targeting System (ATS) targeting capabilities into a single platform that leverages new methods for developing targets while incorporating existing ATS targeting concepts, and has allowed a seamless integration of functionality without an interruption of services to the users. Advanced Targeting uses targeting performance metrics defined by recorded results and rule-based risk assessments to evaluate targeting approaches and provide recommendations for adjustments. The Advanced Targeting capability provides an improved view of the risk assessment results and provides the user with a better prioritization of risk. Advanced Targeting facilitates users' evaluations of ATS rules and applies targeting action to the cargo control systems (ACS and ACE).

Entry Summary, Accounts, and Revenue (ESAR): Master Data and Enhanced Accounts (A1) capabilities provide ACE access to virtually every entity doing business with CBP, and enhanced ACE Secure Data Portal account management features which have helped lay the foundation for a future integrated, account-based financial and entry summary processing system in ACE.

Initial Entry Summary Processing functionality allows the trade community and CBP to file and process the most common entry summary types via ACE. These entry summaries represent nearly 99 percent of all entries eligible to be filed each year. The new ACE entry summary processing capabilities allow ACE Secure Data Portal account holders the option to receive and respond to CBP

forms electronically through the ACE portal. Electronic responses are stored with associated entry summaries, enabling them to be shared within CBP nationwide. Modernizing the entry summary process enhances uniformity and facilitates compliance for those filing for entry. Entry summary processing for remaining entry types will be added throughout the next few years.

In addition to the primary benefits of the capabilities above, actual benefits realized by stakeholders such as PGAs, CBP, and the trade community through ACE include:

- The Food Safety Inspection Service (FSIS) can act faster to detect, detain and remove from commerce potentially dangerous agricultural products. Between FY05 and FY06, the amount of ineligible product detected, detained and removed from commerce increased from 97,000 pounds to 2.87 million pounds. Seizures continued in FY 2007 with 2.04 million pounds; in FY 2008 with 3.69 million pounds; and in FY 2009 with 1.87 million pounds of ineligible product.
- Recently, the Consumer Product Safety Commission (CPSC) used ACE data to research a company importing all-terrain vehicles with known consumer safety hazards. CPSC created an “Import Alert” which provided information to a specific port. Upon arrival of the suspect shipment, CPSC was notified to investigate and recommend a course of action (e.g., denial of entry).
- Agencies can now administer and maintain real-time screening and targeting systems that help CBP officers and analysts secure the supply chain and support CBP’s layered defense strategy for inbound and outbound cargo.
- ACE facilitates the collection and analysis of information, integrating that information into larger analytic efforts, as well as developing and evaluating targeting rules that are intelligence-based and constantly refreshed.
- The system offers periodic payment capabilities whereby the trade community can wait until the 15th working day of the next month to pay for shipments released during the previous month, which can result in significant cash flow benefits. CBP currently collects approximately \$1.6 billion per month via the ACE system.
- ACE deployed the first automation of the truck manifest, e-Manifest, Truck (Release 4), that has reduced border processing time of truck cargo by more than 24 percent compared to paper-based manifests (based on a national average of select land border POEs).
- ACE offers targeted reports to support in-house audits, discrepancy reports to identify systemic errors and entry summary reports to provide insight into cargo entries under review by CBP.
- The ACE Secure Data Portal provides trade users with near real-time access to their CBP transactional data.
- ACE portal users can access over 150 standard and customizable reports on company-specific compliance, transaction, and financial data from both ACE and the ACS.
- ACE portal functionality provides carriers the ability to control the use of their custodial bond (in-bond movement of cargo).
- ACE provides the collection of additional trade information to segregate high risk cargo while facilitating lawful entry of trade that is considered low risk.

Future benefits to PGAs, CBP, and the trade community include:

- Enhanced and coordinated release process and notification stream that will provide for PGA cargo hold and status notifications to the filer.
- Automated notice of port arrivals, cargo clearance and enforcement actions to CBP, Animal and Plant Health Inspection Service (APHIS) and U.S. Coast Guard which will replace phone, fax, and manual input.
- Integration of PGA admissibility decisions up-front, systematically targeting for PGA requirements to support their missions.
- Automation of vessel boarding documentation and communication currently done through paper forms.
- Consolidated entry process – having an import entry and cargo release process in one system thus reducing our collective reliance on legacy systems.
- Standardized cargo processing for all modes of transportation, programs, and entry types.
- Integrated manifest capabilities for the truck, rail, and sea environments.
- More modern and agile technology platform that will reduce operations and maintenance costs and allow for more rapid delivery of capabilities to CBP/PGA and Trade users.
- Integration of cargo processing and risk assessments systems i.e., cargo targeting and enforcement capabilities.

FY 2010 accomplishments include:

- On February 14, 2010, CBP successfully deployed ESAR: AD/CVD and Additional Functionality capabilities. These capabilities will provide new ACE portal and EDI capabilities specific to the filing and processing of AD/CVD entries (also known as type 03 entries) as well as AD/CVD case management.
- EDI Image Capture Phase 1 was completed in October 2010. Initial participation by 10 PGAs including the U.S. Environmental Protection Agency (EPA) and the National Marine Fisheries Service (NMFS) within the Department of Commerce. This initial EDI capability was delivered in 45 days and introduced competition into the ACE acquisition strategy.
- On October 31, 2010, CBP partially deployed ESAR: Post-Summary Corrections (PSC) to internal CBP users. It provided functionality for the initial deployment of post-summary corrections for entry summaries and the ability for mass updates to entry summaries.

FY 2011 goals include:

- E-Manifest: Rail and Sea will provide cargo manifest processing for rail and sea modes of transportation and the creation of a unified, multi-modal environment that will support all modes of transportation. CBP expects full operational capability.

- ESAR: PSC will implement the final deployment of functionality for post-summary corrections for entry summaries. CBP expects full operating capability for internal CBP users and the trade community.
- ITDS Measures will advance the ITDS program including adding data elements required by other agencies to the major import reporting messages, developing the capability to accept the transmission of imaged forms, and develop an implementation schedule for delivery of the first web service.
- Cargo Release will provide for collection of additional data elements to support PGAs as well as CBP. CBP's improved business requirements definition, design, and acquisition process is being utilized for this development. In accordance with this new process, work is now underway with the PGAs and trade community to revalidate the previously gathered requirements, map the requirements against the concept of operations (CONOPs) and identify any gaps that need to be addressed. Once the requirements are revalidated, the design and acquisition phase will begin.
- Air Manifest will bring air cargo into the full Multi-Modal Manifest (MMM) processing environment shared by the rail and sea modes of transportation. CBP plans to begin the business requirements definition process.

FY 2012 goals include:

- Continue the design, development, and implementation of the cargo release functionality. The Cargo Release functionality of ACE will modernize import processing to include the electronic processing of cargo and border selectivity transactions, the bill of lading correction process, the entry-status query capability, the override functions, and the cargo release status notifications that are returned to the entry filer and the transportation partner. Recommend changing title to Cargo Release to help identify it as a discrete software delivery.
- The Air Manifest business needs a statement of work, development of the CONOPs. A review of both by all stakeholders is targeted for mid-2012. The design and acquisition phase would then begin after stakeholder approval.

PPA: COPPS

	<u>Perm Pos.</u>	<u>FTE</u>	<u>Amount</u>
2010 Actual	1	1	213,363
2011 Annualized CR	1	1	194,485
2012 Adjustment to Base	---	---	2,955
2012 Current Services	1	1	197,440
2012 Program Change	---	---	(3,165)
2012 Request	1	1	194,275

CBP requests \$194.275 million for COPPS. The request includes:

- Increase of \$2.961 million for infrastructure maintenance.
- Decrease of \$3.165 million towards the DHS-wide decrease in professional services contracts to achieve efficiencies and apply savings towards the highest priority requirements.
- Decrease of \$6 thousand towards the government-wide initiative to reduce administrative costs known as the Administrative Savings Initiative.

CURRENT SERVICES PROGRAM DESCRIPTION:

The COPPS PPA provides funds for COPPS IT infrastructure, TECS modernization, and TPSE. COPPS provides nearly all the CBP IT infrastructure the ability to operate and maintain mission-critical IT systems requisite to securing the borders while facilitating legitimate trade and travel. TECS Modernization is a multi-year project that will end in FY 2015. TECS will enhance CBP's mission capabilities by developing and deploying a modernized TECS. TPSE will enable 24x7x365 systems operational availability to meet the future processing and storage/backup requirements for passenger screening while enhancing the existing systems.

Infrastructure:

The IT infrastructure is the backbone that supports all of CBP's systems. The systems supported by CBP's IT infrastructure allow for a unified border presence and provides for more efficient and effective sharing of information amongst trade and law enforcement agencies. CBP's IT infrastructure serves a variety of Federal, state, local, and international government agencies. These agencies have varying missions and strategic goals, but collectively their purpose is to minimize threats to the American people and their freedom. The IT systems are vital tools that CBP and other federal agencies use to defend our borders and support our POEs. The IT infrastructure systems assist CBP officers to identify potential catastrophic threats, including terrorists, weapons of mass destruction and bioterrorism. The systems provide the means by which U.S. criminal and trade laws are enforced and provide the capability to collect tariffs and taxes associated with international trade and commerce.

CBP facilitates trade growth, economic development, and the efficient processing of international travelers through the use of comprehensive, integrated surveillance, detection, scientific, forensic, and information systems technology. The technology utilized within CBP's IT infrastructure enables CBP to continually improve the selectivity of low-risk cargo, vehicles, and people, while expediting the

clearance process. The infrastructure provides the support for maintaining a reliable trade management system that maximizes compliance with the law, moves legitimate cargo efficiently; targets high-risk shipments, secures our borders, facilitates movement of international travel, and protects the public from contraband.

CBP's IT infrastructure must be secure, available, and reliable for CBP officers to make timely decisions and to take appropriate action in protecting our Nation's borders. CBP's infrastructure requirements continue to grow, both in response to greater DHS requirements and in response to the growth of international trade and immigration. In a typical day, CBP systems process data from over 1.1 million inbound passengers, 330,000 passenger vehicles, 69,000 truck, rail, and sea containers, 2,500 aircraft, 550 vessels, and 79,000 merchandise entries, collecting over \$70 million in revenue.

Updated technology will allow CBP to keep up with demand and maintain acceptable response times.

TECS Modernization:

Funded within the COPPS PPA is TECS Modernization. TECS is a key border enforcement system for CBP and DHS, and plays an essential role in the screening of travelers entering the U.S. and in supporting the screening requirements of other federal agencies. Maintaining TECS functionality is critical to CBP's border enforcement mission. The current TECS system is over 20 years old and uses technology that will be increasingly difficult to support in the future. The multi-year TECS Modernization project will be modernized using an incremental approach with the following work streams:

- Secondary Inspection is consolidating and replacing the functionality of three legacy applications.
- High Performance Primary Query (HPPQ) will improve the backend processing capabilities to perform person searches to better integrate available data within TECS and improve the effectiveness and efficiency of primary inspections.
- Travel Document and Encounter Data (TDED) will provide improved functionality for querying and/or validating travel documents and encounter data for passengers and conveyances.
- Lookout Record Data and Services will migrate mainframe-based lookout records to target infrastructure. Provide CBP and external agencies access to lookout records and vetting via services.
- Primary Inspection Processes will complete modernization for existing primary applications (Air, Sea, and Land). Business operations will be modernized to support random referral and operational messaging to primary officers.

TECS provides critical border enforcement and POE processing capabilities. TECS is a key system for border enforcement and sharing of information about people who are inadmissible or may pose a threat to the security of the United States. CBP is collaborating with Immigration and Customs Enforcement (ICE) in the development of TECS Modernization. TECS is the primary lookout record database for all of DHS. TECS currently:

- Provides subject record "watch list" processing for DHS and other agencies. This includes maintenance of lookout records and vetting services against these records.
- Supports primary and secondary inspections for persons and conveyances at the POEs.
- Tracks crossing history for persons and conveyances.

- Receives and processes passenger manifests from carriers.
- Provides screening services for trusted traveler programs, Electronic System for Travel Authorization (ESTA), and to support targeting analysis.
- Supports more than 70,000 users from over 20 Federal agencies responsible for screening to determine benefits, traveler processing, investigations, case management, and intelligence.
- Provides entry/exit data to other systems/agencies.
- Provides a real time interface with Federal Bureau of Investigation's National Criminal Information Center (NCIC) and Integrated Automated Fingerprint Information System (IAFIS) for on line-queries of wants/warrants and criminal history records.
- Provides a real time interface to National Law Enforcement Telecommunications System (Nlets) for on-line-queries of driver's licenses, vehicle registration and state wants/warrants from all 50 states and Canada.
- Provides a real time interface with U.S. Visitor and Immigrant Status Indicator Technology (US-VISIT) IDENT system for collection and verification of fingerprints of non-U.S. citizens.
- Provides a real-time interface to travel document issuing authorities. The travel document photos and biographic data are displayed at primary and secondary inspection, and made available for data share with other federal stakeholders as provisioned in the memoranda of understanding. These issuing authorities include the Department of State, U.S. Citizenship and Immigration Services, CBP's Trusted Traveler Programs, departments of motor vehicles of states and Canadian provinces with enhanced driver's licenses, and Indian Tribes.
- Processes over two million transactions daily.
- Supports the case management solution for ICE investigations including functions such as Investigative Case Management, Money Laundering Tracking and Reporting, Casino and Bank Secrecy Act data, Telephone Analysis and other functionalities unique to ICE's mission. Included within ICE's budget is funding to modify the portion of TECS that is unique to its mission.

Terrorism Prevention Systems Enhancements (TPSE):

Also funded within the COPPS PPA is TPSE. TPSE initiated in FY 2008 to enhance critical infrastructure, monitoring capabilities, networking and computing capabilities to support our worldwide passenger responsibilities such as facilitating electronic travel authorization, pre-clearance of passengers coming into all POEs and analyzing passenger data for terrorist and threat analysis. CBP's current infrastructure contains many single points of failure and outdated components that have caused repeat problems at POEs. TPSE is intended to ensure 24x7 systems availability, network redundancy, and monitoring in the Passenger and Targeting areas. The TPSE infrastructure enhancements will be implemented at the CBP National Data Center (NDC), the DHS Stennis Data Center, and targeted POEs. TPSE will enable 24x7x365 systems operational availability to meet the future processing and storage/backup requirements for passenger screening while enhancing the existing systems.

Strategic investments such as TPSE will ensure that the critical infrastructure services that enable continuous passenger systems operations are improved to meet the mission demand. These services include enhancing our monitoring capabilities, improving our current data center infrastructure, and enhancing our capability to maintain exact copies from our production facility to our continuity facility.

COPPS FY 2010 accomplishments include:

- Supported additional CBP users including the increase in Border Patrol agents
- Maintained a minimum of 20 percent reserve capacity on the local area network, open systems (Unix, Windows), and storage environments.
- Windows 7 Alpha build was deployed to the pilot 150 workstation set, and Windows 7 Beta Builds are in process now to 350 workstations. The Beta image provides for United States Government Configuration Baseline (newer Federal Desktop Core Configurations (FDCC) requirements) applicability on the workstation via Group Policy Objects.
- Completed a transition from legacy model to CBP modernized Help Desk
- Performed a System Test and Evaluations to evaluate the security posture of the CBP systems within the TPSE environment.
- Migrated legacy systems to an advanced replicated storage environment.
- Expanded the current Web Services capabilities and establish duplication of critical system components, with the intention of increasing reliability at the Stennis Data Center.
- Created a duplicate virtual environment for legacy systems to allow continuous uninterrupted service between Stennis Data Center and NDC.
- Established technologies to provide for remote management and automatic failover of systems to enhance continuity capability.
- Increased the network bandwidth duplication to account for newly implemented technologies and ensure mission success between Stennis Data Center and NDC.

COPPS PPA FY 2011 goals include:

- Reduce response time to critical field application fileserver outages by 5 percent
- Roll out a larger deployment for Windows 7
- Provide a fully functional and approved Desktop Management Team
- Reduce by 17 percent planned outages due to technology refresh and advancements
- Maintain the processor capacity usage rate of less than an 80 percent
- Ensure that TECS will be available to end users 98.9 percent of the time and the network will be available 99.6 percent of the time
- Sustain 100 percent of hardware maintenance renewals completed in a timely manner prior to the cessation of vendor support
- Sustain 100 percent of E-mail system patches applied by the mandatory deployment date as defined by DHS
- Sustain 100 percent of software maintenance renewals completed in a timely manner prior to the cessation of vendor support

COPPS PPA FY 2012 goals include:

- Complete 25 percent of server consolidation in an effort to deliver new mission capabilities through service platforms
- Establish TECS Modernization services with active and stand by capabilities between the NDC and the Stennis Data Center
- Adopting desktop virtualization within the CBP enterprise
- Sustain 100 percent of hardware maintenance renewals completed in a timely manner prior to the cessation of vendor support
- Sustain 100 percent of E-mail system patches applied by the mandatory deployment date as defined by DHS

- Sustain 100 percent of software maintenance renewals completed in a timely manner prior to the cessation of vendor support

IV. Program Justification of Changes

**Department of Homeland Security
U.S. Customs and Border Protection
Automation
Justification of Program Changes**

(Dollars in Thousands)

Program Increase: Automated Commercial Environment (ACE)/
International Trade Data System (ITDS)

Strategic Goal(s) & Objective(s): The ACE/ITDS program directly supports both of CBP’s strategic goals:

- Strategic Goal 1: Secure the Nation’s borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel; and
- Strategic Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders.

CBP strategic objectives supported by ACE/ITDS include:

- Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of the appropriate mix of infrastructure, technology, and personnel.
- Objective 1.5: Identify and target critical points in the import life cycle at which product safety risks are greatest to protect consumers from health and safety concerns.
- Objective 2.1: Through the use of accurate advance information and modern systems for cargo processing, expedite the processing of people, products, and conveyances at land border ports, airports, and seaports.
- Objective 2.2: Fully employ the use of risk management and targeting to detect and deter trade noncompliance and apply consistent enforcement actions.
- Objective 2.3: Conduct compliance reviews of trade activities to ensure collection of all lawfully owed revenue and to identify delinquencies in the most efficient manner possible, thereby facilitating the release of compliant cargo.

Total Request	62	62	201,811	62	62	227,960	62	62	172,991

Description of Item:

CBP requests \$20 million (in addition to \$15 million in carryover funds for a total of \$35 million to fund the new useful segment) to support ACE and ITDS. More specifically, this funding will be used to implement the Cargo Release functionality within ACE. Cargo Release functionality will incorporate the informational and operational requirements of more than 40 federal agencies into ACE via the ITDS initiative. It facilitates faster cargo processing by providing CBP officers with security screening results in ACE, streamlining the process of separating high-risk cargo from low-risk cargo. It will also provide new cargo status querying capabilities, giving trade partners visibility into cargo screening results, hold status and other government agency data requirements. It will also provide new electronic messages for other government agency data requirements, allowing the elimination of paper forms.

The Cargo Release process has been referred to as the heart of the cargo system. ACS currently processes as many as 28 million entries a year. Each entry can contain up to 999 lines of data. Entry processing interfaces with all modes of transportation, including imported goods that do not require the use of a carrier (*i.e.* pipeline entries). It is a complex system with a straightforward mission. Cargo Release focuses on the admissibility of imported articles and their release into the commerce of the United States.

As CBP modernizes the Cargo Release processes, the agency stands to revolutionize the cargo process. It will reduce paper processes and automate operational bottlenecks that have plagued CBP POEs and CBP officers for many years. At the same time it will integrate the needs of PGAs and the trade community.

Justification:

Modernization of Cargo Release business processes will include changes such as:

- **The “Single Window Concept”** - Allow the trade community to submit electronic data to CBP and all PGAs through a single interface. This functionality is the flagship of the modernization effort. Over forty agencies are being considered as viable participants in ACE. The reduction of paper processing and increased processing times will be a significant improvement.
- **Facilitating Trade** - The opportunity to advance a new expedited entry program will allow benefits to span across all modes of transportation and for those who participate in trade partnership programs such as the Customs-Trade Partnership Against Terrorism (C-TPAT) and Importer Self Assessment (ISA). It will also provide for improved messaging between the trade community and government to communicate cargo status.
- **Security** – A modernized Cargo Release process will allow CBP to establish requirements for data to be fully integrated with targeting models. Data, necessary for accurate and timely screening will be collected, stored and processed in a manner consistent with the needs of the agency and allow the interception of cargo that poses a threat to the country. This process can enhance CBP’s ability to provide an effective and flexible response to all manner of cargo borne threats both identified and those that are yet to emerge.
- **Diversion Process** – An opportunity for the government to take a proactive stance in times of emergency. Modernized cargo release processes will provide CBP with the flexibility to divert

freight to other ports in the event of an emergency. This process will enhance CBP's responsiveness to safeguarding the economy, U.S. resources, and keeping people safe while maintaining the movement of legitimate trade through our borders for situations such as natural disaster or in response to a terrorism event.

- **Integration** – Cargo Release processing will promulgate an increased level of integration between Entry Summary and manifest processing systems. It will also leverage enhanced screening and targeting tools. An integrated approach to statistical sampling and risk management will increase targeting effectiveness while facilitating legitimate trade.

The enhancements noted above in addition to added functionality that ACE will provide will establish a solid foundation for the modernization effort in order to carry out mission critical objectives that CBP, the PGAs and the trade diligently seek. Modernization of the Cargo Release processes will bring CBP to the forefront of electronic cargo processing and will pave the way for future system integration and ACE enhancements.

Impact on Performance:

Benefits to PGAs, CBP, and the trade community include:

- Introduction of the Single Window concept which will reduce paper processing and facilitate shipments through all government agency requirements.
- Enhanced notifications system will allow trade to follow and complete the shipment lifecycle for each government agency that has interest in a shipment.
- Greater integration of data for targeting purposes due to inclusion of PGA data.
- Enhanced automation for CBP/PGA field users allowing personnel to be utilized more efficiently.
- Integration of PGA admissibility decisions up front, systematically targeting for PGA requirements to support their missions.
- Consolidates import entry and cargo release processes in one system thus reducing reliance on separate, legacy systems.
- Standardized cargo processing for all modes of transportation, programs, and entry types.

Current Services Level							63	63	350,447
Program Decrease									(6,401)
Total Request							63	63	344,046

Description of Item

CBP is actively participating in this government-wide initiative to reduce Professional Service contract spending. In accordance with this effort, the Automation Modernization appropriation account includes a reduction of \$6.401 million. The proposed reduction supports the President’s initiative on fiscal discipline and spending restraint.

Justification

Professional services contracts include a wide variety of services many of which are mission critical and deliver core capabilities of the CBP workforce including engineering services, and IT operations and maintenance. CBP’s ability to effectively facilitate and enforce trade will be impacted. These types of contracts help CBP deliver products on time, within cost and achieve effective results. These contract vehicles provide necessary skills not widely available in CBP. While there are areas where these skills are being developed within CBP, there are difficulties in select areas, due to costs, workload fluctuations, etc. These contracts provide critical support to CBP missions.

In order to achieve the necessary savings, CBP will reduce usage of professional services contracts. Many of these reductions will be achieved through delayed, deferred or forgone activities, although specific efficiencies were identified.

Impact on Performance (Relationship to Strategic Goals)

In order to achieve the proposed reduction for COPPS, CBP will defer modernization efforts and reduce support used to sustain the field data network, data center, and IT customer support.

The proposed reduction to ACE will result in delayed technical refresh cycles. Further analysis will need to be conducted by OIT in conjunction with creating the FY12 Expenditure Plan for ACE.

However, these efforts will be focused with the intent of minimal amount of adverse operational activities.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U.S. Customs and Border Protection
Justification of Proposed Changes in Automation Modernization
Appropriation Language**

For expenses for U.S. Customs and Border Protection automated systems, **\$364,030,000**, to remain available until expended, of which not less than **\$169,755,000** shall be for the Automated Commercial Environment.

Note.--A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111-242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

PPA Mission Statement

ACE will provide tools and enhance the business processes that are essential to securing the U.S. borders from terrorists by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. ACE capabilities have been designed to identify potential risks, analyze information prior to arrival of people and cargo, and provide intelligence in easy-to-use formats. As a web-based system, ACE will provide users from government and the trade community with new, more efficient ways of accessing, processing, and sharing trade-related information.

Summary Justification and Explanation of Changes

	2010 Actuals	2011 Annualized CR	2012 Request	2011 to 2012 Change
Salaries & Benefits	\$6,000	\$8,330	\$8,564	\$234

In FY 2012, an increase of \$193,000 is an object class realignment. In FY 2012, a decrease of -\$89,000 is an adjustment to compensate for the FY 2011 pay freeze. In FY 2012, an increase of \$130,000 is a transfer for anticipated CR funding to reflect CBP's FY 2011 funding requirements. In FY 2012, Salaries and Benefits includes costs for 62 FTEs.

	2010 Actuals	2011 Annualized CR	2012 Request	2011 to 2012 Change
Travel	\$353	\$363	\$42	(\$321)

In FY 2012, a decrease of -\$319,000 is an object class realignment. In FY 2012, a decrease of -\$2,000 is for the Administrative Savings Initiative [administrative services].

	2010 Actuals	2011 Annualized CR	2012 Request	2011 to 2012 Change
GSA rent	\$0	\$0	\$200	\$200

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. CUSTOMS AND BORDER PROTECTION CONSTRUCTION AND FACILITIES MANAGEMENT

I. Appropriation Overview

U.S. Customs and Border Protection (CBP) consistently strives to improve the planning, acquisition, execution, and management of its real property program and facilities portfolio. The Construction and Facilities Management account is a consolidated account structured to provide maximum flexibility to consistently plan, acquire, finance, manage, and sustain CBP's dynamic, multifaceted real property program and facilities portfolio. All resources supporting facilities acquisition, construction, and sustainment, along with facilities management, program and personnel resource requirements are consolidated in this account. This allows for maximum flexibility in managing CBP's portfolio of facilities across the acquisition lifecycle and determining the most appropriate facilities solution and strategy required to meet CBP's mission needs and fulfill operational priorities required to secure the Nation's borders. CBP occupies over 3,600 facilities and 3,200 acres of land in the United States and internationally, which includes CBP owned and leased facilities, General Services Administration (GSA) owned and leased facilities, and other facilities acquired through interagency or free space agreements.

A. Mission Statement:

CBP is the frontline border security agency within the U.S. Department of Homeland Security (DHS) charged with securing our Nation's borders, while also facilitating the flow of legitimate trade and travel. More than 61,000 CBP employees manage, control, and protect the Nation's borders at and between the official ports of entry (POEs). CBP is responsible for protecting more than 3,987 miles of border with Canada, 1,993 miles of border with Mexico, and 2,627 miles of shoreline.

The CBP Construction and Facilities Management account provides the facilities solutions and associated infrastructure required to obtain and maintain operational control of the border, and to ensure the efficient flow of legitimate trade and travel across the border. This account addresses the requirements for new, modernized, expanded, and sustained facilities to fulfill immediate mission driven operational needs; accommodates increasing capacity demands associated with new agent, officer, pilot and asset deployments; provides resources to modify and/or correct deficiencies within existing facilities and structures; and allows CBP to proactively manage the real property inventory and facilities portfolio and support facilities program-wide efforts.

The success of CBP's mission depends heavily on the health and effectiveness of its physical infrastructure, specifically the facilities and infrastructure that support its operations and administrative support requirements. Adequate facilities and a robust real property program are critical in that they provide logistical and mission critical operational support to CBP's agents, officers, pilots and other personnel; protect and house critical assets; supply strategically-located operational bases improving mobility and expediency of response; and maximize operational efficiencies on mission-related activities.

CBP's diverse real property portfolio includes, but is not limited to: ports of entry (POEs), Border Patrol stations, Border Patrol sector headquarters, Border Patrol checkpoints, forward operating bases (FOBs) or camps, laboratories, aviation hangars, marine piers/docks, administrative office space, classrooms and other training facilities, maintenance and repair facilities, parking facilities, vaults, firing ranges, intelligence and operations coordination centers, residential housing units, and parcels of land.

CBP facilities efforts are planned, executed, and managed by the Office of Administration, Facilities Management and Engineering (FM&E) Directorate, operating in conjunction with its business partners, service providers, and internal/external stakeholders. FM&E delivers facilities solutions through four integrated Program Management Offices, each supporting a single business partner. This model provides maximum flexibility to plan, acquire, execute, and manage CBP's facilities portfolio to best fulfill the driving mission needs.

B. Budget Activities:

The Construction and Facilities Management program must be responsive to the needs and requirements of the mission elements responsible for the Nation's borders, which include the Office of Border Patrol (OBP), Office of Field Operations (OFO), Office of Air and Marine (OAM), and the Mission Support offices. The CBP Construction and Facilities Management program provides the facilities solutions and associated infrastructure required to effectively meet CBP's dual mission of securing the nation's border while facilitating legitimate trade and travel. It addresses requirements on the Northern and Southwest borders for new and enhanced facilities and related initiatives to fulfill immediate operational needs; accommodate increasing capacity demands associated with new agent, officer, pilot, and asset deployments; provide resources to modify and/or correct facilities and real property program deficiencies; and allows CBP to proactively maintain the real property inventory and facilities portfolio.

The Construction & Facilities Management account consists of two major Program, Project, and Activities (PPAs) which support the entire program. These include the Facilities Construction and Sustainment PPA and the Program Management and Oversight PPA. Construction and facilities management resources are consolidated to provide CBP maximum flexibility to determine the most appropriate facilities solution required to meet CBP's driving mission needs and employ the most appropriate strategy.

Facilities Construction and Sustainment

The Facilities Construction and Sustainment PPA provides resources for all activities supporting the construction, acquisition, leasing, sustainment, and management of CBP's real property program and facilities portfolio. This includes, but is not limited to: program, facilities, and portfolio planning activities and operational requirements associated with project management activities; environmental program support requirements; real estate acquisition and disposal including leasing, right of entry, and fee-simple purchases; construction and demolition of real property assets, such as buildings and structures; property improvements including modernization, enhancements, expansion, and alterations of facilities and land improvements; design, architecture, and engineering services; construction and project management support; infrastructure connectivity; sustainment activities, such as maintenance, repairs, and operational requirements and services; portfolio and operational management support; and all related activities and operational support required to provide turnkey facilities solutions. Resources

for rent and rent-related costs, such as security services provided by the Federal Protective Service (FPS), are included in the Salaries and Expenses appropriation.

This PPA also includes funding to support CBP tunnel remediation. Tunnel remediation is the process whereby cross-border tunnels are physically secured and rendered unusable after discovery. The remediation process includes initial analyses, environmental services, project oversight and support, obtaining rights of entry, engineering/surveying, filling/plugging, inspection/acceptance, and reporting of associated status.

Program Oversight and Management

The Program Oversight and Management PPA provides for the necessary government and support personnel, tools, planning, processes, procedures, and resource requirements in an integrated and effective manner to enable the Facilities Management and Engineering objectives to be successfully implemented. It provides resources for program management and support activities at the enterprise level to maximize operational efficiencies and guide strategic initiatives of the CBP Facilities Management and Engineering Directorate.

C. Budget Request Summary:

CBP requests \$283.822 million and 226 FTE full-time positions for the FY 2012 Construction and Facilities Management appropriation. This includes a total adjustments-to-base decrease of \$10.313 million, which includes a transfer for personnel support resources along with facilities requirements to support critical assets, and program change reductions of \$25.435 million for the Construction and Facilities Management appropriation.

The adjustment-to-base includes a transfer of existing resources – CBP requests a transfer of \$23.064 million from the Salaries and Expenses appropriation into the Construction and Facilities Management appropriation for the salaries and resources associated with the government and support personnel required to administer the Facilities Management and Engineering program.

Increase for the annualization of facilities requirements – Also the adjustment-to-base includes an increase of \$18.441 million for the annualization costs associated with the facilities related items such as facilities solutions for the unmanned aircraft systems (UAS) and sustainment activities for the Border Patrol FOBs, that were funded in the FY 2010 Emergency Border Security Supplemental Act (P.L. 111-230). This increase will allow for the necessary expenses to support the acquisition of two new hangars, which are essential to accommodate the deployment of the UAS. Resources for the sustainment activities for the FOBs will ensure the FOBs remain in good operating condition, thereby permitting Border Patrol agents to carry out their critical duties unhindered. This includes necessary maintenance, repairs, and operations activities for the FOBs along with project management support personnel required for the delivery of sustainment activities. Adequate facilities resources for the UAS and FOBs will advance CBP's efforts to secure our nation's borders as intended in the Border Security Supplemental.

Reduction to Construction and Facilities Management – CBP requests a funding reduction of \$25.435 million for the Construction and Facilities Management appropriation. This reduction in funding for FY 2012 impacts the Facilities Construction and Sustainment PPA, which includes facilities management, and sustainment activities of CBP's facilities portfolio and real property inventory.

II. Summary of FY 2012 Budget Estimates by Program/Project Activity (PPA)

Department of Homeland Security U.S. Customs and Border Protection Construction and Facilities Management Summary of FY 2012 Budget Estimates by Program/Project Activity (Dollars in Thousands)

Total	---	\$186,273										

* As part of the American Recovery and Reinvestment Act of 2009 (P.L. 111-5), CBP received a total of \$420 million for Land Port of Entry Modernization.

III. Current Services Program Description by PPA

Department of Homeland Security
U.S. Customs and Border Protection
Construction & Facilities Management
Program Performance Justification
(Dollars in thousands)

PPA: FACILITIES CONSTRUCTION AND SUSTAINMENT

	Perm		
	Pos	FTE	Amount
2010 Actual	525,869
2011 Annualized CR	282,557
2012 Adjustments-to-Base	(32,735)
2012 Current Services	249,822
2012 Program Change	(23,096)
2012 Request	226,726

CBP requests \$226.726 million for Facilities Construction and Sustainment. The request includes:

- Increase of \$18.411 million for the annualization of facilities requirements in the FY 2010 Emergency Border Security Supplemental Act, including the acquisition of two hangars to house unmanned aircraft systems, sustainment activities for Border Patrol Forward Operating Bases (FOBs), and project management support required for the delivery of facilities solutions.
- Increase of \$1.173 million for the increases in facilities requirements for the additional staffing at new POEs, the expansion of the canine teams, and the expansion of the National Targeting Center-Passenger program.
- Decrease of \$43.2 million for the non-recursals of the Advanced Training Center at Harpers Ferry and El Paso Airport Hanger.
- Decrease of \$32.215 million to facilities management and sustainment. This reduction, while necessary to maintain staffing levels for officers and agents will require CBP to defer some activities such as preventative maintenance, repairs, operations, and alterations.

