Introduction

The Computer Forensics Tool Testing (CFTT) program is a joint project between the U.S. Department of Homeland Security's (DHS) Science and Technology Directorate (S&T), the National Institute of Justice, and the National Institute of Standards and Technology's (NIST) Special Programs Office and Information Technology Laboratory. CFTT is supported by other organizations, including the Federal Bureau of Investigation, the U.S. Department of Defense Cyber Crime Center, the U.S. Internal Revenue Service's Criminal Investigation Division Electronic Crimes Program, and the DHS' U.S. Immigration and Customs Enforcement, U.S. Customs and Border Protection and U.S. Secret Service. The objective of the CFTT program is to provide measurable assurance to practitioners, researchers, and other applicable users that the tools used in computer forensics investigations provide accurate results. Accomplishing this requires the development of specifications and test methods for computer forensics tools and subsequent testing of specific tools against those specifications.

Test results provide the information necessary for developers to improve tools, users to make informed choices, and the legal community and others to understand the tools' capabilities. The CFTT approach to testing computer forensics tools is based on well-recognized methodologies for conformance and quality testing. Interested parties in the computer forensics community can review and comment on the specifications and test methods posted on the CFTT website (<https://www.cftt.nist.gov/>).

This document reports the results from testing Cellebrite PA – UFED Cloud v7.62.2.9 for extracting supported cloud-based application data. (UFED – Universal Forensics Extraction Device)

Test results from other tools can be found on the DHS S&T-sponsored digital forensics web page, <http://www.dhs.gov/science-and-technology/nist-cftt-reports>.

How to Read This Report

This report is divided into three sections. Section 1 identifies and provides a summary of any significant anomalies observed in the test runs. This section is sufficient for most readers to assess the suitability of the tool for the intended use. Section 2 identifies the testing environment and cloud based applications used for testing. Section 3 provides an overview of the test case results reported by the tool.

Test Results for Mobile Device Acquisition Tool

Tool Tested: Physical Analyzer – UFED Cloud

Software Version: v7.62.2.9

Supplier: Cellebrite, Inc.

Address: 7 Campus Drive, Suite 210, Parsippany, NJ 07054

Fax: (415) 361-4077

WWW: cellebrite.com

1 Results Summary

Cellebrite PA – UFED Cloud v7.62.2.9 was tested for its ability to extract and report data from supported cloud-based applications.

Except for the following anomalies, the tool acquired and reported all supported cloud-based application data.

Note that the tools tested are reporting what is contained within cloud-based applications. Cloud-based applications often modify data (e.g., compressing the file, changing the file name). which results in an inconsistent file names, file sizes and/or hashes compared to the original file uploaded by a user.

Storage Services (One Drive, Google Drive, iCloud Drive):

- Authentication to “One Drive” was not successful. No data was extracted.
- Profile information (Picture, address, phone number) is not reported for Google Drive.
- While data extraction from iCloud drive was successful, no data (files) were reported.

Email Services (Gmail):

- Email attachments are not reported for all incoming, outgoing and draft emails for Gmail.

Social Media and Messaging data (Facebook):

- Direct messages (DMs) are not reported, and files attached to DMs are not reported.

Social Media and Messaging data (WhatsApp):

- Chats containing file attachments are not reported.

- *Note, as per above graphic and videos, files uploaded to WhatsApp will be returned as jpg and mp4 files.

Messaging data (Discord):

- Profile information (bio) is not reported.

Social Media and Messaging data (Twitter):

- Authentication to Twitter was not successful. No data was extracted.

Social Media and Messaging data (TikTok):

- Authentication to TikTok was not successful. No data was extracted.

NOTE: Some social media applications will compress files as they are uploaded, resulting in inconsistent file size, file names and hash values compared to the original uploaded data files, resulting in different file sizes and hashes. This is reported “as expected” behavior and highlighted with an asterisk.

For more test result details, see section 3.

2 Testing Environment

The tests were run in the NIST CFTT lab. This section describes the selected test execution environment, and the cloud-based data applications used for testing.

2.1 Execution Environment

Cellebrite PA – UFED Cloud v7.62.2.9 was installed on Windows 10 Pro version 10.0.19042.1586.

2.2 Cloud-based Application Data

Cellebrite PA – UFED Cloud v7.62.2.9 was measured by analyzing acquired data from supported cloud-based application data. Table 1 defines the data objects and elements used for testing tools capable of extracting and reporting cloud-based application data.

