Subject: unnecessary secrecy

I do not approve of withholding information from the public under the guise of protection. I do not believe that this administration is concerned with public safety. I do believe that this administration would like to hide their corruption from the public. I am more worried about what my own government has done and is doing to my great country than I am of dying at the hand of a terrorist. If you really wanted to protect places such as chemical plants you would tell everybody what was there and draft a citizen patrol of all ages and races. Who would allow terrorists to destroy their own back yard?