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP depends heavily on the health and effectiveness of its physical infrastructure, specifically the facilities, buildings, structures, and land that support its operations and administrative support requirements. The Facilities Construction and Sustainment PPA provides the facilities and associated infrastructure required to obtain and maintain operational control of the border. Specific CBP facility types include, but are not limited to: POEs, Border Patrol stations, Border Patrol sector headquarters, traffic checkpoints, FOBs, laboratories, aviation hangars, marine piers/docks, classrooms and other training facilities, maintenance and repair facilities, parking facilities, vaults, firing ranges, intelligence

and operations coordination centers, administrative office space, residential housing units, and parcels of land.

Resources in the Facilities Construction and Sustainment PPA in FY 2012 will focus on providing facilities solutions to meet operational mission requirements including tunnel remediation; leasing management; sustainment activities associated with the CBP facilities portfolio and real property inventory; and required program and portfolio management support. Resources will also address the facilities requirements associated with the unmanned aircraft systems and Border Patrol FOBs provided in the FY 2010 Emergency Border Security Supplemental Act. Consolidated resources in this PPA will allow CBP to manage its construction and facilities management program more efficiently by funding the highest priorities within CBP's facilities portfolio and program requirements. Rent management and related costs are addressed separately in the Salaries and Expenses appropriation.

Significant completed accomplishments in FY 2010 include the delivery of the facilities and real property program requirements listed below. These projects/requirements were funded with resources from the FY 2010 Construction and Facilities Management appropriation, American Recovery and Reinvestment Act of 2009 (P.L. 111-5; ARRA), and prior years Construction appropriations:

- **Office of Border Patrol:**
 - o **Border Patrol Stations:** Grand Forks and International Falls, Minnesota; Erie, Pennsylvania; Fort Hancock, Texas
 - o **Border Patrol Checkpoints:** Interim I-19 Checkpoint in Arizona
 - o **Tunnels:** Remediated 11 cross-border tunnels along the Southwest Border
- **Office of Air and Marine:**
 - o **Marine Unit Facilities:** Galveston, Texas; Port Angeles, Washington
 - o **Other Accomplishments:** Completed Air & Marine Design Standards
- **Office of Field Operations:**
 - o Partnered closely with GSA to construct and sustain the majority of land POE (LPOE) inspection facilities, many of which were funded by the ARRA. GSA's Public Buildings Service supported LPOE construction projects through a range of services, which included building maintenance, preparation of business cases for each project, planning, design and construction of new facilities. CBP and GSA collaborated diligently on the modernization efforts of LPOEs.
 - o Commenced operations at the following capital projects completed by GSA: Calais-International Avenue, Maine; McAllen-Anzalduas, Texas; and San Luis II, Arizona.
 - o Capital improvement projects completed by GSA include Massena, New York; Warroad, Minnesota; and Jackman, Maine
 - o **ARRA Land Port of Entry Modernization:**
 - Awarded design/build contracts for: Bridgewater, Easton, Forest City, and Hamlin, Maine; Pinecreek, Minnesota; Del Bonita and Whitlash, Montana; Cannon Corners, New York; Hannah, Maida, and Sarles, North Dakota; Los Ebanos and Amistad Dam, Texas; Boundary and Nighthawk, Washington
 - Awarded repair and alteration contracts, including: Emergent repairs for eight LPOEs: Monticello, Maine; Lancaster and Roseau, Minnesota; Ophiem and Willow Creek, Montana; Fortuna and Northgate, North Dakota; and Falcon Dam, Texas

- Installation of the Border Security Deployment Program (BSDP) at seven LPOEs: Lancaster and Roseau, Minnesota; Ophiem and Willow Creek, Montana; Fortuna and Northgate, North Dakota; and Falcon Dam, Texas
 - Installation of emergency generators at four LPOEs: Forest City, Maine; Whitlash, Montana; Hannah, North Dakota; and Nighthawk, Washington
 - Mission enhancements at three LPOEs: Lancaster, Minnesota; Willow Creek Montana; and Falcon Dam, Texas
- **Mission Support Offices:**
 - **Advanced Training Center, Harpers Ferry, West Virginia:** Warehouse (Phase III)
 - IOCC Facility in Tucson, Arizona; Internal Affairs in Washington, DC
 - **Remote and Rural Housing:** Completion of innovative housing design prototypes for Northern and Southwest borders; and installation of 44 mobile homes in Presidio, Texas
- **Program Accomplishments:**
 - Conducted environmental compliance assessments at 300 CBP facilities to evaluate compliance with all applicable environmental regulations;
 - Conducted Facility Condition Assessments of 20 percent of the CBP-owned real property portfolio. Information gained through these efforts is used to develop repair and deficiency planning and preventative maintenance schedules;
 - Successfully procured Program Management and Report System (PMRS) using ARRA resources to provide full facilities lifecycle support, including project management, operations and maintenance management, energy and environmental management and reporting capability;
 - Developed a Policy & Quality Management Framework to standardize approved processes across FM&E programs, measure compliance and implement improvements;
 - Prepared and delivered to Congress the FY 2010 Construction and Facilities Management Expenditure Plan, providing a comprehensive update on the use of facilities resources and investment of appropriated resources to CBP from FY 2004 to FY 2010; and
 - Launched the Facilities Management Council to bring together representatives across CBP to enhance strategic decision making in the facilities management planning process by coordinating and prioritizing facilities investment opportunities across the CBP facilities portfolio.

Significant planned accomplishments in FY 2011 include the sustainment of CBP's real property inventory along with the delivery of the facilities and real property program requirements listed below. While sustainment activities in FY 2011 are funded with the FY 2011 Construction and Facilities Management appropriations, the projects/requirements listed below are funded with resources from the FY 2010 Construction and Facilities Management appropriation, FY 2010 Emergency Border Security Supplemental Act, ARRA, and prior years Construction appropriations.

- **Office of Border Patrol:**
 - **Border Patrol Stations:** Wellton, Arizona; Interim facility in Calexico, California; Expansion in San Clemente, California; Renovations in Nogales, Arizona
 - **Forward Operating Base:** Animas Valley, Arizona; Antelope Wells, New Mexico

- **Office of Air and Marine:**
 - o **Marine Unit Facilities – Permanent:** San Diego, California; Key Largo, Marathon, and Panama City, Florida; Erie, Pennsylvania; Corpus Christi, Texas; and St. Thomas, Virgin Islands. **Interim:** Trenton, Michigan
 - o **Air Branches:** Yuma, Arizona; National Capital Region
- **Office of Field Operations:**
 - o Strengthen continued cooperation with GSA to complete capital construction projects, large-scale modernization projects, substantial design activities, and commence construction activities at existing LPOEs
 - o Completion of new LPOE in Donna, Texas, as well as capital projects at Blaine – Peace Arch, Washington; and Windsor Tunnel, Michigan
 - o Design for Madawaska, Maine; Otay Mesa, California; and Columbus, New Mexico
 - o **ARRA Land Ports of Entry Modernization:** Complete the construction of 18 CBP-owned ARRA funded LPOE projects, including: Morgan, Scobey, and Wild Horse, Montana; Pittsburg, New Hampshire; Antelope Wells, New Mexico; Frontier, Washington; Antler, Carbury, Hansboro, Maida, Neche, Noonan, Sherwood, Walhalla, and Westhope, North Dakota; Pinnacle Road, Vermont
- **Mission Support Offices:**
 - o **Advanced Training Center, Harpers Ferry, West Virginia:** Leadership Academy
 - o **Remote and Rural Housing:** Acquisition of sites in Ajo, Arizona, and Presidio, Texas, for construction of new housing units; procurement and installation of 20 mobile homes in Ajo, Arizona, and 12 replacement mobile home units in Presidio, Texas
 - o Completion of the Land Mobile Radio (LMR) Modernization project for Office of Information and Technology Tactical Communications (TACCOM)
- **Program Accomplishments:**
 - o Continue Facility Condition Assessments and inventory efforts at a minimum of 20 percent of the CBP-owned real property portfolio.

Significant planned accomplishments in FY 2012 include the sustainment of CBP's real property inventory, along with the delivery of the facilities and real property program requirements listed below. While sustainment activities in FY 2012 are funded with the FY 2012 Construction and Facilities Management appropriations, the projects/requirements listed below are funded with resources from the FY 2010 Construction and Facilities Management appropriation, FY 2010 Emergency Border Security Supplemental Act, ARRA, and prior years Construction appropriations.

- **Office of Border Patrol:**
 - o **Border Patrol Stations:** Ajo and Naco, Arizona; Boulevard, California; Bonners Ferry, Idaho; Lordsburg, New Mexico; Swanton, New York; Sandusky/Port Clinton, Ohio; Corpus Christi, Texas; Beecher Falls, Vermont; Bellingham, Colville, Oroville, and Port Angeles, Washington
 - o **Forward Operating Bases:** Complete the construction of forward operating bases funded by the Border Security Supplemental, in Tucson Sector, Arizona
- **Office of Air and Marine:**
 - o **Marine Unit Facilities** – Sault Sainte Marie, Michigan; Rochester, New York
 - o **Air Branches:** El Paso, Texas

- **Unmanned Aircraft System Hangars:** Cape Canaveral, Florida; Corpus Christi, Texas – These facilities will house the unmanned aircraft systems provided in the FY 2010 Emergency Border Security Supplemental Act
- **Office of Field Operations:**
 - Partner with GSA to advance on-going, long-term LPOE construction projects; and bolster collaboration in the areas of increasing resources, streamlining project delivery schedules and providing a sustainable end product that is adaptive to CBP’s evolving operational mission
 - Outfit Madawaska, Maine; Tornillo-Guadalupe, Texas; Phase 1B San Ysidro, California; Phase I Calexico West, California
 - **ARRA Land Port of Entry Modernization:** Complete the construction of 14 CBP-owned ARRA funded LPOE projects, including: Bridgewater, Easton, Forest City, and Hamlin, Maine; Pinecreek, Minnesota; Del Bonita and Whitlash, Montana; Cannon Corners, New York; Hannah and Sarles, North Dakota; Amistad Dam and Los Ebanos, Texas; Boundary and Nighthawk, Washington
- **Mission Support Offices:**
 - **Advanced Training Center, Harpers Ferry, West Virginia:** Dining Facility, Welcome Security Command Center, Dormitories and Conference Center, and Infrastructure Improvements
 - **Office of Information and Technology:** Lab in Los Angeles, California
 - **Remote and Rural Housing:** Completion of 58 housing units along the Southwest border

PPA: PROGRAM OVERSIGHT AND MANAGEMENT

	Perm Pos	FTE	Amount (In Thousands)
2010 Actual	13,234
2011 Annualized CR	37,013
2012 Adjustments-to-Base	226	226	22,422
2012 Current Services	226	226	59,435
2012 Program Change	(2,339)
2012 Request	226	226	57,096

CBP requests \$57.096 million for Program Oversight and Management. The request includes:

- Decrease of \$630 thousand as a Technical Adjustment from the FY 2011 base.
- Increase of \$23.064 million for the transfer of resources associated with government personnel and operational program requirements from the Salaries and Expenses Appropriation.
- Increase of \$30 thousand for the annualization of facilities program management requirements in the FY 2010 Emergency Border Security Supplemental Act.
- Increase of \$3 thousand to support additional staffing at new POEs.
- Decrease of \$42 thousand towards the government-wide initiative to reduce administrative costs known as the Accountable Government Initiative.
- Decrease of \$1 million for a reduction to facilities program oversight and management.
- Decrease of \$1.342 million towards the DHS-wide reduction in professional services contracts to achieve efficiencies and apply savings towards the highest priority requirements.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Program Oversight and Management PPA provides for the necessary government and support personnel, tools, planning, processes, procedures, and resource matrices in an integrated and effective manner to enable all other program objectives to be successfully implemented while ensuring alignment across the program. The FY 2012 request provides funding for 226 government employees for Facilities Management and Engineering, program and contract support requirements as necessary, and other operational requirements of the program necessary to conduct program management and office operations including, but not limited to, office supplies and equipment.

CBP's FY 2012 budget submission includes the agency's request to transfer salaries and operational program resources to the Program Oversight and Management PPA. The transfer of \$23.064 million will allow greater flexibility to allocate resources to the highest priority requirements of CBP's real property program and facilities management portfolio. This is a necessary consolidation of all CBP facilities-related program management and support resources into a single appropriation account so CBP can consistently plan, finance, acquire, manage, oversee, and administer the Facilities

Management and Engineering program along with its facilities portfolio to best fulfill the mission needs.

IV. Program Justification of Changes

**Department of Homeland Security
U.S. Customs and Border Protection
Construction and Facilities Management
Justification of Program Changes
(Dollars in Thousands)**

Program Increase #1: Increase to Facilities Construction and Sustainment
 PPA: Facilities Construction and Sustainment
 Program Increase: Positions -0 FTE -0 Dollars - \$876

Funding Profile

	FY 2010 Actuals			FY 2011 Annualized CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level								-	-
Program Increase								-	\$876
Total Request	-	-	-	-	-	-	-	-	\$876

Description of Item

The increase of \$876 thousand is associated with facilities requirements for the additional staffing at new POEs and the expansion of the canine teams.

Justification

Please refer to the “Program Justification of Changes” section of the CBP Salaries and Expenses budget submission for details of the program justification.

Impact on Performance (Relationship of Increase to Strategic Goals):

Please refer to the “Program Justification of Changes” section of the CBP Salaries and Expenses budget submission for details of the program justification.

**Department of Homeland Security
U.S. Customs and Border Protection
Construction and Facilities Management
Justification of Program Changes**
(Dollars in Thousands)

Program Increase #2: Increase to Facilities Construction and Sustainment
PPA: Facilities Construction and Sustainment
Program Increase: Positions -0 FTE -0 Dollars - \$300

Funding Profile

	FY 2010 Actuals			FY 2011 Annualized CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Program Increase	-	-	-	-	-	-	-	-	\$300
Total Request	-	-	-	-	-	-	-	-	\$300

Description of Item

The increase of \$300 thousand is associated with the National Targeting Center passenger initiative in the Salaries and Expenses Appropriation within the President’s Budget.

Justification

This is the utilities and sustainment costs associated with the efforts to hire 45 U.S. CBP officers and 20 support personnel, to support associated relocation and administrative expenses, and to make logistical and application enhancements to targeting efforts at the National Targeting Center - Passenger. The new NTC-P vetting initiatives include refinements to the General Aviation Hot List which targets high-risk travelers on private aircraft and increased support for the AMOC.

Impact on Performance (Relationship of Increase to Strategic Goals):

Please refer to the “Program Justification of Changes” section of the CBP Salaries and Expenses budget submission for details of the program justification.

**Department of Homeland Security
U.S. Customs and Border Protection
Construction and Facilities Management
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease #1: Reduction to Facilities Construction and Sustainment

PPA: Facilities Construction and Sustainment
Program Oversight and Management (PMO)

Program Decrease: Positions - 0 FTE - 0 Dollars (\$25,187)

Funding Profile

	FY 2010 Actuals			FY 2011 Annualized CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	\$309,257
Program Decrease							-	-	(\$25,187)
Total Request	-	-	-	-	-	-	-	-	\$284,070

Description of Item

The reduction of \$25.187 million is associated with activities in facilities maintenance, repairs, operations, leasing management activities, and alterations. This reduction includes a \$24.187 million to facilities management, repairs and operations sustainment activities, and \$1 million for facilities program oversight and management activities.

Justification

The reduction will be taken in planned facilities management and sustainment activities, including maintenance, repairs, operations, alterations, and one time costs associated with lease renewals, which will be delayed, deferred, or foregone, as needed, to stay within the reduced budget. This reduction will require CBP to delay some activities such as preventative maintenance, repairs, operations, and alterations.

Impact on Performance (Relationship of Increase to Strategic Goals):

The reduction will be taken in planned facilities management and sustainment activities, including one time costs associated with lease renewals such as; maintenance, repairs, operations, alterations, which will be delayed, deferred, or foregone as needed

The reduction will also delay, defer, or forego planned facilities management and sustainment activities. Key activities that could be impacted include maintenance, repairs, operational services such as utilities, required alterations and configuration of leased facilities, and minor construction for border

patrol stations and sector headquarters throughout the nation, ports of entry, air hangars and marine units, and mission support offices.

**Department of Homeland Security
U.S. Customs and Border Protection
Construction and Facilities Management
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease #2: Professional Services Initiative
PPA: Facilities Construction and Sustainment
Program Oversight and Management
Program Decrease: Positions - 0 FTE - 0 Dollars (\$1,424)

Funding Profile

	FY 2010 Actual			FY 2011 Annualized CR			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							226	226	309,257
Program Decrease							-	-	(1,424)
Total Request	-	-	-	-	-	-	226	226	307,833

Description of Item

CBP is actively participating in a government-wide initiative to curb Professional Services contract spending. In accordance with this effort, the Facilities Management appropriation account includes a reduction of \$1.424 million. The proposed reduction supports the President’s initiative on fiscal discipline and spending restraint.

Justification

Professional services contracts include a wide variety of services, many of which are mission critical and deliver core capabilities such as architectural/engineering services and planning activities. These types of contracts help CBP deliver products on time, within cost and achieve effective results. These contract vehicles provide necessary skills to supplement those skills already resident within CBP. This includes contract management services, programmatic contract support, strategic resource assessments, data and information management solutions, space models, costing, depreciation methodologies and tools, reconciliation of assets and other program management activities associated with the acquisition, management, and sustainment of real property assets and facilities portfolio.

The funding reduction would require that CBP reduce program management support and planning activities associated with the delivery of facilities solutions for Office of Border Patrol, Office of Field Operations, Office of Air and Marine, and CBP’s Mission Support offices.

To achieve the necessary savings, CBP will reduce usage of Professional Services contracts. Many of these reductions will be achieved through delayed, deferred or forgone activities, or in-sourcing.

Impact on Performance (Relationship to Strategic Goals)

To the greatest extent possible, CBP has avoided direct impacts to operations.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U.S. Customs and Border Protection
Justification of Proposed Changes in Construction and Facilities Management
Appropriation Language**

For necessary expenses to plan, acquire, construct, renovate, equip, furnish, operate, manage, oversee, administer and maintain buildings and facilities and to provide facilities solutions and related infrastructure along with program management support necessary for the administration and enforcement of laws related to customs, immigration, and border security, [319,570,000], \$283,822,000 to remain available until expended.

Note.--A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111-242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

Total Investments	\$309.257	(\$25,435)	\$283,822		

NAME OF CONSTRUCTION INITIATIVES

1. Project Description, Justification and Scope

The CBP Construction and Facilities Management account provides the facilities solutions and associated infrastructure required to obtain and maintain operational control of the border. It addresses the requirements for new, modernized, expanded, and sustained facilities to fulfill immediate mission driving operational needs; accommodates increasing capacity demands associated with new agent, officer, pilot and asset deployments; provides resources to modify and/or correct deficiencies within existing facilities and structures; and allows CBP to proactively manage the real property inventory and facilities portfolio and support facilities program-wide efforts. The FY 2012 Budget request focuses on sustainment activities of CBP's real property program and facilities portfolio and associated infrastructure requirements, and program management support.

2. Significant Changes

The FY 2012 Budget submission includes the transfer of salaries and operational program management support resources from the Salaries and Expenses appropriation into the Program Management and Oversight PPA. These resources are associated with government and support personnel, along with the operational requirements of the government personnel supporting the Construction and Facilities Management account.

3. Project Schedule

Not applicable.

4. Schedule of Project Funding (Dollars in Thousands)

Facilities Construction and Sustainment				
	FY 2010	FY 2011	FY 2012	Total
Appropriation	\$282,557	\$282,557	\$226,726	\$791,840
Obligation (planned)	\$234,357	\$215,437	\$204,053	\$653,847
Expenditure (planned)	\$117,178	\$135,107	\$102,027	\$354,312

Program Oversight and Management				
	FY 2010	FY 2011	FY 2012	Total
Appropriation	\$37,013	\$37,013	\$57,096	\$131,122
Obligation (planned)	\$37,013	\$36,383	\$57,029	\$130,425
Expenditure (planned)	\$32,013	\$22,074	\$42,771	\$96,858

5. Cost Estimate Detail and Changes (Dollars in Thousands)

Not applicable.

6. Method of Performance

CBP Construction and Facilities Management requirements are executed through the U.S. Army Corps of Engineers (USACE), GSA, and the CBP Office of Procurement.

Through a memorandum of agreement, the USACE provides CBP with consolidated program management services for real estate planning and acquisition, planning and programming, environmental planning and compliance, design and cost engineering, construction and warranty enforcement and integrated occupancy services.

Project schedules and cost estimates are developed by the FM&E program management offices and are tracked through Program Management Reviews. Project completion schedules and funding allocated to specific projects are tracked within the current CBP accounting system. This system includes modules that store specific information on each asset. That information is automatically linked to key information systems and includes modules that cover all aspects of the assets. The real property profile performance data can be used to produce financial, procurement, and real property indices for measuring the performance of the assets. Projects in Progress are tracked and reported on a monthly basis by project managers in the field. The tracking consists of monitoring the project delivery for construction and leasing through industry standards, including tracking each specific project's schedule, scope, and budget.

Across CBP's owned facilities, the general performance indices include:

1. Facility Condition - Condition surveys are performed on a periodic basis to ascertain the true condition of the asset. A Strategic Resource Assessment will be the primary means by which this information will be generated in the future.
2. Facility Utilization - These indices track the square footage of space and the number of FTEs assigned.
3. Operating Costs - These indices track the cleaning / janitorial, maintenance, and utility costs at the asset level.

Mission Dependency - The primary categories include: Mission Critical, Mission Dependent Not Critical, and Non Mission Dependent.

4. Energy Consumption - As part of the Operating Costs Indices, energy consumption and conservation measures are tracked separately.
5. National Historical Preservation Assets - Real Property Assets that could be eligible for the National Historical Preservation List are tracked.

Within the LPOEs, CBP applies an additional set of performance indices including:

1. Mission and Operations - Factors for the mission and operations criterion measure the facility's compatibility with specific inspection responsibilities. Individual factors address the type of activities performed within the facility and features of the facility necessary for successful inspection services. This criterion contains factors that cause the most significant disruptions to inspection activities and conditions that reflect the significance of the facility's operations.

2. Life Safety and Security - The factors for security and life safety measure a facility's ability to protect occupants and visitors and allow law enforcement functions to maintain safe and secure control of the public and detained individuals. The individual factors address compliance with security and life safety standards (features incorporated in the facility to resist assault and allow staff to maintain operations during emergencies) and deficiencies that represent hazards to the occupants. Safety standards include building life safety codes, as well as federal standards developed in response to terrorist attacks or other threats faced by the occupants.
3. Space and Site Deficiencies - Space and site deficiencies are related to the functional work environment and the overall facility site. Space deficiencies are determined by applying utilization rates, based on space standards, to existing personnel and functions to calculate the amount of usable space that should be available in an existing facility. In addition, the major facility systems and site and building layouts are evaluated for functionality and expansion potential.
4. Personnel and Workload Growth - The personnel and workload growth criterion contains factors related to both current and future personnel, along with current and projected workload categories that generate the need for additional personnel and space at each facility. The points for many of the factors are determined through a national ranking system.

**7. Related Annual Funding Requirements
(Dollars in Thousands)**

Construction & Facilities Management Appropriation	FY 2012
	Current Estimate
Facilities Construction and Sustainment	\$226,726
Program Oversight and Management	\$57,096
Total	\$283,822

8. Budget Allocation to Programs

Program	Allocated Budget (\$000)	
	FY 2011	FY 2012
Facilities Construction & Sustainment	\$239,357	\$226,726
Program Oversight & Management	\$36,383	\$57,096
Total	\$275,740	\$283,822

*FY 2012 budget request includes a transfer of resources for the program management support associated with government personnel.

9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

The Construction and Facilities Management program complies with the Immigration and Nationality Act (P.L. 82-414, INA), Section 235 Inspection by Immigration Officers, Expedited Removal of Inadmissible Arriving Aliens, Referral For Hearing; Section 287 Powers of Immigration Officers and Employees; the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (P.L. 104-208, IIRIRA), Section 102 Improvement of Barriers at Border; and the Homeland Security Act of 2002 (P.L. 107-296).

PPA Mission Statement

Program Oversight and Management - provides for the programmatic studies, services, initiatives, as well as contract support and services required to support the administration and management of facilities and construction programs, program management oversight, and project management oversight.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Salaries & Benefits	\$0	\$0	\$24,153	\$24,153

In FY 2012, an increase of \$2,519,000 is an object class realignment. In FY 2012, an increase of \$21,634,000 is a transfer of Facilities Management & Engineering staff to the Facilities program. In FY 2012, Salaries and Benefits includes costs for 226 FTEs.

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Travel	\$13	\$33	\$799	\$766

In FY 2011, an increase of \$33,000 is FY 2010 carryover. In FY 2012, an increase of \$800,000 is a transfer of Facilities Management & Engineering staff to the Facilities program. In FY 2012, a decrease of -\$34,000 is for the Administrative Savings Initiative/ Efficiency Review. In FY 2012, an increase of \$24,000 is for the annualization of the FY 2010 Border Security Supplemental. In FY 2012, an increase of \$6,000 is an annualization of the FY 2010 Border Security Supplemental for 250 CBPOs. In FY 2012, an increase of \$3,000 is for an expansion to staff new POE and enhance POE operations (Canine).

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Transportation of Things	\$0	\$225	\$0	(\$225)

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Communication, Utilities, and miscellaneous charges	\$146	\$4,058	\$150	(\$3,908)

In FY 2011, an increase of \$897,000 is FY 2010 carryover. In FY 2012, a decrease of -\$3,122,000 is an object class realignment. In FY 2012, an increase of \$111,000 is a transfer of Facilities Management & Engineering staff to the Facilities program.

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Other Services	\$12,746	\$120,202	\$31,522	(\$88,680)

In FY 2011, an increase of \$87,209,000 is FY 2010 carryover. In FY 2012, an increase of \$1,501,000 is an object class realignment. In FY 2012, a decrease of -\$1,342,000 is an Professional Services Contracts reduction. In FY 2012, a decrease of -\$1,000,000 is a reduction to Facilities Program Oversight and Management. In FY 2012, a decrease of -\$630,000 as a technical adjustment to the FY 2011 base.

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Purchase from Government Accounts	\$6	\$0	\$0	\$0

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Supplies & materials	\$202	\$659	\$197	(\$462)

In FY 2011, an increase of \$104,000 is FY 2010 carryover. In FY 2012, a decrease of -\$463,000 is an object class realignment. In FY 2012, an increase of \$113,000 is a transfer of Facilities Management & Engineering staff to the Facilities program. In FY 2012, a decrease of -\$8,000 is for the Accountable Government Initiative/ Efficiency Review.

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Equipment	\$108	\$7,469	\$275	(\$7,194)

In FY 2011, an increase of \$7,165,000 is FY 2010 carryover. In FY 2012, a decrease of -\$435,000 is an object class realignment. In FY 2012, an increase of \$406,000 is a transfer of Facilities Management & Engineering staff to the Facilities program.

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Land & Structures	\$0	\$15,236	\$0	(\$15,236)

In FY 2011, an increase of \$15,236,000 is FY 2010 carryover.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**U.S. Customs and Border Protection
Air and Marine Interdiction:**

I. Appropriation Overview

A. Mission Statement for Air and Marine Interdiction:

CBP protects the Nation through the coordinated use of integrated air and marine forces to detect, interdict, and prevent acts of terrorism and the unlawful movement of people, illegal drugs, and other contraband toward or across the borders of the United States. The CBP Office of Air and Marine's (OAM's) core competencies include air and marine interdiction, air and marine law enforcement, and air and national border domain security.

OAM has a staff of 1,851 personnel, including pilots and aircrew, air and marine law enforcement officers, operations specialists, logistics and maintenance support personnel, and administrative personnel. In FY 2012, mission critical assets will consist of 274 aircraft (including fixed wing, rotary helicopters, and unmanned aircraft systems), approximately 250 marine vessels, a national air and marine operations center (AMOC), fixed and mobile surveillance equipment, ground vehicles, training facilities, maintenance facilities, aircraft hangars, and marine facilities located along all of the Nation's borders and at key interior support locations.

B. Budget Activities:

CBP's Air Strategic Plan was updated in FY 2010 to include marine strategic plans, an expanded plan for Unmanned Aircraft Systems (UASs), a facilities enhancement approach, and updates to the ten-year investment model provided in the baseline plan submission to Congress. CBP's approach to executing the plan can be divided along the three major border security areas of responsibility (AOR) – northern border, southwest border, and southeast/coastal borders. Since FY 2004, five primary air branches and supporting units were established along the northern border. Consideration will be given to establishing secondary or satellite sites to support the concentration of assets needed to meet specific threats as they are identified. Based on the results of operational demonstrations conducted from the joint CBP/Air National Guard (ANG) located in North Dakota in FY 2008, CBP's UAS capabilities to obtain increased intelligence and gain better situational awareness were expanded to North Dakota.

In FY 2011, OAM provided air support to the Office of Border Patrol (OBP) in the Arizona surge by providing resources to the Tucson and Yuma Air Branches. Both air and marine operations will expand along the Great Lakes, the northwestern, and northeastern maritime approaches to the Nation's borders, as additional aircraft, marine vessels, and personnel are deployed. The delivery of new aircraft and additional pilots/air crew will provide increased tactical support to the Border Patrol along the southwest, northern, and southeast coastal borders as the number of agents on the ground increases. The UAS Branch will expand its operations as additional systems are delivered and deployed. Within

the southeast/coastal AOR, P-3 aircraft wing operations will increase as assets are delivered from extensive depot-level rework.

Maritime demonstrations of UAS capabilities in the southeast coastal approaches to the U.S. have been conducted and CBP has plans for a permanent UAS Branch along the gulf coast or eastern shore of Florida in FY 2011 or FY 2012. Marine operations in the Gulf of Mexico will be enhanced as new interceptor vessels replace the aging Black Night Interceptors and additional sea-borne radar platforms are acquired. The investments needed to achieve CBP's end state and to support the operational objectives discussed above can be described in four broad categories discussed below.

Aircraft Safety and Service Life Extension

The highest priority remains the P-3 Service Life Extension Program (SLEP) since it rectifies serious flight safety concerns and provides an unmatched capability to interdict bulk drug shipments to Mexico through the source and transit zones. The average age of 49 percent of CBP's aircraft is 33 years, and the average age of the aircraft in the P-3 fleet is over 40 years old. The P-3 SLEP began in FY 2006 with the repair of fleet-wide wing stress cracks and the development of the requirements for extending the lives of the 16 P-3 aircraft by 20 years. Two P-3 aircraft were inducted in the re-wing phase of SLEP in FY 2010, followed by one in FY 2011. This brings the total wing kits procured from FY 2008 through FY 2010 to nine with two more planned for FY 2011. In total, CBP plans to send 14 of its 16 P-3s through SLEP. The remaining two platforms will likely be retired without undergoing a SLEP, as CBP plans to introduce a new replacement capability for the P-3, which will be consistent with the results of an assessment of alternatives that should be completed sometime in FY 2011.

Establishment of a Strategic Intelligence, Surveillance, and Interdiction Capability

The UAS program is an equally high priority. This program will support CBP's efforts to maintain priority coverage along the southwest and northern borders and increase effectiveness at the southeast/coastal borders. In FY 2006, CBP established a UAS program that will be the key element of the agency's strategic intelligence, surveillance, and interdiction capability. The total capability will include the P-3 Maritime Patrol Aircraft and the DHC-8/Q200 and Q300 Multi-Role Patrol Aircraft (MPA). The strategic plan currently calls for up to three squadrons of UASs to be deployed along the southwest border, northern border, and southeast/coastal operating area. The end-state objectives for the MPA changed in FY 2007 when the manufacturer closed the DHC-8/Q300 production line in favor of a larger, more commercially viable DHC-8/Q400. OAM concluded that the larger Q400 was not suitable for its missions, and in early FY 2009, focused on the acquisition of a smaller, twin-engine, Multi-Role Enforcement Aircraft (MEA) capable of operating effectively over land and water. Additionally, UAS supports Immigration and Customs Enforcement (ICE) investigative efforts, extends cross-border operations into the source and transit zones, as well as augments and enhances the crewed air and marine assets. In addition to enhancements gained through the UAS program, CBP will continue to work on the software and systems of AMOC, using funds provided by Congress in FY 2010.

Air Recapitalization and Modernization

The present air fleet consists of 19 different aircraft types. Currently, seven of ten aircraft types have exceeded their normal service life expectancy, some by nearly two times the industry average. The impact has been an unavoidable loss of operational readiness, as a result of additional maintenance down time due to increased inspections and a shrinking pool of spare parts. To accomplish its border

security, anti-drug, and customs and immigration enforcement missions, CBP requires a more flexible and supportable air fleet. To this end, the air fleet is being standardized, and will emphasize the use of multi-mission assets that can be deployed to multiple locations as the threat changes over time. The strategic objective is to reduce the types of aircraft used to eight or nine, and to increase the total number of aircraft to a level consistent with operational demands. The total will likely change over time, as the nature of the threat changes; therefore, the CBP strategic plan and end-state model will be updated accordingly.

Aged Aircraft Risk Management

CBP must maintain its aging aircraft to keep pace with mission demands. The slow pace of aged aircraft replacement and the prospect for a constrained resource environment require CBP to take additional action to ensure its aged assets can be operated safely. To accomplish this, an aged aircraft investigation was conducted in FY 2010 to determine how long selected assets, such as the OH-6 helicopters and C-12/C-12M aircraft, will remain operational. The aged aircraft investigation will help determine the operating life limitations of the aircraft types most at risk. Based on the results, a sustainment regimen will be established for each aircraft type that employs additional inspections, shortened maintenance intervals, and additional repairs. Along with the additional inspections and repairs, CBP will revise its maintenance reporting requirements to capture the data needed to identify key indicators of aged aircraft condition that would drive CBP to retire the aircraft from service. In accordance with House Report 111-157, as modified in the joint Conference Report 111-298, CBP provided the Committees on Appropriations in the House and the Senate with a briefing on its plans to manage its aging aircraft, details of which are contained in the FY 2010 update to the Strategic Air and Marine Implementation Plan submitted to the Committees on Appropriations in the House and the Senate.

