

# Fiscal Year 2017 Entry/Exit Overstay Report

Homeland  
Security

# Message from the Secretary

I am pleased to present the following “Fiscal Year 2017 Entry/Exit Overstay Report” prepared by the U.S. Department of Homeland Security (DHS). Pursuant to the requirements contained in Section 2(a) of the *Immigration and Naturalization Service Data Management Improvement Act of 2000* (Pub. L. No. 106-215) and the FY 2018 Joint Explanatory Statement, DHS is submitting this report on overstay data.

DHS has generated this report to provide data on departures and overstays, by country, for foreign visitors to the United States who were expected to depart in Fiscal Year (FY) 2017 (October 1, 2016 - September 30, 2017). DHS is working with the U.S. Department of State (DOS) to share information on departures and overstays, especially as it pertains to the visa application and adjudication process, with the goals of increasing visa compliance and decreasing overstay numbers and rates.

This report is being provided to the following Members of Congress:

The Honorable Charles E. Grassley  
Chairman, Senate Committee on Judiciary

The Honorable Dianne Feinstein  
Ranking Member, Senate Committee on Judiciary

The Honorable Bob Goodlatte  
Chairman, House Committee on Judiciary

The Honorable Jerrold Nadler  
Ranking Member, House Committee on Judiciary

The Honorable Kevin Yoder  
Chairman, House Appropriations Subcommittee on Homeland Security

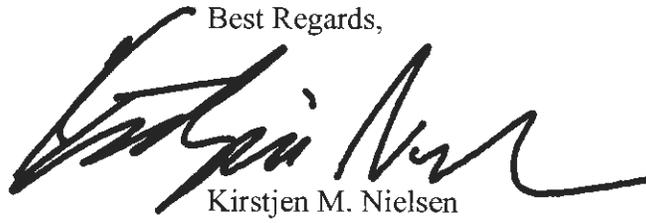

The Honorable Lucille Roybal-Allard  
Ranking Member, House Appropriations Subcommittee on Homeland Security

The Honorable Shelley Moore-Capito  
Chairman, Senate Appropriations Subcommittee on Homeland Security

The Honorable Jon Tester  
Ranking Member, Senate Appropriations Subcommittee on Homeland Security

Inquiries relating to this report may be directed to the DHS Office of Legislative Affairs at (202) 447-5890.

Best Regards,

A handwritten signature in black ink, appearing to read "Kirstjen Nielsen", written in a cursive style.

Kirstjen M. Nielsen

# Executive Summary

This report provides data on expected departures and overstays, by country, for foreign travelers to the United States who entered as nonimmigrants through an air or sea port of entry (POE) and who were expected to depart in FY 2017 (October 1, 2016 – September 30, 2017). It does this by examining the number of entries, by country, for foreign travelers who arrived as nonimmigrants during this time as of October 1, 2017.

An overstay is a nonimmigrant who was lawfully admitted to the United States for an authorized period, but remained in the United States beyond his or her authorized period of admission. The authorized admission period can be a fixed period; or for the duration of a certain activity, such as the period during which a student is pursuing a full course of study or any authorized technical/practical training. DHS identifies two types of overstays: 1) individuals for whom no departure has been recorded (Suspected In-Country Overstays), and 2) individuals whose departure was recorded after their authorized period of admission expired (Out-of-Country Overstays).

Determining lawful status requires more than solely matching entry and exit data. For example, a person may receive from U.S. Customs and Border Protection (CBP) a six-month admission upon entry, and then he or she may subsequently apply for and receive from U.S. Citizenship and Immigration Services (USCIS) an extension of up to six months. Identifying extensions, changes, or adjustments of status are necessary steps to determine whether a person has overstayed their authorized period of admission.

Valid periods of admission to the United States vary; therefore, it was necessary to establish “cutoff dates” for the purposes of a written report. Unless otherwise noted, the tables accompanying this report refer to departures that were expected to occur between October 1, 2016 and September 30, 2017.

This report presents the overstay rates to provide a better understanding of those who overstay and remain in the United States beyond their authorized period of admission with no evidence of an extension to their period of admission or adjustment to another immigration status. Rates are provided for the following major categories:

## **Total Overstay Rate**

DHS has determined that there were 52,656,022 in-scope nonimmigrant admissions<sup>1</sup> to the United States through air or sea POEs with expected departures occurring in FY 2017, which represents the majority of air and sea annual nonimmigrant admissions. Of this number, DHS calculated a total overstay rate of 1.33 percent, or 701,900 overstay events. In other words, 98.67 percent of the in-scope nonimmigrant entries departed the United States on time and in accordance with the terms of their admission.

---

<sup>1</sup> See Appendix A for a full list defining “in-scope nonimmigrant classes of admission.”

This report breaks down the overstay rates further to provide a better picture of those overstays who remain in the United States beyond their period of admission and for whom there is no identifiable evidence of a departure, an extension of period of admission, or transition to another immigration status. At the end of FY 2017, there were 606,926 Suspected In-Country Overstays. The overall Suspected In-Country Overstay rate for this scope of travelers is 1.15 percent of the expected departures.

Due to continuing departures and adjustments of status by individuals in this population, by January 24, 2018 the number of Suspected In-Country Overstays for FY 2017 decreased to 494,710, rendering the Suspected In-Country Overstay rate of 0.94 percent. As of May 1, 2018, the number of Suspected In-Country Overstays for FY 2017 further decreased to 421,325, rendering the Suspected In-Country Overstay rate as 0.80 percent. As of May 1, 2018, DHS has been able to confirm the departures or adjustment of status of more than 99.20 percent of nonimmigrants scheduled to depart in FY 2017 via air and sea POEs.

### **Visa Waiver Program (VWP) Country Overstay Rate**

This report separates Visa Waiver Program (VWP) country overstay figures from non-VWP country figures. For VWP countries, the FY 2017 Suspected In-Country Overstay rate is 0.51 percent of the 22,472,710 expected departures.

### **Non-Visa Waiver Program Participant Overstay Rate**

For non-VWP countries, the FY 2017 Suspected In-Country Overstay rate is 1.91 percent of the 14,659,249 expected departures.

### **Student or Exchange Visitor Visa Overstay Rate**

For nonimmigrants who entered on a student or exchange visitor visa (F, M, or J visa), DHS has determined there were 1,662,369 students and exchange visitors scheduled to complete their program in the United States. However, 4.15 percent stayed beyond the authorized window for departure at the end of their program.<sup>2</sup>

### **Canada and Mexico Overstay Rates**

Unlike other countries, a majority of travelers from Canada and Mexico enter the United States by land. Figures pertaining to Canada and Mexico are presented separately from the other countries due to the fact that air and sea information represent a smaller portion of the Canadian and Mexican travel population. For Canada, the FY 2017 Suspected In-Country Overstay rate for those traveling through air and sea POEs is 1.01 percent of 9,215,158 expected departures. For Mexico, the FY 2017 Suspected In-Country Overstay rate for those traveling through air and sea POEs is 1.63 percent of 2,916,430

---

<sup>2</sup> Excludes Canada and Mexico student or exchange visitors.

expected departures. This represents only travel through air and sea POEs and does not include data on land border crossings.

