

FY 2015 Budget Overview

	FY 2013 Revised Enacted ¹	FY 2014 Enacted ²	FY 2015 Pres. Budget ³	FY 2015 +/- FY 2014
	\$000	\$000	\$000	\$000
Total Budget Authority:	\$ 59,209,964	\$ 60,655,168	\$ 60,918,787	\$ 263,619
Less: Mandatory, Fee, and Trust Funds:	(11,308,307)	(11,526,210)	(11,890,496)	(364,286)
Gross Discretionary Budget Authority:	47,901,657	49,128,958	49,028,291	(100,667)
Less: Discretionary Offsetting Fees:	(3,553,282)	(3,733,428)	(4,414,798)	(681,370)
Net Discretionary Budget Authority:	44,348,375	45,395,530	44,613,493	(782,037)
Less: FEMA Disaster Relief - Major Disasters Cap Adjustment:	(6,075,554)	(5,626,386)	(6,437,793)	(811,407)
Less: Rescission of Prior-Year Carryover - Regular Appropriations: ⁴	(151,463)	(543,968)	-	543,968
Adjusted Net Discretionary Budget Authority:	38,121,358	39,225,176	38,175,700	(1,049,476)
Supplemental: ⁵	\$ 11,483,313	\$ -	\$ -	-

1/ FY 2013 Revised Enacted:

- Reflects across the board rescissions of 0.1% and 0.032% pursuant to P.L. 113-6.
- Reflects funds sequestered pursuant to section 251 A(7)(A) of the Balance Budget and Emergency Deficit Control Act of 1985, as amended by the Budget Control Act of 2011.
- Reflects a transfer of \$22.8 million from FEMA Disaster Relief Fund (DRF) to OIG pursuant to P.L. 113-6.
- Excludes USCG Overseas Contingency Operations funding of \$240.605 million provided in P.L. 113-6.
- Includes FEMA Disaster Relief base funds of \$553.562 million and an additional \$6.075 billion for major disasters declared pursuant to the Stafford Act and designated by the Congress as being for disaster relief pursuant to section 251 (b)(2)(D) of the Balance Budget and Emergency Deficit Control Act of 1985 (BBEDCA), as amended by the Budget Control Act of 2011.
- Total Budget Authority Request excluding DRF Major Disasters Cap Adjustment and rescissions of prior year carryover balances is: \$53,134,410.
- Gross Discretionary Request excluding DRF Major Disasters Cap Adjustment and rescissions of prior year carryover balances is: \$41,826,103.
- Net Discretionary Request excluding DRF Major Disasters Cap Adjustment and rescissions of prior year carryover balances is: \$38,272,821.

2/ FY 2014 Enacted:

- Reflects a transfer of \$24 million from FEMA DRF to OIG pursuant to P.L. 113-76.
- Excludes USCG Overseas Contingency Operations funding of \$227.0 million provided in P.L. 113-76.
- Includes FEMA Disaster Relief base funds of \$570.522 million and an additional \$5.626 billion for major disasters declared pursuant to the Stafford Act and designated by the Congress as being for disaster relief pursuant to section 251 (b)(2)(D) of the BBEDCA of 1985, as amended by the Budget Control Act of 2011.
- Reflects the following technical adjustments: \$33.522 million increase for TSA - Aviation Security revised fee levels; \$15.042 million decrease for USCG Health Care Fund Contribution; \$3.741 million increase for CBP Small Airports.
- Total Budget Authority Request excluding DRF Major Disasters Cap Adjustment and rescissions of prior year carryover balances is: \$55,028,782
- Gross Discretionary Request excluding DRF Major Disasters Cap Adjustment and rescissions of prior year carryover balances is: \$43,502,572.
- Net Discretionary Request excluding DRF Major Disasters Cap Adjustment and rescissions of prior year carryover balances is: \$39,769,144.

3/ FY 2015 President's Budget:

- Reflects a proposed transfer of \$24 million from FEMA DRF to OIG.
- Includes FEMA Disaster Relief base funds of \$371.672 million and an additional \$6.438 billion for major disasters declared pursuant to the Stafford Act and designated by the Congress as being for disaster relief pursuant to section 251 (b)(2)(D) of the BBEDCA of 1985, as amended by the Budget Control Act of 2011.
- Total Budget Authority Request excluding DRF Major Disasters Cap Adjustment is: \$54,480,994.
- Gross Discretionary Request excluding DRF Major Disasters Cap Adjustment is: \$42,590,498.
- Net Discretionary Request excluding DRF Major Disasters Cap Adjustment is: \$38,175,700.

4/ Rescissions of Prior Year Unobligated Balances:

- FY 2013 - Pursuant to P.L. 113-6, reflects rescissions of prior year unobligated balances of -\$151.463 million
- FY 2014 - Pursuant to P.L. 113-76, reflects rescissions of prior year unobligated balances of -\$543.968 million.

5/ In order to obtain comparable figures, Net Discretionary, Gross Discretionary, and Total Budget Authority excludes:

- FY 2013 supplemental funding provided in P.L. 113-2 (Disaster Relief Appropriations Act 2013) and sequestered pursuant to 251 A(7)(A) of the Balance Budget and Emergency Deficit Control Act of 1985, as amended by the Budget Control Act of 2011: OIG (\$2.850 million), CBP (\$1.584 million), ICE (\$0.812 million), USCG (\$260.521 million), USSS (\$0.285 million), FEMA (\$11.210 billion), S&T (\$3.087 million), DNDO (\$3.676 million).
- Excludes FEMA NFIF (\$9.7 billion) increase in borrowing authority provided in P.L. 113-1.

Department of Homeland Security

Title V

Fiscal Year 2014

Explanation of Changes – General Provisions

Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

Proposal to Amend *Old* Section 503

SEC. 503. (a) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year [2014] 2015, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure through a reprogramming of funds that:

- (1) creates a new program, project, or activity;
- (2) eliminates a program, project, office, or activity;
- (3) increases funds for any program, project, or activity for which funds have been denied or restricted by the Congress;
- (4) proposes to use funds directed for a specific activity by either of the Committees on Appropriations of the Senate or the House of Representatives for a different purpose; or
- (5) contracts out any function or activity for which funding levels were requested for Federal full-time equivalents in the object classification tables contained in the fiscal year [2014] 2015 Budget Appendix for the Department of Homeland Security, as modified by the report accompanying this Act, unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds.