Marine Recapitalization and Modernization

In FY 2008 and FY 2009, Congress provided funding for 11 new marine units consisting of 197 new marine agents and 54 new marine vessels, including 26 new Safeboat Interceptors and 7 Interim Coastal Interceptors. A portion of the funding was used to acquire an Advanced Concept Technology Demonstration (ACTD) vessel for a new class of fast coastal interceptors that completed a year of test and evaluation in November 2009. The results of the ACTD effort have enabled CBP to define its requirements for a highly capable replacement for the currently employed slower, aging Midnight Express Interceptors.

The largest change to CBP's investment plan was driven by the transfer of used vessels from the U.S. Coast Guard (USCG) to CBP over the past two years. As of this report, the USCG has transferred custody of 55 21-27 foot Safeboat-type vessels that are being refurbished and returned to service with CBP. In general, the vessels were transferred in good-to-excellent condition, some provided with the requisite outboard engines. The transfer of these vessels has enabled CBP to avoid future riverine vessel investments, saving nearly \$9 million (including the amount needed to repair and upgrade the vessels and to provide engines).

C. Budget Request Summary:

CBP requests \$470.566 million for the FY 2012 request. The total adjustments-to-base is a decrease of \$13.966 million. The program changes include a total program decrease of \$35.294 million to:

- Increase for two Blackhawk A-L Conversion (\$22.0 million).
- Decrease to Procurement for Strategic Air and Marine Plan (StAMP) Level 1 Program (\$48.218 million).
- Decrease of \$9.076 million towards the DHS-wide decrease in professional services contracts to achieve efficiencies and apply savings towards the highest priority requirements.

	FY 2010 Enacted		FY 2011 Annualized CR		FY 2012 President's budget

III. Current Services Program Description by PPA

**Department of Homeland Security
U.S. Customs and Border Protection
Air and Marine Interdiction:
Operations and Maintenance
Program Performance Justification
(Dollars in Thousands)**

PPA: Operations and Maintenance

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
2010 Actual	-	-	438,432
2011 Annualized CR	-	-	374,217
2012 Adjustments-to-Base	-	-	(4,054)
2012 Current Services	-	-	370,163
2012 Program Change	-	-	(9,076)
2012 Total Request	-	-	361,087

CBP requests \$361.087 million for Operations and Maintenance. The request includes:

- Decrease of \$2.575 million Technical Adjustment for the FY 2011 Base.
- Increase of \$3.454 million for 2010 supplemental annualization.
- Increase of \$804,000 related to the on-going support of CBP's use of air and marine forces to detect and prevent acts of terrorism.
- Decrease of \$5.737 million towards the government-wide initiative to reduce administrative costs known as the Accountable Government Initiative as well as reductions from the Efficiency Review.
- Decrease of \$9.076 million towards the DHS-wide decrease in professional services contracts to achieve efficiencies and apply savings towards the highest priority requirements.

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP secures the borders against terrorists, acts of terrorism, drug smuggling and other illegal activity by operating air and marine branches at strategic locations along the borders. Multi-mission aircraft with advanced sensors and communications equipment provide powerful interdiction and mobility capabilities directly in support of detecting, identifying, and interdicting suspect conveyances, and apprehending suspect terrorists and smugglers. OAM maximizes the capabilities of air and marine assets through a cohesive joint air operations model for centralized command and control and a responsive, integrated control system for decentralized execution.

CBP partners with numerous stakeholders in performing its missions throughout the continental United States and the Western Hemisphere. This includes domestic operations at the borders; source, transit,

and arrival zone operations; interior law enforcement support; and support to other agencies. Crosscutting within the Department of Homeland Security and the Federal government as a whole, the unique capabilities of OAM serve as both a stand-alone entity and as a force multiplier. In fulfilling the mission of CBP to protect the borders, CBP OAM's three main geographical mission areas of responsibilities (AOR) are: the southwest, northern, and southeast/coastal borders (to include Caribbean corridors). CBP continually protects the American people and critical infrastructure by using an integrated and coordinated air and marine force of 274 aircraft, 250 marine vessels and 1,851 personnel, including pilots and air crew, fixed wing aircraft, rotary helicopters, unmanned aircraft systems, marine vessels, a national air and marine operations center, and surveillance equipment, to detect, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States.

Significant accomplishments in FY 2010 include:

- CBP funded over 100,000 flight hours for its mixed fleet of long range patrol and tactical air assets providing support for both border security and the interdiction of bulk drug traffic passing through the source and transit zones of the Caribbean and Eastern Pacific.
- In November 2009, a new national aviation maintenance contract was awarded that, for the first time, brings all CBP tactical assets, including southwest border air branches and units, under a uniform system of maintenance, logistic support, and configuration control. It is expected that this will improve safety and overall fleet effectiveness.
- OAM initiated an aged aircraft investigation to determine the remaining service lives for selected tactical aircraft types such as the OH-6 light observation helicopter; the PA-42 twin-engine patrol aircraft; the C-12/C-12M patrol aircraft; and the UH-60A Black Hawk medium lift helicopter. This investigation is an ongoing process and is expected to continue in FY 2011.
- Provided support to OBP in Arizona by providing air interdiction assistance, which resulted in over 3,500 apprehensions and 1,400 assists, and contributed to the seizure of over 38,000 pounds of narcotics.

FY 2011 goals include:

- In FY 2011, CBP plans to replenish resources/assets deployed from the Southeast/Coastal area to the Northern Border in FYs 2008 and 2009 to support the establishment of the final two primary air branches in North Dakota and the Great Lakes region of Detroit. CBP will continue to address needs on the Northern Border. This approach represents CBP OAM's deployment end-state that considers the entirety of our Nation's borders and will best address threats, increased efficiencies and operational effectiveness.
- CBP will continue to take into inventory aircraft it has been acquiring since FY 2006. To continue providing a reasonable level of aviation support along all borders, CBP will also continue to maintain older, less supportable aircraft as long as the aircraft are safe to fly.
- With the initiation of the aged aircraft investigation effort in FY 2010, there will be an engineering assessment of the remaining service lives of selected aircraft types, such as the OH-6 light helicopter, the C-12/C-12M twin engine aircraft and the PA-42 twin engine aircraft. Based on the results of the investigation, CBP will initiate an enhanced inspection and repair regimen aimed at keeping the aged aircraft in service as long as the aircraft are safe to fly. As required in House Report 111-157, CBP will provide to the Committees on Appropriations of

the House and Senate the results of the aged investigations, to include estimates of the costs to sustain the aged aircraft, as well as assessments of the impacts of additional maintenance and aircraft retirements on mission availability.

- CBP expects to begin the retirement of aged aircraft, consistent with the results of the aged aircraft investigation, and the delivery of new assets. CBP has already taken delivery of 50 new helicopters to replace the aging helicopters and single-engine observation aircraft, and will deliver two of five KA-350CER twin-engine multi-role enforcement aircraft to replace 2 PA-42s in March 2011.

FY 2012 goals include:

- As in FY 2011, CBP will continue to take into inventory aircraft it has been acquiring since FY 2006. To continue providing a reasonable level of aviation support along all borders, CBP will also continue to maintain older, less supportable aircraft as long as they are safe to fly.
- CBP expects that aged aircraft investigations will continue, to include an assessment of the UH-1 “Huey” utility helicopter and the UH-60A Black Hawks that may not be inducted for service life extension overhauls.
- CBP expects to support nearly 90,000 flight hours across the Nation’s borders and into the source and transit zones of the Caribbean and Eastern Pacific.

**Department of Homeland Security
U.S. Customs and Border Protection
Air and Marine Interdiction:
Procurement
Program Performance Justification
(Dollars in Thousands)**

PPA: Procurement

	Perm. Pos	FTE	Amount
2010 Actual	-	-	161,941
2011 Annualized CR	-	-	145,609
2012 Adjustments-to-Base	-	-	(9,912)
2012 Current Services	-	-	135,697
2012 Program Change	-	-	(26,218)
2012 Total Request	-	-	109,479

CBP requests \$109.479 million for Procurement.

- Increase of \$4.088 million for 2010 supplemental annualization.
- Increase of \$22 million for two Blackhawk A-L.
- Decrease of \$14 million for the non-recur for marine vessels and AMOC.
- Decrease of \$48.218 million to the StAMP Level 1 Program.

CURRENT SERVICES PROGRAM DESCRIPTION:

OAM has published a multi-year strategic plan that seeks to economically extend the life of existing assets, and to recapitalize capability when the service life is exhausted. The investments are made in conformance with the DHS-approved StAMP, a Level 1 investment program.

Significant accomplishments in FY 2010 include:

- CBP received an additional \$9.0 million to be used for the P-3 SLEP, for a total funding level of \$65.0 million. These funds continued the procurement of the three new wing/tail assemblies, the wing/tail refurbishment kits for aircraft that do not need new wings/tails, the continued work to complete the last special structural inspections (SSI) and extended special structural inspections (ESSI), and the induction of an additional P-3 platform into the SLEP program.
- CBP ensured adequate radar coverage along the borders by utilizing the joint Department of Defense (DOD)-DHS Long Range Radar assessments office to monitor FAA progress on maintaining nation-wide primary air search radar capabilities to detect and track non-cooperative targets, by continuing to add Canadian radar feeds to the AMOC capabilities, and by utilizing C-550 Interceptor and the Multi Role Enforcement Aircraft to track and/or intercept both conventional and non-conventional aircraft.

- CBP continued the acquisition of five to six AS-350s (Light Enforcement Helicopters), UAS spare parts and components, and one C550 Sensor Upgrade. A contract for the new class of coastal interceptor vessel should be awarded before the end of the year.
- CBP tested the first Maritime configured Predator B aircraft equipped with Raytheon's SeaVue marine radar and enhanced EO/IR optical sensor. Working closely with DoD, CBP also leveraged extensive U.S. Navy developments in ocean surveillance and tracking technology to greatly enhance maritime target detection, identification and tracking of surface and semi-submersible targets. To exercise command and control of the new Maritime Predator B aircraft, CBP also evaluated and procured a specifically configured maritime ground control station which exploits all of the new maritime surveillance hardware and software.

FY 2011 goals include:

- The FY 2011 budget request includes \$47.7 million for P-3 SLEP. These funds will continue the procurement of the new wing/tail assembly, the wing/tail refurbishment kits for aircraft that do not need new wings/tails, continue the special structural inspections (SSI) and extended special structural inspections (ESSI), and induct an additional P-3 platform into the SLEP program.
- Continue the acquisition of up to eight AS-350s (Light Enforcement Helicopters). By the end of FY 2011, OAM will have acquired 39 of the 50 AS-350's in the strategic plan.
- Funding is provided for one MQ-9 Maritime Variant (Guardian) Unmanned Aircraft System.
- Funding is provided to convert one UH-60 Medium Lift Helicopter from an A (alpha) to L (lima) model.
- Funding is provided to convert one UH-1 to an UH-2 Utility Helicopter.
- Funding is provided for P-3 and other sensor upgrades, specifically three additional SeaVue maritime radars and one or more back-up MTS-B electro-optical/infrared sensors for the Predator B UAS.
- Funding is also provided for various marine vessels, to include up to six additional coastal interceptors and additional extreme shallow water riverine vessels.

FY 2012 goals include:

- Continuing the P-3 SLEP, purchasing two new wing sets and completing the total SLEP effort on two P-3 aircraft;
- The purchase of six or seven new AS-350 Light Enforcement Helicopters;
- The purchase and outfitting of up to five new marine coastal interceptor vessels;
- The refurbishment and conversion of two Blackhawk Helicopters from A models to L models;
- The expansion of the aged aircraft investigation effort started in FY 2010, to include service life determinations for the UH-1 "Huey" utility helicopters and UH-60A Black Hawk Medium Lift Helicopters not already inducted into the planned conversion program, along with the remaining MD-500 Light Observation Helicopters; and
- Continued retirement of aged aircraft that have exceeded their service lives in accordance with the StAMP and the aged aircraft investigation efforts that will be completed in FY 2011.

IV. Program Justification Changes

**Department of Homeland Security
U.S. Customs and Border Protection
Air and Marine Interdiction:
Procurement
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease #1: Reduction to StAMP Replacement
PPA: Procurement

Total Request	-	-	161,941	-	-	145,609	-	-	109,479

Description of Item

The total funding reduction of \$26.218 million will decrease the FY 2012 funding request for Air & Marine Operations Procurement to \$109.479 million.

Justification

Strategic Air and Marine Plan

The table on the following page depicts the asset acquisitions in FY 2010-2012.

	FY 2010 Enacted		FY 2011 Annualized CR		FY 2012 President's budget	
	Quantity	\$ in Millions	Quantity	\$ in Millions	Quantity	\$ in Millions
P-3 SLEP		65.00		47.70		42.00
New AS-350 Helicopters	6	28.00	8	38.40	8	36.80
MQ-9 Predator/Guardian UAS	1	22.10	1	18.00		4.00
UH-60 A-L Black Hawk Recap.		None	2	25.00	2	22.00
New UH-60M Black Hawk Helicopters		None		None		None
KA-350CER Multi-Role Enforcement Aircraft		None		None		None
UH-1 to Huey II Helicopter Recap.		None		None		None
C-550 Jet Interceptor Sensor Upgrades		10.00		None		None
Sensor Upgrades (SeaVue Radars/EOIR)		None	3	10.00		None
Marine Vessels (various)		14.50	6	6.50		4.70
AMOC Phase B		6.00				
Total		\$145.60		\$145.60		\$109.50

In order to fund high priority border security requirements, a reduction in funding is requested to the OAM strategic recapitalization program, specifically, the conversions of existing UH-60 A-L and conversions of UH-I to UH-II. The U.S. Army is planning to accelerate the UH-60A-L production line, and without funds to induct additional assets, the production line will likely shut down before CBP's conversions can be completed. Without the economic advantages offered by CBP's partnership with the U.S. Army, CBP will likely be unable to afford to continue this project. Additionally, the reduction will limit the UH-I to UH-II production line after five of 14 upgrades have been completed.

Items Funded

P-3 SLEP: CBP's P-3 aircraft are high-endurance, all-weather, tactical turbo-prop aircraft, which are utilized primarily for long-range patrols along the entire U.S. border, near choke points off the coast of source and transit zone countries, and throughout Central and South America. It is the primary DHS asset used to detect and target bulk drug shipments carried by self-propelled semi-submersible vessels. The aircraft provides advanced sensor capabilities, can track and identify targets over extended periods, and remains vital to Joint Interagency Taskforce South (JIATF-S) support. In short, the P-3 provides mission support capabilities beyond those of any other aircraft available to law enforcement. Each P-3 airframe is over 40 years old, and in FY 2006, CBP initiated a two-phase SLEP that will eventually add another 18 years (15,000 flight hours) to 14 of the 16 aircraft in the inventory (two aircraft have sufficient remaining service life to forgo the SLEP). The first phase consisted of special structural inspections and repairs that enabled CBP to keep some aircraft available for its ongoing mission. To date CBP has returned 11 aircraft to full operation. The second phase consists of wing and tail replacements and other upgrades needed to keep the aircraft in service for most of the next two decades.

MQ-9 Predator/Guardian Unmanned Aircraft System (UAS) Acquisition and Deployment: The MQ-9 Predator B UAS augments OAM assets supporting ground interdiction agents in the southern and northern borders. The Predator B is a force multiplier for CBP and its border security mission. In addition, it has the potential to allow CBP to coordinate operations within other DHS organizations, including the USCG and Federal Emergency Management Agency (FEMA).

Light Enforcement Helicopters (LEHs): These assets deploy border agents, support ICE investigations, and route resources to remote locations along the Nation's borders. Sensor-equipped LEHs are optimal aerial surveillance platforms in metropolitan areas. Electro-optical/Infrared (EO/IR)

sensors and video downlink capabilities improve the quality of investigative work and enhance officer safety by providing intelligence to agents during surveillance operations.

Marine coastal interceptor vessels: These vessels are used to pursue suspect vessels for the purpose of boarding, searching, and when necessary arresting violators and seizing the vessel and/or contraband. Vessels are capable of tactical and interdiction operations that include performing high-speed maneuvers and turns in close proximity of another vessel. The new vessels will be a highly capable replacement for the slower, aging Midnight Express Interceptors currently employed by CBP, many of which are beyond their planned retirement dates, but have been kept operational through inspections and repairs. Through the ongoing assessment of maritime threats and the capabilities needed to meet them, CBP has determined that specific marine units may require additional interceptors to support increased operating tempos. In many cases, these units are geographically dispersed along the southeast or southwest areas of responsibility, with only one interceptor currently assigned. The vessel increases will provide for the deployment of multiple vessels during each shift, allowing for greater coverage and enhanced security.

UH-60A-L Black Hawk Recap:

UH-60A Black Hawk medium lift helicopters perform missions such as border security, insertion of agents in remote areas and rapid-response to acts of terrorism, natural disasters and other emergencies. High operating costs due to age and a limited number of airframes have adversely impacted mission availability.

The MLH modernization program envisions a fleet of new or refurbished UH60 helicopters equipped with EO/IR sensors, secure communications, weather radar, video data downlinks and essential law enforcement equipment.

- CBP funded four new UH-60M helicopters in FY 2006 - FY 2008; due for delivery between April 2011 and August 2012.
- CBP funded two of 16 UH-60A to L conversions in FY 2008, and one requested in FY 2011 and two with this request in FY 2012.
- CBP obtains a “zero-time” aircraft for between \$10.5 million and \$12 million each, based on aircraft condition, which is half the cost of a new UH-60M.
- Without sustained funding for these UH-60 conversions, OAM can expect to ground/retire up to nine UH-60As before the end of FY 2014, as the aircraft will be 33-34 years old.

Reduction of Maintenance and Support Costs

A number of maintenance issues arise in older platforms including fatigue, total operational hours, and the need for scheduled and unscheduled maintenance. As aircraft advance in age, the required inspections become more complex, removing the platform from service for longer periods of time, and incurring greater maintenance costs. Additionally, manufacturers often cease to support older models of aircraft with parts and supplies, complicating the sourcing of replacement parts or specialized maintenance support. Aging has a well-documented and profound impact on maintenance costs. When an aircraft is 30 years old, maintenance costs are 2.2 times greater than they were when the aircraft was five years old. Approximately two-thirds of the CBP aircraft have reached or exceeded their economic service life, some by almost two times the industry average. Since some of these aircraft are more than

35 years old, the resulting impact has been an unavoidable loss of operational sorties due to additional maintenance down time and a shrinking pool of spare parts.

Impact on Performance (Relationship of Decrease to Strategic Goals):

OAM promotes DHS strategic goal 2.1 “Effectively Control U.S. Air, Land, and Sea Borders” and strategic objectives 2.1.1 “Prevent illegal entry” and 2.1.2 “Prevent illegal export and exit”. CBP’s OAM utilizes Marine Coastal Interceptor Vessels to detect, interdict, and prevent acts of terrorism and the unlawful movement of people, illegal drugs, and other contraband toward or across the borders of the United States.

Current Services Level							-	-	370,163
Program Decrease							-	-	(9,076)
Total Request	-	-	-	-	-	-	-	-	361,087

Description of Item

CBP is actively participating in a government-wide initiative to reduce Professional Service contract spending. In accordance with this effort, the OAM appropriations account includes a reduction of \$9.076 million. The proposed reduction supports the President’s initiative on fiscal discipline and spending restraint.

Justification

Professional services contracts include a wide variety of services, many of which are mission critical and deliver core capabilities of the CBP workforce. They include architectural/engineering services, information technology operations and maintenance, and design and development of air and marine platforms. These types of contracts help CBP deliver products on time, within cost, and achieve effective results. While there are areas where we are cultivating these skills within CBP, it is not efficient in select areas, due to costs, workload fluctuations, etc.

CBP will review all of its aircraft retirements to see if it can stop work early to avoid maintenance and logistics costs. In addition, CBP will eliminate all non-essential support projects, including some sensor investigations and mutual support agreements. We will evaluate the possibility of base/unit/surge site consolidations and/or closures if a near-term financial return on such actions can be attained without significantly affect agency priorities. Finally, if necessary, determine if specific missions should be curtailed in favor of the agency’s highest priorities.

Impact on Performance (Relationship to Strategic Goals)

To the greatest extent possible, CBP has avoided direct impacts to air and marine operations.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U.S. Customs and Border Protection
Justification of Proposed Changes in Air and Marine Interdiction
Appropriation Language**

For necessary expenses for the operations, maintenance, and procurement of marine vessels, aircraft, unmanned aircraft systems, and other related equipment of the air and marine program, including, operational training and mission-related travel, the operations of which include the following: the interdiction of narcotics and other goods; the provision of support to Federal, State, and local agencies in the enforcement or administration of laws enforced by the Department of Homeland Security; and at the discretion of the Secretary of Homeland Security, the provision of assistance to Federal, State, and local agencies in other law enforcement and emergency humanitarian efforts, [\$519,826,000] \$470,566,000, to remain available until expended: Provided that, no aircraft or other related equipment, with the exception of aircraft that are one of a kind and have been identified as excess to United States Customs and Border Protection requirements and aircraft that have been damaged beyond repair, shall be transferred to any other Federal agency, department, or office outside of the Department of Homeland Security during fiscal year [2011] 2012 without prior notice to the Committees on Appropriations of the Senate and the House of Representatives.

Note.--A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111-242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution. (*Department of Homeland Security Appropriations Act, 2012.*)

Explanation of Changes:

No substantive changes.

1. Project Description, Justification and Scope

Project Description

In the summer of 2006, CBP developed and submitted to Congress a Strategic Air Plan that defines the end state for the air force based on ongoing threat assessments, mission requirements determined by higher authority, and the evolving requirements of the Secure Border Initiative (SBI). In 2007, this Plan was updated (further updates occurred in FY 2010) to incorporate marine vessels and Unmanned Aircraft Systems (UAS). The UAS PPA was formally merged into CBP Air and Marine (A&M) Procurement PPA in FY 2007.

The Air Plan calls for the air and marine fleets to be standardized, emphasizing the use of multi-mission assets that can be deployed to multiple locations as the threat changes over time. The A&M Procurement PPA recurs each fiscal year and is used to acquire new aircraft and marine vessels, UAS, retire unserviceable assets, upgrade sensors and surveillance capabilities, and support the expansion of mission capabilities along the borders in response to ongoing threat assessments and mission assignments directed by higher authority.

Program Justification

Gain operational control of the borders

Through the coordinated use of integrated air and marine force to detect, interdict and prevent acts of terrorism and the unlawful movement of people, illegal drugs and other contraband toward or across the borders of the United States. Terrain, weather, and distance are significant obstacles along much of the southern, northern, and coastal borders. CBP OAM support acts as a force multiplier, allowing personnel and equipment to be transported efficiently and effectively. This support also provides rapid-response relocation of personnel and equipment, to safeguard people and critical infrastructure from acts of terrorism, natural disasters and other emergencies. The Air Safety and Life Extension Contract support the aircraft that makes it possible for CBP OAM to perform this mission.

2. Significant Changes

The funds requested will enable continued support for program operations through FY 2012.

3. Project Schedule

	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012
Aircraft Acquired	30	2	6	8	8
UAS Acquired	1	1	0	1	0
Vessels Acquired	21	18	29	30	various

4. Schedule of Project Funding (Dollars in Thousands)

	FY 2009	FY 2010	FY 2011	FY 2012	Total
Appropriation	147,978	145,609	145,609	109,479	\$510,692
Obligation (planned)	147,978	145,609	145,609	109,479	\$510,692
Expenditure (planned)	147,978	145,609	145,609	109,479	\$510,692

5. Cost Estimate Detail and Changes (Dollars in Thousands)

Not Applicable

6. Method of Performance

1. Is there a project (investment) manager assigned to the investment?

Yes

If so, what is his/her name?

Charles Bourquardez

2. Is there a contracting officer assigned to the investment?

Yes

If so, what is his/her name?

Sharon Lim

3. Is there an Integrated Project Team?

Yes

If so, list the skill set represented.

The integrated project team is comprised of individuals from OAM, Office of Administration, Office of Information and Technology, Office of Chief Counsel, Secure Border Initiative – Program Management Office, and OBP representing systems acquisition, project management, systems engineering, legal review and test and acceptance.

4. Is there a sponsor/owner for this investment?

Yes

If so, identify the sponsor/process owner by name and title and provide contact information.

Michael C. Kostelnik, Assistant Commissioner, Office of CBP Air and Marine, (202) 344-3950.

Fiscal Year	Strategic Goal(s) Supported	Performance Measure / Type	Explanation or Description	Target or Goal	Actual Performance Results
2011	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Percent of detected conventional aircraft incursions resolved along all borders of the United States Long Term/ Output	This measure shows the percent of conventional aircraft that once detected are suspected of illegal cross - border activity and are brought to a successful law enforcement resolution. The Office of Air and Marine (OAM) determines whether an incursion is legal or illegal. If illegal, the Office of Air and Marine operations continue through the apprehension phase to successfully resolve the incursion.	2011 – 100%	N/A

PPA Mission Statement					
<p>The Office of Air & Marine (OAM) is responsible for the protection of the borders of the United States. OAM identifies, deters, interdicts, and investigates acts of terrorism and smuggling arising from unlawful movement of people and goods into and out of the United States with an integrated and coordinated air and marine force. OAM has historically conducted missions along the southern borders of the United States, Mexico, South America and the Caribbean. Since September 11, 2001, OAM has established a presence along the northern border. OAM has a staff of over 1,895 pilots, law enforcement officers, operational support, and administrative positions. Mission critical assets consist of aircraft (including fixed wing and rotary helicopters), marine vessels, P-3 surveillance aircraft, surveillance equipment, maintenance facilities and hangers. With the transfer of the Unmanned Aircraft Vehicles (UAS) and Border Patrol assets, U. S. Customs and Border Protection (CBP) has been able to achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets</p>

PPA Mission Statement

The Office of Air & Marine (OAM) is responsible for the protection of the borders of the United States. OAM identifies, deters, interdicts, and investigates acts of terrorism and smuggling arising from unlawful movement of people and goods into and out of the United States with an integrated and coordinated air and marine force. OAM has historically conducted missions along the southern borders of the United States, Mexico, South America and the Caribbean. Since September 11, 2001, OAM has established a presence along the northern border. OAM has a staff of over 1,895 pilots, law enforcement officers, operational support, and administrative positions. Mission critical assets consist of aircraft (including fixed wing and rotary helicopters), marine vessels, P-3 surveillance aircraft, surveillance equipment, maintenance facilities and hangers. With the transfer of the Unmanned Aircraft Vehicles (UAS) and Border Patrol assets, U. S. Customs and Border Protection (CBP) has been able to achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection COBRA Passenger Inspection Fee

I. Appropriation Overview

A. Mission Statement for COBRA Passenger Inspection Fee:

The Consolidated Omnibus Budget Reconciliation Act of 1985 (P.L. 99-272; COBRA) created a series of user fees to recover certain costs incurred by Customs and Border Protection (CBP). Public Law 99-272, codified as 19 U.S.C. 58c (a)(1-8), established processing fees for air and sea passengers, commercial trucks, railroad cars, private aircraft and vessels, commercial vessels, dutiable mail packages, broker permits, barges and bulk carriers from Canada and Mexico, cruise vessel passengers, and ferry vessel passengers.

Collections from COBRA user fees are made available through permanent/indefinite appropriation created by the user fee statute. The fees are deposited in the Customs User Fee Account (No Year) at the U.S. Treasury. Excess collections, after reimbursements for inspectional overtime and preclearance costs are available without fiscal year limitation.

The COBRA statute mandates that the fee collections be used to pay for (in the order listed):

- All inspectional overtime
- Premium Pay
- Civil Service Retirement and Disability Fund (Agency Contribution)
- Excess Preclearance
- Foreign Language Proficiency Awards
- Enhanced Equipment and Support

The Trade Act 2002 (P.L. 107-210) section 337, codified as 19 USC 58c (b)(9)(A) (ii) and (b) (9)(B), authorized the establishment of the Express Consignment Courier Facilities (ECCF) fee to reimburse CBP for the processing costs incurred at those facilities. The original fee was set at 66 cents per individual airway bill or bill of lading. The Act also stipulated that the fee could be increased to a maximum of \$1.00 per individual airway bill or bill of lading. The ECCF fee increased to \$1.00 effective July 2008. Congress also mandated that 50 percent of the ECCF collection be transferred to Treasury's General Fund.

Since collections from the ECCF are deposited in the Customs User Fee Account, for budgetary purposes, they are reported as part of the COBRA User Fees.

B. Budget Activities:

The collections support Customs and Border Protection Officers' salaries and benefits to ensure all carriers, passengers and their personal effects entering the U.S. are compliant with U.S. customs laws. To the extent that revenues are available, the estimated FY 2012 collections will fund some of the hierarchy of activities referenced above in the COBRA statute (i.e. inspectional overtime, premium

pay, etc). Because these fees are not set to be full cost recovery, the estimated revenues will not fund all of the authorized activities.

C. Budget Request Summary:

Collections for COBRA user fees and the ECCF are estimated at \$440,521,000 in FY 2012. COBRA and ECCF collections are projected to support 1,683 FTEs, 1683 positions in FY 2012.

CBP projected FY 2012 collections by applying global economic growth figures released by the Office of Management and Budget. Since historical revenue trends show that fluctuations in collections from the ECCF charge are correlated with collections from air passenger fees, CBP used the same anticipated economic growth rates to project revenues from this fee. The enacted amount for FY 2011 does not fully reflect the impact of the FY 2010 recession and its residual impact on FY 2011 projected collections. Therefore, the enacted FY 2011 is higher than the anticipated collections in FY 2010.

2012 Request	1,683	1,683	440,521

The components of the COBRA User Fees account are: international air and sea passenger, commercial trucks, loaded/partially loaded rail cars, commercial vessels, private aircraft and vessels, dutiable mail, customs broker permits, barges/bulk carriers, cruise vessel passenger fees and express consignment carrier fees. Collecting fees to help recover the costs of providing customs inspections, including, but not limited to, all costs associated with barge, commercial passenger, vessel, truck, rail car, and aircraft processing. CBP collects Express Consignment Fees to help recover the costs of providing customs cargo inspection services to express consignment carriers or centralized hub facilities.” Each of these fees are set by statute, however, the current fee levels are not set at a level to recover the full costs of each of the programs. Remaining activities will be funded with appropriated funding.

The President’s FY 2012 Budget also includes a legislative proposal to lift the country exemptions for Mexico, Canada, and the Caribbean, which will increase collections by \$110 million. The Budget assumes implementation of this exemption by Q3 FY 2012 and therefore requests \$55 million in discretionary funding to cover half of the costs.

Revenues from these charges will support CBP’s inspection functions in meeting Strategic Goals Strategic Goals 1. Secure the Nation’s borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel and the Quadrennial Homeland Security Mission 2: Securing and Managing our Borders.

Total requirements	\$405,473	\$393,000	\$440,521	47,521

Instructions (Do not print for final submission)

Total obligations reported should be direct obligations only. Include SF-1151 transfers, as well as annual, multi-year and no-year resources.

The section at the bottom of the exhibit on unobligated balances may be omitted if no multiple year authority is available. In general, the total requirements line will equal the budget authority shown on the Summary of Requirements exhibit. In cases where multiple object class displays are needed, the sum of all total requirements lines will equal the totals on the Summary of Requirements exhibit.

PPA Mission Statement

Customs and Border Protection user fees are authorized under Title 19 U.S.C. 58c, fees for certain customs services. The fees were created by the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA). COBRA fees are made available through permanent /indefinite appropriation created by the user fee statute. CBP collects customs fees to cover the cost of providing customs inspections of commercial operations, including, but not limited to, all costs associated with commercial passenger, vessel, vehicle, aircraft, and cargo processing. The fees are deposited in the Customs and Border Protection user Fee Account (No Year) at the U.S. Treasury. The excess of collections over inspectional overtime and preclearance are available without fiscal year limitation, except that \$30 million of such excess remains as a contingency for use in any year in which receipts are insufficient to cover the costs of providing the services described by the statute.

Summary Justification and Explanation of Changes

	2010 Actuals	2011 Annualized CR	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$362,486	\$363,238	\$409,271	\$46,033

Salaries and Benefits includes costs for 1,683 FTEs.

	2010 Actuals	2011 Annualized CR	2012 Request	2011 to 2012 Change
Communication, Utilities, and miscellaneous charges	\$8,594	\$8,612	\$9,703	\$1,091

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

Immigration Inspection User Fees

I. Appropriation Overview

A. Mission Statement for Immigration Inspection User Fees:

The Department of Justice Appropriation Act of 1987 (P.L. 99-591) authorized the collection of user fees for International Arrivals of air and sea passengers. This law codified as 8 U.S.C. 1356(h) established the air and sea passenger fees to generate revenues that would reimburse “the appropriation for expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels”.

After the creation of the Department of Homeland Security (DHS), most of the immigration inspection functions were transferred to CBP. However, the detention and removal of inadmissible aliens and other activities related to investigations funded by Immigration Inspection User Fees (IUF) were transferred to the U.S. Immigration and Customs Enforcement (ICE). As a result, a Memorandum of Agreement (MOA) was established in 2004 between CBP and ICE to determine the allocation of fee collection between the two DHS’ components.

B. Budget Activities:

The IUF collections support Customs and Border Protection Officers and help recover some of the costs of immigration inspection services and detention and removal of inadmissible aliens.

C. Budget Request Summary:

Customs and Border Protection’s (CBP) share of the IUF collections for FY 2012 is estimated at \$527,629,000. The IUF is shared between CBP and ICE. IUF is composed of Administrative Carrier Fines and Airline and Vessel User Fees. While CBP retains 100% of Administrative Carrier Fines, 82.63% of the Airline and Vessel User Fees are received by CBP. The remaining 17.37% is collected by ICE. CBP will support 4,311 FTEs with its share of IUF collections. CBP projected FY 2012 collections by analyzing external statistics, including the FAA forecasts for passengers and OMB economic growth, as well as internal OFO projections.

