The CO may designate one or more CORs for the Order that will be responsible for the day-to-day oversight of the Order. The COR will represent the CO in the administration of technical details within the scope of the task order. The COR is also responsible for the final inspection and acceptance of all task order deliverables and reports, and such other responsibilities as may be specified in the order. The COR is not otherwise authorized to make any representations or commitments of any kind on behalf of the CO or the Government. The COR does not have authority to alter the Contractor’s obligations or to change the order specifications, price, terms or conditions. If, as a result of technical discussions, it is
desirable to modify order obligations or the specification, changes will be issued in writing and signed by the CO.

(A) The designated COR may provide written technical direction to the Contractor concerning the work performed under the contract. Technical direction is limited to direction that fills in details or otherwise completes the general description of the work set forth in the contract. Technical direction includes:

1) Directions to the Contractor that suggest pursuit of certain lines of inquiry, shift work emphasis, fill in details or otherwise serve to accomplish the contractual Statement of Objectives.

2) Guidelines to the Contractor, that help interpret technical portions of work descriptions.

(B) Technical direction must be within the general scope of work stated in the contract. Technical direction may not be used to:

1) Assign additional work under the contract.

2) Direct a change as defined in the “CHANGES” clause of the contract.

3) Increase or decrease the contract price or estimated contract amount (including fee), as applicable, the direct labor hours, or time required for contract performance.

4) Change any of the terms, conditions or specifications of the contract.

5) Interfere with the Contractor’s rights to perform the terms and conditions of the contract.

(C) All technical direction has to be in writing (or via e-mail) by the applicable COR.

(D) If the Contractor believes any technical direction calls for effort outside the scope of the contract or is inconsistent with this requirement, the Contractor must notify the CO in writing within five (5) working days after receipt of any such instruction. The Contractor must not proceed with the work affected by the technical direction unless and until the Contractor is notified by the CO that the technical direction is within the scope of this contract. To notify the Contractor, the CO will either issue an appropriate contract modification within a reasonable time or advise the Contractor in writing within 30 days that the instruction or direction is-

1) Rescinded in its entirety; or

2) Within the scope of the contract and does not constitute a change under the changes clause of the contract, and that the Contractor should proceed promptly with its performance.

(E) Failure of the Contractor and CO to agree that the instruction or direction is both within the scope of the contract and does not constitute a change under the changes clause, or a failure
to agree upon the contract action to be taken with respect to the instruction or direction, is subject to the Disputes clause of this contract.

(F) Any action(s) taken by the Contractor in response to any direction given by any person other than the CO or the applicable COR is at the Contractor’s risk.

(G) Nothing in the foregoing paragraph will excuse the Contractor from performing that portion of the contractual work statement which is not affected by the disputed technical direction.

DEPARTMENT OF HOMELAND SECURITY (DHS)

Statement of Work (SOW)

Reduced Sodium
I. Background

In a catastrophic disaster, FEMA must provide meals for 1.75M survivors for 72 hours; a total of 10.5 million meals as a requirement of the Federal Interagency Operational Plan (FIOP). The total is sourced through a combination of FEMA stockpile, immediate fulfillment contracts, and federal partner stockpile.

FEMA conducted market research August 2016 – October 2016, on the availability of reduced sodium meals for the youth and elderly populations. Based on market research results, it was determined that; (a) 36 month mandatory shelf-life was a limiting factor, hence a 30-36 month shelf-life (b) commercial meals are normally stocked at vendor’s facility and (c) Reduced Sodium meals have to be specially made and may require a longer ramp up time from receipt of distribution order to delivery.

To mitigate the lead time from delivery order to delivery, Distribution Management Division (DMD)’s current strategy is to stock 8 million meals across its enterprise for immediate delivery during a response. FEMA’s primary stockpiled meals are Reduced Sodium.

II. Period of Performance

Base Year (6 months) and Option 6 months( 6 months each).

III. Meals Specification

FEMA requires type one type of meal; primary type is “Reduced Sodium”

(1) All meals must be shelf stable, self-heating, and include an entrée along with additional meal components that can be consumed either as part of the meal or reserved for a supplemental snack.
(2) The meals should provide a variety of nutrient dense foods that reflect the basic food groups.
(3) Saturated and Trans fats, sodium and added sugars should be limited.
(4) Nuts are NOT to be included due to diverticulitis and allergy conditions.
(5) Meal components should be appropriate for consumption by the full range of disaster survivors including children (5 years and older)* and seniors (65 years and older).
(6) Each case shall include at least six varieties of an entrée meal.
(7) All meals/kits must have 30-36 months long shelf-life remaining upon delivery.
(8) No beverages or drink mixes are required.
(9) Meals should include: utensil package, napkin, salt and pepper, and salt free seasoning packet.