The FY 2017 report covers the same classes of admission as the FY 2016 DHS Entry and Exit Overstay Report.<sup>3</sup> These classes include those traveling to the United States temporarily for business and pleasure, including those from VWP designated countries, traveling under an Electronic System for Travel Authorization (ESTA), student travelers, worker classifications, and other classes of nonimmigrant admission.<sup>4</sup> These classes of admission account for 97 percent<sup>5</sup> of all air and sea nonimmigrant admissions to the United States in FY 2017. The only excluded classes are diplomats, crewmembers, aliens in transit, and section 1367 special protected classes (Appendix B).<sup>6</sup>

In FY 2017, DHS expanded its overstay mission capabilities. In addition to further developing a vetting unit responsible for assisting the review of Out-of-Country overstay leads, CBP started a notification process for VWP travelers who overstayed their period of admission in the United States, emailing them regarding their non-compliance and informing them of the ramifications of their violation. In FY 2018, CBP also began notifying VWP travelers in advance of the end date of their period of authorized admission. CBP plans to further expand these notifications to additional populations. Additionally, DHS began requiring VWP countries with an overstay rate equal to or exceeding two percent to implement a public awareness campaign intended to educate their nationals on the importance of abiding by the terms of their admission to the United States.

Overall, total FY 2017 overstay rates are lower than those presented in the previous year's FY 2016 report. Appendix C provides FY 2016 reported figures and updated statistics on total overstay rates from that report year updated through May 1, 2018. At the end of FY 2016, the overall Suspected In-Country Overstay number was 628,799, or 1.25 percent. As of May 1, 2018 the number of Suspected In-Country Overstays had further decreased to 340,377 rendering the FY 2016 Suspected In-Country Overstay rate 0.67 percent. While, at this time, there is no specific cause that can be directly attributed to the decrease in overstay rates between FY report years, it is believed that some contributing factors are: improvements in immigration enforcement, and border security operations, and country specific changes to political, infrastructure, or humanitarian conditions.

DHS continues to improve its data collection of both biographic and biometric data on travelers departing the United States, and these improvements are discussed in this report. DHS will continue to publicly release this report, at a minimum, on an annual basis.

---

<sup>4</sup> See Appendix A

<sup>5</sup> Appendix B details the 3 percent not accounted for in this report. More than 95 percent of that total are the C or D category (in-transit aliens/airline crewmembers) whose records are difficult to quantify due to the frequency of arrivals and departures close together in time. CBP will continue to improve its ability to report these numbers.

<sup>6</sup> Section 1367 of title 8, United States Code, establishes rules and penalties for the disclosure of information related to applicants for or beneficiaries of U visas, T visas, or Violence Against Women Act (VAWA) protections.

# I. Legislative Language

This document responds to the legislative language set forth in Section 2(a) of the *Immigration and Naturalization Service Data Management Improvement Act of 2000* (Pub. L. No. 106-215) and the FY 2018 Joint Explanatory Statement.

Section 2(a), amending section 110 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, states in relevant part:

“(e) REPORTS —

“(1) In General — Not later than December 31 of each year following the commencement of implementation of the integrated entry and exit data system, the Attorney General shall use the system to prepare an annual report to the Committees on the Judiciary of the House of Representatives and of the Senate.

“(2) Information — Each report shall include the following information with respect to the preceding fiscal year, and an analysis of that information:

(A) The number of aliens for whom departure data was collected during the reporting period, with an accounting by country of nationality of the departing alien.

(B) The number of departing aliens whose departure data was successfully matched to the alien’s arrival data, with an accounting by the alien’s country of nationality and by the alien’s classification as an immigrant or nonimmigrant.

(C) The number of aliens who arrived pursuant to a nonimmigrant visa, or as a visitor under the visa waiver program under section 217 of the Immigration and Nationality Act (8 U.S.C. 1187), for whom no matching departure data have been obtained through the system or through other means as of the end of the alien’s authorized period of stay, with an accounting by the alien’s country of nationality and date of arrival in the United States.

(D) The number of lawfully admitted nonimmigrants identified as having remained in the United States beyond the period authorized by the Attorney General, with an accounting by the alien’s country of nationality.

The FY 2018 Joint Explanatory Statement states:

The Department’s Entry/Exit Overstay Report for fiscal year 2016 revealed that, at the end of that year, there were 628,799 individuals who remained in the United States beyond their authorized period of stay and for whom departure from the United States could not be verified. The Department is directed to develop and report within 180 days of the date of enactment of this Act on a statistically sound metric for measuring the total nonimmigrant air and sea overstay population in the United States at a given time. The report should also describe the

characteristics of suspected in-country overstays and detail how the Department will improve its collection and use of data sets necessary to develop a more comprehensive in-country alien overstay estimate.

## II. Background

The purpose of this report is to identify the Fiscal Year (FY) 2017 country-by-country overstay rates for all air and sea in-scope<sup>7</sup> nonimmigrant classes of admission.

The overstay identification process is conducted utilizing arrival, departure, and immigration benefit information, which is consolidated to generate a complete history for individuals who traveled, and were subsequently admitted, to the United States, as described below.

U.S. Customs and Border Protection (CBP) receives passenger manifests from commercial sea and air carriers and private aircraft for all arrivals to and departures from the United States. These manifests indicate who is aboard the aircraft or vessel. In the land environment, CBP receives travel data on third-country nationals who enter Canada from the United States at a land port of entry.<sup>8</sup> Additionally, CBP is able to reconcile a significant portion of travelers who enter through our borders with both Canada and Mexico, since the majority of those travelers are frequent border crossers and CBP is able to close a previous arrival when recording a new arrival.

CBP Officers (CBPOs) interview travelers upon arrival at United States ports of entry (POEs) to determine the purpose and intent of travel. CBPOs collect biographic information on all nonimmigrants applying for admission and confirm the accuracy of the biographic manifest data provided by the carriers, which are subject to fines for any missing or inaccurate data. For most foreign nationals, CBP also collects fingerprints and digital photographs<sup>9</sup> to conduct biometric comparisons against data previously provided to the United States. In addition, CBP strengthened the document requirements at air, land, and sea POEs by requiring all travelers, U.S. citizens and foreign nationals alike, to present a passport or other acceptable document that denotes identity and citizenship when entering the United States.<sup>10</sup>

For departing travelers, air and sea carriers provide biographic manifest data for all travelers prior to leaving the United States. Federal regulation requires the carriers to provide specific sets of data, which include name and passport number, and the carriers are subject to fines for missing or inaccurate data. CBP then matches these biographic departure data against arrival data to determine who has complied with the terms of admission and who has overstayed. CBP maintains a separate system specifically for this purpose. This system also receives other Department of Homeland Security (DHS) data relevant to whether a person is lawfully present, such as immigration benefit information or information on student visitors to the United States.