Immigration Inspection User Fees
Program Performance Justification**
(Dollars in Thousands)

PPA: Immigration Inspection User Fees

	Perm. Pos	FTE	Amount
2010 Actuals	4,921	4,921	592,087
2011 Annualized CR	4,311	4,311	525,443
2011 Adjustments-to-Base	0	0	2,186
2011 Current Services	4,311	4,311	527,629
2012 Total Presidents Budget	4,311	4,311	527,629

Note: The estimated 4,921 FTEs to be supported by IUF collections were based on using a higher projected collection (\$596 million) than the one enacted for FY 2010. FTEs were adjusted accordingly for FY 2011.

CURRENT SERVICES PROGRAM DESCRIPTION:

As established in a Memorandum of Agreement between CBP and ICE, funds from the Immigration Inspection User Fee account are used by CBP (82.63%) and ICE (17.37%) to recover some of the costs of immigration inspection services and detention and removal of inadmissible aliens associated with inspection and pre-inspection services for commercial aircraft or vessels. At air and sea ports of entry specifically, the fees cover some of the costs of immigration personnel, the maintenance and updating of systems to track criminal and illegal aliens in areas with high apprehensions, and the repair and maintenance of equipment. Revenues from these charges will support CBP's inspection functions in meeting Strategic Goals 1. Secure the Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel and the Quadrennial Homeland Security Mission 2: Securing and Managing our Borders.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Land Border Inspection Fee

I. Appropriation Overview

A. Mission Statement for Land Border Inspection Fee

The Department of Justice Appropriation Act of 1990 (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the Land Border Inspection fees to recover costs incurred in the following categories involving the operation of various programs:

- Overtime inspection services;
- Expansion, operation and maintenance of information technology systems for non-immigrant control;
- The hiring of temporary and permanent inspectors;
- Minor construction costs associated with the addition of new traffic lanes;
- Detection of fraudulent travel documents; and
- Administrative expenses of account.

The following fees are deposited into the Land Border Inspection Fee account:

- Dedicated Commuter Lane additional vehicle (DCL) - \$42
- Arrival/Departure Land Border (I-94) - \$6
- Non-Immigrant Visa Waiver (I-94W) - \$6
- Canadian Boat Landing Permit Individual (I-68) - \$16
- Canadian Boat Landing Permit Family (I-68) - \$32
- Replacement of Papers for Non-resident Mexican Crossing (I-190) - \$26
- NEXUS - \$50 (every five years)
- SENTRI (Secure Electronic Network for Travelers Rapid Inspection) - \$129 (individuals); \$160 (families). Both fees cover five years.
- Fast (Free and Secure Trade Program) Driver Application Fee - \$50 (every five years)

B. Budget Activities:

The Land Border Inspection collections support Customs and Border Protection Officers' inspection services, and operation and maintenance costs. To the extent funds are available from the LBIF account; the CBP appropriations can be reimbursed for its full costs of inspections services at land border points of entry. In addition to the activities mentioned above, CBP uses expenses included in the statute as a hierarchy for reimbursing the appropriation for minor construction costs associated with the addition of new traffic lanes.

C. Budget Request Summary:

Collections for Land Border Inspection Fees are estimated at \$28,909,000 in FY 2012. This estimate is based on growth of the overall economy (Gross Domestic Product), as projected by the Congressional Budget Office. CBP is projecting to support 287 FTEs, 287 positions, with collections from the Land Border Inspection Fees.

CURRENT SERVICES PROGRAM DESCRIPTION:

As authorized by law, Land Border Inspection Fees are used to recover part of CBP's costs of immigration inspections at land border ports of entry. This includes inspections of pedestrians, buses, passenger occupancy vehicles, and rail cars. It also includes antiterrorism efforts, dedicated lane programs, and forms processing. These collections will support CBP's immigration law enforcement functions in meeting Strategic Goals 1. Secure the Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel and the Quadrennial Homeland Security Mission 2: Securing and Managing our Borders.

PPA Mission Statement

The Department of Justice Appropriation Act of 1990 (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes

- Overtime inspection services;
- Expansion, operation and maintenance of information technology systems for non-immigrant control;
- The hiring of temporary and permanent inspectors;
- Minor construction costs associated with the addition of new traffic lanes;
- Detection of fraudulent travel documents; and
- Administrative expenses of account.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Immigration Enforcement Fines

I. Appropriation Overview

A. Mission Statement for Immigration Enforcement Fines:

Section 382 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (P.L. 104-208; IIRIRA) created the Immigration Enforcement Account (IEA). In addition to creating this account, IIRIRA also added new types of fines, such as those fines levied against aliens for failure to depart the United States after being so ordered.

B. Budget Activities:

To the extent collections are available, they can be used to support Customs and Border Protection Officers' activities, which may include: identification, investigation, apprehension, detention and remove criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry.

C. Budget Request Summary:

Based on prior year collections, the FY 2012 Immigration Enforcement Fines estimated collections are \$1,041,000. Since violations of the law are not easily quantifiable, enforcement related collections are relatively fluid. CBP will support 23 FTEs, 23 positions with collections from Immigration Enforcement Fines in FY 2012.

PPA Mission Statement

The Immigration Enforcement account was established under Section 382 of the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996. Previously, similar fines were collected and deposited into the Immigration User Fee account. In addition to creating this account, IIRIRA also added new types of fines, such as those levied against aliens for failure to depart the United States after being so ordered.

The authorized uses of this funds consist of: the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection GLOBAL ENTRY

I. Appropriation Overview

A. Mission Statement for Global Entry

The Global Entry Program is authorized under the Consolidated Appropriations Act of 2008 (P.L. 110-161) Section 565(3)(A). The Program established an international registered traveler program that incorporated available technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. Travelers must be pre-approved for the Global Entry program. All applicants undergo a rigorous background check and interview before enrollment. Global Entry allows expedited clearance for those pre-approved, low-risk travelers upon arrival in the United States. Though intended for frequent international travelers, there is no minimum number of trips necessary to qualify for the program. Participants may enter the United States by using automated kiosks located at select airports.

In addition, Section 565 (3) (B) of the Consolidated Appropriations Act of 2008 authorized the imposition of a fee to recover the full cost of the Program. The implementing regulation to establish an application fee for Global Entry was issued in November 2009 (74 FR 59936 (2009-11-19)). Based on program's cost estimates and enrollment projections, it was concluded that a charge of \$100 per application should produce enough revenue to recover the full cost of processing Global Entry applications. CBP is authorized to conduct a review of the Global Entry application charge to ensure that the costs of the program continue to be fully covered by the charge.

B. Budget Activities:

The Global Entry collections support Customs and Border Protection Officers screening and processing of international passengers into the U.S. Though collections for Global Entry began in FY 2008, actual obligations started in FY 2010, resulting in carryover each year since the inception of the Program.

C. Budget Request Summary:

The Office of Field Operations is projecting to process a total of 26,150 enrollees in FY 2012. Based on projected enrollment the FY 2012 estimated Global Entry collections are \$2,615,000. Collections from the Global Entry fee will support 40 FTEs, 40 positions.

2012 Request	40	40	2,615

The Global Entry Program authorizes the use of available technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. Currently there is a \$100 per applicant fee charged to cover the costs of this program. This fee will be reviewed to ensure that the fee is set at an appropriate level to recover the full costs of operating the program. Revenues from this fee will support CBP's inspection functions in meeting Strategic Goals 1. Secure the Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel and the Quadrennial Homeland Security Mission 2: Securing and Managing our Borders.

PPA Mission Statement

The Global Entry Program is authorized under the Consolidated Appropriations Act of 2008 (P.L. 110-161) Section 565(3)(A). The Program established an international registered traveler program that incorporated available technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. In addition, Section 565 (3)(B) of the Consolidated Appropriations Act of 2008 authorized the imposition of a fee to recover the full cost of the Program. The current fee rate has been set at \$100 per applicant.

BUDGET REQUEST AND SUPPORTING INFORMATION

Electronic System for Travel Authorization (ESTA) Fee

I. Appropriation Overview

A. Mission Statement for Electronic System for Travel Authorization:

Public Law 110-53 or the 9/11 Act (or the Act) includes language to establish an electronic authorization system to pre-screen aliens prior to arrival in the United States to avoid security risks. This mandate was made operational by the creation of the Electronic System for Travel Authorization (ESTA or the System). ESTA operates under informed compliance, requiring all Visa Waiver Program (VWP) travelers to obtain authorization prior to travel.

Section 711 (h)(3)(B) of the Act, authorizes the Secretary of DHS to consider establishing a fee via regulation to recover the cost of operating and administering the System. CBP conducted a fee study and published the results of that study in an interim final rule in August 2010. This rule set the fee at \$4.00 per application to recover the full costs associated with operating ESTA. The authorization to travel to the United States is valid for a two year period; for example a single user would only have to pay once during the two year period.

B. Budget Activities:

The ESTA collections support Office of Field Operations salaries and other services to administer ESTA.

C. Budget Request Summary:

The Office of Field Operations estimates that over 11 million applications will be processed by CBP in FY 2012. Collections from ESTA applicants will support 24 FTEs, 24 positions. CBP estimates collections of \$44,524,000 in FY 2012.

All passengers from countries that are part of the VWP are required to submit an application via ESTA to determine eligibility to travel to the United States. A passenger whose ESTA application has been rejected must apply for a visa before traveling to the United States. Revenues from this charge will support CBP's inspection functions in meeting Strategic Goals 1. Secure the Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel and the Quadrennial Homeland Security Mission 2: Securing and Managing our Borders.

BUDGET REQUEST AND SUPPORTING INFORMATION

APHIS User Fees

I. Appropriation Overview:

Section 2509 of the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorized United States Department of Agriculture (USDA) to collect user fees for various services. The law codified as 21 U.S.C. 136a authorized the Secretary of Agriculture to prescribe and collect fees to recover the costs of providing Agriculture Quarantine and Inspection (AQI) services for international arrivals of passengers, conveyances, animals, plants and agricultural goods at Ports of Entry. This authority establishes fees on five modes of international passenger transportation: (i) commercial aircraft, (ii) sea going vessels, (iii) trucks with single entry, (iv) trucks operating under a multiple entry decal, and (v) loaded rail cars. In FY 2010, revenues from AQI (or Animal Plant Health Inspection Service (APHIS)) user fees were used to reimburse 75% of the costs incurred in providing inspection services.

The Homeland Security Act of 2002 (P.L. 107-296) transferred to the Department of Homeland Security (DHS), APHIS' responsibility for inspecting passenger declarations and cargo manifests, international air passengers, baggage, cargo, and conveyances and holding suspect articles in quarantine to prevent the introduction of plant or animal diseases. Section of 421(f) in the Homeland Security Act of 2002, mandates DHS/CBP and USDA/APHIS to agree on a periodic transfer of funds from the latter to the former to cover its agricultural inspectional costs. Under an MOA between DHS/CBP and USDA/APHIS, CBP received approximately 63 percent of the collections from the APHIS user fees in FY 2009. CBP expects to maintain a similar share in FY 2011 and 2012.

B. Budget Activities:

CBP agriculture specialists and officers perform biological and agricultural inspections to prevent the entry of organisms that might be used for biological warfare or terrorism and the introduction of harmful agriculture pests and diseases into the United States.

C. Budget Request Summary:

Based on APHIS' estimates, CBP's share from APHIS user fees in FY 2012 is \$323,000,000. This represents a \$4,528,000 increase from the requested amount in FY 2011. CBP requests 2,332 FTEs, 2,332 positions, to support APHIS in FY 2012.

PPA Mission Statement

Section 2509 of the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorized USAD to collect user fees for various services. The law codified as 21 U.S.C. 136 established seven types of Plant Protection and Quarantine (PPQ) user fees, six of which are the Agricultural Quarantine and Inspection (AQI) fees, known to CBP as the APHIS user fees. The six established processing fees are for international air passengers, commercial aircraft clearance, commercial vessels, commercial trucks, commercial truck decals, and loaded rail cars. The revenues from these fees are used to reimburse 75% of the costs incurred in providing the inspectional activities associated with the passengers and conveyances that are subject to fees.

Small Airport User Fee

I. Appropriation Overview

A. Mission Statement for Small Airport User Fee:

The Small Airport User Fee is authorized under Title 19 U.S.C. 58b and administered under Title 19 U.S.C. 58c (b) (9) (A) (i). The Small Airport User Fee program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The fee charged under this program is set forth in a Memorandum of Agreement (MOA) between the user fee airport and Customs and Border Protection, and may be adjusted annually as costs and requirements change.

B. Budget Activities:

The MOA includes provisions for payment of a flat initial start-up fee and an annual recurring fee. The fees do not cover overtime or certain computer and telecommunications costs that are paid separately by the airport authority. Currently, CBP supports 47 Small User Fee airports. In FY 2012, CBP expects to begin operations at Ellington Field in Houston, Texas.

C. Budget Request Summary:

Based on the anticipated \$8,167,000 in collections from the Small Airport User Fee, CBP will support 54 FTEs, 54 positions.

2012 Request	54	54	8,167

The Small Airport User Fee program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The amount charged is determined by how many CBP Officers are stationed at the port and whether it is a new or existing facility. Revenue from this fee will support CBP in meeting Strategic Goals 1. Secure the Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel and the Quadrennial Homeland Security Mission 2: Securing and Managing our Borders.

Puerto Rico Trust Fund

I. Appropriation Overview

A. Mission Statement for Puerto Rico Trust Fund:

Title 48 U.S.C. 740 authorizes the collections of duties and taxes in Puerto Rico and the creation of the Puerto Rico Trust Fund (PRTF). Collections in Puerto Rico, less the costs of collecting duties and taxes, are transferred to Puerto Rico's Treasury (Hacienda), to be expended as required by law for the Government of Puerto Rico and the benefit thereof. The Government of Puerto Rico negotiates biennial agreements with CBP's Office of Air and Marine (OAM) and Immigration Customs Enforcement (ICE) to cover the costs of performing their functions in Puerto Rico. CBP transfers funds to OAM and ICE from the trust fund based on the agreement negotiated.

B. Budget Activities:

The PRTF collections support the inspection of passengers and merchandise entering Puerto Rico from foreign locations, and to combat criminal elements that have focused on Puerto Rico as a gateway to illegally introduce narcotics into the mainland of the U.S.

C. Budget Request Summary:

CBP projects collections to total \$91,779,000 in FY 2012. The collections of import duties and certain taxes deposited in the Puerto Rico Trust Fund will support 529 FTEs, 529 positions.

2012 Total Request	529	529	91,779

CBP is authorized to use collections in the Puerto Rico Trust Fund to cover its costs related to the collections of duties and taxes in Puerto Rico. CBP's Office of Air and Marine and U.S. Immigration and Customs Enforcement (ICE) negotiate biennial agreements with Puerto Rico's Treasury that are funded with the anticipated surplus Puerto Rico expects to receive after CBP covers its customs related costs. Revenues from import duties and taxes will support CBP's inspection functions in meeting Strategic Goals 1. Secure the Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel and the Quadrennial Homeland Security Mission 2: Securing and Managing our Borders

PPA Mission Statement

The duties and taxes related to the Puerto Rico Trust Fund are authorized under Title 48 U.S.C. 740. The duties and taxes collected in Puerto Rico, less the costs of providing inspection and law enforcement services, are paid into the treasury of Puerto Rico, to be expended as required by law for the Government of Puerto Rico and the benefit thereof. These funds are intended to combat criminal elements who have focused on Puerto Rico as a gateway to illegally introduce narcotics into the mainland of the U.S.

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Salaries and Benefits	\$30,626	\$33,102	\$33,764	\$662

Salaries and Benefits includes costs for 529 FTE. The FY 2012 request includes an increase of \$662,000 due to a 2% projected higher level of collections.

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change
Travel	\$877	\$699	\$713	\$14

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request includes an increase of \$14,000 due to a 2% projected higher level of collections.

	2010	2011	2012	2011 to 2012
	Actuals	Annualized CR	Request	Change

Less: Adjustments for Other Funding Sources	-	-	-	-	-	-	-	-	-	-	-	-
Net, Enacted Appropriations and Budget Estimates:	19,346³	5,685,461	20,417	5,748,339	20,546¹	5,822,576	129	80,824	129	214,545	0	(128,903)
Less: Less prior year Cancellations	-	-	-	-	-	(16,300)⁴	-	-	-	-	-	(128,903)

¹ ICE is working to standardize the practice of including only FTE that are fully dedicated and funded in appropriation totals. In FY 2012 ICE will transfer 71 FTEs into the Salaries and Expenses appropriation from other appropriations.

² FY 2010 Actuals included obligations of carry-forward balances from prior years.

³ FTE in FY 2010 are calculated by ICE's Position Management Level analysis to reflect Actuals and vary slightly from projected levels as shown by OMB MAX.

⁴ In FY 2012 \$16,300,000 of unobligated balances available to Construction are permanently cancelled.

BUDGET REQUEST AND SUPPORTING INFORMATION

Salaries and Expenses

I. Appropriation Overview

A – Mission Statement for Salaries and Expenses

Programs funded through the Salaries and Expenses account contribute to the ICE mission of bringing a unified and coordinated focus to the enforcement of federal immigration and customs laws. Salaries and Expenses resources are used to combat terrorism, protect our Nation's borders, deter illegal immigration, and protect our cyber border. ICE accomplishes these missions by investigating, detaining, and prosecuting criminals and aliens who pose a risk to national security and public safety. These activities protect the infrastructure and persons within the United States.

B – Budget Activities

Management and Administration

The following offices perform the management and administration (M&A) activities for ICE: the Offices of the Assistant Secretary (OAS), Professional Responsibility (OPR), State Local, and Tribal Coordination (OSLTC), the Chief Diversity Officer (CDO), Equal Employment Opportunity (EEO), the Chief Financial Officer (OCFO), the Chief Information Officer (OCIO), Acquisition Management (OAQ), Human Capital (OHC), Freedom of Information Act (FOIA), the Office of Training and Development (OTD), the National Firearms Training and Tactics Unit (NFTTU), the Office of Privacy and the Office of Policy. The M&A activities include executive and overall leadership direction, strategic planning, policy development, and administrative support for the human, financial, information, and physical resources required to facilitate the operational capabilities of a productive ICE workforce.

Legal Proceedings

The Office of the Principal Legal Advisor (OPLA) provides the legal advice, training, and services required to support the ICE mission. As the legal representative for the U.S. Government at immigration court hearings, OPLA attorneys handle a variety of immigration-related issues that range from contested removals to custody determinations to applications for administrative relief. Additionally, OPLA provides legal advice in

customs-related enforcement actions, represents the Government in Merit System Protection Board and Equal Employment Opportunity hearings, provides ethics advice, and handles matters involving commercial and administrative law.

Domestic Investigations

The ICE Office of Investigations (OI) is divided into four broad investigative categories: National Security; Financial and Trade; Smuggling and Public Safety; and Investigative Services. OI enforces trade and immigration laws through the investigation of activities, persons, and events that may pose a threat to the safety or security of the United States and its people. OI also investigates illegal trafficking in weapons (including weapons of mass destruction), the smuggling of narcotics and other contraband, human smuggling and trafficking, money laundering and other financial crimes, fraudulent trade practices, identity and benefit fraud, child pornography, child sex tourism, and health and public safety dangers.

International Affairs

The ICE Office of International Affairs (OIA) represents DHS's largest investigative law enforcement presence abroad and protects the Nation beyond its borders. ICE OIA has the broadest international footprint in DHS with 69 offices in 47 countries. Through OIA, ICE works with foreign counterparts to identify and combat criminal organizations before they can adversely impact the United States. ICE's international mission is to protect the United States by enhancing its security through international investigations; preventing acts of terrorism by targeting the people, money, and materials that support terrorist and criminal activities; and identifying and eliminating vulnerabilities in the Nation's border, economic, transportation, and infrastructure security.

Intelligence

The Office of Intelligence collects, analyzes, and distributes information on critical homeland security vulnerabilities that could be exploited by terrorist and criminal organizations. Intelligence utilizes data and information on the movement of people, money, and materials into, within, and out of the United States to provide accurate and timely reporting to ICE leadership and field agents. Intelligence Operations' Field Intelligence Groups (FIGs) are the agency's primary vehicle for intelligence analysis in support of field operations and enforcement. FIGs link headquarters and field components to facilitate intelligence collection, integration, analysis, and dissemination.

Detention and Removal Operations

The Office of Detention and Removal Operations (DRO) is responsible for ensuring that every alien who has been ordered removed departs the United States through enforcement of the Nation's immigration laws and coordination with foreign governments to ensure countries will accept removable aliens. DRO is comprised of five Program/Project Activities:

Custody Operations Program – This program provides safe, secure, and humane conditions of custody for removable aliens who are detained because they present a risk of flight, risk to public safety, or are subject to mandatory detention. ICE carefully monitors which aliens are detained to ensure its limited detention space is used to best support border security and public safety.

Fugitive Operations Program – This program locates and apprehends fugitive aliens in the United States. ICE strives to identify and apprehend all fugitives, with an emphasis on those aliens posing the greatest risk to public safety. This creates a deterrent to potential absconders and promotes the integrity of the immigration process.

Criminal Alien Program – This program identifies criminal aliens incarcerated within federal, state, and local correctional facilities. To ensure that these criminal aliens are not released into the community, ICE strives to secure a final order of removal prior to the termination of their sentences. Upon completion of their criminal sentences, aliens are transferred into ICE custody to be removed from the United States.

Alternatives to Detention Program – This program places low-risk aliens under various forms of intensive supervision rather than traditional detention or no supervision at all. It can be a cost-effective way to ensure individuals' appearance for an immigration hearing and for removal. This program also lowers the risk that aliens ordered removed will become fugitives through a variety of methods of supervision.

Transportation and Removal Program – This program provides for the safe and secure transportation of aliens in ICE custody and removal of aliens from the United States.

Secure Communities / Comprehensive Plan to Identify and Remove Criminal Aliens (SC/CIRCA)

Secure Communities/Comprehensive Plan to Identify and Remove Criminal Aliens (SC/CIRCA) is a comprehensive plan to improve community safety by transforming the way the Federal Government cooperates with state and local law enforcement agencies to identify, detain, and remove criminal aliens held in custody and at large. SC/CIRCA is working to revolutionize immigration enforcement by using technology to share information between law enforcement agencies and by applying risk-based methodologies to focus resources on assisting local communities in the removal of those criminal aliens representing the greatest threat to community safety. SC/CIRCA's risk-based application of enforcement assets is now being utilized ICE-wide.

C – Budget Request Summary:

U.S. Immigration and Customs Enforcement (ICE) requests 20,470 positions, 20,342 FTE, and \$5,496,847,000 in FY 2012 for the Salaries and Expenses (S&E) appropriation. In order to accomplish the agency's objectives and mission, ICE requests \$5,296,162,000

and 20,213 FTE to maintain current services, and \$200,685,000 and 129 FTE in program changes for the S&E account appropriation.

The request includes a reduction of \$54.832 million representing cost savings attributed to the Administrative Savings Initiative (ASI) to reduce overall administrative expenses. It is a reduction to the following types of activities: advisory and assistance services; travel of people and things; printing and reproduction; and supplies.

Program Change Requests

ICE requests program changes for the Salaries and Expenses appropriation in the following key areas:

- **Acquisition Workforce.....\$3.6M (14 FTE)**
This request will help ensure the future programmatic growth requirements for training, recruitment, and retention activities while helping ICE to attract and hire qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act.

- **Data Center Migration.....\$10.5M (0 FTE)**
This request is targeted at migrating data center operations, active online data, and other IT assets from two Department of Justice (DOJ) data centers and multiple processing centers to two new DHS data centers while ensuring near-continuous operations of mission-critical IT systems through contingency infrastructure, planning, and testing, to provide systems and data integrity that align with the DHS goal of ensuring that two new DHS data centers support fully redundant IT systems.

- **Funding for 33,400 Detention Beds.....\$157.7M (0 FTE)**
This request will fund the effort to right-size bed costs to account for 33,400 beds within DRO’s Custody Operations. Additionally, ICE will continue to seek efficiencies in immigration enforcement activities.

- **Alternatives to Detention (ATD).....\$6.5M (0 FTE)**
This request will fund an additional 2,500 enrollees in the ATD program. As a result, ICE will be able to monitor more non-mandatory and low-risk aliens, freeing up additional bed space for criminal aliens that would be a danger to the public.

- **Secure Communities Interoperability Deployment.....\$64.0M (115 FTE)**
This request will enable ICE to expand Secure Communities to 96 percent of all jurisdictions nationally in FY 2012, providing ICE with the resources to confirm the identification of an estimated 199,000 more criminal aliens through interoperability in FY 2012 than FY 2010 and transport more than 44,000 criminal aliens from state and local jails into the custody of ICE. Under this

budget, Secure Communities remains on track for nationwide deployment by 2013.

- **Atlas IT Infrastructure O&M Reduction.....(\$14.9M) (0 FTE)**
Efficiencies and contract support cost-savings to Network Services, Help Desk Services, and Site Services would allow for the reduction, without significant drop in performance. As part of this reduction, \$3.4 million in savings will be achieved through the ongoing DHS Data Center Consolidation effort.
- **Detention and Removal Efficiencies.....(\$26.8M) (0 FTE)**
This reduction is an ongoing effort to consolidate major detention contracts as ICE moves toward a national transportation framework for the removal of aliens that decreases the need for smaller local transportation contracts.

CURRENT SERVICES PROGRAM DESCRIPTION

ICE Management and Administration (M&A) resources provide for top-level agency-wide management in the following areas: the Offices of the Assistant Secretary, Professional Responsibility, State, Local, and Tribal Coordination, the Chief Financial Officer and Acquisition Management. The M&A activities include executive and overall leadership direction, strategic planning, policy development, and administrative support for the human, financial, information, and physical resources required to facilitate the operational capabilities of a productive ICE workforce. The following highlights the primary functions of the various M&A activities:

Office of the Assistant Secretary – The ICE Office of the Assistant Secretary (OAS) is responsible for the advancement of the agency’s objectives outlined in the ICE strategic plan. This includes both operational and management support to meet day-to-day organizational needs, as well as long-term agency goals. The operational support areas provide leadership and coordination of all of ICE’s operational components, address operational challenges, and support ICE’s continued growth and development as a premier law enforcement agency. The management support areas provide coordination of all administrative and managerial components of ICE. OAS is responsible for Human Capital, Congressional Relations, Public Affairs, Equal Employment Office, Chief Diversity Officer, Training and Development, and the Freedom of Information Act Office.

Office of Professional Responsibility – The ICE Office of Professional Responsibility (OPR) is assigned a broad range of mission responsibilities. Among the most important duties tasked to OPR is the responsibility to investigate allegations of misconduct involving employees of ICE and U.S. Customs and Border Protection (CBP). In addition to maintaining its ability to conduct

internal investigations, OPR conducts independent inspections and reviews of ICE offices, operations, and processes in order to provide executive management with an independent review of the agency's organizational health and assess the effectiveness and efficiency of the overall ICE mission. OPR ensures that all ICE applicants are properly screened prior to entering on duty by appropriately assessing the security clearance level needed for all ICE federal and contract employees. Finally, the OPR Security Management Unit provides the appropriate oversight for all physical, communication and operational security requirements governing ICE employees and facilities world-wide.

Office of the Chief Financial Officer – The ICE Office of the Chief Financial Officer (OCFO) works to support a more secure homeland by providing effective and efficient management of ICE's financial and physical resources, promoting integrity and accountability, delivering the highest quality financial management services, providing exemplary facilities and property management services, and managing the development, execution, and monitoring of sound performance-based budgets. Included in its work is an effort to deliver best-in-class customer service.

Acquisition Management – The ICE Office of Acquisition Management (OAQ) is a customer-focused organization with an enterprise-wide, strategic approach to procurement. OAQ operates as a full business partner with internal and external organizations and serves as a strategic asset dedicated to improving the agency's overall business performance. The mission of the ICE Office of Acquisition Management is to create quality business solutions that accomplish ICE mission goals.

Office of State, Local, and Tribal Coordination – The ICE Office of State, Local, and Tribal Coordination (OSLTC) works to enhance federal, state, local, and tribal capabilities in the enforcement of immigration and customs law and protect our communities and develop a secure environment through trusting partnerships. ICE created the OSLTC in December 2007, to build and improve relationships, and coordinate activities with state, local, territorial, and tribal law enforcement agencies (LEAs). OSLTC is responsible for coordinating and managing the 287(g) Program operations as a component of services offered under ICE Agreements of Cooperation in Communities to Enhance Safety and Security (ACCESS) and builds awareness and understanding of ICE ACCESS.

Key Accomplishments

In FY 2010, ICE M&A:

- Implemented the Business Management Dashboard that serves as the central resource for financial and operational data and metrics;
- Implemented the new DHS-wide Travel System, FedTraveler, for ICE and its customers;
- Established OPR Detention Oversight offices in Phoenix and Houston for conducting compliance inspections and investigating allegations at ICE detention facilities. ODO Quality Assurance Reviews (QARs) increased by 25 percent, and Follow-Up inspections increased by 100 percent from FY 2009;
- Reduced the use of high-risk contracts (noncompetitive, cost-reimbursement, time-and-materials, and labor-hour contracts) by 10 percent using FY 2008 as a baseline; and

- Fully implemented the Power Management Initiative for computers, laptops and monitors, which will result in estimated annual savings of over \$1.2M.

In FY 2011, ICE M&A will:

- Expand the ICE Business Management Dashboard reporting to include performance measures from operational and management components. This will help ICE link budget execution and program performance;
- Implement a new standardized Accounts Payable process for ICE's external customers;
- Increase the Quality Assurance Reviews (QARs) by 44 percent and Follow-Up inspections by 150 percent from FY 2010;
- Increase ICE stakeholder outreach and engagement; strengthen program stewardship; and strengthen internal management capability while improving internal controls; and
- Support, develop, and implement continued coordination with major local, national, and international media outlets regarding the release of official information surrounding ICE's mission and activities worldwide through public affairs outreach efforts.

In FY 2012, ICE M&A will:

- Distribute the Business Management Dashboard to internal users nationwide and promote transparency of performance measures with both internal and external stakeholders;
- Implement a centralized customer inquiry center to standardize and improve efficiency and effectiveness of ICE's customer service related to all financial services;
- Increase Quality Assurance Reviews (QARs) by 33 percent and Follow-Up inspections by 44 percent from FY 2011; and
- Achieve acquisition savings by maximizing competition, implementing strategic solutions, and managing contract risk sharing.

CURRENT SERVICES PROGRAM DESCRIPTION

The ICE Office of the Chief Information Officer (OCIO) provides information technology services and products that enable ICE to meet its mission. In order to meet its goals, the OCIO has developed a number of critical IT initiatives that will help ICE to modernize its IT systems, adapt and conform to modern IT management disciplines, and provide IT solutions throughout ICE. Specifically, ICE OCIO handles the operation and maintenance, as well as other back-end support functions, for Automation Modernization (AM) initiatives. In FY 2012, 36 positions and 36 FTEs will be transferred from Automation Modernization to this PPA within Salaries and Expenses. ICE OCIO is also responsible for the regular IT Refresh of computers, file & print servers, local area networks (LANs), cables, and switches. Also, the ICE OCIO works to ensure that ICE's IT enterprise architecture is in place to provide ICE with full IT capabilities including disaster recovery, cyber security, IT operations, IT systems development, and engineering.

Key Accomplishments

In FY 2010, OCIO:

- Began migration to DHS Data Centers;
- Completed migration to DHS One Net, all of which improve the efficiency of ICE's data processing; and
- Began implementing reductions of seven percent of baseline contract spending within the HQ Managed IT account.

In FY 2011, OCIO will:

- Continue Migration to DHS Data Centers; and
- By the end of the fiscal year, save seven percent of baseline contract spending within the HQ managed IT account by:

- Reviewing existing contracts utilizing high risk vehicles such as Time and Materials;
- Re-competing contracts, where feasible, to lower risk vehicles such as Firm Fixed Price;
- Targeting a reduction of 20 Contractor FTEs;
- Assessing the OCIO workforce for additional in-sourcing opportunities; and
- Continuing to implement the ongoing multi-year cycle technology refresh schedule.

In FY 2012, OCIO will:

- Continue implementing ongoing multi-year technology refresh;
- Identify and begin implementing priority Disaster Recovery solutions that are mission-critical to individual IT systems within ICE;
- Realize cost-savings within Atlas IT Infrastructure by obtaining contract efficiencies pertaining to Help Desk Services and Site Services as well as implementing more efficient data exchange and linking tools for Network Services; and
- Achieve efficiencies of \$3,845,000. This will be accomplished through program and contract efficiencies including reductions in overhead and similar expenses.

CURRENT SERVICES PROGRAM DESCRIPTION

ICE Legal Proceedings (also referred to as the Office of the Principal Legal Advisor or OPLA) provides the legal representation, advice, training, and services required to support the ICE mission. Pursuant to section 442(c) of the Homeland Security Act, OPLA is the exclusive legal representative for ICE and the sole DHS legal component authorized to represent the Government in all exclusion, deportation, and removal proceedings before the Department of Justice’s Executive Office for Immigration Review (EOIR).

As the legal representative for the U.S. Government at immigration court hearings, OPLA attorneys handle a variety of immigration-related issues that range from contested removals to custody determinations to applications for protection or relief from removal. Many of the hearings involve criminal aliens, while others involve terrorists and human rights abusers. Additionally, OPLA provides critical legal support to ICE operations concerning criminal immigration and customs law violations, ethics, employment law, tort claims, and administrative law issues.

OPLA consists of a headquarters office and 26 Offices of the Chief Counsel (OCC). The areas of responsibility for the OCC are aligned to the 26 domestic areas of responsibility within the ICE Office of Investigations and Detention and Removal Operations. Additionally, the Mission Support Division, centralized in Dallas, provides administrative services to all OPLA offices.