(b) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year [2014] 2015, or provided from any accounts in the Treasury of the United States derived by the collection of fees or proceeds available to the agencies funded by this Act, shall be available for obligation or expenditure for programs, projects, or activities through a reprogramming of funds in excess of \$5,000,000 or 10 percent, whichever is less, that:

- (1) augments existing programs, projects, or activities;
- (2) reduces by 10 percent funding for any existing program, project, or activity;
- (3) reduces by 10 percent the numbers of personnel approved by the Congress; or
- (4) results from any general savings from a reduction in personnel that would result in a change in existing programs, projects, or activities as approved by the Congress, unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds.

(c) Not to exceed 5 percent of any appropriation made available for the current fiscal year for the Department of Homeland Security by this Act or provided by previous appropriations Acts may be transferred between such appropriations, but no such appropriation, except as otherwise specifically provided, shall be increased by more than 10 percent by such transfers: *Provided, That, subject to approval by the Director of the Office of Management and Budget, any unobligated funds within such department or agency may be transferred between appropriations in order to expedite a more rapid and effective response to a Presidentially-declared major disaster, as provided in the National Response Plan required under Public Law 107-296: Provided further, That any transfer under this section shall be treated as a reprogramming of funds under subsection (b) and shall not be available for obligation unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such transfer.*

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

(d) Notwithstanding subsections (a), (b), and (c) of this section, no funds shall be reprogrammed within or transferred between appropriations based upon an initial notification provided after June 30, except in extraordinary circumstances that imminently threaten the safety of human life or the protection of property.

(e) The notification thresholds and procedures set forth in this section shall apply to any use of deobligated balances of funds provided in previous Department of Homeland Security Appropriations Acts.

Explanation: The Department requests routine date changes and the insertion of a proviso in subsection (c) to provide greater flexibility to the Department to respond to Presidentially declared major disasters.

Proposal to Amend *Old* Section 504

SEC. 504. The Department of Homeland Security Working Capital Fund, established pursuant to section 403 of Public Law 103–356 (31 U.S.C. 501 note), shall continue operations as a permanent working capital fund for fiscal year **[2014] 2015**: Provided, That none of the funds appropriated or otherwise made available to the Department of Homeland Security may be used to make payments to the Working Capital Fund, except for the activities and amounts allowed in the President's fiscal year **[2014] 2015** budget: *Provided further*, That funds provided to the Working Capital Fund shall be available for obligation until expended to carry out the purposes of the Working Capital Fund: Provided further, That all departmental components shall be charged only for direct usage of each Working Capital Fund service: Provided further, That funds provided to the Working Capital Fund shall be used only for purposes consistent with the contributing component: Provided further, That the Working Capital Fund shall be paid in advance or reimbursed at rates which will return the full cost of each service: Provided further, That the Committees on Appropriations of the Senate and House of Representatives shall be notified of any activity added to or removed from the fund: Provided further, That the Chief Financial Officer of the Department of Homeland Security shall submit a quarterly execution report with activity level detail, not later than 30 days after the end of each quarter.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2015.

Proposal to Amend *Old* Section 505

SEC. 505. Except as otherwise specifically provided by law, not to exceed 50 percent of unobligated balances remaining available at the end of fiscal year **[2014] 2015**, as recorded in the financial records at the time of a reprogramming request, but not later than June 30, **[2015] 2016**, from appropriations for salaries and expenses for fiscal year **[2014] 2015** in this Act shall remain available through September 30, **[2015] 2016**, in the account and for the purposes for which the appropriations were provided: Provided, That prior to the obligation of such funds, **[a request]** *notification* shall be submitted to the Committees on Appropriations of the Senate and the House of Representatives **[for approval]** in accordance with section 503 of this Act.

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

Explanation: The Department requests routine date changes to extend this provision and amendments to ensure consistency with the notification requirements of section 503.

Proposal to Amend *Old* Section 506

SEC. 506. Funds made available by this Act for intelligence activities are deemed to be specifically authorized by the Congress for purposes of section 504 of the National Security Act of 1947 (50 U.S.C. 414) during fiscal year **[2014]** 2015 until the enactment of an Act authorizing intelligence activities for fiscal year **[2014]** 2015.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2015.

Proposal to Amend *Old* Section 507

SEC. 507. (a) Except as provided in subsections (b) and (c), none of the funds made available by this Act may be used to—

(1) make or award a grant allocation, grant, contract, other transaction agreement, or task or delivery order on a Department of Homeland Security multiple award contract, or to issue a letter of intent totaling in excess of \$1,000,000;

(2) award a task or delivery order requiring an obligation of funds in an amount greater than \$10,000,000 from multi-year Department of Homeland Security funds or a task or delivery order that would cause cumulative obligations of multi-year funds in a single account to exceed 50 percent of the total amount appropriated;

[(3) make a sole-source grant award; or]

[(4)] 3) announce publicly the intention to make or award items under paragraph (1), (2), or (3) including a contract covered by the Federal Acquisition Regulation.

(b) The Secretary of Homeland Security may waive the prohibition under sub- section (a) if the Secretary notifies the Committees on Appropriations of the Senate and the House of Representatives at least 3 full business days in advance of making an award or issuing a letter as described in that subsection.

(c) If the Secretary of Homeland Security determines that compliance with this section would pose a substantial risk to human life, health, or safety, an award may be made without notification, and the Secretary shall notify the Committees on Appropriations of the Senate and the House of Representatives not later than 5 full business days after such an award is made or letter issued.

(d) A notification under this section—

(1) may not involve funds that are not available for obligation; and

(2) shall include the amount of the award; the fiscal year for which the funds for the award were appropriated; the type of contract; and the account and each program, project, and activity from which the funds are being drawn.

(e) The Administrator of the Federal Emergency Management Agency shall brief the Committees on Appropriations of the Senate and the House of Representatives 5 full business days in advance of announcing publicly the intention of making an award under "State and Local Programs".

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

Explanation: The Department requests amendments to this provision to increase the Department's flexibility to use and manage appropriated resources.

Proposal to Amend *Old* Section 508

SEC. 508. Notwithstanding any other provision of law, no agency shall purchase, construct, or lease any additional facilities, except within or contiguous to existing locations, to be used for the purpose of conducting Federal law enforcement training without **[the]** advance **[approval of]** *notification to* the Committees on Appropriations of the Senate and the House of Representatives, except that the Federal Law Enforcement Training Center is authorized to obtain the temporary use of additional facilities by lease, contract, or other agreement for training that cannot be accommodated in existing Center facilities.