---

<sup>7</sup> See Appendix A for a full list defining “In-Scope nonimmigrant classes of admission”

<sup>8</sup> For the purposes of this paragraph, third country national refers to a person who is not a citizen of Canada or the United States.

<sup>9</sup> 8 C.F.R. §235.1(f)(1)(ii)

<sup>10</sup> The Western Hemisphere Travel Initiative is a joint U.S. State Department/DHS initiative that implemented §7209 of the Intelligence Reform and Terrorism Prevention Act of 2004 (Pub. L. No. 108-458).

In general, transportation hubs and border infrastructure in the United States were not constructed with exit processing in mind. For example, airports in the United States do not have areas designated exclusively for travelers leaving the United States. Instead, traveler departures are recorded biographically using outbound passenger manifests provided by commercial carriers. Under the Advance Passenger Information System legislation, carriers are required to validate the manifest against the travel document presented by the traveler before he or she is permitted to board his or her aircraft or sea vessel. DHS is also implementing a biometric-based departure program to complement the biographic data collection that already exists.

Travelers arrive at land POEs via various modes of transportation, including cars, trains, buses, bicycles, trucks, and on foot. There are major physical, logistical, and operational obstacles to collecting an individual's biographic and biometric data upon departure. Due to the existing limitations in collecting departure data in the land environment, this report provides limited departure and overstay information for land POEs; when used, it is primarily to match records of individuals arriving by air and sea to those that may have subsequently departed by land to Canada. CBP's ongoing efforts, described in this report, will continue to improve the existing process and availability of departure data.

### III. Existing Operations

#### A. Air and Sea Environments

Today, in the air and sea environments, CBP obtains entry records through both carrier-provided manifest data and inspections conducted by CBPOs. CBP obtains biographic data on travelers who lawfully enter or depart the United States by air or sea.<sup>11</sup> Federal regulation requires air and sea carriers to submit passenger manifests to CBP; these are then recorded as arrivals to, or departures from, the United States.<sup>12</sup> Air carriers are required to provide data not solely on who has made a reservation for a particular flight, but who is actually on the aircraft at the time the aircraft departs.<sup>13</sup> Airlines are subject to fines for making errors regarding who is or is not on any particular aircraft.<sup>14</sup>

While CBP currently obtains biographic arrival and departure information on almost all foreign nationals in the air and sea environments, and biometric entry data in the air environment, CBP is committed to continuously improving existing biometric and biographic exit and entry processes. These initial biometric exit processes are providing new opportunities to verify an individual's identity and facilitate collection of new biographic information on individuals where none previously existed. The progress made in both the biometric entry and exit environments is below.

##### **Biometric Air Exit**

During FY 2016, CBP began a field test of facial recognition technology for internationally departing air passengers at Atlanta/Hartsfield International airport. Building on the success of that program, CBP has developed a robust cloud-based service which uses facial recognition to match travelers against their photographs contained on their travel documents or from previous arrival processing. Utilizing the air passenger manifest, CBP retrieves traveler photographs from DHS holdings in advance and segregates them into smaller, more manageable data sets. The architecture allows for the real-time biometric exit processing of travelers. As part of this, fingerprint checks are run in the background and concurrently with biographic law enforcement queries. In FY 2017, CBP implemented biometric air exit demonstration projects at eight international airports; from January 1, 2017 to November 30, 2017, over 175,000 travelers and 1,500 flights were processed.

Additionally, CBP has partnered with airports and airlines to implement integrated solutions to collect biometric exit data utilizing front-end capture devices supplied by airports or airlines that are integrated with the biometric solution. In partnership with JetBlue in Boston, CBP has undertaken a paperless boarding project where the face is used to confirm identity of travelers boarding the plane. Additionally, Delta Airlines implemented an auto boarding gate capability at

---

<sup>11</sup> In addition, the Department obtains biometric information on all nonimmigrants who enter the United States via air and sea, except for those who are exempt by regulation, which includes those over the age of 79 or under 14, diplomats, and certain other discrete categories. See 8 C.F.R. §§ 235.1(f)(1)(ii); 235.1(f)(1)(iv).

<sup>12</sup> 8 C.F.R. §231.1, (describing the specific data elements for each passenger that carriers are required to provide).

<sup>13</sup> 19 C.F.R. §§ 122.49a; 122.75a.

<sup>14</sup> 8 U.S.C. § 1221(g).

John F. Kennedy International Airport using CBP's matching service. In FY 2017 CBP continued to expand integrated biometric exit projects with airports and airlines, and is moving to a seamless biometric exit collection process. As a result of the pilot programs described above, CBP believes that facial recognition technology at the airline departure gate is a scalable solution for biometric exit in the air environment. Furthermore, the biometric match allows CBP to ensure the accuracy of the biographic data provided by air and sea carriers used to conduct law enforcement and national security based queries. It also mitigates the possibility of an imposter using a legitimate document.

## **B. Land Environment**

The collection of departure information in the land environment is more difficult than in the air and sea environments due to the major physical, logistical, and operational obstacles involved with electronically collecting an individual's biographic and biometric data. Additionally, in the land environment, it is not feasible to obtain advance reporting of arrivals and departures, as the majority of travelers cross the borders using their own vehicle or as a pedestrian.

### **1. Northern Border**

On the Northern border, CBP is addressing this limitation through a partnership with the Canada Border Services Agency. The 2011 U.S.-Canada Beyond the Border declaration and action plan,<sup>15</sup> included an entry and exit initiative under which Canada and the United States have agreed to exchange biographic entry records for land crossings between the two countries, so that an entry into one is recorded as an exit from the other.

On June 30, 2013, Canada and the United States began exchanging biographic entry data for third-country nationals (including permanent residents of Canada and United States lawful permanent residents) who enter through land POEs along the shared border where information is collected electronically. Because of this initiative, the United States now has a working biographic land border exit system on its Northern border for non-Canadian citizens (and legislation is underway in Canada to include Canadian citizen data in the future).

CBP currently matches 98.6 percent of the entry information received from Canada to an entry in the Arrival and Departure Information System (ADIS). To date, this data-sharing agreement has led to 19.6 million departure records. CBP uses this information to resolve previous traveler air or sea arrivals into the United States for those cases where the traveler may then subsequently depart by land to Canada.

