

# VIRTUAL CORPORATE SECURITY ENGAGEMENT SERIES

IN TODAY'S EVER-EVOLVING THREAT ENVIRONMENT — INCLUDING THE ONGOING GLOBAL PANDEMIC — IT IS ESSENTIAL FOR PUBLIC AND PRIVATE SECTOR PARTNERS TO CONTINUE TO COLLABORATE TO ENSURE CORPORATE SECURITY PRACTICES REMAIN RELEVANT AND EFFECTIVE.

It is only by building relationships and proactively sharing resources that we can grow our security knowledge base and protect the United States and the companies within it.

The Department of Homeland Security (DHS), Office of Intelligence and Analysis (I&A), Private Sector Engagement provides regular opportunities for public and private sector entities to engage with one another.

The Private Sector Engagement Virtual Corporate Security Engagement Series (CSES) consists of several two-hour regional virtual engagements held around the country, which are focused on navigating the security landscape of the evolving digital business environment. This series generates discussion among public and private sector partners regarding some of the most challenging security issues our nation faces today.

## OVERVIEW

CSES has been designed as information sharing forums and networking platforms, which focus on topics that are critical to our national security.

The series features prominent speakers from both the public and private sector who shed light on how to best leverage corporate security efforts and analytic capabilities. Some of the topics addressed may include:

- Cyber Threat
- Cyber Mitigation
- Response to Insider Threats
- Global Pandemic Updates
- and Terrorism, among others.

The sessions reflect the most pressing global security challenges, while also addressing the current needs of local markets and providing ample scope for in-depth and engaging discussions.

## WHY ATTEND A CSES?

- Explore **key trends** and **lessons learned** that are shaping security decisions across the country.
- Learn about proven best practices through real-life **case studies** and **keynote speakers**.
- Get inspired by professional stories shared by **corporate security pioneers** and **federal partners**.
- Gain a clearer understanding of current **physical** and **digital security challenges**.
- Engage with **public** and **private sector partners**.