Explanation: The Department requests amendments to this provision to ensure consistency with the notification requirements of section 503.

Proposal to Delete *Old* Section 512

[SEC. 512. None of the funds made available in this Act may be used by any person other than the Privacy Officer appointed under subsection (a) of section 222 of the Homeland Security Act of 2002 (6 U.S.C. 142(a)) to alter, direct that changes be made to, delay, or prohibit the transmission to Congress of any report prepared under paragraph (6) of such subsection.]

Explanation: The Department requests deletion of this provision as it restricts the Department's ability to use and manage appropriated resources and infringes upon the Department's ability to manage administrative functions.

Proposal to Delete *Old* Section 513

[SEC. 513. None of the funds made available in this Act may be used to amend the oath of allegiance required by section 337 of the Immigration and Nationality Act (8 U.S.C. 1448).]

Explanation: The Department requests deletion of this provision as it restricts the Department's ability to use and manage appropriated resources and infringes upon the Department's ability to manage administrative functions.

Proposal to Delete *Old* Section 515

[SEC. 515. Except as provided in section 44945 of title 49, United States Code, funds appropriated or transferred to Transportation Security Administration "Aviation Security", "Administration", and "Transportation Security Support" for fiscal years 2004 and 2005 that are recovered or deobligated shall be available only for the procurement or installation of explosives detection systems, air cargo, baggage, and checkpoint screening systems, subject to notification: Provided, That quarterly reports shall be submitted to the

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

Committees on Appropriations of the Senate and the House of Representatives on any funds that are recovered or deobligated.]

Explanation: The Department proposes deletion of this provision as the referenced funds are no longer recovered or deobligated.

Proposal to Delete *Old* Section 518

[SEC. 518. Section 532(a) of Public Law 109–295 (120 Stat. 1384) is amended by striking "2013" and inserting "2014 and thereafter"].

Explanation: The Department requests deletion of this provision because it is permanent.

Proposal to Amend *Old* Section 520

SEC. 520. (a) The Secretary of Homeland Security shall submit a report not later than October 15, [2014] 2015, to the Office of Inspector General of the Department of Homeland Security listing all grants and contracts awarded by any means other than full and open competition during fiscal year [2014] 2015.

(b) The Inspector General shall review the report required by subsection (a) to assess Departmental compliance with applicable laws and regulations and report the results of that review to the Committees on Appropriations of the Senate and the House of Representatives not later than February 15, [2015] 2016.

Explanation: The Department requests routine date changes.

Proposal to Delete *Old* Section 521

[SEC. 521. None of the funds provided by this or previous appropriations Acts shall be used to fund any position designated as a Principal Federal Official (or the successor thereto) for any Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.) declared disasters or emergencies unless—

(1) the responsibilities of the Principal Federal Official do not include operational functions related to incident management, including coordination of operations, and are consistent with the requirements of section 509(c) and sections 503(c)(3) and 503(c)(4)(A) of the Homeland Security Act of 2002 (6 U.S.C. 319(c) and 313(c)(3) and 313(c)(4)(A)) and section 302 of the Robert T. Stafford Disaster Relief and Assistance Act (42 U.S.C. 5143);

(2) not later than 10 business days after the latter of the date on which the Secretary of Homeland Security appoints the Principal Federal Official and the date on which the President issues a declaration under section 401 or section 501 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170 and 5191, respectively), the Secretary of Homeland Security shall submit a notification of the appointment of the Principal Federal Official and a description of the responsibilities of such Official and how such responsibilities are consistent with paragraph (1) to the Committees on Appropriations of the Senate and the House of Representatives, the Transportation and

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

Infrastructure Committee of the House of Representatives, and the Homeland Security and Governmental Affairs Committee of the Senate; and

(3) not later than 60 days after the date of enactment of this Act, the Secretary shall provide a report specifying timeframes and milestones regarding the update of operations, planning and policy documents, and training and exercise protocols, to ensure consistency with paragraph (1) of this section.]

Explanation: The Department requests deletion of this restrictive provision in part because the Secretary is the Principal Federal Official and does not intend to appoint other individuals to this position.

Proposal to Amend *Old* Section 522

SEC. 522. None of the funds provided or otherwise made available in this Act shall be available to carry out section 872 of the Homeland Security Act of 2002 (6 U.S.C. 452); *Provided, That this section shall not apply to funds made available to the Department of Homeland Security in this or any prior Act for activities related to cybersecurity, infrastructure protection, or biometric identity management.*

Explanation: The Department requests an amendment to provide the Department with the flexibility to carry out its operational and mission requirements related to cybersecurity, infrastructure protection, or biometric identity management. The Department also requests continuation and amendment of the 2014 Joint Explanatory Statement language:

A provision proposed by the House and Senate is continued *and amended* that precludes DHS from using funds in this Act to carry out reorganization authority, *with the exception of activities related to cybersecurity, infrastructure protection, or biometric identity management.* This prohibition is not intended to prevent the Department from carrying out routine or small reallocations of personnel or functions within components, subject to Section 503 of this Act. This language prevents large scale reorganization of the Department, which should be acted on legislatively by the relevant Congressional committees of jurisdiction.

Proposal to Delete *Old* Section 523

[SEC. 523. Funds made available in this Act may be used to alter operations within the Civil Engineering Program of the Coast Guard nationwide, including civil engineering units, facilities design and construction centers, maintenance and logistics commands, and the Coast Guard Academy, except that none of the funds provided in this Act may be used to reduce operations within any Civil Engineering Unit unless specifically authorized by a statute enacted after the date of enactment of this Act.]

Explanation: The Department requests deletion of this provision as it restricts the Department's ability to use and manage appropriated resources.

Proposal to Amend *Old* Section 525

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

SEC. 525. Section 831 of the Homeland Security Act of 2002 (6 U.S.C. 391) is amended—
(1) in subsection (a), by striking "Until September 30, [2013] 2014," and inserting "Until September 30, [2014] 2015,";
(2) in subsection (c)(1), by striking "September 30, [2013] 2014," and inserting "September 30, [2014] 2015,"

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2015.

