BUDGET REQUEST AND SUPPORTING INFORMATION

Construction

I. Appropriation Overview

A – Mission Statement for Construction

ICE maintains 18 ICE-owned and directly leased facilities and provides housing, processing, medical, administrative, and support facilities needed to assist and meet the needs of Detention and Removal Operations (DRO) and other ICE Programs and DHS tenants. The construction account funds are available until expended.

B – Budget Activities

With the Construction account, ICE has the authority to plan, design, and construct housing and processing, medical, administrative, and support facilities to support the detention of aliens, as well as perform repair and alteration of existing structures.

C – Budget Request Summary

ICE uses existing resources to accomplish critical repairs and maintenance. Critical projects include: items that poses a life, health or safety issue or items such as adding additional space in processing, medical, administrative, and support facilities and capital and non-capital improvement projects to replace critical systems that are approaching their maximum life expectancy. The FY 2012 request includes the cancellation of \$16,300,000 from prior-year balances. ICE will manage its responsibilities with remaining balances.

Construction
Program Performance Justification**
(Dollars in Thousands)

PPA: Construction

	Perm. Pos	FTE	Amount
2010 Actual	-	-	18,627
2011 C.R.	-	-	4,818
2012 Current Services	-	-	-
2012 Total Request	-	-	-

U.S. Immigration and Customs Enforcement does not request funding for Construction in FY 2012. In FY 2012, \$16,300,000 in prior-year balances will be cancelled.

CURRENT SERVICES PROGRAM DESCRIPTION:

The ICE Construction Program supports DRO’s national detention program and other ICE Programs including, but not limited to, Homeland Security Investigations (HSI), the Office of Principal Legal Advisors (OPLA), the National Firearms Tactical Training Unit (NFTTU) and others by providing space in its owned and directly leased portfolio. The ICE-owned and directly leased portfolio consists of approximately 1.5 million square feet of space at eighteen (18) sites. The primary tenant is Detention and Removal Operations (DRO), which operates Service Processing Centers (SPCs) and related mission operations at six (6) of the ICE sites. The SPC locations are: Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Miami, Florida, and Los Fresnos, Texas. These facilities accommodate approximately 12 percent of ICE detainees. The other 12 locations are used to support ICE field operations.

The ICE Construction Program provides construction, maintenance, sustainment, and expansion of housing, processing, medical, administrative, and support facilities needed to support the detention of aliens. These projects are part of an ongoing program to meet the growing national demand for detention capacity. ICE continues to address the need for bed space and support facilities required to handle the processing and removal of aliens during immigration proceedings, relative to the total number of potentially removable aliens in the country.

In FY 2010, ICE used carry-forward funding and appropriations of \$4.8 million to perform repairs, alterations, and emergency repairs based on health and safety issues to existing ICE-owned facilities.

In FY 2011, ICE will use carry-forward funding to perform emergency repairs and alterations based on health and safety issues to maintain ICE-owned facilities.

In FY 2012, ICE will continue to monitor prior activity in the Construction account to determine if any recoveries can be made due to lower than anticipated project costs or by deferring projects. In FY 2012, \$16,300,000 in prior-year balances will be cancelled. Remaining and recovered funds will be used for critical repairs to maintain the present level of functionality of the SPCs and other tenant operations, as well as maintain a small emergency buffer in case of anticipated failures to critical mechanical/electrical systems or natural disasters. ICE will manage its responsibilities with remaining balances.

IV. Justification of Program Changes

Not Applicable

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

Of the unobligated balances available under the heading "Construction" appropriated for construction projects in prior year appropriations, \$16,300,000 are hereby permanently cancelled: Provided, That no amounts may be cancelled from amounts that were designated by the Congress as an emergency requirement pursuant to the Concurrent Resolution on the Budget or the Balanced Budget and Emergency Deficit Control Act of 1985, as amended.

Explanation of Changes:

Cancellation of \$16,300,000 in unobligated balances from prior-year appropriations. ICE will manage its responsibilities with remaining balances.

G. Capital Investment and Construction Initiative Listing

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 and other immigration statutes authorize ICE to detain aliens who are charged with immigration violations, have entered the United States illegally, or have been ordered to leave the country. These aliens can be detained while their immigration proceedings are administered, which in turn facilitates their proper and expedient removal from the country.

The ICE Construction Program provides construction, maintenance, sustainment, and expansion of housing, processing, medical, administrative, and support facilities needed to support the detention of aliens. These projects are part of an ongoing capital investment program that is intended to meet the growing national demand for detention capacity. ICE continues to address the need for bed space and support facilities required to handle the processing and removal of aliens during immigration proceedings, relative to the total number of potentially removable aliens in the country.

Facility Repair & Alterations

1. Project Description, Justification, and Scope

Repair and alteration projects are continually identified at existing ICE owned facilities. These projects are not capital construction projects, but maintenance, repair and alteration projects necessary to maintain government owned facilities and ensure they comply with life safety and code requirements in support to tenant activities.

2. Significant Changes

In FY 2012, carryover funds within the no-year Construction account will be used for deferred maintenance, emergency repairs and alterations and approved capital improvements. Only critical repairs will be funded.

3. Project Schedule

	Work Initiated	Work Completed	Physical Start	Physical Complete	Total Estimated Cost (000)	Total Project Cost (000)

Expenditure (actual and planned)	\$5,000	\$18,627	\$4,818	\$0	\$28,445

**5. Cost Estimate Detail and Changes
(Dollars in Thousands)**

	Current Estimate	Previous Estimate
Construction: \$0		
Other costs: \$0		
Project total for FY12: \$0		

6. Method of Performance

All detention projects are currently planned, managed, and monitored by the ICE Chief Financial Officer, Office of Facilities Administration. ICE entered into a MOU with the United States Army Corps of Engineers (USACE) to provide environmental documentation, planning, design, construction, procurement, and project management services.

7. Compliance with Applicable Public Laws, Regulations, Standards, and Executive Orders

The United States Army Corps of Engineers (USACE) is responsible for the compliance with all applicable laws, code compliance, regulations and standards for all ICE projects. The services being provided by USACE are managed and monitored by ICE/OFA.

ICE projects must comply with the following life-safety codes and standards:

- Local building codes or the latest edition of one of the model building codes, and the most current International Building Code (IBC)
- National Fire Protection Association (NFPA) Standard 101 Life Safety Code
- National Electric Code

ICE OFA must also comply with the ICE Detention Design Guidelines (2002 edition), and the ICE Detention Construction Guidelines (2004 edition).

Handicapped accessibility codes and standards apply to ICE facilities as follows:

- Facilities must comply with the Uniform Federal Accessibility Standards, Federal Standard 795
- Facilities must also comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG)

BUDGET REQUEST AND SUPPORTING INFORMATION

Student Exchange and Visitor Program

I. Appropriation Overview

A – Mission Statement for Student Exchange and Visitor Program

The Student and Exchange Visitor Program's (SEVP) mission is to enhance national security by collecting, maintaining, and providing reliable information on foreign students, exchange visitors, and the schools and exchange programs that host them. SEVP is an enforcement tool to assist in keeping our Nation safe while facilitating the participation of students and exchange visitors in the academic programs in the United States.

B – Budget Activities

SEVP administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, and J visa classifications) in the United States. SEVP also provides outreach and training for SEVIS users. SEVIS is used by the Compliance Enforcement Unit (CEU) to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools. The CEU also uses SEVIS to identify schools and exchange visitor programs that are not in compliance with regulatory requirements.

C – Budget Request Summary

ICE requests \$120,000,000, 204 positions, and 204 FTE for SEVP in FY 2012. The requested funds will provide the resources needed to fund base requirements for salaries and benefits and operational expenses.

2012 Total Request	204	204	120,000

U.S. Immigration and Customs Enforcement requests \$120.0 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION

The Student and Exchange Visitor Program (SEVP) works to enhance national security by collecting, maintaining, and providing reliable information on foreign students, exchange visitors, and the schools and exchange programs that host them. SEVP facilitates the participation of students and exchange visitors in the academic programs in the United States and works to ensure that the programs are not used to illegally allow entrance into the country.

SEVP administers the Student and Exchange Visitor Information System (SEVIS). SEVIS collects, maintains and provides information on foreign students, exchange visitors and their dependents on F, M, and J visas while studying in the United States. SEVIS also maintains information on the schools and program sponsors authorized to use SEVIS and host foreign students and exchange visitors. SEVIS assists in the identification of those who are not in compliance with visa rules and immigration law and who may be a threat to national security.

SEVIS is ICE's core technology in this critical homeland security mission. It is the first web-based system that provides real-time, up-to-date information on F, M, and J visa holders. The system can be accessed at any time making it an effective law enforcement tool used by agencies within the Department of Homeland Security, Department of State, and Department of Justice. SEVIS is used by the Compliance Enforcement Unit (CEU) to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools. SEVP and CEU also use SEVIS to identify schools and exchange visitor programs that are not in compliance with regulatory requirements. Information maintained in SEVIS is instrumental in supporting ICE's role in conducting human smuggling investigations that identify and prosecute criminal organizations involved in the transporting and harboring of illegal aliens into the United States.

All prospective students and exchange visitors are required to pay a SEVP processing fee electronically or by check using the Form I-901 (currently fees are \$200 for F and M visa

holders, \$180 for J visa holders, and \$35 for some exchange visitors) prior to seeking a visa at consulates and embassies overseas. This fee, in addition to the fees collected from schools seeking certification to host non-immigrant students, provides the full funding for SEVP, including CEU agents that support enforcement of SEVP policies and regulations. Statutory and regulatory guidance requires SEVP to review its fee structure every two years to ensure that the costs of the services that are provided are fully captured by fees assessed on those receiving the services. The latest fee study was completed in the 2nd Quarter of FY 2010. The study's results show no fee increase will be required for FY 2011- FY 2012. Publication of the report is scheduled for the 2nd Quarter of FY 2011.

Key Accomplishments

In FY 2010, SEVP:

- Continued development of a newly configured SEVIS II system that is based on tracking and monitoring individuals rather than records (SEVIS II will be highly interoperable with all of ICE's stakeholders eliminating critical vulnerabilities);
- Increased outreach to the academic and student communities with SEVP Response Center, a dedicated customer information and queries resolution that handles more than 950 calls monthly;
- Developed and implemented a reorganization plan to establish the management, organization, and grade structure to effectively integrate 88 additional FTE for recertification and field liaison activities;
- Developed and implemented a systematic hiring plan to prioritize hiring new positions and fill existing vacancies;
- Developed recertification process and deployment plan for 23 FTE;
- Developed a revenue contingency plan to monitor fee receipts, project revenue shortfalls, and identify potential savings based on current revenues;
- Completed a fee study for the FY 2011-2012 program fees which ensures long term cash flow and solvency requirements are met and provides long term stability and sustainability of fees;
- Completed the first phase of automated Standard Operating Plans for SEVP;
- Conducted research with the flight community leading toward a comprehensive rewrite of the flight regulation; and
- Deployed the SEVP Automated Management System with major functionality to support recertification.

In FY 2011, SEVP will:

- Complete deferred hiring of 23 FTE to staff recertification positions within SEVP;
- Revise the sections of 8 CFR 214 under SEVP's authority to clarify the specifications for nonimmigrant students (F and M visas) and exchange visitors (J visas), explain the school certification criteria with more detail, incorporates all comments/questions received since the implementation of SEVIS incorporate significant refinements in policy and procedures, supporting the transition to SEVIS II and deletes obsolete provisions and language;
- Complete a fee study and formulate fee rules for FY 2012-2013 program fees with recommendations regarding potential fee adjustments based on revised application volume projections and future program requirements; and
- Continue the development of SEVP Automated Management System.

For FY 2012, SEVP is not seeking additional resources for staffing increases or new initiatives but a fee study is underway to determine the correct fee amounts to fund SEVP activities in FY 2013 – FY 2014. SEVP will continue to work on the existing initiatives and further execute activities and programs newly established in FY2010 and FY 2011. SEVP will complete development of the SEVP Automated Management System moving SEVP to a significantly paperless system. Also, SEVP will continue working on the development of SEVIS II.

Below is a more detailed analysis of the accomplishments and goals for the ongoing compliance enforcement, SEVIS II, recertification and liaison initiatives that were newly established in FY 2009.

Compliance Enforcement: The budget supports expansion of SEVP compliance enforcement efforts that are essential to support ICE and DHS strategic objectives to prevent the unlawful exploitation of our Nation's people and institutions by non-immigrants violating laws within the homeland, and to enforce non-immigrant compliance with our immigration, customs, and criminal laws.

In FY 2010, CEU:

- Analyzed 156,279 SEVP leads in FY 2010, in contrast to 149,114 analyzed in FY 2009. This represents an increase of 5 percent. The CEU also responded to 147 requests for analysis to support major criminal cases. This is 12 percent higher than the 132 requests for analytical support in FY 2009. To support these efforts, approximately \$5.318 million in SEVP funding was spent on CEU analytical and support contracts;
- Initiated 3,943 SEVP investigations in FY 2010, up from 3,488 in FY 2009. This represents an increase of 13 percent from FY 2009 to FY 2010;
- SEVP investigations resulted in 1,207 SEVP-related arrests, up 17 percent from the 1,033 SEVP arrests made in FY 2009;
- Spent \$422,895 in SEVP funding on surveillance, tracking, utility and specialized IT equipment to support major SEVP visa fraud investigative activities by field offices;
- Spent \$310,000 of SEVP funding to support major visa fraud cases investigating criminal exploitations of SEVP; and
- Increased staffing by 21 FTE for a total of 156 FTE.

In FY 2011, CEU will:

- Increase all categories of leads, referrals and arrests. To support these cases, SEVP will purchase specialized equipment for surveillance, tracking, utility and IT resources for compliance cases requiring positive identification of foreign nationals during field encounters including mobile biometric identification equipment;
- Increase major criminal investigative activities involving sensitive national security concerns and major criminal fraud cases through establishing a School Fraud Investigation Program to identify and develop potential school fraud referrals to OI field offices. Key areas where funding will be used include, but are not limited to: analysis, surveillance, undercover operations, collection of evidence, and prosecutions;
- Implement an outreach initiative directed to academic and training institutions that are certified by ICE to enroll foreign students and exchange visitors. The scope of the outreach will be to educate the institution on relevant laws and regulations, and to develop sources of information supporting school and student visa fraud investigations;

- Increase capability to provide higher-level specialized analytical support for SEVP major criminal investigations; and
- Hire 78 FTE for a total of 234 FTE for compliance and enforcement agents.

For FY 2012, the CEU will increase compliance efforts while increasing efficiency, and strengthen existing interagency partnerships to ensure efforts remain focused on emerging national security threat streams. With the full staffing levels planned in FY 2011 the CEU planned accomplishments include:

- Increase all categories of leads, referrals and arrests.
- Increase capability to provide higher-level specialized analytical support for SEVP major criminal investigations.
- Increase case development through analysis, surveillance, undercover operations, collection of evidence, and prosecutions.
- Continue to expand the School Fraud Investigation Program to increase referrals to OI field offices for investigation into sensitive national security concerns and major criminal investigations of school and student visa fraud.
- Continue to develop outreach to academic and training institutions certified by SEVP to increase information sources supporting fraud investigations.

SEVIS II: Fundamental to the attainment of any DHS and ICE strategic objective to detect and deter threats to our homeland through terrorist exploitation of legitimate student entry pathways into the Homeland is SEVP's ability to collect information and track legitimate non-immigrant students and certified schools. This tracking can only be accomplished through the SEVIS system.

The current SEVIS system does not adequately meet the needs of the national security, law enforcement, and educational institution communities, which all rely heavily on SEVIS data and its interoperability. The SEVIS II initiative supports the DHS Strategic Goal of Prevention, Objective 2.2, Enforce Trade and Immigration Laws. It will meet the needs of the intelligence and enforcement communities increasing the ability to track and monitor individuals; integrate seamlessly with other intelligence systems; and provide real-time critical individual-based information. A newly configured and deployed SEVIS II system based on tracking and monitoring individuals rather than records that is highly interoperable with all of our stakeholders will eliminate critical vulnerabilities.

SEVP is reassessing its cost and schedule baselines for the SEVIS II project due to changing system functionality requirements to ensure system compatibility and integration with other existing law enforcement system modernization upgrades currently underway. This rebaselining effort has been briefed to the DHS Acquisition Review Board (ARB), and it is anticipated a revised Acquisition Program Baseline (APB), including a revised schedule and lifecycle cost estimate, will be submitted to the ARB prior to April of 2011. Delivery of SEVIS II is not anticipated before the end of 2012.

In FY 2010, SEVP:

- Increased SEVIS II requirements and project management staff to support the development of SEVIS II;
- Completed a re-write of the SEVIS II Functional Requirements Document;

- Completed the writing of a SEVIS II Vision Document to better define the scope and purpose of SEVIS II ;
- Re-defined the method for SEVIS II requirements gathering to use the OneSpring, LLC iRise, and ICE Enterprise tool; and
- Executed Interface Statement of Intent (ISI) with all SEVIS II interface partners except Customs and Border Protection (CBP) which is awaiting CBP's signature.

In FY 2011, SEVP will:

- Continue the design and development of SEVIS II system that is based on tracking and monitoring individuals rather than records;
- Work with ICE OCIO to re-baseline the SEVIS II Lifecycle Cost Estimate (LCCE) and development and deployment schedule;
- Continue SEVIS II requirements Visualization;
- Begin the implementation of a comprehensive SEVIS II Communications Strategy (micro site, webinars, conferences, etc.);
- Work with U.S. Citizenship and Immigration Services (USCIS) Transformation Program Office to ensure that key components of SEVIS II development, including Account Setup, and critical interfaces to USCIS systems are coordinated and delivered in accordance with the revised SEVIS II development schedule;
- Continue full engagement with academic and program sponsor community to ensure that system performance requirements are met and their interests and requirements are fully incorporated into SEVIS II;
- Continue outreach and partnership with Department of State and other DHS partners with the SEVIS II system; and
- Continue operations and maintenance of SEVIS.

In FY2012, SEVP will continue development activities for SEVIS II in accordance with the re-baselined cost and schedule. SEVP will continue to work closely with key program stakeholders in the academic and program sponsor communities and SEVIS II partners to share information and collaborate on development issues. SEVP will continue to operate and maintain SEVIS to fully meet mission requirements until SEVIS II is fully deployed and operational.

Recertification: The Enhanced Border Security and Visa Entry Reform Act of 2002 mandated that DHS conduct recertification of certified educational institutions every two years. SEVP recertification is a review of an educational institution previously certified to affirm that the educational institutions remains eligible and is complying with regulatory recordkeeping, retention, and reporting requirements. The focus of recertification is past performance coupled with a review to ensure that the educational institution maintains its basic eligibility for initial certification. The process may include an on-site visit or review. Approximately 9,200 educational institutions have been certified by SEVP. As of the end of December 2010, there were 76 schools recertified and 285 schools had successfully submitted a recertification package for a review by SEVP.

In FY 2010, SEVP:

- Completed documentation of recertification standard operating procedures and related job aids;
- Developed the recertification process and deployment plan for 8 FTE for recertification; and

- Successfully deployed recertification at the end of May 2010 with the expectation to recertify 10,000 schools in the next 2 years.

In FY 2011, SEVP will:

- Hire six FTE for recertification in November and December 2010;
- Send 1,152 recertification notices out to petitioners by December 2010;
- Coordinate expanded efforts with the new liaison unit and the already established compliance enforcement unit;
- Integrate SEVP Automated Management System workflow process with the recertification of all SEVP certified schools;
- Coordinate with SEVP's stakeholders to ensure timely and thorough recertification reviews of the results of the first half of the recertification process.

For FY 2012, SEVP will refine and improve work processes to ensure thorough and timely recertification reviews of approximately 5,000 educational institutions.

Liaison: The purpose of the SEVP Liaison initiative is to improve dialog and provide assistance between SEVP and the stakeholder communities it serves. Liaisons will proactively provide training as required, disseminate information on policy changes and conduct follow-up visits with stakeholders as needed. Liaisons will be fully trained in all aspects of the Student and Exchange Visitor Program and will be central to ensuring communication between the program and its stakeholders. Liaisons will undergo a comprehensive training program prior to their assignment so that the program can work toward consistency in its policies and procedures. Through the liaisons, SEVP hopes to see improved data integrity in SEVIS. Liaisons will be co-located in ICE Special Agent In-Charge offices across the United States. They will provide assistance to the more than 9,000 schools approved by SEVP as well as stakeholders. The budget request to fund the hiring and deployment of the liaison representatives will enable SEVP to improve its ability to effectively ensure optimal compliance by the academic community with immigration regulations.

In FY 2010, SEVP:

- Redeveloped and refined Liaison territories structure and resubmitted request for approval of revised territory (SAC/RAC) offices; and
- Developed a virtual office using SharePoint to be used by the Liaison staff.

In FY 2011, SEVP will:

- Hire five FTE to establish a liaison function for SEVP. These positions will include a branch chief, three regional managers, and a knowledge analyst. These individuals will take the basic work developed in all areas of the program to refine the training and develop an implementation plan with an anticipated hiring of 60 liaisons positions in FY 2012.

For FY 2012, the 60 FTEs for this initiative will provide for a fully functioning and robust liaison program that coordinates on a routine basis with other OI, ICE, DHS, and educational institution stakeholders.

PPA Mission Statement

The Student and Exchange Visitor Program (SEVP) administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, J visa classification) in the United States. SEVIS is designed to keep our nation safe while facilitating the participation of students and exchange visitors seeking to study in the United States.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.1 Total FTE & personnel compensation	15,139	24,365	28,451	4,086

Permanent Positions includes salaries and benefits in FY 2012.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.3 Other than full-time permanent	213	-	-	-

Other than Permanent includes regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment. The FY 2012 request reflects the anticipated need for this object class.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
11.5 Other personnel compensation	3,039	7,694	7,746	52

Other Personnel Compensation includes compensation above the basic rates paid directly to civilian employees, such as overtime, holiday pay, night work differential, and hazardous duty pay, supervisory differential, cash incentive awards and royalties. The FY 2012 request includes funds for the aforementioned types of compensation.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
12.1 Benefits	7,065	10,655	11,585	930

Benefits include cash payments to other funds for the benefit of Federal civilian employees or direct payments to these employees, including life insurance, health insurance, employee retirement, work injury disabilities or death and professional liability insurance, recruitment, retention, or other incentives, and other allowances and payments. The FY 2012 request includes funds for the aforementioned benefits.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
21.0 Travel	262	2,461	2,727	266

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request represents the anticipated need for travel expenses.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
22.0 Transportation of things	4	35	65	30

Transportation of Things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. The FY 2012 request reflects the anticipated need for this object class.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
23.1 GSA rent	174	-	-	-

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request reflects the anticipated need for this object class.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
23.3 Communications, utilities, & other misc. charges	86	1,018	1,210	192

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phone (land line). The FY 2012 request reflects the anticipated need for this object class.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.1 Advisory and assistance services	20,556	25,784	22,216	(3,568)

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e., the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request reflects the anticipated need for this object class.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.2 Other services	7,683	4,872	6,328	1,456

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request includes funds for these services.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.3 Purchases of goods & svcs. from gov't accounts	47	7,067	16,733	9,666

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2012 request reflects the anticipated need for this object class.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.6 Medical care	-	116	124	8

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2012 request reflects anticipated medical care needs.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.7 Operation and maintenance of equipment	15,389	30,735	17,265	(13,470)

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2012 request reflects the anticipated need for this object class.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
26.0 Supplies and materials	1,415	1,930	1,986	56

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request reflects anticipated supplies and materials needs.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
31.0 Equipment	1,749	3,268	3,564	296

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2012 request reflects the anticipated need for equipment.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
91.0 Unvouchered	18	-	-	-

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement to informants, which are not subject to detailed vouchering or reporting. The FY 2012 request reflects the anticipated need for this object class.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
99.0 Other	11	-	-	-

Other includes charges that cannot be distributed to any of the object classes listed previously. The FY 2012 request reflects the need for this object class.

BUDGET REQUEST AND SUPPORTING INFORMATION

Breached Bond Detention Fund

I. Appropriation Overview

A – Mission Statement for Breached Bond Detention Fund

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of \$8,000,000 posted under the INA, which are recovered by the Department of Justice, are deposited as offsetting collections into this fund.

B – Budget Activities

Breached Bond Detention Fund – Under this program, amounts deposited into the fund can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in their obligations, and for expenses associated with the detention of criminal and illegal aliens. Funds remain available until expended.

C – Budget Request Summary

For FY 2012, ICE requests \$75,000,000 for new collections and corresponding spending authority. ICE uses this money as part of its overall detention budget and, in FY 2012, this funding will allow ICE to fund an estimated 1,572 detention beds and related costs such as healthcare and compliance oversight.

2012 Current Services	-	-	75,000
2012 Total Request	-	-	75,000

U.S. Immigration and Customs Enforcement requests \$75.0 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond/Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of the first \$8,000,000 are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, are used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

ICE uses these resources to support 1,572 beds and related costs such as healthcare and compliance oversight. A portion of these funds were used to support 13 staff in FY 2010, including bond control specialists, immigration enforcement agents, and administrative personnel. Throughout FY 2011, ICE will work to re-align the positions currently paid for by the Breached Bond Detention Fund. In FY 2012, these positions will be paid for out of annual appropriations from the Salaries and Expenses account.

PPA Mission Statement

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of \$8,000,000 posted under the INA, which are recovered by the Department of Justice, are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
21.0 Travel	9	66	68	2

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request reflects anticipated project travel needs.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
22.0 Transportation of Things	2	-	-	-

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2012 request reflects the anticipated need for transportation of things.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
23.3 Communications, utilities, & other misc. charges	28	374	374	-

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phone (land line). The FY 2012 request reflects the anticipated need for the aforementioned items and services.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.1 Advisory and assistance services	3,695	29	29	-

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e., the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request reflects the anticipated need for the aforementioned services.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.2 Other services	3,330	2,481	2,480	(1)

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request reflects the need for other services.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.4 Operation & maintenance of facilities	52,874	36,004	36,159	155

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal Government account. The FY 2012 request includes funds for the previously mentioned contracts.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.6 Medical care	0	35,651	35,698	47

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2012 request includes funds for medical care.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.7 Operation and maintenance of equipment	1	-	-	-

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2012 request reflects the anticipated need for the aforementioned activities.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
26.0 Supplies and materials	263	70	70	-

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request reflects the anticipated need for supplies and materials.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
31.0 Equipment	11	113	113	-

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2012 request reflects the anticipated need for equipment.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
32.0 Land & structures	0	9	9	-

Land and Structures includes the costs for land and interests in land; buildings and other structures; roads; additions to buildings; nonstructural (or resource) improvements, such as fences and landscaping; and fixed equipment additions and replacements. The FY 2012 request reflects the need for land and structures.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
99.0 Other	-	203	-	(203)

Other includes charges that cannot be distributed to any of the object classes listed previously. The FY 2012 request does not include funds for miscellaneous items.

BUDGET REQUEST AND SUPPORTING INFORMATION

Immigration Inspection User Fees

I. Appropriation Overview

A – Mission Statement for Immigration Inspection User Fees

The ICE Immigration User Fee account is a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry as codified in 8 U.S.C 1103, 1356, section 286, the Immigration and Nationality Act. These fees are used to recover some of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air and sea ports. These ICE operations encompass:

- expanding, operating, and maintaining information systems for nonimmigrant control;
- detecting fraudulent documents used by passengers traveling to the United States;
- investigating crimes relating to admissibility and establishing the government's legal position regarding all detentions;
- representing the government in all legal proceedings involving immigration and admissibility;
- transporting detained aliens who arrive at air and sea ports of entry to immigration legal proceedings;
- providing detention and removal services for inadmissible aliens arriving on commercial aircraft or vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry;
- providing training and technical assistance to commercial airline and vessel personnel regarding detection of fraudulent documents; and
- program oversight and management.

B – Budget Activities

The Immigration Inspection User Fee will fund 1,415 detention beds. The 22 positions funded from this account in FY 2011 will be transferred to the Salaries and Expenses appropriation in FY 2012.

C – Budget Request Summary

ICE requests \$116,869,000 in spending authority for FY 2012. ICE projects approximately a one-half percent increase in fee collections in FY 2012 which is aligned with the U.S. Customs and Border Protection projections for international visitors to the United States and immigration inspection user fee collections.

2012 Total Request	-	-	116,869

U.S. Immigration and Customs Enforcement requests \$116.9 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Immigration User Fee account was established as a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry. These fees are used to recover some of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports. These ICE operations encompass:

- expanding, operating, and maintaining information systems for nonimmigrant control;
- detecting fraudulent documents used by passengers traveling to the United States;
- investigating crimes relating to admissibility and establishing the government’s legal position regarding all detentions;
- representing the government in all legal proceedings involving immigration and admissibility;
- transporting detained aliens who arrive at air and sea ports of entry to immigration legal proceedings;
- providing detention and removal services for inadmissible aliens arriving on commercial aircraft or vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry;
- providing training and technical assistance to commercial airline and vessel personnel regarding detection of fraudulent documents; and
- program oversight and management.

All deposits into the Immigration User Fee account are available until expended.

PPA Mission Statement

The Immigration User Fee account was established as a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry. These fees are used to recover some of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
12.1 Benefits	1	-	-	-

Benefits include cash payments to other funds for the benefit of Federal civilian employees or direct payments to these employees, including life insurance, health insurance, employee retirement, work injury disabilities or death and professional liability insurance, recruitment, retention, or other incentives, and other allowances and payments. The FY 2012 request reflects the need for benefits.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
21.0 Travel	76	199	199	-

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request reflects the need for travel.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
22.0 Transportation of things	11	118	118	-

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2012 request reflects the need for transportation of things.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
23.2 Other rent	-	3	3	-

Other Rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2012 request reflects the need for other rent.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
23.3 Communications, utilities, & other misc. charges	108	96	96	-

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phone (land line). The FY 2012 request reflects the need for communication, utilities, and other miscellaneous charges.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
24.0 Reproduction and Printing	2	-	-	-

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2012 request reflects the need for reproduction and printing.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.1 Advisory and assistance services	1,057	4,873	4,882	9

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e., the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request reflects the anticipated needs for advisory and assistance services.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.2 Other services	10,869	50,849	32,725	(18,124)

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request reflects the anticipated needs for other services.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.3 Purchases of goods & svcs. from gov't accounts	17	20	20	-

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2012 request reflects the need for purchases of goods and services from government accounts.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.4 Operation & maintenance of facilities	58,399	20,255	38,781	18,526

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal Government account. The FY 2012 request reflects the anticipated need for operation and maintenance of facilities.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.6 Medical care	1,158	15,751	15,779	28

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2012 request reflects the need for medical care.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
25.7 Operation and maintenance of equipment	1,206	7,159	7,172	13

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2012 request reflects the anticipated need for operation and maintenance of equipment.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
26.0 Supplies and materials	4,140	11,471	11,491	20

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request reflects the anticipated need for supplies and materials.

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	FY 2011 to FY 2012 Change
31.0 Equipment	14,273	5,593	5,603	10

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2012 request reflects the anticipated need for equipment.

BUDGET REQUEST AND SUPPORTING INFORMATION

Aviation Security

I. Appropriation Overview

A. Mission Statement for Aviation Security:

The Aviation and Transportation Security Act (ATSA), P.L. 107-71, enacted on November 19, 2001, established the Transportation Security Administration (TSA) to protect the transportation system and ensure the freedom of movement for people and commerce. The Aviation Security Appropriation consists of programs whose primary focus is to secure aviation transportation. The path to achieving this mission has evolved in the years since the September 11th attacks. Enhancements in aviation security have included emphasis in explosives detection training and technology, modifications to the prohibited items list, and changes to TSA security screening protocols.

B. Budget Activities:

The Aviation Security appropriation includes two distinct components: (1) Transportation Security Officer (TSO) Operations and Equipment and (2) Aviation Direction and Enforcement.

TSO Operations and Equipment includes the Programs, Projects and Activities (PPAs) that support the pay, training, outfitting, and operating costs for the TSO workforce. Funding is also included for checkpoint support, purchase, installation, and maintenance of screening equipment, to include explosives detection systems (EDS) and explosives trace detection machines (ETD).

Aviation Direction and Enforcement includes activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the Nation's commercial airports. Funding requested under this decision unit supports air cargo and airport/airline regulation compliance through inspections, international programs, and the airport management and direction staff and airport administrative support.

Terrorism in the aviation domain is an enduring and highly adaptive threat. Terrorists study our vulnerabilities to learn how to exploit our procedural and technological security gaps to increase the lethality and political impact of their attacks. Aviation continues to be a target of coordinated terrorist activity. Examples include the attempted attack of Northwest Airlines Flight 253 from Amsterdam to Detroit on Christmas Day in 2009, an alleged terrorist plot to detonate liquid explosives onboard multiple aircraft departing from the United Kingdom for the United States in August 2006, and terrorists' intended attacks on U.S.-bound flights originating from multiple foreign airports in December 2003. This request supports efforts to mitigate the risk to the Aviation domain.

C. Budget Request Summary:

The Transportation Security Administration requests 60,951 positions, 55,284 Full-Time Equivalent (FTE), and \$5,401,165,000 in discretionary appropriated funding. Also included in the appropriation is \$250,000,000 in mandatory fee collections (0 FTP/FTE). The total adjustment-to-base includes an increase of 1,416 positions; 2,406 FTE; and a net increase of

\$87,116,000 in appropriated funding. The program changes include 1,216 positions, 609 FTE, and an increase of \$100,009,000 to:

- Purchase 200 additional Advanced Imaging Technology (AIT) units, as well as provide the staffing to support and operate these machines. (535 positions, 268 FTE, and \$75,801,000)
- Expand the Behavior Detection Officer workforce. (350 positions, 175 FTE and \$18,299,000)
- Provide an additional twelve multi-modal Visible Intermodal Prevention and Response (VIPR) teams. (331 positions, 166 FTE, and \$23,509,000)
- Reduce Screening Technology Maintenance by \$17,600,000

TSA also requests an adjustment to the aviation security passenger fee (0 FTP/0 FTE, \$589,940)

PPA: SCREENER PARTNERSHIP PROGRAM

	Perm Pos	FTE	Amount
FY 2010 Actual	\$153,702
2011 C.R.	139,643
2012 Adjustments-to-Base	4,550
2012 Current Services	144,193
2012 Program Change	0
2012 Request	144,193

The Transportation Security Administration requests \$144.2 million for this activity. This includes an adjustment-to-base of \$4.6 million.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Screener Partnership Program (SPP) was established under Section 108 of the ATSA to permit an airport operator to request screening services through a private screening company. The program was intended as a pilot and was only mandated for two years. The requirement was fulfilled in 2005. There are currently 16 SPP airports. Private screening contractors are to perform equal to or better than federal screening operations under federal oversight following the same operating procedures.

Below is a list of the 16 airports currently participating in the program:

San Francisco International Airport	Roswell Industrial Airport
Kansas City International Airport	Dawson Community Airport
Greater Rochester International Airport	Wokal Field
Jackson Hole Airport	Havre City-County Airport
Tupelo Regional Airport	Lewiston Municipal Airport
Sioux Falls Joe Foss Field Regional Airport	Frank Wiley Field
Key West International Airport	Clayton Airport
Charles Schulz – Sonoma County Airport	Sidney-Richland Regional Airport

Significant accomplishments in FY 2010 included:

- Deployed VIPR teams to SPP airports;
- Evaluated the Quality Assurance Surveillance Plan to ensure the objectivity of the metrics;
- Implemented security requirements in existing contracts as changes were made to Standard Operating Procedures (SOPs) or new security programs were developed.

FY 2011 planned accomplishments include:

- Award five contracts for screening services at eight airports;
- Execute eight contract option years;
- Deploy Advanced Imaging Technology at two airports;
- Implement security requirements in existing contracts as changes are made to SOPs or as new security programs are developed;
- Support the Department of Homeland Security (DHS) Science and Technology (S&T) Directorate as they receive Safety Act Designation and Certification applications; and
- Transition eight airports to new security screening contracts.

In FY 2012, TSA plans to:

- Execute 16 contract option years;
- Continue to implement security requirements in existing contracts as changes are made to SOP or as new security programs are developed;
- Continue to support DHS's S&T Directorate as they receive Safety Act Designation and Certification applications; and,
- Prepare solicitations for eight airports for renewal of screening services.

	Perm Pos	FTE	Amount
FY 2010 Actual	49,468	44,244	\$2,785,447
2011 C.R.	52,871	47,224	2,880,209
2012 Adjustments-to-Base	1,275	2,075	149,958
2012 Current Services	54,146	49,299	3,030,167
2012 Program Change	860	430	30,326
2012 Request	55,006	49,729	3,060,493

TSA requests \$3.1 billion for this activity. This includes an adjustment-to-base of 1,275 FTP/2,075 FTE and \$149.9 million. The program change includes a total increase of 860 FTP/430 FTE and \$30.3 million consisting of an increase of 510 FTP/255 FTE and \$16.1 million for additional TSOs to support the FY 2012 procurement of 200 AIT machines; and 350 FTP/175 FTE and \$14.2 million for Behavior Detection Officers (BDOs).

CURRENT SERVICES PROGRAM DESCRIPTION:

Passenger and baggage screening protects commercial air travelers by detecting and removing dangerous or deadly objects that individuals are attempting to smuggle onto aircraft, either on their person or in their carry-on or checked baggage. The TSA screening process must strike the appropriate balance between preventing security breaches and maintaining the efficient movement of law-abiding passengers through the security checkpoints. After passenger check-in, TSOs use various types of electronic detection and imaging machines, including X-ray machines, explosives trace detection (ETD) equipment, walk-through metal detectors (WTMD), AIT, and hand-held metal detectors. At the checkpoints, TSOs may perform physical searches of carry-on baggage and pat-down searches of airline passengers, crew, and airport employees. This is in conjunction with the use of behavior recognition techniques and the validation of travel documents.

Since 2010, the size of the TSO workforce has increased significantly to facilitate the accelerated deployment of AIT machines. AIT offers a significant increase in detection capabilities for non-metallic threats. The FY 2012 request annualizes positions expected to be hired in FY 2011 and required to operate these machines, and provides additional TSOs to support 200 new AIT machines.

TSO Workforce

ATSA established the employment standards for security screening personnel. Security screening personnel -- both private and federal -- are required to be U.S. citizens; pass a background investigation; and have a high school diploma, a general equivalency diploma, or sufficient experience. They must undergo extensive training and be certified to screen passengers and baggage through the use of detection equipment. The screening workforce is subject to periodic training and testing. Failure to pass any phase of training or a certification examination is grounds for employment termination.

TSOs are just one of the layers of security needed to thwart the threats to the aviation system. TSA has added more specialized security positions with different skill sets such as Travel Document Checkers (TDCs) and BDOs to enhance the level of security provided and to move security beyond the checkpoint environment. TSA has seen the benefits of these new positions in providing a career path for TSOs, which has had a direct impact on reducing attrition and enabling TSA to retain a more tenured TSO workforce.

The TSO budgeted FTE levels are broken down as follows:

TSO Budgeted FTE by Job title ^{1/}

Job title	Band	FY 2008 FTE	FY 2009 FTE	FY 2010 FTE	FY 2011 FTE	FY 2012 FTE
TSOs	D, E	32,180	31,536	29,792	31,636	33,911
Lead/Master ^{2/}	F	5,490	5,490	6,090	6,615	6,615
Supervisory/Expert TSOs ^{2/}	G	4,360	4,360	4,610	4,850	4,850
BDOs	F,G,H,I	2,011	2,860	2,986	2,986	3,161
BAOs	H, I	297	297	352	Realigned to Airport Mgmt	Realigned to Airport Mgmt
Managers	H, I	1,100	1,100	1,100	1,137	1,192
TOTAL		45,438	45,643	44,930	47,224	49,729

^{1/} TSO Workforce is composed of approximately 11,000 PT TSOs and 37,000 FT TSOs (of which over 3,000 are Split Shift Employees).

^{2/} These numbers were adjusted for FY 2010 and FY 2011 to more accurately reflect TSOs outside the entry level/journeyman position.

TSO FTE Allocated to Security Duties

Job Duty	FY 2008 FTE	FY 2009 FTE	FY 2010 FTE	FY 2011 FTE	FY 2012 FTE
TDC	2,001	2,001	2,001	2,001	2,001
ADASP	1,279	1,654	1,654	1,654	1,654
BDOs	2,011	2,860	2,986	2,986	3,161
BAO	297	297	352	Realigned to Airport Mgmt	Realigned to Airport Mgmt
Checkpoint / Other	39,850	38,831	37,937	40,583	42,913
TOTAL	45,438	45,643	44,930	47,224	49,729

^{1/} TSO Workforce is composed of approximately 11,000 PT TSOs and 37,000 FT TSOs (of which over 3,000 are Split Shift Employees).

^{2/} These numbers were adjusted for FY 2010 and FY 2011 to more accurately reflect TSOs outside the entry level/journeyman position. The responsibilities of the TSOs have increased over the years, becoming more specialized with additional technology requirements and additional responsibilities and the number of TSOs in these positions have increased.

Workforce Initiatives

TSA determines and allocates FTE to the airports through the Staffing Allocation Model (SAM). This model is constantly refined to most effectively allocate and manage the TSO workforce. Through the SAM process, TSA has been able to identify operational and efficiency gains made possible through better scheduling, increased use of part-time and split shift employees, technology improvements and improved management practices. These gains have led to the expansion of security initiatives, largely accomplished within existing resources, which have significantly strengthened air transportation security. The workforce initiatives include:

- TDC Program - This program ensures that only passengers with authentic boarding passes can access the sterile areas of airports and board aircraft. Specially trained TSOs, using black lights and magnifying loupes to detect fraudulent documents, are positioned in front of the checkpoint to check passengers' boarding passes and identification. Any passenger identification screening issues are resolved by the Identity Verification Coordination Center.
- Screening of Passengers by Observation Techniques (SPOT) – This essential behavior recognition and analysis program adds an important layer of security in all areas of an airport. It provides a non-intrusive means of identifying potentially high-risk individuals who exhibit behaviors that deviate from an established environmental baseline (indicative of stress, fear and deception), which could possibly reflect intentions of terrorism and/or criminal activity. SPOT looks at involuntary physical and physiological reactions. In FY 2010, SPOT's BDOs were evaluated under the Performance and Accountability Standards System (PASS) program and required to successfully qualify on technical proficiency assessments germane to their screening functions. This included job knowledge tests, practical skills evaluation, and a proficiency checklist.

- VIPR teams – These teams consist of TSOs, BDOs, Transportation Security Inspectors, Transportation Security Specialist - Explosives and Federal Air Marshals. Their duty is to screen passengers, look for suspicious behavior and act as a visible deterrent in multiple transportation sectors, including general aviation, buses, and mass-transit. New technology, including the use of mobile radiological screening equipment, has expanded the reach and capability of TSA’s VIPR teams.
- Playbook/Aviation Direct Access Screening Program (ADASP) – The objective of Playbook/ADASP is to establish uniform procedures and standards for TSOs to screen individuals, their accessible property, vehicles upon entering a direct access point screening location, and conduct visual inspections of aircraft.

Playbook is designed as a comprehensive, flexible deployment system of countermeasures that are coordinated at the local airport level in order to respond quickly to emergency conditions or hostile acts. It’s supported through local decision-making between the Airport Operator and the Federal Security Director (FSD). Playbook involves working collaboratively with stakeholders and coordinating the assets of TSA, local law enforcement, and other Department of Homeland Security (DHS) agencies to improve an airport’s overall security posture. ADASP is an enhanced layer of security in response to a possible threat posed by airport and aircraft operator employees or other individuals and vehicles entering or present within a Security Identification Display Area (SIDA), Air Operations Area (AOA), secured, or sterile area. In FY 2010, ADASP was integrated into Playbook.

- Performance Accountability and Standards System (PASS) – TSA’s innovative pay-for-performance system has been rewarding high performing TSOs for over five years. The objective rating system has been refined and the system overall has become more successful as employees become familiar with expectations and scoring techniques. PASS grants TSOs the opportunity to earn a pay raise every year, in addition to the federal cost of living adjustment, if applicable. PASS serves as an effective motivator for the workforce and represents the cutting edge of government pay-for-performance systems.
- The Aviation Screening Assessment Program (ASAP) – This program measures TSO screening performance using realistic and standardized assessment scenarios. The primary purpose of ASAP is to provide statistical data to determine reasons for failure within the checkpoint and checked baggage screening process. ASAP test results provide critical information to TSA leadership that helps with the improvement of aviation security and the identification of vulnerabilities across screening operations. Each ASAP cycle is six-months long with the number of assessments required per cycle based on the factors to be evaluated.

Career Progression Program

This program enables widespread career growth and professional development opportunities for high-performing TSOs, while reducing attrition. The career progression structure allows TSA to distinguish and retain the more experienced and top performing TSOs. Test results show a positive correlation between longevity and performance, including detection ability, screening efficiency and customer service. As threats evolve and increase in complexity, the advanced skills of the TSA workforce are necessary to stay ahead of terrorist capabilities.

Program benefits include:

- Providing for the promotions of TSOs to E Band, a TSO compensation scale above the existing entry-level D Band. TSOs are eligible based on a minimum of two years experience, specific level of performance and additional training/duties.
- Increasing opportunities whereby TSOs can advance into specialized technical career tracks. For example, a Master or Expert TSO can further specialize their skill-sets by advancing into a position as a BDO. Additionally, Security Training Instructors (STIs) and Coordination Center Officers (CCOs) are specialized TSO tracks which are compensated at a higher band. STIs perform training instruction based on national and local training programs. CCOs monitor and disseminate information provided to the coordination center, respond to critical incidents, and provide direct operational support to the passenger/baggage screening function.
- Deploying new training to TSOs to increase their abilities and skill sets, and to enhance TSOs' security expertise.
- In FY 2009 and FY 2010, TSA achieved record low attrition rates, allowing TSA to continue progression to a more experienced workforce. The chart below indicates the historical trend of decreasing attrition rates; TSA expects a continual downward trend for the rest of FY 2010 and FY 2011.

Historical Attrition Rates:

Attrition Type	Work Schedule	FY04	FY05	FY06	FY07	FY08	FY09	FY10
Voluntary	Full-Time ONLY	13.6%	13.4%	12.6%	11.6%	10.8%	5.3%	4.2%
Voluntary	Part-Time ONLY	57.8%	44.1%	38.6%	37.4%	31.8%	15.5%	12.9%
Voluntary	TOTAL	18.0%	17.4%	16.5%	17.4%	15.8%	7.7%	6.2%

Workers' Compensation

TSA continues to aggressively reduce U.S. Department of Labor Office of Workers' Compensation Program costs through strategies of prevention, education, case management, and nurse intervention. TSA field operations are required to develop a local safety program targeted at inspections, hazard recognition and analysis, hazard abatement, and injury documentation. TSA's Office of Occupational Safety, Health and Environment (OSHE) provides field support to the nation's airports to develop their safety programs. OSHE provides, through the Online Learning Center, 11 safety courses aimed at injury prevention. The national nurse case management program has successfully assisted TSOs in returning to employment in a shorter time. The Periodic Roll Initiative, established in April 2007 is a joint effort with the Nurse Case Management team where all of the long-term disability (Periodic Roll) cases are examined for opportunities to return employees to work when medically feasible.

The President's Safety, Health, and Return to Employment Initiative requires Federal agencies to reduce the Total Case Rate and Lost Time Case Rate by three percent each fiscal year. As noted in the chart below, TSA has exceeded its goal of reducing the number of TSO injuries and illnesses, and in FY 2012, TSA will seek to continue the trend of reducing

numbers of TSO injuries and illnesses. In addition, TSA's Workers' Compensation has decreased by over \$15 million from FY 2006 to FY 2010.

	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	Percent Change FY 2005 - FY 2010
Total Case Rate (TCR)	22.89	36.27	29.06	16.46	13.93	10.15	7.55	7.16	-75.36%
Lost Time Case Rate (LTCR)	--	--	12.89	8.94	7.19	5.14	3.53	3.37	-73.86%

On November 12, 2010, the Federal Labor Relations Authority (FLRA), an independent Federal agency, issued a decision directing an election among TSOs to determine whether or not they want to be represented by one of two unions for purposes other than collective bargaining. The FLRA plans to conduct this election this spring and would subsequently initiate proceedings to resolve any objections or challenges to the election that may be filed. Should a union win a majority of the votes cast and the FLRA ultimately certify that the election was valid, a modest amount of funds from this PPA will be necessary to engage and support implementation with the selected union on a limited basis.

Significant accomplishments in FY 2010 included:

- Staffed the rapid deployment of AIT machines;
- Screened more than 628 million people and more than 425 million checked bags;
- Prevented passengers from bringing onto planes more than 860 firearms; and
- Executed 6,600 ASAP assessments at airports.

FY 2011 planned accomplishments include:

- Continue the deployment of AIT machines to double the number by the end of the calendar year;
- Expand use of Credential Authentication Technology/Boarding Pass Scanning System (CAT/BPSS) devices at TDC stations; and
- Maintain the annual level of 6,600 ASAP airport assessments.

In FY 2012, TSA will continue staffing new and existing AIT machines and explore ways to gain efficiencies through AIT and TDC staffing. TSA will strive to maintain the successful trend of reducing attrition year over year to new all-time lows. TSA will search for ways to expand and enhance Behavior Detection techniques and continue to deploy CAT/BPSS devices to TDC stations and complete over 6,600 ASAP assessments at airports.

PPA: SCREENING TRAINING AND OTHER

	Perm Pos	FTE	Amount
FY 2010 Actual	56	56	\$208,684
2011 C.R.	56	55	238,693
2012 Adjustments-to-Base	(8)	(8)	6472
2012 Current Services	48	47	245,165
2012 Program Change	7,361
2012 Request	48	47	252,526

TSA requests \$252.5 million for this activity. This includes an adjustment-to-base of (8) FTP/FTE and \$6.5 million. The program change includes an increase of \$7.4 million to support training, consumables and other associated costs for the additional AIT machines and 350 new BDOs.

CURRENT SERVICES PROGRAM DESCRIPTION:

This activity provides the resources to support new and recurring training requirements for the Transportation Security Officer (TSO) workforce, as well as other direct costs associated with screening operations.

The following table provides the components of this PPA.

(dollars in millions)

	FY 2011 C.R.	FY 2012
TSO Training	\$121.7	\$123.8
Screener Consumables, Uniforms, and Other	\$79.9	\$91.8
National Deployment Office	\$25.0	\$24.9
Environmental Programs	\$12.1	\$12.0
Total	\$238.7	\$252.5

Transportation Security Officer (TSO) Training: \$123.8 million: Given the ever changing threats that face the aviation domain, screener training is constantly evolving. TSO training is comprised of a compendium of courses that includes basic training for initial hires, on-the-job training, lead and supervisor technical training, recurrent training, advanced technical skills training, remedial training, and return-to-duty training. All new hires receive a combination of instructor-led, hands-on, and web-based training. Recurrent and specialized

training courses are provided by either classroom instruction or the TSA Online Learning Center.

TSA uses a measurement and evaluation process to ensure training programs meet established objectives and standards. Training effectiveness is assessed using a four-level model measuring trainee reaction, learning, behavior, and results. TSA also conducts assessments to ensure a high level of instructional quality is maintained.

Training under this PPA includes:

- New Hire Training Program (NHTP): The bulk of the security training funding provides for classroom instruction on checkpoint procedures and strategy, including travel document checking and the tenants of checkpoint evolution. NHTP provides web-based training, 40 hours of instructor-led training and hands-on equipment-specific labs at the home/hub airport. The checked baggage screening procedures module includes on-screen-resolution protocol training for all new hires depending upon the equipment in place at their duty location. TSA develops and delivers training in support of emerging technologies, such as AIT, into the mainstream passenger screening process.
- Recurrent Training: All TSOs are required to undergo recurrent security training to ensure they maintain proficiency of skills learned during basic training. Additionally, the recurrent courses are designed to keep the workforce up-to-date with procedural changes; new technologies introduced into the screening operations, such as AIT; equipment used by the TSOs in the performance of their duties; and new threat items. This training is often delivered on a weekly basis and targets the TSOs' individual training needs. Recurrent training courses are also required for BDOs and TDCs.
- Supervisor Technical Training Course: The technical and leadership competence of Supervisory Transportation Security Officers (STSOs) and Lead TSOs (LTSOs) is a critical component of workforce effectiveness and retention. TSA developed and deployed a course to strengthen STSOs' technical and general supervisory skills and to provide tools needed to successfully manage the daily responsibilities and challenges faced at the checkpoint and/or checked baggage screening locations. TSA conducts additional STSO Train-the-Trainer courses to enable airports to provide ongoing training to their STSOs and LTSOs at their home airports.
- Leadership Training: This training supports the requirements of 5 CFR 412.202 Systematic Training and Development of Supervisors, Manager, and Executives. Leadership training programs have been developed and are deployed for different levels of TSOs. All leadership training programs cover topic areas such as communications skills, managing employee performance, coaching and mentoring, and team building. Examples of such programs are:
 - The Real Time Leadership Skills program - a new course of study designed for approximately 13,000 team leads that include LTSOs, Expert Behavior Detection Officers, and Security Training Instructors (STIs).
 - Foundations of Leadership program - basic leadership training for the 5,000 STSOs.

Additional initiatives are underway to provide additional training in basic employee relations, supervisory responsibilities in managing safety, and diversity training.

In FY 2010, TSA piloted an Associates Program at selected CAT X and I airports and more than 3,000 TSO employees participated. The Associates Program provides for re-skilling the workforce and providing cutting-edge professional training and development that is critical for the TSOs to fully accomplish the TSA mission and fulfill its vision. It also provides for career development and supports overall retention efforts. In FY 2012, this program will roll out to the entire TSO workforce, primarily through long distance learning, to CAT II, III, and IV airports.

TSA continues to use the latest cutting edge technologies to provide sophisticated scenario-based training on known and emerging threats. TSA employs a variety of automated training and testing tools to enhance TSO skills, including simulated computer based courses and training videos. Training supports the evaluation and deployment of emerging technology training/aids and tools for passenger, carry-on, and checked baggage screening. Some of these emerging technologies include AIT, Advanced Technology (AT), X-Ray, Bottled Liquid Scanners (BLS), Stand-Off Detection (SOD), and Auto Explosives Detection Systems (Auto-EDS).

Performance Reviews:

All TSOs, Lead TSOs, STIs, and STSOs must participate in an Annual Proficiency Review to ensure that they meet all of the qualifications and performance standards required to perform their duties as required by ATSA. TSOs will continue to be certified annually based on overall performance as defined by the PASS. In 2010, PASS Technical Proficiency testing focused on image recognition, proper screening techniques, and the ability to identify, detect, and locate prohibited items. Technical proficiency is measured in the following ways:

- Measuring Image Proficiency – One image quiz per year administered using the X-ray simulation;
- Measuring Practical Skills – A series of Practical Skills Evaluations, including the detection of prohibited items, of all TSOs every year; and
- Measuring On-Screen Alarm Resolution Protocol (OSARP) Proficiency – One OSARP quiz per year administered using the Employee Assessment Management System software.

Practical skills evaluations are also conducted on the TSO workforce by STIs. Over 40,000 TSOs were successfully recertified using an end-to-end paperless evaluation and reporting system. The evaluation criteria has been restructured into a more focused results-based measure centered on a TSO's ability to find prohibited/threat items. TSA also created more realistic object recognition assessments to accommodate for the evolving technology deployed at airports.

Significant accomplishments in FY 2010 included:

- Designed, developed, and delivered a training event to support the changes implemented by TSA to adopt the new pat down procedures. Held instructor led classroom training sessions for over 600 TSA STIs, who then trained over 43,000 officers, supervisors, and leads to ensure a consistent understanding of the changes and to allow for the proficiency demonstrations required of each training participant;

- Designed, developed, and delivered technical training to approximately 10,000 TSOs to support the deployment of over 250 AITs;
- Designed, developed, and delivered technical training to support the deployment of Auto EDS; and
- Launched simulation software for use during image analysis training for both AIT and checkpoint advanced technology (AT) x-ray systems.

FY 2011 planned accomplishments include:

- Continue to design, develop, and launch training courses/materials to support new technology deployments. This includes AIT, reduced-size EDS for use at checkpoints, shoe and bottled liquid scanners, and checkpoint AT X-ray;
- Explore the use of digital video recording tools to upload TSO real-life performance at the checkpoint into an electronic and automated evaluation system to capture demonstrations of proficiency;
- Launch a national standardized on the job training (OJT) instructor program, which will provide specialized training to OJT instructors for the purposes of building effective coaching and mentoring skills; and
- Develop and launch a verbal communications training program for TSOs to build skills that will help them better understand passenger behavior and diffuse disruptive reactions to the screening process.

In FY 2012, TSA will continue to ensure that the training provided to screeners encompasses known and emerging threats. TSA will redesign an imaging simulator that will provide the capability to simulate checkpoint imaging technologies for the purposes of training and certifying TSOs. In addition, TSA plans to develop and implement an updated training curriculum for STIs and Supervisory TSOs enhancing technical and coaching skills.

Supplies/Uniforms/and Other: \$91.8 million: Consumable supplies are critical materials used by TSOs to ensure effective screening of passengers, carry-on, and checked baggage. These consumable supplies include disposable gloves, sample swabs/wands, reactant materials, label seals to identify bags inspected by TSOs, and baggage inserts, which both notify passengers that their bag has been inspected and provide contact information in the event of a problem. In addition, TSA provides uniforms to new hires as well as provides replacement uniforms to all TSOs through the annual allowance program.

National Deployment Office (NDO): \$24.9 million: The NDO provides additional TSOs and BDOs to FSDs for screening support during crisis response and recovery operations, seasonal demands, special events or other activities that require higher-than-normal security related staffing levels. Each request for NDO support is analyzed from a cost/benefit/risk perspective to ensure the optimal use of limited resources is achieved. The NDOs responsibilities include deploying TSOs, TSIs, and BDOs in support of VIPR Teams. For disaster response operations, the NDO is responsible for deploying 12 Transportation Security Advance Teams, which include 156 personnel, and 41 Transportation Screening Security Teams, which include 895 personnel.

Environmental Management Program: \$12.0 million: This program provides for the disposition of hazardous materials and abandoned personal property collected by TSA at checkpoints, as well as the maintenance of the environmental management system. TSA has an extensive and complex program to safely and securely identify, sort, store, and protect assets; as well as to remove and dispose of hazardous and voluntarily abandoned property.

TSA's national hazardous materials disposal program protects the traveling public from exposure to hazardous materials and complies with Federal, State, and local environmental regulations and laws.

PPA: CHECKPOINT SUPPORT

	Perm Pos	FTE	Amount
FY 2010 Actual*	65	45	\$213,920
2011 C.R.	56	54	256,143
2012 Adjustments-to-Base	8	7	(55,858)
2012 Current Services	64	61	200,285
2012 Program Change	53,808
2012 Request	64	61	254,093

*The table above excludes American Recovery and Reinvestment Act (ARRA; P.L. 111-5) funding of \$170.5 million.

TSA requests \$254.1 million for this activity. This includes an adjustment-to-base of \$55.9 million. The program change includes a \$53.8 million increase to maintain the acceleration of AIT deployment.

CURRENT SERVICES PROGRAM DESCRIPTION

The following table provides the components of this PPA.

(dollars in millions)

	FY 2011 C.R.	FY 2012
Checkpoint Technology	\$240.4	\$238.3
Advanced Surveillance Program	6.0	6.0
Payroll	9.7	9.8
Total	\$256.1	\$254.1

The checkpoint support program provides the resources required to test, evaluate, integrate, and deploy passenger screening and carry-on baggage screening capabilities. This involves technologies, training, checkpoint reconfigurations, closed circuit television surveillance equipment, and the operational integration of systems at approximately 2,250 passenger checkpoint lanes in our Nation’s airports. TSA developed a strategic plan to enhance screening through improved checkpoint technology that will refine passenger security for aviation. This initiative extends beyond the airport checkpoint and considers the end-to-end passenger experience to improve security and increase efficiency. The focus is on a layered security approach and includes improved explosives detection and enhanced hostile intent detection.

Current technologies that have been deployed include Threat Image Protection Ready X-Ray machines; Enhanced Walk-through Metal Detectors that screen persons for metallic weapons such as guns or knives; Explosives Trace Detectors (ETD), which are used to test for explosive residue on selected carry-on items or can be used as a portable device that allows for increased security and an added layer of random screening within the sterile area; Bottled Liquids Scanners (BLS), which screen bottles to determine if they contain explosives or benign liquids; Chemical Analysis Devices (CAD), which are small devices used to identify suspect substances; AIT consisting of millimeter wave and backscatter X-ray ; and Advanced Technology (AT-2) systems, which are X-ray systems with advanced visual detection capabilities that use multi-view capabilities or automated explosives detection capabilities.

Significant accomplishments in FY 2010 included:

- Established a Qualified Products List (QPL) for AT-2; added vendors to existing QPL for BLS and AIT;
- Conducted test and evaluation (T&E) support for AT-2 and Security Technology Integrated Program (STIP);
- Completed upgrade and enabled STIP functionality on first ETD systems; and
- Accelerated the large scale deployment of AT-2, BLS, AIT, CAD, and Next Generation ETDs (NextGen ETDs) using funding provided in the American Recovery and Reinvestment Act of 2009.

FY 2011 planned accomplishments include:

- Continue procurement and deployment of AT-2, BLS, NextGen ETD, and AIT;
- Conduct laboratory and operational T&E for Automated Wait Time (AWT), Credential Authentication Technology (CAT), and Shoe Scanner Devices (SSD);
- Procure and deploy Portable ETD, AWT, and CAT;
- Add STIP enhancements to include the Maintenance Ticket Application and the Remote Monitoring and Maintenance capabilities; and
- Upgrade AT-1 to AT-2, and enhance AIT with Automated Target Recognition (ATR) capability.

In FY 2012, TSA plans to:

- Continue the procurement and deployment of AT-2, NextGen ETD, CAT & Boarding Pass Scanning System (CAT/BPSS), and AIT;
- Evaluate and modify fielded systems to enhance features and add threat detection capabilities; and
- Establish a new set of technology qualification groups based on Innovative Technology Review Process data and information on next generation technologies to include: emerging spectrum-based inspection technologies, Advanced Enhanced Metal Detector including echo-imaging, and Next generation X-ray based systems.

Checkpoint Technology: \$238.3 million: This request includes funding to test, procure, and deploy improved technology systems to further extend explosives and prohibited item detection coverage at aviation checkpoints. It includes funding to test, purchase, and install new screening equipment and update existing equipment with such enhancements as AT-2 tier upgrades and ATR for AIT. Funds will also be used for program, engineering, technical support and travel, original equipment manufacturer training, warehousing, consumables, and refurbishing equipment, to provide functionality and performance enhancements, as well as for life-cycle replacements for units reaching the end of their useful life.

TSA analyzes the integration of new and modified systems and concepts of operation to ensure operational effectiveness and suitability prior to full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment under the proposed concept of operations, in the field under a variety of environmental conditions. In particular, this includes:

- Operational Test and Evaluation (OT&E) in support of regulatory and policy decisions;
- OT&E as part of the acquisition process for items procured by TSA, including Early Utility Assessments, Initial OT&E, and Follow-on OT&E over the project lifecycle;
- Pilots, concept demonstrations, and field experimentation in support of mission area analyses, concept of operations development, process optimization and improvement, and workforce / vector characterizations; and
- T&E capabilities development to improve the quality and utility of evaluation products.

Advanced Surveillance Program: \$6.0 million: As part of TSA’s layered approach, the Advanced Surveillance Program (ASP), partnering with local transportation authorities, utilizes the existing infrastructure owned and operated by local airport authorities to meet the needs of TSA for remote monitoring of screening areas, threat detection and assessment, and to provide enhanced situational awareness to local TSA. Advanced Surveillance systems have proven to be a key component in the “best practices” of the security industry world-wide for many years. They provide threat identification, situational awareness, deterrence, loss prevention, investigative and legal activities along with standard management functions within the checkpoint areas, to include exit lanes, sterile areas, and queue lanes. ASP promotes a cooperative partnership and sharing of information between Federal and local authorities and provides invaluable coordination for command and control for first responders in the event of an incident or threat. Additional funding is requested in the EDS Procurement and Installation PPA to support ASP in baggage handling areas.

	FOC	Projects Completed with Prior Year and FY 2012 Funds	After FY 2012 Projects
Advanced Surveillance Program Projects	285	73	26%

Payroll: \$9.8 million: The request provides funding to support 64 full time positions.

*The table above excludes American Recovery and Reinvestment Act (ARRA; P.L. 111-5) funding of \$253.6 million.

The Transportation Security Administration requests \$272.7 million for this activity. The adjustments-to-base includes a decrease of 2 FTE and \$117.5 million.

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of this PPA.

(dollars in millions)

	FY 2011 C.R.	FY 2012
Installation ^{1/}	\$496.9	\$308.7
Purchase of Checked Baggage Equipment	119.2	190.5
Advanced Surveillance Program	5.0	5.0
Payroll	19.2	18.5
Total	\$640.3	\$522.7

^{1/} Includes mandatory funding of \$250M

The FY 2012 request will be used to test, evaluate, select, and deploy electronic baggage screening technology systems. TSA’s Electronic Baggage Screen Program (EBSP) is responsible for ensuring that 100 percent of all checked baggage is screened with explosives detection system capabilities or a suitable alternative. The two primary technologies acquired and deployed under the EBSP are EDS equipment and Explosives Trace Detection (ETD) devices. TSA’s activities related to purchasing and installing EDS and ETD systems consist of some or all of the following, depending on the equipment and specific location: 1)

operational testing and evaluation (OT&E), 2) equipment purchase, 3) site survey and design, 4) site preparation, 5) facility modification, 6) warehousing and shipping, 7) equipment installation, integration, and multiplexing, 8) independent verification and validation testing, and 9) program support.

In 2006, TSA developed a Strategic Plan for achieving risk-based, optimal screening solutions. Implementation of these optimal solutions has resulted in decreased life cycle costs for the EBSP program. This plan uses a top-down prioritization model to perform a systematic and comprehensive assessment of screening alternatives at airports and prioritizes projects by balancing security and economic factors. These results feed into a deployment model that identifies the optimal schedule for deploying equipment to airports given funding, equipment availability, and other key assumptions. TSA's progress towards completing airports of highest priority as identified in TSA's risk-based EBSP Integrated Deployment Model is shown below. Continued progress assumes enactment of the legislative proposal that allows the use of the Aviation Security Capital Fund (ASCF) for the purchase and installation of EDS equipment in order to complete optimal in-line systems.

Program progress relative to EDS/ETD deployment and facility modifications
*Projections through FY 2011**

	Total Number of TSA Airports**	Entire Airport Completed	Some Screening Areas with Completed Systems	Total Number of Airports with Some Completed Systems	Percentage of Airports with Some Completed Systems
CAT X	28	17	11	28	100%
CAT I	57	38	11	49	86%
CAT II	76	60	9	69	91%
CAT III	125	72	1	73	58%
Total	286	187	32	219	77%

* As of December 3, 2010.

* Status is based on live bag screening as of August 31, 2010, and projects planned to be completed with FY 2009, ARRA, and FY 2010-FY 2011 funds by September 30, 2011.

**Based on TSA Threat Category listing as of August 20, 2010.

Prioritization

TSA historically focused on completing the highest priority systems at Airport Security Threat Category (CAT) X – III airports with risk being a major factor in determining the priorities. As shown in the chart above, considerable progress has been made towards this goal. In order to accomplish the goals of optimizing security and screening checked baggage with the most effective and efficient system for each airport screening zone, in FY 2011 the EBSP broadened its focus to look more closely at all airports, including the reevaluation of existing sites.

Recapitalization

As of November 30, 2010, TSA had approximately 2,000 EDS units deployed nationwide. The increasing age of the Transportation Security Equipment necessitates the implementation

of a Recapitalization Program to improve operations at existing sites. There is a need for TSA to replace aging and less up-to-date security technologies over the next five years.

Facility Modification Project Prioritization

Facility modification priorities necessarily occur after resources are allocated to other program commitments. To prioritize facility modification projects, several factors are considered beyond the risk-based Airport Prioritization Model (APM) ranking, including the cost share the airport is willing to assume, the scoring of the airport’s funding application, and the readiness of the airport to apply funding (i.e., schedule). In this process, TSA first runs a top-down model to generate the APM scores and concurrently reviews airport funding applications submitted. TSA then scores the additional factors and generates a prioritization list. The figure that follows indicates how that process is conducted. Lastly, a factor for readiness is then applied to ensure that funds are directed to airports that are ready to apply them.

Process Overview

Technology

EDS is the main technology used in the checked baggage screening process. This equipment automates what was previously a manually-intensive baggage inspection, allowing faster bag throughput (up to 300 percent) and improved threat detection capabilities. EDS machines are the largest and most expensive security screening equipment in the TSA inventory.

EDS equipment can be in stand alone or in-line configurations. In-line configurations integrate the EDS equipment into the baggage handling system. In-line EDS provides more reliable baggage delivery, greater efficiency, and increased flexibility to accommodate traffic growth. TSA benefits from operational improvements associated with this type of automation. For instance, working conditions for screeners improve with in-line systems. Alarms can be resolved in quieter, dedicated spaces that are properly designed for the alarm resolution function. On-the-job injuries are reduced as a result of better-designed alarm resolution areas since fewer alarms mean fewer bags are lifted by TSOs. These are just some examples of the broad reaching benefits of in-line systems.

Continuous improvements are required to increase equipment reliability, reduce downtime, extend service life, and eliminate screener safety hazards in order for EBSP to substantially improve the effectiveness and efficiency of the deployed screening equipment.

Newly entrant EDS machines and significant upgrades to existing EDS technology are constantly under development. These technologies offer a variety of enhancements that will improve screening capabilities, increase throughput, and reduce equipment footprint. . Additionally, TSA’s efforts to contain costs by using Reduced Size EDS to combine checkpoint and checked baggage operations at low-efficiency/high-cost airports are being explored.

ETD machines are used both as primary and secondary screening methods (i.e., resolving EDS alarms). ETDs are the second largest component of equipment cost within the EBSP program. ETDs are designed to detect explosives residue left on an item and/or bag. Since the enactment of the Aviation and Transportation Security Act, TSA has implemented the 100 percent checked baggage screening requirement; however, some solutions in place may not be sustainable as passenger loads increase. TSA plans to replace 100 percent ETD checked baggage screening solutions with EDS or reduced sized dual-use EDS where appropriate. These changes began in FY 2009.

Changes in EDS detection capabilities will also require additional technologies such as Bottled Liquids Scanners to assist in alarm resolution.

Significant accomplishments in FY 2010 included:

- Continued competitive procurement process for all three classes of EDS machines: High Speed, Medium Speed (MS), and Reduced Size EDS (RS-EDS);
- Awarded facility modification contracts funded by American Recovery and Reinvestment Act of 2009 to eleven airports;
- Deployed and installed 151 RS-EDS units and had 39 MS-EDS units go operational in FY 2010 to support both stand-alone and in-line Checked Baggage Inspection Systems (CBIS); and
- Initiated ETD recapitalization effort with the deployment of 257 ETDs beginning in August, 2010.

FY 2011 planned accomplishments include:

- Complete Windows 1a, the first window of opportunity the vendors can enter into the competitive procurement process, for all three classes of EDS machines: High Speed, MS, and RS-EDS and award contracts based on this competition; complete certification and operational testing for Windows 3 of the competitive procurement process;
- Continue collaboration with the DHS Science & Technology Directorate to execute higher detection standards for EDS equipment;
- Award facility modification contracts to 12 airports nationwide;
- Procure EDS machines to support ongoing in-line projects and initiation of the recapitalization of legacy EDS machines including in-line systems; and
- Conduct Testing and Evaluation support for CBIS.

In FY 2012, TSA plans to:

- Complete Windows 1b of the competitive procurement process of all three classes of EDS machines and award contracts based on this competition achieving Home Made Explosives capability;
- Procure and deploy all three classes of EDS machines to support optimal screening solutions; and
- Continue the recapitalization of the aging EDS and ETD fleet.

Purchase: \$190.5 million: The FY 2012 request includes funding to support the purchase of 156 EDS for deployment in our Nation's airports. The procurement will consist of MS-, high-speed, and RS-EDS. Purchases in FY 2012 are planned to support projects where facility modifications will be completed from prior year funded projects and to purchase units to replace aging equipment in the field.

The following table provides a breakout of planned technology purchases.

(dollars in millions)

EDS Type	FY 2011 C.R.		FY 2012 Budgeted	
	Planned Purchases	Projected Costs	Planned Purchases	Projected Costs
Reduced-Size	112	\$39.2	35	\$13.5
Medium Speed	74	\$74.0	114	\$166.5
High Speed	4	\$6.0	7	\$10.5
Total	190	\$119.2	156	\$190.5

Installation: \$308.7 million: The FY 2012 request includes funding for installation. The installation funding supports the multi year-Letter of Intent requirement and the installation of electronic baggage screening equipment in the Nation’s airports. In addition to equipment installation, integration, and multiplexing, installation activities include independent verification and validation testing, site survey and design, facility modification, site preparation, warehousing and shipping, operational testing and evaluation (OT&E), and program support.

Installation funding is also used to evaluate the impact of new security technologies, procedures, and policies. TSA analyzes integration of new and modified systems and concepts of operation to ensure operational effectiveness and suitability prior to full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment under the proposed concept of operations in the field under a variety of environmental conditions. In particular, this includes:

- OT&E as part of the acquisition process for items procured by TSA;
- OT&E in support of regulatory and policy decisions in areas such as air cargo;
- Pilots, concept demonstrations, and field experimentation in support of mission area analyses, concept of operations development and workforce characterization; and
- Testing & Evaluation capabilities development to improve the quality and utility of evaluation products.

Advanced Surveillance Program (ASP): \$5.0 million: As part of TSA’s layered approach, ASP, partnering with local transportation authorities, utilizes the existing infrastructure owned and operated by local airport authorities to meet the needs of TSA for remote monitoring of screening areas, threat detection and assessment, and to provide enhanced situational awareness to local TSA. Advanced surveillance systems have proven to be a key component in the “best practices” of the security industry world-wide. They provide threat identification, situational awareness, deterrence, loss prevention, investigative and legal activities along with standard management functions, within the checked baggage areas. ASP promotes a cooperative partnership and sharing of information between Federal and local authorities and provides invaluable coordination for command and control as well as first responders in the event of an incident or threat. The Checkpoint Support program requests additional funding to support ASP in passenger screening areas.

	FOC	Projects Completed with Prior Year and FY 2012 Funds	After FY 2012 Projects
Advanced Surveillance Program Projects	285	73	26%

Payroll: \$18.5 million: The request provides funding to support 120 full time positions.

PPA: SCREENING TECHNOLOGY AND
MAINTENANCE

	Perm		
	Pos	FTE	Amount
FY 2010 Actual	\$298,637
2011 C.R.	316,625
2012 Adjustments-to-Base	33,240
2012 Current Services	349,865
2012 Program Change	(17,600)
2012 Request	332,265

TSA requests \$332.3 million for this activity. The adjustment-to-base is \$33.2 million, and the program change includes a \$17.6 million decrease from contract savings.

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of this PPA.

(dollars in millions)

	FY 2011 C.R.	FY 2012
Checked Baggage Equipment Maintenance	\$234.1	\$251.9
Checkpoint Equipment Maintenance	73.4	76.8
Utilities	6.0	0.0
Disposal	3.1	3.6
Total	\$316.6	\$332.3

Funding in this PPA supports the maintenance and disposal of Transportation Security Equipment (TSE) in the Nation’s airports. Maintenance is essential to preserve the operational capability of security technology equipment. Once warranties expire (normally after 12 - 24 months), all TSA checkpoint and checked baggage screening equipment is under a maintenance contract throughout its life cycle. Most maintenance is performed by contractor Field Service Technicians working for Original Equipment Manufacturers or a third party Maintenance Service Provider. Preventive maintenance is performed according to the manufacturer’s recommended schedule (e.g., monthly, annually, etc). Corrective maintenance support is provided 24 hours a day, 7 days a week to perform unplanned corrective repairs in the field. Maintenance contracts include labor costs for all preventive

and corrective maintenance, as well as material costs for repair parts or consumables (e.g., ETD swabs).

Significant accomplishments in FY 2010 included:

- Provided preventive and corrective maintenance to over 13,500 pieces of security equipment;
- Sustained high levels of operational availability achieved in FY 2009 for TSE;
- Replaced aging or unreliable EDS technologies with RS-EDS with lower maintenance prices; and,
- Imposed responsiveness and performance reporting requirements on equipment warranties that are consistent with long-term maintenance practices.

FY 2011 planned accomplishments include:

- Provide cost-effective, mission enhancing maintenance services for the expanded fleet of screening equipment resulting from procurement actions under the American Recovery and Reinvestment Act of 2009;
- Begin implementing Remote Maintenance Monitoring/Maintenance Ticketing Application; and,
- Reduce EDS average unit maintenance costs due to equipment recapitalization.

In FY 2012, TSA plans to provide cost effective, mission enhancing maintenance services for the expanded fleet of screening equipment resulting from procurement actions undertaken in FY 2010 and FY 2011. Additionally, TSA intends to identify opportunities for equipment reliability improvements based on performance metrics analysis and using Logistics Engineering Changes. Finally, in FY 2012, TSA will continue to exceed equipment performance objectives for Operational Availability.

Checked Baggage Equipment Maintenance: \$251.9 million: This request funds preventive and corrective maintenance activities required to maintain the operation of deployed checked baggage screening systems. These costs include labor; repair parts; packaging and transportation of repair parts; consumables for ETDs; tools and test equipment/calibration; maintenance training; and related logistics, data management, safety, occupational health, and environmental management functions.

Below is a breakout of projected maintenance costs for baggage screening equipment:

Equipment	FY 2012 Fielded Quantity	FY 2012 Requirement
EDS		
CTX-5500	255	\$21,113,174
CTX-9000	248	\$26,772,326
CTX-9400	194	\$18,783,809
CTX-9800	18	\$1,727,247
e6000/ 6000FFOV	503	\$58,040,862
e6600	172	\$18,203,379
Reveal CT-80	594	\$23,536,863
XLB	37	\$4,601,152
King Cobra	5	\$367,719

Checkpoint Equipment Maintenance		\$67,848,987
Call Center/Excepted Maintenance/Program Management		\$5,976,233
Support Services		\$2,965,500
Total Checkpoint Maintenance Requirement		\$76,790,720
Disposal		\$1,807,500

Disposal: \$3.6 million: This request includes funding to provide disposal of equipment. Security equipment is decommissioned when evolving operational requirements (e.g., higher screening throughput), technological advancements (e.g., improved detection capability) or supportability problems (e.g., frequent failures) dictate the need for replacement. Sometimes equipment is redeployed to satisfy screening requirements at other airports. Security equipment that is not redeployed is considered for disposal in accordance with the TSA National Disposal Plan and all applicable laws and regulations governing the disposal of hazardous materials. This budget includes funding to dispose of excess security equipment through an agreement with the Defense Reutilization and Marketing Service to provide disposition/disposal services, including hazardous property.

PPA: AVIATION REGULATION AND OTHER ENFORCEMENT

	Perm Pos	FTE	Amount
FY 2010 Actual	1,186	1,114	\$259,462
2011 C.R.	1,424	1,224	318,666
2012 Adjustments-to-Base	48	184	31,628
2012 Current Services	1,472	1,408	350,294
2012 Program Change	331	166	22,945
2012 Request	1,803	1,574	373,239

TSA requests \$373.2 million for this activity. This includes an adjustment-to-base of 48 FTP/184 FTE and \$31.6 million. The program change includes 331 FTP/166 FTE and \$22.9 million for 12 new multi-modal Visible Intermodal Prevention and Response (VIPR) teams.

CURRENT SERVICES PROGRAM DESCRIPTION:

Aviation Regulation is responsible for providing law enforcement and regulatory presence at airports to ensure compliance with required security measures and response to security incidents. It also provides an international component to foster consistency in worldwide security requirements.

The following table provides the components of this PPA.
(dollars in millions)

	FY 2011 C.R.	FY 2012
Regulatory Inspection and Enforcement	\$107.6	120.0
International Programs	\$51.1	66.8
International Repair Station Inspections	\$2.7	2.6
Airport Law Enforcement & Assessments	\$82.5	83.3
National Explosive Detection Canine Training Program (NEDCTP)	\$55.6	62.3
Transportation Sector Network Management (TSNM)	\$11.7	12.7
VIPR	\$7.5	25.5
Total	\$318.7	373.2

Regulatory Inspection and Enforcement: \$120.0 million: The mission of the regulatory inspection program is broad and involves the evaluation of the security integrity of more than 450 U.S. airports, 550 foreign airports, and a combined total of over 1,500 domestic and international carriers that operate in the United States. These inspectors also conduct periodic inspections of over 7,500 indirect air carriers operating in the United States.

Over the past few years, TSA’s inspector community has made significant efforts to ensure that various airport inspections are scheduled in a way that balances/maximizes oversight while identifying possible efficiencies in scheduling. Risk scores are used to drive and prioritize inspection activity and take into account various factors, including the latest intelligence information.

The following chart provides historical and current information on the total number of TSA Inspectors (TSIs). This PPA includes 855 TSI-Aviation Domestic Inspectors, of which 123 are Canine Handlers; 45 TSI-Aviation International Inspectors; and 15 TSI International Repair Station Inspectors.

TSA Inspectors

	Full-Time Permanent Positions						
	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012
TSI - Aviation Domestic	681	657	778	755	755	855 ¹	855
TSI - Aviation Int'l	39	39	45	45	45	45	45

TSI - Int'l Repair Stations	2	15	15	15	15	15	15
TSI - Cargo	225	300	535	535	620 ²	620	620
TSI - Cargo Int'l		10	10	10	10	10	10
Total, Cargo	225	310	545	545	630	630	630
TSI - Surface	100	100	175	225	404 ³	404	404
TOTAL	1,047	1,121	1,558	1,585	1,849	1,949	1,949

1/ Increase of 100 inspectors/canine handlers in support of additional proprietary teams

2/ Increase of 50 inspectors in P.L. 111-83, conversion of 35 legacy canine teams to proprietary canine teams

3/ Increase of 100 inspectors in P.L. 111-83; Increase of 79 inspectors for the 15 additional VIPR teams

Aviation TSIs (TSI-As) have an essential role in executing local annual inspection plans based on the national inspection plan. As part of their inspection responsibilities, TSI-As review records and files pertaining to criminal history records checks performed pursuant to federal law. The inspectors also review records and files to ensure compliance of indirect air carriers; private passenger and/or cargo charters; and airmen and aircrew with security requirements. In addition to inspections, TSI-As also perform testing to determine compliance with transportation security regulations. The TSI-As investigate incidents related to violations of TSA regulations, security directives, and approved security programs. Inspectors deliver technical briefings and provide assistance to the aviation industry in interpreting agency policies to ensure compliance with rules. Inspections are both scheduled and random and may include one or all of the critical security elements required by TSA.

To ensure the adequacy and integrity of security at airports, TSIs evaluate the types of fences, lighting, and locks being used, among other important security measures through visual and hands-on inspection. Based on these assessments inspectors will recommend enhancements,

where appropriate, for non-regulated airports/facilities, including general aviation landing facilities and airports, and for aircraft operators. Areas of emphasis for inspection and/or assessment include: access control systems, security identification systems, surveillance systems, law enforcement response capabilities, physical security of aviation facilities and aircraft.

Inspectors are given the authority to initiate enforcement actions against airports, air carriers, and indirect air carriers where compliance violations have occurred or corrections have not been made. This includes misconduct of employees that threaten the security of an airport and/or aircraft. Inspectors must be well trained and knowledgeable in order to assist the agency Chief Counsel in the preparation of formal enforcement actions against those who violate security requirements.

Significant accomplishments in FY 2010 included:

- Completed over 6,817 airport inspections, 12,357 aircraft operator inspections, and 2,036 foreign air carrier inspections (including one baseline comprehensive inspection on each), as well as conducted follow up inspections to address previously identified compliance issues and completed over 1,049 flight school inspections;
- Expanded Airport Strikes to monthly multi-week efforts focusing on comprehensive inspections and testing at high-threat airports averaging one per month;
- Participated in over 66,285 activities, which include Aviation Screening Assessment Program (ASAP) testing, multi-modal VIPRs, Playbook exercises, and other high-visibility activities;
- Processed 5,428 Notice of Violations against passengers traveling with prohibited items and collected \$1,613,887 in fines; and
- Completed 25 Congressionally mandated Joint Vulnerability Assessments at CAT X and CAT I airports in coordination with the Office of Law Enforcement/Federal Air Marshal Service, Office of Security Assessments.

Planned accomplishments in FY 2011 include:

- Expand Airport Strikes and Flight School strikes to twice a month, multi-week efforts focusing on comprehensive inspections and testing at high-threat airports;
- Conduct Corporate Security Inspections of domestic aircraft operator's corporate security functions; and
- Continue to conduct one annual baseline comprehensive inspection of all airports, aircraft operators, flight schools, and foreign air carriers at domestic airports; issue quarterly special emphasis inspections that focus on threat, risk, and previous year compliance; and support ASAP, VIPR, and Playbook activities.

For FY 2012, the regulatory inspection and enforcement program plans to continue to conduct one comprehensive annual baseline inspection of all airports, aircraft operators, flight schools, repair stations, and foreign air carriers at domestic airports; conduct bi-monthly multi-week airport and flight school strikes, issue quarterly special emphasis inspections that focus on threat, risk, and previous year compliance; and support ASAP, VIPR, and Playbook activities.

International Programs (including International Repair Station Inspections): \$69.4 million: TSA's Office of Global Strategies (OGS) promotes alignment and consistency

between the security requirements of the U.S. and foreign governments and is responsible for all facets of the agency's activities at foreign locations. Its statutory and regulatory responsibilities focus on identifying and mitigating security risks to transportation modes used extensively by U.S. citizens and foreign governments. When a new threat or vulnerability emerges, OGS must coordinate the implementation of appropriate responses to mitigate the likelihood of a successful attack with both foreign governments and industry. TSA takes a leadership role as a permanent U.S. member in the regional and international organizations concerned with transportation security [i.e., International Civil Aviation Organization (ICAO), the Group of Eight (G8) Transportation Security Subgroup, and the European Civil Aviation Conference (ECAC)].

TSA strives to lead worldwide improvements in transportation security using a multi-layered approach, which includes:

- Liaison activity and representation with over 100 foreign governments, on-site liaison activity and representation in 25 foreign countries;
- Evaluation and documentation of vulnerabilities at nearly 300 airports and 900 air carrier stations located in foreign countries around the world;
- Liaison activity and representation with approximately 240 foreign air carriers;
- Active leadership within the regional and international community that comprises the world's transportation security expertise engaged in policy development; and
- Capacity building program for nations needing assistance in order to meet international standards.

An increase in FY 2011 of \$32.2 million provided funding for 74 additional positions to enhance and manage international programs at 25 existing offices in high risk areas, to provide training to host nations to mitigate vulnerabilities, and to ensure compliance with aviation security standards. The increase will also allow TSA to triple its Aviation Security Sustainable International Standards Teams (ASSIST), and to support technical and automated systems used by Foreign Airport Assessment Program for risk management.

Transportation Security Administration Representatives (TSARs)

TSARs serve as on-site coordinators for the TSA response to terrorist incidents and threats to U.S. assets at foreign transportation modes. The TSARs serve as principal advisors on transportation security affairs to U.S. Ambassadors and other embassy officials. TSARs handle all modes of transportation and are responsible for ensuring the National Civil Aviation Security Programs meet international standards for aviation security. TSARs also facilitate the TSA compliance effort by planning and coordinating airport assessments.

TSA requested to increase TSAR positions by three in the FY 2011 Presidents Request. These positions were for Dubai, United Arab Emirates (UAE); Dakar, Senegal; and New Delhi, India. Currently, the embassy in Dubai, UAE has no space for a TSAR, therefore OGS has shifted this position to Abu Dhabi, UAE, and the request is pending formal Department of State (DOS) approval. DOS has approved the TSAR position in New Delhi and OGS is currently awaiting approval by the Government of India. There are also space constraints at the Embassy in Dakar and DHS is currently working with DOS in an effort to find a solution. These positions are expected to be funded from within OGS current service levels.

TSA developed, distributed, and analyzed a comprehensive staffing scorecard to determine the number of countries that should be assigned to each TSAR. The scorecard accounts for the number of Last Point of Departure (LPD) airports in a given country, the vulnerabilities at those airports, the number of carriers and weekly flights from the airports, threat level in the country, the level of cooperation between the host government and the United States, the amount of assistance needed (and likelihood of sustainment of any help provided), and the level of priority of the country for TSA and the U.S. Government. The resulting data enables TSA to determine the appropriate distribution of countries to each TSAR to ensure an equivalent workload is maintained across the workforce.

TSARs			
Locations	Number	Location	Number

Pre-Clearances

At 13 airports (eight in Canada, two in the Bahamas, one in Bermuda, one in Aruba, and one in Shannon, Ireland), Customs and Border Protection (CBP) officers pre-clear passengers and baggage for entry into the United States. Inspection procedures, which are commensurate with U.S. port of entry screening, involve immigrations, customs, and agriculture screening. Pre-cleared international flights arrive at a U.S. domestic gate and passengers deplane directly into the sterile area at more than 60 U.S. airports without having another U.S. government inspection. Upon arrival at the U.S. domestic terminal facility, the traveler may either connect to a U.S. domestic flight or they may leave the airport. In order to permit these passengers to bypass TSA screening, TSA must ensure that the screening measures applied to passengers and their carry-on baggage at the pre-clearance foreign airport is equivalent to those measures performed at domestic U.S. airports. Determination of comparability entails extensive negotiation with the host government and frequent observations of operations. In FY 2011, TSA plans to establish pre-clearance operations in Dublin, Ireland.

Aviation Security Sustainable International Standards Team (ASSIST)

In addition to conducting aviation security training courses in support of the ICAO, the Organization of American States and the U.S. Department of State, TSA developed and fielded its own capability for providing focused and comprehensive support to willing partner

countries with the goal of appreciably enhancing their aviation security programs. ASSIST deploys single and multifaceted teams of subject matter experts to provide in-depth training and technical assistance that help willing aviation security officials develop and sustain suitable aviation security institutions and procedures that meet all international standards and recommended practices. ASSIST focuses geographically on Africa, the Latin America/Caribbean area, and the Asia-Pacific region in light of the exponential growth in traffic from these regions to the United States, as well as concerns about the security of transiting U.S. passengers and cargo.

Cargo Security

Air cargo security, especially those measures applied to goods carried on passenger aircraft, remains important to DHS. TSA has initiated several efforts to ensure that cargo destined for the United States is subjected to the required level of screening. These efforts include:

- Convening the International Cargo Workgroup and focusing on the full spectrum of cargo security issues such as determining acceptance of other countries' cargo programs, identifying best practices for dissemination to other cargo experts, and incorporating all-cargo operations into the Compliance Work Plan;
- Developing a comprehensive Risk Methodology that aligns with the process used for passenger airports;
- Ensuring that the FY 2011 Work Plan reflects a comprehensive review of all airports or carriers providing cargo service to the United States;
- Partnering with Australia to conduct an Air Cargo Security Workshop within the rubric of the Asia-Pacific Economic Council. This Workshop was held in Singapore and was viewed as highly successful;
- Implementing the airport assessment methodology for those airports providing only cargo operations/service to the United States;
- Beginning compliance/verification procedures for new ICAO standards pertaining to Supply Chain Security; and
- Conducting visits to all airports and air carrier stations involved in transporting cargo on passenger aircraft to the United States.

Transportation Security Specialists (TSS)

TSA's OGS identifies vulnerabilities at foreign locations through two primary means – assessments of foreign airports and inspections of air carriers that fly from those airports.

Under 49 United States Code (U.S.C.) 44907, TSA is charged with assessing all foreign airports with flights to the United States and those from which U.S. air carriers operate (regardless of the destination). TSA has a cadre of Security Specialists who visit the nearly 300 airports at one- to three-year intervals. Frequency of the visits is based on risk computations of current threat, documented vulnerabilities, and flight data. During the assessments, TSA evaluates the security posture of the airport in accordance with security standards established by the ICAO. The observations focus on screening (passengers, accessible property, and checked bags), access control (e.g., fence integrity, badge display and control, vehicle access), aircraft security (e.g., ensuring the aircraft was guarded against any unauthorized access), cargo, catering, and quality control (e.g., ensuring that screeners were properly trained).

Annual visits are conducted to ensure that all U.S. air carriers operate in compliance with TSA regulations identified in the Aircraft Operator Standard Security Program (AOSSP) and supporting Security Directives (SDs). TSA also inspects foreign air carriers that fly to the United States from each airport that they operate to ensure compliance with the Model Security Program and supporting Emergency Amendments (EAs).

TSA has a spectrum of responses available to mitigate issues identified during these visits. Options range from providing on-the-spot correction recommendations, to conducting formal training, to recommending enacting a Public Notice that the airport does not implement adequate security measures, to suspending service. These last two responses are usually only considered when all other attempts have failed in assisting the airport or host government to improve security. Interim measures may also include issuance of site-specific SDs and EAs (that require additional measures by the regulated air carriers) or repeated visits by Security Specialists to evaluate progress.

Staffing will enable TSA to continue airport assessments, air carrier inspections, and in the very near future, foreign repair station audits.

TSS	
Location	Number
Miami	25
Dallas	19
Los Angeles	17
Singapore	7
Frankfurt	21
HQ	1
Total	90

TSA plans to expand the Risk Methodology to reflect specific threat vectors in each specific region (e.g., presence of Man Portable Air Defense System inventory). TSA will also expand the data included in vulnerability evaluations to include concerns such as Vehicle Borne Improvised Explosive Device protection and land-side security in addition to the ICAO Standards.

Repair Station Inspection Program

TSA is required under Vision 100 (49 U.S.C. 44924) to establish security regulations for foreign and domestic aircraft repair stations and to conduct audits of foreign repair stations. The Aviation Repair Station Security Notice of Proposed Rule Making (NPRM), TSA-2004-1713 RIN 1652-AA38, proposes security requirements for repair stations that are certificated by the Federal Aviation Administration (FAA) and codifies TSA’s inspection authority.

This program serves to ensure the security of maintenance, overhaul, repair and assembly work conducted on air carrier aircraft and components at foreign and domestic repair stations. This will be achieved through specific inspection activities including security reviews and audits, vulnerability assessments and surveys. Implementation of the Vision 100 legislation for repair stations will allow FAA to certify new repair stations regulated under 14 CFR part 145.

On November 17, 2009, TSA issued a NPRM for aircraft repair station security that clarifies the agency's inspection authority and imposes security requirements for both domestic and foreign repair stations, notably pertaining to control access for aircraft and aircraft components. Efforts include, but are not limited to, conducting voluntary reviews for security enhancement of foreign and domestic repair stations, inspecting for compliance of approximately 4,100 domestic repair stations and 700 foreign repair stations and identifying security gaps through security analysis and action programs.

The Repair Station Inspection program uses a risk-based methodology to schedule foreign airport assessments and foreign air carrier inspections. Currently, all air carriers are inspected once annually unless they have a high "Airport Vulnerability" rating. This rating is used to determine the frequency of assessment and inspection planning based on the outcome of threat, vulnerability, and consequence analysis. This methodology allows TSA to efficiently utilize its workforce by visiting airports with a higher likelihood of being a target for criminal or terrorist acts, while taking into account analysis of the protective measures in place and the potential impact for loss.

This program engages industry through a voluntary audit program which involves a three-tier approach for conducting audits: 1) scheduling visits using the risk-based prioritization in conjunction with TSA Foreign Airport Assessment Program; 2) outreach to U.S. air carriers to capture the foreign repair stations they contract; and 3) contacting corporations with multi-station ownership for information on their foreign repair stations.

Global Policy and Programs

TSA's Global Policy and Programs (GPP) guide TSA's development of policy, including cargo policy, affecting international operations and stakeholders. This includes planning international projects and diplomatic approaches, strategic planning, cargo related outreach, and ensuring consistent messaging to international industry members concerning policy and change. TSA also assigns a point of contact to the ICAO to work collaboratively towards the development of global aviation security standards. Since FY 2010, GPP has performed the ICAO policy development and implementation responsibilities that had been conducted by International Operations Division.

International Industry Representatives

International Industry Representatives (IIRs) serve as TSA's principal representative to the international aviation industry. The role of the IIR has become increasingly involved as more stringent rules, requirements, and procedures have been imposed on foreign air carriers with scheduled or public charter operations to and from the United States from foreign locations. The IIRs provide oversight and guidance to each foreign air carrier and are responsible for ensuring air carriers understand and comply with U.S. regulations and TSA-accepted security programs and initiatives.

In FY 2011, the number of IIRs are expected to increase by ten, bringing the total number to 18. The 5 IIR FTPs assigned at headquarters are desk officers that support the IIR staff in the field. They serve as the headquarters communication and coordination link for the field when resolving highly sensitive security issues associated with international incidents, and develop and analyze the risk assessments and metrics. They communicate intelligence information,

assist in the preparation and distribution of DHS/TSA policies and plans for threats to worldwide transportation security systems, and assist IIRs with technical direction for both foreign air and cargo carriers. As the table below indicates, IIRs are placed globally to assist TSA outreach efforts in locations with foreign partners.

IIRs Locations FY 2010		Additional IIRs Locations in FY 2011 & 2012	
Number	Number	Number	Number
Miami	1	Europe	1
Dallas Ft. Worth	1	Africa	1
Beijing	1	Asia Pacific	1
Singapore	1	Western Hemisphere	1
Frankfurt	2	Ottawa	1
Warsaw	1	Headquarters	5
Abu Dhabi	1		

The number of active foreign air carriers fluctuates per year as new carriers either begin or cease operations to the United States. At the close of FY 2010, there were 214 TSA-regulated passenger and all-cargo carriers.

Significant accomplishments in FY 2010 included:

- Established TSAR offices in Nairobi, Kenya; Johannesburg, South Africa; and Nassau, Bahamas;
- Developed an ASSIST priority list of countries in coordination with DHS, Department of State, and ECAC;
- Provided rapid response to the January 2010 earthquake in Haiti, including forward deployment of personnel to assist host government officials ensure protocols at the Port Au Prince, Haiti airport to facilitate the resumption of service;
- Conducted 123 airport assessments and more than 850 air carrier inspections, which reflected an increase from 62 percent to 85 percent completion of the scheduled compliance activities as compared with FY 2009; and
- Coordinated program implementation for all passenger foreign air carriers to cutover to the Secure Flight program by the end of 2010, advised foreign air carriers on cargo screening requirements to meet the 100 percent domestic outbound screening requirement effective August 1, 2010.

Planned accomplishments in FY 2011 include:

- Staff new overseas IIR positions in Europe, Africa, Asia-Pacific, and in the Western Hemisphere to include Ottawa, Canada. Staff three TSARs positions as a result of an emerging need at strategic locations around the world– one each in Dakar, Senegal; Abu Dhabi, UAE; and New Delhi, India to address potential risks and harmonization and/or capacity building efforts; and
- Issue the final NPRM for repair stations by the end of FY 2011.

In FY 2012, TSA plans to have all overseas positions filled in high risk areas, to automate and streamline reporting processes for significant activities, continue collaboration with other U.S. Government agencies to promote “one voice” on transportation security issues, and

deepen outreach to international stakeholders. TSA will also conduct annual or biennial evaluations to ensure that all pre-clearance foreign airports apply equivalent security measures to those performed at domestic U.S. airports, and review ASSIST information and define metrics used to evaluate program impact. There are plans to implement the repair station program to assess and inspect all repair stations both foreign and domestic. In FY 2012, TSA plans to continue to expand the presence and role of GPP in global transportation security, participate in outreach to familiarize global aviation stakeholders with the new Model Security Programs, and review trend analysis to make GPP more efficient and effective.

Airport Law Enforcement & Assessments: \$83.4 million

Law Enforcement Officer (LEO) Reimbursement Program: In accordance with the ATSA, TSA established cooperative agreements with state and local law enforcement agencies to provide uniformed officers at passenger security checkpoints under the flexible response authorities granted to TSA. These agreements provide financial assistance to partially reimburse airports at screening points throughout the United States for post 9/11 law enforcement hours. They ensure that a consistent law enforcement presence is always available to deter suspicious activity and respond quickly in the event of a breach of security at designated checkpoints.

In FY 2010, TSA funded 330 cooperative agreements that included the following LEO patrol and response hours:

Airport Category	Hours
Cat I	552,983
Cat II	440,892
Cat III	355,272
Cat IV	272,411
Cat X	787,707
Total	2,409,265

In FY 2011, TSA will continue to improve program efficiencies and to maximize the use of available program funds by reviewing participants' actual annual expenditures and adjusting award levels accordingly. This review process continues to include site visits to a select number of airports during the course of the fiscal year, which will ensure appropriate use and expenditure of program funding by airport participants.

Assistant Federal Security Directors for Law Enforcement (AFSD-LEs):

In addition to these agreements, AFSD-LEs further coordinate and support TSA's security efforts with local law enforcement. AFSD-LEs partner with law enforcement officials from other Federal, State, and local agencies to address significant issues, share intelligence and ensure the safety of airports. AFSD-LEs are assigned to a hub airport, but most are also

responsible for spoke airports in their district. There are currently 82 AFSD-LEs positions that cover 275 airports.

The FY 2012 request includes an adjustment-to-base for an additional 22 AFSD-LEs. These proposed positions will help to mitigate response times for investigations and to ease congestion at the checkpoint. Given the increased threat to aviation security, the additional strategically placed AFSD-LEs will provide an additional layer of support to the airports.

Joint Vulnerability Assessments:

Joint Vulnerability Assessments (JVAs) are a joint effort undertaken by TSA and FBI with the purpose of assessing current and potential threats to commercial air transportation facilities within the United States. The process is a direct result of the increasing threats to aviation, which prompted Congress to pass Section 310 of the Federal Aviation Reauthorization Act of 1966. Section 310 requires the FAA and the FBI to conduct joint threat and vulnerability assessments of security at U.S. airports. This responsibility was transferred to TSA under ATSA.

Man-Portable Air Defense System (MANPADS) Vulnerability Assessments (MVAs) are designed to enhance security of air transportation by minimizing the potential for missile or stand-off weapons attack against aircraft. The program is designed to deter, detect, and mitigate the MANPADS threat.

TSA also conducts international MANPADS Assist Visits to partner with international allies on joint international assessments that are appropriate and mutually beneficial to the U.S. Government and the host nation. These visits are similar to the domestic MANPADS Vulnerability Assessments and are conducted at foreign airports to help identify and define potential launch locations in areas surrounding the airport by using known terrorist methodology and weapon employment tactics and capabilities.

Significant accomplishments in FY 2010 included:

- Conducted 24 JVAs, 15 MANPADS Vulnerability Assessments, Three MANPADS Assist Visits, and 25 MANPADS outreach/training initiatives;
- Initiated partnerships with other agencies/programs to provide MANPADS recognition training, outline the technique and methodologies utilized during the vulnerability assessment process and the subsequent development of a mitigation plan; and
- Established two additional AFSD-LE positions in Texas (Lubbock Preston Smith International Airport and McAllen Miller International Airport) bringing the current total number of airports supported by the program to 82.

Planned accomplishments in FY 2011 include:

- Continue to oversee the AFSD-LE program to support security coordination and collaboration with State and local law enforcement and to maintain effective and efficient use of resources;
- Expand partnerships with other Federal agencies/programs to provide MANPADS training;
- Increase JVAs and MVAs by 3-5 percent; and
- Implement the Multiple Disciplinary Vulnerability Assessment (MDVA) program with a focus on the insider threat. The MDVA is a vulnerability assessment initiative that

capitalizes on a multi-layered approach to gather and analyze information identified as vulnerabilities from personnel, physical and information systems within the inter-security environment of an airport. The MDVA will identify and mitigate insider threats.

In FY 2012, the program plans to conduct six MDVAs at CAT X airports using a risk based model and enhancing the MDVA process by developing a comprehensive assessment tool/database.

National Explosives Detection Canine Training Program (NEDCTP): \$62.4 million:

TSA’s NEDCTP develops, trains, deploys, and certifies explosives detection canine teams to deter and detect the introduction of explosive devices into the transportation system. Each team is composed of a specially trained canine and either a TSA or State and local law enforcement handler. Bomb threats cause disruption of air, land, and sea commerce and pose an unacceptable danger to the traveling public. Explosives detection canine teams are proven and reliable resources in the detection of explosives and are a key component in a balanced counter-sabotage program. Fostering partnerships throughout the Federal government, State and local law enforcement, and the international community is a key element of NEDCTP’s mission.

Through cooperative agreements, TSA provides funding for training, certification and maintenance of the explosives detection capable canines, training for the handlers, and partial reimbursement of handlers’ salaries and other costs. In FY 2012, TSA plans to increase the current stipend by approximately \$10,500 per team. This is necessary to proportionately compensate for the escalating inflationary and operational costs borne by NEDCTP participants.

Projected FY 2012 Funded Canine Teams				
<u>Funding Source</u>	<u>Legacy Aviation</u>	<u>Proprietary</u>	<u>Mass Transit</u>	<u>Total</u>
Base Funding	468	45	117	630
Supplemental	50	120		170
FY 2011 Enhancement		100		100
Total	518	265	117	900

Significant accomplishments in FY 2010 included:

- Conducted 10 handler training classes;
- Participated in Triacetone Triperoxide (TATP) Training Aid Research and Development. Program awaiting Final Report on the initiative to identify how to produce safe TATP training aids for explosives detection canine teams;
- Contributed to Ozone Odor Concealment Test (Phase I & II). This is a joint effort between the NEDCTP and DHS Science & Technology to test ozone disbursing machines and their odor masking capabilities; and

- Established Naval Air Systems Command (NAVAIR) Pilot (Handheld Scanners) at Dulles International Airport (IAD) and Delaware River and Bay Authority (DRBA). This pilot program provides a Canine Asset Management System for the accountability and tracking of Explosives Training aids through the use of a secure mobile device.

Planned accomplishments in FY 2011 include:

- Start to train and deploy 100 Person Borne Improvised Explosives Detection (PBIED) Canine Teams;
- Expand the NEDCTP infrastructure with special emphasis on the Canine Training and Evaluation Branch in San Antonio, TX;
- Fund an estimated total of 783 teams in Aviation and Air Cargo. These teams enhance the layer of security to other modes of transportation within their area of responsibility in addition to the airport;
- Continue to participate in the DHS Canine Working Group;
- Participate in Ozone Odor Concealment Test (Phase III); and
- Continue NAVAIR Pilot (Handheld Scanners) at Dulles International Airport (IAD) and Delaware Bay Authority (DRBA).

In FY 2012, the NEDCTP plans to continue the training and deployment of the 100 teams and plans to provide supplemental PBIED training to the State and local law enforcement teams.

Transportation Security Network Management (TSNM) \$12.7 million

TSNM coordinates aviation security efforts with airlines, airports, and within the general aviation community. General Aviation (GA) includes corporate operators, recreational and private aircraft, and charter operations; private and public use of general aviation airports, airmen, and airspace. The program works collaboratively with industry and government stakeholders to develop innovative methods to enhance security and to develop, disseminate, and consistently apply a framework of appropriate and feasible security standards. TSNM serves as the “one-stop” shop for all GA security matters. The program uses a threat based and risk management approach to develop strategies, policies, plans, and programs to reduce the security risks and vulnerabilities associated with GA operations.

Significant accomplishments in FY 2010 included:

- Redefined the requirements of the GA Data Management System;
- Implemented a vulnerability assessment survey tool for GA airports;
- In conjunction with CBP, TSA eliminated international waivers for aircraft travelling to/from the United States, in favor of CBP’s Electronic Advanced Passenger Information System; and
- Developed/implemented a GA marketing and educational program for the GA industry to enhance security awareness.

Planned accomplishments in FY 2011 include:

- Modify the existing Large Aircraft Security Program (LASP) rulemaking and implement/issue a Supplemental Notice of Proposed Rulemaking for GA aircraft;
- Develop and implement the GA Data Management System;

- Work with CBP and the FAA to analyze feasibility of aligning the Automatic Detection and Processing Terminal (ADAPT) tool with the Air and Marine Surveillance System (AMOSS) and incorporate Electronic Advanced Passenger Information System (EAPIS) into AMOSS/ADAPT;
- Work with industry to modify the DCA Access Security Program.

In FY 2012, TSA plans to enhance the GA Data Management System to include additional functionality and to explore the possibility of expanding to other modes of transportation. In addition, TSA will identify a database that will enhance available knowledge of GA operations and operators, and facilitate access to this information for the purposes of enforcing regulations and resolving incidents.

Commercial Airlines

This activity includes the TSA/Aircraft Operator Corporate liaison function, development of new aviation security policy, and management of existing policy for necessary modification or elimination based on the evolving threat against full program commercial airlines. The program provides high level system-wide regulatory oversight of commercial airlines including management of the AOSSP, the Private Charter Program, and associated Security Directives. This supports the TSA vision for security excellence through lessons learned, best practices, case studies, corporate reviews and evaluations, operator improvement plans, and trend analysis.

The Commercial Airlines program is responsible for 70 aircraft operators with Principal Security Inspectors (PSIs) assigned to multiple commercial airlines. PSIs act as the TSA representative and provide the industry, at the corporate level, with supporting interpretations, clarifications, and assessments of the regulations. This branch monitors the specific operator's compliance level and takes action when a trend is identified. PSIs are subject matter experts on their assigned carriers, included approvers of carrier's security training programs provided to the flight deck and cabin crew, and ground security coordinators. Additionally, commercial airlines staff provides vital subject matter expertise for critical incident management during times of national emergencies and conducts outreach to airlines when developing aviation security measures to mitigate threats.

Significant accomplishments in FY 2010 included:

- Provided extended vital support as subject matter experts at the Critical Incident Management Group located at the TSOC during the attempted bombing of Northwest Flight 253 on Christmas Day 2009 and continued provision of industry interpretation and clarification to security directives issued as a result;
- Managed 259 aircraft operator amendments to the AOSSP. Each amendment provides alternate measures that meet or exceed existing AOSSP requirements; and
- Reassigned aircraft operators and PSIs to ensure periodic rotation is accomplished giving the PSIs a broad range of experience handling various operators.

Planned accomplishments in FY 2011 include:

- Strengthen relationships with the U.S. airlines that are certified to operate under the full AOSSP to provide a stronger support not only on regulatory oversight of commercial airlines on the full Program and on the Private Charter Program but also provide the

- industry with supporting interpretations, clarification and assessments of the regulations and the level of carrier compliance;
- Work with operators and TSA's Transportation Threat Assessment and Credentialing (TTAC) program to oversee the transfer of airline employee vetting from an aircraft operator responsibility; and
 - Create PSI specific database to assist in reporting and tracking trends in areas of non-compliance.

In FY 2012, TSA plans to apply best practice findings resulting from the Homeland Security Study Analysis Institute contract to each aircraft operator. Operator risk will be based on analysis of the findings providing a guideline for future improvements on a carrier by carrier basis. Additionally, TSA plans to complete AOSSP and PCSSP baseline updates for all Chapters updated from the reissue version released in April 2006. TSA also plans to refine the PSI specific compliance database to ensure consistent reporting and tracking.

Visible Intermodal Prevention and Response (VIPR): \$25.4 million

The objective of VIPR deployments is to augment capabilities that disrupt and deter potential terrorist activity. To achieve this end, TSA utilizes risk-based, periodic random deployments that are unpredictably executed in timing, location, and types of activities. VIPR operations teams consist of TSA personnel that may include TSIs, TSOs, Federal Air Marshals, Behavioral Detection Officers, Transportation Security Specialists-Explosives, Explosives Detection Canine teams, and Federal, State and local law enforcement officers. Uniformed VIPR team members provide a visible and official security presence apparent to all who use or are observing the mass transit or passenger rail system. VIPR activities bolster the system's efforts to prevent an adversary from orienting on and breaching a pattern in security activities. As a result of additional resources and an increased Federal, state and local stakeholder awareness of, and commitment to VIPR deployments, the total number of VIPR deployments has increased from four to five per week in 2007 to approximately 145 to 150 per week in 2010.

Significant accomplishments in FY 2010 included:

- Conducted 3,784 VIPR operations in the Aviation environment.

Planned accomplishments in FY 2011 include:

- Increase the number of Aviation VIPR operations to 4,400 annually.

In FY 2012, TSA plans to increase the number of multi-modal VIPR teams by 12. This will increase the number of operations by 2,760 nationwide to 7,360 annually.

PPA: AIRPORT MANAGEMENT AND SUPPORT

	Perm Pos	FTE	Amount
FY 2010 Actual	2,414	2,227	\$453,568
2011 C.R.	3,004	2,841	533,827
2012 Adjustments-to-Base	77	133	34,507
2012 Current Services	3,081	2,974	568,334
2012 Program Change	25	13	3,169
2012 Request	3,106	2,987	571,503

TSA requests \$571.5 million for this activity. This includes an adjustments-to-base of 77 FTP/133 FTE and \$34.5 million. The program change includes 25 FTP/13 FTE and \$3.2 million to support the FY 2012 program increases related to AIT, BDOs and additional VIPR teams.

CURRENT SERVICES PROGRAM DESCRIPTION:

(dollars in millions)

	FY 2011 C.R.	FY 2012
Federal Security Director (FSD) and Staff Costs - Field and HQ	\$341.7	\$377.7
Transportation Security Operations Center (TSOC)	\$28.4	\$22.3
Airport Parking, Transit, and Fleet	\$24.3	\$24.8
Airport Rent and Furniture	\$139.4	\$146.7
Total	\$533.8	\$571.5

Federal Security Directors (FSD) Staff and Headquarters: \$377.7 million: This funding supports the salaries and benefits of FSDs and their staff, as well as travel, training, and contract requirements support. In addition, the funding provides for headquarters positions that direct the policy, analysis, and administration of aviation screening. FSDs and staff are critical to supporting the front line operations of the TSOs. To streamline the administrative operations and gain efficiency at the airports, larger airports have been designated as hubs. These hubs provide security direction, administrative support, and staffing/personnel as needed to smaller, lower staffed airports (spokes). For example, Boston-Logan International Airport is the hub for seven spoke airports (Bedford-Hanscom, Barnstable, Martha's Vineyard, Nantucket, Provincetown, Westover and Worcester airports).

FSDs and staff travel frequently between the hubs and spoke airports. Funding for airport management and staff provides the proper direction, support, and staff at the spokes to ensure efficient and effective operations.

FSDs and staff develop operational strategies to make the screening process more efficient for the traveling public especially during peak travel seasons. They continue to be the central reference point on policy development, information technology, training, performance management, finance, and human resources to support the mission of TSA.

TSA adapts to a dynamic and changing environment with industry accepted scheduling and modeling programs. These applications allow TSA to efficiently determine and schedule the TSO workforce at the Nation's diverse airports. By accurately predicting, executing, and measuring the number of TSOs required, TSA ensures that the public has a positive experience while maintaining the proper number of TSOs at each airport.

This activity also includes funding for Explosives Transportation Security Specialists (TSS-Es) (formerly called Bomb Appraisal Officers (BAOs)). The TSS-E program strengthens the security of the Nation's transportation systems by providing frequent interaction and formal training to TSOs to increase their ability to recognize potential Improvised Explosive Devices (IEDs) and IED components. TSS-Es are highly skilled individuals who have undergone training in the disposal of explosive ordinance. This program provides preventative measures against IEDs while reducing costly airport delays and closures. The TSS-E Program currently operates at 123 airports.

TSS-Es are assigned to selected FSDs to provide subject matter expertise to TSA and its stakeholders on chemical, biological, nuclear, radiological, and explosive threats to the Nation's infrastructure. Although TSS-Es are assigned to selected FSD staffs they have regional responsibilities making them available to all FSDs within their region to assist in multi-modal explosives security issues. TSS-Es conduct explosives vulnerability assessments in all transportation modes, participate in aviation related Joint Vulnerability Assessments and MANPAD Vulnerability Assessments. They assist in the development of mitigation plans, conduct tailored explosives recognition and response training, and develop exercises for all transportation modes. TSS-Es also provide transportation specific expertise to the FBI Explosives Unit and the National Transportation Safety Board during investigations where explosives are suspected or confirmed.

In calendar year 2010, TSS-E's responded to 5,451 calls for advanced alarm resolution which prevented 5,287 hours of potential terminal disruption resulting in an estimated cost avoidance of \$21.2M. This is based on an estimate of productive time of \$67.06 per minute. As anecdotal information, air carriers and airports have told the BAO program that a single terminal evacuation causes major disruption and can cost millions of dollars.

Transportation Security Operations Center (TSOC): \$22.3 million: The TSOC is located at TSA's Freedom Center in Northern Virginia. The TSOC provides 24/7/365 coordination, communications, collaboration of intelligence and domain awareness for all DHS transportation-related security activities worldwide. The TSOC correlates and fuses real-time intelligence and operational information, ensuring unity of action in the prevention of, and response to, terrorist-related incidents across transportation modes. The TSOC is co-located and closely aligned with TSA's Continuity of Operations (COOP) and Emergency Preparedness activities.

Significant accomplishments in FY 2010 included:

- Managed daily operations to include continuous reporting from TSA personnel at 450 sites and 23 countries overseas, handled approximately 52 incidents daily and over 8,500 inbound and outbound phone calls weekly;
- Handled 250 events at the Freedom Center, including security related conferences, and security/incident management tabletop exercises;
- Conducted final testing of ACTIVU, a content management display system that enables users in geographically diverse locations to view the same displayed content, promoting better information sharing and ultimately aiding in event management;
- Expanded use of ADAPT (Automatic Detection and Processing Terminal), which provides TSA enhanced aviation situational awareness; and
- Created an updated operational pod for the National Capital Region Coordination Center, a multi-agency collaborative effort to oversee the security of the National Capital Region, on the TSOC Watch Floor to enhance the National Capital Region security with seven federal partners and three departments.

Planned accomplishments in FY 2011 include:

- Finalize the rollout of the ACTIVU system capability;
- Establish the National Airspace Coordination Center; and
- Establish training programs to include formal surveillance system operations training to enhance the National Capital Region security and Watch Officer resident training.

The FY 2012 request includes a \$745,000 adjustment-to-base for five Watch Officers to assist with TSA's increased vetting workload as a result of the December 25, 2009 bombing attempt. TSA also plans to enhance system capability on the TSOC Watch Floor to provide enhanced support for "No Fly" Watch List inquiries, and equipping the Watch Officers with a state-of-the-art training and certification process.

Airport Parking, Fleet Services, and Transit Benefits: \$24.8 million: This program provides parking at 28 participating airports for field staff. In addition, TSA provides transit benefits for field office employees as well as provides fleet services.

Airport Rent and Furniture: \$146.7 million: In support of its field operations, TSA leases over 3.5 million square feet of space with more than 700 leases at more than 450 airport locations. On-airport space is used for mission-critical direct TSO support, such as break rooms, lockers, and training facilities. These airport leases are typically short-term, requiring frequent re-negotiation. The annual rent is set by the local airport authority based on formulas to recapture operating costs, capital improvements, and major repairs. Annual increases are generally far greater than the change in the Consumer Price Index or any other general economic measure. Airport rent is far more expensive and far less predictable than general office space in other commercial buildings.

For FY 2012, TSA plans to begin application of the new space allocation and design guidelines to all field real estate projects, with the goal to better distribute the portfolio, and make efficient use of space.

FFDO and Flight Crew Training
Program Performance Justification
(Dollars in Thousands)**

PPA: FFDO and Flight Crew Training

	Perm Pos	FTE	Amount
2010 Actual	44	28	\$25,928
2011 C.R.	30	29	\$25,148
2012 Adjustments-to-Base	14	13	\$313
2012 Current Services	44	42	\$25,461
2012 Program Change	-	-	-
2012 Total Request	44	42	\$25,461

TSA requests \$25.5 million for this activity. The adjustments-to-base include \$313,000 and 13 FTE to support enhanced security initiatives.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Federal Flight Deck Officer Program (FFDO) program was created by the Arming Pilots Against Terrorism Act of 2003 (APATA – P.L. 107-296), which authorizes the deputation of qualified airline pilots to act as Federal law enforcement officers in order to defend the flight decks of aircraft against acts of criminal violence or air piracy. This voluntary program provides a combination of law enforcement training in firearms proficiency, self-defense tactics, authority, use-of-force, and decision-making in defense of both commercial and cargo aircraft.

The Crew Member Self Defense (CMSD) Program was established via the Vision 100 – Century of Aviation Reauthorization Act (FAA Reauthorization Act) in 2004. The Act requires TSA to develop and make available to flight and cabin crewmembers a voluntary, advanced self-defense training program as another means of safeguarding the civil aviation system.

(dollars in millions)

	FY 2011 C.R.	FY 2012
Federal Flight Deck Officer	\$23.7	\$24.1
Crew Member Self Defense	\$1.4	\$1.4
Total	\$25.1	\$25.5

In FY 2010, TSA permanently transferred \$1.5 million from the CMSD to the FFDO program in order to best meet recurrent training requirements for the thousands of existing FFDOs who are reaching their fourth and fifth years within the program. TSA continues to provide required bi-annual firearms requalification training to program volunteers and plans

to improve communications with FFDO participants by completing implementation of a dedicated e-mail and web portal system to more readily share and receive information.

TSA continues to provide CMSD training based on historic attendance and participation levels. Additionally, as a means of increasing participation in CMSD Training, TSA will continue to evaluate the use of Federal Air Marshal Field Offices as a way to provide training at more locations.

Significant accomplishments in FY 2010 included:

- Delivered initial training to an estimated 542 FFDOs;
- Provided recurrent training opportunities for 1,960 volunteers to maintain and update their required skills as FFDOs; and
- Completed 17,367 iterations of firearms requalification training which is required bi-annually for all existing FFDOs.

Planned accomplishments in FY 2011 include:

- Offer initial FFDO training to an estimated 650 new volunteers;
- Train and maintain the existing population of FFDO volunteers through recurrent training and firearms requalification; and
- Provide recurrent training (recertification) to approximately 4,000 volunteers.

In FY 2012, TSA plans to offer initial FFDO training to an estimated 250 new volunteers as well as train and maintain the existing population of FFDO volunteers through recurrent training and firearms requalification. The FFDO program expects to provide recurrent training (recertification) for approximately 4,000 volunteers and to provide CMSD Training based on historic attendance and participation levels.

2012 Total Request	760	730	114,654

The Transportation Security Administration requests \$114.7 million for this activity in FY 2012 which includes an adjustment-to-base of 4 FTE and a decrease of \$172,000.

PROGRAM DESCRIPTION:

The Aviation and Transportation Security Act of 2001 charges TSA with the implementation of statutory requirements for ensuring the security of transportation systems and passengers when cargo is transported by air.

The following table provides the components of this PPA.

(dollars in millions)

	FY 2011 C.R.	FY 2012
Air Cargo Policy and Programs and Technology	\$27.9	\$25.8
Air Cargo Inspectors and Proprietary Canine	73.6	\$73.7
National Explosive Detection Canine Training Program (NEDCTP)	13.3	15.2
Total	\$114.8	\$114.7

Air Cargo Policy and Programs and Technology: \$25.8 million: The program is responsible for securing the air cargo supply chain including cargo, conveyances, and people. The air cargo transportation system consists of approximately 450 domestic airports, 225 air carriers, and 4,100 indirect air carriers and shippers. An estimated 32 billion pounds of cargo is shipped within the United States by air annually. TSA focuses on two primary security threats related to the air cargo transportation system: (1) introduction of an explosive device on a passenger aircraft, and (2) the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

The Implementing Recommendations of the 9/11 Commission Act of 2007 (9/11 Act) required TSA to implement a system to ensure that 100 percent of all cargo on passenger aircraft is screened at a level commensurate with checked baggage. To meet this requirement, TSA has employed two phases for screening air cargo: (1) as of August 1, 2010, 100 percent of all cargo transported on a passenger aircraft departing a U.S. airport was required to be screened; and (2) on January 11, 2011, TSA published proposed revisions to the Standard Security programs for domestic and international air carriers, proposing that 100 percent of all cargo transported on a passenger aircraft from foreign last point of departure (LPD) into the United States be screened by December 31, 2011. Affected industry has up to 45 days to comment. This is TSA's standard notice and comment process for security programs.

TSA recognized that 100 percent screening could not be achieved solely by the aircraft operators screening cargo. To limit screening capacity to a single point within the cargo supply chain would create significant delays and missed flights, and ultimately impede the flow of commerce. To support the requirement on industry to screen 100 percent of air cargo transported on passenger aircraft from U.S. airports, TSA developed the Certified Cargo Screening Program (CCSP). CCSP allows screening of cargo at points throughout the supply chain by an approved Certified Cargo Screening Facility (CCSF) prior to the arrival of the cargo at airport.

To support the mandate for 100 percent screening, TSA approved a suite of screening technologies and associated protocols whereby screening entities may choose, on the basis of their unique requirements and commodities, the appropriate type of screening technology for the screening of cargo. While the 100 percent screening mandate has been achieved for cargo originating from U.S. airports, challenges remain for air cargo screening. As such, TSA is engaged in ongoing identification, evaluation and qualification of existing screening technologies as well as research and development for new technologies that will enhance the screening of air cargo in collaboration with S&T.

In support of systems for the enhanced screening of international air cargo, during FY 2010 TSA formally established an agreement with the Customs and Border Protection (CBP) National Targeting Center – Cargo (NTC-C) to increase information sharing between the agencies and explore the feasibility of leveraging CBP's Automated Targeting System (ATS) to assess the risk of inbound international cargo shipments. This risk assessment would be in addition to the requirement that air carriers ensure that 100 percent of international inbound air cargo on passenger flights is screened.

