- USCG submitted a formal request to DHS on 9 June 2017 to expand our biometrics program to collect information from all illegal migrants found at sea bound for the United State in accordance with revised Maritime Operational Threat Response Business Rules in advance of formal concurrence from the National Security Council. S1 also directed expansion of the Program to cover illegal migrants of ages 7-79. USCG notified DHS of possible conditions of entry being placed on vessels arriving from ports and facilities in the Dominican Republic and Trinidad and Tobago due to lack of effective anti-terrorism measures. This action has been coordinated with the National Security Council and Department of State.

Immigrations and Customs Enforcement (ICE)

➤ Policy Items

- *ICE Enforcement and Removal Operations (ERO)*
 - Immigration
 - Invocation of visa sanctions on China under Section 243(d) of the Immigration and Nationality Act.
 - In regards to ICE's removal mission, China is considered to be an uncooperative country. Despite repeated engagements, to include multiple efforts from the prior administration, China remains unwilling to accept the return of their nationals subject to final orders of removal from the United States in accordance with international law.
 - ICE Point of Contact (POC): (b)(6) ICE ERO (b)(6)
 - ICE is currently addressing the Department of Homeland Security (DHS) Office of Policy's comments on the documents.
 - Schedule a China-specific Policy Coordination Committee within the next 2 weeks to discuss options.
- Proposal for portability of licensure for ICE Health Service Corps health care providers-ICE authorization bill.
 - This proposal codifies the authorities for agency health care providers to deliver critical health care to detained aliens in any jurisdiction. Specifically, the agency needs this proposal in the ICE authorization legislation to expressly overcome non-federal licensure requirements that might otherwise be perceived as limiting ICE health care professionals from carrying out official federal duties.
 - The House ICE authorization bill, as currently drafted, contains the necessary portability of licensure language.
 - Without portability of licensure, nearly 700 of 1,100 ICE Health Service Corps staff cannot deploy, cannot travel across state lines to provide care, and therefore, cannot provide care in an audio/visual environment i.e. telehealth. Therefore, any temporary duty requirement to fulfill routine, mission critical, or contingent needs must be completed by the federal staff. Additionally, some state laws prohibit federal employees from providing a variety of services.
 - Similar portability of licensure laws are already in force for providers at the U.S. Department of Defense (DOD), the Veterans Administration, and the Bureau of Prisons.
 - ICE POC: (b)(6)
 - As of April 26, 2017, legislation is formally being commented on by the agency and committee.

- ICE POC: (b)(6) ICE Office of Policy.
- White Paper on ICE detention standard
 - ICE is reviewing its detention standards in order to increase local government's interest in partnering with ICE for use of detention space. The Appropriations Committee has proposed language in the Explanatory Statement of the Appropriations Bill that requires ICE, through the Secretary of Homeland Security, to submit a report to the Senate and House Committees on Appropriations, justifying the rationale for any changes in detention standards 30 days prior to ICE entering into new detention contracts or changing existing detention contracts.
ICE POC: (b)(6) ICE Office of Policy.

 - Project of Washington, DC, on behalf of the James Madison Project and The Daily Beast's Executive Editor, (b)(6) requested the following:

 - The FOIA requesters advised that this request relates to the Executive Order issued by the President on January 27, 2017, entitled "Protecting the Nation from Foreign Terrorist Entry into the United States." The Executive Order suspended the U.S. Government refugee program, indefinitely barred Syrian refugees, and temporarily barred entry of foreign nationals from seven countries into the United States.

