2021-FEFO-00902		All correspondence (emails, letters) between FEMA personnel and the City of Richwood WV, including consultants (b)(6) of AEMS, (b)(6), (b)(6), (b)(6) (all of Simmons Recovery Consulting) about reimbursement for pay to employees of the Incident Command Structure after the June 23 2016 flood. In the middle of November 2016, employees filed estimates of work records for August, September, October, and November. In addition they were paid beginning soon after the flood in June and all of July. Please do not refer me to the WV Department of Homeland Security, as a FEMA spokesperson did earlier this year. WVDHS never responded to multiple FOIAS about that status of reimbursement to Richwood. Emails I've seen show that FEMA (not the state) was concerned about the size of reimbursement to the ICS in Richwood, as was the Inspector General's Office. Please send all correspondence about the costs and FEMA reimbursements so I can finally clearly explain what happened in my book. Thank you! 2021-FEFO-00638	Coddington, Hicks and Danforth	<p>I am making a request for records under the Freedom of Information Act (5 U.S.C. § 552). I am directing this request to FEMA because the Army Corps of Engineers has indicated that they believe FEMA should hold the records of this cleanup.</p> <p>I would like to request a copy of documents relating to a wildfire cleanup on a specific property. We are looking for records relating to a cleanup after the Lobo Fire in Rough and Ready, CA. More specifically, we are looking for information on the cleanup/clearing and state of a property after the Army Corps of Engineers performed their work. The subject property is (b)(6). The lobo fire occurred in October of 2017 and any work performed by the Army Corps of Engineers should have occurred in the months immediately following. We are unclear on the exact dates that FEMA and the Army Corps of Engineers received the application for cleanup and performed the cleanup.</p> <p>At a minimum, we believe there should have been an application to FEMA by (b)(6) to have the property cleared after it was largely destroyed by the fire. We are hopeful that there may be reports or pictures generated related to the cleanup. If I need to obtain authorization from (b)(6) for the release of this information, please let me know (we are providing his defense in a lawsuit).</p> <p>I am willing to pay the appropriate fees for this request, but would like to be informed if you estimate they will exceed \$250. We are not trying to involve FEMA in this lawsuit in any capacity and will not involve them, just to better understand the situation that gave rise to an injury.</p> <p>If any part of this request is unclear or something additional needs to be provided by me, please do not hesitate to reach out for clarification. 2021-FEFO-00481	University of Utah	Hurricane Maria hit Puerto Rico on September 20th, 2017. The destruction caused by the hurricane prompted the evacuation of thousands of people to the mainland US. Many Puerto Ricans relocated to Massachusetts. Here, many people settled in a city called Holyoke. When Puerto Ricans arrived, they completed intake forms at several Family Resource Centers. I am requesting from FEMA this intake form titled Form A: Family Intake Form 10-17-2017. The intake forms have 4 sections. Section 1 is titled Family members requesting services, section 2 titled Services requested, section 3 referral source and section 4 is titled disposition. There is a fourth sheet which is titled First point of access Hurricane evacuees Service Access Tracking Sheet. There is information on about 5,000 intake forms that contain valuable data on the needs of relocated people after Hurricane Maria. All documents that I am requesting should be completely de-identified. After I reviewed the nine FOIA exemptions on the FEMA website I believe that de-identified intake forms could be shared without the violation of any laws or confidentially. The data that these intake forms contain are crucial to understand the needs of evacuees and create better public policy for the future. Here on the next page, I attach pictures of the intake forms. These are guidance documents that staff used to register and process IHP applications for disasters declared from 2016 through 2018. - The 2,999 notifications to National Processing Service Center (NPSC) staff communicating changes or clarifications in IHP procedures and guidance referenced on the same page of the GAO report [Furthermore, from 2016 through 2018, FEMA sent 2,999 (an average of three per day) notifications to NPSC staff, communicating changes or clarifications in IHP procedures and guidance. -The more than 250 documents, including SOPs, job aids, and FAQs referenced on the same page of the GAO report [Throughout 2016, IHP management officials consolidated over 250 IHP documents, including SOPs, job aids, and Frequently Asked Questions, into a set of 70 SOPs and guidance documents to help NPSC staff process cases more efficiently and provide survivors with relevant information. - The set of 70 SOPs and guidance documents to help NPSC staff process cases more efficiently referenced on the same page of the GAO report - The spreadsheet used by IHP Policy and Doctrine Unit that tracks changes to guidance documents referenced on page 51 of the GAO report The IHP Policy and Doctrine Unit began tracking these changes in a spreadsheet in 2019, which officials stated would allow IHP Policy and Doctrine Unit management to better monitor the changes and the effect of those changes on program implementation. - Documents describing the productivity measurements designed to assess NPSC staff in 2017, as referenced on page 52 of the GAO report While NPSC management developed productivity metrics for staff in 2017, during that year program officials determined they would not use the productivity metric because it was unreliable. - Documents assessing the reliability of the 2017 productivity measurements mentioned above - The database containing individual-level records of NPSC phone calls with applicants, including any information about time spent on the phone or the number of calls an individual NPSC staff member made per day - The following training materials used to train NPSC staff from 2016 to 2018, as referenced on pages 55&56 of the GAO report: [For example, the comprehensive training to answer survivors questions includes a 10-day curriculum. According to program managers, FEMA officials compressed this training to a 5-hour surge training before staff began answering calls when survivors apply for assistance. FEMA provided an additional 3-day training that provided NPSC staff with more skills needed to assist survivors calling FEMA with questions about the status of their application and steps for processing awards and appeals. - 10-day curriculum and materials that was traditionally used to provide comprehensive training for NPSC staff to answer survivors questions - The 5-hour surge training materials used in 2017-2018. Per the GAO report, this surge training is a compressed version of the 10-day curriculum. - The additional 3-day training materials referred to on the same page of the GAO report. 	3/5/2021

Additional years of data and additional columns that can be merged into the publicly available NFIP policies dataset. Alternatively, a new dataset may be provided, containing all data elements provided in the public dataset posted to OpenFEMA, with the addition of these columns and years of data. The data are requested for all policies in the state of North Carolina, and for at least 1995 to the present (only 2010 to the present is available via OpenFEMA). The additional data columns requested are:</p> <ol style="list-style-type: none"> 1. A True/False (or similar) indicator for each policy, identifying whether the covered property is defined by NFIP as a "severe repetitive loss" property. 2. The census block group and census block of the covered property associated with each policy. 3. An identifier for linking multiple policies attributable to the same property over time. 3. A crosslink table to match claims data with policies data. This table is requested both for the existing claims and policies data available on OpenFEMA, and any additional years of data provided in fulfillment of this request. It is requested for policies and claims in the state of North Carolina, for all available years of data provided. 	11/17/2020
