

Masters of Business Administration - Security Technology Transition (MBA STT) Led by The George Washington University

A DHS Center of Excellence

The MBA STT program is building a cross-DHS collaborative workforce with the skillsets needed to develop, acquire, and implement operationally relevant technologies, understand and manage the process of transition, and reduce the barriers to technology transition that research has revealed impede critical technological or operational improvements.

Research and Education Capabilities

- Program consists of 13 MBA core courses and 8 security and technology transition topics
- Hands on experience with real world subject matter, study tours, case competitions, improvisational cases, and projects
- Access and engagement with a specially established industry advisory council