Significant accomplishments in FY 2010 included:

- Achieved 100 percent screening of cargo on passenger aircraft originating from U.S. locations as required by the 9/11 Act, as of August 1, 2010;
- Certified nearly 500 CCSFs, bringing the total, as of September 30, 2010, to 1,105 CCSFs;
- Renewed and certified approximately 4,100 Independent Air Carriers (IAC) within the United States and territories annually by verifying IAC corporate structure, compliance, and security posture; and
- Completed 343 (88 at two Category X airports and 255 at Category I airports) air cargo vulnerability assessments.

Planned accomplishments in FY 2011 include:

- Focus air cargo resources to ensure continued compliance domestically with the 100 percent screening requirement and work toward screening 100 percent international inbound air cargo on passenger aircraft and publish security program changes to increase screening requirements for international inbound to 100 percent;
- Identify and evaluate technology equipment to screen specific commodities: perishable, chemicals, and pharmaceuticals;
- Test, evaluate, and when appropriate, qualify existing technologies for use in complying with screening requirements for specific commodities;
- Issue the Air Cargo Screening Final Rule to codify requirements for 100 percent screening for U.S. uplifted cargo on passenger aircraft;
- Publish a major revision of the Full All-Cargo Aircraft Operator Standard Security; and
- Conduct a pilot to identify and evaluate the operational requirements for pre-departure data collection and risk assessment of inbound air cargo on passenger and all cargo carriers.

In FY 2012, TSA plans to achieve 100 percent screening for air cargo uplifted on passenger aircraft from LPD airports inbound to the United States to fulfill the requirements of the 9/11 Act. TSA will continue collaboration with ICAO, the European Commission, and other international stakeholders to harmonize air cargo security standards and advance the supply chain screening. Further, TSA will phase implementation of a program for pre-departure data collection and risk assessment of inbound air cargo on passenger and all cargo carriers.

Air Cargo Inspectors and Proprietary Canine Program: \$73.7 million:¹

TSA Transportation Security Inspectors-Cargo (TSI-Cs) perform compliance inspections, including special emphasis inspections, focused inspections, air cargo strikes (weeklong compliance enforcement surges focused on IACs, air carriers, and CCSFs within a single metropolitan area), investigations and tests of air carriers and IACs. TSA TSI-Cs also perform educational outreach to assist air carriers and IACs in complying with air cargo security mandates. TSI-Cs are located at 121 airports with high cargo volumes in the United States.

Air Cargo Inspectors enforce statutory and regulatory requirements and provide guidance to industry on securing air cargo. Inspectors ensure that air carriers (passenger and all-cargo) and indirect air carriers meet their operational responsibility by implementing the security requirements issued by TSA. This includes maintaining a TSA-approved security program that describes the security policies, procedures, and systems that must be implemented in order to comply with TSA security requirements. These requirements include measures related to the acceptance, handling, and inspection of cargo; training of employees in security and cargo inspection procedures; testing employee proficiency in cargo inspection; and access to cargo areas and aircraft.

¹ Of the \$73.7 million, \$15.6 million is allocated for the TSA Proprietary Canine Program. A more thorough description of Canine-Program related activities is included in the discussion under NEDCTP in the following section.

TSA inspectors carry out planned and random inspections of foreign and domestic air carriers and IACs. In addition, inspectors conduct monthly cargo strikes (week-long compliance exercises in a single metropolitan area) at airports and IAC facilities. TSA also promotes the full compliance with security requirements through outreach programs and collaboration with industry.

In FY 2010, there was a significant decrease in the number of cargo facilities ranked either high- or medium-risk. In addition, there was an overall lower average risk score among all air cargo facilities.

In FY 2010, TSA was authorized to hire an additional 50 TSI-Cs to augment the current staffing level and increase the number of inspections at domestic high cargo volume, high-risk airports and to oversee the CCSP and industry compliance with the 100-percent air cargo screening mandate. At the end of FY 2010, TSA's total allocation of Cargo Inspectors is 500 (not including canine handlers). In addition, TSA employs ten international air cargo inspectors who assess international airports and facilities. In FY 2011, the additional TSI-Cs will provide important coverage to over 1,140 current CCSFs and unlimited prospective CCSFs based upon massive outreach efforts.

The FY 2011 Compliance Work Plan (CWP) outlines goals for inspecting regulated entities based upon risk at the station level, in addition to the minimum entity inspection requirements. TSA calculates risk scores for airlines (which includes both passenger and all-cargo), IACs, and CCSFs. Risk scores will be utilized in FYs 2011 and 2012 to focus Inspector time during all field activities, including Cargo Strikes, Special Emphasis Inspections (SEIs) and testing. At a high-level, TSI-Cs conduct inspections based on following risk schema:

- Previous inspection and test results;
- Previous investigation/non-compliance history;
- Operation volumes; and
- Intelligence and other special considerations.

International Cargo Inspections: In addition to domestic inspections, TSA has developed and begun implementation of a strategy for 100 percent screening for international inbound cargo. TSA developed a process for the National Cargo Security Program's (NCSP) recognition and will assess and declare that other nation's cargo security programs are security-comparable to ours. TSA piloted the NCSP process through re-assessment of four legacy recognized programs. TSA has conducted a two-month pilot with CBP to explore the feasibility of collecting advance information on inbound air cargo by utilizing CBP's ATS.

Significant accomplishments in FY 2010 included:

- Conducted more than 55,000 regulatory inspections and special emphasis inspections;
- Began a major revision of the Full All-Cargo AOSSP by way of inspections and information exchanges with industry, inspectors and other TSA regulatory authorities;
- Established the first TSA-CBP Liaison at the CBP National Targeting Center for Cargo (NTC-C);
- Developed a Cargo Training Lab to better train TSI-Cs in overseeing air cargo screening;
- TSI canine teams screened 308 million pounds of cargo in FY 2010; and

- Conducted Advanced Training with 74 TSI canine teams.

Planned accomplishments in FY 2011 include:

- Notify industry of all cargo security requirements and enforce the 100 percent screening effort for domestic cargo;
- Provide regulatory compliance oversight of 225 domestic and foreign air carriers and aircraft operators, 4,100 IACs (at more than 10,000 facilities), and approximately 500 CCSF shippers and independent cargo screening facilities;
- Continue downward trend of the number of cargo facilities ranked either high- or medium-risk based targeted compliance efforts;
- Enhance air cargo screening testing by Inspectors; and
- Advance training for Cargo Inspectors

In FY 2012, TSA plans to achieve 100 percent system-wide screening for air cargo on passenger aircraft uplifted from U.S. locations and LPD airports inbound to the United States.

National Explosives Detection Canine Training Program (NEDCTP): \$15.2 million

Canines provide a valuable tool to assist in the screening of air cargo. TSA has funded 518 local law enforcement officer-led (LEO) canine teams at 78 airports. LEO teams spend a portion of their time in a cargo environment and associated facilities. In addition, TSA was funded for 170 additional cargo specific canine teams, split between LEO canine teams and proprietary (Federal handler) teams led by TSA cargo inspectors. The proprietary canine teams screen air cargo at 20 domestic airports with the greatest volume of passenger air cargo. The teams focus their efforts on screening large, bulk configurations as well as individual cargo pieces when appropriate. The full complement of 170 TSA canine teams has provided and continues to provide considerable screening capabilities for air cargo and continue to assist in maintaining the 100 percent screening of all passenger air cargo.

Projected FY 2012 Funded Canine Teams				
<u>Funding Source</u>	<u>Legacy Aviation</u>	<u>Proprietary</u>	<u>Mass Transit</u>	<u>Total</u>
Base Funding	468	45	117	630
Supplemental	50	120		170
FY 2011 Enhancement		100		100
Total	518	265	117	900

Significant accomplishments in FY 2010 included:

- Deployed an additional 35 TSA proprietary canine teams transitioned from current legacy (state/local) teams.

Planned accomplishments in FY 2011 include:

- Completed Phase IV Cargo Assessment. Program awaiting Final Report to determine the capability of explosives detection canines in certain cargo configurations;
- Continued deployment of 120 TSA Proprietary Canine Teams; and
- Conduct Third Party Canine Pilot to assess the efficacy of and determine the operational and programmatic requirements for the screening of air cargo by commercial canine providers.

In FY 2012, TSA plans to continue to train the TSA Proprietary teams to ensure that they maintain their proficiency in the field including assessing whether or not a recommendation should be made for the Third Party Canine Pilot. .

Per P.L. 111-83, beginning in FY 2010, this fee was moved from the Aviation Security to the TTAC appropriation and FY 2011 and FY 2012 information can be found under that appropriation.

This offsetting collection supports General Aviation (GA) flights into Reagan National (DCA) as provided by the Vision 100 Act. TSA levies a \$15 fee for each person onboard the flight for security threat assessments and flight authorization services. In addition, a \$296 fee per roundtrip is charged to flight operators for the screening personnel and equipment used to support such flights at DCA. These fee collections cover program costs associated with the legislated mandate requiring the establishment of a security program to allow GA flights into and out of DCA.

**Although the Aviation Security Passenger Security fee includes \$250 million set aside for the Aviation Security Capital Fund (ASCF), for display purposes it is not included above. The funding and display of the ASCF is provided separately.*

TSA proposes a restructuring of the airline security passenger fee for a total of \$2.3 billion, which will provide further offsets toward recovering costs for federal aviation security operations. This is an increase of \$589.9 million over FY 2011 assuming six months of collections in FY 2012.

CURRENT SERVICES PROGRAM DESCRIPTION:

TSA proposes a provision that will restructure the September 11th Passenger Security Fee. Under the FY 2011 fee structure, passengers pay \$2.50 per enplanement for a maximum of \$5.00 per one-way trip and \$10 per round trip. The FY 2012 Budget proposes a \$1.50 increase in the passenger fee beginning in the third quarter of FY 2012 to \$4.00 per enplanement for a maximum of \$8.00 per one way and \$16 per round trip. Since the security fee was established in 2002, it has not been adjusted for inflation or increased costs of providing security for the traveling public. A statutory cap on the fee set nine years ago, combined with limited discretionary resources, severely limits the TSA’s flexibility to meet its increasing aviation costs. Increasing the fee better aligns the fee with the costs associated with providing passenger security operations.

(Dollars in Thousands)**

FEE: AVIATION SECURITY INFRASTRUCTURE FEE (ASIF – Air Carrier Fee)

	Perm Pos	FTE	Amount
2010 Actual	282,144
2011 C.R.	420,000
2012 Adjustments-to-Base	0
2012 Current Services	420,000
2012 Program Change	0
2012 Request	420,000

TSA proposes a total of \$420 million in the Aviation Security Infrastructure fee collections for federal aviation security operations.

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2002, the Air Carrier Fee was assessed on the basis of an air carrier's 2000 passenger and property screening costs. In its 2005 report on this fee, GAO determined that the air carriers should be paying annual fees of \$425 to \$471 million compared with the \$315 million they had been paying. TSA utilized GAO's methodology as the basis to determine total industry costs for passenger and property screening. Choosing the mid-point of this range resulted in an annual fee collection of \$448 million. In June 2010, the U.S. Court of Appeals required TSA to decrease the overall limit of the fee. TSA determined that the new overall limit is \$420 million.

Description of Item

This initiative is for a total increase of \$82 million for Advanced Imaging Technology (AIT), of which \$75.8 million is in the Aviation Security Appropriation and \$6.2 million is in the Transportation Security Support Appropriation. This funding will be used to purchase an additional 200 AIT units above the 75 units in the Checkpoint Support base, bringing the total number of AITs to 1,275. In addition to the AIT units, this request includes an increase of 510 TSOs and 25 Federal Security Director staff to support the deployment of the 200 AIT units, as well as TSO support costs (e.g., supplies/consumables, training).

Justification

The increase of \$75.8 million is requested to maintain the acceleration of AIT deployment. Continuing to increase AIT deployments while ensuring privacy safeguards are in place is critical to address the current threat by safely screening passengers for metallic and non-metallic threats, including weapons, explosives, and other objects concealed under layers of clothing. TSA continues to expand the use of AIT systems and is currently testing Automatic Target Recognition (ATR) software that will reduce privacy concerns and increase throughput. ATR software for the millimeter wave systems is currently undergoing field testing and should be available for implementation on current TSA millimeter wave AITs in the summer of 2011. TSA has been working with the backscatter vendor to develop and test a similar ATR software and has several other vendor systems undergoing evaluation. TSA is also working with vendors to develop a reduced footprint AIT, which will be deployable to an even wider selection of airport checkpoints. The staffing increase is necessary to successfully operate the AIT machines without diminishing the current allocation of resources. Additional TSOs will provide divestiture information, operate the machines, and perform resolution screening at the checkpoint. TSA's request reflects an expected average AIT staffing requirement.

Impact on Performance

Terrorists have demonstrated their intent at striking aviation. An increase of \$75.8 million for 200 AIT units – in addition to the AITs funded in the base – will add more effective and consistent levels of protection against acts of aggression and will reduce the risk to the traveling public.

AIT screens passengers for concealed weapons (metal and nonmetal), explosives, and other prohibited items, and is the most effective passenger screening technology currently available. This deployment will support screening of 80 percent of all air passengers.

Description of Item

This initiative is for a total increase of \$21.9 million for 350 FTP/ 175 FTE new Behavior Detection Officers (BDOs), of which \$18.3 million is in the Aviation Security Appropriation and \$3.6 million is in the Transportation Security Support Appropriation. This initiative will expand TSA’s Screening of Passengers by Observation Technique (SPOT) program.

Justification

TSA’s SPOT program is a behavior and analysis program in which personnel are trained to identify anomalous behaviors that deviate from an established environmental baseline. SPOT personnel are known as BDOs who observe the security checkpoint to identify passengers that

are emphasizing non-verbal, potentially high-risk behaviors. In FY 2010, SPOT referred 50,172 passengers for additional screening resulting in 3,569 law enforcement officer calls yielding 314 arrests.

The current SPOT program is comprised of approximately 3,000 BDOs at 161 airports. BDOs serve as an additional layer of security in airports by providing a non-intrusive means of identifying individuals who may pose a risk of terrorism or criminal activity. The requested additional BDOs will be allocated based on risk to both small airports and larger airports.

Impact on Performance (Relationship of Increase to Strategic Goals):

Terrorists have demonstrated their intent to strike aviation. An increase of \$18.3 million for 350 additional BDO positions will add more effective and consistent levels of protection at the Nation's airports and will reduce the risk to the traveling public.

Program Increase – Airport Management and Support							0	0	\$564
Total Request	3,600	3,341	\$713,030	4,428	4,065	\$852,493	4,919	4,548	\$942,137

Description of Item

This initiative is for a total increase of \$26.8 million to fund an additional 12 multi-modal Visible Intermodal Prevention and Response (VIPR) teams, of which \$23.5 million is in Aviation Security Appropriation and \$3.3 million is in the Transportation Security Support Appropriation. TSA formed dedicated VIPR teams in FY 2008, as requested in the FY 2008 Budget Amendment. In FY 2010, TSA expanded inspection, behavior detection, security screening, and law enforcement for random unpredictable deployments throughout the transportation sector to prevent potential terrorist and criminal acts.

Justification

VIPR teams provide a tool with unique capabilities for use within the transportation system. VIPR teams may also augment transportation security during periods of heightened threat. The additional requested positions and associated resources will enable TSA to enhance the nationwide footprint for VIPR operations and enhance capability to:

- Deploy teams to cover high-risk transportation infrastructure, address intelligence-driven threats or support special event operations within various transportation sectors; and
- Supplement local mass transit agency security capabilities in response to a specific intelligence-driven threat or incident.

Impact on Performance

Terrorists have demonstrated their intent to strike the transportation sector. An increase of \$26.8 million for 12 additional multi-modal VIPR teams will add more effective and consistent levels of protection against acts of aggression and will reduce the risk to the traveling public. The requested additional VIPR teams will give TSA the ability to significantly increase the number of annual deployments and further mitigate risk in the transportation sector.

IV. Program Justification of Changes

**Department of Homeland Security
Transportation Security Administration
Aviation Security
Justification of Program Changes
(Dollars in Thousands)**

Program Decrease 4: Screening Technology Maintenance

Quadrennial Homeland Security Review (QHSR) Goal & Objective: Goal 1.1: Prevent Terrorist Attacks
Objective 1.1.2: Deter and disrupt operations

PPA: Screening Technology Maintenance

Program Decrease: Positions 0, FTE 0 Dollars \$-17.6 million

Funding Profile

	FY 2010 Actual			FY 2011 C.R.			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	\$349,865
Program Decrease							-	-	-17,600
Total Request	-	-	\$298,637	-	-	316,625	-	-	\$332,265

Description of Item

The FY 2012 Request reflects a \$17.6 million base reduction to the Screening Technology Maintenance PPA. TSA will reduce Checked Baggage Equipment Maintenance by \$3.6 million and Checkpoint Equipment Maintenance by \$14.0 million.

Justification

In support of the QHSR Objective 1.1.2: Deter and disrupt operations, TSA proposes to reduce the Screening Technology Maintenance PPA by \$17.6 million in FY 2012. The FY 2012 requested level will adequately fund the maintenance of all deployed screening equipment. This reduction can be absorbed given that, with the procurement of new technologies, TSA benefitted from the extension of Transportation Security Equipment (TSE) maintenance warranties from 12 to 24 months, creating efficiencies that can be used to fulfill other programmatic needs.

Impact on Performance

The proposed reduction will not impact the necessary levels of maintenance or security.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Transportation Security Administration
Justification of Proposed Changes in Aviation Security
Appropriation Language**

For necessary expenses of the Transportation Security Administration related to providing civil aviation security services pursuant to the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat. 597; 49 U.S.C. 40101 note), \$5,401,165,000, to remain available until September 30, 2013, of which not to exceed \$10,000 shall be for official reception and representation expenses: Provided, That of the total amount made available under this heading, not to exceed 4,316,308,000 shall be for screening operations, of which \$605,003,000 shall be available for explosives detection systems; and not to exceed \$1,084,857,000 shall be for aviation security direction and enforcement: Provided further, That of the amount made available in the preceding proviso for explosives detection systems, \$272,738,000 shall be available for the purchase and installation of these systems: Provided further, That any award to deploy explosives detection systems shall be based on risk, the airport's current reliance on other screening solutions, lobby congestion resulting in increased security concerns, high injury rates, airport readiness, and increased cost effectiveness: Provided further, That security service fees authorized under section 44940 of title 49, United States Code, shall be credited to this appropriation as offsetting collections and shall be available only for aviation security: Provided further, That the sum appropriated under this heading from the general fund shall be reduced on a dollar-for-dollar basis as such offsetting collections are received during fiscal year 2012, so as to result in a final fiscal year appropriation from the general fund estimated at not more than \$2,689,665,000: Provided further, That any security service fees collected in excess of the amount made available under this heading shall become available during fiscal year 2013: Provided further, That notwithstanding section 44923 of title 49, United States Code, the share of the cost of the Federal Government for a project shall not exceed 90 percent, and any funds in the Aviation Security Capital Fund established [all funding provided] by section 44923(h) of title 49, United States Code, may be distributed in any manner deemed necessary to ensure aviation security: Provided further, That Members of the United States House of Representatives and United States Senate, including the leadership; the heads of Federal agencies and commissions, including the Secretary, Deputy Secretary, Under Secretaries, and Assistant Secretaries of the Department of Homeland Security; the United States Attorney General and Assistant Attorneys General and the United States Attorneys[attorneys]; and senior members of the Executive Office of the President, including the Director of the Office of Management and Budget; shall not be exempt from Federal passenger and baggage screening.

Note.--A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111-242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

Explanation of Change:

Current law requires that the first \$250,000,000 derived from passenger and air carrier security fees in each of fiscal years 2004 through 2028 be deposited in an Aviation Security Capital Fund (ASCF) to be available for grants to airport sponsors for airport security improvement projects, including projects to enable TSA to deploy explosives detection systems (EDS) at airports. This proposal would permit the ASCF to be used additionally for TSA to procure and install EDS equipment, including to replace EDS equipment originally installed in conjunction with projects funded by the ASCF that has reached the end of its anticipated useful life.

Required funding for most of the security improvement projects currently under consideration or identified for CAT X and CAT I airports is expected to be obligated using FY11 and prior year available funds. While additional projects may be developed for consideration, TSA has not received security improvement project funding agreement applications for other CAT X or CAT I projects.

A critical need exists, on the other hand, for TSA to procure and install large quantities of the EDS equipment itself, in order to replace aging and less up-to-date security technologies. TSA currently has approximately 2,000 EDS units deployed nationwide. By 2013, almost half of those units will have reached the end of the anticipated useful life of 10 years.

INITIATIVE #1

TSA – ELECTRONIC BAGGAGE SCREENING PROGRAM (EBSP)

1. Project Description, Justification and Scope

The Electronic Baggage Screening Program (EBSP) implements a national checked-baggage screening system to protect against criminal and terrorist threats, while minimizing transportation industry and traveling public burdens. TSA provides life-cycle procurement, deployment, integration, and maintenance of security equipment at over 450 U.S. airports. This program includes: (1) maintaining first generation Explosives Detection Systems (EDS), and Explosives Trace Detection (ETD) devices deployed after 9/11; (2) improving efficiency and effectiveness by acquiring and deploying next generation inline explosives detection technology, and by relocating lobby equipment at some airports; and (3) Efforts to establish operational, functional, performance and integration requirements for TSA security screening equipment.

While the Congressionally-mandated requirement for 100 percent screening of aviation-checked baggage by electronic or other approved means has been achieved, the program must continue to

research, evaluate, and deploy refinements to EDS and ETD technology and associated systems, that allow for improvements in: (1) throughput (checked bags per hour), (2) false alarm rate, (3) system availability, and (4) total cost of ownership for baggage screening (cost per checked bag). Equipment must be also be relocated from airport lobby areas to baggage room areas.

The following programs are funded under EBSP:

a) Operation Integration (OI): TSA analyzes integration of new technologies into existing systems to ensure operational effectiveness and suitability before full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment in the field in a variety of environmental conditions. The division conducts:

- Operational test and evaluation as part of the acquisition process for items procured by TSA
- Pilots, demonstrations, and field experimentation in support of mission area analyses, concept of operations development and workforce characterization

2. Significant Changes

TSA is reducing the EDS Procurement and Installation base in FY 2012 by \$84 million. This reduction will not impact current levels of checked baggage screening or aviation security.

3. Project Schedule

	Fiscal Quarter and Year				Total Estimated Completion Cost (\$000)	Total Project Cost (\$000)

5. Cost Estimate Detail and Changes
(Dollars in Thousands)

Description of Milestone	Initial Total Cost (\$mil)	Planned Total Cost (\$mil)	Actual Total Cost (\$mil)	Explanation of Difference Between Current and Previous Estimate
(FY02-FY07) Program initiation (MNS, ConOps draft); Deployed systems for facility mods, Strategic Program Plan, & NEXGEN. Updated Strategic Plan, LCCE, CBA, Deployment Schedule; Performed program/tech mgmt, system deployment, & O&M, per deployment plan. Maintained equipment	3,346,127	3,346,127	2,971,762	Airport scheduling delays slowed deployment of equipment.
(FY08) Perform program management, system deployment, O&M, tech management , and maintenance utilizing final strategic plan	758,210	758,210	743,303	Airport scheduling delays slowed deployment of equipment.
(FY09) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan; and perform operations and maintenance utilizing final strategic plan.	782,518	782,518	720,756	Airport scheduling delays slowed deployment of equipment and acquisition of EDS equipment delayed due to competitive award.
(FY10) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan; and perform operations and maintenance utilizing final strategic plan.	1,253,373	1,253,373	581,810	Airport scheduling delays slowed deployment of equipment and acquisition of EDS equipment delayed due to competitive award.
(FY11) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan and for recapitalization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing final strategic plan.	847,207	847,207		

(FY12) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan and for recapitalization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing final strategic plan.	744,677	744,677		
---	---------	---------	--	--

*FY02 – FY12 excludes STIP and ASP

*FY11 – FY12 excludes Surface and Cargo

6. Method of Performance

EBSP is a twenty year program. Expenditures are approved based on an overall strategic plan that is submitted to Congress annually. Operational performance will be measured based on the following criteria:

- 100 percent electronic screening of checked baggage for explosives at all commercial airports nationwide
- Percent of checked bags screened with electronic detection systems (EDS) that maximize security effectiveness and efficiency
- Cost per bag screened
- Operational availability of baggage screening equipment

7. Related Annual Funding Requirements (Dollars in Thousands)

	FY 2011	
	Current Estimate	Previous Estimate
N/A (All operations and maintenance are included in program cost estimates.)	N/A	N/A
Total	N/A	N/A

8. Budget Allocation to Programs

Program	Allocated Budget (\$000)	
	FY 2011	FY 2012
EDS/ETD Purchase & Install	608,984	491,462
Screening Technology Maintenance [& Utilities]	238,675	253,667
Total	847,659	745,129

*FY02 – FY12 excludes STIP and ASP

*FY11 – FY12 excludes Surface and Cargo

9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

This program is mandated under the Aviation and Transportation Security Act (P.L. 107-71) which requires screening of checked baggage by EDS.

Initiative #2

TSA – PASSENGER SCREENING PROGRAM (PSP)

1. Project Description, Justification and Scope

The Passenger Screening Program (PSP) serves as the Transportation Security Administration's (TSA) Program Management Office responsible for aviation checkpoint security equipment for federalized airports. PSP's mission is to provide technologies that assist Transportation Security Officers in denying entry to potential threats directed against the air transportation network. PSP's mission aligns to TSA's mission of protecting the Nation's transportation systems to ensure the freedom of movement for people and commerce and the DHS mission of Preventing Terrorism and Enhancing Security, by embodying two associated goals into program operations: Preventing Terrorist Attacks and Managing Risks to Critical Infrastructure. PSP protects the travelling public and adapts to evolving security conditions by identifying and evaluating risks to passenger screening checkpoints and mitigating threats to infrastructure including terminals, aircraft and checkpoints. PSP consists of three security technology portfolios: people screening technologies, carry-on screening technologies and layered security technologies. Each portfolio consists of subordinate security technology projects that focus on specific threat mitigation systems. PSP-managed technologies screen over two million passengers and their carry-on items for weapons, explosives and prohibited items at over 450 airports nationwide each day. Program objectives include increasing detection, limiting false alarms, enhancing efficiency, consolidating equipment footprint and centralizing results monitoring to support checkpoint staffing reductions. To realize these goals, PSP is moving from independently-functioning technologies to optimized, integrated technologies that are easier to upgrade via software upgrades. The system-of-systems security architecture will enable TSA to address both known vulnerabilities and emerging threats in the most comprehensive manner possible. PSP balances its duties with considerations such as passenger privacy, dignity, safety, and health, while maintaining affordability, deployment, maintenance and other life cycle issues. Accomplishments include the replacement of legacy systems with Enhanced Metal Detectors and Threat Image Protection Ready X-ray systems, expanded use of Explosives Trace Detectors and the deployment of emerging technologies such as Advanced Technology X-ray systems, Bottled Liquids Scanners, Chemical Analysis Detectors and Advanced Imaging Technology.

2. Significant Changes

A reduction in the amount of AITs planned to be purchased in FY 2012, as compared to the FY 2011 plan.

Total Project Costs	\$ 1,023,370	\$ 204,124	\$ 320,143	\$ 318,741	\$1,866,378

*Excludes STIP and ASP

5. Cost Estimate Detail and Changes (Dollars in Thousands)

Description of Milestone	Planned Total Cost	Actual Total Cost	Explanation of Difference
Procurement and Deployment (FY2006)	95,060	88,733	Program received quantity discount and awards lower than estimate
Procurement and Deployment (FY2008)	228,248	198,057	Funding still planned for obligations

*Excludes STIP and ASP

6. Method of Performance

Expenditures are approved based on an overall strategic plan that is submitted to Congress annually.

Operational performance will be measured based on the following criteria:

- Cost per passenger screened
- Availability of fielded screening systems successfully detecting threats at specified levels

**7. Related Annual Funding Requirements
(Dollars in Thousands)**

	FY 2012	
	Current Estimate	Previous Estimate
N/A (All operations and maintenance are included in program cost estimates.)	N/A	N/A
Total	N/A	N/A

8. Budget Allocation to Programs

Program	Allocated Budget (\$000)	
	FY 2011	FY 2012
Checkpoint Support*	242,193	240,143
Screening Technology Maintenance [and Utilities]**	77,950	78,598
Total	320,143	318,741

*Excludes STIP and ASP

** Screening technology maintenance and utilities were combined to one PPA in FY 2008

9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

This program is mandated under the ATSA (P.L. 107-71) which requires screening of all passengers and property including carry-on baggage and other articles that will be carried aboard a passenger aircraft.

PPA Mission Statement

Provides the ATSA mandated and discretionary training to new TSO hires and the recurrent training of the TSO workforce. Provides all the operational support, such as consumables; uniforms; supplies; claims; etc. to maintain the TSO workforce.

Summary Justification and Explanation of Changes

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$7,625	\$7,630	\$7,630	\$0

Salaries and Benefits includes costs for 47 FTEs. The FY2012 request transfers 8 FTE to Aviation Regulation.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$37,566	\$38,000	\$38,079	\$79

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request includes funding for program changes.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Transportation of Things	\$929	\$929	\$929	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Other Rent	\$335	\$342	\$342	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Communication, Utilities, and miscellaneous charges	\$105	\$105	\$105	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Printing	\$361	\$361	\$361	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Advisory and Assistance Services	\$7,297	\$7,297	\$3,086	(\$4,211)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request includes contractor conversions associated with the tort claims process.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Other Services	\$90,860	\$108,285	\$110,865	\$2,580

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request includes funding for basic and advanced training in support program increases.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Purchase from Government Accounts	\$8,571	\$8,571	\$8,571	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & maintenance of facilities	\$7,056	\$7,056	\$7,056	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Medical Care	\$8	\$8	\$8	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & Maintenance of equipment	\$53	\$53	\$53	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Supplies & materials	\$39,361	\$51,499	\$66,884	\$15,385

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request includes funding related to consumables associated with program increases.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Equipment	\$7,866	\$7,866	\$7,866	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Land & Structures	\$1	\$1	\$1	\$0

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Indemnity	\$690	\$690	\$690	\$0

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act.

PPA Mission Statement

The Checkpoint Support PPA provides the resources required to deploy passenger screening, carry-on baggage screening and electronic surveillance equipment. This equipment is a vital component of TSA's efforts to secure our nation's air transportation.

Summary Justification and Explanation of Changes

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$6,229	\$9,864	\$9,847	(\$17)

Salaries and Benefits includes costs for 61 FTEs. The FY 2012 request includes base adjustments of salaries and benefits to other PPAs for resource realignments.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$558	\$935	\$935	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Transportation of Things	\$3	\$16,575	\$4,000	(\$12,575)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2012 request reflects a consolidation of contracts and a lower level of systems in the base to be procured.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Other Rent	\$2,093	\$1,200	\$0	(\$1,200)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2012 request reflects the purchase of a facility previously rented.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Advisory and Assistance Services	\$161,877	\$106,193	\$87,252	(\$18,941)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request reflects a smaller base amount of equipment funded and the change in support services needed to deploy them.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Other Services	\$12,201	\$4,000	\$4,500	\$500

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request includes funds that will be used to fund multiple Other Transaction Agreements (OTAs).

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Purchase from Government Accounts	\$47	\$0	\$0	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & maintenance of facilities	\$1,596	\$2,050	\$2,500	\$450

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2012 request includes funding for warehouse operations and facilities for security equipment.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & Maintenance of equipment	\$833	\$0	\$0	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Subsistence & Support of Persons	\$211	\$0	\$0	\$0

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Supplies & materials	\$170	\$95	\$65	(\$30)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

^{1/}The table above includes American Recovery and Reinvestment Act (ARRA; P.L. 111-5) funding of \$253.6 million

PPA Mission Statement

EDS/ETD Purchase and Installation is the purchase of electronic baggage screening equipment for deployment and the installation of electronic baggage screening equipment in our nation's airports. The deployment of this equipment is a key component of TSA's ability to ensure the security of the air transportation system. Installation is an integral cost associated with the deployment of equipment that enhances the security of our air transportation system.

Summary Justification and Explanation of Changes

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$15,761	\$19,459	\$18,447	(\$1,012)

Salaries and Benefits includes costs for 114 FTEs. The FY2012 request includes base adjustments of salaries and benefits to other PPAs for resource realignments.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$632	\$1,500	\$1,500	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request has no change.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Transportation of Things	\$0	\$2,000	\$2,000	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Other Rent	\$998	\$800	\$800	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Communication, Utilities, and miscellaneous charges	\$90	\$550	\$550	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Advisory and Assistance Services	\$429,281	\$148,650	\$111,288	(\$37,362)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request includes a portion of installation efforts being funded from the Aviation Security Capital Fund (ASCF). The FY 2012 request assumes enactment of the legislative proposal that the ASCF will fund equipment purchases and installations as well as facility modifications in FY 2012.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Other Services	\$26,495	\$20,076	\$20,076	\$0

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Purchase from Government Accounts	\$145	\$0	\$0	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & maintenance of facilities	\$903	\$4,297	\$4,297	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & Maintenance of equipment	\$2,095	\$1,306	\$1,306	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Subsistence & Support of Persons	\$977	\$0	\$0	\$0

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Supplies & materials	\$188	\$27	\$27	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Equipment	\$118,187	\$191,595	\$112,447	(\$79,148)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2012 request reflects plans to purchase equipment with Aviation Security Capital Fund (ASCF) funding in FY 2012. The request assumes enactment of the legislative proposal that the ASCF will fund equipment purchases and installations as well as facility modifications in FY 2012.

PPA Mission Statement

The purpose of Aviation Regulation and Other Enforcement is to provide activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the nation's commercial airports. Funding requested under this decision unit supports airport regulation compliance through domestic and international inspections, K-9 units, international outreach programs to ensure alignment and consistency in security requirements of the United States and those of the other nations to ensure transportation system integrity; and reimbursements provided to State and local law enforcement for support provided at commercial airport checkpoints.

Summary Justification and Explanation of Changes

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$142,639	\$164,908	\$209,166	\$44,258

Salaries and Benefits includes costs for 1,889 FTEs. The FY 2012 request reflects program increases and correlating FTE.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$11,912	\$13,000	\$13,284	\$284

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations.

PPA Mission Statement

Airport Management and Support provides funding for each Federal Security Director and staff at each hub airport along with the headquarters personnel who direct the policy, analysis, and the administration of aviation screening and airport security. In addition, this PPA supports aviation functions at TSA's Transportation Security Operations Center. These offices and positions are critical to supporting the front-line operations of our TSOs.

Summary Justification and Explanation of Changes

	2010	2011	2012	2011 to 2012

PPA Mission Statement

TSA is provides the Federal Flight Deck Officer (FFDO) and Flight Crew Training programs to deputize qualified airline pilots as federal law enforcement officers and to train flight crew members to defend the flight decks and cabins of aircraft against acts of criminal violence or air piracy. This voluntary program provides training in firearms proficiency, self-defense tactics, authorities, and decision-making to defend the cockpit.

Summary Justification and Explanation of Changes

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$4,408	\$4,393	\$6,059	\$1,666

Salaries and Benefits includes costs for 42 FTEs. The FY 2012 request includes an additional 13 FTE.

PPA Mission Statement

The Air Cargo program operates through compliance activities, regulatory efforts, outreach initiatives, and technology implementation. TSA uses a threat-based risk management approach based on two threats: 1) introduction of an explosive device on a passenger aircraft, and 2) the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

Summary Justification and Explanation of Changes

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$73,573	\$84,377	\$84,477	\$100

The FY 2012 request reflects increase of \$100,000 from the FY 2012 for 4 new positions from within the base.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$5,526	\$1,923	\$2,341	\$418

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request includes costs associated with inspections.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Transportation of Things	\$26	\$0	\$0	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
GSA rent	\$100	\$771	\$169	(\$602)

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request reflects an Object Class correction.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Other Rent	\$103	\$0	\$103	\$103

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2013 budget.

TRANSPORTATION SECURITY ADMINISTRATION requests \$0 and 47 FTE for the FY 2012 DHS Balanced Workforce Strategy.

Annualization of FY 2011 DHS Balanced Workforce Strategy

Not Applicable

DHS Balanced Workforce Strategy Follow-On

- The FY 2012 DHS Balanced Workforce includes 49 FTP, 47 FTE and \$0 for various Aviation programs:
 - TSA does not have plans for the conversion of contracts in FY 2012.
 - TSA does not need funds for Annualization of FY 2011 DHS Balanced Workforce.
 - TSA’s FY 2012 budget request reflects an additional 49 FTP/47 FTE that resulted from contract conversions completed in FY 2010. These positions were annualized in FY 2011, and full costs were included in the FY 2012 current services.

BUDGET REQUEST AND SUPPORTING INFORMATION

Surface Transportation Security:

I. Appropriation Overview

A. Mission Statement for Surface Transportation Security:

The Transportation Security Administration (TSA) is mandated to protect the surface transportation system and to ensure the freedom of movement and the security of people and commerce. This mission is accomplished largely by a consortium of Federal, State, local, and private entities optimizing resources in a risk-based approach to security. In addition to sector and modal planning and coordination, TSA provides operational deterrence support through surface security inspectors, canine teams, and Visible Intermodal Prevention and Response (VIPR) teams. TSA also provides other protective resources such as: training, personnel funding and capital improvements through grants programs, such as the Transit Security Grants Program; screening and detection programs; voluntary guidelines and best practices; regulations; security and process standards; vulnerability and risk assessment teams as well as subject matter expertise to the Federal Emergency Management Agency (FEMA) for surface transportation security grant programs.

Various statutes and executive directives require that transportation risk reduction activities be determined and implemented collaboratively in accordance with strategic plans developed with security partners. These combined efforts play an essential role in DHS' mission to prevent terrorist acts within the United States, to reduce vulnerability to terrorism, to minimize the damage from potential attacks and disasters, and to improve system resilience after an incident. The surface domain includes:

- 1) Approximately 751 million passengers traveling on commercial buses each year and over 9 billion passenger trips on publicly operated mass transit per year.
- 2) Over 140,000 miles of railroad track (of which 120,000 miles are privately owned); 3.8 million miles of roads (46,717 miles of interstate highway and 114,700 miles of National Highway System roads); 582,000 bridges over 20 feet of span; 54 tunnels over 19,685 feet in length, and nearly 2.5 million miles of pipeline.
- 3) Nearly 800,000 shipments of hazardous materials transported every day (95 percent by truck).
- 4) The Marine Transportation System consisting of waterways, ports, and their connections, as well as commercial and recreational vessels, vehicles, and system users, such as importers and exporters. This system is geographically vast, with 95,000 miles of shoreline, 25,000 miles of rivers and canals, and is the primary transportation mode providing connectivity between the United States and global economies; 99 percent of overseas trade by volume enters or leaves the United States by ship.

The threat to surface transportation security has been growing over the past decade. Surface transportation remains an attractive target both globally (witness the bombings in Madrid in 2004, London in 2005, Mumbai, India in 2006, and Moscow in both 2004 and 2010) and within the United States. For example: in 2007 Russell Defreitas and three others planned to attack

pipelines at the John F. Kennedy Airport; in 2008 there was a threat to New York City commuter rail; in 2009 Najibullah Zazi planned to bomb the New York City subway and in 2010 Faisal Shahzad left a car with gas, propane, fertilizer, and firecrackers at Times Square in New York City. To counter the dynamic, yet enduring nature of the threat to surface transportation, TSA, its government partners, and industry owners and operators have committed to improve the security and resilience of the transportation system.

TSA plays a pivotal role in strengthening Surface Transportation Security. The *Implementing Recommendations of the 9/11 Commission Act of 2007* (9/11 Act) requires TSA to take specific measures to strengthen specific modes of transportation by conducting modal security assessments, requiring modal security plan development, providing guidelines for modal security training, and conducting exercise activities to reinforce those security plans. Additionally, the President's Surface Transportation Priority Security Assessment designates TSA as the lead agency for implementing 17 of the report's 20 recommendations, and requires TSA to support the lead agency for two additional recommendations. The Surface Transportation Security budget request for FY 2012 reflects TSA's continuing efforts to improve surface transportation security pursuant to these requirements.

B. Budget Activities:

This appropriation includes two major programs, Surface Transportation Security Staffing and Operations, and Surface Transportation Security Inspectors and Canines.

Surface Transportation Security Staffing and Operations - Provides funding for the coordination among all surface security stakeholders of processes and programs to: (1) identify and remediate unacceptable risks to critical infrastructure from all types of hazards; and (2) develop a regulatory framework and the administrative policy for national security strategies, plans, and programs that identify innovative solutions and best practices.

Surface Transportation Security Inspectors and Canines - Employs a cadre of inspectors and canine teams to assess compliance, national program delivery, and provide outreach on security assets in the surface transportation system. These resources interact daily within the transportation network to enhance security measures and are available for surge operations during times of heightened security. These inspectors and canine teams are an integral part of TSA's VIPR program.

C. Budget Request Summary:

The Transportation Security Administration requests 807 positions, 775 FTE, and \$134,748,000 for FY 2012. The total adjustment-to-base is \$24,232,000.

II. Summary of FY 2012 Budget Estimates by Program/Project Activity (PPA)

Department of Homeland Security
Transportation Security Administration
Surface Transportation Security
 Summary of FY 2012 Budget Estimates by Program/Project Activity
 (Dollars in Thousands)

Program/Project Activity	FY 2010 Actuals		FY 2011 C.R.		FY 2012 Request		Increase (+) or Decrease (-) For FY 2012					
	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	Total Changes		Program Changes		Adjustments-to-Base	
							FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT
Staffing and Operations	154	\$48,075	165	\$39,792	153	\$38,514	(12)	(1,278)	---	0 00	(12)	(1,278)

Surface Transportation Security:
Staffing and Operations
Program Performance Justification**
(Dollars in Thousands)

PPA: Staffing and Operations

	Perm		
	Pos	FTE	Amount
2010 Actuals	171	154	\$48,075
2011 C.R.	171	165	39,792
2012 Adjustments-to-Base	(13)	(12)	(1,278)
2012 Current Services	158	153	38,514
2012 Program Change	-	-	-
2012 Total Request	158	153	38,514

The Transportation Security Administration requests \$38.5 million for this activity in FY 2012. This includes a \$2.1 million permanent realignment of resources to TSA's Aviation Security Appropriation, Transportation Security Operations Center, where the program resides.

CURRENT SERVICES PROGRAM DESCRIPTION:

TSA, in accordance with the Aviation and Transportation Security Act (ATSA), is responsible for assessing security threats, vulnerabilities, and consequences in all surface transportation modes. Further, TSA is charged with identifying needed security enhancements for surface transportation and related infrastructure, as well as developing security plans, and issuing and enforcing regulations to improve modal security. Homeland Security Presidential Directives (HSPD) 7 and 8 expand TSA's security responsibilities to include coordination of preparedness, response, and recovery activities for all hazards threatening the critical infrastructure and systems that comprise the Transportation Systems Sector.

The key strategic plans and requirements documents driving TSA's security efforts are the Executive Order to Strengthen Surface Transportation, the Intelligence Reform and Terrorism Prevention Act (IRTPA) of 2004, the National Infrastructure Protection Plan, the 9/11 Commission Act of 2007, and the DHS Strategic Plan. The following activities are supported by Staffing and Operations:

Multi-modal Activities:

National Transportation Strategies and Plans: TSA develops multiple strategies and plans for the protection of transportation assets, such as the Transportation Systems Sector-Specific Plan, strategic modal security plans as required by the IRTPA, and national strategies for public transportation, railroads, and a pipeline system recovery plan as required by the 9/11 Act. The development and planning process for each strategy and plan requires extensive coordination and outreach to engage Federal, State, local, tribal and territorial governments, owners and operators of transportation infrastructure, private sector stakeholders, and non-profit employee representative organizations. TSA strives to minimize the overlap in planning requirements and to provide a unified process for its stakeholders.

For example, by letter dated September 8, 2009, Congress gave TSA approval to combine the National Strategy for Transportation Security (NSTS) and the modal plans with the 2010 Transportation System Sector-Specific Plan. The 2010 Transportation System Sector-Specific Plan was the first sector strategic plan produced under the current administration and combines the Transportation Systems Sector-Specific Plan, the NSTS, the National Strategy for Railroad Security, the National Strategy for Public Transportation Security, and the National Maritime Transportation Security Plan.

9/11 Regulations: In response to the 9/11 Act, TSA is issuing a regulation mandating that freight rail employers, public transportation agencies, passenger rail carriers, and over-the-road-bus (OTRB) operators develop comprehensive security plans and conduct vulnerability assessments. TSA is preparing multiple rulemakings to cover each of these modes of surface transportation, as well as motor carriers transporting Highway Security Sensitive Materials. In order to maintain consistency, these rules will cover the same population of entities as covered by the Security Training Programs for Surface Mode Employees Notice of Public Rule Making (NPRM). TSA expects to issue the NPRMs for surface mode security plans and vulnerability assessments during FY 2012.

The 9/11 Act also requires employees across the surface transportation and aviation modes to complete Security Threat Assessments (STAs). The Transportation Threat Assessment and Credentialing office is preparing a rulemaking to consolidate, coordinate, and harmonize background checks for employees across these different modes of transportation. TSA will work with other agencies that conduct background checks to avoid redundancies. TSA expects to issue the NPRM for the STA in FY 2012.

Surface Transportation Security Priority Assessment: TSA is responsible for implementing and managing 17 of the Surface Transportation Security Priority Assessment Report's 20 recommendations, and will also support the lead agency for an additional two recommendations. The implementation costs for many of these recommendations are reflected in other program budget justifications (i.e., credentialing and security threat assessment, grants initiatives). However, TSA is required to establish a single data repository for all Federally-obtained security risk-related information on transportation systems and assets. This will require TSA to

inventory, store, maintain, and make available surface transportation risk assessment information to transportation security industry partners. In FY 2010, TSA developed a database taxonomy that will support the storage and maintenance of all Federally-obtained transportation security risk-related information. In FY 2011, testing will begin on the functioning, prototype risk database to determine the appropriate next steps towards achieving this important goal. The prototype will include information from a variety of previous assessments and data gathering efforts relating to risk management activities.

Grant Oversight and Management: TSA provides subject matter expertise and programmatic support to the Grants Program Directorate at FEMA to determine funding priorities and allocation methodologies; issue guidance; and evaluate and approve grant applications for intercity bus, trucks, freight rail, mass transit, ferry, and passenger rail systems. Representatives from the TSA's Port & Intermodal Security Division are members of the Executive Steering Committee, as well as the National Review Team for the port security grant program. The grants are awarded based on risk.

Intermodal Security Training Exercise Program (I-STEP): TSA's I-STEP meets the requirements of the 9/11 Act by creating a security exercise program in the mass transit, freight rail, pipeline, maritime, and OTRB sectors. I-STEP provides programmatic support to modal General Managers that include the development of training and security awareness material, strategic planning; transportation risk management analysis, stakeholder outreach and modal/multi-modal security program planning. I-STEP supports DHS FY 2009 – 2013 Integrated Planning Guidance and TSA Strategies and Goals to enhance the protection of all modes of transportation through objectively measured risk reduction. TSA's I-STEP has developed a comprehensive training matrix to serve as a resource for TSA security partners in government and industry. Additionally, TSA and the U.S. Coast Guard collaborated on multi port, intermodal exercises on a regional level in the maritime sector.

Intermodal Visual Enhancement Workshop (I-VIEW): TSA will employ photographic and video images to record high-risk transportation infrastructure and systems. I-VIEW provides very detailed domain awareness of a facility or asset by creating a virtual reality of the transportation system by giving the user detailed views, information, and associated documents. I-VIEW will aid agencies with a prevention, response, investigatory capability or responsibility. I-VIEW will assist public and private transportation agencies in preventing, mitigating, responding to, and recovering from terrorist incidents. In FY 2010, TSA worked alongside DHS Infrastructure Protection on two transportation system initiatives to validate capabilities, purchase imagery capture and post-processing equipment, and to conduct initial training for staff. In FY 2011, TSA will utilize base resources to finalize contract support agreements. TSA will continue to capture/process imagery in FY 2012.

Stakeholder Collaboration: TSA interfaces with stakeholders in multiple modes by distributing security awareness training. For example, TSA provides security awareness information to operators as part of the HAZMAT Motor Carrier Security Action Item Training Program, to the school transportation industry as part of the School Transportation Security Awareness Program, and to the motor coach industry through Operation Security Transport. Campaigns being conducted with mass transit and passenger rail include Transit Watch, First Observer, and "If

You See Something, Say Something,” a campaign being conducted cooperatively with DHS and Amtrak, which emphasizes the importance of vigilance, timely reporting of security concerns, and fostering public awareness and education.

Baseline Assessment for Security Enhancement (BASE) Program: TSA has implemented a continuous improvement process via comprehensive security assessments conducted by TSA Transportation Security Inspectors-Surface (TSIs-Surface) under the BASE program. Assessments evaluate posture in 17 Security and Emergency Management Action Items foundational to an effective security program. The results influence security enhancement priorities and review of projects under the Transportation Security Grant Program (TSGP) for mass transit and passenger rail agencies. The most effective security practices cited in BASE assessments are shared throughout the transit and rail community, which spurs networking among security professionals and expands implementation.

Beyond conducting assessments, TSIs-Surface serve as direct liaisons to mass transit and passenger rail security officials. In this capacity, they facilitate security enhancement efforts, respond to reports of threats and suspicious incidents, and foster regional security collaboration.

Corporate Security Reviews (CSRs): TSA conducts CSRs in multiple modes of transportation on a continuous basis to evaluate standards and identify security gaps in reviewed systems. CSRs allow TSA and the system operators and owners to develop first-hand knowledge of security planning and execution at critical systems, establish communication between key security personnel, identify and share smart practices, and make recommendations for security improvements. During a CSR, teams of TSA modal experts evaluate and collect physical and operational preparedness information on critical assets and key point-of-contact lists, review emergency procedures and security plans, provide domain awareness training, and offer an opportunity to share security practices among security partners.

Significant accomplishments in FY 2010 included:

- Completed 20 I-STEP exercises for the pipeline, mass transit, freight and passenger rail, and the highway motor-coach modes of transportation;
- Completed risk assessments on eight additional freight rail bridges; and
- Completed 12 CSRs for the pipeline system and conducted CSRs on all seven Class I railroads.

FY 2011 planned accomplishments include:

- Conduct 18 I-STEP exercises for multiple surface transportation modes;
- Publish legislation in the Federal Register to require owners and operators of multiple modes of transit to implement security training programs; and
- Deliver completed I-VIEW DVD's to six transportation venues.

In FY 2012, the program will issue the NPRMs for surface mode security plans, and for the STA. Additionally, eight I-VIEW DVDs will be completed for high-risk security system owners and operators.

Ports [Maritime]:

Security Enhancement and Capability Augmentation Program (SEACAP) enhances the capability to deter, detect, and prevent explosives from being introduced as a weapon on port and multimodal transportation systems and their associated facilities and terminals. SEACAP builds upon existing technology pilots that provide a platform and programmatic infrastructure for improving current security screening for high capacity transportation operations.

Through the Security Training, Operational Readiness and Maritime Community Awareness Program (STORMCAP), TSA develops and disseminates enhanced security training, community awareness products, and operational guidance to enhance security and eliminate duplication of effort in multi-modal transportation operations including seaports. Seaports are classic intermodal connection points where trucks, trains, pipeline, and mass transit ferry systems can intersect. In many cases, ferry systems are a part of a larger city-wide mass transit system. TSA will coordinate and host a series of Explosive Security Seminars for security personnel and first responders in high-risk cities across the nation. The seminars will present concepts on responding to threats and share regional best practices on an actual event of Improvised Explosive Device/Vehicle Borne Improvised Explosive Devices in intermodal environments.

Significant accomplishments in FY 2010 included:

- SEACAP tested and evaluated portable explosive trace technology in mass transit, highway, and maritime venues; and
- STORMCAP released a training CD-ROM for Crowd Control Techniques, and completed and distributed a CD-ROM on Anti-hijacking and piracy prevention.

FY 2011 planned accomplishments include:

- Continue to support TSA's Office of Screening Technology by coordinating deployment of off-the-shelf and developmental screening technologies for testing in surface transportation systems;
- Produce training products that will include terminal evacuation procedures and training on using the I-VIEW product for Transportation Security Incident prevention and response; and
- Complete and distribute the Maritime Screening Procedures CD-ROM.

In FY 2012, the risk data for TSA's Resiliency Plan CSRs will be completed. Additionally, awareness products for ports will continue to be provided.

Mass Transit Activities (Including, Passenger Rail, and Bus):

Stakeholder Collaboration: TSA Mass Transit officials coordinate with key stakeholders in a number of ways, such as the Regional Transit Security Working Groups. The purpose of the working group is to identify regional priorities and resolve security needs. In FY 2010, TSA focused on Tier 1 Transit Security Grant Program areas.

TSA also works closely with the Mass Transit and Passenger Rail Security Government Coordinating Council and Sector Coordinating Council, and with the Transit Policing and Security Peer Advisory Group (PAG). The PAG is a collection of 14 Transit Police and Security Chiefs representing various types of transit agencies across the nation. TSA also partners with the Department of Transportation's Federal Transit Administration to conduct annual Safety and Security Roundtables where the agencies with daily weekday ridership of 60,000 or greater attend a three-day conference where best practices and ideas are shared.

TSA's Mass Transit program coordinates bomb squad responses to Transportation System training and exercises with transit systems around the country. The Mass Transit's training division works with the public transit industry, TSA's explosive ordinance division, and local law enforcement agencies in providing training to local bomb squad units across the Nation. The eight-hour Bomb Squad Response Training Program is designed specifically for non-transit police bomb squads responsible for responding to IED events involving mass transit and passenger subway trains, light rail vehicles, and buses. The training, which includes video, classroom instruction and field components, equips first-responders with the working knowledge of the various mass transit and passenger rail operating conditions and environment (e.g., subway tunnels, stations and aerial structures) in order to safely and expeditiously remediate an improvised explosive device (IED) incident.

Infrastructure Protection: The TSA Mass Transit and Passenger Rail Security Division, in coordination with other government partners (i.e. NPPD) and industry, have identified the Nation's most critical mass transit and passenger rail infrastructure. The Mass Transit and Passenger Rail Security Division, in coordination with its partners, is focused on identifying vulnerabilities and facilitating the mitigation of these vulnerabilities for the most critical infrastructures. Mass Transit and Passenger Rail critical infrastructure consists of transit and rail underwater tunnels, high volume, multi-modal transit and rail stations, bridges, and other identified structures. TSA is working closely with these stakeholders to guide them in developing remediation plans to harden this infrastructure.

Technology: TSA's Mass Transit and Passenger Rail Security Division, in coordination with its partners, maintains a robust research and development agenda and technology program. Working with security partners to identify additional research and development requirements, coupled with testing new and emerging technologies in the field, is critical to advancing new and emerging technologies throughout the Mass Transit community.

Resilient Tunnel Program: In partnership with the DHS Science and Technology Directorate (S&T), this project aims to provide a low-cost solution to limit the flow of water in the event an underwater tunnel is compromised. While the concept was proven by conducting a test in a tunnel at the Washington Metropolitan Area Transportation Authority in FY 2009, additional work and testing is still required to further this capability. If successful, it is likely that the

testing agency will begin the process to design and build this capability for one of its underwater tunnels.

Transit Bus Command and Control: To fill a technology gap and reduce the risk of vehicle hijacking and theft, TSA has worked with a commercial company to develop a system that allows buses to be remotely disabled and also requires keyless driver authentication in order for a transit bus to be functional. In the event of a hijacking or theft, alarms are sent wirelessly to a command or dispatch center if an unauthorized user attempts to operate the bus. The dispatch center then has the capability through this technology, to bring the bus gradually to a stop. The intent of this work is to minimize the potential of a bus from being used by a terrorist as an offensive weapon and being driven into a building or crowd causing large scale damage and injuries. TSA completed a full field operational testing (FOT) of this system under actual operational conditions. Upon completion of the FOT, TSA concluded that the transit bus command and control technology is an effective mitigation strategy for the transit industry. This system is commercially available and eligible for procurement through the TSGP. TSA is now working to develop the technology for locomotives.

Layered Security Operational Test Bed: This collaborative security engagement tests the effectiveness of operational and technological solutions applied in a layered approach at mass transit and passenger rail facilities. The effort commenced with the Port Authority Trans Hudson (PATH) interstate rail system. TSA plans to continue development and extension to other systems and diverse public transportation environments (e.g., rail terminals and stations, system infrastructure, bus terminals and stations).

Significant accomplishments in FY 2010 included:

- Conducted four Connecting Communities Workshops to enhance security and safety by sharing transit policies, procedures, resources, and best practices with local first responders to transit emergencies;
- Produced standards and guidance to assist mass transit and passenger rail security professionals in making well-informed decisions on procuring technical systems to enhance security; and
- Completed a pilot to conduct structural blast assessments of critical Mass Transit and Passenger Rail stations around the country; and
- Conducted four regional Mass Transit I-STEP exercises.

FY 2011 planned accomplishments include:

- Conduct seven regional Mass Transit I-STEP exercises;
- Publish security standards to assist mass transit and passenger rail security professions in making well-informed decisions on procuring technical systems to enhance security; and
- Conduct physical testing on railcar blast vulnerability.

In FY 2012, I-STEP exercises will continue to be conducted as well as structural blast assessments of critical mass transit and passenger rail stations. TSA will also continue to

provide awareness and enhance security and safety by sharing transit policies, procedures, resources, and best practices.

Freight Rail Activities:

Bridge Criticality Tool: The TSA Freight Rail Security Division has developed a critical infrastructure risk assessment tool for freight rail bridges. This tool is designed to measure the criticality and vulnerability of freight rail bridges in the United States and will serve as the factual and analytical baseline to develop and propose security enhancements and mitigation strategies for critical railroad bridges. The Freight Rail Security Division is developing a second railroad infrastructure assessment tool designed to measure the criticality and vulnerability of freight railroad tunnels.

Freight Rail Comprehensive Reviews (CRs): TSA, as part of a team of industry and government subject matter experts, conducts CRs to assess the relative risk associated with the movement of bulk Toxic Inhalation Hazard (TIH) materials and to identify and measure the criticality of railroad infrastructure, such as bridges and tunnels. CRs are fact-based, analytical assessments that evaluate freight rail operations in High Threat Urban Areas (HTUAs) to identify security control points and recommend mitigation measures to reduce risk. TSA also coordinates communication between owner/operators, government, and first responders to bring about enhanced preparedness and domain awareness.

Toxic Inhalation Hazard Transportation Risk Reduction: TSA, in cooperation with industry stakeholders, established the TIH risk reduction program to objectively measure the security risk associated with the rail transportation of TIH materials through HTUAs. The program's objective is to reduce the dwell time of rail cars carrying TIH materials, and implement positive security measures by rail carriers. TSA measures and reports the level of risk reduction of TIH materials. An estimated risk reduction of 92 percent was achieved when compared against the original baseline. As part of its FY 2009 grant program, TSA also provided funds for the installation of electronic tracking systems on over 50 percent of rail cars transporting rail security-sensitive materials, including TIH. This technology will optimize the time spent on TIH risk surveys, as it will provide TSA with event reporting, car location, and tracking capabilities. In FY 2010, the grant awardees acquired and installed the GPS units and anticipate completion in FY 2011.

Rail Transportation Security Rule: On November 26, 2008, TSA issued a final rule on rail transportation security covering freight railroad carriers, shippers of rail security-sensitive materials (RSSM), and receivers of RSSM located within an HTUA. The Rail Transportation Security Rule referenced includes subparts that apply to Freight Railroad Carriers, Rail Hazardous Materials Shippers, Rail Hazardous Material Receivers and Private Cars, as well as subparts that apply to Passenger Rail Carriers, Rail Transit Systems, Tourist, Scenic, and Historic and Excursion Operators. The rule establishes procedures for a positive chain of custody while RSSM cars are in transportation. The rule also requires the appointment of Rail Security Coordinators, the reporting of location and shipping information of RSSM rail cars, and the reporting of significant security concerns to TSA. TSA's surface inspector workforce is the

primary mechanism by which the agency monitors industry compliance with the chain of custody provisions.

Chlorine and Ammonia Release Testing at Dugway Proving Grounds, Utah: The Edgewood Chemical and Biological Command, with the support of the S&T Chemical Security Analysis Center, conducts field testing of the release of TIH materials in an outdoor environment (e.g., Dugway Proving Grounds, Utah). This testing provides vast amounts of data that is collected from a wide range of instrumentation and video cameras. The data and analysis will be used to improve understanding of large-scale releases, enhance modeling methodologies, refine emergency response procedures, and potentially reveal more effective hazard mitigation strategies.

Significant accomplishments in FY 2010 included:

- Completed 63 risk assessments on freight rail bridges; and
- Completed freight rail comprehensive reviews in Atlanta, GA; Memphis, TN; St. Louis, MO; and Dallas/Fort Worth, TX.

FY 2011 planned accomplishments include:

- Implement the tunnel assessment tool for the freight rail and railroad tunnel industry;
- Continue to conduct TIH risk surveys; and
- Provide awareness to stakeholders regarding freight rail security efforts, programs, projects, and policies.

In FY 2012, TSA will continue to conduct I-STEP exercises and conduct risk assessments on freight rail bridges and tunnels.

Pipeline Activities:

Critical Facility Inspections: As required by the 9/11 Act, TSA must develop and implement a plan for inspecting the 100 “most critical pipeline” systems. TSA has collected critical facility information from those systems, which have hundreds of facilities associated with their operation. TSA has begun inspections that focus on physical security.

Pipeline Corporate Security Reviews (CSRs): TSA conducts 12 annual CSRs of the top 100 natural gas and hazardous liquid transmission pipelines and natural gas distribution systems within the United States. This allows the program to revisit a company within the top 100 approximately every five years to assess the present status of the company’s security efforts and gauge progress from previous reviews.

Stakeholder Collaboration: The TSA Pipeline Security Division, in conjunction with Natural Resources Canada, hosts International Pipeline Security Forums annually. The two-day conference enhances government and industry pipeline security domain awareness and provides opportunities for discussion of major pipeline security issues, both domestic and international.

Significant accomplishments in FY 2010 included:

- Conducted 12 CSRs to assess the present status of the company's security efforts and to gauge progress from previous reviews;
- Developed a security awareness training program for all pipeline employees; and
- Provided awareness to the pipeline industry regarding security efforts, initiatives, updates, and addressed issues.

FY 2011 planned accomplishments include:

- Continue to conduct 12 corporate security reviews annually;
- Continue to conduct critical facility inspections; and
- Continue to conduct I-STEP exercises for pipeline companies.

In FY 2012, TSA will continue to conduct and complete the critical facility inspections for all 100 pipeline systems and conduct 12 corporate security reviews on an annual basis. The program will also continue to provide awareness to stakeholders regarding pipeline security efforts, initiatives, and current risk.

Highway and Motor Carrier Activities:

Highway Infrastructure Assessments: TSA developed a comprehensive critical infrastructure (bridges and tunnels) vulnerability assessment program to identify and rank critical assets, identify vulnerabilities, and quantify costs for hardening structures and replacing each structure. TSA plans to continue to conduct assessments (finite element modeling) on critical structures. In FY 2011, this program will be expanded by incorporating outreach efforts utilizing U.S. Army Corps of Engineers (USACE) subject matter experts (SME) to participate in working groups and seminars that identify security related vulnerabilities at the design phases of an individual structure. These additional USACE SME personnel will also augment TSA personnel and act in an advisory capacity to review structural plans provided by stakeholders to identify weaknesses in the structure that may result in emergency support or mitigation.

Highway Corporate Security Reviews: TSA conducts highway modal industry CSRs to establish and reaffirm security baselines. TSA conducts CSRs on states' Departments of Transportation (DOTs) to assess their security posture, security programs, and activities implemented for bridge and tunnel assets. TSA completed CSRs on a total of 48 out of the 51 DOTs. TSA conducts CSRs on trucking companies, school transportation organizations, and motor coach companies. Data is collected and returned during compliance and enforcement audits. Three CSRs are planned for FY 2011.

Highway Industry Assessments: TSA conducts Highway Industry Assessments of the trucking industry including carriers of general freight, hazardous materials, food and agriculture, and port and intermodal interfaces. Additionally, TSA conducts Highway Industry Assessments of the school transportation industry, the motor coach industry and infrastructures in order to identify

industry best practices, quantify assets, and provide recommendations for changes in security activities and business security operations. Through these assessments, TSA increases its awareness of industry security practices and identifies business operations and practices that may be impacted by changes in security awareness, regulation, and program development. All of these separate industry reports will be included as a part of a larger aggregate report of the entire highway sector.

In addition to industry assessments, TSA also conducts infrastructure vulnerability assessments that capture cost data to include estimated cost to replace the existing structure and costs to implement the recommended security mitigation strategies.

Stakeholder Collaboration: TSA coordinates closely with industry stakeholders through the Critical Infrastructure Partnership Advisory Council meetings that are held with each of the four highway modal industry groups of trucking, motor coach, school bus, and infrastructure. Additional areas of stakeholder collaboration include the development of modal training programs and the planning and execution of modally-focused security exercise programs through TSA's I-STEP program office.

Significant accomplishments in FY 2010 included:

- Completed assessments of the school transportation industry and the trucking industry that carries Highway Security Sensitive Materials (a specific subset of hazardous materials).
- Completed 20 Infrastructure Assessments

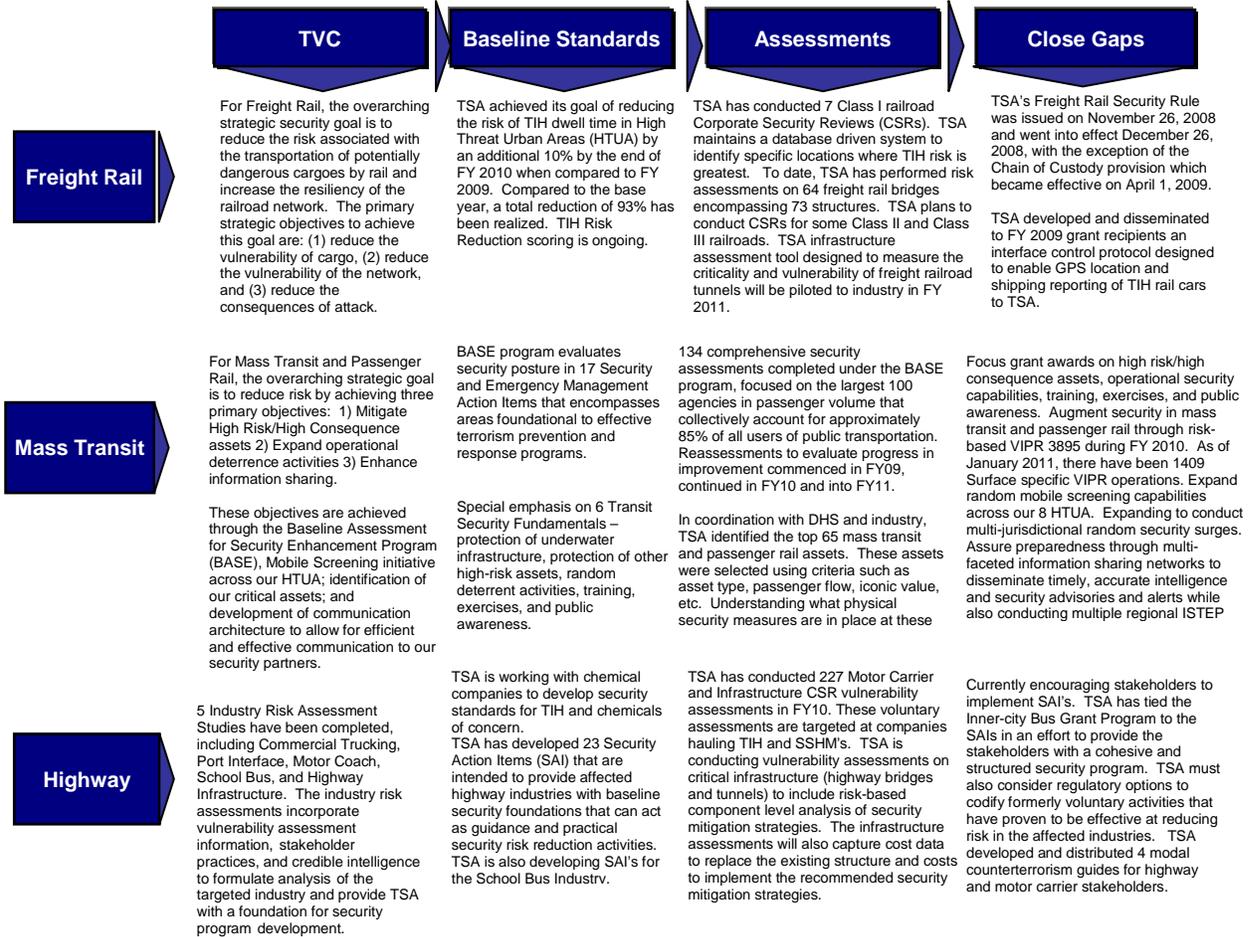

FY 2011 planned accomplishments include:

- Conduct CSRs of previously unvisited owners and operators of transportation assets, and at critical corporations where revisits are justified by high threat or vulnerability;
- Conduct additional industry assessments of the motor coach industry as well as the food and agriculture, general freight, and port and intermodal interface areas of the trucking industry; and
- Continue vulnerability assessments on national critical infrastructure (highway bridges and tunnels) to include risk-based component level analysis of security mitigation strategies.

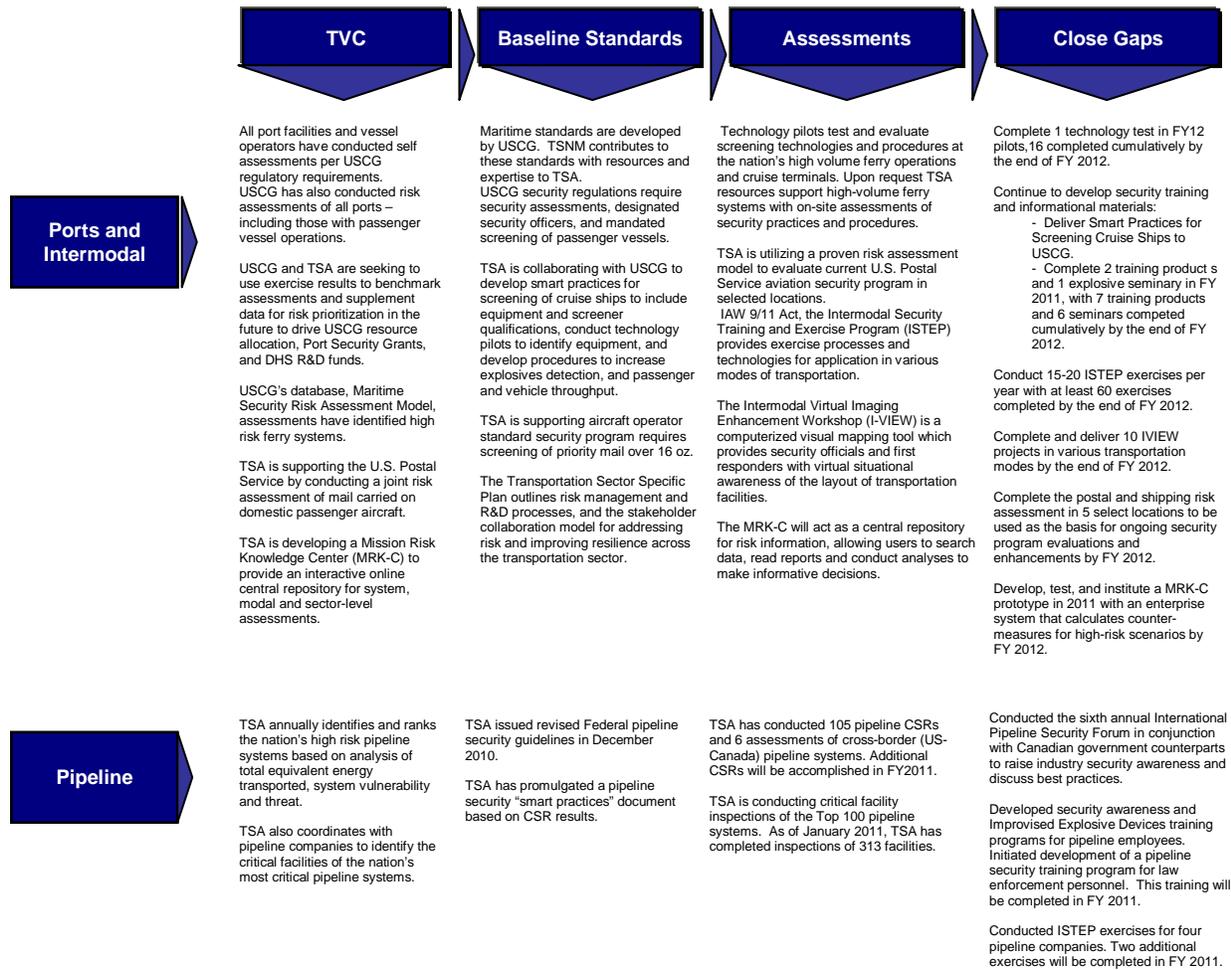

In FY 2012, TSA plans to implement proposed regulations in the motor coach and HAZMAT motor carrier industries. The program will also conduct CSRs in the school transportation industry and the states' DOTs.

The following surface transportation initiative matrix displays the mitigation activities that TSA has conducted to reduce the risk resulting from threats, vulnerabilities, and consequences specific to each transportation mode.

SURFACE TRANSPORTATION INITIATIVE MATRIX

SURFACE TRANSPORTATION INITIATIVE MATRIX

**Department of Homeland Security
Transportation Security Administration
Surface Transportation Security:
Rail Security Inspectors and Canines
Program Performance Justification**
(Dollars in Thousands)

PPA: Rail Security Inspectors and Canines

	Perm Pos	FTE	Amount
2010 Actual	649	276	\$48,846
2011 C.R.	649	622	70,724
2012 Adjustments-to-Base			25,510
2012 Current Services	649	622	96,234
2012 Program Change	-	-	-
2012 Total Request	649	622	96,234

The Transportation Security Administration requests \$96.2 million for FY 2012 to support Surface Inspection and Program Oversight, dedicated surface VIPR teams and explosive detection canine programs.

CURRENT SERVICES PROGRAM DESCRIPTION:

Surface Inspection and Program Oversight (SIPO):

The SIPO is a unique and critically important Federal inspection program with responsibilities in United States surface transportation security. With initial emphasis on freight railroads, mass transit and passenger rail, the SIPO has set out to enhance security preparedness in an industry that is the largest transporter of passengers in the country.

The following chart provides historical and current information on the total number of Surface, Aviation, and Cargo Transportation Security Inspectors (TSIs) positions across TSA.

TSA Inspectors

	Full-Time Permanent Positions						
	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012
TSI - Aviation Domestic	681	657	778	755	755	855 ¹	855
TSI - Aviation Int'l	39	39	45	45	45	45	45
Total, Aviation Inspectors	720	696	823	800	800	900	900

TOTAL	1,047	1,121	1,558	1,585	1,849	1,949	1,949

1/ Increase of 100 inspectors/canine handlers in support of additional proprietary teams

2/ Increase of 50 inspectors in P.L. 111-83, conversion of 35 legacy canine teams to proprietary canine teams

3/ Increase of 100 inspectors in P.L. 111-83; Increase of 79 inspectors for the 15 additional VIPR teams

Transportation Security Inspectors - Surface (TSI-Ss) are deployed through a risk-based approach and provide coverage of key passenger rail and mass transit rail facilities in their regions, as well as 61 HTUAs, as defined by DHS. The location and number of inspectors is also determined by transit ridership, proximity to TIH shipment locations (freight rail), critical infrastructure ratings, and HTUA ranking. TSI-S personnel continue to provide stakeholder liaison functions, situational awareness of security conditions and, during surface transportation incidents, convey valuable first-hand information to Federal Security Directors (FSDs), security, policy and intelligence offices, and TSA leadership. To ensure inspectors operate safely and appropriately in the surface transportation environment, training for TSIs-Surface is provided at a Pueblo, CO facility. Training is key to ensuring that TSA has a technically proficient and agile workforce. All courses include both classroom instruction and on-site practical application and exercises.

The legislation underlying 49 CFR provides TSA's TSI-Ss with regulatory authority to ensure a secure chain of custody of security-sensitive material rail cars occurs between rail carriers and shippers/receivers at points of origin, delivery, and interchange. It also requires the designation of a Rail Security Coordinator by freight and passenger railroad carriers, rail transit systems, and certain hazardous materials facilities. TSA's TSI-Ss verify the paperwork at the covered facilities to ensure compliance, including reporting requirements for incidents, potential threats, and significant security concerns, and location tracking requirements.

Additional responsibilities of the TSI-Ss include:

- Conducting threat and vulnerability inspections, reviews, and assessments that are used to determine the capability of a potentially targeted transportation system/asset to reduce the risk from a specified threat;

- Conducting Risk Reduction Survey assessments for railcars carrying TIH materials and shippers;
- Serving as panel members on the TSGP to review project proposals, assess grant applications, and assist in developing a process for awarding grants;
- Responding to surface transportation security incidents (i.e., train derailments, possible improvised explosive devices, major truck accidents, etc.) to gather real-time, on-scene information
- Staffing transit agency and freight rail operations centers in times of increased threat, heightened alert, or during a catastrophic event; and
- Planning and participating in – and dedicating personnel to – TSA VIPR deployments.

The SIPO includes various types of inspections and assessments, such as:

- 1) HTUA Vulnerability Assessments: SIPO personnel act as team leads on a team composed of Federal, State, and industry SMEs to conduct risk assessments of selected HTUA rail corridors. On-site assessments consist of a detailed examination of the railroad(s) operations and procedures within the HTUA. Assessments lead to security enhancements and mitigation strategies to address the handling and protection of TIH rail shipments through the HTUA.
- 2) Station Criticality Assessments (SCA): TSI-Ss conduct SCAs, which are in-depth assessments of critical infrastructure facilities and transit stations. SCAs have gained importance with the terrorist attacks in the mass transit mode in Mumbai, Madrid, London, and Moscow. The assessments provide detailed information on a variety of station-related intelligence, such as the locations of exits, telephones, Closed Circuit Television (CCTV), electrical power, station managers, etc. The information has been extremely useful in VIPR planning, and is also relevant for first responders, intelligence planners and security personnel. The majority of stations across the nation have been completed and are in the process of being continually updated as security enhancements are added to stations.

In addition, upon the issuance of the rail and mass transit regulation under 49 CFR 1580, TSI-Ss will conduct compliance inspections throughout the freight rail and mass transit domain.

TSA, in conjunction with the private sector, has also developed a list of 24 Security Action Items (SAIs) and three Supplemental Security Action Items (SSAIs). These security guidelines identified best practices, which freight railroads and their employees should implement to reduce the risk associated with the transportation of TIH materials. TSA also conducts Rail Corridor Assessments (RCAs), which focus on assessing the vulnerabilities of high-population areas where TIH materials are moved by rail in significant quantities. The RCAs provide site-specific mitigation strategies and lessons learned, and support the development of the SAIs. RCAs take approximately 4-6 weeks to complete, depending on the HTUA and complexity of the railroad operations within the corridor. These vulnerability assessments have also led to the implementation of a TIH Risk Reduction Project. Implemented in 2007, the project focuses on objectively measuring the risk reduction associated with the rail transportation of TIH materials

through 46 HTUAs. As of July 2010, the objectively-measured risk score has been reduced 92 percent as compared to the base measurement year (2006).

TSA conducts BASE reviews among the Nation's mass transit systems including the 50 top, high-risk mass transit systems based upon weekly ridership. In FY 2011, TSA plans to initiate a follow-up program to improve the overall security posture of public transportation systems and facilities. The Performance Improvement Action Plan (PIAP) will monitor the efforts of transit agencies to improve security vulnerabilities discovered through BASE reviews. TSI-Surface personnel will evaluate the transit agencies improvement efforts and prioritize lists of security improvements necessary to make public transportation systems, facilities and passengers more secure. TSI-Surface personnel will also work closely with transit agencies to offer additional resources and TSA programs to help bolster the results of low scoring sections found in the BASE.

Significant accomplishments in FY 2010 included:

- Completed over 5,000 compliance inspections and 156 CSRs for highway and motor carriers;
- Performed 23 BASE reviews within the top 50 high-risk mass transit agencies in the nation, based on an average weekday ridership of 60,000 or more; and
- Conducted over 9,000 TIH Risk Reduction Surveys.

FY 2011 planned accomplishments include:

- Complete over 6,000 compliance inspections;
- Conduct BASE reviews focusing on high-risk transit agencies that have a 60,000 average weekday ridership. Thirty-two of the 54 high-risk transit agencies are scheduled for re-assessments in 2011 and another 30 re-assessments of agencies outside the high-risk category;
- Perform a complete review of the original 46 HTUAs; and
- Complete over 12,000 TIH Risk Reduction Surveys.

In FY 2012, TSA will complete over 8,000 compliance inspections, including 1,500 to 2,000 Highway Motor Carrier compliance inspections related to new regulations anticipated to be in effect, and 60 BASE reviews. TSA will continue to perform TIH Risk Reduction Surveys and 12 RCAs.

Visible Intermodal Prevention and Response (VIPR)

The objective of VIPR deployments in mass transit and passenger rail systems is to augment capabilities that disrupt and deter potential terrorist activity. To achieve this end, TSA utilizes periodic random deployments that are unpredictably executed in timing, location, and types of activities. VIPR operations teams consist of TSA personnel that may include Transportation Security Inspectors, Transportation Security Officers, Federal Air Marshals, Behavior Detection Officers, Transportation Security Specialists-Explosives, Explosives Detection Canine teams, and Federal, State and local law enforcement officers. Uniformed VIPR team members provide

a visible and official security presence apparent to all who use or are observing the mass transit or passenger rail system. VIPR activities support the system's efforts to prevent an adversary from orienting on and breaching a pattern in security activities. The total number of VIPR deployments has increased from four to five per week in 2007 to approximately 40 to 50 per week in 2009. In FY 2010, TSA provided additional emphasis on surface deployments and achieved a nationwide footprint for Surface VIPR operations by beginning to staff a total of 15 dedicated Surface VIPR Teams and completing 75-80 deployments per week.

Significant accomplishments in FY 2010 included:

- Conducted 3,800 VIPR operations nationwide in the Surface environment

Planned accomplishments in FY 2011 include:

- Increase the number of Surface VIPR operations nationwide to 4,200 annually

In FY 2012, TSA will increase the number of Surface VIPR operations nationwide to 4,600 annually, as a result of the full implementation of the 15 dedicated Surface teams.

National Explosives Detection Canine Team Program (NEDCTP):

TSA's NEDCTP develops, trains, deploys, and certifies explosives detection canine teams to deter and detect the introduction of explosive devices into the transportation system. Each team is composed of a specially trained canine and a State or local law enforcement handler. The NEDCTP, in partnership with State and local law enforcement agencies, fulfills the need to provide effective, low-cost security measures within the mass transit/commuter rail, and maritime (ferry system) sector.

Through cooperative agreements, TSA provides funding for training, certification, and maintenance of the capable explosive detection canines, training for the handlers, and partial reimbursement of handlers' salaries and other costs. In FY 2012, TSA plans to increase the current annual stipend by approximately \$10,500 per team. This is necessary to proportionately compensate for the escalating inflationary and operational costs borne by NEDCTP participants. Local law enforcement agencies deploy these canine teams and provide DHS with a mobile response platform for specific threats to the transportation systems.

Projected FY 2012 Funded Canine Teams				
<u>Funding Source</u>	<u>Legacy Aviation</u>	<u>Proprietary*</u>	<u>Mass Transit</u>	<u>Total</u>
Base Funding	468	45	117	630
Supplemental	50	120		170
FY 2011 Enhancement		100		100
<hr/>				

Total	518	265	117	900
--------------	------------	------------	------------	------------

Significant accomplishments in FY 2010 included:

- Provided security and screening at 18 of the largest mass transit systems in the country;
- Established Naval Air Systems Command (NAVAIR) Pilot (handheld scanners) at Delaware Bay Authority (DRBA). This pilot program provides a Canine Asset Management System for the accountability and tracking of explosives training aids through the use of a secure mobile device; and,
- Increased participation by raising the team authorization levels for three participants and a total of 10 new teams to reach the optimal funded team levels of 117 for mass transit. These teams were deployed at Chicago Transit Authority (CTA), Los Angeles County Mass Transit (LACMT), and Niagara Frontier Transit Authority (NFTA).

FY 2011 and FY 2012 planned activities include:

- Continue to provide the necessary security measures for the traveling public at 18 of the largest Mass Transit Systems in the country; and
- Continue NAVAIR Pilot (handheld scanners) at DRBA.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

Department of Homeland Security

Transportation Security Administration Justification of Proposed Changes in Surface Transportation Security Appropriation Language

For necessary expenses of the Transportation Security Administration related to providing surface transportation security activities, \$134,748,000, to remain available until September 30, 2013.

Note.—A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111–242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

Explanation of Changes:

No substantive changes proposed.

B. FY 2010 to 2011 Budget Change

**Department of Homeland Security

PPA Mission Statement

Surface Transportation Security Operations and Staffing is charged with managing TSA's efforts to mitigate the risk and provide security direction to all non-aviation transportation systems. This responsibility covers rail, mass transit, highways, buses, trucking, ferries, and pipelines. The Surface Transportation Security Operations and Staffing office also works with industry, State and local governments, and other Federal agencies in developing standards and regulations to ensure the security of these vital transportation systems.

Summary Justification and Explanation of Changes

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Salaries and Benefits	\$21,392	\$24,387	\$22,869	(\$1,518)

The FY 2012 request reflects Salaries and Benefits for 153 FTE, along with the realignment of TSOC FTE to Aviation Security, Airport Management PPA.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Travel	\$1,331	\$1,701	\$1,658	(\$43)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request reflects the transfer of TSOC resources to Aviation Security.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Transportation of Things	\$1	\$0	\$0	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Other Rent	\$1	\$0	\$0	\$0

Other rent includes all payments to a non-Federal source for rental space, land and structures.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Communication, Utilities, and misc. charges	\$163	\$127	\$127	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. PDA and cell phone air time are the major items being charged to this object class.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Printing	\$20	\$31	\$31	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Advisory and Assistance Services	\$12,218	\$0	\$0	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal government.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Other Services	\$10,947	\$12,999	\$13,282	\$283

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The funds will be used to support security efforts in non-aviation modes including Pipelines, Maritime, Mass Transit, Rail, Highway and Motor Carrier and Postal and Shipping. The FY 2012 request reflects contract increases.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Purchase from Government Accounts	\$1,107	\$142	\$142	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The funds will be used to support partnership activities with other government agencies.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Medical Care	\$1	\$0	\$0	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Operation and Maintenance of Equipment	\$200	\$0	\$0	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	2010	2011	2012	2011- 2012
	Actuals	C.R.	Request	Change
Supplies & materials	\$80	\$405	\$405	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. This PPA will use these funds to acquire office supplies, education materials, training materials and any other supplies and materials.

	2010	2011	2012	2011- 2012
	Actuals	C.R.	Request	Change
Equipment	\$614	\$0	\$0	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

PPA Mission Statement

TSA has been given the responsibility to ensure the compliance of security regulations and standards within the rail and mass transit modes. TSA will accomplish this with a cadre of 100 inspectors located at significant rail, mass transit, and transit centers across the United States.

Summary Justification and Explanation of Changes

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Salaries and Benefits	\$28,801	\$45,795	\$72,794	\$26,999

The FY 2012 request includes annualization of the VIPR and Surface Inspectors hired in FY 2011.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Travel	\$4,029	\$1,500	\$1,500	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. This funding will be used for local and extended travel to conduct a multitude of transit inspections program management.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Transportation of Things	\$17	\$0	\$0	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
GSA rent	\$158	\$200	\$200	\$0

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Other Rent	\$575	\$575	\$575	\$0

Other rent includes all payments to a non-Federal source for rental space, land and structures.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Communication, Utilities, and miscellaneous	\$9	\$454	\$450	(\$4)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. This funding will be used for communication equipment and service cost. The FY12 request includes a realignment between object classes.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Printing	\$3	\$2	\$2	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Advisory and assistance services	\$12	\$0	\$0	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal government.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Other Services	\$2,967	\$15,330	\$12,562	(\$2,768)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY2012 request includes the transfer of costs to the Support Appropriation and management efficiencies.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Purchase from Government Accounts	\$1,580	\$159	\$159	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The funds will be used to support partnership activities with other government agencies.

	2010 Actuals	2011 C.R.	2012 Request	2011- 2012 Change
Medical Care	\$1	\$0	\$0	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	2010	2011	2012	2011- 2012
	Actuals	C.R.	Request	Change
Supplies & materials	\$1,056	\$977	\$980	\$3

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request reflects a realignment between object classes.

	2010	2011	2012	2011- 2012
	Actuals	C.R.	Request	Change
Equipment	\$6,042	\$232	\$232	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	2010	2011	2012	2011- 2012
	Actuals	C.R.	Request	Change
Land and Structures	\$87	\$0	\$0	\$0

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease.

	2010	2011	2012	2011- 2012
	Actuals	C.R.	Request	Change
Grants/Subsidies/Contributions	\$3,509	\$5,500	\$6,780	\$1,280

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2012 request includes the stipend request within the Canine program.

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Threat Assessment & Credentialing

I. Appropriation Overview

A. Mission Statement for Transportation Threat Assessment & Credentialing:

To reduce the probability of a successful terrorist or other criminal attack to the transportation system through application of threat assessment methodologies that are intended to identify known or suspected terrorist threats working or seeking access to the Nation's transportation system.

This appropriation supports compliance with:

- National Strategy for Homeland Security,
- USA PATRIOT ACT of 2001 (P.L. 107-56),
- Safe Explosives Act (P.L. 107-296),
- Aviation Transportation Security Act of 2001 (P.L. 107-71),
- Maritime Transportation Security Act of 2002 (P.L. 107-295),
- Security and Accountability For Every Port Act of 2006 (P.L. 109-347),
- Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (P.L. 109-59),
- Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176),
- Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-408), and
- 9/11 Commission Act of 2007 (P.L. 110-53).

These laws provide direction to the Federal Government to protect homeland security, placing special emphasis on deterrence, prevention, interdiction of threats, aggression, and unlawful acts directed toward the United States. The Homeland Security Presidential Directive-11 (HSPD-11), issued August 27, 2004, directed the Department of Homeland Security (DHS), in coordination with other Federal agencies, to “enhance terrorist-related threat assessment through comprehensive, coordinated procedures.”

The objective of HSPD-11 is to more effectively detect and interdict individuals known to engage in terrorist activities or those who are reasonably suspected to be doing so, or who have been engaged in terrorist activities. To that end, the broad range of existing government and private sector security measures and initiatives will be augmented by a comprehensive, coordinated, and integrated threat assessment environment. Implementation of HSPD-11 must facilitate the efficient movement of people, cargo, and conveyances and minimize any negative impacts on related activities. The Presidential Directive requires that these goals be achieved without compromising personal or institutional privacy and with due respect for other rights and freedoms quintessential to the American way of life.

TSA supports this directive by consolidating the management of all vetting and credentialing programs within the Office of Transportation Threat Assessment and Credentialing (TTAC). TTAC manages the following screening programs: Secure Flight, Transportation Worker Identification Credential (TWIC), Hazardous Materials Commercial Driver's License Endorsement Threat Assessment Program (HTAP), Alien Flight Student Program (AFSP), and Other Vetting Programs. This appropriation also includes other fee-funded vetting programs, two of which were realigned from Aviation Security in the FY 2010 appropriation. These fee-funded programs are listed in detail under "Budget Activities."

All programs that comprise this appropriation are designed to enhance security for many components of the transportation sector (air, land, sea); and much of the risk-analysis being performed is scalable for use in other sectors of this dynamic network.

TSA's vetting responsibilities have grown significantly in recent years and TSA has responded with the development and implementation of efficient, reliable, and cost-effective terrorist-related screening programs. TTAC currently vets and adjudicates approximately 400,000 cases a week by reviewing and assessing biographic and biometric information. Additionally, TTAC perpetually vets over 14 million records per day, adjudicates over 12,000 cases per week, and responds to over 200 redress requests a week.

B. Budget Activities:

Secure Flight

Under the Secure Flight Final Rule (**Federal Register**, Vol. 73, No. 209), the Secure Flight program assumes responsibility of airline passenger watch list matching from the airline industry into one program managed and operated by the Federal government. This consolidation meets the provisions outlined in the Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458) and the recommendations of the 9/11 Commission. For the purpose of preventing terrorists from boarding an aircraft or accessing the sterile area of a U.S. airport, the Secure Flight program uses an automated process to match Secure Flight Passenger Data (SFPD) against records contained in portions of the Terrorist Screening Database (TSDB). Secure Flight began program implementation with the first domestic aircraft operator on January 27, 2009. On June 22, 2010, Secure Flight met its goal of conducting watch list matching for all domestic aircraft operator flights within, into, and out of the United States, as well as international point-to-point flights between two foreign cities. On November 23, 2010, more than a month ahead of schedule, Secure Flight completed deployment to all covered foreign air carriers flying into and out of the United States. Secure Flight prescreens nearly 2 million passenger enplanements daily.

Transportation Worker Identification Credential (TWIC)

TWIC establishes an integrated, credential-based, identity verification program through the use of biometric technology. In order to gain unescorted access to the secure areas of U.S. ports, transportation workers are required to undergo a satisfactory security background check before they are issued a TWIC card. The TWIC card is intended to work as an integrated part of any existing or newly-developed access control system deployed by the maritime transportation sector. TSA conducted a prototype of the TWIC program at 28 port sites, which concluded in

June 2005, with sustained prototype operations for a limited number of sites through March 2006. The Final Rule was issued on January 25, 2007. The TWIC enrollment process began in October 2007 and within 22 months TSA enrolled more than 1.3 million workers, including longshoremen, truckers, and port employees who require access into secure areas of U.S. ports. On April 15, 2009, the United States Coast Guard (USCG) began enforcing the TWIC requirement for workers who need unescorted access to secure areas of U.S. ports. More than 1.7 million workers are currently enrolled in the TWIC program. Operational costs of the program are entirely funded from fee revenue.

Hazardous Materials Endorsement Threat Assessment Program (HTAP)

The USA PATRIOT Act prohibits states from issuing a license to transport hazardous materials (hazmat) in commerce unless a determination has been made that the individual does not pose a security risk (49 U.S.C. § 5103a). The Act further requires that this risk assessment include checks of criminal history records, legal status, and relevant intelligence databases. TSA implemented the HTAP to meet this mandate and conducts a security threat assessment on anyone applying to obtain, renew, or transfer a Hazardous Materials Endorsement (HME) on their state-issued Commercial Drivers License (CDL). The TSA security threat assessment (STA) includes a fingerprint-based Criminal History Records Check (CHRC), a legal status check, and checks for ties to terrorism. The program also fulfills statutory requirements under the Safe Explosives Act (P.L. 107-296). Operational since January 31, 2005, the program has enrolled more than 1.6 million drivers and is entirely funded by fee revenue.

Alien Flight Student Program (AFSP)

Established under the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176), AFSP reviews and assesses biographic and biometric information of non-U.S. citizens or any other individual (specified by the Secretary of Homeland Security) applying for training in the operation of any aircraft (having a maximum certificated takeoff weight of more than 12,500 pounds) at both domestic and international Federal Aviation Administration (FAA) certified flight schools. These persons are subject to an STA based on background and terrorist-based checks. Since its transfer to TSA from the Federal Bureau of Investigation (FBI) in July 2004, this program was expanded to conduct background checks of non-U.S. citizens seeking flight training in aircraft weighing under 12,500. This action was taken to mitigate a critical security weakness in the legislation. On April 13, 2009, a notice in the Federal Register was published, allowing TSA the authority to charge a fee to recurrent flight school students for security threat assessments conducted by the agency. Operational since 2004, the program has enrolled more than 188,831 students.

Other Vetting

This activity incorporates personnel and operational costs of vetting operations that are not a part of any of the programs described above, as well as TTAC administrative costs and TSA's efforts to modernize its vetting infrastructure. Other Vetting initiatives include:

- Crew Vetting Program (CVP) for crewmembers flying into, over and out of the United States;
- Secure Identification Display Area (SIDA) and Sterile Area workers;

- Other Aviation Vetting Programs, including DCA Access Standard Security Program (DASSP), Private Charter Standard Security Program (PCSSP), 12/5 Standard Security Program (12/5), Maryland Three Program and Airspace Waivers (ASW);
- FAA/Airmen Certificate Vetting (through reimbursable agreement); and
- TTAC Infrastructure Modernization (TIM) will provide a single, uniform vetting system.

Other Vetting Fees

This category incorporates new and existing fees that were shifted in FY 2011 from the Aviation Security and Transportation Security Support appropriations to the TTAC appropriation. These fee programs provide revenue to fund STAs and program/system functionality. These initiatives include:

- General Aviation at Ronald Reagan National Airport (previously in Aviation Security)
- Indirect Air Carrier (Previously in Aviation Security)
- Certified Cargo Screening Program
- Large Aircraft Security Program
- SIDA badges (FBI CHRC only)
- Other Security Threat Assessments to include PCSSP; 12/5; and Maryland Three Program (FBI CHRCs only)
- Sensitive Security Information (SSI)

C. Budget Request Summary:

For FY 2012, the Transportation Security Administration requests a total budget authority for the Transportation Threat and Credentialing mandatory and discretionary appropriations of 512 positions, 487 FTE, and \$224,274,000. This request consists of 459 positions, 435 FTE, and \$183,954,000 million in appropriated funding; and 47 positions, 46 FTE, and \$36,320,000 million in discretionary fee collections. Also included in this appropriation are 6 positions, 6 FTE, and \$4,000,000 in mandatory fee collections. The total adjustments-to-base include 193 FTE and \$3,191,000 million in appropriated funding; and \$900,000 decrease in fee estimates.

III. Current Services Program Description by PPA

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
Secure Flight
Program Performance Justification
(Dollars in Thousands)**

PPA: SECURE FLIGHT

	Perm. Pos	FTE	Amount
2010 Actuals	113	103	86,969
2011 C.R.	113	108	84,363
2012 Adjustments-to-Base	181	170	(713)
2012 Current Services	294	278	83,650
2012 Program Change	38	36	8,764
2012 Total Request	332	314	92,414

TSA requests \$92.4 million for the Secure Flight program, which includes an adjustment-to-base increase of 181FTP/170 FTE and a decrease of \$794,000 for the FY 2011 Balanced Workforce Strategy; and an increase of 38 FTP/36 FTE and \$8.8 million for the Expanded Watchlist Vetting program.

CURRENT SERVICES PROGRAM DESCRIPTION:

Secure Flight's mission is to enhance the security of domestic and international commercial air travel in the United States through the use of improved watch list matching. The program's goals are to:

- Identify known and suspected terrorists;
- Prevent individuals on the No Fly List from boarding an aircraft;
- Identify individuals on the Selectee List for enhanced screening to determine if they are permitted to board an aircraft;
- Facilitate passenger air travel; and
- Protect individuals' privacy.

Transitioning watch list matching to TSA streamlines watch list matching and limits the distribution of the watch list, thereby minimizing the possibility for compromised watch list data. By bringing the watch list matching function into the Federal government, the Department of Homeland Security (DHS) Traveler Redress Inquiry Program is able to provide a more consistent application of an integrated redress process for passengers who believe they have been misidentified as a threat. Further, the Secure Flight program expedites law enforcement

notification by reducing the time it takes to identify potential matches – from days to minutes. The Secure Flight program is proving to be very effective in accurately identifying passengers who are on the Selectee and No Fly watchlists, while reducing the number of misidentified passengers. Over 99 percent of passengers are consistently cleared automatically and immediately by the Secure Flight system.

TSA is committed to engaging the individuals and organizations that are impacted by the Secure Flight program. TSA has adopted a strong security partner engagement approach that includes interactively communicating with key stakeholders, working closely with aircraft operators through the deployment process, and providing materials for public awareness and education.

Aircraft operators must collect and transmit full Secure Flight Passenger Data (SFPD) for watch list matching, including the passengers' full name, date of birth, and gender as they appear on the government-issued identification they plan to use when traveling, and Redress Number (if available). The program compares SFPD to the No Fly and Selectee components of the Terrorist Screening Database (TSDB), which contains the Federal government's consolidated terrorist watch list maintained by the Terrorist Screening Center (TSC). Secure Flight also expanded its matching function to include the Centers for Disease Control and Prevention Do Not Board List, which contains a list of individuals who pose a significant health risk to other travelers. Secure Flight will transmit instructions identifying individuals requiring enhanced screening prior to boarding an aircraft derived from real-time threat-based intelligence scenarios run by the U.S. Custom and Border Protection's Automated Targeting System.

In FY 2011, TSA reprogrammed \$15.9 million into Secure Flight to begin operational vetting of an expanded Selectee watchlist, which consists of any record in the TSDB that has a complete name and full date of birth; the gender is not required for this separate list. The expanded watchlist was added in response to the attempted bombing of Northwest Airlines Flight 253 on December 25, 2009. The full TSDB was not used since matching passenger information (name, date of birth, and gender) against the entire TSDB could result in a significant increase in possible matches, increasing costs and potentially causing time-consuming manual review to clear passengers and thereby delaying or inconveniencing travelers. The 2012 Budget Request proposes funding to make this expanded Selectee watchlist screening permanent.

Significant accomplishments in FY 2010 included:

- The Government Accountability Office noted on April 5, 2010, that TSA has generally achieved all 10 statutory conditions related to the development and implementation of the Secure Flight program.
- On June 22, 2010, the program completed cutover of all domestic and international flights operated by U.S. aircraft operators.

FY 2011 achieved and planned accomplishments include:

- On November 23, 2010, more than a month ahead of schedule, Secure Flight completed deployment to all covered foreign air carriers flying into and out of the United States.

- Implement watchlist screening for people aboard over-flights; which are all flights transiting over U.S. airspace, but which do not take-off or land in the United States.
- Execute the Twelve-Five Operators and Private Charter Pilot Program, in preparation for offering Secure Flight watch list matching to this additional operator population.
- Secure Flight will interface with the Watch List Service (WLS) operated by U.S. Customs and Border Protection to receive close to real-time updates for TSC watch lists. The WLS is designed to streamline watch list data transfer between the TSC and DHS components. At initial operating capability, Secure Flight will receive updates on the No Fly, Selectee, and Expanded Selectee Lists.

In FY 2012, TSA will continue to work with aircraft operators to ensure all flight services are compliant with the Secure Flight Final Rule and continue operations and maintenance of the Secure Flight program, as well as the development of the Secure Flight system to ensure efficient, accurate, and reliable watch list matching. TSA will also continue the expanded watch list vetting of the expanded Selectee list to include any name in the TSDB that has a complete name and full date of birth.

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
Other Vetting Programs
Program Performance Justification
(Dollars in Thousands)**

PPA: OTHER VETTING PROGRAMS

	Perm. Pos	FTE	Amount
2010 Actuals	127	97	51,434
2011 C.R.	113	98	87,636
2012 Adjustments-to-Base	14	23	3,904
2012 Current Services	127	121	91,540
2012 Program Change	-	-	-
2012 Total Request	127	121	91,540

The Transportation Security Administration requests \$91.5 million to provide funding for the Other Vetting Programs. Adjustments-to-base include an increase of 14 FTP/13 FTE and \$2.6 million for the addition of the Visa Holders within the TSDB to the No-Fly list, and \$1.3 million to annualize the FY 2010 increase of positions to the TTAC Infrastructure Modernization (TIM) program.

CURRENT SERVICES PROGRAM DESCRIPTION:

This PPA will provide funding for the administrative and operational needs of the following activities:

Other Vetting Funding (in millions)	FY 2011	FY 2012
Aviation Workers	\$5.9	\$5.9
Crew Vetting Program	4.3	4.3
Other Aviation Vetting Programs	0.4	0.4
Admin and Operations	20.5	23.1
TTAC Infrastructure Modernization (TIM)	56.5	57.8
Total	\$87.6	\$91.5

As a result of the December 25, 2009 attempted bombing incident and the resulting policy change that all visa holders within the TSDB be added to the Selectee list, TTAC shifted \$2.6 million in FY 2010 from TIM to Administration and Operations to address the workload increase for visa holder vetting.

Aviation Workers (AW) Program (including SIDA and other badge holders): The AW Program includes those individuals who apply for, or are issued personnel identification media at U.S. federalized domestic airports. Prior to receiving any identification media, aviation workers must undergo a successful name-based Security Threat Assessment (STA), and if applicable, a fingerprint-based Federal Bureau of Investigations (FBI) CHRC. The program reviews approximately 450,000 aviation workers annually.

Crew Vetting Program (CVP): CVP screens flight crewmembers on flights into, out of, or over the continental United States prior to an airport's release of an aircraft for takeoff. Flight crewmembers undergo a name-based STA to determine if they have a terrorist nexus and, if so, TSA would notify the air carrier that the individual cannot have access to United States airspace. The program reviews approximately 1.8 million flight crewmembers annually.

Other Aviation Vetting Programs: Other Aviation Vetting Programs includes DASSP; PCSSP; 12/5; Maryland Three Airports Program, and Airspace waivers program. These programs all require a name-based security threat assessment. Some also require a fingerprint based CHRC. Since 2008, the growth in the number of individuals vetted within these programs has grown 157 percent (from 81,891 to 210,785).

Administration and Operations (A&O): This account includes the general administrative expenses for TTAC to include the common biometric identity initiative (formerly under the Aviation Credential Interoperability Solution sub-group). It also includes all payroll costs for administrative staff and the programs that fall under Other Vetting (the Infrastructure Modernization payroll costs are included within the TIM sub-group).

TTAC Infrastructure Modernization (TIM): TIM is considered a significant DHS IT program with a forecast life cycle cost of \$571 million through 2018 to be funded through appropriations and fees. The modernization initiative in concert with a universal fee, expected to be published in 2013, addresses and eliminates redundant business practices, processes, and subsequent IT investments to achieve significant economies of scale and other benefits associated with a unifying business integration effort.

The core of the TTAC process is the vetting and credentialing of individuals requiring access to the transportation infrastructure. It currently involves eight parallel systems responsible for specific infrastructure populations, each with its own enrollment, vetting, and adjudication and redress process. TIM will:

- Combine functions and processes into a single, uniform approach with common security requirements, methods, and information;
- Enable policy, business, systems and data integration and drive the development of person-centric information architecture in accordance with the DHS Credentialing Framework Initiative;
- Reduce the cost, risk, and time associated with implementing new business capabilities and new populations, while improving the robust nature of the architecture and on-going operations and maintenance services; and

- Eliminate redundant background checks by working in tandem with TSA's Universal Rule initiative.

Upon implementation, the following new mission capabilities will be available to support emerging vetting and credentialing population requirements:

- **Partner Portal Services** – a web portal for directly processing enrollment requests and sharing status information;
- **3rd Party/External System Interface Management Services** – a system-to-system interface with the US-VISIT Automated Biometric Fingerprint Identification System (IDENT);
- **Integrated Customer Relationship Management Services** – enables improved security threat assessment workflow and more responsive customer service;
- **Enterprise Service Management** – supports the transformation of the new and legacy system components, reusing existing infrastructure elements to the extent possible, to establish enterprise level services. TTAC will standardize the system(s) across screening and credentialing programs into a single, holistic set of Service Oriented Architecture (SOA) based capabilities to meet current mission demands and to expand future mission needs.; and
- **Enterprise Performance Reporting Management Service** – provides monitoring and performance management capability to support end-to-end applicant processing.

In February 2010, the DHS Acquisition Review Board gave their approval for TIM to proceed with investing resources to initiate the program. TTAC is in the process of defining the “to-be” business architecture and functional requirements while conducting an Analysis of Alternatives before awarding an initial capability development contract anticipated to be awarded in FY 2011. The Initial Operational Capability is projected in FY 2013 in alignment with the completion of the Universal Fee Rule with Full Operational Capability projected in FY 2015. Transition of current and new programs will begin incrementally at the end of FY 2013 and will continue through FY 2014.

In concurrence with this modernization effort, TSA is currently working toward the implementation of a common universal fee structure that will capitalize on the capabilities of an improved vetting infrastructure. The new Universal Rule framework will establish comparable security threat assessment services for vetting activities with a common fee structure. This rulemaking effort requires the modernized capabilities of TIM to be 100 percent functional or the rule's effective date will be delayed. While the modernized platform could be utilized to process threat assessments for some regulated populations prior to the rule's effective date, those previously established vetting programs would have to continue utilizing the existing fee structures outlined in original rulemakings. Further, a delay will result in an implementation delay of security vetting for newly regulated populations, such as freight rail and mass transit populations.

An analysis of the universal fee structure is currently in the developmental phase and is estimated to become effective, at the earliest, during FY 2013. Any such implementation would be conducted through the Federal Rulemaking process. Once the new infrastructure is

implemented, TSA will begin phasing in programs in the following order: 1) programs funded through appropriations, 2) programs funded through existing fees, and 3) programs that will require security threat assessments on newly regulated populations.

The modernization effort will support Vetting and Credentialing programs across the Department affecting the security of critical infrastructure. To that end, TSA’s modernization is being coordinated with the Department’s other ongoing information technology modernization efforts and will interact with numerous other systems such as: Treasury Enforcement Communication System, U.S. Citizens and Immigration’s Systematic Alien Verification for Entitlements , U.S. VISIT’s IDENT, and the FBI’s Criminal Justice Information System.

Other Vetting program accomplishments:

The numerous small vetting programs included in the Other Vetting PPA are in operations and maintenance mode and will continue to vet the various populations each fiscal year.

Since inception of each of these programs, over 96 million names have been vetted:

Total Names Vetted Since Inception	Total Vetted
12/5 Standard Security Program	32,658
Airspace waivers	461,353
Crew Vetting	89,034,289
DCA Access Program	30,912
Maryland Three	1,806
Private Charter	948
Aviation Workers & SIDA Badges	6,511,364
Total	96,073,330

Significant accomplishments in FY 2010 included:

- Recurrent vetting of over 13 million distinct individuals in several critical sectors of credentialed or benefit-holding aviation sectors to include:
 - o Approximately 2.2 million records on flight crew manifests and 4 million FAA Airmen Certificate Holders.
- Continued to support the development of Supplemental Notice of Proposed Rulemaking for General Aviation (formerly known as the Large Aircraft Security Program).

FY 2011 achieved and planned accomplishments include:

- Released Aviation Channeling Service Provider Request for Proposal in November 2010, which offers airport stakeholders a choice in selecting an aviation worker enrollment provider.
- Complete an Analysis of Alternatives to establish a cost effective approach to capability systems modernization (TIM).
- Achieve approval from the DHS Acquisition Review Board to begin TIM development.

- Award the TIM development contract.
- Expand adjudication services to the Colorado Springs Operations Center and the vetting capability at Annapolis Junction. This includes the use of both locations simultaneously as active sites for all of our operations.
- Expand the ability to analyze the results of matches to the TSDB to reduce risk to the nation's transportation systems and infrastructure.
- Continue the development of Universal Rule.

In FY 2012, TSA plans to initiate the transition of TTAC legacy systems to the TIM system with the universal fee.

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
Transportation Worker Identification Credential (TWIC) - fee
Program Performance Justification**
(Dollars in Thousands)

PPA: TRANSPORTATION WORKER IDENTIFICATION CREDENTIAL (TWIC)

	Perm. Pos	FTE	Amount
2010 Actuals	21	27	32,151
2011 C.R.	21	21	9,200
2012 Adjustments-to-Base	-	-	(900)
2012 Current Services	21	21	8,300
2012 Program Change	-	-	-
2012 Total Request	21	21	8,300

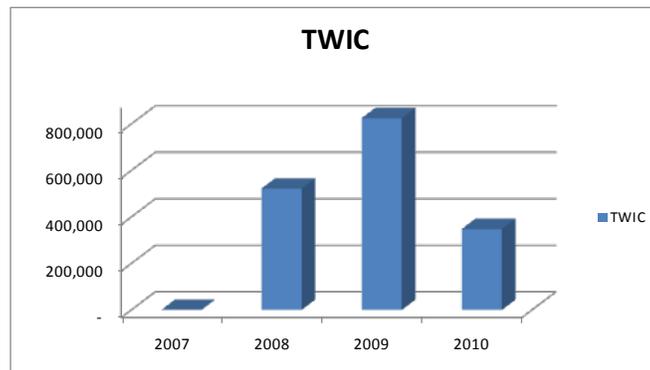

The Transportation Security Administration estimates fee collections of \$8.3 million for the TWIC Program.

CURRENT SERVICES PROGRAM DESCRIPTION:

The TWIC program enhances security by providing a tamper-resistant biometric credential to maritime workers requiring unescorted access to secure areas of port facilities and vessels regulated under the Maritime Transportation Security Act of 2002 (MTSA), (P.L. 107-295), and is being implemented in accordance with the spirit and requirements of the Aviation and Transportation Security Act of 2001 (P.L. 107-71). The program provides a common, consistent biometric credential at over 3,200 facilities and on over 10,000 vessels. When fully implemented after the promulgation of the TWIC reader rule by the U.S. Coast Guard, which is expected by the end of CY 2012, the program will ensure that the identity of each TWIC holder has been verified; that a satisfactory security background check has been completed on that identity; and that each credential issued is positively linked to the rightful holder through the use of biometric technology.

TWIC's personal identity verification standards and credential issuance closely adhere to those of Homeland Security Presidential Directive - 12 and its implementing standard, Federal Information Processing Standard 201. The program specifically follows biometric standards of the American National Standards Institute for its pattern-based fingerprint format operational biometric, and was the first to adopt common biometric standards in the Federal Government. TSA continues to work with the National Institute of Standards and Technology to ensure compliance with appropriate national standards and to develop technology specifications to support the overall program. In addition, TSA and USCG continue to work closely with the industry and the TWIC Stakeholder Communications Committee.

The TWIC Program has established applicant fees to sufficiently recover the cost of providing this security service. The standard TWIC Fee is \$132.50 per applicant. A reduced TWIC fee of \$105.25 has also been established for those applicants that previously completed a comparable STA. The card replacement fee is \$60.00. Since inception in October 2007, TWIC has enrolled over 1.776 million workers as of January 20, 2011. The credential is valid for five years and revenue generated from these security fees will only be used to support the TWIC program. The chart below reflects the spike in enrollment that will occur every fifth year.

The final rule includes the ability to provide a discount for Free and Secure Trade card holders, documented merchant mariners, and truckers with Hazardous Material Endorsements.

In FY 2008, Congress provided \$8.1 million in two-year appropriated funding for TSA to implement an access control technology pilot to test biometric technologies within the TWIC program. Of the \$8.1 million appropriation, \$2 million was obligated to support the program's administrative efforts for the pilot; and \$6.1 million was obligated for work and test equipment at test participant facilities and vessels. The Early Operational Assessment field test phase of the pilot began in April 2009. The initial technical testing phase, where readers were tested in a laboratory setting, was completed in December 2009. The system test and evaluation field test phase began in November 2009. As of January 14, 2011 approximately 147 of a planned 177 readers are installed. (The number of planned readers was recently reduced, as a result of one of the facilities withdrawing from the pilot, since the facility was over a year behind schedule).

Under the current plans, the USCG estimates the Notice of Proposed Rulemaking should be published by the end of calendar year (CY) 2011 and a final rule published by the end of CY 2012. TSA is committed to finalizing the TWIC Reader Pilot and anticipates completion early CY 2011. At the conclusion of the TWIC reader pilot, the program will finalize the reader specifications, publish a notice of availability in the Federal Register, and post the specification on the TSA Website.

In the interim, to fully leverage the security benefit of the TWIC, the USCG has added an electronic TWIC reader capability to existing MTSA and law enforcement programs. Additionally, the USCG is currently verifying compliance with the TWIC requirements through electronic validation during vessel and facility compliance exams and/or security spot checks. Through the use of handheld readers for TWIC verification, the USCG is maximizing the use of the security features of the credential.

Significant accomplishments in FY 2010 included:

- Processed over 328,400 TWIC applicants.

FY 2011 planned accomplishments include:

- Measure the performance of TWIC readers in a maritime setting through lab/bench testing and field tests at pilot facilities and vessels;
- Draft a final pilot report in 2011; and
- Develop the capability to provide individuals holding a TWIC the ability to apply for and receive a HME at a reduced fee.

In FY 2012, the TWIC program will move into a sustainment mode, and continue to support enrollment centers nationwide for new maritime workers, workers requiring a replacement card, and workers renewing their TWIC.

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
Hazardous Material CDL - fee
Program Performance Justification**
(Dollars in Thousands)

PPA: HAZMAT

	Perm. Pos	FTE	Amount
2010 Actuals	17	16	10,911
2011 C.R.	17	17	12,000
2012 Adjustments-to-Base	-	-	-
2012 Current Services	17	17	12,000
2012 Program Change	-	-	-
2012 Total Request	17	17	12,000

The Transportation Security Administration estimates fee collection of \$12.0 million in the Hazardous Materials Endorsement Threat Assessment Program (HTAP).

CURRENT SERVICES PROGRAM DESCRIPTION:

The HTAP was established to fulfill the statutory requirements of both the USA PATRIOT and Safe Explosives Acts to further protect against the threats to transportation posed by terrorists, dangerous criminals, and illegal aliens that may attempt to transport hazardous materials in commerce.

The program is funded through fee revenue that consists of three elements: 1) the cost for collecting and processing fingerprint and application information; 2) the fee the FBI charges to run the fingerprints against the criminal history records; and 3) a TSA program fee to cover costs to administer the program, including conducting the Security Threat Assessments (STAs). Payment of the Federal fee is a requirement to undergo the TSA STA.

TSA charges \$38 for the collection of information, \$17.25 for the FBI fingerprint-based CHRC, and \$34 for the TSA program fee for a total fee of \$89.25. The \$34 TSA program fee is charged to every applicant regardless of the state of issuance. However, the cost to the applicant varies by state. Non-TSA Agent States charge various collection, processing, and fingerprinting fees; the average total fee in non-TSA Agent States is approximately \$89.

States must forward biographic and biometric (fingerprint) information to TSA in an approved and established format to facilitate the STA process. TSA allowed States to elect to perform the biographic and biometric collection, or utilize a TSA-contracted agent to perform these functions on their behalf. Currently, 12 states collect the required biographic information and biometric

data through their individually established and maintained programs and 38 states and the District of Columbia have elected to utilize the TSA-contracted agent. Additionally, drivers registered in a state serviced by the TSA Agent may be fingerprinted in any other state serviced by the TSA Agent.

The HTAP has a robust redress process, including appeals, waivers, and Administrative Law Judge review. In FY 2009, the program conducted threat assessments on 297,473 applicants, a continued increase from the program's inception that confirms the vital role of improving the safety and protection of passengers and freight traveling on our Nation's highways. TTAC has processed over 1.6 million applications since January 2005.

Significant accomplishments in FY 2010 included:

- Processed over 286,200 HTAP applicants.
- Processed over 95 percent of applications in five days or less.

FY 2011 planned accomplishments include:

- Process over 352,000 applicants.
- Continue in sustainment mode, supporting new and current HTAP workers.

In FY 2012, HTAP plans to process over 352,000 applicants and will continue in sustainment mode, supporting new and current HTAP workers.

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
General Aviation - fee
Program Performance Justification
(Dollars in Thousands)**

PPA: GENERAL AVIATION

	Perm. Pos	FTE	Amount

2012 Current Services	-	-	100
2012 Program Change	-	-	-
2012 Total Request	-	-	100

The Transportation Security Administration requests \$100,000 in fee collection authority to support General Aviation security threat assessment vetting and program management activities.

CURRENT SERVICES PROGRAM DESCRIPTION:

This offsetting collection supports General Aviation flights into Ronald Reagan National Airport (DCA) as provided by the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176). The DASSP conducts STAs for all flight crewmembers and passengers including security coordinators and armed security officers on non-commercial aircraft (non-cargo) flying into or out of DCA from one of the 28 domestic gateway airports. TSA levies a \$15 fee for each person onboard the flight and flight authorization services. In addition, a \$296 fee per roundtrip is charged to flight operators for the screening personnel and equipment used to support such flights at DCA. TTAC has vetted over 34,300 General Aviation – DCA applicants since inception in October 2005.

Significant accomplishments in FY 2010 included:

- TTAC vetted over 4,400 General Aviation - DCA applicants.

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
Indirect Air Cargo - fee
Program Performance Justification
(Dollars in Thousands)**

PPA: INDIRECT AIR CARGO

	Perm. Pos	FTE	Amount

2012 Current Services	3	2	1,400
2012 Program Change	-	-	-
2012 Total Request	3	2	1,400

Transportation Security Administration requests \$1.4 million in fee collection authority to support the Indirect Air Cargo (IAC) program.

CURRENT SERVICES PROGRAM DESCRIPTION:

This program provides for fee collections supporting STAs of air cargo workers in the air cargo supply chain. In FY 2012, TSA will charge a \$41 per assessment fee to offset costs for conducting the STA and program management costs under CCSP. The new fee structure is based on revised cost and population estimates analysis conducted in support of the Air Cargo Security Rule that will be published in FY 2011.

The total FY 2012 collections from these fees are estimated to be \$1.4 million. This fee is collected in accordance with the Final Rule on Air Cargo Security Requirements and as authorized by the FY 2004 DHS Appropriations Act (P.L. 108-90). TTAC has vetted over 356,200 IAC applicants since inception in January 2007.

Significant accomplishments in FY 2010 included:

- TTAC vetted over 63,300 IAC applicants.

**Department of Homeland Security
Transportation Security Administration
Transportation Threat Assessment & Credentialing:
Certified Cargo Screening Program – fee
Program Performance Justification**
(Dollars in Thousands)

2012 Current Services	6	6	5,200
2012 Program Change	-	-	-
2012 Total Request	6	6	5,200

The Transportation Security Administration requests \$5.2 million in fee collection authority to support the Certified Cargo Screening Program (CCSP).

CURRENT SERVICES PROGRAM DESCRIPTION:

This initiative provides for fee collections to fund STAs for individuals authorized to screen cargo at designated cargo screening facilities. The CCSP rulemaking activity in FY 2011 will set an assessment fee of \$41 per applicant to support program management and vetting activities associated with conducting a security threat assessment. This program will utilize existing shipping infrastructure to help TSA meet cargo screening mandates.

Currently, CCSP is a voluntary program. Once the Air Cargo fee rule is published STAs will be mandatory for participation. TSA anticipates the fee rule publication in FY 2011. Since 2008, TTAC has vetted over 23,500 CCSP applicants.

The FY 2012 estimate is based on 67,694 CCSP applicants and 64,344 IAC applicants at a fee of \$41.

Significant accomplishments in FY 2010 included:

- TTAC vetted over 15,700 CCSP applicants.

2012 Program Change	-	-	-
2012 Total Request	-	-	1,200

The Transportation Security Administration requests \$1.2 million in fee collection authority to support the Large Aircraft Security Program (LASP).

CURRENT SERVICES PROGRAM DESCRIPTION:

This program provides for the fee collections to fund STAs for the large aircraft security program. The original LASP Notice of Proposed Rulemaking (NPRM) included language to require all U.S. operators of aircraft over 12,500 maximum gross take-off weight to adopt and implement a TSA-approved security program. The rule is currently undergoing analysis and revision by TSA with additional feedback from industry regarding alternatives to the rule’s proposed requirements, and a Supplemental NPRM is expected.

The FY 2012 estimate is based on 17,000 applicants at a fee of \$60.

2012 Program Change	-	-	-
2012 Total Request	-	-	8,000

The Transportation Security Administration requests \$8.0 million in fee collection authority to support the SIDA and Sterile Area Workers airport employee checks.

CURRENT SERVICES PROGRAM DESCRIPTION:

The SIDA and Sterile Area Workers program includes those individuals who apply for, or are issued, personnel identification media at U.S. domestic airports (e.g., airport facilities workers, retail employees, airline employees, taxi drivers, parking attendants, etc.). Prior to receiving any identification media, aviation workers must undergo a successful name-based STA. Depending on the access level granted to the airport worker, the individual may also be required to have a fingerprint based FBI CHRC.

The FY 2012 estimate is based on 463,700 applicants at a fee of \$17.25.

2012 Program Change	-	-	-
2012 Total Request	-	-	100

The Transportation Security Administration requests \$100,000 in fee collection authority to support Other Security Threat Assessments (OSTA).

CURRENT SERVICES PROGRAM DESCRIPTION:

The OSTA fees fund the 12/5, PCSSP, Maryland-Three (MD-3), and Airspace Waivers (ASW).

The 12/5 program conducts STAs for flight crewmembers operating (e.g., cockpit crew, airline personnel authorized in the cockpit, cargo carrier employees) aircraft with a maximum certificated takeoff weight of 12,500 pounds or more. Annual population for the 12/5 program is approximately 31,000 applicants. Each program conducts STAs for regulated parties

The PCSSP program is for private charter flight crewmembers operating aircraft with a maximum certificated takeoff weight of 45,000kg (100,309 pounds) or more, or a passenger-seating configuration of 61 or more, or whose passengers are enplaned from or deplaned into a sterile area. PCSSP does not include government charters.

The MD-3 program applies to pilots who operate aircraft and apply for privileges to fly to or from the three General Aviation airports in the Washington, D.C. restricted flight zones (Potomac Airport, Washington Executive/Hyde Field, and College Park Airport).