### **2. Southern Border**

On the southern border, CBP conducts outbound pulse and surge operations as part of its law enforcement mission. These operations are ongoing and provide some outbound departure

---

<sup>15</sup>United States-Canada Beyond the Border: A Shared Vision for Perimeter Security and Economic Competitiveness, Action Plan, Dec. 2011. Accessible at <https://obamawhitehouse.archives.gov/the-press-office/2011/02/04/declaration-president-obama-and-prime-minister-harper-canada-beyond-bord>

information on travelers departing the United States and entering Mexico. Southern Border exits include both vehicle and pedestrian.

### **Vehicle**

In FY 2017, CBP expanded on the successful FY 2016 Otay Border crossing experiment by utilizing Biometric Exit Mobile (BE-Mobile) devices during pulse and surge operations. BE-Mobile devices were used at three port locations along the southern border in 2017, providing CBP officers with the ability to capture the fingerprints of third country nationals departing the United States via the southern border. CBP plans to expand BE-Mobile use at land borders nationwide in FY 2018.

### **Pedestrian**

In FY 2017, CBP began planning for a pilot at the Ports of Nogales and San Luis that will demonstrate the feasibility of acquiring photos of all arriving and departing travelers on the southern border and comparing those photos using facial recognition algorithms to photos on file in government holdings. The pilot is expected to go live in late FY 2018.

In addition, CBP is partnering with the Mexican National Institute of Migration (INM) to share information on Mexican citizens entering Mexico, and thus departing the United States, at the San Ysidro port of entry. The program is using radio frequency identification (RFID) which is included on many forms of documentation typically carried by Mexican nationals who travel to the United States. The data collected on the Mexican side of the border is sent to the United States to confirm a departure. This program began in December 2017.

## **C. Overstay Definition**

An overstay is a nonimmigrant who was lawfully admitted to the United States for an authorized period but stayed in the United States beyond his or her authorized admission period.

Nonimmigrants admitted for “duration of status” who fail to maintain their status also may be considered overstays. “Duration of status” is a term used for foreign nationals who are admitted for the duration of a specific program or activity, which may be variable, instead of for a set timeframe.<sup>16</sup> The authorized admission period ends when the foreign national has accomplished the purpose or is no longer engaged in authorized activities pertaining to that purpose. An example is a student program that runs for four years. When the program is completed, the student must leave or go on to pursue another program of study.

DHS classifies individuals as overstays by using the ADIS system to match departure and status change records to arrival records collected during the admission process. DHS further identifies nonimmigrant status through manual vetting processes to support possible enforcement action. DHS identifies an individual as having overstayed if his or her departure record shows he or she departed the United States after his or her authorized admission period expired<sup>17</sup> (i.e., Out-of-

---

<sup>16</sup> For example, “duration of status” for F-1 nonimmigrants is defined as “the time during which an F-1 student is pursuing a full course of study at an [approved] educational institution . . . or engaging in authorized practical training following completion of studies, . . .” 8 C.F.R. 214.2(f)(5)(i).

<sup>17</sup> In these cases, DHS sanctions the individual who overstayed the authorized period of stay in the United States according to immigration law, which is based on a sliding scale of penalties depending on the length of time unlawfully present in the United States. See, e.g., 8 U.S.C. § 1202(g) (nonimmigrant visa is voided at conclusion of authorized period of stay, if an individual remains in the United States beyond the

Country Overstays). While these individuals are considered overstays, there is evidence indicating they are no longer physically present in the United States. DHS also identifies individuals as possible overstays if there are no records of a departure or change in status prior to the end of their authorized admission period (i.e., Suspected In-Country Overstays).<sup>18</sup>

In this report, DHS presents ADIS-generated overstay rates by country of citizenship for nonimmigrant visitors who were admitted to the United States through an air or sea POE, regardless of overstay type.<sup>19</sup> The ADIS-generated overstay rates produced for this report depict a snapshot of statistics reflecting the date the data was pulled for analysis. The reported classes of admission account for 97 percent of the total number of admissions by nonimmigrants who arrived by air or sea in FY 2017. While significant progress has been made, challenges remain with the integration of systems used in the travel continuum for reporting on classes of admission associated with land entry. It is anticipated these challenges will be mitigated in the future through improvements in land data collection for individuals exiting the United States and improvements in data exchanges with Canada and Mexico.

The following nonimmigrant classes of admission are not included in the report due to unspecified authorized periods of stay and legal protections: diplomats and other representatives, crewmembers, aliens in transit, and Section 1367 special-protected classes (Appendix B).

## D. Overstay Identification and Action

CBP maintains arrival and departure information for all foreign nationals based on border crossings and carrier data. This information is used to generate daily overstay lists by the ADIS system. These system-generated overstay lists are sent for checks against the CBP Automated Targeting System-Passenger (ATS-P) and the USCIS Computer Linked Application Information Management System 3 (CLAIMS3) database, reducing the overall list size by identifying persons who have departed the United States or adjusted their status to another nonimmigrant or immigrant category. For Suspected In-Country Overstays, the ATS-P then applies screening rules, as defined by U.S. Immigration and Customs Enforcement (ICE), to determine the level of priority for each system-identified overstay.

As part of the overstay enforcement mission, DHS operational units further vet these system-identified Suspected In-Country and Out-of-Country Overstay leads. The In-Country Overstay

---

authorized period); 8 U.S.C. § 1187(a)(7) (referring to the VWP, “if the alien previously was admitted without a visa under this section, the alien must not have failed to comply with the conditions of any previous admission as such a nonimmigrant”); and 8 U.S.C. § 1182(a)(9)(B)(i)(I) and (II) (alien inadmissible for 3 years if unlawfully present for more than 180 days but less than a year; alien inadmissible for 10 years if unlawfully present for a year or more, pursuant to various provisions of the Immigration and Nationality Act).

<sup>18</sup> Pending immigration benefit applications and approved extensions of stay, change of nonimmigrant status, or adjustment of status to lawful permanent resident may extend or modify the authorized period of stay. For example, upon entering the United States a person may be granted a six-month period of admission, but thereafter lawfully change immigration status prior to the expiration of that period, and in turn be authorized to stay beyond the initial six months. These options are not available to all categories of aliens. See 8 U.S.C. 1258, 8 C.F.R. 248.2. For example, those who enter under the VWP are generally not eligible to change or extend their nonimmigrant status. 8 C.F.R. § 245.1(b)(8); 8 C.F.R. § 248.2(a)(6).

