Subject: RE: CATEX for GSA site next to Otay Mesa POE

Thanks (b)(6)(b)(7)(C) I spoke to (b)(6)(b)(7)(C) about this on Friday. We are going to prepare a CATEX to cover ingress and egress to the site as well as the prototype construction. We have a couple of surveys of the prototype area we will execute likely around mid-May.

(b)(6)(b)(7)(C)

Thank you for the clarification and apologies for the confusion. I hadn't seen your initial email before (b)(6)(b)(7)(C) called. Since you aren't talking about using the Otay Mesa site itself as the location for prototype mock-up construction, please put my initial recommendation to (b)(6)(b)(7)(C) off to the side.

(b)(6)(b)(7)(C)

Do you have this covered? It does seem that there should be NEPA/HP documentation specific the (proposal and) activities to enhance the Otay Mesa site's capability to support transit through for construction. (But is up to GSA to determine how to meet their NEPA compliance obligations.) I defer to you (b)(6)(b)(7)(C) on waiver status and determination of what activities are connected for the purposes of NEPA review. I am copying (b)(6)(b)(7)(C) since he is the EEMD primary for BPAM actions and I will be out of pocket Monday afternoon.

Any CATEX needs to reference access to border road and not mention prototypes

(b)(6)(b)(7)(C) probably has info regarding the potential waiver. Issue is I need to do some work in prep on this site before prototypes

(b)(6)(b)(7)(C)

There is much that can be recycled from the Tent Cities CATEX. I have all the backup material that was mined in preparation for the CATEX. I am sure that (b)(6)(b)(7)(C) is quite familiar with the site, and may have gone to it when the last survey for burrowing owls was performed.

(b)(6)(b)(7)(C) the EEMD liaison to FOF, and I had a discussion about the NEPA requirements for the fence prototypes. He has suggested that CATEX B9 might be most suitable:

*B9 Acquisition, installation, operation, or evaluation of physical security devices, or controls to enhance the physical security of existing critical assets and the eventual removal and disposal of that equipment in compliance with applicable requirements to protect the environment. Examples include, but are not limited to:

- (a) Motion detection systems,
- (b) Use of temporary barriers, fences, and jersey walls on or adjacent to existing facilities or on land that has already been disturbed or built upon,
- (c) Impact resistant doors and gates,
- (d) X-ray units,
- (e) Remote video surveillance systems,
- (f) Diver/swimmer detection systems, except sonar,
- (g) Blast/shock impact-resistant systems for land based and waterfront facilities,
- (h) Column and surface wraps, and
- (i) Breakage/shatter-resistant glass.

Coordination with the CA SHPO will be required, but we think they will be able to respond very quickly (<week). The site was surveyed for archaeology in 2009, and nothing was found. We used the "credible threat" clause in the SW Border PA for the tent cities, and are preparing the after action report now. (b)(6)(b)(7)(C) has a good relationship with the CA SHPO, and has coordinated numerous projects with them, and she is available to lend a hand.

Let us know how we can assist BPAM.

Subject: CATEX for GSA site next to Otay Mesa POE

(b)(6)(b)(7)(C)

I tried calling but went to VM. (b)(6)(b)(7)(C) had copied me on a portion of the CATEX for the Otay Mesa Port Tent City. I believe this could satisfy the need for GSA regarding BPAM using the property for access to the Wall Prototype site. Can you take a look at it and let me know? What we want to do is basically some minor smoothing, compacting and bring in some material to support vehicle traffic through here during the construction period.

thanks