The ASW program, in conjunction with the Federal Aviation Administration, conducts STAs for domestic and international flight crew members and passengers for access to: certain operational areas of Ronald Reagan Washington National Airport, access to restricted Washington, D.C. flight restricted zones, major sporting events, Disney theme parks, flight training, and special events.

The FY 2012 estimate is based on 5,800 applicants at a fee of \$17.25.

The Transportation Security Administration requests \$20,000 in discretionary fee collection authority to support Sensitive Security Information (SSI).

CURRENT SERVICES PROGRAM DESCRIPTION:

TSA is collecting the SSI fee to fund the STAs and the FBI CHRCs for those individuals who require access to SSI. TSA has processed over 3,000 SSI vets since inception.

Significant accomplishments in FY 2010 included:

-
- TSA processed over 100 SSI vets.

2011 C.R.	6	6	4,000
2012 Adjustments-to-Base	-	-	-
2012 Current Services	6	6	4,000
2012 Program Change	-	-	-
2012 Total Request	6	6	4,000

The Transportation Security Administration estimates \$4.0 million in fee collection for the Alien Flight Student Program (AFSP).

CURRENT SERVICES PROGRAM DESCRIPTION:

AFSP conducts terrorist, immigration, and criminal-background checks on all foreign students applying for flight training in the United States or abroad at FAA certified flight training locations. Applicants are subject to a STA in accordance with Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176). AFSP applicants identified as a “threat to aviation or national security” under this program will be denied training.

The program reviews and assesses both biographic and biometric information to identify individuals who pose a security threat. Prior to the September 11, 2001 attacks, there were no systematic security checks performed on foreign students applying for FAA certified flight training in the United States or abroad.

Section 612 of the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176) transferred the function for screening AFSP applicants from the Attorney General to the Secretary of Homeland Security (and subsequently delegated to the TSA). The Act also gives the Secretary of Homeland Security the authority to establish a fee to offset costs of vetting AFSP applicants.

The program also began migrating 10-print fingerprints data to a common DHS platform, which will allow for the leveraging of program data to other DHS components. This effort is of particular interest to DHS Immigration and Customs Enforcement’s Student and Exchange Visitor Information System and will enhance both programs’ capability to more closely monitor attendance and status of students in training.

AFSP currently collects a fee of \$130 per basic applicant. This fee includes \$112.75 for extensive TSA international and domestic threat assessments, and \$17.25 for an FBI CHRC. On May 13, 2009, AFSP also began collecting a fee of \$70 per recurrent applicant. Fees collected for AFSP support the enrollment, vetting, and adjudication of flight training applicants and program management support. AFSP applicants, who require training for a new skill set, will also be required to undergo a fingerprint based FBI CHRC. AFSP has been operational since 2004 and has enrolled more than 188,900 students and is entirely funded by fee revenue.

Significant accomplishments in FY 2010 included:

- AFSP processed over 42,800 flight training fee applications.

FY 2011 planned accomplishments:

- 47,000 fee applicants in FY 2011.

In FY 2012, AFSP plans to process approximately 50,000 fee applicants in FY 2012; and continue in sustainment mode.

The TSDB expansion includes an additional 24 personnel in the Support Appropriations:

- 21 Intelligence Officers for continued analytical support for 24/7 indication and warning operations, and situational awareness to quickly identify potential threats to transportation as well as maintain the quality, timeliness, and quantity of notifications and analytical products; and
- 3 Attorneys for Office of Chief Counsel.

Justification

In response to the attempted bombing of Northwest Airlines Flight 253 on December 25, 2009, TSA and the DHS Office of Policy plan to expand the Selectee list to include any name in the Terrorist Screening Database (TSDB) that has a complete name and full date of birth. This will enable TSA to identify a larger set of individuals who may present a threat. TSA will use a higher match threshold against the expanded list, and will rely on the Secure Flight system's automated results to designate passengers as Selectees. This funding will allow TSA to address critical vulnerabilities identified after the December 25th incident.

Impact on Performance

Terrorists have demonstrated their intent at striking within the modes of transportation. An increase of \$12.4 million and 62 FTP will add more effective and consistent levels of protection against acts of aggression and will reduce the risk to the traveling public. TSA's vetting responsibilities have grown significantly in recent years and continue to grow as new threats, such as the Christmas Day attempted bombing of Northwest Airlines Flight 253, are identified and new populations are added or expanded. TSA has responded with the development and implementation of efficient, reliable changes to the vetting operations. The additional staff and operational funding will allow TSA to continue to provide timely and accurate vetting services to deter threats to our transportation systems.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Transportation Security Administration
Justification of Proposed Changes in
Transportation Threat Assessment and Credentialing
Appropriation Language**

For necessary expenses for the development and implementation of screening programs of the Office of Transportation Threat Assessment and Credentialing, \$183,954,000 available until September 30, 2013.

Note – A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111-242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

Explanation of Changes:

No substantive changes proposed.

PPA Mission Statement

The mission of the Secure Flight Program is to significantly improve the Federal Government's ability to prevent terrorists from boarding aircraft, help move passengers through airport screening more quickly, and reduce the number of individuals selected for secondary screening, while fully protecting passengers' privacy and civil liberties.

Summary Justification and Explanation of Changes

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Salaries and Benefits	\$14,590	\$16,156	\$39,699	\$23,543

The FY 2012 request provides for the balanced workforce strategy, and the Expanded Watchlist Vetting program increase for Secure Flight.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Travel	\$180	\$200	\$200	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Transportation of Things	\$3	\$3	\$1	(\$2)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Other Rent	\$3,797	\$4,000	\$4,500	\$500

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Communication, Utilities, and miscellaneous charges	\$75	\$335	\$900	\$565

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, and utility services. TSA is dependant upon communications lines and utilities to run the Secure Flight platform.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Advisory and Assistance Services	\$52,666	\$19,000	\$12,699	(\$6,301)

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. The FY 2012 request reflects the results of the balanced workforce strategy.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Other Services	\$46	\$18,590	\$12,215	(\$6,375)

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services will be the primary vehicle by which the Secure Flight program will be implemented and operated in regard to connectivity with air carriers and the processing of security checks. The FY 2012 request reflects the results of the balanced workforce strategy.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Operation & maintenance of facilities	\$906	\$18,076	\$19,980	\$1,904

Provides for the operation and maintenance of information technology systems used to support the Secure Flight program.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Operation & maintenance of equipment	\$1,531	\$1,000	\$0	(\$1,000)

Provides for the operation and maintenance of equipment used to support the Secure Flight program.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Supplies & materials	\$3,107	\$220	\$220	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Equipment	\$10,052	\$6,783	\$2,000	(\$4,783)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. These costs include equipment that will be purchased for the Secure Flight program outside of contracts for rollout and sustainment of the program. The FY 2012 request reflects the results of the Secure Flight program being fully implemented.

	Full Time Equivalents	97	98	121	23

PPA Mission Statement

The mission of Other Vetting is to help support the identification of individuals deemed as potential terrorists or who pose a security threat to either aviation or national security.

Summary Justification and Explanation of Changes

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Salaries and Benefits	\$14,006	\$15,415	\$18,057	\$2,642

The FY 2012 request reflects the increase in personnel due to the TSDB inclusion of VISA holders.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Travel	\$245	\$235	\$241	\$6

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request includes travel needs for the Other Vetting Programs.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Transportation of Things	\$11	\$40	\$41	\$1

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things. The FY 2012 request reflects transportation needs for the Other Vetting Program.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Other Rent	\$386	\$1,000	\$1,017	\$17

Rent includes all payments to a GSA managed source for rental space, land, and structures. The FY 2012 request includes the additional rental space needed for the Other Vetting Programs.

	2010	2011	2012	2012 - 2011
	<u>Actuals</u>	<u>C.R.</u>	<u>Request</u>	<u>Change</u>
Communication, Utilities, and miscellaneous charges	\$4	\$100	\$103	\$3

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, and utility services. TSA is dependant upon communications lines and utilities to run the vetting systems.

	2010	2011	2012	2012 - 2011
	<u>Actuals</u>	<u>C.R.</u>	<u>Request</u>	<u>Change</u>
Advisory and Assistance Services	\$8,523	\$10,850	\$11,004	\$154

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these services to provide program management, technical and logistical support as well as evaluations.

	2010	2011	2012	2012 - 2011
	<u>Actuals</u>	<u>C.R.</u>	<u>Request</u>	<u>Change</u>
Other Services	\$24,662	\$44,000	\$44,848	\$848

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services are used extensively in systems operations. These contracts will support TIM, SIDA, 12/5 Charter Pilots, MD-3 Airports and the Temporary Flight Restriction programs.

	2010	2011	2012	2012 - 2011
	<u>Actuals</u>	<u>C.R.</u>	<u>Request</u>	<u>Change</u>
Operation & Maintenance of equipment	\$234	\$200	\$206	\$6

Supports the operation and maintenance of information technology systems used to perform name checks for SIDA, 12/5 Charter Pilots, MD-3 Airports, and the Temporary Flight Restriction program.

	2010	2011	2012	2012 - 2011
	<u>Actuals</u>	<u>C.R.</u>	<u>Request</u>	<u>Change</u>
Supplies & materials	\$120	\$120	\$124	\$4

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property.

	2010	2011	2012	2012 - 2011
	<u>Actuals</u>	<u>C.R.</u>	<u>Request</u>	<u>Change</u>
Equipment	\$3,235	\$15,676	\$15,899	\$223

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2012 request reflects equipment needs.

Full Time Equivalents		27	21	21	0

PPA Mission Statement

The mission of the TWIC Program is to establish an integrated, credential-based, identity verification program through the use of biometric technology to grant workers unescorted access to secure areas within the nation's transportation system.

Summary Justification and Explanation of Changes

	2010 Actuals	2011 C.R.	2012 Request	2012 - 2011 Change
Salaries and Benefits	\$3,382	\$2,815	\$2,815	\$0

The FY 2012 request includes Salary and Benefits for 21 FTE.

	2010 Actuals	2011 C.R.	2012 Request	2012 - 2011 Change
Travel	\$242	\$200	\$200	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is necessary to conduct on-site reviews and meetings with maritime port operators and other TWIC program stakeholders.

	2010 Actuals	2011 C.R.	2012 Request	2012 - 2011 Change
Transportation of Things	\$169	\$250	\$250	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things.

	2010 Actuals	2011 C.R.	2012 Request	2012 - 2011 Change
Advisory and Assistance Services	\$12,366	\$700	\$700	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these types of contracts to assist in the development and implementation of the TWIC program.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Other Services	\$3,041	\$2,254	\$1,754	(\$500)

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services will include the adjudication of cases where individuals are denied a TWIC card. The request reflects the change in contractor staffing needed after the initial surge of enrollments; Government personnel will complete the majority of vetting and adjudication services.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Purchase from Government Accounts	\$6,409	\$0	\$0	\$0

Includes contracts with federal agencies for background check services including the FBI for fingerprint based checks and/or name based checks for these vetting programs.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Operation & Maintenance of equipment	\$6,131	\$1,900	\$1,500	(\$400)

Supports the operation and maintenance of information technology systems used for the TWIC program. The FY 2012 request reflects a better alignment in O&M costs.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Supplies & materials	\$2	\$81	\$81	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	2010	2011	2012	2012 - 2011
	Actuals	C.R.	Request	Change
Equipment	\$408	\$1,000	\$1,000	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. These costs include equipment that will be purchased for the TWIC program outside of contracts for implementation and sustainment of the program. The FY 2012 request reflects the results of the completion of the initial surge of TWIC applicants.

Travel	\$4	\$6	\$6	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is necessary to conduct on-site reviews and meetings with state and local stakeholders in the Alien Flight Student Program.

	2010 Actuals	2011 C.R.	2012 Request	2012 - 2011 Change
Other Services	\$3,138	\$3,222	\$3,222	\$0

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services are used extensively in the systems operation and case adjudication of the Alien Flight Student program.

	2010 Actuals	2011 C.R.	2012 Request	2012 - 2011 Change
Purchase from Government Accounts	\$88	\$0	\$0	\$0

Alien Flight Student program contracts with federal agencies for background check services including the FBI for fingerprint based checks on each applicant.

	2010 Actuals	2011 C.R.	2012 Request	2012 - 2011 Change
Supplies & materials	\$0	\$4	\$4	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	2010 Actuals	2011 C.R.	2012 Request	2012 - 2011 Change
Equipment	\$131	\$14	\$14	\$0

To purchase hardware and software used to support the program.

J. FY 2012 Schedule of Working Capital Fund by Program/Project Activity

Not Applicable

K. FY 2012 Schedule of Working Capital Fund by Program/Project Activity

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2013 budget.

TRANSPORTATION SECURITY ADMINISTRATION requests \$0 and 170 FTE for the FY 2012 DHS Balanced Workforce Strategy.

DHS Balanced Workforce Strategy Follow-On

- The FY 2012 DHS Balanced Workforce includes 181 FTP, 170 FTE and \$0 for Secure Flight:
 - Funding for the annualization of the 181 FTP will be covered by the savings from the termination of contracts.
 - All 181 FTP will be converted from contractors to Federal employees by the start of FY 2012.
 - Adjustments to the FY 2011 Secure Flight Amount and FTP/FTE are necessary to reflect the contractor conversions that occurred in FY 2011 as part of the FY 2011 DHS Balanced Workforce for Secure Flight, and were not reflected in the corresponding year's budget request.

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Support:

I. Appropriation Overview

A. Mission Statement for Transportation Security Support:

The Transportation Security Administration (TSA) is an agency of more than 50,000 personnel, with approximately \$8.1 billion in budget authority, regulatory and law enforcement authorities, and a nationwide presence. The management and support of the organization is accomplished by a transportation security support staff in the Washington, D.C. metropolitan area and five Mission Support Centers (MSCs).

B. Budget Activities:

Intelligence - The Office of Intelligence (INTEL) receives, assesses, and distributes intelligence information to support TSA's mission of securing the transportation system. INTEL also conducts strategic operational and tactical risk-based security planning.

HQ Administration – Headquarters (HQ) Administration provides all aspects of the support infrastructure required to sustain TSA's nation-wide operations. These activities include serving as the central point on policy development, performance management, facilities management, financial management, acquisition, civil rights protection, legal advice, internal conduct and audits, and providing a safe and healthful work environment for employees.

Human Capital Services - The Office of Human Capital Services (OHCS) includes all services that support the recruitment, assessment, servicing, and payroll of TSA's employees at headquarters, field offices, airports, and other locations. OHCS maintains oversight of all human resources contractual activities, and provides advice and counsel to senior managers on personnel issues.

Information Technology - Information Technology provides the IT infrastructure and services to maintain connectivity, provide productivity tools, and support headquarters and field corporate applications.

C. Budget Request Summary:

The Transportation Security Administration requests 1,961 positions, 1,855 FTE, and \$1,113,697,000 in appropriated funding for Transportation Security Support in FY 2012. The total adjustments-to-base include 286 FTP, 308 FTE and \$110,401,000. The program changes listed below support proposed FY 2012 enhanced security initiatives and Acquisition Workforce enhancement and decrease for administrative savings initiative total 39 FTP, 30 FTE, and \$1,516,000:

- Increase Intelligence, 21 FTP, 20 FTE, and \$2,163,000

- Increase Headquarters Administration, 18 FTP, 10 FTE, and \$5,631,000
- Increase Human Capital Services, 0 FTP, 0 FTE, and \$5,878,000, and
- Decrease Information Technology, 0 FTP, 0 FTE, and \$12,156,000

PPA: INTELLIGENCE

	Perm. Pos	FTE	Amount
2010 Actuals	190	144	24,711
2011 C.R.	211	175	33,604
2012 Adjustments-to-Base	--	28	7,225
2012 Current Services	211	203	40,829
2012 Program Change	21	20	2,163
2012 Total Request	232	223	42,992

The Transportation Security Administration requests \$42.9 million for Intelligence. The adjustments-to-base include an increase of 28 FTE and \$7.2 million for annualization of FY 2011 program increase, \$900,000 to support increase in Working Capital Fund, and \$1.6 million to support increased vetting for visa holders; and an increase of 20 FTE and \$2.2 million to support the enhanced vetting initiative.

CURRENT SERVICES PROGRAM DESCRIPTION:

INTEL provides TSA with an organic capability to review, synthesize, and analyze transportation specific intelligence in addition to providing comprehensive and cogent analytic products. It is the only Federal intelligence entity focused solely on the transportation sector. INTEL coordinates closely and shares information with DHS Intelligence & Analysis, the Intelligence Community (IC), the intelligence sections of law enforcement agencies, and the transportation industry. To facilitate collaboration and provide rapid analysis and notification of threats, the office assigns Field Intelligence Officers (FIOs) at key transportation nodes and places liaison officers at key IC and law enforcement agencies.

INTEL is critical to TSA's overall risk-based security strategy and the intelligence products generated provide the threat framework utilized to prioritize security resources. These products are regularly used by TSA senior leadership, the Federal Security Directors (FSDs), the Federal Air Marshal Service (FAMS), and the transportation industry to guide decisions. INTEL operates and maintains 24/7 intelligence capabilities at TSA Headquarters and the TSA Freedom Center to disseminate warnings and notifications of credible and immediate threats. INTEL also assists in coordinating domestic and international civil aviation and other modal security intelligence activities with other government agencies.

In order to perform its mission, INTEL provides and maintains Top Secret and Secret Collateral classified information technology infrastructures for interfacing via voice, video, and data with the IC, state and local law enforcement, field sites, and industry partners. One such system is the TSA Remote Access to Classified Enclaves (TRACE) solution which provides secure access to classified and unclassified threat information in a timely manner to multiple remote locations.

Significant accomplishments in FY 2010 included:

- Enhanced TSA's capability to provide comprehensive risk analyses, made up of quantifiable threat, vulnerability and consequence factors, to assist and enable TSA senior leadership and the operations elements in decisions concerning the application of low density – high demand assets to critical transportation sector security needs;
- Delivered TSA's first comprehensive risk assessment to Congress. The Transportation Sector Security Risk Assessment (TSSRA) included risk findings for all U.S. transportation modes as well as cross modal analysis; and
- Expanded the FIO program to improve INTEL's ability to provide accurate and timely intelligence products and threat warnings to more than 30 additional FSDs. Additionally, enhanced the network of state, local and industry partners fully involved and engaged with the newly created TSA Infospace collaborative website.

FY 2011 planned accomplishments include:

- Expand FIO program to increase field notification of threats and warnings to cover 100 percent of Category X and 73 percent of Category I airports by FY 2012. The FY 2011 locations will be selected based on close coordination with TSA operational elements to meet critical security needs;
- Develop and refine the risk assessment and analysis program to provide TSA leadership, TSA operational elements and transportation stakeholders with the most relevant and usable information and recommendations; and
- Lead TSA in developing and implementing classified communications architecture and capability by completing a comprehensive TRACE to Homeland Secure Data Network conversion plan and expanding the deployment of TANDBERG systems to enable secure video-teleconferencing between TSA Headquarters and key airports nationwide.

In FY 2012, TSA's planned accomplishments include:

- Select the remaining FIO program expansion based on close coordination with TSA operational elements to meet critical security needs, including enhanced vetting;
- Increase support to partnership programs and provide long-term trend analysis and liaisons for partnership agencies, such as Silent Partner with Customs and Border Protection;
- Redesign Watch operations to conduct more in-depth analysis, reporting, and provide more robust indications and warnings capability to support the enhanced vetting initiative;

- Continue evolution of the TSA risk assessment and analysis program to include the development of best-in-class risk management analytical approaches for integrating threat scoring, vulnerability assessments, and indirect consequence analysis into risk assessments; and
- Expand the scope and confidence level of cyber scenarios used in risk assessments.

PPA: HEADQUARTERS ADMINISTRATION

	Perm. Pos	FTE	Amount
2010 Actuals	1,093	910	257,827
2011 C.R.	1,039	971	254,794
2012 Adjustments-to-Base	201	200	60,369
2012 Current Services	1,240	1,171	315,163
2012 Program Change	18	10	5,631
2012 Total Request	1,258	1,181	320,794

The Transportation Security Administration requests \$320.8 million for this activity. The adjustments-to-base include annualization of 200 FTE and \$60.4 million for FY 2011 program increase, and realignments. Program increases include 3 FTP, 3 FTE, and \$3.6 million to support enhanced security initiatives, and an increase of 15 FTP, 7 FTE and \$2 million to support the Acquisition Workforce enhancement.

CURRENT SERVICES PROGRAM DESCRIPTION

The following table provides the components that make up this PPA.

(Dollars in Millions)

	FY 2011 CR	FY 2012
Personnel	\$139.1	\$162.4
Leadership	2.6	4.5
Internal Management and Controls	61.9	86.4
Workforce Support	18.1	22.1
Facilities Management & Physical Security	33.1	45.4
Total	\$254.8	\$320.8

Headquarters Administration supports numerous functions required to provide leadership, management, and logistics support to TSA operations.

Personnel: \$162.4 million in personnel costs are included in this PPA for the Offices of the Assistant Secretary and Deputy Assistant Secretary, Inspection, Chief Counsel, Finance and Administration (Chief Financial Officer and Chief Administrative Officer), Legislative Affairs, Acquisition, Special Counselor, Security, and Strategic Communications and Public Affairs.

Leadership: \$4.5 million in operating expenses are provided to develop the policy and management architecture to guide overall activities, ensure compliance with laws and regulations, and manage external relationships with Congress, the Administration, other

oversight entities, and private sector partners. Executive leadership offices include the Office of the Administrator, Deputy Administrator, Legislative Affairs, and Strategic Communications and Public Affairs.

Internal Management and Controls: \$86.4 million in operating expenses support the day-to-day management of an \$8.1 billion budget and over 50,000 personnel. Offices overseeing internal management and controls include: Inspection, Acquisition, Chief Financial Officer (CFO) Chief Administrative Officer (CAO), Chief Counsel, and Security.

Workforce Support: \$22.1 million in operating expenses support all aspects of sustaining approximately 50,000 employees and ensuring an excellent working climate and a safe and healthful environment while performing TSA's mission. In addition, these programs ensure fair and lawful treatment of employees and the public. Offices that provide workforce support include: Special Counselor and CAO.

Facilities Management and Physical Security: \$45.4 million is needed for operating expenses managed by the CAO for facility and management support for HQ, the Freedom Center, the Franconia Warehouse, and the MSCs. The Franconia warehouse is used to stage TSA equipment prior to deployment, to store special purpose consumables, and to serve as temporary storage of property and equipment during construction projects. The MSCs are the central field service support mechanism for TSA across transportation modes. They provide TSA field personnel with support within designated areas, located in San Francisco, CA; Atlanta, GA; Dearborn, MI; Philadelphia, PA; and Coppell, TX.

PROGRAM OFFICES

Acquisition – Executes contracts and other agreements for the supplies and services needed by TSA to accomplish its mission. This office provides subject matter expertise in the areas of acquisition, field office acquisition guidance, grants management, requirements development, and program management.

Significant accomplishments in FY 2010 included:

- Developed an acquisition workforce by implementing recruitment, retention and employee development plans, and participated in the DHS Acquisition Professional Career Program;
- Implemented process improvements identified through Lean Six Sigma efforts to formalize Test and Evaluation policy to include requirements for a program Test and Evaluation Master Plan and implement systematic reviews of test results as part of the Investment Review Board process; and
- Initiated strategic sourcing efforts, including the development of a comprehensive plan for enterprise-wide requirements.

Planned accomplishments in FY 2011 include:

- Strengthen contract oversight, including consistent file and process reviews of the end-to-end procurement process; and
- Formulate Acquisition Logistics guidance and policy, develop documentation requirements for the Integrated Logistics Support Plan, and implement the strategic sourcing plan.

In FY 2012, Acquisition will increase its workforce by 15 FTP, 7 FTE and \$2.0 million in support of the Administration's emphasis to increase its acquisition workforce capacity and capabilities, while maximizing competition and value. The initiative will mitigate capacity and capability risks associated with identified gaps in the acquisition workforce, while improving acquisition management. To accomplish this, Acquisition plans to improve program management by building and maturing the Program Management infrastructure and environment as well as focus on continuing and expanding assistance and outreach to all program offices, and strengthening the acquisition review process. Acquisitions will also strengthen the Contracting Officer's Technical Representative program and contract administration through improved compliance in systems, reports, and processes.

Chief Administrative Officer (CAO) – Develops and implements administrative services programs, policies and functions to include occupational safety health and environment (OSHE), property management, Field Real Estate Services, Building Management Services, and Information Management. These programs provide the following services:

- OSHE ensures TSA is in compliance with Federal regulations, DHS policy, and TSA policy and guidance in the areas of safety, health, and environmental services;
- Property Management provides accountability of all personal property owned by TSA, manages the fleet and transportation program, transit benefits, and HQ parking;
- Field Real Estate Services provides facilities services for field workspace locations by managing office and airport space allocations; lease acquisitions; design, construction and renovation of leased space and furniture acquisition;
- Building Management Services provides HQ building management and facilities support; and
- Information Management Programs manages the release of official agency records, management directives, and official forms.

Significant accomplishments in FY 2010 included:

- Met the requirements of the former Safety, Health, and Return to Employment (SHARE) initiative by reducing the total injury case rates and lost time case rates by more than 27 percent between FY 2009 and 2nd quarter FY 2010;
- Implemented a Workers' Compensation Case Management Module that includes electronic reporting and transmittal of employee injury and illness records to the Office of Workers' Compensation Programs. This module assists in activities such medical monitoring, light and limited duty assignments, and leave and pay entitlements; and
- Completed a study that found radiation exposure of TSOs while performing screening operations is well below occupational radiation safety limits and TSOs would not be required to wear dosimeters.

Planned accomplishments for FY 2011 include:

- Establish internal performance metrics that align with the President's "Protecting Our Workers and Ensuring Reemployment" (POWER) initiative which replaces the former SHARE initiative by reducing the total injury case rates and lost time case rates, reducing the lost days incurred from injuries, and improving timeliness of filing injury reports;
- Develop and offer a Designated Occupational Safety and Health workshop to assist senior safety and health officials at airports to manage local OSHE programs and lead employees to an improved culture of safety; and

- Revise the facilities program requirements and space allocation standards to reflect lessons learned from the FY 2010 space management pilot in Los Angeles.

In FY 2012, CAO plans to implement initiatives to meet the POWER requirements and to reduce the total injury case rates and lost time case rates as well as begin application of the new space allocation and design guidelines to all field real estate projects, with the goal of densification of our portfolio, and gains in space use efficiencies. CAO will conduct training on eTagging and eRMS, and seminars on Records Management. The office will also conduct approximately 300 inventory site visits and continue to focus on energy saving projects to reduce energy consumption.

Chief Counsel – Delivers legal services to all mission areas, components, and staff, covering all substantive legal areas applicable to TSA. These include a comprehensive and inclusive array of services from legal and policy development, ethics, negotiating and drafting international agreements, drafting and reviewing legislation, Congressional testimony, and regulations and rulemaking.

Significant accomplishments in FY 2010 included:

- Drafted legislative proposals to authorize special testing of air cargo;
- Developed rule making proceedings, in conjunction with the DHS Office of General Counsel, for Secure Flight, Air Cargo, Rail, and Large Aircraft; and
- Issued and reviewed regulations on canine searches and cargo screening, credential authentication technology/boarding pass scanning system pilot, Stand-Off Detection Passive Millimeter Wave Screening, fee increases for Transportation Worker Identification Credential (TWIC) Maritime, and drafted rule on Protection of Sensitive Security Information (SSI) in Federal Civil Court proceedings.

Planned accomplishments in FY 2011 include:

- Write Security Directives and regulations/rulemaking to support security threat assessments (STAs) for surface transportation modes (rail and mass transit), as well as all other aspects of transportation security;
- Evaluate analysis of immigration documentation and policy to support the TWIC program, including evaluation of new fee component and potential use of TWIC at new sites; and
- Determine legal feasibility of regulating additional populations based on security risk and involvement of state agencies regarding Commercial Driver License vetting.

In FY 2012, the Chief Counsel will increase by 3 FTP, 3 FTE and \$670,000. The Office will write Security Directives and regulations/rulemaking to support STAs for surface transportation modes; evaluate potential use of TWIC at new sites and Memorandum of Understanding and Interagency Agreement to support vetting of chemical sector workers; and provide legal guidance on an acquisition strategy for long term contract solution for TWIC enrollments.

Furthermore, with the increase in individuals who receive selectee screening as directed by the expanded watch list vetting policy, there will be a commensurate increase in individuals who are determined to be such a threat that their credential should be revoked. Thus, more

selectees vetted will result in more revocations, which, in turn, will create more redress requests that result in an increased attorney workload.

Chief Financial Officer (CFO) – Obtains the necessary resources to support TSA’s critical mission and ensures the resources are used efficiently by providing effective financial systems and robust internal funds controls. Provides planning guidance to align the TSA budget with DHS goals and objectives and provides performance guidance and assistance to ensure goals and objectives are executed.

Significant accomplishments in FY 2010 included:

- Ensured fiscal responsibility and accountability and improved financial audit results by strengthening fiscal policies and procedures, providing financial training and tools to the workforce, enhancing the management control program and testing of internal controls, and improving the quality and integrity of financial data;
- Transitioned to DHS’ Travel Management System, FedTraveler; and
- Developed, presented, and defended TSA’s annual budget requests (FY 2011/FY 2012) in meetings with the Department, the Office of Management and Budget (OMB), and FY 2011 with Congress.

Planned accomplishments in FY 2011 include:

- Ensure that improvements put into place over the past years to strengthen fiscal policies and procedures are firmly integrated into the day-to-day business processes by continuing testing of management controls, providing on-going training, and expanding financial reporting to provide enhanced analytical capabilities to facilitate monitoring, tracking, and resource decision making and plan for transition to the next generation of DHS financial and administrative systems;
- Provide Program Executives/DHS with monthly execution reports on available funding, obligations and commitments to date; and
- Develop, present, and defend TSA’s annual budget requests (FY 2012/FY 2013) in meetings with the Department, OMB, and Congress.

In FY 2012, the CFO will sustain improvements in fiscal policies and procedures and begin transitioning to the next generation of DHS financial and administrative systems. In addition, the CFO will develop, present, and defend TSA’s annual budget requests (FY 2013/FY 2014) in meetings with the Department, OMB, and Congress and will ensure that program operational spending plans emanate from DHS Mission and Goals and the TSA Strategic Plan.

Inspection – Conducts covert testing to assess systematic vulnerabilities across all modes of transportation; investigates allegations of employee misconduct within TSA and conducts proactive compliance inspections of programs; provides financial and operational reviews to assess the integrity of programs; and conducts insider threats reviews.

Significant accomplishments in FY 2010 included:

- Conducted covert tests of aviation security at 319 airports: tests included screening checkpoint and checked baggage, focused testing of new technologies and procedures, targeted testing based on intelligence information on new threats, and expanded air cargo

covert testing to include the TSA Known Shipper Program and Certified Shipper Program;

- Completed 86 airport inspections, nine FAMS Headquarters and nine Field Office inspections, and three Headquarters Office inspections to evaluate offices for compliance with TSA and DHS directives, standard operating procedures and policies; and
- Performed 15 audits of airline security fees remitted to TSA to determine compliance with regulatory requirements and identify possible liability.

Planned accomplishments in FY 2011 include:

- Increase number of covert test team leaders to target a broader range of the multiple layers of security and respond to new threats based on intelligence information; and expand intermodal covert testing to include rail and ground mass transit;
- Conduct inspections of 21 FAMS Headquarters and Field, and Headquarters Offices to achieve the goal of inspecting all offices on a three year cycle, and complete 106 Federal Security Director airport inspections and re-inspections to reach the goal of inspecting all airports on a four year cycle; and
- Conduct risk assessments of TSA operations and execute 20 internal reviews and airline audits to address potential weaknesses.

In FY 2012, Inspection will increase covert testing across security practices to meet the challenges of the changing threat environment and emerging technologies. In addition, it will provide more extensive risk-based, intelligence driven information to senior leadership while continuing to conduct covert testing across the various modes of transportation.

Security – Oversees and administers the agency-wide physical, personnel, and internal security policies and procedures, thereby ensuring a safe and secure workplace for its employees, and effectively determining the pre-employment suitability of all TSA personnel, to include contractors.

Significant accomplishments in FY 2010 included:

- Enhanced the level of background investigation for all newly hired TSOs to a Minimum Background Investigation rather than the current Access National Agency Check and Inquiry (ANACI) based on their designated position sensitivity level. Close to 4,000 upgrade actions were completed;
- Initiated a three-year plan to complete re-investigations for TSA personnel employed for at least five years; and
- Distributed HSPD-12 Personal Identity Verification (PIV) cards for all National Capital Region (NCR) TSA employees and supported the deployment of the HSPD-12 nationwide.

Planned accomplishments in FY 2011 include:

- Complete the planned upgrade of 10,000 TSOs to Secret security clearance eligibility to allow TSA to provide mission-critical intelligence data to frontline personnel;

- Reduce the processing time for the background investigation and thus quicken the pace of the hiring process, clear re-investigation backlogs, and strengthen security through more thorough Minimum Background Investigations; and
- Consolidate the HSPD-12 PIV issuance program into the Working Capital Fund along with other DHS Components.

In FY 2012, Security will continue the re-investigation of approximately 25,000 TSOs current employees who have been employed at TSA for at least five years, and reduce the processing time for background investigations, clear re-investigation backlogs, and strengthen security through more thorough Minimum Background Investigations. Security will continue the phased upgrade effort of the Lead TSOs as necessary to enable to provision of timely, mission-critical intelligence data to frontline personnel. In addition, Security will support the HSPD-12 PIV issuance program, and continue to enhance and upgrade software and hardware security countermeasures at all NCR facilities as part of life-cycle operations.

Special Counselor - Includes Offices of Audit Liaison, Executive Secretariat, Freedom of Information Act (FOIA), Civil Rights and Liberties (OCRL), Ombudsman, Privacy, and Transportation Security Redress. These offices provide the following services:

- Audit Liaison is the TSA point of contact for audits performed by the Government Accountability Office and the DHS Office of the Inspector General;
- Executive Secretariat manages the preparation and coordination of correspondence with DHS, Congress, and the public, briefing materials for the Secretary and Deputy Secretary, and congressional Questions for the Record, and Reports to Congress. It also operates the TSA Contact Center which responds to traveler inquiries;
- FOIA responds to FOIA and Privacy Act requests from the public, Congress, and other government agencies;
- OCRL provides Equal Employment Opportunity services including education, traditional counseling, mediation, and formal complaint investigation;
- Ombudsman provides neutral and confidential problem resolution services to employees and the public for issues involving TSA;
- The Privacy Office ensures that TSA complies with all privacy laws and regulations; and
- Transportation Security Redress provides an appeal forum for individuals identified as a threat or a potential threat to transportation security.

Significant accomplishments in FY 2010 included:

- Processed more than 100 traveler-related complaints and conducted outreach with 500 individuals from 40 disability organizations on navigating the security process and the increased use of Advanced Imaging Technology at airport checkpoints;
- Processed more than 40,000 requests for redress from the traveling public, an increase of 48 percent over FY 2009. Collaborated with DHS stakeholder components to ensure efficiencies in planning and design phase of new DHS Traveler Redress Inquiry Program (DHS TRIP) case management system; and
- Developed and implemented a centralized information technology infrastructure for civil rights and liberties case tracking and Equal Employment Opportunity Commission (EEOC) statutory reporting, in support of One-DHS.

Planned accomplishments for FY 2011 include:

- Implement a centralized-information technology infrastructure across DHS for civil rights and liberties case tracking and EEOC statutory reporting;
- Implement the new DHS TRIP case management system to increase the capacity to respond to redress requests and substantially reducing the DHS TRIP processing time for misidentified individuals; and
- Increase engagement with disability groups by 25 percent and with Muslim, Arab and Sikh organizations by 25 percent.

In FY 2012, Special Counselor plans to increase the efficiency of the TSA Contact Center to meet the needs of more than 650,000 traveling citizens by augmenting performance requirements to more advanced service levels; reduce production time for civil rights statutorily mandated reports through the application of automation efficiencies, thus, obtaining significant productivity gain to operations.

Strategic Communications and Public Affairs – Serves as TSA’s buttress in protecting the Nation’s transportation systems by providing full and appropriate information about the implemented policies and security measures. The office fosters a broad public understanding of the methods and impact of transportation security to promote effectiveness and contribute to TSA’s commitment to customer service.

Significant accomplishments in FY 2010 included:

- Received the Public Relation Society of America’s Bronze Anvil Award for work and response to the “Mommy Blogger” incident. The award recognizes outstanding communications with the public; and
- Received the 2009 Merit Award for Excellence in Open Government for the TSA Blog for excellence in innovative implementations aimed to deliver a more efficient and transparent government.

In FY 2011 and FY 2012, the Office will develop and institute a nationwide public awareness campaign targeted at the general public and transportation industry employees.

**Department of Homeland Security
Transportation Security Administration
Transportation Security Support:
Human Capital Services
Program Performance Justification**
(Dollars in Thousands)

PPA: HUMAN CAPITAL SERVICES

	Perm. Pos	FTE	Amount
2010 Actuals	246	212	240,032
2011 C.R.	231	222	237,770
2012 Adjustments-to-Base	14	13	20,651
2012 Current Services	245	235	258,421
2012 Program Change	-	-	5,878
2012 Total Request	245	235	264,299

The Transportation Security Administration requests \$264.3 million for Human Resources Services for Headquarters and field offices. The adjustments-to-base include a realignment of 13 FTE and \$20.7 million. Increases include \$9.9 million to support enhanced security initiatives and a decrease of \$4.0 million for the Human Capital Services Efficiencies.

CURRENT SERVICES PROGRAM DESCRIPTION

The following table provides the components that make up this PPA.

(Dollars in Millions)

	FY 2011 CR	FY 2012
Personnel	\$41.1	45.5
HR Access -- Recruitment, Assessment, & Personnel Administration	153.4	175.5
Other HC Services	30.6	30.9
Leadership Training & Development	12.7	12.4
Total	\$237.8	264.3

The Office of Human Capital Services (OHCS) maintains oversight of all Human Resources (HR) contractual activities, develops policies, guidance and programs that are used to identify and promote the best and most efficient HR practices, thereby allowing TSA to establish and administer programs necessary to create and sustain a diverse and highly skilled workforce.

Personnel: \$45.5 million in personnel costs are included in this PPA to support all HR activities.

HR Access: The request includes \$175.5 million to provide HR Services to the workforce located in nearly 450 airports in all 50 States, the District of Columbia, and U.S. Territories.

HRAccess aligns with the Enterprise Architecture of DHS and leverages available e-systems that create efficient services and processes. As a result, TSA benefits from improved customer service both through feedback and stakeholder communications, innovative approaches utilizing automated solutions and Federal best practice applications, and improved efficiency through system/process integration resulting in reduced overhead.

Significant accomplishments in FY 2010 included:

- Implemented the Personnel Action System with 6-day business rule and automated email notifications to HR Specialists on successful processing;
- Streamlined automated awards and recruitment processing systems which resulted in significant reduction in errors and reduction in processing times; and
- Rolled out a new Transportation Security Officers (TSO) application that includes 28 disqualifiers to allow for an earlier self select-out process and moved quick-check earlier in the hiring process.

Planned accomplishments for FY 2011 include:

- Continue to hire TSOs in support of the deployment of Advanced Imaging Technology;
- Sustain the hiring of Federal Air Marshals and Transportation Security Inspectors; and
- Complete the implementation of the Integrated Data Warehouse.

In FY 2012, HRAccess program will continually refine the new integrated system to realize efficiencies and cost savings to the government. OHCS will also review the service levels being delivered and the methodologies, tools, and staffing levels being employed by HRAccess with the objective of identifying further opportunities for improvements.

Other Human Capital Services: \$30.9 million is requested for employee relations, program management support of Human Capital systems, strategic Human Capital planning, reasonable accommodation, management of the Worker's Compensation program, Medical Evaluation Program, and mandatory programs. Mandatory programs include drug and alcohol testing and Unemployment Compensation.

The Workers' Compensation Program oversees the Workers' Compensation chargeback from the Department of Labor and the Nurse Case Management Program. The Program established the Periodic Roll Initiative (PRI) in April 2007. The initiative is a joint effort with the Nurse Case Management team in which all of the long term disability (Periodic Roll) cases are examined for opportunities to return employees to work when medically feasible.

MedLink is utilized to schedule and provide Magnetic Resonance Imaging (MRI) and Computed Tomography (CT) scans for employees with work-related injuries. MedLink's service expedites the scheduling of MRI and CT Scans at a reduced cost. This service schedules appointments with local radiology and diagnostic imaging centers at the earliest possible date, providing the employee's physician with an image and image study within 24 hours of testing. This enables the physician to provide accurate and timely diagnosis for quality care and medical treatment.

The Medical Evaluation Program ensures that TSOs are physically fit to continue to perform the mission critical duties of their position. This program will require TSOs to be medically evaluated, on a recurring basis -- every three years of service. The incumbent TSO medical

qualification standards will parallel the standards for the TSO applicants. The Aviation and Transportation Security Act (ATSA) mandates annual proficiency review of TSOs to ensure they continue to meet all qualifications and standards required to perform screening duties. TSA requires applicants for TSO positions to demonstrate that they are medically/physically qualified. Currently, incumbent TSOs are not medically evaluated on an on-going basis

Significant accomplishments in FY 2010 included:

- Realized a three percent reduction of PRI cases through April 30, 2010 with a projected annual salary savings of \$930,000;
- Piloted a Prescription Network, Pharmacy Benefit Management program (PBM) in 20 airports. This network provides prescribed medication through a network provider allowing an injured employee to receive medication for job-related injuries without incurring out-of-pocket expenses; and
- Received the 2009 Theodore Roosevelt Workers' Compensation and Disability Management Award sponsored by Specialty Risk Services.

Planned accomplishments for FY 2011 include:

- Review and assess the remaining periodic roll cases;
- Fully implement the PBM network throughout TSA and review and assess the newly implemented prescription network; and
- Establish and pilot the Medical Evaluation and Review Program and develop detailed plans for processes and procedures, and draft policies and standards.

In FY 2012, OHCS will review and assess any remaining periodic roll cases and all newly added periodic roll cases and continue to use MedLink. The pharmacy prescription network will be reviewed and assessed for performance improvements and program enhancements. In addition, the office will also begin annual TSO medical evaluations and reviews, develop any appropriate reasonable accommodations, and respond to appeals; and assess potential efficiency gains from consolidation of other existing medical activities, such as Workers' Compensation and the Drug-Free Workplace initiative.

Leadership Training and Development Program: \$12.4 million is requested for training and development of Headquarters and Field staff. OHCS works closely with TSA leadership to develop and administer programs to prepare for future leadership needs and fulfill the succession planning mandated by OPM and DHS. This requires identifying the most critical current and future senior leadership requirements, preparing a pipeline of talented and motivated leaders at all levels, and identifying the best external sources of recruitment when internal sources are insufficient to meet critical needs.

Succession Planning provides the opportunity for current leaders to make an investment in the development of future leaders and in the long-term success of TSA. The program was launched in three phases: Senior Leadership Development Program (SLDP) 1, SLDP2, and Candidate Development Program (CDP) 2010 (previously known as SLDP3). The CDP is a formal program operating under OPM and DHS rules to develop candidates who will seek certification from an OPM-sponsored Qualifications Review Board. Upon completion of the requirements and once certified, the employee will be eligible for non-competitive selection to executive positions. The first three phases of SLDP each target different pools of applicants for critical positions.

The professional development program provides mission-related training that is either beneficial for an employee in his/her current position or for professional development that will increase the employee's ability to contribute to TSA's mission in another capacity. The Career Resident Program is a formal career development program designed to attract exceptional candidates with diverse backgrounds into targeted entry level positions.

Significant accomplishments in FY 2010 included:

- Completed testing and deployment of new learning and development tools for aspiring mid-level managers in a new class of Mid-Level Leadership Development Program, and developed additional tools to aid program management and oversight;
- Published the first annual Leadership Development Program Stakeholder Report which contains narrative and metric assessments of the performance of leadership development programs; and
- Updated Assistant Administrator succession plans and the TSA corporate succession plan, including identification of critical positions and related competencies, emerging challenges, projection of near-term turnover and internal/external selection ratios, evaluation of internal and external feeder pools, and recommendation of specific succession strategies.

Planned accomplishments for FY 2011 include:

- Complete evaluation of first SES-CDP results and providing programmatic support and management of the TSA selections under the 2011 DHS SES-CDP;
- Create a leadership refresher training program in accordance with 5CFR 412.202: Systematic Training and Development of Supervisors, Managers, and Executives; and
- Develop and test TSA e-University as a method to provide long-distance training, development, and educational opportunities to the field.

In FY 2012, OHCS will update the Assistant Administrator succession plans and the corporate succession plan, initiate new and/or revised learning, development and educational programs, and pilot the use of TSA e-University, a system used to deliver long distance Homeland Security related courses from various colleges and universities.

**Department of Homeland Security
Transportation Security Administration
Transportation Security Support:
Information Technology
Program Performance Justification**
(Dollars in Thousands)

PPA: INFORMATION TECHNOLOGY

	Perm Pos	FTE	Amount
2010 Actual	186	148	\$450,830
2011 C.R.	155	149	475,612
2012 Adjustments-to-Base	71	67	22,156
2012 Current Services	226	216	497,768
2012 Program Change	(12,156)
2012 Request	226	216	485,612

The Transportation Security Administration requests \$485.6 million to support information technology. The adjustments-to-base include an increase of 67 FTE and an increase of \$22.2 million for realignments. The program change includes a program decrease of \$14.7 million for the IT Infrastructure program and TSA Operating Platform; a \$17.8 million across-the-board reduction to IT services; a \$1 million reduction to personnel pay and compensation; a \$20.300 million program increase for Data Center Migration; and a \$1 million increase to support enhanced security initiatives.

CURRENT SERVICES PROGRAM DESCRIPTION

The following table provides the components of the PPA's Current Services.

(dollars in millions)

	FY 2011 CR	FY 2012
Core Information Technology Program	\$392.3	\$365.5
Financial Management Systems	\$59.4	\$87.1
IT Personnel	\$23.9	\$33.0
Total	\$475.6	\$485.6

Core Information Technology (IT) Program: A total of \$365.5 million supports the core IT and telecommunications infrastructure for all TSA enterprise-wide IT services that assist in accomplishing TSA mission responsibilities. The core enterprise IT capability is supported through an IT infrastructure contract that provides TSA the flexibility to manage and adjust IT resources as necessary. The IT business model that TSA has implemented offers the prospect of long-term cost efficiencies and the implementation of state-of-the-art technologies without sacrificing the integrity or security of IT systems.

Significant accomplishments in FY 2010 include:

- Reengineered the data storage, backup, and recovery environment at TSA to ensure services are aligned with the evolving demands of the agency;

- Transitioned from the current IT managed service contract to a new competitively awarded DHS Enterprise Acquisition Gateway for Leading Edge Solutions (EAGLE) contract;
- Maintained a score of 100 percent on the OMB Federal Information Security Management Act (FISMA) scorecard;
- Completed the transition of all TSA telecommunication circuits to the Networx contract providing greater return-on-investment to TSA; and
- Deployed 300 new hand-held encryption capable devices, 9,800 whisper communication radios, and additional infrastructure to support strategic secure communications for the TSA security workforce.

FY 2011 planned accomplishments include:

- Complete the consolidation of remaining data center assets from the TSA Headquarters location to the DHS consolidated data center solution;
- Evaluate and test solutions for a proposed virtual computing environment to provide greater flexibility and efficiency of IT resources;
- Consolidate and centralize IT system monitoring to provide more effective visibility into network events/incidents;
- Implement an enterprise solution to enable TSA to identify, label, monitor, and protect all electronic Sensitive Agency Information; and
- Expand the large land mobile radio and checkpoint communication equipment base and evaluate the needs of the screener workforce to enhance communication capabilities.

In FY 2012, TSA will develop and begin to execute plans to consolidate and reengineer residual non-Headquarters data center assets into the DHS data center. TSA will incrementally implement virtual solutions into the TSA IT environment to produce additional utilization and resource efficiencies. TSA will also enhance cyber security capabilities through intrusion prevention, forensic analysis, and data protection.

TSA has planned objectives in FY 2012 to strengthen its IT security posture and reevaluate current network and IT infrastructure resources for optimum efficiency. TSA is working with DHS to align current IT capabilities. To accomplish this goal, TSA has aligned a number of core IT services with the existing DHS EAGLE contract to further improve mission support and operational efficiency across DHS. The alignment will help deliver enhanced business-focused IT services and a more robust telecommunications infrastructure for all TSA employees. The funding in FY 2012 will also assist TSA in developing an IT environment that promotes collaboration throughout TSA and the DHS component agencies.

Enhancements to the IT environment include:

- Optimizing current data circuits under the GSA Networx contract to create costs and bandwidth efficiencies;
- Evaluating and testing solutions for a proposed virtual computing environment; and
- Consolidating and centralizing IT system monitoring.

Financial Management Systems: This activity funds \$87.1 million of interagency agreements with the U.S. Coast Guard for the use of their financial management system. This also funds reimbursements to DHS for the costs of the Working Capital Fund related to operational and information management support functions.

IT Personnel: This PPA includes \$33.0 million to support 226 FTP / 216 FTE for Information Technology support. These personnel consist of IT engineers, application developers, technical specialists, and associated support professionals. They provide the IT infrastructure and services to TSA Headquarters and field locations.

Justification

The Transportation Security Support Appropriation funds transportation security support staff at locations throughout the United States that provide leadership, management, and support to TSA.

Intelligence provides intelligence support and predictive analysis to the Field Intelligence Officers program. The increase of 21 FTP, 20 FTE, and \$2.2 million is to perform incident and trend analysis of selectee encounters.

Headquarters Administration provides all aspects of the support infrastructure required to sustain TSA's nation-wide operations. The increase of \$3.6 million is for support activities which include leadership, internal management and controls, workforce support, facilities management and physical security. In addition, program increases will fund the following new positions:

- Attorney positions (3 FTP/3 FTE) and \$670,000 to provide additional legal guidance on security directives, and regulatory and rulemaking that will result from the enhanced vetting. With the increase in individuals who receive selectee screening as directed by the expanded watch list vetting policy, there will be a commensurate increase in individuals who are determined to be such a threat that their credential should be revoked. Thus, more selectees vetted will result in more revocations, which, in turn, will create more redress requests that result in an increased attorney workload.

Human Capital Services includes the services to support the recruitment, assessment, servicing, and payroll of all TSA employees at headquarters and in the field. The increase of \$9.9 million is for recruitment and servicing of new positions: TSOs, VIPRs, and support staff.

The Information Technology program provides a suite of IT services to Headquarters and field locations throughout the United States. The program increase of \$1.1 million for Working Capital Fund payroll services and the core IT functional requirements of the organization, which include the voice and data network, email, file storage, wireless communications, personal computing equipment, and cyber security services for an agency of over 50,000 personnel spanning more than 400 locations.

Impact on Performance

Terrorists have demonstrated their intent at striking within the modes of transportation. An increase of \$16.7 million for 24 positions will add more effective and consistent levels of protection and will reduce the risk to the traveling public.

Transportation Security Administration
Transportation Security Support**

Justification of Program Changes
(Dollars in Thousands)

Program Increase # 2: Acquisition Workforce
 Quadrennial Homeland Security Review (QHSR): Goal 1.1: Prevent Terrorist Attacks
 Objective 1.1.2: Deter and Disrupt Operations
 PPA: Headquarters Administration
 Program Increase: Positions 15 FTE 7 Dollars \$1,998

Funding Profile

	FY 2010 Actual			FY 2011 C.R.			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							1,240	1,171	315,163
Program Increase – Headquarters Administration							15	7	1,998
Total Request	1,093	910	257,827	1,039	971	254,794	1,255	1,178	317,161

Description of Item

Successful acquisition outcomes are the direct result of having the appropriate personnel with the requisite skills managing various aspects of the acquisition process. Between FY 2000 and FY 2008, acquisition spending by civilian agencies increased by 56% (in inflation-adjusted dollars). The Department of Homeland Security (DHS) is working to ensure its major acquisitions are effectively managed to ensure that the Department maximizes the value of every homeland security dollar and that major programs are implemented in the most responsible and efficient manner possible. This includes having disciplined oversight processes and robust acquisition program management teams in place. DHS has assessed the current resident skills against a set of core acquisition management skills: a program manager, a systems engineer, a life cycle logistician, a business/financial manager and a contracting officer’s technical representative, and determined that many of our major acquisition programs are deficient in several of these areas.

The President’s March 4, 2009 memorandum on Government Contracting required agencies to improve acquisition practices and performance by maximizing competition and value, minimizing risk, and reviewing the ability of the acquisition workforce to develop, manage, and oversee acquisitions appropriately. Subsequent guidance from the Office of Management and Budget, including memorandum M-09-25 *Improving Government Acquisition* issued July 29, 2009, and OFPP’s Memorandum of October 27, 2009 *Acquisition Workforce Development Strategic Plan for Civilian Agencies- FY2010-2014*, provided guidance to agencies to strengthen the acquisition workforce and increase the civilian agency workforce by 5% to more effectively manage acquisition performance. These funds will help ensure the future programmatic growth requirements for training, recruitment, and retention activities while helping us to attract and hire qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act.

In support of the Administration's emphasis on strengthening the Federal acquisition workforce, Transportation Security Administration requests \$1.998M to increase its acquisition workforce capacity and capabilities. The increase will mitigate the risks associated with gaps in either capacity or capability of the acquisition workforce and improve its effectiveness. The resources requested for the Transportation Security Administration will be used to fund two business/financial managers, one cost analyst, one information technology architect, three information technology/system architects, one logistician, six system engineers and one test and evaluation.

These positions will provide support to the following programs:

- IT/System architect and a systems engineer for the Acquisition and Program Management Support Division to provide acquisition assistance and advice to TSA program managers and administrators;
- IT architect and systems engineer for the Information Technology Infrastructure Program, which will provide comprehensive technical infrastructure support for TSA;
- Logistical support for the National Explosives Detection Canine Team Program;
- Business/financial manager to support the Screening Partnership Program;
- Cost analyst, IT/System architect, and test and evaluator for Secure Flight to support the security of domestic and international commercial air travel through the use of improved watch list matching;
- Business/financial manager, IT/system architect, and systems engineer to support the Security Technology Integrated Program, which is an agency-wide data management system that provides a centralized focal point connecting passenger and baggage screening security technologies to one network, addressing current data, threat response and equipment challenges;
- Systems engineer to support the Specialized Training Program;
- Systems engineer to support the Transportation Worker Identification Credential (TWIC) Program. TWICs are tamper-resistant biometric credentials issued to workers who require unescorted access to secure areas of ports, vessels, and outer continental shelf facilities, as well as to all credentialed merchant mariners;
- Systems engineer for the Transportation Threat Assessment & Credentialing (TTAC) Infrastructure Modernization Program to support the alignment and integration of current TTAC processes, services, and infrastructure through the development of an integrated system.
- Increase the capability of the acquisition workforce by investing in training to close identified gaps in such areas as project management, negotiations, requirements development, contract management, and other key topics;
- Increase the effectiveness of the acquisition workforce by investing in improvements to systems that support the contracting function;
- Conduct an assessment of options for creating systems to maintain comprehensive acquisition workforce data and selecting the appropriate system; and
- Increase the effectiveness of the Department's centralized acquisition workforce training program comprised of certification and targeted/continuous learning developmental training opportunities.

Impact on Performance (Relationship of Increase to Strategic Goals)

The FY 2012 funding request will help ensure:

- The future programmatic growth capacity for training, recruitment, and retention activities, while attracting and hiring qualified members of the acquisition workforce.
- The sustainability and availability of information technology systems and equipment in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

(Dollars in Thousands)

Program Increase 3: DHS Data Center Consolidation

Quadrennial Homeland Security Review (QHSR): Goal 1.1: Prevent Terrorist Attacks
 Goal & Objective: Objective 1.1.2: Deter and Disrupt Operations

PPA: Information Technology

Program Increase: Positions 0 FTE 0 Dollars \$ 20,300

Funding Profile

	FY 2010 Actual			FY 2011 C.R.			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							226	216	\$497,768
Program Increase							0	0	20,300
Total Request	186	148	450,830	155	149	475,612	226	216	\$518,068

Description of Item

The FY 2012 Request reflects a \$20.3 million increase to the Information Technology (IT) PPA. FY 2012 data center development funding, to be managed through the DHS Working Capital Fund, will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers for central DHS management in FY 2012. This includes:

- Discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS Data Centers in FY 2012
- Purchase of new equipment for placement in the DHS Data Centers as part of migration/transition efforts
- Installation of equipment racks at the DHS Data Centers
- Migration-related build-out of DHS Data Center infrastructure
- Transition of disaster recovery/backup/continuity of operations capability to DHS Data Centers
- Installation of infrastructure support as part of system migrations at the DHS Data Centers

Justification

The Data Center consolidation efforts will standardize IT resource acquisitions across DHS Components, and streamline maintenance and support contracts, allowing for less complex

vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

Impact on Performance

Terrorists have demonstrated their intent at striking within the modes of transportation. An increase of \$20.3 million for the DHS Data Center Consolidation will add more effective and consistent levels of protection and will reduce the risk to the traveling public.

Program Decrease: <i>Across the board IT reduction</i>							0	0	-17,800
Program Decrease: <i>Personnel Pay and Compensation Reduction</i>							0	0	-1,000
Total Request	186	148	450,830	155	149	\$475,612	226	216	\$464,248

Description of Item

The FY 2012 Request reflects a \$33.5 million reduction to the Information Technology (IT) PPA. The total non-recurring reduction is based on a \$10.3 million reduction to the IT Infrastructure Program (ITIP) and a \$4.5 million reduction to the TSA Operating Platform (TOP). These are anticipated one-year reductions. Additional reductions were taken in the IT PPA and consist of a \$17.8 million across the board reduction to IT and a \$1.0 million reduction to personnel pay and compensation.

Justification

TSA proposes a program decrease to the IT base of \$33.520 million in FY 2012 through reductions to ITIP, TOP, IT services, and personnel pay and compensation in order to fund frontline security operations. The IT environment will remain stable, secure, and reliable with the proposed level of base funding.

The IT program at TSA provides a suite of IT services to Headquarters and field locations throughout the United States. Funding provided within the PPA supports the core IT functional requirements of the organization which include: the voice and data network, email, file storage, wireless communications, personal computing equipment, and cyber security services for an agency of over 50,000 personnel spanning more than 400 locations.

Impact on Performance

In support of the QHSR Objective 1.1.2: Deter and Disrupt Operations, TSA will reduce the IT PPA by \$33.5 million. To accommodate this reduction, TSA will extend the duration between recapitalization of infrastructure equipment, and postpone initiatives to migrate to a cloud/virtual operating environment. The reduction will not significantly impact TSA's current levels of network security.

Total Request	246	212	240,032	231	222	\$237,770	245	235	\$254,421

Description of Item

The FY 2012 Request reflects a \$4.0 million reduction to the Human Capital Services (HCS) PPA.

Justification

In support of the QHSR Objective 1.1.2: Deter and Disrupt Operations, TSA will reduce the Human Capital Services PPA by \$4.0 million in order to fund frontline security operations. Human Capital Services includes the services to support the recruitment, assessment, servicing, and payroll of all TSA employees at headquarters and in the field.

Impact on Performance

To accommodate this reduction, TSA will realign funds within the PPA to meet mission critical mission requirements. This reduction will not significantly impact TSA’s Human Resource programs.

Department of Homeland Security Transportation Security Administration

Justification of Proposed Changes in Transportation Security Support Appropriation Language

For necessary expenses of the Transportation Security Administration related to providing transportation security support and intelligence pursuant to the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat. 597; 49 U.S.C. 40101 note), \$1,113,697,000, to remain available until September 30, 2013: Provided, That of the funds made available under this heading, \$1,998,302 shall be for strengthening the capacity and capabilities of the acquisition workforce (as defined by the Office of Federal Procurement Policy Act, as amended (41 U.S.C. 401 et. seq.)), including the recruitment, hiring, training, and retention of such workforce and information technology in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

Note – A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111-242, as amended). The amount included for 2011 reflect the annualized level provided by the continuing resolution.

Explanation of Changes:

TSA has complied with the provisions included in previous language.

PPA Mission Statement

Provide Intelligence Analysis, Coordination, and Dissemination -- TSA will continue to provide current and strategic warning regarding threats to U.S. transportation modes and identify trends and changes in targeting. The TSA intelligence unit analyzes intelligence and disseminates information through liaison with intelligence community agencies.

Summary Justification and Explanation of Changes

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$19,538	\$26,166	\$33,721	\$7,555

Salaries and Benefits are for 223 FTE. It includes FTE to support enhanced security initiatives.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$393	\$465	\$509	\$44

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request is for travel for new staff.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Transportation of Things	\$5	\$4	\$0	(\$4)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2012 request reflects an administrative savings initiative.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Other Services	\$4,447	\$6,773	\$8,042	\$1,269

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included in this category is contractual services for intelligence support. The FY 2012 request is for system maintenance and operating expenses for new staff.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Purchase from Government Accounts	\$178	\$0	\$62	\$62

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2012 request is for new staff.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Medical Care	\$2	\$0	\$0	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Supplies & materials	\$146	\$170	\$172	\$2

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 request is for new staff.

	2010	2011	2012	2011 to 2012
	Actual	C.R.	Request	Change
Equipment	\$2	\$26	\$486	\$460

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2012 request is for equipment for new staff.

PPA Mission Statement

Human Capital Services include all the activities that support the Office of Human Capital Services (OHCS) including the recruitment, assessment, servicing, and payroll of TSA's Transportation Security Officers and other workforce at headquarters, field locations, and airports, and personnel policies, programs and systems.

Summary Justification and Explanation of Changes

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$38,289	\$41,128	\$45,525	\$4,397

Salaries and benefits are for 235 FTE. The FY 2012 request includes conversions of contracts to government FTEs and realignments.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$2,477	\$2,892	\$2,817	(\$75)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request reflects administrative savings initiatives.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Transportation of Things	\$63	\$65	\$63	(\$2)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. FY 2012 request reflects administrative savings initiatives.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Other Rent	\$127	\$399	\$449	\$50

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Communication, Utilities, and Miscellaneous Charges	\$1	\$21	\$24	\$3

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Printing	\$35	\$75	\$83	\$8

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Other Services	\$177,852	\$172,149	\$181,524	\$9,375

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included under this object class are contracts for security support, EEO support, and corporate training.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Purchase from Government Accounts	\$20,856	\$20,490	\$33,226	\$12,736

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Medical Care	\$24	\$6	\$10	\$4

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Supplies & materials	\$270	\$282	\$281	(\$1)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Equipment	\$38	\$263	\$297	\$34

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2013 budget.

TRANSPORTATION SECURITY ADMINISTRATION requests \$0 and 148 FTE for the FY 2012 DHS Balanced Workforce Strategy.

BUDGET REQUEST AND SUPPORTING INFORMATION

TRANSPORTATION SECURITY ADMINISTRATION FEDERAL AIR MARSHAL SERVICE

I. Appropriation Overview

A - Mission Statement for Federal Air Marshal Service:

The Federal Air Marshal Service (FAMS) promotes public confidence in our Nation's civil transportation systems through the effective risk-based strategic deployment of Federal Air Marshals (FAMs) in both air and land based mission-related assignments. The organization's primary focus is to detect, deter, and defeat terrorist or other criminal hostile acts targeting U.S. air carriers, airports, passengers, and crew.

B - Budget Activities:

Management and Administration (M&A)

The FAMS' mission demands a host of critical planning, operational, and support programs to protect the public from the threat of a terrorist attack or other criminal activity. The FAMS' M&A programs encompass vital enforcement, information management, and infrastructure components necessary to support core operations. Examples include FAMS participation in Joint Terrorism Task Force (JTTF) activities, management and implementation of a sophisticated flight/mission scheduling and notification system, and performance of mission critical workforce management, command and control, information technology, logistics, and related services.

Travel and Training (T&T)

In order to maintain optimum readiness and to perform its primary operational functions, the FAMS requires extensive training and mission travel capabilities. FAMs must undergo continuous training to maintain and expand their expertise in the full-range of skills necessary to operate within the transportation domain, to include specialized tactics, enforcement, surveillance detection, marksmanship, and other skill sets. Furthermore, this PPA funds FAMS's mission travel, which is an integral component of the international and domestic flight coverage activities that are core to the FAMS mission.

C - Budget Request Summary:

The Transportation Security Administration (TSA) requests \$991,375,000 in FY 2012.

PPA: MANAGEMENT AND ADMINISTRATION

	Perm Pos	FTE	Amount
2010 Actuals	\$759,635
2011 C.R.	\$762,569
2012 Adjustments-to-Base	\$97,691
2012 Current Services	\$860,260
2012 Program Change	\$0
2012 Request	\$860,260

The Transportation Security Administration requests \$860.3 million for this activity. This includes an adjustment-to-base of \$97.7 million.

PROGRAM DESCRIPTION:

The Management & Administration (M&A) PPA funds the FAMS’s payroll costs and supports all operational and infrastructure requirements with the exception of training and travel expenses. The vast majority of this PPA provides the salaries for FAMS to provide the vital protective and law enforcement services necessary for both domestic and international air travel as well as other transportation related security activities.

The remaining balance of M&A funding supports the continuing development and maintenance of the Service’s infrastructure, internal business processes, and systems that enable FAMS to seamlessly perform the integrated set of functions that make up their mission. In addition to the activities detailed below, M&A provides funding for workforce management activities; information technology; leasing and maintenance of facilities in the Washington, D.C. area, Atlantic City, NJ, and 22 field and four Resident Agent in Charge offices across the country including a Baltimore Field Office; and program infrastructure and logistics support such as vehicles, communications, duty equipment, and physical security.

Key programs of the Management & Administration PPA include:

Joint Terrorism Task Force (JTTF): The FAMS is a full participant in the JTTF, a nationwide counter-terrorism enforcement program managed by the Federal Bureau of Investigation (FBI). The JTTF targets terrorism-related criminal threats against the United States and its interests. Since 2002, the FAMS has been an active full-time partner in the JTTF. The FAMS is able to partner with and to provide support to the FBI and other law enforcement agencies' investigations of aviation and other transportation-related threats via this program.

Transportation Information Sharing System (TISS): The TISS enables the collection, analysis, and dissemination of intelligence information observed by FAMS, TSA personnel, and State/local law enforcement in the transportation sector. FAMS routinely submit Suspicious Incident Reports when they observe activities that fall below a predetermined threshold of an actionable incident. The information is used to identify a nexus of terrorist or criminal-related activity, as well as trends, patterns, or associations that may reveal circumstances or subjects that are deemed to be of interest to Department of Homeland Security (DHS) intelligence.

Visible Intermodal Prevention and Response (VIPR): Deployments are conducted in all modes of transportation to detect, deter, defeat, and disrupt potential terrorist and/or criminal activity. VIPR operations consist of teams of TSA personnel including FAMS, Transportation Security Inspectors, Transportation Security Officers, Behavior Detection Officers, Explosive Detection Canine Teams, Bomb Appraisal Officers, and Federal, state and local law enforcement officers. The teams are tailored to each transportation mode, integrating the specific needs of each transportation partner at the venue level. In addition, these deployments incorporate elements of randomness and are unpredictable in frequency, location, and duration. VIPR operations are planned and implemented through a risk-based deployment methodology that utilizes existing national and local intelligence, data analysis, and security assessments. These resources are used to enhance TSA's overall ability to act as a visible deterrent across multiple transportation sectors, to screen passengers, and to identify suspicious behavior.

The following table provides the major components of the M&A PPA, with resources shown in millions of dollars.

	FY 2011	FY 2012
Payroll, Compensation and Benefits	\$659.2	\$741.4
Information Technology	45.7	51.0
Operations Infrastructure	57.7	67.9
Total	\$762.6	\$860.3

Payroll/Office of Worker's Compensation (OWCP) – \$741.4M: This component, which amounts to approximately 75 percent of the total FAMS budget, covers all pay, compensation and benefits, overtime, Law Enforcement Availability Pay, awards, and workers' compensation payments for the Service's FAM and civilian work force. The FAMS personnel are arrayed throughout the country and provide the manpower necessary to conduct the Service's full range of operations.

Information Technology (IT) – \$51.0M: The FAMS IT capability is critical to providing the Service and individual FAMS with the vital automated tools, systems, and computer security technology necessary to ensure accomplishment of the FAMS mission.

In FY 2010, the FAMS completed its enterprise integration with the DHS One net infrastructure. FAMS plans to migrate and decommission the Atlantic City, NJ datacenter in FY 2012. The primary production datacenter, located in Ashburn, VA will be migrated after FY 2012.

The M&A PPA also funds the FAMS Mission Scheduling and Notification System (MSNS), the core automated system used by the Service for planning, scheduling, and implementing FAMS's flight coverage operations. The MSNS uses a risk-based process that selects from over 28,000 daily U.S. commercial airline flights to prioritize deployments of thousands of FAMS worldwide. In FY 2010, the FAMS initiated a hardware refresh for the MSNS and continued work on scheduled software improvements to address quality of life and coverage issues.

Operations Infrastructure – \$67.9M: The Operations Infrastructure component funds critical activities including, but not limited to: permanent change of station; facility build out, leases, utilities, and maintenance; vehicles; telecommunications; background investigations; and logistics management.

Significant Accomplishments in FY 2010 included:

- Enhanced mission coverage efforts in response to threats and credible intelligence;
- Managed and led a temporary FAM Augmentee program comprised of law enforcement personnel from other DHS components to complement Service's flight coverage efforts;
- Enhanced current IT capabilities by providing additional resources and functionalities to the FAMS in mission status, both remotely and on their personal data assistants;
- Initiated technology refresh to provide network users with updated equipment to maintain and support critical communication and business processes;
- Initiated hardware refresh for the MSNS; and
- Established a new field office in Baltimore, MD to best meet day to day operational needs and to improve the tactical placement of FAM resources in the National Capital Region.

Planned Accomplishments for FY 2011 include:

- Complete the upgrade of the FAMS's existing Resident Agent in Charge office in San Francisco to Field Office status to help accommodate additional personnel;
- Continue work on MSNS improvements within current services levels;
- Develop the mobile interface to the Transportation Information Sharing System as well as integrate additional analytical tools developed by DHS' Office of Science and Technology Directorate;
- Implement the VIPR Information Management System to reduce administrative requirements and contribute to improve strategic and tactical planning; and
- Continue efforts to enhance mission coverage efforts in response to threats and credible intelligence.

In FY 2012, FAMS will continue its efforts to enhance mission coverage in response to threats and credible intelligence. FAMS will continue to work on MSNS improvements at current services levels. The program will also sustain facilities expansions in targeted geographical regions (Baltimore and San Francisco) due to the impact of the increase in personnel to allow the FAMS to keep pace with operational needs and maintain the increase in mission tempo in international flight coverage. MSNS will also complete the redevelopment and deployment of the Federal Air Marshal Information System, currently operated and maintained by the FAA under an Interagency Service Agreement.

Additionally, the VIPR program will continue its work to integrate planning and deployment data with risk assessment data, coming from the Transportation Sector Security Risk Assessment and local sources, and implement a metric for assessing risk-based effectiveness.

PPA: TRAVEL AND TRAINING

	Perm Pos	FTE	Amount
2010 Actuals	\$112,506
2011 C.R.	\$97,542
2012 Adjustments-to-Base	\$33,573
2012 Current Services	\$131,115
2012 Program Change	\$0
2012 Request	\$131,115

The Transportation Security Administration requests \$131.1 million for this activity. This includes an adjustment-to-base of \$33.6 million.

PROGRAM DESCRIPTION:

The Travel and Training (T&T) PPA supports the FAMS’s core requirements for travel, travel-associated costs, and training. The following table provides the major component parts of the T&T PPA, with resources shown in millions of dollars.

	FY 2011	FY 2012
Travel	\$82.2	\$107.6
Training	15.3	23.5
Total	\$97.5	\$131.1

Travel – \$107.6M: This portion funds all travel necessary to perform domestic and international mission coverage, mission essential training, and other business-related travel in support of FAMS operational and programmatic goals. The FAMS schedules the coverage of high-risk flights according to a concept of operations that incorporates threat, vulnerability, and consequence.

In FY 2010, in response to the December 25, 2009 attempted bombing of Northwest Airline Flight 253, the FAMS significantly increased its international coverage to detect, deter or defeat additional terrorist attacks. Achieving this heightened coverage required a reprogramming of \$20.3 million to cover overtime and travel costs associated with the FAMS’s expanded coverage efforts. FAMS also utilized the support of other DHS components to augment its FAM

workforce through the remainder of the fiscal year. Maintaining mission coverage provides flexibility in efforts to cover high-risk flights, supporting TSA's strategy of increasing the use of flexible and unpredictable security measures to protect critical infrastructure.

Training – \$23.5M: Through its training programs, the FAMS provides effective learning environments and opportunities for its employees by utilizing current and relevant curricula and training methodologies to enable and challenge FAMS to perform their duties and responsibilities in a highly effective and efficient manner.

Upon entry into the FAMS training program, FAM trainees undergo an intensive 16.5-week training program conducted at the Federal Law Enforcement Training Center (FLETC) in Artesia, NM and at the FAMS Training Center (FAMSTC) in Atlantic City, NJ. The training component provides for all associated training requirements to include FLETC-related expenses, role player contracts, hotel lodging contracts for Atlantic City-based classes, training supplies, firing range fees, and training gear, equipment, and clothing. Once assigned to a field office, FAMS undergo recurrent, in-service training to maintain their necessary skill base and to meet firearms certification levels on a quarterly basis. Currently, the FAMS has the highest firearms qualification score of any Federal agency (85 percent or 255/300).

In FY 2011, the FAMS will finish the procurement and installation of specialized Aircraft Training Simulators (ACTS) at the FAMSTC. These simulators will represent 767, 747, and 737 air frames. The simulators will replace the outdated L1001 and 727 airframes currently in use at the FAMSTC and will provide a more realistic, updated environment for FAMS to learn and to maintain their tactical skill sets. Additionally, in FY 2011, the final phases of Platform V, the field office version of the ACTS, will be approved and 11 units will be purchased and placed in various field offices. The Platform V simulator will provide the same realistic training environment in each field office, as well as assist in establishing uniform training practices throughout the FAMS.

Additional training provided includes firearms training, professional/technical development, FAMS instructor training, leadership/management development, and professional/career development courses.

Significant Accomplishments in FY 2010 included:

- Increased international mission coverage in response to the attempted bombing on December 25, 2009;
- 99.8 percent of all eligible FAMS met their quarterly firearms qualification;
- Achieved accreditation of the FAMS' Instructor Development Course;
- Initiated the procurement of six training simulators to replace the most outdated and deteriorating field office simulators that were in place since 2002; and
- Maintained a focus on high risk flights including support to special events, such as the Vancouver Olympics and the G-20 Meeting.

Planned Accomplishments in FY 2011 include:

- Complete installation of the 767, 747, and 737 ACTS in FAMSTC;

- Complete installation of Platform V in the Philadelphia and Los Angeles Field Offices;
- Obtain re-accreditation for the FAMSTC and Federal Air Marshal Training Program II in Atlantic City, NJ;
- Complete installation of specialized aircraft cabin training simulator at the FAMSTC in Atlantic City, NJ;
- Deliver and install the remaining field office training simulators purchased in FY 2010; and
- Continue priority flight coverage operations based on FAMS's Concept of Operations.

In FY 2012, the FAMS will complete the training of all additional FAMS hired in FY 2011. The FAMS also expects to obtain re-accreditation for the Federal Air Marshal Training Program I at FLETC in Artesia, NM.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Transportation Security Administration
Justification of Proposed Changes in Federal Air Marshal Service
Appropriation Language**

For necessary expenses of the Federal Air Marshals, \$991,375,000.

Note.—A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111–242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

PPA Mission Statement

The Management and Administration (M&A) PPA funds the FAMS' staffing/payroll requirements, which include: salary/compensation, benefits, awards, overtime, etc. In addition, M&A funds critical administrative and operational requirements including the FAMS' mission scheduling system and information technology requirements, rent, wireless communications systems; recruitment/hiring and retention services (background investigations, security clearances, medical exams/physicals, drug tests); and a host of program support services and requirements (interagency agreements, vehicle leasing, shipment of goods, utilities/communications, janitorial services, supplies, duty equipment, printing, physical security, etc.)

Summary Justification and Explanation of Changes

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$654,495	\$659,200	\$741,441	\$82,241

The FY 2012 request reflects Salaries and Benefits associated with enhanced mission coverage.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Travel	\$2,648	\$2,441	\$2,441	\$0

Travel in the M&A PPA reflects costs for vehicle leases.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Transportation of Things	\$193	\$267	\$281	\$14

Transportation of things includes all costs associated with the care of items in the process of being transported, as well as other services associated with the transportation of things. The FAMS uses this object class series for central billing and for the shipment of goods between Headquarters and Field Offices. The FY 2012 request reflects enhanced mission coverage.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
GSA rent	\$2,616	\$3,361	\$3,656	\$295

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request reflects increased personnel.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Other Rent	\$15,167	\$14,339	\$16,126	\$1,787

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The majority of the FAMS' commercial office leases for Headquarters and field offices are included in this category. The FY 2012 request reflects increased personnel.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Communication, Utilities, and Miscellaneous charges	\$8,551	\$13,651	\$15,303	\$1,652

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FAMS uses this object class series for PDA and cell phone air time and general office utilities such as metered gas, electricity, water usage, etc. The FY 2012 request reflects enhanced mission coverage.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Printing	\$16	\$10	\$10	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The majority of costs are for promotional/public relations materials.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Advisory and Assistance Services	\$12,712	\$12,076	\$14,192	\$2,116

Advisory and assistance services primarily include services acquired by contract from non-Federal sources (i.e., the private sector, foreign governments, State and local governments, tribes, etc.). The FY 2012 request reflects enhanced mission coverage.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Other Services	\$21,360	\$23,946	\$27,134	\$3,188

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25.1. The FAMS uses this series for additional support for the Mission Scheduling and Notification System, support services for other elements (including contractors supporting contracting/procurement efforts) within the Service. The FY 2012 request reflects enhanced mission coverage.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Purchase from Government Accounts	\$11,289	\$12,501	\$15,834	\$3,333

Purchases from Government Accounts include costs for purchases from other Federal agencies or accounts that are not otherwise classified. For the FAMS, this includes IT Support for the entire FAMS, facility maintenance support from the FAA, office equipment maintenance and security clearances. The FY 2012 request reflects enhanced mission coverage.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & Maintenance of Facilities	\$8,447	\$2,935	\$3,208	\$273

Operation and maintenance of facilities includes all payments for the operation and maintenance of facilities when done by contract with either the private sector or another Federal Government account. The FAMS uses this object class series for custodial services and facility build out/enhancements of current leases. The FY 2012 request reflects enhanced mission coverage.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Medical Care	\$0	\$1,900	\$1,909	\$9

Medical care includes payments to contracts for medical services, but excludes Federal employees who are reportable under OPM regulations as federal employees. The FAMS uses this series for a contract with Federal Occupational Health (FOH).

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Operation & Maintenance of Equipment	\$4,036	\$5,035	\$5,838	\$803

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal account. The FY 2012 request reflects enhanced mission coverage.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Supplies & Materials	\$2,151	\$3,096	\$3,246	\$150

Supplies and materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FAMS uses this series for IT supplies and materials, office supplies and fuel. The FY 2012 request reflects enhanced mission coverage.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Equipment	\$15,260	\$7,810	\$9,640	\$1,830

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. Included in this total are costs for IT equipment and software, furniture and other office equipment. The FY 2012 request reflects enhanced mission coverage.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Indemnity	\$693	\$1	\$1	\$0

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. If a claim is incurred, FAMS will address via the budget execution process (i.e., redistribute funds from another object class).

PPA Mission Statement

The Travel and Training (T&T) PPA is used to cover all travel and training requirements that support the FAMS program. The travel portion of the PPA supports the FAMS' requirements for mission travel (per diem, lodging) and associated costs, such as airport parking and automated travel account services. Mission travel resources are essential to the Federal Air Marshals' ability to perform scheduled flight coverage on both domestic and international operations and provide the FAMS the necessary mobility and flexibility to perform their enforcement and counterterrorism missions. T&T funds also support other FAMS travel required for non-mission and training purposes.

T&T also supports the FAMS' comprehensive training requirements to include TPI (Basic Law Enforcement Training) and TP II (FAMS specific training) training of new Federal Air Marshals and all recurrent field training. This PPA provides funding for all associated training requirements, such as Federal Law Enforcement Training Center (FLETC) costs, training-related ammunition, TP II instructor contracts, hotel lodging contracts for Atlantic City classes, training supplies, firing range fees, professional & training gear, equipment and clothing. The T&T PPA also supports the required professional training for other professional development and career training as required.

Summary Justification and Explanation of Changes

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$97,629	\$82,225	\$107,586	\$25,361

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The bulk of these costs directly support Federal Air Marshal domestic and international mission travel, which is the primary mission of the Service. Also included in this object class are travel costs related to training, conference attendance, and site visits. The FY 2012 request reflects enhanced mission coverage.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Transportation of Things	\$0	\$10	\$10	\$0

Transportation of things includes all costs associated with the care of items in the process of being transported, as well as other services associated with the transportation of things. Under this PPA (T&T), costs are associated specifically with transportation of things related to training (e.g., shipment of equipment from vendors to field offices).

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Other Rent	\$1,079	\$921	\$921	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The T&T PPA covers airport parking lot rental (to support mission travel operations) and other rent associated specifically with meeting the Service's training requirements. All other rent is funded through the FAMS' M&A PPA.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Other Services	\$5,900	\$8,232	\$8,180	(\$52)

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25. The FAMS uses this object class series for FLETC training costs, hotel lodging contracts for TP II training and field recurring range fees for Federal Air Marshals' quarterly requalification. The FY 2012 request includes the transfer of Explosives Operations Division (EOD) to the Aviation Security Appropriation.

	2010 Actuals	2011 C.R.	2012 Request	2011 to 2012 Change
Purchase from Government Accounts	\$366	\$259	\$8,282	\$8,023

Purchases from Government Accounts include costs for purchases from other Federal agencies or accounts that are not otherwise classified and include costs associated with maintenance and repair of the Atlantic City training facility. The FY 2012 request reflects enhanced mission coverage.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Operation & maintenance of facilities	\$50	\$0	\$0	\$0

The T&T PPA does not cover O&M of facility requirements. The FAMS' M&A PPA is the designated funding unit for meeting these requirements.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Medical Care	\$52	\$17	\$17	\$0

This object class series includes medical care.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Supplies & materials	\$1,878	\$5,209	\$5,450	\$241

Supplies and materials are defined as commodities that are : (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FAMS uses this object class series for ammunition, armory supplies and training supplies. The FY 2012 request reflects enhanced mission coverage. This includes the transfer of EOD to the Aviation Security Appropriation.

	2010	2011	2012	2011 to 2012
	Actuals	C.R.	Request	Change
Equipment	\$5,552	\$669	\$669	\$0

Equipment includes all costs for the purchase of personal property of a durable nature or the initial installation of equipment when performed under contract. The FAMS uses this object class series for training and other equipment, primarily for field office recurrent training and TP II tactical training equipment.

K. DHS Balance Workforce Strategy

DHS Balanced Workforce Strategy:

In order to establish a high performing workforce comprised of a strong internal core of Federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009 (P.L. 111-8), the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. Through a workforce planning assessment, the Department will realign contractor and/or Federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with Federal employees to better realize the full potential of our total workforce – both contracted and Federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential to effective government performance.

The FY 2012 budget includes contractor conversion in functional areas where the Department has identified a preliminary need. As part of the FY 2012 DHS Balance Workforce Strategy, the FAMS requests 4 FTE for the FY 2012 DHS Balanced Workforce Strategy.

- The FY 2012 DHS Balanced Workforce for FAMS includes:
 - 4 FTP from the FY 2011 DHS Balanced Workforce Strategy.
 - Funding for the annualization of the 4 FTP will be covered by the savings from the termination of contracts.
 - The 4 FTP will be converted from contractors to Federal employees by the start of FY 2012.

- DHS Balanced Workforce Follow-Up:

Adjustments to the FY 2011 FAMS funding amount and FTP/FTE are necessary to reflect the contractor conversions that occurred in FY 2011 as part of the FY 2011 DHS Balanced Workforce for FAMS, and were not reflected in the corresponding year's budget request.

Notes:

- 1) Homeland Security activities includes the following programs: Migrant Interdiction, Ports, Waterways and Coastal Security, and Defense Readiness.
- 2) Non-Homeland activities include the following programs: Search and Rescue, Marine Safety, Aids to Navigation, Ice Operations, Marine Environmental Protection, Living Marine Resources, Drug Interdiction and Other Law Enforcement.
- 3) Funds account for all scorekeeping adjustments.
- 4) For comparability purposes across Fiscal Years, Operating Expenses includes funding for Overseas Contingency Operations (OCO): FY 2010 (\$241,503,000 and 872 FTE), FY 2011 (\$241,503,000 and 872 FTE), and the FY 2012 proposed transfer (\$258,278,000 and 961 FTE).
- 5) For comparability purposes across Fiscal Years, Operating Expenses includes funding for Polar Icebreaking: FY 2010 (\$52,172,000 out of \$54,000,000 and 247 FTE transferred from the National Science Foundation (NSF)) and FY 2011 (\$54,000,000 and 247 FTE transferred from NSF).
The Coast Guard's FY 2012 request includes \$39,000,000 for Polar Icebreaking.

U. S. Coast Guard

Operating Expenses

I. Appropriation Overview

A. Mission Statement for Operating Expenses:

The OE appropriation funds the Coast Guard's role as the principal Federal agency providing maritime safety, security, and stewardship to the Nation.

B. Budget Activities:

The Operating Expenses (OE) appropriation funds the annualization of prior-year funding, economic adjustments, and operating and maintenance funding for new and existing Coast Guard programs, projects and activities (PPA). The OE request supports all 11 statutory Coast Guard missions in support of the Coast Guard's six DHS Programs.

C. Budget Request Summary:

The Coast Guard requests 49,428 positions, 49,217 FTE, and \$6.8 billion in FY 2012. Total adjustments-to-base are \$162.3 million and 342 FTE. Of that amount, an interdepartmental transfer from the Department of Defense (DoD) includes 113 positions, 113 FTE, and \$24.2 million. In particular, \$365.1 million in new funding will support the pay increase (1.6 percent for military and 0 percent civilian); military allowances; GSA rent increases; increased critical depot level maintenance costs; increased costs for government services; and the operation, maintenance, and crewing of systems, vessels, and aircraft delivered via the Coast Guard's acquisition/capital programs (e.g. shore facilities and Aids-to-Navigation (ATON), Response Boat-Medium (RB-M), Rescue 21 (R21), Interagency Operations Center (IOC), Nationwide Automatic Identification System (NAIS), Manned Covert Surveillance Aircraft (MCSA), National Security Cutter (NSC), Fast Response Cutter (FRC), and HC-144A Maritime Patrol Aircraft (MPA)).

The adjustments-to-base include decreases of \$227.0 million to focus resources toward sustaining operational capacity, targeted operational enhancements, military family initiatives, and recapitalizing aged, obsolete assets. Decreases include the annualization of prior year management efficiencies; termination of one-time costs; asset decommissionings; termination of Sector Corpus Christi follow-on funding; DHS Balanced Workforce Strategy; operational support reduction; Administrative Savings Initiatives; Standard Workstation Help Desk Consolidation; and program support reduction.

Program increases include 284 FTE and \$93.4 million for Marine Safety and Marine Environmental Response capability enhancements, the Polar Icebreaking program, Coast Guard network security, Distress Alerting Satellite System (DASS), Data Center Migration, and a Child Care Initiative for military families.

Base adjustment increases include:

- Annualizations of prior-year funding – \$53.9 million
- FY 2012 pay increase and annualization of FY 2011 pay raise for military members – \$31.8 million
- DoD parity: adjustments to military pay and allowances, health care, and Permanent Change of Station (PCS) – \$34.3 million
- Non-pay inflation - \$36.1 million
- Operational Adjustment Increases (includes critical depot level maintenance, GSA rent, and Government services) – \$33.5 million
- Operating and Maintenance funds for new assets, including follow-on costs related to Shore Facilities and ATON, RB-M, R21, NAIS, IOC, MCSA, and Surface and Air Asset Follow-on – \$67.8 million

Base Re-Allocations (non-Add) include:

- Reserve Force Contract Conversion – [\$1.5 million]
- Military FTP and FTE Transfer for Civilian – [\$3.1 million]
- PPA Funding Technical Transfer – [\$22.4 million]
- Multi-Sector Workforce Rebalancing Initiative Technical Adjustment – [\$22.6 million]

Base adjustment decreases include:

- Termination of One-Time Costs – (\$19.9 million)
- Prior Year Management Annualizations – (\$41.1 million)
- Scheduled decommissionings of one High Endurance Cutter and three PC-179 Patrol Coastal cutters, and termination of Sector Corpus Christi follow-on funding – (\$25.4 million)
- DHS Balanced Workforce Strategy – (\$484,000)
- Operational Support Reduction – (\$36.1 million)
- Administrative Savings Initiative – (\$83.5 million)
- Standard Workstation Helpdesk Consolidation – (\$6.9 million)
- Program Support Reduction – (\$13.6 million)

Program changes include:

- Marine Safety Enhancement – \$10.7 million
- Marine Environmental Response Enhancement – \$11.5 million
- Child Care Initiative - \$9.3 million
- Polar Icebreaking Program - \$39.0 million
- Coast Guard Network Security – \$8.6 million
- DASS – \$6.3 million
- Data Center Migration – \$8.0 million

1) The March 4, 2011 Continuing Resolution (annualized) includes \$241.5 million for Overseas Contingency Operations (OCO) and \$54.0 million for the Polar Icebreaking Program.

2) FY 2010 actual obligations include \$241.5 million for OCO.

3) FY 2010 actual obligations include \$52.2 of the \$54.0 million transferred from the National Science Foundation (NSF) for Icebreaking Services.

4) FY 2010 actual obligations does not include funding appropriated in the Disaster Relief Act of 2010 supplemental.

III. Current Services Program Description by PPA

**Department of Homeland Security
U. S. Coast Guard
Operating Expenses
Program Performance Justification**
(Dollars in thousands)

PPA I: MILITARY PAY AND ALLOWANCES

	Perm Pos	FTE¹	Amount
2010 Actual	40,615	41,757	3,375,735
2011 C.R.	41,450	41,811	3,253,130
2012 Adjustments-to-Base	(342)	(319)	172,025
2012 Current Services	41,108	41,492	3,425,155
2012 Program Change	364	239	22,598
2012 Request	41,472	41,731	3,447,753

The Coast Guard requests \$3.4 billion for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requests funding for expenses related to compensation and benefits for active duty military personnel. This category includes pay, allowances, employer's share of the Federal Insurance Contribution Act (FICA), Social Security credits, child care benefits for Coast Guard families, and other expenses associated with compensating military personnel. Costs related to compensation are calculated by using the Coast Guard's Standard Personnel Cost (SPC) tables. These tables are updated annually and provide a detailed calculation for each billet, broken down by rank/rate, location – in the United States (INCONUS) or out of the country (OCONUS – which includes AK and HI), medical costs and permanent change of station (PCS) expenses. Calculations for medical cost estimates are the same for each billet. Calculations for PCS moves and base pay are based upon rank and location of billet. Pay estimates account for OMB published pay inflation factors for the fiscal year in question.

Coast Guard's significant accomplishments in FY 2010 included:

- Led the Federal response to the Deepwater Horizon oil spill, the first-ever Spill of National Significance and the worst environmental disaster in U.S. history. Worked across the whole of government and industry to contain the spill, recovered more than 34.7 million gallons of oil-water mix, and performed controlled burns removing more than 11 million gallons of oil from open water to protect the shoreline and wildlife. The Coast Guard implemented the first-ever National Incident Command for a real world event, providing Federal oversight and direction for over 48,000 response personnel and 4,340 response vessels. The Coast Guard deployed 46 cutters, 22 aircraft (flying 1,749

¹ The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

sorties totaling 3,874 hours) and 7,000 people in support of this unprecedented response operation.

- Responded to the Haitian earthquake disaster. Provided humanitarian relief, medical aid, and restoration of the Marine Transportation System. Coast Guard Air Station Clearwater MH-60s were the first military aircraft to arrive on-scene and USCGC OAK became the first military vessel to moor to Haiti following the devastating 7.0 magnitude earthquake. The MH-60s evacuated injured U.S. personnel and OAK delivered medical supplies, clean drinking water, and a medical response team to assist with triage at the Haitian Coast Guard base. OAK also established new buoys to facilitate relief ships and barges carrying tons of humanitarian aid supplies.
- Responded to over 22,000 Search and Rescue cases and saved over 4,300 lives.
- Removed a total of 202,439 pounds of cocaine, and 36,739 pounds of marijuana destined for the United States; seized 56 vessels, and detained 229 suspected smugglers.
- Provided for the orderly shutdown of 24 Long Range Aids to Navigation (LORAN) stations. In addition, coordinated termination of international agreements with the Russian and Canadian Governments to facilitate coordinated signal termination of respective chains in August 2010.

Coast Guard's planned accomplishments in FY 2011 include:

- Continue response efforts for the Deepwater Horizon oil spill.
- Support OCO.
- Increase capacity of LEDET Teams.
- Continue to conduct mission execution and support activities to best leverage resources to meet mission demand and Coast Guard/DHS mission objectives.

In FY 2012 active duty military personnel will ensure the service remains agile, adaptable, and ready to serve the Nation's domestic and international maritime interests across a range of dynamic operational environments. The Coast Guard was founded as a military, multi-mission, maritime service and continues to be ready, aware, and responsive across all of the Coast Guard's statutory missions.

Dedicated Coast Guard personnel, as members of one of the Nation's five Armed Services, conduct the missions that protect the public, the environment, and U.S. economic interests – in the Nation's ports and waterways, along the coast, on international waters and in any maritime region required to support Homeland Security. The unique, multi-mission character of the Coast Guard requires personnel to serve as emergency responders, humanitarians, regulators, law enforcement personnel, stewards of the environment, and guardians of the coast. Coast Guard forces are flexible, rapidly deployable, and able to respond to crises with a full range of authorities and capabilities. Coast Guard forces capitalize upon their adaptable nature and multi-mission, versatile assets to prevent maritime incidents, protect the U.S. Maritime Domain, and assist in response and recovery from threats and hazards – both natural and manmade.

Funding requested will support the anticipated FY 2012 pay raise for all military service members (pay inflation rate is estimated at 1.6 percent) and the net basic allowance for housing increase for military service members, while annualizing the military average monthly end strength introduced in FY 2011.

Additionally, the funding will support military personnel to:

- Operate and maintain IOC –WatchKeeper.
- Operate and maintain NAIS.
- Support and operate the third NSC.
- Support and operate FRCs.
- Support and operate MPAs.
- Provide training for newly acquired assets (FRC and NSC).
- Enhance Marine Safety and Environmental Response.
- Support three National Strike Teams.
- Support the Polar Icebreaking Program.

PPA II: CIVILIAN PAY AND BENEFITS

	Perm Pos	FTE	Amount
2010 Actual	6,928	6,790	695,438
2011 C.R.	7,251	6,780	700,646
2012 Adjustments-to-Base	617 661		74,765
2012 Current Services	7,868	7,441	775,411
2012 Program Change	88 45		5,145
2012 Request	7,956	7,486	780,556

The Coast Guard requests \$780.6 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requests funding for expenses related to compensation and entitlements for Federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial operations, and “Non-Ceiling” (NC) employees (e.g., cooperative education students, student aids, summer interns, and Federal junior fellows). Costs related to compensation are calculated using the Coast Guard’s SPC tables. These annually updated tables provide a detailed calculation for each billet, broken down by pay grade and location –INCONUS or OCONUS – which includes AK and HI. Calculations for base pay are based upon position, location of position, and OMB economic assumptions for the fiscal year in question.

Coast Guard’s significant accomplishments in FY 2010 included:

- Led the Federal response to the Deepwater Horizon oil spill with over 200 Coast Guard civilian personnel deployed to the incident, the first ever Spill of National Significance and the worst environmental disaster in U.S. history. Worked across the whole of government and industry to contain the spill, recovered more than 34.7 million gallons of oil-water mix, and performed controlled burns removing more than 11 million gallons of oil from open water to protect the shoreline and wildlife. The Coast Guard implemented the first-ever National Incident Command for a real world event, providing Federal oversight and direction for over 48,000 response personnel and 4,340 response vessels. The Coast Guard deployed 46 cutters, 22 aircraft (flying 1,749 sorties totaling 3,874 hours) and 7,000 people in support of this unprecedented response operation.
- Responded to over 22,000 Search and Rescue cases and saved over 4,300 lives utilizing over 140 civilian Command Center watchstanders throughout the Coast Guard.
- The National Maritime Center issued 53,288 consolidated Merchant Mariner Credentials (MMCs) to qualified Mariners. These MMCs reflect 94,000 Professional Qualifications Evaluations, 24,000 proctored Professional Examinations, 55,000 Medical Evaluations, and over 248,000 direct contacts with Merchant Mariners during the credentialing process.
- Conducted over 450 contingency exercises in conjunction with Federal, State, and local partners, as well as the private sector. These contingency exercises test plans, policies,

and procedures that enhance our nation's ability to prevent, respond to, and recover from a myriad of manmade and natural disasters.

- The Coast Guard Vessel Traffic Service (VTS) program managed nearly 1.4 million commercial vessel transits in 12 of the Nation's high traffic ports employing over 160 Coast Guard civilian watchstanders.

Civilian personnel are an integral part of the Coast Guard and vital to execution of its statutory missions. The Coast Guard continues to complement its military workforce by recruiting diverse, well-educated, and dedicated civilians needed to meet current and future demands.

Coast Guard's planned accomplishments in FY 2011 include:

- Continue response efforts for the Deepwater Horizon Oil Spill in support of QHSR Mission 5.
- Continue to safely manage commercial vessel transits in 12 of the Nation's most congested ports.
- Continue to ensure the accreditation of qualified merchant mariners.
- Continue to conduct mission execution and support activities to best leverage resources to meet mission demand and Coast Guard/DHS mission objectives.

In FY 2012, requested funding will increase the number of dedicated civilian personnel who contribute daily to the Coast Guard's statutory missions. As demonstrated during the response to the Deepwater Horizon oil spill, civilian personnel stand side-by-side with military personnel to fulfill the roles of maritime first responders and help maintain mission effectiveness, prepare for emergencies and contingencies, and ensure Maritime Domain Awareness. These dedicated people support and conduct the missions that protect the public, the environment, and U.S. economic interests – in the Nation's ports and waterways, along the coast, on international waters, and in any maritime region as required to support national security. Through proposed FY 2012 enhancements to the Marine Safety program, civilian personnel will conduct marine inspection and investigations and ensure the safety of the commercial fishing vessel fleet.

Funding requested will also support the annualization of civilian FTE introduced in FY 2011.

PPA III: TRAINING AND RECRUITING

	Perm Pos	FTE	Amount
2010 Actual	214,726
2011 C.R.	206,840
2012 Adjustments-to-Base	3,853
2012 Current Services	210,693
2012 Program Change	2,589
2012 Request	213,282

The Coast Guard requests \$213.3 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The training and recruiting PPA provides funding for the Coast Guard’s professional training and education programs, as well as operation and maintenance of the seven major Coast Guard training centers and the Coast Guard Academy and Leadership Development Center.

Coast Guard’s significant accomplishments in FY 2010 included:

- Accessed 2,761 recruits through recruit training; graduated 2,288 enlisted apprentices from Coast Guard “A” schools; and commissioned 318 officers from the Coast Guard Academy, Officer Candidate School, and Direct Commission Program.
- Trained 1,802 members in advanced maritime law enforcement, 635 members in counter terrorism activities, 2,893 members in leadership skills, and provided 16,873 advanced Coast Guard classroom training courses.
- Graduated 204 members from post-graduate schools to meet advanced training and knowledge requirements.

Coast Guard’s planned accomplishments in FY 2011 include:

- Accessing 3,250 recruits through recruit training; graduating 3,338 enlisted apprentices from Coast Guard “A” schools; and commissioning 341 officers from the Coast Guard Academy, Officer Candidate School and Direct Commission Program.
- Training 2,648 members in advanced maritime law enforcement, 1,464 members in counter terrorism activities, 7,577 members in leadership skills, and providing 39,966 advanced Coast Guard classroom training courses.
- Graduating 198 members from post-graduate schools to meet advanced training and knowledge requirements.

The FY 2012 request provides funding for all Coast Guard recruiting operations, given projected attrition and growth, to ensure sufficient numbers of qualified individuals are accessed to sustain the military workforce. Coast Guard recruiting is a national endeavor. As such, recruiters cover broad geographic areas with diverse socio-economic demographics to compete for the best qualified candidates.

Additionally, this request includes funding for tuition, travel, and per diem for formal training and education performed as temporary additional duty (TAD) by military service members and civilian personnel. It also ensures the training infrastructure is adequately resourced to provide Coast Guard personnel with the tools and competencies necessary for assigned missions. Specifically, this request funds additional instructors for Marine Safety training. Training is provided by the Coast Guard, commercial providers, DoD, and other agencies. This training and education is usually conducted by dedicated resident staffs in classrooms, but may also include exportable training, correspondence courses, and/or computer-based training.

From entry-level personnel through senior leadership, the Coast Guard focuses its training resources to engrain those competencies that will maximize operational capabilities. The FY 2012 budget provides funding for increased training requirements related to new platforms, such as the NSC, the FRC and MPA.

PPA IV: OPERATING FUNDS AND UNIT LEVEL MAINTENANCE

	Perm Pos	FTE	Amount
2010 Actual	1,251,181
2011 C.R.	1,154,720
2012 Adjustments-to-Base	(65,797)
2012 Current Services	1,088,923
2012 Program Change	20,400
2012 Request	1,109,323

The Coast Guard requests \$1.1 billion for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requests funding for units, facilities, and activities that are under the direct operational and administrative control of the Coast Guard’s Headquarters, Atlantic Area or Pacific Area Commanders. These include Base Support Units (BSUs); High and Medium Endurance Cutters (WHECs/WMECs); Sectors; Patrol Boats; Boat Stations; Air Stations; Communication Stations; Maritime Safety and Security Teams (MSSTs); support commands; and Area Offices as applicable for supplies, materials, and services that allow the Coast Guard to sustain an operations tempo with an immediate response capability for Coast Guard missions. Funds unit-level maintenance of cutters, boats, aircraft, mechanical systems, and electrical equipment; procurement of supplies and materials utilized for unit “housekeeping” and administration, spare parts, fuel, and energy; and other materials consumed that contribute directly to mission effectiveness.

Coast Guard’s significant accomplishments in FY 2010 included:

- Led the Federal response to the Deepwater Horizon oil spill, the first ever Spill of National Significance and the worst environmental disaster in U.S. history. Worked across the whole of government and industry to contain the spill, recovered more than 34.7 million gallons of oil-water mix, and performed controlled burns removing more than 11 million gallons of oil from open water to protect the shoreline and wildlife. The Coast Guard implemented the first-ever National Incident Command for a real world event, providing Federal oversight and direction for over 48,000 response personnel and 4,340 response vessels. The Coast Guard deployed 46 cutters, 22 aircraft (flying 1,749 sorties totaling 3,874 hours) and 7,000 people in support of this unprecedented response operation.
- Responded to the Haitian earthquake disaster. Provided humanitarian relief, medical aid, and restoration of the Marine Transportation System. Coast Guard Air Station Clearwater MH-60s were the first military aircraft to arrive on-scene and USCGC OAK became the first military vessel to moor to Haiti following the devastating 7.0 magnitude earthquake. The MH-60s evacuated injured U.S. personnel and OAK delivered medical supplies, clean drinking water, and a medical response team to assist with triage at the Haitian Coast Guard base. OAK also established two buoys to facilitate relief ships and barges carrying tons of humanitarian aid supplies.
- Responded to over 22,000 Search and Rescue cases and saved over 4,300 lives.

- Removed a total of 202,439 pounds of cocaine, and 36,739 pounds of marijuana destined for the United States; seized 56 vessels, and detained 229 suspected smugglers.
- Completed over 9,000 Safety of Life At Sea (SOLAS) safety exams on foreign vessels.
- Completed over 8,900 International Ship and Port Facility Code security exams on foreign vessels.
- Completed over 21,600 container inspections.
- Completed over 7,000 facility safety and security inspections.
- Examined over 62,535 Transportation Worker Identification Credentials (TWICs), 6,000 of which were electronically verified through handheld readers.
- Patrolled the nearly 3.4 million square miles of the U.S. Exclusive Economic Zone (EEZ) to suppress illegal fishing by foreign vessels. Coast Guard assets detected 82 EEZ incursions and interdicted 12 vessels.
- Conducted 34 boardings of foreign vessels to suppress Illegal, Unregulated, and Unreported (IUU) fishing on the high seas and in the EEZs of partner nations.
- Encountered 149 domestic significant fishery violations during boardings of over 5,361 U.S. vessels.
- Responded to over 50 reports or requests from partner agencies to assist with stranded or entangled marine protected resources.
- Interdicted over 2,088 illegal migrants. Of those, 553 Haitian migrants were interdicted and repatriated in three events over a two week period between July and August.
- Established a 24/7 security presence on the maritime border during the 2010 Olympics in partnership with the Royal Canadian Mounted Police (RCMP). Utilizing a Memorandum of Understanding between the United States and Canada for Integrated Maritime Cross-Border Law Enforcement Operations, joint Coast Guard and RCMP vessels boarded 184 boats, conducted detailed screenings of 105 additional boats, and queried 532 people.

Coast Guard's planned accomplishments in FY 2011 include:

- Continue response efforts for the Deepwater Horizon oil spill.
- Support OCO.
- Increase capacity of LEDET Teams.

The FY 2012 request supports the annualization of the LEDET enhancement introduced in FY 2011, as well as follow-on funding to operate and maintain Shore Facilities and ATON, RB-M, IOC, new R21 equipment, new NAIS equipment, and multiple surface and air assets including the third NSC, FRCs, and MPA. In addition, the FY 2012 request supports a Marine Safety and Environmental Response capacity and capability enhancement, the transition to the DASS, the Polar Icebreaking Program, and key improvements in the child care services provided to military families.

PPA V: CENTRALLY MANAGED ACCOUNTS

	Perm Pos	FTE	Amount
2010 Actual	335,569
2011 C.R.	334,766
2012 Adjustments-to-Base	(1,111)
2012 Current Services	333,655
2012 Program Change	17,823
2012 Request	351,478

The Coast Guard requests \$351.5 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requested funding represents centrally managed accounts that provide service to the entire Coast Guard. Larger central accounts include: the Federal Telephone System (FTS), Standard Workstation recapitalization, Coast Guard Data Network (CGDN), postal expenses, satellite communications, General Services Administration (GSA) rent, ammunition replenishment, and the DHS Working Capital Fund.

Coast Guard's significant accomplishments in FY 2010 included:

- Expansion of Coast Guard Portal capabilities in conjunction with secure Common Access Card (CAC) authentication to expand access to more Coast Guard communities including the Coast Guard Reserves.

Coast Guard's planned accomplishments in FY 2011 include:

- Maintain frequencies for Coast Guard communications.
- Provide commercial satellite air time for afloat Coast Guard cutter operations.

Coast Guard's FY 2012 request funds:

- Services provided by the Defense Information Services Agency for the Defense Information System Network.
- Network security and interoperability with the DoD.
- GSA lease renewals at various Coast Guard units.

PPA VI: INTERMEDIATE AND DEPOT LEVEL MAINTENANCE

	Perm Pos	FTE	Amount
2010 Actual	999,815
2011 C.R.	913,786
2012 Adjustments-to-Base	(21,469)
2012 Current Services	892,317
2012 Program Change	24,796
2012 Request	917,113

The Coast Guard requests \$917.1 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

This request provides service-wide funding for the Coast Guard’s depot level operating expense funded maintenance for the service’s shore facilities, vessels, and aircraft. The Coast Guard maintains its aircraft, vessels, and shore infrastructure using in-house maintenance and repair infrastructure in conjunction with contracted depot level maintenance activities. A mature project planning and execution program exists within the Coast Guard to provide routine unit-level and depot level maintenance. Where expertise or infrastructure does not exist organically within the Service, the Coast Guard uses contracted resources to provide the requisite maintenance support.

The Coast Guard’s maintenance planning process involves every level of the organization including: (1) field level input provided in casualty, mishap, and annual unit engineering reports; (2) engineering/support provider input in the form of regional maintenance data/trend analysis, observations of experienced support/engineering personnel, and prioritization of issues/needs; and (3) Coast Guard Headquarters involvement in the collation of CG-wide data/trend analysis, input from the Atlantic and Pacific Area Commanders and their support providers, and development of corrective strategies.

Coast Guard’s significant accomplishments in FY 2010 included:

- Program Depot Maintenance for: HC-130H (5); HC-130J (2); HH-60J/MH-60T (7); HH-65C (19); HU-25 (3); and HC-144A (1).
- Completed dry-docks to perform depot level maintenance and repairs on the following vessels: WYTL 65 (6); WPB 87 (21); WPB 110 (18); WLR/WLIC (10); WTGB 140 (3); WLM 175 (5); WLB 225 (8); WMEC 210/270 (8); and WHEC 378 (4).
- Performed Depot Electronics Systems Maintenance on cutters (133), small boats (81), land based communications equipment (218), Differential Global Positioning System (DGPS) equipment (471), shore based radar equipment (373), Short-Range Aids to Navigation equipment (172).
- Leveraged a one-time \$35.0 million budget initiative to substantially restore aviation spare part inventories and reduce the deferred maintenance balance to achieve the Coast Guard’s aircraft availability rate standard of 71 percent.

Coast Guard's planned accomplishments in FY 2011 include:

- Program Depot Level maintenance for: HC-130H (8); HC-130J (3); MH-60J/MH-60T (8); HH-65C (22); HU-25 (3) and HC-144A (1).
- Planned 2011 dry-docks: WYTL 65 (3); WPB 87 (24); WPB 110 (19); WLR/WLIC (8); WTGB 140 (1); WLM 175 (3); WLB 225 (3); WMEC 210/270 (6); and, WHEC 378 (2).
- Continue recapitalization of Defense Message Service (DMS) servers and associated infrastructure components; perform communications systems maintenance of Large Cutter Connectivity (Ku-Band) onboard WHEC-378s and WMEC-270s; and perform maintenance and repair of all Coast Guard owned shore, cutter, and boat standard electronic navigation, command and control (C2) and communications systems.
- Continue to focus efforts towards reducing the shore facility deferred maintenance backlog to reduce failures and avoid future recapitalization costs.

The FY 2012 request includes a \$28.7 million increase to continue depot level maintenance to support the Coast Guard's cutters; aircraft; Command, Control, Communications, Computers and Information Technology (C4IT) systems; and shore infrastructure:

Aircraft. Includes service-wide funding to support the depot level maintenance and repair of Coast Guard aircraft. This category includes: materials, services, and supplies necessary for depot level repair, maintenance, modification, and overhaul of aircraft and aircraft equipment, including associated avionics; transportation of aircraft and aeronautical materials and equipment; and procurement and overhaul of aircraft ground handling and support equipment. The request also includes funding for general expenses related to spare parts inventory and engineering design, alteration and modification services in support of Coast Guard aircraft.

This funding request also supports depot level aircraft repair. Coast Guard aircraft are continuously rotated out of operational service to allow for programmed depot maintenance (PDM) at the Aviation Logistics Center (ALC) in Elizabeth City, NC. All PDM is based upon established service standards. The purpose of the aircraft PDM program is to (1) provide periodic inspection of areas of an aircraft which are not accessible without extensive disassembly, (2) perform heavy maintenance which is beyond the capability of operating units, and (3) incorporate configuration changes and modifications which are too extensive to perform at the operating unit level.

Vessels. Includes service-wide funding to support the depot level maintenance and repair of Coast Guard vessels. In particular, funding requested will support the procurement, installation, replacement and support of standard hull, mechanical, electrical, and electronic systems. The request also includes funding for general expenses related to inventory and engineering design, as well as alteration and modification services in support of Coast Guard vessels.

Coast Guard vessels are regularly scheduled for PDM based upon established class maintenance plans (CMP). In addition to ship repair work provided by the Coast Guard Yard in Curtis Bay, MD, the Coast Guard routinely uses ship repair facilities/contractors to complete depot level maintenance via competitive contracts. The Coast Guard manages vessel depot level maintenance funding using Standard Support Levels (SSLs) established for each vessel class of asset at the time of asset acquisition and adjusts annually for inflation when inflationary costs are funded. Actual expenditures vary from the SSL as the Coast Guard's maintenance managers allocate

resources to address the most immediate fleet maintenance challenges. Each year the fleet ages, this becomes a greater challenge.

Shore Infrastructure. Includes service-wide funding for depot level facility maintenance to ensure the safety and integrity of the shore infrastructure, maximize facility economic life, and address facility degradation issues as early as possible to prevent large recapitalization expenses. This request includes funding for depot level maintenance repairs, rebuilding, renovation, alterations, and related minor improvements, as well as other services provided by the Coast Guard's Civil Engineering program. This category includes support of: Coast Guard-owned land, buildings (e.g., replacement of roofs and mechanical systems), and structures (e.g., repairs to waterfront, communications and navigation system towers, roads and runways). It also includes support for fixed ATON structures (ashore and offshore) and major non-consumable equipment used to support the Coast Guard's shore plant (e.g., emergency generators, fuel systems, and pressure vessels). Funding also supports depot level maintenance on the Coast Guard's Unaccompanied Personnel Housing (i.e., barracks), family housing, clinics, and morale/well-being and recreational facilities.

Electronics. Includes funding for depot level maintenance and support of all Coast Guard owned standard electronic systems. This request includes funding required for the procurement, replacement, installation, major maintenance, and casualty response for standard electronic navigation, command and control (C2), and communications systems. This category also includes support for the Coast Guard's Command, Control, and Communications Engineering Center (C3CEN) and Telecommunication and Information Systems Command (TISCOM), through the Electronic Support Units and Field Support Divisions to affect system repairs and install upgraded electronics systems on all classes of Coast Guard vessels and boats, and shore facilities including Sectors and Vessel Traffic Services.

III. Current Services Program Description by PPA

Department of Homeland Security
U. S. Coast Guard
Operating Expenses
Program Performance Justification
(Dollars in thousands)

Transfers to and from Other Accounts

A. Interdepartmental Transfer.....\$24,174

PPA Breakdown - Interdepartmental Transfer		Total (\$000)
PPA I: Military Personnel (46 FTP, 46 FTE)		
	Military Pay and Allowances	3,794
	Military Health Care	430
	Permanent Change of Station	268
PPA II: Civilian Personnel (67 FTP, 67 FTE)		
	Civilian Pay and Allowances	8,705
PPA III: Training and Recruiting		
	Training and Education	131
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	10,846
		24,174

Transfers 113 FTP and \$24.2 million of existing government resources from a DoD appropriation to a complementary DHS appropriation to combine funding lines.

Increases

\$365,068

Technical Adjustment.....\$107,722

PPA Breakdown - Technical Adjustment		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	77,476
	Military Health Care	43,450
	Permanent Change of Station	6,050
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	42,100
PPA III: Training and Recruiting		
	Training and Education	(1,878)
	Recruiting and Training Centers	(459)

	Aircraft Maintenance	3,024
	Electronics Maintenance	4,964
	Civil/Ocean Engineering and Shore Facility Maintenance	120
	Vessel Maintenance	6,786
		53,871

Annualizes funding and FTE to provide full year resources for certain projects and programs initiated in the prior year.

FY 2011 Line Items	FTE (Mil)	FTE (Civ)	Recurring Amount (\$000)
Shore Facility and Aids to Navigation (ATON) Follow-On	0	0	68
Response Boat - Medium (RB-M) Maintenance Follow-On	4	0	792
Rescue 21 Follow-On	1	0	2,409
Nationwide Automatic Identification System (NAIS) Follow-On	4	1	570
Defense Messaging System (DMS) Follow-On	0	0	220
Rescue Swimmer Training Facility (RSTF) Follow-On	4	1	4,062
Surface and Air Asset Follow-On	128	27	43,462
Deployable Force Capacity	21	3	2,288
Total	162	32	53,871

B. Mandatory Personnel Entitlements

1. Annualization of FY 2011 Military Pay Raise.....\$7,171

PPA Breakdown - Annualization of FY 2011 Military Pay Raise		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	7,104
	Permanent Change of Station	67
		7,171

Provides one quarter funding to annualize the FY 2011 military (1.4 percent) pay raise.

2. FY 2012 Military Pay Increase\$24,590

PPA Breakdown - FY 2012 Military Pay Increase		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	24,359
	Permanent Change of Station	231
		24,590

Provides three quarters funding for the FY 2012 military (1.6 percent) pay raise.

3. Military Allowances\$34,334

PPA Breakdown - Military Allowances		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances (Basic Allowance for Housing)	8,600
	Military Health Care	15,409
	Permanent Change of Station	9,631
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	694
		34,334

Provides funding to maintain current services and ensure parity of military pay, allowances, and health care with the DoD. This request includes funding for Basic Allowance for Housing (BAH) changes scheduled to take effect on January 1, 2012, projected increases to Permanent Change of Station (PCS) costs, and for requirements to participate in the DoD’s Defense Personnel Property System (DPS), a new household good transportation management system used for military members. Additionally, increased health care costs for military members, dependants, and eligible beneficiaries are forecasted using actuarial projections and include funding for Coast Guard clinics, TRICARE, pharmaceuticals, use of DoD military treatment facilities and Public Health Service physicians serving at Coast Guard medical facilities.

C. Non-pay Adjustments

1. Non-pay Inflation.....\$36,077

PPA Breakdown - Non-pay Inflation		Total (\$000)
PPA III: Training and Recruiting		
	Training and Education	1,447
	Recruiting and Training Centers	1,426
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	494
	Pacific Area	1,090
	1st District	626
	5th District	508
	7th District	745
	8th District	633
	9th District	411
	11th District	398
	13th District	269
	14th District	186
	17th District	284
	Headquarters Directorates	4,554
	Headquarters Units	5,852
PPA V: Centrally Managed Accounts		
	Central Accounts	4,835
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	4,606
	Electronics Maintenance	2,301
	Civil/Ocean Engineering and Shore Facility Maintenance	2,532
	Vessel Maintenance	2,880
		36,077

Coast Guard operations rely heavily upon goods and services for items such as capital asset maintenance, domestic services, cutter and aircraft deployment logistics, food services and procurement. This request represents the anticipated current services increase of these goods and services, based on the OMB projected inflation rate of 1.4 percent.

2. Operational Adjustments

a) GSA Rent and Security Charges Increase\$200

PPA Breakdown - GSA Rent Increase		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	200
		200

This request funds costs associated with lease renewal cost escalations and new GSA lease space requirements. The GSA Rent account is a demand account that reflects costs resulting from current and new occupancy agreements established between the Coast Guard and GSA to meet specific operational and shore facility requirements. Facility space requirements include administrative office space and other unique space such as waterfront facilities and hangar space.

b) Critical Depot Level Maintenance - Asset Sustainment\$28,670

PPA Breakdown - Critical Depot Level Maintenance - Asset Sustainment		Total (\$000)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	12,000
	Civil/Ocean Engineering and Shore Facility Maintenance	5,000
	Vessel Maintenance	11,670
		28,670

Provides funding for critical depot level maintenance and asset sustainment for vessels, aircraft, and infrastructure in support of all Coast Guard programs. Increasing equipment failures and rising maintenance costs have outpaced current funding levels for depot level maintenance. Insufficient maintenance funding leads to increased deferred maintenance, emergency repairs to operational units, parts shortages, and lost operational capacity. Coast Guard assets and supporting infrastructure are critical to the performance of the Coast Guard’s statutory missions and provide the surge capacity that the Nation expects during disasters. When asset availability is reduced, Coast Guard mission performance and National resilience is degraded. In order to fully leverage existing Coast Guard capability and ensure readiness to respond to all threats and hazards, funding is requested for the following initiatives:

Aviation Spare Parts: \$12.0 million in FY 2012 will build on the one-time \$35.0 million FY 2010 aviation sustainment funding increase to continue aircraft asset sustainment through the process of restoring the aviation spare parts to a level needed to meet operational requirements. Current funding levels do not sustain an adequate spare parts inventory. If sufficient parts are not available, aircraft will be grounded and aircraft availability will fall below the required 71 percent, negatively impacting operational readiness. Degraded availability impacts mission execution standards, including the ability to meet “ready to launch within 30 minutes” Search and Rescue standards at Coast Guard Air Stations.

Vessel Sustainment: \$11.7 million in FY 2012 will support the critical depot level maintenance and support of standard hull, mechanical, electrical, and electronic systems on the 140-ft Ice Breaking Tugs, 175-ft Coastal Buoy Tenders, and 225-ft Seagoing Buoy Tenders – multi-mission assets critical to the performance of routinely assigned maritime mobility missions and essential for surge capacity as demonstrated in the recent Deepwater Horizon oil spill response. Currently, the Standard Support Levels (SSL) are insufficient to meet the growing maintenance demand for these cutters reaching the middle or end of their designed service life. Additional SSL funding is required to maintain these assets until a Service Life Extension Project (SLEP) can be completed.

Shore Facilities: \$5.0 million in FY 2012 will enable depot level repair of aging shore infrastructure to ensure safe and effective mission execution, quality of life for Coast Guard personnel, and reduce the risk of service failures and higher long-term costs. The request represents a starting point to address this critical gap that has resulted in a depot level shore maintenance backlog now exceeding \$600.0 million.

c) Government Services Increase\$4,673

PPA Breakdown - Government Services Increase		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	3,800
PPA V: Centrally Managed Accounts		
	Central Accounts	873
		4,673

Provides funding for increases in user fee rates for Defense Information Services Agency (DISA) and National Telecommunications and Information Administration (NTIA) service fees. DISA charges the Coast Guard a mandatory service fee for the delivery of Defense Information System Network (DISN) services (JWICS, SIPRNET, NIPRNET). The estimated increase for the DISA service fee for FY 2012 is \$642,000. In addition, the Coast Guard currently uses over 17,000 radio frequencies and is required to pay NTIA to retain the use of these bandwidths. The estimated increase for the NTIA service fee for FY 2012 is \$231,000.

Additionally, this initiative provides funding for the Office of Personnel Management (OPM) to conduct suitability and national security investigations for Coast Guard personnel to comply with Executive Order 10450, “Security Requirements for Government Employment,” and the Intelligence Reform and Terrorism Prevention Act (IRTPA). These programs require the Coast Guard to maintain an effective personnel security program to ensure that the employment of all Coast Guard personnel is consistent with the interest of national security mandates and that each individual is subject to an investigation according to the nature of their assigned position. OPM charges a service fee for the suitability and national security investigations. The estimated increase for the OPM service fee for FY 2012 is \$3.8 million.

D. Operating and Maintenance Funds for New Assets

1. Shore Facility Follow-On\$4,925

PPA Breakdown - Shore Facility Follow-On		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	600
	7th District	172
	8th District	621
	13th District	122
	Headquarters Directorates	379
PPA VI: Depot Level Maintenance		
	Civil/Ocean Engineering and Shore Facility Maintenance	3,031
		4,925

Provides funding for the incremental costs associated with operation and maintenance of new/improved shore facilities scheduled for completion prior to FY 2012. Funding is required for daily operating costs for energy, utility services, grounds maintenance, routine repairs, and housekeeping. Funding also supports major (e.g., depot level) non-recurring maintenance and repairs (e.g., system component renewals, preventive maintenance, emergency response repairs, scheduled inspections, etc.) anticipated throughout the life of the facility.

This funding provides the resources required to maintain and operate new assets/improvements acquired through the execution of the following AC&I mission-essential facility projects:

- Station Neah Bay: Covered Moorings
- Base Support Unit Elizabeth City: Thrun Hall Phase I
- Group Air Station North Bend: Engineering and Aviation Survivalman Shop
- Air Station Elizabeth City: Rescue Swimmer Training Facility Phases I & II
- Station Lake Charles: Aids-to-Navigation Team (ANT) Sabine Relocation
- Great Inagua: Hangar and Support Facilities
- ANT Dulac: Rebuilt Facilities
- Sector Houston-Galveston: Relocation and Rebuilding of Facilities and Offices
- Station Sabine: Rebuilt Facilities for Station Sabine and USCGC HERON

2. Response Boat - Medium (RB-M) Maintenance Follow-On\$2,090

PPA Breakdown - Response Boat - Medium (RB-M) Maintenance Follow-On		Total (\$000)
PPA I: Military Personnel (1 FTP, 1 FTE)		
	Military Pay and Allowances	32
	Military Health Care	5
	Permanent Change of Station	11
PPA III: Training and Recruiting		
	Training and Education	18
	Recruiting and Training Centers	1
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	1,451
PPA V: Centrally Managed Accounts		
	Central Accounts	5
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	390
	Civil/Ocean Engineering and Shore Facility Maintenance	93
	Vessel Maintenance	84
		2,090

This request provides funding and personnel for operation and maintenance, including fuel costs, associated with delivery of 37 RB-Ms. Additional funding is required for RB-M maintenance, repair, and operational costs as these new assets are delivered in FY 2012. The resources requested herein reflect the increased cost of operating and maintaining the RB-Ms as compared to operating and maintenance costs of the boats they are replacing. The increased costs are driven primarily by the capability enhancements included in the RB-M that are required to meet current mission demands.