<sup>19</sup> The sea overstay rates are only reflective of the population that initially entered the United States through a sea POE but is not reflective of all traveler arrivals where the vessel both departs from and subsequently arrives at the same location (commonly referred to as “closed loop” cruises.) For example, if a foreign national already within the United States departs from the Port Canaveral, Florida Seaport for a seven-day cruise in the Caribbean and subsequently re-enters at Port Canaveral, then that arrival would not be taken into account for the purposes of this report.

leads are worked by ICE. ICE's Homeland Security Investigations (HSI) Counterterrorism and Criminal Exploitation Unit (CTCEU) is a national program dedicated to the investigation of nonimmigrant violations that pose a national security or public safety concern. Each year, CTCEU analyzes records of over one million potential status violators from various investigative databases and DHS entry/exit registration systems. To better manage investigative resources, CTCEU relies on a prioritization framework for these leads established in consultation with interagency partners within the national intelligence and federal law enforcement communities. Those identified as posing a potential national security or public safety concern are prioritized and referred to HSI field offices for investigation. Where nonimmigrant violators are identified but do not meet CTCEU's criteria for investigation, HSI refers the case to ICE's Enforcement and Removal Operations (ERO) National Criminal Analysis and Targeting Center (NCATC) which works in close coordination with CTCEU for further vetting. If the lead is credible and justifies further investigation, it is then forwarded to the respective ICE ERO field office for enforcement action.

ICE HSI Special Agents and analysts continuously monitor threat reports and proactively address emergent issues. This practice has contributed to ICE HSI's counterterrorism mission by managing and supporting high-priority national security initiatives based on specific intelligence from intra- and inter-agency partners. The goal is to identify, locate, and where applicable, prosecute and remove those overstays posing current or potential national security and public safety concerns to the United States. ICE HSI accomplishes its mission by conducting specialized research and analysis, executing targeted operations and special initiatives, and leveraging ICE's expertise with partnering agencies. As part of the overstay enforcement mission, ICE focuses its investigations on those subjects who are considered to pose a concern to national security or public safety. CTCEU's capabilities are enhanced by the use of the National Counterterrorism Center (NCTC) resources to screen overstays by identifying potential matches to derogatory intelligence community holdings.

In June 2016, CBP established an operation unit to review and vet Out-of-Country overstays. The ADIS Vetting Unit (AVU) receives new Out-of-Country Overstay leads for analysts to review on a daily basis. The first step an analyst takes is to ensure that the traveler's person-centric identity is correct in both ADIS and the Automated Biometric Identification System (IDENT). Once the identity has been validated, the analyst queries multiple information systems containing travel and immigration data. These exhaustive searches are designed to find any relevant data not present in ADIS in order to ensure confidence is high that the overstay lead is valid. If these reviews confirm the traveler has overstayed, that traveler may lose the ability to participate in the VWP program, may have their nonimmigrant visa no longer recognized by CBP as valid, and/or may have a three or ten-year bar placed on any subsequent reentry. To date, the work of the AVU has resulted in over 13,000 actions taken of this kind.

Furthermore, in May 2017, CBP began notifying VWP travelers that were in violation of their overstay status via email and via access to the CBP public website providing I-94 data and other immigration data.<sup>20</sup> As part of this effort, the public I-94 website was updated to provide VWP travelers with a portal where they can look up their "admitted until date" for those travelers

---

<sup>20</sup> "Official Site for Travelers Visiting the United States: Apply for or Retrieve Form I-94, Request Travel History and Check Travel Compliance." Accessible at <https://i94.cbp.dhs.gov/>

receiving emails indicating they had overstayed. In January 2018, CBP also began notifying VWP travelers in advance of the end date of their period of authorized admission. CBP plans to further expand these notifications to additional populations.

To date, over a thousand notifications have occurred. The goal is to improve traveler awareness, especially as it pertains to the length of admitted time to the United States. CBP expects these proactive communications and improvements will provide tools for travelers to be more cognizant of their immigration status, especially as it pertains to their period of admission while in the United States. The program is expanding to include notifications to travelers nearing their expected time of departure, as well as notifications to additional traveler populations outside of the VWP program when an overstay violation occurs.

As reflected in Table 1 travelers from VWP countries are less likely to overstay compared to visitors from non-VWP countries. However, in accordance with the high standards required for a country to join and remain in the VWP, DHS introduced a new program enhancement designed to reduce overstays even further. Starting in December 2017, VWP countries with a business or tourism nonimmigrant visitors overstay rate of two percent or greater are required to initiate a public information campaign to reduce overstay violations by educating their nationals on the conditions for admission into the United States. Based on the statistics in the FY 2016 Exit/Entry Overstay Report, DHS informed four affected VWP countries (i.e., Greece, Hungary, Portugal, and San Marino) of the need to develop a campaign and began engaging with their nationals. As of the date of the publication of this report, only Hungary and Portugal exceeded the two percent threshold.

## IV. Overstay Rates

Tables 1 – 6 represent country-by-country overstay rates from FY 2017. For this report, the term, “in-scope”, includes the following categories of nonimmigrant admissions: temporary workers and families (temporary workers and trainees, intracompany transferees, treaty traders and investors), students, exchange visitors, temporary visitors for pleasure, temporary visitors for business, and other nonimmigrant classes of admission.<sup>21</sup> This report calculates overstays by entry rather than by individual. For example, if a traveler with a multiple entry visa enters multiple times during the reporting period and overstays more than once during this time, each time the traveler remains longer than the authorized period of admission is counted in this report as a separate overstay.

In Tables 1–6, the term “Expected Departures” represents the entries by travelers from each country who were lawfully admitted to the United States as a nonimmigrant and whose authorized period of admission expired within FY 2017. The “Total Number of Overstays” for each country equals the summation of both the Out-of-Country and Suspected In-Country Overstays (based on number of overstay entries) for a specific country. The “Overstay Rate” is the percentage of entries by travelers from each country who overstayed their authorized period of admission to the United States, regardless of type.<sup>22</sup> This rate is the percentage of the Total Number of Overstays compared with the current fiscal year’s Expected Departures.

DHS identified 52,656,022 in-scope nonimmigrants who were expected to depart the United States via air or sea in FY 2017. The FY 2017 nonimmigrant travel data identified a Suspected In-Country Overstay rate of 1.15 percent (606,926), and a total overstay rate of 1.33 percent (701,900) out of the overall expected departures of in-scope travelers in FY 2017.

### **Temporary Visitors for Business and Pleasure (Tables 2, 3, and 6)**

Tables 2 and 3 present the overstay rates for temporary visitors for business and pleasure. The overstay rates for temporary visitors for business and pleasure traveling under the VWP or on a B1 or B2 visa are identified in Table 2. Similarly, Table 3 identifies the overstay rates for temporary visitors for business and pleasure admitted to the United States under B1 or B2 classes of admission for non-VWP countries excluding Canada and Mexico. The B1 and B2 overstay rates for Canada and Mexico (Table 6) are separate due to the high percentage of land travelers who are admitted to the United States relative to the other countries. It is important to note that the total number of overstays, as identified in this report, does not equal the total number of overstays who currently remain in the United States during this reporting period. That number is lower because foreign nationals identified as possible overstays can subsequently depart the United States, or adjust their lawful status. For purposes of this report, these are still considered overstays.