Proposal to Delete *Old* Section 527

[SEC. 527. Notwithstanding any other provision of law, none of the funds provided in this or any other Act shall be used to approve a waiver of the navigation and vessel-inspection laws pursuant to 46 U.S.C. 501(b) for the transportation of crude oil distributed from the Strategic Petroleum Reserve until the Secretary of Homeland Security, after consultation with the Secretaries of the Departments of Energy and Transportation and representatives from the United States flag maritime industry, takes adequate measures to ensure the use of United States flag vessels: Provided, That the Secretary shall notify the Committees on Appropriations of the Senate and the House of Representatives, the Committee on Commerce, Science, and Transportation of the Senate, and the Committee on Transportation and Infrastructure of the House of Representatives within 2 business days of any request for waivers of navigation and vessel-inspection laws pursuant to 46 U.S.C. 501(b).]

Explanation: The Department requests deletion of this provision as unnecessary, unduly restrictive, and onerous.

Proposal to Delete *Old* Section 529

[Sec. 529. None of the funds in this Act shall be used to reduce the United States Coast Guard's Operations Systems Center mission or its government-employed or contract staff levels.]

Explanation: The Department requests deletion of this provision as it restricts the Department's ability to use and manage appropriated resources.

Proposal to Amend *Old* Section 530

SEC. 530. The Secretary of Homeland Security, in consultation with the Secretary of the Treasury, shall notify the Committees on Appropriations of the Senate and the House of Representatives of any proposed transfers of funds available under section 9703.1(g)(4)(B) of title 31, United States Code (as added by Public Law 102–393) from the Department of the Treasury Forfeiture Fund to any agency within the Department of Homeland Security: Provided, That none of the funds identified for such a transfer may be obligated **[until]** *unless* the

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

Committees on Appropriations of the Senate and the House of Representatives **[approve]** *are notified 15 days in advance of* the proposed transfers.

Explanation: The Department requests amendments to this provision to ensure consistency with the notification requirements of section 503.

Proposal to Delete *Old* Section 532

[Sec. 532. None of the funds appropriated by this Act may be used to conduct, or to implement the results of, a competition under Office of Management and Budget Circular A-76 for activities performed with respect to the Coast Guard National Vessel Documentation Center.]

Explanation: The Department requests deletion of this provision as it restricts the Department's ability to use and manage appropriated resources.

Proposal to Delete *Old* Section 533

[Sec. 533. If the Administrator of the Transportation Security Administration determines that an airport does not need to participate in the E-Verify Program as described in section 403(a) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1324a note), the Administrator shall certify to the Committees on Appropriations of the Senate and the House of Representatives that no security risks will result from such non-participation.]

Explanation: The Department requests deletion of this provision as it is unnecessary and burdensome.

Proposal to Delete *Old* Section 534

[Sec. 534. (a) Notwithstanding any other provision of this Act, except as provided in subsection (b), and 30 days after the date on which the President determines whether to declare a major disaster because of an event and any appeal is completed, the Administrator shall publish on the Web site of the Federal Emergency Management Agency a report regarding that decision that shall summarize damage assessment information used to determine whether to declare a major disaster.

(b) The Administrator may redact from a report under subsection (a) any data that the Administrator determines would compromise national security.

(c) In this section –

(1) the term “Administrator” means the Administrator of the Federal Emergency Management Agency; and

(2) the term “major disaster” has the meaning given that term in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122).]

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

Explanation: The Department requests deletion of this provision because posting of the referenced information is now standard operating procedure, and, therefore, the provision is unnecessary.

Proposal to Delete *Old* Section 535

[Sec. 535. Any official that is required by this Act to report or to certify to the Committees on Appropriations of the Senate and the House of Representatives may not delegate such authority to perform that act unless specifically authorized herein.]

Explanation: The Department requests deletion of this provision as unnecessary, unduly restrictive and onerous, and contributes to the possibility for delays in the Department's reporting to Congress.

Proposal to Amend *Old* Section 536

SEC. 536. Section 550(b) of the Department of Homeland Security Appropriations Act, 2007 (Public Law 109–295; 6 U.S.C. 121 note), as amended by section **[537 of the Department of Homeland Security Appropriations Act, 2013 (Public Law 113–6)]** *536 of the Department of Homeland Security Appropriations Act, 2014 (Public Law 113-76)*, is further amended by striking "on October 4, **[2013]** 2014" and inserting "on October 4, **[2014]** 2015".

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2015.

Proposal to Delete *Old* Section 537

[Sec. 537. None of the funds appropriated or otherwise made available in this or any other Act may be used to transfer, release, or assist in the transfer or release to or within the United States, its territories, or possessions Khalid Sheikh Mohammed or any other detainee who –

**(1) is not a United States citizen or a member of the Armed Forces of the United States; and
(2) is or was held on or after June 24, 2009, at the United States Naval Station, Guantanamo Bay, Cuba, by the Department of Defense.]**

Explanation: The Administration requests deletion of this provision which infringes upon the President's prerogative and executive authority on national security matters.

Proposal to Delete *Old* Section 539

[Sec. 539. None of the funds made available in this Act may be used to employ workers described in section 274A(h)(3) of the Immigration and Nationality Act (8 U.S.C. 1324a(h)(3)).]

Explanation: The Department requests deletion of this provision as it is restrictive in nature.

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

Proposal to Delete *Old* Section 542

[Sec. 542. In developing any process to screen aviation passengers and crews for transportation or national security purposes, the Secretary of Homeland Security shall ensure that all such processes take into consideration such passengers' and crews' privacy and civil liberties consistent with applicable laws, regulations, and guidance.]

Explanation: The Department requests deletion of this provision because it is a onetime directive.

Proposal to Delete *Old* Section 543

[SEC. 543. (a) Notwithstanding section 1356(n) of title 8, United States Code, of the funds deposited into the Immigration Examinations Fee Account, \$7,500,000 may be allocated by United States Citizenship and Immigration Services in fiscal year 2014 for the purpose of providing an immigrant integration grants program.

(b) For an additional amount for "United States Citizenship and Immigration Services" for the purpose of providing immigrant integration grants, \$2,500,000.

(c) None of the funds made available to United States Citizenship and Immigration Services for grants for immigrant integration may be used to provide services to aliens who have not been lawfully admitted for permanent residence.]

Explanation: The Department requests deletion of this provision because it is a onetime directive. Additionally, the Department requests funding in the Citizenship and Immigration Services appropriation rather than the authority to use fee funds in this provision.