3. Interagency Operations Centers (IOC) Follow-On\$3,407

PPA Breakdown - Interagency Operations Centers (IOC) Follow-On		Total (\$000)
PPA I: Military Personnel (12 FTP, 6 FTE)		
	Military Pay and Allowances	534
	Military Health Care	56
	Permanent Change of Station	192
PPA II: Civilian Personnel (2 FTP, 1 FTE)		
	Civilian Pay and Allowances	119
PPA III: Training and Recruiting		
	Training and Education	54
	Recruiting and Training Centers	18
PPA IV: Operating Funds and Unit Level Maintenance		
	1st District	219
	5th District	143
	7th District	294
	8th District	179
	9th District	112
	11th District	227
	13th District	98
	14th District	45
	17th District	45
	Headquarters Directorates	20
	Headquarters Units	86
	Other Activities	4
PPA V: Centrally Managed Accounts		
	Central Accounts	62
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	780
	Civil/Ocean Engineering and Shore Facility Maintenance	120
		3,407

Provides first year follow-on funding to operate and maintain the capabilities delivered via the IOC project, including the WatchKeeper information system and the sensor management capability as required by the Security and Accountability for Every (SAFE) Port Act (P.L. 109-347). IOCs enhance command and control, situational awareness, and collaborative operational planning and execution in conjunction with partner Federal, State, and local agencies throughout our Nation’s ports. The WatchKeeper web-based system will be partially deployed in FY 2010-2011 using AC&I funding. In FY 2012, \$3.4 million in funding will support the operation and maintenance of the WatchKeeper information management system, enabling information sharing, interoperability, and collaboration with port partners.

Critical support funded by this initiative includes system management, connectivity, hardware spares, and software support. Additionally, requested personnel to support the project include Command Center School instructors, personnel at the Coast Guard’s C3CEN for logistics oversight and management, and

system engineers and help desk support. The Coast Guard, acting as the executive agent for DHS IOCs, will maintain the information management system’s hardware and software components.

4. Rescue 21 Follow-On\$6,151

PPA Breakdown - Rescue 21 (R21) Follow-On		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	5,799
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	245
	Civil/Ocean Engineering and Shore Facility Maintenance	107
		6,151

Provides follow-on funding to support R21, the Coast Guard’s primary system for performing the functional tasks of command, control, and communications in the inland and coastal zones. R21 is a key enabler for an effective emergency response in the maritime domain. Funding supports equipment Operations and Maintenance (O&M), circuit connectivity, property and power, training, and technology refreshment.

The R21 system reached its Initial Operating Capability in December 2005. As of December 2010, R21 is operational in 26 Sectors and two Group/Air Stations along 36,985 miles of coastline covering the eastern seaboard (northeast, mid-Atlantic, and southeast), Gulf Coast, Pacific Northwest, and California except for Los Angeles/Long Beach. In those areas where R21 has been deployed, the system has proven to be an invaluable asset in over 18,000 Search and Rescue cases.

The FY 2012 request provides funding to support operation and maintenance of the R21 System in the following six Sectors: Detroit, Los Angeles/Long Beach, Honolulu, San Juan, Guam, and Buffalo.

5. Nationwide Automatic Identification System (NAIS) Follow-On\$570

PPA Breakdown - Nationwide Automatic Identification System (NAIS) Follow-On		Total (\$000)
PPA I: Military Personnel (6 FTP, 3 FTE)		
	Military Pay and Allowances	192
	Military Health Care	28
	Permanent Change of Station	68
PPA III: Training and Recruiting		
	Training and Education	33
	Recruiting and Training Centers	6
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	6
	Headquarters Directorates	98
	Headquarters Units	4
	Other Activities	1
PPA V: Centrally Managed Accounts		
	Central Accounts	27
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	107
		570

Provides funding for the operation and maintenance of NAIS interim capabilities in 58 ports and the permanent capabilities in the first three sectors (Mobile, Hampton Roads, and Delaware Bay (Philadelphia)) scheduled for deployment by the end of FY 2011. Maintenance costs include network management, data storage, and system troubleshooting and repair at several local and remote locations. Requested personnel include an IT analyst and maintenance support billets required to monitor and ensure the security, performance, reliability, troubleshooting, and repair of NAIS. These billets also support the continued transition to government OE maintenance support in FY 2012 in conjunction with the expiration of the warranty for the core system design.

The Maritime Transportation Security Act of 2002 (46 U.S.C. 70013) directed DHS to implement a persistent maritime surveillance system to collect, integrate, and analyze information concerning certain vessels operating within, or bound for waters subject to the jurisdiction of the United States. NAIS is essential to fulfilling this Congressional requirement and serves as a centerpiece of DHS's effort to build Maritime Domain Awareness (MDA).

6. Manned Covert Surveillance Aircraft (MCSA) Follow-On.....\$1,880

PPA Breakdown - Manned Covert Surveillance Aircraft (MCSA) Follow-On		Total (\$000)
PPA I: Military Personnel (12 FTP, 6 FTE)		
	Military Pay and Allowances	555
	Military Health Care	56
	Permanent Change of Station	180
PPA III: Training and Recruiting		
	Training and Education	415
	Recruiting and Training Centers	5
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	25
	7th District	105
	Headquarters Directorates	58
	Other Activities	1
PPA V: Centrally Managed Accounts		
	Central Accounts	39
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	441
		1,880

Provides personnel and operations and maintenance (O&M) funding for the Coast Guard MCSA. The MCSA is scheduled to be delivered by the 4th quarter of FY 2012. The MCSA is expected to fly 1,000 Maritime Patrol Aircraft (MPA) hours annually to provide covert detection and monitoring capability with real time communications to Coast Guard operational commanders via automatic feeds to Command Center Common Operational Picture displays.

7. Surface and Air Asset Follow-On.....\$48,737

PPA Breakdown - Surface and Air Asset Follow-On		Total (\$000)
PPA I: Military Personnel (318 FTP, 190 FTE)		
	Military Pay and Allowances	13,264
	Military Health Care	1,765
	Permanent Change of Station	4,064
PPA II: Civilian Personnel (55 FTP, 29 FTE)		
	Civilian Pay and Allowances	3,225
PPA III: Training and Recruiting		
	Training and Education	2,907
	Recruiting and Training Centers	317
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	525
	Pacific Area	1,326
	7th District	1,995
	8th District	211
	Headquarters Directorates	5,480
	Headquarters Units	2,221
	Other Activities	32
PPA V: Centrally Managed Accounts		
	Central Accounts	2,284
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	3,688
	Electronics Maintenance	2,876
	Civil/Ocean Engineering and Shore Facility Maintenance	476
	Vessel Maintenance	2,081
		48,737

Surface and air assets provide the Coast Guard with the foundational capability necessary to perform its missions. Funding is requested to operate and maintain new assets that will transition from the acquisition program to operations in FY 2012 or to prepare crews in advance of that transition.

FRC O&M for 6 through 8 (Key West): Provides O&M for FRC hulls six through eight scheduled for delivery in 2012 and homeported in Miami, FL (#6) and Key West, FL (#7-8). The FRC is larger and more capable than the 110-ft patrol boat with advanced electronics and enhanced capabilities. This platform sustains the Coast Guard’s high speed, coastal capability for prosecuting immigration laws, enforcing boarder security, preventing terrorism, and ensuring resiliency to disasters. The FRC will also provide improved interoperability, C4ISR, common operating picture, and sensors to enhance surveillance and identification.

FRC Crews 9 and 10 (Key West): Provides personnel to operate and maintain the ninth and tenth FRCs scheduled for delivery in early 2013. Advance arrival of the crew is critical to ensure appropriate training and crew readiness prior to delivery.

FRC Follow-on Support: Provides personnel for shore-side support of the FRCs to be homeported in the first two homeports (Miami and Key West) for FRC shore-side personnel in FY 2011. These billets will fully staff the required Maintenance Augmentation Team (MAT) support for Miami and provide initial staffing to establish MAT Key West. In addition, FRC support personnel are provided for the Asset Program Office (APO), Surface Forces Logistics Center (SFLC), and training teams to support and maintain crew proficiency and safety.

NSC Crew Rotational Concept (Alameda): Provides the required resources to support the Crew Rotational Concept (CRC) on Coast Guard Cutters BERTHOLF, WAESCHE, and STRATTON. These cutters will transition from the standard crewing paradigm to CRC. Funding provides personnel to support NSC CRC oversight by establishing Squadron Alameda consisting of squadron staff and MAT augmentation.

NSC Crew: Provides personnel and funding for the third phase of the crew designated to accept and operate the third NSC, USCGC STRATTON.

NSC Signals Intelligence Capability: Provides personnel and follow-on funding to operate, staff, and maintain equipment in the Sensitive Compartmentalized Information Facilities (SCIF) onboard the first three NSCs. The installed SCIFs and trained personnel will greatly improve MDA by enhancing a cutter's ability to locate, identify, and target specific security threats and vessels.

Helicopter Communications and Sensor Systems Follow-on: Provides O&M funding for the communications and sensor systems installed as part of the HH-60 and HH-65 helicopter conversion/sustainment projects.

HC-144A Aircraft Follow-on: Provides personnel funding for MPA (HC-144A) #14. In addition, this initiative provides personnel and O&M funding for the C4IT Service Center to support aircraft Mission System Pallets (MSP) #1 through #12.

Asset Training System Engineering Personnel: Provides personnel and follow-on O&M funding necessary to meet and support NSC and FRC training requirements at Training Center Yorktown. These instructors and support personnel will develop curriculum and perform human performance/training analysis to ensure training objectives are met at the new Hull, Maintenance & Engineering School.

C4ISR Follow-on: Provides funding for personnel required for the C4IT Service Center to maintain more than 200 C4ISR systems deployed and delivered by the Coast Guard C4ISR Program. Assets supported include the NSC, FRC, HC-144A, HC-130J, and surface, air, and shore assets with enhanced C4ISR capabilities.

E. Base Re-Allocations (Non-Add)

1. Reserve Force Contract Conversion[\$1,490]

PPA Breakdown - Reserve Force Contract Conversion		Total (\$000)
PPA I: Military Personnel (8 FTP, 8 FTE)		
	Military Pay and Allowances	554
	Military Health Care	75
	Permanent Change of Station	99
PPA II: Civilian Personnel (5 FTP, 5 FTE)		
	Civilian Pay and Allowances	671
PPA III: Training and Recruiting		
	Training and Education	54
	Recruiting and Training Centers	11
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	(1,490)
	Other Activities	1
PPA V: Centrally Managed Accounts		
	Central Accounts	25
		0

Provides permanent government personnel at the Coast Guard Security Center (SECCEN) to adjudicate security clearances. SECCEN is responsible for ensuring the Coast Guard Personnel Security and Suitability Program is managed effectively and in alignment with Federal mandates. Due to the “inherently governmental” aspect of security and suitability determinations, only Federal employees can make final determinations. This initiative transfers funding used to provide temporary reservist support for this function to the military and civilian pay accounts to fund the permanent FTE.

2. Military FTP and FTE Transfer to Civilian.....[\$3,127]

PPA Breakdown - Military FTP and FTE Transfer to Civilian		Total (\$000)
PPA I: Military Personnel (-32 FTP, -32 FTE)		
	Military Pay and Allowances	(2,599)
	Military Health Care	(299)
	Permanent Change of Station	(190)
PPA II: Civilian Personnel (32 FTP, 32 FTE)		
	Civilian Pay and Allowances	3,127
PPA III: Training and Recruiting		
	Training and Education	(39)
		0

Transfers 32 military FTP/FTE to civilian FTP/FTE. This request is based upon the conversion of military positions to civilian positions. These conversions are in accordance with GAO guidance to

change military positions funded in PPA I (Military Pay and Allowances) with inherently civilian job functions to civilian positions funded in PPA II (Civilian Pay and Allowances).

3. PPA Funding Technical Transfers.....[\$22,365]

PPA Breakdown - PPA Funding Technical Transfers		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	580
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	2,843
PPA III: Training and Recruiting		
	Training and Education	4,705
	Recruiting and Training Centers	6,006
PPA IV: Operating Funds and Unit Level Maintenance		
	Pacific Area	(1,685)
	1st District	(116)
	5th District	(145)
	7th District	(73)
	8th District	(82)
	17th District	(152)
	Headquarters Directorates	(19,823)
	Headquarters Units	(289)
PPA V: Centrally Managed Accounts		
	Central Accounts	6,844
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(75)
	Electronics Maintenance	(229)
	Civil/Ocean Engineering and Shore Facility Maintenance	1,828
	Vessel Maintenance	(137)
		0

This request implements recurring technical base adjustments to reallocate funding to the appropriate PPA for compliance with Coast Guard financial policy and proper alignment to the modernized operations and support organizations of the Coast Guard. All requested adjustments retain the original intent and purpose of the funding appropriated; however, the PPA required to properly execute these items is different than originally appropriated.

Requested FY 2012 adjustments to the PPA allocation include:

- Military and Civilian pay account adjustments accounting for annual personnel reprogrammings.
- Unit level operating base funding adjustments to align with the authorized Coast Guard modernized structure.
- The centralization of training support funding to properly source field-level training schools.
- The centralization and alignment of hardware and network services funding.

4. Multi-Sector Workforce Rebalancing Initiative Technical Adjustment[\$22,629]

PPA Breakdown - Multi-Sector Workforce Rebalancing Initiative Technical Adjustment		Total (\$000)
PPA I: Military Personnel (-86 FTP, -86 FTE)		
	Military Pay and Allowances	(6,195)
	Military Health Care	(629)
	Permanent Change of Station	(238)
PPA II: Civilian Personnel (101 FTP, 101 FTE)		
	Civilian Pay and Allowances	10,118
PPA III: Training and Recruiting		
	Training and Education	(88)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	12,511
PPA V: Centrally Managed Accounts		
	Central Accounts	(1,481)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(591)
	Electronics Maintenance	(3,727)
	Civil/Ocean Engineering and Shore Facility Maintenance	(2,055)
	Vessel Maintenance	(7,625)
		0

The Coast Guard's FY 2011 Multi-Sector Workforce Rebalancing Initiative (MWRI), formally known as the DHS Balance Workforce Strategy in the FY 2011 President's Request, originally estimated 300 full-time positions (185 civilian and 115 military) for conversion to government performance. This initiative yielded \$14.5 million in savings in the FY 2011 President's Request. Extensive analysis was completed identifying contracts ideally suited for conversion to government performance based on a potential to achieve greater workforce balance and cost efficiencies. The resulting review recommended adjusting the original insourcing estimates by increasing the number of civilian conversions from 185 to 286 and decreasing the military conversions from 115 to 29 for a total of 315 positions. This review ensured the Coast Guard has the proper mix of Federal and contractor workforce, and achieved the targeted savings outlined in the FY 2011 President's Request. The FY 2012 MWRI technical adjustment accounts for the military to civilian conversions, the additional 15 positions insourced, and technical base adjustments to reallocate funding for professional service contracts to the appropriate PPA.

Decreases**(\$226,976)****A. Termination of One Time Costs (\$19,935)**

PPA Breakdown - Termination of One-Time Costs		Total (\$000)
PPA I: Military Personnel		
	Permanent Change of Station	(6,164)
PPA III: Training and Recruiting		
	Training and Education	(2,913)
	Recruiting and Training Centers	(78)
PPA IV: Operating Funds and Unit Level Maintenance		
	Pacific Area	(500)
	7th District	(580)
	8th District	(110)
	Headquarters Directorates	(6,113)
	Headquarters Units	(380)
PPA V: Centrally Managed Accounts		
	Central Accounts	(2,798)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(209)
	Civil/Ocean Engineering and Shore Facility Maintenance	(90)
		(19,935)

This line item reflects FY 2012 savings associated with the termination of one-time costs for program start-up and exit transactions anticipated in FY 2011.

FY 2011 Line Items	Non-Recurring Amount (\$000)
Response Boat - Medium (RB-M) Maintenance Follow-On	(330)
Rescue 21 Follow-On	(24)
Nationwide Automatic Identification System (NAIS) Follow-On	(130)
Defense Messaging System (DMS) Follow-On	(320)
Rescue Swimmer Training Facility (RSTF) Follow-On	(144)
Surface and Air Asset Follow-On	(9,584)
Manned Covert Surveillance Aircraft Follow-On	(93)
Consolidate Maritime Intelligence Fusion Centers (MIFCs)	(82)
Retire Four HU-25 Aircraft	(705)
Two High Endurance Cutters (HEC)	(5,431)
Decommission Medium Endurance Cutter (MEC)	(1,408)
Deployable Force Capacity	(1,669)
CG Investigative Service (CGIS)	(15)
Total	(19,935)

B. Prior Year Management Annualizations (\$41,133)

PPA Breakdown - Prior Year Management Annualizations		Total (\$000)
PPA I: Military Personnel (-310 FTE)		
	Military Pay and Allowances	(19,695)
	Military Health Care	(2,702)
	Permanent Change of Station	(2,677)
PPA II: Civilian Personnel (-4 FTE)		
	Civilian Pay and Allowances	(530)
PPA III: Training and Recruiting		
	Training and Education	(746)
	Recruiting and Training Centers	(405)
PPA IV: Operating Funds and Unit Level Maintenance

	Pacific Area	(1,331)
	1st District	(64)
	7th District	(219)
	Headquarters Directorates	(4,274)
	Headquarters Units	(1,309)
	Other Activities	(41)
PPA V: Centrally Managed Accounts		
	Central Accounts	(1,002)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(3,825)
	Electronics Maintenance	(276)
	Vessel Maintenance	(2,019)
		(41,133)

This line item annualizes part-year reductions from various asset decommissionings anticipated in FY 2011.

FY 2011 Line Items	FTE (Mil)	FTE (Civ)	Recurring Amount (\$000)
Manned Covert Surveillance Aircraft Follow-On	0	0	(63)
Consolidate Maritime Intelligence Fusion Centers (MIFCs)	(5)	0	(620)
Retire Four HU-25 Aircraft	(30)	0	(8,675)
Decommission Two High Endurance Cutters (HEC)	(187)	0	(20,837)
Decommission Medium Endurance Cutter (MEC)	(43)	0	(4,594)
Deployable Force Capacity	(44)	(1)	(5,744)
CG Investigative Service (CGIS)	(1)	(3)	(600)
Total	(310)	(4)	(41,133)

C. Asset Decommissionings

1. Decommission Three PC-179s (\$16,383)

PPA Breakdown - Three PC-179s		Total (\$000)
PPA I: Military Personnel (-108 FTP, -108 FTE)		
	Military Pay and Allowances	(7,072)
	Military Health Care	(1,009)
	Permanent Change of Station	756
PPA III: Training and Recruiting		
	Training and Education	(177)
	Recruiting and Training Centers	(153)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(1,814)
	Pacific Area	(108)
	Headquarters Directorates	(1,658)
	Other Activities	(19)
PPA V: Centrally Managed Accounts		
	Central Accounts	(374)
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	(67)
	Civil/Ocean Engineering and Shore Facility Maintenance	(10)
	Vessel Maintenance	(4,678)
		(16,383)

Three 179-ft Patrol Coastal (PC) vessels will be decommissioned per a signed Memorandum of Agreement (MOA) with the U.S. Navy in January 2007. These vessels will be returned to the U.S. Navy in FY 2012.

2. Decommission High Endurance Cutter (HEC).....(\$6,700)

PPA Breakdown - Decommission High Endurance Cutter (HEC)		Total (\$000)
PPA I: Military Personnel (-184 FTP, -92 FTE)		
	Military Pay and Allowances	(5,377)
	Military Health Care	(859)
	Permanent Change of Station	1,420
PPA III: Training and Recruiting		
	Training and Education	(155)
	Recruiting and Training Centers	(128)
PPA IV: Operating Funds and Unit Level Maintenance		
	Pacific Area	(624)
	Headquarters Directorates	360
	Other Activities	(16)
PPA V: Centrally Managed Accounts		
	Central Accounts	(384)
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	(112)
	Vessel Maintenance	(825)
		(6,700)

The Coast Guard will decommission one High Endurance Cutter (HEC) in FY 2012. The average age of the HEC fleet is 43 years and these assets are failing at an increased rate resulting in lost operational days and increased maintenance costs. With the acquisition of the fifth NSC fully funded in the FY 2012 budget and the third NSC scheduled for delivery in FY 2011, decommissioning of a third HEC will continue the transition from HECs to NSCs.

D. Termination of Sector Corpus Christi Facility Follow-On(\$2,301)

PPA Breakdown - Termination of Sector Corpus Christi Facility Follow-On		Total (\$000)
PPA I: Military Personnel (-26 FTP, -26 FTE)		
	Military Pay and Allowances	(1,683)
	Military Health Care	(202)
	Permanent Change of Station	(72)
PPA III: Training and Recruiting		
	Training and Education	(41)
	Recruiting and Training Centers	(8)
PPA IV: Operating Funds and Unit Level Maintenance		
	8th District	(171)
PPA V: Centrally Managed Accounts		
	Central Accounts	(34)
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	(90)
		(2,301)

Follow-on funding was provided in FY 2010 for the operation and maintenance of new facilities required to co-locate Coast Guard Sector and Air Station Corpus Christi at the Corpus Christi Airport and provide joint operations space with Customs and Border Protection (CBP). The facilities will not be acquired prior to FY 2012; therefore, funding for this initiative is being terminated.

In the FY 2012 Acquisition, Construction, and Improvement appropriation the Coast Guard is requesting funding to consolidate Sector and Air Station Corpus Christi facilities in order to properly hangar, maintain, and operate new CASA HC-144A aircraft and effectively meet mission requirements. If appropriated as requested, follow-on funding would be required in the future to support the proposed facility.

E. FY 2012 Balanced Workforce Strategy(\$484)

PPA Breakdown - FY 2012 Balanced Workforce Strategy		Total (\$000)
PPA II: Civilian Personnel (4 FTP, 4 FTE)		
	Civilian Pay and Allowances	601
PPA III: Training and Recruiting		
	Training and Education	2
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	(1,095)
PPA V: Centrally Managed Accounts		
	Central Accounts	8
		(484)

In order to establish a high performing workforce comprised of a strong internal core of Federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. The Coast Guard is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. The Coast Guard proposes insourcing a professional service contract to government service using four new full time positions. This initiative will save approximately \$484,000 in operating expenses.

F. Efficiencies and Offsets

1. Operational Support Reduction(\$36,077)

PPA Breakdown - Operational Support Reduction		Total (\$000)
PPA III: Training and Recruiting		
	Training and Education	(1,447)
	Recruiting and Training Centers	(1,426)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(494)
	Pacific Area	(1,090)
	1st District	(626)
	5th District	(508)
	7th District	(745)
	8th District	(633)

	Electronics Maintenance	(2,301)
	Civil/Ocean Engineering and Shore Facility Maintenance	(2,532)
	Vessel Maintenance	(2,880)
		(36,077)

\$36.1 million service-wide reduction in funding that supports day-to-day Coast Guard operations. Reductions were generated to sustain front-line operational capacity and invest in critical recapitalization initiatives.

2. Administrative Savings Initiative (\$83,469)

PPA Breakdown - Administrative Savings Initiative		Total (\$000)
PPA I: Military Personnel		
	Permanent Change of Station	(5,000)
PPA III: Training and Recruiting		
	Recruiting and Training Centers	(6,283)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(2,359)
	Pacific Area	(2,968)
	1st District	(522)
	5th District	(445)
	7th District	(655)
	8th District	(539)
	9th District	(359)
	11th District	(338)
	13th District	(226)
	14th District	(157)
	17th District	(228)
	Headquarters Directorates	(20,026)
	Headquarters Units	(7,932)
PPA V: Centrally Managed Accounts		
	Central Accounts	(11,596)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(8,900)
	Electronics Maintenance	(4,450)
	Civil/Ocean Engineering and Shore Facility Maintenance	(4,996)
	Vessel Maintenance	(5,490)
		(83,469)

In FY 2012 the Coast Guard will make difficult, albeit necessary trade-offs to sustain front-line operational capacity and invest in critical recapitalization initiatives. To fund higher order needs the Coast Guard will seek efficiencies and make targeted reductions in administrative functions. These decisions are necessary in the current fiscal environment but do not come without impact to readiness and operations. FY 2012 Administrative Savings initiatives include:

DHS Efficiency Review: Consistent with the Secretary of Homeland Security’s Efficiency Review, and building upon efforts in previous fiscal years, the Coast Guard will endeavor to produce administrative savings by leveraging centralized purchasing and software licensing agreements, reductions in printing and publications, reductions in shipping and the transportation of goods, reductions in advisory and assistance contracts, and minimizing purchases of supplies and materials. Office equipment consolidation, implementing automation and energy conservation/savings measures, and limiting non-government facility usage will also improve efficiency and eliminate waste.

Non-Operational Travel Reduction: In FY 2012, the Coast Guard will reduce non-operational travel by more than 25 percent across all programs. The Coast Guard will maximize technology and training

tools, such as teleconferencing and webinars to reduce travel related to professional development, planning conferences, and international engagement.

Professional Service Contracts: The Coast Guard will reduce professional services contracts for enterprise-wide mission support and operational support activities. Examples of contracts targeted for reduction include: program management, engineering and technical services, financial audit support, doctrine and publication development, studies, software development, and other professional contracts.

While these efficiencies achieve savings to fund higher priority needs, they do so through a reduction in administrative and programmatic support across all Coast Guard programs. The Coast Guard will leverage technology and base resources to mitigate impacts of these reductions on Coast Guard readiness, operations, and the workforce.

3. Standard Workstation Help Desk Consolidation..... (\$6,900)

PPA Breakdown - Standard Workstation Help Desk Consolidation		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	(6,900)
		(6,900)

This proposed reduction restructures the Standard Workstation (SWS) support model by consolidating Tier 2 (depot level) support to two Regional Centers. Electronic Support Units (ESU) SWS Help Desks will be eliminated, which will eliminate 54 contractors. Tier 1 (end-user) support will be maintained at local ESU and Detachments dispatched to major field commands to provide local response as needed.

Efficiencies will be realized with the elimination of the local help desks. Though there may be an increase in the mean time to repair computer-related casualties, processes are in place to monitor the status of help requests to mitigate performance degradation and will be used to monitor support performance.

4. Program Support Reduction.....(\$13,594)

PPA Breakdown - Program Support Reduction		Total (\$000)
PPA III: Training and Recruiting		
	Recruiting and Training Centers	(2,000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(657)
	Pacific Area	(1,212)
	Headquarters Directorates	(8,275)
	Headquarters Units	(100)
PPA V: Centrally Managed Accounts		
	Central Accounts	(1,200)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(150)
		(13,594)

In order to preserve front-line operations and sustain investment in critical recapitalization initiatives, the Coast Guard will reduce headquarters policy and enterprise-wide program support funding. Elements affected by this reduction include support for Coast Guard small boats, engineering and logistics support, financial management, and human capital initiatives such as recruiting, innovation, and individual unit professional development and training opportunities.

IV. Program Justification of Changes

**Department of Homeland Security
U. S. Coast Guard
Operating Expenses
Justification of Program Changes
(Dollars in thousands)**

Program Changes **\$93,351**

A. Enhancing Marine Safety**\$10,666**

PPA Breakdown - Enhancing Marine Safety		Total (\$000)
PPA I: Military Personnel (48 FTP, 24 FTE)		
	Military Pay and Allowances	2,303
	Military Health Care	224
	Permanent Change of Station	825
PPA II: Civilian Personnel (57 FTP, 29 FTE)

	14th District	35
	17th District	36
	Other Activities	4
PPA V: Centrally Managed Accounts		
	Central Accounts	609
PPA VI: Depot Level Maintenance		
	Civil/Ocean Engineering and Shore Facility Maintenance	1,600
		10,666

Description of Item

This request builds upon the Coast Guard’s Marine Safety Performance Plan (MSPP), the foundational plan initiated in 2008 to meet the challenges associated with effectively regulating a dynamic and ever-growing maritime industry. It includes growing a highly skilled and high performing diversified workforce of military and civilian personnel to support the plan’s goals and initiatives of having a superior marine safety workforce, providing superb service delivery to the public, and implementing

fishing and vessel safety initiatives to reduce casualties from these types of vessels. The request includes 105 personnel to implement the next segment of the MSPP by investing in Marine Safety Inspectors, Investigators, and Fishing Vessel Safety Examiners at Coast Guard Sectors.

Justification

The current and future challenges in the U.S. Marine Transportation System (MTS) are many. Increases in maritime commerce across the MTS highlight the necessity for growth in the Marine Safety workforce to reduce the risk of marine casualties and meet demand for Coast Guard services. This request invests in necessary Marine Safety Inspectors, Investigators and Fishing Vessel Safety Examiners at Coast Guard Sectors, and places critical attorney positions at Coast Guard Districts to enhance capacity for enforcement actions, suspension and revocation cases, marine casualty boards, and civil penalties. Additional personnel in this request will assist in meeting the Coast Guard Authorization Act (CGAA) of 2010 requirements regarding dockside examinations.

Additionally, this request provides additional personnel to improve the competency and proficiency of the Coast Guard's marine safety workforce through enhancements to marine safety workforce training.

Impact on Performance

Funding improves the Coast Guard's ability to ensure the safety of thousands of vessels and mariners and the resiliency of the international supply chain critical to the economic security of the Nation. These personnel are paramount to the Coast Guard's ability to prevent marine casualties and environmental disasters. The initiative will provide needed capacity and improve technical competency of the marine safety workforce as documented in the Marine Safety Performance Plan.

B. Enhancing Marine Environmental Response.....\$11,485

PPA Breakdown - Enhancing Marine Environmental Response		Total (\$000)
PPA I: Military Personnel (69 FTP, 35 FTE)		
	Military Pay and Allowances	3,079
	Military Health Care	322
	Permanent Change of Station	1,030
PPA II: Civilian Personnel (18 FTP, 9 FTE)		
	Civilian Pay and Allowances	1,135
PPA III: Training and Recruiting		
	Training and Education	1,612
	Recruiting and Training Centers	335
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	9
	Pacific Area	1,169
	1st District	38
	5th District	36
	7th District	59
	8th District	82
	9th District	1
	11th District	36
	13th District	23
	14th District	12
	17th District	29
	Headquarters Directorates	108
	Headquarters Units	297
	Other Activities	6
PPA V: Centrally Managed Accounts		
	Central Accounts	487
PPA VI: Depot Level Maintenance		
	Civil/Ocean Engineering and Shore Facility Maintenance	1,580
		11,485

Description of Item

This request supports the Marine Environmental Protection mission by providing funding for a Marine Environmental Response (MER) Incident Management and Assist Team (IMAT) and increasing technical expertise and strengthening MER career paths at Coast Guard Sectors and Strike Teams. The request is the initial investment in the Coast Guard’s initiative to improve mission performance in accordance with the MER Mission Performance Plan (2009). This initiative will begin to address gaps in the Coast Guard’s ability to meet requirements of the National Contingency Plan, the National Response Framework, and the Coast Guard MER Mission Performance Plan by providing personnel with the necessary skills to perform MER functions and enhance environmental response competencies.

Justification

Recent experience with several complex oil spills including the M/V Cosco Busan, the T/V Eagle Otome, and Mobile Offshore Drilling Unit (MODU) Deepwater Horizon underscore the importance of having well-trained and readily deployable incident managers and pollution responders throughout the Coast Guard. This request addresses critical MER resource and capability gaps by improving port-level and regional preparedness and providing increased capacity for response to discharges of oil, releases of hazardous materials, major marine casualties, and environmental disasters in the nation's ports and approaches. The funding also provides for incident responders with advanced level incident management training, and cost and legal documentation expertise to support steady-state and prolonged response operations. Through investment in the National Center of Expertise, as authorized by the CGAA of 2010, this enhancement will begin to institutionalize a dedicated and reliable team of experts to work with maritime communities to minimize oil and hazardous materials incident impacts to human health, the environment, and the Marine Transportation System. Ultimately, investment will ensure effective industry oversight for enforcement of pollution prevention regulations and environmental response.

Impact on Performance

The Coast Guard will enhance the MER program by matching capacity to demand at the three National Strike Teams, institutionalizing expertise in the National Incident Management System, and investing in additional competency and capacity necessary to carry out existing authorities embodied in the National Contingency Plan, the Oil Pollution Act of 1990 and the Clean Water Act. The investment will ensure a robust cycle of preparedness for, response to, and recovery from catastrophic releases of hazardous materials, discharges of oil that may result from major marine casualties or environmental disasters. It will also provide a rapid, professional, and deployable response capacity with the right training using the proper equipment to sustain the Coast Guard's leadership role in oil spill response. Continued investment in MER capacity will yield organizational expertise to facilitate Federal integration with State, local, and tribal entities as well as natural resource trustees in daily operations and disaster response. Investment in the National Center of Expertise for Response will contribute to a resilient supply chain that can rapidly recover and minimize impact to the Nation's economic security.

C. Child Care Initiative\$9,300

PPA Breakdown - Child Care Initiative		Total (\$000)
PPA II: Civilian Personnel (12 FTP, 6 FTE)		
	Civilian Pay and Allowances	633
PPA III: Training and Recruiting		
	Training and Education	4
	Recruiting and Training Centers	4
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	3
	Pacific Area	7
	1st District	2
	7th District	3
	Headquarters Directorates	8,284
PPA V: Centrally Managed Accounts		
	Central Accounts	120
PPA VI: Depot Level Maintenance		
	Civil/Ocean Engineering and Shore Facility Maintenance	240
		9,300

Description of Item

This request provides funding to increase access to child care services for Coast Guard families with dependents under the age of 12, better aligning the Coast Guard with DoD child care standards. Increasing the Coast Guard’s GSA child care subsidy program provides more Service members the opportunity to seek quality, affordable child care throughout the country. Additionally, this request funds 12 new civilian positions to align with DoD child care program management standards and national accreditation requirements. These positions will enhance training curriculum at Coast Guard Child Care Development Centers (CDC) and provide regional dependent care specialists to better manage, train, and expand the Coast Guard Family Child Care Home Program (FCC), which certifies military family members as in-home child care providers at several Coast Guard units.

Justification

The well-being of military families is an important indicator of the well-being of the overall Service. There are approximately 28,000 Coast Guard dependents under the age of 12 and currently 5.3 percent of those eligible dependents are enrolled in Coast Guard sponsored or subsidized child care services. By comparison, over 14 percent of DoD children under 12 are enrolled in some form of DoD sponsored or subsidized child care program. This disparity is due in part by the limited resources available for child care subsidies. This request provides resources to increase subsidy funding based on family income levels, which is more in line with the DoD child care subsidy program.

DHS and the Coast Guard continue to support military families though the use of base resources, as well as leveraging partnerships with DoD and other governmental agencies to enhance the long-term effectiveness of the Service’s military personnel. Much like DoD’s Reserve and National Guard units, Coast Guard units are often geographically dispersed, making it challenging to centralize child care programs that provide quality child care for Coast Guard families. The Coast Guard currently takes full advantage of DoD child care facilities, where available; however, expanding Coast Guard child care

programs such as the Coast Guard’s GSA Childcare Subsidy Program and FCC homes will provide more viable options to families seeking child care services in areas where larger DoD installations are not in close proximity.

Impact on Performance

Funding this request would close the child care parity gap with DoD by increasing subsidies up to \$4,500 per child while simultaneously raising the family income cap above the current level of \$75,000 per household. This increases the number of eligible children covered by the current Coast Guard subsidy program and distributes subsidy funding more in line with the DoD reimbursement schedule. Also, this request funds 12 new civilian positions that are required to sustain CDC accreditation in light of increased staffing, training, and certification requirements imposed by the National Association for the Education of Young Children (NAEYC), and ensures alignment with DoD staffing standards. Funding will also provide regional dependent care specialists to better manage and provide training for the Coast Guard FCC program participants. Funding will also provide for minor technology upgrades to all nine of the Coast Guard’s CDCs.

D. Polar Icebreaking Program.....\$39,000

PPA Breakdown - Polar Icebreaking Program		Total (\$000)
PPA I: Military Personnel (247 FTP, 180 FTE)		
	Military Pay and Allowances	12,175
	Military Health Care	1,574
	Permanent Change of Station	1,066
PPA III: Training and Recruiting		
	Training and Education	284
PPA IV: Operating Funds and Unit Level Maintenance		
	Pacific Area	2,525
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	4,963
	Vessel Maintenance	16,413
		39,000

Description of Item

This request provides budget authority to enable Coast Guard to make all critical decisions with respect to operation and maintenance of its polar icebreakers, consistent with MOUs between Coast Guard and its customer agencies. The request provides full-year personnel, operations, and maintenance funding for CGC HEALY and advance funding to support the reactivation of CGC POLAR STAR, ensuring its return to operations in FY 2013. AC&I industrial work on the CGC POLAR STAR reactivation project, funded in FY 2009 and FY 2010, is planned for completion in December 2012. The Coast Guard plans to decommission CGC POLAR SEA in FY 2011 and transition her crew to CGC POLAR STAR, enabling orderly transition to CGC POLAR STAR and facilitating her return to operations in FY 2013.

Justification

Based on current Federal requirements, maintaining and operating one medium duty and one heavy duty icebreaker will allow the Coast Guard to meet operational requirements. CGC HEALY must be sustained to meet the federal survey and research needs in the Arctic, including joint projects with other

nations that support cooperative efforts to establish jurisdictional rights in this region. Although the existing heavy-duty polar icebreakers are more costly to operate, are physically and technologically aged and are not optimally configured, it is prudent to maintain CGC POLAR STAR which is currently undergoing extensive maintenance to extend its service life as an interim capability while long-term Arctic capability requirements are finalized. CGC POLAR STAR will be a capable backup for the annual resupply of McMurdo Base and for CGC HEALY in the Arctic should it become beset in the ice.

To help define the capability that is needed to meet long-term federal needs in the changing Arctic environment, Coast Guard will participate in the DHS-led interagency working group, funded in FY 2012 to develop final requirements for acquisition of the 21st Century icebreaking capability. In the meantime, CGC POLAR STAR will provide a platform capable of staging resources and supporting international response to unanticipated emergencies or disasters (natural or manmade).

Impact on Performance

CGC HEALY and CGC POLAR STAR will continue to support federal activities in the high latitude regions. Additionally, the replacement of CGC POLAR SEA with CGC POLAR STAR in FY 2013 will provide a more dependable resource for contingency operations in both the Arctic and Antarctic. The funding for CGC POLAR STAR in FY 2012 will help Coast Guard sustain a trained crew and make ready for operations as quickly as possible.

E. Coast Guard Network Security.....\$8,600

PPA Breakdown - Coast Guard Network Security		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	8,600
		8,600

Description of Item

The \$8.6 million requested provides funding for the Coast Guard to transition from its commercially provided Internet Access Points (IAPs) to DoD IAPs provided via DISA. Access to these IAPs, a more secure network pathway, is critical to interoperability and interagency coordination between DHS and DoD and ensuring the continued security of Coast Guard networks. Secure networks provide the platform to execute all of the Coast Guard’s statutory missions.

Justification

The Coast Guard has an increased need for security for critical operational systems, such as command and control systems, that communicate over military networks. DoD security standards require that these systems be protected by DoD trusted internet connections provided by DISA. Currently, the Coast Guard manages commercially provided IAPs that do not meet DoD standards. Each month, 12 million emails hit Coast Guard gateways with 25,000 infections or malicious payloads, 5.5 million spam emails are rejected, 175 information assurance (IA) incidents occur, 350 computers are re-built and 40,000 computers are scanned for vulnerabilities. This funding provides for the installation of three fiber optic circuits at each of the Coast Guard’s existing IAP locations in Alexandria, VA; Kearneysville, WV; and Alameda, CA. These circuits will route all internet traffic to and from the internal Coast Guard One network (uscg.mil address space) through DoD managed IAPs and DoD network sensors. Traffic from the internet destined to the uscg.gov address space would continue to be routed through DHS IAPs.

Impact on Performance

The implementation of proven cyber security sensors will ensure robust and secure interoperability with DoD and will also increase the protection of information on Coast Guard networks. As a military service within DHS, the Coast Guard serves as a bridge between DHS and DoD for network security and information sharing. Failure to complete conversion to the DoD IAPs increases risk to DHS networks during steady-state operations and at times of crisis when network performance and stability is paramount to public safety in the maritime domain.

F. Distress Alerting Satellite System (DASS)\$6,300

PPA Breakdown - Distress Alerting Satellite System (DASS)		Total (\$000)
PPA II: Civilian Personnel (1 FTP, 1 FTE)		
	Civilian Pay and Allowances	139
PPA III: Training and Recruiting		
	Training and Education	1
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	6,153
PPA V: Centrally Managed Accounts		
	Central Accounts	7
		6,300

Description of Item

This request provides funding to support replacement of the Search and Rescue Satellite Aided Tracking (SARSAT) system with DASS to ensure no loss of life saving coverage in a system that supports Coast Guard’s SAR statutory mission. Commencing recapitalization of the SARSAT system is essential in FY 2012 to mitigate system degradation in 2017. DASS utilizes Search and Rescue (SAR) payloads on GPS Block III satellites. The primary partners involved in this multi-agency effort to deploy and operate DASS include the National Aeronautics and Space Administration (NASA), the National Oceanic and Atmospheric Administration (NOAA), the U.S. Air Force (USAF), and the U.S. Coast Guard. In February 2010, NASA, NOAA, USAF, and the Coast Guard signed the U.S. SARSAT Program MOA providing a policy framework and party commitments to continue supporting the existing operational SARSAT and international COSPAS-SARSAT programs, and to develop a Medium-altitude Earth Orbiting SAR (MEOSAR) system called DASS. Recapitalization of the SARSAT system is an essential element to effectively carrying out the Coast Guard’s Maritime Response activities.

Justification

The current SARSAT system’s reliability and level of service will begin to degrade in 2017, with total system obsolescence by 2020. A fully functional DASS constellation will consist of 24 satellites equipped with Canadian supplied DASS payloads. There is a limited window of opportunity to initiate the DASS payload integration with the GPS satellites prior to deploying into space. Funding is required in FY 2012 to initiate the Coast Guard’s portion of the DASS payload integration with GPS satellites prior to launch. A delay in funding will result in an incomplete satellite constellation and coverage gaps. These coverage gaps will prevent first responders from receiving distress alerting data, potentially resulting in lives lost. Hundreds of thousands of distress beacons are used by U.S. citizens in aircraft (Emergency Locator Transmitters – ELTs), ships and boats (Emergency Position Indicating Radio

Beacons – EPIRBs) and on their persons (Personal Locator Beacons – PLBs) in the U.S., as well as worldwide. Over the past five years the legacy SARSAT system provided critical life saving data to first responders in order to save over 1,300 lives in the U.S. Internationally, since 1982, the International COSPAS-SARSAT system provided critical distress alerting data to SAR authorities worldwide, saving more than 26,000 lives.

Impact on Performance

The Coast Guard is the Nation’s leader in maritime SAR. DASS will increase distress position accuracy information by 80 percent over that provided by the legacy SARSAT system and will increase system redundancy while retaining this critical capability beyond SARSAT’s end of reliable service life in 2017. Additionally, DASS will reduce notification of a distress beacon alert to less than five minutes. Currently, the interval between satellite passes is approximately 90 minutes with location confirmation often requiring at least two passes. DASS will greatly reduce the time required to locate a beacon, which will ultimately result in more lives saved and fewer national resources expended prosecuting searches with incomplete data. Partnering with other agencies/nations will decrease cost of development, implementation, and operations over the life of the system.

G. Data Center Migration\$8,000

PPA Breakdown - FY 2012 Data Center Migration		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	8,000
		8,000

Description of Item

FY 2012 data center development funding, to be managed through the DHS Working Capital Fund (WCF), will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers for central DHS management in FY 2012. This includes:

- Discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS Data Centers in FY 2012.
- Purchase of new equipment for placement in the DHS Data Centers as part of migration/transition efforts.
- Installation of equipment racks at the DHS Data Centers.
- Migration-related build-out of DHS Data Center infrastructure.
- Transition of disaster recovery/backup/COOP (Continuity of Operations) capability to DHS Data Centers.
- Installation of infrastructure support as part of system migrations at the DHS Data Centers.

Justification

The Data Center consolidation efforts will standardize IT resource acquisitions across DHS Components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U. S. Coast Guard
Justification of Proposed Changes in Operating Expenses
Appropriation Language**

For necessary expenses for the operation and maintenance of the Coast Guard, not otherwise provided for; purchase or lease of not to exceed 25 passenger motor vehicles, which shall be for replacement only; purchase or lease of small boats for contingent and emergent requirements (at a unit cost of no more than \$700,000) and repairs and service-life replacements, not to exceed a total of \$28,000,000; purchase or lease of boats necessary for overseas deployments and activities; minor shore construction projects not exceeding \$1,000,000 in total cost at any location; payments pursuant to section 156 of Public Law 97–377 (42 U.S.C. 402 note; 96 Stat. 1920); and recreation and welfare; \$6,819,505,000, of which \$340,000,000 shall be for defense-related activities; of which \$24,500,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); of which not to exceed \$20,000 shall be for official reception and representation expenses: Provided, That none of the funds made available by this Act shall be for expenses incurred for recreational vessels under section 12114 of title 46, United States Code, except to the extent fees are collected from yacht owners and credited to this appropriation.

Note.—A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111-242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

2011 to 2012 Total Change	727	626	255,617

1) FY 2011 C.R. funding level equals the FY 2010 Enacted.

2) A total of \$92.0M for the Administrative Savings Initiative (ASI) is taken across Coast Guard in two accounts: OE and AC&I. It comprises reductions to the following types of activities: advisory and assistance services; travel of people and things; printing and reproduction; and supplies and materials. From OE, this amount is comprised of \$83.5M listed above under ASI and \$5.7M included in the Program Support Reduction listed above. From AC&I, \$2.8M in Systems Engineering and Integration.

1) FY 2010 actual obligations include funding for Overseas Contingency Operations (OCO) appropriated in P.L. 111-83 and funding transferred from the National Science Foundation (NSF) for Icebreaking Services appropriated in P.L. 111-117.

2) March 4, 2011 Continuing Resolution (annualized) obligations include funding for Overseas Contingency Operations (OCO), funding transferred from the National Science Foundation (NSF) for Icebreaking Services and funding for Haiti emergency relief efforts provided in supplemental P.L. 111-212.

PPA Mission Statement

This PPA requests funding for expenses related to compensation for active duty military personnel. This category also includes pay, allowances, employer's share of FICA, Social Security credits and other expenses associated with compensating military personnel. Requested funding will compensate our military personnel as they serve as the Nation's First Responder across all of the Coast Guard's eleven statutory missions in support of the Coast Guard's six FYHSP Programs.

Summary Justification and Explanation of Changes

Salaries and Benefits

2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
\$ 2,748,685	\$ 2,847,100	\$ 2,857,681	\$ 10,581

Salaries and benefits funds provide for compensation directly related to duties performed for the Coast Guard by active duty military personnel. The FY 2012 request reflects funding for the proposed pay raise (currently predicted at 1.6 percent for military only), medical benefits, and other mandatory personnel entitlements. Personnel increases include personnel to enhance Marine Safety and Marine Environmental Response and personnel to operate new systems and assets, including the National Security Cutter, Fast Response Cutter, HC-144A, Response Boat-Medium (RB-M), and the Interagency Operation Centers. Additionally, the request includes funding for personnel for two polar icebreakers. Personnel reductions are accounted for through the annualization of FTE reduced in FY 2011, as well as the decommissioning of the three PC-179 patrol coastal cutters and one High Endurance Cutter.

Travel

2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
\$ 122,318	\$ 96,700	\$ 102,437	\$ 5,737

Requested funds cover the travel costs of Coast Guard military service members, while in an authorized travel status, either directly or by reimbursing the traveler. Funding also supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2012 request reflects funding for PCS travel costs, such as PCS travel costs associated with the commissioning of new assets and the decommissioning of three PC-179 patrol coastal cutters and one High Endurance Cutter.

Transportation of things

2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
\$ 60,339	\$ 62,430	\$ 67,107	\$ 4,677

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2012 request includes funding for PCS travel costs, such as PCS costs for the crews associated with new assets, personnel for the enhancement of Marine Safety and Marine Environmental Response and personnel assigned to the NSC Crew Rotational Concept (CRC).

Other services

	2010 Actual		2011 C.R.		2012 Request		2011 to 2012 Change
\$	37,120	\$	8,302	\$	2,268	\$	(6,034)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The request reflects professional services reductions.

Medical care

	2010 Actual		2011 C.R.		2012 Request		2011 to 2012 Change
\$	352,384	\$	359,734	\$	416,905	\$	57,171

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, funding supports medical care costs for military service members. The request includes actuary-forecasted cost increases associated with the existing workforce and new billets added through FY 2012 adjustment to base.

Operation and maintenance of equipment

	2010 Actual		2011 C.R.		2012 Request		2011 to 2012 Change
\$	5,498	\$	1,087	\$	136	\$	(951)

The request reflects annualization of management and technology efficiencies.

Subsistence and support of persons

	2010 Actual		2011 C.R.		2012 Request		2011 to 2012 Change
\$	4,417	\$	874	\$	109	\$	(765)

The request reflects the estimated annualization associated with the decommissioning of assets and the annualization of prior year management and technology efficiencies.

Supplies and materials

	2010 Actual		2011 C.R.		2012 Request		2011 to 2012 Change
\$	42,563	\$	8,418	\$	1,050	\$	(7,368)

The request reflects the estimated annualization associated with the decommissioning of assets and the annualization of prior year management and technology efficiencies.

Insurance claims and indemnity

	2010 Actual		2011 C.R.		2012 Request		2011 to 2012 Change
\$	2,411	\$	477	\$	60	\$	(417)

The request is associated with an anticipated reduction in claims.

PPA Mission Statement

This PPA requests funding for expenses related to compensation and entitlements for Federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial positions, and "Non-Ceiling" (NC) employees (e.g., cooperative education students, student aids, summer interns and Federal junior fellows) and civilian employees not otherwise covered by other PPAs.

Summary Justification and Explanation of Changes

Salaries and Benefits

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 685,855	\$ 693,278	\$ 773,188	\$ 79,910

Salaries and benefits funds provide for compensation directly related to duties performed for the Coast Guard by Federal civilian employees. The FY 2012 request includes funding for civilian personnel increases associated with the FY 2011 base technical adjustment, enhancement of Marine Safety and Marine Environmental Response, interdepartmental transfer, and personnel to operate new systems and assets including the NSC, FRC, and the HC-144A. This request also includes medical benefits, and other mandatory personnel entitlements.

Travel

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 7,672	\$ 3,957	\$ 3,957	-

Requested funds cover the travel costs of Coast Guard civilian employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2012 request has no change.

Transportation of things

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 1,911	\$ 3,411	\$ 3,411	-

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of civilian personnel's household goods in conjunction with the acceptance of a new position. The FY 2012 request has no change.

1) FY 2010 actual obligations include funding for Overseas Contingency Operations (OCO) appropriated in P.L. 111-83 and funding transferred from the National Science Foundation (NSF) for Icebreaking Services appropriated in P.L. 111-117.

2) March 4, 2011 Continuing Resolution (annualized) obligations include funding for Overseas Contingency Operations (OCO) and funding transferred from the National Science Foundation (NSF) for Icebreaking Services.

PPA Mission Statement

Requests funding for the Coast Guard's professional training and education programs, and operation and maintenance of the six Coast Guard Training Centers and the Coast Guard Academy. Provides funding for tuition, travel and per diem for formal training and education performed as Temporary Assigned Duty (TAD) for military and civilian personnel. "Formal training and education" is defined as structured, curriculum-based instruction and applied exercises for the attainment and retention of skills and knowledge required to accomplish specific job tasks. Requested funding will ensure a level of capabilities and competencies commensurate with the response posture the Coast Guard has displayed in recent years, such as operational responses to the 9/11 terrorist attack, Overseas Contingency Operations, Hurricane Katrina, the earthquake in Haiti, the Deepwater Horizon oil spill, and other events requiring a rapid response capability.

Summary Justification and Explanation of Changes

Travel

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 45,367	\$ 41,527	\$ 45,591	\$ 4,064

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The travel request for FY 2012 includes funding derived from additional operational training requirements resulting from additional personnel for HC-144A operations, the Manned Covert Surveillance Aircraft, the enhancement of Marine Safety and Marine Environmental Response, and the FRC follow-on support.

Other rent

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 3,028	\$ 2,772	\$ 2,761	(11)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2012 request has no significant change.

Communication, utilities, and misc charges

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 13,742	\$ 13,213	\$ 12,598	(615)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2012 request primarily reflects program support reductions.

Printing and reproduction

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 318	\$ 654	\$ 496	(158)

Includes printing and reproduction costs. The FY 2012 request reflects the Administrative Savings Initiative.

Advisory and assistance services

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 18,037	\$	18,178	\$	13,417	\$	(4,761)

Advisory and assistance services include services acquired by contract from non-Federal sources (e.g., private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2012 request reflects the net result of decreases in contractor support due to the annualization of prior year management and technology efficiencies and a Service-wide reduction in administrative and advisory assistance services/support.

Other services

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 62,249	\$	56,027	\$	55,109	\$	(918)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2012 request has not changed. The decrease is an artifact of the display which includes OCO obligations for FY 2011, but not FY 2012.

Purchases of goods & svcs. from gov't accounts

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ -	\$	5,594	\$	5,162	\$	(432)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2012 request reflects annualization of prior year management and technology efficiencies.

Operation & maintenance of facilities

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 6,077	\$	5,666	\$	9,966	\$	4,300

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2012 request primarily reflects annualization of the HC-144A flight simulator operation/maintenance follow-on and training school requirements associated the enhancement of Marine Safety and Marine Environmental Response.

Operation and maintenance of equipment

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 773	\$	5,621	\$	8,823	\$	3,202

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2012 request reflects technical transfers and the annualization of prior year funding.

Subsistence and support of persons

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 2,510	\$	2,653	\$	2,653	\$	-

The FY 2012 request has no change.

Supplies and materials

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 59,264	\$	57,801	\$	52,954	\$	(4,847)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational, training and shore support units. The FY 2012 request primarily reflects the estimated annualization of prior year management and technology efficiencies. The decrease is partly an artifact of the display which includes OCO obligations for FY 2011, but not FY 2012.

Equipment

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 3,114	\$	2,950	\$	3,374	\$	424

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for the cadets at the Coast Guard Academy. The FY 2012 request is the annualization of the HC-144A flight simulator operation and maintenance follow-on.

Insurance claims and indemnity

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 247	\$	378	\$	378	\$	-

The FY 2012 request has no change.

1) FY 2010 actual obligations include funding for Overseas Contingency Operations (OCO) appropriated in P.L. 111-83 and funding transferred from the National Science Foundation (NSF) for Icebreaking Services appropriated in P.L. 111-117.

2) March 4, 2011 Continuing Resolution (annualized) obligations include funding for Overseas Contingency Operations (OCO) and funding transferred from the National Science Foundation (NSF) for Icebreaking Services.

PPA Mission Statement

Requests funding to units, facilities and activities that are under the direct operational and administrative control of the Coast Guard's Atlantic Area and Pacific Area Commanders, operational units as well as headquarters units. These include High Endurance Cutters (WHECs), Medium Endurance Cutters (WMECs), Communications Stations, Sector Commands, Stations, Marine Safety and Security Teams (MSSTs), various support units, and Area offices as applicable. Request includes funding to sustain normal operating costs that include energy, parts, and supplies for routine maintenance of operational assets and shore facilities and administrative supplies.

Summary Justification and Explanation of Changes

Travel

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 144,101	\$ 141,115	\$ 115,066	\$ (26,049)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2012 request reflects a Service-wide non-operational travel reduction and the Administrative Savings Initiative. The decrease is partly an artifact of the display which includes OCO obligations for FY 2011, but not FY 2012.

Transportation of things

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ -	\$ 2,706	\$ 2,965	\$ 259

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2012 request primarily reflects the net change in transportation costs associated with FRC follow-on and the decommissioning of one High Endurance Cutter.

Other rent

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 26,275	\$ 23,299	\$ 26,771	\$ 3,472

Other rent includes all payments to a non-Federal source for rental space, land and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The FY 2012 request reflects enhancements to the Marine Safety and Marine Environmental Response Programs.

Communication, utilities, and misc charges

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 86,331	\$ 31,107	\$ 17,668	\$ (13,439)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. The FY 2012 request primarily reflects annualization of prior year management and technology efficiencies.

Printing and reproduction

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 2,252	\$ 4,149	\$ 340	\$ (3,809)

The FY 2012 request primarily reflects Service-wide reduction in overhead and program support and the Administrative Savings Initiative.

Advisory and assistance services

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 90,625	\$ 118,210	\$ 55,281	\$ (62,929)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2012 request reflects the estimated net change from professional services reductions, the Administrative Savings Initiative and reduction in program support. The decrease is partly an artifact of the display which includes OCO obligations for FY 2011, but not FY 2012.

Other services

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 389,868	\$ 374,894	\$ 362,774	\$ (12,120)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2012 request reflects termination of one time FY 2011 costs. The decrease is partly an artifact of the display which includes OCO obligations for FY 2011, but not FY 2012.

Purchases of goods & svcs. from gov't accounts

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ -	\$ 317	\$ 5,609	\$ 5,292

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2012 request reflects inter-government services funding for an increase in security clearance requirements.

Operation & maintenance of facilities

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 31,467	\$	37,087	\$	33,752	\$	(3,335)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2012 request reflects annualization associated with the prior year decommissioning of assets and technical transfers. The decrease is partly an artifact of the display which includes OCO obligations for FY 2011, but not FY 2012.

Medical care

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 3,814	\$	4,253	\$	4,253	\$	-

The FY 2012 request has no change.

Operation and maintenance of equipment

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 6,256	\$	28,850	\$	56,241	\$	27,391

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2012 request reflects follow-on costs for R21, the DASS, the annualization of funding for prior year initiatives and funds associated with the interdepartmental transfer.

Subsistence and support of persons

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 42,916	\$	43,016	\$	40,287	\$	(2,729)

The FY 2012 request has not changed. The decrease is an artifact of the display which includes OCO obligations for FY 2011, but not FY 2012.

Supplies and materials

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 401,629	\$	410,099	\$	371,342	\$	(38,757)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2012 request reflects the Administrative Savings Initiative and technical transfers. The decrease is partly an artifact of the display which includes OCO obligations for FY 2011, but not FY 2012.

Equipment

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 24,023	\$	24,832	\$	15,433	\$	(9,399)

This object class covers the purchase of capitalized and non-capitalized assets. The FY 2012 request reflects program support reductions and technical transfers. The decrease is partly an artifact of the display which includes OCO obligations for FY 2011, but not FY 2012.

Insurance claims and indemnity

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 1,624	\$	1,541	\$	1,541	\$	-

The FY 2012 request has no change.

1) FY 2010 actual obligations include funding for Overseas Contingency Operations (OCO) appropriated in P.L. 111-83.

2) March 4, 2011 Continuing Resolution (annualized) obligations include funding for Overseas Contingency Operations (OCO) and FY 2010 unobligated funds.

PPA Mission Statement

This request provides funding for accounts centrally managed at Coast Guard Headquarters such as: Federal Telephone System (FTS) accounts, Standard Workstation recapitalization, ammunition replenishment, recapitalization of buoys, GSA Rent, postal expenses and Mass Transit benefits. Request ensures critical support elements are provided to the workforce, allowing them to execute their roles in supporting Coast Guard operations. Lease of adequate office space, effective communications (computers, phones, etc) and operational gear (ammunition) are all part of those critical support requirements.

Summary Justification and Explanation of Changes

Travel

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 5,872	\$ 998	\$ (317)	\$ (1,315)

The FY 2012 request reflects the Administrative Savings Initiative.

GSA rent

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 86,462	\$ 89,619	\$ 91,019	\$ 1,400

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2012 request reflects changes in GSA rental costs and additional space requirements.

Other rent

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 2,090	\$ 1,609	\$ 1,609	-

Other rent includes all payments to a non-Federal source for rental space, land and structures. The FY 2012 request has no change.

Communication, utilities, and misc charges

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 60,402	\$ 138,803	\$ 140,834	\$ 2,031

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. The FY 2012 request reflects the Coast Guard Network Security initiative.

Printing and reproduction

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 1,275	\$	1,503	\$	1,325	\$	(178)

The FY 2012 request reflects the Administrative Savings Initiative.

Advisory and assistance services

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 6,193	\$	13,263	\$	(3,699)	\$	(16,962)

Advisory and assistance services include services acquired by contract from non-Federal sources (e.g., the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2012 request reflects the Administrative Savings Initiative, professional services reductions, and the obligation of FY 2010 unobligated funding in FY 2011 for the Operations System Center in Martinsburg, WV.

Other services

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 102,508	\$	58,864	\$	77,235	\$	18,371

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2012 request reflects government services increases for communications, postal services, and the Data Center Migration initiative.

Purchases of goods & svcs. from gov't accounts

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ -	\$	4,011	\$	4,513	\$	502

Purchases from Government Accounts include costs for purchases from other Federal government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g., MIPR). The FY 2012 request reflects government services increases for communications.

Operation & maintenance of facilities

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 666	\$	501	\$	2,547	\$	2,046

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2012 reflects annualization of prior year funding.

Operation and maintenance of equipment

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 18,121	\$	5,880	\$	3,133	\$	(2,747)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2012 request reflects Standard Work Station helpdesk consolidation.

Supplies and materials

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 20,973	\$	21,660	\$	7,000	\$	(14,660)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2012 request reflects the Administrative Savings Initiative. The decrease is partly an artifact of the display which includes OCO obligations for FY 2011, but not FY 2012.

Equipment

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 31,007	\$	25,622	\$	26,279	\$	657

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for cadets at the Coast Guard Academy and survival suits for rescue swimmers deployed to the frigid waters of Alaska. The FY 2012 request primarily is associated with enhancement of Marine Safety and Marine Environmental Response.

1) FY 2010 actual obligations include funding for Overseas Contingency Operations (OCO) appropriated in P.L. 111-83 and funding transferred from the National Science Foundation (NSF) for Icebreaking Services appropriated in P.L. 111-117.

2) March 4, 2011 Continuing Resolution (annualized) obligations include funding for Overseas Contingency Operations (OCO), funding transferred from the National Science Foundation (NSF) for Icebreaking Services and funding for Haiti emergency relief efforts provided in supplemental P.L. 111-212.

PPA Mission Statement

Request provides service-wide funding to support the major maintenance and repair of Coast Guard aircraft not appropriated in the Coast Guard Acquisition, Construction & Improvements (AC&I) appropriation. This includes materials, services and supplies necessary for depot-level repair of buildings, structures, ground, towers, runways, aids to navigation, aircraft, and aircraft equipment.

Summary Justification and Explanation of Changes

Travel

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 24,305	\$ 20,084	\$ 17,422	\$ (2,662)

The FY 2012 request reflects the Administrative Savings Initiative.

Transportation of things

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ -	\$ 2,630	\$ 2,630	\$ -

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2012 request has no change.

Other rent

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 380	\$ 1,229	\$ 1,322	\$ 93

Other rent includes all payments to a non-Federal source for rental space, land and structures. The FY 2012 request reflects follow-on costs for FRC support.

Communication, utilities, and misc charges

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 2,468	\$ 22,669	\$ 23,059	\$ 390

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters and aircraft, utility costs, postal costs and cutter, boat and aircraft fuel requirements. The FY 2012 request supports new costs for CGC POLAR STAR icebreaker reactivation.

Printing and reproduction

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 500	\$ 496	\$ 201	\$ (295)

The FY 2012 request reflects the Administrative Savings Initiative.

Advisory and assistance services

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 116,978	\$	126,100	\$	96,593	\$	(29,507)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. FY 2012 request primarily reflects professional services reductions and the Administrative Savings Initiative. The decrease is partly an artifact of the display which includes OCO obligations for FY 2011, but not FY 2012.

Other services

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 359,719	\$	271,748	\$	274,462	\$	2,714

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2012 request reflects increases for surface and air asset follow-on.

Purchases of goods & svcs. from gov't accounts

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ -	\$	-	\$	1,039	\$	1,039

Purchases from Government Accounts include costs for purchases from other Federal government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g., MIPR). The FY 2012 request reflects increases for FRC follow-on costs.

Operation & maintenance of facilities

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 157,271	\$	136,494	\$	139,391	\$	2,897

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2012 request primary reflects increases for shore, NAIS, and surface and air asset follow-on funding and the Marine Safety and Marine Environmental Response enhancement.

Operation and maintenance of equipment

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 87,993	\$	205,861	\$	142,387	\$	(63,474)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats and aircraft) and supporting systems. The FY 2012 request primarily reflects decommissioning of three PC-179 Patrol Coastal Cutters and one High Endurance Cutter, prior year management and technology efficiencies and the obligation of Haiti disaster response emergency supplemental funding in FY 2011. The decrease is partly an artifact of the display which includes OCO obligations for FY 2011, but not FY 2012.

Supplies and materials

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 211,981	\$	169,355	\$	150,902	\$	(18,453)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats and aircraft, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2012 request primarily reflects the Administrative Savings Initiative and termination of one-time funding. The decrease is partly an artifact of the display which includes OCO obligations for FY 2011, but not FY 2012.

Equipment

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 34,495	\$	44,569	\$	48,690	\$	4,121

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for the cadets at the Coast Guard Academy and survival suits for the rescue swimmers deployed to the frigid waters of Alaska. The FY 2012 request reflects the support for Signal Intelligence capability on the NSC and the POLAR STAR icebreaker reactivation.

Land and structures

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 3,725	\$	12,032	\$	19,015	\$	6,983

The FY 2012 request reflects funding associated with Critical Depot Level Maintenance annualization of prior year funding, and surface and air asset follow-on.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement. Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance. Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2013 budget.

U. S. Coast Guard requests (\$484,000) and 4 FTE for the FY 2012 DHS Balanced Workforce Strategy.

¹The 15 Pos/FTE associated with the FY 2011 Follow-On is 15 additional contractor positions converted in FY 2011 and annotated in the MWRI Technical Adjustment.

FY 2012 DHS Balanced Workforce Strategy

In FY 2012, the Coast Guard proposes converting a professional services contract costing approximately \$1 million to governmental service using four full-time civilian positions costing approximately \$516 thousand. This conversion will achieve a total saving of approximately \$484 thousand in operating expenses. Implementation of this contract conversion will have a minimal overlap period (1-2 weeks), and all contractor functions will be transferred to the new federal employees.

Annualization and Follow-On of FY 2011 DHS Balanced Workforce Strategy

The Coast Guard's FY 2011 Multi-Sector Workforce Rebalancing Initiative (MWRI), formally known as the DHS Balance Workforce Strategy in the FY 2011 President's Request, originally estimated 300 full-time positions (185 civilian and 115 military) for conversion to government performance. This initiative yielded \$14.5 million in savings in the FY 2011 President's Request. Extensive analysis was completed identifying contracts ideally suited for conversion to government performance based on a potential to achieve greater workforce balance and cost efficiencies. The resulting review recommended adjusting the original insourcing estimates by increasing the number of civilian conversions from 185 to 286 and decreasing the military conversions from 115 to 29 for a total of 315 positions. This review ensured the Coast Guard has the proper mix of federal and contractor workforce, and achieved the targeted savings outlined in the FY 2011 President's Request. The FY 2012 MWRI technical adjustment accounts for the military to civilian conversions, the additional 15 positions insourced, and technical base adjustments to reallocate funding for professional service contracts to the appropriate PPA.

U. S. Coast Guard
Environmental Compliance and Restoration

I. Appropriation Overview

A. Mission Statement for Environmental Compliance and Restoration:

The Environmental Compliance and Restoration (EC&R) appropriation provides funding for environmental cleanup, sustainment and restoration of current and formerly contaminated Coast Guard facilities, and engineering remedies on Coast Guard assets for the purpose of complying with environmental laws and preventing contamination and environmental damage. The EC&R funding request supports all of the Coast Guard's 11 statutorily mandated missions.

EC&R funding ensures the Coast Guard maintains its responsibilities in environmental stewardship. Failure to meet restoration or compliance responsibilities could subject the U.S. Government to fines, penalties, or shutdown of operational assets by environmental regulators.

B. Budget Activities:

EC&R activities include site investigation and remediation activities at shore facilities slated for property divestiture or transfer.

C. Budget Request Summary:

The Coast Guard requests 25 positions, 24 FTE, and \$16.7 million in FY 2012 to provide for environmental remediation and restoration of Coast Guard facilities, including Base Support Unit Kodiak, USCGC ACUSHNET, and Aviation Logistics Center Elizabeth City, NC and for the remediation of several Long Range Aids to Navigation (LORAN) stations decommissioned in FY 2010 and High Endurance cutters to be decommissioned in FY 2011, the annualization of the FY 2011 military pay raise, FY 2012 military pay raise, and FY 2012 non-pay inflation. This request also includes a total decrease of \$142,000 for a program support reduction.

2012 Program Change	3,500
2012 Request	25	24	16,699

The Coast Guard requests \$16.7 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Coast Guard Authorization Act of 1989 (P.L. 101-225) created the Coast Guard EC&R Program and Appropriation. The purpose of the EC&R Appropriation is to carry out a program of environmental compliance and restoration at all current and former Coast Guard facilities. It involves the identification, investigation, and cleanup of contamination from hazardous substances and pollutants; and engineering fixes (i.e., physical changes) to Coast Guard buildings, structures and assets in order to comply with environmental laws and keep environmental liabilities from developing.

Significant accomplishments in FY 2010 included:

- Continued environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, as well as engineering fixes on Coast Guard assets to comply with environmental laws and regulations. Initiated LORAN remediation process.

FY 2011 planned accomplishments (based on an annualized CR funding estimate) include:

- Perform comprehensive environmental investigations and clean-up actions at sites with existing written agreements, at former and current LORAN sites and at sites with leaking underground fuel storage tanks (USTs).
- Continue support for disposal of Coast Guard vessels, including USCGC ACUSHNET, the 123-ft ISLAND Class cutters, and High Endurance Cutters.

- Continue to partner through the Great Lakes Restoration Initiative with the U.S. Environmental Protection Agency and the U.S. National Park Service (NPS) to remove hazardous materials from Great Lakes light houses, including contaminated soils, lead based paints, asbestos, PCBs and petroleum products. Funding being provided for the first phase of Cleveland West Pierhead Light lead and asbestos abatement project and asbestos removal project for Green Bay Light, WI.

FY 2012 planned accomplishments include:

- Continue environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, as well as engineering fixes on Coast Guard assets.
- Environmental investigations and remediation of current and former Lighthouses and several LORAN-C stations decommissioned in FY 2010. Continue clean-up of leaking USTs and fuel systems including Air Stations Miami and Clearwater. Continuation of ongoing remediation projects at Air Station Kodiak, AK; Support Center Elizabeth City, NC; the Coast Guard Yard, MD; and Coast Guard training centers Petaluma, CA and Yorktown, VA.
- Continue support for disposal of Coast Guard vessels, including High Endurance Cutters.

Program Increase/decrease	-	-	-	-	-	-	-	-	3,500
Total Request	25	22	16,759	25	24	13,198	25	24	16,699

Description of Item

The \$3.5 million requested increase provides funding for the Coast Guard to begin environmental remediation and restoration work necessary to permanently decommission, dispose or transfer legacy cutters and LORAN transmitter sites dispersed throughout the United States. Remediation of cutters includes removing hazardous substances, including petroleum products, lead based paint, Polychlorinated biphenyls (PCBs), and asbestos. Funding requested for disposal of vessels decommissioned in FY 2011 assumes minimal required EC&R work associated with disposal via foreign military sales or scrapping in accordance with proposed FY 2012 General Provisions. Remediation or restoration of LORAN sites includes removing hazardous or toxic substances (e.g., unconsumed petroleum products, lead based paint, asbestos), removing hazardous equipment, and performing site remediation. Detailed environmental surveys, funded from the EC&R appropriation are required to develop cost estimates for this work. In addition to funding provided/requested via the EC&R appropriation, the Coast Guard plans to leverage proceeds from the sale of LORAN-C properties, consistent with proposed FY 2012 General Provisions to complete required LORAN-C remediation.

Justification

Environmental restoration or remediation is necessary to protect human health and the environment. The Coast Guard is statutorily responsible to remediate or restore legacy cutters and LORAN sites in support of disposition following decommissioning. All LORAN sites are uninhabited, and many are in remote locations, making them highly susceptible to trespassing and vandalism, increasing the risk to humans and the environment through exposure to hazardous substances and materials until conveyed through transfer or sale. Despite being inactive, the Coast Guard is still responsible for minimally maintaining these assets and sites in a caretaker status. It is critical to complete timely environmental remediation so the Coast Guard

can remove assets and sites from its inventory, thereby eliminating the latent environmental liability and caretaker costs.

Performance Impact

Funding in FY 2012 is critical to initiate environmental restoration necessary to dispose of these cutters and LORAN sites. Until restoration work is completed, the Coast Guard will retain the environmental and resource liability represented by maintaining these assets in its inventory.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U. S. Coast Guard
Justification of Proposed Changes in Environmental Compliance and Restoration
Appropriation Language**

For necessary expenses to carry out the environmental compliance and restoration functions of the Coast Guard under chapter 19 of title 14, United States Code, \$16,699,000, to remain available until expended.

Note.—A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111–242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

PPA Mission Statement

Environmental Compliance and Restoration (EC&R) will provide for (1) environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, and (2) engineering fixes on Coast Guard assets to comply with environmental laws and keep environmental damage from developing. Failure to meet restoration or compliance responsibilities could subject the Coast Guard to fines, penalties, or shutdown of operational assets by environmental regulators. In addition, Coast Guard EC&R funding supports site investigation and remediation activities at shore facilities slated for property divestiture or transfer actions.

Summary Justification and Explanation of Changes

Salaries and Benefits

FY 2010	FY 2011	FY 2012	2011 - 2012
Actual	C.R.	Request	Change
\$ 2,862	\$ 3,039	\$ 3,040	\$ 1

The FY 2012 request includes the proposed pay raise (1.6 percent for military and 0 percent for civilians), medical benefits, other mandatory personnel entitlements.

Travel

FY 2010	FY 2011	FY 2012	2011 - 2012
Actual	C.R.	Request	Change
\$ 68	\$ 66	\$ 67	\$ 1

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2012 request reflects anticipated project travel needs.

Advisory and assistance services

FY 2010	FY 2011	FY 2012	2011 - 2012
Actual	C.R.	Request	Change
\$ 350	\$ 339	\$ 343	\$ 4

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2012 request reflects the anticipated need for environmental remediation expenses.

Other services

FY 2010	FY 2011	FY 2012	2011 - 2012
Actual	C.R.	Request	Change
\$ 13,359	\$ 12,937	\$ 13,131	\$ 194

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 request reflects the anticipated need associated with remediation and restoration of LORAN stations and asset decommissionings in FY 2011.

Operation & maintenance of facilities

2010	2011	2012	2011 - 2012
Actual	C.R.	Request	Change
\$ 102	\$ 99	\$ 100	\$ 1

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental service (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2012 request reflects the anticipated need for maintenance of facilities.

Supplies and Materials

FY 2010		FY 2011		FY 2012		2011 - 2012	
Actual		C.R.		Request		Change	
\$	18	\$	17	\$	18	\$	1

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. The FY 2012 request reflects the anticipated need for supplies and material cost.

U. S. Coast Guard **Reserve Training**

I. Appropriation Overview

A. Mission Statement for Reserve Training:

As the principal Federal agency charged with maritime safety, security and environmental stewardship, the Coast Guard protects vital economic and security interests of the United States from internal and external maritime risks and threats. Our reserve forces provide critical support to all of the Coast Guard's 11 statutorily mandated missions. Moreover, the Coast Guard Reserve may be called upon to provide units and personnel to augment active Coast Guard forces during times of crisis, domestically or worldwide.

B. Budget Activities:

The Reserve Training appropriation directly supports training, operation and administration of the Coast Guard Reserve Program. Coast Guard Reserve Forces provide qualified and trained personnel for active duty in the event of conflict, national emergency, or natural and man-made disasters. The reservists maintain their readiness through mobilization exercises and duty alongside regular Coast Guard members during routine and emergency operations. Reservists will continue to serve as a cost-effective surge force to enhance the Nation's resilience to disasters.

C. Budget Request Summary:

The Coast Guard requests 536 positions, 536 FTE, and \$136.8 million in FY 2012. This request provides necessary resources for the training, operation, and administration of the Coast Guard Reserve Program, including training, equipping, and ensuring the readiness of the Coast Guard's 8,100 member Reserve workforce. The total adjustments-to-base is \$3.1 million for the military pay raises in FYs 2011 and 2012, and non-pay inflation. This request also includes a total decrease of \$407,000 for program support reductions.

PPA I: PAY, BENEFITS AND ALLOWANCES

	Perm		
	Pos	FTE	Amount
2010 Actual	530	481	93,440
2011 C.R.	536	536	104,548
2012 Adjustments-to-Base	3,146
Current Services	536	536	107,694
Program Change
2012 Request	536	536	107,694

The Coast Guard requests \$107.7 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

This request for Pay, Benefits and Allowances funds salaries, benefits, and other compensation for both military and civilian Full Time Support (FTS) staffs supporting members of the Coast Guard's Selected Reserve, as well as for reservists who participate in training activities. The Coast Guard Reserve is the Coast Guard's surge-capacity military workforce and provides a cost-effective and versatile surge capacity to respond to major contingencies, such as natural and man-made disasters, maritime homeland security, national security, and other events.

The Coast Guard Reserve is a cornerstone of service readiness and pivotal to the success of daily mission execution and contingency response. The Coast Guard Reserve was an invaluable contributor to Operation Deepwater Horizon with approximately 31 percent of the Selected Reserve having been mobilized since the response began in April 2010. Selected Reservists also played an integral role in response to the devastating earthquake in Haiti. At the same time, the Coast Guard Reserve continues to support the Department of Defense's (DoD) Overseas Contingency Operations in Iraq. Our reservists provide an outstanding return on investment by augmenting the active duty with needed competencies and capacity through Inactive Duty Training and Active Duty Training periods.

This request for funding sustains 536 FTS FTE, which represent both military and civilian members who manage all recruiting, formal training, personnel, and resource/program oversight. No additional FTE are requested.

Significant accomplishments in FY 2010 included:

- Trained additional reservists for deployable expeditionary support and provided safety and security teams for deployment within the United States.
- Trained reservists for mobilization to support national security and disaster response, resulting in 2,700 highly qualified reservists deployed in support of Haiti earthquake response, Operation Deepwater Horizon, Operation Unified Response, etc.
- Increased full-time support to Commanders in the field for the training and personal readiness of reserve personnel.

FY 2011 planned accomplishments (based on an annualized CR funding estimate) include:

- Prepare reservists to serve an integral role during DoD's Overseas Contingency Operations.
- Train for mobilization to support national security and disaster response, including the ongoing response to the Deepwater Horizon Oil Spill and future emergent man-made or natural disasters.
- Create a Reserve Force structure to better synchronize training efforts to mission sets to more efficiently integrate the Coast Guard drilling reservists into the workforce.

FY 2012 planned accomplishments include:

- Train additional reservists for deployable expeditionary support and train safety and security teams for deployment within the United States.
- Enhance FTS management of the Reserve Force Readiness System through training and doctrine to improve Reserve Force readiness.
- Train for mobilization to support national security and future disaster response.

PPA II: OPERATIONS, MAINTENANCE AND ADMINISTRATION

	Perm Pos	FTE	Amount
2010 Actual	34,261
2011 C.R.	29,084
2012 Adjustments-to-Base
2012 Current Services	29,084
2012 Program Change
2012 Request	29,084

The Coast Guard requests \$29.1 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

This request for Operations, Maintenance and Administration funds services and facilities to train reservists, and to administer the Reserve program.

By providing funding for enterprise-wide services used by reservists, the Reserve Training appropriation ensures equipment and facilities necessary to attract and maintain a high-caliber reserve force without eroding the resource base of the active duty military workforce. Coast Guard reservists train and serve in multiple mission areas as boarding officers, small boat coxswains, contingency planners, and marine inspectors. The Coast Guard Reserve is an extraordinary force multiplier upon which our nation can confidently rely in times of exceptional need.

Significant accomplishments in FY 2010 included:

- Maintained readiness and sharpened mobilization skills through training and exercises during routine and emergency operations, and to support defense operations.
- Enhanced the delivery of training, readiness, and operational support.
- Improved Reserve readiness and training with further development of formal and on-line training for the entire corps of FTS personnel who support reserve readiness throughout the Coast Guard.

FY 2011 planned accomplishments (based on an annualized CR funding estimate) include:

- Improve processes to enhance ability to mobilize, train, and maintain skills required to support defense operations. Improve readiness through training and exercises during routine and emergency operations.
- Ensure on-time delivery of pre-mobilization and in-theater training, readiness, and operational support for reserve personnel through e-Learning initiatives.

- Review current distribution of drilling reserve strength to determine optimal distribution for purposes of meeting dynamic operational demands.

FY 2012 planned accomplishments include:

- Improve in-theater movement tracking of mobilized reservists.
- Improve the capability to recall members from the Inactive Ready Reserve (IRR) and ensure the mobilization readiness of a select group of IRR members.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U. S. Coast Guard
Justification of Proposed Changes in Reserve Training
Appropriation Language**

For necessary expenses of the Coast Guard Reserve, as authorized by law; operations and maintenance of the reserve program; personnel and training costs; and equipment and services; \$136,778,000.

Note.—A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111–242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

*The Coast Guard manages the military workforce by end strength, not Full Time Equivalent (FTE). The military FTE represented in these numbers are monthly end strengths averaged over the year. Public Health Service (PHS) officers were removed from this presentation to properly document the arrangement per OMB A-11 Section 85.7; Department of Health and Human Services (HHS) is the servicing account in the reimbursable FTE arrangement with the Coast Guard.

**The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular pay grade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

PPA Mission Statement

This PPA request funds expenses for compensation of active duty military service members and civilian personnel who support the Reserve Training program. This category also includes pay, allowances, employer's share of FICA, Social Security credits and other expenses. Requested funding will compensate our 536 full-time personnel.

Summary Justification and Explanation of Changes

Salaries and Benefits

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 to 2012 Change
\$ 93,440	\$ 104,548	\$ 107,694	\$ 3,146

Salaries and Benefits provides compensation directly related to Coast Guard active duty military and civilian personnel duties. This includes costs for 536 FTE. The FY 2012 request includes an increase of \$3,146,000 in funding for the FY 2012 proposed pay raise (1.6 percent for military and 0 percent for civilians), the military pay raise in FY 2011, medical benefits, and other mandatory personnel entitlements.

U. S. Coast Guard

Acquisition, Construction and Improvements

I. Appropriation Overview

A. Mission Statement for Acquisition, Construction and Improvements:

Acquisition, Construction and Improvement (AC&I) provides for the acquisition, construction, rebuilding, and improvement of vessels, aircraft, shore facilities, aids to navigation (ATON) systems and facilities, and command, control, communications and computer systems and related equipment. Funds appropriated for AC&I are managed by Coast Guard acquisition project managers who oversee these projects and apply best practices, in accordance with the Coast Guard's Major Systems Acquisition Manual (MSAM) and applicable Department of Homeland Security (DHS) management directives, to optimize the return on recapitalization investments.

B. Budget Activities:

The AC&I appropriation funds the acquisition of new capital assets, construction of required facilities, and physical improvements to existing facilities and assets. The appropriation covers Coast Guard-owned and operated vessels, shore facilities and other items such as command, control, communications and computer equipment. Through processes documented in the MSAM, acquisition managers are required to follow a continuum of activities ranging from pre-acquisition concept development to deployment and sustainment. Activities and documentation produced throughout the acquisition lifecycle inform budget requests and budget-related project activities.

C. Budget Request Summary:

The Coast Guard requests \$1.4 billion in FY 2012 for the following programs:

- Vessels - \$642.0 million
- Aircraft - \$289.9 million
- Other - \$166.1 million
- Shore and ATON - \$193.7 million
- Military Housing - \$20.0 million
- Personnel and Management - \$110.2 million

III. Current Services Program Description by PPA

Department of Homeland Security
U. S. Coast Guard
Acquisition, Construction and Improvements
Program Performance Justification
(Dollars in thousands)

INTRODUCTION

The Coast Guard FY 2012 budget proposes the elimination of the Integrated Deepwater System (IDS) sub-appropriation and disaggregation of the IDS construct from the Coast Guard's Acquisition, Construction and Improvement (AC&I) appropriation. Enacting this proposal will further enhance acquisition management and accountability by aligning the appropriations structure with how the projects are managed. This initiative also enhances accountability by establishing a stronger linkage between appropriations and specific asset acquisition projects, promotes better alignment with the authorized appropriation structure, and is a natural outcome of the Coast Guard's ongoing efforts to reform acquisition management and oversight. The new appropriations structure includes the following sub-appropriations:

- *Vessels* (cutters, small boats and related equipment)
- *Aircraft* (aviation capability)
- *Other*
- *Shore Facilities and Aids to Navigation*
- *Military Housing*
- *Personnel and Management*

PPA I: VESSELS

	Perm Pos	FTE	Amount
2010 Actual	\$561,053
2011 C.R	851,680
2012 Adjustments-to-Base
2012 Current Services	851,680
2012 Program Change	(209,680)
2012 Request	642,000

The Coast Guard request for FY 2012 is \$642.0 million.

PROGRAM DESCRIPTION:

Primary operational resource supported: Surface assets

The vessel program provides funding to recapitalize and/or improve the Coast Guard's fleet of aging boats and cutters. With many of the Coast Guard's cutters operating at or beyond their planned service life, these recapitalization and sustainment projects are critical to ensuring the continued mission effectiveness and readiness of the Coast Guard's surface fleet. FY 2012 funding supports the Survey and Design of Vessels and Boats, In-Service Vessel Sustainment (ISVS),

Response Boat-Medium (RB-M), National Security Cutter (NSC), Offshore Patrol Cutter (OPC), Fast Response Cutter (FRC), Cutter Boats and Medium Endurance Cutter Sustainment projects. The Coast Guard's fleet of boats and cutters supported within this program collectively perform all 11 statutory Coast Guard missions in the offshore, coastal and inland areas of responsibility (AOR).

The ISVS acquisition is a new project, intended to perform life-cycle sustainment work on aging vessels, starting with 140' Ice-Breaking Tugs in FY 2012.

The Coast Guard's future fleet of NSCs, OPCs and FRCs will replace the current fleet of High and Medium Endurance Cutters and Island-Class Patrol Boats. These cutters will provide endurance, speed, sea-keeping, surveillance, and persistent presence in the offshore AOR to perform the following Coast Guard missions: Drug and Migrant Interdiction, Living Marine Resources, Defense Readiness, Search and Rescue (SAR), Marine Environmental Protection, and Ports, Waterways, and Coastal Security. The NSCs and OPCs will be able to autonomously support and deploy aircraft and cutter boats, and possess a highly effective suite of electronics communication and surveillance equipment. NSCs, which have been fielded, are also able to optimally conduct critical law enforcement and SAR missions in the most challenging operational environments (e.g., Bering Sea, Russian-U.S. Maritime Boundary Line, Eastern Pacific, etc.), and overseas DHS missions, including out-of-hemisphere deployments. Furthermore, NSCs have the capacity to perform contingency response operations in all environments, including contaminated areas in the wake of a chemical or biological attack. Cutter boats provide major cutters the capability to deliver boarding teams, stop non-compliant vessels, transfer personnel/cargo, and augment the operations outlined above. The FRC is optimized for similar Coast Guard missions as the NSC and OPC, but at a shorter range within the Coastal and near-Offshore domains, while relying exclusively upon shore-based aircraft as opposed to cutter-borne assets to perform airborne surveillance and tactical support.

The RB-M is designed for operations within the coastal AOR, optimized for the full range of Law Enforcement, Maritime Response, Maritime Security, and Maritime Transportation System Management Programs within the territorial seas, harbors, and inland waterways. RB-Ms operate from multi-mission boat stations throughout the coastal United States and Territories. 140' Ice-Breaking Tugs primarily perform domestic icebreaking services, facilitating the safe passage of maritime commerce and conducting flood-relief operations, in addition to fulfilling other Coast Guard statutory missions within the Coastal and Inland AORs. These cutters are extremely versatile, as highlighted during Deepwater Horizon Marine Environmental Response operations.

Significant accomplishments in FY 2010:

- RB-M – Ordered 39 RB-Ms (hulls #67-105). Accepted delivery of 22 RB-Ms (hulls #15-36).
- NSC – Christened USCGC STRATTON (WMSL-752). Delivered USCGC WAESCHE (WMSL-751). USCGC BERTHOLF (WMSL-750) fully operational.
- OPC – Developed Concepts of Operations (CONOPS) and Operational Requirements Document (ORD). Developed Preliminary and Contract Design (P&CD) Request for Proposal.
- FRC – Completed critical design review (CDR) and award contract options for seven Low-Rate Initial Production (LRIP) hulls (#2 - 8).
- Cutter Boats – Completed design, engineering and specification development for CB-OTH Mk IV and LRI Mk II.

- Medium Endurance Cutter (WMEC) MEP – Finished MEP on the last four of fourteen 210’ WMECs.
- Patrol Boat (WPB) MEP - Completed MEPs on three 110’ WPBs.

FY 2011 planned accomplishments (based upon 2011 annualized CR except as noted below):

- RB-M – Accept delivery of 33 RB-Ms (hulls #37-69), and continue acquisition of RB-Ms.
- NSC – Award fixed-price incentive fee contract for production of NSC-4. Award long-lead time materials (LLTM) and production contract options for NSC-5 (assumes enactment of 2012 proposal to fully fund NSC-5). Deliver USCGC STRATTON (WMSL-752). Make USCGC WAESCHE (WMSL-751) fully operational.
- OPC – Continue pre-acquisition work through release of the request for proposal (RFP) for multiple preliminary designs.
- FRC – Fund contract option for construction of four FRCs.
- Cutter Boats – Conduct production and competition between lead CB-OTH Mk IV hulls.
- WMEC MEP – Complete two 270’ WMEC MEPs, and continue production of third 270’ WMEC MEP.
- WPB MEP – Complete last three of seventeen 110’ WPB MEPs.

FY 2012 planned accomplishments:

- Survey and Design – Complete survey and design work for 140’ WTGB sustainment, and commence survey and design work for 225’ WLB sustainment at the CG Yard.
- In-Service Vessel Sustainment – Conduct sustainment availability for the first 140’ WTGB at the CG Yard.
- RB-M – Order 40 RB-Ms.
- NSC – Continue production of NSC-4 and NSC-5.
- OPC - Continue acquisition by awarding Preliminary Contract & Design (PC&D) to multiple contractors.
- FRC – Fund contract option for construction of six FRCs. Award contract line item for the Re-procurement Data and Licensing Package, allowing for pursuit of a competitive fixed-price FRC production contract in FY 2015.
- Cutter Boats – Conduct production and testing of two Cutter Boat Long Range Interceptor Mark II (CB-LRI Mark II hulls #1-2) and eight Cutter Boat Over the Horizon Mark IVs (hulls #2-9).
- WMEC MEP – Complete MEP on three 270’ WMECs.

PPA II: AIRCRAFT

	Perm Pos	FTE	Amount
2010 Actual	\$299,137
2011 C.R.	269,000
2012 Adjustments-to-Base
2012 Current Services	269,000
2012 Program Change	20,900
2012 Request	289,900

The Coast Guard request for FY 2012 is \$289.9 million.

PROGRAM DESCRIPTION:

Primary operational resource supported: Aviation Assets

The aircraft program is the primary recapitalization and sustainment effort for the Coast Guard's aging aircraft. It is comprised of new fixed-wing aircraft acquisitions, acquisition of one H-60 helicopter lost during operational service, and both fixed and rotary wing aircraft sustainment projects. Through strategic investment in state-of-the-market Command, Control, Communications and Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) equipment and design, this program also provides the necessary capability enhancements to conduct maritime safety and security missions.

The Coast Guard's fleet of fixed and rotary wing aircraft supported within this program collectively performs all 11 statutory Coast Guard missions in the Offshore, Coastal and Inland AOR. The land-based fixed-wing aircraft include the C-130, HU-25 and C-144A aircraft. The C-144A is replacing the HU-25 as the Coast Guard's primary medium-range fixed-wing aircraft. The Coast Guard's fleet of C-130Hs and C-130Js provide long-range fixed-wing capability. Each of these fixed-wing aircraft enables the Coast Guard to conduct airborne surveillance, detection, classification and identification of vessels and other aircraft. The Coast Guard's fleet of rotary wing aircraft includes the H-60 and H-65 helicopters. Both aircraft are deployed from land-based Air Stations, while the H-65 is also deployed routinely aboard the Coast Guard's fleet of NSCs, WHECs, WAGBs, and WMECs. The H-60 is a medium-range helicopter, and the H-65 is a short-range helicopter. Both aircraft are used to execute the full range of Coast Guard programs including Law Enforcement, Maritime Security, Maritime Response, Defense Operations, and Maritime Transportation System Management. The projects within this program are intended to recapitalize and sustain these aircraft.

Significant accomplishments in FY 2010:

- C-144A, Maritime Patrol Aircraft (MPA) – Contracted production of MPA #12-14. Accepted delivery of MPAs #9-11 and six Mission System Pallets (MSPs).
- H-65 – Continued a service-life extension to refurbish the airframe, wiring and components; add new radar and C4ISR suite, and install an integrated cockpit.
- H-60 – Continued a service-life extension to refurbish the airframe, wiring, and components; add new radar and C4ISR suite, and install an integrated cockpit.
- C-130H – Attained full operating capability for radar replacement, continued avionics modernization and center wing box replacement to extend fleet service life.
- C-130J – Completed missionization of aircrafts #5 and #6, including the installation of air-certified observer seats.

FY 2011 planned accomplishments:

- MPA – Continue MPA acquisition. Contract for flight simulator construction.
- H-65 – Continue obsolete component upgrades.
- H-60 – Continue service-life extension to refurbish the airframe, wiring, and components; add new radar and C4ISR suite, and install an integrated cockpit.
- C-130H – Continue avionics modernization and center wing box replacement to extend fleet service life.

FY 2012 planned accomplishments:

- CGNR 6017 Airframe Replacement – Convert one Navy SH-60F to an MH-60T aircraft, to replace 6017, lost in a mishap.

- MPA – Fund production of two MPAs, up to five MSPs, and initial spares for MPAs and MSPs. Accept delivery of MPAs #12-14.
- H-60 – Continue service-life extension to refurbish the airframe, wiring, and components for the Coast Guard’s fleet of H-60 helicopters. Continue to fund installation of new Electro Optical/Infra-Red Sensor System and Avionics upgrades.
- H-65 – Continue to fund Discrete Segments 4 (Obsolete Component Modernization) and 6 (Automatic Flight Control System and cockpit modernization) for eleven aircraft.
- C-130H – Continue avionics design, development and testing, non-recurring engineering work for Mission System Sustainment/Upgrade, procurement, and installation of one center wing box.

PPA III: OTHER

	Perm		
	Pos	FTE	Amount
2010 Actual	\$285,340
2011 C.R.	284,100
2012 Adjustments-to-Base
2012 Current Services	284,100
2012 Program Change	(117,960)
2012 Request	166,140

The Coast Guard request for FY 2012 is \$166.1 million.

PROGRAM DESCRIPTION:

Primary operational resource supported: Command, Control, Communications, Computers and Information Technology (C4IT), Acquisition Management

Funding procures hardware and software, including initial acquisition, development or construction or improvement of any system, software or equipment costing over \$1.0 million per usable segment or item, or \$10.0 million total project cost. In FY 2012, funding will support continued progress on build-out of Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) systems, CG-Logistics Information Management System (CG-LIMS), Interagency Operations Centers (IOCs), Nationwide Automatic Identification System (NAIS) and Rescue 21 (R21). This program also provides funding for Systems Engineering and Integration (SEI) and Government Program Management (GPM).

The Coast Guard leverages its C4ISR capability to effectively execute a broad mission set in an immensely challenging operating environment. Assets are able to receive, evaluate and act upon information obtained through the capability provided by the systems supported in this program. The C4ISR project provides standardized capability to major cutters and aircraft, facilitating interoperability and information sharing. R21 facilitates SAR and other coastal operations by identifying, communicating with, and locating vessels in distress and providing the VHF command, control and communications backbone leveraged by all assets operating in the coastal zone. NAIS provides the ability to identify and classify vessels operating within the coastal and inland AORs to support maritime domain awareness activities. The IOC project facilitates maritime interagency cooperation during normal and contingency operations in major ports by integrating existing sensor output (e.g. radar, cameras, etc.) and providing asset status information to maritime agency stakeholders. Deployment of CG-LIMS enables the Coast Guard to replace redundant and

incompatible logistics and financial systems with one single integrated IT system capable of providing enhanced configuration management, supply support, and improved financial accountability. SEI and GPM are critical to efficient oversight and execution of the Coast Guard's acquisition programs.

Significant accomplishments in FY 2010:

- C4ISR – Continued delivery of Segment 2, the second C4ISR baseline; began Ku-band Satellite communication upgrades on WHECs/WMECs; began Integrated Waveform Military Satellite Communications upgrades on WMECs.
- CG-LIMS – Continued pre-acquisition activities of CG-LIMS.
- NAIS – Deployed the core system upgrade to the Coast Guard's Operations Systems Center, Navigation Center and three sectors: Mobile, AL; Hampton Roads, VA and Delaware Bay (Philadelphia, PA).
- R21 – Deployed system to five additional Sectors/Groups (Puget Sound, WA; Columbia River, OR; Corpus Christi, TX; San Francisco, CA and San Diego, CA). Rescue 21 operational along 35,748 miles of coastline.
- IOCs – Completed Watchkeeper Operational Testing and Evaluation and deployed to: Hampton Roads, VA; Jacksonville, FL. Outfitted Command Center at IOC New Orleans. Commenced sensor management capability development.

FY 2011 planned accomplishments:

- C4ISR – Continue critical system updates for safety, Information Assurance (IA), and diminishing manufacturing sources.
- CG-LIMS – Continue development and prototype deployment to Coast Guard operational assets and support facilities, starting with the MPA fleet.
- NAIS – Complete site surveys within two sectors with the goal of collocating NAIS equipment with R21 infrastructure.
- R21 – Deploy system to four additional Sectors (Detroit, MI; Los Angeles/Long Beach, CA; Buffalo, NY; Sault Ste. Marie, MI).
- IOCs – Deploy Watchkeeper to select IOC locations via technology demonstrator. Continue sensor management capability development.

FY 2012 planned accomplishments:

- C4ISR – Deploy Segment 2 capability to newly fielded NSCs and MPAs, and develop C4ISR capability for the OPC.
- CG-LIMS - Continue development and prototype deployment to Coast Guard operational assets and support facilities.
- NAIS – Install permanent NAIS capability in Sectors New Orleans, Houston/Galveston and Corpus Christi.
- R21 – Complete deployment at Sectors Lake Michigan, San Juan, PR, Honolulu, HI, Guam, and continue replacement of legacy VHF systems in the Western Rivers.
- IOCs – Continue to deploy Watchkeeper and sensor management capabilities to IOC locations.

PPA IV: SHORE AND AIDS TO NAVIGATION (ATON)

	Perm Pos	FTE	Amount
2010 Actual	\$45,965
2011 C.R.	27,100
2012 Adjustments-to-Base
2012 Current Services	27,100
2012 Program Change	166,592
2012 Request	193,692

The Coast Guard request for FY 2012 is \$193.7 million.

PROGRAM DESCRIPTION:

Primary operational resource supported: Shore units and Aids-to-Navigation (ATON)

The AC&I shore facilities and ATON capital investment provides funding for the acquisition, construction, rebuilding, and improvement of the Coast Guard's shore facilities, ATON and related equipment. Shore facilities are critical to supporting all Coast Guard operations.

Significant accomplishments in FY 2010:

- Began work on MPA Hangar for CGAS Cape Cod.
- Continued to support NSCs with facility upgrades in Alameda, CA; facility upgrades at the first two FRC homeports; construction of an FRC trainer at Yorktown, VA; environmental assessments of new asset homeports and aviation sites; and detailed engineering evaluations.
- Commenced the renovation and construction of a new Station and Marine Safety Unit at Cleveland Harbor, OH.
- Commenced survey and design for the Coast Guard Academy pier project in New London, CT.
- Completed initial survey and design for seven major shore facilities/projects.
- Completed Aids to Navigation work at the following sites: Port Canaveral, FL – Outbound Ranges; Belle Pass/Port Fuchon, LA – Inbound Ranges ; Anaheim Bay Ranges, CA; Anaheim Bay, CA – Buoys to Beacons; Napa River, CA; Sacramento/San Joaquin Rivers, CA; Houston Ship Channel Ranges, TX; St. Mary's River, MI – Buoys to Beacons; Mobile Channel Ranges, AL.

FY 2011 planned accomplishments:

- Continue construction work on the aircraft hangar in Cape Cod, MA and build-out of facility upgrades for new FRCs and NSCs.
- Execute major shore recapitalization projects upon receipt of FY 2011 appropriations.
- Construct minor AC&I shore facility projects.

FY 2012 planned accomplishments:

- Commence design/construction of Cape May, NJ Pier repairs, CG Academy recapitalization, TRACEN Petaluma Wastewater Treatment Plant, Sector Corpus Christi facilities, STA Fairport recapitalization and STA Menemsha boathouse replacement.
- Commence construction of the next four FRC homeports, C4ISR training facility, Phase II

MPA Hangar Modifications at AIRSTA Miami, second NSC homeport, and upgrades to stations receiving the new 45' Response Boat – Medium (RB-Ms). These critical modifications will support the planned production rate of FRCs, MPAs, and RB-Ms. C4ISR training facility upgrades will provide training to crews on use of newly fielded C4ISR equipment.

- Construct Minor AC&I shore facility projects.

PPA V: MILITARY HOUSING

	Perm Pos	FTE	Amount
2010 Actual
2011 C.R.
2012 Adjustments-to-Base
2012 Current Services
2012 Program Change	20,000
2012 Request	20,000

The Coast Guard request for FY 2012 is \$20.0 million.

PROGRAM DESCRIPTION:

Primary operational resource supported: Coast Guard Housing

This program provides funding to recapitalize Coast Guard military family housing facilities to ensure military members have access to housing in areas where there is a lack of affordable accommodations. These funds will be used to plan, execute, administer contracts; and acquire and construct military family housing for Coast Guard active duty personnel and their families assigned to areas where there are documented housing shortages. The military housing projects planned in FY 2012 allocate funding to the highest priority housing recapitalization initiatives.

FY 2012 planned accomplishments:

- Continue acquisition and construction of housing in the Florida Keys and Long Island, New York.
- Commence projects to recapitalize Military Housing in Cape Cod, Massachusetts and Astoria, Oregon.

PPA VI: PERSONNEL AND MANAGEMENT

	Perm Pos	FTE	Amount
2010 Actual	956	772	\$101,234
2011 C.R.	893	735	105,200
2012 Adjustments-to-Base
2012 Current Services	893	735	105,200
2012 Program Change	17	59	4,992
2012 Request	910	794	110,192

The Coast Guard request for FY 2012 is \$110.2 million.

PROGRAM DESCRIPTION:

Primary operational resource supported: Personnel to support program management of all acquisitions.

- AC&I has a specific annual appropriation to fund “personnel compensation and benefits and related costs.” The primary activities include project management, financial management, support services, training, and workforce certification. The funding provides the appropriate level of government acquisition professionals to field a workforce with the competencies and capacity to manage acquisitions in accordance with CG and DHS policies, while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act, DHS certification level requirements and OMB Circular A-76.
- The FY 2012 budget includes funds allocated towards the DHS acquisition workforce initiative. These funds will support acquisition training, recruitment, and retention activities, while helping the Coast Guard attract and hire qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act. Specific areas of focus include program management, systems engineering, testing and evaluation, and logistics.

IV. Program Justification of Changes

¹ FY 2010 Actuals do not include \$77.8 million in American Recovery and Reinvestment Act (ARRA) obligations.

Description of Item

Please see the following budget displays for detailed information: Summary of Requirements and Capital Investments and Construction Initiative Listing.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U. S. Coast Guard
Justification of Proposed Changes in Acquisition, Construction, and Improvements
Appropriation Language**

For necessary expenses of acquisition, construction, renovation, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; and maintenance, rehabilitation, lease and operation of facilities and equipment, as authorized by law; \$1,421,924,000, of which \$20,000,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); of which \$20,000,000 shall remain available until expended for military family housing, of which not more than \$14,000,000 shall be derived from the Coast Guard Housing Fund, established pursuant to 14 U.S.C. 687; of which \$642,000,000 shall be available until September 30, 2016, to acquire, effect major repairs, renovate, or improve vessels, small boats, and related equipment; of which \$289,900,000 shall be available until September 30, 2016, to acquire, effect major repairs, renovate, or improve aircraft or increase aviation capability; of which \$166,140,000 shall be available until September 30, 2016, for other equipment; of which \$193,692,000 shall be available until September 30, 2016, for shore facilities and aids to navigation facilities; and of which \$110,192,000 shall be available for personnel compensation and benefits and related costs: Provided, That of the funds made available for personnel compensation and benefits and related costs, \$2,249,714 shall be for strengthening the capacity and capabilities of the acquisition workforce (as defined by the Office of Federal Procurement Policy Act, as amended (41 U.S.C. 401 et seq.), including the recruitment, hiring, training, and retention of such workforce and information technology in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

Note: A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111-242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

Explanation of Changes:

Consistent with the dissolution of Integrated CG Systems and the disaggregation of the Deepwater Acquisition into asset-based Acquisition Program Baselines, the proposed changes align projects that were formerly grouped under Integrated Deepwater Systems (IDS) with the existing authorized structure for Vessels, Aviation, Shore, Other Equipment, and Personnel and Management.

Makes all AC&I funds available for five years. This ensures comparability with the current structure under which the IDS sub-appropriation has had five year availability for all of its sub-activities. Since the applicable authorization language in 14 USC 656 approves the Coast Guard AC&I activities to be appropriated until expended, only the appropriations language must be modified.

Adds the phrase “*except as otherwise provided*” to aircraft appropriation, making it consistent with the minor construction and small boat language in the OE appropriation.

B. FY 2011 to FY 2012 Budget

**Department of Homeland Security
U. S. Coast Guard
Acquisition Construction and Improvements
FY 2011 to FY 2012 Budget Change
(Dollars in Thousands)**

	<u>Pos.</u>	<u>FTE</u>	<u>Amount</u>

Total Program Changes	910	794	1,421,924
2011 to 2012 Total Change	17	59	(114,356)

1) FY 2011 C.R. funding level equals the FY 2010 Enacted.

2) A total of \$92.0M for the Administrative Savings Initiative (ASI) is taken across Coast Guard in two accounts: OE and AC&I. It comprises reductions to the following types of activities: advisory and assistance services; travel of people and things; printing and reproduction; and supplies and materials. From OE, this amount is comprised of \$83.5M included in ASI and \$5.7M included in the Program Support Reduction. From AC&I \$2.8M in Systems Engineering and Integration.

TOTAL	\$ 1,536,280	\$ 1,421,924	\$ 1,702,300	\$ 1,774,059	\$ 2,351,584	\$ 1,764,575		

Notes: (1) FY 2013-16 funding levels are subject to change based upon adjustment to our year fiscal guidance and finalization of the FY 2012-16 Future Year Homeland Security Program.

(2) For purposes of display, 2011 project funding levels are a distribution of the annualized March 4, 2011 Continuing Resolution (H.R. 3082) "top-line" AC&I funding level, which is \$156.5 million more than the FY 2011 President's Budget. The distribution of funds to each project is consistent with the FY 2011 President's Budget with the following exceptions:

(a) \$615 million for NSC; \$77M greater than the President's Budget, consistent with the 11th Congress FY 2011 House Full-Year Continuing Resolution and FY 2011 Draft Omnibus Appropriations Bills. The additional \$77M in 2011, plus another \$77M in 2012, is required to fully fund NSC-5.

(b) \$105.6 million for Direct Personnel; \$1.5 million less than the FY 2011 President's Budget, reflects savings from the 2011-2012 civilian pay freeze, consistent with the March 4, 2011 Continuing Resolution.

(c) The remainder of the excess \$156.5 million (\$79.5 million) is allocated to MPA, as this is a high priority recapitalization project in FY 2011. The excess funds would provide one additional aircraft and initial spares.

(3) Total project costs and estimated completion date are based on individual project DHS Acquisition Program Baselines (APBs) when available, or the 2005 Integrated Deepwater System APB.

**U. S. Coast Guard
Acquisition, Construction & Improvements
FY 2012 Congressional Justification
(Dollars in Thousands)**

Survey and Design - Vessels and Boats **\$6,000**

Project Description, Justification and Scope

The FY 2012 funding will complete survey and design work for the 140-foot Icebreaking Tugs (WTGBs) as well as initiate this work for the 225-foot Sea-Going Buoy Tenders (WLBs) and the 175-foot Coastal Buoy Tenders (WLMs).

This request provides ongoing funding to support multi-year engineering survey and design efforts in support of future-year Mission Effectiveness Projects (MEPs), Service-Life Extension Projects (SLEPs), and other similar projects. Several of the Coast Guard’s cutters and boats are operating near or beyond their designed service life, or are requiring extensive repairs and upgrades to maintain mission effectiveness. As these vessels continue to age, project funding is required to conduct detailed condition surveys of the hull, along with engineering design work to be used in the planning and scope of sustainment or fleet replacement projects. Examples of the work to be performed under this project include: detailed survey and assessment of the material condition within the current fleet; study and analysis of engineering systems and components to evaluate their suitability for use in sustainment projects; and the development of pre-acquisition documentation to enable a sustainment or recapitalization project to reach initial approval in accordance with the Coast Guard’s Major Systems Acquisition Manual.

Early planning, requirements development and cost estimating in support of future cutter and boat acquisition and sustainment projects are critical to exercising good governance, planning, and acquisition oversight to make the best use of limited resources.

Significant Changes

No significant changes.

Note: A full-year FY 2011 appropriation was not enacted at the time the budget was prepared; thus the FY 2011 appropriation, obligation, and expenditure values are not included in the tables below.

Acquisition, Construction & Improvements
FY 2012 Congressional Justification
(Dollars in Thousands)

In Service Vessel Sustainment (ISVS)

\$14,000

Project Description, Justification and Scope

This request initiates a permanent acquisition program for sustainment of aging vessels to include Mission Effectiveness Projects (MEP) and Service Life Extension Projects (SLEP). Specifically funded in FY 2012 is a SLEP on the first 140' Ice Breaking Tug (WTGB).

The WTGB fleet of nine vessels was designed with a 30-year service life. The lead ship in this class was placed in service in 1978, and has been in continuous service for 32 years. No mid-life sustainment program has been performed on this fleet. From 2006 to 2009, the WTGB fleet lagged operational readiness targets by 19% due to major equipment failures, reducing operational capacity, and, in some cases, precluding cutters from getting underway, or resulting in aborted missions. This project is intended to increase the reliability and operational availability of these cutter classes through replacement of equipment and components that have been identified as the highest contributors to increasing maintenance costs and decreasing cutter availability.

Specific system upgrades and improvements to be addressed include:

- Overall reliability and efficiency of the propulsion plant will be improved through renewal of key components of the propulsion and power generation systems, many of which have not been updated since the cutter was placed in-service.
- Renewal of increasingly unreliable and difficult to repair & maintain Auxiliary systems including the steering and Heating, Ventilation and Cooling (HVAC) systems.
- Improve environmental compliance via installation of a new engine room fire suppression system that meets current environmental standards, renewal of the Oily Water Separator (OWS) system and reconfiguration of the stack exhaust system to better control emissions.
- Safety improvements including replacement of the boat launching davit system, which was originally designed for a smaller, lighter boat and is minimally capable of handling the current cutter boat.
- Major improvements to crew habitability including reconfiguration of berthing areas to meet current habitability standards.

In addition to summer Aids To Navigation work, the WTGB fleet is critical to performing Domestic Icebreaking missions essential to ensuring safe passage of more than twenty million tons of cargo during peak winter months in the Great Lakes region, and millions of tons in coastal regions along the Northeast Atlantic. It is also able to support other missions as was recently demonstrated by its significant contributions to Deepwater Horizon Marine Environmental Response operations.

Significant Changes

This is the first submission for the In Service Vessel Sustainment project.

Response Boat - Medium (RB-M)

\$110,000

Project Description, Justification and Scope

This funding places 40 boats on order. It also supports engineering changes identified through early operations, and supports logistics development.

The Response Boat - Medium (RB-M) project was established in October 2001 to procure 180 new small boats to replace the aging 41-foot Utility Boats (UTB) (and other large non-standard boats) with standardized assets more capable of meeting the Coast Guard's multi-mission operational requirements. The legacy 41' UTB is a key asset for Coast Guard operations within coastal zones. Although designed specifically for Search and Rescue (SAR) missions, the 41' UTBs have been employed as multi-mission assets. Since the

RB-M 45602 from Station Port Angeles, Washington Coast, June 2009

41' UTB was built, Coast Guard mission requirements, particularly in terms of maritime security have changed markedly. The RB-M offers a number of improvements over the existing fleet of 41' UTBs and other boats in performance, human system interface and operational availability. Several program requirements and extensive field commander input supported a need for an RB-M that is substantially faster (e.g., 40+ knots vs. 26 knots) than the 41' UTB to support homeland security operations and improve multi-mission performance effectiveness.

Integrated navigation and sensing systems compliant with modern international radio-telephone standards provide the RB-M with improved communications and search capability compared to the 41' UTB, improving mission effectiveness. Interoperability of the RB-M with Rescue 21 equipment enhances overall command and control as well as crew safety in coastal zones. Moreover, crew interface with the boat and equipment has been improved in a number of areas. For example,

- Self-righting capability provides improved survivability in higher sea states;
- Self-fendering allows more efficient boarding and towing operations;
- Improved survivor recovery arrangement improves crew effectiveness; and
- Secure seating for each crewmember in an environmentally controlled cabin enables greater mission endurance with less crew fatigue.

The project emphasizes standardization and the ability to maintain and replace RB-M components quickly. This improves the efficiency of organizational and depot level maintenance support. Additionally the RB-M system includes an interactive logistics support package that provides ready access to technical information. Further efficiencies are gained by providing maintenance relief vessels to substitute for station boats during major maintenance and casualty repairs. Finally, the RB-M is built to dimensions that allow for commercial overland transportation to support deployed surge operations.

U. S. Coast Guard - FY 2012 Congressional Justification

Response Boat - Medium (RB-M)

\$110,000

PROJECT HISTORY

The RB-M project acquisition strategy is two-phased. Phase I entailed developmental testing and evaluation on three test boats to validate RB-M requirements. On June 21, 2006 Phase II contract was awarded to Marinette Marine Corporation (MMC) of Marinette, Wisconsin. MMC's primary subcontractor is Kvichak Marine Industries (KMI) in Kent, Washington for the design and sole construction of the initial RB-Ms. Detailed design was completed in June 2007 and construction on the first RB-M started in July 2007 with the first boat delivery in March 2008 that initiated Operational Testing and Evaluation (OT&E) on the first six boats. The FY 2008 appropriation provided funding to place sufficient orders to warrant opening a second production facility in Green Bay, Wisconsin. This facility opened in September 2008 and delivered its first RB-M (hull #11) in Q4 FY 2009.

The project received approval to move from LRIP (Low Rate Initial Production of 15 RB-Ms per year) into Full Rate Production (30 boats per year) in March 2010. With ramp-up to full production complete in FY 2010, both the Green Bay, Wisconsin facility and the Kent, Washington facility are now capable of delivering at least 15 RB-Ms each annually for a combined total of no less than 30 boats per year, provided funding is sufficient to sustain RB-M orders per the contract pricing schedule.

The table below lists the RB-Ms delivered as of February 4, 2011 as well as the others still to be delivered in FY 2011 per the last IBR (integrated baseline review). Note the following in the table:

- *Facility* – RB-Ms are produced by, and delivered from, two facilities: Kent, WA and Green Bay, WI.
- “Seq” is the sequence in which the boat is delivered to the respective station and “Qty” is the total number of RB-Ms to be delivered to the station, such that, 45601 is the 1st of 2 delivered to Little Creek.
- First six RB-Ms (hulls # **45601-6**) designated for Operational Testing and Evaluation (OT&E).
- Hull# **45602** delivered to Station Cape Disappointment has transferred to Station Port Angeles.
- Hull# **45611** was the first RB-M from the Green Bay facility.

Total		(39 + 30)	= 69			RB-Ms delivered to CG stations by end of FY 2011	

KEY EVENTS

Significant accomplishments in FY 2010 included:

- Ordered 39 RB-Ms (hulls #67-105)
- Received 22 (hulls #15-36) RB-Ms and supported a total of 36 delivered RB-Ms
- Completed OT&E. Moved from LRIP into full production, attained Initial Operating Capability with delivery of the first RB-M following a Full Production Decision
- Reached a full production rate of at least 30 boats per year by the end of the fiscal year

FY 2011 planned accomplishments include:

- Continue procurement of RB-Ms.
- Receive 33 RB-Ms and support delivered RB-Ms (see table above)

FY 2012 planned accomplishments include:

- Order 40 RB-Ms.

Significant Changes

FY 2012 is the second year of full production (which is a rate of at least 30 RB-Ms per year) with planned deliveries of 34 RB-Ms. Funding at current levels minimizes production costs and facilitates procurement of 180 RB-Ms prior to expiration of the current contract at the end of FY 2014.

Note: A full-year FY 2011 appropriation was not enacted at the time the budget was prepared; thus the FY 2011 appropriation, obligation, and expenditure values are not included in the tables below.

Acquisition, Construction & Improvements
FY 2012 Congressional Justification
(Dollars in Thousands)

National Security Cutter (NSC)

\$77,000

Project Description, Justification and Scope

This request will complete funding for NSC #5.

The Legend Class NSCs will replace the fleet of 378' High Endurance Cutters (WHEC), built between 1967 and 1972, which are operating beyond their economic service life, experiencing decreased operational availability, and increasingly more expensive to maintain. The NSC provides enhanced capability, essential for prosecuting missions in today's high-threat environment.

The NSC is capable of extended on-scene presence, operating in the harshest maritime environments, long transits and out-of-hemisphere deployments. It is equipped with communication, navigation and surveillance systems that allow the cutter and its deployed air and organic boat assets to operate worldwide and conduct a daily search of up to 56,000 square miles throughout the maritime domain. The NSC enables the Coast Guard to serve as a leader in maritime incident response, taking action against all hazards and threats in every ocean and all environments.

The NSC conducts patrols on the high seas and coastal approaches employing a robust command and control capability for the task unit commander or on-scene commander. It is capable of performing all maritime DHS missions including overseas operations with the U.S. Navy and partner nations. When engaged in these missions, the NSC is capable of detecting, classifying, and tracking surface Targets of Interest (TOI) in sizes ranging from makeshift rafts to large commercial vessels, and air TOIs as small as single-engine civil aircraft.

Leveraging updated technology, the NSC possesses improved capabilities over the legacy 378' High Endurance Cutter. It has a range of approximately 12,000 nautical miles (nm) and an underway endurance of 60 days. The cutter is capable of patrolling alone or with multiple U.S. Coast Guard vessels, U.S. Navy vessels, or vessels from other nations' navies or coast guards.

Once each NSC is completely outfitted it will have the capability to:

- Provide anti-terrorism/force protection;
- Carry and deploy aircraft and unmanned aerial vehicles (UAV);
- Carry and deploy multiple small boats (e.g., Cutter Boat Over the Horizon (CB-OTH) and Cutter Boat Long Range Interceptor (CB-LRI));
- Conduct boat and flight operations safely and efficiently in up to Sea State 5 (wave heights of 8-12 feet and wind 21- 25 knots);

U. S. Coast Guard - FY 2012 Congressional Justification

National Security Cutter (NSC)

\$77,000

- Support intelligence operations through greatly improved intelligence gathering and Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) capabilities, including use of a Sensitive Compartmented Information Facility (SCIF), all of which enhance the NSC's self-defense capabilities and facilitate seamless operations with networked DHS, DoD, and national assets;
- Maintain presence and perform command and control operations in Chemical, Biological, or Radiological contaminated environments for up to 36 hours;
- Operate with U.S. Navy Battle Groups with a maximum sustained speed of 28 knots.

FUNDING HISTORY

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>
2002	\$7,869	Conceptual Development/Design

CONTRACTOR:

Northrop Grumman Shipbuilding, Pascagoula, MS

Type of Contract: Fixed Price Incentive (Firm Target)/Various

SUBCONTRACTORS:

Lockheed Martin Company (LMCO), Moorestown, NJ

FY 2010 Planned Accomplishments:

- Delivered NSC #2, USCGC WAESCHE (WMSL-751)

¹ Funding History for FY 2007 reflects changes from the Consolidated Contracting Action.

² Funding History for FY 2008 reflects changes from the Consolidated Contracting Action.

³ Funding History for FY 2009 reflects \$9.4M included for, "necessary expenses related to the consequences of 2008 natural disasters," per P.L. 110-329.

⁴ FY 2010 appropriations included \$108M above the President's Request for NSC-5 LLTM. \$103M was used to fund completion of NSC #4.

⁵ Anticipated FY 2011 appropriation is \$615M. \$5M in FY 2010 carryover funding combined with \$615M in anticipated FY 2011 funding and \$77M included in the FY 2012 President's Budget will fully fund NSC-5 and allow USCG to award a production contract.

U. S. Coast Guard - FY 2012 Congressional Justification

National Security Cutter (NSC)

\$77,000

- Christened NSC #3, USCGC STRATTON (WMSL-752)

FY 2011 Planned Accomplishments:

- Deliver NSC#3, USCGC STRATTON (WMSL-752)
- Award Production, NSC #4, USCGC HAMILTON (WMSL-753)
- Award LLTM NSC #5

FY 2012 Planned Accomplishments:

- Continue construction of NSCs #4-5

Significant Changes

No significant changes.

Note: The schedule provided in the tables below assumes appropriation of \$615 million in FY2011 based on Appropriations Committee actions to date.

U. S. Coast Guard
Acquisition, Construction & Improvements
FY 2012 Congressional Justification
(Dollars in Thousands)

Offshore Patrol Cutter (OPC) \$25,000

Project Description, Justification and Scope

This funding will continue pre-acquisition design work for the Offshore Patrol Cutter (OPC) class, intended to replace the Coast Guard's fleet of Medium Endurance Cutters (WMEC). The acquisition strategy for this program awards multiple Preliminary & Contract Designs (P&CDs) to competing contractors. From the P&CD efforts, one design will be chosen for detailed design development. FY2012 funding will facilitate P&CD evaluations, preparing the Request for Proposal (RFP) for the Detailed Design and Construction contract award, OPC Project Office technical and project support, OPC Ship Design Team support, completing various trade-off studies and requirements validations, life-cycle cost estimating support, logistics, and training studies.

The OPC will resolve current gaps in capabilities and capacity stemming from the aging 270' and 210' Medium Endurance Cutters (WMEC) which have decreased reliability and increased operating costs. The current WMEC fleet, which comprises the majority of the Coast Guard deepwater fleet, has either passed its end-of-service life, or is rapidly approaching it. The OPC will possess the capabilities necessary to perform WMEC statutory missions, providing the endurance, seakeeping, and persistent presence to complete missions throughout the Exclusive Economic Zone (EEZ) and coastal approaches.

OPC will be deployed as part of a layered border security strategy that gives the Coast Guard and its law enforcement and military partners time to react to emerging maritime threats. OPC will replace the existing 210' and 270' MECs and be designed to conduct assigned missions through a full-spectrum of climate and environmental conditions. Advanced communications capabilities will facilitate interoperability with DHS, State and local responders as well as DoD and international partners. Updated command and control systems will aid in the detection, classification, and identification of targets of interest (TOIs), while the use of well-equipped aircraft and small boats coupled with increased cutter speed will allow greater capacity for intercept and TOI prosecution.

Significant Accomplishments in FY 2010:

- Preliminary & Contract Design (P&CD) RFP Completed

FY 2011 Planned Accomplishments:

- Release of P&CD RFP

FY 2012 Planned Accomplishments:

- Award and evaluation of multiple P&CD contracts

U. S. Coast Guard - FY 2012 Congressional Justification

U. S. Coast Guard
Acquisition, Construction & Improvements
FY 2012 Congressional Justification
(Dollars in Thousands)

Fast Response Cutter (FRC)

\$358,000

Project Description, Justification and Scope

This request funds production of six FRC hulls, associated contract line items, and project management costs. Procuring six FRCs maximizes the production line and generates a cost savings of nearly \$5 million per hull. In addition to production of six FRCs, this funding also procures the Reprourement Data and Licensing Package (RDLP) required for the Coast Guard to re-compete the FRC production contract in order to maximize cost efficiencies. Continued acquisition of FRCs is critical to replace the aging 110' patrol boat fleet.

The planned fleet of 58 FRCs will conduct primarily the same missions as the 110' patrol boats they are replacing. In addition, the FRC will have several increased capabilities enhancing overall mission execution. FRC is designed for rapid response, with approximately a 28 knot speed capability, and will typically operate in the coastal zones. Examples of common missions that FRCs will complete include SAR, Migrant Interdiction, Drug Interdiction, and Ports Waterways and Coastal Security.

FRCs will provide enhanced capabilities over the 110's, including improved C4ISR capability and interoperability; stern launch and recovery (up through sea state 4) of a 40 knot, Over-the-Horizon, 7m cutter boat; a remote operated, gyro stabilized MK38 Mod 2, 25mm main gun; improved sea keeping; and enhanced crew habitability.