Service	Artifact Group - Artifacts
Storage Service: Google Drive iCloud One Drive	Account Profile: <i>Profile picture, Username, Password, Token</i> Files: <i>Filename, File Content, File Size, Creation Date, Last Viewed Date, Hash</i>
Email Service: Gmail	Account Profile: <i>Name, Username, Password, Token</i> Contacts: <i>Full Name, Email Address, Last Time Contacted Date, Number of Times Contacted, Last Viewed Date, File Content, File Type, File Size, Last Viewed Data</i> Email Data: <i>Direction (incoming, outgoing), Status (read, unread), Creation Date, Sender, Receiver email addresses, Subject, Email Body, Attachment Filename, Attachment File Content, File Size, Folder: Drafts, Inbox, Sent, Email Header, Hash</i>
Productivity Services: Google Calendar Google Contacts iCloud Contacts	<u>Google Calendar</u> Account Profile: <i>Username, Password, Token</i> Calendar Data: <i>Calendar Name, Event Description, Location of Event Start Date, End Date, Event Recurrence Date Range</i> <u>Google Contacts</u> Account Profile: <i>Email, Password, Token</i> Contact Data: <i>Profile Pic, Name, Company, Job Title, Email, Phone Number, Street Address, City, St, Zip, Birthday, Website, Notes</i>

Service	Artifact Group - Artifacts
Productivity Services, <i>continued</i>	<u>iCloud Contacts</u> Account Profile: <i>Email, Password, Token</i> Contact Data: <i>Profile Pic, Name, Company, Job Title, Email, Phone, Street Address, City, State/Country, Zip, Birthday, Website, Notes</i>
Social Media: Facebook Facebook Messenger Twitter WhatsApp Instagram TikTok	<u>Facebook</u> Account Profile: <i>Username, Email, Password, Token,</i> <i>User Info: Phone, DOB, Education, Family members, etc.</i> Contacts: <i>Name, Facebook ID, Interaction Status (Friend, Family)</i> <i>Work Place, Contact Info: Phone, DOB, Education,</i> <i>Family members, etc.</i> Messages: <i>Participants (To, From), Message content, Last Modified Date</i> <i>Attachment Filename, Attachment File Content, File Size, Hash</i> Calls: <i>Participants (To, From), Creation Date, Duration</i> Posts: <i>Author Name, Participants Names, Type: Comment, Posts</i> <i>Post Content, Create Date, Attachment Filename,</i> <i>Attachment File Content</i> Comments: <i>Creation Date, Participant Name (From), Comment Text Content</i> Files: <i>Filename, File Content, File Type: Audio, Graphic, Video</i> <i>Create Date, Hash</i> <u>Facebook Messenger</u> Messages: <i>Participants (To, From), Message content, Last Modified Date</i> <i>Attachment Filename, Attachment File Content, File Size, Hash</i> Calls: <i>Participants (To, From), Creation Date, Duration</i> <u>Twitter</u> Account Profile: <i>Username, Email, Profile Picture, Password, Token</i> Contacts: <i>Name, Profile Picture, Bio, # of Followers, # of People Following</i> <i>Phone, Email, Date of Last Contact, # of Times Contacted</i> <i>Interaction Status (Follower)</i> Chats: <i>Participants (To, From), Direction (incoming, outgoing)</i> <i>Creation Date, Chat Text, Attachment Filename</i> <i>Attachment File Content</i>

Service	Artifact Group - Artifacts

3 Test Results

This section provides the test cases results reported by the tool. Section 3.1 identifies the cloud-based service and data artifacts within each service used for testing Cellebrite PA – UFED Cloud v7.62.2.9.

The *Test Cases* column in sections 3.1 are comprised of two sub-columns that define a particular test category and individual sub-categories of cloud services that are verified when testing. The results are as follows:

As Expected: the CDX tool returned expected test results.

Partial: the CDX tool returned some of data.

Not As Expected: the CDX tool failed to return expected test results.

Not Applicable (NA): the CDX tool does not provide support.

3.1 Cloud Data Extraction

Cloud-based application data were acquired and analyzed with Cellebrite PA – UFED Cloud v7.62.2.9. All test cases pertaining to the acquisition of supported cloud-based application data were successful with the exception of the anomalies reported in Section 1 [Results Summary](#).

See Tables 2-6 below for more details.

NOTE: Some social media applications will compress files as they are uploaded, resulting in inconsistent file size, file names and hash values compared to the original uploaded data files, resulting in different file sizes and hashes. This is reported as expected behavior and highlighted with an asterisk.
