Potable Water Service and Delivery

Department of Homeland Security, U.S. Customs and Border Protection

U.S. Border Patrol (USBP) Yuma Sector

1.0 BACKGROUND

The U.S. Customs and Border Protection (CBP) U.S. Border Patrol (USBP) Yuma, Sector, Yuma, Arizona, has a mission essential requirement due to the Southwest Border Surge (SWB) to obtain potable water service and delivery at locations in the Yuma Station's area of operations (AOR) for in-field processing. The need to have water available in these locations has been identified and will assist with maintaining a safe environment for the excessive number of non –citizens illegally entering the United States. The temperatures for the Yuma, Arizona area can exceed 118 degrees during the summer months and the aforementioned items are required to assist avoidance of migrant fatalities. This Statement of Work (SOW) defines the requirements for the purchase and delivery of potable water to the locations as indicated.

2.0 SCOPE OF WORK

The provision of potable water service with regular scheduled services will be performed as identified and detailed by the Description of Tasks in 4.0, Deliverables in 5.0 and Appendix One of this SOW.

3.0 APPLICABLE DOCUMENTS

Commercial Industry standards shall be applicable.

4.0 DESCRIPTIONS OF TASKS

The Contractor shall complete the following tasks as required to comply with Health and Safety compliance and per assignment of this SOW.

4.1 Tasks

- 4.1.1 The Contractor shall furnish the necessary equipment, materials, supplies, to include water storage tanks, tank stands, health and safety scheduling of daily evaluation and supervision of necessary services to deliver, inspect, assemble, connect, test and repair or replace equipment to ensure consistent upkeep service of portable units and hand wash stations.

- 4.1.2 The Contractor shall deliver all equipment in excellent condition and perform sanitary cleaning functions as outlined in Section 5.0.
- 4.1.3 The Contractor shall be responsible for regular testing of equipment for optimal functionality, maintain servicing, cleaning, and disinfecting of all potable water tanks in accordance with the daily delivery schedule as per section 5.3.
- 4.1.4 The contractor shall deliver weekly service reports to the point of contact to ensure deliverables are meeting the required needs.

5.0 DELIVERABLES AND DELIVERY SCHEDULE

The Contractor shall provide the following deliverables to the locations outlined in Section 5.1. The deliverables and delivery schedules should be in accordance with Station operating hours.

5.1 CONTRACTOR SHALL DELIVER TO THE FOLLOWING LOCATIONS:

USBP Yuma Sector

1. County 23rd and US – Mexico Border
2. County 21st and Salinity Canal
3. County 12 & 7/8ths and the Salinity Canal
4. Cable Crossing and the Colorado River
5. Additional sites may be added via the formal contract negotiation and modification process as needed

County: Yuma County, AZ

5.2 Delivery of Equipment (number of units required may fluctuate)

Item	Location	Description	Qty
1	County 23rd and US – Mexico Border - Qty 1 tank Lat: 32.49402 Long: -114.81129 County 21 and the Salinity Canal – Qty 1 tank Lat: 32.52184 Long: -114.79935 County 12 & 7/8ths and the Salinity Canal – Qty 2 tanks Lat: 32.64273 Long: -114.76368	Provision and delivery of potable water	210 gallons for each bulk tank, serviced weekly, Monday to Sunday.

	Cable Crossing and the Colorado River – Qty 1 tank Lat: 32.71806 Long: -114.71981		
--	---	--	--

5.3 Servicing Requirement:

Services shall be performed once daily, Monday through Sunday between 7:00 AM & 4:00 PM Arizona MST.

- 5.3.1 Additional guidance must be directly communicated to the Point of Contacts (POCs) to discuss revisions or corrections and shall be performed and completed daily during operational hours, Monday through Friday 7:00 AM to 4:00 PM.
- 5.3.2 Contractor shall remove and dispose of any visible material and debris in receptacles to be made available on location.
- 5.3.3 Contractor shall service and sanitize the water tanks as required by law and ensure all trash and debris is removed and disposed from the units and areas surrounding the servicing area. Equipment shall be replaced and promptly delivered, setup, and provide guidance regarding prohibited hazardous matter or debris, at the time of delivery.

6. GOVERNMENT-FURNISHED EQUIPMENT AND INFORMATION

The Government does not anticipate providing any GFE or GFI. The Contractor shall provide all necessary resources to service the water requirements.

7. SECURITY

Delivery of the potable water is considered unclassified and off site, therefore there is no need to enter Border Patrol facility.

8. PLACE OF PERFORMANCE

Delivery and services shall be provided at the locations as outlined in Section 5.0 of this SOW.

County: Yuma County, AZ 85365

9. PERIOD OF PERFORMANCE

September 30, 2024 – September 29, 2025

10. SPECIAL CONSIDERATIONS

10.1 Changes to SOW

No changes to this SOW or cost increases shall be incurred without written prior approval from the Contracting Officer Representative (COR) as coordinated through the Program Management Office (PMO) and Contracting Officer (CO). Any changes or cost increases will not take effect until the CO executes a formal written modification.

10.2 The Yuma Station does not observe the standard business hours or the following days as holidays: New Year's Day, Martin Luther King's Birthday, President's Day, Memorial Day, 4th of July, Labor Day, Columbus Day, Veteran's Day, Thanksgiving Day, Christmas Day, any non-federal holiday; or any day designated by Executive Order or by the President's proclamation. Vendor delivery and service requirements must be available at all times based on the schedule provided in Section 5.0.

10.3 In the event CBP grants administrative leave to its government employees, because of inclement weather, potentially hazardous conditions, explosions, or other special circumstances, the vendor will direct its staff to contact the technical or point of contacts as listed.

APPENDIX ONE

Potable Water Service and Delivery Product Description and Specifications – Applicable to All Locations

Potable Water Service and Delivery

220 gallon potable water tanks and stand provided by vendor.

Potable water Requirements

Softening – this is resin based ionic exchange process which removes hardness. This process helps protect treatment equipment and processing which we will be using further on.

Carbon Filtration – this is a filtering process which removes chlorine, chloramines, VOCs and THMs.

20 Micron Filtration – removes sediment and suspended particles.

Micron Filtration – removes sediment and suspended particles.

Reverse Osmosis – a process of pushing water through a semi-permeable membrane at high pressure to remove dissolved minerals and salts.

Storage – we then store this water for further treatment before bottling.

Post Filters

UV disinfection – use of ultraviolet light to disinfect source water

Ozone – Ozonate the water to again to disinfect.

Dispensing Faucet or Bottling Machine – Purified water ready to drink.