Effective August 2010, OPLA reorganized its headquarters organizational structure to better align with the agency’s realignment and more effectively provide client services. Further, the goal of OPLA’s reorganization was to clarify roles and responsibilities, increase ownership of cases and issues, identify and eliminate inefficiencies, improve accountability, and continue progression of past successes. The following highlights the primary duties and responsibilities of OPLA’s headquarters divisions:

Immigration Law & Practice Division (ILP) - ILP provides assistance and legal guidance to the Offices of Chief Counsel (OCCs), other OPLA HQ Divisions, and a range of DHS and non-DHS agency partners on a comprehensive range of immigration law topics. In particular, ILP has primary responsibility for the oversight of OPLA's litigation before the immigration courts and the Board of Immigration Appeals (Board). This responsibility includes, among other things, the following: appellate and motions practice before the Board, the handling and analysis of protection law issues, and the review of derivative citizenship claims. ILP specifically handles automatic and discretionary stays of immigration court bond decisions and recommendations to certify cases to the Attorney General. ILP is also the lead OPLA HQ Division on foreign fugitive cases, coordinating, as necessary and appropriate, with the Office of International Affairs within the Criminal Division of the Department of Justice (DOJ), the Office of Immigration Litigation (OIL) within the Civil Division of DOJ, U.S. Attorney's Offices, and the Department of State. Additionally, ILP reviews all ICE appeal briefs filed with the Board and plays a lead role in briefing the most significant cases, such as those where the Board has requested supplemental briefing or oral argument. With respect to protection law, ILP works closely with USCIS, the DHS Office of the General Counsel (OGC), and other stakeholders on the development of legal strategy and policy, as well as fraud prevention. Finally, ILP is responsible for reviewing adverse federal circuit court and Supreme Court decisions. In this regard, ILP makes recommendations on adverse federal litigation impacting ICE and provides guidance to the OCC on developments in the federal courts. ILP works closely with DHS OGC, OIL, and U.S. Attorney's Offices in developing legal strategy and briefing in significant federal cases. ILP is organized into three sections, with complementary roles in performing the ILP mission: the Appellate and Protection Law Section; the Immigration Court Practice Section (East); and the Immigration Court Practice Section (West).

The Homeland Security Investigations Law Division (HSILD) - HSILD is comprised of the following three sections:

Human Rights Law Section (HRLS) - HRLS coordinates ICE's litigation efforts nationwide to pursue criminal prosecutions and orders of removal against human rights abusers. HRLS team members work closely with the Office of Investigations (OI) and Detention and Removal Operations (DRO) to provide legal advice to agents and officers in the identification, investigation, prosecution, and removal of individuals involved in human rights abuses such as genocide, extrajudicial killings, the recruitment or use of child soldiers, and torture. HRLS works closely with the Departments of State and Justice, intelligence agencies, and non-governmental organizations to ensure that the United States does not become a safe haven for human rights abusers. HRLS currently has a caseload of approximately 1,400 cases in various stages of investigation, criminal prosecution, or administrative litigation involving individuals from 85 different countries.

National Security Law Section (NSLS) - NSLS provides legal advice and oversees litigation involving special interest cases, including those involving international terrorism, counter-terrorism, espionage, classified evidence and other national security matters. The legal work performed by the NSLS is critical to ICE's efforts to protect the Nation's security. NSLS attorneys are involved in a fast-paced practice, working closely with other federal law enforcement and intelligence agencies, including the FBI and CIA, and routinely make decisions that have an immediate impact on national security. Specifically, NSLS attorneys oversee and coordinate removal proceedings involving terrorists and foreign intelligence agents, and review and revise proposed legislation, regulations and policy directives with a nexus to ICE's national

security work. NSLS attorneys also provide legal support and training to ICE's OI (especially the Counter Terrorism Section, National Security Integration Center, and Visa Security Unit) and Office of Intelligence, as well as act as a liaison with the Civil and Criminal Divisions of the Department of Justice.

Criminal Law Section (CLS) - CLS is responsible for providing legal advice and guidance to OI on all matters, with the exception of denaturalization cases, Student and Exchange Visitor Program matters, and issues addressed by either HRLS or NSLS. Criminal investigations and enforcement activities have increased tremendously in recent years. Accordingly, CLS continues to build client relationships and provide trainings as it develops its ability to provide legal support and counsel in a variety of areas, including but not limited to: undercover operations, financial crimes, asset forfeiture, parole matters, counter-proliferation investigations, and issues related to work-site enforcement and/or employer sanctions. CLS also provides significant legal input to United States Attorney's Offices nationwide and other DHS components on novel or emerging areas of the law related to OI's area of responsibility, such as border search of electronic devices. Further, CLS provides legal support and counsel to the ICE Cyber Crimes Center, National Intellectual Property Rights Coordination Center, and International Affairs, on criminal enforcement, legislation, regulation, and operational issues.

The Enforcement and Removal Operations Law Division (EROLD) - EROLD consists of two sections specializing in legal matters relating to the Detention and Removal Operations (DRO) operational client. The specialty areas of each division are summarized below:

Enforcement Law Section (ELS) - ELS provides legal advice and training to DRO operational divisions including the Criminal Alien Program, Secure Communities, Fugitive Operations, Office of State and Local Coordination, Juvenile and Family Residential Management Unit, ICE International Affairs and the Student Exchange and Visitor Program, on key issues including, but not limited to, DRO's general arrest authority, rapid repatriation of criminal aliens, 287(g) authority, inoperability, and unaccompanied alien children. Additionally, the Enforcement Law Section provides legal and procedural guidance to the 26 ICE Chief Counsel Offices and other Headquarters components on matters in support of DRO operations in the field. Additionally, this section manages the litigation of civil denaturalization cases and serves as the liaison in denaturalization cases to the Civil Division's Office of Immigration Litigation.

Detention and Removal Law Section (DRLS) - DRLS provides legal advice and training to those components within the Office of Detention and Removal Operations (DRO) charged with the agency's detention and removal missions on a variety of issues including, but not limited to, detainee medical and mental health care, detention officer authorities, removal strategies, detainers, deferred action, alternatives to detention, and continued detention. The Detention and Removal Section also provides legal and procedural guidance to the Office of Detention Policy and Planning (ODPP) regarding liability and/or litigation risks that could impact various detention reform initiatives and new operational policies. Additionally, this section provides legal and procedural guidance to OPLA's OCC and other Headquarters components on matters relating to DRO operations

District Court Litigation Division (DCLD) - DCLD focuses on two primary areas: managing civil litigation and working closely with Assistant United States Attorneys and attorneys in the Office of Immigration Litigation to advocate and ensure that ICE's interests are represented in litigation. DCLD also assists ICE personnel and the Department of Justice in all aspects of

federal litigation, including discovery and settlement talks, in cases involving, but not limited to, habeas corpus and claims seeking injunctive or declaratory relief. In addition, DCLD assists Department of Justice attorneys in representing ICE before the various federal courts in federal tort claims and Bivens cases. Lastly, DCLD provides verbal and written advice regarding potential litigation risks, and represents the agency's interests in discussions with other agencies and components.

Commercial and Administrative Law Division (CALD) - CALD provides legal advice to ICE and represents ICE in the areas of fiscal law, procurement law, memoranda of understanding and other agreements; breached bonds, and a range of other administrative law matters in support of ICE operations. CALD also provides guidance and legal advice concerning procurement actions, and develops and coordinates ICE legal policy in the areas of procurement and appropriations law. CALD represents ICE before the Government Accountability Office and the Civilian Board of Contract Appeals in procurement matters. CALD further assists Department of Justice litigation attorneys in representing ICE before the various federal courts on procurement matters, and other administrative law matters.

Government Information Law Division (GILD) - GILD is responsible for providing legal advice on all matters relating to the disclosure of Government information to entities outside of ICE. This includes disclosures to members of the public, Congress, Government Accountability Office, DHS Office of the Inspector General, other law enforcement agencies, foreign governments, and international organizations. These disclosures require GILD to review documents for the purpose of identify issues relating to privacy and law enforcement sensitivity, draft and review of information sharing agreements, defending the agency in litigation involving disclosures made under the Freedom of Information Act and the Privacy Act, and respond to third-party requests for information or subpoenas for agency testimony and documents. Additionally, GILD handles all administrative matters relating to agency requirements under the E-Government Act and the Privacy Act, including the review of System of Record Notices (SORN) and Privacy Impact Assessments (PIA).

Labor and Employment Law Division (LELD) - LELED provides legal advice and represents ICE in the areas of employment and labor law. LELED is responsible for providing advice, guidance, and representation for ICE regarding employment and labor related issues. Specifically, LELED reviews all disciplinary actions that are proposed and issued by ICE. LELED also assists supervisors with fitness for duty issues, reasonable accommodation questions, and performance concerns to include performance improvement plans and performance based adverse actions. LELED also serves as the POC in any investigation of an ICE employee or supervisor by Office of Special Counsel. If any of the above actions results in litigation, either before the Equal Employment Opportunity Commission (EEOC) or the Merit Systems Protection Board (MSPB), LELED represents ICE before these administrative bodies. Further, LELED attorneys provide support for management related to EEO complaints. This includes a range of activities from attending mediations, drafting settlements, and reviewing affidavits during the investigative stage of the EEO process through participation in hearings before an EEOC administrative judges and/or federal District Court action. Moreover, LELED supports ICE in all labor related matters. LELED provides legal advice and guidance during all negotiations with labor unions. LELED also provides training to ICE managers and supervisors in all areas of federal employment and labor law.

Ethics Office - The Ethics Office implements the Federal Government Standards of Conduct

Program for ICE employees, providing training, advice and counseling, and management of the ethics financial disclosure process. This division also provides legal and professional responsibility advice to OPLA attorneys and facilitates the ICE Office of Professional Responsibility program to conduct inquiries into misconduct allegations about OPLA employees.

Knowledge Management Division (KMD) - KMD is responsible for assuring that information relating to the critical issues of the day is available and rapidly developed into knowledge for decision-making processes. This includes providing access to applications based on requests from OPLA personnel, such as TECS, Consular Consolidated Database (CCD), and the new systems of agencies and other DHS components, such as U.S. Citizenship and Immigration Services (USCIS) Enterprise Document Management System (EDMS). KMD develops and provides the organizational processes for a synergistic combination of the data and information-processing capacity of information technologies and the creative and innovative capacity of human beings. Toward this end, the KMD has developed and deployed the General Counsel Electronic Management System (GEMS) – a case and document management system. KMD develops, monitors compliance of users, and analyzes OPLA workload and performance data. KMD is OPLA’s liaison with the Office of the Chief Information Officer (OCIO) on all issues, including field office support, deployment of new systems and hardware, information sharing and system compatibility, and e-discovery. KMD staff serves as subject matter experts for OPLA IT in the field.

Mission Support Division (MSD) - To recognize process efficiencies and ensure consistency in the quality and timeliness of service delivery, OPLA has consolidated the vast majority of its administrative functions within MSD. Comprised of three sections: Acquisition and Logistics, Financial Management, and Human Capital, MSD supports the nationwide programmatic administrative needs of all OPLA Headquarters Divisions and Chief Counsel Offices. The responsibilities of each division are summarized below.

Acquisition and Logistics Section - The Acquisition and Logistics Section is responsible for the nationwide coordination and support of the acquisition, personnel security, property management, records management and facilities project management needs.

Financial Management Section - The Financial Management Section is responsible for budget formulation and execution, invoice processing for all contract actions, obligation management, oversight and customer support of all travel authorizations and claims, and management of the wireless program.

The Human Capital Section - The Human Capital Section is responsible for resource utilization analysis and reporting, recruitment and staffing, benefits guidance, workforce management and planning, performance management, and the Office of Worker’s Compensation Program (OWCP).

Training Division (TD) - The TD is responsible for the development and implementation of national trainings including the OPLA Management Course, New Attorney Training, Trial Advocacy Training Program (Levels One and Two), and legal support staff training. The TD collaborates with the ICE Office of Training and Development to facilitate participation in the ICE Supervisory Leadership Training, Executive Transition Course, USDA Graduate School Leadership Programs, and other training opportunities within ICE and DHS. Additionally, the TD is responsible for the strategic reviews of OPLA’s field offices and headquarters divisions.

The TD also assists OPLA attorneys with state mandatory continuing legal education (CLE) requirements in obtaining state CLE accreditation for OPLA-sponsored courses/conferences, and serves as the point of contact for the West Legal Ed Center. The TD monitors OPLA's compliance with mandatory ICE training requirements throughout the year. Finally, the TD is the lead for an OPLA headquarters legal externship program.

Key Accomplishments

In FY 2010, OPLA:

- Litigated 85,956 criminal cases resulting in 34,736 Immigration Judges (IJ) orders of removal;
- Handled 392,888 matters in Executive Office of Immigration Review (EOIR) immigration courts of which 357,355 were completed. Additionally, OPLA attorneys responded to over 34,000 appeals of IJ decisions in removal, deportation, and exclusion proceedings as well as DHS adjudicated decisions involving of family-based visa petitions, carrier fines and penalties, and waivers of inadmissibility for non-immigrants. *Note: all figures shown are unofficial until official EOIR statistics are released in February/March 2011;*
- Increased attorney staffing to 937 of the targeted 958 (97.8%) attorneys;
- Focused legal support and stakeholder training efforts on the stipulated removal program to eliminate the need to have an in-person hearing before an immigration judge. A total of 32,625 cases were completed through the stipulated removal process;
- Increased the number of OPLA attorneys detailed as Special Assistant U.S. Attorney (SAUSA) from 21 in FY 2009 to 47 leading to 721 criminal prosecutions in federal court;

In FY 2011, OPLA will:

- Expand support of immigration enforcement initiatives, worksite enforcement, and criminal prosecutions; and
- Continue improving upon efforts to collect and analyze relevant workload data to track outcome based performance.

In FY 2012, OPLA will:

- Continue to increase the Offices of Chief Counsel's knowledge and provision of legal services and advice related to preventing terrorists from entering the United States, counter-proliferation, money laundering and bulk cash smuggling, contraband smuggling, intellectual property, and worksite enforcement cases; and
- Enhance capabilities to partner with the Department of Justice to effectively and efficiently prosecute immigration and customs law violations by further refining and improving efficiencies in how workload is managed.

CURRENT SERVICES PROGRAM DESCRIPTION

The Office of Investigations (OI) enforces customs and immigration laws through the investigation of activities, persons, and events that may pose a threat to the safety or security of the United States and its citizens. Investigations lead to the arrest and prosecution of perpetrators and/or result in the removal of individuals posing risks to national security or public safety. OI investigates: illegal trafficking in weapons and procurement of sensitive U.S. origin technology, including weapons of mass destruction; the smuggling of narcotics and other contraband; human smuggling and trafficking; money laundering and other financial crimes; fraudulent trade practices; identity and benefit fraud; child pornography; child sex tourism; employers that hire illegal and undocumented workers; and health and public safety dangers, that involve cross-border crime.

The following five investigative components of OI use immigration and customs authorities to address vulnerabilities and prevent violations that threaten national security and public safety.

National Security Investigations - OI works to deter and dismantle terrorist groups, individuals, and companies involved in the illegal procurement and movement of weapons of mass destruction and their materials and components. National Security Investigations (NSI) personnel work closely with the Federal Bureau of Investigation's Joint Terrorism Task Forces (JTTFs). In addition, the following components within NSI address specific threats:

- The Counter Proliferation Investigations (CPI) Unit leads U.S. Government efforts to prevent foreign adversaries from illegally obtaining U.S. military products and sensitive technology, including weapons of mass destruction components. Under Project Shield America, ICE's public and industry outreach program, special agents visit U.S. manufacturers and exporters of arms and sensitive goods to educate them about U.S. export laws and solicit their assistance in identifying potential illegal exports. Since late

2001, ICE special agents have conducted more than 18,000 presentations, resulting in tips that have led to ICE criminal investigations.

- The National Security Entry Exit Registration System (NSEERS), the Student and Exchange Visitor Information System (SEVIS), and U.S. Visitor and Immigrant Status Indicator Technology (US-VISIT) tracks non-immigrant aliens in the United States. An estimated 100,000 of these aliens annually will overstay or violate the terms of their authorized period of admission, for economic, personal, and criminal reasons. The responsibility for enforcing the violations identified by these systems lies within the Counterterrorism and Criminal Exploitation Unit.
- The Threat Analysis Section (TAS) is a specialized group of agents and intelligence analysts who proactively identify persons of interest from within the non-immigrant community of visitors, students, and temporary workers in the United States. The TAS uses the latest computer technology to access immigration, law enforcement, and intelligence information to identify hidden links and associations between persons and events that could indicate a previously unknown threat.
- The Human Rights Violator and War Crimes Unit oversees ICE investigations involving torture, genocide, extrajudicial killings, recruitment of child soldiers, war crimes, extreme forms of religious persecution, and immigration and visa fraud where the underlying offense is based on substantive human rights abuses and war crimes. The Unit attempts to deny safe haven in the United States to human rights violators by using all of ICE's investigative techniques and legal authorities.

Financial Investigations - OI identifies, investigates, disrupts, and dismantles criminal organizations and the complex systems used to launder funds generated from smuggling, human trafficking, financial scams, commercial fraud and intellectual property rights violations, forced child labor, and other criminal activity. In coordination with private sector partners, OI reduces the vulnerability of U.S. financial systems to exploitation by terrorist and other criminal organizations, and seizes illicit proceeds derived from and used for criminal activity. In view of the significant role that financial assets and money laundering play in sustaining criminal organizations and criminal activity, all ICE investigations include a financial component.

The *Cornerstone Initiative* focuses on coordination and cooperation with domestic and foreign private sector entities to identify vulnerabilities in U.S. financial systems. This information exchange greatly helps ICE in its efforts to disrupt and dismantle alternative financing mechanisms that terrorists and other criminals use to earn, move, and store illicit funds.

The Trade Transparency Unit (TTU) provides the analytical infrastructure to support international financial and trade investigations. The TTU provides the capability to identify and analyze complex trade-based money laundering schemes where criminals use the international trade system to hide illegal proceeds within legitimate trade transactions. OI works closely with foreign government law enforcement agencies to share investigative methods and techniques and foster their cooperation to jointly analyze foreign and domestic trade and financial data. This cooperation can lead to the disruption of criminal organizations that use trade-based money laundering to launder their illicit proceeds.

Smuggling/Public Safety Investigations - OI identifies, deters, interdicts, and investigates activities associated with the unlawful movement of people and goods into and out of the country. OI investigations are targeted at disrupting and dismantling activities of groups and individuals engaged in human smuggling, narcotics, and contraband, and human rights violations, exploitation of individuals, importation of hazardous and prohibited items, identity and benefit fraud, critical infrastructure protection/worksites enforcement, and violent criminal aliens.

- Criminal organizations and smugglers constantly develop new methods to conceal contraband in legitimate cargo or conveyances and continually change transshipment routes to evade detection. International and domestic criminal organizations target, recruit, and corrupt private sector and government personnel into conspiracies to smuggle narcotics and other contraband. Using programs such as the Maritime Port Security Program, OI eliminates the threats posed by internal conspiracies and smuggling organizations. *Operation Safe Harbor* focuses on investigative initiatives in the maritime port environment as well as non-investigative initiatives including cooperative programs with CBP and DHS component agencies. Resources and support for these investigative efforts are enhanced through increased coordination and cooperation with other federal, state, tribal, local, and foreign law enforcement agencies and through participation in task forces such as the Border Enforcement Security Task Force (BEST), Integrated Border Enforcement Team (IBET), Organized Crime Drug Enforcement Task Force (OCDETF), the High Intensity Drug Trafficking Area (HIDTA), and the High Intensity Financial Crime Area Programs.
- OI investigates violent criminal aliens, such as sexual predators and street gang members that pose a significant threat to public safety. In partnership with state and local law enforcement, OI identifies and investigates foreign-born sex offenders for violations of laws in order to remove them from the country. OI criminal gang investigations and gang enforcement operations focus on transnational criminal street gangs, prison gangs, and outlaw motorcycle gangs subject to ICE's broad scope of immigration and customs authorities because the members may be foreign born and/or illegally present. The investigations often involve crimes with a nexus to the border including narcotics smuggling and distribution, weapons smuggling and arms trafficking, money laundering and bulk cash smuggling, human smuggling and trafficking, identity theft and benefit fraud, and cyber crimes.
- OI leads the Border Enforcement Security Task Forces (BESTs), which are comprised of federal, state, local and international law enforcement agencies. The BESTs utilize the resources of partner law enforcement agencies to comprehensively identify, target and dismantle cross-border criminal organizations whose illicit activities fuel much of the violence on our shared borders. OI additionally participates in other collaborative investigative task forces (e.g., High Intensity Financial Crime Area Programs, Joint Vetting Units, Financial Action Task Forces) targeting terrorist financing and transnational money crimes, and export violations.
- The Commercial Fraud Unit and National Center for Intellectual Property Rights (IPR Center) target predatory and unfair trade practices that threaten our economic stability, restrict the competitiveness of U.S. industry in world markets, and place the public health

and safety of the American people at risk. ICE is the only federal agency that investigates predatory and unfair trade practices under Title 19 of the U.S.C.

- Identity and benefit fraud crimes are vulnerabilities of national security that enable terrorists and criminals to exploit the legitimate immigration process and obtain legal status in the United States via fraudulent means. Benefit fraud is an extremely lucrative form of organized white-collar crime. It is complex and challenging to investigate and often involves sophisticated multi-layered schemes with multiple co-conspirators that take years to investigate and prosecute. OI targets the most significant, prolific, and egregious violators, and individuals and organizations that pose a risk to national security or public safety.
- OI worksite enforcement initiatives promote collaboration with the private sector to prevent criminals and terrorists from penetrating and harming the U.S. economy through employment in critical and sensitive areas. OI prioritizes enforcement operations to target the most important and vulnerable facilities, and identify and remove unauthorized facility workers through multi-agency screening and arrest operations. OI applies criminal sanctions to employers that exploit workers and whose employment practices involve alien smuggling or fraud. OI conducts enforcement operations and Form I-9 inspections to identify non-compliance with Employment Eligibility Verification requirements and employers whose practice is to strategically and repeatedly hire unauthorized workers. OI conducts proactive outreach under the ICE Mutual Agreement between Government and Employers (IMAGE) program to foster compliance by employers and trade associations and to reduce unauthorized employment. IMAGE provides training on proper hiring procedures, fraudulent document detection, and use of E-Verify for employment eligibility verification

Investigative Services - OI provides investigative support services for Asset Forfeiture to all categories of investigations. Asset Forfeiture laws allow ICE agents to store and maintain seized property and forfeit illicit proceeds and other criminally derived assets from critical infrastructure cases. Illicit proceeds are gained by organizations utilizing undocumented workers at Ports of Entry and/or In-Bond warehouses and are used to sustain the criminal activity and to fund other criminal endeavors.

Law Enforcement Support & Information Management - OI provides investigative support services to all categories of investigation through the Cyber Crimes Center (C3), Technical Operations, and the Forensic Document Laboratory (FDL). The C3 manages Operation Predator and investigates and provides computer forensics support to investigations on domestic and international criminal activities occurring on, or facilitated by, the Internet, including document and benefit fraud; arms and strategic technology; money laundering; counterfeit pharmaceuticals; child pornography; and child sex tourism investigations.

The FDL is the only federal crime laboratory specializing in the scientific authentication and research of travel and identity documents and related issues. This capacity is critical to detecting and deterring travel and identity document fraud which facilitates all types of criminal activity.

Technical Operations assists the field by providing training and support for technical equipment needs including tracking devices, video equipment, body wires, covert entry, wiretap equipment,

and the Telecommunications Linking System. Technical Operations also supports all ICE OI Title III telephone, email and IP intercepts, and pen registers.

Key Accomplishments

In FY 2010, OI:

- Permanently expanded investigative resources at the Southwest Border to address border violence along the U.S./Mexican border and to focus on cross-border threats in the region including contraband smuggling, money laundering and bulk cash smuggling, human smuggling and trafficking, transnational criminal gangs, and tunnel detection;
- Expanded the BEST program to additional locations - Charleston, SC; Seattle WA; New Orleans, LA; El Paso, TX - to prevent the smuggling of goods and the illegal entry of persons, with a priority focus on terrorist groups, gang members, and criminal aliens;
- Expanded Operation Armas Cruzadas to incorporate additional agency partners and increase the scope of targeting, interdiction, and investigation of the smuggling of weapons from the U.S. into Mexico and continue to effectively respond to and support the task of investigating the illegal smuggling of weapons from the U.S. into Mexico;
- Completed 887 presentations to 5,868 businesses throughout the United States to build on the successful partnerships with exemplary businesses in the area of immigration compliance;
- Continued to roll-out Operation High Road, an ICE-led, multi-agency initiative to investigate U.S.-based automobile exporters to the Middle East and the flow of associated funds from these exports back to the U.S.;
- Established six Operation Community Shield Task Force (OCSTF) units in Salt Lake City, UT; Charlotte, NC; St. Paul, MN; Dallas, TX; Birmingham, AL and Tegucigalpa, Honduras to combat the global proliferation of transnational gang organizations;
- Established partnerships with TSA at airports around the country to disrupt efforts of criminal organizations involved in cross-border crimes to move their illicit proceeds;
- Established the first Counter-Proliferation Investigations Center (CPIC) within the SAC Washington, DC area of operation in an effort to maximize CPI resources in strategic locations throughout the United States;
- Collaborated with the Government of Panama on the sharing of Mexican trade data to complete and publish a bi-lateral study on the movement of illicit proceeds and established a new TTU partnership with Panamanian Customs authorities; and
- Launched “Operation Overload” a financial investigations surge targeting the movement of illicit funds along the Southwest Border.

In FY 2011, OI will:

- Expand Operation Armas Cruzadas to incorporate additional agency partners and increase the scope of targeting, interdiction, and investigation of the smuggling of weapons from the U.S. into Mexico to reduce the flow of weapons trafficking through U.S. borders;
- Establish a School Fraud Investigation Program to identify and develop potential school fraud referrals to field offices;

- Implement an outreach initiative directed to academic and training institutions to educate the institutions on SEVP associated laws and regulations, and to develop sources of information to develop School and Student Visa Fraud investigations;
- Establish BESTs in three additional locations - Massena, NY; San Francisco, CA; and Honolulu, HI - to prevent the smuggling of goods and the illegal entry of persons, with a priority focus on terrorist groups, gang members, and criminal aliens;
- Expand OCSTF's into two additional U.S. cities including Baltimore, MD and San Angelo, TX to combat the global proliferation of transnational criminal gang organizations;
- Implement a national security task force to identify, arrest, prosecute, and/or remove Terrorist Identities Datamart Environment (TIDE) subjects present in the U.S. who have applied for or obtained immigration benefits through fraud;
- Establish the second Counter-Proliferation Investigations Center (CPIC) within the SAC Denver area of operation in an effort to maximize CPI resources in strategic locations throughout the United States;
- Expand nationwide worksite IMAGE outreach training to educate employers on the Twelve Best Employment Practices, proper hiring procedures and methods to reduce unauthorized employment; and
- Establish a centralized unit to conduct Form I-9 inspections to support worksite enforcement investigations.

In FY 2012, OI will:

- Expand trade transparency activities to viable foreign nations to exchange international trade data and enhance trade based money laundering investigations; and increase outreach the trade and financial industry to promote awareness and reduction of vulnerabilities within the international trade system to prevent trade based money laundering;
- Conduct training, capacity building, and mentoring programs to ensure Federal, State, Local, and foreign law enforcement partners are empowered to thwart the proliferation of gangs with unique ICE enforcement authorities;
- Expand IMAGE outreach training efforts nationwide to provide regional and/or local IMAGE training conferences to employers;
- Expand the operations of the Child Exploitation Section with the creation of the Child Exploitation Center and begin deploying Child Sex Tourism Traveler Jump Teams in an effort to conduct investigations of U.S. citizens traveling in foreign commerce for the purposes of engaging in sex with minors; and
- Expand the Computer Forensics Program to address the increases in digital data forensics volumes, while developing new tools and methods to manage and improve the analysis of derived digital information.

2012 Total Request	199	199	114,928

CURRENT SERVICES PROGRAM DESCRIPTION

The Office of International Affairs (OIA) works to protect the United States through proactive international investigations overseas involving transnational criminal organizations responsible for the illegal movement of people, goods, and technology. OIA works with foreign counterparts to identify and combat criminal organizations before they can adversely impact the United States. OIA serves as the primary international investigative component within DHS and must maintain operational flexibility in order to meet the dynamic challenges and threats in the global environment. OIA personnel collaborate with foreign counterparts in a joint effort to deter, disrupt, and dismantle transnational criminal organizations. OIA investigates human trafficking, child sexual exploitation, counter-proliferation and illegal arms trafficking, alien smuggling and immigration violations, intellectual property rights violations, commercial fraud, money laundering, bulk cash smuggling, and drug trafficking.

The primary mission of an OIA Attaché office is to conduct ICE investigations and critical law enforcement operations and to provide investigative support to domestic offices in combating transnational crime. OIA offices coordinate international law enforcement operations and work closely with foreign law enforcement officials to target international criminal enterprises. In addition, OIA supports other U.S. Government components and initiatives, refers requests from host country law enforcement agencies to domestic offices, and serves as advisors to U.S. missions. OIA provides training and conducts outreach to foreign officials on DHS/ICE international priorities. OIA also coordinates with foreign counterparts to share information under negotiated bilateral agreements and Mutual Legal Assistance Agreements. OIA conducts and coordinates international training for law enforcement officials through International Law Enforcement Academies (ILEA). OIA's activities also support the goals and initiatives set forth by the Department of State (DOS) in the areas of regional stability, counter-terrorism, homeland security, weapons of mass destruction, international crime and drugs, economic prosperity, and public diplomacy.

One of ICE's primary strategic goals is to protect communities and public safety by investigating and removing aliens who present a risk to national security or public safety, including terrorists, gang members, and convicted criminals. OIA assists in the timely removal and return of aliens from the United States to host countries, and strengthens and supports legal migration. Through the use of dedicated Assistant Attachés for Removals overseas, OIA is able to coordinate returns with host governments and to facilitate transits and country clearances. The newly deployed Assistant Attachés are integrated with and supported by the OIA Attaché offices. The removal and repatriation activities are focused in areas where liaison will have the greatest enforcement benefit and regional impact, such as the Caribbean, the Americas, Asia, and Africa.

Through the Repatriations and International Agreements Unit (RIA), OIA coordinates with the ICE Office of Detention and Removal Operations (DRO) to affect the removal of aliens from the United States who have final orders of removal. RIA provides guidance, training and defines scope of mission of the Assistant Attachés for Removal. The Assistant Attachés for Removal participate in directing, coordinating, and controlling the execution of DRO activities in the overseas office. These functions speed the removal process and reduce related detention costs. The Department of State (DOS) also benefits from ICE support at the U.S. embassies through assistance in sensitive removal discussions with receiving and transit countries. Close foreign coordination is required to gain cooperation from foreign governments on return of aliens and coordination of Justice Prisoner and Alien Transport System flights, country clearances, escorts, and charters. The RIA furthers law enforcement coordination through development of international agreements. In addition to acting as liaison with ICE DRO, RIA also coordinates information sharing through and negotiation on Customs Mutual Assistance Agreements, Mutual Legal Assistance Treaties and other international agreements as needed. These bilateral agreements and activities are centrally controlled and coordinated under OIA to provide one voice for ICE.

Key Accomplishments

In FY 2010, OIA:

- Continued to support investigations of criminal organizations engaged in human trafficking of children and child sexual exploitation, counter-proliferation and illegal arms trafficking, alien smuggling and immigration violations, intellectual property rights violations and commercial fraud, money laundering and bulk cash smuggling, and drug trafficking overseas;
- Conducted a joint operation with Mexican authorities which targeted transportation companies in Arizona that facilitate human smuggling.
- Expanded ICE's presence through the deployment of two Special Agents along Mexico's northern border in high-risk locations (Tijuana and Monterrey);
- Expanded ICE's presence in the Americas to assist in the reduction of narcotics trafficking through ICE's existing strong partnerships with Central American law enforcement and efforts to build capacity to investigate and interdict narcotics and bulk cash shipments;
- Conducted joint operations with the Governments of Mexico and Colombia that resulted in the disruption and dismantlement of the largest supplier of cocaine to Mexican and European drug trafficking organizations. These operations resulted in a \$41 million

seizure, the largest containerized bulk cash seizure in the history of the United States, Mexico, and Colombia. Joint operations also yielded the seizure of 3.3 tons of cocaine, criminal forfeitures of \$37 million, 13 indictments, 18 arrests, and 4 guilty pleas;

- Continued to work with DOD partners to support efforts in the war on terror to include expanding ICE's presence in CENTCOM and an Attaché office in Kabul, Afghanistan in support of CENTCOM, SOCOM, and U.S. mission interests and to support DHS and DOD priorities in the region;
- Continued operational training of foreign law enforcement officials in undercover techniques and counter-proliferation investigations; and
- Expanded task force efforts to identify and investigate Politically Exposed Persons (PEP) in coordination with foreign governments and continued efforts to establish permanent, formal TTUs.

In FY 2011, OIA will:

- Improve and expand the global reach in the investigations of criminal organizations engaged in human trafficking of children and child sexual exploitation, counter-proliferation and illegal arms trafficking, alien smuggling and immigration violations, intellectual property rights violations and commercial fraud, money laundering and bulk cash smuggling, and drug trafficking overseas;
- Increase working relationships and coordination with DOD elements and other U.S. and foreign partners in Overseas Contingency Operations to combat transnational criminal organizations; and
- Increase coordination with Mexico to target and reduce vulnerabilities and criminal organizations that threaten our security: OIA supports U.S. drug control policy by supporting the overall ICE mandate to detect, disrupt, and dismantle organizations smuggling contraband (including narcotics) into the United States.

In FY 2012, OIA will:

- Review investigative trends and formulate new strategies to address national security threats with such partners as the DOS, Department of Commerce (DOC), U.S. Citizenship and Immigration Services (USCIS), Customs and Border Protection (CBP), Department of Justice (DOJ), ICE Detention and Removal Operations (DRO), ICE Office of Investigations (OI), and the ICE Office of Intelligence (Intel);
- Strategically align priorities using a comprehensive site selection model to evaluate and justify efforts to expand international operations to additional underrepresented overseas locations;
- Improve and expand the global reach in the investigations of criminal organizations engaged in human trafficking and child sexual exploitation, counter-proliferation and illegal arms trafficking, alien smuggling and immigration violations, intellectual property rights violations and commercial fraud, money laundering and bulk cash smuggling, and drug trafficking overseas; and
- Participate in directing, coordinating, and controlling the execution of Enforcement and Removal activities in the overseas environment.