Additional capabilities include;

- The ability to conduct shipboard migrant interdiction evolutions, including detection, tracking, interdiction, embarkation and disembarkation, rescue administrative processing, and retention onboard.
- The ability to patrol areas where suspected illegal migrant, drug, or fisheries activities may occur, and dispatch boarding teams to suspect vessels and subsequently escort them to their final disposition.
- The ability to search for and locate and recover distressed mariners, provide medical assistance or evacuation, and provide safe transport. It will also provide the ability to control damage to distressed vessels and other property, provide dewatering equipment and mechanical assistance, and tow stricken vessels.

Prior Significant Accomplishments:

- Awarded design and construction of lead-hull (2008)

Fast Response Cutter (FRC)

\$358,000

Significant Accomplishments in FY 2010:

- Started production of lead-ship
- Awarded contract option for hulls #2-8

FY 2011 Planned Accomplishments:

- Deliver lead-ship
- Continue procurement of FRC hulls

FY 2012 Planned Accomplishments:

- Award contract option for six additional hulls
- Award contract option to obtain RDLP

FUNDING HISTORY⁶

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>
2007 & Prior	\$152,249	Base contract option (lead plus design & associated Contract Line Item Numbers, CLINs)
2009	\$115,300	Option period #1 (hulls 2-4) plus associated CLINs
2010	\$243,000	Option period #2 (hulls 5-8) plus associated CLINs
<i>Total</i>	<i>\$510,549</i>	<i>Funding received for FY 2004 through FY 2010</i>

CONTRACTOR: Bollinger Shipyards Inc.

Type of Contract: FFP-EPA

Significant Changes

In FY 2012, funding enables procurement of six FRCs and the RDLP in order to initiate a new competitive fixed-price production contract in FY 2015 in accordance with the DHS-approved acquisition strategy. The existing contract with the shipbuilder expires at the end of FY 2014. An option in the existing contract exists to procure the RDLP.

Note: A full-year FY 2011 appropriation was not enacted at the time the budget was prepared; thus the FY 2011 appropriation, obligation, and expenditure values are not included in the tables below.

Cutter Boats

\$5,000

Project Description, Justification and Scope

This request continues funding for production of multi-mission cutter small boats that will be fielded on the Coast Guard's newly acquired National Security Cutter. This request funds production of two Cutter Boat Long Range Interceptor Mark II (CB-LRI Mark II), hulls #1&2, and four Cutter Boats Over-the-Horizon Mark IV (CB-OTH Mark IV), hulls #6-9, along with project and technical support.

The CB-LRI Mark II is an 11-meter (36-foot) cutter boat carried by NSCs and, potentially, by the future OPC. The CB-LRI Mark II provides enhanced capabilities compared to legacy cutter boats, such as higher speeds, extended range, better sea-keeping, and greatly improved communications and connectivity to the parent cutter. The CB-OTH Mark IV⁷ is a 7-meter (25-foot) cutter boat that also provides enhanced capabilities compared to legacy cutter boats. The CB-OTH Mark IV is both stern launch/recovery, and side-davit launch/recovery, capable.

The CB-OTH Mark IV operates beyond sight of the parent cutter (over the horizon) to deploy boarding parties, pursue and interdict TOI, and perform SAR operations.

Leading up to selection of the final CB-OTH Mark IV design, there will be a "Boat Off" competition between competing boat manufacturers. In this acquisition strategy, the CG will award a contract for construction of one boat to four different manufacturers, with options for full production. The CG will then determine which design (of the boats built) best meets its mission needs, and this design will be selected for full production. Funding for CB-OTH Mark IV hull #1 includes the cost of procuring the boats for this competition. CB-OTH Mark IV hull #2 and beyond will be produced by the manufacturer that wins the "Boat Off" competition. Prior-year funding will be used to construct CB-OTH Mark IV hulls #2-5 after the "Boat Off" competition is complete.

Significant Accomplishments in FY 2010:

- Completed Design, Engineering & Spec. Development for CB-OTH Mark IV and LRI Mark II

FY 2011 Planned Accomplishments:

- Production & Testing CB-OTH Mark IV # 1 (includes "Boat Off" competition hulls)

⁷ CB-OTH is an updated version of the original Short Range Prosecutor (SRP). Eight SRPs were constructed for the 123' Patrol Boats. Hull numbering was restarted with the name change from SRP to OTH. OTH's #1-5 were funded with prior year funding.

Cutter Boats**\$5,000****FY 2012 Planned Accomplishments:**

- Production & Testing LRI Mark II #1&2
- Production & Testing CB-OTH Mark IV #2-9

FUNDING HISTORY

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>

Assembly Subcontractor: Zodiac Hurricane Technologies, Delta, British Columbia, Canada

LRI Mark 1: Willard Marine, Anaheim, California

CB-OTH Mark IV – TBD

CB-LRI Mark II - TBD

Significant Changes

Title is changed from “IDS Small Boats” to “Cutter Boats Project” and different names are used for each type of cutter boat as noted in Section I above (Project Description, Justification and Scope).

Note: A full-year FY 2011 appropriation was not enacted at the time the budget was prepared; thus the FY 2011 appropriation, obligation, and expenditure values are not included in the tables below.

⁸ SRPs #1-8 were built for the 123’ Patrol Boats, which are now decommissioned.

⁹ SRP Hull #9 was never constructed, program was restarted.

Medium Endurance Cutter Sustainment

\$47,000

Project Description, Justification and Scope

This request funds Mission Effectiveness Projects (MEP) on five 270' WMECs. Three of these MEPs will be completed in FY 2012 with the remaining two completed the following year. This work includes replacement of major equipment and systems that are the primary source of degraded operational readiness, such as the main propulsion control and monitoring system, small boat davits, oily water separators, air conditioning, refrigeration, and evaporators. This work will be performed at the Coast Guard Yard in Curtis Bay, MD. The MEP project includes both the 210' and 270' WMECs. The last 210' WMEC MEP was completed in FY 2010, leaving work on 270' WMECs as the focus for the remainder of this project.

The MEP project is intended as a bridging strategy for the WMEC fleet, until it is replaced by the OPC fleet. This funding will improve the overall operational readiness and mission effectiveness of the 270' cutter class. Each 270' WMEC provides 185 days of mission performance; a loss of that capability reduces operational hours and may adversely affect mission performance. Additionally, the MEP will improve 270 WMEC operating and cost performance by replacing equipment that has the highest failure rates with more reliable equipment. Replacing obsolete equipment will yield greater standardization, capability, and reliability across the two WMEC classes. Post-MEP WMECs have an average equipment reliability rate (in terms of decreased number of major casualties) that is nearly double that of pre-MEP WMECs.

MECs have helicopter and small boat capabilities that support operations in the coastal and offshore areas of the Exclusive Economic Zone (EEZ).

CGNR 6017 Helicopter Replacement **\$18,300**

Project Description, Justification and Scope

This funding request replaces one MH-60T Jayhawk Medium Range Recovery (MRR) aircraft (CGNR 6017), lost during a crash in Washington state in 2010. The aircraft will be replaced with a retired Navy SH-60F that will be converted to the Coast Guard MH-60T configuration. This conversion includes installation of a new avionics suite and an Electro Optical Infra-Red (EO/IR) Sensor system (ESS).

The Navy's H-60 Sundown Plan has enabled the Coast Guard to acquire SH-60Fs that are scheduled for retirement but have usable structural service life. The Coast Guard Aviation Logistics Center developed industrial processes to convert SH-60Fs into the MH-60T configuration, and recently completed this conversion with CGNR 6043.

With this and one replacement funded in the FY 2010 Disaster/War Supplemental Appropriation, the fleet will be returned to its full strength of 42 H-60s.

FY 2012 Planned Accomplishments:

- Obtain and convert SH-60F to MH-60T

CONTRACTOR(S):

Product Line: Coast Guard Aviation Logistics Center (ALC)/ Lear Siegler Services, Inc.
Aircraft: Sikorsky, Stratford, CT
Avionics: Rockwell Collins, Cedar Rapids, IA
Power Plant: General Electric, Lynn, MA

FY 2012 Congressional Justification
(Dollars in Thousands)**

Maritime Patrol Aircraft (MPA) HC-144

\$129,500

Project Description, Justification and Scope

This request funds two of 36 planned HC-144A Maritime Patrol Aircraft (MPA) airframes, along with up to 5 Mission System Pallets (MSPs), Non-Recurring Engineering (NRE), and initial spare parts and manufacturing supplies for MPAs and MSPs. These funds will help address the Coast Guard’s MPA flight hour gap by providing 2,400 MPA hours each year.

The first eighteen HC-144 aircraft will be stationed at the following locations:

Mobile, AL (Aviation Training Center & Operational)	Elizabeth City, NC (Product Line)
Miami, FL	Cape Cod, MA
Corpus Christi, TX	

The HC-144A Ocean Sentry is the Coast Guard’s medium-range surveillance (MRS) and transport fixed air capability, complementing the long-range, heavy-lift, four-engine HC-130 aircraft. It replaces and enhances the current capability provided by the HU-25 Falcon. The two-engine high-efficiency turboprop design enables extended surveillance, quick response capability, at a relatively low cost per flight hour. The HC-144A is used to perform Search and Rescue missions; enforce laws and treaties, including illegal drug interdiction and marine environmental protection; perform homeland security and International Ice Patrol missions, as well as assist with cargo and personnel transport. It can perform aerial delivery of Search and Rescue equipment, such as rafts, pumps, and flares, and can be used as an On-Scene Commander platform. The asset delivers maritime domain awareness essential to achieving mission success.

The modern cockpit design provides pilots with superior situational awareness, reduced workload, and increased safety, allowing them to better concentrate on mission execution. Human factors engineering is also evident in the tactical workstations of the MSP. System operators can collect, compile, and transfer vital information in real time to operational commanders on ship or shore, hundreds of miles from the aircraft. Satellite radios provide clear and uninterrupted voice and data exchange. The Automatic Identification System (AIS) allows crews to rapidly identify and monitor vessels, adding a robust layer to border security. As demonstrated during the response to Deepwater Horizon, the multi-mode radar can detect differences in backscatter between clear water and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the Electro-Optical/Infrared (EO/IR) sensor can detect the small temperature variation between clear and oil-covered water. The Common Operating Picture (COP) provides the capability to navigate to previously-marked pollution areas and update them based on current C4ISR and visual indications. Unlike the HU-25, the HC-144A has a rear ramp to facilitate easy roll-on/roll-off provisions from the cargo bay. This quick-change feature allows ground crews to re-configure the aircraft between maritime patrol, medical evacuation, and passenger/freight transport. Its medium size and high-lift wing design allow take-off and landing on

U. S. Coast Guard - FY 2012 Congressional Justification

Maritime Patrol Aircraft (MPA) HC-144

\$129,500

short, unpaved landing areas, further enhancing the Coast Guard’s abilities to serve its broad array of missions.

Prior Accomplishments:

- MPA 1 – 3 Delivery 2007
- MPA 4 – 5 Delivery 2009
- MPA Initial Operating Capability (IOC) 2009
- MPA 6 – 8 Delivery 2009

Significant Accomplishments in FY 2010/2011:

- Contract Production of MPA airframes
- MPA 9 – 11 Delivery
- Delivery of 6 MSPs
- Contract for Full-Motion Flight Simulator

FY 2012 Planned Accomplishments:

- MPA 12 – 14 Delivery
- Contract Production of two MPA airframes and five Mission System Pallets

HH-60 Conversion Projects

\$56,100

Project Description, Justification and Scope

This funding request continues the modernization of the Coast Guard's fleet of 40¹¹ H-60 Jayhawk, Medium Range Recovery (MRR) helicopters as these helicopters rotate through Programmed Depot Maintenance at the CG Aviation Logistics Center (ALC). The H-60 Conversion Project is comprised of four discrete segments and two service life extension efforts.

Each segment consists of upgrades to and modernization of aging components and sub-systems that enhance the aircraft's overall capability. In conjunction with prior year appropriations, funds will allow the continued implementation of two of the segments: Avionics and Electro-Optical Infrared (EO/IR) Sensor System Upgrades (ESS). It further allows for development and testing of the Radar Sensor System (RSS) that will replace the weather-search radar with a more capable multi-mode surface search radar system. The Avionics Upgrade replaces obsolete MH-60J avionics with modernized equipment and aligns configuration with the DoD Common Avionics Architecture System as well as the Coast Guard's H-65 helicopter. After installation, the avionics upgrades result in redesignation of the aircraft to MH-60T, include Multi-Functional Display screens, a radar altimeter with verbal low altitude alarm and Traffic Collision Avoidance System to enhance safety during night hovering and increase pilots' overall situational awareness. The ESS segment replaces the obsolete Forward Looking Infra-Red (FLIR) sensor with an enhanced EO/IR sensor common to all Coast Guard helicopter platforms. In addition, the funding allows for necessary Service Life Extension Program work items, including electrical re-wiring and dynamic component replacement.

H-60 helicopters are stationed out of the following locations:

Mobile, AL (ATC)	San Diego, CA	Elizabeth City, NC (PL & Ops)
Sitka, AK	Clearwater, FL	Astoria, OR
Kodiak, AK	Cape Cod, MA	OPBAT

ATC: Aviation Training Center

PL: Product Line

Ops: Operations

OPBAT: Operations Bahamas Turks & Caicos

The larger and more powerful all-weather Sikorsky H-60 Jayhawk is the Coast Guard's medium-range recovery (MRR) rotary wing air capability, complementing the Coast Guard's H-65 short-range recovery helicopter. It has been in operation since 1990. The MRR can perform surveillance missions and provides the critical means to detect, classify, identify and prosecute in order to interdict drugs or

¹¹ The current fleet of H-60s includes 40 aircraft, accounting for the recent losses of CGNR-6028 and CGNR-6017. FY 2010 supplemental appropriation (P.L. 111-212) funds the replacement of CGNR-6028. The FY 2012 President's budget requests funding to replace CGNR-6017, restoring the fleet to 42 aircraft.

HH-60 Conversion Projects

\$56,100

migrants, protect living marine resource, relay the location of oil-covered surfaces and enforce safety and security zones. Because of the extended-capacity fuel tanks, the H-60 is often called upon for Search and Rescue missions far offshore. It is capable of flying up to 300 miles offshore and picking up six or more survivors and returning safely to shore.

Prior Accomplishments:

- H-60T Avionics Upgrade Preliminary Design 2004
- H-60T Avionics Upgrade Detail Design 2005
- H-60T Avionics Upgrade Installations Begin 2006
- H-60T SLEP / Legacy Re-Wire Begin 2006
- H-60T Radar / EO/IR Sensor Selection Begin 2007
- H-60T Engine Sustainment Begin 2007
- H-60T Engine Sustainment Full Production 2008

Significant Accomplishments in FY 2010:

- H-60T Avionics Upgrade Initial Operating Capability Achieved
- Begin Dynamic Component Recapitalization

FY 2011 Planned Accomplishments:

- H-60T Acquisition Decision Event 3 (Obtain Phase) for Avionics Upgrade and ESS
- Achieve H-60T ESS Initial Operating Capability

FY 2012 Planned Accomplishments:

- Continue H-60T EO/IR and Avionics Upgrades

Significant Changes

FY 2012 funding reflects the anticipated procurement schedule. Current analysis determined that many dynamic components (helicopter blades, etc.) slated for recapitalization beginning in FY 2013 are reaching the end of the service life more quickly than anticipated. Consequently, recapitalization of these components began in FY 2011 using prior year funding, and will continue until FY 2017, as part of this project.

Note: A full-year FY 2011 appropriation was not enacted at the time the budget was prepared; thus the FY 2011 appropriation, obligation, and expenditure values are not included in the tables below.

Project Schedule

HH-65 Conversion and Sustainment Projects

\$24,000

Project Description, Justification and Scope

This funding request continues to modernize the Coast Guard's current fleet of 100¹² H-65 helicopters, extending their service life through 2027. The H-65 Conversion and Sustainment Project is comprised of six discrete segments. Each of the six discrete segments consists of upgrades to

and modernization of aging components and sub-systems that enhance the aircraft's overall capability. The first three segments have been funded. This request continues to fund a portion of the production and development of two project segments: Discrete segment 4, Obsolete Component Modernization; and Discrete Segment 6, Automatic Flight Control System (AFCS) and Cockpit Modernization. The upgrades replace analog with digital technology and provide cockpit architecture common to other Coast Guard assets and DoD, enhancing system interface and sensor integration. Logistics support elements required to operate and maintain the modernized H-65 are embedded within each of the discrete segments, including initial sparing, training aids and support, technical data, support equipment and supply support.

H-65 helicopters are stationed out of the following locations:

Mobile, AL (ATC)	Barbers Point, HI	Atlantic City, NJ
Kodiak, AK	Waukegan, IL (AIRFAC)	Humboldt Bay, OR
Los Angeles, CA	New Orleans, LA	North Bend, OR
San Francisco, CA	Detroit, MI	Borinquen, PR
Washington, DC (NCRAD)	Muskegon, MI (AIRFAC)	Corpus Christi, TX
Jacksonville, FL (HITRON)	Traverse City, MI	Houston, TX
Miami, FL	Elizabeth City, NC (PL)	Port Angeles, WA
Savannah, GA		

ATC: Aviation Training Center

NCRAD: National Capital Region Air Defense

HITRON: Helicopter Interdiction Tactical Squadron

AIRFAC: Air Facility maintained May-September

PL: Product Line

The H-65 Dolphin is the Coast Guard's short-range recovery helicopter (SRR), which has been in operation since 1984. Due to its size and weight, the H-65 integrates with the NSC, OPC and all current Major Cutters. When the project is completed, the fully upgraded H-65 will be referred to as the SRR Helicopter. It will be a much more capable and interoperable asset with increased aircraft performance, state-of-the-market avionics and surveillance equipment, and provisions for weapons. The SRR extends

¹² The current fleet of H-65s includes 100 aircraft, accounting for the loss of 6505 and 6523.

U. S. Coast Guard - FY 2012 Congressional Justification

HH-65 Conversion and Sustainment Projects

\$24,000

the surveillance capability of the cutter over the horizon and provides the critical means to detect, classify, identify and prosecute in order to interdict drugs or migrants, protect living marine resource, relay the location of oil-covered surfaces and icebergs and enforce safety and security zones. The H-65 is also a critical Search and Rescue asset and further provides support for repair of Aids to Navigation.

PROJECT HISTORY

During the first segment, the original fleet of 95 HH-65B model aircraft received new, more powerful engines, resulting in redesignation as HH-65C. The second segment increased the fleet size by seven aircraft to support the Coast Guard's newly assumed National Capital Region Air Defense (NCRAD) mission. This segment was funded outside the H-65 Conversion and Sustainment Project. The third segment, Airborne Use of Force (AUF), provided upgrades to the communications sub-systems to provide interoperability with other Homeland Security components and local response agencies. Additionally, the aircraft were configured and pre-wired to allow for the installation and removal of special AUF mission equipment (e.g., weapons, armor, Electro-Optical Infra-Red (EO/IR), Heads Up Display), resulting in designation of these aircraft as MH-65C. This discrete segment was also funded outside the H-65 Conversion and Sustainment Project and will be completed in FY 2012.

Prior Accomplishments:

- Engine Upgrade Completed 2007

Significant Accomplishments in FY 2010:

- Continued AUF and obsolete component upgrades

FY 2011 Planned Accomplishments:

- Continue obsolete component and AUF upgrades
- Complete National Capital Region Air Defense Project Segment

FY 2012 Planned Accomplishments:

- Continue obsolete component and cockpit modernization upgrades

HC-130H Conversion and Sustainment Projects

\$62,000

Project Description, Justification and Scope

This funding request continues to modernize the Coast Guard's fleet of HC-130H Long Range Surveillance (LRS) aircraft. The project is comprised of five discrete segments. The first segment, Surface Search Radar is near completion. This request funds portions of three other segments of the HC-130H conversion/sustainment acquisition as follows:

- (1) HC-130H Avionics I Upgrade (A1U)
- (2) Center Wing Box (CWB) replacement
- (3) Mission System Sustainment/Upgrade

Prototype installation and test of the new digital cockpit as part of the Avionics I Upgrade, will continue and include multi-function displays that will provide aircrews with increased situational awareness, reduced cockpit workload, and replace non-sustainable components. Additionally, funding will be used to order A1U digital cockpit components and will provide for their installation. Prior year funding was used to purchase six CWBs, all of which will be delivered in FY 2011; FY 2012 funding will be used to begin installation of those CWBs. FY 2012 funding will also be applied toward Non-Recurring Engineering (NRE) work for the Mission System Sustainment/Upgrade and the second-generation avionics upgrade (A2U).

The HC-130H is a major contributor to overall performance of the Coast Guard's statutory missions with specific contributions to Maritime Law Enforcement, Maritime Response, Defense Operations, and Marine Transportation System Management. HC-130H aircraft are stationed out of the following locations:

Kodiak, AK	Barbers Point, HI	Elizabeth City, NC (PL)
Sacramento, CA	Clearwater, FL	

PL: Product Line

Various models of the Lockheed C-130 Hercules have served as the Coast Guard's long range surveillance (LRS) aircraft since 1959, and the current HC-130H fleet has been in service since the early 1980s. The HC-130H is powered by four Allison T56-A15 engines driving Hamilton Standard four-bladed propellers. When all fuel tanks are filled, the aircraft is capable of extended range (>2600 miles in low-altitude flight). With reduced fuel loads, the aircraft can carry a 40,000 pound payload. A large cargo compartment area, easily accessed through a large rear ramp, can accommodate a wide range of cargo. The aircraft's high-lift capability allows takeoff and landings from short, unimproved runways.

With its flight-management and sensor systems, the HC-130H is a very capable maritime patrol aircraft, equipped with a powerful surface search radar that can detect surface targets from over 50 miles away. Once closer to a target, the sensor operator uses the Forward-Looking Infrared Radar (FLIR) and Electro

HC-130H Conversion and Sustainment Projects \$62,000

Optical (EO) sensor to classify and identify the target, even in night or low-light conditions. A flight-management system that includes an automatic-pilot and precise GPS navigation equipment allows the pilot to concentrate on mission management. Large scanner windows on either side of the cargo compartment provide aerial observers with a bird’s eye view of the search areas in favorable visual conditions. The LRS performs surveillance missions and provides the critical means to detect, classify and identify targets. This information is shared with “end game” capabilities to interdict drugs or migrants, protect living marine resources, and enforce economic, safety and security zones. The HC-130H can perform aerial delivery of Search and Rescue equipment, such as rafts, pumps, and flares, and can be used as an On-Scene Commander platform. The asset delivers maritime domain awareness essential to achieving mission success.

Prior Accomplishments:

- HC-130H Radar Replacement Project Contract Award 2005
- Radar Preliminary Design Review 2006
- Radar Critical Design Review 2006
- Prototype Delivery 2006
- APS-137 Radar Replacement Developmental Test & Evaluation Complete 2007
- APS-137 Radar Replacement Installs Complete on 10 Aircraft 2008
- Avionics one Upgrade System Requirement Review 2009

Significant Accomplishments in FY 2010:

- APS-137 Radar Replacement Installs Complete
- Avionics I Upgrade Preliminary Design Review

FY 2011 Planned Accomplishments:

- Avionics I Upgrade Critical Design Review and Prototype Development
- Commence Missionization Non-recurring Engineering
- Delivery of 6 CWBs

FY 2012 Planned Accomplishments:

- Installation of first CWB
- Avionics I Upgrade Prototype Test

Government Program Management **\$35,000**

Project Description, Justification and Scope

This request provides funding for government program management and oversight. Program management funds provide support for government administration, technical reviews, technology analysis, performance monitoring of the program, Operational Test and Evaluation (OT&E), transition management, and risk management. This activity provides support to Coast Guard acquisition projects, and is critical as the Coast Guard has assumed the role of Lead System Integrator.

The Coast Guard is responsible for ensuring the products delivered by contractors and suppliers meet performance specifications. This requires sound management policies and the processes needed to implement them. Specifically, program management funds provide the Coast Guard with the capability to protect the government's interests during the acquisition and ensure contractors and suppliers deliver required products and services and meet prescribed terms and conditions. The Coast Guard accomplishes this management and oversight through staff located at the Program Management Office and at other contractor/government sites. Personnel working on acquisition projects include a mix of military, civilian, and support contractors experienced in all phases of large, complex acquisition programs.

Technology is constantly changing and several technology refreshes or upgrades are planned over the projected duration of numerous Coast Guard acquisition projects. Government program management personnel analyze the capability and applicability of these replacement technologies. Support contractors assist in this effort by gathering and assembling data that facilitates informed government decision-making.

Government program management funding also supports performance measurement of major acquisition project contracts. This is accomplished through the use of a variety of tools such as the Earned Value Management System (EVMS), periodic reports to DHS and Congress, and the Acquisition Performance Management System (APMS). EVMS permits the Coast Guard to closely follow cost and schedule performance of the projects by asset, while the reports and APMS data allow for periodic internal and external reviews of program cost, schedule, and performance criteria.

Government program management funding also supports OT&E done with the U.S. Navy's Commander Operational Test and Evaluation Forces (COMOPTEVFOR) for the execution of project operational testing. While Developmental Test and Evaluation (DT&E) is the responsibility of the contractor, OT&E is an inherently governmental responsibility.

Government program management funding supports activities associated with the transition of Coast Guard's assets from acquisition to operation, including delivery, provision of logistics, training and other services necessary to ensure seamless integration into the operational fleet.

U. S. Coast Guard - FY 2012 Congressional Justification

Systems Engineering and Integration (SE&I) **\$17,140**

Project Description, Justification and Scope

This request funds system engineering design and integration work across the Coast Guard's major recapitalization projects. This request impacts every aspect of the Coast Guard enterprise—encompassing the integration of human capital management; information technology; capital investment planning for air and surface platforms; logistics; command, control, computers, intelligence, surveillance, and reconnaissance; and most importantly - the fleet operator. SE&I supports the following activities:

- Systems Engineering
 - System architecture development
 - Operational performance analysis
 - Cost reduction efforts
 - Enterprise-level requirements management support
- Enterprise-level system integration
- Interface management
- Configuration management
- Technical data management
- Technical assessment
- Decision analysis support

SE&I is essential for interoperability at the unit, system, and organizational levels, both internal and external to the Coast Guard. Effective systems integration ensures systems operate in a manner that minimizes the cost of asset acquisition, operations and maintenance, and mitigates risk inherent to a complex acquisition program. SE&I is also intended to maximize the ability of Coast Guard assets to operate in concert with each other, and with those of partner agencies (e.g., DoD, other government agencies, and state and local responders). Furthermore, by leveraging common system engineering processes, tools, standards, and Coast Guard infrastructure to the greatest extent possible, SE&I minimizes major system acquisition life-cycle costs.

The Coast Guard is fielding an integrated system of aviation, cutter, and shore assets that are interoperable through a comprehensive Command, Control, Computers, Communications, Intelligence, Surveillance, and Reconnaissance (C4ISR) detection and communications structure. Without SE&I, these assets and sub-systems might be implemented in an inefficient and ineffective manner. For example, one aspect of SE&I involves establishing a methodology for managing requirements decomposition. Rather than have each acquisition program create “stove-piped” processes, databases and decision criteria, SE&I funds a common requirements database architecture that facilitates rapid searches for common requirements, systems, and interfaces between assets. These also facilitate better alignment with federal enterprise architecture mandates. In addition, SE&I also funds modeling and simulation of capabilities across all new asset acquisitions. This provides better decisions from a holistic perspective to deliver required capabilities as efficiently as possible. SE&I emphasizes a CG-wide view of each individual project, yielding recognition of corresponding upgrades needed across other platforms and programs.

U. S. Coast Guard - FY 2012 Congressional Justification

Systems Engineering and Integration (SE&I) \$17,140

System engineering evaluations will be performed across system, subsystem, and component levels to analyze products and capabilities for interoperability, integration, modularity, and system commonality for designs and for all proposed engineering changes. These efforts culminate in the ability to determine and document predicted total system performance for numerous configurations and scenarios. Systems engineering has the responsibility for the overall technical configuration development processes. Because the Coast Guard has become the Lead System Integrator, a process started in FY 2008, SE&I also delivers an integrated master schedule across programs which are needed to reduce government, and or contractor delay costs, as the interdependency between multiple contracts becomes a Coast Guard responsibility. SE&I also funds an integrated data environment that allows all stakeholders access to appropriate documents as each program, technical authority, and contractor works through engineering processes.

C4ISR

\$34,500

Project Description, Justification and Scope

This request includes funding for the Command, Control, Computers, Communications, Intelligence, Surveillance, and Reconnaissance (C4ISR) hardware and software design of the OPC with modifications to design of new MPAs, MSPs, NSCs, and FRCs consistent with the ongoing transition to a federated (Coast Guard) C4ISR design (Segment 2) that is scalable in useable modules. Interoperable and integrated C4ISR is essential to the efficient and effective operation of these assets. These cutters and aircraft are critical to the execution of the CG's statutory missions and FYHSP Programs. FY 2012 funding will enable the following activities:

- *OPC-Specific Design.* A tailored software and hardware baseline will address OPC-specific requirements, using the NSC C4ISR design as a starting point. This design effort will allow for interoperability of the OPC with other new cutters and air assets, as well as between DOD and other DHS assets.
- *Use of Navy Developed Sensors and Systems.* Cost sharing and alignment with DOD weapons systems will decrease life-cycle costs of Coast Guard systems. Efforts to incorporate and leverage DOD systems allow the NSC to deploy with the Navy with clearance to use its weapons. As DOD updates its systems, integration with the relevant updated systems will require corresponding adjustments.
- *Labs.* Lab work is necessary for the Coast Guard to continue development of the C4ISR suite for OPCs and other existing cutters and aircraft that are still in production (e.g., NSCs, MPAs). Additionally the labs will facilitate the Coast Guard systems integrator (SI) role and provide proper oversight, integration, and testing. They also reduce lifecycle costs by controlling configuration management, decrease impacts to users by reducing or eliminating tests on operational platforms, and reduce schedule by providing a dedicated testing and analysis venue. Labs include:

Lab Location.....Purpose of Lab

- Camden, NJCommunications development
- Charleston, SCNSC Sensitive Compartmented Information Facility (SCIF) production integration and test facility
- Eagan, MNAircraft mission system pallet development
- Lowell, MAEmissions security (TEMPEST) certification test facility
- Moorestown, NJMaritime Domain Awareness Center (MDAC) – asset baseline integration/development; there is also a separate Government asset baseline acceptance lab in Moorestown.
- Portsmouth, VAC4I software support & legacy integration

- *Execution Support.* In FY 2011, the C4ISR project will deliver a federated system for better Coast Guard Management to facilitate assumption of SI roles. OPC C4ISR acquisition will have multiple vendors and contracts requiring increased oversight. As the Coast Guard continues to increase oversight and manage integration of multiple vendors, execution support is needed to continue to

C4ISR

\$34,500

assist government personnel in overseeing software development, synthesizing requirements decomposition, and executing other program management functions.

- *Information Assurance (IA)*. This includes updates to ensure C4ISR systems comply with continuously evolving DHS and DOD standards regarding IA.
- *Engineering Change Proposals/Updates*. These efforts provide updated software and hardware designs for assets currently in production. Design updates are needed due to external impacts such as interoperability architecture changes, diminished manufacturing sources, hardware changes, and interface changes.

KEY EVENTS

Unless specified otherwise, the following accomplishments are within Segment 2 – a modular, “next generation” version of Segment 1 baseline design (the previous C4ISR design under ICGS’ “system of systems” construct).

Significant Accomplishments in FY 2010:

- *OPC Design*
 - Formalized C4ISR acquisition strategy for OPC
 - Started design analysis of OPC C4ISR requirements
- *Design Deliveries*
 - Delivery of Segment 2 design
 - Delivery of upgraded external communications design to USCGC BERTHOLF (WMSL-750)
 - Delivery of hardware and software design from Segment 2 base contract
- *Integration Facility Stand Ups*
 - SCIF Test and Integration Facility
 - CG Command and Control Engineering Center support and legacy integration facility
- *Major Cutter Upgrades*
 - Begin Ku band upgrades on High and Medium Endurance Cutters (HECs/MECs)
 - Start of Integrated Waveform Military Satellite Communications upgrades on MECs

FY 2011 Planned Accomplishments:

- *Aircraft*
 - Standardize C-130 and MPA Mission System Pallet design to minimize lifecycle costs
- *Vessels*
 - Develop the hardware and software requirements for the OPC
 - Deliver federated (modular) C4ISR design for implementation on the NSC and use as base for OPC
- *Information Assurance*
 - Critical system updates for safety, IA, and diminishing manufacturing sources

FY 2012 Planned Accomplishments:

- *OPC*
 - Tailor Segment 2 design to meet OPC requirements
- *NSCs and MPAs*

U. S. Coast Guard - FY 2012 Congressional Justification

C4ISR

\$34,500

- Commence design and changes to Segment 2 C4ISR hardware and software intended for new NSCs and MPAs. The Segment 2 C4ISR system capabilities include: redundant tactical networks, SCIF integration, integrated weapons systems, communications equipment, sensor control, command and control displays, computing hardware, network hardware, navigation systems, and integration of all sensor, navigation, and weapons systems to establish the Common Operating Picture.

FUNDING HISTORY

C4ISR ASSETS	Segments 1, 2* NSC, MPA, MSP	Segment 5 (Upgrades) **		FY Totals (\$K)
		MECs, HECs	SHORE FACILITIES	
FY 2002	\$110,254	\$ 12,940	\$ 2,286	\$125,480
FY 2003	\$ 10,782	\$ 6,282	\$ 4,968	\$ 22,032
FY 2004	\$ 74,316	\$ 7,058	\$ 19,760	\$101,134
FY 2005	\$ 32,326	\$ 1,500	\$ 19,774	\$ 53,600
FY 2006	\$ 45,764	\$ 464	\$ 1,292	\$ 47,520
FY 2007	\$ 39,552	\$ 331	\$ 10,117	\$ 50,000
FY 2008	\$ 83,730	\$ 400	\$ 5,500	\$ 89,630
FY 2009	\$ 77,100	\$ 11,000		\$ 88,100
FY 2010	\$ 35,000			\$ 35,000
Subtotals	\$508,824	\$ 39,975	\$ 63,697	\$612,496

* **Segment 1** used ICGS' "system of systems" approach that is concluded. **Segment 2** is a modular, "next generation" version of Segment 1's baseline design that includes the following work – *Design*: Hardware/Software; *IA*: Information Assurance; *Labs*: simulators, initial training, testing & support (for new assets: NSC, OPC, MPA, and Mission System Pallet). ** **Segment 5 (Upgrades)** to existing assets): MECs-210s/-270s; HECs-378s. SHORE FACILITIES - CAMS (Communications Area Master Stations), Training Center Petaluma, (Communications Stations), Command Centers. Note: Segment 4 (net-centric capability) design is scheduled in out years.

Significant Changes

OPC requirements have evolved, as have the requirements for its C4ISR suite, which will leverage the Segment 2 federated (modular) baseline with the Coast Guard as System Integrator, and involve multiple engineering and development contracts. The OPC baseline will be the primary deliverable of the next contracted effort.

Note: A full-year FY 2011 appropriation was not enacted at the time the budget was prepared; thus the FY 2011 appropriation, obligation, and expenditure values are not included in the tables below.

FY 2012 Congressional Justification
(Dollars in Thousands)

CG-LIMS

\$6,500

Project Description, Justification and Scope

This request supports the delivery of the Coast Guard Logistics Information Management System (CG-LIMS). This funding will continue CG-LIMS development and phased deployment to Coast Guard operational assets and support facilities. Specifically, the funding will support Initial Operating Capability of the Configuration and Maintenance Management module of CG-LIMS, along with development of the Supply Chain Management module.

CG-LIMS will directly support the Coast Guard goal of a single, unified logistics system that improves mission readiness, operational effectiveness and decision making by enabling decision support at the enterprise and tactical level. CG-LIMS will adhere to the Mission Support Business Model, providing: Configuration Management; Total Asset Visibility; Bi-Level Maintenance; and a single point of accountability through Product Line Managers. In addition, CG-LIMS will allow the organization to satisfy logistics-related financial management requirements of the Chief Financial Officers Act of 1990 and the Federal Financial Management Improvement Act of 1996 by capturing financial data at the transaction level and providing transparent integration with the Coast Guard core accounting system.

CG-LIMS will be the authoritative source for the configuration of all Coast Guard assets. It will enable product line management by providing total asset visibility throughout the enterprise. It will be the tool through which all maintenance is managed, and by which the enterprise supply chain is driven. All technical information relating to Coast Guard assets, including technical publications and manuals, drawings, maintenance procedure cards, and maintained raw data will be organized and managed in the system. The components of configuration, maintenance, supply, and technical information will be tightly integrated and configured to allow efficient execution of a standardized business process. As mission support is executed throughout the Coast Guard, CG-LIMS will interface with finance, procurement, and human resources so that enterprise business needs are met in a standardized manner. CG-LIMS will also reach out to systems beyond the Coast Guard to execute integrated logistics with other government agencies and vendors.

CG-LIMS is planned for phased implementation by segments. Segment 1 will start with configuration and maintenance management functionality for the HC 144A Maritime Patrol Aircraft (MPA) aviation product line; once deployed to that product line, Initial Operating Capability (IOC) will be declared. Immediately following IOC, Segment 1 will be deployed to other asset product lines. CG-LIMS will continue to be deployed by segments across the enterprise; Full Operational Capability (FOC) will be declared when the last segment, Segment 5, is deployed to all product lines. Deployment of Segment 5 will then continue across the enterprise with CG-LIMS replacing legacy databases such as the Asset Logistics Management Information System, Fleet Logistics System, and Shore Asset Management System.

U. S. Coast Guard - FY 2012 Congressional Justification

CG-LIMS

\$6,500

The five CG-LIMS segments are:

- Segment 1: Configuration and Maintenance Management
- Segment 2: Supply Chain Management
- Segment 3: Technical Data Management
- Segment 4: Financial Integration
- Segment 5: Human Resources and External Integration

FUNDING HISTORY

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>
2008	\$1,900	CG-LIMS ICGS to U.S. Coast Guard Transition
2009	\$500	CG-LIMS Alternatives Analysis
2010	\$6,000	CG-LIMS Pre-acquisition Activities, Cost Estimates and Program Management Support
<i>Total</i>	<i>\$8,400</i>	<i>Funding received for FY 2004 through FY 2010</i>

Significant Changes

This is the first submission for CG-LIMS under the post-Integrated Deepwater Systems construct. Previous work managed under this program was conducted under the Deepwater Logistics Acquisition Project. Deepwater Logistics was disaggregated into CG-LIMS within the “Other” sub-appropriation and Major Acquisition Systems Infrastructure (MASI) within the “Shore and Aids to Navigation” sub-appropriation.

Note: A full-year FY 2011 appropriation was not enacted at the time the budget was prepared; thus the FY 2011 appropriation, obligation, and expenditure values are not included in the tables below.

U. S. Coast Guard
Acquisition, Construction & Improvements
FY 2012 Congressional Justification
(Dollars in Thousands)

Nationwide Automatic Identification System (NAIS)

\$5,000

Project Description, Justification and Scope

The FY 2012 request will be used to continue recapitalizing the existing interim NAIS system in 58 ports by replacing it with the permanent solution design and technology via the core system upgrade. Below on the left is an example of an interim site in Tranquillon Mountain, CA that is anchored by cinder blocks. When recapitalized with the permanent solution, the NAIS equipment will be installed to co-locate with Rescue 21 (R21) infrastructure, such as the tower pictured below in San Onofre, CA.

Tranquillon Mountain, California
(Interim capability)

R21 tower in San Onofre, California
(Permanent co-located infrastructure)

NAIS is a data collection, processing, and distribution system being implemented in response to the requirements of the Maritime Transportation Security Act and consistent with the International Maritime Organization (IMO) standards to enhance maritime domain awareness (MDA). The project provides the necessary capability to ensure the effective exchange of information between AIS-equipped vessels, aircraft, aids to navigation, and shore stations within all major US ports, waterways, and coastal zones. The data collected by NAIS will be shared with other pertinent stakeholders and decision makers in support of maritime security at critical ports.

Significant Accomplishments in FY 2010:

- Began deploying the NAIS core system upgrade to the Coast Guard's Operations Systems Center, the Navigation Center, and the first three sectors: Mobile, AL; Hampton Roads, VA; and Delaware Bay (Philadelphia, PA) that will replace the interim capability at eight of the 58 ports with the permanent system.
- Completed site surveys of R21 sites within one sector (Sector New Orleans) to collocate NAIS equipment with R21 infrastructure.

Nationwide Automatic Identification System (NAIS)

\$5,000

FY 2011 Planned Accomplishments:

- Establish initial operating capability of the permanent system upon deployment to the first three sectors: Mobile, AL; Hampton Roads, VA; and Delaware Bay (Philadelphia, PA).
- Complete site surveys of R21 sites within four sectors (Sectors Houston-Galveston, Corpus Christi, Long Island Sound and New York) to co-locate NAIS equipment with R21 infrastructure to provide NAIS coverage for ports within these sectors.

FY 2012 Planned Accomplishments:

- Equipment deployments to Sectors New Orleans and Houston Galveston that will upgrade another ten of the 58 ports with the permanent system.
- Complete site surveys of R21 sites within four sectors (Sectors Baltimore, San Francisco, LA/LB and San Diego) to co-locate NAIS equipment with R21 infrastructure to provide NAIS coverage for ports within these sectors.
- Equipment acquisition, including procurement of NAIS base station equipment, antennas, networking equipment, annual software licensing, and other shelter and site equipment for three sectors
- Continue one-for-one replacement of interim prototype capability originally deployed in 58 ports, with permanent solution design and technology.

CONTRACTOR

- Prime Contractor for the design and installations of the permanent solution in the first three Sectors – Northrop Grumman Space and Mission Systems, Inc. (Herndon, VA).
- Implementation Contractor(s) for the permanent solution in the remaining sectors – To be determined.

Significant Changes

No significant changes.

Note: A full-year FY 2011 appropriation was not enacted at the time the budget was prepared; thus the FY 2011 appropriation, obligation, and expenditure values are not included in the tables below.

Compliance with Public Laws, Regulations, Standards & Executive Orders

Adhering to the National Environmental Policy Act (NEPA), the NAIS project has completed a Programmatic Environmental Impact Statement (PEIS), dated October 6, 2006. The proposed action analyzed in the PEIS is the broad scope of implementation of the NAIS project. As supported by the analysis in the PEIS, the NAIS Project Manager decided to implement the project using the preferred alternative: a combination of coverage mechanisms, including a combination of collocated and newly

Nationwide Automatic Identification System (NAIS)

\$5,000

built shore-based Radio Frequency (RF) sites for short-range AIS coverage. Implementation of the proposed NAIS project through the Preferred Alternative ensures that the Coast Guard satisfies the purpose and need for NAIS. The Preferred Alternative implementation approach offers siting flexibility that will help mitigate or minimize the potential for environmental impacts as well as allow the Coast Guard to maximize the use of existing assets to meet coverage requirements. This decision is documented in a Record of Decision issued on October 27, 2006.

The PEIS provides a general level of analysis of alternatives and environmental impacts and serves as a top-tier environmental analysis of the general project of installing a nationwide AIS-based vessel detection, identification, tracking, and communication system. As a continuation of the environmental planning process, the Coast Guard is conducting site-specific environmental analysis coincident with the project implementation as specific sites are identified. All sites selected and upgraded with the NAIS permanent solution capability will be surveyed and likely will be categorically excluded from further analysis under NEPA.

U. S. Coast Guard
Acquisition, Construction & Improvements
FY 2012 Congressional Justification
(Dollars in Thousands)

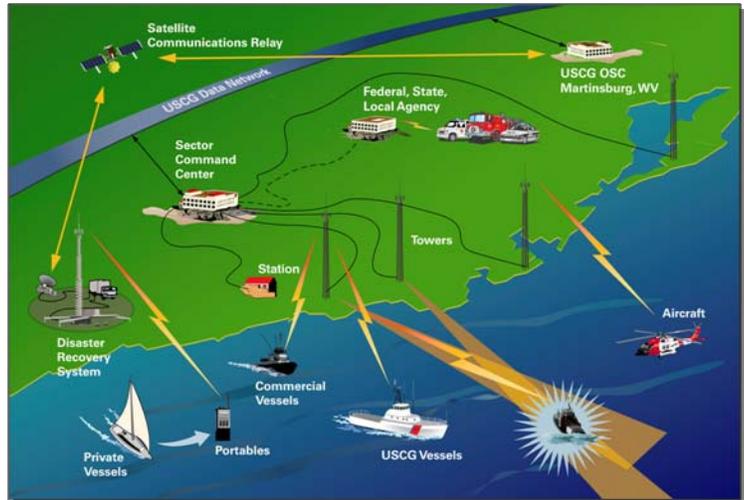

Rescue 21

\$65,000

Project Description, Justification and Scope

This request funds the continuation of the Full Rate Production contract with General Dynamics C4 Systems (GDC4S), in addition to deployment in Alaska, Western Rivers, and on Coast Guard vessels.

The Rescue 21 project is replacing the U.S. Coast Guard's legacy National Distress and Response System (NDRS) equipment, which enhances the Coast Guard's mission execution through improved communications, command and control capabilities in the U.S. coastal zone. The basic NDRS components include radios, transceivers, towers for antennas, and an interconnecting network. It is the foundation for coastal SAR (search and rescue), and is a critical enabler of efficient and effective command and control for all missions in coastal zones. As of December 2010, Rescue 21 is standing watch and saving lives along approximately 36,985 miles of U.S. coastline.

Benefits of Rescue 21 include:

- Eliminates many existing communication coverage gaps ("dead zones") while ensuring continuous, enhanced VHF-FM marine radio coverage out to 20 nautical miles from shore within the coastal zone;
- Features digital voice recording capability with immediate playback, improving the ability to review and resolve garbled or unclear transmissions - critical to search and rescue planning and response;
- Improves direction finding capability for more timely response to mariners in distress and an ability to distinguish "hoax" calls from actual distress calls;
- Adds four voice channels (from one to five), allowing watch standers to conduct multiple operations, while offering protected (secure) communications for homeland security missions when needed;
- Provides Digital Selective Calling capability to meet the international Global Maritime Distress and Safety System (GMDSS) requirements for Sea Area 1 per the Safety of Life at Sea (SOLAS) treaty;
- Enhances Maritime Domain Awareness (MDA) by maintaining communications with mariners, and facilitating the timely flow of information between the Coast Guard and other government and law enforcement agencies.

Significant Accomplishments in FY 2010: *Rescue 21 Ground Subsystem (GSS) Deployment – Full Rate Production (FRP) Group III.* Completed deployment in the Northeast (Sectors Southeastern and Northern New England), the Gulf Coast (Sector Corpus Christi), and continued deployment in the West Coast (Sectors San Francisco and San Diego), for a cumulative addition of 7,482 miles of coverage.

U. S. Coast Guard - FY 2012 Congressional Justification

Rescue 21

\$65,000

FY 2011 Planned Accomplishments: *Rescue 21 GSS Deployment – FRP Group III.* Completes deployment along the West Coast (Sector Los Angeles/Long Beach), and most of Great Lakes (Sectors Detroit, Buffalo, and Sault Ste Marie, MI), for a cumulative addition of 2,933 coastline coverage miles.

FY 2012 Planned Accomplishments: *Rescue 21 GSS Deployment – FRP Group III.* Completes deployment in the Great Lakes (Sector Lake Michigan) and the OCONUS Islands (Sectors San Juan, PR; Honolulu, HI; and Guam), for a cumulative addition of 3,190 coastline coverage miles.

Rescue 21's Deployment / Acceptance Schedule with its prime contractor is provided as follows. Unless otherwise indicated as a Group (and Air Station), the locations listed below are Coast Guard Sectors.

*New Orleans coastal accelerated deployment was achieved via supplemental appropriations following Hurricanes Rita and Katrina; **Former command merged with new Sector per USCG's Sector re-organization.

Western Rivers, Alaska and Vessels: In addition to completing deployment of the Rescue 21 GSS, the FY 2012 request includes the following:

- \$6 million to recapitalize the legacy NDRS in the Western Rivers (Sectors Ohio Valley, Upper Mississippi River, and Lower Mississippi River);
- \$9.5 million to continue deployment to Alaska; and
- \$1.5 million to continue installation of Rescue 21 communications equipment on vessels.

Production Contractor: GDC4S of Scottsdale, AZ is the Rescue 21 Phase II Contractor. The Phase II contract is a delivery order-based Indefinite Delivery, Indefinite Quantity (IDIQ) contract with award term incentives. The contract has a base period of six years, plus two four-year award terms and one five-year award term. GDC4S is responsible for complete system maintenance and operates a 24/7 Customer Care Center to respond to system discrepancies.

Subcontractors:

- Motorola, Inc. (Schaumburg, IL) – Radio subsystems
- Consolidated Analysts Centers, Federal, Inc (Manassas, VA) – Direction finding subsystems
- General Dynamics Information Technology (GDIT) (Needham, MA) – Remote fixed facilities planning team member and construction management
- Stanley Associates, Inc. (Charleston, SC) – Fixed facility infrastructure and cutover
- Chelton Inc. (Lewisville, TX) – Co-site interference mitigation subsystems
- CellXion (Bossier City, LA) – Remote Fixed Facility (RFF) shelters
- MWH Americas, Inc. (Farmington Hills, MI) – Environmental services, planning team member
- Rhode & Schwarz (Columbia, MD) – Direction finding subsystems
- Western Maritime (San Diego, CA) – Direction finding calibration vessel testing
- Andrew Systems (Orland Park, IL) – Third party inspections and system support and maintenance

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the following laws, regulations, standards and Executive Orders:

- Presidential Directive 24 and National Security Decision Directive 145
- National Environmental Policy Act (NEPA)
- Bridge to Bridge Radiotelephone Act (33 USC 1201-1208)
- Parts II and III of the Communications Act of 1934
- Commercial Fishing Industry Vessel Safety Act of 1988
- The Safety of Life at Sea (SOLAS) Convention
- International Telecommunications Union (ITU) Radio Regulations
- Agreement between the United States and Canada for the Promotion of Safety on the Great Lakes by Means of Radio, 1973
- Manual of Regulations and Procedures for Federal Radio Frequency Management
- FCC Telecommunications Regulations
- USCG Shipping Regulations and Navigation Regulations

U. S. Coast Guard
Acquisition, Construction & Improvements
FY 2012 Congressional Justification
(Dollars in Thousands)

Interagency Operations Centers (IOC) **\$3,000**

Project Description, Justification and Scope

This request funds the continued deployment of Interagency Operations Center (IOC) sensor management capabilities to provide participating port partners with shared access to existing cameras and radars.

The IOC project has been established to implement the mandates of the SAFE Port Act by providing the capability necessary to enable designated locations (e.g., high priority ports) to function in an IOC context. IOCs and SCCs (Sector Command Centers), though interrelated, are conceptually distinct. IOCs enable collaboration to achieve a “whole of government” response that accounts for interagency objectives and variable lines of authority. In order to meet the requirements set forth in the SAFE Port Act, the Coast Guard is focusing the IOC acquisition on the following capabilities:

WatchKeeper Information Management (IM) processes and systems, which link information with operations in the context of daily decision making, situational awareness, operations monitoring, rules-based processing, and joint planning; and

Integration of Existing Sensors and tools necessary to enable IOCs to access and manage local sensor resources. Establish enterprise sensor coverage where needed, to best share information and establish/maintain maritime domain awareness.

Specific expected outcomes from the IOC project include:

- *Establishment of IOCs to meet the mandate of the SAFE Port Act of 2006* - IOCs will provide the capability to: (a) coordinate routine and emergent interagency planning and information sharing; (b) monitor current port activities and identify anomalies from planned and normal events; and (c) initiate a coordinated response.
- *Development and deployment of the Information Management System (a.k.a. WatchKeeper)* - to improve the capability to see, understand, and share tactical information critical to security and interagency coordination in vulnerable ports and coastal areas.
- *IOC Sensor Management* - to provide an adaptable network and actively monitor activities within critical ports, coastal infrastructure, and waterways.

Significant Accomplishments in FY 2010:

- Completed Operational Test & Evaluation on Watchkeeper.
- Initiated releasing WatchKeeper v1.0 as a technology demonstrator to two training centers and other IOCs.
- Completed IOC Sensor Management solution engineering to enhance maritime domain awareness and further expand information management capabilities.
- Completed construction/outfitting of IOC New Orleans.

FY 2011 Planned Accomplishments:

- Continue release of WatchKeeper v1.0 as a technology demonstrator to IOCs at a rate of approximately one per month, establishing a national standard for information management, joint planning, and interagency operations.

U. S. Coast Guard - FY 2012 Congressional Justification

Interagency Operations Centers (IOC) \$3,000

- Continue development and testing of IOC Sensor Management to enhance maritime domain awareness and further expand information management capabilities.
- Complete construction/outfitting of IOC San Francisco.

FY 2012 Planned Accomplishments:

- Complete development and testing of IOC Sensor Management.
- Complete WatchKeeper v1.0 release as a technology demonstrator.
- Deploy IOC Sensor Management System as a pilot to select IOC(s), including interface to existing legacy sensors.

Significant Changes

The first installment of WatchKeeper was delivered on schedule in FY 2009. Final developmental and operational testing is complete, and the project received approval to release WatchKeeper v1.0 as a technology demonstrator to 35 IOCs.

Note: A full-year FY 2011 appropriation was not enacted at the time the budget was prepared; thus the FY 2011 appropriation, obligation, and expenditure values are not included in the tables below.

U. S. Coast Guard
Acquisition, Construction & Improvements
FY 2012 Congressional Justification
(Dollars in Thousands)

Station Menemsha Boathouse Rebuild **\$10,000**

Project Description, Justification and Scope

This funding will recapitalize the boathouse at Station Menemsha in Chilmark, Massachusetts. A fire in July 2010 destroyed Station Menemsha's boathouse and pier, requiring temporary relocation of the station's two small boats. Station Menemsha's 25' Response Boat-Small (RB-S) is required to operate out of a local marina, while the 47' Motor Lifeboat (MLB) has been relocated to Sector Southeastern New England in Woods Hole, Massachusetts. Station Menemsha's area of responsibility includes Vineyard Sound and Buzzards Bay (off the coast of Massachusetts) and Block Island Sound (off the coast of Connecticut). Station Menemsha also covers out to 50 miles offshore of Martha's Vineyard, Massachusetts.

Station Menemsha is a multi-mission station that performs Search and Rescue (SAR), Law Enforcement, and other homeland security missions. It provides for the safety and security of a large local commercial fishing fleet and boating community. Since 2007, Station Menemsha saved and assisted over 290 people while conducting more than 300 SAR cases. With the absence of the 47' MLB, the heavy weather mission for Station Menemsha's area of responsibility is now shared by other local stations, with a reduction in heavy-weather SAR capacity. With the 25' RB-S, Station Menemsha is operationally limited to performing missions in up to 6 foot seas without surf conditions, and wind speeds of less than 28 miles per hour. Failure to recapitalize the Station Menemsha facilities in FY 2012 will permanently reduce heavy-weather SAR response capacity in this Area of Responsibility.

Significant Changes

This is a new project.

U. S. Coast Guard
Acquisition, Construction & Improvements
FY 2012 Congressional Justification
(Dollars in Thousands)

Station Fairport Recapitalization **\$16,400**

Project Description, Justification and Scope

This funding will recapitalize the small boat station house as well as the small boat haulout and maintenance bay at Station Fairport, Ohio, located on the shores of Lake Erie. Station Fairport was originally constructed in 1918, and the current facilities are inadequate to support the Coast Guard's small boats assigned to the Station. The small boat haulout and boathouse cannot accommodate the 45' RB-M or 47' MLB, degrading readiness and increasing maintenance workload. This multi-mission station is designated as a heavy weather unit, and averages 100 SAR cases per year. Station Fairport is also responsible for conducting security patrols along the Canadian border, a nuclear power plant, and other critical maritime infrastructure.

Significant Changes

This is a new project.

TRACEN Petaluma Wastewater Treatment Plant **\$35,000**

Project Description, Justification and Scope

This funding will recapitalize the existing Wastewater Treatment Plant (WWTP) at the Coast Guard's Training Center (TRACEN) in Petaluma, California. The on-site WWTP was originally constructed in the 1940s and no longer meets current environmental standards. Furthermore, the system has a limited capacity to treat approximately 800,000 gallons of wastewater per week, to prevent the release of untreated wastewater. The existing WWTP does not have sufficient storage and disposal capacity to support the number of personnel assigned to the base, and thus must be replaced.

Significant Changes

This is a new project.

FY 2012 Congressional Justification
(Dollars in Thousands)

Cape May Pier 4 Recapitalization **\$11,000**

Project Description, Justification and Scope

This funding will recapitalize Pier 4 at Cape May, NJ, which supports three 87' Patrol Boats. The patrol boats assigned to this location are responsible for performing critical safety and security missions along the coastal Mid-Atlantic region, including ports waterways and coastal security, search and rescue and law enforcement.

The pier has been maintained over the last 60 years, but has had serious damage from marine bore activity. Initially, the loading capacity of the pier was downgraded to pedestrian traffic only and limited cutter operations. The condition of Pier 4 has continued to deteriorate and has been recently condemned and is no longer safe for Coast Guard operations. As a result the patrol boats that moored there have been temporarily relocated.

Pier 4 was constructed in 1935. The inboard 220 feet of the pier was replaced with new concrete sections in FY 2009. Based on inspections conducted prior to 2009, the replacement of the wooden section of the pier was planned for 2017. However, a more recent inspection of the pier revealed severe degradation of the piles and bracing at an accelerated rate, requiring immediate replacement. Specifically, the remaining wooden portion of Pier 4 has been destroyed by marine bore activity that has compromised the pier's support structure. Maintaining suitable moorings for current and future cutters in Cape May is vital to carrying out Fifth Coast Guard District missions, and thus cannot be deferred beyond FY 2012.

Significant Changes

This is a new project.

U. S. Coast Guard
Acquisition, Construction & Improvements
FY 2012 Congressional Justification
(Dollars in Thousands)

Sector Corpus Christi Relocation **\$10,500**

Project Description, Justification and Scope

This funding will be used to accomplish a “build to suit” lease project through the General Services Administration to construct a hangar and command center facilities in Corpus Christi, TX. The Coast Guard’s requirements include a consolidated Coast Guard Air Station and Sector facility with the ability to hangar all assigned fixed wing aircraft. This request specifically funds the build-out of tenant improvements.

The Coast Guard is currently located in a WWII-era Navy seaplane facility, Hangar 41, at Naval Station Corpus Christi, Texas. The 70-year old hangar is well past its service life and is in extremely poor material condition. In addition to deterioration of the structure, the space configuration within this hangar is functionally deficient, and cannot accommodate the Coast Guard’s maintenance and operational requirements. The current layout prohibits ready crew berthing in the vicinity of aircraft, resulting in longer times necessary to launch planes in response to Search and Rescue cases, and other critical homeland security operations. Due to Hangar 41’s close proximity to the seawall and its insufficient size preventing sheltering of the aircraft inside the hangar, the aircraft stationed in Corpus Christi are exposed to a corrosive environment requiring additional parts and maintenance to keep aircraft operational. The inability to hangar aircraft in this corrosive environment increases maintenance costs and reduces operational availability. This project will address the aforementioned shortcomings, improving operational response time and operational reliability of aircraft, and minimizing aircraft maintenance costs.

Significant Changes

This is a new project.

Recapitalization of Coast Guard Academy Facilities **\$8,000**

Project Description, Justification and Scope

This funding will recapitalize infrastructure at the Coast Guard Academy (CGA) in New London, CT. Specifically, it supports continued renovation of the Chase Hall Barracks, a multi-phase project intended to recapitalize the 343,000 square foot Chase Hall student berthing facility by improving habitability and bringing the barracks into compliance with fire and life-safety standards. This phase will finish renovations of Annex B started with prior-year funding, and renew the centralized Chase Hall chiller plant (air conditioning) piping.

In June 2008, the Coast Guard Academy completed the new Chase Hall E Annex, the first stage of a comprehensive mid-life renovation project to Chase Hall which provided the living space necessary to continue with renovations of Annexes A thru D. Each phase of the renovation addresses significant life-safety deficiencies such as new fire detection and fire suppression systems, new fire rated doors, ceiling and wall assemblies, improved paths of egress with new lighting horns and strobes and new electrical and mechanical rooms. In addition, each phase of renovation introduces modern amenities to include IT upgrades, public address speakers, new interior finishes and new heating, ventilation and air conditioning (HVAC). This comprehensive renovation improves habitability and safety of the cadet berthing facilities.

Renovation of Chase Hall Barracks South Annex A, and Annexes C and D are planned as survey and design is completed, and future funding permits.

Significant Accomplishments in FY 2010 and Prior:

Began construction of Chase Hall Barracks Phase II (North Annex A).

FY 2011 Planned Accomplishments:

Chase Hall Barracks Phase II (North Annex A) complete.

FY 2012 Planned Accomplishments:

Award contract for Recapitalization of Academy Facilities project.

FUNDING HISTORY

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>
2006	\$14,850	Chase Hall Barracks Phase I (Annex E)
2007	\$ 1,170	Chase Hall Barracks Phase I (Annex E)
2009	\$10,300	Chase Hall Barracks Phase II (North Annex A)
<i>Total</i>	<i>\$26,320</i>	<i>Funding received for FY 2006 through FY 2010</i>

CONTRACTOR: All Shore Facility projects are executed by the Coast Guard with technical oversight provided by the Shore Infrastructure Logistics Center (SILC) and Civil Engineering Units (CEUs) located around the United States. Each project is contracted to a construction contractor for execution.

Shore Infrastructure Survey and Design **\$1,000**

Project Description, Justification and Scope

The Coast Guard's FY 2012 Survey and Design (S&D) request includes S&D funding essential to future year Acquisition, Construction and Improvement (AC&I) shore projects.

Funding will support planning and engineering studies, project design, master plans, appraisals, real property requirements and other architectural/engineering efforts. Completing proper planning and design helps to ensure AC&I projects are properly assessed, planned, budgeted, and prioritized prior to seeking project appropriations. The projects supported by this request contribute to long-range plans and support of operational units. This funding is requested to complete initial S&D to include the following facilities/purposes:

- CG Academy Facilities Recapitalization: Chase Hall Barracks Phase IV
- CG Maritime Safety Security Team (MSST) San Diego, Pacific Area Tactical Law Enforcement Team (TACLET) Facilities
- CG Air Station Elizabeth City
- CG Sector Southeastern New England in Woods Hole, Massachusetts
- CG Base Support Unit Kodiak

Shore AC&I Waterways ATON Infrastructure **\$1,000**

Project Description, Justification and Scope

This request provides funding to establish, repair, and improve Aids to Navigation (ATON) on Federal waterways. Funding from this project enhances interstate transportation and waterway recreation through lower cost preventative maritime safety measures. Regular annual project funding enables the Coast Guard to be proactive in planning ATON recapitalization as well as be responsive to emergent needs.

This request will fund projects that are critical to safe and efficient maritime transportation.

Significant Changes

(Dollars in Thousands)

Major Acquisition Systems Infrastructure **\$94,500**

Project Description, Justification and Scope

This request supports shore facility infrastructure modifications, upgrades, and new construction associated with homeporting new or modified cutters, boats, and aircraft funded through AC&I projects.

Funding in FY 2012 makes progress toward completing the following facility upgrades and infrastructure improvements:

- Pier, support facility and shore power modifications to support FRC homeports #3 through #6.
- Starts pier, support facility, and shore power modifications for the second NSC homeport.
- Phase II of hangar modifications to accommodate MPAs at AIRSTA Miami.
- C4ISR Training facility at CG TRACEN Petaluma.
- Shore infrastructure modifications to support RB-Ms.
- Engineering studies and analyses for future-year facilities projects covered under this acquisition program.

Facilities upgrade projects are critical to the overall success of the respective asset system. Successful completion of facility upgrades will enable the Coast Guard to maximize the operational effectiveness of new assets and permit maintenance support and meet new training needs, as outlined in respective Integrated Logistics Support Plans.

Significant Changes

This is the first submission for Major Acquisition Systems Infrastructure (MASI) under the post-Integrated Deepwater Systems construct. Previous work managed under this program was conducted under the Deepwater Logistics Acquisition Project. Deepwater Logistics was disaggregated into CG LIMS and MASI.

(Dollars in Thousands)

Minor AC&I Shore Construction Projects **\$6,292**

Project Description, Justification and Scope

This request provides funds to complete minor AC&I shore facility construction projects. These projects are typically less complex and require less advanced planning than major shore projects. Funds will be used to complete minor projects that have cost estimates which exceed the construction authority provided in the Operating Expense appropriation. For example, this may include:

- Emergency repair projects which have cost estimates that are greater than 50% of the plant replacement value;
- Minor facility improvements, which cost more than one million dollars, that are needed to adapt to changing/increased missions.

Significant Changes

No significant changes.

Note: A full-year FY 2011 appropriation was not enacted at the time the budget was prepared; thus the FY 2011 appropriation, obligation, and expenditure values are not included in the tables below.

Military Housing **\$20,000**

Project Description, Justification and Scope

The Administration's *Families First* Initiative supports military personnel in an effort to ensure that their families have access to housing in areas where there is a lack of affordable accommodations. The Coast Guard's Military Housing Program recapitalizes and constructs Coast Guard housing facilities. The military housing projects outlined below are the Coast Guard's highest priority housing recapitalization initiatives for 2012.

Air Station Cape Cod Recapitalize Barracks (\$9M) Phase 1: This project is intended to recapitalize one wing of the Cape Cod Unaccompanied Personnel Housing (UPH). Phase 2 would recapitalize the remaining UPH barracks and galley. The current structure has deteriorated and does not comply with life-safety codes (e.g., non-compliant fire suppression systems, presence of asbestos, etc.). This project includes renovation of portions of the UPH to meet current construction code and habitability standards. The project scope includes recapitalization of utilities, lighting, fire alarm/suppression systems, asbestos remediation, and heating, ventilation and air conditioning replacement.

Sector Columbia River Family Housing (\$11M): This is the initial phase of a multi-phase project to recapitalize existing housing and to provide new housing units in the greater Astoria, OR area which lacks available, adequate and affordable housing. Phase 1 of this project would meet the most critical needs by building the first 15 units and establishing utilities and infrastructure to support construction of additional units in subsequent phases.

Acquisition, Construction & Improvements
FY 2012 Congressional Justification
(Dollars in Thousands)

AC&I Core **\$600**

Project Description, Justification and Scope

This funding is necessary to cover costs associated with project shared service and training activities for major acquisition projects. The primary initiatives include Acquisition Project Office shared services support, contractor support services, records storage and training. The funding allows the Coast Guard to maintain an effective acquisition process by providing AC&I resources that are not project-specific. Resources are needed to maintain core competencies and capabilities necessary to execute assigned workload while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act and OMB Circular A-76.

Significant Changes

No significant changes.

Note: A full-year FY 2011 appropriation was not enacted at the time the budget was prepared; thus the FY 2011 appropriation, obligation, and expenditure values are not included in the tables below.

U. S. Coast Guard
Acquisition, Construction & Improvements
FY 2012 Congressional Justification
(Dollars in Thousands)

Direct Personnel Costs **\$109,592**

Project Description, Justification and Scope

This request funds the salaries, compensation, and support costs for personnel who manage, execute, and administer multi-year funded projects within the Acquisition, Construction and Improvements (AC&I) Program. The requested funding level will support 794 FTE and it includes cost savings anticipated as a result of the 2011-2012 civilian federal employee pay-freeze. The personnel will support projects requested in this budget submission, as well as prior year funded AC&I projects, by performing planning, design, engineering, contracting, project management, quality assurance and logistics support activities. This ensures the products and services acquired through the AC&I program are completed on time, within budget, and in compliance with performance requirements.

The request also includes a \$2.3 million increase in support of the Administration's *Acquisition Workforce Initiative*, as described below:

The President's March 4, 2009 memorandum on Government Contracting required agencies to improve acquisition practices and performance by maximizing competition and value, minimizing risk, and reviewing the ability of the acquisition workforce to develop, manage, and oversee acquisitions appropriately.

The funds allocated towards this initiative will help ensure future programmatic growth requirements for training, recruitment, and retention activities while helping the Coast Guard attract and hire qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act. This funding will increase the size of the acquisition workforce by 9 FTE / 17 FTP in the fields of program management, systems engineering, testing and evaluation, and logistics.

Significant Changes

No significant change.

Summary Justification and Explanation of Changes

Travel

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 6,822	\$ 17,977	\$ 7,133	\$ (10,844)

Travel includes all costs of transportation of persons, subsistence of travelers and incidental travel expenses in accordance with Federal travel regulations. Specifically, funds transport of personnel in support of training, project management and oversight of the In Service Cutter Sustainment Project, Survey and Design, Response Boat - Medium Project, National Security Cutter, Offshore Patrol Cutter, Fast Response Cutter, Cutter Boats and Medium Endurance Cutter Sustainment. Funding in FY 2012 reflects the anticipated need.

Transportation of things

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 1,133	\$ 2,986	\$ 1,185	\$ (1,801)

Transportation of things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. Specifically, funding provides for shipment of goods, equipment, supplies and materials to support completion of AC&I projects. Funding in FY 2012 reflects the anticipated need.

Other rent

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 438	\$ 1,153	\$ 458	\$ (695)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2012 reflects the anticipated need.

Communication, utilities, and misc charges

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 853	\$ 2,247	\$ 892	\$ (1,355)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities and cutters, utility costs, including shore facility utilities, cutter and boat fuel requirements, and postal costs. Funding in FY 2012 reflects the anticipated need.

Advisory and assistance services

	Actual		C.R.		Request		Change
\$	96,653	\$	254,677	\$	101,054	\$	(153,623)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2012 reflects the anticipated need.

Other services

	2010		2011		2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	113,563	\$	299,235	\$	118,734	\$	(180,501)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2012 reflects the anticipated need.

Supplies and materials

	2010		2011		2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	47,347	\$	124,759	\$	49,503	\$	(75,256)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters and boats, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2012 reflects the anticipated need.

Equipment

	2010		2011		2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	257,153	\$	677,592	\$	268,864	\$	(408,728)

This object class covers the purchase of capitalized and non-capitalized assets. Funding in FY 2012 reflects the anticipated need.

Land and structures

	2010		2011		2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	36,670	\$	96,627	\$	38,339	\$	(58,288)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Funding in FY 2012 reflects the anticipated need.

Summary Justification and Explanation of Changes

Travel

2010	2011	2012	2011 - 2012
Actual	C.R.	Request	Change
\$ 3,639	\$ 2,957	\$ 2,871	\$ (86)

Travel includes all costs of transportation of persons, subsistence of travelers and incidental travel expenses in accordance with Federal travel regulations. Specifically, funds transport of personnel in support of training, project management and oversight of the aircraft replacement, Maritime Patrol Aircraft, HH-60 Conversion Projects, HH-65 Conversion /Sustainment Projects, and HC-130H Conversion/Sustainment Projects. Funding in FY 2012 reflects the anticipated need.

Transportation of things

2010	2011	2012	2011 - 2012
Actual	C.R.	Request	Change
\$ 605	\$ 491	\$ 477	\$ (14)

Transportation of things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. Specifically, funding provides for shipment of goods, equipment, supplies and materials to support completion of AC&I projects. Funding in FY 2012 reflects the anticipated need.

Other rent

2010	2011	2012	2011 - 2012
Actual	C.R.	Request	Change
\$ 232	\$ 189	\$ 183	\$ (6)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g., office space, hangar facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2012 reflects the anticipated need.

Communication, utilities, and misc charges

2010	2011	2012	2011 - 2012
Actual	C.R.	Request	Change
\$ 455	\$ 370	\$ 359	\$ (11)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for facility utilities, fuel requirements, and postal costs. Funding in FY 2012 reflects the anticipated need.

Advisory and assistance services

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 51,532	\$	41,871	\$	40,652	\$	(1,219)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2012 reflects the anticipated need.

Other services

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 60,549	\$	49,198	\$	47,766	\$	(1,432)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2012 reflects the anticipated need.

Supplies and materials

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 25,244	\$	20,512	\$	19,915	\$	(597)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2012 reflects the anticipated need.

Equipment

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
	\$ 137,106	\$	111,403	\$	108,160	\$	(3,243)

This object class covers the purchase of capitalized and non-capitalized assets. Funding in FY 2012 reflects the anticipated need.

Land and structures

	2010		2011		2012		2011 - 2012
	Actual		C.R.		Request		Change
	\$ 19,551	\$	15,886	\$	15,422	\$	(464)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Funding in FY 2012 reflects the anticipated need.

Summary Justification and Explanation of Changes

Travel

	2010		2011		2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	3,470	\$	2,068	\$	1,367	\$	(701)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Funding in FY 2012 reflects the anticipated need.

Transportation of things

	2010		2011		2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	576	\$	344	\$	227	\$	(117)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding in FY 2012 reflects the anticipated need.

Other rent

	2010		2011		2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	223	\$	133	\$	88	\$	(45)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2012 reflects the anticipated need.

Communication, utilities, and misc charges

	2010		2011		2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	434	\$	258	\$	171	\$	(87)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Funding in FY 2012 reflects the anticipated need.

Advisory and assistance services

	2010		2011		2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	49,156	\$	29,296	\$	19,360	\$	(9,936)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2012 reflects the anticipated need.

Other services

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
\$	57,756	\$	34,422	\$	22,747	\$	(11,675)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2012 reflects the anticipated need.

Supplies and materials

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
\$	24,080	\$	14,351	\$	9,484	\$	(4,867)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2012 reflects the anticipated need.

Equipment

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
\$	130,783	\$	77,946	\$	51,510	\$	(26,436)

This object class covers the purchase of capitalized and non-capitalized assets. Funding in FY 2012 reflects the anticipated need.

Land and structures

	2010 Actual		2011 C.R.		2012 Request		2011 - 2012 Change
\$	18,650	\$	11,115	\$	7,345	\$	(3,770)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Funding in FY 2012 reflects the anticipated need.

Summary Justification and Explanation of Changes

Travel

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ -	\$ -	243	\$ 243

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Funding in FY 2012 reflects the anticipated need.

Transportation of things

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ -	\$ -	40	\$ 40

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding in FY 2012 reflects the anticipated need.

Other rent

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ -	\$ -	16	\$ 16

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding in FY 2012 reflects the anticipated need.

Communication, utilities, and misc charges

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ -	\$ -	30	\$ 30

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Funding in FY 2012 reflects the anticipated need.

Advisory and assistance services

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ -	\$ -	3,445	\$ 3,445

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2012 reflects the anticipated need.

Other services

	2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$	- \$	- \$	4,048 \$	4,048

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2012 reflects the anticipated need.

Supplies and materials

	2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$	- \$	- \$	1,688 \$	1,688

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2012 reflects the anticipated need.

Equipment

	2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$	- \$	- \$	9,167 \$	9,167

This object class covers the purchase of capitalized and non-capitalized assets. Funding in FY 2012 reflects the anticipated need.

Land and structures

	2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$	- \$	- \$	1,308 \$	1,308

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Funding in FY 2012 reflects the anticipated need.

Summary Justification and Explanation of Changes

Salaries and Benefits

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 87,724	\$ 99,104	\$ 102,032	\$ 2,928

Currently, all salaries, benefits, and support for the military and civilian personnel who administer AC&I contracts are funded by the AC&I appropriation, whereas 97 percent of the Coast Guard's personnel is funded from the OE appropriation. AC&I has a specific annual appropriation to fund "personnel compensation and benefits and government program management related costs." Annual AC&I personnel compensation appropriation, rather than the multi-year project funds, must be used to fund all AC&I related personnel costs. Funding includes the proposed pay raise (1.6 percent for military and 0.0 percent for civilians), medical benefits, other mandatory personnel entitlements.

Travel

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 165	\$ 74	\$ 99	\$ 25

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Funding in FY 2012 reflects the anticipated need.

Transportation of things

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 27	\$ 12	\$ 16	\$ 4

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Specifically, funding supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. Funding in FY 2012 reflects the anticipated need.

Other rent

2010 Actual	2011 C.R.	2012 Request	2011 - 2012 Change
\$ 11	\$ 5	\$ 6	\$ 1

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2012 reflects the anticipated need.

Communication, utilities, and misc charges

	2010		2011		2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	21	\$	9	\$	12	\$	3

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. Funding in FY 2012 reflects the anticipated need.

Advisory and assistance services

	2010		2011		2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	2,336	\$	1,050	\$	1,406	\$	356

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2012 reflects the anticipated need.

Other services

	2010		2011		2012		2011 - 2012

U. S. Coast Guard
Alteration of Bridges

I. Appropriation Overview

A. Mission Statement for Alteration of Bridges:

Alteration of unreasonably obstructive bridges supports navigational safety and freedom of mobility to facilitate commerce, emergency response and U.S. Government operations by providing sufficient clearances for the type of vessels that transit beneath bridges. Alterations also deter waterway and highway/railway closures due to accidents.

B. Budget Activities:

Funding for Alteration of Bridges supports the Coast Guard's Aids to Navigation mission.

C. Budget Request Summary:

The Coast Guard is not requesting funding for Alteration of Bridges in FY 2012.

PPA I: ALTERATION OF BRIDGES

	Perm Pos	FTE	Amount
2010 Actual	\$21,000
2011 C.R.	4,000
2012 Adjustments-to-Base			(\$4,000)
2012 Current Services
2012 Program Change
2012 Request

The Coast Guard does not request funding for this activity in FY 2012.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Alteration of Bridges program funds the Federal Government’s share of the costs for altering or removing bridges determined to be unreasonable obstructions to navigation. Under the Truman-Hobbs Act of 1940 (33 U.S.C. 511-523), the Federal Government shares, with the bridge owner, the cost of altering railroad and publicly-owned highway bridges declared by the Coast Guard to be unreasonable obstructions to navigation. Under the Federal-Aid to Highways Program, unreasonably obstructive highway bridges may be eligible for funding.

Significant accomplishments in FY 2010 include:

In FY 2009, the Alteration of Bridges program received \$142.0 million for “executable” bridge alteration projects through the American Recovery and Reinvestment Act (ARRA) of 2009. The ARRA funds allowed the Coast Guard to authorize bridge owners to award construction contracts for four bridge projects. ARRA and FY 2010 appropriated funding contributed to the following significant accomplishments related to these four projects:

- CSXT Railroad Bridge across the Mobile River in Mobile, Alabama: Construction work started. Contractor mobilized, prepared shop drawings, ordered material, completed the foundation work, and started the construction of the sub-structure.
- EJ&E Railroad Bridge across Illinois Waterways in Divine, Illinois: Construction work started. Contractor mobilized, prepared shop drawings, ordered material, completed the foundation work, and started the construction of the sub-structure.

- Burlington Northern Santa Fe Railroad Bridge across the Upper Mississippi River in Burlington, Iowa: Construction work started. Contractor mobilized, prepared shop drawings, ordered material, completed the foundation work, and started the construction of the sub-structure.
- Galveston Railroad Bridge across the Gulf Intracoastal Waterway in Galveston, Texas: Construction work started. Contractor mobilized, prepared shop drawings, ordered material, and started the foundation work.

In addition, design work progresses for the following project:

- Canadian Pacific Railroad Bridge across the Upper Mississippi River in Lacrosse, Wisconsin: Completed 90 percent of the design of the new bridge.

In addition to the four bridge projects under construction listed above, there are currently eight bridges, including the above Canadian Pacific Railroad Bridge, that the Coast Guard has determined to be unreasonable obstructions to navigation and has issued orders to alter. These projects are pending availability of funding.

The Coast Guard has deemed an additional 32 bridges as potentially unreasonable obstructions to navigation. These bridges will require a detailed Truman-Hobbs eligibility investigation to definitively determine whether they are unreasonably obstructive.

U. S. Coast Guard
Research, Development, Test and Evaluation

I. Appropriation Overview

A. Mission Statement for Research, Development, Test and Evaluation:

Research, Development, Test and Evaluation (RDT&E) funding allows the Coast Guard to sustain critical mission capabilities through applied research and partnerships with the Department of Homeland Security (DHS), the Department of Defense (DoD), as well as other Federal and private research organizations. The purpose of the Research and Development Program (R&D) is to help identify and examine existing or impending problems in the Coast Guard's operational, regulatory, and support programs and make improvements through solutions based on scientific and technological advances. The RDT&E funding supports risk-reduction expertise and services in the pre-acquisition process of major and non-major acquisition projects.

B. Budget Activities:

The RDT&E appropriation sustains program infrastructure and core capabilities, knowledge, skills, experience, and facilities to allow the Coast Guard to maintain a balanced portfolio of projects that supports short, medium, and long range requirements across all missions. Other activities include formulation and oversight of cooperative agreements with relevant professionals in the public and private sectors, such as University Affiliated Research Centers (UARC) and Federally Funded Research & Development Centers (FFRDC). These agreements promote collaboration and leverage expertise and the development of techniques, methods, hardware, and systems that directly contribute to increasing productivity and effectiveness of the Coast Guard's missions.

C. Budget Request Summary:

The Coast Guard requests \$19.8 million in FY 2012. This request includes an increase of \$140,000 for annualization of the FY 2011 military pay raise, FY 2012 military pay raise, and FY 2012 non-pay inflation. This request also reflects termination of one-time costs (-\$5.0 million) and a reduction in program support for modeling and simulation software (-\$100,000). RDT&E funding requested in FY 2012 will be used to develop technologies and systems that improve operational presence and response, as well as perform technology assessments to inform the early stages of the acquisition process. Specific projects include: developing new technologies for the detection and recovery of oil and hazardous materials from the sea floor; developing ballast water treatment methodologies; providing data-sharing and information security technologies to support adaptive force packages; and developing advanced analytical techniques to support the acquisition process. In addition, funding supports program operations and maintenance costs (e.g., salaries, facility rent, utilities) at the Coast Guard Research and Development Center and the R&D Program's continued collaboration and participation with the research community. Healthy partnerships with other government, academic, and private research entities enable the Coast Guard to leverage research and development resources and foster synergies in scientific fields pertinent to Coast Guard missions.

II. Summary of FY 2012 Budget Estimates by Program/Project Activity (PPA)

2012 Program Change
2012 Request	101	101	19,779

The Coast Guard requests \$19.8 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The RDT&E Appropriation funds foundational work for decision-makers of acquisition, operations, regulatory, and support initiatives before long-term commitments are made through the Acquisition, Construction & Improvements or Operating Expenses appropriations. Knowledge and experience are gained through mission validation, gap analysis, modeling and simulation, requirements validation, operational analysis, market research, alternatives analysis, technology maturity assessments, cost estimation, prototyping, operational assessments, testing, and evaluation.

Funding requirements for the RDT&E Program are grouped into two categories: Coast Guard Mission Research and Operations & Maintenance (e.g., salaries, facility rent, utilities, etc.)

Significant accomplishments in FY 2010 included:

- Unmanned Aerial Systems (UAS)
Provided consolidated results of all Advanced Concept Demonstrations conducted to determine the most effective UAS for the Coast Guard's National Security Cutter (NSC). Completed the final recommendation for NSC-based UAS capabilities and configuration report that will support the Acquisition Concept and Technology Demonstration Phase activities. Completed preparation of engineering documentation to support the installation of the Navy's Fire Scout UAS on board a NSC.
- Oil Spill Detection/Response

Selected three heavy oil full recovery systems for further development, including capabilities such as remotely operated vehicles and manned submersibles as well as utilization of commercially available pumps and dredge systems.

- Ballast Water Treatment (BWT) Systems
Provided a step-by-step protocol to enable automated zooplankton analyses by ballast water test facility operators and other researchers. Selected a candidate BWT System for full-scale testing. Coordinated with other government agencies in the further development of BWT systems suitable for fresh water ecosystems.
- Arctic Operations
Demonstrated proof-of-concept for the Arctic Tactical Modeling Environment, a prototype simulation model that measures the relative effectiveness of various force deployment options in the Arctic Region.

With FY 2011 funding, the Coast Guard RDT&E Program will update and certify critical modeling and simulation tools and stand up both engagement and campaign-level modeling and simulation capability; support aviation platform performance testing and evaluation, while maintaining a core competency in UAS; as well as conduct R&D in the following areas: prevention, response management and mitigation of oil spills; prevention and mitigation of aquatic invasive species; sensor optimization, automation, and visualization for aviation, surface, and shore assets; exploration of key technologies for surface-fleet assets, including energy/green technologies; and exploration of concepts and technologies supporting Coast Guard operations in the Arctic regions.

FY 2011 planned accomplishments (based on an annualized CR funding estimate) include:

Infrastructure and Capability Investment

- Modeling & Simulation
Improve the RDT&E Program's in-house analysis capability by enhancing the Coast Guard's modeling & simulation tools. Perform analyses for acquisition, operational, and regulatory issues to support program managers. Develop a pipeline of reusable tools, beginning with exploratory studies to determine acquisitions and operational areas where modeling would optimize decision support. FY 2011 efforts include development of a Command, Control, Computers, Communications, Intelligence, Surveillance, and Reconnaissance (C4ISR) modeling and simulation capability to improve the Coast Guard's ability to predict operational impact and converting existing Coast Guard campaign-modeling algorithms to a next-generation simulation environment. Modeling and simulation (M&S) is key to properly understanding risk and forecasting performance and outcomes for Coast Guard missions and assets. Currently, the campaign-level modeling and simulation tool resides on severely outdated hardware and operating system.

Refine existing tactical and system models and accredit these tools. Verification, Validation, and Accreditation efforts ensure the application of modeling and simulation

results is appropriate for the intended purpose. Every Coast Guard M&S, whether embedded in operational systems, stand-alone systems, or integrated with other M&S systems for distributed simulation, is required to be verified and validated prior to its use. Confidence in a particular M&S must be justified before its results are used in decisions involving resources, risk to human life, or the possible loss of critical Coast Guard capabilities. Human Systems Integration Model verification and validation is planned for FY 2011. The Pre-Acquisition Cost and the Sensor Performance models will begin the accreditation process.

Operational Program Support

- Sensor Optimization, Automation, and Visualization

Recent and future acquisitions are introducing a new generation of sensors with highly increased capabilities and complexity. Consequently, there is a need for updated Coast Guard search effectiveness data. The RDT&E Program will: (1) optimize and automate sensor performance of the new generation aviation-, surface-, and shore-based systems to enhance operational missions, (2) improve M&S tools by providing the real-world data needed to improve M&S accuracy, and (3) enhance the understanding of the results through updated visualization techniques. In FY 2011, the Program will begin development of a new Sensor/Target/Environment model, summarizing the various sensors, targets, environment, and platforms.

Regulatory Program Support

- Oil Spill Detection/Response (Oil Spill Liability Trust Fund)

Invest in the infrastructure and capabilities development necessary to identify those technologies most effective in preventing, managing, and mitigating maritime environmental incidents involving oil spills that could potentially threaten sensitive maritime and coastal environments or critical coastal infrastructure.

Continue to develop systems and operational processes to address performance gaps in heavy, viscous oil recovery. The focus in FY 2011 is to evaluate the options for selecting vendors to pursue the development of a prototype system for recovering heavy oil on the bottom of the sea floor. Evaluation of the most promising of those capabilities and techniques would follow in future years.

Great Lakes Restoration Initiative

- Invasive Species and BWT Systems

The Coast Guard will continue to coordinate with the Environmental Protection Agency (EPA), U.S. Fish and Wildlife Service, and Maritime Administration to fund the further development of up to five BWT systems suitable for fresh water ecosystems by supporting the use of laboratory and shipboard testing, verification of treatment technologies, and coordination with the maritime industry.

Complete investigation and development of rigorous and defensible test procedures. Based on credible performance data, recommend procedures and techniques for routine shipboard BWT compliance testing to support Coast Guard decisions on certifying commercial BWT systems.

Continue investments and partnerships with entities conducting BWT system testing to test the efficacy of such systems and methods in both salt and fresh water. This work will benefit regulatory program managers in the area of prevention and mitigation of non-indigenous species (NIS) invasion (e.g., zebra mussels) through vectors such as ballast-water.

With FY 2012 funding, the Coast Guard RDT&E Program will conduct R&D in the following areas: command center operations and intelligence; prevention, response management and mitigation of oil spills; prevention and mitigation of aquatic invasive species; sensor optimization, automation, and visualization for aviation, surface, and shore assets; exploration of key technologies for surface-fleet assets, including energy/green technologies; and exploration of concepts and technologies supporting Coast Guard operations in the Arctic regions.

FY 2012 planned accomplishments include:

Acquisition Program Support

- Pre-Acquisition Exploration for the Surface Fleet
In FY 2012, the RDT&E Program will continue its analysis of modern, “green” technology areas, continuing to build knowledge and experience crucial to reducing risk of future major acquisitions of cutters.

Operational Program Support

- Sensor Optimization, Automation, and Visualization
Recent and future acquisitions are introducing a new generation of sensors with highly increased capabilities and complexity. Consequently, there is a need for updated Coast Guard search and law-enforcement effectiveness data. The RDT&E Program will: (1) optimize and automate sensor performance of the new generation aviation-, surface-, and shore-based systems to enhance operational missions, (2) improve M&S tools by providing the real-world data needed to improve accuracy, and (3) enhance the understanding of the results through updated visualization techniques. In FY 2012, the program will provide an updated analysis of detection and search methodology for incorporation into the overall sensor optimization concept and validate all models using field data, including validation of sensor performance prediction and area search performance metric estimation using available test data.
- Intelligence
Conduct R&D to improve Coast Guard Intelligence capabilities, while reducing long-term costs and risks. Improve the effectiveness of collecting intelligence information and data; process and integrate the data into operationally-valued and assured information;

and analyze, evaluate, and/or interpret the available intelligence information into actionable knowledge to enhance maritime domain and situational awareness within maritime areas of U.S. interest. The RDT&E Program will support the Coast Guard Intelligence Directorate (CG-2) in the intelligence disciplines of Signals Intelligence and Law Enforcement Technical Collection, focusing on dark targets, advanced analytical tools, airborne tactical intelligence, and specific emitter identification from Coast Guard afloat/ashore/airborne assets.

Long-term objectives include broad support to the Intelligence Directorate and the Coast Guard Cryptologic Group by employing advanced sensor testing against the non-cooperative target set, to assist in protecting critical infrastructure from accidental or deliberate spoofing, counter-measures, detectability of non-emitting targets, and other items of national and localized data collection issues or law enforcement missions.

Regulatory Program Support

- Oil Spill Detection/Response (Oil Spill Liability Trust Fund)
Invest in the infrastructure and capabilities development necessary to identify those technologies most effective in preventing, managing, and mitigating maritime environmental incidents involving oil spills that could potentially threaten sensitive maritime and coastal environments or critical coastal infrastructure. This work will benefit regulatory program managers in the area of oil spill prevention, detection, and response.

Consistent with recommendations from the President's Oil Spill Commission report, the FY 2012 RDT&E Program will address capability gaps for hazardous materials spills in the maritime environment. The intent is to reduce the costs and risks associated with acquiring, implementing, and operating new spill response capabilities. FY 2012 research areas include: (a) Spill response in the Arctic region and (b) Submerged (deepwater) spill response.

The Program will also complete development of systems and operational processes to address performance gaps in heavy, viscous oil recovery. The objective is to develop a system to detect, collect, and recover heavy oil from the sea floor. The focus in FY 2012 is to develop prototype designs and test prototypes for the recovery of submerged oil. The results of these tests will provide the foundation for recommendations for use by Federal On-Scene Coordinators. Reports will provide product information and specifications that will be used to identify techniques that can be utilized in the field during a heavy oil spill response.

- BWT Systems
The FY 2012 RDT&E appropriation will provide support and funding to mitigate the economic and environmental risk posed by the introduction of NIS, including developing and testing shipboard testing protocols to verify BWT system capabilities; and developing and testing shipboard verification protocols and tools for Coast Guard

operators to verify compliance with BWT standards. The FY 2012 appropriation will provide resources needed to complete research in support of Phase I BWT Standards.

Methodologies are also needed to test and certify design criteria for BWT systems in a shipboard environment, investigate how to minimize other-than-ballast-water introduction of NIS (e.g., via hull fouling), and determine ways to mitigate effects.

- Arctic Operations

This research area will address operational capability gaps in the Arctic region by conducting analyses and performing advanced concept technology demonstrations. The RDT&E Program will continue focus on three FY 2012 research areas that have unique characteristics/problems in the Arctic region: communications capabilities, sensor capabilities, and ship/small boat operations capabilities.

FY 2012 deliverables include: Communication Advanced Concept Technology Demonstrations (ACTD) preparation, sensor data assessments and ACTD preparation, analysis of small craft operations, and tactical small craft M&S tools.

Asset Support Manager Support

- Alternative Energy/Environmental Analysis

RDT&E resources will be leveraged to develop and implement energy alternatives that are either currently not available or have not been adapted to Coast Guard use. RDT&E investments in alternative and renewable energy, energy conservation, and carbon footprint reduction for mobile units will significantly reduce the risk of technology implementation and will dramatically increase the probability of success in meeting Coast Guard energy goals while improving mission performance.

The focus in FY 2012 and beyond will be to modify and test an existing Coast Guard vessel to operate using an alternate fuel, based on the decision matrix developed in FY 2011 and the suitability of the platforms analyzed. The carbon footprint measurement method developed in FY 2011 will be used to evaluate the effectiveness of the alternative fuel and associated vessel modifications.

Great Lakes Restoration Initiative

- Invasive Species

The Coast Guard will continue to coordinate with the EPA, U.S. Fish and Wildlife Service, and Maritime Administration to fund the further development of up to five BWT systems suitable for fresh water ecosystems by supporting the use of laboratory and shipboard testing, verification of treatment technologies, and coordination with the maritime industry.

- Oil in Ice

Typical Arctic conditions such as extreme temperature, unstable ice, safety and poor visibility create a significant response gap that hinders oil spill prevention and clean up

efforts. Arctic conditions can impact both the probability that a spill will occur from oil and gas operations and the consequences of such a spill. To address the potential for a major marine spill, a system of spill prevention, contingency planning, and response readiness is necessary to mitigate or combat oil spills from Arctic exploration, production, storage, and transportation operations.

In FY 2012, the Program will continue development of equipment and techniques that can be used successfully to detect, track, and recover oil in ice filled waters in all conditions. Tasks will include applied research and methodology testing. Post-FY 2012 follow-on efforts would include full-scale exercises, including an exercise in the ice on the Great Lakes to evaluate mechanical recovery. Funds from EPA and other partners, as well as related research and partnerships with Canada and the European Union, will be leveraged to fund and advance this effort.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U. S. Coast Guard
Justification of Proposed Changes in Research, Development, Test and Evaluation
Appropriation Language**

For necessary expenses for applied scientific research, development, test, and evaluation; and for maintenance, rehabilitation, lease, and operation of facilities and equipment; as authorized by law; \$19,779,000, to remain available until expended, of which \$500,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)): Provided, That there may be credited to and used for the purposes of this appropriation funds received from State and local governments, other public authorities, private sources, and foreign countries for expenses incurred for research, development, testing, and evaluation.

Note.—A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111–242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

PPA Mission Statement

The Coast Guard RDT&E Appropriation serves as a strategic investment in real-world exploration to quickly gain knowledge and experience enhancing the sound early decisions that have a significant effect on a system's overall value and risk profiles. The RDT&E Appropriation funds foundational work for decision-makers of future acquisition, operations, regulatory, and support initiatives before long-term commitments are made through the AC&I or OE appropriations. Knowledge and experience are gained through mission validation, gap analysis, modeling and simulation, requirements validation, operational analysis, market research, alternatives analysis, technology maturity assessments, cost estimation, prototyping, operational assessments, testing, and evaluation.

Summary Justification and Explanation of Changes

Salaries and Benefits

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 - 2012 Change
\$ 12,013	\$ 12,065	\$ 12,099	\$ 34

The increase of \$34,000 in FY 2012 includes funding for the proposed pay raise (1.6 percent for military and 0 percent for civilians), medical benefits, other mandatory personnel entitlements.

Travel

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 - 2012 Change
\$ 1,147	\$ 3,205	\$ 793	\$ (2,412)

The decrease in funding of \$2,412,000 reflects reduced travel costs of Coast Guard military service members, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2012 request also reflects the reduced need for R&D project related travel.

Lease of Vehicles

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 - 2012 Change
\$ 15	\$ 42	\$ 10	\$ (32)

The decrease of \$32,000 in FY 2012 is the anticipated reduction for government vehicles leases.

Transportation of things

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 - 2012 Change
\$ 56	\$ 156	\$ 39	\$ (117)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2012 request reflects the reduction of \$117,000 for transportation of things related to R&D research projects.

Other Rent

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 - 2012 Change
\$ 40	\$ 112	\$ 28	\$ (84)

Payments to a non-Federal source for rental space, land, and structures. The FY 2012 request reflects the reduction of \$84,000 for payments to non-Federal sources.

Communication, utilities, and misc charges

	FY 2010		FY 2011		FY 2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	278	\$	1,615	\$	400	\$	(1,215)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2012 decrease of \$1,215,000 reflects the anticipated reduction for R&D related projects.

Advisory and Assistance

	FY 2010		FY 2011		FY 2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	4,192	\$	11,712	\$	2,899	\$	(8,813)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The funding request in FY 2012 reflects decreases in project funding for technology demonstrations, testing and evaluations and their progress, including termination of one-time costs (-\$5 million).

Research and development

	FY 2010		FY 2011		FY 2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	4,831	\$	9,779	\$	2,420	\$	(7,359)

The decreased funding of \$7,359,000 in FY 2012 reflects obligation of funding carried over from FY 2010 in FY 2011.

Supplies and materials

	FY 2010		FY 2011		FY 2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	1,933	\$	4,372	\$	1,081	\$	(3,291)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. The FY 2012 request reflects a reduction of \$3,291,000 for the decreased need for R&D projects.

Equipment

	FY 2010		FY 2011		FY 2012		2011 - 2012
	Actual		C.R.		Request		Change
\$	14	\$	39	\$	10	\$	(29)

This object class covers the purchase of R&D materials for technology demonstrations, testing and evaluations and their progress. The FY 2012 request reflects a reduction of \$29,000 for the decreased need for R&D projects.

U. S. Coast Guard
Medicare-Eligible Retiree Health Care Fund Contribution

I. Appropriation Overview

A. Mission Statement for the Health Care Fund Contribution:

The Medicare-Eligible Retiree Health Care Fund Contribution funds accrual of the Coast Guard's military Medicare-eligible health benefit contribution to the Department of Defense (DoD) Medicare-Eligible Retiree Health Care Fund. Contributions are for future Medicare-eligible retirees currently serving on active duty in the Coast Guard, as well as retiree dependents and their potential survivors. The authority for the Coast Guard to make this payment on an annual basis was provided in P.L. 108-375, the 2005 Defense Appropriations Act. While this expenditure requires no annual action by Congress, it is scored as discretionary spending.

B. Budget Activities:

There are no budget activities directly related to providing this benefit to active duty personnel and their dependents.

C. Budget Request Summary:

The Coast Guard estimates that \$261.9 million will be paid to the DoD Medicare-Eligible Retiree Health Care Fund in FY 2012 to support the benefits outlined above. The annual budget estimate for Medicare-Eligible Retiree Health Care Fund Contribution is calculated by multiplying the projected end strength (FTE) by DoD actuary projected cost rates. Despite an increased projected end strength in FY 2012, the total adjustment to the base is a decrease of \$3.5 million, due to reduced DoD actuary projections.

U. S. Coast Guard
Retired Pay

I. Appropriation Overview

A. Mission Statement for Retired Pay:

The Retired Pay (RP) appropriation provides payments as identified under the Retired Serviceman's Family Protection and Survivor Benefits Plans, and other retired personnel entitlements identified under National Defense Authorization Acts. This includes payment for medical care of retired personnel and their dependents.

B. Budget Activities:

There are no budget activities directly related to providing this benefit to retired military personnel and their dependents.

C. Budget Request Summary:

The Coast Guard requests \$1.4 billion in FY 2012 to support the benefits outlined above. The Coast Guard also requests that any FY 2012 funding remain available until expended. The Retired Pay appropriation is scored as a mandatory appropriation.

Total requirements in FY 2012 are based on actuary projections and the obligation of \$50.8 million of the projected March 4, 2011 Continuing Resolution (annualized) unobligated balance.

PPA Mission Statement

Retired Pay will provide payments as identified under the Retired Serviceman's Family Protection and Survivor Benefits Plans, payments for career status bonuses, concurrent receipts and combat related special compensation identified under the National Defense Authorization Act.

Summary Justification and Explanation of Changes

Salaries and Benefits

	FY 2010 Actual		FY 2011 C.R.		FY 2012 Request		2011-2012 Change
	\$ 1,051,195	\$	1,143,500	\$	1,238,280	\$	94,780

Requested increase of \$94,780,000 accounts for cost-of-living adjustments for all retirement and most survivor annuities, benefits authorized by the National Defense Authorization Act, and also accounts for the obligation of \$50,838,000 of the projected unobligated balance based on the 2011 estimate (annualized C.R.).

Medical care

	FY 2010 Actual		FY 2011 C.R.		FY 2012 Request		2011-2012 Change
	\$ 237,054	\$	227,000	\$	252,715	\$	25,715

Increase of \$25,715,000 accounts for the projections for retiree medical benefits costs. Once a member becomes eligible for Medicare, the Medicare-Eligible Retiree Health Care Fund is responsible for these benefits. This request also accounts for a projected \$2,435,280 in savings associated with increased Tricare enrollment fees for retirees and savings associated with pharmacy co-pay policy changes.

U. S. Coast Guard
Boat Safety

I. Appropriation Overview

A. Mission Statement for Boat Safety:

The Boating Safety (BS) program is designed, through preventive means, to minimize loss of life, personal injury, property damage and environmental impact associated with the use of recreational boats. The program directly supports the Coast Guard's Maritime Prevention Program by promoting safe and enjoyable use of public U.S. waterways.

B. Budget Activities:

Boating Safety activities include overseeing manufacturer compliance with USCG regulations; grantmaking to States and national non-profit boating safety organizations; conducting surveys to measure recreational boating activity; continuing the "Boat Responsibly!" national outreach and awareness initiative; promulgating safety regulations; and measuring life jacket wear rates, including the effectiveness of voluntary and mandatory efforts to increase life jacket usage.

C. Budget Request Summary:

In its role as the designated National Recreational Boating Safety (RBS) Program Coordinator, the Coast Guard is charged with managing dedicated user fee funding to support the National Recreational Boating Safety Program provided from the Sport Fish Restoration and Boating Trust Fund (formerly Aquatic Resources Trust Fund). Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e., FY 2012 funding will be a percentage of FY 2011 trust fund receipts). These amounts are available until expended, but are limited in purpose and amount in accordance with existing statutes.

The FY 2012 budget reflects the anticipated level of funding that would be available from the trust fund for boating safety. This is based on current estimates of FY 2011 trust fund receipts from the Office of Tax Analysis at the Department of the Treasury (adjusted to reflect amendments of current law enacted in P.L. 109-59). The estimated total distribution from the trust fund for boating safety in FY 2012 is \$120.8 million. Of that amount, \$5.5 million is available for use by the Coast Guard to coordinate and execute new and enhanced National RBS Program activities. The balance is authorized for the State RBS Federal Financial Assistance Program established by 46 U.S.C. 13101, et seq., minus not more than five percent for national boating safety activities of national non-profit public service organizations, and not more than two percent for Coast Guard expenses to administer State RBS programs. Two additional FTE, reimbursed via The Boating Safety trust fund for grant management services, are reflected in the FY 2012 request.

III. Current Services Program Description by PPA

**Department of Homeland Security
U. S. Coast Guard
Boat Safety
Program Performance Justification
(Dollars in Thousands)**

PPA I: BOAT SAFETY

	Perm Pos	FTE	Amount
2010 Actual	8	8	\$130,180
2011 C.R.	8	8	117,699
2012 Adjustments-to-Base
2012 Current Services	8	8	117,699
2012 Program Change	2	2	3,053
2012 Request	10	10	120,752

The Coast Guard requests \$120.8 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Significant accomplishments in FY 2010 included:

- Conducted national observation studies that measured life jacket wear. Continued to measure effectiveness of a U.S. Army Corps of Engineers (USACE) project to mandate life jacket wear by all boaters aboard certain sized boats on USACE waters in northern Mississippi and central California. Results from USACE in northern Mississippi indicated significant increases in life jacket wear rates. The Coast Guard studied these results and consulted with the National Boating Safety Advisory Council to consider initiating mandatory requirements for life jacket usage in high-risk scenarios and for high-risk vessels (i.e., operating boats less than 26 or 21 feet in length). The Coast Guard is now awaiting recommendations from the Council before considering a plan of action.
- Continued the boating under the influence (BUI) initiative (Operation Dry Water) to reduce the number of casualties where the use of alcohol was a cause of the accident.
- Initiated new innovative national marketing measures that have proven effective in Minnesota over an extended period. The Coast Guard's new initiative is called "Don't Wreck Your Summer."

FY 2011 planned accomplishments (based on an annualized CR funding estimate) include:

- Continue to measure effectiveness of a USACE-project to mandate life jacket wear by all boaters aboard certain sized boats on USACE waters in northern Mississippi and central California. If continued testing in northern Mississippi coupled with central California testing initiated in FY 2011 continues to result in a substantial increase in life jacket wear, the Coast Guard will work with the National Boating Safety Advisory Council to consider initiating mandatory requirements for life jacket usage in high-risk areas (i.e., operating boats less than 26 or 21 feet in length).
- Continue the boating safety/boating under the influence (BUI) initiatives (Operation Dry Water and “Don’t Wreck Your Summer” and voluntary boat operator skill training courses) to reduce the number of casualties where reckless operation or lack of adequate operator skills or the use of alcohol by a boat’s occupants is a cause of the accident.
- Complete the Propeller Guard Test Protocol Project and implement the results. Continue developing and promulgating regulations that require installation and wear of emergency cut-off devices (mechanical or wireless) on vessels under a certain length, as well as require operators to turn off the vessel when a swimmer is in the water and in close proximity to the stern of the vessel (propeller).

FY 2012 planned accomplishments include:

- Increase support of voluntary skill training courses provided to the recreational boating public by various organizations.
- If marketing measures prove effective, continuation of additional elements of the national outreach and awareness initiative, “Don’t Wreck Your Summer.”
- Progress in promulgating regulations that require life jacket wear in high-risk recreational boating activities if voluntary measures fail to achieve an acceptable wear rate.
- Continue the BUI initiative (Operation Dry Water) to reduce the number of casualties where the use of alcohol is a cause of the accident.
- Conduct an operator compliance outreach initiative to reduce deaths due to navigation rules violations (i.e., Reckless/Negligent Operation, Excessive Speed, Improper Lookout, Operator Inattention, and Rules of the Road).
- Implement and monitor State program approval systems (i.e., adequate enforcement/sufficient patrol, adequate education, numbering system, casualty reporting system).

- Continue to assure manufacturer compliance with recreational boat safety construction standards through the Factory Visit and Boat Testing Programs with emphasis on identifying boats and manufacturers whose boats are involved in accidents where carbon monoxide, flotation, capacity, or fuel systems are causal factors.

B. FY 2011 to FY 2012 Budget Change

Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e., FY 2012 funding will be a percentage of FY 2011 trust fund receipts).

Summary Justification and Explanation of Changes

Salaries and Benefits

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 - 2012 Change
\$ 1,050	\$ 1,015	\$ 1,345	\$ 330

The FY 2012 request includes funding for mandatory personnel entitlements for the two new civilian FTE.

Travel

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 - 2012 Change
\$ -	\$ 217	\$ 172	\$ (45)

Transportation funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2012 request reflects the anticipated need for Coast Guard personnel traveling for the RBS program activities.

Transportation of Things

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 - 2012 Change
\$ -	\$ 3	\$ 2	\$ (1)

Transportation of things includes all costs of the care of such things while in the process of being transported and other services incident to the transportation of things. The FY 2012 request reflects the anticipated need for transportation of things for the RBS program activities.

Printing and reproduction

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 - 2012 Change
\$ 82	\$ 99	\$ 78	\$ (21)

The FY 2012 request reflects the anticipated need for printing and reproduction of the RBS program activities.

Advisory and assistance services

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 - 2012 Change
\$ -	\$ 984	\$ 780	\$ (204)

The FY 2012 request reflects the anticipated need for advisory and assistance services, including services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

Other Services

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 - 2012 Change
\$ 32,012	\$ 3,993	\$ 3,156	\$ (837)

Other services include reported contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Decreased funding in FY 2012 reflects changes in the revenues from trust fund receipts. Non-Federal services for boating safety activities will be decreased across all States.

Supplies and materials

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 - 2012 Change
\$ 34	\$ 96	\$ 76	\$ (20)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. The FY 2012 request reflects the anticipated need for supplies and materials for the National RBS Program activities.

Grants, Subsidies and Contributions

FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2011 - 2012 Change
\$ 97,002	\$ 145,697	\$ 115,143	\$ (30,554)

Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts. The request reflects the estimated share for FY 2012.

U. S. Coast Guard
Maritime Oil Spill Program

I. Appropriation Overview

A. Mission Statement for Maritime Oil Spill Program:

The Maritime Oil Spill Program operates under the authority of Title I of the Oil Pollution Act of 1990 (OPA), as amended, which provides for the use of the Oil Spill Liability Trust Fund (OSLTF) to pay for Federal response to oil spills and claims for uncompensated removal costs and damages resulting from such spills. In Section Seven of Executive Order 12777, the President delegated management responsibility for these uses of the OSLTF to the Secretary of the Department in which the Coast Guard is operating. Upon re-delegation by the Secretary, the Commandant of the Coast Guard delegated responsibility to the National Pollution Funds Center (NPFC), which oversees the OSLTF.

B. Budget Activities:

The Maritime Oil Spill Program directly supports the Coast Guard's Marine Environmental Protection mission and Maritime Response Program, which accomplish the following objectives:

- Provides funding for Federal removal actions in response to a discharge or a substantial threat of discharge of oil to navigable waters of the United States.
- Compensates claimants for OPA removal costs or damages.
- Provides funding to natural resource trustees for Natural Resource Damage Assessments (NRDA).
- Administers the OSLTF.

C. Budget Request Summary:

The Coast Guard estimates that expenditures from this account will total \$101.0 million in FY 2012, an increase of \$9.0 million above the FY 2011 Continuing Resolution due to a projected increase in claims for FY 2012. These estimated expenditures consist of a \$50.0 million expenditure transfer for immediate Federal oil spill response, an estimated \$1.0 million payment to the Prince William Sound Oil Spill Recovery Institute, and \$50.0 million to compensate claimants for uncompensated OPA removal costs and damages including natural resources damages.

(Dollars in Thousands)**

PPA I: MARITIME OIL SPILL PROGRAM

	Perm Pos	FTE	Amount
2010 Actual	\$708,063
2011 C.R.	92,000
2012 Adjustments-to-Base			9,000
2012 Current Services	101,000
2012 Program Change
2012 Request	101,000

The Coast Guard requests \$101.0 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Title I of OPA, as amended, provides for the use of the OSLTF to pay for Federal response to oil spills and claims for uncompensated removal costs and damages resulting from such spills. In Section Seven of Executive Order 12777, the President delegated management responsibility for these uses of the OSLTF to the Secretary of the Department in which the Coast Guard is operating. Upon re-delegation by the Secretary, the Commandant of the Coast Guard delegated responsibility to the NPFC, which oversees the OSLTF.

OPA section 5006(b) directs the NPFC to make annual payments to the Prince William Sound Oil Spill Recovery Institute for the interest on a portion of the OSLTF balance.

Significant accomplishments in FY 2010 included:

- Oversaw execution of approximately \$665.0 million in funding for Federal response for approximately 500 oil spills. Of this total, \$601.6 million was for the Deepwater Horizon Incident.
- Executed payment of \$226,000 to the Oil Spill Recovery Institute.
- Executed payment of \$42.3 million in claims for uncompensated removal costs and damages, which included natural resource damages, resulting from oil spills.

FY 2011 planned accomplishments (based on an annualized CR funding estimate) include:

- Oversee execution of \$50.0 million in funding for Federal response to an estimated 500 oil spills, including the continued response to the Deepwater Horizon oil incident.
- Execute payment of an estimated \$1.2 million to the Oil Spill Recovery Institute.
- Pay \$40.8 million in claims for uncompensated removal costs and damages, including natural resource damages, resulting from oil spills.

FY 2012 planned accomplishments include:

- Oversee execution of \$50.0 million in funding for Federal response to an estimated 500 oil spills, including the continued response to the Deepwater Horizon oil incident.
- Oversee payment of an estimated \$1.0 million to the Oil Spill Recovery Institute.
- Oversee payment of \$50.0 million in claims for uncompensated removal costs and damages, including natural resource damages, resulting from oil spills.

PPA Mission Statement

The Maritime Oil Spill Program fund will provide a source of funds for removal costs and damages resulting from oil spills, or the substantial threat of a spill, into navigable waters of the U.S. In accordance with the provisions of the Oil Pollution Act of 1990, the President may make available up to \$50.0 million annually from the Fund for oil spill removal activities. The Fund also pays all eligible claims for removal costs and damages resulting from oil spills.

Summary Justification and Explanation of Changes

U. S. Coast Guard
Miscellaneous Funds

I. General Gift Fund Overview

A. Mission Statement for General Gift Fund

The Coast Guard General Gift Fund is authorized under 10 U.S.C. § 2601 provisions for such funds within the Department of Defense and the Coast Guard. The General Gift Fund is a vehicle that authorizes the Commandant of the Coast Guard to accept gifts and donations for the benefit of activities such as museums, chapels, and other organizations under the jurisdiction of the Coast Guard. A recent legislative change also authorizes the Coast Guard to accept gifts to be used for the benefit of service members who are wounded, injured or taken ill while in the line of duty, as well as for those members' dependents and survivors.

B. Budget Activities:

The General Gift Fund indirectly supports Coast Guard activities.

C. Budget Bequest Summary:

The Coast Guard estimates \$80,000 in bequests from various sources to the General Gift Fund in FY 2012.

U.S. Coast Guard General Gift Fund

Miscellaneous Funds

II. Yard Fund Overview

A. Mission Statement for Yard Fund

Coast Guard Yard contributes to all 11 statutory Coast Guard missions through completion of mission-essential logistics and engineering support (e.g., cutter drydocking). The Yard Fund is a revolving account supported by the Coast Guard's Operating Expenses and Acquisition, Construction & Improvements appropriations to pay for FTE and materials required for Coast Guard projects and work orders completed by the Coast Guard Yard, located in Curtis Bay, MD.

B. Budget Activities:

Yard Fund activities include logistics and engineering support for Coast Guard vessels. These activities indirectly support Coast Guard missions.

C. Budget Request Summary:

U. S. Coast Guard
Miscellaneous Funds

II. Supply Fund Overview

A. Mission Statement for Supply Fund

The Supply Fund, in accordance with 14 U.S.C. § 650, finances the procurement of uniform clothing, commissary provisions, general stores, technical material, and fuel for vessels over 180 feet in length. The fund is normally financed by reimbursements from the sale of goods.

B. Budget Activities:

Supply Fund activities include funding the procurement of uniforms, commissioning provisions, stores, materials, and fuel. These activities indirectly support Coast Guard missions.

iii. Status of Congressionally Requested Studies, Reports, and Evaluation

Department of Homeland Security
United States Secret Service

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2011	Immediately	H.Rept. 111-xxx (pp.102-103)	"As required by law, the Secret Service 'shall report immediately to the President and Congress all relevant facts and a statement of actions taken' to rectify the violation of the Antideficiency Act."	Pending final release of the DHS-OIG review.
2011	Not specified	H.Rept. 111-xxx (p. 103)	"...the Committee directs the Secret Service, in consultation with the DHS Chief Financial Officer (CFO), to submit a strategic plan for implementing strict financial controls for all 2012 campaign costs, including a schedule of monthly deadlines and deliverables required to rectify the problem fully."	In progress.
2011	Regularly	H.Rept. 111-xxx (p. 103)	"...the Committee directs the Secret Service and the DHS CFO to provide regular updates on the implementation of such [strategic] plan [for implementing strict financial controls for all 2012 campaign costs] to ensure this situation [campaign overspending] does not recur."	In progress.
2011	Conditional	H.Rept. 111-xxx (p. 104)	"...the Committee directs the Secret Service, in conjunction with the DHS Office of International Affairs, to evaluate the need for a permanent Secret Service presence in Peru and to notify the Committee of any plans to establish such a location."	The Secret Service submitted the NSDD-38 to establish a permanent office in Lima, Peru to DHS-OIA in October 2010. DHS-OIA initiated the formal review in December 2010.
2011	Immediately	H.Rept. 111-xxx (p. 105)	"The Committee therefore directs the Secret Service to consult immediately with the National Capital Planning Commission on efforts needed to improve the appearance of E Street between 15 th and 17 th Streets, and to provide a briefing on the anticipate timeline for improving the conditions of the area."	Completed on 9/23/2010.
2011	Prior to obligation of funds	H.Rept. 111-xxx (p. 27) S. Rept. 111-222 (p. 28)	" <i>Provided further</i> , That none of the funds made available in the preceding proviso [for agency-wide IT expenses] shall be obligated to purchase or install information technology equipment until the Chief Information Officer of the Department submits a report to the Committees on Appropriations of the Senate and the House of Representatives certifying that all plans for such investments are consistent with Department of Homeland Security data center migration and enterprise architecture requirements." "Provided further, That \$20,000,000 [of the \$69,960,000 appropriated for IT modernization] is unavailable for obligation to purchase or install information technology equipment until the Chief Information Officer of the Department of Homeland Security submits a report to the Committees on Appropriations of the Senate and the House of Representatives certifying that all plans for such modernization are consistent with Department of Homeland Security data center migration and enterprise architecture requirements."	Pending DHS-CIO review.

BUDGET REQUEST AND SUPPORTING INFORMATION

Salaries & Expenses

I. Appropriation Overview

A – Mission Statement for Salaries & Expenses

The United States Secret Service performs two critical homeland security missions: protection and criminal investigations. The Secret Service protects the President and Vice President, their families, visiting heads-of-state/government, and other designated individuals, such as the Secretary of Homeland Security; investigates threats against these protectees; protects the White House, Vice President’s Residence, Foreign Missions and other designated buildings within the Washington, DC area; and designs, coordinates, and implements operational security plans for designated National Special Security Events (NSSEs). The Secret Service investigates violations of laws relating to counterfeiting of obligations and securities of the United States; financial crimes such as access device fraud, financial institution fraud, identity theft, and computer fraud; computer-based attacks on our nation’s financial, banking, and telecommunications infrastructure; and provides critical forensic support for associated investigations of cases involving missing and exploited children.

B – Budget Activities:

Protection of Persons and Facilities - The primary purpose of the Secret Service’s domestic protection activity is to protect our nation’s leaders. To accomplish this, this program operates to ensure protectees’ personal safety, and to protect the buildings and grounds where these individuals reside and work (e.g., the White House Complex and the Vice President’s residence). Currently, the Secret Service provides protection to permanent protectees who are authorized under 18 USC § 3056, and provisional protectees who are authorized pursuant to Presidential Memoranda. Included in the totals above is the protection of the Secretary of the Department of Homeland Security (DHS). The Secretary of the Treasury is also receiving protection, on a reimbursable basis.

Part of the protection of persons and facilities program is the protection of foreign heads-of-state/government visiting the United States (U.S.). Foreign dignitary protection includes: 1) protection for visiting heads-of-state/government and their spouses, as well as other distinguished visitors to the U.S. as directed by the President; and 2) external security for foreign diplomatic embassies and missions in the Washington, DC area (and other limited areas consistent with statute). The Secret Service provides protection to these individuals and foreign missions by strategically placing human and physical assets (agents, tactical support, technical security, explosives detection and weapons-of-mass destruction detection and operations) at these foreign missions and using these assets during foreign dignitary visits to the United States. The foreign dignitaries who visit the

U.S. often are high-profile. Today's threat environment necessitates the implementation of complex security operations that involve multiple jurisdictions and functions. All efforts are directed toward ensuring that foreign dignitaries and foreign missions receive the optimal level of protection.

The Secret Service has the sole statutory authority to provide a dedicated police presence and response to foreign embassies, chanceries and residences. When a "surge" in protective responsibilities in this area is necessary, the Secret Service turns to other entities (i.e., Metropolitan Police Department) for assistance in dealing with such issues as demonstration control. Currently, the Secret Service protects foreign missions located in the Washington, D.C. area.

Protective Intelligence Activities - The Service's protective intelligence program is responsible for overseeing the investigation and evaluation of all protective intelligence subjects and for the receipt, analysis, and dissemination of all protective intelligence information. This mission is accomplished by the review, coordination, control and referral of information about individuals, groups and activities that pose a potential threat to persons and property protected by the Secret Service. Threat assessments on both the target and the protected entity are developed and utilized by operational details.

National Special Security Events (NSSEs) - The Secret Service is the lead agency for designing, coordinating, and implementing operational security plans for NSSEs. As with campaign events, special agents coordinate with the military and federal, state, county, local, and international law enforcement organizations to ensure the success of security operations for NSSEs.

The Secret Service plans and implements security designs for designated NSSEs to ensure the physical protection of the President, the public and other Secret Service protectees who participate in NSSEs.

Our adversaries have demonstrated the capability to attack our Nation on a grand scale and employ extensive research and surveillance methodologies, acquire substantial skills and instruction, and strike their targets without warning.

Presidential Candidate/Nominee Protection – The Secret Service provides protection to major presidential and vice presidential candidates. It also provides protection to their spouses within 120 days of a general presidential election. Protective details are activated only after established criteria are considered. Campaign protection is a mandatory workload increase and requires funding three out of every four fiscal years. The Secret Service has no base budget funding for this activity--all campaign funding is non-recurred following a presidential campaign and inauguration.

White House Mail Screening - The Secret Service screens White House mail to ensure it is free of harmful toxins or other dangerous materials. Due to the discovery of anthrax in letters mailed to political leaders and members of the press, the Secret Service initiated a program to provide additional screening for mail destined for the White House

Complex. This program is indicative of the close partnership the Secret Service maintains with the White House regarding the implementation of security measures. Mail is now being delivered to a facility where it is undergoing a series of tests and is analyzed to ascertain if any chemical, biological, radiological contamination or explosive material is present. At times, additional shifts are required to screen significant increases in mail volume.

Headquarters, Management and Administration - The Headquarters, Management and Administration program develops and administers Secret Service-wide policies, plans, and procedures in budget, finance, accounting, financial systems, statements, and relocation and travel services. It exercises accountability over the collection and disposition of the Service's financial resources and examines and processes documents for payment of contracts, purchase orders, invoices and recurring expenses, including reservations and payments for travel and relocation services. It also provides management and program analysis support to all operational and administrative programs involving studies of organizational structuring, workflow efficiencies, and staffing allocations. It maintains organization charts and functional responsibility statements for all Secret Service offices. In addition, it establishes, develops, implements, and manages the strategic planning process for the Secret Service and coordinates Secret Service participation in all DHS and government-wide management improvement and evaluation programs. These tasks serve to assist the Service's leadership in formulating the vision and direction of the Secret Service.

This program also purchases goods via procurement services within the scope of the law and provides value-added procurement solutions to ensure that government assets and resources are managed wisely.

The program promotes fairness, consistency, and efficiency in the utilization of staffing, scheduling, and travel logistics through the Service's Logistics Resource Center. It analyzes staffing needs and travel logistics alternatives to provide for more informed decision-making by balancing cost considerations with operational needs.

The Administrative Operations Division (AOD) plans, develops, and administers policies and procedures, and performs related activities for a variety of real and personal property management areas in support of the Secret Service Headquarters and field elements. AOD functions include space and facilities management, personal property and supply management, vehicle fleet management, mail distribution and screening and printing management. AOD acts as the single acquisition agent between the Secret Service and the General Services Administration and the Department of State for the acquisition, construction and renovation of Secret Service-owned or leased real property.

In addition, AOD organizes and coordinates facilities and property management support activities in support of the Service's protective activities and designated NSSEs; manages and coordinates administrative operations and services functions related to the planning, preparation, establishment, and deactivation of permanent and temporary protective sites; plans, develops, and administers policies and procedures for environmental management, energy conservation and other related programs for the Secret Service and provides

building maintenance management and general repairs and limited labor services support to all Headquarters offices.

Rowley Training Center - This program encompasses personnel at the Service's James J. Rowley Training Center (JJRTC), including instructors, tactical and weapons systems specialists, curricula design staff, computer and web-based faculty/technicians, executive training advisors, administrative support, and maintenance staff. The Secret Service has a separate appropriation, the Acquisition, Construction, Improvements and Related Expenses account which is used to maintain the facility.

The Service's current Strategic Plan provides the following primary objectives with regard to future mission-driven training protocols:

- Enhance JJRTC to provide an academic environment that promotes in-depth critical thinking and innovative strategies in the areas of physical protection, site event security, threat/risk assessments, protection intelligence/counterterrorism techniques, emergency preparedness, criminal investigations, protection of critical financial infrastructure, and executive/management development.
- Maximize training opportunities by using emerging technologies, such as 3-D modeling, computer-generated simulation training, and distance learning.
- Develop and implement training programs consistent with the Service's core mission for Federal, State, and local law enforcement partners in the areas of electronic crimes, financial crimes, counterterrorism/protection, cyber/counterfeit investigations, threat/risk assessment, and operational security for National Special Security Events.
- Establish partnerships with academic institutions and professional associations to assess, confirm, and ensure innovative training methodologies.

