

Suspicious Activity Reporting Private Sector Security Training

Domestic and international terrorism plots did not end with 9/11—in fact, they continue to grow and threaten the United States, its citizens, and its critical infrastructure.

Reporting suspicious activity to law enforcement provides leads to further investigations and helps prevent crime, including terrorism.

In the course of their daily duties and responsibilities, private sector security officers and personnel may observe suspicious activity that could be an indicator of a terrorist attack or other criminal activity. This online training video was developed to assist private sector security officers and personnel in:

- **Recognizing what kinds of suspicious behaviors** may be related to pre-incident terrorism activities.
- **Understanding how and where to report suspicious activity.**
- **Protecting privacy, civil rights, and civil liberties** when reporting or documenting information.

Private sector security officers and personnel can incorporate this video into their training programs for current or newly hired personnel.

Nationwide Suspicious Activity Reporting (SAR) Initiative (NSI)

This training was developed by the **Nationwide Suspicious Activity Reporting (SAR) Initiative (NSI)**, a partnership of agencies at all levels that provides law enforcement with another tool to combat crime and terrorism. The NSI has established a national capacity for gathering, documenting, processing, analyzing, and sharing terrorism-related SARs. Visit the NSI Web site at <http://nsi.ncirc.gov> for resources to assist agencies in developing and increasing the effectiveness of their SAR processes and counterterrorism activities.