Department of Homeland Security

Salaries and Expenses
Visa Security Program
Program Performance Justification
(Dollars in Thousands)

PPA: Visa Security Program

	Perm. Pos	FTE	Amount
2010 Actual	71	45	27,614
2011 C.R.	67	67	30,686
2012 Adjustments-to-Base	-	-	(1,197)
2012 Current Services	67	67	29,489
2012 Program Change	-	-	-
2012 Total Request	67	67	29,489

CURRENT SERVICES PROGRAM DESCRIPTION

Authorized by the Homeland Security Act of 2002, the Visa Security Program (VSP) and Security Advisory Opinion Unit (SAOU) reduce the potential for criminals, terrorists, and persons of interest to exploit the legal visa process to enter the United States. The VSP identifies potential terrorist or criminal threats before they reach the United States by conducting targeted, in-depth vetting of individuals who apply for visas overseas. The SAOU is part of the VSP dedicated to participating in the interagency checks of visa applicants conducted through the SAO process. The SAOU checks DHS-held derogatory information on visa applicants and provides liaison and operational de-confliction with other participating agencies. The VSP and SAOU foster coordinated decision-making across DHS and the Department of State (DOS) to utilize law enforcement expertise and analysis to maximize the enforcement benefit to the visa process.

Through the implementation of VSP at 17 overseas posts in 14 countries, OIA is working closely with DOS to enhance national security by providing an additional level of review and security along with the unique law enforcement expertise necessary to identify terrorists, other criminals, and persons of special interest before they enter the United States.

The Visa Security Program enhances the security of visa issuance at high-risk overseas posts by deploying highly skilled and experienced law enforcement officers who conduct in-depth investigative reviews of visa applications that raise security concerns, investigate visa fraud and other criminal activity which can exploit the visa system, and provide advice and training on security issues. The advice and assistance provided by VSP enhances DOS consular officers' ability to screen security risks as they adjudicate visas and refuse or revoke applications when warranted.

Key Accomplishments

In FY 2010, VSP:

- Expanded the VSP by opening new offices in London, England; Jeddah, Saudi Arabia; and Tel Aviv, Israel;
- Provided 1,491 recommendations for denial of visa applications to the Department of State with findings of derogatory information, exceeding the FY 2010 target of 955 by 536;
- Continued to negotiate with partner agencies to expand the Security Advisory Opinion Unit (SAOU) activity to screen and vet additional categories of SAOs;
- Continued to develop and refine the VSP Tracking System (VSPTS-Net) to develop more comprehensive targeting tools, facilitate vetting activities, and provide coordinated development to ensure that ICE findings are shared with the Department of State (DOS) in a more efficient manner; and
- Trained 63 ICE Special Agents as Visa Security Officers (VSOs).

In FY 2011, VSP will:

- Increase the number of visa applications in which VSP discovers and provides derogatory information to DOS and raise the target goal to 1,050 based on new offices opened in FY 2009 and FY 2010;
- Support investigative initiatives by identifying emerging patterns and national security threats of increased risk from terrorists, criminals, and other ineligible visa applicants; and

In FY 2012, VSP will:

- Continue to increase the number of visas guided by Visa Security Officers towards refusal/denial based on derogatory information provided to the Department of State; Continue to support investigative initiatives by identifying emerging patterns and national security threats of increased risk from terrorists, criminals, and other ineligible visa applicants.

2012 Program Change	-	-	-
2012 Total Request	466	466	81,503

CURRENT SERVICES PROGRAM DESCRIPTION

The Office of Intelligence (Intel) is responsible for managing ICE intelligence operations, including the activities of the headquarters staff, and field offices co-located with ICE enforcement offices throughout the country.

The aim of the program is to develop and receive intelligence and process, analyze, and disseminate it to ICE executive management and to operational units as it pertains to homeland security and ICE strategic goals, which include national security, infrastructure protection, immigration enforcement, transnational criminal investigations, and the illegal movement of people, money, and cargo.

This is accomplished using the Intelligence Fusion System (IFS). IFS is the comprehensive analytical and investigative tool that enables ICE and other DHS personnel to access and analyze large volumes of data from sources such as the Enforcement Apprehension Booking Module (EABM), US-VISIT Automated Biometric Identification System (IDENT), portions of the Treasury Enforcement Communication System (TECS), Student and Exchange Information System (SEVIS), Intelligence Reporting System (IRS), and Significant Event Notification System (SEN), as well as digitized content obtained from Document Exploitation (IDocX) initiatives. The IFS database includes indexed names, subject records, and investigative and intelligence reports, as well as global intelligence information on topics that include smuggling, terrorism, and transnational trends.

The staff, assets, and resources of Intel operate across the United States and respond to intelligence needs based on formal and ad hoc requirements levied by its customers in ICE, within the DHS, and in the intelligence and law enforcement communities, in support of the following programmatic areas:

- **Southwest Border Violence**, where Intel provides a wide spectrum of intelligence support to enforcement entities on the Southwest Border including state, tribal, local and other Federal law enforcement and Intelligence Community partners; Human Smuggling and Public Safety, focusing on human smuggling, trafficking in persons, immigration benefit fraud, mass migration, and threats to public safety emanating from street gangs and other criminal aliens;
- **Contraband Smuggling**, where Intel provides intelligence to assist in the disruption of the activities related to the trafficking of international narcotics and other prohibited goods;
- **Illicit Finance and Trade Fraud**, involving illicit movements of money or financial instruments, and other commerce-related crime issues such as international trade violations, protection of intellectual property rights, and public health threats that cross our borders;
- **Counter-Proliferation Intelligence**, focusing on the identification and disruption of individuals and organizations involved in the unauthorized movement and procurement of critical technology, dual-use goods, chemical, biological, radiological, nuclear/conventional weapons, and unauthorized U.S. exports to prohibited countries.

Intel achieves this through the following functional areas:

- **Field Intelligence Groups (FIGs)** - yield efficiencies through co-location with other elements of ICE. The 26 FIGs foster relationships between Intel analysts and the customers they support. This structure also allows for flexibility to support customers as the FIG can be augmented with analysts temporarily deployed from around the country as needed.
- **Secure Communities** - exploits classified reporting, conducts Human Intelligence (HUMINT), and performs extensive research to develop actionable information on the U.S. VISIT biometric backlog, the “largest population of potential immigration violators that pose a threat to the safety of American communities”. Intel also produces alerts and reports that enhance officer safety and provide situational awareness to personnel participating in removal operations overseas;
- **Border Coordination Unit** - provides intelligence support to ICE’s OI and OIA worldwide with emphasis on regions having significant levels of transnational criminal activity affecting ICE operations. It is structured into units to provide intelligence in support of ICE’s mission for the Southwest Border/Mexico strategy, strategic partnerships, plans and integration, and oversees the Border Violence Intelligence Center.
- **Collections and Requirements** - works to increase responsiveness to customer and executive leadership, emphasizing requirement-driven intelligence service and improving internal and external information sharing.

Key Accomplishments

In FY 2010, the Office of Intelligence:

- Employed the Intelligence Requirement Intake System and requirements management process to support our customer's needs for intelligence products in line with the strategic objectives of ICE.
- Provided actionable intelligence through Operation Wing Clip (OWC) to the Detention and Removals Office, resulting in six arrests. Additionally, the section provided OI special agents with six OWC leads in support of extra territorial criminal travel (ECT) targets;
- Developed over 480 TECS records on SIAs destined for illegal entry to the United States likely to defraud the U.S. asylum program;
- Expanded its support to the National Intellectual Property Rights Center, National Export Enforcement Coordination Network, by assigning/embedding analysts to provide on-site investigative support through research and analysis and lead generation; and
- Provided support to Operation Athena II, a bulk cash smuggling operation organized to fight money laundering, by carrying out controls on natural persons, their baggage and their means of transport to check compliance with the obligation to declare cash and monetary instruments.

In FY 2011, the Office of Intelligence will:

- Seek efficiencies through co-location, and information sharing partnerships with other Federal, state, tribal and local partners;
- Develop innovative approaches to yield a five percent increase in production per analyst FTE each year through business process improvements; and
- Pilot innovative methodologies that enhance our ability to better support customers in executing law enforcement actions such as arrests, seizures, and the return of criminal aliens.

In FY 2012, the Office of Intelligence will:

- Build and foster relationships with our International partners by continuing to participate in the Virtual Global Taskforce (VGT) work stream, which is made up of law enforcement agencies from around the world working together to fight child abuse online;
- Build strategic partnerships with Australia, Canada, New Zealand and the United Kingdom, and United States partners FBI and DEA, in the context of the Strategic Advisory Group (SAG);
- Support Operation Armas Cruzadas to combat the smuggling of weapons from the United States into Mexico;
- Support the northern and southern border threat assessments, strategies and working groups with DHS, contributing towards the mission of securing our borders;
- Provide analytical support to Secure Communities by exploiting classified reporting, conducting HUMINT, and performing extensive research to develop actionable information on the U.S. VISIT biometric backlog, the largest population of potential immigration violators that pose a threat to the safety of American communities; and

- Provide support to ICE financial initiatives to detect banks, trade and transportation areas that that can be exploited by money laundering, alien smuggling, human trafficking and narcotics smuggling organizations.

CURRENT SERVICES PROGRAM DESCRIPTION:

The U.S. Immigration and Customs Enforcement (ICE) Office of Detention and Removal Operations' (DRO) Custody Operations Program provides safe, secure, and humane conditions of confinement for aliens apprehended by ICE and other law enforcement partners, such as the Border Patrol and state, county, and local law enforcement agencies throughout the United States.

Current Bed Space Management

ICE owns and operates six secure detention facilities, called Service Processing Centers (SPCs), located in: Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Miami, Florida; and Los Fresnos, Texas. El Paso is currently being converted to office space and El Centro is being considered for co-location of ICE field offices. ICE will examine closing the remaining SPCs in favor of lower cost options. ICE also currently utilizes seven contract detention facilities (CDFs), which are run solely for ICE. These facilities are located in: Aurora, Colorado; Houston, Texas; Tacoma, Washington; Elizabeth, New Jersey; Broward County, Florida; Pearsall, Texas; and San Diego, California. In addition, ICE obtains additional bed space throughout the United States in State and local detention facilities, through Inter-governmental Service Agreements (IGSAs). Furthermore, ICE supplements detention capacity through an arrangement with the Federal Bureau of Prisons (BOP) for the Federal Detention Center in Oakdale, Louisiana and several other locations.

Detention Standards Compliance Oversight

ICE monitors detention facilities to ensure compliance with applicable detention standards. These standards specify the living conditions and services required to assure detainees the appropriate dignity, respect, and care while in ICE custody. Each authorized facility receives an

annual inspection by an independent contractor. In addition, the Office of Detention Oversight within the ICE Office of Professional Responsibility conducts random reviews and focused reviews. These reviews are conducted in response to alleged detention deficiencies at facilities where ICE detainees are held to ensure that conditions of confinement are in compliance with ICE standards. ICE also has ongoing onsite quality assurance compliance monitoring at our largest facilities.

DRO and ICE's Office of Detention Policy and Planning (ODPP) are in the final stages of modernizing ICE's detention standards. In collaboration with various stakeholders, ICE has drafted the 2010 Performance-Based National Detention Standards (PBNDS), which focus on the outcomes that the required procedures are expected to accomplish. These new standards will reflect ICE's civil detention mission and create a new detention system geared to the unique needs of those in ICE custody.

Healthcare

Primary healthcare for alien detainees is managed by the ICE Health Service Corps (IHSC), which became a component of DRO operations in FY 2008. Through comprehensive health screening and the provision of direct patient and managed care services to the ICE detainee population, IHSC directly impacts the globalization of communicable disease and serves as a model for global health services delivery. A managed healthcare program is available system-wide to ensure appropriate care is provided to all detainees in the most efficient manner possible.

The revised PBNDS will provide for enhanced medical and mental healthcare. In addition, ICE is developing an enhanced medical and mental health classification system to ensure detainees are placed at facilities that can best meet their medical and mental health needs. ICE is also developing a comprehensive electronic health records system to enhance communication among facilities and improve the reporting and delivery of care for detainees.

Emergency Response

The breadth of the responsibilities within the detention program requires a readiness to respond to a wide variety of emergency situations. DRO has created contingency plans for DRO resources to remain readily available for deployment in the event a mass migration occurs.

Detention Reforms

In FY 2009, ICE announced a series of fundamental detention reforms to ensure that conditions of confinement are based on a civil rather than a penal model. These reforms are intended to facilitate individual detention determination-based factors, such as threat to the community, criminal history, risk of flight, immigration status, and medical and mental health. These reforms will significantly improve the current immigration detention system, while allowing ICE to maintain a significant, robust detention capacity. ICE is committed to taking the steps that will lead the agency away from the present decentralized, jail-oriented approach to a system wholly designed for and based on ICE's needs.

The Administration's goal is to house detainees in facilities designed, located, and operated to accomplish immigration detention as efficiently and effectively as possible. Reforms will bring improved custodial conditions, ICE oversight, medical care, and fiscal prudence.

In FY 2010, through the newly created ODP, ICE and DRO initiated the following Detention Reform activities:

- Revised immigration detention standards to reflect the conditions appropriate for various immigration detainee populations;
- Systematically reviewed high-cost detention space to maximize use of less expensive detention resources and encourage the private sector to develop innovative and inexpensive civil detention facilities;
- Improved detention by reviewing contracts for all detention facilities to identify opportunities to centralize all detention contracts managed by field offices. ICE plans to achieve a cost savings via centralized procurement management and its coordination with the Office of the Federal Detention Trustee;
- Refined a risk-assessment instrument that will improve custody decisions and ensure bed space is being used prudently;
- Developed a medical care risk-assessment system to assist in appropriate placement of detainees with medical and mental health issues, to avoid unnecessary and costly transfers;
- Implemented a program to utilize Federal employees as detention services monitors. By federalizing this function and developing a corps of specialized detention experts, ICE will reduce its dependency on private sector resources and reduce contract costs; and
- Proposed to issue a new detainee transfer policy aimed at reducing the number of detainee transfers.

ICE & Office of the Federal Detention Trustee Collaboration

In FY 2010, ICE began to collaborate closely with the Office of the Federal Detention Trustee (OFDT) on a number of joint actions aimed at improving the efficiency and cost effectiveness of ICE's detention program in FY 2011. Under specific consideration are the following initiatives:

- Establishment of common Federal per diem rates to leverage Federal buying power in an effort to reduce ICE's daily bed costs;
- Sharing and cross-utilization of ICE, OFDT, and U.S. Marshals Service facility inspections to ensure consistent conditions of confinement and reduce ICE's inspection costs; and
- Joint population projections and capacity planning to optimize the size, type, location, use, and acquisition of Federal detention space.

Reducing the Criminal Alien Average Length of Stay (ALOS) in FY 2011 and 2012

DRO is working to achieve an average length of stay (ALOS) for criminal aliens of not more than 38 days by the end of FY 2011, and ICE is currently on target to meet or exceed this goal.

ALOS reductions in FY 2010 can be attributed, in part, to the increased exercise of prosecutorial discretion; an increase in hiring from FY 2008 to FY 2009 that led to more trained staff efficiently following procedures in FY 2010; emphasizing the achievement of ALOS efficiencies in each field office; and new detention guidance to prioritize the use of its enforcement personnel, detention space, and removal resources for criminal aliens.

In FY 2011, ICE will continue efforts to reduce the ALOS for criminal aliens. ICE will:

- Document processes and provide training opportunities for key process owners;
- Enhance collaboration with foreign governments through the Department of State to obtain travel documents more quickly;
- Continue to improve coordination with Executive Office for Immigration Review (EOIR) to expedite detained and Alternatives to Detention (ATD) cases; and
- Improve data integrity efforts to maintain the accuracy of the data elements used to calculate ALOS;

These initiatives collectively will reduce the ALOS and enable DRO to meet its enforcement goals.

Bed Cost Realignment

Several ICE Salaries and Expenses PPAs funded detention bed procurements in the past. For FY 2011, ICE proposed to fund detention beds from the Custody Operations PPA, providing better transparency into the cost of detention bed procurement. Usage by detainee type will still be tracked, but bringing all funding for bed space under one PPA eliminates the need for artificial division of funding as bed space can be efficiently procured by facility rather than source of detainee. ICE proposes to continue this practice in FY 2012 for direct funding. Funding from ICE's fee accounts (Immigration Inspection User Fee and Breached Bond Detention Fund) fund a limited number of detention beds.

Key Accomplishments

In FY 2010, Custody Operations:

- Continued to support Secure Communities initiatives to identify and remove all convicted criminal aliens amenable to removal in jails and prisons throughout the United States. Secure Communities' risk-based application of resources will continue to inform enforcement activities as well as use of detention space;
- Began optimizing facility locations to align bed space supply with detention demand, and to decrease transfers away from relatives and counsel;
- Implemented an electronic resource management system to centralize publication of directives, facilitate development and modification of new policies, and allow collaboration across DRO and with other ICE programs;
- Continued to support state and local jurisdictions through the provision of detention space for detainees arrested by municipal law enforcement jurisdictions and brought to DRO custody; and
- Deployed the eBONDS initiative.

In FY 2011, Custody Operations will:

- Continue to support any additional bed space requirements generated by Secure Communities' interoperability program;

- Work to ensure current resources can be strategically focused on criminal alien identification and removal efforts;
- Continue refinement of the bed space forecast model;
- Continue to focus on reducing the time a criminal alien spends in the “Process” phase of the criminal alien enforcement cycle;
- Continue optimizing the location of facilities to align bed space supply with detention demand, and to decrease transfers away from relatives and counsel;
- Continue efforts to improve the quality of care for detainees, while increasing program efficiencies;
- Continue to support state and local jurisdictions through the provision of detention space for detainees arrested by municipal law enforcement jurisdictions and brought to DRO custody;
- Continue modernization efforts of the PBNDS; and
- Continue its detention inspection program.

In FY 2012, Custody Operations will:

- Ensure enhancement funding and programmatic efficiencies are utilized to maintain a funded detention capacity at the 33,400 bed level;
- Continue to support any additional bed space requirements generated by Secure Communities’ interoperability program;
- Continue to refine its bed space forecast model;
- Continue to focus on reducing the time a criminal alien spends in the “Process” phase of the criminal alien enforcement cycle;
- Continue optimizing the location of facilities to align bed space supply with detention demand, and to decrease transfers away from relatives and counsel;
- Continue efforts to improve the quality of care for detainees, while increasing program efficiencies;
- Continue to support state and local jurisdictions through the provision of detention space for detainees arrested by municipal law enforcement jurisdictions and brought to DRO custody;
- Continue its detention inspection program;
- Continue modernization efforts of the PBNDS; and
- Refine the inspection program to include bi-annual inspections in accordance with industry practice; and
- Begin the process of exiting the detention line of business at the SPCs.

PPA: Fugitive Operations

	Perm. Pos	FTE	Amount
2010 Actual	677	710	229,281
2011 C.R.	655	655	229,682
2012 Adjustments-to-Base	22	22	(66,962)
2012 Current Services	677	677	162,720
2012 Program Change	-	-	(8,123)
2012 Total Request	677	677	154,597

CURRENT SERVICES PROGRAM DESCRIPTION

The National Fugitive Operations Program (NFOP) is responsible for reducing the fugitive alien population in the United States. At the end of FY 2010, there were 506,332 fugitive aliens on the fugitive backlog. ICE uses several tools to reduce the backlog. The greatest contribution comes from Fugitive Operations Teams (FOT), which consist of:

- One Supervisory Detention and Deportation Officer (SDDO);
- Four Deportation Officers (DO);
- One Immigration Enforcement Agent (IEA); and
- One Deportation and Removal Assistant (DRA).

These teams focus on their core missions: the apprehension and removal of fugitive aliens, aliens who have been removed previously from the United States and return illegally, and criminal or otherwise dangerous aliens living at large in our communities. All of the 104 funded FOTs are operational and conducting enforcement activities across the United States. Presently, each of the 24 DRO Field Offices has at least one operational FOT.

In addition, DRO created the Fugitive Operation Support Center (FOSC) to enhance the efficiency and effectiveness of the NFOP. The FOSC reviews and updates ICE fugitive alien cases in the Enforce Alien Removal Module (EARM), provides comprehensive leads to the FOTs, closes cases as appropriate, and facilitates the overall efforts to arrest fugitives. As a component of the NFOP, the goal established for the FOSC is to assist in the overall decrease of at least five percent to the fugitive backlog each fiscal year.

The FOSC conducts analysis, screening, background checks, and related support activities for the vetting of ICE fugitive aliens. The FOSC then reconciles data from external government and private sources. A significant number of cases are closed as a result of data analysis performed

at the FOOSC, resulting in more focused FOT operations. After analyzing, vetting, and compiling data, actionable information is disseminated to FOTs.

In FY 2012, Fugitive Operations will achieve efficiencies of \$8,123,000. This will be accomplished through contract efficiencies and reductions in travel and overhead expenses.

Key Accomplishments

In FY 2010, Fugitive Operations:

- Arrested 10,370 fugitive criminal aliens and 7,878 non-fugitive criminal aliens;
- Reduced ICE's fugitive case backlog to 506,332 fugitive aliens, a reduction of 5.3 percent from the beginning of the fiscal year;
- Arrested a total of 23,931 fugitive aliens and 11,843 non-fugitive aliens;
- Resolved 76,306 fugitive cases through arrest and administrative measures, assisting in the reduction of the fugitive backlog; and
- Coordinated seven large scale enforcement operations targeting criminal aliens throughout the United States which resulted in the arrest of 2,003 criminal aliens.

In FY 2011 and FY 2012, Fugitive Operations will:

- Continue to conduct targeted fugitive alien operations to reduce the fugitive alien backlog as directed by Congress. Fugitive Operations will continue to target and arrest aliens previously removed from the United States, as well as at-large aliens convicted of crimes. Enforcement activities conducted by the 104 FOTs will primarily target criminal aliens and those found to be a threat to community safety or national security;
- Continue to enhance procedures to process and analyze EARM fugitive data;
- Continue to develop and augment procedures in an effort to analyze the nature and characteristics of the fugitive alien population. This effort will aid in reducing the reported number of fugitives by reconciling the records of those fugitive aliens who have left the country, adjusted their status, immigrated, or were discovered to be incarcerated;
- Work to ensure NFOP can support the Secure Communities Program's targeting criminal aliens and fugitives; and
- Continue to enhance and incorporate technologies such as the analysis of government and commercial databases to prepare leads on fugitive aliens for transmission to the field.

2012 Program Change	-	-	(8,650)
2012 Total Request	1,211	1,211	196,696

CURRENT SERVICES PROGRAM DESCRIPTION

The Criminal Alien Program (CAP) conducts operations to identify and arrest criminal aliens who are incarcerated within federal, state, and local prisons and jails. ICE ensures that all efforts are made to arrest and remove these individuals from the community by securing a final order of removal prior to the termination of their period of imprisonment. The identification and processing of incarcerated criminal aliens, prior to release from jails and prisons, decreases or eliminates the time spent in ICE custody, reducing the overall cost to the U.S. Government. Additionally, the aggressive prosecution of criminal offenders identified by DRO officers is integral to the effective execution of CAP.

ICE, in conjunction with the United States Attorney's Office, actively pursues criminal prosecutions when offenses of the Nation's criminal code and immigration laws are discovered. This further ensures public safety and provides a significant deterrent to recidivism. ICE has also continued deployment of Video Teleconference (VTC) systems to CAP programs throughout the country. These tools further the effectiveness of the Criminal Alien Program.

The 126 ICE CAP teams are each composed of:

- One Supervisory Detention and Deportation Officer (SDDO);
- One Deportation Officer (DOs);
- Six Immigration Enforcement Agents (IEAs); and
- Two Deportation and Removal Assistants (DRAs).

ICE identifies criminal aliens through the following methods. Throughout the United States, state and local correctional departments provide ICE with inmate rosters maintained through independent data systems. ICE works with state and local governments to analyze their data and verify prisoners' identities against ICE immigration databases.

CAP is also supported through the Secure Communities Program to implement interoperability with the law enforcement agencies in order to match biographical data against ICE databases that will help assist in the identification of criminal aliens more efficiently and effectively in federal, state and local facilities.

CAP has expanded its enforcement activities with the Joint Criminal Alien Taskforce (JCART), Violent Criminal Alien Section (VCAS), and the Phoenix Law Enforcement Area Response (LEAR).

The purpose of JCART is to seek, locate and arrest at-large criminal aliens with, but not limited to, convictions for drug trafficking offenses, crimes of violence, and sex offenses. JCART works with other agencies such as, Probation and Parole Offices, the United States Marshal's Service, ICE Office of Investigations (OI), U.S. Customs and Border Protection (CBP), Bureau of Prisons (BOP) and at the request of local law enforcement conducting special operations. JCART may also target criminal aliens at large in the community who have been released from federal, state or local custody.

VCAS screens recidivist criminal aliens encountered through CAP, the National Fugitive Operations Program and the Law Enforcement Agency Response Unit, to deter and reduce future recidivism rates of violent criminal aliens by seeking criminal prosecution. In coordination with the U.S. Attorney's Office, the VCAS works to prioritize federal criminal prosecution of egregious recidivist criminal aliens for felony violations.

LEAR was established on September 4, 2006, in Phoenix, Arizona, to establish a method for state and local law enforcement agencies (LEAs) in Arizona to directly contact and receive response from ICE Detention and Removal Operations (DRO) for all suspected immigration law violators. The LEAR responds to all LEA requests 24 hours a day, 7 days a week. ICE-DRO determines nationality, immigration status and amenability to removal. ICE detainers are placed, transportation is provided as appropriate, and removable aliens are processed by ICE-DRO. Responses are provided to 100 percent of LEA calls received.

In FY 2012, CAP will achieve efficiencies of \$8,650,000. This will be accomplished through contract efficiencies and reduced travel and overhead expenses.

Key Accomplishments

In FY 2010, CAP:

- Continued the deployment of VTC systems to CAP programs throughout the country. In FY 2010 112 VTC units were deployed throughout the country to include 2 Federal, 5 state, and 48 local facilities. Additionally, CAP has installed VTC at 16 DRO offices and 3 Foreign Consulates;
- Worked to increase the level of coverage nationally to achieve 100 percent screening in all identified facilities. This will enhance the mission of pursuing a final order of removal prior to the termination of a person's sentence;

- Increased the number of criminal prosecutions presented to the U.S. Attorney's Office over the FY 2009 total number of indictments (6,848). In FY 2010 CAP achieved 8,233, an increase of 1,385 Indictments;
- Increased the number of convicted criminal aliens removed to 195,772. This was 35,772 higher than the original target of 160,000 for the year; and
- Increased the number of aliens removed convicted of a level 1 offense to 64,466. This was 7,742 above the target of 56,724.

In FY 2011, CAP will:

- Continue to increase efforts to identify, screen and interview criminal aliens incarcerated in federal, state, and local facilities;
- Continue to increase the number of criminal prosecutions of violent recidivist criminal aliens;
- Continue to further the advancement of the Secure Communities plan within the law enforcement community across the United States;
- Develop new advancements and best practices to ensure full screenings of institutional facilities;
- Increase the focus of identification and apprehension of criminal aliens along the Southwest Border;
- Increase the number of convicted criminal aliens removed to 210,000; and
- Increase the number of aliens removed convicted of the most serious crime (level 1 offenders) to 73,500.

In FY 2012, CAP will:

- Continue to increase efforts to identify, screen and interview criminal aliens incarcerated in federal, state, and local facilities, and the additional personnel will help to ensure that these criminals are not released into the community while preparing for immigration proceedings;
- Continue to increase the number of criminal prosecutions of violent recidivist criminal aliens;
- Continue to further the advancement of the Secure Communities plan within the law enforcement community across the United States with a culmination of national deployment anticipated by the end of FY 2013; and
- Increase focus of identification and apprehension of criminal aliens along the Southwest Border.

2012 Adjustments-to-Base	-	-	(4,071)
2012 Current Services	182	182	65,842
2012 Program Change	-	-	6,531
2012 Total Request	182	182	72,373

CURRENT SERVICES PROGRAM DESCRIPTION

The Alternatives to Detention (ATD) program helps to assure that aliens who are not held in detention are compliant with conditions of release, attend immigration hearings, and comply with final decisions and/or removal orders.

Currently, the ATD program consists of two primary components:

- Full-Service (FS) in which contractors provide the equipment and monitoring services along with case management service provisions which include both home and office visits as well as technological options for monitoring; and
- Technology-Assisted (TA) in which the contractor provides the equipment and monitoring services but ICE continues to supervise the alien participants.

As of January 22, 2011, there were 13,583 participants in the FS category and 3,871 participants in the TA category.

ATD eligibility is determined based on public safety and security, flight risks, along with an alien's status within immigration proceedings. Upon FS intake, a participant receives an orientation to the program and is assigned a case specialist. The alien participant is also assessed to ensure basic life needs are met; from that assessment, an individual service plan is created. Identified needs and appropriate referrals are included in the individual service plan. Upon entry into TA monitoring, a participant receives a program overview and reporting requirements as identified by an Officer.

FS programs are currently available in over 30 locations nationwide, for aliens residing within a 50- to 85-mile radius of an ICE office (with the actual range varying by location). TA is available at all ICE locations. Determination of the form of monitoring to which an alien is

assigned depends largely on whether the FS is available where the alien resides and whether a slot is available. If FS is not available or slots are not available, TA may be utilized.

Key Accomplishments

In FY 2010, ATD:

- Combined the previous Enhanced Supervision/Reporting Program and the Intensive Supervision Appearance Program (ISAP) contracts into one contract, ISAP II. Prior to award of the ISAP II contract on November 6, 2009, ATD supervision and monitoring services were provided by two separate contractors. The ISAP II contract provides the field offices with the flexibility of placing participants under either FS or TA electronic monitoring only;
- Exceeded the FY 2010 goal of maintaining a full-service ATD program participation rate at 90 percent of capacity;
- Exceeded goal to reduce the Average Length in Program (ALIP) by five percent among pre-order participants. This performance target has been exceeded and is applicable to the entire ATD population, not just pre-order participants. This is a direct result of improved case and docket management efficiencies. It is anticipated that the EOIR Fast Track Pilot program participants may additionally contribute to further ALIP reductions, specifically among pre-order participants;
- Updated training for officers/staff who manage the ATD Program nationwide;
- Updated ATD policy and procedures through publication of the Alternatives to Detention Handbook. The handbook provides guidance to the field offices on effective and appropriate use of the ATD program by outlining criteria for identifying program participants, managing ATD program cases, and handling program violations and terminations;
- Collaborated with the Executive Office for Immigration Review (EOIR) to implement a “Fast Track” pilot initiative to reduce the length of time participants spend in the ATD program. The pilot program began at the Baltimore and Miami Field Offices on January 25, 2010. As of August 24, 2010, there have been 193 participants enrolled in the Baltimore pilot, and 323 in Miami;
- Had an average cost to supervise removable aliens in the ATD program of \$2,552.00; and
- Exceeded the target for appearance rates for Immigration Hearings for ATD participants by 35.8 percent. The target was 58 percent and the actual FY 2010 rate was 93.8 percent.

In FY 2011 and FY 2012, ATD will:

- Expand the number of participants in the program from 17,000 in FY 2010 to 19,500 in FY 2012;
- Continue to collaborate with the EOIR to implement an initiative to reduce the length of time spent in the ATD program;
- Continue to reduce participant Average Length in Program (ALIP) by continuing to improve case and docket management efficiencies;
- Maintain 100 percent timely invoice approval and payment; maintain prompt payment interest payments at \$0.00;
- Lower the average cost to supervise removable aliens in the Alternatives to Detention Program target from \$2,214 in FY 2011 to \$2,168 in FY 2012.

- Increase the appearance rates for Immigration Hearings for Alternatives to Detention participants target to 94% in FY 2011 and 94.5% in FY 2012.

2012 Program Change	-	-	(10,000)
2012 Total Request	59	59	276,632

CURRENT SERVICES PROGRAM DESCRIPTION

Appropriations to the Transportation and Removal Program (TRP) fund safe and secure transportation of aliens in ICE custody and removals of aliens from the United States, as ordered by an immigration judge.

The Removal Management Division (RMD) is comprised of the Travel Document Unit, Flight Operations Unit, and the Removals Coordination Unit. RMD provides oversight through its three component units to all 24 Field Offices. RMD conducts air transportation and removal planning, and develops and implements strategies to support the removal of all removable aliens. RMD oversees and supports Field Office Directors' execution of air transportation and removal funding. RMD, through these units, ensures the TRP funds are efficiently and effectively used.

Travel Document Unit (TDU) - supports ICE field offices and overseas entities on travel document and removal related issues to ensure the safe and orderly removal of persons from the United States. TDU also has oversight of the electronic Travel Document System (eTD) and conducts liaisons with governmental and Non-Governmental Organizations, over 200 embassies and consulates within the United States, foreign governments, and law enforcement organizations worldwide.

Removal Coordination Unit (RCU) - manages commercial airline removals (CENTIX) and the Detention Operations Coordination Center (DOCC). RCU facilitates:

- Commercial escorted and unescorted removal operations in coordination with DRO Field Offices and Omega Travel Management Center. Services include requesting country clearances via the electronic Country Clearance system (eCC) and sending removal notifications via a secure messaging system (cable), both of which interface with the Department of State.

- The DOCC ensures capacity equilibrium among detention locations. The DOCC identifies available space to meet field office requirements and coordinates available transportation options. The DOCC also provides detention and transportation support for ICE Enforcement Operations.

Flight Operations Unit (FOU) - manages all ICE mass airlift operations. In conducting its mission of transporting aliens with a removal order, the FOU oversees domestic and foreign scheduling of all ICE-managed aircraft based on the operational requirements of the 24 field offices along with coordination with each respective receiving country and ICE Attaché office. The FOU also coordinates the procurement of ICE charters involved with the removal of aliens to Central Asia, the Pacific Rim, Africa, and the Middle East.

Key Accomplishments

In FY 2010, TRP:

- Removed 392,862 aliens;
- Provided Electronic Travel Document (eTD) Program presentations to seven of the top 25 removal countries;
- Employed four ICE charter aircraft operating six days per week to support foreign removals; and
- Used the ICE-chartered aircraft as a long-range platform capable of supporting special removal missions to South America, Eastern Europe, Africa, Middle East and Pacific Rim.