The Rowley Training Center supports protection and criminal investigations, the two critical homeland security missions mandated for the Secret Service.

Domestic Field Operations - In order to accomplish its investigative responsibilities, the Secret Service maintains a network of 142 offices nationwide. Agents assigned to these domestic offices investigate counterfeiting of obligations and securities of the United States (currency, treasury checks, etc.) and financial crimes that include, but are not limited to, access device fraud, financial institution fraud, identity theft, and computer fraud. Secret Service agents are also responsible for investigating computer-based attacks on our nation's financial, banking, and telecommunications infrastructure. Additionally, these agents augment any protective mission or protective intelligence investigation within their geographic area of responsibility.

International Field Office Administration and Operations - The Secret Service maintains a total of 23 foreign offices and one domicile office in 19 countries. Similar to

their domestic counterparts, agents assigned to these offices are responsible for investigating violations of criminal statutes falling under the Service's investigative mission. Because they do not have arrest authority, agents liaise with their foreign law enforcement counterparts in order to fulfill their investigative responsibilities. These agents also support any protective mission or protective intelligence investigation falling within their geographic area of responsibility. Conducting criminal investigations abroad establishes relationships that greatly enhance the Service's ability to provide a safe and secure environment for protectees traveling overseas.

Electronic Crimes Special Agent Program (ECSAP) and Electronic Crimes Task Forces (ECTF) - The Secret Service established the ECSAP Program in response to the emerging trends involving the criminal use of computers and their peripheral devices. Special Agents involved with the ECSAP are computer investigative specialists qualified to conduct examinations on many types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, and other electronic media. Currently, more than 1,454 special agents have received at least one of the three levels of ECSAP training.

In addition to the ECSAP, the Secret Service has established a network of 29 domestic and two foreign ECFTs. The concept of the ECTF model is truly unique since it brings together not only federal, state and local law enforcement officials from a specific region, but also individuals from private industry and academia. These task forces provide a productive framework and collaborative crime-fighting environment in which the resources of its participants are combined to effectively and efficiently make a significant impact in detecting and preventing electronic crimes.

Support for Missing and Exploited Children – Funding for missing and exploited children includes forensic and related support of investigations involving missing and exploited children.

C – Budget Request Summary:

The Secret Service requests 7,091 positions, 7,054 FTE, and \$1,691,751,000 for FY 2012. This level of funding is required for and includes the following:

- Program changes totaling \$173,116,000 and 38 FTEs. This includes program increases for the 2012 Presidential Campaign \$60,455,000, Operational Mission Support \$65,800,000 and 35 FTE, Asian Pacific Economic Cooperation (APEC) Summit \$7,258,000, Economic Summit (G-8) \$5,686,000, NATO Summit \$5,363,000, Data Center Migration \$18,000,000, Acquisition Workforce \$671,000, and 3 FTE and Information Integration and Transformation (IIT) \$9,883,000.
- Adjustments to the base include increases for 2nd year funding for positions to be hired for the IIT program \$186,000, 3rd year funding for positions hired for the

IIT program \$81,000, and restoration of critical base infrastructure \$19,562,000. Adjustments to the base also include decreases for Data Center Migration (\$12,600,000), FY 2011 pay freeze (\$14,100,000), reduction to Operational costs (\$1,000,000), efficiency review (\$1,200,000), office relocation (\$1,700,000), professional services (\$1,500,000), and non-protective travel (\$736,000).

2012 Program Change	70	35	72,800
2012 Total Request	3,824	3,789	\$847,963

The United States Secret Service requests \$848.0 million and 3,789 FTE for this program, which includes an increase of \$9.1 million for the restoration of critical base infrastructure.

CURRENT SERVICES ACTIVITY DESCRIPTION:

The Secret Service secures the physical safety of the President, Vice President, their families, and other individuals as designated by statute, and of facilities under Secret Service protection from all threats. The Secret Service also secures the physical safety of visiting heads-of-state/heads-of-government, and their spouses, and other distinguished visitors to the United States as directed by the President. In addition, the Secret Service provides external security to foreign diplomatic embassies and missions in the Washington, DC area (and other limited areas, consistent with statute).

In order to protect our Nation's leaders, the Secret Service operates to ensure protectees' physical safety and to protect the buildings and grounds where they reside and work. The requested amount addresses the strategic challenges facing the Secret Service - including terrorists' sustained motivation to attack U.S. interests (including its leaders) and the increasing technological sophistication of the threat environment.

Uniformed Division

The U.S. Secret Service Uniformed Division (UD) began as the White House Police and was originally created as a separate and distinct organization by Public Law 67-300, approved September 14, 1922. The White House Police came under the direct

supervision of the Secret Service in 1930. The mandate of the White House Police, incorporated in Title 3 of the U.S. Code, involves duties in connection with the protection of the Executive Mansion and grounds in the District of Columbia; any building in which White House offices are located; the President and his immediate family.

The members of the UD assigned to the White House Branch perform many functions that thrust them into the public light. These officers process thousands of staff members, other workers, members of the press and those individuals with appointments into the White House Complex on a daily basis. Officers assigned to this Branch provide protection to the White House Complex through the effective use of fixed posts, foot beats, bicycle patrols and police cruisers. Technicians assigned to the Counter Sniper Unit, Canine Unit and the Emergency Response Team also provide their expertise to our mission on a daily basis in and around the White House Complex. The Special Operations Section of the UD is an additional unit responsible for tours of the White House Mansion and for the coordination of special events such as the Easter Egg Roll, Presidential Receptions, and Inaugural events. The White House Vehicle Inspection Team and the Counter Surveillance Unit also help achieve the UD goal of providing a safe and protected environment.

The UD provides a safe and secure environment for the President, his immediate family, the Vice President, their staff members and a myriad of other White House employees that work there each day. In addition to these responsibilities, personnel assigned to the White House Branch perform similar functions at the Treasury Building, the New Executive Office Building, the Eisenhower Executive Office Building, and other locations which house Presidential Offices. In addition to the White House Branch, other publicly visible components of the UD are the Naval Observatory Branch and Foreign Missions Branch.

Significant accomplishments in FY 2010 include the following:

- Provided protection for the President and Vice President, their families, visiting heads-of-state/government, other designated individuals, the White House and other buildings within the Washington, D.C. area.
- Ensured seamless security operations for the Nuclear Security Summit in Washington, DC This Summit was the largest gathering of heads of state and government in Washington's history and was the Service's 37th National Special Security Event. Our personnel had approximately 52 days to design a comprehensive security plan and did so with diligence, integrity, and professionalism consistent with the paramount mission of this agency.

Significant planned accomplishments in FY 2011 include the following:

- Continue to provide protection for the President and Vice President, their families, visiting heads-of-state/government, other designated individuals, the White House and other buildings within the Washington, D.C. area.

Significant planned accomplishments in FY 2012 include the following:

- Continue to provide protection for the President and Vice President, their families, visiting heads-of-state/government, other designated individuals, the White House and other buildings within the Washington, DC area.

2012 Current Services	535	535	68,125
2012 Program Change	-	-	-
2012 Total Request	535	535	\$68,125

The United States Secret Service requests \$68.1 million and 535 FTE for this activity.

CURRENT SERVICES ACTIVITY DESCRIPTION:

The Secret Service analyzes threats, investigates threats, and conducts intelligence advances and threat assessments in order to minimize the risk of harm to protected persons, property, and events. Subjects (individuals and groups) and activities that pose threats to protectees and protected events are investigated. The requested amount funds these activities in an environment characterized by terrorists and lone offenders. The Secret Service also conducts behavioral research into the area of “targeted violence”, and shares this knowledge with appropriate federal, state, and local entities.

2012 Current Services	-	-	1,000
2012 Program Change	-	-	18,307
2012 Total Request	-	-	\$19,307

The United States Secret Service requests \$19.3 million for this activity.

CURRENT SERVICES ACTIVITY DESCRIPTION:

The Secret Service plans and implements security designs for designated NSSEs. In addition, the Secret Service ensures the physical protection of the President, the public, and other Secret Service protectees who participate in NSSEs.

Ensuring the security of NSSEs is a vital part of the Secret Service’s homeland security mission. NSSEs, by definition, involve persons, institutions, and landmarks that are integral to the governance of the nation, vital to national and/or global economic stability, or symbolically important to American citizens. The requested amount provides funding for the design, planning, and implementation of operational security plans for NSSEs.

Significant accomplishments in FY 2010 include the following:

- Implement operational security for designated NSSEs such as the Nuclear Summit.

Significant planned accomplishments in FY 2011 include the following:

- Continue to implement operational security for designated NSSEs such as the State of the Union.

Significant planned accomplishments in FY 2012 include the following:

- Continue to implement operational security for designated NSSEs such as the State of the Union, APEC, G-8 and NATO Summits.

Campaign Labor Adjustment	275	275	39,007
2012 Adjustments-to-Base	-	-	14,000
2012 Current Services	275	275	53,007
2012 Program Change	-	-	60,455
2012 Total Request	275	275	\$113,462

The United States Secret Service requests \$113.5 million and 275 FTE for this activity. This request includes a shift of existing base resources from investigative activities to support staffing requirements for the 2012 Presidential Campaign.

CURRENT SERVICES ACTIVITY DESCRIPTION:

The Secret Service is required by statute to undertake campaign-related protective operations. The approximate costs contained in this initiative have been estimated based upon highly successful protective operations during previous campaigns. However, factors beyond the control of the Secret Service will have a major impact on the cost of the 2012 Presidential Campaign and the number of days of protection that the Secret Service will be required to provide. These factors include the political climate; the threat level within the country and the types of hazardous situations occurring overseas that impact domestic protective operations; the number of candidates that will enter the race; the number of spouses and children of the candidates that may be authorized protection; the location of the conventions; and the primary type of campaigning that will occur (national, regional, or local). The requested funding is critical to ensure the safety of Secret Service campaign-related protectees during the 2012 Presidential Campaign and will be required for expenses associated with the protection of candidates/nominees and spouses who qualify for protection in the current high-threat environment.

Significant planned accomplishments in FY 2011 include the following:

- Provide training to candidate protective detail personnel.
- Initiate protective intelligence coordination.

- Initiate campaign operations to support communications/data protocols/platforms.
- Procure supplies and equipment to support candidate/nominee protective operations.
- Procure critical protective vehicles and equipment for the campaign.

Significant planned accomplishments in FY 2012 include the following:

- Protect qualifying presidential candidates/nominees, and their spouses.
- Provide security for major political conventions and debates.
- Continue campaign protective intelligence to include inaugural activities.

PPA: White House mail screening

	Perm. Pos	FTE	Amount
2010 Actual	-	-	\$20,308
2011 C.R.	-	-	22,415
2012 Adjustments-to-Base	-	-	1,900
2012 Current Services	-	-	24,315
2012 Total Request	-	-	\$24,315

The United States Secret Service requests \$24.3 million for this activity.

CURRENT SERVICES ACTIVITY DESCRIPTION:

Due to the heightened potential of biological and chemical threats, the Secret Service implemented a security program to screen all incoming mail, equipment, supplies, and agricultural products destined for the White House Complex. The goal of this security enhancement is to identify lethal threats at a remote location away from the White House Complex, and contain, mitigate, and investigate any vulnerability posed by these threats.

Once the mail and other items are transported to the screening facility by the Executive Office of the President (EOP), security personnel and technical specialists at the facility utilize strict protocols to sample the mail for contamination and monitor the environment for potentially hazardous substances. Any items containing unknown substances are subjected to analysis at an on-site laboratory and are quarantined at the facility until any potential hazards have been positively identified and subjected to appropriate mitigation procedures. Following a determination that the screened items pose no security risks to the White House Complex and Secret Service protectees, they are released to the EOP for administrative processing and distribution.

Significant accomplishments in FY 2010 include the following:

- Opened the new White House Mail screening facility for operation on May 4, 2010.
- Completed installation of all (government-furnished) equipment to include laboratory equipment, processing equipment, Chemical Biological Radiological Nuclear and Explosive (CBRNE) detection equipment, security and access control equipment.

- Awarded contracts for the operations contractor and program management contractor to support the new White House mail screening facility.
- Continued to screen all incoming mail, packages and gifts destined for the White House complex for select CBRNE contamination at both the current mail screening facility and commenced transition of operations to the new mail screening facility.

Significant planned accomplishments in FY 2011 include the following:

- Continue to screen all incoming mail, to include packages and gifts, destined for the White House complex for select CBRNE contamination.
- Continue to watch for advancement in technology to ensure that the program is utilizing all pertinent detection technologies available and that current intelligence information is monitored to ensure possible threats are mitigated.
- Transition the facility laboratory to an independent Secret Service laboratory. The initial facility laboratory services were initiated with aid from Department of Defense personnel, Edgewater Chemical Biological Center (ECBC).

Significant planned accomplishments in FY 2012 include the following:

- Continue to screen all incoming mail, to include packages and gifts, destined for the White House complex for select CBRNE contamination.
- Continue to ensure that the program is utilizing all pertinent detection technologies available and that current intelligence information is monitored to ensure possible threats are mitigated.

2012 Program Change	10	6	21,554
2012 Total Request	343	341	\$246,602

The United States Secret Service requests \$246.6 million and 341 FTE for this activity, which includes an increase of \$5.4 million for the restoration of critical base infrastructure.

CURRENT SERVICES ACTIVITIES DESCRIPTION:

Administration is responsible for:

- Tracking, monitoring, executing, and reporting the financial activities of the Secret Service;
- Improving the efficiency and productivity of personnel;
- Conducting analyses of program objectives and strategies to examine operational and cost factors impacting the continued viability of ongoing activities and the feasibility of proposed initiatives;
- Procuring quality goods and services in a timely fashion; and
- Administering the design, construction, acquisition, assignment, maintenance, and disposal of Secret Service properties.

Administrative Operations

This activity plans, develops and administers policies and procedures and performs related activities for a variety of real and personal property management areas in support of the Secret Service Headquarters and field offices.

Some functions include Protective and Investigative Facilities Management; JJRTC Facilities Management; Mail and Print Operations Management; Property Management; Warehouse and Disposal Management; and Fleet Management.

In addition, Administrative Operations acts as the primary acquisition agent between the Secret Service and General Services Administration (GSA); Department of State; the U.S. Army Corps of Engineers and other Federal Government and Department of Defense organizations for the acquisition, construction and renovation of Secret Service owned or leased real property.

Organizes and coordinates facilities and property management activities in support of the Service's protective missions as well as designated NSSEs; and manages and coordinates administrative operations and services functions related to the planning, preparation, establishment, and deactivation of permanent and temporary protective sites. This activity provides building maintenance management, general repairs, engineering, architectural and design services, as well as labor services in support of all Secret Service Memorial Headquarters Directorates and Divisions.

Significant accomplishments in FY 2010 include the following:

- Provided support for protection of the President and Vice President, their families, visiting heads-of-state/government, other designated individuals, the White House and other buildings within the Washington, DC area.
- Provided support for protection of heads-of state/government at the 65th United Nations General Assembly.
- Provided support for protection of the President, Vice President, other government officials, and foreign heads of state/heads of government and spouses who were in attendance during the Nuclear Summit in April 2010 in Washington DC.
- Provided support for operational security for designated NSSEs

Significant planned accomplishments in FY 2011 include the following:

- Continue to provide support for protection of the President and Vice President, their families, visiting heads-of-state/government, other designated individuals, the White House and other buildings within the Washington, D.C. area.
- Continue to provide support for operational security for designated NSSEs.

Significant planned accomplishments in FY 2012 include the following:

- Initiate planning and preparation to provide major event infrastructure support for the next annual UN General Assembly and other events as announced.

Financial Management

The financial management activity includes systems development in specific business areas including: core financial accounting and reporting; travel and relocation management; property management; and procurement management. This activity develops appropriate interfaces between these and other administrative systems, and supports system users through training, communications, user procedures, and technical support services.

Significant planned accomplishments in FY 2011 include the following:

- Provide the infrastructure to integrate time and labor with the enterprise financial application. This will support the improved financial reporting required by Congress, the Office of Management and Budget, and the Secret Service.

Significant planned accomplishments in FY 2012 include the following:

- Continue to provide the infrastructure to integrate time and labor with the enterprise financial application. This will support the improved financial reporting required by Congress, the Office of Management and Budget, DHS and the Secret Service.
- Procure commercial off-the-shelf products to implement a financial repository of enterprise data (FRED) during the 2nd quarter of the fiscal year.
- Produce financial dashboards and reports by program, organization, project, and object class codes.
- This repository will allow for better matching of costs to activities, improve the tracking of budgeted funds against budget execution, provide better management of costs in accordance with the existing PPA structure and facilitate reporting in accordance with the BUR.
- Evaluate and merge data captured in tracking systems outside the financial system environment to produce meaningful, accurate reports and analyses that will enable management to make better financial decisions, support future budget submissions, and support financial data presented to the Department, Office of Budget and Management, and Congress.
- Establish a Component Acquisition Executive position and support team to help the Secret Service oversee investment decisions by taking into consideration the current needs, as well as the uniform and thorough vetting of investment

proposals, contracting and program management; better manage investments throughout their lifecycles, from start to finish; and increase the discretionary dollars by reducing or eliminating redundant, poor performing or outdated business practices.

Program Management

This activity continues to actively participate in the Department of Homeland Security (DHS) planning and performance measurement processes, including DHS Strategic Plan revision, Risk Steering Committee Tier III (and associated working group) meetings, DHS Performance Improvement Officer Council meetings, and the DHS Performance Team Working group and associated activities. It continues to coordinate the Service's submission of timely responses to quarterly reporting requirements for the President's Management Agenda (PMA), and facilitate the Service's achievement of scores above the DHS average. This activity contributes to managing organizational change initiatives by continuously monitoring and coordinating the regular update and publication of official Secret Service policy directives.

Significant accomplishments in FY 2010 included the following:

- Continued to take steps to ensure Records Management in the Secret Service is understood and tools are in place to facilitate effective and efficient records management, in order to pave the way for deployment of an Enterprise Records Management System (ERMS) to help manage records electronically. Specific efforts completed include development of a web-based training module, completion of which is required by all Secret Service personnel during each performance year; hiring of a Program Manager for the ERMS project; and deployment of a new records management directive and instruction.

Significant planned accomplishments in FY 2011 included the following:

- Continue to take steps to ensure Records Management in the Secret Service is understood and tools are in place to facilitate effective and efficient records management, in order to pave the way for deployment of an ERMS to help manage records electronically. This includes the establishment of a new comprehensive file plan (numbering system) based upon Federal Enterprise Architecture (FEA) protocols; survey and analysis of electronic records holdings to ensure non-paper holdings are properly scheduled and disposed; and integration of metadata needed by ERMS into existing and developing IT systems and databases.

Significant planned accomplishments in FY 2012 included the following:

- Serve as a pilot location for the ERMS solution designated by the Department, and provide constructive feedback to refine the application's deployment and use throughout the Department.

The United States Secret Service requests \$55.6 million and 273 FTE for this activity, which includes an increase of \$1.0 million for the restoration of critical base infrastructure.

CURRENT SERVICES ACTIVITY DESCRIPTION:

The James J. Rowley Training Center (JJRTC) is responsible for:

- developing, administering, and coordinating training programs for Secret Service employees, and for other federal law enforcement agencies and law enforcement officials from various state and local police departments;
- providing all basic, in-service, and specialized skills training for special agents, Uniformed Division officers, special officers and other professional personnel;
- providing training for the executive, managerial, supervisory, administrative support, cyber/IT solutions, and foreign language needs for all Secret Service components;
- providing specialized operational training for the Service’s tactical elements (counter-assault, counter-sniper, and emergency response teams), which include the core components of the protective methodology;
- evaluating, selecting, and training all Secret Service explosive detection canines/tactical canines;
- administering and coordinating fitness, control tactics, vehicle operation training, emergency medicine, and water safety programs;
- conducting research and testing of munitions, and related equipment technology; and
- administering the acquisition, storage, maintenance, and issuance of firearms, operational weapons and ammunition to all Secret Service personnel.

Significant accomplishments in FY 2010 include the following:

- JJRTC provided specialized operational skills training to include, Protective Detail Training; Counter Assault Team Selection and Basic Course, Emergency Response Team Selection and Basic Course, and Countersniper Selection and Basic Course for special agents and Uniformed Division Officers.

Significant planned accomplishments in FY 2011 include the following:

- JJRTC will continue to provide specialized operational skills training to include, Protective Detail Training; Counter Assault Team Selection and Basic Course, Emergency Response Team Selection and Basic Course, and Countersniper Selection and Basic Course for special agents and Uniformed Division Officers.
- JJRTC will oversee the accreditation of the Firearms Instructor Training Course (FITC) in accordance with the DHS, Federal Law Enforcement Training Accreditation (FLETA) guidelines and standards.

Significant planned accomplishments in FY 2012 include the following:

- JJRTC will continue to provide specialized operational skills training to include, Protective Detail Training; Counter Assault Team Selection and Basic Course, Emergency Response Team Selection and Basic Course, and Countersniper Selection and Basic Course for special agents and Uniformed Division Officers.
- JJRTC will oversee the re-accreditation process for its Uniformed Division Training Course (UDTC), Special Agent Training Course (SATC), Essentials of Instruction (Instructor Development Program) Course, and academy curriculum.

2012 Total Request	1,457	1,457	\$223,991

The United States Secret Service requests \$224.0 million and 1,457 FTE for this activity. This request includes a shift of existing base resources to support staffing requirements for the 2012 Presidential Campaign and an increase of \$4.0 million for the restoration of critical base infrastructure

CURRENT SERVICES ACTIVITY DESCRIPTION:

The Secret Service investigates violations of laws relating to counterfeiting of obligations and securities of the United States, and financial crimes that include, but are not limited to, financial institution fraud, identity theft, access device fraud, money laundering and electronic crimes. Domestic field resources are focused on achieving the Department of Homeland Security strategic objective of economic security. The requested amount funds field offices nationwide in a strategic context which addresses the spread of the Internet and other consumer-friendly technologies that facilitate electronic commerce, and the increasing growth and complexity of electronic criminal threats and exploitation of those technologies.

Significant accomplishments in FY 2010 include the following:

- Maintained current investigative operations while continuing to pursue efficiencies within program areas.

Significant planned accomplishments in FY 2011 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas.
- Continue to maintain supportive protective operations.

- Enhance capabilities to prevent and mitigate attacks against the U.S. critical infrastructures including:
 - Expand Electronic Crimes Task Forces (ECTFs)
 - Expand Financial Crimes Task Forces (FCTFs)
 - Expand training efforts through the Electronic Crimes Special Agent Program (ECSAP)
 - Increase focus on cyber intelligence

Significant planned accomplishments in FY 2012 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas.
- Continue to maintain supportive protective operations.
- Enhance capabilities to prevent and mitigate attacks against the U.S. critical infrastructures including:
 - Expand Electronic Crimes Task Forces (ECTFs)
 - Expand Financial Crimes Task Forces (FCTFs)
 - Expand training efforts through the Electronic Crimes Special Agent Program (ECSAP)
 - Increase focus on cyber and protective intelligence

2011 C.R.	74	74	30,705
2012 Adjustments-to-Base	-	-	266
2012 Current Services	74	74	30,971
2012 Total Request	74	74	\$30,971

The United States Secret Service requests \$31.0 million and 74 FTE for this activity.

CURRENT SERVICES ACTIVITY DESCRIPTION:

The Secret Service provides a comprehensive, internationally coordinated response to new threats to the integrity of U.S. currency and other transnational crimes.

International field resources are focused on achieving the DHS strategic objective of economic security (e.g. combating foreign counterfeiting of U.S. currency). The requested amount funds 23 international offices and one domicile office in 19 countries in a strategic context of the worldwide spread of the Internet and other consumer-friendly technologies that facilitate electronic commerce, the increasing criminal exploitation of those technologies, and dollarization.

Significant accomplishments in FY 2010 include the following:

- Maintained current investigative operations while continuing to pursue efficiencies within program areas.
- Expanded overseas presence with the opening of a new office in Tallinn, Estonia to combat financial crimes.

Significant planned accomplishments in FY 2011 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas.
- The Secret Service is pursuing efforts to establish a permanent presence in Lima, Peru during FY 2011, to combat the counterfeiting of U.S. currency. In one year, there has been a 26% increase in counterfeit identification and seizure, from \$9.6M in 2009 to \$12.1M in 2010. Peruvian National Police

currently rely heavily upon the Secret Service for investigative expertise in combating counterfeit crimes.

Significant planned accomplishments in FY 2012 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas.

The United States Secret Service requests \$53.1 million and 290 FTE for this activity. This request includes a shift of existing base resources to support staffing requirements for the 2012 Presidential Campaign.

CURRENT SERVICES ACTIVITY DESCRIPTION:

Through the Electronic Crimes Special Agent Program (ECSAP), the Secret Service trains special agents to detect network intrusions and conduct examinations on all types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, scanners, and other electronic equipment. Through Electronic Crimes Task Forces (ECTF), the Service forms partnerships with private industry, academia, other federal law enforcement, and state and local law enforcement to prevent, detect, mitigate, and aggressively investigate attacks on our nation's financial infrastructures.

The ECSAP and ECTF's combat those who seek to defraud financial institutions, private industry, or individuals through electronic or digital media. The requested amount funds these entities in an environment characterized by a rise in electronic financial transactions and associated criminal activity.

Significant accomplishments in FY 2010 include the following:

- Continued to foster exceptional relationships with other federal, state, and local law enforcement agencies by building on proven investigative techniques and expanding methodologies that have already been developed and deployed.
- Maintained current investigative operations while continuing to pursue efficiencies within program areas.

Significant planned accomplishments in FY 2011 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas.

Significant planned accomplishments in FY 2012 include the following:

The United States Secret Service requests \$8.4 million and 20 FTE for this activity.

CURRENT SERVICES ACTIVITY DESCRIPTION:

Language contained in the Violent Crime Reduction Trust Fund legislation in 1995 directed the Secret Service to provide forensic support to the National Center for Missing and Exploited Children. Since that time, forensic support has included polygraph examinations, handwriting examinations, voiceprint comparisons, audio and video enhancements, age progressions/regressions, and fingerprint research and identification.

Requested funding provides state of the art forensics support for investigations involving missing and exploited children and grant funds for activities related to the investigations of missing and exploited children. In a strategic context characterized by predators determined to abuse the nation's children, the Service's technologies provide critical support to associated investigations.

Description of Item

Successful acquisition outcomes are the direct result of having the appropriate personnel with the requisite skills managing various aspects of the acquisition process. Between FY 2000 and FY 2008, acquisition spending by civilian agencies increased by 56% (in inflation-adjusted dollars). The Department of Homeland Security is working to ensure its major acquisitions are effectively managed to ensure that the Department maximizes the value of every homeland security dollar and that major programs are implemented in the most responsible and efficient manner possible. This includes having disciplined oversight processes and robust acquisition program management teams in place. DHS has assessed the current resident skills against a set of core acquisition management skills: a program manager, a systems engineer, a life cycle logistician, a business/financial manager and a contracting officer's technical representative, and determined that many of our major acquisition programs are deficient in several of these areas.

The President's March 4, 2009 memorandum on Government Contracting required agencies to improve acquisition practices and performance by maximizing competition and value, minimizing risk, and reviewing the ability of the acquisition workforce to develop, manage, and oversee acquisitions appropriately. Subsequent guidance from the Office of Management and Budget, including memorandum M-09-25 *Improving Government Acquisition* issued July 29, 2009, and OFPP's Memorandum of October 27, 2009 *Acquisition Workforce Development Strategic Plan for Civilian Agencies- FY2010-2014*, provided guidance to agencies to strengthen the acquisition workforce and increase the civilian agency workforce by 5% to more effectively manage acquisition performance. These funds will help ensure the future programmatic growth requirements for training, recruitment, and retention activities while helping us to attract and hire

qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act.

In support of the administration's emphasis on strengthening the Federal acquisition workforce, the Secret Service requests \$671,000 to increase its acquisition workforce capacity and capabilities. The increase will mitigate the risks associated with gaps in either capacity or capability of the acquisition workforce and improve its effectiveness. The resources requested for the Secret Service will be used to:

- Hire five positions; Logistician GS-15, Business Financial Manager GS-14, IT/System Architect GS-15, Test and Evaluator GS-14, and Cost Estimator GS-15.
- Increase the capability of the acquisition workforce by investing in training to close identified gaps in such areas as project management, negotiations, requirements development, contract management, and other key topics;
- Increase the effectiveness of the acquisition workforce by investing in improvements to systems that support the contracting function;
- Conduct an assessment of options for creating systems to maintain comprehensive acquisition workforce data and selecting the appropriate system; and
- Increase the effectiveness of the Department's centralized acquisition workforce training program comprised of certification and targeted/continuous learning developmental training opportunities.

Impact on Performance (Relationship of Increase to Strategic Goals)

The FY 2012 funding request will help ensure:

- The future programmatic growth capacity for training, recruitment, and retention activities while attracting and hiring qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act. These funds allow DHS the ability to train, recruit, and retain at acceptable standards.

The sustainability and availability of information technology systems and equipment in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

Program Increase 7:

Data Center Migration

PPA:

Headquarters, management and administration

Program Increase:

Positions __ FTE __ Dollars \$18,000

Funding Profile:

FY 2010 Actual \$0; FY 2011 C.R. \$12,600; FY 2012 Request \$18,000

	FY 2010 Actual			FY 2011 C.R.			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									\$12,600
Adjustments-to-base									(12,600)
Program Increase									18,000
Total Request									\$18,000

Description of Item

FY 2012 data center development funding, to be managed through the DHS Working Capital Fund (WCF), will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers for central DHS management. This includes:

- Discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS Data Centers Purchase of new equipment for placement in the DHS Data Centers as part of migration/transition efforts
- Installation of equipment racks at the DHS Data Centers
- Migration-related build-out of DHS Data Center infrastructure
- Transition of disaster recovery/backup/COOP (Continuity of Operations) capability to DHS Data Centers
- Installation of infrastructure support as part of system migrations at the DHS Data Centers

Justification

The Data Center consolidation efforts will standardize IT resource acquisitions across DHS Components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

Program Increase 8: Information Integration and Transformation (IIT)

PPA: Headquarters, management and administration

Description of Item

The USSS plans a significant transformation and sustained investment of resources in information technology (IT) and communications capabilities in the Information Integration and Transformation (IIT) Program. The USSS relies heavily on infrastructure and communications systems to perform its mission. Each day, whether executing protective, investigative, or administrative duties, USSS agents, officers, and professional staff require secure, reliable, and resilient voice and data communications networks, applications, systems, and equipment to operate effectively.

The USSS is dependent on its IT infrastructure and communications systems to monitor the threat environment, detect threats, assess and analyze the threat potential. IT capabilities are leveraged to plan and execute protective, investigative, and administrative activities, all while maintaining real-time communication interfaces with key mission partners. These mission partners include, but are not limited to, DHS, Department of Defense (DOD), Department of State (DOS), law enforcement agencies (foreign, federal, state, and local), and the intelligence community.

The approach for segmenting the IIT Program into Capability Areas allows for the delivery of critical functionalities in logical groupings based on need and interdependencies as documented in the IIT Mission Needs Statement (MNS), while also supporting current USSS funding timelines and organizational structure. The IIT Program Capability Areas are described in the following paragraphs.

IIT Capabilities Description

Enabling Capabilities: Address the IIT MNS' Enterprise Business Support capability gaps in IT Infrastructure and Information Assurance (IA). Capabilities include IT Infrastructure Modernization, Database Architecture and Maintenance, Cyber Security, Information Assurance, and Data Center Consolidation. The IIT Enabling Capabilities provide the foundational infrastructure, and are intended to be initiated first, and may be delivered in parallel to other IIT capabilities. As an example, the IA capability assists in the certification and accreditation of USSS systems which is key to maintaining the confidentiality, integrity, and availability of the USSS IT infrastructure.

Communication Capabilities: Address the USSS voice and data (routine / secure) interoperability gaps with key internal and external organizations and consist of the Communication Interoperability (e.g., White House Communications Agency Interoperability), and Internet Protocol Communications Convergence activities. Capabilities include secure radios, satellite telephones, HSDN / HTSN terminals and video teleconferencing.

Control Capabilities: Address the capability gaps in physical and logic controls managing access to USSS information and activities and consist of Cross Domain - Multi-Level Security and Access Control. Control Capabilities focus on the functions associated with managing access to the various capabilities delivered across the IIT Program to meet operational requirements. Capabilities include the ability to pass and receive classified and unclassified information from single workstation and address HSPD-12 access control requirements.

Mission Support Capabilities: Address the capability gaps in the day-to-day USSS mission activities and consist of Threat Management, Protective Security Planning and Investigative Technologies, Enterprise Logistics Management and Operations (Combined Operations and Logistics Database, COLD 2), Business Process Modernization, and Headquarters Management and Administration capabilities. Mission Support Capabilities deliver the core functions and modernized applications associated with protective, investigative, and administrative activities. These capabilities transition legacy applications to web enabled applications and consolidated databases. **Justification**

The USSS IIT Program will modernize legacy applications and business processes into a modern infrastructure leveraging a common database architecture that enhances mission performance. The IIT Program will provide secure, reliable, resilient, and timely IT and communications systems that are interoperable with USSS mission partners, meet expectations for regulatory compliance, and enable USSS personnel to carry out their statutory protective and investigative responsibilities.

The USSS mission needs are organized by business categories and functions that are enabled by the IIT Program. These mission needs are defined by the gaps identified in the IIT MNS aligned within the four business categories:

- Protective

- Investigative
- Enterprise Support
- Enterprise Business Support

The IIT MNS points to the need for a comprehensive overhaul of the USSS IT and communications systems implemented by means of an extensive and complex re-architecting of the current infrastructure and the careful selection and integration of interoperable capabilities based on USSS core functions and priorities. The IIT Program supports the USSS mission through the collection, management, reporting, distribution and communication of protective, investigative, and administrative information. The specific USSS functions enabled by the IIT Program are described in the IIT Operational Requirements Document (ORD) and Concept of Operations (CONOPS) and are grouped into four Capability Areas that consist of multiple projects:

- Enabling Capabilities
- Communications Capabilities
- Control Capabilities
- Mission Support Capabilities

The below impact statement explains how the Secret Service would allocate the funding and is consistent with the IIT ARB (Acquisition Review Board) briefing / ADE (Acquisition Decision Event) 2 approval by DHS on January 28, 2011.

Impact on Performance (Relationship of Increase to Strategic Goals)

Funding will allow the Secret Service to commence Phase II (Design and Development) of the IIT Program, which involves a significant re-architecting of the existing dated infrastructure and provide new specialized cyber security tools and software. Further, classified electronic messaging systems such as HSDN (Homeland Secure Data Network) and HTSN (Homeland Top Secret Network), and secure communications equipment designed to support mission critical activities will be acquired. The secure communications systems and equipment will address some operational mission gaps. Information Assurance activities such as Certification and Accreditation will continue. The Secret Service will deploy the Protective Threat Management System (PTMS) tool that will centralize USSS protective intelligence and threat assessment activities.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
United States Secret Service
Justification of Proposed Changes in Salaries and Expenses
Appropriation Language**

For necessary expenses of the United States Secret Service, including purchase of not to exceed 652 vehicles for police-type use, for replacement only, hire of passenger motor vehicles; purchase of motorcycles made in the United States; hire of aircraft; services of expert witnesses at such rates as may be determined by the Director of the Secret Service; rental of buildings in the District of Columbia, and fencing, lighting, guard booths, and other facilities on private or other property not in Government ownership or control, as may be necessary to perform protective functions; payment of per diem or subsistence allowances to employees where a protective assignment during the actual day or days of the visit of a protectee requires an employee to work 16 hours per day or to remain overnight at a post of duty; conduct of and participation in firearms matches; presentation of awards; travel of United States Secret Service employees on protective missions without regard to the limitations on such expenditures in this or any other Act; research and development; grants to conduct behavioral research in support of protective research and operations; and payment in advance for commercial accommodations as may be necessary to perform protective functions; [~~\$1,567,642,000~~] \$1,691,751,000; of which not to exceed \$25,000 shall be for official reception and representation expenses; of which not to exceed \$100,000 shall be to provide technical assistance and equipment to foreign law enforcement organizations in counterfeit investigations; of which \$2,366,000 shall be for forensic and related support of investigations of missing and exploited children; and of which \$6,000,000 shall be for a grant for activities related to the investigations of missing and exploited children and shall remain available until expended: Provided, That up to \$18,000,000 provided for protective travel shall remain available until September 30, [2012] 2013: Provided further, That up to [~~\$1,000,000~~] \$19,307,000 for National Special Security Events shall remain available until expended: Provided further, That the United States Secret Service is authorized to obligate funds in anticipation of reimbursements from Federal agencies and entities, as defined in section 105 of title 5, United States Code, receiving training sponsored by the James J. Rowley Training Center, except that total obligations at the end of the fiscal year shall not exceed total budgetary resources available under this heading at the end of the fiscal year: Provided further, That none of the funds made available under this heading shall be available to compensate any employee for overtime in an annual amount in excess of \$35,000, except that the Secretary of Homeland Security, or the designee of the Secretary, may waive that amount as necessary for national security purposes: Provided further, That none of the funds

appropriated to the United States Secret Service by this Act or by previous appropriations Acts may be made available for the protection of the head of a Federal agency other than the Secretary of Homeland Security: Provided further, That the Director of the United States Secret Service may enter into an agreement to perform such service on a fully reimbursable basis: Provided, that the funds made available under this heading, \$671,000 shall be for strengthening the capacity and capabilities of the acquisition workforce (as defined by the Office of Federal Procurement Policy Act, as amended (41U.S.C. 401 et seq.)), including the recruitment, hiring, training, and retention of such workforce and information technology in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

B: FY 2011 to FY 2012 Budget Change

PPA Mission Statement

Protection of Persons and Facilities - Ensure the safety and security of national leaders, visiting heads of state and government and other designated protectees. Safeguard the White House Complex, the Vice President's residence, foreign missions in the Washington, DC area and other high profile sites.

Protection resources directly support the DHS strategic goal to protect critical infrastructure, which includes our nation's leaders, other high profile persons and designated sites. The Service ensures protectees' physical protection at all times. Protection includes all activities related to identifying threats, mitigating vulnerabilities and creating secure environments wherever protectees work, reside and travel. The requested amount addresses strategic challenges which include terrorists' sustained motivation to attack U.S. interests (including its leaders), and the increasing complexity and technological sophistication of the threat environment.

Summary Justification and Explanation of Changes

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Salaries and Benefits	\$587,892	\$606,665	\$625,654	\$18,989

Salaries and benefits includes funding for 3,789 FTE.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Travel	\$50,703	\$61,703	\$61,780	\$77

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with federal travel regulations.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Transportation of Things	\$1,458	\$1,423	\$1,465	\$42

Transportation of things includes all costs of the care of such things while in the process of being transported, and other services incident to the transportation of things.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
GSA Rent	\$40,858	\$31,020	\$31,159	\$139

GSA rent includes all payments to the General Services Administration (GSA) for rental of space and rent-related services.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Other Rent	\$132	\$0	\$0	\$0

Other rent includes all payments to a non-Federal source for rental of space, land, and structures.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Communication, Utilities, and Misc. Charges	\$15,416	\$11,809	\$13,999	\$2,190

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Printing	\$8	\$76	\$121	\$45

Printing includes all costs for printing and reproduction obtained from the private sector or from other federal entities.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Other Services	\$33,209	\$15,777	\$38,741	\$22,964

Other services include contractual services from federal and non-federal sources.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Supplies and Materials	\$11,000	\$7,001	\$7,043	\$42

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	2010 Actual	2011 C.R.	2012 Request	2011 to 2012 Change
Equipment	\$16,378	\$29,643	\$34,626	\$4,983

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

PPA Mission Statement

National Special Security Events - Effectively lead and manage the planning, coordination and implementation of operational security plans at designated NSSEs. Ensure the physical protection of the President, the public, and other Secret Service protectees who participate in NSSEs.

NSSE resources directly support the DHS strategic goal to protect critical infrastructure, which includes events of symbolic importance to American citizens. Protection includes all activities related to identifying threats, mitigating vulnerabilities and creating secure environments wherever these specially designated events take place. The requested amount ensures NSSE security measures continue to evolve at an appropriate pace to meet the challenges of an increasingly complex threat environment.

PPA Mission Statement

Rowley Training Center - Strengthen the agency's ability to develop and retain a highly specialized and dedicated workforce to fulfill mission-critical requirements.

Rowley Training Center resources support the DHS strategic goal to protect critical infrastructure by ensuring the USSS workforce is continuously prepared to meet the challenges of the investigative and protective missions. The requested amount will ensure that the Service's most important resource - its employees - have the knowledge and skills and abilities to execute the investigative and protective missions. In a strategic context of threat, the Service must ensure that its workforce planning and development practices outpace the threat environment.

PPA Mission Statement

Domestic Field Operations - Investigate violations of laws relating to counterfeiting of obligations and securities of the United States; investigate financial crimes that include, but are not limited to, financial institution fraud, identity theft, access device fraud, and money laundering.

Domestic field office resources directly support the DHS strategic goal to protect critical infrastructure, which includes protecting our nation's currency and financial systems within our borders. The requested amount funds field offices nationwide in a strategic context that includes advances in photographic and printing device technologies and the spread of the internet and other consumer-friendly technologies. These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies increases, field resources must continue to demonstrate agility in combating criminal efforts.

PPA Mission Statement

International Field Office Administration and Operations - Provide a comprehensive, internationally-coordinated response to threats to the integrity of U.S. currency and other transnational financial crimes.

International field office administration and operations resources directly support the DHS strategic goal to protect critical infrastructure, which includes protecting our nation's currency and financial systems from threats originating abroad. The requested amount funds field offices in 18 countries in a strategic context that includes advances in photographic and printing device technologies and the worldwide spread of the internet, other consumer-friendly technologies and dollarization (when a developing county replaces its national currency with the U.S. dollar). These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies and practices increases, field resources must continue to demonstrate agility in combating criminal efforts.

PPA Mission Statement

Electronic Crimes Special Agent Program (ECSAP) - Develop and deploy personnel trained specifically to detect network intrusions and conduct examinations on all types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, scanners, and other electronic equipment, to investigate complex electronic crimes and develop strong cases for prosecution. Electronic Crimes Task Forces (ECTFs) - Form and expand partnerships to reinforce strategic alliances among law enforcement, academia and private industry to prevent, detect, investigate and mitigate the effects of electronic crimes on our nation's financial infrastructure.

ECSAP and ECTF resources directly support the DHS strategic goal to protect critical infrastructure, which includes reducing losses resulting from electronic crimes perpetrated against our nation's financial infrastructure. The ECSAP and ECTFs combat those who seek to defraud U.S. financial institutions, private industry or individuals through electronic or digital means. The requested amount funds the ECSAP and ECTF entities in a strategic context that includes advances in photographic and printing device technologies and the worldwide spread of the internet and other consumer-friendly technologies. These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies and practices increases, the ECSAP and ECTF ensure the Service remains on the cutting edge of electronic crime investigations, and that it maintains liaisons with critical partners and stakeholders.

PPA Mission Statement

Support for Missing and Exploited Children - Provides grant funding and forensic support for cases involving missing and exploited children. Forensic support includes polygraph examinations, handwriting examinations, voiceprint comparisons, audio and video enhancements, age progressions/regressions, and fingerprint research and identification.

Funding provides state of the art forensics support for investigations involving missing and exploited children and grant funds. In a strategic context characterized by predators determined to abuse the nation's children, the Secret Service's technologies provide critical support to associated investigations.

Acquisition, Construction, Improvements, and Related Expenses

I. Appropriation Overview

A – Mission Statement for Acquisition, Construction, Improvements, and Related Expenses

The Acquisition, Construction, Improvements, and Related Expenses (ACIRE) account ensures funding related to the support and deferred maintenance of the James J. Rowley Training Center (JJRTC). The JJRTC is the primary training center for the United States Secret Service. The overall support and maintenance provided through ACIRE funding is critical to the agency's missions – protection and criminal investigations. ACIRE funding provides critical support for JJRTC infrastructure, life cycle maintenance of structures and systems; as well as sustainment of existing facilities and program support assets. The JJRTC is utilized by special agents, uniformed officers, and support personnel.

B – Budget Activities:

James J. Rowley Training Center (JJRTC)

The Acquisition, Construction, Improvements, and Related Expenses (ACIRE) account is used to maintain the Service's JJRTC which provides the protection and criminal investigation training required to meet the needs of the Service's dual mission.

C – Budget Request Summary:

The United States Secret Service requests \$6,780,000 (0 FTE) to maintain the JJRTC located in Beltsville, Maryland; this includes an adjustment to base of \$455,000 for the increased cost of JJRTC maintenance contracts and a program increase of \$2,350,000 to address deferred maintenance at the JJRTC.

The United States Secret Service requests \$6.8 million and 0 FTE for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Acquisition, Construction, Improvements, and Related Expenses account is used to maintain the James J. Rowley Training Center. This facility provides the protection and criminal investigation training required to meet the needs of the Service's dual mission.

Significant accomplishments in FY 2010 include the following:

- Completed the repaving and extension of the Protective Operations Driving Course pad, including repaving the feeder roads onto the pad.
- Completed the surge suppression and lightning protection project, ArcFlash analysis and labeling, Physical Training Expansion Area and waterproofing/sealing projects which covers the Bowron, Merletti and Knight buildings.
- Commenced replacement of the entire perimeter fence and repaired/replaced the roofs on the Outdoor Pistol and Rifle Ranges.

Significant planned accomplishments in FY 2011 include the following:

- Replacement of the Canine building roof.
- Repaving of the Bowron and Knight parking lots as well as several roadways.

- Commence phase two of the HVAC upgrade project which will replace boilers in the Knight and Wilson building.
- Replacement of hot water heaters in numerous buildings and energy efficient upgrades to campus-wide electrical fixtures.
- Install new HVAC unit in the Moran Building.
- Completion of the security upgrade project for the front gate.
- Continue to maintain the facilities and grounds at the JJTRC.

Significant planned accomplishments in FY 2012 include the following:

Address maintenance backlog such as:

- Replace Target Systems at outdoor pistol and rifle ranges.
- Enclose and renovate the HVAC pit at the Wilkie Building.
- Repair/renovate HVAC system controls.
- Repair/replacement of skylights in the Knight and Wilson Buildings.
- Replace main entry doors on various buildings campus wide to meet current safety codes.
- Replace the computer room HVAC system in the Hazen Building.
- Repair/replace sidewalks campus-wide.
- Upgrade the electrical systems at the Judgmental Range and Tactical Village.
- Repair/replace windows on various campus-wide buildings.
- Repair roadways campus-wide.

Current Services Level									
Program Increase									\$2,350
Total Request			\$8,966						\$2,350

Description of Item

This budget requests funding necessary to sustain the JJRTC campus structures, infrastructure, and equipment. The integrity of the structures, infrastructure, and equipment at the Rowley Training Center has deteriorated significantly in recent years. This is evidenced by the current deferred maintenance backlog identified and partially covered by the FY 2009 Omnibus Supplemental. Funding to address these deferred maintenance issues will allow the Secret Service to eliminate its current deferred maintenance backlog within four years and maintain its certification as a Federal Law Enforcement Training Accreditation-accredited training center.

Justification

In a September 2007 report submitted to Congress, the Secret Service identified roughly \$13 million in backlogged maintenance at the JJRTC, noting urgent problems such as ". . . the failure to back feed campus structures during electrical outages; sewer lines that are undersized and not capable of carrying discharged effluent; and a water tank that is too low in height and cannot provide the water pressure required to sustain fire sprinklers." In response to these emergency needs, the FY 2009 Omnibus Appropriations Act (P.L. 111-8) provided the Secret Service with \$12,730,000 in supplemental funding for repairs and deferred maintenance at JJRTC.

Prior to obligating the funds provided in P.L. 111-8, the Secret Service developed an expenditure plan that prioritized work according to mission criticality. The first priority

gave attention to projects that required near-term action to remediate code violations or known life-threatening safety hazards that jeopardized suitability for occupancy. The second priority focused on repairs that would prevent accelerated deterioration of building components or systems, replace components that were worn out or beyond their useful service life, avert the loss of critical systems that would significantly affect training, address existing non-life threatening safety hazards, or reduce unacceptably high maintenance, energy, and/or other operating costs.

Supplemental funding is currently helping to support several large-scale projects to address these issues, but large infrastructure projects remain, including the repaving of the entire campus road system (which is approximately seven miles, has not been repaved in over twenty years, and is showing real signs of deterioration). JJRTC uses the road network for dynamic training scenarios in both the investigative (i.e. vehicle traffic stops) and protective mission (i.e., motorcade movements). Repairing and repaving the JJRTC road system is essential to meeting the training needs of this agency. Additionally, it has become readily apparent that the targeting systems on both the indoor and outdoor ranges need to be replaced as they require extensive non-customary maintenance and parts are difficult to obtain. This, in effect, impacts training because the ranges are taken out of commission when they are not fully functional.

A well-maintained facility is vital to ensuring that special agents and Uniformed Division Officers can conduct quality criminal investigations and provide security to all our protectees and protective sites. It fosters an environment that provides training in accordance with the high standard of excellence that the Secret Service is known for throughout the law enforcement community.

Performance Impact

This funding will halt the slide of equipment, building, and structure failure at JJRTC. Funds will immediately address this long-term problem and the risks associated with facilities requirement shortfalls. The states of the Rowley facilities have had a negative impact on training, raising the potential of significant harm to Secret Service employees, Secret Service protectees.

This initiative directly supports Quadrennial Homeland Security Review Mission Objective 1.3.4 “protect(ing) government leaders, facilities, and special events.” As providing 100 percent protection is the top priority of the Secret Service, funding this program will have a cascading effect on minimizing risk. This funding will minimize risk and positively affect the protective operation training that occurs at JJRTC and the Service's overall mission.

This initiative also directly supports QHSR Mission Objective 1.3.2 “Protect critical infrastructure,” and 4.1.3 “Prevent cyber crime and other malicious uses of cyberspace.” Sufficient funding for the buildings, structures, and equipment located at JJRTC will improve cyber training and better allow Secret Service agents to investigate increasingly

more sophisticated financial and cyber crimes such as identity theft, credit card fraud, and computer fraud.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
United States Secret Service
Justification of Proposed Changes in
Acquisition, Construction, Improvements, and Related Expenses
Appropriation Language**

For necessary expenses for acquisition, construction, repair, alteration, and improvement of facilities, [\$3,975,000] **\$6,780,000**, to remain available until expended. *Note.* - A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111-242, was amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

BUDGET REQUEST AND SUPPORTING INFORMATION

Management and Administration

I. Appropriation Overview

A. Mission Statement for Management and Administration:

Programs funded through the Department of Homeland Security (DHS) National Protection and Programs Directorate (NPPD) Management and Administration appropriation contribute to the NPPD goal of advancing the Department's risk reduction mission. Reducing risk requires an integrated approach that encompasses both physical and virtual threats and their associated human elements. NPPD reduces the risk of attack against the Nation by protecting critical physical and cyber infrastructure, guarding against threats posed by foreign travelers to the country, and by standardizing the Department's approach to the analysis and management of potential risks to the Nation.

B. Budget Activities:

The Management and Administration appropriation major program activities include Directorate Administration and Risk Management and Analysis.

Directorate Administration

Includes the Office of the Under Secretary, which consists of: (1) Resource Administration, (2) Budget and Financial Administration, (3) Information Management, (4) Communications and Public Affairs, and (5) Office of Information Technology.

Risk Management and Analysis

Risk Management and Analysis (RMA) matures and strengthens the Homeland Security Enterprise by leading the Department's efforts to establish a common framework addressing the overall management and analysis of homeland security risk. RMA also leads and executes the Risk Assessment Process for Informed Decisionmaking, a strategic, all-hazard risk assessment. RMA also provides tools, training, technical assistance, and accountability frameworks to enhance the risk management capabilities throughout the Department and stakeholders.

C. Budget Request Summary:

NPPD requests 185 FTP/185 FTE, and \$55.156 million for FY 2012.

Adjustments-to-Base

- FY 2012 DHS Balanced Workforce decrease: \$0.554 million
- GSA Rent inflation increase: \$0.051 million
- Administrative Savings Initiative decrease: \$1.033 million

Program Changes

An increase of \$0.115 million for acquisition workforce.

An increase of \$12.000 million for data center migration costs.

III. Current Services Program Description by PPA

**Department of Homeland Security
National Protection and Programs Directorate
Management and Administration
Program Performance Justification**
(Dollars in Thousands)

PPA: Directorate Administration

	<u>Perm Pos</u>	<u>FTE</u>	<u>Amount</u>
FY 2010 Actual	104	85	\$34,572
FY 2011 C.R.	104	104	\$34,682
2011 Adjustments-to-Base	41	41	(\$1,163)
2012 Current Services	145	145	\$33,519
2012 Program Change	1	1	\$12,115
FY 2012 Request	146	146	\$45,634

The National Protection and Programs Directorate requests \$45.634 million and 146 positions/FTE for Directorate Administration.

The FY 2012 request reflects an adjustment-to-base net decrease of \$1.163 million, which includes an increase of \$0.042 million in GSA rent inflation, a decrease of \$0.554 million in FY 2012 DHS Balanced Workforce savings, and a decrease of \$0.651 million due to the Administrative Savings Initiative. Directorate Administration requests \$12.000 million to continue systems and applications migration to the two DHS Enterprise Data Centers and \$0.115 million for one FTE in acquisition workforce.

CURRENT SERVICES PROGRAM DESCRIPTION:

Office of the Under Secretary

The Office of the Under Secretary provides NPPD leadership and management, coordinates NPPD activities throughout the Department, and serves as an advocate for protection across all governmental sectors, protection stakeholders, and citizens. The Office of the Under Secretary consists of the Under Secretary, Deputy Under Secretary, Chief Operating Officer, Chief of Staff, and legal and administrative support.

Office of Budget and Financial Administration

The Office of Budget and Financial Administration supports the NPPD mission by providing financial management information, oversight, and fiscal services and policies. The Office of Budget and Financial Administration consists of the following activities and elements:

- *Budget Formulation* - Reviews the current state of programs and projects, assesses activities against the desired future direction, and builds and justifies funding requests to resource mission needs.
- *Budget Execution* - Responsible for the workflow and funds control process to ensure that resources are available when needed, do not exceed authorized levels, are used in accordance with law and congressional intent, and are recorded and reported in accordance with Federal accounting principles and guidelines.
- *Strategic Planning* - Develops NPPD planning and objectives to drive program strategy to maximize risk reduction in priority mission areas.
- *Performance Management* - Fulfills internal and external performance management requirements, including the collection, analysis, monitoring, and reporting of performance data.
- *Accounting Operations* - Responsible for the overall accounting operations of NPPD and ensures that the NPPD meets financial execution and accounting requirements in support of DHS' centralized financial management program. Functions include commitment/obligations input and tracking, travel and purchase card processing, status of funds monitoring, and payroll reconciliation.
- *Financial Systems Reporting and Internal Controls* - Responsible for the preparation and submission of financial reports to DHS and to the Immigration and Customs Enforcement (ICE) Chief Financial Officer (CFO). Works closely with the ICE CFO to monitor and reconcile Treasury Information Executive Repository reports and to provide analysis to validate accuracy of data. Responsible for the development and monitoring of NPPD internal control programs.
- *Acquisition Operations* - Reviews and monitors NPPD's acquisition program status and ensures compliance with Federal and DHS acquisition regulations.
- *Procurement Operations* - Reviews and tracks NPPD contracts and small purchases, provides procedural guidance and support to NPPD staff, administers the purchase card program, and supports investment review. This office also serves as a liaison to the DHS procurement office.
- *Regulatory and Economic Analysis* - Ensures NPPD guidance and regulatory actions consider alternatives and impacts. Ensures regulatory analyses are completed following the requirements of statute, executive order, and the Office of Management and Budget policy. Provides leadership with economic impact analysis related to NPPD programs and activities.

FY 2010 Accomplishments

- Designed and conducted assessments of internal controls over financial and program operations. Retested the design and control of budgetary resource management and tested its effectiveness.
- Developed an improved reconciliation process for the Federal Financial Management System (FFMS) and the procurement system to better evaluate the accuracy of processing commitments and obligations into FFMS.
- Implemented a Web-based invoice consolidation payment system.

- Transitioned the certification of purchase requests in the procurement and financial systems to the offices. Trained staff to transition and support requests for assistance during the year.
- Instituted NPPD-wide detailed operating plans for program and financial execution. Measured progress against the plans through quarterly NPPD leadership reviews.
- Audited program performance measure verification and validation data and developed corrective action plans for any weaknesses identified.
- Updated NPPD Acquisition Review Process in accordance with the revised version of Management Directive-102. Ensured 80 percent of NPPD's acquisition portfolio underwent an acquisition review.

FY 2011 Planned Accomplishments

- Improve the efficiency of budgetary and financial operations and reporting.
- Initiate internal control evaluations on budgetary and financial operations of sub-offices to ensure internal controls are maintained.
- Review status of corrective action plans for performance measure verification and validation weaknesses and ensure actions stay on track.
- Expand financial planning to include expenditure projections and timelines, and measure progress through quarterly NPPD leadership reviews.
- Facilitate integration of improved regulatory and program alternative analysis to include appropriate cost benefit or other economic analysis in decision making.
- Increase the percentage of NPPD major acquisition certified program managers from 40 percent to 80 percent.
- Increase the collection and assessment of NPPD acquisition programs.

2012 Planned Accomplishments

- Utilize new tools to improve efficiency and overall budgetary and financial operations and reporting.
- Continue internal control evaluations on budgetary and financial operations of sub-offices to ensure internal controls are maintained.
- Further develop NPPD expenditure planning for more effective control over financial execution.
- Provide assessment of economic considerations of NPPD programs to leadership.
- Enhance data utilization and facilitate component training where required to ensure NPPD continuously improves quantitative and regulatory analysis.
- Further increase the percentage of NPPD major acquisition certified program managers.
- Implement capabilities-based analysis of programs to improve mission effectiveness and fiscal efficiency.

Office of Resource Administration

The Office of Resource Administration (ORA) provides operational services for human capital planning, facilities and property, security, training and emergency plans, and continuity. ORA consists of the following activities and elements:

- *Human Capital* - Responsible for recruiting, staffing, classification, performance management, awards, employee relations, benefits, pay and compensation, and personnel and payroll processing, as well as workforce utilization tracking by office and maintaining records of NPPD personnel.
- *Training* - Coordinates all of the mandatory and voluntary training requirements of the NPPD, the Department, and the Government for NPPD personnel.
- *Facilities* - Responsible for facilities property and logistics support, facility space planning, rent, procurement and oversight of facilities support services, and continuity of operations (COOP) activities.
- *Assets and Property* - Records NPPD property, manages the fleet of GSA-owned vehicles, and documents property records and disposal.
- *Security* - Implements all of the National Security Information programs, Controlled Unclassified Information, and Sensitive Security Information programs. Security also procures the armed guards and escort services for NPPD facilities, physical access control and key control for NPPD facilities, and ensures that NPPD facilities' intrusion detection systems and security access control mechanisms are maintained and up-to-date.
- *Emergency Plans and Continuity* - Leads and coordinates the implementation of NPPD business continuity and emergency preparedness activities, including COOP plans; incident information reporting; occupant evacuation plans; pandemic planning; and, test, training, and exercise activities.
- *Exercise Program* - Plans exercises and coordinates NPPD participation in Departmental or Government-wide exercises.

FY 2010 Accomplishments

- Supported long-range facilities planning efforts, including participation in the planning efforts for the eventual move to the St. Elizabeth's campus.
- Effectively transitioned the Federal Protective Service (FPS) workforce into NPPD.
- Established a full-service human resources operation.
- Strengthened NPPD's business continuity and emergency preparedness posture and readiness to continue mission-essential functions under all conditions.
- Developed a consolidated facility plan for all NPPD components.
- Implemented and established a full-service training program in conjunction with the Department's Training Branch.
- Completed the absorption of FPS staff seamlessly into the NPPD training environment. Established full range of professional development opportunities for NPPD.

FY 2011 Planned Accomplishments

- Strengthen NPPD's business continuity and emergency preparedness posture and readiness to continue mission-essential functions under all conditions.
- Streamline the hiring process and fill existing vacancies in addition to new positions for 2011.
- Negotiate 75 percent of the new collective bargaining agreement with the first DHS headquarters (HQ) union.
- Complete a comprehensive and accurate table of organization (TO) encompassing all NPPD components, and which will include an established procedure for approving changes to ensure a consistently accurate TO is always available to NPPD leadership.
- Continue to effectively transition all FPS facility, COOP, and security functions into NPPD.
- Create and deliver in-house comprehensive training programs for NPPD staff to supplement Departmental offerings.
- Open two new office facilities, one new storage facility, and one new COOP facility in the National Capital Region (NCR) and renew multiple leases throughout the U.S.
- Integrate FPS facilities support into NPPD HQ by transitioning responsibility from ICE to NPPD.

FY 2012 Planned Accomplishments

- Complete the negotiations and implementation of the NPPD and FPS collective bargaining agreement.
- Complete a comprehensive inventory, review, and revision on all NPPD position descriptions to ensure they accurately reflect the security level and essential personnel designation for every NPPD position.
- Conduct random review of NPPD performance plans in each subcomponent to ensure they are including measurable metrics and targeted outcomes.
- Fill all approved vacancies for 2012.
- Continue to strengthen NPPD's business continuity and emergency preparedness posture and readiness to continue mission-essential functions under all conditions.
- Obtain additional operating space at Mt. Weather.
- Continue to develop full roles and responsibilities for all personnel in Facilities.
- Stand up a full-service personnel security operation.
- Deliver in-house comprehensive training programs for NPPD staff to supplement Departmental offerings.

NPPD Office of the Chief Information Officer

The NPPD Office of the Chief Information Officer (OCIO) actively participates in information technology (IT) strategic planning by ensuring systems and processes are integrated and consistent with the DHS Chief Information Office Strategic Plan and overarching departmental goals and objectives. In addition, OCIO evaluates new

technology and advises NPPD leadership as to how IT solutions might offer opportunities and options to support the successful implementation of policy decisions and organizational goals and objectives. OCIO approves, oversees, and monitors IT investment requests for NPPD subcomponents including the Office of Cyber Security & Communications, US-VISIT, the Office of Infrastructure Protection, RMA, and FPS. OCIO provides governance and oversight over DHS enterprise architecture processes and objectives, and IT security policies. Finally, OCIO and staff serve as the NPPD representative on various departmental planning, oversight, leadership, and counsel committees sponsored by the DHS Chief Information Office.

FY 2010 Accomplishments

- Worked closely with the DHS OCIO to improve NPPD subcomponent IT programs and project alignment with DHS policy, directives, and mandates as evidenced by enhanced program/project justifications, expenditure plans, and project reports.
- Supported implementation of enterprise-wide initiatives to include personal identification verification & logical access, trusted internet connection planning, data center migration, capital planning and investment control, and IT program and portfolio reviews.
- Helped align major NPPD programs to DHS enterprise architecture in order to optimize value and ensure responsible management of IT resources.
- Managed a directorate information security program that was in full compliance with all DHS policies.

FY 2011 Planned Accomplishments

- Continue efforts to coordinate with the DHS OCIO to optimize NPPD subcomponent IT investments, programs, and project alignment with DHS policy, directives, and objectives.
- Support NPPD goals, policies, and objectives to promote and support implementation of ongoing and new enterprise-wide IT initiatives.
- Provide effective leadership, oversight, governance, and technical management to improve efficiency, discipline, clarity, and transparency of NPPD IT programs and activities.
- Leverage DHS enterprise architecture policies, processes and objectives to optimize value and return of investment of IT programs and investments.
- Ensure NPPD IT security programs and activities are in compliance and alignment with Departmental policies and objectives.

FY 2012 Planned Accomplishments

- Continue efforts to coordinate with the DHS OCIO to optimize NPPD subcomponent IT investments, programs, and project alignment with DHS policy, directives, and objectives.
- Support NPPD goals, policies, and objectives to promote and support implementation of ongoing and new enterprise-wide IT initiatives.

- Provide effective leadership, oversight, governance, and technical management to improve efficiency, discipline, clarity, and transparency of NPPD IT programs and activities.
- Leverage DHS enterprise architecture policies, processes, and objectives to optimize value and return of investment of IT programs and investments.
- Ensure that NPPD IT security programs and activities are in compliance and alignment with Departmental policies and objectives.

Office of Communications and Public Affairs

The Office of Communications and Public Affairs is the nexus for all NPPD communications, outreach, and awareness. The Office of Communications and Public Affairs is comprised of three branches: Internal Communications, External Communications, and Strategic Communications.

The Office of Communications and Public Affairs plays a lead role in developing and approving all correspondence and messaging intended for external or internal outreach or distribution. The Office of Communications and Public Affairs develops communications strategies and action plans to promote NPPD programs and activities. The Office of Communications and Public Affairs develops and posts content for all NPPD and component pages on the intranet site (DHSONline.gov) and on the Department's external website (DHS.gov).

FY 2010 Accomplishments

- Launched iShare information sharing resource through Internal Communications branch. iShare will enable the NPPD workforce to blog/post about NPPD issues and events, as well as directly engage NPPD's leadership team.
- Established a series of topical monthly leadership forums led by NPPD leadership to discuss issues of interest or concern to the workforce through the NPPD Employee Advisory Council.

FY 2011 Planned Accomplishments

- Develop NPPD blog for employees to communicate with leadership on a regular basis through the NPPD intranet site.
- In coordination with DHS Office of Public Affairs and senior communicators throughout the Federal Government, devise a comprehensive and effective National Cybersecurity Awareness Month education and outreach campaign targeting nontraditional audiences (K-12, collegiate, urban).

FY 2012 Planned Accomplishments

- Implement enhancements to the NPPD blog for employees to better communicate with leadership on a regular basis through the NPPD intranet site.
- Hold the 2nd Annual National Cybersecurity Awareness Month education and outreach campaign targeting nontraditional audiences (K-12, collegiate, urban).

Office of Information Management

The Office of Information Management is responsible for managing and improving external communications for NPPD. Information Management is comprised of the Executive Secretariat, Freedom of Information Act (FOIA), Records Management, and Audit Liaison functions.

- Executive Secretariat - Serves as the central processing point for formal documents and taskers sent to/from NPPD.
- FOIA - Works in concert with the Departmental FOIA/Privacy Office, which serves as the steward of Section 222, the responsibilities of the Chief Privacy Officer, of the Homeland Security Act, the Privacy Act of 1974, the FOIA, the E-Government Act of 2002, and the numerous laws, Executive Orders, court decisions, and Departmental policies that protect the collection, use, and disclosure of Departmental and personal information.
- Records Management - Provides leadership and direction for the NPPD records management program. Develops an overall records management strategy producing the policy, procedures, and guidance necessary to implement that program, develops policies and guidance on the application of technology to records management, coordinates the program within and outside NPPD overall.
- Audit Liaison - Serves as a liaison among external Departmental offices, the Government Accountability Office (GAO), Office of the Inspector General (OIG) and NPPD offices for all audit activities undertaken by either GAO or OIG. Activities include work with NPPD components and GAO or OIG to facilitate entrance/exit conferences, fieldwork, release of draft and final reports, and recommendation follow-up.

FY 2010 Accomplishments

- Assigned, monitored, reviewed, edited, and managed correspondence, action and information memoranda, congressional reports, White House requests, Congressional Questions for the Record, and other material.
- Ensured timely review and completion of NPPD reports to Congress.
- Received and processed FOIA requests for information held by NPPD and provided guidance to NPPD personnel responsible for assisting with FOIA document and information requests.
- Ensured privacy protections were maintained in NPPD programs and systems.

FY 2011 Planned Accomplishments

- Assign, monitor, review, edit, and manage correspondence, action and information memoranda, congressional reports, White House requests, Congressional questions for the record, and other material. Conduct Directorate-wide training on processes and technology and provide guidance via an Executive Secretariat website.
- Ensure timely review and completion of NPPD reports to Congress.
- Ensure privacy protections are maintained in NPPD programs and systems.

- Formalize process mapping of all Office of the Under Secretary – Office of Information Management processes and procedures to make available to Directorate components via the intranet.
- Implement Electronic Records Management System (ERMS) and conduct NPPD-wide training on records retention processes and procedures.

FY 2012 Planned Accomplishments

- Assign, monitor, review, edit, and manage correspondence, action and information memoranda, congressional reports, White House requests, Congressional questions for the record, and other material. Conduct NPPD-wide training on processes and technology and provide guidance via component-specific onsite training sessions.
- Ensure timely review and completion of NPPD reports to Congress.
- Ensure adherence to FOIA, including improving timeliness of FOIA responses and appropriate application of FOIA exemptions, guided by President Obama's direction to increase/improve transparency of Federal Government operations.
- Finalize written guidance documents and management directives for the various products and work processes within Information Management.
- Implement ERMS and conduct NPPD-wide training on records retention processes and procedures.

PPA: Risk Management and Analysis

	Perm Pos	FTE	Amount
FY 2010 Actual	25	22	\$9,838
FY 2011 C.R.	25	25	\$9,895
2011 Adjustments-to-Base	14	14	(\$373)
2012 Current Services	39	39	\$9,522
2012 Program Change	-	-	-
FY 2012 Request	39	39	\$9,522

In FY 2012, NPPD requests \$9.522 million and 39 positions and FTE for RMA. Adjustments-to-base total includes an increase of \$0.009 million in GSA rent inflation and a decrease of \$0.382 million due to the Administrative Savings Initiative.

CURRENT SERVICES PROGRAM DESCRIPTION:

As the Quadrennial Homeland Security Review (QHSR) identified, homeland security is about effectively managing risks to the Nation's security. On May 27, 2010, the Secretary promulgated the DHS Policy for Integrated Risk Management (IRM). Homeland security risks are so complex and crosscutting that no single entity within or outside of the Department is able to effectively manage these risks independently.

IRM is based on the premise that security partners working together can most effectively manage risk by unifying efforts among all homeland security partners to ensure that strategies and actions are informed by a common understanding of homeland security risk; ensuring that information and analysis about homeland security risks are incorporated into strategic and operational decision-making processes; building a common understanding of risk management through development of a risk lexicon, risk-informed planning process, training, and standards of practice; and providing mechanisms to share risk data, risk assessments, and risk management decision support and analysis tools across the homeland security enterprise. It is the policy of the Department and its components to use IRM to inform strategies, processes, and decisions to enhance security and to work in a unified manner to manage risks to the Nation's homeland security. RMA, in conjunction with Federal, State, local, tribal, and territorial government organizations, the private sector, and our international partners, is working to develop IRM across the homeland security enterprise.

RMA has taken several critical steps toward the development of an IRM framework. The office has established a risk governance process with the DHS Risk Steering Committee (RSC). The RSC ensures that there is collaboration, information-sharing, and consensus-building across the Department as we identify and integrate best practices for risk management and analysis. In September 2008, the RSC published a *DHS Risk Lexicon* that establishes a common language for discussing risk-related concepts and techniques, and then in January 2009 released an *Interim Integrated Risk Management Framework* that sets the foundation for a common approach to homeland security risk management.

RMA is also committed to providing sound risk analytic products and support to homeland security leaders at the Federal, State, local, tribal, and territorial levels. To this end, RMA continues to develop the Risk Assessment Process for Informed Decision-Making (RAPID), to inform the Department's annual Planning, Programming, Budgeting, and Execution (PPBE) cycle; and provides technical assistance to DHS components and other Federal, State, local, tribal, and territorial partners.

As stated in the QHSR, risk management helps the enterprise more efficiently and effectively accomplish its missions of preventing terrorism and enhancing security, securing and managing our borders, enforcing and administering our immigration laws, safeguarding and securing cyber space, and ensuring resilience to disasters. The Bottom-Up Review identified that by employing an integrated risk management framework, DHS will enhance its capability to inform strategies, processes, and decisions to enhance security and to work in a unified manner with its homeland security partners to manage risks. DHS will continue building this framework and invest in the governance, policy, guidance, processes, tools, training, and accountability necessary to manage risk. DHS will also continue to work to evaluate all hazards risks to the Nation, identify improved strategies for managing risks, and measure performance in terms of risk reduction. Through the implementation and execution of RMA activities we aim to improve homeland security risk management integration, and in turn, move us closer to a more secure and resilient Nation.

FY 2010 Accomplishments

- Completed RAPID II. RMA delivered the Department's first quantitative all-hazards assessment of risk, as well as an initial evaluation of how well DHS' operational and primary enabling programs manage that risk. RAPID results informed DHS' annual PPBE cycle of resource allocation decisions, including the FY 2012-2016 Program Review Board (PRB) and Resource Allocation Decision (RAD) process. In addition, RMA supported individual component analytical requirements using the RAPID data. RMA has also initiated planning for the execution of the 2011 RAPID (RAPID III).
- Continued to build the IRM Framework by developing policy and guidance documents to operationalize IRM by further defining risk management priorities, and roles, responsibilities, and specific activities designed to enhance DHS' ability to lead the national homeland security risk management effort. The following documents are among those that RMA has led the development of:
 - DHS Policy Statement on Integrated Risk Management
 - DHS Directive on Integrated Risk Management
 - DHS Risk Lexicon, Version 2

- Draft DHS Instruction on Risk Steering Committee
- Assigned relative risk level to the 5,000+ special events submitted to DHS in an annual state and local data call; presented results to the Special Event Working Group (SEWG) Co-Chairs. The Co-Chairs include NPPD, Federal Emergency Management Agency (FEMA), Office of Operations Coordination and Planning, U.S. Secret Service, and the Federal Bureau of Investigation (Department of Justice). In addition:
 - Worked with the Office of Intergovernmental Affairs to complete the voluntary 2010 Data Call to State, Local, Tribal, and Territorial (SLTT) event contributors and conducted analysis of the events.
 - Chaired the SEWG Risk Methodology Committee, conducted annual review of the Special Event Assessment Rating (SEAR) methodology and identified opportunities to (1) improve the methodology to provide better information to the SEWG and (2) better align with risk analysis best practices. Reported findings to the SEWG co-chairs for continual improvement.
 - Co-chaired the Risk Analysis Advisory Council (RAAC). To develop and implement a continuous evaluation process for special events identified as potentially at high risk, specifically:
 - Collected and synthesized existing risk data regarding upcoming special events
 - Continually analyzed risk data received regarding upcoming events and advised the Co-Chairs as appropriate
 - Provided support to the SEWG Co-Chairs as directed and developed special analyses at their request
- Provided risk analytic expertise and support to DHS components, HQ elements, and SLTT partners as requested, including technical assistance to the following programs:
 - **FEMA - RMA** assisted FEMA and the NPPD Office of Emergency Communications to develop an all-hazards methodology to guide the allocation of grant dollars for the Interoperable Emergency Communications Grant program.
 - **ICE** - The ICE Office of Policy conducted a strategic risk assessment to assist the ICE Office of Investigations in making risk-informed resource allocations. RMA provided a technical review of the proposed methodology, which led to modifications that improved the defensibility of the risk model. RMA continued to provide assistance to the ICE team as they completed their risk assessment through feedback on proposed data visualizations.
 - **Office of Operations Coordination and Planning** – RMA supported the Business Continuity and Emergency Preparedness Branch by developing a project outline for the process of redeveloping the scope, methodology, and outputs of the Business Impact Analysis.
 - **Customs & Border Protection (CBP)** - CBP Tucson Sector requested RMA subject matter expertise in the areas of risk management and risk analysis to aid in their risk assessment process, Risk-informed Border Security Model (RIBSM). RMA provided technical support to the Tucson

Sector on the design and implementation of the RIBSM. RMA led the CBP team through exercises to help them determine their fundamental objectives, which was critical in helping them appropriately scope their risk assessment.

- **ICE** - Provided on-the-spot methodological feedback to ICE's Office of International Affairs for their process to measure risk within the ICE site selection process.
 - **Office of Science and Technology (S&T)** - Provided technical support and advice to the S&T Office of National Laboratories in their design and execution of the National Bio and Agro-Defense Facility (NBAF) risk assessment and related sensitivity studies to assess, and evaluate mitigation options for, accidental or intentional release of hazardous biological pathogens.
 - **Transportation Security Agency** - RMA provided methodological review during the development of the Transportation Sector Security Risk Assessment.
 - **Franklin County** - Conducted a review on a strategic risk analysis methodology for Franklin County, Ohio.
 - **San Francisco Bay Area Super Urban Area Security Initiative** - Provided technical assistance to the Bay Area's risk and capability assessment program.
- Completed a Benchmark Study of "Risk Management Practices in the Public and Private Sector," during which RMA surveyed more than two dozen executives and officials involved in enterprise risk management programs across a cross-section of public and private organizations.
 - In collaboration with its partners across DHS, RMA worked to help SLTT partners, including Fusion Centers, develop consistent risk management capabilities based on sound risk principles and processes. To that end, RMA collaborated with FEMA in the refinement of Comprehensive Preparedness Guide (CPG) 101 to enhance the focus on risk management. This effort involved regional workshops to solicit a diverse set of perspectives (regional, functional, domain). The CPG 101 will provide state and local jurisdictions and Fusion Centers with guidance on how to conduct analysis and build and achieve processes to manage their homeland security risks.
 - Produced additional risk management guidelines to continue to support the formalized training and education of homeland security risk practitioners. They will be reviewed and updated on an annual basis to ensure they remain an accurate reflection of, and relevant to, DHS risk management practice. Guideline topics included:
 - Defining the Decision Context
 - Developing Scenarios
 - Communicating Results to Decision Makers
 - Managed and led the administration and operation of the Department's Risk Steering Committee (RSC).

- Working with DHS Chief Learning Officer, as part of the Efficiency Review, RMA is leading the Curriculum Review Group (CRG) for the development of risk management training for DHS. In FY 2010, the CRG:
 - Developed a set of risk management core competencies for all DHS staff, executive decision makers, operators, planner and program managers, and risk and decision analysts.
 - Reviewed available risk management and statutory training and alignment to identified risk management core competencies.
 - Conducted a gap and redundancy analysis to identify risk management training needs and areas for consolidation.
 - Produced findings and recommendations for path forward for developing integrated risk management training.
- Produced two Risk Management Issue Briefs (formerly strategic issue papers) to serve as a forum to identify and assess strategic risk management issues facing the homeland security enterprise and provide decision-makers insight and recommendations to address these issues.
 - “Risk Management Practices in the Public and Private Sector: Lessons for the Department of Homeland Security”
 - “Comparing Risk Across Geographies: Toward an Integrated National Risk Assessment for Homeland Security”
- Begin to frame risk management approaches, analysis, and tools to support deliberate and crisis planning for homeland security operations (e.g. Fusion Centers).
- Completed the Risk Management study with the National Academies.
- Deployed pilot of inherently Federal computational modeling and simulation capability to support risk and decision analysis within RMA at the UNCLASS level. Capability includes advanced modeling and analysis tools for both strategic risk analyses and technical assistance/quick-response analytics for stakeholders and partners.
- Developed Concept of Operations (CONOPS) and stakeholder survey analysis for a prototype Risk Knowledge Management System (RKMS) to archive, curate, and share risk-related data and information to customers and stakeholders across the homeland security enterprise.
- RMA’s Advanced Risk Concepts team produced and submitted multiple scientific/technical publications to peer-reviewed professional and technical journals, advancing the state of the art in homeland security risk analysis to address gaps in risk and decision science related to homeland security risk analysis.

FY 2011 Planned Accomplishments

- Conduct a formal lessons learned process for RAPID II as well as a requirements generation process for RAPID III and incorporate the results to refine the methodology for the next RAPID iteration. Generate results to inform DHS’s FY 2013-2017 PPBE cycle, including the PRB and the process for developing the Resource Allocation Plan (RAP) and the RAD.

- Develop the supporting documents necessary to continue to implement IRM:
 - **“The Fundamentals of Risk Management for Homeland Security.”**
This foundational document will establish risk management principles and describe a risk management process for homeland security.
 - **“DHS Concept of Operations for Integrated Risk Management (IRM).”** The CONOPS will describe the IRM system, how the IRM system will work operationally, and where and how organizations and individuals plug into the IRM system.
 - Three instructions in support of the DHS IRM Directive. The first two identified by the RSC include:
 - Instructions for risk informing the DHS Strategic Planning System.
 - Instructions for risk informing performance management.
 - Continue the development and adoption of DHS Risk Management Guidelines to serve as primers for DHS risk analysis practitioners on tactics, techniques, and procedures related to homeland security risk.
- Support the development and execution of the Department’s Strategic Planning System: Department strategic planning, joint requirements process, integrated planning guidance, and the investment review process.
- Develop a Risk Management Capability Assessment for DHS for purposes of improving risk management and enhancing accountability. RMA will conduct an annual assessment of the Department’s risk management capability to show progress using a Departmental risk management “maturity model.”
- Provide general risk management and analytic expertise and support to DHS components and HQ elements as requested. For example,
 - Work with the U.S. Coast Guard on the expansion and continuous improvement of the Maritime Security Risk Analysis Model.
 - Continue to work with CBP on a strategic model for border security risk management.
 - Work with ICE on enhancements to application of risk analysis to support decision making across missions.
 - Support FEMA in any desired refinements to the preparedness grant formulas.
- Support the Joint Fusion Center Program Management Office by collaborating with DHS components, including with I&A, FEMA, IP, as well as SLTT partners, on developing a process to:
 - Develop and distribute a framework, template, and/or tool for state and major urban area fusion centers to complete a risk assessment for their area of responsibility, building on existing frameworks, processes, and data.
 - Facilitate the provision of subject matter expertise assistance to assist state and major urban area fusion centers in the execution of risk assessments.
- Provide risk analytical tools to states and locals to assist them in conducting regional and local strategic risk assessments:
 - Develop an approach to technical assistance to help FEMA Regions, by collaborating with FEMA HQ and regional offices for the conduct of a “regional risk summit.”

- Pilot capability to provide technical assistance and support for DHS components and other homeland security stakeholders.
- Continue to support FEMA and advance the CPG focus on risk management
- Lead the effort of the Department-wide CRG to execute a plan for integrating and improving the Department's approach to risk management training:
 - Integrate risk management training into existing courses by developing risk management modules to add to the statutory training for leadership, program managers, and planners.
 - Develop materials on risk management basic principles and available resources for DHS staff orientation.
 - Compile and post a list of available risk management training courses across DHS, interagency, and possibly academia to improve efficiency and awareness.
 - Develop a standards guide for risk management training to ensure all courses funded with DHS money are consistent and adhere to basic principles (e.g., DHS Lexicon, IRMF).
- Develop four Risk Management Issue Briefs to serve as a forum to identify and assess strategic risk management issues facing the homeland security enterprise and provide decision-makers insight and recommendations to address these issues.
- Work with the Department of Defense to establish partnerships to facilitate improved national security risk management.
- Manage and lead the administration and operation of the RSC.
- Deploy inherently Federal computational modeling and simulation capability to support risk and decision analysis within RMA at the UNCLASS and SECRET levels. Capability includes expanded advanced modeling and analysis tools for both strategic risk analyses and technical assistance/quick-response analytics for stakeholders and partners.
- Deploy prototype RKMS to archive, curate, and share risk-related data and information to customers and stakeholders across the homeland security enterprise.
- RMA's Advanced Risk Concepts team will identify areas of applied research that are relevant to advancing the ability to execute sound risk homeland security risk and decision analysis. RMA expects to produce and submit multiple scientific/technical publications to peer-reviewed professional and technical journals.
- Engage the academic, industry, and professional risk and decision analysis communities to ensure that best practices in risk and decision analysis are incorporated into homeland security analyses. This includes actively participating in key technical/professional conferences such as the Society for Risk Analysis (SRA) and the Institute for Operations Research and Management Science (INFORMS), as well as including experts from these groups into analysis design and peer review.
- Test and evaluate a prototype "intelligent adversary" model for inclusion into future RMA and DHS risk analyses, in response to feedback from Government and technical experts.

- Assign relative risk level to the 5,000+ special events submitted to DHS in an annual state and local data call; present results to the SEWG Co-Chairs. In addition:
 - Work with the Office of Intergovernmental Affairs to complete the voluntary 2011 Data Call to SLTT event contributors and conduct analysis of the events.
 - Co-chair the RAAC and conduct ongoing analysis of additional risk data for new events and updated risk information for existing events and provide reports to the SEWG co-chairs.
 - Conduct annual review of the SEAR methodology and identification of opportunities to (1) improve the methodology to provide better information to the SEWG and (2) better align with risk analysis with the latest risk information.

FY 2012 Planned Accomplishments

- Evaluate the implementation of the IRM Directive and supporting CONOPS:
 - Refine the Directive and CONOPS as needed.
 - Conduct an assessment and review of the Risk Management Fundamentals document and modify as required.
 - Develop a Risk Analysis Fundamentals document to support the Risk Management Fundamentals document.
 - Update Department's Risk Lexicon, as needed.
- Conduct a formal lessons learned process for the RAPID III as well as a requirements generation process for RAPID IV and incorporate the results to refine the methodology for the next RAPID iteration. Generate results to inform DHS's FY 2014-2018 PPBE cycle, including the PRB and the process for developing the RAP and RAD.
- Provide strategic risk analysis to support Departmental strategic planning system, policy development, and performance management.
- Execute national-level risk assessment in support of the QHSR
- Continue to provide technical assistance to DHS and enterprise-wide partners, including SLTT, as requested, with focus on delivering standardized tools and technical assistance to help implement those tools. Technical assistance will include:
 - DHS components
 - FEMA regions
 - Fusion Centers
 - States and Urban Areas
- Work with DHS Office of Public Affairs to refine the Department's risk communications strategy.
- Lead the effort of the Department-wide CRG to enhance risk management training by integrating and improving the Department's approach to risk management training:

- Develop a basic web-based risk management course to make available on DHScovery for all DHS staff; this could serve as prerequisite for other more detailed/tailored risk courses, which would increase efficiency.
 - Institute a series of risk management seminars for DHS leadership to show how risk management principles can be applied and used to support sound decision making.
 - Develop a learning and development track for DHS risk and decision analysts, including a certificate program with continuing education requirements, to standardize and solidify this profession.
- Develop four Risk Management Issue Briefs to serve as a forum to identify and assess strategic risk management issues facing the homeland security enterprise and provide decision-makers insight and recommendations to address these issues.
- Expand inherently Federal computational modeling and simulation capability at the UNCLASS and SECRET levels to include cluster computing for large-scale simulations.
- Expand the prototype RKMS to include data from other DHS analyses as facilitated through the RSC.
- Continue to pursue targeted areas of applied research relevant to advancing the ability to execute sound homeland security risk and decision analysis; continue to publish scientific/technical publications to peer-reviewed professional and technical journals.
- Complete prototype “intelligent adversary” modeling and incorporate into RAPID.
- Manage and lead the administration and operation of the RSC.
- Assign relative risk level to the 5,000+ special events submitted to DHS in an annual state and local data call; present results to the SEWG Co-Chairs. In addition:
 - Work with the Office of Intergovernmental Affairs to complete voluntary 2012 Data Call to SLTT event contributors and conduct analysis of the events.
 - Co-chair the RAAC and conduct ongoing analysis of additional risk data for new events and updated risk information for existing events and provide reports to the SEWG co-chairs.
 - Conduct annual review of the SEAR methodology and identification of opportunities to (1) improve the methodology to provide better information to the SEWG and (2) better align with risk analysis best practices. Reported findings to the SEWG co-chairs for continual improvement.
- Engage the academic, industry, and professional risk and decision analysis communities to ensure that best practices in risk and decision analysis are incorporated into homeland security analyses. This includes actively participating in key technical/professional conferences such as SRA and INFORMS, as well as including experts from these groups into analysis design and peer review.

**Department of Homeland Security
National Protection and Programs Directorate
Management and Administration
Justification of Program Changes**
(Dollars in Thousands)

Program Increase #1: Data Center Migration

Strategic Goal(s) &

Objective(s): QHSR Mission

PPA: Directorate Administration

Program Increase: Positions 0 FTE 0 Dollars \$12,000

Funding Profile

	FY 2010 Actual			FY 2011 C.R.			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	145	145	33,519
Program Increase	-	-	-	-	-	-			12,000
Total Request	104	85	34,572	104	104	34,682	146	146	45,634

Description

FY 2012 data center development funding, to be managed through the DHS Working Capital Fund, will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers for central DHS management in FY 2012. This includes:

- Discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS Data Centers in FY 2012
- Purchase of new equipment for placement in the DHS Data Centers as part of migration/transition efforts
- Installation of equipment racks at the DHS Data Centers
- Migration-related buildout of DHS Data Center infrastructure
- Transition of disaster recovery/backup/COOP capability to DHS Data Centers
- Installation of infrastructure support as part of system migrations at the DHS Data Centers

Justification

The Data Center consolidation efforts will standardize IT resource acquisitions across DHS components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

NPPD consolidation efforts are ongoing. FY 2012 funding is necessary to fully complete many of these efforts as well as progress others. NPPD has identified the following efforts in FY 2012:

- Completion of migration from NPPD Office of Infrastructure Protection (IP)/ Infrastructure Security Compliance Division (ISCD) - Oak Ridge site
- Completion of their NPPD/National Cyber Security (NCS) National Coordinating Center (NCC) Server and COOP Server transition
- Progression of system transition from Argonne National Laboratory site
- Consolidation of NPPD IP/ Partnership and Outreach Division (POD) - Sterling Data Center – (Primary), Qwest Hosting Facility
- Consolidation of NPPD IP/POD - Chantilly Data Center - (Secondary)
- Progression of transition from NPPD/ Office of Cybersecurity and Communications (CS&C) Space and Naval Warfare Systems Command (SPAWAR) Atlantic Pensacola Office

These efforts will include: 1) supporting ongoing mission operations to include production, development, testing and staging environment; 2) implementation of data replication at the primary Enterprise Data Center (EDC); 3) implementation of production environment at the primary EDC; 4) implementation of data replication at the secondary EDC; and 5) implementation of production environment at the secondary EDC.

Impact on Performance:

Data Center consolidation efforts align to the QHSR Maturing and Strengthening the Homeland Security Enterprise Mission, with an objective to strengthen the ability of Federal departments and agencies to support homeland security missions.

To the end, the Data Center consolidation efforts are designed to standardize IT resource acquisitions across DHS components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Ultimately this Data Center consolidation will enhance DHS IT security posture, improve information sharing with stakeholders, and increase operational efficiencies over time.

Program Increase #2: Acquisition Workforce

Strategic Goal(s) &

Objective(s): QHSR Mission

PPA: Directorate Administration

Program Increase: Positions 1 FTE 1 Dollars \$115

Funding Profile

	FY 2010 Actual			FY 2011 C.R.			FY 2012 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	145	145	33,519
Program Increase	-	-	-	-	-	-	1	1	115
Total Request	104	85	34,572	104	104	34,682	146	146	45,634

Description of Item

Successful acquisition outcomes are the direct result of having the appropriate personnel with the requisite skills managing various aspects of the acquisition process. Between FY 2000 and FY 2008, acquisition spending by civilian agencies increased by 56% (in inflation-adjusted dollars). The Department of Homeland Security is working to ensure its major acquisitions are effectively managed to ensure that the Department maximizes the value of every homeland security dollar and that major programs are implemented in the most responsible and efficient manner possible. This includes having disciplined oversight processes and robust acquisition program management teams in place. DHS has assessed the current resident skills against a set of core acquisition management skills: a program manager, a systems engineer, a life cycle logistician, a business/financial manager and a contracting officer's technical representative, and determined that many of our major acquisition programs are deficient in several of these areas.

The President's March 4, 2009 memorandum on Government Contracting required agencies to improve acquisition practices and performance by maximizing competition and value, minimizing risk, and reviewing the ability of the acquisition workforce to develop, manage, and oversee acquisitions appropriately. Subsequent guidance from the Office of Management and Budget, including memorandum M-09-25 *Improving Government Acquisition* issued July 29, 2009, and OFPP's Memorandum of October 27, 2009 *Acquisition Workforce Development Strategic Plan for Civilian Agencies- FY2010-2014*, provided guidance to agencies to strengthen the acquisition workforce and increase

the civilian agency workforce by five percent to more effectively manage acquisition performance. These funds will help ensure the future programmatic growth requirements for training, recruitment, and retention activities while helping us to attract and hire qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act.

In support of the administration's emphasis on strengthening the Federal acquisition workforce, Directorate Administration requests \$0.115 million to increase its acquisition workforce capacity and capabilities. The increase will mitigate the risks associated with gaps in either capacity or capability of the acquisition workforce and improve its effectiveness. The resources requested for Directorate Administration will be used to:

- Increase the capability of the acquisition workforce by investing in training to close identified gaps in such areas as project management, negotiations, requirements development, contract management, and other key topics;
- Increase the effectiveness of the acquisition workforce by investing in improvements to systems that support the contracting function;
- Conduct an assessment of options for creating systems to maintain comprehensive acquisition workforce data and selecting the appropriate system; and
- Increase the effectiveness of the Department's centralized acquisition workforce training program comprised of certification and targeted/continuous learning developmental training opportunities.

Due to the fact that FPS is funded by offsetting collections, the Logistician (Grade 13) is funded via M&A but will support FPS acquisition efforts.

Impact on Performance (Relationship of Increase to Strategic Goals)

The FY 2012 funding request will help ensure:

- The future programmatic growth capacity for training, recruitment, and retention activities while attracting and hiring qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act. These funds allow DHS the ability to train, recruit, and retain at acceptable standards.
- The sustainability and availability of information technology systems and equipment in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

IV. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
National Protection and Programs Directorate
Management and Administration
Justification of Proposed Changes in Management and Administration
Appropriation Language**

For salaries and expenses of the Office of the Under Secretary for the National Protection and Programs Directorate, support for operations, information technology, and the Office of Risk Management and Analysis, \$55,156,000: Provided, That not to exceed \$5,000 shall be for official reception and representation expenses [.]: Provided further, That of the funds made available under this heading, \$115,007 shall be for strengthening the capacity and capabilities of the acquisition workforce (as defined by the Office of Federal Procurement Policy Act, as amended (41 U.S.C. 401 et seq.)), including the recruitment, hiring, training, and retention of such workforce and information technology in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

Note.—A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111–242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

PPA Mission Statement

The National Protection and Programs Directorate (NPPD) Directorate Administration includes the Office of the Under Secretary, the Office of Resource Administration, the Office of Budget and Financial Management, the Office of Information Management, the Office of Communications and Public Affairs, and the Office of Information Technology.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request	2012 - 2011 Change
Salaries and Benefits	\$13,053	\$14,400	\$19,630	\$5,230

The FY 2012 request includes \$20,101,000 for salaries and benefits for 146 FTE. This includes money for the DHS Balanced Workforce initiative and for the Acquisition Workforce.

	FY 2010		FY 2012	2012 - 2011
	Actual	FY 2011 C.R.	Request	Change
Travel	\$151	\$243	\$243	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2010		FY 2012	2012 - 2011
	Actual	FY 2011 C.R.	Request	Change
GSA rent	\$0	\$2,613	\$2,655	\$42

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2010		FY 2012	2012 - 2011
	Actual	FY 2011 C.R.	Request	Change
Communication, Utilities, and miscellaneous charges	\$0	\$409	\$409	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	FY 2010		FY 2012	2012 - 2011
	Actual	FY 2011 C.R.	Request	Change
Printing	\$209	\$0	\$0	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	FY 2010		FY 2012	2012 - 2011
	Actual	FY 2011 C.R.	Request	Change
Advisory and Assistance Services	\$10,745	\$8,140	\$1,820	(\$6,320)

Advisory and assistance services includes services acquired by contract from non-Federal sources as well as from other units within the Federal Government. The FY 2012 request represents a \$5,669,000 decrease due to the Balanced Workforce initiative and a \$651,000 decrease due to the Administrative Savings Initiative.

	FY 2010		FY 2012	2012 - 2011
	Actual	FY 2011 C.R.	Request	Change
Other Services	\$61	\$510	\$510	\$0

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2010		FY 2012	2012 - 2011
	Actual	FY 2011 C.R.	Request	Change
Purchase from Government Accounts	\$6,919	\$8,362	\$20,362	\$12,000

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. \$12,000,000 is included for data center migration costs.

	FY 2010		FY 2012	2012 - 2011
	Actual	FY 2011 C.R.	Request	Change
Operation & Maintenance of Equipment	\$3,005	\$0	\$0	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	FY 2010		FY 2012	2012 - 2011
	Actual	FY 2011 C.R.	Request	Change
Supplies & materials	\$264	\$5	\$5	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2010	FY 2011 C.R.	FY 2012	2012 - 2011
	Actual		Request	Change
Equipment	\$164	\$0	\$0	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

Total Working Capital Fund	\$4,010	\$5,875	\$18,653	\$12,778

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2013 budget.

Management and Administration requests \$0.0 and 55 FTE for the FY 2012 DHS Balanced Workforce Strategy.

Position Type	FY 2010 Actual		FY 2011 C.R.		FY 2011 Annualization		FY 2011 Follow On		FY 2012 Increase		FY2010 – FY2012 DHS Balanced Workforce Strategy

FY 2012 DHS Balanced Workforce Strategy

- \$5,115,000 is needed to hire Federal employees in Directorate Administration and \$1,337,000 is needed to hire Federal employees in Risk Management and Analysis
- Contracts will be reduced by \$5,669,000 in Directorate Administration and by \$1,337,000 in Risk Management and Analysis.
- Implementation Timeline – FY 2012, due to the Continuing Resolution it is anticipated that this program will start in October 2011
- Identify any contractor functions that will be eliminated or absorbed by current federal employees and do not require additional new federal positions
 - Contractor functions will be reduced and positions will be converted in accordance with the Department’s Balanced Workforce Initiative with a particular focus on contractors who are performing “nearly government inherent” responsibilities. Contractor reductions will be absorbed by the existing Government Employees and new FTE converted positions.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

Infrastructure Protection and Information Security

I. Appropriation Overview

A – Mission Statement for Infrastructure Protection and Information Security:

Infrastructure Protection

The Office of Infrastructure Protection (IP) leads the coordinated national effort to reduce risk to our critical infrastructure and key resources (CIKR) posed by acts of terrorism and enables national preparedness, timely response, and rapid recovery in the event of an attack, natural disaster, or other emergency.

Identification and Analysis – The Information and Analysis program area includes projects and activities that support the identification, prioritization, and protection of the Nation’s CIKR, as well as the assessment of CIKR vulnerabilities, consequences and risks. These activities provide a comprehensive inventory of the Nation’s CIKR assets. The program collects vulnerability assessments and consequence information required to produce comprehensive asset and system risk assessments. These CIKR protection assessments enable the analysis of interdependencies and cascading effects.

Coordination and Information Sharing – The Coordination and Information Sharing program area includes projects and activities that increase the ability of all levels of government and private sector partners to assess risks, coordinate programs and processes, and execute risk mitigation programs and activities. Coordination and Information Sharing is responsible for executing the National Infrastructure Protection Plan (NIPP) and coordinating the efforts of the 18 sectors to implement and execute their Sector-Specific Plans. These activities foster information sharing and coordination between individual sector governance structures and facilitate the development of critical infrastructure partner governance and coordination structures.

Mitigation Programs – The Mitigation Programs program area includes voluntary and regulatory projects and activities, which enable security partners to: identify and mitigate vulnerabilities; implement protective measures and report on risk mitigation activities; and increase preparedness and resilience for facilities, systems, and surrounding communities. They support public awareness efforts, facilitate the sharing of CIKR protection-related best practices and lessons learned, and enable infrastructure protection planning, readiness, and incident management.

Infrastructure Protection derives its mission from the following statutes and regulations:

- Homeland Security Act of 2002
- Intelligence Reform and Terrorism Prevention Act of 2004
- Homeland Security Presidential Directive-7, “Critical Infrastructure Identification, Prioritization, and Protection”

- Section 550 of the Fiscal Year 2007 Homeland Security Appropriations Act
- Section 563 of FY 2008 Homeland Security Appropriations Act
- Energy Policy Act of 2005
- Homeland Security Presidential Directive-19, “Combating Terrorist Use of Explosives in the United States”
- Other Executive Orders, Homeland Security Presidential Directives and National Security Presidential Directives.

Cybersecurity and Communications

The Assistant Secretary for Cybersecurity and Communications (CS&C) serves as the White House Executive Agent for DHS’s cyber and communication missions. As the Homeland Security Presidential Directive 7, *Critical Infrastructure Identification, Prioritization, and Protection* lead, CS&C is charged for protecting the Nation’s Information Technology and Communications sectors from the growing array of state and non-state actors who wish to compromise, steal or destroy our country’s most critical infrastructures. In this capacity, the Office of the Assistant Secretary for Cybersecurity and Communications collaborates with government and private industry leaders to develop strategic policies, which mitigate risk to the Nation’s communication and information technology infrastructures and enable the Department to provide timely response and recovery efforts of these infrastructures under all circumstances. In support of these responsibilities, the Office of the Assistant Secretary for Cybersecurity and Communications oversees the operational missions of *the National Cyber Security Division, the National Communications System, and the Office of Emergency Communications.*

The National Cyber Security Division (NCSA) partners with private sector, government, military, and intelligence stakeholders to conduct risk assessments and mitigate vulnerabilities and threats to information technology assets and activities affecting the operation of the civilian government critical cyber infrastructures. NCSA provides cyber threat and vulnerability analysis, early warning, and incident response assistance for public and private sector constituents.

Additionally, NCSA supports the mission of the former National Cyber Security Center (NCSC) through the Cybersecurity Coordination program. Under the US-CERT mission, Cybersecurity Coordination helps implement DHS’s national efforts in preventing, protecting, responding, and recovering from cyber incidents impacting our Nation by coordinating and integrating information to provide cross-domain situational awareness, analyzing and reporting on the composite state of national cyber networks and systems, and fostering collaboration. Through Cybersecurity Coordination’s collaborative efforts with the six cyber security centers – the National Cyber Investigative Joint Task Force (NCIJTF), the National Security Agency/Central Security Service Threat Operations Center (NTOC), the U.S. Cyber Command (CYBERCMD), the Department of Defense Cyber Crime Center (DC3), the United States Computer Emergency Readiness Team (US-CERT), and the Intelligence Community Incident Response Center (IC-IRC) – NCSA is able to leverage this increased knowledge base to provide its public, private, and international partners with a more comprehensive picture of the Nation’s cybersecurity posture. Under a recently signed DHS-DOD memorandum of agreement, beginning in FY 2012 NCSA plans to implement a Cyber Mission Integration activity, which will allow DHS cyber

mission integrators to serve as on-site cybersecurity coordinators at Fort Meade's DHS/DOD Joint Coordination Element (JCE).

NCSD carries out the majority of DHS' responsibilities under the Comprehensive National Cybersecurity Initiative. Pending the FY 2011 DHS appropriations bill, NCSD is submitting this budget request to reflect the FY 2010 Congressionally appropriated programs: *United States Computer Emergency Readiness Team (US-CERT)*, *Strategic Initiatives*, and *Outreach and Programs*.

United States Computer Emergency Readiness Team – US-CERT leverages technical competencies in Federal network operations and threat analysis centers to develop knowledge and knowledge management practices supporting Federal stakeholders as they make key operational and execution decisions. It analyzes and reduces cyber threats and vulnerabilities, disseminates cyber threat warning information, and coordinates with partners and customers to achieve shared cyber situational awareness related to the Nation's cyber infrastructure. Through the National Cybersecurity and Communications Integration Center (NCCIC), US-CERT will improve national efforts to address threats and incidents affecting the Nation's critical information technology assets and cyber infrastructure and serve as a key component of the National Cyber Incident Response Plan (NCIRP). US-CERT addresses the need for a single, accountable focal point for achieving cyber infrastructure security and compliance throughout the Federal government. Guided by various mandates, US-CERT enables departments and agencies to address their cybersecurity challenges in a manner that maximizes value and minimizes risks associated with technology and security investments. US-CERT is also responsible for the design, development, acquisition, deployment, and operations and maintenance required to implement the National Cybersecurity Protection System, operationally known as EINSTEIN. US-CERT develops national strategies and implementation plans on cybersecurity workforce development and training and education opportunities, and furthermore focuses on relationship building amongst public and private cybersecurity institutions with regard to education and workforce development, development, implementation, and promotion of nationwide standards to ensure consistent competency levels. Lastly, US-CERT provides a set of comprehensive resources that can be used to appropriately manage supply chain risk across the lifecycle of networks, systems, and components, and oversees the implementation of national cybersecurity policies to ensure appropriate resources are available to support the mission and its specialized information technology systems.

Strategic Initiatives – Strategic Initiatives establishes mechanisms for Federal partners to deploy standardized tools and services at a reduced cost, paving the way for a collaborative environment that enables sharing of best practices and common security challenges and shortfalls. Strategic Initiatives develops and promulgates sound practices for software developers, information technology security professionals, and other critical infrastructure and key resources stakeholders, and collaborates with the public and private sectors to assess and mitigate risk to the Nation's cyber critical infrastructure and key resources.

Outreach and Programs – Outreach and Programs promotes opportunities to leverage the cybersecurity research and development (R&D) investments of public and private industry

partners. It promotes cybersecurity awareness among and within the general public and key communities, maintains relationships with governmental cybersecurity professionals to share information about cybersecurity initiatives, and develops partnerships to promote collaboration on cybersecurity issues. Outreach and Programs also establishes cybersecurity strategy and planning efforts through integrating resource management, human capital, facilities, performance management, and policy development and implementation into the broad array of issues addressed by NCSD.

President Kennedy established the National Communications System to bring about a single unified national communication system that allows Federal, State, and local branches of government the ability to communicate during emergencies. The National Communications System is comprised of the following programs: *Priority Telecommunications Services*, *Critical Infrastructure Protection*, *Programs to Study and Enhance Telecommunications*, and *Next Generation Network*.

Priority Telecommunications Services – The Priority Telecommunications Services (PTS) program provides specially designed telecommunications services to the national security and emergency preparedness user community during natural or man-made disasters when conventional communications services are ineffective. These telecommunication services are used to coordinate response and recovery efforts and, in severe conditions, assist with Continuity of Operations and Government. Also included within PTS is Customer Service (also known as Industry-Government Interagency Processes, IGIP), which manages the Committee of Principles, a confederation of 24 departments, agencies; industry partnerships through the National Security Telecommunications Advisory Committee; and Sector Specific Agency responsibilities for communication under HSPD-7.

Critical Infrastructure Protection – The Critical Infrastructure Protection program ensures the continued availability of national security and emergency preparedness telecommunications services under all circumstances, including emergency, attack, recovery, and reconstitution. The program includes: National Coordinating Center Operations (which includes the 24x7 Watch); Critical Infrastructure Protection Operations; Plans and Policy; Training and Exercises; Network Security Information Exchanges (NSIE); and Telecommunications Service Priority.

Programs to Study and Enhance Telecommunications – The Programs to Study and Enhance Telecommunications (PSET) program develops models and conducts technical analyses of public communications infrastructures and equipment to provide resiliency and identify vulnerabilities in new communications in the event of natural or man-made disasters. PSET also works with the Committee on Foreign Investment in the United States (CFIUS) to review national security implications of foreign investments of U.S. companies. PSET works with national and international non-government standards bodies to ensure that evolving commercial standards address the technical requirements of National Security and Emergency Preparedness communications.

Next Generation Network – The Next Generation Network program is a technology initiative to maintain and migrate legacy priority voice telecommunications features from the current

public switched telephone network (PSTN), which is the current industry base to an Internet protocol (IP) based system, to which the industry is rapidly transitioning their voice services. The Office of the Manager, National Communication System is working with industry to apply priority to data and video applications as technology becomes available.

Office of Emergency Communications – The Office of Emergency Communications (OEC) supports and promotes the ability of emergency response providers and government officials to maintain continuous communication in the event of natural disasters, acts of terrorism, or other man-made disasters. The Office of Emergency Communications works to ensure, accelerate, and attain interoperable emergency communications nationwide.

Office of the Director – The Office of the Director (OD) is responsible for program management for all OEC programs. The OD manages the budget and acquisitions, develops and executes an outreach strategy with Federal, State, and local stakeholders, and facilitates training and the organizational management of OEC.

Federal Communications Services – The Federal Communications Services (FCS) engages with Federal departments and agencies to improve emergency communications capabilities, including policy development, investment planning, and direct assistance.

Multi-Jurisdictional Communications Services – The Multi-Jurisdictional Communications Services (MCS) engages with State, local, and tribal stakeholders to deliver targeted technical assistance and gather stakeholder input on policies, guidance, and initiative.

Policy, Planning, and Analysis – Policy, Planning, and Analysis (PPA) identifies and assesses interoperable emergency communications capabilities and drives Federal grants to meet emergency responders' requirements and needs.

B – Budget Activities:

Infrastructure Protection

In FY 2012, NPPD requests \$322.279 million for Infrastructure Protection, including 715 FTP/660 FTE.

Identification and Analysis – In FY 2012, NPPD requests \$83.948 million for the Identification and Analysis program, including 127 FTP/122 FTE. These funds support vulnerability assessments, the critical infrastructure technology and architecture (CITA), and infrastructure sector analysis activities.

Coordination and Information Sharing – In FY 2012, NPPD requests \$48.353 million for the Coordination and Information Sharing program, including 83 FTP/80 FTE. These funds support the management and facilitation of CIKR partnerships, operation and coordination of the associated Information Sharing Environment, coordination and management of the NIPP and 18 supporting Sector-Specific Plans, preparation of the National Annual Report, development of NIPP activity performance metrics, coordination of the Sector Annual Reports, development and execution of a variety of education/training/outreach programs, and IP's management and planning activities.

Mitigation Programs – In FY 2012, NPPD requests \$189.978 million, for Mitigation Programs, including 505 FTP/458 FTE. These funds support: the coordination and management of the Department's regulatory authority over high-risk chemical facilities and ammonium nitrate; bombing prevention activities; protective security advisor support; Sector-Specific Agency responsibilities; and incident management, contingency, and readiness activities.

Cybersecurity and Communications

In FY 2012, NPPD requests \$614.206 million for Cybersecurity and Communications, including 596 FTP/551 FTE.

Within the National Cyber Security Division:

United States Computer Emergency Readiness Team – In FY 2012, NPPD requests \$391.406 million for the United States Computer Emergency Readiness Team, including 362 FTP/333 FTE. These funds support NPPD's role in the Comprehensive National Cybersecurity Initiative (CNCI) and the other cybersecurity activities.

Strategic Initiatives – In FY 2012, NPPD requests \$65.339 million for Strategic Initiatives, including 42 FTP/33 FTE. These funds support NPPD's role in cybersecurity activities.

Outreach and Programs – In FY 2012, NPPD requests \$7.096 million for Outreach and Programs, including 16 FTP/14 FTE. These funds support NPPD's role in cybersecurity activities.

Within the National Communications System:

Priority Telecommunications Services – In FY 2012, NPPD requests \$56.824 million for Priority Telecommunications Services, including 44 FTP/44 FTE. These funds support the operation of the Government Emergency Telecommunications System, Wireless Priority Service, Special Routing Agreement Service, the Industry-Government and Interagency Processes, and funds for the Assistant Secretary, Cyber Security and Communications.

Next Generation Network – In FY 2012, NPPD requests \$25.253 million for the Next Generation Network, including 2 FTP/1 FTE. These funds support the transition of national security and emergency preparedness communications systems from the public switched networks to the next generation networks.

Programs to Study and Enhance Telecommunications – In FY 2012, NPPD requests \$13.441 million for Programs to Study and Enhance Telecommunications, including 28 FTP/28 FTE. These funds support modeling, simulation, technology assessments, National Security and Emergency Preparedness standards, and vulnerability assessments on advanced technologies and converged networks.

Critical Infrastructure Protection Program – In FY 2012, NPPD requests \$11.352 million for the Critical Infrastructure Protection programs, including 40 FTP/36 FTE. These funds support National Coordinating Center, Critical Infrastructure Protection Operations, planning, Network Security Information Exchange, and the Telecommunications Service Priority program.

Office of Emergency Communications – In FY 2012, NPPD requests \$43.495 million for the Office of Emergency Communications, including 62 FTP/62 FTE. These funds will support and promote the ability of emergency response providers and Federal Officials to continue maintain continuous communication in the event of natural disasters, acts of terrorism, or other manmade disasters, and to ensure, accelerate, and attain interoperable Emergency Communications nationwide.

C – Budget Request Summary:

In FY 2012, NPPD requests 1,311 FTP/1,211 FTE and \$936.485 million for Infrastructure Protection and Information Security. The FTP and FTE amounts include 152 FTP/180 FTE funded through offsets from program and contract dollars, and realized savings from converting contractors to Federal positions.

Adjustments-to-Base

- Annualization of prior year funding: \$5.907 million for 41 FTE;
- DHS Balanced Workforce: (\$10.588 million) in savings generated by converting 152 FTP/180 FTE;
- Non-pay Inflation (excluding GSA Rent): \$10.371 million
- GSA Rent increase: \$0.296 million;
- Non-recur of one-time costs in FY 2010: (\$7.350 million);

- Non-recur of Data Center Migration Costs: (\$15.300 million);
- Data Center Savings: (\$2.525 million);
- Administrative savings: (\$10.449 million) funded through proposed efficiencies;
- Technical adjustment: (\$21,527 million) reflecting requested changes in the FY 2011 President's Budget; and
- Operational Support Reduction: (\$10.371 million).

Program Changes

Infrastructure Protection Facilities – The request includes a program increase of \$5.695 million for the Management, Planning, and Administration project to support increased IP facilities costs. IP is requesting a commensurate decrease of \$5.695 million for salaries and benefits to support this increase. This represents a \$1.138 million decrease in salaries and benefits for *Identification and Analysis*, \$0.855 million from *Coordination and Information Sharing*, and \$3.702 million for *Mitigation Programs*.

Mitigation Programs – Program changes also include an increase of \$2.300 million for the Protective Security Advisor project to support Critical Infrastructure/Key Resource analysts for State and Local Fusion Centers, with a commensurate decrease in the Infrastructure Sector Analysis project within *Identification and Analysis* to support this. The request also includes an increase of \$3.000 million and 5 FTP/3 FTE to support the Interagency Steering Committee.

Identification and Analysis also includes an increase of \$0.138 million to support CITA acquisition staff.

United States Computer Emergency Readiness Team – The request includes total program changes of \$93.973 million and 32 FTP/18 FTE. Program changes include: an increase of \$4.689 million to support US-CERT Operations; an increase of \$1.253 million and 15 FTP/8 FTE to stand up US-CERT Cyber Mission Integration; an increase of \$21.569 million and 11 FTP/6 FTE to support Federal Network Security; an increase of \$0.700 million and 5 FTP/3 FTE to expand Federal Network Security to support Small- and Micro-Agencies; an increase of \$56.624 million to Network Security Deployment; an increase of \$9.000 million for Global Cyber Security Management to support the National Initiative for Cyber Education; and an increase of \$0.138 million to support NCPS acquisition.

Strategic Initiatives – The request includes an increase of \$1.240 million to support Critical Infrastructure Cyber Protection and Awareness.

Next Generation Networks – The request includes an increase of \$0.253 million and 2 FTP/1 FTE to support acquisition.

2012 Program Change	(7)	(7)	\$ (3,300)
FY 2012 Request	127	122	\$ 83,948

In FY 2012, NPPD requests \$83.948 million for the Identification and Analysis program, including 127 FTP/122 FTE. These funds support the Vulnerability Assessments, Critical Infrastructure Technology and Architecture, and Infrastructure Sector Analysis Projects.

Adjustments-to-base include: an increase of \$0.335 million and 2 FTE for the annualization of prior year funding; a decrease of \$7.706 million as a technical adjustment; an increase of \$1.037 million for non-pay inflation; and a \$1.037 million offset for non-pay inflation.

CURRENT SERVICES PROGRAM DESCRIPTION

\$ thousands	FY 2011			FY 2012			Change		
	FTE	FTP	C.R.	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	130	130	\$16,503	122	127	\$15,138	-8	-3	-\$1,366

Total	130	130	\$90,610	122	127	\$83,948	-8	-3	-\$6,662

The Identification and Analysis mission supports Infrastructure Protection's capability to identify, prioritize, and protect the Nation's CIKR. Responsibilities include the assessment of CIKR vulnerabilities and consequences, and the prioritization of assets and systems. These efforts provide a comprehensive inventory of the Nation's CIKR and the capability to collect the vulnerability and consequence information required for comprehensive asset and system risk analyses. Efforts include

simulation, modeling, and the fusion of intelligence with information from practical field assessments, which enables the analysis of interdependencies and cascading effects. Identification and Analysis' three Projects include *Vulnerability Assessments, Infrastructure Sector Analysis, and Critical Infrastructure Technology and Architecture*. The descriptions below provide more definition and clarity with regard to the capabilities provided by each of the Projects.

Vulnerability Assessments

\$ thousands	FY 2011			FY 2012			Change		
	Activity	FTE	FTP	C.R.	FTE	FTP	Request	FTE	FTP
Salaries & Benefits	16	16	\$2,275	14	16	\$2,048	2	0	-227
Program Costs			\$24,246			\$20,220			-\$4,026
Total	16	16	\$26,521	14	16	\$22,268	2	0	-\$4,253

The Vulnerability Assessments Project is an Infrastructure Protection-led collaborative effort between the Federal, State, local, and private sectors to not only identify vulnerabilities and enhance the security and resilience of the Nation's Level 1 and Level 2¹ CIKRs, but also to provide the capabilities to identify and prioritize infrastructure at the State and Sector levels. The Vulnerability Assessments Project fulfills the requirements of Homeland Security Presidential Directive-7 by coordinating efforts among Federal, State, and local governments and the private sector to protect the Nation's CIKRs, and supports the implementation of the National Infrastructure Protection Plan and the National Response Framework.

The Vulnerability Assessment Project conducts specialized field assessments to identify vulnerabilities of Level 1 and Level 2 CIKRs. This serves as the foundation for the risk-based implementation of protective programs designed to prevent, deter, and mitigate the risk of a terrorist attack while also enabling efficient response and restoration in an all-hazards post-event situation. Current efforts cover the spectrum, from field teams conducting single Site Assistance Visits and Buffer Zone Plans, to larger-scale assessments of infrastructure "clusters," systems and regions via the interagency Regional Resiliency Assessment Program. The Regional Resiliency Assessment Program examines vulnerabilities, threats, and potential consequences from an all-hazards perspective to identify dependencies, interdependencies, cascading effects, resiliency characteristics, and security gaps, with an aim towards providing a comprehensive analysis of a region's CIKRs prevention and protection capabilities.

The Computer-Based Assessment Tool (CBAT) complements these assessments by integrating 360-degree geospherical video and geospatial and hypermedia data of facilities, surrounding areas, routes and other areas of interest, thereby creating an interactive visual guide of any location. This provides law enforcement, emergency response personnel, and CIKR owners and operators with a computer-based, cross-platform tool that allows them to present data, make informed decisions quickly, and confidently respond to an incident.

Additionally, the Vulnerability Assessment Project, in cooperation with the Nuclear Regulatory Commission, conducts security consultations to analyze the vulnerabilities and threats to the locations of proposed nuclear reactors. Section 657 of the Energy Policy Act of 2005 mandates the security consultations.

¹ Formerly referred to as the Tier 1 and Tier 2 list, IP made the nomenclature change to differentiate between this effort and facilities covered by the Chemical Facility Anti-Terrorism Standards

Infrastructure Sector Analysis

\$ thousands	FY 2011			FY 2012			Change			
	Activity	FTE	FTP	C.R.	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	42	42	\$4,525	41	42	\$4,357	1	0		-\$168
Program Costs			\$30,299			\$23,836				-\$6,463
Total	42	42	\$34,824	41	42	\$28,193	1	0		-\$6,631

The Infrastructure Sector Analysis Project provides the capability to conduct comprehensive assessments, modeling, simulation, and analysis to advance the Nation’s understanding of the dynamic risk landscape impacting CIKRs. The Infrastructure Sector Analysis project, through the Homeland Infrastructure Threat and Risk Analysis Center (HITRAC) and the National Infrastructure Simulation and Analysis Center (NISAC), analyzes and monitors risks to the Nation’s infrastructure and provides key decision-makers with risk-informed analytic products that influence the prioritization of risk-reduction strategies. In addition to its analytic products, the Infrastructure Sector Analysis Project also develops and deploys methodologies, tools, and technologies that enable NIPP implementation and other risk mitigation activities at the Federal, State, local, Tribal, and Territorial government and private-sector levels.

Critical Infrastructure Technology and Analysis

\$ thousands	FY 2011			FY 2012			Change			
	Activity	FTE	FTP	C.R.	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	72	72	\$9,703	67	70	\$8,733	5	2		-970
Program Costs			\$19,562			\$24,754				\$5,192
Total	72	72	\$29,265	67	70	\$33,487	5	2		\$4,222

IP has developed various tools and programs that collect and maintain infrastructure data. The CITA Project addresses the need for common foundational infrastructure data by establishing common standards for sharing, taxonomy, lexicon, and protection. The CITA project supports the goals of the Homeland Security Act of 2002 and Homeland Security Presidential Directive-7 (HSPD-7) to identify, prioritize, and protect the Nation’s infrastructure, as well as the Critical Infrastructure Information Act of 2002 to protect critical infrastructure information voluntarily shared with DHS by the private sector.

The purpose of the CITA Project is to enhance infrastructure protection by collecting, cataloguing, and maintaining standardized Critical Infrastructure risk-related information to enable the execution of risk management efforts and the prioritization of infrastructure data for homeland security partners. CITA provides DHS decision makers, at all levels and across all Components, the ability to make timely and informed decisions to plan for, protect against, respond to, and recover from natural and man-made incidents. Specifically, CITA will:

- Provide authoritative infrastructure data to customers end users across the country;
- Provide visualization to add context to infrastructure and situational awareness data in support of crisis-action, steady-state, and deliberate planning; and
- Automate decision making to enable faster and better quality incident response and recovery.

FY 2010 Identification and Analysis Accomplishments

- Conducted six Regional Resiliency Assessments in a high-risk regional infrastructure clusters in Seattle, Washington; Boston, Massachusetts; Atlanta, Georgia; Las Vegas, Nevada;

- Amarillo/Hereford, Texas; and the Kanawha River Valley region in West Virginia.
- Conducted approximately 450 vulnerability assessments through Site Assistance Visit assessments, Buffer Zone Protection Plans, and the Regional Resiliency Assessment Program.
- Completed the implementation and integration of five management and assessment tools within the Methodology Technical Implementation, which integrates risk-based assessment methodologies into automated tools.
- Completed release 1 of the Infrastructure Data Collection application that allows IP to manage asset level data with more flexibility, efficiency, and accuracy, to better serve mission partners.
- Completed a significant software development improvement of the iCAV (Integrated Common Analytical Viewer) to increase the capabilities and supporting data for Federal, State, and local iCAV users.
- Completed the release of the Automated Critical Asset Management System version 3.1 and implemented the beta-tested version in the production environment and trained an estimated 1,200 State and local officials on creating and implementing critical infrastructure protection plans using the Automated Critical Asset Management System.
- Completed additional risk and vulnerability assessment tools for the Emergency Services, Transportation, and Government Facilities, Public Health sectors vital to DHS efforts to execute National Comparative Risk Assessment.
- Completed the development of an IP remote sensing standard operating procedure that streamlines requirements management and data acquisition

FY 2011 Identification and Analysis Planned Accomplishments

- Conduct a minimum of 275 Vulnerability Assessments.
- Conduct performance reviews on 10 percent of the National Guard assessment teams to ensure that they have the training needed to conduct assessments.
- Initiate National Infrastructure Simulation and Analysis Center five year program review.
- Complete a significant software development improvement of the iCAV system to ensure continuity of iCAV operations and the continued accessibility of iCAV capabilities and data.
- Complete the fourth revision and release of the Infrastructure Data Taxonomy, which provides a common framework and infrastructure nomenclature, to capture, update and expand key data elements about CIKR assets across the Nation.
- Achieve Full Operating Capability of the Protected Critical Infrastructure Information Management System.
- Increase, by 20 percent, the number of Protected Critical Infrastructure Information authorized users who are trained in the policies and procedures for handling, use and safeguarding Protected Critical Infrastructure Information.
- Achieve Initial Operating Capability for the Infrastructure Information Collection System's Continuity of Operations System.

FY 2012 Identification and Analysis Planned Accomplishments

- Conduct a minimum of 275 vulnerability assessments based on expanded National Guard vulnerability assessment teams.
- Execute six Regional Resilience Assessment Programs (RRAPs) in a high-risk regional infrastructure cluster.

- Ensure that 50 percent of States have protected access to, and training on, the IP infrastructure data gateway to implement the NIPP Risk Management Framework.
- Provide risk analysis support and expertise to at least five States to enable the implementation of risk management programs and capabilities.
- Achieve Full Operating Capability of Customer Relationship Management function to provide technical, data, and analysis products and services to IP customers.
- Create a rigorous, repeatable, and sustainable analytical and infrastructure situational awareness capability to support steady state and incident response operations conducted by DHS/IP and IP partners.

PPA: Coordination and Information Sharing

	Perm Pos	FTE	Amount
FY 2010 Actual	79	68	\$ 58,651
FY 2011 Continuing Resolution	89	89	\$ 59,582
2011 Adjustments-to-Base	0	(3)	\$ (16,069)
2012 Current Services	89	86	\$ 43,513
2012 Program Change	(6)	(6)	\$ 4,840
FY 2012 Request	83	80	\$ 48,353

In FY 2012, NPPD requests \$48.353 million for the Coordination and Information Sharing program, including 83 FTP/80 FTE. These funds support the management and facilitation of CIKR Partnerships, operation and coordination of the associated Information Sharing Environment, coordination and management of the National Infrastructure Protection Plan and 18 supporting Sector-Specific Plans, preparation of the National Annual Report, development of National Infrastructure Protection Plan performance metrics, coordination of the Sector Annual Reports, development and execution of a variety of education/training/outreach programs, and IP's management and planning activities.