---

<sup>21</sup> See Appendix A for a full list of “In-Scope nonimmigrant classes of admission”

<sup>22</sup> Rates are shown for countries as well as passport-issuing authorities and places of origin recognized by the United States. With respect to all references to “country” or “countries” in this document, Section 4(b)(1) of the Taiwan Relations Act of 1979 (Pub. L. No. 96-8) provides that “[w]henver the laws of the United States refer or relate to foreign countries, nations, states, governments, or similar entities, such terms shall include and such laws shall apply with respect to Taiwan.” 22 U.S.C. § 3303(b)(1). Accordingly, references to “country” or “countries” in the VWP authorizing legislation, Section 217 of the Immigration and Nationality Act (8 U.S.C. § 1187), are read to include Taiwan. Taiwan entered the VWP on October 2, 2012.

### **VWP Countries Business or Pleasure Visitors Air and Sea Overstay Rate Summary**

In FY 2017, DHS calculated 22,472,710 B1/B2/Waiver-Business (WB)/Waiver-Tourist (WT) expected departures for VWP countries. The FY 2017 VWP countries' total overstay rate is 0.58 percent of the VWP countries expected departures, and the Suspected In-Country Overstay rate is 0.51 percent of the VWP countries expected departures. DHS is in the process of determining how the data presented in this report is best used to make decisions regarding the continued designation of countries in the VWP.

### **Non-VWP Countries Business or Pleasure Visitors Air and Sea Overstay Rate Summary (excluding Canada and Mexico)**

For the FY 2017 non-VWP countries, DHS calculated 14,659,249 expected departures. The FY 2017 non-VWP total overstay rate is 2.06 percent of the non-VWP expected departures, and the Suspected In-Country Overstay rate is 1.91 percent of the non-VWP expected departures.

### **Student and Exchange Visitors**

For the purposes of this Report, the term "Expected Departures" located in Table 4 refers to a date identified in the Student and Exchange Visitor System (SEVIS) based on the authorized program or employment status of an F or M student or J exchange visitor.<sup>23</sup> The system-generated overstay leads are generated by ADIS matching information against SEVIS data. One current challenge in this process, however, is that ADIS is a person-centric data, but, SEVIS data is document-centric, meaning the system tracks a unique SEVIS identification number associated with each Form I-20 issued. In a person-centric environment an individual is either active or inactive but in a document-centric environment a person could have multiple active records, making it difficult to determine if a person is in valid status. To address this issue, SEVIS is currently undergoing a modernization process to become a person-centric system, which will greatly enhance the automated matching capabilities between ADIS and SEVIS when generating automated overstay lists.

In FY 2017, DHS calculated a total of 1,662,369 students and exchange visitors who were expected to change status or depart the United States.<sup>24</sup> The 1,662,369 is composed of 1,171,744 F, 15,545 M, and 475,080 J visa categories of admission. The F, M, and J Suspected In-Country Overstay rate is 2.35 percent of the total number of students and exchange visitors who were expected to change status or depart the United States. The Suspected In-Country Overstay rate is 2.25 percent for the F visa category, 2.36 percent for the M visa category and 2.59 percent for J visa category. The total overstay rate (*i.e.*, both Suspected In-Country and Out-of-Country Overstays) for students and exchange visitors in FY 2017 is 4.15 percent of the total number of students and exchange visitors who were expected to have changed status or departed from the United States in FY 2017. The total overstay rate is 4.07 percent for the F visa category, 9.54 percent for the M visa category, and 4.17 percent for the J visa category.

---

<sup>23</sup> "F" includes (F1/F2), "M" includes (M1/M2), "J" includes (J1/J2) classes of admission

<sup>24</sup> This figure does not include the F/M/J classes of admission for those visitors with a Mexican or Canadian Country of citizenship; those figures are included in table 4. With the inclusion of Canada and Mexico, the F/M/J total is 1,771,375 (1,251,241 F; 16,982 M; and 503,152 J)

### Overstay Duration Highlights

This year's report includes a new section on examining overstay durations. A significant number of overstays depart the United States a short time after the overstay has occurred. Table 7 displays the number of late departures among Out-of-Country overstays that occurred within a 60-day time window following the overstay, broken down by 10 day intervals within this period. Corrective actions taken when an overstay is confirmed varies with the overstay duration.

This section also presents overstay rates by major class of admission, as reported at the end of FY 2017 and FY 2016 reporting periods, followed by those rates by major class of admission near the time of the publication of this report.

### A. Overstay Rate Summary

The table below provides a high-level summary of the country-by-country data identified in Tables 2 through 6.

<b>Admission Type</b>	<b>Expected Departures</b>	<b>Out-of-Country Overstays</b>	<b>Suspected In-Country Overstays</b>	<b>Total Overstays</b>	<b>Total Overstay Rate</b>	<b>Suspected In-Country Overstay Rate</b>
<i>VWP Countries Business or Pleasure Visitors<sup>25,26</sup> (Table 2)</i>	22,472,710	16,944	114,121	131,065	0.58%	0.51%
<i>Non-VWP Countries Business or Pleasure Visitors (excluding Canada and Mexico) (Table 3)</i>	14,659,249	21,157	280,559	301,716	2.06%	1.91%
<i>Student and Exchange Visitors (excluding Canada and Mexico) (Table 4)</i>	1,662,369	29,909	39,074	68,983	4.15%	2.35%
<i>All Other In-Scope Nonimmigrants<sup>27</sup> (excluding Canada and Mexico) (Table 5)</i>	1,730,106	13,119	32,877	45,996	2.66%	1.90%
<i>Canada and Mexico Nonimmigrants (Table 6)</i>	12,131,588	13,845	140,295	154,140	1.27%	1.16%
<b>TOTAL</b>	<b>52,656,022</b>	<b>94,974</b>	<b>606,926</b>	<b>701,900</b>	<b>1.33%</b>	<b>1.15%</b>

<sup>25</sup> Upon admission into the United States, visitors classified under either a WT (waiver-tourist) or a WB (waiver-business) status.

<sup>26</sup> Citizens or nationals of VWP countries may also obtain and travel to the United States on a B1/B2 visa and seek admission under the B1 or B2 nonimmigrant classification.

