(b)(6)(b)(7)(C) – The revised scope looks good. I will let you know when the TO is awarded and then we can send your WO to HDR for a proposal.

Thanks.

H (b)(6)(b)(7)(C)
Thanks for the feedback. I've attached a revised SOW based on your comments.

A MBTA survey will cover the burrowing owl requirement, as burrowing owls are protected under the MBTA and the surveys have the same timing conditions.

I left site restoration out because I don't know if it's necessary or feasible given the unknown impacts from construction and future use of the site. I'll write a separate SOW for that work if and when the requirement becomes clear.

Regards,

(b)(6)(b)(7)(C)

(b)(6)(b)(7)(C) – This looks good. I had just a couple of questions and comments (included in the attached). Should the section related to the MBTA survey breakout the MBTA survey and the Burrowing Owl survey? Also, do we need to include any site restoration after construction or do you want to just do that as a separate WO, once we know the final impacts from construction?

Thanks for putting this together.

Hi (b)(6);(b)(7)(C)

Attached for your review is a draft SOW for the environmental services to support the wall prototype development. As we discussed it includes: bio and cultural surveys; MBTA pre-construction surveys; SWPPP preparation and implementation; and monitoring during construction.