The FY 2012 request includes the following adjustments-to-base: a decrease of 6 FTE/FTP; an increase of \$0.045 million for the annualization of prior year funding; \$0.138 million for GSA Rent inflation; a decrease of \$7.300 million due to the non-recur of one-time data center migration costs; a \$1.677 million decrease for Administrative savings; a decrease of \$7.275 million as a technical adjustment; an increase of \$0.693 million for non-pay inflation excluding GSA Rent; and a \$0.693 million offset for non-pay inflation.

CURRENT SERVICES PROGRAM DESCRIPTION

Total	89	89	\$59,582	80	83	\$48,353	-9	-6	-\$11,229

The Coordination and Information Sharing program coordinates public-private partnership activities. Coordination and Information Sharing enhances the ability of government and private sector CIKRs

partners at all levels to assess risks, coordinate programs and processes, and execute risk mitigation programs and activities. In support of partner coordination, IP leads, integrates, and coordinates the execution of the NIPP and the 18 Sector-Specific Plans. IP also is the nexus for information sharing, coordinating individual sector governance structures, and facilitating the development and ongoing support of these partner governance and coordination structures or models.

National Infrastructure Protection Plan Management

Activity	FY 2011			FY 2012			Change		
	FTE	FTP	C.R.	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	24	24	\$3,315	23	24	\$3,191	-1	0	-\$124
Program Costs			\$11,731			\$7,643			-\$4,088
Total	24	24	\$15,046	23	24	\$10,834	-1	0	-\$4,212

The National Infrastructure Protection Plan Management (NIPP) Project has three major activities:

- Coordination, development, and execution of the NIPP;
- NIPP activity performance metrics and national annual reporting; and
- Critical infrastructure protection education, training, and outreach.

The NIPP Management Project serves as the foundation for all IP activities related to the NIPP and the 18 Sector-Specific Plans. The project is the vehicle through which a broad range of public and private sector partners interface with DHS. The project has overall responsibility for managing the collaboration, coordination, integration, awareness, measurement and reporting, education, training and outreach processes that result in implementation and execution of the NIPP and its Sector-Specific Plans. Some of the project’s responsibilities include: leading and coordinating the implementation and execution of the NIPP and the Sector-Specific Plans; managing the NIPP annual review and maintenance process; supporting the review and maintenance of the Sector-Specific Plans; developing guidance documents; connecting sectors with tools or methodologies to achieve their NIPP and Sector-Specific Plan goals and objectives; supporting and promoting a strategic framework to ensure that Sector-Specific Agencies and other partners collaborate in the development, implementation, and maintenance of national approaches to information sharing, protection, and resilience; the development of multi-media materials and participation in national and sector-level events to promote understanding and engagement in the development and execution of the NIPP and Sector-Specific Plans; developing and delivering education and training initiatives to ensure skilled professionals are available to implement the NIPP and the Sector-Specific Plans; and ensuring that the NIPP is not only implemented consistently and comprehensively, but also kept responsive to the changing risk environment.

The NIPP Management Project is responsible for measurement and reporting related to the national CIKRs protection and resilience mission area. Measuring, analyzing, and reporting the performance of the program helps to ensure accountability and transparency among sector partners so that information on the collective progress of the NIPP is clearly communicated. Additionally, measurement and reporting aids in the development of comprehensive reports that measure the efficacy and progress of risk management activities performed under the NIPP CIKR, and helps inform national and sector-level risk management decisions. The National and Sector CIKRs Protection Annual Reports, due to the Executive Office of the President and Congress annually, are the key reports detailing the status of the NIPP and the progress made towards reducing the risks to the Nation’s CIKRs. The NIPP Management Project provides the leadership, guidance, structure, and technical expertise to develop,

support, and sustain comprehensive education, training, and outreach activities that engage all DHS and IP components and CIKR partners. This is accomplished by building national awareness to support the CIKR protection and resilience activities. Outreach and awareness efforts promote an understanding of the all-hazards environment and steps taken to protect and enable the timely restoration of the Nation’s CIKR. Education and training programs that ensure that skilled professionals and experienced organizations are able to undertake NIPP implementation and execution further support these efforts.

CIKR Partnerships and Information Sharing

Activity	FY 2011			FY 2012			Change		
	FTE	FTP	C.R.	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	26	26	\$3,514	25	26	\$3,384	-1	0	-\$130
Program Costs			\$26,164			\$16,143			-\$10,021
Total	26	26	\$29,678	25	26	\$19,527	-1	0	-\$10,151

The CIKR Partnerships and Information Sharing Project ensures the effective coordination and operations of the comprehensive network of structures, mechanisms, and processes that engage all CIKR stakeholders across the Nation. It enables systematic and sustainable communication, coordination, and information exchange among all partners. The resourcing of the partnerships structures and their operations is organized through sector partnership activities and CIKR Information Sharing Environment activities.

Public-private partnership activities are the foundation of the Nation’s strategy for critical infrastructure protection and resilience. Although diverse and numerous, CIKR stakeholders in these partnerships fall into four general categories: infrastructure owners and operators; Federal agencies and their national and international partners; State, local, Tribal, and Territorial governments and their regional partners; and subject matter experts. The sector partnership model, which is the organizing framework for these partnerships, is the foundation for implementation of the NIPP and is the key to sustaining the Nation’s CIKR protection and resilience programs. This governance structure provides the consensus-built policy and strategy that drives requirements: it sets requirements and implements a comprehensive set of mechanisms and processes that provide useful and actionable content it identifies and demands accountability for efficient mechanisms and processes to deliver information between stakeholders and partners and it fosters trusted relationships among the stakeholders, who then utilize the information to take action.

Information sharing enables effective coordination and communication within and across the partnerships, and is a critical enabler for risk management activities that strengthen the protection and resilience of the Nation’s critical infrastructure. An effective and robust information-sharing environment that promotes a free flow of information requires an effective governance structure to identify and employ an effective and trusted set of information-sharing risk mitigation mechanisms and processes. Unification and implementation of these necessary elements creates an effective, efficient, and trusted Information Sharing Environment. The CIKR Partnerships and Information Sharing Project resources all these activities to build the Information Sharing Environment.

Management, Planning and Administration

Activity	FY 2011			FY 2012			Change		
	FTE	FTP	C.R.	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	39	39	\$3,264	32	33	\$2,289	-7	6	-\$975
Program Costs			\$11,594			\$15,703			\$4,109
Total	39	39	\$14,858	32	33	\$17,992	-7	6	\$3,134

The Management, Planning and Administration Project is a key enabler of all of the IP’s programmatic actions. It encompasses a number of planning, policy, and programmatic areas, including human resource management, professional development, budget formulation and execution, investment planning, acquisition strategy, personnel and facility, security, logistics and executive secretariat support, Government Accountability Office and DHS Inspector General facilitation and support, policy development and evaluation, legislative analysis, and International Partnership Coordination.

Integrating IP’s activities on a strategic, organizational, and project level represents a core competency for IP. Management, Planning and Administration focuses on maturing and improving IP’s strategic planning and its business and administrative processes. These functions support project management and execution as well as long-term investment planning and decision making for efficient and effective project execution. An integrated planning and performance capability ensures that IP’s planning and communication and outreach efforts include Federal, State, local, Tribal, and Territorial governments; the private sector; and international security partners--thereby facilitating both greater transparency and sense of community.

FY 2010 Coordination and Information Sharing Accomplishments

- Refined metrics to assess the progress of implementing the NIPP risk management framework and value of CIKRs protection efforts by helping SSAs develop more actionable measures pertaining to risk mitigation activities
- Moved the CIKRs Information Sharing Environment into full operations for CIKRs regional coalitions and the CIKR national community, which will support effective coordination and communication by providing content portals for specific CIKR communities and increasing training participation.
- Completed incorporation of 15 State Fusion Centers, which require CIKR protection and resilience mission support into the CIKR Information Sharing Environment
- Coordinated the development of an enhanced framework for State, local, Tribal, and Territorial CIKRs program engagement with the Grant Programs Directorate risk-based processes and assessments.
- Expanded participation of State, local, Tribal, and Territorial government representatives in the activities of the SLTTGCC and reached over 450 key state and local officials relevant to CIKR protection across the Nation.
- Launched the Commercial Facilities Training and Resources page on DHS.gov to provide a consolidated location for commercial facilities owners and operators to find training information
- Developed draft landscape study, Regional Partnerships: Enabling Regional Critical Infrastructure Resilience through the Regional Consortium Coordinating Council

FY 2011 Coordination and Information Sharing Planned Accomplishments

- Refine the NIPP metrics process and analysis to improve assessment capabilities of the value of CIKR's protection efforts and develop a standardized method to report on outcomes and progress, which will provide the ability to conduct analysis to identify gaps and directly support the risk-based allocation of resources.
- Support the addition of a CIKR's protection capability into the following State Fusion Centers: Washington State Fusion Center, Nebraska Information Analysis Center, Iowa Intelligence Fusion Center, Virginia, and Southern California.
- Deliver priority requirements for the CIKR's Information Sharing Environment to the Information Sharing Environment Program Manager along with the Annual progress report.
- Partner with the State, Local, Tribal, and Territorial Government Coordinating Council and Regional Consortium Coordinating Council to develop and implement awareness initiatives that enable a more robust implementation of the NIPP and the Sector-Specific Plans at the State, regional, and local levels to reach stakeholders in the field with information, products, resources and tools to enhance their capacity to make informed decisions and to act on CIKR protection and resilience.
- Develop and incorporate an addition of seven CIKR courses into the Federal Emergency Management Agency's Emergency Management Institute's catalogue and integrate modules into four Emergency Management Institute courses.
- Develop, update and deliver NIPP-related courses to include web-based and classroom-based courses to help government and private sector partners implement CIKR program management activities
- Conduct outreach activities to encourage sectors and partners to align CIKR's education and training with the NIPP.
- Implement all participating sector's or subsector's Information Sharing Environment, and complete the roll-out of sectors' standard operating procedures (which include training, sector outreach, and will achieve the milestone of the sector beginning to operate under these procedures).
- Participate in the Global Critical Energy Infrastructure Protection Initiative in conjunction with the Departments of Energy, State, and Defense.

FY 2012 Coordination and Information Sharing Planned Accomplishments

- Maintain and support the CIKR owner/operator Sector and Government partnership council operations at FY 2011's 100 percent.
- Maintain and support the Critical Infrastructure ISE at FY 2010/FY 2011 level of 10,000-15,000 users and 15 Fusion Centers.
- Review project-level Program Management Plans (PMPs) covering FY 12 – 18 and receive Assistant Secretary's approval prior to release.

PPA: Mitigation Programs

	Perm Pos	FTE	Amount
FY 2010 Actual	\$ 358	\$ 344	\$ 172,056
FY 2011 Continuing Resolution	\$ 506	\$ 469	\$ 197,111
2011 Adjustments-to-Base	\$ 5	\$ 4	\$ (8,732)
2012 Current Services	\$ 511	\$ 473	\$ 188,380
2012 Program Change	\$ (6)	\$ (15)	\$ 1,598
FY 2012 Request	\$ 505	\$ 458	\$ 189,978

In FY 2012, NPPD requests \$189.978 million for Mitigation Programs, including 505 FTP/458 FTE. These funds support the coordination and management of the DHS' regulatory authority over high-risk chemical facilities and ammonium nitrate, bombing prevention activities, protective security advisors, Sector-Specific Agency responsibilities, and incident management, contingency and readiness activities.

The FY 2012 request includes the following adjustments-to-base: an increase of 23 FTE and \$3.324 million for the annualization of prior year funding, \$1.856 million for non-pay inflation, a decrease of \$5.501 million for administrative savings; a decrease of \$2.546 million as a technical adjustment, and a decrease of \$1.856 million to offset for non-pay inflation.

Mitigation Programs utilizes measures designed to prevent, deter, and mitigate threats to CIKRs, and subsequently enable timely, efficient response and restoration in a post-event situation for all hazards. Mitigation Programs helps security partners identify and mitigate vulnerabilities, implement protective measures, and increase preparedness for facilities, systems, and surrounding communities. They also support public awareness efforts and facilitate the sharing of CIKRs protection-related best practices

and lessons learned. Additionally, they provide the Office of Infrastructure Protection planning, readiness and incident management capabilities. Mitigation Programs is divided into six projects: *National Infrastructure Coordinating Center (NICC), Incident Planning and Exercises, Infrastructure Security Compliance, Protective Security Advisors, Sector-Specific Agency Management, and Bombing Prevention*. The scope of *Contingency Planning and Readiness* has expanded in to the *NICC and Incident Planning and Exercises* Projects.

National Infrastructure Coordinating Center (NICC)

\$ thousands	FY 2011			FY 2012			Change		
	FTE	FTP	C.R.	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	24	24	\$3,253	22	22	\$3,004	-2	-2	-\$249
Program Costs			\$14,437			\$11,337			-\$3,100
Total	24	24	\$17,690	22	22	\$14,341	-2	0	-\$3,349

Guided by the NIPP and the National Response Framework, the NICC provides the structures, mechanisms, facilities, and personnel needed to execute CIKRs -focused response to emerging and no-notice incidents. This incident management capability reduces risk to CIKRs sectors from impending or occurring incidents, enables more rapid recovery of damaged CIKRs assets and networks, and mitigates the impact of CIKRs degradation on the safety and quality of life of the American people.

The NICC also includes IP's Incident Management Cell (IMC) activity.

- The NICC enables the Office of Infrastructure Protection’s response to the full range of incidents by providing situational awareness, coordinating operational activities, and developing recommended courses of action. The NICC – designated as one of five core elements of the Department of Homeland Security (DHS) National Operations Center (NOC) – provides steady-state monitoring and alerting through its 24/7 watch operation (‘the watch’). The NICC’s continuous operation fosters and enhances established relationships, processes, and information-sharing regimes that are leveraged during significant incidents. During incident response, the project must have the capability to operationalize established relationships, share information, analyze data, develop recommended actions and protective measures, contribute to national reporting, and distribute key information and decision products.
- The IMC provides the core staff and facilities around which IP’s scalable incident management capability coalesces during an incident. During steady-state operations, the IMC coordinates daily executive briefings for IP and its parent organization, NPPD, conducts future operations preparations for National Planning Scenarios and upcoming special events, and prepares core staff, augmentation staff, and facilities for activation. When activated, the IMC functions 24/7, coordinating all incident response activities across IP. The IMC provides situational awareness, analysis, prioritization, and decision support to DHS leadership, critical infrastructure partners, and emergency response officials at all levels.

Incident Planning and Exercises

Activity	FY 2011			FY 2012			Change		
	FTE	FTP	C.R.	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	18	18	\$2,440	16	18	\$2,192	-2	0	-\$248
Program Costs			\$9,713			\$8,314			-\$1,399
Total	18	18	\$12,153	16	18	\$10,506	-2	0	-\$1,647

Successful execution of the infrastructure protection mission requires IP to be prepared for any contingency. To ensure preparedness, the Incident Planning and Exercises project conducts planning for the full range of critical infrastructure incidents, develops and maintains a directorate-level Continuity of Operations (COOP) and provides a readiness program to ensure that those planned responses are validated, exercised, and ready to execute.

Deliberate contingency planning and a readiness program encompassing both training and exercises are core to IP's robust response capability and help advance IP's mission of building resilience among critical infrastructure sectors. The Contingency Planning activity develops the core IP incident management plans and standard operating procedures, develops and maintains incident-operating procedures, and develops specific contingency plans as required for incidents or emergent threats. These contingency planning activities build consensus across IP divisions to institutionalize plans and incident management products, support product use in exercises, and formalize processes for product development and dissemination. Project activities also include the development of scenario-specific plans to address the National Planning Scenarios covering a plausible range of major events that pose the greatest risk to the Nation's critical infrastructure.

The IP Continuity activity is a comprehensively managed effort to prioritize key business processes (Mission Essential Functions), identify significant threats to normal operations, and plan mitigation strategies to ensure effective organizational response to the challenges that surface during and after a crisis; The IP Continuity activity maintains the business of government. The IP Continuity activity develops and maintains a directorate-level Continuity program to include Continuity of Government (COG), COOP, and Enduring Constitutional Government (ECG) under all conditions. Specific responsibilities include maintaining the Emergency Relocation Site infrastructure and logistics, testing and training IP's COOP programs, monitoring and activating the COOP telework program, maintaining succession planning and delegations of authority, deploying and relocating emergency essential personnel, reconstituting business processes, and coordinating with other emergency operations personnel and sites.

The Readiness activity ensures that incident management personnel have the required skills to successfully execute their mission. Additionally, the readiness activity ensures that critical infrastructure issues are incorporated into the National Exercise Plan and execution so that critical infrastructure impacts are understood as a component of overall incident management. Readiness activities serve to test, evaluate, and enhance IP's plans and capabilities for responding to incidents affecting the Nation's critical infrastructure. Training and exercise programs are fully compliant with the Homeland Security Exercise and Evaluation Program (HSEEP). The project coordinates IP participation in 8–10 national exercises per year with the interagency community and manages the development and execution of IP's Sector-specific Tier III exercises.

Infrastructure Security Compliance

Activity	FY 2011			FY 2012			Change		
	FTE	FTP	C.R.	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	246	268	\$33,495	242	253	\$32,965	-4	-15	-\$530
Program Costs			\$69,868			\$66,383			-\$3,485
Total	246	268	\$103,363	242	253	\$99,348	-2	0	-\$4,015

The Infrastructure Security Compliance Project is being implemented in response to the DHS Appropriations Act of 2007 (Public Law 109-295), which provided DHS with the authority to regulate and prioritize security at chemical facilities nationwide that present a high level of risk. The statutory requirements which the Infrastructure Security Compliance Project implements are contained in the Chemical Facility Anti-Terrorism Standards (6 C.F.R. Part 27), and additional requirements are being added to the Infrastructure Security Compliance Project in response to Section 563 of the 2008 Consolidated Appropriations Act, Subtitle J – Secure Handling of Ammonium Nitrate (“Section 563”). Section 563 amends the Homeland Security Act of 2002 and provides the DHS with the authority to “regulate the sale and transfer of ammonium nitrate by an ammonium nitrate facility...to prevent the misappropriation or use of ammonium nitrate in an act of terrorism.”

In addition to providing oversight and incentives to the risk-reduction activities of individual high-risk chemical facilities, the Infrastructure Security Compliance Project applies a holistic view to managing the security of the Nation’s chemical facility infrastructure to ensure that risks are managed across the Nation. This will ensure that risks are not shifted between individual facilities, among surrounding communities, between States and regions, nor shifted to non-facility assets (i.e. chemical transportation and shipping infrastructure). The Infrastructure Security Compliance Project engages with voluntary CIKRs protection efforts and include the Chemical Sector-Specific Agency and related forums (e.g., Sector and Government Coordinating Councils) to ensure leveraging of, and coordination with, Homeland Security Presidential Directive-7-driven efforts.

Protective Security Advisors

Activity	FY 2011			FY 2012			Change		
	FTE	FTP	C.R.	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	107	107	\$14,805	105	117	\$14,567	-2	10	-\$238
Program Costs			\$12,824			\$12,932			\$108
Total	107	107	\$27,629	105	117	\$27,499	-2	0	-\$130

The Protective Security Advisors Project was established in 2004 by DHS to increase critical infrastructure security representation and coordination at the Federal, State, local, Tribal and Territorial levels. Protective Security Advisors provide a local perspective to the National risk picture and serve as DHS’ on-site critical infrastructure and vulnerability assessment specialists. In this capacity, Protective Security Advisors serve as a vital channel of communication for CIKRs owners and operators to communicate with DHS.

While the Protective Security Advisor Project supports IP’s goals, it was established primarily to support its mission to build and sustain effective CIKRs partnerships and coordination mechanisms. The Protective Security Advisor Project’s goals include the following: understand and share risk and information about terrorist threats and other hazards to our Nation’s CIKRs; provide a foundation for continuously improving CIKRs preparedness; and build and implement a long-term, national CIKRs risk-management program.

Protective Security Advisors support the development of the national risk picture by identifying, assessing, monitoring, and minimizing the risk to critical assets at the State, local, and regional level. Protective Security Advisors conduct specialized Enhanced Critical Infrastructure Protection site visits at Level 1 and Level 2 facilities to assess overall security postures and track the implementation of new or improved protective measures. Protective Security Advisors also inform and educate facility owners and operators on the criticality of the facilities and relate threats from terrorism while forging strong relationships between Level 1 and Level 2 facility owners and operators, DHS, and Federal, State, and local law enforcement. Protective Security Advisors utilize a suite of tools to assist in conducting the specialized visits and to track improved protective measures at critical facilities. The Infrastructure Survey Tool is a web-based tool that is used in conjunction with Enhanced Critical Infrastructure Protection site visits and provides the ability to collect, process, and analyze assessment facility data in near real-time, enabling sector-by-sector and cross-sector vulnerability comparisons. Using the data collected, DHS is able to identify security gaps and trends across sectors and sub-sectors while establishing sector baseline security scores, and can track the progress toward improving overall CIKR security. Ultimately, this effort will inform and update sector outcome metrics as they relate to NIPP implementation.

Additionally, during incidents requiring Federal assistance and support, the Protective Security Advisors serve as the Infrastructure Liaisons at the Federal Emergency Management Agency Joint Field Office and in the State and county Emergency Operations Centers, providing expert knowledge of the impacted infrastructure, maintaining communication with CIKR owners and operators, and prioritizing the coordinated response, recovery, and restoration efforts for critical infrastructure.

Sector-Specific Agency Management

\$ thousands	FY 2011			FY 2012			Change		
	FTE	FTP	C.R.	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	54	69	\$7,267	55	76	\$7,000	1	7	-\$267
Program Costs			\$14,241			\$17,732			\$3,491
Total	54	69	\$21,508	55	76	\$24,732	-2	0	\$3,224

The Sector-Specific Agency Management Project has been established to execute Sector-Specific Agency functions for 6 of the 18 CIKR sectors: Chemical; Commercial Facilities; Critical Manufacturing; Dams; Emergency Services; and Commercial Nuclear Reactors, Materials, and Waste (Nuclear). In addition, the Sector-Specific Agency Management Project serves as the Program Management Office for the Interagency Security Committee (ISC), a Federal body created to enhance the security of non-military Federal facilities (IP serves as Chair of the Interagency Security Committee).

The Sector-Specific Agency Management Project’s fundamental mission is to achieve cohesive and coordinated risk reduction across its assigned critical infrastructure and key resource sectors. The Sector-Specific Agency Management Project ensures that critical infrastructure and key resource sector risk management efforts are aligned and coordinated, and that resources are applied efficiently across the six CIKR sectors (and the ISC). Where gaps are found and risk is identified, the Sector-Specific Agency Management Project partners with the private sector and Federal, State, local, Tribal, Territorial, and regional government organizations to build capacity and mitigate risk. The Sector-Specific Agency Management Project works with sector partners to: align priorities, goals, and strategic

planning efforts; facilitate the development and implementation of risk management and mitigation initiatives; coordinate education, training, and security exercises; ensure that security information is communicated efficiently and effectively; support CIKR's research and development efforts; work with partners to address international infrastructure issues; and perform important incident management functions for situational awareness.

Bombing Prevention

\$ thousands	FY 2011			FY 2012			Change		
	FTE	FTP	C.R.	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	20	20	\$3,249	18	19	\$2,988	-2	-1	-\$261
Program Costs			\$11,519			\$10,563			-\$956
Total	20	20	\$14,768	18	19	\$13,551	-2	0	-\$1,217

The Bombing Prevention Project is the DHS lead agent for homeland security activities that include strategic coordination, capabilities analysis, and information sharing to combat the improvised explosive device threat to the Homeland. Homeland Security Presidential Directive-19 (HSPD-19), the HSPD-19 *Implementation Plan* and the National Strategy for Combating Terrorist Use of Explosives in the United States placed new and significant responsibilities on the Bombing Prevention Project, including:

- Coordination of national and intergovernmental bombing prevention efforts; including DHS support to the HSPD-19 Implementation Plan and the required establishment of a Department of Justice/DHS Joint Program Office (JPO);
- Increasing information sharing on terrorists tactics and procedures for terrorist use of explosives with State, local, Tribal, Territorial, and private sector security partners; and
- Conducting gap analyses to improve bombing prevention capabilities of State and local law enforcement, protecting high consequence CIKR's from terrorist use of explosives.

Bombing Prevention, over the next several years, will implement a coordinated and responsive set of national programs to combat the threat of terrorist use of explosives in the United States (in accordance with Homeland Security Presidential Directive-19). These programs will utilize information about the latest trends in tactics, techniques, and procedures used by terrorists, as well as regularly updated analyses of domestic bombing prevention capabilities. It will expand its partnership and services with and to State and local law enforcement, first responders, the private sector, and the public, as well as integrate information and capabilities from its partners in the Federal Government and international allies. Bombing Prevention intends to dramatically increase both the number of services provided and the corresponding amount of resources available.

FY 2010 Mitigation Programs Accomplishments

- Implemented capabilities-based risk and prioritization program in Emergency Services Sector as a proof of concept that can be expanded to identify key sector capability gaps and to guide prevention, protection, response, and recovery programs to close gaps.
- Implemented the National Dams Security Performance Program to assess and track statuses, trends, and gaps regarding sector-wide implementation of security and protection programs.
- Validated the closing of previous findings and completed assessments for 25 percent of the explosives detection canine units in UASI Level 1 cities.
- Completed review of Security Vulnerability Assessments submitted by Chemical Facility Anti-

Terrorism Standards (CFATS) facilities, and notified covered facilities (approximately 5,000) of final tier and Site Security Plan due date.

- Initiated inspection cycle to verify security measures in place, or planned, and assessed compliance with CFATS annually at Tier 1 facilities, biannual efforts with Tier 2 facilities, and initial efforts with Tier 3 and 4 facilities.
- Developed 12 Multi-Jurisdiction Improvised Explosive Device Security Plans in support of FEMA’s Regional Catastrophic Preparedness Grant Program and the Regional Resiliency Assessment Program.
- Developed protective measures guide for owners/operators in the Lodging and Outdoor Events sub-sectors of Commercial Facilities Sector.
- Completed all Contingency Plans and Tactical Plans for 15 National Scenarios.
- Reviewed and approved or disapproved Site Security Plans under CFATS, prioritizing Tier 1 and Tier 2 facilities.
- Executed annual National Level Exercise to validate incident management processes and ensure training of key personnel.
- Conducted targeted outreach to the retail and lodging subsectors, including contact with 390 malls and training aides viewed by more than 10,000 facility employees.
- Conducted State Security Seminar and Exercise Series with state chemical industry councils to foster communication between facilities and their local emergency response teams.
- Evaluated Infrastructure Protection Readiness related training and exercise programs to ensure that programs and resources are adequate to produce qualified Incident Response staff and surge teams.
- Adjusted the Chemical Security Assessment Tool as necessary to support implementation of the Department’s regulatory authority over the sale or transfer of ammonium nitrate (e.g., develop portal for submission of Ammonium Nitrate User Number registrations).
- Developed protective measures guide for owners/operators in the Lodging and Outdoor Events sub-sectors of Commercial Facilities Sector.
- Conducted State Security Seminar and Exercise Series with state chemical industry councils to foster communication between facilities and their local emergency response teams.
- Conducted Bomb-Making Materials Awareness Program events in all Level 1 Urban Area Security.

FY 2011 Mitigation Programs Planned Accomplishments

- Execute the annual National Level Exercise to validate incident management processes and ensure training of key personnel.
- Expand efforts to ultimately support full cycle of CFATS facility inspections, including prioritized review, assessment, and inspection efforts of Tier 3 and 4 facilities.
- Conduct one pilot exercise (response capabilities vs. response needs) using threat scenarios that underpin the Chemical Facility Anti-Terrorism Standards risk-based performance standards with select chemical facility owners and operators, and State and local partners.
- Complete the initial deployment of the Geospatial Pilot Project in FY 2011, which will provide real-time geospatial data on CIKRs vulnerability information to Headquarters.
- Continue to develop the Enhanced Critical Infrastructure Protection (ECIP) Infrastructure Survey Tool to add four additional sub-sectors.
- Complete Emergency Services Risk Baseline Program. This process develops a prioritized baseline portfolio of the sector-wide risk landscape to guide decision making and to measure

success.

- Launch Interagency Security Committee (ISC) Voluntary Security Recognition Pilot to encourage Federal facilities to adopt ISC Security measures. The Pilot will include vulnerability assessments, possible Buffer Zone Protection Plans, documentation for implemented security measures, employee security training, communications protocols, and procedures with local first responders, security auditing plans, a certification process, and participating in exercises.
- Complete the “Roadmap to Secure Control Systems in the Dams Sector.” The roadmap will provide a comprehensive framework and recommended strategies focused on the protection of industrial control systems across the Dams Sector to enhance the sector’s understanding and management of cyber risk.
- Conduct six Chemical Sector Explosive Threat Awareness Training courses to increase awareness of the threat of improvised explosive devices to the Chemical Sector.
- Complete and distribute Protective Measures Guide for Shopping Facilities within the Commercial Facilities Sector.
- Expand TRIPwire user access to foreign security partners to include the United Kingdom, Australia, New Zealand, and Canada.
- Continue public safety bomb squad capability assessments, and reassessments of squads previously assessed in FY 2005 – FY 2009.
- Commence development of TRIPwire Secret to enable high-level criminal analysis and targeting, as well the ability to share classified information with other Federal government partners.

FY 2012 Mitigation Programs Planned Accomplishments

- Execute National Exercise Program (NEP Tier) II or III CIKR exercise.
- Perform review and revision of Incident Management (IM) Base plan and IM and IL SOPs.
- Fully implement Web EOC within the NICC Watch.
- Facilitate IP participation in the Continuity of Operations Table Top Exercises.
- Prioritize expansion of inspection capabilities supporting annual review, assessment, and inspection efforts of Tier 1 facilities, prioritized biennial inspections of Tier 2 facilities, and initial inspections of Tier 3 and 4 facilities.
- Conduct one exercise using the threat scenarios that underpin the CFATS risk-based performance standards with State and local partners as part of the response capabilities vs. response needs (RC/RN) project.
- Begin development efforts for a mission-critical model to determine which high-risk facilities produce a significant percentage of a critical chemical for essential national activities.
- Begin incorporation of economic criticality requirements into Top Screen screening formulations and utilize for updated preliminary tiering of facilities calculations of high-risk facilities.
- Conduct 872 Enhanced Critical Infrastructure Protection (ECIP) visits.
- Conduct 180 days “Call Back” on 20 percent of ECIP visits.
- Complete initial ECIP visits to selected sites within three years.
- 2,680 new stakeholder relationships throughout the country including CIKR Owners/Operators, State and Local mission partners, and regionally deployed Federal partners.

- Incorporate 35 States with Superfund Amendment and Reauthorization Act (SARA) Title III Tier II data into the Chemical and Hazmat Information Reference Portal.
- Complete and distribute Protective Measures Guide for the Real Estate and Resorts sub-sectors.
- Expand the Commercial Facilities Sector Risk Self Assessment Tool (R-SAT) program to other Commercial Facilities sub-sectors.
- Conduct International Workshop on Security and Protection of Dams and Locks with appropriate international partners in conjunction with the International Committee of Large Dams (ICOLD) Annual Meeting.
- Conduct 125 capability assessments of State and local bombing prevention units and document results in the National Capabilities Analysis Database (NCAD).
- Update TRIPwire, TRIPwire Community Gateway, and Terrorist Task List content to reflect evolving threats.
- Beta test the TRIPwire Field Tool with 10 Bomb Squads.

National Protection and Programs Directorate
Infrastructure Protection and Information Security
Program Performance Justification
(Dollars in Thousands)

National Cyber Security Division

Includes *US-CERT*, *Strategic Initiatives*, and *Outreach and Programs* PPAs

National information technology infrastructures, including the Internet, telecommunication networks and embedded computer systems, are increasingly targeted for exploitation and disruption. Because national critical cyber infrastructures are under constant attack, the Department of Homeland Security created NCSA to enhance Federal cyber readiness, analyze cyber threats and vulnerabilities, disseminate threat warning information, and coordinate incident response activities.

NCSA mission operates under authorities derived from the Homeland Security Act of 2002, the Federal Information Security Management Act of 2002, the 2003 White House - National Strategy to Secure Cyberspace, Homeland Security Presidential Directive-7: Critical Infrastructure Identification, Prioritization and Protection, OMB M-04-25: FY 2004 Reporting Instructions for the Federal Information Security Management Act, the Federal Information Security Management Act 2004 Report to Congress, National Security Presidential Directive-54/Homeland Security Presidential Directive-23: Cyber Security and Monitoring, the 2009 White House - Cyberspace Policy Review, the 2010 Department of Homeland Security Quadrennial Homeland Security Review and Bottom Up Review, OMB M-10-15: FY 2010 Reporting Instructions for the Federal Information Security Management Act and Agency Privacy Management, and M-10-28: Clarifying Cybersecurity Responsibilities and Activities of the Executive Office of the President and the Department of Homeland Security.

The NCSA branches include:

- **Cybersecurity Coordination** focuses on securing Federal government networks and systems by coordinating and integrating information to provide cross domain situational awareness, analyze and report on the composite state of national cyber networks and systems, and foster collaboration.
- **US-CERT Operations** focuses on utilizing technical competencies in Federal network operations and threat analysis centers to develop knowledge and knowledge management practices supporting Federal stakeholders as they make key operational and execution decisions.
- **Network Security Deployment** focuses on designing, developing, deploying, and maintaining the National Cybersecurity Protection System (NCPS), operationally known as EINSTEIN.
- **Federal Network Security** focuses on achieving cybersecurity throughout the Federal enterprise by utilizing a holistic approach to Federal government network security,

enabling cybersecurity challenges to be addressed in a manner that maximizes value and minimizes risks associated with technology and security investments.

- **Critical Infrastructure Cyber Protection and Awareness** focuses on collaboration with the public and private sectors to assess and mitigate risk to the Nation’s cyber critical infrastructure and key resources and promoting cybersecurity awareness among and within the general public and key communities.

Global Cyber Security Management focuses on development and promulgation of sound software practices, building a skilled national cyber workforce for today and tomorrow, managing supply chain risk across the lifecycle of networks, systems, and components, and managing standards and the transition of R&D results to operational status. Through these mission areas, NCSD strengthens the preparedness of its stakeholders to withstand disruptions, absorb or otherwise tolerate disturbances, understand roles in a crisis, adapt to changing conditions, and grow stronger over time. It leads and coordinates efforts to preserve and safeguard information and information systems that ultimately improve the Nation’s public sector and private sector cybersecurity posture. Moreover, it is maturing the capabilities to manage cyber risks to the Nation, design a resilient infrastructure, deploy protective capabilities, assess defensive capabilities, influence cyber policy, develop the capability to assess cyber threat and risk, and readily and securely share threat information and appropriate mitigation strategies.

NCSD is increasing its cybersecurity activities for Federal civilian networks to ensure that national cybersecurity requirements are met. It will seek to use new models for developing, acquiring, and disseminating cybersecurity technology, and to “design-in” greater resilience for critical infrastructure to ensure national security requirements are met and will include a cybersecurity focus.

As addressed by language in the Joint Explanatory Statement accompanying Public Law 111-83, the request for NCSD is submitted in a PPA structure identical, by account, to that enacted in FY 2010. These Congressional PPAs are: United States Computer Emergency Readiness Team, Strategic Initiatives, and Outreach and Programs.

US-CERT leverages technical competencies in Federal network operations and threat analysis centers to develop knowledge and knowledge management practices supporting Federal stakeholders as they make key operational and execution decisions. It analyzes and reduces

cyber threats and vulnerabilities, disseminates cyber threat warning information, and coordinates with partners and customers to achieve shared cyber situational awareness related to the Nation's cyber infrastructure. US-CERT addresses the need for a single, accountable focal point for achieving cyber infrastructure security and compliance throughout the Federal government. Guided by various mandates, US-CERT enables departments and agencies to address their cybersecurity challenges in a manner that maximizes value and minimizes risks associated with technology and security investments. US-CERT is also responsible for the design, development, acquisition, deployment, and operations and maintenance required to implement the National Cybersecurity Protection System, which is operationally known as EINSTEIN. US-CERT develops national strategies and implementation plans on cybersecurity workforce development and training and education opportunities, and furthermore focuses on relationship building amongst public and private cybersecurity institutions with regard to education and workforce development, and development, implementation, and promotion of national standards to ensure consistent competency levels. Lastly, US-CERT provides a set of comprehensive resources that can be used to appropriately manage supply chain risk across the lifecycle of networks, systems, and components and oversees the implementation of national cybersecurity policies to ensure appropriate resources are available to support the mission and its specialized information technology systems.

This PPA encompasses the following activities:

- *Incident Handling* activities detect and mitigate targeted attacks against the Federal government by covering the security of Federal information technology assets and services, as well as the assurance of essential citizen services.
- *Analysis* activities correlate and analyze cyber threat data “in-house” and disseminate actionable data and information in order to improve the overall understanding of current or emerging cyber threats.
- *Strategic Operations* activities build critical interagency information sharing and incident response collaboration.
- *Situational Awareness* activities identify, analyze, and comprehend broad network activity, supporting incident handling and analysis of trends for Federal departments and agencies. It is responsible for the development, acquisition, deployment, and support required for the National Cybersecurity Protection System, operationally known as EINSTEIN.
- *Production* activities collaborate with the public and private sector to share and disseminate critical cybersecurity information through a variety of distribution mechanisms.
- *Cybersecurity Coordination* focuses on securing Federal government networks and systems by coordinating and integrating information to provide cross domain situational awareness, analyze and report on the composite state of national cyber networks and systems, and foster collaboration.
- *Assistant Secretary, CS&C* includes \$4.246 million and 19 FTP/FTE to support for the Office of the Assistant Secretary of Cybersecurity and Communications.

US-CERT's mission is to lead cross-sector efforts to improve the Nation's cybersecurity posture, coordinate cyber information sharing, and proactively manage cyber risks to the Nation while

protecting constitutional liberties. US-CERT is striving to be a trusted global leader in cybersecurity, emphasizing collaboration, agility, and responsiveness to a complex and dynamic cybersecurity environment.

US-CERT is the operational arm of the National Cyber Security Division. Its primary functions include: building and maintaining the people, processes, and technology to analyze and reduce cyber threats and vulnerabilities; disseminate cyber threat warning information to its public and private sector constituents; coordinate with government and industry partners to achieve shared cyber situational awareness of the Nation's cyber critical infrastructure; provide response and recovery support for national assets; and advise senior leadership on national-level cybersecurity policy and guidance.

US-CERT's mission space includes Federal civilian agencies, the Department of Defense, the intelligence community, State and local governments, private sector partners, critical infrastructure owners and operators, international partners, as well as the general public. To collect, analyze, and disseminate cybersecurity vulnerability, threat, and attack information to this board community, US-CERT maintains a 24x7x365 capability to support the National Cybersecurity and Communications Integration Center (NCCIC), with connectivity to all major Federal cyber operations centers, industry, international, and communications partners, including the National Coordinating Center for Telecommunications, and provides several levels of analytical insight into cyber activities. US-CERT maintains a 24x7 Operations Center that provides situational awareness and risk mitigation information and support for Federal government customers as well as the general public. Through monitoring, communications, and coordination, US-CERT is able to provide timely and accurate mitigation guidance and serve as the focal point for collaborative cyber awareness, mitigation, and reduction for cyber threats and vulnerabilities.

Specifically, the NCCIC will help improve national efforts to address threats and incidents affecting the Nation's critical information technology assets and cyber infrastructure. As a key component of the National Cyber Incident Response Plan (NCIRP), the NCCIC provides the facility and mechanisms to coordinate national response efforts. The NCCIC is responsible for coordinating and integrating information to provide situational awareness and foster collaboration among Federal, State, local, tribal, and territorial homeland security partners; private sector stakeholders; and nongovernmental organizations.

The NCCIC operations center unifies key cyber operational units which include:

- **United States Computer Emergency Readiness Team (US-CERT)** – a partnership between DHS and the public and private sectors. US-CERT is charged with providing response support and defense against cyber attacks for the Federal Civil Executive Branch (.gov) and information sharing and collaboration among State, Local, Tribal and Territorial governments, industry, and international partners. US-CERT interacts with Federal agencies, industry, the research community, State, Local, Tribal and Territorial governments, and other entities to disseminate reasoned and actionable cybersecurity information to the public. US-CERT also provides a way for citizens, businesses, and

other institutions to communicate and coordinate directly with the U.S. Government about cybersecurity.

- **Industrial Control Systems Cyber Emergency Response Team (ICS-CERT)** – provides focused operational capabilities for defending control system environments against emerging cyber threats. ICS-CERT provides efficient coordination of control systems-related security incidents and information sharing with Federal, State, Local, Tribal and Territorial agencies and organizations; the Intelligence Community (IC); private sector constituents, including vendors, owners, and operators; and international and private sector CERTs. ICS-CERT leads this effort by responding to and analyzing control systems-related incidents, conducting vulnerability and malware analysis, providing onsite support for forensic investigations, and providing situational awareness in the form of actionable intelligence and reports.

National Coordinating Center for Telecommunications (NCC) – Provides the operational core of the National Communications System and is co-located with the United States Computer Emergency Readiness Team (US-CERT). Similar to US-CERT, the NCC Watch provides 24x7 situational awareness over the health of the Telecommunications infrastructure and facilitates the initiation, coordination, restoration, and reconstitution of national security and emergency preparedness telecommunications services or facilities during emergency events. The NCC Watch enhances physical and cyber security of the Nation's critical communications infrastructures by facilitating cooperation, providing real-time situational awareness, enhancing information sharing, and maintaining system-to-system interaction among critical infrastructures and between the Government and the private sector. The NCC is funded under the Critical Infrastructure Protection PPA within the National Communications System portfolio.

Elements of US-CERT's capabilities include the near-real time analyses of raw and summarized data from a wide variety of information sources, conducting assessments of actual or potential attacks detected by the National Cybersecurity Protection System's alerting systems, and support for the implementation of tools and technologies, including monitoring of deployed sensors and creation of threat signatures, countermeasures, and scenarios to rapidly detect and categorize cyber activities that could pose a potential risk US-CERT stakeholders.

US-CERT possesses a robust capability to anticipate attack vectors and intrusion activity in order to protect against and mitigate the dynamic activities of individuals and groups responsible for attacks against Federal government systems. As adversaries evolve in sophistication, US-CERT's approach to prioritization and escalation must incorporate the expected impact of the incident on the Nation's cyber critical infrastructure. Currently, US-CERT escalates and prioritizes efforts to assess risk, identify mitigation strategies, coordinate strategies, and monitor results in a comprehensive risk management approach.

To optimize Federal departments' and agencies' network services and secure the Federal government's external network connections, the Office of Management and Budget (OMB) initiated the Trusted Internet Connections Initiative (TIC) in November, 2007. As co-lead with OMB, the Department of Homeland Security focuses on three implementation areas: driving departments and agencies to reduce and consolidate their external connections through approved

TIC access points, managing the TIC Reference Architecture, including a baseline set of capabilities for securing TIC access points, and assessing agency progress in complying with the TIC Initiative. US-CERT serves as the single, accountable focal point for the TIC initiative. To execute this responsibility, it synchronizes Federal department and agency efforts, monitors transitions, provides technical expertise, and manages baseline information security system capabilities.

US-CERT also manages the Cybersecurity Compliance Validation program, which is capable of monitoring, evaluating, and enabling ongoing compliance with Federal information technology security directives and initiatives.

The execution of compliance assessments will establish a baseline profile and maintain an enterprise view of the Federal government's cybersecurity state which will provide detailed insight into the technical implementation, operational readiness, implementation impediments, and capability gaps of Federal Civilian Executive Branch Agencies with respect to national cybersecurity initiatives, policies, and standards. This insight is necessary for the Office of Cyber Security and Communications, NCSD, and other stakeholders, to make informed decisions based on objective assessments and quantitative data.

US-CERT is responsible for the design, development, acquisition, deployment, and operations and maintenance required for the National Cybersecurity Protection System (NCPS), operationally known as EINSTEIN. NCPS is an integrated intrusion detection/prevention system that encompasses the hardware, software, and other components being procured specifically to support the Department's responsibilities under the Comprehensive National Cybersecurity Initiative.

NCPS improves security for the Federal Executive Branch by providing customers with orderly and efficient capability improvements. Broadly, it consists of discrete blocks consisting of follow-on end-to-end system upgrades. The end-to-end system upgrades are achieved through incremental development and deployment. The deployed capabilities include flow collection at agency sites, centralized data storage, visualization, correlation, knowledge based, intrusion detection system capabilities, flow analysis tools, contextual data feeds, and a prototype environment.

National Cybersecurity Protection System Block 1/EINSTEIN 1 was deployed at thirty-one sites between 2003 and 2008. Its capabilities included flow collection at Federal partner sites, centralized data storage, visualization, correlation, knowledgebase, flow analysis tools, and contextual data feeds.

National Cybersecurity Protection System Block 2/ EINSTEIN 2 is an enhancement of Block 1/EINSTEIN 1. It includes three parts: Blocks 2.0, 2.1 and 2.2, which provide EINSTEIN 2, updated visualization and correlation tools and other updated capabilities based on Federal partner-gathered data sets.

- Block 2.0 includes flow collection and intrusion detection system at Federal partner sites, centralized data storage, visualization, correlation, knowledge base/management, flow

analysis, intrusion detection system tools, contextual data feeds, and a prototype environment.

- Block 2.1 includes increased capabilities in event detection and management including aggregation, correlation, and visualization.

NCPS Block 3/EINSTEIN 3 includes classified capability improvements. It provides an intrusion prevention capability, utilizing a new and distinctly unique architecture not previously used in other NCPS blocks. Its architecture and deployment are interdependent with the capabilities delivered via EINSTEIN 1 and EINSTEIN 2. EINSTEIN 3's full capabilities are classified and the Department of Homeland Security Secretary's Cybersecurity Memorandum for 2010 addresses its planned deliverables.

The NCPS structure improves the capability to analyze malicious activity occurring across the Federal Executive Branch civilian networks resulting in improved computer network security situational awareness. This increase in situational awareness can then be shared with Federal executive agencies in an effort to reduce and better prevent computer network vulnerabilities.

US-CERT will continue to lead the development and implementation of cybersecurity technologies that counter ongoing national cyber threats and apply effective risk mitigation strategies to detect and deter these threats. Collaborating with public and private industry partners provides the technological innovation and development that promotes the overall effectiveness of the cybersecurity effort.

US-CERT serves as the Department's primary conduit for the National Initiative for Cybersecurity Education (NICE) and all education-focused elements of the Comprehensive National Cybersecurity Initiative. US-CERT assists in the NICE Strategy, leading and coordinating efforts to improve the Nation's cybersecurity education posture to ensure a robust, competent cybersecurity workforce. This effort includes development of national strategies and implementation plans for cybersecurity workforce development, and training and education opportunities consistent with the administration priorities. It also focuses on relationship building amongst public and private cybersecurity institutions with regard to education and workforce development, and development, implementation, and promotion of nationwide standards to ensure consistent competency levels.

The growing sophistication and diversity of international cyber threats, as well as supply chain vulnerabilities, increase the potential for adverse impact on organizational operations and assets, individuals, and the Nation. Presently, US-CERT is focusing on the shift from piloting activity to a more formal, targeted approach in order to build a permanent supply chain risk management capability for the Federal civilian government by enabling the Federal civilian government to manage supply chain risk across the lifecycle of networks, systems, and components, providing resources to continue Federal civilian government management of risk through the use of tools and resources once systems are deployed and operational, and collaborating with interagency partners to adopt technical and acquisition policy updates.

Additionally, US-CERT supports the leadership of NCSD by establishing policies and direction to sustain overall cybersecurity strategy and planning through effective integration of resource and financial management, human capital, facilities, performance management, policy development and implementation, information and personnel security, and strategic planning.

The US-CERT PPA also contains the budget request for Cybersecurity Coordination, which funds the National Cyber Security Center (NCSC). NCSC's mission is to ensure that Federal agencies have access to and receive information and intelligence needed to execute their respective cybersecurity missions. All six service areas have been designed to deliver on that mandate, each with its own unique capability that enhances another service area. The integrating capabilities, processes and tools the Center deploys strengthen each individual center's mission; promote an integrated national situational awareness; and support an integrated cyber incident response.

The NCSC plans to deliver on six key service areas:

- *Mission Integration* facilitates the integration of the six participating centers through common or aligned processes, procedures and techniques. The six participating centers include: the United States Computer Emergency Response Team (US CERT), the NSA Threat Operations Center (NTOC), the Intelligence Community Incident Response Center (IC-IRC), the US STRATCOM Cyber Command (CYBERCMD), the Department of Defense Cyber Crimes Center (DC3), and the National Cyber Investigative Joint Task Force (NCIJTF.)
- *Collaboration and Coordination* facilitates professional collaboration and managing the partnership agreement process with each center. The partnership agreements and the mission integration officers work to provide the cross organizational information sharing process. For example, if US CERT needs information from DC3 to fulfill an information gap, and that same information is needed for CYBERCMD, the partnership agreements and mission integration officers will serve as the mechanism(s) for multi-cross organizational information sharing.
- *Situational Awareness and Cyber Incident Response* sustains an integrated national situational awareness capability for operational and strategic means at all three classification levels. Provides support to steady state incident response and lead national cyber incident response efforts. Develops and deploy an integrated incident management system of detection, analysis, alert and notification, and response/remediation. Under the Situational Awareness and Cyber Incident Response team, this unit will support the Secretary as the Principal Federal Official for cyber under the National Infrastructure Protection Plan (NIPP).
- *Analysis and Reporting* reports daily, weekly and annually on the composite state of the U.S. Cyber Networks and Systems. Conducts system wide incident analysis, and integrated incident response planning. Convenes and manages the cyber incident investigative capability, modeled after other successful Federal investigative capabilities. Critical to this effort is for the Center to operate at all three classification levels - in order to share information across all classification domains and to build mechanisms to down grade information to a lower classification level to share information more broadly.

- *Knowledge Management* provides a portal with a compendium of cybersecurity information and intelligence for cybersecurity professionals, analysts, and center customers. Sustains a national cyber incident database. This knowledge management system will provide the means for on-line collaboration, correlation analysis, discovery, and trend studies.
- *Technology Development and Management* provides enabling IT support for the center and provides enterprise tools and capabilities (process, tool deployment and common procedures) for all six centers.

NCSC will utilize the information sharing agency agreements documented in the 2003 Memorandum of Understanding (MOU) Between the Intelligence Community, Federal Law Enforcement Agencies, and the Department of Homeland Security Concerning Information Sharing (Information Sharing MOU); the 2005 Memorandum for the Heads of Executive Departments and Agencies on the Terrorism Information Sharing Environment; and the policies and procedures developed by the Program Manager for the Information Sharing Environment (PM-ISE). In FY 2011, the program will complete the mission analysis and partnership agreements utilizing the framework established by the PM-ISE. These agreements will identify complimentary mission space and information/intelligence gaps. The agreements will delineate how the NCSC will deliver key information and intelligence needs to improve each Center's mission as defined by National Security Presidential Directive 54 (NSPD 54)/Homeland Security Presidential Directive 23 (HSPD 23).

FY 2010 US-CERT Accomplishments:

- Developed a Department and Agency Cybersecurity Activity Report to provide situational awareness on cyber activity across the Federal civilian government.
- Achieved operational status of new integrated joint watch floor, which will enhance the US-CERT's situational awareness and responsiveness to current threats and vulnerabilities.
- Implemented a strong correlation engine to process the increased volume of EINSTEIN data and reporting in order to provide more timely notification of suspected malicious activity to security professionals across the Federal Enterprise.
- Increased the EINSTEIN sensor network and operationally integrated newly deployed EINSTEIN sensors to provide broader operational situational awareness of malicious activity across Federal networks.
- Monitored the prevalence of sophisticated malware across Federal networks from deployment of signatures within EINSTEIN, based on information derived from malware analysis, and provided warnings and indicators to Federal departments and agencies on confirmed infections within their networks.
- Completed installation of EINSTEIN 2 capabilities² at four departments/agencies and one Managed Trusted Internet Protocol Service (MTIPS) vendor in support of the Trusted

² EINSTEIN 2 capabilities include flow collection and information detection systems at Federal partner sites, centralized data storage, visualization, correlation, knowledge base, intrusion detection system and flow analysis tools, contextual data feeds, and prototype environment.

Internet Connection³ (TIC) initiative. This brings the total deployments to 13 departments/agencies and four MTIPS providers, with three MTIPS customers on-board.

- Improved analysis capabilities of through enhancements to the malware laboratory and the creation of a digital media analysis laboratory.
- Actively participated in International and Domestic cyber information sharing in all sectors.
- Increased international efforts by more robust information sharing and collaboration with other National Computer Incident Response Support Teams.
- Oversaw implementation of the Trusted Internet Connections (TIC) Initiative by Federal Departments and Agencies, providing coordination and guidance, achieving 82% technical compliance, 42% connection consolidation, and 54% network capacity consolidation across the Federal civilian executive branch of government.
- Defined requirements and coordinated with the General Services Administration to establish the Managed Trusted IP Service (MTIPS) under the NETWORX contract vehicle in order to provide a cost effective solution for implementation of the capabilities necessary to comply with the TIC Initiative.
- Updated the TIC Reference Architecture and capability requirements in response to lessons learned and evolving threats.
- Conducted a combined feasibility study and cost-benefit analysis on the optimization of reducing TIC access points.
- Reviewed Agency requests for additional TIC access points and, in coordination with OMB, authorized additional TIC access points for ten TICAP agencies, raising the total number of authorized TIC access points to 64.
- Performed 16 TIC compliance assessments to ensure agencies have the appropriate operational capabilities in place to meet the Trusted Internet Connection Initiative objectives.
- Mapped TIC compliance assessment criteria to other common Federal and industry compliance, audit, and certification criteria to allow parties engaged in the assessment process to leverage existing documentation to satisfy checks and eliminate unnecessary duplication of effort.
- Expanded the TIC compliance assessment program to support implementation of additional requirements by identifying and adding required capability checks to the compliance catalog, and conducted eight expanded assessments.
- Defined requirements for a FISMA enterprise performance program needed to execute DHS responsibilities outlined in OMB M-10-15 and OMB M-10-28 and initiated execution of the CyberScope transition plan developed by the Department.
- Implemented and initiated testing of an automated visualization and correlation tool to support the US-CERT in the correlation of incidents from approximately two billion flow and intrusion detection records collected by the NCPS each day.
- Awarded a contract to support Independent Verification and Validation (IV&V) for the entire NCPS program. The third-party IV&V organization will provide an independent assessment of activities and processes focused on program management, testing and

³ The Trusted Internet Connection Initiative is a multi-faceted plan to improve the Federal government's security posture by reducing the number of Federal external connections.

evaluation, and installation and deployment of the NCPS Blocks to identify areas of improvement.

- Conducted the CNCI Initiative 3 Exercise, resulting in a proven concept of aggregation and protection of .gov traffic in the cloud (at an Internet Service Provider, ISP Nest) and proof that the National Security Agency's (NSA) technology could be integrated into ISP facilities and managed by DHS.
- Completed joint DHS / NSA / ISPs design study to identify design options, key interfaces as well as cost, schedule and risk for EINSTEIN 3 traffic aggregation and related Cybersecurity services.
- Streamlined operations & maintenance using DHS Data Center consolidation efforts. Data Centers provide data and system replications that improve availability, resiliency, and performance.
- Established supply chain threat information sharing capability with the Office of the Director of National Intelligence and began integration activity with the Department's Office of Intelligence and Analysis.
- Developed seven technical and acquisition recommendations, including a full analysis of the Federal Acquisition Regulations, on the basis of pilot findings, market research and collaboration with both public and private-sector partners to meet the Comprehensive National Cybersecurity Initiative deadline of September 30, 2010.
- Established and piloted a Federal Virtual Training Environment capable of providing online and on-demand information technology security training to approximately 125,000 users across the Federal government.
- Established a community college National Centers of Academic Excellence program to strengthen information assurance programs in community colleges and to promote a strong national community college cybersecurity presence.
- Established and piloted a Federal Cybersecurity Training Exercise program to deliver experiential and interactive training to IT security professionals and to foster sharing of best practices across the Federal government.
- Implemented process improvements to reduce procurement processing and collective Division budgetary oversight and improved budget development/execution cycle/processes via continuous reporting/monitoring.
- Instituted successful automated patching capabilities for critical/diverse cybersecurity systems.
- Successfully accredited Malware Lab Network and accomplished four vital re-accreditations for NCPS, which resulted in three-year ATOs that enabled a phased approach to align the Mission Operating Environment and EINSTEIN systems under a single accreditation package.
- Doubled the NCSD workforce through on-boarding of more than 80 cybersecurity and mission support personnel.
- Completed build-out of the new integrated joint watch floor and successfully relocated associated Watch Center staff without interruption to core services or capabilities.
- Designed and implemented the Significant Cyber Event Call, a mechanism which convenes all Directors of the seven Federal Partner Cyber Centers within one hour of call request.

- Designed and implemented the Significant Cyber Event Report to produce and disseminate a significant cyber event report to senior policy makers within one hour of convening the centers.
- Produced the first ever National Cyber Security Capabilities Compendium in concert with the six partner centers which presents the first comprehensive cross-agency order of battle in forming the National cyber defense.
- Completed 25 percent of the partnership agreements with the centers.
- Coordinated with DHS and other external Federal partners to develop Cyber Alert Levels used to classify significant cyber events.
- Conducted a proof of concept for a national cyber incident database utilizing National Information Exchange Model developed by DHS (NIEM) and markup language of Information Object Data Exchange Format (IODEF), in order to obtain real time reporting on cyber incidents across the Federal government.

FY 2011 US-CERT Planned Accomplishments:

- Enhance US-CERT’s situational awareness, collaborative posture, and responsiveness to current threats and vulnerabilities by integrating and coordinating US-CERT activities with other National Cybersecurity and Communications Integration Center partners.
- Continue to build out and enhance the US-CERT malware laboratory to support analysis and mitigation of cyber attacks and vulnerabilities in order to improve the security posture of Federal departments and agencies and obtain a more comprehensive picture of malicious cyber activity across the Federal enterprise. Specific enhancements include: additional staff; suitable data and equipment; a consolidated lab/LAN room; reporting tools for post analysis to facilitate threat assessments and trending.
- Achieve operational status of the digital media analysis laboratory to improve US-CERT analysis capabilities.
- Provide additional capabilities through the Government Forum of Incident Response and Security Teams and its supporting portal (GFIRST Portal) in order to distribute information and products which will assist Government Incident Response Teams in identifying and responding to current threats and vulnerabilities. Specific capabilities will include: current cyber event reporting with correlation where possible; automatically created Internet Protocol watch lists; current and important exploits, vulnerabilities, and weaknesses coupled with suggested mitigation strategies; incident and indicator reporting; department/agency-specific portals with daily snapshots of how the department/agency compares with the rest of the Federal government; Federal, State, local, tribal and international analysts information sharing and collaborating; shared situational awareness to be updated in near-real-time as additional cyber event incident or indicator information is fed into the system and fused with threat feeds from various sources; and the provision of a near-real-time status on a particular department’s/agency’s open cyber events, incidents, or requests for information.
- Define a Federal Cybersecurity Baseline Capability Roadmap to provide agencies with guidance on future IT security investments and develop four technical reference architectures that will be used by agencies to effectively deploy technologies sufficient to meet Federal cybersecurity policies and mandates.

- In coordination with OMB, establish target dates for agencies to complete key milestones install, such as the acquisition of MTIPS service by Seeking Service agencies, and track agency progress meeting those milestones.
- Publish version 2.0 of the Trusted Internet Connections Reference Architecture, and communicate the improved capabilities needed to departments and agencies.
- Provide Federal partners cost effective solutions for implementing the capabilities necessary to comply with Federal security strategy and initiatives by defining requirements and coordinating with the General Services Administration to update the NETWORKX contract.
- Expand the Trusted Internet Connection Compliance Validation project into a broader Compliance and Assurance Program that will conduct collaborative Cybersecurity Compliance Validations of Federal Executive Branch departments/agencies.
- Conduct 19 Cybersecurity Compliance Validations assessments of TIC Access Provider departments/agencies to objectively and quantifiably measure Federal agency implementation of and compliance with a select subset of elements from OMB Cybersecurity Memoranda, the Federal Information Security Management Act, and the Trusted Internet Connection Initiative.
- Collect and process Self-Assessment Reports from any agency that does not receive a Department of Homeland Security-led Cybersecurity Compliance Validations assessment.
- Further build capability and execute DHS FISMA responsibilities (outlined in OMB M-10-15 and OMB M-10-28) by completing the transition of CyberScope to DHS, drafting the annual FISMA report to Congress for OMB review, conducting CIO/CISO interviews with agencies, developing quarterly and annual FISMA metrics (to include the IG measures), and developing processes and infrastructure to support monthly FISMA data collection and analysis.
- Assess the effectiveness of Federal civilian agency security programs and develop a baseline benchmark of the Federal civilian executive branch’s cybersecurity posture via analysis of the data collected through DHS led assessments and the FISMA data collected through CyberScope.
- Define Continuous Monitoring, identify the scope, and establish requirements for continuous monitoring tools and services.
- Complete the remaining six department/agency NCPS Block 2.0 installations bringing the total to nineteen D/As, and maintain EINSTEIN 2 operations, and conduct standard technical refresh of existing NCPS equipment deployed in FY 2009 and FY 2010. Deploy fourteen additional TICs at exiting EINSTEIN 2 D/As to enhance EINSTEIN 2 capabilities. Achieve FOC of nineteen D/A TICs in 2011 and four MTIPS providers. Additional MTIPS customers will be added as MOAs are finalized.
- Complete operational testing, transition to sustainment, and maintain a Security Information and Event Management (SIEM) analytical capability to support US-CERT in identifying patterns of malicious activity and in correlating, aggregating, and visualizing incidents from the approximately two billion flow and intrusion detection records collected by the NCPS each day. Initiate development of a SIEM Continuity of Operations (COOP) capability to be deployed in a DHS Data Center.
- Deploy and maintain the communications infrastructure necessary to support immediate access, data archiving, COOP, and availability requirements of EINSTEIN 3.

Infrastructure upgrades will enhance existing capabilities by interconnecting primary and secondary DHS Data Centers in Clarksville, VA, and Stennis, MS, as well as Operation Centers in Arlington, VA, and Pensacola, FL, and therefore, will directly support COOP for NCPS. These upgrades, based on a multilayer protocol label switching design, will also provide greater flexibility by incorporating enterprise switching equipment that can accommodate links speeds up to 10 Gbps, a substantial increase over current link speeds.

- Continue design efforts with NCPS Federal and industry partners for FY 2012 EINSTEIN 3 deployments. Collaboration ensures that the program leverages the best mix of commercial (ISP) and government (Partner) technologies to optimize system cost and performance.
- Initiate procurement and commence development of EINSTEIN 3 capabilities in partnership with NSA. EINSTEIN 3 will provide an online intrusion protection and detection capability enabled by intrusion prevention sensors and traffic aggregation points referred to as Nests.
- Begin deployment of the first set of five EINSTEIN 3 sensors and five Nests (of the fifteen planned for FOC in FY 2016) to be completed in FY 2012. This will continue the “cloud”-based deployment for the EINSTEIN program, providing defense in depth, reducing the number of points to defend, and defending further away from the edge of D/A networks. This deployment will represent the first enablement of active defense capability to prevent and/or limit malicious activities from penetrating the .gov environment.
- Establish an expanded operations environment to run a TS/SCI Network Operations Center that can meet system growth and cyber watch needs as well as provide an alternate operations location for US-CERT analysts and NCCIC staff.
- Pilot the Federal Virtual Training Environment.
- Commence planning for the development of a National Institute for Cybersecurity Studies, both a physical and virtual university, for the national cybersecurity workforce to engage in cybersecurity training and education, acquire the knowledge, skills, and expertise necessary to effectively perform job duties, and facilitate greater consistency in the performance of cybersecurity roles and functions across the Federal workforce.
- In partnership with the National Security Agency’s (NSA) National Centers of Academic Excellence office and the National Science Foundation, expand the program to strengthen information assurance programs in community colleges (CAE2Y) and to promote a stronger national community-based cybersecurity presence.
- In partnership with the NSA, support National Centers of Academic Excellence-designated institutions that facilitate cybersecurity of critical infrastructure sectors through capacity-building educational awards.
- Develop the implementation plan for the Federal Cybersecurity Training Exercise program and facilitate its roll-out across the Federal government.
- Implement supply chain risk management policy recommendations developed in FY 2010 through collaboration across the Interagency including OMB Chief Information Officer Council, OMB Federal Acquisition Regulations Council, Committee on National Security Systems, and Office of the Director of National Intelligence and Office of the National Counterintelligence Executive.
- Develop Federal civilian government supply chain information sharing (including counterfeit) concept of operations to disseminate threat information to the public sector.

- Enhance dynamic mission operations support to accommodate and harmonize increased mission activities and responsibilities
- Establish/integrate technological enhancements, associated operating procedures, and oversight control mechanisms to reduce acquisition/procurement processing timelines and facilitate information sharing and program planning capabilities for NCSD.
- Refine and supplement existing workforce training programs; establish a robust implementation of full-scale accelerated, promotional, cybersecurity fellowship and internship programs to better compete with comparable external agencies who are also vying for limited cybersecurity expertise.
- Diversify and expand information and system security controls, oversight, and accreditation programs and processes to solidify Division compliance with internal and external information and system security standards.
- Prepare for increased organizational baseline manpower onboarding; develop staffing plan and processes that will facilitate the increased organizational growth.
- Conduct recurring and programmatic evaluations of cost, schedule and performance activities relative to collective Division goals, objectives, and established contract agreements.
- Establish a comprehensive Division-led resource and information technology requirements board, including development of supporting policies, standardized and recurring internal management with Division leadership participation, and centralized and experienced facilitation to ensure effective oversight, approval, and execution of resource requirements, acquisition, and budgetary processes.
- Identify/document strategies to implement personnel recruitment and development programs that will ensure a core baseline staff of cybersecurity professionals who are committed to the various cyber mission areas, purpose, and processes critical to the Division and supported Federal agencies.
- Dedicate resources and personnel to effectively identify, audit, and account for diverse Division information technology resources, and integrate automated processes to ensure security and accountability of resources required to enable and sustain cybersecurity capabilities within NCSD.
- Complete partnership agreements with three Federal Cyber Security Centers and identify mission gaps and identify means to close capability gaps.
- Implement National Cyber Alert Levels aligned with other national alert mechanisms for consistency across the Federal government.
- Deploy the knowledge management system for cybersecurity information on Homeland Security Data Network (HSDN).
- Publish the 2011 National Cyber Security Capabilities Compendium.

FY 2012 US-CERT Planned Accomplishments:

- Implement an improved information sharing and collaboration environment by employing existing enhanced platform at all information classification levels.
- Improve US-CERT's ability to automatically analyze raw data and produce reports to reduce the risk of cyber threats and vulnerabilities across public and private sector constituencies.

- Increase staffing within US-CERT Operations to support its mandate to be the focal point for analysis and warning related to the Nation’s cyber infrastructure, to include both the public sector and private sector.
- Improve US-CERT’s mission execution through integrated operational planning, program planning, and sustainable financial, acquisition, and human capital management for its activities.
- Assist stakeholders in taking appropriate actions to secure and protect cyber infrastructure by producing timely, targeted, and accurate recommendations, guidance and alerts.
- Contribute to the development of cybersecurity-focused legislation, guidance, and coordination activities.
- Build and employ mobile digital media analysis kits to support US-CERT partners and constituents with off-site analytics.
- Update the TIC Access Points Technical and Information Systems Security Requirements and TIC Architecture to remain aligned with Federal security strategy. Monitor and forecast network capacity requirements across the TIC Access Providers for the Federal enterprise and provide analysis on the impact on reduction and consolidation.
- Develop four additional technical reference architectures that will be used by agencies to effectively deploy technologies sufficient to meet Federal cybersecurity policies and mandates.
- Perform Cybersecurity Compliance Validations assessments against a subset of Cabinet, Scorecard, and TIC Access Provider departments/agencies to objectively and quantifiably measure Federal agency implementation of and compliance with OMB Cybersecurity Memoranda, the Federal Information Security Management Act, and the Trusted Internet Connection Initiative.
- Collect and process Self-Assessment Reports from any agency that does not receive a Department of Homeland Security-led Cybersecurity Compliance Validations assessment.
- Conduct collaborative and independent Risk and Vulnerability Assessment assessments against a subset of Cabinet, Scorecard, and Trusted Internet Connection Access Provider departments/agencies to verify Cybersecurity Compliance Validations results.
- Produce agency-specific risk analysis reports, which will aid policymakers and Federal departments/agencies in the development of sound security and risk mitigation strategies.
- Execute DHS FISMA responsibilities by drafting the annual FISMA report to congress for OMB review, conducting CIO/CISO interviews with agencies and developing updated quarterly and annual FISMA metrics (to include the IG measures) for FY 2012.
- Assess the effectiveness of Federal civilian agency security programs and track the Federal civilian executive branch’s progress affecting improvement against the enterprise cybersecurity baseline established in FY 2011. Address any identified solution gaps to provide Federal agencies clear guidance for the migration of existing infrastructure and the implementation of new capabilities in a manner consistent with the overall Federal security strategy.
- Maintain EINSTEIN 2 operations and conduct standard technical refresh of existing NCPS Equipment.
- Maintain a Security Information and Event Management analytical capability to support US-CERT in identifying patterns of malicious activity and in correlating, aggregating,

and visualizing incidents from the approximately two billion flow and intrusion detection records collected by the NCPS each day.

- Complete the deployment of the remaining five EINSTEIN 3 sensors procured in FY 2011.
- Complete implementation scope for National Institute for Cybersecurity Studies, including the identification and initial development of a brick and mortar facility to host cybersecurity workforce professionals, the virtual university and the public-private advisory board to ensure applicable education standards and accreditation. Begin integrating cyber portal with all existing Federal cybersecurity training sites. Host Cybersecurity Placement Office functions for employers and job seekers but linking into existing Internet sites. Host classified version of portal for Federal cybersecurity professionals that require classified virtual training environment.
- Further expand the scope and content of the Federal Virtual Training Environment capability, continuing to assess the needs for additional content in concert with the baseline study of all cybersecurity training across the Federal Government. Expand initial scope from 100,000 to 200,000 users and fully integrate with National Institute for Cybersecurity Studies, and fully integrate the Federal Virtual Training Environment with National Institute for Cybersecurity Studies.
- Implement the Federal civilian government supply chain information sharing concept of operations by providing the ability to alert and warn public and private stakeholders of supply chain threats and incidents, to include the dissemination of Supply Chain Risk Threat Reports to civilian departments and agencies.
- Coordinate with industry to scope and charter stakeholder involvement activities in the Supply Chain Risk Management “Community of Practice.”
- Enable software security automation, as well as address use cases and automation protocols, and collaborate with tool vendors that meet dynamic requirements of the information technology security community.
- Provide security criteria for use in supply chain risk management, procurement acquisition, and collaborate with consumer groups and Federal agencies to leverage software assurance-related standards, models, and acquisition guidance to influence procurement of software.
- Prepare for integration of increased baseline manpower to coincide with corresponding Division mission/personnel growth to enable NCSD front office staff to maintain a first-rate operational team comparatively and accurately sized to support the Director, Deputy Director, and organization/mission.
- Identify opportunities at academic institutions for recruitment of new employees, fellows and interns. Launch development opportunities geared to drive and sustain senior Department of Homeland Security leadership direction to hire, develop, and retain the most trained, skilled, and talented cybersecurity professionals in the world.
- Complete partnership agreements with the national labs and other Federal cybersecurity centers. Complete partnership agreements with IT and COMMs ISACs.
- Achieve Full Operating Capability (FOC) with a Federal manning strength of 60 and continue to refine the capabilities under the six service lines.
- Exercise the National Cyber Alert Levels and integrate with the national situational awareness framework.

- Publish the 2012 National Cyber Security Capabilities Compendium, which will be expanded to include state and local entities.
- Implement the deep dive cyber analysis process within 90 days after a significant cyber incident. This process includes convening a panel of experts to analyze the effectiveness of the Federal government's response and developing a set of recommendations for improvement in incident response across the Federal government.
- Publish (with the six Federal cyber centers) a playbook for operational integration of activities and tasks during a significant cyber event.

Strategic Initiatives establishes mechanisms for Federal partners to deploy standardized tools and services at a reduced cost, paving the way for a collaborative environment that enables sharing of best practices and common security challenges and shortfalls. It develops and promulgates sound practices for software developers, information technology security professionals, and other critical infrastructure and key resources stakeholders and collaborates with the public and private sectors to assess and mitigate risk to the Nation's cyber critical infrastructure and key resources.

This PPA encompasses activities under:

- *Critical Infrastructure Protection-Cyber Security* activities strengthen preparedness by partnering with the public and private sectors to reduce vulnerabilities and minimize the severity of cyber attacks across all critical infrastructures and key resources sectors.
- *Training and Education* activities provide resources to improve the training, education, and workforce development of information technology security professionals within the Federal government and private industry.
- *Software Assurance* activities improve software development and acquisition processes by way of forums, working groups, and best practices collaborations.
- *Cyber Exercises* activities plan, coordinate, and conduct cyber-focused exercises that prepare and enhance incident operational capabilities for the Department and its Federal, State, local, regional, international, and private sector partners.
- *Standards and Best Practices* activities promote and sponsor the development of standards, guidance documents, metrics, and tools that raise awareness and provide technical guidance for the implementation of cybersecurity controls.
- *Information Systems Security Line of Business (ISS LoB)* activities support the long-term strategic prevention of attacks against Federal government networks by addressing common challenges faced by all agencies.
- *Control Systems* focus on reducing the cyber risk to industrial control systems within the Nation's critical infrastructure and key resources.
- *Assistant Secretary, CS&C* includes \$0.013 million to support the Office of the Assistant Secretary of Cybersecurity and Communications.

Strategic Initiatives supports the long-term strategic prevention of attacks against Federal government networks by addressing common challenges faced by all agencies. It works to assess and prioritize common cybersecurity needs and solutions, promote actionable cybersecurity policies, initiatives, standards, and guidelines for implementation, works closely with OMB, Department of Commerce, and others to enable and drive the effective implementation of cybersecurity risk mitigation strategies, and measures and monitors agency implementation strategies and compliance with published cybersecurity policies, initiatives, standards, and guidelines.

Strategic Initiatives promotes a skilled workforce and facilitates the availability of qualified cybersecurity professionals to support the Nation's cybersecurity needs through education and workforce development programs in order to develop and maintain a technologically skilled, cyber-savvy workforce and ensure a pipeline of future cybersecurity professionals.

It also promotes collaboratively developed processes and standards that improve cybersecurity through the promulgation, adoption, and enhancement of common indexing and reporting capabilities for malware, exploitable software vulnerabilities, and common attacks which target software and advances the future state of cybersecurity and showcase CS&C as a leader in both standards and the transition of R&D results to operational status.

Strategic Initiatives collects and maintains CS&C's' cybersecurity R&D requirements, encourages critical cyber technological innovation and investment in R&D, promotes opportunities to leverage the R&D investments of others, and facilitates the integration of resultant R&D efforts into mission and operational areas of CS&C. It also promotes the development of standards and frameworks that align with national interests to enhance cybersecurity postures of networks, software, and other cyber domains, and effectively shares information about development and use of cybersecurity standards throughout the Department.

Leading the Nation in efforts to improve control systems security within U.S. critical infrastructure and key resources, the Industrial Control Systems Cyber Emergency Response Team and Industrial Control Systems Joint Working Group works with both the public and private sector to provide guidance on efforts aimed at reducing the likelihood of success and severity of impact of a cyber attack against the Nation's critical infrastructure industrial control systems.

As part of Strategic Initiatives, the Control Systems Security Program coordinates with public and private partners to increase capabilities within critical infrastructure and key resources stakeholders for assessing and mitigating vulnerabilities, disseminating products containing actionable intelligence, training staff and personnel on control systems security, and implementing defense and remediation practices within operational environments. In FY 2010, the Control Systems Security Program's Industrial Control Systems Cyber Emergency Response Team achieved domestic and international standing as the global clearing house for responding to threats to critical infrastructure control systems assets at all levels of classification. Going forward, the Control Systems Security Program will continue to provide focused operational capabilities for defense of control system environments against emerging cyber threats.

Strategic Initiatives will advance and enhance cyber control systems security through expanded on-site threat and vulnerability assessments as part of its mission to facilitate information sharing and reduce the risk to the Nation's industrial control systems. This will include extensive collaboration and coordination with the private sector via on-site assessments and in-house laboratory testing. The expanded on-site threat and vulnerability assessments will significantly improve the quantity and quality of Industrial Control Systems Cyber Emergency Response Team products and provide for a greater number of on-site assessments and forensic investigations.

In accordance with the National Infrastructure Protection Plan, Strategic Initiatives strengthens the Nation's preparedness through public and private partnerships that work to improve the security of the Information Technology Sector through serving as the designated Sector-Specific Agency. In this capacity, it provides assistance and expertise across all critical infrastructure and key resources sectors for cybersecurity by working with NPPD's Office of Infrastructure Protection to develop and implement the National Infrastructure Protection Plan Information Technology Sector-Specific Plan. It also assists other Sector-Specific Agencies, private sector owners and operators of critical infrastructures and key resources in other sectors, and State and local governments in assessing and mitigating cyber risks and development of strong cyber risk management practices.

Strategic Initiatives conducts voluntary cyber security assessments across all 18 critical infrastructure and key resource sectors. It affords critical infrastructure and key resource sector participants a portfolio of assessment tools, techniques, and analytics, ranging from those that can be self-applied to those that require expert facilitation or mentoring outreach. Strategic Initiatives also provides critical infrastructure and key resource participants and other policy stakeholders with regionally-placed liaison support, through its Cyber Security Advisor initiative. The cornerstone of the program's cyber security assessment portfolio and primary outreach and measurement mechanism for Cyber Security Advisors is the Cyber Resiliency Review, which is an assessment to measure and enhance the implementation of key cyber security capacities and capabilities of critical infrastructure and key resource. The purpose of the Cyber Resiliency Review is to gather information regarding cyber security performance from specific critical infrastructure and key resource in order to gain an understanding of the relationships and impacts of critical infrastructure and key resource performance in protecting critical infrastructure operations.

Strategic Initiatives plans, coordinates, and conducts cyber-focused exercises that prepare and enhance incident operational capabilities for the Department and its Federal, State, local, regional, international, and private sector partners. Working collaboratively with stakeholders, it develops, designs, and executes cyber exercises that range from policy process exercises that facilitate cybersecurity operations to network simulations that test command and control procedures, response mechanisms, and cross-sector coordination.

It also manages the biannual Cyber Storm exercises series, which involves hundreds of cross-sector critical infrastructure and key resources participants. The construction of a national cyber exercise supports Federal partners and State and local governments in identifying gaps in cybersecurity processes and procedures, demonstrating interdependencies between response organizations and the information technology, and improving cyber preparedness for the delivery of critical government services.

FY 2010 Strategic Initiatives Accomplishments:

- Achieved approximately \$9.800 million in government-wide cost savings through the ISSLOB as a result of agencies utilizing the Situational Awareness and Incident Response (SAIR) Tier I BPA purchases and Certification and Accreditation Shared Service Centers to provide certification and accreditation services for approximately 125 systems of varying size and complexity.
- Defined the requirements, evaluated proposals and designated two additional government agencies as ISSLOB Shared Service Centers to provide Risk Management Framework (C&A) services to the Federal civilian executive branch of government.
- Initiated development of a Federal Cyber Resiliency Model and conducted a pilot assessment to evaluate the effectiveness of the model.
- In partnership with the Department of State's Diplomatic Security Training Center, customized existing information assurance role-based training, customized the courses to meet DHS requirements, and implemented the delivery of four courses (instructor-led and web-based options).
- In partnership with the National Security Agency's National Centers of Academic Excellence office, establish a set of university based national critical infrastructure cyber

vulnerability laboratories to produce an infrastructure-specific cybersecurity education capability for support regionally based employers and provide local technical expertise to the critical infrastructure agencies.

- Promoted and matured the Cyber Ecosystem by publishing four updates to the Enumerations portion of software security automation through the advancement of the Common Weakness Enumeration and Common Attack Pattern Enumeration and Classification programs.
- Sponsored NIST Software Assurance Metrics and Tools Evaluation initiatives culminating in the Static Analysis Tool Expo that published the results of evaluating multiple tools using the Common Weakness Enumeration.
- Published the Master of Software Assurance Reference Curriculum, which was formally recognized by IEEE Computer Society as a certified Master’s Degree program in software assurance. This was the first curriculum of its kind to focus on assuring the functionality, dependability, and security of software and systems. The curriculum was produced through the Software Assurance Curriculum Project which also produced undergraduate course outlines as part of co-sponsored public-private collaboration efforts through the Software Assurance Forum and Working Groups.
- Co-edited and contributed to the development of the cybersecurity information exchange techniques as part of participation in the International Telecommunication Union – Telecommunication Standardization Sector standards body, Study Group 17, Question 4.
- Developed the cybersecurity technology transition process and project plan in coordination with the DHS Science and Technology Directorate.
- Participated in the first phase of the Federal Experts Security Advisory Panel working group on physical and cyber security. Provided input into the four cybersecurity recommendations for the document "Recommendations Concerning the Select Agent Program" presented to the White House on November 2, 2010.
- Participated in the White House International sub-Interagency Policy Committee (IPC) Cybersecurity Standards Assessment Working Group to develop the “USG Strategic Objectives for International Cyber Security Standardization”.
- Deployed six fly-away teams to provide onsite incident response to CIKR organizations that required immediate assistance in responding to a cyber attack.
- Conducted over 50 cybersecurity evaluations of critical infrastructure and key resources facilities.
- Performed over 50 on-site assessments of government and industry CIKR facilities to assess their control system and information technology network security practices against recognized industry standards.
- Reviewed, enhanced, and widely distributed Version 3.0 of the Cyber Security Evaluation Tool across the control systems community, including public and private partners, to increase situation awareness of the cyber status and health of CIKR control systems, and guide Federal and industry partners through a step-by-step process to assess their control system and information technology network security practices against recognized industry standards.
- Continued to lead the implementation of the *Strategy for Securing Control Systems* by operating the Industrial Control Systems Joint Working Group (ICSJWG) and its subgroups to provide a formal mechanism for the coordination of activities and programs across government and private sector stakeholders.

- Conducted over 30 training sessions to educate the control systems community on the risk of control system cyber attacks and aid them in developing mitigation solutions.
- Planned and executed the Cyber Storm III Mid-Term Planning Conference, Master Scenario Event List Planning Conference, and Final Planning Conference.
- Executed Cyber Storm III, including the visitor program and media outreach, which included participation for 60 private sector companies, 11 state governments and 13 nations.
- Developed and produced the 2010 the Information Technology Sector Specific Plan Triennial Update in coordination with the Information Technology Sector Coordinating Council and Government Coordinating Council.
- Engaged in various Cross Sector Cyber Security Working Group initiatives.
- Collected cybersecurity data from the 18 critical infrastructure and key resources sectors related to their cybersecurity metrics contained with their FY 2009 and FY 2010 Sector Annual Reports.
- Supported development of a new National Cyber Incident Response Plan and facilitated engagement of CIKR partners.
- Developed and deployed the Cyber Resiliency Review to assess CIKR providers – an evaluation to measure and enhance key cybersecurity capabilities to protect and sustain infrastructure operations and service delivery.
- Developed, piloted, and refined a method for performing the nationwide cyber security review of States and Large Urban Areas.

FY 2011 Strategic Initiatives Planned Accomplishments:

- Award ISSLOB BPA(s) for the Risk Management Framework (C&A) and Situational Awareness and Incident Response (SAIR) Tier II BPA(s) and Initiative planning for the release of the ISSLOB SAIR Tier III BPA(s)
- Assess the current and emerging state information security tools, technologies, and services and provide a repository of knowledge for use by Federal agencies to conduct research into those tools, technologies, and services
- Continue to develop and refine the Federal Cyber Resiliency Model, define a methodology for assessing and improving cybersecurity resiliency across the government and publish the methodology and supporting tools to allow agencies to self assess. Conduct a limited number of pilot assessments to validate the assessment methodology.
- Enable software security automation efforts supporting the evolution, promotion, reporting, and management of software assurance programs and security automation schema, for the Malware Attribute Enumeration and Characterization, the Common Weakness Enumeration, and the Common Attack Pattern Enumeration and Classification.
- Collaborate with the National Institute of Standards and Technology, the Department of Defense Information Assurance entities, and other stakeholders linking software assurance with relevant education and training programs to provide relevant curricula and a repository of resources suitable to use in education and training.
- Co-edit and contribute to the development of the cybersecurity information exchange techniques recommendation, known as X.1500, as part of participation in the International Telecommunication Union – Telecommunication Standardization Sector standards body, Study Group 17, Question 4.

- Pilot a technology transition process in coordination with DHS Science and Technology Directorate, Network Security Deployment, and US-CERT to facilitate the transition of three R&D-created technologies to National Cyber Security Division programs.
- Support and promote prioritized R&D activities, including opportunities to leverage the R&D investments of others.
- Collect, analyze, and report to the DHS Standards Office information required for an annual report to the National Institute of Standards and Technology.
- Deploy six fly-away teams to provide onsite incident response to CIKR organizations requiring immediate assistance and resolve in responding to a cyber attack.
- Perform 75 on-site assessments of government and industry CIKR facilities to assess their control system and information technology network security practices against recognized industry standards.
- Review, enhance, and widely distribute Version 4.0 of the Cyber Security Evaluation Tool across the control systems community, including public and private partners, to increase situation awareness information on the cyber status and health of CIKR control systems, and guide Federal and industry partners through a step-by-step process to assess their control system and information technology network security practices against recognized industry standards.
- Distribute CSET to CIKR asset owners and operators through website-based digital download.
- Continue to lead the implementation of the *Strategy for Securing Control Systems* by operating the Industrial Control Systems Joint Working Group (ICSJWG) to provide a formal mechanism for the coordination of activities and programs across government and private sector stakeholders.
- Conduct over 30 training sessions to educate the control systems community on the risk of control system cyber attacks and aid them in developing mitigation solutions.
- Plan and execute the Cyber Storm III After Action Process, including compiling and coordinating the Cyber Storm III After Action Report with entire exercise player set.
- Begin preparations for Cyber Storm IV, National Level Exercise 12, and conduct cyber exercises to support the National Cyber Incident Response Plan (NCIRP) and related operational activities.
- Deploy repeatable cyber exercise assistance program to assist states, CIKR partners, and other partners with their cyber exercise needs.
- Collect cybersecurity data from the 18 critical infrastructure and key resources sectors related to their cybersecurity metrics contained with their FY 2009 and FY 2010 Sector Annual Reports.
- Conduct approximately 50 voluntary cybersecurity evaluations of CIKR facilities with an emphasis on protecting and sustaining essential CIKR services across all sectors.

FY 2012 Strategic Initiatives Planned Accomplishments:

- Monitor implementation of Federal cybersecurity policies by Federal partners, providing coordination, guidance, and progression tracking in implementation, in order to create an environment of improved protection of Federal information systems from unauthorized access, use, disclosure, disruption, modification, or destruction.

- Build and provide Federal departments and agencies access to five Federal Network Security risk management training modules housed in a Federal Network Security Risk Management Resource Library or website.
- Sponsor strategic sourcing and requirement development activities to identify and pursue strategic information security product and service acquisitions
- Update and maintain the Federal knowledge repository of information security technologies, tools and services that was established in FY 2011.
- Maintain and update the Federal Cyber Resiliency Model, assessment methodology and supporting tools. Develop performance metrics for cyber security risk management.
- In partnership with the NSA National Centers of Academic Excellence office, ensure the set of university based national critical infrastructure cyber vulnerability laboratories are instructing students and conducting research related to infrastructure-specific cybersecurity education topics, and are known to the regionally based employers and provide are available to the local critical infrastructure agencies to support technical concerns.
- Enable software security automation, as well as address use cases and automation protocols, and collaborate with tool vendors that meet dynamic requirements of the information technology security community.
- Provide security criteria for use in supply chain risk management, procurement acquisition, and collaborate with consumer groups and Federal agencies to leverage software assurance-related standards, models, and acquisition guidance to influence procurement of software.
- Collect, analyze, and report to the DHS Standards Office information required for an annual report to the National Institute of Standards and Technology, and based on analysis, identify and communicate emergent needs for enhancements to existing standards or the development of additional standards with respect to national interests.
- Represent NCSO on the Department of Homeland Security Standards Council. Analyze and report on standards that have wide applicability to National Cyber Security Division programs.
- Identify, develop, and prioritize CS&C's cybersecurity R&D requirements. In addition, continue the technology transition process in coordination with DHS Science and Technology Directorate, Network Security Deployment, and US-CERT to facilitate the transition of R&D-created technologies to National Cyber Security Division programs.
- Operate the Industrial Control Systems Cyber Emergency Response Team (ICS-CERT) to respond to and analyze cyber threats and control systems incidents, conduct vulnerability and malware analysis, and provide onsite support for forensic investigations and analysis.
- Deploy eight fly-away teams to provide onsite incident response to CIKR organizations requiring immediate assistance and resolve in responding to a cyber attack
- Perform 75 on-site assessments of government and industry CIKR facilities to assess their control system and information technology network security practices against recognized industry standards.
- Review, enhance, and widely distribute Version 5.0 of the Cyber Security Evaluation Tool across the control systems community.
- Continue to lead the implementation of the *Strategy for Securing Control Systems* by operating the Industrial Control Systems Joint Working Group (ICSJWG) to provide a

formal mechanism for the coordination of activities and programs across government and private sector stakeholders.

- Conduct over 45 training sessions to educate the control systems community on the risk of control system cyber attacks and aid them in developing mitigation solutions
- Promote broad adoption of the Cyber Resilience Review in specific communities-of-interest through tailored, self-assessment guidelines, and continue expert led facilitation of regional, system-wide, and individual CIKR reviews.
- Continue to implement the Cyber Security Advisor initiative with additional placement of regional support in cyber security risk management (adding five to six additional regions, nine total).
- Plan and execute Cyber Storm IV.
- Develop National Level Exercise 12 (cyber-focused scenario) with the Federal Emergency Management Agency.
- Deploy repeatable cyber exercise assistance program to assist states, CIKR partners, and other partners with their cyber exercise needs.
- Conduct approximately 75 voluntary cybersecurity evaluations of critical infrastructure and key resources facilities with an emphasis on protecting and sustaining essential CIKR services across all sectors.

Outreach and Programs promotes opportunities to leverage the cybersecurity R&D investments of others. It promotes cybersecurity awareness among and within the general public and key communities, maintains relationships with governmental cybersecurity professionals to share information about cybersecurity initiatives, and develops partnerships to promote collaboration on cybersecurity issues. Outreach and Programs establishes cybersecurity strategy and planning by integrating resource management, human capital, facilities, performance management, and policy development and implementation into the broad array of issues addressed by NCSD.

This PPA encompasses activities under:

- *Stakeholder Outreach, Communications and Coordination* activities focus on the development of internal and external communications, ensure collaboration on events and activities across NCSD, and build and maintain stakeholder relationships to raise cybersecurity awareness.
- *International Affairs and Public Policy* activities conduct international outreach, facilitating collaboration, cooperation, planning, and policy development on global cyber security issues.
- *Planning and Programs* activities integrate resource management, human capital, facilities, performance management, and policy development and implementation into the broad array of issues addressed by National Cyber Security Division leadership.
- *Information Sharing and Collaboration* activities develop research, education, and outreach programs that focus on technology critical for cybersecurity and emergency preparedness and response.
- *Assistant Secretary, CS&C* includes \$0.485 million and 3 FTP/FTE to support the Office of the Assistant Secretary of Cybersecurity and Communications.

Outreach and Programs coordinates domestic and international engagement and outreach by promoting cybersecurity awareness among and within the general public and key stakeholder communities. It maintains relationships with Federal, State, local, and tribal governments; private industry stakeholders, and international cybersecurity professionals to share information about cybersecurity initiatives, and develops partnerships to promote collaboration and awareness on cybersecurity issues.

Outreach and Programs furthermore builds international partnerships and conducts outreach to advance information sharing and collaboration, cooperation, and planning to achieve cybersecurity goals. Specifically, the International Affairs Program participates in and fosters regional, bilateral, and multilateral relationships and forums that improve incident response capabilities, contribute to cybersecurity capacity building efforts globally, and enhance coordination on strategic policy issues. It also serves as the Department's international cybersecurity point of contact, meeting with foreign government counterparts to discuss policy and operational issues, and creating and facilitating opportunities for Department engagement in international cybersecurity activities.

In support of the leadership of NCSD, Outreach and Programs also assists in establishing policies and direction to sustain overall cybersecurity strategy and planning through effective integration of resource and financial management, human capital, facilities, performance management, policy development and implementation, information and personnel security, and strategic planning.

FY 2010 Outreach and Programs Accomplishments:

- Supported public affairs for key outreach events such as the Cyber Storm III, RSA Security Conference, and Government Forum of Incident Response and Security Teams Conference as well as ongoing NCSD speaking and media engagements.

- Planned, coordinated, and executed National Cyber Security Awareness Month key events and managed engagement, and conducted media outreach to promote National Cyber Security Awareness Month and related activities.
- Supported Department of Homeland Security engagement in key State and local outreach opportunities such as the Multi-State Information Sharing and Analysis Center Annual Conference, the National Association of State Chief Information Officers Annual Meeting, the National Governors Association Annual Meeting, the National Association of Counties Annual Meeting, etc.
- Maintained and implemented cybersecurity work streams for bilateral engagement with the United Kingdom through the DHS Joint Contact Group, with Germany through the Department of Homeland Security Cooperation Group, and with Canada through the Emergency Management Consultative Group.
- Advanced collaboration with the Working Group of Key Allies to include implementation of findings from Cyber Storm III, updating of Joint Incident Management Operating Procedures, and addressing secure communications.
- Developed/initiated process improvements to support and improve Division Executive Secretariat document version review and control through integration of improved automated workflow processes, which reduced response times for internal and external inquiries, as well as staffing requirements.
- Developed Executive Secretariat automated workflow/staffing requirements via SharePoint; introduced/tested electronic staffing tools/programs to fully automate and effectively fulfill collective staffing requirements.

FY 2011 Outreach and Programs Planned Accomplishments:

- Support public affairs for key outreach events such as the Cyber Storm III, RSA Security Conference, and Government Forum of Incident Response and Security Teams Conference, as well as ongoing NCSA speaking and media engagements.
- Plan, coordinate, and execute National Cyber Security Awareness Month key events and manage engagement, and conduct media outreach to promote National Cyber Security Awareness Month and related activities.
- Support DHS engagement in key State and local outreach opportunities such as the Multi-State Information Sharing and Analysis Center Annual Conference, the National Association of State Chief Information Officers Annual Meeting, the National Governors Association Annual Meeting, the National Association of Counties Annual Meeting, etc.
- Maintain and implement cybersecurity work streams for bilateral engagement with the United Kingdom through the DHS Joint Contact Group, with Germany through the DHS Cooperation Group, and with Canada through the Emergency Management Consultative Group.
- Advance collaboration with the Working Group of Key Allies to include implementation of findings from Cyber Storm III, updating of Joint Incident Management Operating Procedures, and addressing secure communications.
- Provide timely and effective responses to high-level inquiries from Congress, OMB, Government Accountability Office, and other Federal departments and agencies.

FY 2012 Outreach and Programs Planned Accomplishments:

- Serve on Program Committee and contribute to planning process for Meridian Conference, which brings together senior policy makers to collaborate on critical information infrastructure protection.
- Develop and pilot training materials to conduct training for developing nations.
- Identify protective programs and/or R&D initiatives to mitigate the key risks from the Information Technology Sector Risk Assessment.
- Plan, coordinate, and execute National Cyber Security Awareness Month key events and manage engagement, conduct media outreach to promote National Cyber Security Awareness Month and related activities; and develop materials for National Cyber Security Awareness Month to include communications, letters, tip sheets, posters,
- Continue ongoing partnerships with private sector, and government stakeholders at all levels to improve information-sharing and enhance awareness of cybersecurity issues.

NPPD requests \$56.824 million and 44 FTP/FTE for Priority Telecommunications Services in FY 2012. These funds support the operation of the Government Emergency Telecommunications System, Wireless Priority Service, Special Routing Agreement Service, the Industry-Government and Interagency Processes, and funds for the Assistant Secretary, Cyber Security and Communications.

The FY 2012 request includes the following adjustments-to-base: an additional 3 FTP/FTE as part of the Balanced Workforce initiative in FY 2012; \$0.721 million for non- pay inflation; \$0.051 million for GSA Rent inflation; and a decrease of \$0.721 million to offset non-pay inflation.

Priority Telecommunications Services

Priority Telecommunications Services (PTS) ensure the availability of national security and emergency preparedness communications during National efforts to prevent, respond to, and recover from threatened and actual terrorist attacks, major disasters, and other emergencies, even when conventional communications services are congested or degraded. PTS significantly enhances call completion capabilities of first responders, national leadership, and other national security and emergency preparedness users as a result of the capabilities provided by through the following three PTS programs:

- *Government Emergency Telecommunications Service (GETS)* – A nationwide landline telephone service enabling priority communications for the President, Federal, State, and local governments, and industry organizations by providing priority voice calling via the existing public switched network;
- *Wireless Priority Service (WPS)* – A nationwide wireless telephone service providing end-to-end priority calls via selected commercial wireless carriers, which includes GETS interoperability to enhance the probability of call completion;
- *Special Routing Arrangement Service (SRAS)* – The SRAS is held in classified channels and supports special communication capabilities for unnamed selective users that require special processing of priority calls.
- *Assistant Secretary, CS&C* includes \$0.750 million and 4 FTP/FTE to support the Office of the Assistant Secretary of Cybersecurity and Communications.

Government Industry Planning & Management Branch

The Government Industry Planning & Management Branch supports five main functions:

- Manage the President’s National Security Telecommunications Advisory Committee (NSTAC) under Executive Order 12382;
- Support the Committee of Principals (COP) under Executive Order 12472;
- Manage the Communication Sector under HSPD-7;
- Manage the Network Security Information Exchanges; and
- Serve as the Public Affairs coordinator for the National Communications System.

The Government Industry Planning & Management (GIP&M) Branch interfaces extensively with government and private sector stakeholders and maintains key relationships with representatives from across the Communications Sector, and other critical infrastructure sectors. By building and maintaining relationships across sectors, GIP&M helps ensure that the communication sector has the critical access, credentialing, fuel, and security needed to effectively respond to attacks, accidents, and service impairment. Without this access, the ability to repair, recover, or reconstitute national communications networks would be adversely impacted, increasing the duration and scope of a disruption.

The GIPM Branch acts as a public affairs coordinator and, as such, oversees coordinated strategic communications for the National Communications System. This includes the provision of extensive training on both public-private sector relationship management and NCS strategies for national security emergency preparedness communications.

FY 2010 Priority Telecommunications Services Accomplishments

- Achieved over 90% GETS call completion rate during emergency communications periods.
- Increased total Government Emergency Telecommunications Service cards to 252,822 and increased total Wireless Priority Service users to 113,198.
- Completed the US-Canada WPS Interoperability capability, which provides priority for cross-border roaming for WPS subscribers on GSM technology. This capability was initially tested as part of Exercise GOLD, which demonstrated readiness for the 2010 Winter Olympics in Vancouver.
- Completed Captive Office Testing (lab) on AT&T Mobility and T-Mobile for the Universal Mobile Telecommunications System (UMTS) redirection to Global System for Mobile Communications (GSM) of the Wireless Priority Service. Completed the initial Network Service Acceptance Testing for UMTS redirection to GSM.
- Completed governance documentation and obtained DHS/NPPD approval for a Level III acquisition that will provide the WPS Enhanced Overload Performance (EOP) capability on CDMA technology.
- The Communication Dependency on Electric Power Working Group's 2008 recommendations were addressed by the Telecom Energy Alliance under the Homeland Security Presidential Directive, which authorized plans for eventual implementation;
- Developed the cross sector risk assessments to define communications dependencies, corresponding risk mitigation activities, and recommended follow on activities such as R&D, capabilities' development, and protective programs;
- In accordance with HSPD-7, reported on Critical Infrastructure and Key Resources Tier 1 and Tier 2 critical asset program to identify and prioritize critical infrastructure and key resources within the Communications Sector.

FY 2011 Priority Telecommunications Services Planned Accomplishments

- Achieve over 90% GETS call completion rate during emergency communications periods.
- Complete the remaining Network Service Acceptance Testing for Universal Mobile Telecommunications Service (UMTS) Redirection to Global System for Mobile Communications (GSM).
- Complete the deployment for Universal Mobile Telecommunications Service (UMTS) Redirection to Global System for Mobile Communications (GSM) extending the life of WPS.
- Complete Captive Office Testing for WPS Code Division Multiple Access (CDMA) Enhanced Overload Performance (EOP) capability for achieving General Availability of Alcatel-Lucent software.
- Develop an NCS 24 member Department and Agency database of communications capabilities

FY 2012 Priority Telecommunications Services Planned Accomplishments

- Maintain nationwide coverage for Government Emergency Telecommunications Service while supporting increase to 323,406 GETS users.

- Maintain nationwide coverage for Wireless Priority Service while supporting increase to 119,791 WPS users.
- Complete Captive Office Testing for WPS Code Division Multiple Access (CDMA) Enhance
- Develop and report quarterly Communications Sector Specific Plan implementation metrics to the DHS Office of Infrastructure Protection.
- Develop the cross sector risk assessments to define communications dependencies, corresponding risk mitigation activities, and recommended follow on activities such as R&D, capabilities' development, and protective programs.

The National Communications System's Next Generation Network (NGN) Priority Services program was established to address the ramifications of continuously evolving technology that the communications industry is implementing nationwide to improve services. As this technology evolves, it is imperative that the Federal Government evolve as well, or else it will lose the ability to deliver national security and emergency preparedness voice communications to help the Nation prevent, respond to, and recover from threatened or actual terrorist attacks, major disasters, and other emergencies.

Next Generation Network Priority Services is in place to ensure the Federal Government keeps pace with the communications industry. Traditional national security and emergency preparedness telecommunications services were designed around the legacy circuit-switched infrastructure of the public switched telephone network. Public networks are now merging with packet-switched infrastructures and converging into Next Generation Networks. As this evolution continues, national security and emergency preparedness telecommunications services will be guided by commercial standards and technologies based on packet-switching Internet Protocol based networks. Wireless public networks have also become increasingly vital during national security and emergency preparedness events.

As a result of the NGN Priority Services program, NCS will be able to phase out the current Priority Telecommunications Services program, and its' circuit-based priority features and functions, and transition to Internet Protocol/packet-based networks. This will enable NCS to leverage highly survivable commercially-owned public switched network assets in order to provide a robust and diverse nationwide communications capability and support response and recovery coordination efforts and programs such as Continuity of Operations and Continuity of Government, to ensure that essential Government functions and operations are carried out.

FY 2010 Next Generation Network Accomplishments

- Completed industry Requirements for Wireless and Wireline access technologies.
- AT&T achieved limited operational capability in March 2010, validating the priority solution assumptions for later phases, when GETS/SRAS traffic will be able to travel over Internet Protocol through the AT&T network.
- Completed the analysis of the NGN Priority Services Request for Information in August 2010.
- Verizon completed planning for the implementation of the NGN GETS service in September 2010 with the delivery of the Integrated Plan for Evolution to NGN GETS. NCS and Verizon conducted a preliminary Network Service Design Review in September 2010 thereby affirming Government requirements.
- Completed required DHS NGN Program governance documentation by September 2010.

FY 2011 Next Generation Network Planned Accomplishments

- Modify the Nortel Networks CS2k to provide NGN GETS Voice over Internet protocol priority features. With the general availability of these features, the objective is subsequent deployment of them in Carrier networks.
- Conduct network design demonstrations of priority wireline network equipment features, to include performance metrics and monitoring plan.
- Conduct planning, architecture, and implementation of Next Generation Network priority capabilities in one additional wireline service provider network (Sprint) in support of the Initial Operating Capability milestone.
- Work with industry to develop and implement Next Generation Network security measures, including: survivability enhancements, national security threat mitigation, and user identification management and authentication.
- Provide priority core Voice over Internet Protocol communications capability with AT&T national carrier's core network.

FY 2012 Next Generation Network Planned Accomplishments

- Develop standards for NGN NS/EP Priority continuation. Implement NS/EP NGN Priority Service security features with Core NGN carriers. NCS will have security engineering tasks with each Core VoIP carrier to provide NS/EP enhancements to the carriers' standard security configurations.
- Implement NGN Priority Services Core VoIP for AT&T, Sprint and Verizon. These tasks are multiyear contracts with the three Core VoIP carriers to implement NGN priority services in their network.

- NCS will prototype priority solutions to assist in validating Industry requirements for LTE. Prototype of Wireless VoIP (Cellular Long Term Evolution). Cellular Long Term Evolution (LTE) is the 4th Generation cellular network solution, which most wireless carriers will be following.

Modeling, Analysis and Technology Assessment

Modeling, Analysis and Technology Assessment (MATA) develops models, conducts technical studies, and provides analyses of public communications infrastructures. Its goal is to identify approaches to fulfill national security and emergency preparedness communications objectives and support priority service and Comprehensive National Cyber Initiative programs. Through the use of an extensive industry dataset and software-based commercial and government off the shelf analytic tools, MATA analyzes natural and man-made disruptions on communications infrastructure, conducts vendor independent analyses, and identifies network effectiveness

solutions. MATA also conducts communications technology assessments, such as those required by the Committee on Foreign Investment in the United States (CFIUS) in support of the DHS Office of Policy, and performs studies that quantify the dependence of critical government networks on Internet service provider infrastructure.

National Security and Emergency Preparedness Standards Team

The Standards Team works with national and international industry standards organizations to ensure that evolving communications standards address the technical requirements of national security emergency preparedness communications. The Standards Team performs under Presidential Executive Order 12472 which directs the Office of the Manager National Communications System to take into consideration the development of evolving industry consensus standards with respect to national security emergency preparedness communications. The Standards Team adheres to the policy put forth in OMB Circular A-119 that: "...directs agencies to use voluntary consensus standards in lieu of government-unique standards except where inconsistent with law or otherwise impractical."

The Standards Team focuses on evolutions in the communications industry (such as Next Generation Networks) by working proactively with industry on standards development. These national security and emergency preparedness standards efforts involve a two-pronged approach. The first standards effort is to establish national security and emergency preparedness service requirements within the standards bodies, and the second is to work to develop standards-based technical capabilities to support National Communications System programs and missions.

Team members serve as senior Government advisors and leaders to a variety of international meetings on communications. When requested, the Standards Team takes specific requirements from North Atlantic Treaty Organization and other member organizations and introduces them into the international standards process. In addition, the Standards Team members actively participate in the work of industry groups, such as the Alliance for Telecommunications Industry Solutions, Telecommunications Industry Association, and the International Telecommunications Union.

The Government Emergency Telecommunications Service (GETS), Wireless Priority Service (WPS), Special Routing Arrangement Service (SRAS) and the Telecommunications Service Priority (TSP) are national security and emergency preparedness services based on national and international standards implemented in the public circuit switched network. Service providers are transitioning their network infrastructure to an Internet Protocol based infrastructure which means that the national security emergency preparedness services will also transition. In order for these services to transition and offer, at a minimum, the same level of capabilities available in today's circuit switched network it is necessary to make modifications to Internet Protocol specifications, as well as national and international standards.

Advanced Technologies/Converged Networks

Advanced Technologies/Converged Networks provides a vulnerability assessment of new technologies to Telecommunications and their impact on the infrastructure.

Advanced Technologies/Converged Networks work also includes identification and assessment of the vulnerabilities of satellite communications systems, coordination with commercial vendors in conducting studies on physical vulnerabilities, development of plans to mitigate interference, leadership and coordination efforts across DHS to ensure that satellite capabilities required to prevent, protect, respond to and recover from acts of terrorism, natural disasters, and other emergencies are available when needed.

FY 2010 PSET Accomplishments

- Developed and deployed version 3.4 of the Infrastructure Mapping Tool to continue improving Emergency Support Function #2 operations, which will implement a Zoom to Address tool, a Real-Time Data Loading tool, and a Cyber Data Query tool.
- Provided support to NCSA's activities under the Trusted Internet Connection initiative.
- Modeled and analyzed existing and emerging communications and internet networks to evaluate potential mitigation solutions for achieving national security and emergency preparedness services. Developed a Priority Services Modeling plan in support of the Next Generation Networks priority services testing and Independent Verification and Validation (IV&V).
- Analyzed physical infrastructure diversity, or "last-mile" connectivity, for four NCS member agencies to ensure primary mission essential functions are preserved.
- The Standards Team worked with more than ten national and international telecommunications and Internet forums, councils, groups, and Task Forces to represent the U.S. Government's requirements in providing priority communications services.
- The Advanced Technology Team issued revisions to the National Communications System Manual 3-10-1 "Guidance for Implementing National Communications".
- The Advanced Technology Team provided telecommunications engineering subject matter expertise and consultation on the technical aspects of issues before the United States Committee on Foreign Investment in the United States (CFIUS) and provided expertise in support of cases under review by the DHS Office of Policy.

FY 2011 PSET Planned Accomplishments

- Provide tools for Emergency Support Function #2 operations like hurricanes, earthquakes, and other man-made and natural disasters and modeling and simulations for NGN and PTS to predict success and identify weakness for emergency communications.
- Work with national and international telecommunications and Internet forums, councils, groups, and Task Forces to represent the U.S. Government's requirements in providing priority communications services.
- Provide revisions to the National Communications System Manuals and Directives as required
- Provide telecommunications engineering subject matter expertise and consultation on the technical aspects of issues before the United States Committee on Foreign Investment in the United States (CFIUS) for DHS Office of Policy.

FY 2012 PSET Planned Accomplishments

- Provide both support and tools to Emergency Support Function #2 operations (e.g. hurricanes, earthquakes, and other man-made and natural disasters) and modeling and

simulations for NGN and PTS to predict success, and identify weakness, of emergency communications.

- Work with national and international telecommunications and Internet forums, councils, groups, and Task Forces to represent the U.S. Government’s requirements in providing priority communications services.
- Provide revisions to the National Communications System Manuals and Directives.
- Provide telecommunications engineering subject matter expertise and consultation on the technical aspects of issues before CFIUS for DHS Office of Policy.

The Critical Infrastructure Protection Programs ensure the continued availability of national security and emergency preparedness telecommunications services under all circumstances, including crisis or emergency, attack, recovery, and reconstitution. Critical Infrastructure Protection initiatives include:

- Operation and maintenance of the National Coordinating Center for Communications;

- Telecommunication analyses in support of disaster response exercises, planning, and operations;
- National continuity communications testing, compliance reporting, and scenario-based operations assessments;
- Continuity planning and operational support;
- Training and exercise of communications emergency response personnel;
- Production and maintenance of operational procedures, policies and support tools;
- Management of a structured forum for Government and telecommunication industry collaboration on national security and emergency preparedness telecommunications policies, procedures and issues; and
- Management of the system that provides for the restoration and provisioning of telecommunications circuits that support national security and emergency preparedness.

The Critical Infrastructure Protection Program includes the following Activities: *National Coordinating Center Operations; Critical Infrastructure Protection Operations, Plans, and Policy; Training and Exercises; Network Security Information Exchanges; and Telecommunications Service Priority.*

National Coordinating Center (NCC)

The National Coordinating Center (NCC) Operations is a joint industry-government body that provides a mechanism to respond to national security and emergency preparedness telecommunications incidents. The mission of the NCC is to assist in the initiation, coordination, restoration, and reconstitution of national security and emergency preparedness telecommunications services or facilities under all conditions, crises, or emergencies. The strength of the NCC lies in the trusted relationship between government and industry. This relationship is critical to the NCC in its role as the primary mechanism within the National Communications System for executing Emergency Support Function #2 – Communications under the National Response Framework during an incident.

Through the NCC Watch, NCC provides the operational core of the National Communications System. Co-located with the United States Computer Emergency Readiness Team (US-CERT), the NCC Watch provides 24x7 situational awareness over the health of the telecommunications infrastructure and facilitates the initiation, coordination, restoration, and reconstitution of national security and emergency preparedness telecommunications services or facilities during emergency events. The NCC Watch enhances physical and cyber security of the Nation's critical communications infrastructures by facilitating cooperation, providing real-time situational awareness, enhancing information sharing, and maintaining system-to-system interaction among critical infrastructures and between the Government and the private sector.

The NCC also administers the High Frequency Radio program which provides technical, administrative, operational, and readiness support to four emergency High Frequency radio operational activities: Shared Resources High Frequency Radio Program, NCC High Frequency Radio Program, the NCS Regional Managers High Frequency Radio Program, and the NCS Auxiliary High Frequency Radio Program. These programs support a nationwide radio network of approximately 1,400 high frequency radio stations to form a nationwide emergency message-handling network. It has been vital for ensuring communications between isolated emergency

operations centers during disasters such as Hurricane Katrina. The NCS High Frequency Radio Program supports the NCS mission of executing Emergency Support Function #2 under the National Response Framework and is essential in supporting the NCC mission.

Critical Infrastructure Protection Operations, Plans, and Policy

Continuity of Operations

The goal of Continuity of Operations is to improve the overall readiness, operations, and execution of mission essential functions, including Enduring Constitutional Government, and Continuity of Government operations. It also establishes the framework to ensure all National Communications System staff members are trained to work continuity operations during an all-hazards event or incident. Homeland Security Presidential Directive-20 and the National Continuity Directive-1 require all Executive Branch departments and agencies to have plans in place to continue their mission essential functions at alternate facilities if their primary facilities become uninhabitable for an extended period.

The Continuity of Operations Plan provides guidance for the organization, its leaders, and all assigned staff, should NCS be directed to deploy during a Continuity of Operations event. The Continuity of Operations Plan identifies the mission essential functions of each NCS Branch, the order of succession for leadership, Emergency Relocation Group members and Advance Relocation Team members, mission critical systems, vital records and databases, and required communications for the Relocation Facility.

Operations Analysis

The Operations Analysis (OA) Team provides telecommunication analyses in support of disaster response related exercises, planning, and operations and assessments of national continuity communications through monthly testing, quarterly compliance reporting, and scenario-based mission-focused operations analyses.

During significant disasters or crises, the Operations Analysis activity leads the multi-agency Analysis Response Team (ART) in support of the NCC Manager. In this capacity, the Operations Analysis Team provides rapid assessments of potential impacts and/or actual damage or disruptions of critical telecommunications infrastructures. This activity supports all phases of Emergency Support Function #2 operations – from planning and preparedness, to full recovery of the telecommunications infrastructure.

The Operations Analysis Team works within the telecommunications analysis community to support the development, documentation, implementation, and maintenance of policies, procedures, tools, databases, capabilities, and baseline analyses to enable comprehensive, accurate, and rapid assessments of the communications infrastructure. For example, this activity is developing a series of in-depth regional and metro characterization baselines of the communications infrastructure in high-risk areas (e.g. Washington D.C., Philadelphia, and along the hurricane prone coastal areas). These characterizations are used for planning, exercises, and during actual crises or disaster operations to significantly reduce the time required to assess potential or actual telecommunications infrastructure issues.

This activity also supports the requirements in Homeland Security Presidential Directive-20 to “conduct quarterly and annual assessments of continuity communications capabilities.” To accomplish this, the Operations Analysis Team conducts the monthly Title Globe program continuity testing of departments and agencies specified by the Office of Science and Technology Policy (OSTP). In addition, the Operations Analysis Team conducts quarterly and annual assessments of National Communications System Directive 3-10, *Minimum Requirements for Continuity Communications Capabilities*, compliance on behalf of OSTP.

Training and Exercise Program

The Training and Exercise Program ensures that NCS has a cadre of emergency response personnel prepared to respond across the spectrum of crises and emergencies. These personnel are organized in accordance with the Emergency Support Function #2 Annex of the National Response Framework and are tasked to coordinate the restoration and provisioning of national security and emergency preparedness communications during an incident or disaster. In response to the recommendations of the *Hurricane Katrina After Action Report*, NCS is enhancing its readiness for emergency response operations with an increased tempo of training and exercises for personnel who have Emergency Support Function #2 collateral duties. NCS participates in exercises involving scenarios as varied as continuity of operations, continuity of government, natural disasters, weapons of mass destruction, critical infrastructure protection, and cyber intrusion. The training program will combine distance learning instruction with a periodic conference to provide interaction among the team members.

Network Security Information Exchanges

The Network Security Information Exchanges (NSIE) activity provides technical and administrative support to both the National Security Telecommunications Advisory Committee (NSTAC) and Government Network Security Information Exchanges (NSIE). The NSIE consists of two bodies: the Government Network Security Information Exchange, which represents Federal agencies that have research, standards, regulatory, law enforcement, or intelligence functions related to the public network, or are major telecommunications users, and the President’s NSTAC NSIE which includes representatives from telecommunications service providers, equipment vendors, systems integrators, and major users. Participants on this international forum include representatives from the Canadian and United Kingdom government and telecommunications industry involved in the United Kingdom and Canadian Network Security Information Exchanges. The NSIE forum provides a trusted environment in which industry and government representatives exchange information on threats to and vulnerabilities of the public network. These bodies meet jointly on a bimonthly basis to address major technical and operational issues affecting the security of the public network, such as unauthorized penetration or manipulation of the public network software, databases, and other infrastructures supporting national security and emergency preparedness telecommunications services. The NSIE forums are designed to exchange ideas on technologies and techniques for addressing and mitigating the risks to the public network and its supporting infrastructures.

Telecommunications Service Priority Program

The Telecommunications Service Priority (TSP) program was established by a Federal Communications Commission Report and Order 88-341 in 1988. TSP is the regulatory,

administrative, and operational system authorizing and providing for priority treatment of national security and emergency preparedness telecommunications services. The TSP program provides national security and emergency preparedness users with priority restoration and provisioning of telecommunications services that are vital to maintaining readiness or response to an incident. As a result of hurricanes, floods, earthquakes, and other natural or man-made incidents, telecommunications service vendors may become overwhelmed with requests for new telecommunications services and requirements to restore existing telecommunications services. The TSP Program provides service vendors with a Federal Communications Commission mandate for prioritizing service requests by identifying those services critical to national security and emergency preparedness. A telecommunications service with a TSP assignment is assured of receiving full attention by the service vendor before a non-Telecommunications Service Priority service. The TSP Program has two component priorities, which include restoration and provisioning. A restoration priority is applied to telecommunications services to ensure restoration before any other services. A provisioning priority is obtained to facilitate priority installation of new telecommunications services.

FY 2010 Critical Infrastructure Protection Accomplishments

- Provided Emergency Support Function #2 representatives to participate in the exercise development and conducted the National Level Exercise 2010 in May.
- Provided seven distance learning, teleconference training sessions for the Emergency Support Function #2 team members.
- Planned and conducted the 2010 Emergency Support Function #2 Winter Conference in December.
- Ensured operational readiness through participation in exercises such as CyberStorm, Top Officials, Pinnacle, Forward Challenge, National Response Framework Exercises, and other Continuity of Operations and Continuity of Government readiness events.
- Expanded the National Coordinating Center and Communications Information Sharing and Analysis Center membership to keep pace with developing technologies and new entrants into communications sector.

FY 2011 Critical Infrastructure Protection Planned Accomplishments

- Provide monthly Title Globe continuity communications testing, conduct quarterly multi-agency Continuity of Operations Communications Managers Group meetings, and develop quarterly and annual NCS Directive 3-10 compliance assessment report for Office of Science and Technology Policy.
- Conduct in-depth telecommunications assessment baselines of high risk areas throughout the United States and in support of special events in order to support disaster response operations, planning, and exercises related to critical communications infrastructures.
- Manage the Telecommunications Service Priority requirements that ensure the relevance and accuracy of the restoration priorities that are on the Nation's national security and emergency preparedness circuits. These requirements are the revalidation of current assignments, telecommunications vendor confirmation of new assignments, and reconciliation of data with telecommunications vendors.
- Create new standard operating procedures, continuity of operations plans, and response plans for the Joint Watch mission that has been created due to the operational integration of the NCC 24x7 Watch and the US CERT.

- Ensure operational readiness through weekly network checks; planning and coordination of one annual nationwide Shared Resources (SHARES) high frequency radio exercise.

FY 2012 Critical Infrastructure Protection Planned Accomplishments

- Manage priority and emergency communications programs used during disasters and events.
- Model and analyze communications infrastructures for Federal, State, local, and tribal disaster response and recovery entities and emergency first responders.
- Serve as the Primary component under National Response Framework (NRF) for coordinating Emergency Support Function #2 – Communications.
- Manage the capabilities and capacities for the NCS to COOP (Continuity of Operations) as a Category 1 Agency

FY 2012 Request	62	62	\$ 43,495

NPPD requests \$43.495 million and 62 FTP/FTE in FY 2012 for the Office of Emergency Communications.

The FY 2012 request includes the following adjustments-to-base: an additional 10 FTP/FTE associated with the DHS Balanced Workforce Initiative funded within the requested salary and benefit resources; \$0.502 million for non-pay inflation; \$0.018 million for GSA Rent inflation; a decrease of \$1.000 million to remove one-time costs funded in FY 2010; a decrease of \$0.583 million due to administrative savings; and a decrease of \$0.502 million to offset non-pay inflation.

CURRENT SERVICES PROGRAM DESCRIPTION

Pursuant to Title XVIII of the Homeland Security Act of 2002, as amended, OEC was formally established on April 1, 2007, and charged with supporting and promoting continuing communications for emergency responders and government officials in the event of natural disasters, acts of terrorism, or other man-made disasters, and working to ensure, accelerate, and attain interoperable and operable emergency communications nationwide.

Mandated under the Post-Katrina Management Reform Act of 2006, OEC serves as the coordination point for interoperable communications policies and holds key responsibilities, such

as its leadership role in the development and implementation of the National Emergency Communications Plan (NECP). OEC developed the NECP, the first nationwide strategic plan for enhancing emergency communications, with input from more than 150 stakeholders at all levels of government and the private sector, to address emergency communications challenges and gaps.

Emergency communications encompasses operability, interoperability, and the continuity of communications across a full range of current and future voice, data, and video information exchange capabilities. The Office of Emergency Communications is committed to ensuring that emergency response personnel at all levels of government and across all disciplines can communicate as needed, on demand, and as authorized. To achieve this vision, the Office of Emergency Communications developed six key strategic goals to improve emergency communications and support the goals of DHS.

Goal 1: Foster coordination between Federal, State, local, tribal, and private sector Emergency Communications stakeholders.

Goal 2: Improve emergency communications capabilities through targeted interaction with Federal, State, local, and tribal agencies.

Goal 3: Target Federal grants to the most critical emergency communications needs of States and localities in alignment with the National Emergency Communications Plan.

Goal 4: Develop policies and plans guiding, promoting, and enhancing efforts to improve emergency communications nationwide.

Goal 5: Develop innovative methods to address emergency communications gaps.

Goal 6: Create a unified Office of Emergency Communications Headquarters and regional staff committed to ensuring programmatic success.

The Office of Emergency Communications is a flexible, responsive organization that delivers consistent and effective services in order to meet the needs of its stakeholders. OEC also drives continuous capability improvements that strengthen emergency communications preparedness and response. In support of the OEC mission, vision, and goals, the OEC Office of the Director provides leadership, direction, and oversight for Office of Emergency Communications activities in support of its mission, and serves as the organization's principal advocate before Congress; other Federal, State, local, and tribal agencies; key stakeholders; and the public. The three divisions that report to the OEC Director and carry out OEC's mission and programmatic responsibilities are as follows:

- *Federal Communications Services (FCS)* engages with Federal Departments and Agencies to improve emergency communications capabilities, including policy development, investment planning, and direct assistance;
- *Multi-Jurisdictional Communications Services (MCS)* engages with State, local, and tribal stakeholders to deliver targeted technical assistance and gather stakeholder input on policies, guidance, and initiatives; and
- *Policy, Planning, and Analysis (PPA)* identifies and assesses interoperable emergency communications capabilities and drives Federal grants to meet emergency responders' requirements and needs.

Office of the Director

The OEC Office of the Director provides strategic leadership and oversight guidance, which facilitates the dissemination of Office of Emergency Communication's mission objectives, policies, and programs to the Nation's State, local, and tribal governments; other Departments and Agencies; key stakeholders; and the public.

FY 2010 Office of the Director Accomplishments:

- Implemented a Training Roadmap to ensure all OEC employees develop core skill sets and competencies including communications, leadership, coalition building, and program/project management.
- Implemented Continuity of Operations planning actions to ensure successful integration of OEC Continuity of Operations efforts and CS&C planning efforts.

FY 2011 Office of the Director Planned Accomplishments:

- Align strategic planning and integration activities with Department-wide and interagency Emergency Communications activities.
- Position the Office of Emergency Communications as a focal point of nationwide emergency communications in conjunction with continued strategic outreach efforts.

FY 2012 Office of the Director Planned Accomplishments:

- Enhance the alignment of strategic planning and integration activities with Department-wide and interagency Emergency Communications activities.
- Engage in workforce planning to align resources and core competencies to organizational requirements in conjunction with strategic human capital analysis and planning.