<sup>27</sup> See Appendix A for a complete list of "In-Scope nonimmigrant classes of admission"

## B. VWP Nonimmigrant Business or Pleasure Overstay Rates

**Table 2**  
**FY 2017 Overstay rates for nonimmigrant visitors admitted to the United States for business or pleasure (WB/WT/B-1/B-2) via air and sea POEs for VWP Countries**

Country of Citizenship	Expected Departures	Out-of-Country Overstays	Suspected In-Country Overstays	Total Overstays	Total Overstay Rate	Suspected In-Country Overstay Rate
<i>Andorra</i>	1,372	1	5	6	0.44%	0.36%
<i>Australia</i> <sup>28</sup>	1,396,537	798	4,581	5,379	0.39%	0.33%

<b>Grand Total</b>	<b>12,131,588</b>	<b>13,845</b>	<b>140,295</b>	<b>154,140</b>	<b>1.27%</b>	<b>1.16%</b>

Table 6 represents Canadian and Mexican nonimmigrant visitors admitted at air and sea POEs who were expected to depart in FY 2017. Unlike all other countries, the overwhelming majority of travelers from Canada or Mexico enter the United States by land. Overstay data concerning land entries will be incorporated into future iterations of this report as projects progress.

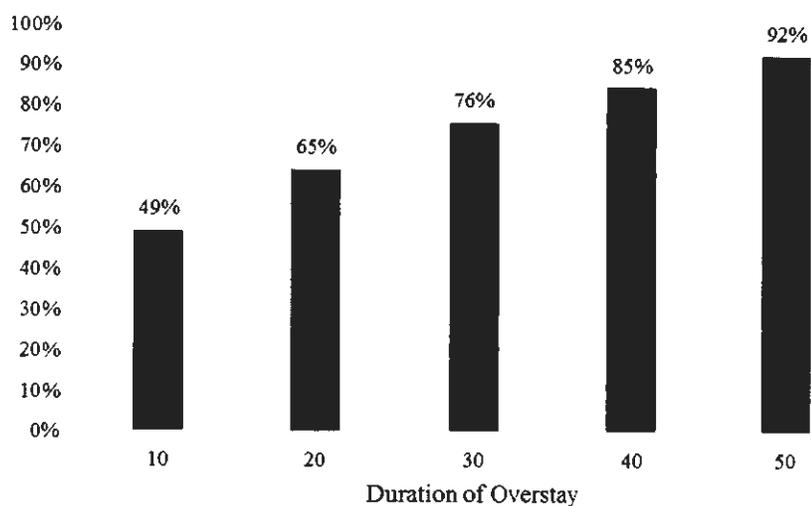

<sup>40</sup> The Canada and Mexico Expected Departure total comprises 79,497 for the F visa category, 1,439 for the M visa category, 28,072 for the J visa category

<sup>41</sup> The Canada and Mexico Out-of-Country Overstay total comprises 783 for the F visa category, 46 for the M visa category, 232 for the J visa category

<sup>42</sup> The Canada and Mexico Suspected In-Country Overstay total comprises 829 for the F visa category, 67 for the M visa category, 581 for the J visa category

## G. Overstay Duration Highlights

<b>Table 7</b>						
<b>Duration of Overstay among Out-of-Country Overstays of 60 Days or Fewer</b>						
Duration of Overstay (Days or Fewer)	10	20	30	40	50	60
	30,653	40,138	47,189	52,633	57,514	62,185
Percentage of 60 Day Total	49%	65%	76%	85%	92%	100%

**Figure 1: Duration of Overstay among Out-of-Country Overstays of 60 Days or Fewer**

Among the Out-of-Country Overstays of 60 days or fewer, 49 percent left within the first 10 days, 65 percent left within the first 20 days, 76 percent left within the first 30 days, 85 percent left within the first 40 days, and 92 percent left within the first 50 days.<sup>43</sup>

<sup>43</sup> Table 7 includes 768 Out-of-Country Overstays (1.3% of the 62,185 overstays of 60 days or fewer) that were identified as Suspected In-Country Overstays in the FY 2017 Report, but as of December 1, 2017 switched to Out-of-Country Overstays due to a departure. DHS added this population to adjust for statistical bias associated with overstays that occurred at the end of the FY 2017 reporting period.

Admission Type	Overstay Status at the end of FY 2017			Overstay Status as of May 1, 2018

## V. Conclusion

Identifying aliens who overstay their authorized periods of stay is important for national security, public safety, immigration enforcement, and processing applications for immigration benefits.

Over the years, DHS significantly improved data collection processes in the entry environment. These improvements include the collection of data on all admissions to the United States by foreign nationals, the reduction of the number of documents that may be used for entry to the United States, the collection of biometric data on most foreign travelers to the United States, and the comparison of that data against criminal and terrorist watchlists. Despite the different infrastructural, operational, and logistical challenges presented in the exit environment, DHS has been able to resolve many of the issues regarding the collection of departure information for foreign nationals. Further efforts, including partnerships with other governments and the private sector (e.g., airlines airports, cruise lines), are ongoing and will continue to improve data integrity.

During the past three years, DHS made significant progress in terms of the ability to accurately report data on overstays—progress that was made possible by congressional realignment of Department resources in order to better centralize the overall mission in identifying overstays. In FY 2017, new biometric exit tests in both the land and air environment enabled continued progress toward the fusion of biometric and biographic verification of travelers. While these tests account for only a small percentage of all the departure records for FY 2017, this is a significant increase from FY 2016 and a critical step forward towards implementing a comprehensive biometric entry and exit system.

DHS will continue to develop and test the entry and exit system during FY 2018, both biometric and biographic, and this testing will improve CBP's ability to capture and report this data accurately. DHS will continue to annually release this overstay data to the public and examine trends over time, and looks forward to providing updates to congressional members and their staff on its ongoing progress.

## VI. Appendices

### Appendix A. In-Scope Nonimmigrant Classes of Admission

CLASS OF ADMISSION DESCRIPTION	CODE
<b>Temporary Workers and Trainees</b>	
Commonwealth of the Northern Mariana Islands (CNMI)-only transitional workers	CW1
Spouses and children of CW1	CW2
Temporary workers in specialty occupations	H1B
Chile and Singapore Free Trade Agreement aliens	H1B1
Registered nurses participating in the Nursing Relief for Disadvantaged Areas	H1C
Agricultural workers	H2A
Nonagricultural workers	H2B
Returning H2B workers	H2R
Trainees	H3
Spouse and unmarried child(ren) under 21 years of age of H1B, H1B1, H1C, H2A, H2B, H2R, or H3	H4
Workers with extraordinary ability or achievement	O1
Workers accompanying and assisting in performance of O1 workers	O2
Spouses and children of O1 and O2	O3
Internationally recognized athletes or entertainers	P1
Artists or entertainers in reciprocal exchange programs	P2
Artists or entertainers in culturally unique programs	P3
Spouses and children of P1, P2, or P3	P4
Workers in international cultural exchange programs	Q1
Workers in religious occupations	R1
Spouses and children of R1	R2
North American Free Trade Agreement professional workers	TN
Spouses and children of TN	TD
<b>Intracompany Transferees</b>	
Intracompany transferees	L1 <sup>44</sup>
Spouses and children of L1	L2
<b>Treaty Traders and Investors</b>	