**VI. Production/Delivery Schedule Requirements**

The delivery schedule will be specified in each order. The orders will be classified as either Stock Replenishment or Emergency Response.

Initial delivery freight costs should be included in price quote of each meal unit cost.

Descriptions of each order are detailed below:

1. **Stock Replenishment**
   The contractor(s) may be tasked to deliver meals to both Continental United States (CONUS) and Outside the Continental United States (OCONUS) FEMA Distribution Centers to maintain FEMA’s readiness stock for disaster operations. FEMA shall determine delivery quantities, schedules, and locations at the time of order. The Contractor must have the capability to vendor manage storage up to 4,000,000 reduced sodium meals and to deliver to any Distribution Centers within 30 days of the date of order when requested.

2. **Emergency Response**
   The contractor(s) may be tasked to deliver meals during presidential declared disasters and/or other emergency events. To support this requirement, the contractor must have the capability to produce and ship up to 1,000,000 meals with a shelf-life between 30-36 months within 48 hours of notification. Delivery location shall be anywhere, CONUS (Continental United States) or to the OCONUS (Outside Continental United States) Port of Departure as designated by FEMA. Delivery times shall be designated in the Delivery Order. Contractor may have first right of refusal to fulfill a task order during a declared disaster and/or other emergency event.
VII. **Hours of Delivery**

The vendor shall schedule all delivery activities with the appropriate delivery point of contact after award. IX. Tracking

The Contractor must have the capability to track shipments (i.e. Global Positioning System GPS) and provide updates on a 24/7 basis. For example: FEMA may request diversion of shipment during response to disaster and would need to know current location of shipment in order to calculate accurate arrival time to diverted location.

Upon invoicing, the contractors shall provide an electronic spreadsheet showing details of commodity shipped from place of origin to destination. At a minimum the electronic spreadsheet must provide these details: Load number, BOL number, nomenclature and units shipped, carrier, truck number, trailer number, place of origin, and destination.

X. Logistics Supply Chain Management (LSCMS) Training

During the contract period of performance, FEMA will require at least two (2) individuals from the Contractor’s staff to be trained in the agency’s inventory system of record, known as LSCMS. The training will teach each individual how to enter shipments in LSCMS’ Vendor Portal for visibility purposes. This will be a one (1) day training onsite in Washington, DC. Cost-reimbursement will follow government travel regulations and not exceed $2,000 per contract.

XI. Additional Requirements

(1) Drop Trailer

The Contractor(s) must be able to accommodate requirements during periods of Emergency Response operations where delivery of a 53FT (up to the equivalent of 21,000 meals) trailer containing commodities are dropped at the delivery destination and the tractor and driver are released for up to 30 days.

(2) Diversion Mileage

Sometimes an event or storm shifts directions and impacts several states. This causes FEMA to re-direct the Contractor deliveries that have not reached their original destination. If the change of drop off location occurs beyond 50 miles radius of the original destination point, then the Contractor will bill FEMA at per mile rate for diversions. The diversion mileage will be calculated from the original destination point to the re-directed destination point. The Contractor cannot charge diversion if they have not left the point of origin. The diversion mileage will not be incurred for drop off location changes within 50 mile radius of the original destination point.
(3) **Driver Hour**
Once the Contractor arrives at the destination point, it may take up to four (4) hours for trailer drop coordination. In case of gate delays inhibiting trailer drop off exceeding four (4) hours and fifteen (15) minutes, the Contractor is allowed hourly charge for the waiting period. The trailer’s real-time position must be verifiable via electronic tracking system to demonstrate that waiting period extended beyond 4 hours and 15 minutes. FEMA must be notified immediately if potential gate delays is expected. The Contractor may bill at a minimum of one (1) hour for the waiting time.

(4) **Power Only to Transport Loaded Trailer**
The Contractor(s) must be able to provide power only to a FEMA destination to transport a loaded trailer. This will be billed based on mileage from FEMA pick up point to drop off location. FEMA may change the drop off location up to 50 mile radius which will not incur additional mileage. If the drop off location changes beyond 50 mile radius, then diversion mileage rate will be incurred.

(5) **Power and Trailer to Transport Inventory**
The Contractor(s) must be able to provide power and trailer to move FEMA inventory from Distribution Center to event site. This will be billed on mileage from FEMA pick up point to drop off location. FEMA may change the drop off location up to 50 mile radius which will not incur additional mileage. If the drop off location changes beyond 50 mile radius, then diversion mileage rate will be incurred.