Proposal to Delete *Old* Section 544

[SEC. 544. For an additional amount for the "Office of the Under Secretary for Management", \$35,000,000 to remain available until expended, for necessary expenses to plan, acquire, design, construct, renovate, remediate, equip, furnish, improve infrastructure, and occupy buildings and facilities for the department headquarters consolidation project and associated mission support consolidation: Provided, That the Committees on Appropriations of the Senate and the House of Representatives shall receive an expenditure plan not later than 90 days after the date of enactment of the Act detailing the allocation of these funds.]

Explanation: The Department requests deletion of this provision because it is duplicative of the Department's request for funding for headquarters consolidation.

Proposal to Delete *Old* Section 546

[SEC. 546. (a) For an additional amount for data center migration, \$42,200,000.

(b) Funds made available in subsection (a) for data center migration may be transferred by the Secretary of Homeland Security between appropriations for the same purpose, notwithstanding section 503 of this Act.

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

(c) No transfer described in subsection (b) shall occur until 15 days after the Committees on Appropriations of the Senate and the House of Representatives are notified of such transfer.]

Explanation: The Department requests deletion of this provision because the Department does not requesting funding for data center migration in Fiscal Year 2015.

Proposal to Delete *Old* Section 547

[SEC. 547. (a) For an additional amount for financial systems modernization, \$29,548,000. (b) Funds made available in subsection (a) for financial systems modernization may be transferred by the Secretary of Homeland Security between appropriations for the same purpose, notwithstanding section 503 of this Act. (c) No transfer described in subsection (b) shall occur until 15 days after the Committees on Appropriations of the Senate and the House of Representatives are notified of such transfer.]

Explanation: The Department requests deletion of this provision because it is duplicative of the Department's request for funding for financial systems modernization within the Office of the Chief Financial Officer's account.

Proposal to Amend *Old* Section 549

SEC. 549. Notwithstanding any other provision of law, if the Secretary of Homeland Security determines that specific U.S. Immigration and Customs Enforcement Service Processing Centers or other U.S. Immigration and Customs Enforcement owned detention facilities no longer meet the mission need, the Secretary is authorized to dispose of individual Service Processing Centers or other Immigration and Customs Enforcement owned detention facilities by directing the Administrator of General Services to sell all real and related personal property which support Service Processing Centers or other U.S. Immigration and Customs Enforcement owned detention facilities, subject to such terms and conditions as necessary to protect Government interests and meet program requirements: Provided, That the proceeds, net of the costs of sale incurred by the General Services Administration and U.S. Immigration and Customs Enforcement, shall be deposited as offsetting collections into a separate account that shall be available, subject to appropriation, until expended for other real property capital asset needs of existing U.S. Immigration and Customs Enforcement assets, excluding daily operations and maintenance costs, as the Secretary deems appropriate: Provided further, **[That any sale or collocation of federally owned detention facilities shall not result in the maintenance of fewer than 34,000 detention beds: Provided further,]** That the Committees on Appropriations of the Senate and the House of Representatives shall be notified 15 days prior to the announcement of any proposed sale or collocation.

Explanation: The Department requests deletion of the proviso within this provision as the proviso restricts the Department's ability to use and manage appropriated resources and infringes upon the Department's ability to manage administrative functions.

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

Proposal to Amend *Old* Section 551

SEC. 551. The Department of Homeland Security Chief Information Officer, the Commissioner of U.S. Customs and Border Protection, the Assistant Secretary of Homeland Security for U.S. Immigration and Customs Enforcement, the Director of the United States Secret Service, and the Director of the Office of Biometric Identity Management shall, with respect to fiscal years 2014, 2015, 2016, and 2017, submit to the Committees on Appropriations of the Senate and the House of Representatives, at the time that the President's budget proposal for fiscal year **[2015] 2016** is submitted pursuant to the requirements of section 1105(a) of title 31, United States Code, the information required in the multi-year investment and management plans required, respectively, under the headings "U.S. Customs and Border Protection, Salaries and Expenses" under title II of division D of the Consolidated Appropriations Act, 2012 (Public Law 112–74); "U.S. Customs and Border Protection, Border Security Fencing, Infrastructure, and Technology" under such title; section 568 of such Act; and "Office of the Chief Information Officer", "United States Secret Service, Acquisition, Construction, Improvements, and Related Expenses", and "Office of Biometric Identity Management" under division D of the Homeland Security Appropriations Act, 2013 (Public Law 113–6).

Explanation: The Department requests routine date changes.

Proposal to Delete *Old* Section 553

[SEC. 553. The Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives, not later than April 15, 2014, a report detailing the fiscal policy that prescribes Coast Guard budgetary policies, procedures, and technical direction necessary to comply with subsection (a) of section 557 of division D of Public Law 113–6 (as required to be developed under subsection (b) of such section).]

Explanation: The Department requests deletion of this provision because it was a onetime directive.

Proposal to Delete *Old* Section 554

[SEC. 554. (a) Of the amounts made available by this Act for National Protection and Programs Directorate, "Infrastructure Protection and Information Security", \$166,000,000 for the "Federal Network Security" program, project, and activity shall be used to deploy on Federal systems technology to improve the information security of agency information systems covered by section 3543(a) of title 44, United States Code: Provided, That funds made available under this section shall be used to assist and support Government-wide and agency-specific efforts to provide adequate, risk-based, and cost-effective cybersecurity to address escalating and rapidly evolving threats to information security, including the acquisition and operation of a continuous monitoring and diagnostics program, in collaboration with departments and agencies, that includes equipment, software, and Department of Homeland Security supplied services: Provided further, That not later than April 1, 2014, and quarterly thereafter, the Under Secretary of Homeland Security of the

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

National Protection and Programs Directorate shall submit to the Committees on Appropriations of the Senate and the House of Representatives a report on the obligation and expenditure of funds made available under this section: Provided further, That continuous monitoring and diagnostics software procured by the funds made available by this section shall not transmit to the Department of Homeland Security any personally identifiable information or content of network communications of other agencies' users: Provided further, That such software shall be installed, maintained, and operated in accordance with all applicable privacy laws and agency-specific policies regarding network content.

(b) Funds made available under this section may not be used to supplant funds provided for any such system within an agency budget.

(c) Not later than July 1, 2014, the heads of all Federal agencies shall submit to the Committees on Appropriations of the Senate and the House of Representatives expenditure plans for necessary cybersecurity improvements to address known vulnerabilities to information systems described in subsection (a).