<sup>44</sup> Includes L1A and L1B classes of admission

CLASS OF ADMISSION DESCRIPTION	CODE
Treaty traders and their spouses and children	E1
Treaty investors and their spouses and children	E2
Treaty investors and their spouses and children CNMI only	E2C
Australian Free Trade Agreement principals, spouses and children	E3 <sup>45</sup>
<b>Students</b>	
Academic students	F1
Spouses and children of F1	F2
Vocational students	M1
Spouses and children of M1	M2
<b>Exchange Visitors</b>	
Exchange visitors	J1
Spouses and children of J1	J2
<b>Temporary Visitors for Pleasure</b>	
Temporary visitors for pleasure	B2
Visa Waiver Program – temporary visitors for pleasure	WT
<b>Temporary Visitors for Business</b>	
Temporary visitors for business	B1
Visa Waiver Program – temporary visitors for business	WB
<b>Alien Fiancées of U.S. Citizens and Children</b>	
Fiancées of U.S. citizens	K1
Children of K1	K2
<b>Legal Immigration Family Equity LIFE Act</b>	
Spouses of U.S. citizens, visa pending	K3
Children of U.S. citizens, visa pending	K4
Spouses of permanent residents, visa pending	V1
Children of permanent residents, visa pending	V2
Dependents of V1 or V2, visa pending	V3
<b>Other</b>	
Attendants, servants, or personal employees of A1 and A2 and their families	A3
Attendants, servants, or personal employees of diplomats or other representatives	G5
Attendant, servant, personal employer of North Atlantic Treaty Organization (NATO) NATO-1 through NATO-6 or Immediate Family	NATO- 7

<sup>45</sup> Includes E3D and E3R classes of admission

## Appendix B. Out-of-Scope Nonimmigrant Classes of Admission

CLASS OF ADMISSION DESCRIPTION	CODE
<b>Diplomats and Other Representatives</b>	
Representatives of foreign information media and spouses and children	I1
Ambassadors, public ministers, career diplomatic/consular officers and families	A1
Other foreign government officials or employees and their families	A2
Principals of recognized foreign governments	G1
Other representatives of recognized foreign governments	G2
Representatives of non-recognized or nonmember foreign governments	G3
International organization officers or employees	G4
NATO officials, spouses, and children	NATO-1 to NATO-6
<b>Transit Aliens</b>	
Aliens in continuous and immediate transit through the United States	C1
Aliens in transit to the United Nations	C2
Foreign government officials, their spouses, children, and attendants in transit	C3
<b>Special Classes</b>	
Alien Witness or Informant	S5
Alien Witness or Informant	S6
Qualified Family Member of S5, S6	S7
Victim of Trafficking, Special Protected Class	T1
Spouse of T1, Special Protected Class	T2
Spouse of T1, Special Protected Class	T3
Parent of T1, Special Protected Class	T4
Sibling unmarried of T1, Special Protected Class	T5
Victim of Criminal Activity, Special Protected Class	U1
Spouse of U2, Special Protected Class	U2
Spouse of U1, Special Protected Class	U3
Parent of U1, Special Protected Class	U4
Sibling unmarried of U1, Special Protected Class	U5
Special Protected Class, Violence against Women Act	VAWA
<b>Other</b>	
Crewmen	D1
Crewman-different vessel/flight	D2

## Appendix C. FY 2016 Overstay Rates

### FY 2016 Entry/Exit Overstay Report Overview

Below are the tabulated rates from the Fiscal Year 2016 Entry and Exit Overstay Report. The inclusion of these tables is for reference only. The FY 2016 Report provides data on expected departures and overstays, by country, for foreign travelers to the United States who entered as nonimmigrants through an air or sea port of entry (POE) and who were expected to depart in FY 2016 (October 1, 2015 – September 30, 2016). It does this by examining the number of entries, by country, for foreign travelers who arrived as nonimmigrants during this time as of October 1, 2016.

At the end of FY 2016, the overall Suspected In-Country Overstay number – i.e., those for whom the Department did not have evidence of a departure or transition to another immigration status – was 628,799, or 1.25 percent. As included in the FY 2016 Report, by January 2017, the number of Suspected In-Country overstays had dropped to 544,676, rendering the Suspected In-Country Overstay rate 1.07 percent. As of December 2017, the number of Suspected In-Country overstays for FY 2016 had further dropped to 403,415, rendering the Suspected In-Country Overstay rate 0.80 percent. As of May 1, 2018 the number of Suspected In-Country Overstays further decreased to 340,377 rendering the FY 2016 Suspected In-Country Overstay rate 0.67 percent.

Country of Citizenship	Expected Departures	Out-of-Country Overstays	Suspected In-Country Overstays	Total Overstays	Total Overstay Rate	Suspected In-Country Overstay Rate
<i>Andorra</i>	1,308	-	9	9	0.69%	0.69%
<i>Australia</i> <sup>46</sup>	1,362,199	980	6,583	7,563	0.56%	0.48%
<i>Austria</i>	211,224	116	2,784	2,900	1.37%	1.32%
<i>Belgium</i>	288,117	178	1,369	1,547	0.54%	0.48%
<i>Brunei</i>	1,125	1	10	11	0.98%	0.89%
<i>Chile</i>	363,570	813	5,416	6,229	1.71%	1.49%
<i>Czech Republic</i>	103,158	214	927	1,141	1.11%	0.90%
<i>Denmark</i> <sup>47</sup>	329,981	158	1,505	1,663	0.50%	0.46%
<i>Estonia</i>	23,158	35	160	195	0.84%	0.69%
<i>Finland</i>	156,057	112	604	716	0.46%	0.39%
<i>France</i> <sup>48</sup>	1,751,536	1,629	10,358	11,987	0.68%	0.59%
<i>Germany</i>	2,061,112	1,416	18,780	20,196	0.98%	0.91%
<i>Greece</i>	77,562	421	1,280	1,701	2.19%	1.65%
<i>Hungary</i>	82,533	431	1,841	2,272	2.75%	2.23%

<sup>46</sup> Australia includes Australia, Norfolk Island, Christmas Island, and Cocos (Keeling) Island.

<sup>47</sup> Denmark includes Denmark, Faroe Islands, and Greenland.

<sup>48</sup> France includes France, French Guiana, French Polynesia, French Southern and Antarctic Lands, Guadeloupe, Martinique, Mayotte, New Caledonia, Reunion, Saint Barthelemy, Saint Pierre and Miquelon, and Wallis and Futuna.