In FY 2011 and FY 2012, TRP will:

- Continue to expand CMU activities;
- Coordinate the movement of over 240,000 aliens through the use of eight large and one medium sized aircraft in both FY 2011 and FY 2012. Accordingly, DRO plans to log 13,000 flight hours or more each year; and
- Provide presentations of the Electronic Travel Document (eTD) program to five additional countries by the end of FY 2011, and an additional five by the end of FY 2012.
- In FY 2012, the Transportation and Removal Program will achieve efficiencies of \$10,000,000. This will be accomplished through contract efficiencies and reductions in overhead expenses.

CURRENT SERVICES PROGRAM DESCRIPTION

ICE estimates that approximately 900,000¹ arrests of aliens for crimes occur every year and that approximately 550,000 criminal aliens convicted of crimes exit law enforcement custody every year. In the past, ICE has not had the capacity to identify, arrest, and remove all of these criminal aliens. ICE estimates that 1.9² million removable criminal aliens are in the United States today; this population of criminal aliens poses a major threat to public safety. A more comprehensive approach to address this threat has become one of the highest priorities of the Secretary of Homeland Security and of Congress.

To meet this threat, Congress created Secure Communities in FY 2008 to establish the nationwide capability to identify all criminal aliens or potential criminal aliens at the time of arrest. To best protect public safety using available resources, ICE prioritizes enforcement actions toward the highest threat criminal aliens among those identified. ICE has committed to taking enforcement action against all identified criminal aliens convicted of an aggravated felony plus as many others as available resources permit. By prioritizing enforcement actions in this manner, ICE will remove the highest threat removable criminal aliens, including all those convicted of aggravated felonies, from the United States before they can exit the criminal justice system to re-enter our Nation's communities.

¹ Secure Communities Criminal Alien Population Projection Analysis (CAPP), Version 1.2 as delivered October 27, 2010. This version of the model has been validated by the CAPP Working Group, but has not been made public. CAPP includes analysis from the following sources: FBI Uniform Crime Report, 2007; Census Bureau American Community Survey, 2008; Bureau of Justice Statistics Felony Defendants in Large Urban Counties, 2006; Federal Justice Statistics Resource Center, 2008.

² Estimate calculation based on data pulled from U.S. Census Bureau, American Community Survey, 2008, <http://www.census.gov/acs/www>, adjusted for ACS undercount of the non-citizen population using the DHS OIS methodology and Bureau of Justice Statistics, Prevalence of Imprisonment in US Population, 1974-2001, 8/2003, <http://www.ojp.usdoj.gov/bjs/pub/pdf/piusp01.pdf>

In order to remove the criminal aliens that pose the greatest threat to the American public from the United States, ICE continues to implement the three SC/CIRCA strategic goals:

- IDENTIFY all criminal aliens;
- REMOVE criminal aliens through prioritized enforcement actions; and
- OPTIMIZE criminal alien enforcement.

Key Accomplishments

In FY 2010, SC/CIRCA:

Goal: *Identify all criminal aliens*

- Deployed biometric identification capability (integration of DOJ and DHS biometric databases) to 570 new jurisdictions for a cumulative total of 658 jurisdictions in 32 states covering approximately 64 percent of the estimated nationwide arrested alien population;
- Processed over 3,300,000 fingerprints submitted through Interoperability, of which over 248,000 resulted in an IDENT match on a potential criminal alien; and
- Established full 24x7 response capabilities for all Interoperability submissions.

Goal: *Remove criminal aliens through prioritized enforcement actions*

- Removed 195,772 criminal aliens, representing a 71 percent increase over FY 2008;
- Prioritized use of detention beds, increasing the percentage of criminal aliens within the total detained population from 48 percent in FY 2009 to 62 percent in FY 2010;
- Reduced criminal alien detention times by 18 percent compared to FY 2008, to approximately 37 days;
- Aggressively prosecuted over 10,200 recidivist criminal aliens in coordination with U.S. Attorney Offices, thus deterring removed criminal aliens from re-entering the country; and
- Through IDENT matches, administratively arrested 30,599 and removed 13,945 criminal aliens convicted of Level 1 offenses (see table that follows).

Goal: *Optimize criminal alien enforcement*

- Completed outreach to all state level identification bureaus and continued outreach to the national local law enforcement community to strengthen information sharing partnerships for identifying and removing criminal aliens; and
- Continued the development of systems to support larger numbers of alien status determinations, improved illegal alien threat prioritization and the more efficient removal of criminal aliens.

Interoperability Performance Measures

	Q1 FY09	Q2 FY09	Q3 FY09	Q4 FY09	Q1 FY10	Q2 FY10	Q3 FY10	Q4 FY10

Non-Criminal Illegal Aliens	67	616	1,197	1,869	1,891	2,260	4,668	5,018

** As of January 7, 2011

In FY 2011 SC/CIRCA appropriations will be used to:

Goal: Identify all criminal aliens

- Continue moving toward nationwide identification and removal of all Level 1 (those convicted of aggravated felonies as defined by the Immigration and Nationality Act) criminal aliens in accordance with the SC/CIRCA strategic plan, program goals and program objectives by extending criminal alien biometric identification capabilities to over 897 additional jurisdictions (1,555 cumulative) covering approximately 80 percent of the estimated nationwide number arrested alien population; and
- Identify approximately 20,000 Level 1 IDENT matches.

Goal: Remove criminal aliens through prioritized enforcement actions

- Detain and remove criminal aliens who are subject to the mandatory detention provisions of the Immigration and Nationality Act (INA) by prioritizing use of finite enforcement resources; and

- Continue presenting criminal aliens who repeatedly re-enter the United States illegally to U.S. Attorney Offices for aggressive prosecution under felony immigration charges.

Goal: *Optimize criminal alien enforcement*

- Continue outreach to the national law enforcement community to strengthen information sharing partnerships for identifying and removing criminal aliens; and
- Continue the development of systems to support larger numbers of alien status determinations, improved illegal alien threat prioritization and the more efficient removal of criminal aliens

In FY 2012, SC/CIRCA will:

Goal: *Identify all criminal aliens and determine their threat level*

- Continue FY 2010 progress toward nationwide identification, apprehension and removal of all Level 1 criminal aliens by operating criminal alien biometric identification capabilities in over 1,594 additional jurisdictions (3,149 cumulative) covering approximately 96 percent of the estimated nationwide arrested alien population;
- Identify approximately 73,000 Level 1 IDENT matches; and
- Transition contractor support for 24x7 Interoperability response capabilities to federal employees.

Goal: *Remove criminal aliens through prioritized enforcement actions*

- Detain and remove all criminal aliens who are subject to the mandatory detention provisions of the Immigration and Nationality Act (INA) by prioritizing use of finite enforcement resources; and
- Continue presenting criminal aliens who repeatedly re-enter the United States illegally to U.S. Attorney Offices for aggressive prosecution under felony immigration charges.

Goal: *Optimize criminal alien enforcement*

- Continue outreach to the national law enforcement community to strengthen information sharing partnerships for identifying and removing criminal aliens; and
- Complete initial operating capability of major systems supporting larger numbers of alien status determinations and improved illegal alien threat prioritization.

Criminal Alien Enforcement Targets	FY10	FY11	FY12
New Jurisdictions Deployed	570	897	1,594
Alien Population Coverage %	64%	80%	96%
Interoperability Submissions	3.3 million	5.9 million	7.5 million
Alien IDENT Matches	248,000	420,000	530,000
Total number of convicted criminal alien removals and returns from all lead sources	195,772	210,000	210,000

SC/CIRCA, in cooperation with Federal, State and local law enforcement agencies, will provide a safeguard to American communities by removing those criminal aliens from the United States that represent the greatest threats to community safety and by deterring their re-entry through aggressive prosecution of recidivists.

Description of Item

Successful acquisition outcomes are the direct result of having the appropriate personnel with the requisite skills managing various aspects of the acquisition process. Between FY 2000 and FY 2008, acquisition spending by civilian agencies increased by 56 percent (in inflation-adjusted dollars). The Department of Homeland Security is working to ensure its major acquisitions are effectively managed to ensure that the Department maximizes the value of every homeland security dollar and that major programs are implemented in the most responsible and efficient manner possible. This includes having disciplined oversight processes and robust acquisition program management teams in place. DHS has assessed the current resident skills against a set of core acquisition management skills: a program manager, a systems engineer, a life cycle logistician, a business/financial manager and a contracting officer's technical representative, and determined that many of our major acquisition programs are deficient in several of these areas.

The President's March 4, 2009, memorandum on Government Contracting required agencies to improve acquisition practices and performance by maximizing competition and value, minimizing risk, and reviewing the ability of the acquisition workforce to develop, manage, and oversee acquisitions appropriately. Subsequent guidance from the Office of Management and Budget, including memorandum M-09-25 *Improving Government Acquisition* issued July 29, 2009, and OFPP's Memorandum of October 27, 2009 *Acquisition Workforce Development Strategic Plan for Civilian Agencies- FY2010-*

2014, provided guidance to agencies to strengthen the acquisition workforce and increase the civilian agency workforce by 5 percent to more effectively manage acquisition performance. These funds will help ensure the future programmatic growth requirements for training, recruitment, and retention activities while helping us to attract and hire qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act.

In support of the administration's emphasis on strengthening the Federal acquisition workforce, ICE requests \$3.591 million to increase its acquisition workforce capacity and capabilities. The increase will mitigate the risks associated with gaps in either capacity or capability of the acquisition workforce and improve its effectiveness. The resources requested for ICE will be used to:

- Fund 27 positions as follows:
 - 13 GS-9/14 Contracting Officers and 11 GS-14/15 Contracting Specialists who will support ICE acquisition efforts in five main areas:
 - Compliance and Removals;
 - Detention Management;
 - Mission Support;
 - Information Technology Services; and
 - Information Technology Commodities
 - 3 GS-14/15 Management & Program Analysts who will handle mission support responsibilities within the following offices:
 - Commercial Services Management;
 - Acquisition Policy;
 - Acquisition Systems; and
 - Suspension and Disbarment
- Increase the capability of the acquisition workforce by investing in training to close identified gaps in such areas as project management, negotiations, requirements development, contract management, and other key topics;
- Increase the effectiveness of the acquisition workforce by investing in improvements to systems that support the contracting function; and
- Conduct an assessment of options for creating systems to maintain comprehensive acquisition workforce data and selecting the appropriate system.

Impact on Performance (Relationship of Increase to Strategic Goals)

The FY 2012 funding request will help ensure:

- The future programmatic growth capacity for training, recruitment, and retention activities while attracting and hiring qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act. These funds allow DHS the ability to train, recruit, and retain at acceptable standards.

- The sustainability and availability of information technology systems and equipment in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

Program Increase	-	-	-	-	-	-	-	-	10,500
Total Request	4	4	23,850	-	-	10,400	-	-	10,500

Description of Item

FY 2012 data center development funding, managed through the DHS Working Capital Fund (WCF), will be used for the continuation of system and application migration to the DHS enterprise data centers (DCs) for central DHS management in FY 2012. This includes: (1) site migration of Division of Immigrant Health Services (DIHS) DCs in Houston & Washington, DC, to DHS DCs and (2) on-going integrated program and engineering support as disaster recovery and site migration.

The ICE FY 2012 data center migration (DCM) funding request of \$10.5 million will provide for the following activities:

Non-Personnel Costs (\$10.5 million):

- Disaster Recovery (DR) (\$2.20 M) – Improve ICE mission critical application DR capabilities; provide for the lease of new DR equipment; installation costs, data migration, and one time engineering costs incurred at the DHS DCs to implement improved DR capability for six mission critical ICE applications; facilitate execution of equipment functionality testing and enterprise-wide DR exercises of ICE IT infrastructure

- Site Migration (\$5.70 M) – Migration of Immigration Health Service Center (IHSC) DCs in Houston & Washington, DC to DHS DCs. IHSC applications included within this initiative will be migrated into the DHS DCs with recovery capability.
- Program and Engineering Support (\$2.60 M) – Provides integrated program and engineering support for FY 2012 initiatives. Also includes additional surge capability for engineering support to maintain daily operational mission capabilities during migration.

Justification

FY 2012 is year three of ICE's DC efforts. DCM efforts in FY 2012 will focus on two key aspects: disaster recovery (DR) and site migration of IHSC data centers. Currently, ICE has no DR capabilities within its data centers. By consolidating into DHS data centers, ICE will be able to lease DR equipment while building up its DR capabilities for six mission-critical applications. Without DR capabilities, the DHS data centers will be prone to security breaches or threats if a data center were to crash or shut down.

In addition to DR, site migration of IHSC data centers will ensure secure and streamlined access to relevant immigration health data. IHSC data center consolidation will shrink ICE's data center footprint by reducing the Houston and Washington, DC data center needs and costs.

Impact on Performance (Relationship of Increase to Strategic Goals)

DCM supports Maturing and Unifying DHS. The DCM project focuses on transition of data center operations from multiple facilities to the new DHS consolidated data centers. The migration of disparate and complex ICE data center infrastructure is necessary to ensure compliance with the DHS enterprise infrastructure program consolidation effort; provide survivability of the data center, a common operating environment, and integrated logistics support processes.

Program Increase	-	-	-	-	-	-	-	-	157,706
Total Request	5,210	5,210	1,771,168	5,131	5,131	1,903,764	5,131	5,131	2,023,827

Description of Item

The requested funding will allow ICE to maintain 33,400 detention beds in FY 2012. As described below, ICE is projecting an average daily bed rate of \$122.00 for FY 2012.

Non-Personnel Costs

\$157.7 million will provide funding to allow ICE to procure 3,542 additional detention beds.

Justification

ICE completed a study of actual FY 2009 costs associated with detention beds and found that the fully burdened bed rate³ had increased by 21 percent between what was budgeted in FY 2007 and actual costs in FY 2009. During that same time, actual healthcare costs doubled from what was budgeted in FY 2007. The detailed study showed that the actual average daily bed rate for FY 2009 was \$115.34 per day instead of the \$99 per day as ICE previously estimated for that year. ICE completed a detailed study of FY 2010 costs and determined the fully burdened rate to be \$116.88.

³ The fully burdened rate includes the cost of beds, healthcare, guard contracts, facility costs, and administrative overhead. This rate excludes payroll.

In addition to conducting the bed cost study, ICE is also evaluating ways to lower the average cost of a bed, while furthering the Administration's goal to reform and improve the detention system, conditions of detention, and the quality and uniformity of detainee medical care. ICE has been working to suspend detention housing activities at facilities that have had unusually high per diem rates. In particular, in FY 2010, ICE suspended detention operations at the Varick Street facility in New York and the Aguadilla facility in San Juan, Puerto Rico, and converted the T. Don Hutto Family Residential Facility in Texas from a family detention center to an adult female facility. ICE is also working on eliminating the detention line of business at its Service Processing Centers. ICE has also been converting contractors to Federal staff where possible. In FY 2010, ICE hired Detention Service Monitors (DSMs) to monitor compliance standards of detention facilities to replace the compliance contract with Management of America, thus, creating a cost savings.

Although ICE cannot control inflation in contract prices and healthcare costs, ICE can negotiate contracts in a more resourceful manner, find efficiencies in Federal staff versus contractors, and continue to study the mix of facility types (i.e. ICE-owned Service Processing Centers versus Inter-Governmental Service Agreements and Contract Detention Facilities) to continue to bring down the costs of bed space. Taking into account these possible actions, ICE has a goal to normalize the average daily bed rate to \$122 per day or less.

Considering current funding in ICE Custody Operations and estimated Breached Bond Detention Fund and Immigration Inspection User Fee funding, ICE estimates the ability to fully fund 33,400 detention beds with the addition of \$157.7 million and realizing efficiencies from other DRO activities.

Performance Impact

ICE has moved to a new model where it prioritizes its resources by focusing on those aliens who pose the greatest risk to public safety and national security. This additional funding will enable ICE to fully fund 33,400 beds. Without adequate funding, ICE will still vigilantly enforce the laws within its enforcement portfolio, at the expense of other priorities. Funding at present levels impedes ICE's capacity to process the projected influx of removable criminal aliens identified through the Secure Communities initiative. ICE continues to identify greater numbers of aliens who have committed serious crimes, and must have the resources to process, detain, and remove them.

Program Increase	-	-	-	-	-	-	-	-	6,531
Total Request	-	-	-	-	-	-	182	182	72,373

Description

The Alternatives to Detention (ATD) program meets a critical need for community supervision of the non-detained alien population. Congress specifically established the program in 2002 as a mechanism to facilitate alien compliance with court hearings and orders while remaining in their communities. Unlike orders of supervision, ATD utilizes technology and often case specialists to actively engage aliens as they move through the immigration process. ATD is a cost-effective alternative to secure detention of aliens in removal proceedings. ATD is integral to ICE’s detention and removal strategies, as a cost-effective alternative for aliens who do not pose a risk to public safety, a flight risk, or are otherwise not suitable for detention at a secure facility. Expanded use of ATD is a key part of ICE’s detention reform efforts, with approximately 17,000 aliens under supervision.

Justification

The requested funding will permit the ATD program to increase the total number of participants enrolled by 2,500, from 17,000 to 19,500.

The additional capacity will give ICE more flexibility to maintain oversight of aliens who pose the lowest risk to public safety and do not meet criteria for continued detention. These aliens can be placed in ATD, which has a proven record of participant compliance and appearance at removal proceedings, as opposed to those aliens being released under the bond, supervision, or recognizance which do not have as high compliance and

appearance rates. The expanded use of ATD directly supports the Administration's detention reform goals to make bed space available for those aliens posing the greatest risks to public safety or national security.

Non-Personnel Costs

\$6.531 million will fund additional 2,500 enrollees to the ATD program.

Impact on Performance (Relationship of Increase to Strategic Goals)

With this capacity increase, ICE would have additional flexibility to prioritize its bed space for aliens who pose the greatest risks to public safety or national security, while maintaining less costly supervision of those aliens who are not detained. ATD assures high court appearance rates for aliens who may be otherwise deemed a risk of flight, while not being a risk to public safety and is a less costly means of providing an intensive level of supervision than custody.

Total Request	552	527	178,264	552	552	200,000	782	667	184,064

Description of Item

In FY 2009, Secure Communities initiated the first IDENT/IAFIS Interoperability (“Interoperability”) activations in local jurisdictions for the purpose of identifying criminal aliens. Through this technology, DHS receives fingerprint submissions submitted to the FBI for individuals who are criminally arrested within activated jurisdictions. These submissions then come to ICE in order to determine alien status of arrested individuals. If ICE determines that an individual is or could become removable from the United States based on their alien status and criminal history, ICE will take enforcement action against identified criminal aliens based upon the alien’s threat level and available ICE enforcement resources.

Activations completed during FY 2012 are projected to create referrals for an estimated 96 percent of arrested aliens nationwide annually, which will require ICE to screen an estimated 7,500,000 submissions. To avoid Interoperability activation delays and confirm identifications of an estimated 199,000 additional criminal aliens during FY 2012 as compared to FY 2010, Secure Communities requests the following:

Personnel Costs (\$33.8 million)

\$33.8 million for 230 front line law enforcement personnel comprised of:

- 23 Supervisory Detention & Deportation Officers (series 1801, grade 13);
- 46 Deportation Officers (series 1801, grade 9/11/12);
- 138 Immigration Enforcement Agents (series 1801, grade 5/7/9); and

- 23 Detention and Removal Assistants (series 1802, grade 5/6/7).

Non-Personnel Costs (\$30.2 million)

- \$4.8 million to continue IT investment in ICE's ACRIME system, which will serve as the integrated user facing system for coordinating nationwide identifications and arrests of criminal aliens across ICE;
- \$5.7 million to continue IT investment in ICE's Automated Threat Prioritization system, which will gather criminal history and related threat information from nationwide law enforcement partners and present that information to ICE officers for determination of alien threat level;
- \$11.7 million to continue IT investment in ICE's Status Determination Support system, which will support determination of alien status based on DHS records, track criminal aliens through the criminal justice system to track convictions and incarceration releases, and assist with identifying criminal aliens arrested prior to Interoperability rollout who are still incarcerated;
- \$2.5 million for increased 24x7 operational coverage to ensure the identification and arrest of high threat criminal aliens at Interoperability Response Centers; and
- \$5.5 million to transport increased number of criminal aliens into ICE custody. In FY 2012, Interoperability activations will be deployed to hundreds of rural jurisdictions where ICE currently has no permanent presence. As a result, greatly increasing the number of criminal aliens referred in these counties through Interoperability requires a significant expansion of ICE's current domestic transportation capabilities.

Justification

To identify all encountered criminal aliens or potential criminal aliens, ICE resources must be used to conclude what if any, enforcement action should be taken by determining: 1) if the arrested alien is or becomes convicted of a crime, 2) if the arrested alien is removable based on alien status, and 3) what relative threat the alien poses to the American public. These determinations require significant increases in manpower and improvements in systems tracking capabilities to complete identifications and to determine the threat posed by arrested aliens for the large increase in Interoperability-generated referrals that ICE will experience in FY 2012. Without sufficient manpower and systems to track incoming referrals, ICE will be challenged to complete determinations for all referrals, leading to the potential for high threat criminal aliens to remain undetected by ICE and remain within our Nation's communities. Further, fewer resources for Secure Communities to adequately follow up on incoming referrals may limit the nationwide rollout of Interoperability, delaying nationwide screening for criminal aliens through Interoperability.

Impact on Performance (Relationship of Increase to Strategic Goals)

The requested resources will enable Secure Communities to build the ICE capacity and capability needed to confirm the identification of 199,000 more criminal aliens through Interoperability in FY 2012 when compared to FY 2010. Without this request, ICE projects a reduced capability in confirming the identity of a projected 9,000 high-threat and 26,000 other criminal aliens for enforcement prioritization. ICE also projects removing over 210,000 criminal aliens in FY 2012 under this request, which is over an 80 percent increase compared to criminal removals made by ICE in FY 2008, the year that the Secure Communities program began. In addition, resources provided through this request will increase the proportion of criminal alien removals comprised of the highest-threat criminal aliens compared to the proportions that can be achieved without satisfaction of this request. Through continued execution of the Secure Communities plan, ICE is making unprecedented progress in protecting the American public from further harm by aliens convicted of crimes.

Criminal Alien Enforcement Targets	FY10	FY11	FY12
New Jurisdictions Deployed	570	897	1,594
Alien Population Coverage %	64%	80%	96%
Interoperability Submissions	3.3 million	5.9 million	7.5 million
Alien IDENT Matches	248,000	420,000	530,000
Total number of convicted criminal alien removals and returns from all lead sources	195,772	210,000	210,000

Prior to FY 2010, ICE deployed Interoperability in 88 jurisdictions. Through FY 2010 ICE deployed Interoperability in 570 jurisdictions and plans deploying Interoperability in 897 jurisdictions in FY 2011 and 1,594 jurisdictions in FY 2012. ICE projects cumulative Interoperability deployment of 3,149 jurisdictions by the end of FY 2012.

Description of Item

ICE HQ Managed IT provides IT services and capabilities to ICE programs and ensures a robust IT environment that enables ICE to carry out its mission. The Atlas program is the framework and groundwork for ICE’s IT systems and capabilities. Atlas IT Infrastructure, one of the four core components of ICE’s Atlas program, is made up of the following:

- Network Services
- Email Services
- Help Desk Services
- Data Center Services
- Desktop Services
- Site Services
- Web Services
- Voice Services
- Wireless Services

In addition to IT Infrastructure, Atlas manages ICE’s Data Center Migration (DCM) initiative. DCM is designed to consolidate all of ICE’s data centers into DHS data centers in order to streamline and secure ICE’s IT operations.

ICE's Atlas program is continuously updated to provide improved IT services so that ICE's mission is carried out in the most efficient and effective manner. The following reductions are a result of these efforts.

Non-Personnel Costs (-\$14.87 M)

- Atlas IT Infrastructure (-\$11.47 M) – efficiencies in the provision of Network Services, Help Desk Services, and Site Services components will be applied within the Atlas IT Infrastructure project.
- Atlas Data Center (-\$3.40 M) – funding reduction will be applied through cost savings from the migration of data centers from DOJ and IHSC to DHS data centers.

Justification

HQ Managed IT will further reduce Atlas IT Infrastructure O&M spending through cost savings within the program. HQ Managed IT will realize cost-savings by:

- Implementing more efficient data exchange and linking tools for Network Services; and
- Reducing costs associated with Help Desk Services and Site Services through in-sourcing and re-competing support contracts.

In addition, the DCM initiative will realize savings by streamlining contracts for maintenance and support of the data centers as well as standardizing IT acquisition. DCM allows ICE to better manage its data centers and derive benefits including improved information-sharing, economies of scale, and enhanced data center security all while reducing ICE's overall data center footprint. DHS and ICE will benefit together as shared responsibilities will reduce workload and allow for improved DCM management and operations.

Impact on Performance (Relationship of Increase to Strategic Goals)

Efficiencies within Atlas IT Infrastructure will allow the Network, Help Desk, and Site Services components to maintain performance levels. Contract savings will be shared so that performance is maintained.

The migration of ICE data center infrastructure will enable ICE to be compliant with the DHS enterprise infrastructure program consolidation effort all while reducing the cost burden. In addition, ICE's data centers will be more secure and will allow for a common operating environment. ICE will strive to continue meeting the requirements set forth through DCM, but some non-critical aspects of DCM may be delayed or prioritized based on the funding reduction.

Department of Homeland Security
U.S. Immigration and Customs Enforcement
Salaries and Expenses
Detention and Removal Operations
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 2: Detention and Removal Efficiencies
PPA: Fugitive Operations, Criminal Alien Program and Transportation and Removal Program
Program Decrease: Positions 0.0, FTE 0.0, Dollars \$(26,773)

Funding Profile

	FY 2010 Actual			FY 2011 C.R.			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	667,198
Program Decrease	-	-	-	-	-	-	-	-	(26,773)
Total Request	-	-	774,012	-	-	714,473	-	-	640,425

Description of Item

Non-Personnel Costs (-\$26.773M)

- **Fugitive Operations (-\$8.123 M)** – In FY 2012, Fugitive Operations will achieve efficiencies of \$8,123,000 through contract efficiencies and reduced travel and overhead costs.
- **Criminal Alien Program (-\$8.650 M)** – In FY 2012, CAP will achieve efficiencies of \$8,650,000 through contract efficiencies and reduced travel and overhead expenses.
- **Transportation and Removal Program (-\$10.00 M)** – In FY 2012, TRP will achieve efficiencies of \$10,000,000 through contract and overhead efficiencies.

Justification

In three specific program areas, DRO will aim to reduce overhead expenses and realize cost savings such as terminating the use of the Justice Prisoner Air Transport System (JPATS), which will see full cost savings in FY 2012. DRO will also aim for efficiencies by moving toward consolidated transportation contracts. CAP will find efficiencies through focusing its resources on actionable cases where the alien is amenable to removal. CAP will optimize staffing at locations where there is a Secure Communities

(SC) deployment, and will find efficiencies where there are duplicate identifications of aliens from SC and CAP resources, as well as consolidating transportation and bed space contracts with SC where practicable. Fugitive Operations will streamline operations to meet targeted reductions by reducing non-essential agent travel, equipment purchases, and by consolidating field office contracts with CAP and SC to maximize buying power and leverage economies of scale.

Impact on Performance (Relationship of Increase to Strategic Goals)

ICE is making an ongoing effort to improve its ability to consolidate and streamline major detention contracts and find efficiencies in enforcement activities. These efficiencies will allow for a \$26.773 million reduction in funding while performing at an optimal level with a streamlined business process.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of immigration and customs laws, detention and removals, and investigations; and purchase and lease of up to 3,790 (2,350 for replacement only) police-type vehicles; \$5,496,847,000, of which not to exceed \$7,500,000 shall be available until expended for conducting special operations under section 3131 of the Customs Enforcement Act of 1986 (19 U.S.C. 2081); of which not to exceed \$15,000 shall be for official reception and representation expenses; of which not to exceed \$2,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security; of which not less than \$305,000 shall be for promotion of public awareness of the child pornography tipline and anti-child exploitation activities; of which not less than \$5,400,000 shall be used to facilitate agreements consistent with section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)); and of which not to exceed \$11,216,000 shall be available to fund or reimburse other Federal agencies for the costs associated with the care, maintenance, and repatriation of smuggled aliens unlawfully present in the United States: Provided, That none of the funds made available under this heading shall be available to compensate any employee for overtime in an annual amount in excess of \$35,000, except that the Secretary, or the designee of the Secretary, may waive that amount as necessary for national security purposes and in cases of immigration emergencies: Provided further, That of the total amount provided, \$15,770,000 shall be for activities in fiscal year 2012 to enforce laws against forced child labor, of which not to exceed \$6,000,000 shall remain available until expended: Provided further, That the Secretary shall prioritize the identification and removal of aliens convicted of a crime by the severity of that crime: Provided further, That of the total amount provided, not less than \$2,724,125,000 is for detention and removal operations, including transportation of unaccompanied minor aliens: Provided further, That of the total amount provided, \$7,300,000 shall remain available until September 30, 2013, for the Visa Security Program: Provided further, That none of the funds provided under this heading may be used to continue a delegation of law enforcement authority authorized under section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)) if the Department of Homeland Security Inspector General determines that the terms of the agreement governing the delegation of authority have been violated: Provided further, That nothing under this heading shall prevent U.S. Immigration and Customs Enforcement from exercising those authorities provided under immigration laws (as defined in section 101(a)(17) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(17))) during priority operations pertaining to aliens convicted of a crime: Provided further, That of the funds made available under this heading, \$3,591,000 shall be for strengthening the capacity and capabilities of the acquisition workforce (as defined by the Office of Federal Procurement Policy Act, as amended (41 U.S.C. 401 et seq.), including the recruitment, hiring, training, and retention of such workforce and information technology in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

Note. — A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111-242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

Explanation of Changes:

ICE requests an increase to the current statutory limit for compensation to informants in order to improve operational abilities. The previously appropriated amount of \$1,000,000 has remained unchanged since 2004. ICE has found that this amount is insufficient for operational requirements, as the funds are utilized prior to the end of each fiscal year.

ICE has included \$3.591 million in its funding request to increase its acquisition workforce capacity and capabilities. The President's March 4, 2009, memorandum on Government Contracting required agencies to improve acquisition practices and performance by maximizing competition and value, minimizing risk, and reviewing the ability of the acquisition workforce to develop, manage, and oversee acquisitions appropriately. Subsequent guidance from the Office of Management and Budget provided guidance to agencies to strengthen the acquisition workforce and increase the civilian agency workforce by 5 percent to more effectively manage acquisition performance. The increase requested by ICE will mitigate the risks associated with gaps in either capacity or capability of the acquisition workforce and improve its effectiveness.

PPA Mission Statement

ICE Management and Administration (M&A) resources provide for top-level agency-wide management in the following areas: the Offices of the Assistant Secretary (OAS), Professional Responsibility (OPR), State, Local and Tribal Coordination (OSLTC), the Chief Diversity Officer, the Chief Financial Officer (OCFO), Acquisition Management, Human Capital, and Freedom of Information Act. The M&A activities include executive and overall leadership direction, strategic planning, policy development, and administrative support for the human, financial, information, and physical resources required to facilitate the operational capabilities of a productive ICE workforce.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.1 Total FTE & personnel compensation	88,205	91,214	111,897	20,683

Permanent Positions includes salaries and benefits in FY 2012.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.3 Other than full-time permanent	2,858	1,803	1,618	(185)

Other than Permanent includes regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.5 Other personnel compensation	9,289	7,733	9,347	1,614

Other Personnel Compensation includes compensation above the basic rates paid directly to civilian employees, such as overtime, holiday pay, night work differential, and hazardous duty pay, supervisory differential, cash incentive awards, and royalties.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
12.1 Benefits	32,352	28,658	31,667	3,009

Benefits include cash payments to other funds for the benefit of Federal civilian employees or direct payments to these employees, including life insurance, health insurance, employee retirement, work injury disabilities or death and professional liability insurance, recruitment, retention, or other incentives, and other allowances and payments.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
21.0 Travel	5,380	5,927	6,670	743

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
22.0 Transportation of things	649	242	852	610

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
23.1 GSA rent	10,340	14,745	13,359	(1,386)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
23.2 Other rent	26	283	324	41

Other Rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
23.3 Communications, utilities, & other misc. charges	4,911	4,074	2,916	(1,158)

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phone (land line).

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
24.0 Printing and reproduction	6	27	25	(2)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.1 Advisory and assistance services	24,778	28,248	12,587	(15,661)

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e., the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.2 Other services	75,018	36,898	17,055	(19,843)

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.3 Purchases of goods & svcs. from gov't accounts	8,065	47,578	5,276	(42,302)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.4 Operation & maintenance of facilities	1,085	241	6,080	5,839

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal Government account.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.5 Research and development contracts	-	-	1,249	1,249

Research and Development includes costs for contracts for the conduct of basic and applied research and development.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.6 Medical care	7	-	-	-

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.7 Operation and maintenance of equipment	6,099	2,544	1,284	(1,260)

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
26.0 Supplies and materials	2,789	3,105	4,574	1,469

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
31.0 Equipment	6,406	5,156	3,423	(1,733)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
32.0 Land & structures	50	-	-	-

Land and Structures includes the costs for land and interests in land; buildings and other structures; roads; additions to buildings; nonstructural (or resource) improvements, such as fences and landscaping; and fixed equipment additions and replacements.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
42.0 Indemnity	103	-	62	62

Indemnity includes insurance claims and benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
43.0 Interest & dividends	12	-	-	-

Interest and Dividends includes payments to creditors for the use of monies loaned, deposited, over-paid, or otherwise made available; distribution of earnings to owners of trust or other funds; and interest payments under lease-purchase contracts for construction of buildings.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
91.0 Unvouchered	68	599	10,295	9,696

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement to informants, which are not subject to detailed vouchering or reporting.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
99.0 Other	-	(2)	(2,718)	(2,716)

Other includes charges that cannot be distributed to any of the object classes listed previously.