(d) Not later than October 1, 2014, and quarterly thereafter, the head of each Federal agency shall submit to the Director of the Office of Management and Budget a report on the execution of the expenditure plan for that agency required by subsection (c): Provided, That the Director of the Office of Management and Budget shall summarize such execution reports and annually submit such summaries to Congress in conjunction with the annual progress report on implementation of the E-Government Act of 2002 (Public Law 107–347), as required by section 3606 of title 44, United States Code.

(e) This section shall not apply to the legislative and judicial branches of the Federal Government and shall apply to all Federal agencies within the executive branch except for the Department of Defense, the Central Intelligence Agency, and the Office of the Director of National Intelligence.]

Explanation: The Department requests deletion of this provision because the Department requests funding for the activities covered by this provision under the Infrastructure Protection and Information Security appropriation.

Proposal to Delete *Old* Section 557

[SEC. 557. None of the funds provided in this or any other Act may be obligated to implement the National Preparedness Grant Program or any other successor grant programs unless explicitly authorized by Congress.]

Explanation: The Department requests deletion of this restrictive provision because it was a onetime directive and restricts the Department's ability to use and manage appropriated resources.

Proposal to Delete *Old* Section 558

[SEC. 558. None of the funds made available in this Act may be used to provide funding for the position of Public Advocate, or a successor position, within U.S. Immigration and Customs Enforcement.]

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

Explanation: The Department requests deletion of this provision because it was a onetime directive, restricts the Department's ability to use and manage appropriated resources, and infringes upon the Department's ability to manage administrative functions.

Proposal to Delete *Old* Section 559

[SEC. 559. (a) IN GENERAL.—In addition to existing authorities, the Commissioner of U.S. Customs and Border Protection, in collaboration with the Administrator of General Services, is authorized to conduct a pilot program in accordance with this section to permit U.S. Customs and Border Protection to enter into partner- ships with private sector and government entities at ports of entry for certain services and to accept certain donations.

(b) RULE OF CONSTRUCTION.—Except as otherwise provided in this section, nothing in this section may be construed as affecting in any manner the responsibilities, duties, or authorities of U.S. Customs and Border Protection or the General Services Administration.

(c) DURATION.—The pilot program described in subsection (a) shall be for five years. A partnership entered into during such pilot program may last as long as required to meet the terms of such partnership. At the end of such five year period, the Commissioner may request that such pilot program be made permanent.

(d) COORDINATION.—

(1) IN GENERAL.—The Commissioner, in consultation with participating private sector and government entities in a partnership under subsection (a), shall provide the Administrator with information relating to U.S. Customs and Border Protection's requirements for new facilities or upgrades to existing facilities at land ports of entry.

(2) CRITERIA.—The Commissioner and the Administrator shall establish criteria for entering into a partnership under subsection (a) that include the following:

(A) Selection and evaluation of potential partners.

(B) Identification and documentation of roles and responsibilities between U.S. Customs and Border Protection, General Services Administration, and private and government partners.

(C) Identification, allocation, and management of explicit and implicit risks of partnering between U.S. Customs and Border Protection, General Services Administration, and private and government partners.

(D) Decision-making and dispute resolution processes in partnering arrangements.

(E) Criteria and processes for U.S. Customs and Border Protection and General Services Administration to terminate agreements if private or government partners are not meeting the terms of such a partnership, including the security standards established by U.S. Customs and Border Protection.

(3) EVALUATION PLAN.—The Commissioner, in collaboration with the Administrator, shall submit to the Committee on Homeland Security, the Committee on Transportation and Infrastructure, and the Committee on Appropriations of the House of Representatives and the Committee on Homeland Security and Governmental Affairs, the Committee on Environment and Public Works, and the Committee on Appropriations of the Senate, an evaluation plan for the pilot program described in subsection (a) that includes the following:

(A) Well-defined, clear, and measurable objectives.

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

(B) Performance criteria or standards for determining the performance of such pilot program.

(C) Clearly articulated evaluation methodology, including—

- (i) sound sampling methods;**
- (ii) a determination of appropriate sample size for the evaluation design;**
- (iii) a strategy for tracking such pilot program's performance; and**
- (iv) an evaluation of the final results.**

(D) A plan detailing the type and source of data necessary to evaluate such pilot program, methods for data collection, and the timing and frequency of data collection.

(e) AUTHORITY TO ENTER INTO AGREEMENTS FOR THE PROVISION OF CERTAIN SERVICES AT PORTS OF ENTRY.—

(1) IN GENERAL.—Notwithstanding section 13031(e) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(e)) and section 451 of the Tariff Act of 1930 (19 U.S.C. 1451), the Commissioner may, during the pilot program described in subsection (a) and upon the request of a private sector or government entity with which U.S. Customs and Border Protection has entered into a partnership, enter into a reimbursable fee agreement with such entity under which—

(A) U.S. Customs and Border Protection will provide services described in paragraph (2) at a port of entry;

(B) such entity will pay a fee imposed under paragraph (4) to reimburse U.S. Customs and Border Protection for the costs incurred in providing such services; and

(C) each facility at which U.S. Customs and Border Protection services are performed shall be provided, maintained, and equipped by such entity, without cost to the Federal Government, in accordance with U.S. Customs and Border Protection specifications.

(2) SERVICES DESCRIBED.—Services described in this paragraph are any activities of any employee or contractor of U.S. Customs and Border Protection pertaining to customs, agricultural processing, border security, and immigration inspection-related matters at ports of entry.

(3) LIMITATIONS.—

(A) IMPACTS OF SERVICES.—The Commissioner may not enter into a reimbursable fee agreement under this subsection if such agreement would unduly and permanently impact services funded in this or any other appropriations Act, or provided from any account in the Treasury of the United States derived by the collection of fees.

(B) FOR CERTAIN COSTS.—The authority found in this subsection may not be used at U.S. Customs and Border Protection-serviced air ports of entry to enter into reimbursable fee agreements for costs other than payment of overtime.

(C) The authority found in this subsection may not be used to enter into new preclearance agreements or begin to provide U.S. Customs and Border Protection services outside of the United States.

(D) The authority found in this subsection shall be limited with respect to U.S. Customs and Border Protection-serviced air ports of entry to five pilots per year.

(4) FEE.—

(A) IN GENERAL.—The amount of the fee to be charged pursuant to an agreement authorized under paragraph (1) shall be paid by each private sector and government entity requesting U.S. Customs and Border Protection services, and shall include the salaries and expenses of individuals employed by U.S. Customs and Border Protection to provide such

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

services and other costs incurred by U.S. Customs and Border Protection relating to such services, such as temporary placement or permanent relocation of such individuals.