~~FOR OFFICIAL USE ONLY~~

- Per the FOIA request, the scope of the six categories of information should encompass discussions and final determinations that occurred both prior and subsequent to President Trump's signing of the Executive Order on January 27, 2017. The FOIA request ask that ICE uses, but does not limit itself to, the search terms "religious test," "Christian ban," "Jewish ban," and "Muslim ban."
- Memorandum of Understanding (MOU)

- ICE Point of Contact (POC): (b)(6) ICE ERO (b)(6)
- ICE is currently addressing the Department of Homeland Security (DHS) Office of Policy's comments on the documents.
- Schedule a China-specific Policy Coordination Committee within the next 2 weeks to discuss options.
- Proposal for portability of licensure for ICE Health Service Corps health care providers-ICE authorization bill.
 - This proposal codifies the authorities for agency health care providers to deliver critical health care to detained aliens in any jurisdiction. Specifically, the agency needs this proposal in the ICE authorization legislation to expressly overcome non-federal licensure requirements that might otherwise be perceived as limiting ICE health care professionals from carrying out official federal duties.
 - The House ICE authorization bill, as currently drafted, contains the necessary portability of licensure language.
 - Without portability of licensure, nearly 700 of 1,100 ICE Health Service Corps staff cannot deploy, cannot travel across state lines to provide care, and therefore, cannot provide care in an audio/visual environment i.e. telehealth. Therefore, any temporary duty requirement to fulfill routine, mission critical, or contingent needs must be completed by the federal staff. Additionally, some state laws prohibit federal employees from providing a variety of services.
 - Similar portability of licensure laws are already in force for providers at the U.S. Department of Defense (DOD), the Veterans Administration, and the Bureau of Prisons.
 - ICE POC: (b)(6)
 - As of April 26, 2017, legislation is formally being commented on by the agency and committee.

- federal licensure requirements that might otherwise be perceived as limiting ICE health care professionals from carrying out official federal duties.
- The House ICE authorization bill, as currently drafted, contains the necessary portability of licensure language.
 - Without portability of licensure, nearly 700 of 1,100 ICE Health Service Corps staff cannot deploy, cannot travel across state lines to provide care, and therefore, cannot provide care in an audio/visual environment i.e. telehealth. Therefore, any temporary duty requirement to fulfill routine, mission critical, or contingent needs must be completed by the federal staff. Additionally, some state laws prohibit federal employees from providing a variety of services.

The Appropriations Committee has proposed language in the Explanatory Statement of the Appropriations Bill that requires ICE, through the Secretary of Homeland Security, to submit a report to the Senate and House Committees on Appropriations, justifying the rationale for any changes in detention standards 30 days prior to ICE entering into new detention contracts or changing existing detention contracts.

Immigrations and Customs Enforcement (ICE)

➤ Policy Items

- *ICE Enforcement and Removal Operations (ERO)*
 - Immigration
 - Invocation of visa sanctions on China under Section 243(d) of the Immigration and Nationality Act.
 - In regards to ICE's removal mission, China is considered to be an uncooperative country. Despite repeated engagements, to include multiple efforts from the prior administration, China remains unwilling to accept the return of their nationals subject to final orders of removal from the United States in accordance with international law.
 - ICE Point of Contact (POC): Marlen Pineiro, ICE ERO Assistant Director.
 - ICE is currently addressing the Department of Homeland Security (DHS) Office of Policy's comments on the documents.
 - Schedule a China-specific Policy Coordination Committee within the next 2 weeks to discuss options.
- Proposal for portability of licensure for ICE Health Service Corps health care providers-ICE authorization bill.
 - This proposal codifies the authorities for agency health care providers to deliver critical health care to detained aliens in any jurisdiction. Specifically, the agency needs this proposal in the ICE authorization legislation to expressly overcome non-federal licensure requirements that might otherwise be perceived as limiting ICE health care professionals from carrying out official federal duties.
 - The House ICE authorization bill, as currently drafted, contains the necessary portability of licensure language.
 - Without portability of licensure, nearly 700 of 1,100 ICE Health Service Corps staff cannot deploy, cannot travel across state lines to provide care, and therefore, cannot provide care in an audio/visual environment i.e. telehealth. Therefore, any temporary duty requirement to fulfill routine, mission critical, or contingent needs must be completed by the federal staff. Additionally, some state laws prohibit federal employees from providing a variety of services.
 - Similar portability of licensure laws are already in force for providers at the U.S. Department of Defense (DOD), the Veterans Administration, and the Bureau of Prisons.
 - ICE POC: (b)(6)
 - As of April 26, 2017, legislation is formally being commented on by the agency and committee.