PPA Mission Statement

The ICE Office of the Chief Information Officer (OCIO) provides information technology services and products that enable ICE and DHS to meet their mission. The OCIO is committed to providing excellent and efficient service to our customers in order to fulfill their IT needs. In order to meet these goals, the OCIO has developed a number of critical IT initiatives that will help ICE to modernize its IT systems, adapt and conform to modern IT management disciplines, as well as provide IT solutions throughout ICE.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change

PPA Mission Statement

ICE Legal Proceedings (also referred to as the Office of the Principal Legal Advisor or OPLA) provides the legal advice, training, and services required to support the ICE mission while defending the immigration laws of the U. S. in the administrative and federal courts and is the legal representative for ICE. OPLA is the DHS legal component within ICE that is authorized to represent the Government in immigration proceedings that end up in immigration courts.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.1 Total FTE & personnel compensation	118,814	115,828	109,340	(6,488)

Permanent Positions includes salaries and benefits in FY 2012.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.3 Other than full-time permanent	5,644	4,993	4,794	(199)

Other than Permanent includes regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment.

PPA Mission Statement

In the Office of Investigations (OI), our broad Homeland Security mission is to defend the Nation by enforcing trade and immigration laws through investigations that target the people, money, and materials that support terrorist and other criminal activities. We work under that mandate by dividing our investigative effort into three broad investigative

categories: National Security, Financial and Trade, and Smuggling and Public Safety. These three categories represent the general priorities we use to guide our efforts in our daily activities. Each priority can be broken down into many different sub-categories and, in fact, are operationally interrelated in a great many cases.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.1 Total FTE & personnel compensation	662,876	747,866	784,720	36,854

Permanent Positions includes salaries and benefits for 117 new FTE in FY 2012.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.3 Other than full-time permanent	9,432	5,716	6,240	524

Other than Permanent includes regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.5 Other personnel compensation	146,537	78,990	80,684	1,694

Other Personnel Compensation includes compensation above the basic rates paid directly to civilian employees, such as overtime, holiday pay, night work differential, and hazardous duty pay, supervisory differential, cash incentive awards, and royalties.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.8 Special service pay	(2)	-	-	-

Special Services Pay includes payments for personal services that do not represent salaries or wages paid directly to Federal employees and military personnel.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
12.1 Benefits	319,405	320,753	338,359	17,606

Benefits include cash payments to other funds for the benefit of Federal civilian employees or direct payments to these employees, including life insurance, health insurance, employee retirement, work injury disabilities or death and professional liability insurance, recruitment, retention, or other incentives, and other allowances and payments.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
21.0 Travel	36,094	33,844	32,661	(1,183)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
22.0 Transportation of things	2,889	6,389	6,731	342

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change

PPA Mission Statement

Office of International Affairs (OIA) expands the investigative efforts of the Office of Investigations to over 50 foreign locations. OIA represents the international assets of all ICE programs and collaborates with U.S. Citizenship and Immigration Services, U.S. Customs and Border Protection, and other DHS components. OIA liaises with foreign governments and international partners to facilitate the enforcement of U.S. customs and

immigration laws beyond our borders in an effort to interdict criminals and prevent or disrupt criminal activity. OIA also executes the operational mandate of Section 428 of the Homeland Security Act through ICE's Visa Security Program.

Summary Justification and Explanation of Changes

PPA Mission Statement

Office of International Affairs (OIA) expands the investigative efforts of the Office of Investigations to over 50 foreign locations. OIA represents the international assets of all ICE programs and collaborates with U.S. Citizenship and Immigration Services, U.S. Customs and Border Protection, and other DHS components. OIA liaises with foreign governments and international partners to facilitate the enforcement of U.S. customs and immigration laws beyond our borders in an effort to interdict criminals and prevent or disrupt criminal activity. OIA also executes the operational mandate of Section 428 of the Homeland Security Act through ICE's Visa Security Program.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.1 Total FTE & personnel compensation	5,071	6,744	8,155	1,411

Permanent Positions includes salaries and benefits.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.3 Other than full-time permanent	211	2,280	1,342	(938)

Other than Permanent includes regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment.

PPA Mission Statement

The Office of Intelligence focuses on data and information related to the movement of people, money and materials into, within and out of the United States to provide accurate and timely reporting to ICE leadership and field agents in support of enforcement operations. ICE's intelligence functions are managed by a highly trained team of professionals with expertise in data and threat analysis, languages, financial investigations, counterterrorism and a number of other areas. ICE intelligence professionals process information from a variety of sources to provide assessments of

patterns, trends and new developments in a wide range of law enforcement areas. These include the following areas: Terrorism, Human Smuggling and Trafficking, Money Laundering and Financial Crime, Drug Smuggling, Criminal Aliens, Air and Marine Smuggling, Cyber Crimes, Identity Fraud and Document Fraud, and Arms Trafficking.

PPA Mission Statement

Immigration enforcement authorities apprehend potentially removable aliens. In many cases, these aliens must be detained while they go through immigration proceedings and

until they are removed. Often the number of apprehensions exceeds the detention space available and DRO must prioritize which cases will be detained. Custody Operations provides safe, secure, and humane confinement for these aliens. It also ensures that aliens in ICE custody appear for their immigration hearings, and then for their subsequent removal.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.1 Total FTE & personnel compensation	335,646	331,253	367,018	35,765

Permanent Positions includes salaries and benefits in FY 2012.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.3 Other than full-time permanent	3,025	2,055	2,165	110

Other than Permanent includes regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.5 Other personnel compensation	94,878	103,472	109,021	5,549

Other Personnel Compensation includes compensation above the basic rates paid directly to civilian employees, such as overtime, holiday pay, night work differential, and hazardous duty pay, supervisory differential, cash incentive awards, and royalties.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.8 Special service pay	161	382	402	20

Special Services Pay includes payments for personal services that do not represent salaries or wages paid directly to Federal employees and military personnel.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
12.1 Benefits	170,397	173,838	180,161	6,323

Benefits include cash payments to other funds for the benefit of Federal civilian employees or direct payments to these employees, including life insurance, health insurance, employee retirement, work injury disabilities or death and professional liability insurance, recruitment, retention, or other incentives, and other allowances and payments.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
21.0 Travel	7,253	7,069	5,750	(1,319)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
22.0 Transportation of things	1,835	1,844	1,903	59

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
23.1 GSA rent	58,928	57,113	57,535	422

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
23.2 Other rent	2,160	2,199	3,550	1,351

Other Rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
23.3 Communications, utilities, & other misc. charges	24,874	24,511	12,500	(12,011)

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phone (land line).

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
24.0 Printing and reproduction	30	30	31	1

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.1 Advisory and assistance services	28,360	26,506	17,500	(9,006)

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e., the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.2 Other services	82,861	77,510	56,000	(21,510)

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.3 Purchases of goods & svcs. from gov't accounts	3,340	3,844	4,250	406

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.4 Operation & maintenance of facilities	746,384	747,545	1,002,500	254,955

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal Government account.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.6 Medical care	163,520	165,932	172,720	6,788

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.7 Operation and maintenance of equipment	7,970	7,806	2,750	(5,056)

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.8 Subsistence and support of persons	83	86	89	3

Subsistence and Support of Persons includes costs for contractual services with the public or another Federal Government account for the board, lodging, and care of persons, including prisoners.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
26.0 Supplies and materials	28,578	28,874	20,750	(8,124)

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
31.0 Equipment	8,270	7,863	5,750	(2,113)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
32.0 Land & structures	45	45	46	1

Land and Structures includes the costs for land and interests in land; buildings and other structures; roads; additions to buildings; nonstructural (or resource) improvements, such as fences and landscaping; and fixed equipment additions and replacements.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
42.0 Indemnity	1,425	1,391	1,436	45

Indemnity includes insurance claims and benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act

Full Time Equivalents	1,188	942	1,211	269

PPA Mission Statement

The Criminal Alien Program (CAP) ensures that aliens are not released back into the community before they are removed from the United States. Through the CAP, ICE officers interview incarcerated aliens to determine whether they are amenable to immigration proceedings. If a case receives a final order of removal, ICE officers will immediately take that alien into custody upon completion of his or her criminal sentence and then prepare that case for removal

PPA Mission Statement

The Alternatives to Detention program places low-risk aliens under various forms of intensive supervision rather than traditional detention as a cost-effective way to ensure their appearance for an immigration hearing or for removal. This program lowers the risk that aliens will be fugitives.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.1 Total FTE & personnel compensation	11,945	14,032	15,555	1,523

Permanent Positions includes salaries and benefits in FY 2012.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.3 Other than full-time permanent	44	47	49	2

Other than Permanent includes regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change

BUDGET REQUEST AND SUPPORTING INFORMATION

Automation Modernization

I. Appropriation Overview

A – Mission Statement for Automation Modernization

The U.S. Immigration and Customs Enforcement (ICE) Automation Modernization account includes Atlas IT Infrastructure, TECS Modernization, Detention and Removal Operations Modernization (DROM), Atlas Tactical Communications, Modernization of Financial System, ICE Law Enforcement Systems Modernization (LESM), which now includes the TECS Modernization project, and Electronic Health Records (eHR).

The Automation Modernization account allows ICE to improve information sharing with the Department of Homeland Security (DHS) and other partner organizations. These initiatives strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

B – Budget Activities

Atlas

The Atlas program integrates enforcement capability rooted in a “One DHS” vision that includes sharing information, coordinating systems for identifying threats, forging DHS-wide standards, and weaving together networks. To this end, the Atlas program seeks to create and sustain a secure, scalable IT environment that supports ICE law enforcement programs. Prior to 2008, the Atlas Program consisted of eight major projects with 21 subprojects. By January 2009, ten sub-projects were completed. To better align with the DHS IT strategic direction and to allow for more efficient management, the remaining sub-projects were realigned and Atlas was further expanded to include several new IT initiatives. The Atlas program currently consists of three projects with 11 associated subprojects. These projects improve infrastructure, consolidate and standardize IT equipment, improve IT products and services, and increase the security of equipment.

A description of current Atlas projects follows:

- **Atlas IT Infrastructure** – This project was initiated to improve information-sharing across DHS and ICE, strengthen information availability; provide a fully secure IT

environment, improve workforce productivity, and migrate ICE infrastructure to the DHS *One Network*.

- **Tactical Communications (TC)** - This project is designed to modernize mission-critical tactical communications for ICE. This project will replace legacy tactical communications equipment and infrastructure with digital, encrypted, narrowband, Project 25 (P25)-compliant systems. ICE will design, engineer, acquire, integrate, program, install, test, and optimize their tactical wireless communications systems nationwide. Additionally, the TC project will provide infrastructure and subscriber unit training for ICE agents and officers, ensuring users understand how to use the modernized communications systems to support their mission-critical operations.
- **Cyber Security Modernization** – This project will create a robust IT environment in which authentication is rigid. This rigidity greatly increases ICE’s capability to identify threats and respond in an effective manner to those threats. It also increases ICE’s ability to control security assurance and risk management decisions. This increased security control ensures that ICE will better protect its sensitive information, that critical IT resources are available to its workforce when needed, and that information integrity is maintained.

ICE Law Enforcement Systems Modernization

This initiative includes the following projects:

- **TECS Modernization** – This system will modernize the existing TECS functions that are specific to ICE. These include Investigative Case Management (including Bank Secrecy Act data access, Money Laundering reporting and tracking, and Telephone Link analysis), Intelligence Reporting and Dissemination, Management Reporting and Workflow, Security and Oversight, Shared Services, Data Management, and Infrastructure Acquisition and Deployment. TECS modernization is a joint U.S. Customs and Border Protection (CBP) and ICE initiative.
- **Mobile Automated Biometric Identification System (IDENT)** – This project gives ICE agents the ability to identify and process an individual in the field using mobile processing units. Currently, suspected illegal aliens are transported to brick and mortar facilities for fingerprint identification. Mobile IDENT provides near real-time identification of aliens, decreases transportation costs, and increases officer safety by reducing the number of instances of alien transport.
- **ICE Pattern Analysis and Information Collection System (ICEPIC)** – ICEPIC provides the capability to generate statistics, enact geospatial data, and link analysis for criminal and terrorist activities. ICEPIC is also the part of the information sharing initiative that allows the integration of all law enforcement data into a single repository and allows the data to be shareable to Local, State and Federal law enforcement agencies.

- **ICE ACCESS** – This initiative provides the resources to help ICE’s State and local partners in the ICE ACCESS program and will integrate ICE information on gangs with U.S. Department of Justice’s (DOJ) gang database.
- **Law Enforcement Information Sharing System (LEISS)** - ICE is the steward for DHS in the Law Enforcement-Shared Mission Community (LE-SMC) space and is responsible for development, coordination, and support of policies, procedures, and processes that facilitate the mission and the DHS Secretary’s priorities for information sharing.
- **Intelligence Support** – This initiative will fund improvements to ICE’s information technology for its intelligence programs. This includes the migration of Data Analysis and Research for Trade Transparency System (DARTTS) and Cyber Crimes Center (C3) into the enterprise solution. This initiative will fund the maintenance of hardware and software for cyber-crime investigations, the National Child Victim Identification System (NCVIS), e-crimes, overt and covert networks, and an upgrade to the Digital Forensic Lab.
- **International Affairs Modernization** – This initiative will fund the overdue modernization of the tools currently being used to screen visa applicants at consular offices overseas.
- **Forensic Document Lab (FDL)** – This project will fund the expansion of the technology infrastructure for the FDL Automated Document Library System. The FDL provides tools and information to ICE agents performing criminal investigations. The modernization of the FDL will ensure applications and tools are available to the agents and will improve information sharing capabilities. The modernization of the FDL will ensure the systems are incorporated into the enterprise.

DRO Modernization (DROM)

This initiative supports the system upgrades and improvements of Detention and Removal Operations (DRO), as well as supporting the requirements of DHS in providing a secure border. DROM will effect improvements in the areas of real-time dynamic data reporting, detainee management, management of detention beds and tracking detainees, bed-space availability management, and transportation management for detention and removals. Through the system upgrades and improvements, ICE OCIO continues to support DRO with effective, responsive, and accurate computer and control systems that advance the DRO mission.

Electronic Health Records (eHR)

The Immigration Health Services Center (IHSC) serves as the health authority for ICE on all matters related to detainee healthcare. IHSC provides direct patient care at 24 facilities

(housing approximately 50-60 percent of the detainee population) and authorizes managed care services to the remaining ICE detainees housed at over 350 contracted detention facilities without on-site IHSC staff nationwide. The eHR initiative will provide enhanced medical documentation quality across all IHSC and Intergovernmental Service Agreement (IGSA) facilities; faster dissemination and improved exchange of detainee health information; and improved data quality and access to support trend analysis, as well as the identification of national and global public health threats.

Modernization of Financial System

The Modernization of Financial System initiative supports the DHS enterprise-wide initiative of consolidating a number of financial systems. This initiative will support ICE’s transition to the new DHS financial system, assist ICE in achieving and sustaining unqualified financial audit opinions, and performing effective financial management.

ICE Decision Support Program (IDSP)

The ICE Decision Support Program (IDSP) facilitates business and organizational decision-making activities across the ICE enterprise. This project is the sponsor of the ICE Integrated Decision Support (IIDS) System, which provides ICE law enforcement users with information sharing capabilities by addressing information sharing and applications interoperability. IIDS is the program’s vehicle for providing self-service reporting and analysis at users’ fingertips, allowing decision makers to spend less time looking for answers and more time making strategic decisions.

This initiative will assist law enforcement agents and ICE decision makers in collecting and generating data to aid them in their investigative, intelligence, and case management activities.

C – Budget Request Summary

ICE requests \$13,860,000 to continue the modernization of its information technology and systems infrastructure for the following program initiatives:

Information Technology Improvements.....\$13.860M (0 FTE)

- **DRO Modernization (\$4.860M)**: This request will fund the ENFORCE Alien Removal Module (EARM) v4, which will provide data to state and local law enforcement to help identify, process, and detain immigration offenders. In addition, the request will fund the completion of the rollout of the electronic Travel Document system (eTD) to the final target country identified as having the longest travel document processing time and greatest number of removable aliens.

- **Law Enforcement Systems Modernization (\$9.0M)**: This request will fund TECS Modernization, a joint CBP and ICE initiative supporting investigative information sharing that is scheduled for completion in FY 2015.

II. Summary of FY 2012 Budget Estimates by Program/Project Activity (PPA)

¹ The Actuals column includes obligations in FY 2010. The FY 2010 unobligated amounts will be carried forward in FY 2011.

III. Current Services Program Description by PPA

**Department of Homeland Security
U.S. Immigration and Customs Enforcement
Automation Modernization
Program Performance Justification**
(Dollars in Thousands)

PPA: Automation Modernization

	Perm. Pos	FTE	Amount
2010 Actual	36	-	86,018
2011 C.R.	36	36	90,000
2012 Adjustments-to-Base	(36)	(36)	(90,000)
2012 Current Services	-	-	-
2012 Program Change	-	-	13,860
2012 Total Request	-	-	13,860

*In FY 2012, 36 positions and 36 FTE will be transferred to the annual Salaries and Expenses appropriation.

CURRENT SERVICES PROGRAM DESCRIPTION:

FY 2012, the Automation Modernization account requests \$13.860 million. Funding is allocated as follows:

Automation Modernization Project	FY 2012 Funding Request (\$Millions)
ICE Law Enforcement Systems Modernization (including TECS Modernization)	\$9.000
DRO Modernization	\$4.860
Automation Modernization Total FY 2012 Funding	\$13.860

Key Accomplishments

FY 2010

In FY 2010, ICE expanded Automation Modernization activities to include ICE Law Enforcement Systems Modernization (including TECS Modernization) and electronic Health Records (eHR)

Atlas

The Atlas Program continued to improve information-sharing across ICE by strengthening information availability, providing a fully secure IT environment, and improving workforce productivity. Atlas initiatives address infrastructure deficiencies that must be corrected before other Automation Modernization programs can fully deploy planned capabilities.

Accomplishments for FY 2010 include:

- Continued modernizing an additional 290 ICE sites with new file and print servers;
- Integrated two additional data collection systems into the ICE data warehouse;
- Initiated modernization of 30% of local office networks to improve the performance of all networked IT systems, leading to increases in workforce productivity;
- Completed the implementation of the IT access audit log management initiative;
- Implemented vulnerability scanning tools to quickly detect and respond to IT security breaches; and
- Oversaw the migration of ICE IT assets from the Department of Justice to DHS Data Centers.

Law Enforcement Systems Modernization (LESM)

The TECS modernization effort will support the investigative arm of ICE and update a 20-year-old legacy system, giving ICE improved capabilities. These improvements will allow for better case management, money laundering tracking and reporting, telephone analysis, intelligence reporting and dissemination, Bank Secrecy Act data access, and statistical performance reporting. Critical to this project is the fact that the legacy system is part of a larger system maintained by CBP, which is undergoing rapid modernization.

Accomplishments for FY 2010 include:

- **TECS Modernization** – Completed requirements definition phase of the following: Investigative Case Management, Intelligence Reporting and Dissemination, Reporting and Workflow Management, Security and Oversight, Shared Services, Data Management, Infrastructure Acquisition and Deployment.
- **Mobile IDENT** – Developed the Mobile IDENT proto-type booking service and pilot at three Special Agent-In-Charge (SAC) offices for user acceptance and gap analysis.
- **ICEPIC** - Hardware upgrade and migration to the enterprise data center as well as the support of the national rollout to all SAC offices.
- **ICE ACCESS** - Provided requirements gathering with local and state agencies, as well as the U.S. Department of Justice, for gang information sharing and data integration. Delivered a design strategy to plan for the design and development of an integrated solution for FY 2011.
- **Law Enforcement Information Systems Sharing (LEISS)** – Completed development for sharing images and photos within LEISS and continued rollout of LEISS to five additional information sharing partners.
- **Border Enforcement Security Task (BEST) Force Expansion** – Gathered and analyzed the requirements and design for the modernization of BEST information technology.
- **Intelligence Support** – Gathered the requirements and design for moving the Data Analysis & Research for Trade Transparency (DARTT) system into the enterprise environment as well as requirements and design for the modernization of Cyber Crimes Center systems and NCVIS.

- **International Affairs Modernization** – Gathered the requirements and design of the Office of International Affairs (OIA) systems including Parole Case Tracking System (PCTS), Visa Security System (VSP), World Customs Organization Information Sharing (WCO) and Human Resources Dashboard (HRD).
- **Forensic Document Lab** – Gathered the requirements and design for the modernization of the information technology infrastructure as well as moving into the enterprise environment.

DRO Modernization (DROM)

The major goal of DROM is to create an efficient and streamlined process to minimize the length of detention, increase bed utilization efficiency, and increase the removal of aliens ordered removed from the United States. As a result, DROM projects will enable DRO personnel to better manage, track, and report on the movement of illegal aliens through the detention and removal lifecycle.

Accomplishments for FY 2010 include:

- Expanded the Enforce Alien Removal Module (EARM) to include the electronic Travel Documents (eTD), Fugitive Case Management System (FCMS) and Alternatives to Detention Program (ATD);
- Transitioned EARM into Full Operating Capability (FOC) status;
- Deployed BST&T DLT, and Central Reservation System (CRS) Modules to achieve Test status; and
- Continued expanding the eTD system as Memoranda of Understanding (MOUs) are executed for target countries to use eTD for issuing electronic travel documents.

Electronic Health Records (eHR) System

IHSC provides direct patient care at DRO facilities and oversees managed care services for detainees housed in state, local, and contract detention facilities. IHSC was part of the Department of Health and Human Services (HHS) until October 1, 2007, when it was transitioned to ICE DRO. Prior to 2007, IHSC provided health services through an interagency agreement between ICE and HHS.

ICE is currently assessing IHSC IT infrastructure and systems to ensure adherence with DHS IT standards and alignment with mission and program goals.

Accomplishments for FY 2010 include:

- Awarded contracts for design and development of a comprehensive certified eHR system including several subsystems;
- Established an initial planning capability by securing project management office support to manage requirements and expedite documentation;
- Initiated Acquisition Planning and Validation Study to establish the foundation for program execution;
- Developed an eHR program control process to establish comprehensive program management for development, integration and testing environment; and
- Developed and assessed the alignment of the program to the DHS Enterprise Architecture.

Modernization of Financial System

The goal of the Modernization of Financial System project is to ensure compliance with federal financial standards.

Accomplishments for FY 2010 include:

- Procured hardware for the Invoice Management System;
- Procured hardware for the Obligations Document Repository;
- Procured hardware/software for Financial Reporting Repository;
- Conducted Fed Traveler/Core Financial System Interface Enhancements (replace batch with online interface); and
- Established PMO Support for Office of Financial Management (OFM) Modernization.

FY 2011

In FY 2011, ICE will further expand Automation Modernization activities to include the following initiatives: Atlas Cyber Security Modernization; Atlas Tactical Communications; and the ICE Decision Support Program.

Atlas

The Atlas Program will continue to provide integrated sound program management support for the FY11 initiatives, and the ongoing multi-year program activities that were funded in prior years, plan future program activities, and ensure program adherence to cost, schedule, and performance goals. Planned accomplishments for the specific Atlas projects are as follows:

Atlas IT Infrastructure

In FY 2011, the Atlas IT Infrastructure project will continue modernization of field office networks to replace many legacy ICE Local Area Networks (LANs) that do not have sufficient data transmission capabilities and improve the performance of all networked IT systems.

Atlas Tactical Communications

In FY 2011, the Tactical Communications project will acquire P25-compliant tactical communications equipment to modernize tactical communications systems in the fourth region, the Chicago Region (Illinois, Kentucky, Indiana, Missouri, Kansas, and Wisconsin). The modernization in the Chicago Region will include infrastructure and subscriber equipment, as well as system and subscriber training for ICE agents and officers, ensuring they understand how to use the modernized communications systems to support their mission-critical operations.

Atlas Cyber Security Modernization

In FY 2011, the Atlas Cyber Security Modernization project will:

- Improve intelligence fusion capability to give ICE the required intelligence information needed to identify state-sponsored attacks that otherwise may go undetected and to implement cross domain solutions to facilitate information sharing with federal, state, and local partners;
- Continue integrating Single Sign-On (SSO) capability into the ICE enterprise
- Establish the basic Enterprise Operations Center (EOC) facility footprint for the future build out of the Service Desk, the Network Operations Center, Security Operations Center,

National Law Enforcement Communications Center, Law Enforcement Service Center, ICE Reporting and Operations Center and Sensitive Compartmented Information Facility in subsequent years; and

- Provide a Configuration Management Program and Mobile Code Signing capability.

Law Enforcement Systems Modernization (LESM)

Projected accomplishments for FY 2011 include the following project milestones:

- **TECS:** Begin design and development of specific projects from the following: Investigative Case Management, Intelligence Reporting and Dissemination, Reporting and Workflow Management, Security and Oversight, Shared Services, Data Management, Infrastructure Acquisition and Deployment.
- **Mobile IDENT** – Launch a web interface capability. Replace existing technology to include upgrading workstations supporting Mobile IDENT.
- **ICEPIC** – Develop reporting database to include mapping to the TECS Modernization efforts. Enable and expand link analysis, global name resolution, and geospatial capabilities within ICEPIC.
- **ICE ACCESS** – Build upon requirements developed in FY 2010. Integrate infrastructure requirements within ICEPIC.
- **Law Enforcement Information Sharing Service (LEISS)** – Complete development for two factor authentication. Expose law enforcement data to first responders and emergency management teams within ICE and potentially across departments. Continue the rollout to five additional information sharing partners.

DRO Modernization (DROM)

In FY 2011, DROM will:

- Complete deployment of BST&T DLT Modules; and
- Continue development and integration of the BST&T Module TMS;

Electronic Health Records System

In FY 2011, the eHR Program office will design and develop the eHR “Core Capabilities” and deploy the system to the 24 IHSC facilities within two releases (utilizing some FY 2010 funding). Projected accomplishments for FY 2011 include the following project milestones:

- Configure and develop interfaces, complete testing and prototype testing, and initiate deployment of a eHR application to support ICE medical operations at IHSC-staffed detention facilities; and
- Begin deployment of appropriate eHR capability to over 24 IHSC staffed facilities and the 350 Intergovernmental Service Agreements (IGSA) and Contract Detention Facilities (CDF) housing ICE detainees.

Financial System Modernization

Projected FY 2011 accomplishments include:

- Develop system integration plans for ICE's non-core financial systems;
- Prepare detailed test and evaluation scenarios to verify system functionality and determine level of compliance; and
- Perform data cleansing of ICE's current financial systems.

ICE Decision Support Program

Projected accomplishments for FY 2011 include the following project milestones:

- Integrate information from additional enforcement systems into the ICE data warehouse;
- Integrate data from the Law Enforcement Modernization project into the ICE Enterprise Data Warehouse (EDW) and provide reporting capabilities;
- Integrate data from DROM/BST&T modules into the ICE EDW and provide reporting capabilities;
- Develop & Implement Executive Dashboards (SEVIS II & BST&T);
- Continue integration of ICE internal and external data into the ICE EDW; and
- Continue to support Secure Communities initiated application developments by integrating additional data into the ICE EDW.

FY 2012

In FY 2012, ICE Automation Modernization activities will focus on the following initiatives: Law Enforcement Systems Modernization (including TECS Modernization) and DRO Modernization. ICE will transfer the 36 positions and 36 FTE paid for by the Automation appropriation in FY 2011 to the annual Salaries and Expenses appropriation in FY 2012. Additionally, ICE will continue to use its unobligated balances in this account to continue efforts on other ICE IT modernization projects.

LESM - \$9.0M

FY 2012 projected accomplishments include deploying Significant Incident Report / Significant Prospective Enforcement Activity Report (SPEAR) under TECS Modernization.

DROM - \$4.860M

FY 2012 projected accomplishments include the following:

- Deliver final interface support to synchronize remote systems and newly added EARM modules
- Deploy Electronic Travel Documents (eTD) to final target country identified as having longest travel document processing time and greatest number of removals
- Deploy BST&T CRS Module

IV. Justification of Program Changes

**Department of Homeland Security
U.S. Immigration and Customs Enforcement
Automation Modernization
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: DRO Modernization
PPA: Automation Modernization
Program Increase: Positions 0.0, FTE 0.0, Dollars \$4,860

Funding Profile

	FY 2010 Actual			FY 2011 C.R.			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	-
Program Increase	-	-	-	-	-	-	-	-	4,860
Total Request	8	8	20,000	14	14	9,000	-	-	4,860

Description of Item

The Detention and Removal Operations Modernization (DROM) Program was established to oversee the systems upgrades and improvements of DRO's business processes for the detention and removal of illegal aliens from the United States. Specifically, the DROM program is designed to improve real-time reporting, statistics and metrics on detainees through the detention and removals lifecycle; detainee case management and tracking; detainee bed-space availability management; and transportation management.

For FY 2012, ICE requests a DROM enhancement to develop and deploy Enforce Alien Removal Module (EARM) Version 4 as well as issue Electronic Travel Documents (eTD) to one additional target country. EARM and eTD will enable ICE DRO to more efficiently process detainees and improve the removal process of detainees of foreign countries that have eTD issued to them.

Non-Personnel Costs (\$4.860 M)

- ENFORCE Alien Removal Module (EARM) v4 (\$4.00 M) – v4 is a major release to DRO's case management system of record. This will include new capabilities for a web-enabled “Detention Module,” “Alternatives to Detention Module”, a services interface to Executive Office for Immigration Review (EOIR), and a tighter integration with the electronic Travel Document system.
- Electronic Travel Documents (\$.860 M) – provides an automated method of issuing travel documents with foreign consulates and DRO users. Funding will provide DRO the ability to complete the rollout of eTD to the final target country identified as having the longest travel document processing time and greatest number of removable aliens.

Justification

DROM is an integral part in augmenting existing detention and removal case management systems. Within Detention and Removal Operations (DRO), each of the PPAs relies on EARM to meet their respective missions. EARM's ability to provide a framework for integrating all detention and removal programs and interface for internal and external enforcement systems makes it vital to more efficiently process and remove detainees. Enhancing EARM gives ICE the ability to meet mandated goals and achieve performance metrics.

Foreign embassies and consulates are also critical stakeholders of DROM as their cooperation and actions can greatly impact the time and cost of alien detention. They confirm the alien's nationality and must approve travel documents for aliens who are returned to their countries and will increasingly rely upon the eTD system to provide an automated and efficient way of processing travel documents.

Impact on Performance (Relationship of Increase to Strategic Goals)

Funding for this program will enable ICE to support DHS goals by developing real-time dynamic reporting on statistics and metrics for events from apprehension through the detention and removal process, enhancing the ability to monitor and control DRO operations.

Description of Item

The ICE Law Enforcement Systems Modernization initiative includes a number of case management, information sharing, and operational support service projects that will improve ICE law enforcement personnel access to law enforcement information.

The ICE Law Enforcement Systems Modernization investment provides funding of \$9.0 million and is allocated according to the following:

Non-Personnel Costs (\$9.000 Million)

- TECS Modernization (\$9.000 M) – provides for the modernization of the existing TECS functions that are specific to ICE. These include Investigative Case Management, Intelligence Reporting and Dissemination, Bank Secrecy Act data access, Money Laundering reporting and tracking, and Telephone Link analysis. The modernization of the functions will enhance ICE’s ability to share law enforcement information with both federal and non-federal entities. TECS modernization is a joint CBP and ICE initiative. ICE began its modernization effort in FY 2008. ICE must ensure that it is ready to move to the modernized system at the same time as CBP decommissions the existing TECS platform or ICE will shoulder the entire operation and maintenance costs of the legacy TECS platform (estimated to be between \$25 and \$40 million annually).

Justification

The TECS Modernization effort will support the investigative arm of ICE and update a 20-year-old legacy system, giving ICE improved capabilities for case management, money laundering tracking and reporting, telephone analysis, intelligence reporting and dissemination, Bank Secrecy Act data access, information sharing of subject record data, and statistical/performance reporting.

Approval of the LESM initiative will provide ICE with improved interoperability with DHS and other federal law enforcement and homeland security intelligence analysis toolsets; enhanced quality law enforcement information sharing within, and external to DHS; and improved collection of more consistent, timely, and accurate performance information on law enforcement activities and outcomes. It will expand the ability of DHS to collect data using federal standardized data formats and support investigators with a primary source for information sharing within the ISE (Information Sharing Environment) and national Law Enforcement (LE) community.

Impact on Performance (Relationship of Increase to Strategic Goals)

TECS Modernization is the largest project within the Law Enforcement Systems Modernization initiative, and is a joint CBP and ICE initiative that is scheduled for completion in FY 2015. CBP began its modernization effort in FY 2005, while ICE began in FY 2008. If ICE is unable to meet the completion deadline, ICE will incur an operations and maintenance cost for the legacy TECS platform, estimated to cost between \$25-40 million annually. FY 2012 funds will primarily be utilized to modernize those existing TECS functions which are specific to the ICE mission, as well as to deploy other law enforcement systems that support:

- Investigative information sharing;
- Business processes for the ICE Office of the Principal Legal Advisor; and
- Business processes for the ICE Office of International Affairs processes.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

For expenses of immigration and customs enforcement automated systems, \$13,860,000, to remain available until expended.

PPA Mission Statement

In FY 2012, ICE has included two information technology (IT) transformational initiatives in the Automation Modernization program: ICE Law Enforcement Systems Modernization – TECS Modernization and Detention and Removals Operations Modernization (DROM) program. The Automation Modernization program will allow ICE to improve information sharing across the DHS and ICE organizations, strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.1 Total FTE & personnel compensation	-	2,190	-	(2,190)

Permanent Positions includes salaries and benefits for 0 FTEs in FY 2012. The FY 2012 request reflects the anticipated need for this object class.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.3 Other than full-time permanent	-	193	-	(193)

Other than Permanent includes regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment. The FY 2012 request reflects the anticipated need for this object class.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.5 Other personnel compensation	-	14	-	(14)

Other Personnel Compensation includes compensation above the basic rates paid directly to civilian employees, such as overtime, holiday pay, night work differential, and hazardous duty pay, supervisory differential, cash incentive awards, and royalties. The FY 2012 request reflects the anticipated need for this object class.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
12.1 Benefits	-	545	-	(545)

Benefits include cash payments to other funds for the benefit of Federal civilian employees or direct payments to these employees, including life insurance, health insurance, employee retirement, work injury disabilities or death and professional liability insurance, recruitment, retention, or other incentives, and other allowances and payments. The FY 2012 request reflects the aforementioned benefits.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
21.0 Travel	126	42	-	(42)