(B) OVERSIGHT OF FEES.—The Commissioner shall develop a process to oversee the activities reimbursed by the fees charged pursuant to an agreement authorized under paragraph (1) that includes the following:

(i) A determination and report on the full costs of providing services, including direct and indirect costs, including a process for increasing such fees as necessary.

(ii) Establishment of a monthly remittance schedule to reimburse appropriations.

(iii) Identification of overtime costs to be reimbursed by such fees.

(5) DEPOSIT OF FUNDS.—Funds collected pursuant to any agreement entered into under paragraph (1) shall be deposited as offsetting collections and remain available until expended, without fiscal year limitation, and shall directly reimburse each appropriation for the amount paid out of that appropriation for any expenses incurred by U.S. Customs and Border Protection in providing U.S. Customs and Border Protection services and any other costs incurred by U.S. Customs and Border Protection relating to such services.

(6) TERMINATION.—The Commissioner shall terminate the provision of services pursuant to an agreement entered into under paragraph (1) with a private sector or government entity that, after receiving notice from the Commissioner that a fee imposed under paragraph (4) is due, fails to pay such fee in a timely manner. In the event of such termination, all costs incurred by U.S. Customs and Border Protection, which have not been reimbursed, will become immediately due and payable. Interest on unpaid fees will accrue based on current Treasury borrowing rates. Additionally, any private sector or government entity that, after notice and demand for payment of any fee charged under paragraph (4), fails to pay such fee in a timely manner shall be liable for a penalty or liquidated damage equal to two times the amount of such fee. Any amount collected pursuant to any agreement entered into under paragraph (1) shall be deposited into the account specified under paragraph (5) and shall be available as described therein.

(7) NOTIFICATION.—The Commissioner shall notify the Congress 15 days prior to entering into any agreement under paragraph (1) and shall provide a copy of such agreement.

(f) DONATIONS.—

(1) IN GENERAL.—Subject to paragraph (2), the Commissioner and the Administrator may, during the pilot program described in subsection (a), accept a donation of real or personal property (including monetary donations) or nonpersonal services from any private sector or government entity with which U.S. Customs and Border Protection has entered into a partnership.

(2) ALLOWABLE USES OF DONATIONS.—The Commissioner and the Administrator, with respect to any donation provided pursuant to paragraph (1), may—

(A) use such donation for necessary activities related to the construction, alteration, operation, or maintenance of an existing port of entry facility under the jurisdiction, custody, and control of the Commissioner, including expenses related to—

(i) land acquisition, design, construction, repair and alteration;

(ii) furniture, fixtures, and equipment;

(iii) the deployment of technology and equipment; and

(iv) operations and maintenance; or

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

(B) transfer such property or services to the Administrator for necessary activities described in subparagraph (A) related to a new or existing port of entry under the jurisdiction, custody, and control of the Administrator, subject to chapter 33 of title 40, United States Code.

(3) CONSULTATION AND BUDGET.—

(A) WITH THE PRIVATE SECTOR OR GOVERNMENT ENTITY.—To accept a donation described in paragraph (1), the Commissioner and the Administrator shall—

(i) consult with the appropriate stakeholders and the private sector or government entity that is providing the donation and provide such entity with a description of the intended use of such donation; and

(ii) submit to the Committee on Appropriations, the Committee on Homeland Security, and the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Appropriations, the Committee on Homeland Security and Governmental Affairs, and the Committee on Environment and Public Works of the Senate a report not later than one year after the date of enactment of this Act, and annually thereafter, that describes—

(I) the accepted donations received under this subsection;

(II) the ports of entry that received such donations; and

(III) how each donation helped facilitate the construction, alternation, operation, or maintenance of a new or existing land port of entry.

(B) SAVINGS PROVISION.—Nothing in this paragraph may be construed to—

(i) create any right or liability of the parties referred to in subparagraph (A); or

(ii) affect any consultation requirement under any other law.

(4) EVALUATION PROCEDURES.—Not later than 180 days after the date of the enactment of this Act, the Commissioner, in consultation with the Administrator, shall establish procedures for evaluating a proposal submitted by a private sector or government entity to make a donation of real or personal property (including monetary donations) or nonpersonal services under paragraph (1) relating to a port of entry under the jurisdiction, custody and control of the Commissioner or the Administrator and make any such evaluation criteria publicly available.

(5) CONSIDERATIONS.—In determining whether or not to approve a proposal referred to in paragraph (4), the Commissioner or the Administrator shall consider—

(A) the impact of such proposal on the port of entry at issue and other ports of entry on the same border;

(B) the potential of such proposal to increase trade and travel efficiency through added capacity;

(C) the potential of such proposal to enhance the security of the port of entry at issue;

(D) the funding available to complete the intended use of a donation under this subsection, if such donation is real property;

(E) the costs of maintaining and operating such donation;

(F) whether such donation, if real property, satisfies the requirements of such proposal, or whether additional real property would be required;

(G) an explanation of how such donation, if real property, was secured, including if eminent domain was used;

(H) the impact of such proposal on staffing requirements; and

(I) other factors that the Commissioner or Administrator determines to be relevant.

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

(6) UNCONDITIONAL MONETARY DONATIONS.—A monetary donation shall be made unconditionally, although the donor may specify—

(A) the port of entry facility or facilities to be benefitted from such donation; and

(B) the timeframe during which such donation shall be used.

(7) SUPPLEMENTAL FUNDING.—Real or personal property (including monetary donations) or nonpersonal services donated pursuant to paragraph (1) may be used in addition to any other funding (including appropriated funds), property, or services made available for the same purpose.

(8) RETURN OF DONATIONS.—If the Commissioner or the Administrator does not use the real property or monetary donation donated pursuant to paragraph (1) for the specific port of entry facility or facilities designated by the donor or within the timeframe specified by the donor, such donated real property or money may be returned to the donor. No interest shall be owed to the donor with respect to any donation of funding provided under such paragraph (1) that is returned pursuant to this paragraph.

(9) SAVINGS PROVISION.—Nothing in this subsection may be construed to affect or alter the existing authority of the Commissioner or the Administrator to construct, alter, operate, and maintain port of entry facilities.