Policy, Planning, and Analysis

Policy, Planning, and Analysis identifies challenges facing the advancement of interoperable emergency communications capabilities and develops policies and strategies to meet these challenges. The core responsibilities of Policy, Planning, and Analysis include:

- Developing national assessments (e.g., National Communications Capabilities Report);
- Leading the implementation of the National Emergency Communications Plan;
- Leading the development of emergency communications grant program guidance (e.g., Interoperable Emergency Communications Grant Program and the SAFECOM Grant Guidance); and
- Engaging in outreach to industry partners.

Additionally, Policy, Planning, and Analysis leverages information collected by the Federal and Multi-Jurisdictional Communications Services programs to provide an integrated national assessment of existing and emerging interoperable emergency communications challenges and vulnerabilities. Policy, Planning, and Analysis also develops Departmental Emergency Communications grant program guidance and works to evaluate progress achieved through these grant programs so as to ensure that Federal assistance is used to address known interoperable emergency communications challenges.

The Office of Emergency Communications will also continue to support the strategy and development of the Public Safety Broadband Network and the Emergency Response Interoperability Center (ERIC). Specifically, the Office of Emergency Communications will conduct key analysis, coordination and stakeholder outreach activities crucial to the effective management, deployment, and long term operations and maintenance of the Network, in collaboration with ERIC.

FY 2010 Policy, Planning, and Analysis Accomplishments:

- In collaboration with the Federal Emergency Management Agency, developed grant guidance for the Interoperable Emergency Communications Grant Program, and other Departmental grant programs for emergency communications, and ensured that grant selection criteria continued to reflect DHS strategic objectives.
- Through phone support, stakeholder outreach, and data analysis, supported all National Emergency Communications Plan goals.
- Submitted the Biennial Progress Report on Emergency Communications to Congress.
- Developed SAFECOM Guidance for Federal Grant Programs in order to establish standardized policy on equipment, planning, and training.
- Provided guidance to States and urban areas on the achievement of targeted benchmarks under National Emergency Communications Plan Goal 1 and evaluated urban areas' performance against the Goal (90% of all high-risk urban areas designated within the Urban Areas Security Initiative are able to demonstrate response-level emergency communications within one hour for routine events involving multiple jurisdictions and agencies).

FY 2011 Policy, Planning, and Analysis Planned Accomplishments:

- Complete a comprehensive assessment of Federal Emergency Communications capabilities for the next iteration of the National Communications Capabilities Report.
- Continue implementing the National Emergency Communications Plan (NECP) and coordinate efforts to implement the planned 2011 Update.
- Complete the National Communications Capabilities Report.
- Develop national report on results of NECP Goal 1 (90% of all high-risk urban areas designated within the Urban Areas Security Initiative are able to demonstrate response-level emergency communications within one hour for routine events involving multiple jurisdictions and agencies).
- Provide guidance to States and urban areas on the achievement of targeted benchmarks under National Emergency Communications Plan Goal 2 (75% of non-Urban Areas Security Initiative jurisdictions are able to demonstrate response-level emergency communications in the event of a significant incident, as outlined in national planning scenarios, within three hours).
- Develop grant guidance and review grant applications in collaboration with the Federal Emergency Management Agency for the Interoperable Emergency Communications Grant Program and other Departmental grant programs for emergency communications, to ensure that grants support strategic objectives.
- Facilitate a grant focus group within the Emergency Communications Preparedness Center for Federal Departments and Agencies that administer emergency

communications grant programs, in order to share best practices and identify lessons learned.

- Prepare Statewide Communication Interoperability Plan and Interoperable Emergency Communications Grant Program reports for Congress, to demonstrate continuing progress achieved by Federal grants and implementation of Statewide Communication Interoperability Plans.
- Develop criteria required to measure progress in achieving Goal 3 of the National Emergency Communications Plan by 2013 (75% of all jurisdictions are able to demonstrate response-level emergency communications in the event of a significant incident, as outlined in national planning scenarios, within three hours).

FY 2012 Policy, Planning, and Analysis Planned Accomplishments:

- Assess and report on results of National Emergency Communications Plan Goal 2 (75% of non-Urban Areas Security Initiative jurisdictions are able to demonstrate response-level emergency communications within one hour for routine events involving multiple jurisdictions and agencies)
- Develop grant guidance and review grant applications in collaboration with the Federal Emergency Management Agency for the Interoperable Emergency Communications Grant Program and other Departmental grant programs for emergency communications, to ensure that grants support strategic objectives.
- Facilitate a grant focus group within the Emergency Communications Preparedness Center for Federal Departments and Agencies that administer emergency communications grant programs, in order to share best practices and identify lessons learned.
- Prepare Statewide Communication Interoperability Plan and Interoperable Emergency Communications Grant Program reports for Congress, to demonstrate continual progress achieved by Federal grants and implementation of Statewide Communication Interoperability Plans.
- Provide guidance to States and local jurisdictions on Goal 3 of the National Emergency Communications Plan (75% of all jurisdictions are able to demonstrate response-level emergency communications in the event of a significant incident, as outlined in national planning scenarios, within three hours).
- Continue the implementation of initiatives in the updated NECP that foster the integration of broadband technologies and data capabilities to address emergency responders' tactical and operational needs.
- Continue to implement Land Mobile Radio initiatives in the NECP update, given that such technologies are likely to remain the primary mode of mission critical communications for the next decade and beyond,
- Develop grant guidance and review grant applications in collaboration with the Federal Emergency Management Agency for the Interoperable Emergency Communications Grant Program and other Departmental grant programs for emergency communications, to support the deployment of the nationwide public safety broadband network.

Multi-Jurisdictional Communications Services

Multi-Jurisdictional Communications Services establishes and administers the Interoperable Communications Technical Assistance Program, support for State-wide planning activities, and the SAFECOM program - OEC's efforts to advance State, local, tribal, and multi-jurisdictional interoperable emergency communications capabilities. Through the Interoperable Communications Technical Assistance Program, OEC develops and delivers training, tools, and on-site assistance to State, tribal and local agencies in order to advance the implementation of the National Emergency Communications Plan and public safety interoperable emergency communications capabilities. Through the SAFECOM program, OEC develops tools, best practices, and methodologies used by emergency response agencies to enhance their interoperability efforts. The stakeholder engagement effort focuses on conducting outreach and consensus building activities with State, local, and tribal government officials and national practitioner organizations to exchange best practices and build consensus for common challenges.

FY 2010 Multi-Jurisdictional Communications Services Planned Accomplishments:

- Provided 134 technical assistance engagements to States and territories to support the implementation of Statewide Communication Interoperability Plans and the alignment of Statewide Communication Interoperability Plans to the NECP.
- Deployed Communications Unit Technician Training to ensure that in the event of a multi-discipline, multi-jurisdictional response event, on-site response practitioners are trained to a similar baseline.
- Convened meetings for the Statewide Interoperability Coordinator Council resulting in strengthened partnerships between and among the Statewide Interoperability Coordinators and the Office of Emergency Communication, a shared understanding of the Office of Emergency Communications' mission, key projects and offerings, and their impact on the SWICs' communications interoperability efforts. The meetings advance State and territory efforts to implement the National Emergency Communication Plan (NECP) and facilitate action planning for NECP Goals 1 and 2 measurements. Additionally, SWIC meetings support the generation of new ideas, sharing of best practices and lessons learned for the maintenance and support of States' Statewide Communications Interoperability Plan.
- Conducted 60 of 60 planned observations to validate Goal 1 of the National Emergency Communications Plan.
- Conducted 50 Statewide Communication Interoperability Plan workshops.
- Hired Regional Coordinators, established roles and responsibilities, and ensured effective administrative support to regional staff and State and local partners. The Regional Coordinators serve in the DHS Regions where they support Federal, State, local and tribal emergency communications activities, in addition to serving as liaisons to and from all of OEC.
- Developed guidance specific to establishing and maintaining a regional coordinator field staff.

FY 2011 Multi-Jurisdictional Communications Services Planned Accomplishments:

- Provide requested technical assistance to States, territories, and localities to support the implementation of Statewide Communication Interoperability Plans, inclusive of planning for wireless broadband.
- Provide Tribes with technical assistance to promote interoperability and enhance emergency communications.
- Provide technical assistance support to the 700 MHz waiver jurisdictions to enhance planning and early development of their wireless broadband networks, which will be the first implementation of the National Public Safety Wireless Broadband Network.
- Support a Wavier Jurisdiction Working Group, comprised primarily of existing and future waiver jurisdiction agency representatives, to enhance information sharing and ensure interoperability and roaming will occur with the implementation of the National Public Safety Wireless Broadband Network.
- Provide targeted assistance, develop guidance documents, and conduct 50 planned workshops to support the implementation of Statewide Communication Interoperability Plans
- Leverage stakeholder groups to support State and territory demonstrations of National Emergency Communications Plan Goal 2 (75 percent of non-Urban Areas Security Initiative jurisdictions are able to demonstrate response-level Emergency Communications within one hour for routine events involving multiple jurisdictions and agencies).
- Continue to build out previous efforts to enhance information sharing by convening meetings for the SAFECOM Executive Committee, SAFECOM Emergency Response Council, and the Statewide Interoperability Coordinator Council to share challenges and solutions and to support OEC’s achievement of National Emergency Communications Plan Goals and Milestones.
- Provide targeted assistance on the completion of the “performance improvement plans,” outlined in the after action report (AAR), to high risk urban areas designated within the Urban Areas Security Initiative that demonstrated low achievement during the demonstration of Goal 1.
- Convene meetings for the Statewide Interoperability Coordinator Council to share challenges and solutions and to support OEC’s achievement of National Emergency Communications Plan performance goals. Build relationships with Federal, State, local and tribal emergency responders and policy makers in the Regions.
- With Regional Coordinators onboard, participate in ESF#2 responses to disasters by supporting NCS efforts to reconstitute commercial telecommunication services and assist FEMA in providing tactical support.

FY 2012 Multi-Jurisdictional Communications Services Planned Accomplishments:

- Provide requested technical assistance to States, territories and localities to support the implementation of Statewide Communication Interoperability Plans, inclusive of planning for wireless broadband.
- Provide Tribes with technical assistance supporting the development and implementation of Tribal Communications Interoperability Plans.
- Provide technical assistance support to the 700 MHz waiver jurisdictions to enhance

- planning and early development of their wireless broadband networks, which will be the first implementation of the National Public Safety Wireless Broadband Network.
- Support a Wavier Jurisdiction Working Group, comprised primarily of existing and future waiver jurisdiction agency representatives, to enhance information sharing and ensure interoperability and roaming will occur with the implementation of the National Public Safety Wireless Broadband Network.
 - Provide targeted assistance, develop guidance documents, and conduct workshops supporting implementation of Statewide Communication Interoperability Plans and leverage stakeholder groups to support the States’ and territories’ demonstration of National Emergency Communications Plan Goal 3 (75 percent of ALL jurisdictions are able to demonstrate response-level Emergency Communications within three hours, in the event of a significant incident as outlined in National Planning scenarios).
 - Continue expanding previous efforts to enhance information sharing by convening meetings for the SAFECOM Executive Committee, SAFECOM Emergency Response Council, and the Statewide Interoperability Coordinator Council to share challenges and solutions, and to support OEC’s achievement of National Emergency Communications Plan Goals and Milestones.
 - Provide targeted assistance to UASI’s and States that demonstrate low achievement during the demonstration of Goals 1 and 2. Provide onsite support to the jurisdictions and assist in completing the “performance improvement plans” outlined in the after action report (AAR).
 - Conduct 50 planned Statewide Communication Interoperability Plan workshops.
 - Convened meetings for the Statewide Interoperability Coordinator Council resulting in strengthened partnerships between and among the Statewide Interoperability Coordinators and OEC, a shared understanding of the OEC mission, key projects and offerings, and their impact on the SWICs’ communications interoperability efforts. The meetings advance State and territory efforts to implement the NECP and facilitate action planning for NECP Goals 1 and 2 measurements. Additionally, SWIC meetings support the generation of new ideas, sharing of best practices and lessons learned for the maintenance and support of States’ Statewide Communications Interoperability Plan.
 - Build relationships with Federal, State, local, and tribal emergency responders and policy makers in the DHS Regions.
 - OEC Regional Coordinators participate in ESF#2 responses to disasters by supporting National Communication System (NCS) efforts to reconstitute commercial telecommunication services and assist FEMA in providing tactical support.

Federal Communications Services

Federal Communications Services (FCS) leads OEC’s efforts to coordinate and align Federal emergency communications programs and initiatives with national goals. Through the Emergency Communications Preparedness Center (ECPC), OEC has established a forum for Federal Departments and Agencies to share information, coordinate communications programs, and connect those efforts with State, local, tribal, and private sector efforts. The ECPC serves as the single interagency focal point for communications coordination efforts and enables OEC to curtail duplication of emergency communications investments and activities among 14 participating Federal Departments and Agencies. At the Department level, OEC established the One DHS Emergency Communications Committee to coordinate emergency communications initiatives and

investments across DHS. Through the development of the Cross Border Security Communications Network and the Border Interoperability Demonstration Project (BIDP), FCS also leads OEC's efforts to demonstrate innovative solutions for improving border region and cross-border interoperability. These collaborative efforts help OEC improve interoperability and maximize the use of limited resources through the identification of sharing opportunities.

FY 2010 Federal Communications Services Accomplishments:

- Formally established the Emergency Communications Preparedness Center to coordinate emergency communications policy across the Federal interagency, including identifying and advocating of the removal of legal barriers to joint infrastructure investment and coordinating common guidance for emergency communications grants.
- Convened the first ECPC Executive Committee and Steering Committee meetings, and established strategic objectives for the ECPC.
- Established the ECPC Clearinghouse to provide users access to a centralized information source, shared calendar, and document library.
- Developed a Memorandum of Understanding (MOU) template and identified infrastructure sharing best practices for use by ECPC participants.
- Established the One DHS Emergency Communications Committee and began development of a Department strategy to ensure access and exchange of mission-critical information across the Homeland Security enterprise.
- Developed recommendations for coordinated grant guidance for use across all Federal grant programs that provide funding for emergency communications.
- Implemented Phase I of the U.S.-Mexico High Level Consultative Commission, Security Communications Task Group (HLCC SCTG) Action Plan. This phase included completing surveys at four of the 10 identified U.S. sites within the Action Plan.

FY 2011 Federal Communications Services Planned Accomplishments:

- Award the Border Interoperability Demonstration Project (BIDP) grants in coordination with the DHS Grants and Financial Assistance Division (GFAD).
- Continue coordinating interdepartmental efforts driving implementation of the ECPC's strategic objectives, including development of capability mapping products.
- Complete development of One DHS Emergency Communications Strategy and initiate the strategy's action plans to improve emergency communications-related governance and acquisition.
- Implement coordinated grant guidance for use across all Federal grant programs that provide funding for emergency communications.
- Complete Phase II of the U.S.-Mexico HLCC SCTG Action Plan. Phase II includes completing system implementation of two additional sites and completion of Customs and Border Protection (CBP) Operations/Dispatch Center upgrades. Collect best practices and lessons learned from the initial phase.
- Monitor BIDP project implementation and conduct technical assistance.
- Document Federal and Secondary User Requirements for broadband, including key minimum network characteristics for broadband (e.g., availability, reliability, security) and DHS mission needs for broadband, to ensure a national broadband network supports Federal mission needs.

FY 2012 Federal Communications Services Planned Accomplishments:

- Complete implementation of the U.S.-Mexico HLCC SCTG Action Plan, and turn over the ownership and maintenance of cross border communications systems to CBP.
- Expand Clearinghouse capabilities and user base to support Federal, State, local, and tribal stakeholders nationwide.
- Align One DHS Emergency Communications Strategy actions, including consolidation of emergency communications investments across the Department and integration of capabilities.
- Continue to monitor BIDP project implementation, conduct technical assistance, and facilitate sharing lessons learned based on the demonstration projects.
- Continue to document Federal and Secondary User Requirements for broadband to ensure a national broadband network supports Federal mission needs.

IV. Program Justification Changes

**Department of Homeland Security
National Protection and Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes
(Dollars in Thousands)**

Program Change #1: Infrastructure Protection Salaries and Benefits
PPA: Identification and Analysis, Coordination and Information
 Sharing, Mitigation Programs
Program Increase: FTP (40) FTE (40) Dollars (\$5,695,000)

	FY 2010 Actual			FY2011 Continuing Resolution			FY2012 Request		
	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)
Current Services Level (Infrastructure Protection)							734	688	\$319,140
Salaries and Benefits Decrease (Identification and Analysis)							(8)	(8)	(\$1,138)
Salaries and Benefits Decrease (Coordination and Information Sharing)							(6)	(6)	(\$855)
Salaries and Benefits Decrease (Mitigation Programs)							(26)	(26)	(\$3,702)
Total Program Decrease							(40)	(40)	(\$5,695)
Infrastructure Protection TOTAL	510	485	\$318,604	725	668	\$347,303	654	608	\$307,750*

*Note: Before remaining program changes

Description of Item

IP proposes a reduction to salaries and benefits, representing the approximate number of vacancies typical for the organization, in order to fund a required increase in facilities (program change #2)

Justification

In FY 2012, Infrastructure Protection is expecting a 90 percent fill rate; thus, it is requesting that the savings from the 10 percent reduction in positions and FTE be applied to facility costs including conference rooms, mailrooms, copier rooms, break rooms, multiple offices, reception areas, and security guards for six separate locations.

Impact on Performance

There should be minimal impact to performance, as this reduction simply adjusts the IP personnel level to reflect the historical actual fill rate of 90%.

**Department of Homeland Security
National Protection and Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**
(Dollars in Thousands)

Program Change #2: Infrastructure Protection Facilities
PPA: Coordination and Information Sharing
Program Increase: FTP 0 FTE 0 Dollars \$5,695,000

	FY 2010 Actual			FY2011 Continuing Resolution			FY 2012 Request		
	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)
Current Services Level (Coordination and Information Sharing)									\$42,658*
Program Increase									\$5,695
Coordination and Information Sharing TOTAL	79	68	\$58,651	89	89	\$59,582	89	86	\$48,353

*Note: Adjusted for program change #1: IP Facilities

Description of Item

IP is currently housed in six buildings and will require additional facilities cost to move and build out new, consolidated space. This increase is fully offset by a reduction in salaries and benefits cost (program change #1).

Justification

IP requires this program change to meet facility costs that have grown with expansion from four buildings in FY 2010 to six buildings in early FY 2011 (e.g., rent increases to include conference rooms, mailrooms, copier rooms, break rooms, multiple offices, reception areas, and security guards for six separate locations). Additionally, IP has incurred greater costs for facilities than had been previously estimated due to the expansion to new facilities combined with costs associated with GSA rent increases, sub-meter electric costs, Federal Protective Service Guard Services, building escort services, and COOP emergency space.

Currently employing 774 personnel (315 federal employees/FTP and 459 contractors) in the National Capital Region (NCR), IP will grow to 1,316 personnel in the NCR by FY 2015. By the end of FY 2010 and early FY 2011, IP will be housed in parts of six buildings located in Northern Virginia and the District of Columbia:

- Nebraska Avenue Complex (NAC), Northwest Washington, DC – Building 1, Building 17, Building 20;
- 2451 Crystal Drive, Crystal City area of Arlington County, VA – total 188 seats;
- 1421 Jefferson Davis Highway, Crystal City area of Arlington County, VA – total 204 seats; and
- 1310 North Courthouse Road, Courthouse area of Arlington County, VA – approximately 300 seats.

Impact on Performance

Properly allocating funding for IP facility costs will prevent the dilemma of choosing program decrements as offsets for growing costs that could potentially impact mission performance.

**Department of Homeland Security
National Protection and Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**
(Dollars in Thousands)

Program Change #3: Infrastructure Security Specialists (PSA Project)
PPA: Mitigation Programs
Program Increase: FTP 15 FTE 8 Dollars \$2,300,000

	FY 2010 Actual			FY2011 Continuing Resolution			FY 2012 Request		
	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)
Current Services Level (Mitigation Programs)							511	473	\$187,678
Program Increase							15	8	\$2,300
Mitigation Programs TOTAL	358	344	\$172,056	506	469	\$197,111	526	481	\$189,978

*Note: Adjusted for program change #1: Facilities, and #5: ISC

Description of Item

This request adds Infrastructure Security Specialists, through the Protective Security Advisor Project, to work in State and Local Fusion Centers and bring critical infrastructure protection subject matter expertise to the Fusion Centers to fill this mission gap. Infrastructure Security Specialists will be assigned to Fusion Centers located in Los Angeles, CA; Miami, FL; Atlanta, GA; Chicago, IL (2); West Trenton, NJ; New York City, NY; Houston, TX; Seattle, WA; Baltimore, MD; Detroit, MI; Columbus, OH; Philadelphia, PA; Richmond, VA; and Washington, DC. This requirement will be offset by a corresponding decrease to the Infrastructure Sector Analysis Project.

Justification

In coordination with regionally deployed Protective Security Advisors and public and private sector security officers, the Infrastructure Security Specialists will develop State and regional critical infrastructure risk management and resiliency plans and work to ensure that national-level critical infrastructure strategic analysis and decision-making. Using analytical techniques and the IP suite of critical infrastructure management and analysis tools the Infrastructure Security Specialists will examine critical infrastructure risks with threat information to provide Federal, State, local, Territorial, and Tribal leadership with timely and actionable critical infrastructure protection information products.

At the present time, fusion centers receive intelligence and threat information from a number of sources, but they lack the linkage to private sector owner/operators and security directors as well as the expertise to map threat against infrastructure (vulnerabilities and consequence). By examining vulnerabilities, identified through various Buffer Zone Plans (BZPPs), Site Assistance Visits (SAVs) and Computer Based Assessment Tool (CBAT) video captures, and Enhanced Critical Infrastructure Protection (ECIP) surveys, the Infrastructure Security Specialists will be able to highlight specific CI vulnerabilities that could be targeted given the current threat analysis.

Impact on Performance

With the full requested resources, Protective Security Advisor Project will be able to implement the following activities and capabilities in FY 2012:

Additionally, positioning Infrastructure Security Specialists in the fusion centers will enable them to gather regional threat information and apply it to identified critical infrastructure vulnerabilities and relevant consequence information for the facility or local area. DHS has been working with the federal interagency to ensure that each of the recognized fusion centers have the capacity to carry out specific critical operational activities including the ability to “assess the local implications of threat information through the use of a formal risk assessment process,” and to be able to gather and disseminate threat-related and other information with the private sector and in particular with the owners, operators and security personnel within those locations representing the Nation’s critical infrastructure and/or key resources. Establishing a national integrated network of state and major urban area fusion centers that operate at the baseline level of capability described above is an Administration homeland security priority.

Specifically, in support of private sector owners and operators, State, local, tribal, and territorial partners, IP seeks to enable fusion centers with the following capabilities:

- Examination of vulnerabilities, identified through various IP assessments, to highlight specific CI vulnerabilities that could be targeted given the current threat analysis.
- Regional threat information collection and application to identified critical infrastructure vulnerabilities and relevant consequence information for the facility or local area.
- Comprehensive analysis of known critical infrastructure vulnerabilities, the real-time threat and the best practices for securing critical infrastructure assets.
- Coordination with regionally deployed DHS Intelligence personnel, Protective Security Advisors and public and private sector security officers.

Infrastructure Security Specialists will be available to integrate analyses, identified vulnerabilities, and interdependencies with intelligence to provide tactical level products. Further, in alignment with the Fusion Center Guidelines released in 2005 highlighting the private sector as an important component in the success of State and Local Fusion Centers, Infrastructure Security Specialists will be available to enhance the relationships that Protective Security Advisors have established by adding an intelligence based infrastructure analysis component to the existing Protective Security Advisor field deployed physical security expertise.

**Department of Homeland Security
National Protection and Programs Directorate
Infrastructure Protection and Information Security
Justification of Program Changes**
(Dollars in Thousands)

Program Change #4: Infrastructure Sector Analysis
PPA: Identification and Analysis
Program Increase: FTP 0 FTE 0 Dollars (\$2,300,000)

	FY 2010 Actual			FY2011 Continuing Resolution			FY 2012 Request		
	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)
Current Services Level (Identification and Analysis)							134	129	\$86,248*
Program Decrease									(\$2,300)
Identification and Analysis TOTAL	73	73	\$87,897	130	130	\$90,610	134	129	\$83,948

*Note: Adjusted for program change #1: IP Facilities, plus \$138k from part of #13: Acquisition Workforce

Description of Item

This is a decrease to Homeland Infrastructure Threat and Risk Analysis Center (HITRAC) to serve as an offset for the preceding program increase to the Protective Security Advisor project.

Justification

A decrease of \$2.300 million is proposed in FY 2012. This decrease will reduce the funding for HITRAC. HITRAC analyzes and monitors risk to the Nation’s infrastructure. HITRAC’s analytic capabilities provide DHS and its security partners with an understanding of threats, vulnerabilities, and potential consequences of natural and manmade hazards to CIKR as well as the capability to evaluate risk management strategies.

Impact on Performance

Reducing HITRAC funding will limit the volume of analysis and intelligence fusion capacity which may potentially affect critical information sharing with DHS security partners.

*Note: Adjusted for program change #1: IP Facilities and #3: PSAs

Description of Item

NPPD requests an increase of \$3.000 million and 5 FTP/3 FTE is proposed in FY 2012 to support the requirement within Executive Order 12977 to establish a body dedicated to the protection of civilian Federal facilities in the United States. The Interagency Security Committee Program Management Office leads a group of senior executives from Federal agencies and departments in the development of standards, policies, and best practices that are utilized by Federal security managers with the responsibility to protect and secure non-military government infrastructure.

Justification

The Interagency Security Committee has reassessed and revised its priorities, and new subcommittees and working groups have been established to create updated standards and countermeasures suited to today’s fluid risk environment. In addition, this capability also allows the Interagency Security Committee to increase its engagement with private industry and other stakeholders to more broadly share best practices on contemporary threats, risk assessment, and technologies. While the Interagency Security Committee has seen a recent increase in member participation, it is essential that the renewed momentum for Federal facility security efforts be supported through appropriate funding to better ensure that there is no recurrence of the tragic events of Oklahoma City.

The creation, implementation, and maintenance of Interagency Security Committee standards are essential to mitigating the security risk associated with approximately 1.1 million Federally owned and leased assets nationwide. Replacement cost for these assets is estimated at more than \$1.5 trillion.⁴ Since its inception in 1995, the Interagency Security Committee has suffered from a flawed funding model based on member donations. Interagency Security Committee initiatives funded by member agencies were often based on the needs of the funding Department, not on the security needs of the overarching Federal community. Permanent, centralized, funding from the Interagency Security Committee’s lead agency (DHS) demonstrates a clear commitment to

⁴ FY2007 Federal Real Property Report, Federal Real Property Council, GSA Office of Government-wide Policy

improved security for Federal facilities, and ensures that created standards are true “interagency” products that fit the needs of the broad Federal facilities community.

These standards define how the Federal government is protected. The ISC is in final stages of the implementation of Physical Security Criteria that defines physical protection of over a million facilities within the United States. The ISC is close to release of two new major standards; Minimum Armed Contract Guard Standards and Standards for the Operation of Facility Security Committees. Minimum Armed Contract Guard Standards developed by the ISC will standardize armed guard qualifications across the entire Federal government. The Standards for the Operation of Facility Security Committees will create first ever guide lines on how Facility Security Committees will operate. There are an additional five products underway. Each of these standards and best practices require major implementation support and training.

This capability enables the Interagency Security Committee to effectively fulfill its mission by offering security standards that meet the complex and dynamic needs of the entire Federal community. In addition, this capability also allows the Interagency Security Committee to increase its engagement with private industry and other stakeholders to more broadly share best practices on contemporary threats, risk assessment, and technologies.

Impact on Performance

The requested resources will enable the Interagency Security Committee to develop a broad range of security standards and initiatives related to, for example, Federally owned buildings, leased buildings, security contractor training needs, common performance measures, facility security level determinations, workplace violence, security certification, centralization of Federal facility security data, information sharing, emerging threats, and new technologies. Taken separately each of these initiatives will meaningfully contribute to the overall security of Federal facilities and the Federal workforce, and taken as a whole they represent a comprehensive security program that can significantly impact the security and well-being of the Nation. As these standards and initiatives are developed and implemented, each will be continuously evaluated for its effectiveness in strengthening Federal facility security.

Without this capability, the long-term development and improvement of comprehensive security standards and best practices will be severely and negatively impacted for all non-military Federal facilities.

**Justification of Program Changes
 (Dollars in Thousands)**

Program Change #6: US-CERT Operations
 PPA: US-CERT
 Program Increase: FTP _____ FTE _____ Dollars \$4,689,000

	FY 2010 Actual			FY2011 Continuing Resolution			FY 2012 Request		
	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)
Current Services Level							150	142	\$77,425*
Program Increase									\$4,689
US-CERT Operations TOTAL	98	71	\$83,892	98	71	\$83,892	150	142	\$82,114

* Includes program change #10: US-CERT Mission Integration, as that initiative falls within US-CERT Operations.

Description of Item and Justification

US-CERT will expand capabilities in the areas of cyber analytics, including malware analysis, cybersecurity indications and warnings, collaboration and coordination, and cyber incident response by beginning to increase its ability to process up to ten percent more security data and incident alerts than at present, and continue to perform all of its critical functions 24x7x365.

US-CERT will achieve full operational capability of a new malware analysis facility and tools capabilities during FY 2012. These enhancements, in addition to establishing a new research network, will increase US-CERT’s ability to process, analyze and produce mitigation information on malware threats.

Additionally, US-CERT will employ sensor, analytic and information sharing components of the National Cyber Protection System (NCPS) Blocks 2.0, 2.1, and 2.2 (Einstein 2 sensors and related tools) to substantially increase security awareness, and indications and warning capabilities across the Federal government. These capabilities include a threat indicators data base that can be shared with constituents; a data base that supports full-packet capture analysis; and an enhanced analytical data base that allows for improved correlation and fusion. NCPS will also support an enhanced production component which will promulgate increasingly timely and relevant threat, vulnerability, and mitigation information to the critical infrastructure, State and local governments, and other US-CERT constituents. As NCPS develops and provides Block 3.0 capabilities, US-CERT will leverage the new insights gained by a deployed intrusion prevention system with Einstein 2 (intrusion detection system) and Einstein 1 (netflow sensors) to substantially increase its ability to identify emerging threats and capture significant trends across the cyber environment. By the end of FY 2012, US-CERT will develop an initial operating capability to integrate Block 3.0 capabilities into its shared situational awareness and incident response frameworks.

FY 2012 funding will support US-CERT efforts increase its remote and on-site technical assistance capabilities by approximately 50%. These efforts include establishing responsive and equipped technical teams to constituent locations in order to provide assistance in identifying and classifying unknown network activity and developing mitigation. Additionally, US-CERT's abilities to partner with Federal and critical infrastructure will increase through liaisons and other information sharing mechanism. US-CERT will be able to expand its operational relationships with established Information Sharing and Analysis Centers (ISAC), particularly the Multi-State ISAC, which is growing to provide more security services to State governments. Expanded presence in constituent sectors, combined with the capabilities provided by NCPS will significantly increase indications and warnings capabilities and alert dissemination.

US-CERT will increase its work force by at least 30 percent which will support increases in US-CERT's ability to analyze raw data, and produce more timely and relevant reports to all of its constituents in order to reduce the impact of cyber threats and vulnerabilities across the Nation's information infrastructure. US-CERT will also support the professional development of its analytic workforce by expanding its technical mentoring program to provide training in network monitoring, using new analytic tools, and malware and digital media analysis. Additionally, expanding the US-CERT's workforce will support incident response activities by increasing the Federal presence on US-CERT's 24x7 operations floor.

Specifically, with increased funding in FY12, US-CERT seeks to do the following:

- Enhance the Malware lab infrastructure, which will increase US-CERT's ability to process, analyze, and produce malware related mitigation information in house, reducing US-CERT's dependency on subcontractors to provide third party malware support services on current threats (approximately \$1.000 million).
- Expand the unattributable research network, which will allow government analysts the ability to research advanced threats to government networks, without having DHS, or Federal government attribution to our research activities. In addition, this will also allow US-CERT to provide this as a service to departments and agencies, reducing the potential of inadvertent equities compromises by other departments and agencies (approximately \$0.600 million).
- Augment US-CERT's capability to provide tactical response support for onsite engagements. The enhancements include the capability to deploy stand alone analytical environments to provide self contained analysis environments capable of leveraging classified indicators in pursuit of Nation-state intrusions in to private sector companies. In addition, US-CERT will expand the capability of the NCPS infrastructure to accommodate, segmented, secure remote analysis capabilities for corporations requesting technical assistance in analyzing intrusion data. This will be done in a modularized and scalable architecture that can support multiple engagements at once, while maximizing analytical expertise of US-CERT's SME's without requiring on site deployments (approximately \$0.700 million).

- Increase US-CERT's analytical infrastructure (i.e. databases, analytical and presentation programs) to fuse disparate commercial data feeds with information gathered within Einstein and the NCPS, and provide more customized products and services to US-CERT's constituents in an automated fashion. This includes the cross correlation of data from NCPS infrastructure with information acquired from commercial security vendors to increase overall situational awareness of the networks being monitored by Einstein (approximately \$2.389 million).

Impact on Performance

As US-CERT's protection and response responsibilities continue to grow, it must address the increasingly complex requirements necessary to build and enable the capabilities to respond to, mitigate, and prevent malicious cyber activities. Additionally, US-CERT's situational awareness across the cyber landscape must increase in order to adapt to new threats and vulnerabilities. With its current capabilities, US-CERT monitors a small proportion of the network traffic within the Federal Executive Branch and has limited visibility on the cyber health of the critical infrastructure. The NCPS enhancements, and the integration of those enhancements into a coherent and integrated cybersecurity operation are vital to handling the increasingly large volume of network traffic US-CERT will be required to manage, which is expected to increase at least five-fold (the estimated traffic currently monitored is around six percent of the total amount of traffic, and the "total amount" is also expected to increase). Currently, US-CERT is not sufficiently staffed during FY 2012 to process all this critical network traffic or to expand its incident response and technical support requirements. Additionally, as information sharing technology and subsequent protocols are established, US-CERT's ability to process additional reports and share information with vital customers must also increase.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security**

Justification of Program Changes
(Dollars in Thousands)

Program Change #7: US-CERT Cyber Mission Integration
PPA: US-CERT
Program Increase: FTP 15 FTE 8 Dollars \$1,253,000

	FY 2010 Actual			FY2011 Continuing Resolution			FY 2012 Request		
	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)
Current Services Level									\$0
Program Increase							15	8	\$1,253
US-CERT Cyber Mission Integration TOTAL	0	0	\$0	0	0	\$0	15	8	\$1,253

Description of Item

This request would allow NPPD to assign dedicated “Mission Integrators” to staff DHS’ Ft. Meade cybersecurity coordination element as established by the joint DHS/DOD MOA signed during October 2010.

Justification

While DHS and DOD have complementary responsibilities for security cyberspace, it is critical that DHS and DOD work together to ensure best practices and technology is used for the military and civilian domains. A DHS/DOD MOA has facilitated operational and technology development coordination and communications processes by which DHS and DOD will work together to protect the Nation’s cyber networks and critical infrastructure by leveraging their capabilities and distinct authorities. This request provides funds to acquire DHS Cyber Mission Integration (CMI) analysts to serve on the DHS component of the DHS/DOD Joint Coordination Element (JCE). DHS’s “Mission Integrators” will represent DHS in the planning of joint cyber operations and provide an information sharing conduit back to subject matter experts within US-CERT and the DHS National Cybersecurity and Communications Integration Center (NCCIC). Mission Integrators include cybersecurity analysts and planners, who will ensure that DHS equities are addressed during operational planning as well as during the planning and implementation of technology development programs in concert with DOD partners. This agreement also embeds DOD cyber analysts within DHS in a reciprocal effort to leverage threat and vulnerability knowledge and experience to directly support US-CERT’s technical analysis of persistent threats to Federal departments and agencies and critical infrastructure. DOD analysts will be fully embedded in US-CERT’s analytic staff (and be subject to the same rules and restrictions as DHS personnel). Additionally, DOD personnel will support the implementation of the National Cyber Incident Response Plan (NCIRP) through the NCCIC. Under the MOA, DHS will be placing a senior executive staff member as well as 15 cyber mission integrators on-site at the DOD’s Joint Coordination Element at Fort Meade. The role of both DOD and DHS cyber mission integrators will be to synergize and enable the government’s full authorities,

capabilities and expertise to help protect the Nation's vital cyber networks while adhering to U.S. laws and regulations.

Impact on Performance

FY 2012 funding supports full implementation of the mutual support elements described in the October 2010 DHS/DOD MOA. These support elements are intended to improve the efficiency and effectiveness of the mutually beneficial relationships between DHS and DOD, including developing requirements for enhanced security technology; coordinated requests for products and services; technical assistance; operational collaboration; and overall coordination related to understanding and responding to cyber threats across DHS' cybersecurity mission space.

While these actions are critical to improving the nation's cybersecurity posture, DHS and DOD are committed to respecting privacy and civil liberties. Special attention is given – and will be given – to ensure privacy impact statements are conducted on programs and privacy and civil liberties oversight personnel are involved with the program throughout its life cycle.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security**

**Justification of Program Changes
(Dollars in Thousands)**

Program Change #8: Federal Network Security Compliance and Enterprise Performance
 PPA: US-CERT
 Program Increase: FTP 11 FTE 6 Dollars \$21,569,000

	FY 2010 Actual			FY2011 Continuing Resolution			FY 2012 Request		
	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)
Current Services Level							42	36	\$19,354*
Program Increase							11	6	\$21,569
Federal Network Security TOTAL	8	5	\$9,518	8	5	\$9,518	53	42	\$40,923

* Includes program change #9: Micro-Agency Support, as that initiative falls within Federal Network Security.

Description of Item

This request will allow Federal Network Security to expand efforts to objectively measure department and agency cybersecurity postures. It will expand Cybersecurity Compliance Validations (CCVs, blue teaming) and implement the Risk and Vulnerability Assessments (RVAs, red teaming) efforts.

Justification

These red/blue team efforts are critical to objectively, accurately, and consistently measuring the cybersecurity posture across the Federal Executive Branch and providing immediate feedback and guidance regarding agency-specific mitigation recommendations. Specifically, Federal Network Security will utilize the additional resources to enhance existing services and add new capabilities to:

- Conduct 14 additional CCV assessments for a total of 33 (approximately 2 FTP, \$3.706 million);
- Compose quarterly instead of annual network maps of the Federal Civilian Executive branch of governments cyber-perimeter (approximately \$2.200 million);
- Conduct 33 additional RVA assessments for a total of 33 (approximately 4 FTP, \$10.311 million);
- Provide surge capacity to assist NCSO with up to 12⁵ post-incident response strategic remediation activities utilizing CCV and RVA surge capacity (approximately 2 FTP, \$0.306 million);
- Conduct annual external vulnerability scans of the CFO Act agencies, building off of RVA capability (approximately \$0.100 million);

⁵ This assumes one engagement per month of up to 30 days.

- Produce annual, enterprise-level reports and whitepapers detailing the Federal government’s cybersecurity posture, information security trends and challenges, targeted at policymakers and agency stakeholders to facilitate the development of sound security and risk mitigation strategies based on all NCSD data-sets such as US-CERT incident data, NCPS data, FNS assessment data, FISMA submissions, and other available data sets (approximately 2 FTP, \$1.106 million);
- Track Federal civilian agency status implementing vulnerability mitigation directives issued by US-CERT/OMB and providing tactical awareness of the cyber health of the Federal Civilian Executive Branch of government (approximately 1FTP, \$0.184 million).

Federal Network Security will mature its ability to evolve and promote/influence additional policies, establishing requirements for the implementation and maintenance of required solutions and capabilities across Federal Executive Branch departments and agencies. Policies may take the form of DHS mandates and/or Federal Information Security Management Act (FISMA)-related policies and guidance. It will provide operational support for Federal Executive Civilian Branch departments and agencies to ensure/measure compliance with the Federal Information Security Management Act and guidance outlined in OMB M-10-15 and M-10-28. In addition to providing operational support, the Program will continue to work with cybersecurity partners to improve the quality of security measures under FISMA and advance the overall security posture of the Federal civilian enterprise.

As part of this effort, Federal Network Security will oversee the government-wide and agency-specific implementation of and reporting on cybersecurity policies and guidance, oversee Federal department and agency compliance with FISMA and assist in the development of the FISMA annual report to Congress, oversee and assist government-wide and agency-specific efforts to make adequate, risk-based and cost-effective cybersecurity investments, and collaborate with other DHS and Federal government bodies to assess and review agencies’ cybersecurity programs.

- Baseline (government-wide) Federal cybersecurity posture and conduct annual Federal CIO interviews (approximately \$0.820 million)
 - Validate agency data feed
 - Collect quarterly data via CyberScope; development of Federal Cybersecurity
 - Develop Federal Baseline Capabilities Roadmap (FCBCR) quarterly measures analysis
 - Develop and collection of quarterly FCBCR and FISMA metrics
 - Assess annual CIO interviews
 - Conduct pre-interview stakeholder analysis
 - Develop annual interview materials
 - Conduct annual CIO interviews
 - Assess annual CIO interviews
- Provide customer support on FISMA and analyze Federal Enterprise FISMA adherence (approximately \$1.537 million);
 - Establish and socialize processes supporting annual reporting
 - Develop a customer support line/help desk function

- Instantiate a customer recognition program (i.e. FISMA Cup)
 - Design and document the analysis process and identify appropriate skill sets
 - Conduct quarterly summary and individual agency performance analysis
 - Draft the Annual FISMA Report for OMB to Congress
 - Utilize FISMA metrics and other applicable data points to annually review agency security programs
 - Update Government-wide cybersecurity posture baseline
- Baseline capabilities of the Federal Cybersecurity Roadmap and advance FISMA performance metrics (approximately \$1.300 million);
 - Analyze agency annual implementation maturity
 - Maintain the FCBCR and accompanying maturity model for use across the federal enterprise
 - Validate FY capability areas
 - Develop guidance packages for agency use and integration with CyberScope
 - Collaborate with stakeholders to develop future FISMA and IG metrics that are outcome-driven and performance-focused
 - Ensure alignment with applicable mandate, policy, and legislation

Impact on Performance

Federal Network Security will objectively and quantifiably measure the current state of cybersecurity preparedness and operational cybersecurity risks present across the Federal Executive Branch, which will result in a holistic, enterprise view of the Federal Government’s current security posture. Federal Network Security will also improve cybersecurity efficiencies by working with agencies to prioritize remediation activities based on their identified risks and providing enterprise services to the federal civilian executive branch agencies enabling through agency reallocation of resources to “mission critical” activities/operations, resulting in Federal enterprise-wide information security improvements.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security**

Justification of Program Changes
(Dollars in Thousands)

Program Change #9: Federal Network Security Micro-Agency Support
PPA: US-CERT
Program Increase: FTP 5 FTE 3 Dollars \$700,000

	FY 2010 Actual			FY2011 Continuing Resolution			FY 2012 Request		
	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)
Current Services Level									\$0
Program Increase							5	3	\$700
FNS Micro-Agency Support TOTAL	0	0	\$0	0	0	\$0	5	3	\$700

Description of Item

With this request, Federal Network Security will expand support to small- and micro-departments and agencies, as the Federal Enterprise is only as secure as its weakest link.

Justification

Due to their small size, micro-agencies (i.e. agencies with less than 125 staff) often do not have full-time IT security staff or expertise to complete strategic cybersecurity initiatives. This will be a shared cadre of specialists (2 IT security specialists, 2 acquisition specialists, and 1 program manager), which will work with the smallest agencies on strategic cybersecurity initiatives.

Support will include assistance with development of appropriate policies, preparation of technical solutions to satisfy mandates or directives, validation that solutions meet specific agency mission requirements, and coordination with budget planners for each organization. Support will not include day-to-day IT operations.

- Improve micro-agency responses to technical portions of cybersecurity Plans of Actions and Milestones, annual FISMA reporting, and ad-hoc data calls (approximately 1.5 FTP, \$0.210 million);
- Develop shared statements of work for micro-agency procurement use including DNSSEC (M-08-23), Protection of Agency Sensitive Information (M-06-16), Implementation of HSPD-12 (M-05-24), Trusted Internet Connections (M08-05) and other cybersecurity initiatives (approximately 1.5 FTP, \$0.210 million);
- Develop micro-agency specific security and risk mitigation strategies (approximately 2 FTP, \$0.280 million);

By providing centralized subject matter experts, it will improve the efficiency and effectiveness of implementing cybersecurity strategies in micro-agencies.

Impact on Performance

Federal Network Security will substantially improve the information security posture across the Federal enterprise through the development of integrated reference architectures and the establishment and development of cybersecurity account managers for small- and micro-departments and agencies for Federal Cybersecurity Baseline Capabilities Roadmap Categories.

Performance improvements include an increased number of agencies completing cybersecurity strategy Plans of Actions & Milestones, implementing cybersecurity procurements, and participating in government-wide cybersecurity programs. This will improve overall Federal network security posture by raising the cybersecurity level of micro-agencies.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security**

Justification of Program Changes
(Dollars in Thousands)

Program Change #10: Network Security Deployment
PPA: US-CERT
Program Increase: FTP _____ FTE _____ Dollars \$56,623,000

	FY 2010 Actual			FY2011 Continuing Resolution			FY 2012 Request		
	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)
Current Services Level							73	72	\$176,979*
Program Increase									\$56,623
Network Security Deployment TOTAL	32	22	\$193,668	32	22	\$193,668	73	72	\$233,602

*Note: Adjusted for program change #13: Acquisition Workforce

Description of Item

Network Security Deployment is responsible for the design, development, acquisition, deployment, and operations and maintenance required to implement the National Cybersecurity Protection System, operationally known as EINSTEIN. NCPS is an integrated intrusion detection/prevention system that encompasses the hardware, software, and other components procured specifically to support the Department’s responsibilities within the Comprehensive National Cybersecurity Initiative mission.

Network Security Deployment will continue acquiring, developing, deploying, and sustaining the NCPS and its required end-to-end system upgrades consistent with scheduled milestones that will add new and enhanced capabilities to better protect and defend the Federal government’s cyber infrastructure. The NCPS Block 3.0, known as EINSTEIN 3, provides an intrusion prevention capability, addressing expectations outlined in the Department of Homeland Security Secretary’s Cybersecurity Memorandum for 2010.

Justification

This increase allows NPPD to:

- Maintain the previously procured sensors and Nests, reaching total of five sensors and five Nests (approximately \$35.684 million)
 - Monitor performance of two GOTS deployed in FY 2011 (24 x 7 x 365), troubleshoot performance or functional issues, upgrade the system to remain in-line with NSA 90-day spin releases (approximately \$15.350 million)
 - Fund yearly service fee for nest facility and traffic aggregation service, monitor performance of system, support integration activities, as required, for sensor modifications resulting in NSA 90-day spin releases (approximately \$20.334 million)
- Procure two additional sensors and one Nest (approximately \$20.940 million)

- Conduct the development, component testing, integration, and integration testing for one GOTS E3 sensor deployed in a Nest (approximately \$13.924 million)
- Procure the creation of one Nest, which is comprised of a traffic aggregation point, a co-location facility (SCIF), and backhaul communications between the Nest and DHS Data Centers (approximately \$7.016 million)

Impact on Performance

Network Security Deployment will fund EINSTEIN 3 in FY 2012 and will continue the “cloud”-based deployment for the EINSTEIN program, providing defense in depth capabilities and reducing the number of infrastructure points to defend. These deployments will represent the first active defense capability to prevent and/or limit malicious activities from penetrating the .gov environment.

**Department of Homeland Security
National Protection & Programs Directorate
Infrastructure Protection and Information Security**

Justification of Program Changes
(Dollars in Thousands)

Program Change #11: Global Cyber Security Management National Initiative for Cyber Education
 PPA: US-CERT
 Program Increase: FTP _____ FTE _____ Dollars \$9,000,000

	FY 2010 Actual			FY2011 Continuing Resolution			FY 2012 Request		
	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)
Current Services Level							8	7	\$5,876
Program Increase									\$9,000
GCSM National Initiative for Cyber Education TOTAL	7	6	\$6,354	7	6	\$6,354	8	7	\$14,876

PLEASE NOTE: The funding levels listed above are for the following activities only: National Cyber Education Strategy/National Initiative for Cyber Education.

Description of Item

The Global Cyber Security Management Branch leads cybersecurity education, training, and workforce development for the Nation under the auspices of the National Initiative for Cybersecurity Education (NICE) with the goal of providing a competent workforce to protect against and respond to national cybersecurity threats and hazards. The DHS CEO executes this mission by providing leadership to major components and key programs that support NICE. NCSD’s Cybersecurity Education Office (CEO) currently co-leads the Cybersecurity Workforce Training and Professional Development Track, one of the four NICE Tracks, and within that Track is responsible for 50 percent of the sub-organizational elements. It also leads major activities within the Formal Cybersecurity Education Track, and at a higher organizational level, the Department leads a third Track, National Cybersecurity Awareness.

Justification

Additional funding will enable the development of formal education programs, to include enhancements to the National Centers of Academic Excellence (CAE) programs, such as the transfer of funds for awards to educational institutions including community colleges and CAE schools that focus on cybersecurity in critical infrastructure protection, the development of core content courses, new learning solutions, and cybersecurity competitions. Funding will also enable the creation and enhancement of workforce development programs, to include training assessments, enhancements to the Federal Virtual Training Environment, Federal Cybersecurity Training Exercise, and Federal Consortium for Virtual Worlds programs, the development of Supply Chain Risk Management training, and the creation of a NICE Workforce Training and Professional Development Program Management Office.

Specifically, the funding will enable CEO to support the following activities:

- Expand Centers of Academic Excellence 2nd Year (CAE2Y) designations to 10 per year, providing accompanying \$0.050 million capacity-building grants (approximately \$0.500 million);
- Expand CAE educational cybersecurity support of the critical infrastructures for capacity-building, demonstration projects (approximately \$0.500 million);
- Develop core content areas, including Information Assurance education standards for higher education (\$0.500 million);
- Implement Interagency Cybersecurity Training Solutions Working Group model and deliver role-based training courses in various formats (approximately \$0.500 million);
- Develop national-level high school cybersecurity competitions (approximately \$0.500 million);
- Create a NICE Workforce Training and Professional Development Program Management Office (approximately \$0.500 million);
- Create NICE fake spear-phishing exercises and assessments to determine the health of workforce awareness programs (approximately \$0.500 million);
- Fund the continued hosting of on-demand information technology security training and laboratory system at the Department of State Foreign Service Institute and the engineering and instructor support services provided by the Carnegie Mellon University Software Engineering Institute (approximately \$3.000 million);
- Operate the Federal cybersecurity training exercise (FedCTE) program to deliver experiential and interactive training to cybersecurity professionals, increasing frequency of events and expanding to allow State/local government participation (approximately \$0.500 million);
- Continue support to Federal Virtual Worlds Consortium to utilize virtual world space for cybersecurity training cases/scenarios (\$0.500 million); and
- Develop DHS Supply Chain Risk Management training (approximately \$1.500 million).

Currently, the Cyber Education Office leads numerous efforts that support the Nation’s cybersecurity education and training needs, and it is programmatically aligning these activities in support of NICE and the National Institute for Cybersecurity Studies (NICS). The National Institute for Cybersecurity Studies will serve as NICE’s centerpiece institution, and the Cyber Education Office will develop the National Institute for Cybersecurity Studies in partnership with NICE Track Leads, the NICE Lead office, and key stakeholders.

The National Institute for Cybersecurity Studies will make available high-quality, cost-effective virtual cybersecurity training to the Federal, State, local and tribal government elements. Its advisory board comprised of academia, industry, and government representatives, will meet to review national cybersecurity education issues and make recommendations to improve overall cybersecurity education and development programs. The National Institute for Cybersecurity Studies will also host an Internet portal that will make the Department a “one-stop shop” for citizens, government, industry, and academia to be directed to cybersecurity education resources throughout the Nation.

The National Institute for Cybersecurity Studies will initially operate as a virtual environment, capable of delivering training to the Federal cybersecurity workforce. A physical presence will

evolve, in order to house permanent infrastructure for the virtual environment, provide meeting space, and allow for the overall management of the National Institute for Cybersecurity Studies.

Impact on Performance

The Cyber Education Office will substantially improve the cybersecurity workforce posture across the Nation through the development of a web-based architecture that will make cybersecurity education and training more accessible to public and private citizens and enhance cybersecurity scholarship and higher education programs. Specifically, the effort will expand and accelerate the dissemination of nationwide standards that will serve to strengthen the nationwide workforce and the production and integration of gap filling cybersecurity education and training, to include role-based training, supply chain management and software assurance.

It will furthermore objectively and quantifiably measure the current state of cybersecurity preparedness through the measured competency of the national cybersecurity workforce and operational cybersecurity risks present across the Nation. Analysis of these measurements will be used to instill cybersecurity education and training efficiencies through agency reallocation of resources to “NICE-critical” activities/operations that will result in nationwide cybersecurity education improvements.

National Protection & Programs Directorate
Infrastructure Protection and Information Security**

Justification of Program Changes
(Dollars in Thousands)

Program Change #12: Critical Infrastructure Cyber Protection and Awareness Control Systems Security and Cyber Security Evaluations
 PPA: Strategic Initiatives
 Program Increase: FTP _____ FTE _____ Dollars \$1,240,000

	FY 2010 Actual			FY2011 Continuing Resolution			FY 2012 Request		
	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)
Current Services Level							23	18	\$40,588
Program Increase									\$1,240
CICPA Control Systems Security and Cyber Security Evaluations TOTAL	20	14	\$40,613	20	14	\$40,613	23	18	\$41,828

PLEASE NOTE: The funding levels listed above are for the following activities only: Control Systems Security Program and Cyber Security Evaluation Program.

Description of Item

The Control Systems Security Program will enhance cyber control systems security through expanded on-site threat and vulnerability assessments as part of its mission to facilitate information sharing and reduce the risk to the Nation’s industrial control systems. This expansion will include extensive collaboration and coordination with the private sector via on-site assessments and in-house laboratory testing.

Justification

The Control Systems Security Program will identify vulnerabilities within industrial control systems products and provide mitigating measures, as well as add additional capabilities to the Industrial Control Systems Cyber Emergency Response Team (ICS-CERT) since expanded on-site threat and vulnerability assessments will significantly improve the quantity and quality of ICS-CERT products and provide for a greater number of on-site assessments and forensic investigations.

With additional funding the Control Systems Security Program will:

- Deploy two additional ICS-CERT fly-away teams to provide onsite incident response to CIKR organizations requiring immediate assistance and resolve in responding to a cyber attack (approximately \$0.080 million)
- Expand the ICS-CERT Malware Lab capabilities to include new analysis tools and software for both the fly-away toolkits and the lab analysis center; this capability improvement will provide advanced on-site support for forensic analysis and investigations and also allow the ICS-CERT to improve existing partnerships with public and private CIKR security stakeholders (approximately \$1.100 million)
- Conduct two additional on-site assessments of control system networks at national critical infrastructure and key resources facilities (approximately \$0.060 million)

As a result of the explanatory statement accompanying the FY 2010 Department of Homeland Security Appropriations Act, NCSD is working towards developing the Nationwide Cyber Security Review (NCSR) to comprehensively assess the security level of cyberspace of all States and large urban areas. The Cyber Security Evaluation Program would not only continue implementation of this important effort, but enhance the analysis and examination of multi-year trends and results of the NCSR. The NCSR remains an unfunded activity and the additional funding will allow for support and ongoing analysis to continue beyond FY2011.

The Cyber Security Evaluation Program will implement various cybersecurity investigative and assessment techniques to aid in the completion of the consolidated review of cybersecurity measures and capabilities in States and large urban areas. It will ensure appropriate and scalable resources are utilized, to consist of multi-mode deployment of assessment activities, such as direct delivery and self-appraisal, and independent results verification.

Impact on Performance

In direct support of the cybersecurity mission outlined and prioritized by the Department of Homeland Security, the Control System Security Program coordinates and leads the Nation in efforts to improve control systems security with its critical infrastructures and key resources. Additional funding will allow the Control Systems Security Program to implement the necessary enhancements to the ICS-CERT and improve control systems cybersecurity awareness, incident response, coordination, and information sharing.

Enhancements to the Cyber Security Evaluation Program will allow NCSD to continue efforts of the Nationwide Cyber Security Review. Additional funding will allow the Cyber Security Evaluation Program to continue funding infrastructure assessment and assistance capabilities that directly support State and Large Urban Area cybersecurity improvement efforts.

Program Change #13: Acquisition Workforce
 PPAs: Identification and Analysis; US-CERT; and National
 Communication System
 Program Increase: FTP 4 FTE 3 Dollars \$529,307

	FY 2010 Actual			FY2011 Continuing Resolution			FY 2012 Request		
	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)	FTP	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							4	3	\$529
Acquisition Workforce TOTAL	0	0	\$0	0	0	\$0	4	3	\$529

Description of Item

Successful acquisition outcomes are the direct result of having the appropriate personnel with the requisite skills managing various aspects of the acquisition process. Between FY 2000 and FY 2008, acquisition spending by civilian agencies increased by 56% (in inflation-adjusted dollars). The Department of Homeland Security is working to ensure its major acquisitions are effectively managed to ensure that the Department maximizes the value of every homeland security dollar and that major programs are implemented in the most responsible and efficient manner possible. This includes having disciplined oversight processes and robust acquisition program management teams in place. DHS has assessed the current resident skills against a set of core acquisition management skills: a program manager, a systems engineer, a life cycle logistician, a business/financial manager and a contracting officer's technical representative, and determined that many of our major acquisition programs are deficient in several of these areas.

Justification

The President's March 4, 2009 memorandum on Government Contracting required agencies to improve acquisition practices and performance by maximizing competition and value, minimizing risk, and reviewing the ability of the acquisition workforce to develop, manage, and oversee acquisitions appropriately. Subsequent guidance from the Office of Management and Budget, including memorandum M-09-25 *Improving Government Acquisition* issued July 29, 2009, and OFPP's Memorandum of October 27, 2009 *Acquisition Workforce Development Strategic Plan for Civilian Agencies- FY2010-2014*, provided guidance to agencies to strengthen the acquisition workforce and increase the civilian agency workforce by 5% to more effectively manage acquisition performance. These funds will help ensure the future programmatic growth requirements for training, recruitment, and retention activities while helping us to attract and hire qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act.

In support of the administration's emphasis on strengthening the Federal acquisition workforce, NPPD requests \$0.529 million to increase its acquisition workforce capacity and capabilities. The increase will mitigate the risks associated with gaps in either capacity or capability of the acquisition workforce and improve its effectiveness. The resources requested will be used to hire the following positions:

- One Logistician (GS-15) to support the National Cybersecurity and Protection System program;
- One Logistician (GS-15) and one Budget and Financial Analyst (GS-14) to support Next Generation Networks; and
- One Logistician (GS-15) to support Infrastructure Information Collection Program and Visualization.

The funds will achieve the following:

- Increase the capability of the acquisition workforce by investing in training to close identified gaps in such areas as project management, negotiations, requirements development, contract management, and other key topics;
- Increase the effectiveness of the acquisition workforce by investing in improvements to systems that support the contracting function;
- Conduct an assessment of options for creating systems to maintain comprehensive acquisition workforce data and selecting the appropriate system; and
- Increase the effectiveness of the Department's centralized acquisition workforce training program comprised of certification and targeted/continuous learning developmental training opportunities.

Impact on Performance (Relationship of Increase to Strategic Goals)

The FY 2012 funding request will help ensure:

- The future programmatic growth capacity for training, recruitment, and retention activities while attracting and hiring qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act. These funds allow DHS the ability to train, recruit, and retain at acceptable standards.
- The sustainability and availability of information technology systems and equipment in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
National Protection and Programs Directorate
Justification of Proposed Changes in Infrastructure Protection and Information Security
Appropriation Language**

For necessary expenses for infrastructure protection and information security programs and activities, as authorized by title II of the Homeland Security Act of 2002 (6 U.S.C. 121 et seq.), \$936,485,169 of which \$773,464,169 shall remain available until September 30, 2013: Provided, That of the funds made available under this heading, \$529,307 shall be for strengthening the capacity and capabilities of the acquisition workforce (as defined by the Office of Federal Procurement Policy Act, as amended (41 U.S.C. 401 et seq.)), including the recruitment, hiring, training, and retention of such workforce and information technology in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

Explanation of Changes:

None requested.

PPA Mission Statement

Priority Telecommunications Service is specially designed telecommunications services to support the national security and emergency preparedness user community during natural or man-made disasters when conventional communications services are ineffective. In addition to enhancing critical infrastructure protection, these telecommunication services are used to coordinate response and recovery efforts and, in severe conditions, to assist with continuity activities.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 Continuing Resolution	FY 2012 Request	2012 - 2011 Change
Salaries and Benefits	\$8,877	\$5,283	\$5,703	\$420

The FY 2012 Request includes \$5,703,000 for salaries and benefits for 44 FTE, which represents an increase of \$420,000 from FY 2011 to support the conversion of 3 contractor positions (3 FTE) to Federal positions.

	<u>FY 2010 Actual</u>	<u>FY 2011 Continuing Resolution</u>	<u>FY 2012 Request</u>	<u>2012 - 2011 Change</u>
Travel	\$144	\$32	\$32	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2012 Request represents no change from FY 2011.

	<u>FY 2010 Actual</u>	<u>FY 2011 Continuing Resolution</u>	<u>FY 2012 Request</u>	<u>2012 - 2011 Change</u>
GSA rent	\$0	\$2,905	\$2,956	\$51

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent-related services. The FY 2012 Request includes an increase of \$51,000 from FY 2011 to support non-pay inflation.

	<u>FY 2010 Actual</u>	<u>FY 2011 Continuing Resolution</u>	<u>FY 2012 Request</u>	<u>2012 - 2011 Change</u>
Advisory and Assistance Services	\$14,627	\$43,978	\$43,558	(\$420)

Advisory and assistance services include services acquired by contract from non-Federal sources as well as from other units within the Federal Government. The FY 2012 Request represents a decrease of \$420,000 from FY 2011 to support the conversion of 3 contractor positions (3 FTE) to Federal positions.

	<u>FY 2010 Actual</u>	<u>FY 2011 Continuing Resolution</u>	<u>FY 2012 Request</u>	<u>2012 - 2011 Change</u>
Other Services	\$31	\$92	\$92	\$0

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2012 Request represents no change from FY 2011.

	<u>FY 2010 Actual</u>	<u>FY 2011 Continuing Resolution</u>	<u>FY 2012 Request</u>	<u>2012 - 2011 Change</u>
Purchase from Government Accounts	\$33,865	\$4,429	\$4,429	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2012 Request represents no change from FY 2011.

	<u>FY 2010 Actual</u>	<u>FY 2011 Continuing Resolution</u>	<u>FY 2012 Request</u>	<u>2012 - 2011 Change</u>
Supplies & Materials	\$180	\$54	\$54	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2012 Request represents no change from FY 2011.

PPA Mission Statement

The Programs to Study and Enhance Telecommunications develops models and conducts technical analyses of public communications infrastructures and equipment, and identifies vulnerabilities in new communications technologies due to the Telecommunication Electromagnetic Disruptive Effects. It also works with the international communications industry standards organizations to ensure that evolving commercial standards address the technical requirements of national security and emergency communications.

Summary Justification and Explanation of Changes

	FY 2010 Actual	FY 2011 Continuing Resolution	FY 2012 Request	2012 - 2011 Change
Salaries and Benefits	\$3,841	\$3,727	\$3,727	\$0

The FY 2012 Request includes \$3,727,000 for salaries and benefits for 28 FTE, which represents no change from FY 2011.

	<u>FY 2010 Actual</u>	<u>FY 2011 Continuing Resolution</u>	<u>FY 2012 Request</u>	<u>2012 - 2011 Change</u>
Travel	\$95	\$266	\$266	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2012 Request represents no change from FY 2011.

* Please note that FTP/FTE that were originally requested under the FY 2011 PBR are now being requested as part of the FY 2012 PBR due to the FY 2011 Continuing Resolution.

FY 2011 DHS Balanced Workforce Strategy:

- Amount of salaries and benefits funding needed to hire Federal employees (based on an \$0.135 average cost per FTE):
 - \$10.080 million for 53 FTP/91 FTE, including the annualization of 16 FTE from prior year increases
- Amount of program/contract funding that will be terminated

- \$15.253 million program/contract cost. This assumption is based on \$0.200M average cost per contractor. There is a projected \$5.173M cost savings by hiring Federal employees and converting contractors to FTPs/FTEs.
- Implementation timeline
 - FY 2012, due to the FY 2011 Continuing Resolution it is anticipated that this program will start in October 2011.
- Identify any contractor functions that will be eliminated or absorbed by current federal employees and do not require additional new federal positions.
 - Contractor functions will be reduced and positions will be converted in accordance with the Department’s Balanced Workforce Initiative with a particular focus on contractors who are performing “nearly government inherent” responsibilities. Contractor reductions will be absorbed by the existing Federal government employees and new FTE converted positions.

FY 2012 DHS Balanced Workforce Strategy:

- Amount of salaries and benefits funding needed to hire Federal employees (based on an \$0.140 average cost per FTE):
 - \$10.500 million for 81 FTP/75 FTE for NCSD. ;
 - \$1.400 million for 14 FTP/10 FTE for NCS;
 - \$0.560 million for 4 FTP/FTE for OEC.
- Amount of program/contract funding that will be terminated
 - \$15.916 million program/contract cost for NCSD. This assumption is based on the \$0.200M average cost per contractor. There is a projected \$5.416M cost savings by hiring Federal employees and converting contractors to FTEs.
 - \$1.400 million for NCS;
 - \$0.560 million for OEC.
- Implementation timeline
 - FY 2012 due to the FY 2011 Continuing Resolution it is anticipated that this program will start in October 2011.
- Identify any contractor functions that will be eliminated or absorbed by current federal employees and do not require additional new federal positions.
 - Contractor functions will be reduced and positions will be converted in accordance with the Department’s Balanced Workforce Initiative with a particular focus on contractors who are performing “nearly government inherent” responsibilities. Contractor reductions will be absorbed by the existing Federal government employees and new FTE converted positions.

Annualization of FY 2010 DHS Balanced Workforce Strategy

- Amount of salaries and benefits funding that will be annualized
 - \$2.203 million for 0 FTP/16 FTE.

Annualization of FY 2011 DHS Balanced Workforce Strategy

- Amount of salaries and benefits funding that will be annualized
 - Due to the FY 2011 Continuing Resolution there is no annualized cost approved at this time.

Section 1: Overview

The Cybersecurity and Communications (CS&C) budget addendum is submitted due to the ongoing FY 2011 Continuing Resolution which constrains CS&C's opportunity to request PPA restructuring of our appropriated funds.

With a moratorium on PPA restructuring lifted, CS&C requests that our budget structure be revised in order to:

1. Recognize significant mission expansion or mission changes since previous budget Structures were established;
2. Align the budget with organizational structures;
3. Increase transparency and accountability for execution and mission performance; and
4. Streamline NPPD financial execution and reporting.

It is important to note that these requested budget structure changes do not in any way cause changes to the FY 2012 Congressional Justification plans and milestones or program changes. Rather, CS&C PPA restructuring request will more accurately represent how missions are executed, support is provided and operations are carried out.

The proposed changes to CS&C structure include:

1. Establish a PPA for the Assistant Secretary, CS&C. Funding and staff were previously budgeted and funded out of the multiple CS&C PPAs.
2. Realign National Communications System personnel across the NCS PPAs to align with the projects supported.
3. Updating the National Cyber Security Division PPA structure to more accurately reflect expanded responsibilities and enhanced mission outlined under the Comprehensive National Cybersecurity Initiative and other recent mandates.
4. Break out Cyber Coordination as a separate PPA under the IPIS appropriation.

The tables below reflect the FY 2012 CS&C request in the Congressionally approved PPA structure, as well as the FY 2012 IPIS request with the changes outlined in the budget addendum. The specific drivers and details for the requested changes are outlined in greater detail in the text below.

	FY 2012 Request in Congressionally Approved PPA Structure		
Cybersecurity and Communications (\$000)	FTP	FTE	\$
US-CERT	362	333	391,406

Office of Emergency Communications	62	62	43,495
Total CS&C	596	551	614,206

The Infrastructure Protection budget addendum is submitted to:

1. Ensure proper alignment of IP projects and activities with IP, NPPD, and DHS strategic goals
2. Align the budget and programmatic structure more closely with organizational structures
3. Increase transparency and accountability for mission execution and performance through the alignment of projects and PPAs

Section 2: Cybersecurity and Communications

Section 2.1: Office of the Assistant Secretary for Cybersecurity and Communications

PURPOSE:

The purpose of this Budget Addendum is to describe Cybersecurity and Communications (CS&C) restatement of resources to establish a separate Program, Project, Activity for the Assistant Secretary, CS&C.

The request is a restatement of \$5.494 million and 26 FTP/FTE positions from respective CS&C Divisions as indicated below:

National Cyber Security Division (NCSD): Restatement from NCSD includes program funds totaling \$4.744 million and 22 FTP/22 FTE billets.

National Communications System (NCS): Restatement from NCS includes program funds totaling \$0.750 million and 4 FTP/FTE billets.

DESCRIPTION:

PPA: Assistant Secretary for Cybersecurity and Communications

In FY 2012, NPPD requests \$5.494 million for the Assistant Secretary for Cybersecurity and Communications, including 26 FTP/FTE. These funds are needed to provide the resources necessary for efficient support and oversight of Strategic Planning and Policy; Mission Integration; External Affairs; Human Capital; Budget and Finance; Continuity of Government; and Facility Planning.

CURRENT SERVICES PROGRAM DESCRIPTION

Total	0	0	\$0	26	26	\$5,494	26	26	\$5,494

Pursuant to Title II of the Homeland Security Act of 2002, as amended, the Immediate Office of the Assistant Secretary for Cybersecurity and Communications (CS&C) was established in 2007. CS&C works to prevent or minimize disruptions to our critical information infrastructure in order to protect the public, economy, government services, and the overall security of the United States. This is achieved by supporting a series of continuous efforts designed to further safeguard federal government systems by reducing potential vulnerabilities, protecting against cyber intrusions, and anticipating future threats.

CS&C oversees and synergizes the mission domains of:

- National Communications System (NCS);
- National Cyber Security Division (NCSD); and
- Office of Emergency Communications (OEC).

The Office of the Assistant Secretary for CS&C manages the myriad cyber and communications policy initiatives and mission activities collaborations occurring across the United States Government. This staffing serves as a critical link to external stakeholders, OMB and Congress. The requested salaries and support allow centralized resource allocation and outreach efforts with inter-governmental, international, private sector, and other stakeholders, in addition to providing staffing and oversight of the following functional areas: Strategic Planning and Policy, Mission Integration, External Affairs, Human Capital, Budget and Finance, Acquisitions and Procurement, Continuity of Government, and Facility Planning.

Immediate Office of the Assistant Secretary – The Immediate Office of the Assistant Secretary provides strategic leadership across the Cybersecurity and Communications enterprise. The Assistant Secretary and Deputy Assistant Secretary collaborate with internal and external stakeholders, providing policy guidance for carrying out operational missions. They provide mission oversight to prepare for and respond to incidents that could degrade or overwhelm the Nation’s information technology and communications infrastructure operations.

Office of External Affairs – The External Affairs Office is responsible for providing CS&C leadership, divisions and the National Cybersecurity and Communications Integration Center (NCCIC) with mission essential services and is a component of the overall successful management of any cyber incident. Specifically, it provides leadership and support for the National Response Framework’s Emergency Support Function (ESF) 15, Annex C and is responsible for executing the CS&C External Affairs Standard Operating Procedures - as outlined in the National Cyber Incident Response Plan (NCIRP) both during steady state operations and during a cyber incident. It is designed to provide external engagement to effectively integrate, disseminate, coordinate, and prioritize vital information.

External Affairs approaches this mission from a strategic and operational perspective. Strategically, it works with divisions to develop outreach and awareness approaches that result in activities that best represent the divisions and promote programmatic activity. This includes proactively developing and coordinating clear, consistent, and actionable messages for a wide variety of audiences. External Affairs interacts with Congress, key stakeholders (state, local, tribal, private sector, and international), the media, and mission-critical and enabling communities and companies. From an operational standpoint, External Affairs provides timely, accurate, and reliable incident communication and coordination with stakeholders and the public. In addition, External Affairs is responsible for working with the Office of Legislative Affairs and managing Congressional engagements; coordinating division engagement with the Government Accountability Office and DHS Inspector General; overseeing the Speaker’s Bureau

process - integrating component strategic communications and public affairs events; and supporting inter-governmental and international affairs as well as private sector engagements.

Office of Human Capital – Human Capital is responsible for identifying, recruiting, and on-boarding highly qualified personnel, and coordinating with program managers at all levels to train, develop, motivate, and retain skilled staff. Further responsibilities include working closely with DHS Human Capital to provide personnel with effective and efficient employee development and training programs that provides the entire workforce with the knowledge, skills, abilities, and competencies to accomplish CS&C’s missions.

Office of Budget and Finance – The Office of Budget and Finance supports the CS&C mission by providing financial management information, oversight, and fiscal services and policies. The Office of Budget and Finance consists of the following activities and elements:

- **Budget Formulation.** Reviews programs and projects current state, and assesses activities against desired future direction, and builds and justifies funding requests to resource mission needs.
- **Budget Execution.** Responsible for workflow and funds control processes to ensure resources are available when needed, do not exceed authorized levels, are used in accordance with law and congressional intent, and are recorded and reported on in accordance with federal accounting principles and guidelines.
- **Strategic Planning and Performance Management.** Fulfills internal and external performance management requirements, including the collection, analysis, monitoring, and reporting of performance data.

Office of Acquisitions and Procurement – Acquisitions and Procurement is responsible for implementing acquisition review board strategies and provides oversight to ensure compliance with applicable National Protection and Program Directorate, DHS Directive 102-01, and government procurement regulations and procedures. Additionally, the Acquisitions and Procurement Office provides oversight for procurement activities, process and program definition, and the timely processing and submission of contracts. Acquisitions and Procurement consists of the following activities and elements:

- **Acquisition Operations.** Reviews and monitors CS&C’s acquisition documents and ensures compliance with Federal and DHS acquisition regulations.
- **Procurement Operations.** Reviews and tracks CS&C contract execution, providing procedural guidance and support to CS&C staff. This office also serves as a liaison to the NPPD procurement office and directly manages all contract activity that directly supports the OAS including NCCIC related contracts

FY 2010 Assistant Secretary for CS&C Accomplishments

- Developed External Affairs Standard Operating Procedures for the NCIRP and started the coordination and development necessary to re-write Emergency Support Function 15, Annex C as well as lay the groundwork to build a Joint Information Center (JIC) for the NCCIC.
- Provided a wide range of strategic leadership and cross-cutting guidance to the National Cyber Security Division, the National Communications System, and the Office of Emergency Communications.
- Developed and led cross-cutting strategic communications initiatives across the organization – working with the National Cybersecurity and Communications Integration Center (NCCIC).
- Enhanced coordination with the DHS Chief Privacy Officer and Officer for Civil Rights and Civil Liberties through the development of white papers and other high profile communications.
- Developed, reviewed, and analyzed public affairs talking points, public affairs guidance, press releases, testimony, speeches, as well as proactive/ reactive engagement with the media.
- Assisted the NCSA to plan and execute a successful National Cyber Security Month campaign and worked with NPPD and the National Cyber Security Alliance to launch the National Cyber Awareness Campaign.
- Lead and coordinated all elements of External Affairs during the Cyber Storm III exercise, including coordinating message development with state government, the private sector and across the inter-agency.
- Developed EINSTEIN 3 roll-out plan and public messaging.
- Provided incident response support and public affairs guidance to DHS Office of Public Affairs, including support for the “Stuxnet” virus and “Here you have” worm.
- Provided support to the Office of Legislative Affairs, including writing testimony for both the Assistant Secretary and the Deputy Undersecretary.
- CS&C External Affairs created 91 talking points documents during FY 2010. This represents every external event attended by the assistant secretary and deputy assistant secretary for the Office of Cybersecurity and Communications.
- CS&C External Affairs worked with its three component divisions and the Office of Public Affairs to develop, coordinate, integrate, and update 18 Public Affairs Guidance documents used by CS&C and DHS to synchronize its public message across the department and inter-agency,
- Published 51 newsletters, titled, “CS&C Media Download;” a compilation and consolidated narrative of cybersecurity news published weekly and distributed to over 200 key cybersecurity and communications stakeholders.
- External affairs managed the Speakers bureau process for all of CS&C and serves as the single point of entry for speaking engagements for cybersecurity and communications senior leadership. During FY 2010, we processed 438 speaking engagements requests; reviewing each request for ethical and legal concerns, and working with OGC and ethics as required.
- External Affairs authored Congressional testimony, oral remarks and provided substantial review for NPPD leadership and senior personnel. In coordination with DHS Office of

Legislative Affairs, was responsible for the organization of testimony and oral statements within the department.

- Provided a wide range of strategic leadership and cross-cutting corporate guidance to the National Cyber Security Division, the National Communications System, and the Office of Emergency Communications.
- Led and developed cross-cutting strategic initiatives across the organization (such as the National Cybersecurity and Communications Integration Center (NCCIC) and the National Cybersecurity Incident Response Plan (NCIRP)).
- Enhanced coordination with the DHS Chief Privacy Officer and Officer for Civil Rights and Civil Liberties through the development of white papers and other high profile communications.
- Developed a communications annex to the NCIRP and started the coordination and development necessary to stand-up a Joint Information Center (JIC) for the NCCIC.
- Established a functional, streamlined, and transparent human capital recruitment and retention activity fully integrated with DHS Management and NPPD.
- Developed and implemented integrated, comprehensive CS&C-wide processes, procedures, and methods to improve budget and finance activities.
- Developed and provided CS&C-wide budget formulation and execution training; including technical training sessions.
- Established and executed upon a CS&C Acquisition Governance that established internal CS&C authorities, processes and procedures to meet the mandates of DHS Acquisition Directive 102.
- Established a CS&C Procurement Execution and Management Directive and worked with the Office of Emergency Communications, National Communication Systems and National Cyber Security Division to establish standard reporting procedures and increased transparency of on-going procurement activities.
- Established a CS&C procurement planning process and formal review structure.

FY 2011 Assistant Secretary for CS&C Planned Accomplishments

- Develop, review, and analyze public affairs talking points, public affairs guidance, press releases, testimony, speeches, as well as proactive/ reactive engagement with the media.
- Build upon GAO/OIG compliance program and proactive engagement with Congress.
- Implement an integrated and comprehensive suite of processes, procedures, and methods related to all budgetary and financial activities.
- Implement the CS&C investment management process and incorporate performance metrics, including earned value management.
- Effectively manage the DHS Acquisition Directive 102-01 process and Cybersecurity and Communications Acquisition Advisory Council.
- Conduct internal audits and reviews of the CS&C Procurement Execution and Management Process.

FY 2012 Assistant Secretary for CS&C Planned Accomplishments

- Share corporate knowledge and expertise as well as increase efficiencies and cost savings by centralizing BizOps functions across CS&C.
- Achieve 90% hiring goal towards the onboarding of 608 FY 2012 FTEs.

- Establish and implement External Affairs Standard Operating Procedures that support Emergency Support Function 15, Annex C of the National Response Framework.
- Fully integrate embedded budget analysts into NCSD's business and finance operations.
- Work with CS&C and NPPD functional managers to frame out a strategy to improve and standardize public affairs, budget, acquisitions and HR processes and procedures.
- Explore and make recommendations to CS&C and NPPD leadership regarding budget, acquisition and HR activities realignment in support of efficiencies and process streamlining for congruency with new "8th Operational Cyber-IP Component" policies.
- Explore and make initial recommendations to CS&C and NPPD leadership pertaining to implementing, budget and acquisition business tools supporting budget formulation, execution, acquisition, and program management review activities

Section 2.2: National Communications System Realignment

PURPOSE:

The National Communications System (NCS) is requesting a restatement of personnel and support resources from across the National Communications System Programs to more closely reflect how the NCS mission is currently being executed. This requested restatement creates a consolidated Plans and Programs project within Priority Telecommunication Service PPA to coordinate the planning and provisioning of national security and emergency preparedness communications, resources are currently budgeted across all four PPAs. It provides additional support to priority areas such as National Coordinating Center 24x7 Watch and CIP Operations, Plans & Policy (Title Globe). It also restates the NCS positions across the four PPAs to tie the staffing more closely to the projects they support (for example, restating of the 12 NGN Program Office staff to the NGN PPA.)

	FY 2012 Request			NCS Staffing and Support Realignment			Transfer Out to Assistant Sec. CS&C			Addendum Request		
	FTP	FTE	(\$000)	FTP	FTE	(\$000)	FTP	FTE	(\$000)	FTP	FTE	(\$000)
PTS	44	44	56,824	5	5	1,240	(4)	(4)	(750)	45	45	57,314
PSET	28	28	13,441	(14)	(14)	(2,722)				14	14	10,719
CIP	40	36	11,352	(3)	(3)	2,904				37	33	14,256
NGN	2	1	25,253	12	12	(1,422)				14	13	23,831
Total	114	109	106,870	0	0	0	(4)	(4)	(750)	110	105	106,120

DESCRIPTION:

This restatement will create a new Plans and Programs project under the PTS PPA, but will not cause any other structural changes to the current projects under PTS or the projects in the other three PPAs.

Changes include:

- Net Increase of \$1.240 million and 5 FTP/FTE to Priority Telecommunications Service (PTS);
- Net Decrease of \$2.722 million and 14 FTP/FTE from Programs to Study & Enhance Telecommunications (PSET);
- Net Increase of \$2,904 million program dollars and a decrease of 3 FTP/FTE from Critical Infrastructure Protection Programs (CIP);
- Net Decrease of \$1,422 million program dollars and a increase of 12 FTP/FTE to Next Generation Networks (NGN)
- Transfer of \$0.750 million and 4 FTP/FTE to the CS&C front office support

The table at the end provides the restatements at the project level and for the personnel across the NCS PPAs.

The Plans and Programs office provides necessary business and administrative support for the National Communications System and centralizes cross-cutting activities such as budget formulation and execution, contracts management, planning, human capital, performance management oversight, as well as management of travel, training, and supplies across NCS.

Benefits derived from the consolidation of resources across the National Communications System into the Plans and Programs office under PTS enables economies of scale to be achieved in budget, HR and contract management activities in an effort to reduce costs and increase operational efficiencies.

National Coordinating Center Watch personnel stand watch for the National Protection and Programs Directorate (NPPD) and the communications sector, serving as the first line of defense in enhancing the Federal government's ability to rapidly identify, monitor and respond to emerging telecommunications events. As the operational arm of NPPD's National Communications System, the NCC Watch provides 365x24x7 staffed operations to maintain situational awareness on the health of the Nation's telecommunications infrastructure. In this role, the NCC Watch provides time sensitive alerts, warnings, and in-depth analyses on national security/emergency preparedness issues impacting United States Government departments and agencies as well as their industry partners. Moreover, the NCC Watch is the integration point for other Information Sharing and Analysis Centers (ISACs) and government coordination centers. As such, the NCC Watch requires both experienced and operationally trained staff to handle no-notice as well as notice events around the clock. The realignment of FY 2012 funds to National Coordinating Center 24x7 Watch programs will enable the NCC Watch to staff and support 365x24x7 mission operations. The NCC Watch mission fulfills the National Continuity Policy mandates under Homeland Security Presidential Directive (HSPD)-20.

Title Globe is a classified program that provides for monthly continuity testing of United States Government telecommunication networks as specified by the Office of Science and Technology Policy in support of Homeland Security Presidential Directive – 20. The transfer of program funds to Title Globe programs supports CS&C priorities by fulfilling the National Continuity Policy mandates under Homeland Security Presidential Directive (HSPD)-20.

The most significant realignment of personnel is to reflect those positions that are in the NGN Program Office. The NGN program office has the responsibility for monitoring changes to telecommunication policies and technology trends; formulate funding projections necessary to support future program activities; support internal and external reporting requirements; and ensure program adherence to effective NGN cost, schedule, and performance goals.

Section 2.3 National Cyber Security Division

PURPOSE:

This addendum is being submitted as the National Cyber Security Division is currently operating under a Continuing Resolution and is required to submit the FY 2012 budget in the FY 2010 enacted structure pending the passing of the FY 2011 appropriation for the Department of Homeland Security.

This proposed PPA structure for FY 2012 is requested for the National Cyber Security Division to better align appropriated resources to its expanded responsibilities and enhanced mission outlined under the Comprehensive National Cybersecurity Initiative and other recent mandates.

Under this requested realignment, the current National Cyber Security Division PPAs are proposed to be one cybersecurity PPA¹: In the new structure for FY 2012, NPPD requests \$459.097 million for Cybersecurity, including 398 FTP/358 FTE. These figures exclude the realignment of staff and resources for the Office of the Assistant Secretary for Cybersecurity and Communications. These funds support NPPD's role in the Comprehensive National Cybersecurity Initiative and other cybersecurity activities, and is structured to align to the branch-based NCSD organizational structure: Cybersecurity Coordination, US-CERT Operations, Federal Network Security, Network Security Deployment, Global Cyber Security Management, Critical Infrastructure Cyber Protection and Awareness, and Business Operations.

The requested PPA structure outlined below provides for future increased visibility and transparency into how the National Cyber Security Division is executing funding and meeting mission requirements.

A detailed crosswalk of this restructuring is provided on the following pages.

¹ Please note the funding for the Office of the Assistant Secretary for Cybersecurity and Communications will be pulled out of all Office of Cybersecurity and Communications divisions to form its own PPA. This is addressed in a separate section of the addendum.

FY 2010 Congressional Structure to FY 2012 Proposed Structure

PPA: Cybersecurity

	Perm. Pos	FTE	Amount
FY 2010 Actual	-	-	-
FY 2011 Continuing Resolution	260	186	397,153
2011 Adjustments-to-Base	106	154	(-32,570)
2012 Current Services	366	340	364,583
2012 Program Changes	32	18	94,514
FY 2012 Request	398	358	459,097
Total Change 2011-2012	138	172	61,944

NPPD requests \$459.097 million for Cybersecurity, including 398 FTP/358 FTE. These figures exclude the realignment of staff and resources for the Office of the Assistant Secretary for Cybersecurity and Communications. This represents a net increase of \$61.944 million over the FY 2011 Continuing Resolution, which provided \$397.153 million. These funds support NPPD's role in the Comprehensive National Cybersecurity Initiative and other cybersecurity activities.

The FY 2012 request for Cybersecurity includes adjustments-to-base for: annualization for \$2.203 million for 16 FTE requested in FY 2010; an additional 128 FTP/160 FTE offset by \$22.328 million in program and contract dollars and a savings of \$10.588 million in program and contract dollars for administrative efficiency associated with the DHS Balanced Workforce initiative; a proposed transfer of \$4.744 million to the Office of the Assistant Secretary, CS&C; GSA rent escalation of \$0.089 million; a decrease of \$8.000 million for one time Data Center Migration costs; a decrease of \$1.320 million to realize Data Center savings; a decrease of \$0.560 million to support Administrative Savings; a technical adjustment to reflect the removal of \$4.000 million for the National Computer Forensics Institute; and a reduction of \$6.350 million to eliminate one-time costs in FY 2010.

Program changes total an increase of \$95.213 million and 32 FTP/18 FTE. Program changes include: an increase of \$4.689 million to US-CERT Operations; an increase of \$1.253 million and 15 FTP/8 FTE to US-CERT Cyber Mission Integration; an increase of \$21.569 million and 11 FTP/6 FTE to Federal Network Security; an increase of \$0.700 million and 5 FTP/3 FTE to Federal Network Security to support Small- and Micro-Agencies; an increase of \$56.762 million and 1 FTP/1 FTE to Network Security Deployment; an increase of \$9.000 million Global Cyber

Security Management to support the National Initiative for Cyber Education; and an increase of \$1.240 million to Critical Infrastructure Cyber Protection and Awareness.

This PPA encompasses activities under: Cybersecurity Coordination, US-CERT Operations, Federal Network Security, Network Security Deployment, Global Cyber Security Management, Critical Infrastructure Cyber Protection and Awareness, and Business Operations.

Additional details on each activity follows:

Cybersecurity Coordination

\$ thousands	FY 2011 Continuing Resolution			FY 2012 Request			Change		
	Activity	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP
Salaries & Benefits	0	0	\$0	14	14	\$1,960	14	14	\$1,960
Program Costs			\$5,000			\$3,040			-\$1,960
Total	0	0	\$5,000	14	14	\$5,000	14	14	\$0

As stated in National Security Presidential Directive 54 (NSPD 54)/Homeland Security Presidential Directive 23 (HSPD 23), paragraph 29(d) - the former National Cyber Security Center (NCSC), whose mission is now implemented by the Cybersecurity Coordination project, is to ensure that Federal agencies have access to and receive information and intelligence needed to execute their respective cybersecurity missions.

To accomplish its mission, Cybersecurity Coordination is comprised of six functional areas:

- *Collaboration and Coordination* facilitates professional collaboration and manages the partnership agreement process with each center.
- *Mission Integration* facilitates the integration of the six participating centers through common or aligned processes, procedures and techniques.
- *Situational Awareness and Cyber Incident Response* sustains an integrated national situational awareness capability for operational and strategic means at all three classification levels.
- *Analysis and Reporting* reports daily, weekly and annually on the composite state of the U.S. Cyber Networks and Systems.
- *Knowledge Management* capability provides a portal of cybersecurity information and intelligence for cybersecurity professionals, analysts and center customers at all three classification levels.
- *Technology Development and Management* provides IT support for the center and provides enterprise tools and capabilities (data standards, common mark-up language, data definitions and tool deployment) for all participating cybersecurity centers.

US-CERT Operations

US-CERT Operations focuses on utilizing technical competencies in Federal network operations and threat analysis centers to develop knowledge and knowledge management practices supporting Federal stakeholders as they make key operational and execution decisions.

To accomplish its mission, US-CERT Operations is comprised of four functional areas:

- *US-CERT Operations Mission Management* encompasses the activities that provide immediate customer support and incident response, including 24x7x365 support of the National Cybersecurity and Communications Integration Center, which has connectivity to all major Federal cyber operations centers, industry and international partners.
- *US-CERT Operations Business, Performance, and Planning* supports the US-CERT mission through integrated planning and sustainable financial, acquisition, and human capital management.
- *US-CERT Operations Analysis* provides several levels of analytical insight into cyber activities. In near-real time, its analysts examine raw and summarized data from a wide variety of information sources to make determinations about potential attacks detected by the National Cybersecurity Protection System's alerting system.
- *US-CERT Operations Detection* supports the implementation of tools and technologies, including monitoring of deployed sensors and creation of threat signatures, countermeasures, and scenarios to provide the ability to rapidly detect and categorize cyber activities that could pose a potential risk to US-CERT stakeholders.

US-CERT Operations also supports the National Cybersecurity and Communications Integration Center (NCCIC), US-CERT will help improve national efforts to address threats and incidents affecting the nation's critical information technology assets and cyber infrastructure and serve as a key component of the National Cyber Incident Response Plan (NCIRP).

The Cyber Mission Integration activity falls under US-CERT Operations. Cyber Mission Integration will implement critical mission activities addressed under the National Cyber Incident Response Plan (NCIRP) which establishes the strategic framework for organizational roles, responsibilities, and actions to prepare for, respond to, and begin to coordinate recovery from a cyber incident.

Federal Network Security

Federal Network Security focuses on achieving cybersecurity throughout the Federal enterprise by utilizing a holistic approach to Federal government network security, enabling cybersecurity challenges to be addressed in a manner that maximizes value and minimizes risks associated with technology and security investments.

To accomplish its mission, Federal Network Security is comprised of four functional areas:

- *Requirements and Acquisitions Support* supports the long-term strategic prevention of attacks against Federal government networks by addressing common challenges faced by all departments and agencies.
- *Network and Infrastructure Security* leads the Comprehensive National Cybersecurity Initiative Trusted Internet Connections (TIC) Initiative with the Office of Management and Budget. It optimizes network security capabilities into a common solution for the Federal information enterprise and facilitates the reduction, and consolidation of external connections, including Internet points of presence, through approved access points.
- *Compliance and Assurance Program* ensures that implementation efforts across the Federal enterprise are in compliance with information technology security policy directives and statutes.
- *Security Management* supports Federal partners' by promoting cybersecurity directives and statutes, including Office of Management and Budget and National Institute of Standards and Technology guidelines and special publications.
- *FISMA Enterprise Performance Management* provides operational support for Federal Executive Civilian Branch departments and agencies in their compliance with the Federal Information Security Management Act and guidance outlined in OMB M-10-15 and M-10-28. In addition to providing operational support, the Program works with cybersecurity partners to improve the quality of security measures under FISMA and advance the overall security posture of the Federal civilian enterprise.

Network Security Deployment

Activity	FY 2011 Continuing Resolution			FY 2012 Request			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	22	32	\$3,202	72	73	\$9,827	50	41	\$6,625

Total	22	32	\$193,668	72	73	\$233,601	50	41	\$39,933

Network Security Deployment is responsible for the design, development, acquisition, deployment, and operations and maintenance required to implement the National Cybersecurity Protection System, operationally known as EINSTEIN. The National Cybersecurity Protection System is an integrated intrusion detection/prevention system that encompasses the hardware, software, and other components being procured specifically to support the Department's responsibilities within the Comprehensive National Cybersecurity Initiative mission.

To accomplish its mission, Network Security Deployment is comprised of four functional areas: *System Engineering and Integration*; *Program Management and Acquisition*; *Deployment, Logistics and Sustainment*; and *Business, Investment and Budget*.

Global Cyber Security Management

Activity	FY 2011 Continuing Resolution			FY 2012 Request			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	18	22	\$2,572	19	23	\$2,712	1	1	\$140
Software Assurance			\$1,809			\$1,809			\$0

Total	18	22	\$19,891	19	23	\$24,527	1	1	\$4,636

Global Cyber Security Management focuses on development and promulgation of sound software practices, building a skilled national cyber workforce for today and tomorrow, managing supply chain risk across the lifecycle of networks, systems, and components, and managing standards and the transition of research and development results to operational status.

To accomplish its mission, Global Cyber Security Management is comprised of five functional areas:

- *Cybersecurity Education and Workforce Development* promotes a skilled workforce and facilitates the availability of qualified cybersecurity professionals to support the Nation's cybersecurity needs through education and workforce development programs.
- *National Cybersecurity Education Strategy* assists in the National Initiative for Cybersecurity Education Strategy, leading and coordinating efforts to improve the Nation's cybersecurity education posture to ensure a robust, competent cybersecurity

workforce. It also focuses on relationship building amongst public and private cybersecurity institutions with regard to education and workforce development, and development, implementation, and promotion of Nation-wide standards to ensure consistent competency levels.

- *Software Assurance* seeks to improve software development and acquisition processes by way of forums, working groups, and best practices collaborations.
- *Research and Standards Integration* promotes the development of standards and frameworks that align with national interests to enhance cybersecurity postures of networks, software, and other cyber domains, and effectively shares information about development and use of cybersecurity standards throughout the Department of Homeland Security.
- *Supply Chain Risk Management* works collaboratively with the Department of Defense to develop a method to provide the Federal enterprise the ability to manage and mitigate global information and communications technology supply chain risks.

Critical Infrastructure Cyber Protection and Awareness

Activity	FY 2011 Continuing Resolution			FY 2012 Request			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	24	33	\$3,425	28	37	\$3,983	4	4	\$558

Total	24	33	\$60,162	28	37	\$61,364	4	4	\$1,202

Critical Infrastructure Cyber Protection and Awareness focuses on collaboration with the public and private sectors to assess and mitigate risk to the Nation’s cyber critical infrastructure and key resources and promoting cybersecurity awareness among and within the general public and key communities.

To accomplish its mission, Critical Infrastructure Cyber Protection and Awareness is comprised of six functional areas:

- *Control Systems Security Program* focuses on reducing the cyber risk to industrial control systems within the Nation’s critical infrastructure and key resources.
- *Critical Infrastructure Protection-Cyber Security* strengthens the Nation’s preparedness through public and private partnerships that work to improve the security of the Information Technology Sector, serving as the designated Sector-Specific Agency.
- *Cyber Security Evaluation Program* conducts voluntary cyber security assessments across all 18 critical infrastructure and key resources sectors. It affords critical infrastructure and key resources sector participants a portfolio of assessment tools, techniques, and analytics, ranging from those that can be self-applied to those that require expert facilitation or mentoring outreach and furthermore provides critical infrastructure and key resources participants and other policy stakeholders with regionally-placed liaison support, through its Cyber Security Advisor initiative.

- *Outreach and Awareness* coordinates domestic and international engagement and outreach by promoting cybersecurity awareness among and within the general public and key stakeholder communities. It maintains relationships with Federal, State, local, and tribal governments; private industry stakeholders, and international cybersecurity professionals to share information about cybersecurity initiatives, and develops partnerships to promote collaboration and awareness on cybersecurity issues.
- *International Affairs Program* engages in building international partnerships and conducting outreach to advance information sharing and collaboration, cooperation, and planning to achieve cybersecurity goals.
- *Cyber Exercises Program* plans, coordinates, and conducts cyber-focused exercises that prepare and enhance incident operational capabilities for the Department and its Federal, State, local, regional, international, and private sector partners.

Business Operations

Activity	FY 2011 Continuing Resolution			FY 2012 Request			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	37	55	\$5,070	33	33	\$4,418	-4	-22	-\$652
<i>Business Operations</i>			\$3,769			\$1,049			-\$2,720
<i>Facilities</i>			\$6,012			\$6,101			\$89
Program Costs			\$9,781			\$7,150			-\$2,631
Total	37	55	\$14,851	33	33	\$11,568	-4	-22	-\$3,283

Business Operations supports the National Cyber Security Division leadership of by establishing policies and providing collective direction to sustain overall cybersecurity strategy and planning through effective integration of resource and financial management, information management, Executive Secretariat, human capital, facilities, performance management, policy development and implementation, information and personnel security, and strategic planning processes. These eclectic oversight responsibilities solidify the broad array of management and internal control requirements and responsibilities inherently addressed by the Division.

Section 3: Infrastructure Protection

PURPOSE:

The purpose of this Budget Addendum is to describe the following changes:

1. Rename of our 3 PPAs and move Infrastructure Security Compliance into its own PPA for a total of 4 IP PPAs:
 - Identification and Analysis becomes Infrastructure Analysis and Planning (IAP)
 - Coordination and Information Sharing becomes Sector Management and Governance (SMG)
 - Mitigation Programs becomes Regional Field Operations (RFO)
 - Establish an Infrastructure Security Compliance PPA
2. Move Critical Infrastructure Technology and Architecture (CITA) project (formerly 3 projects: Infrastructure Data Management, Infrastructure Visualization and Infrastructure Information Collection Program) from the Infrastructure Analysis and Planning PPA to the Sector Management and Governance PPA
3. Split Infrastructure Coordination & Incident Management into two projects: Infrastructure Protection Watch and Incident Planning & Exercises projects
4. Move Incident Planning and Exercises from Regional Field Operations PPA to Infrastructure Analysis and Planning PPA
5. Move Bombing Prevention from Regional Field Offices PPA to Infrastructure Analysis and Planning PPA
6. Rename CIKR Partnerships to Partnerships & Information Sharing project
7. Move Partnerships & Information Sharing project from Sector Management and Governance PPA to Regional Field Operations PPA
8. Move Sector-Specific Agency (SSA) Management from Regional Field Operations PPA to Sector Management and Governance PPA

The tables below reflect the FY 2012 IP request in the Congressionally approved PPA structure, as well as the FY 2012 IPIS request with the changes outlined in the budget addendum.

DESCRIPTION:

The changes made to the IP FY2012 budget structure have evolved based on the new vision and mission of the organization and pushes IP capabilities out to our stakeholders in a synchronized and centralized approach. The changes will allow IP to focus in a more coordinated manner on its customers in the field, collaborate proactively, and focus the organization on direct delivery of tools, capabilities, and products to our mission partners at the regional and local level.

This new budget structure supports IP's mission, enabling IP to focus its resources to strengthen the capabilities and capacity of our primary stakeholders who are the only entities, which can execute this mission "on their ground": officials and critical infrastructure owners and operators in their jurisdictions. This capacity building is a core tenet of the recently completed DHS bottom-up review (BUR) in aligning DHS' core priorities against the Quadrennial Homeland Security Review (QHSR).

The three PPAs will be renamed to ensure that they accurately reflect IP's mission and priorities. A new PPA will be created for *Infrastructure Security Compliance*. This PPA will accommodate the regulatory component of IP and will allow Infrastructure Security Compliance to manage its resources more effectively and transparently.

The *Critical Infrastructure Technology and Architecture* project will move from the Infrastructure Analysis and Planning PPA to the Sector Management and Governance PPA to better align its activities within IP's structure. The critical infrastructure risk-related information collected, catalogued, and maintained by the project will enable the execution of national critical infrastructure risk management efforts. This information is critical for sectors to identify protective measures and incorporate these measures into their sector management plans. Critical Infrastructure Technology and Architecture should be included under the Sector Management and Governance PPA to facilitate the incorporation of this information.

The Infrastructure Coordination & Incident Management project will be split into two projects. Splitting the current project will allow IP to move the projects into separate PPAs, which will facilitate better alignment of the projects' missions to IP's structure.

1. The *National Infrastructure Coordinating Center (NICC)* will provide the structures, mechanisms, facilities, and personnel needed to execute a coordinated, interoperable, critical infrastructure and key resources-focused response to emerging and no-notice incidents.
2. The *Incident Planning and Exercises* project will move from the Regional Field Operations PPA to the Infrastructure Analysis and Planning PPA. The project will conduct planning for the full range of critical infrastructure incidents, making it appropriate for the project to be included under the Infrastructure Analysis and Planning PPA.

The *Bombing Prevention* project will move from the Regional Field Offices PPA to Infrastructure Analysis and Planning PPA to better-align the program's planning and coordination activities with IP's structure. In addition to planning and coordination activities, Bombing Prevention performs analysis, including capability gap assessment and domestic

terrorism bombing prevention requirements, which aligns to the Infrastructure Analysis and Planning PPA. With its focus on national coordination and the improvement of state and local capabilities, it is appropriate for the Bombing Prevention program to be included in the Infrastructure Analysis and Planning PPA.

The CIKR Partnerships project will be renamed to the *Partnership & Information Sharing* project to reflect the mission of the projects. The Partnerships & Information Sharing project will move from the Sector Management and Governance PPA to the Regional Field Operations PPA to facilitate improved coordination with stakeholders.

The *Sector-Specific Agencies Management* project will move from the Regional Field Offices PPA to the Sector Management and Governance PPA to better align the project’s focus on sector management within IP’s structure. The project is responsible for executing the SSA functions for the six sectors that have been designated to IP and ensures that the critical infrastructure sector security efforts for these sectors are aligned and coordinated. These efforts are appropriately included under the Sector Management and Governance PPA.

The tables below represent the original FY 2011 PBR structure, as well as the FY 2012 proposed budget structure. The highlighted projects moved across PPAs.

Original FY11 Budget Structure	New Proposed FY12 Budget Structure
Infrastructure Protection	Infrastructure Protection
PPA: Identification and Analysis	PPA: Infrastructure Analysis and Planning
Vulnerability Assessments	Vulnerability Assessments
Infrastructure Sector Analysis	Infrastructure Sector Analysis
Infrastructure Visualization	Bombing Prevention
Infrastructure Data Management	Incident Planning and Exercises
Infrastructure Information Collection Project	PPA: Sector Management & Governance
PPA: Coordination and Information Sharing	NIPP Management
NIPP Management	SSA Management
CIKR Partnerships	Management, Planning, and Administration
Management, Planning, and Administration	Critical Infrastructure Technology and Architecture

BUDGET REQUEST AND SUPPORTING INFORMATION

NATIONAL PROTECTION AND PROGRAMS DIRECTORATE UNITED STATES VISITOR AND IMMIGRANT STATUS INDICATOR TECHNOLOGY (US-VISIT) PROGRAM

I. Appropriation Overview

A. Mission Statement for US-VISIT:

The United States Visitor and Immigrant Status Indicator Technology (US-VISIT) Program satisfies legislative and Department of Homeland Security (DHS) mandates and contributes to DHS immigration and border management goals in order to provide United States citizens and foreign visitors with a safer and more facilitative border security and immigration process. US-VISIT is a key component of a multilayered, multiagency defense that is integral to domestic and, increasing, international security.

The mission of US-VISIT is to provide biometric identification through the collection, maintenance, and sharing of biometric and selected biographic data to authorized DHS, Federal, state, tribal, and local law enforcement agencies, and internationally through data-sharing agreements with strategic foreign partners in support of the DHS mission.

Through its use of biometrics, US-VISIT collects stores, and shares digital fingerscans and digital photographs for subsequent verification. This biometric information is paired with biographic information and used to establish and verify an individual's identity, as well as to match that identity against criminal and immigration violator watchlists. US-VISIT also analyzes biographic data for the identification of potential overstays.

B. Budget Activities:

Business Support Services – US-VISIT's business support services provide Federal staffing to all mission activities, such as operations and maintenance (O&M) of the Automated Biometric Identification System (IDENT) and the Arrival and Departure Information System (ADIS) systems and projects to support US-VISIT customers and additional program support-based activities. The demand for US-VISIT services continues to grow along with the need for the workforce to deliver these services. Historically, US-VISIT has provided these services with the assistance of a large contingency of contracted resources. Given the long-term goals of the organization and the nature of the many services delivered, US-VISIT is transitioning the majority of contract positions to Federal positions. A realigned workforce will promote long-term continuity.

Systems Operations and Maintenance – US-VISIT operates and maintains two major automated identification systems in support of its mission: IDENT for biometric data, and ADIS for biographic data. US-VISIT provides the information technology (IT) support enabling identity verification and screening services through these systems, including the

support infrastructure providing the foundation for enhancing and developing new capabilities. O&M includes systems operations and maintenance, developing IT architecture and platforms for user and program interfaces, data center operations support and services, network and data communications integration and support, as well as IT support services.

IDENT processes more than 165,000 transactions per day for DHS and the Department of State (DOS), as well as for other customers. IDENT contains a biometric watchlist with enrolled fingerprints that are compared to identify persons who should be more closely scrutinized prior to entering the United States, prior to being granted visas, immigration benefits, or for law enforcement purposes. The biometric watchlist contains information on known and suspected terrorists (KSTs), criminals, sex offenders, domestic and international fugitives, threats to officer safety, military detainees, persons of interest, and immigration violators.

In FY 2010, US-VISIT's IDENT contained more than 120 million fingerprint records of legitimate travelers to the United States, immigration benefit seekers, and immigration violators. Each time DHS encounters an individual, that person's fingerprints are compared against the watchlist and the results returned to the requester. At the initial encounter, the individual is enrolled and the captured biometric data is stored in IDENT. The individual's fingerprints are compared against the enrollment to verify identity of each subsequent encounter. Each time fingerprints are taken, the reason for the encounter—such as entry to the United States at an air, sea, or land port of entry (POE), or an application for a visa or immigration benefits—is recorded in IDENT. For example, when a foreign traveler provides fingerprints to a U.S. Customs and Border Protection (CBP) officer at a POE, the identity verification and watchlist results are returned to the officer within 10 seconds. Identity verification and matches against the watchlist assist decisionmakers in determining admissibility or eligibility for immigration benefits. Using an automated biometric system enables the rapid identification of KSTs, criminal aliens, and repeat immigration violators, even if such individuals try to conceal their true identities by using aliases or fraudulent travel documents.

ADIS contains arrivals, departures, and current immigration status about noncitizens from multiple systems and matches events to a unique person to create a complete record of events during his or her visit. The main contributing systems are IDENT, the Student and Exchange Visitor Information System (SEVIS), the Computer Linked Application Information Management System (CLAIMS3), and TECS. ADIS matches traveler departures with arrivals to ascertain compliance, store travel and status adjustment records, and provide a range of ad hoc queries and reporting capabilities. ADIS receives 100 percent of all system-confirmed arrivals and all air/sea arrival and departure manifests, along with Form I-94/I-94W arrival/departure records.

Identity Management and Screening Services – US-VISIT is the DHS focal point for providing identity management and screening services by providing diverse assistance and timely responses to DHS in supporting immigration and border management as well as foreign government stakeholders. The IDENT and ADIS systems are supported by fingerprint examiners and analysts in US-VISIT's Identity Services Branch. The fingerprint analyses conducted by examiners in the Biometric Support Center (BSC)

provide real-time human biometric verification services, supplementing IDENT's automated matching. Data Integrity Group (DIG) analysts work with data from ADIS and other systems to identify and verify overstay violators. Watchlist records are created for overstay violators and persons of interest with known immigration violations or criminal records. US-VISIT's Law Enforcement and Intelligence (LE&I) personnel coordinate with the operational activities of law enforcement and intelligence agencies to improve the accuracy and usefulness of US-VISIT data systems, including management of the US-VISIT watchlist.

Through efforts of US-VISIT's Information Sharing and Technical Assistance (ISTA) branch, other countries are adopting biometrics as a tool to secure their borders and better manage immigration flows. US-VISIT is supporting these efforts through the deployment of short- and long-term technical experts to assist in the development and implementation of biometric capabilities for visa and POE identity screenings. Furthermore, ISTA supports DHS efforts to ensure advanced and coordinated research and standards on biometric applications for global interoperability. These services provide identity management, and screening support, and reliable information to US-VISIT operational customers and stakeholders.

Unique Identity – This initiative includes integrated workstreams for achieving interoperability between IDENT and the Federal Bureau of Investigation's (FBI) Integrated Automated Fingerprint Identification System (IAFIS), and the Automated Biometric Identification System (ABIS) of the DOD Biometric Task Force Division, as well as development of multimodal biometric capabilities. The objective of using 10-prints along with additional biometric modalities is to provide more data with which to match and verify an individual's identity, subsequently reducing false positive identifications. This enhances the identification of high-risk persons through the ability to receive, link, store, and share information associated with an individual identity among DHS, DOJ, and DOD systems, as well as with biometric data from foreign governments. Interoperability with both foreign and domestic partners enriches the biometric database used by border management, law enforcement agencies, and the intelligence community.

US-VISIT 1.0 – The objective of the investment is to reengineer and integrate the architecture and functionality while addressing gaps in availability, flexibility, scalability, and affordability of IDENT and ADIS. This investment will provide planning, analytical, and solution engineering services to determine the best approach for meeting mission objectives.

Legislative and Administrative Mandates – The budget requests resources necessary for DHS to meet essential legislative mandates and DHS strategic goals:

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA), P.L. 104-208, requires the development of an automated entry and exit control system to collect records of departure and to match them with records of arrival.

The Immigration and Naturalization Service Data Management Improvement Act of 2000 (DMIA), P.L. 106-215, amends IIRIRA to require that the entry and exit data system integrate all "authorized or required" alien arrival and departure data; use available data to match an alien's arrival and departure; assist the Attorney General (now the Secretary

of Homeland Security) and the Secretary of State to identify lawfully admitted nonimmigrants who have overstayed their periods of admission; use available data to produce a report of arriving and departing aliens by nationality, classification as an immigrant or nonimmigrant, and dates of arrival in and departure from the United States; and be implemented at all air and sea POEs by December 31, 2003, at all air and sea ports and the 50 land border ports serving the highest numbers of aliens by December 31, 2004, and at all POEs by December 31, 2005.

The Visa Waiver Permanent Program Act of 2000 (VWPPA), P.L. 106-396, requires that the entry and exit data system –

- Contain records of arrival and departure of every alien admitted under the Visa Waiver Program (VWP) who arrives and departs by air or sea.
- Contain sufficient data to permit the Attorney General (now the Secretary of Homeland Security), for each fiscal year, to calculate the percentage of each VWP country's nationals who are admitted under the VWP and for whom no departure record exists.
- Use available data to produce a detailed annual report to Congress by December 31 of each year containing the numbers of departing aliens with their nationalities, successful arrival/departure matches, and classifications by immigrant or nonimmigrant, VWP, and other immigrants for whom no departure data is available at the end of the alien's authorized period of stay, among other specific information.
- Record arrivals and departures of every VWP alien transiting through air and sea ports by October 1, 2001.

The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act, P.L. 107-56, requires that the entry and exit data system be implemented with all deliberate speed and as expeditiously as practicable, particularly focused on using biometrics and tamper-resistant documents, and be able to interface with law enforcement databases for use by Federal law enforcement to identify and detain individuals who are threats to national security.

The Enhanced Border Security and Visa Entry Reform Act of 2002 (EBSVERA), P.L. 107-173, as amended, requires that the entry and exit data system –

- Use technology and biometric standards to be developed by the National Institute of Standards and Technology, in consultation with other agencies, for alien identification and other purposes.
- Be accessible at POEs and overseas consular posts.
- Consist of equipment and software to allow biometric comparison and authentication of all U.S. visas, other travel and entry documents issued to aliens, and the machine-readable, biometric passports required to be issued to nationals of VWP countries at all POEs by October 26, 2005.

- Have databases containing alien arrival and departure data from machine-readable visas, passports, and other travel and entry documents.
- Use technologies that facilitate the lawful and efficient cross-border movement of commerce and persons without compromising the safety and security of the United States.
- Be integrated into the new and broader Immigration and Naturalization Data System that fully integrates all the former Immigration and Naturalization Service databases and data systems that process or contain alien information.

The Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA), P.L. 108-458, Section 7208, specifically calls for the Secretary of Homeland Security to accelerate the full implementation of a biometric entry and exit system.

The Implementing Recommendations of the 9/11 Commission Act, P.L. 110-53, Section 711, calls for, among other things, the creation of a biometric exit system at airports to record the departure of VWP travelers and to match biometrics against manifests to confirm the individual alien's departure from the United States.

C. Budget Request Summary:

US-VISIT requests 413 full-time positions (FTPs), 400 full-time equivalents (FTEs), and \$302.271 million.

Adjustments-to-Base:

- *GSA Rent* – (0 FTP, 0 FTE, \$0.059 million increase). An increase in the payments to the General Services Administration for rental of office space and rent-related services.
- *Non-Pay Inflation Excluding GSA Rent* – (0 FTP, 0 FTE, \$4.430 million increase). Increase in operations by approved inflation factors to other appropriate items excluding salaries and benefits and GSA rent.
- *Termination of One-Time Data Center Mirroring and Migration Cost* – (0 FTP, 0 FTE, \$45.244 million decrease). A \$45.244 million decrease in Data Center Mirroring and Migration. The project has been completed.
- *Operational Support Reduction* – (0 FTP, 0 FTE, \$4.430 million decrease). This is the offset to the non-pay inflation that will be absorbed through administrative efficiencies.
- *Administrative Savings Initiative* – (0 FTP, 0 FTE, \$7.139 million decrease). This decrease of \$7.139 million for an administrative savings initiative is a reduction to the following activities: advisory and assistance services; travel of people and things; printing and reproduction; and supplies.
- *Data Center Consolidation Savings* – (0 FTP, 0 FTE, \$2.475 million decrease). This decrease of \$2.475 million is achieved through DHS data center consolidation.

Program Changes:

- *Identity Management and Screening Services* – (0 FTP, 0 FTE, \$1.600 million increase). The requested program increase will allow identity management and screening services the ability to review all incoming overstay records.
- *US-VISIT 1.0* – (0 FTP, 0 FTE, \$4.869 million increase). The requested program increase is to provide funding to address system performance limitations and increasing O&M costs through the evaluation of technologies that will leverage a modernized architecture, resulting in an increasing transaction throughput and reducing the US-VISIT hardware footprint at DHS data centers.
- *Acquisition Workforce* – (1 FTP, 1 FTE, \$0.138 million increase). The requested program increase is to provide funding to ensure the future programmatic requirements for activities as defined in the Office of Federal Procurement Act.
- *Business Support Services* – (0 FTP, 0 FTE, \$1.299 million decrease). The requested net program decrease is due to increased working capital fund costs related to two new office locations and for the realignment of funds to Identity Management and Screening Services for the sustainment of unvetted overstay backlog processing.

II. Summary of FY 2012 Budget Estimates by Program/Project Activity (PPA)

Department of Homeland Security
National Protection and Programs Directorate
United States Visitor and Immigrant Status Indicator Technology
 Summary of FY 2012 Budget Estimates by Program/Project Activity
 FY 2012 Request
 (Dollars in Thousands)

Program/Project Activity	FY 2010 Actual		FY 2011 C.R.		FY 2012 Request		Increase (+) or Decrease (-) For FY 2012					
							Total Changes		Program Changes		Adjustments-to-Base	
	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT
United States Visitor and Immigrant Status Indicator Technology	192	\$358,123	399	\$373,762	400	\$302,271	1	(\$71,491)	1	\$5,308	---	(\$76,799)
Subtotal, Enacted Appropriations and Budget Estimates	192	\$358,123	399	\$373,762	400	\$302,271	1	(\$71,491)	1	\$5,308	---	(\$76,799)
Less: Adjustments for Other Funding Sources	---	---	---	---	---	---	---	---	---	---	---	---
Net, Enacted Appropriations and Budget Estimates	192	\$358,123	399	\$373,762	400	\$302,271	1	(\$71,491)	1	\$5,308	---	(\$76,799)

Note: FY 2012 request does not include a proposed \$25.642 million cancellation from prior year unobligated balances for Biometric Air Exit.

US-VISIT

Program Performance Justification

(Dollars in Thousands)

PPA: UNITED STATES VISITOR AND IMMIGRANT STATUS INDICATOR TECHNOLOGY

	Perm Pos	FTE	Amount
2010 Actual	212	192	\$358,123
2011 C.R.	412	399	373,762
2012 Adjustments-to-Base	---	---	(76,799)
2012 Current Services	412	399	\$296,963
2012 Program Change	1	1	5,308
2012 Request	413	400	\$302,271

US-VISIT requests \$302.271 million in FY 2012 for ongoing operations, including the implementation of initiatives and the deployment of capabilities.

CURRENT SERVICES PROGRAM DESCRIPTION:

Business Support Services

<i>In thousands</i>	FY 2010 Actual	FY 2011 C.R.	FY 2012 Request*
Business Support Services	\$118,692	\$118,692	\$107,976

*The FY 2012 request includes an additional \$0.138 million for an Acquisition Workforce FTP / FTE.

US-VISIT's business support services provides Federal staffing to all mission activities, such as Systems O&M, Unique Identity, US-VISIT 1.0, and business support activities. The demand for US-VISIT services continues to grow along with a workforce to deliver these services. Given the long-term goals of the organization and the nature of the services supported, US-VISIT has transitioned the majority of the contract positions to Federal positions, promoting long-term continuity. In addition, US-VISIT plans to competitively award some activities currently being performed by the prime systems integrator. By minimizing the role of a prime systems integrator, US-VISIT will gain efficiencies through the reduction of costs associated with these efforts.

In FY 2012, the working capital fund is increasing to pay for DHS provided data center services and network services. The rent within the working capital fund is increasing for the US-VISIT office space in Arlington, VA, and San Diego, CA. US-VISIT's business support services provide mission-support resources, ensuring that appropriate strategic and operational planning activities, human capital, budget and financial management resources, program office IT technical support, acquisition policies and procedures, and administration and logistics are in place.

FY 2010 Accomplishments – Business Support Services

The significant accomplishments in FY 2010 for Business Support Services were:

- Developed a program management Strategic Implementation Plan that aided the planning of improvement initiatives, documentation of milestones, and development of both customer service and performance targets. All initiatives and performance targets are aligned to US-VISIT's program management vision, mission, and goals. Major milestones for all new initiatives and ongoing services are captured in schedules that are managed and updated biweekly within functional areas. Performance measures are monitored and reported to leadership on a monthly basis.
- Completed the US-VISIT data governance planning and implementation documentation for the handling, quality, and use of US-VISIT data that increases the reliability and data value to stakeholders.
- Implemented a Business Initiation Policy and Business Initiation Process that provide a consistent and formal business initiation process that will ensure all new initiatives receive the same level of visibility and review, and which will improve interactions with new stakeholders.
- Published a Business Services Catalog that more clearly communicates US-VISIT's capabilities and services.
- Developed a requirements development and management policy in accordance with DHS Acquisition Management Directive 102-01 (DHS AMD 102-01). This policy will ensure US-VISIT project development is in alignment with Department standards.
- Developed a comprehensive reference and technical assistance document for domestic and foreign stakeholders on the "Biometric Standards Requirements for US-VISIT." This document provides a baseline for implementing new and improved biometric technologies, capabilities, and services with the aim of achieving global interoperability.
- Established a consolidated operational and functional requirements database accessible by the US-VISIT requirements tool. This requirements tool allows elements of US-VISIT to identify business needs and records when needs are addressed.
- Developed a long-range plan to implement various recommendations from the Contract Process Action Team. These high-level initiatives will result in additional competitive efforts for the work currently being performed by the prime integrator and most notably the work for critical mission areas such as O&M and systems engineering support.

- Prepared for a DHS acquisition review conducted by the DHS Acquisition Program Management Division.
- Established quality management (QM) functions within the Office of the Director. The function incorporates quality assurance, independent verification and validation (IV&V), and process improvement. The US-VISIT Quality Management Strategy was drafted and one quality process audit was completed.
- Implemented the Process Improvement Plan (PIP) to continue to address process improvements necessary to obtain Capability Maturity Model Integration (CMMI) Level 2, deficiencies identified by program quality assurance (QA) and IV&V assessments, and improvements necessary to implement the Department's acquisition policy.
- Completed the assessment of US-VISIT performance measurement practices against Software Engineering Institute (SEI) CMMI Level 2 measurement and analysis criteria. Drafted an improvement plan to assist the program in attaining SEI CMMI Level 2 certification.
- Redefined the US-VISIT life cycle cost model methodology following a review from the DHS Cost Analysis Division. The work breakdown structure and data were updated to incorporate recently completed Independent Government Cost Estimates. This model methodology is used in the budget build documents, resource allocation planning, and other budgetary documents.
- Completed the training for US-VISIT senior management, program, and project personnel using a cost-estimating firm to facilitate the understanding of the Government Accountability Office Cost Assessment Guide practices. The guide has been established as the guideline by which significant program cost estimates will be assessed to improve the quality of cost estimating and final estimates.
- Implemented a performance management repository for the storage of US-VISIT measurement data to enable effective and efficient access to performance measures.
- Achieved quarterly obligation targets that provided a carryover of not more than 10 percent of budget authority. US-VISIT achieved an eight percent carryover.
- Designed and developed a methodology for monitoring human capital and training data. US-VISIT is reviewing the DHS Science and Technology Directorate's Staff Management System (SMS), which is an intranet, web-based software application that collects, stores, and reports all workforce data.
- Developed and implemented enhancements for strategic human capital and training that included the development of a plan for the required skill sets with a focus on a diverse working environment and targeting underrepresented populations. Implemented an employee exit process phase of the employee life cycle.
- Completed the following strategic planning activities in agreement with the DHS Office of the Chief Human Capital Officer for the goals and milestones identified for US-VISIT within the US-VISIT plan; completed an assessment of the human capital

strategic plan and its alignment for FY 2010 – 2013; and implemented reporting metrics to demonstrate progress.

- Developed and implemented a plan to continue workforce realignment efforts to increase Federal staff within current funding levels including organizational design, recruitment, selection, and onboarding.
- Implemented a revised workforce planning process, using the DHS workforce planning guide, to forecast workforce needs by occupational series in support of the US-VISIT mission, service delivery, and capability planning.
- Established a record management capability in accordance with a DHS Chief Administrative Officer strategic objective. US-VISIT will complete an inventory of records, policies and procedures, and train US-VISIT staff to achieve full compliance with Office of Management and Budget (OMB) Circular A-130.
- Participated in FY 2010 DHS National Level Exercise and Exercise Eagle Horizon 2010 to test US-VISIT biometric mission operations in response to a major incident. Mission-critical staff were deployed to an alternate operating facility to perform mission-essential functions and maintain critical operations.
- Initiated processes to procure a replacement facility for US-VISIT BSC San Diego (BSC West) by completing actions to achieve full operational capability. The solicitation for offers was completed. This new facility allows US-VISIT to grow its workforce to handle the increasing workload of digital and latent fingerprint matching and analysis.
- Continued rollout and implementation of an environmental management system to achieve full compliance with Executive Order 13423. Additionally, US-VISIT conducted a management review to assess extending environmental management beyond its existing Arlington, VA headquarters facility.
- Implemented a global public education program to monitor awareness, understanding, and acceptance of the enhanced border and immigration management system among travelers, the news media, and stakeholders, domestically and internationally.
- Generated awareness of policy discussions associated with alternatives for biometric exit capabilities and processes at air-sea exit locations.
- Completed certification and accreditation for IDENT, a security requirement for continued systems operations and integrity.
- Received a score of “green”, the highest security rating from the OMB based on the criteria from the Federal Information Security Management Act (FISMA).

FY 2011 Planned Accomplishments – Business Support Services

In FY 2011, US-VISIT projects to accomplish the following in Business Support Services and to build on prior accomplishments.

- Transition the US-VISIT Delivery Methodology (UDM) to the systems engineering life cycle in support of US-VISIT’s transition to DHS AMD 102-01.

- Implement earned-value management on all US-VISIT development contracts to ensure product delivery is made within cost, schedule, and performance parameters.
- Develop pre-award contract documentation using the acquisition life cycle process, such as statements of work, Independent Government Cost Estimates, and procurement requests.
- Update the IDENT and ADIS Privacy Impact Assessments.