(g) ANNUAL REPORTS.—The Commissioner, in collaboration with the Administrator, shall annually submit to the Committee on Homeland Security and the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Homeland Security and Governmental Affairs and the Committee on Environment and Public Works of the Senate a report on the pilot program and activities undertaken pursuant thereto in accordance with this Act.

(h) DEFINITIONS.—In this section—

(1) the term "private sector entity" means any corporation, partnership, trust, association, or any other private entity, or any officer, employee, or agent thereof;

(2) the term "Commissioner" means the Commissioner of U.S. Customs and Border Protection; and

(3) the term "Administrator" means the Administrator of General Services.

(i) ROLE OF GENERAL SERVICES ADMINISTRATION.—Under this section, collaboration with the Administrator of General Services is required only with respect to partnerships at land ports of entry.]

Explanation: The Department requests deletion of this provision because it is permanent.

Proposal to Delete *Old* Section 560

[SEC. 560. None of the funds made available in this Act may be used to pay for the travel to or attendance of more than 50 employees of a single component of the Department of Homeland Security, who are stationed in the United States, at a single international conference unless the Secretary of Homeland Security, or a designee, determines that such attendance is in the national interest and notifies the Committees on Appropriations of the Senate and the House of Representatives within at least 10 days of that determination and the basis for that determination: Provided, That for purposes of this section the term "international conference" shall mean a conference occurring outside of the United States

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

attended by representatives of the United States Government and of foreign governments, international organizations, or nongovernmental organizations.]

Explanation: The Department requests deletion of this provision because it was a onetime directive, restricts the Department's ability to use and manage appropriated resources, and infringes upon the Department's ability to manage administrative functions.

Proposal to Amend *Old* Section 561

SEC. 561. None of the funds made available by this Act may be used to enter into a contract, memorandum of understanding, or cooperative agreement with, make a grant to, or provide a loan or loan guarantee to any corporation that was convicted **[(or had an officer or agent of such corporation acting on behalf of the corporation convicted)]** of a felony criminal violation under any Federal **[or State law]** within the preceding 24 months, where the awarding agency is aware of the conviction, unless **[the]** *a Federal* agency has considered suspension or debarment of the corporation**[, or such officer or agent,]** and made a determination that this further action is not necessary to protect the interests of the Government.

Explanation: The Department requests clarifying amendments.

Proposal to Amend *Old* Section 562

SEC. 562. None of the funds made available in this Act may be used to enter into a contract, memorandum of understanding, or cooperative agreement with, make a grant to, or provide a loan or loan guarantee to, any corporation for which any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability, where the awarding agency is aware of the unpaid tax liability, unless **[the]** *a Federal* agency has considered suspension or debarment of the corporation and made a determination that this further action is not necessary to protect the interests of the Government.

Explanation: The Department requests clarifying amendments.

Proposal to Delete *Old* Section 565

[SEC. 565. In making grants under the heading "Firefighter Assistance Grants", the Secretary may grant waivers from the requirements in subsections (a)(1)(A), (a)(1)(B), (a)(1)(E), (c)(1), (c)(2), and (c)(4) of section 34 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2229a).]

Explanation: The Department requests deletion of this provision because the substance of this provision is proposed as a proviso under the Federal Emergency Management Agency, State and Local Programs appropriation.

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

Proposal to Delete *Old* Section 566

[SEC. 566. (a) IN GENERAL.—Beginning on the date of the enactment of this Act, the Secretary shall not—

(1) establish, collect, or otherwise impose any new border crossing fee on individuals crossing the Southern border or the Northern border at a land port of entry; or

(2) conduct any study relating to the imposition of a border crossing fee.

(b) BORDER CROSSING FEE DEFINED.—In this section, the term "border crossing fee" means a fee that every pedestrian, cyclist, and driver and passenger of a private motor vehicle is required to pay for the privilege of crossing the Southern border or the Northern border at a land port of entry.]

Explanation: The Department requests deletion of this provision because its requirements are permanent.

Proposal to Delete *Old* Section 568

[SEC. 568. As authorized by section 601(b) of the United States-Colombia Trade Promotion Agreement Implementation Act (Public Law 112–42) fees collected from passengers arriving from Canada, Mexico, or an adjacent island pursuant to section 13031(a)(5) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)(5)) shall be available until expended.]

Explanation: The Department requests deletion of the provision because its substance is included in subsection (a)(3) of proposed general provision section 548.

Proposal to Delete *Old* Section 570

[SEC. 570. The Commissioner of U.S. Customs and Border Protection may waive the claim for reimbursement of \$221,123 from the fiscal year 2009 appropriation for the Office of the Federal Coordinator for Gulf Coast Rebuilding.]

Explanation: The Department requests deletion of this provision because it is a onetime authority.

Proposal to Delete *Old* Section 571

[SEC. 571. (a) The Commissioner of U.S. Customs and Border Protection shall develop metrics that support a goal of reducing passenger processing times at air, land, and sea ports of entry, taking into consideration the capacity of an air or land port's physical infrastructure, airline arrival schedules, peak processing periods, and security requirements.

(b) Not later than 240 days after the date of enactment of this Act, the Commissioner of U.S. Customs and Border Protection shall develop and implement operational work plans to meet the goals of subsection (a) at United States air, land, and sea ports with the highest passenger volume and longest wait times. In developing such plans, the Commissioner of

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

U.S. Customs and Border Protection shall consult with appropriate stakeholders, including, but not limited to, airlines and airport operators, port authorities, and importers.]

Explanation: The Department requests deletion of this provision because it is a onetime directive.

Proposal to Delete *Old* Section 572

[SEC. 572. None of the funds made available in this Act may be used to implement, carry out, administer, or enforce section 1308(h) of the National Flood Insurance Act of 1968 (42 U.S.C. 4015(h)).]

Explanation: The Department requests deletion of the provision because it was a onetime directive and the provision restricts the Department's ability to use and manage appropriated resources.

Proposal to Insert *New* Section 542

SEC. 542. Of the fees deposited under the heading "Transportation Security Administration-Aviation Security" in fiscal year 2013 and sequestered pursuant to section 251A of the Balanced Budget and Emergency Deficit Control Act, as amended (2 U.S.C.901a), \$104,220,263 shall be available until September 30, 2016.

Explanation: The Department requests insertion of this provision to provide the Department with the authority, in accordance with 2 U.S.C. § 906(k), to obligate fees that were previously collected.

Proposal to Insert *New* Section 543

SEC. 543. For fiscal year 2015—(a) section 44940 of title 49, United States Code, shall be applied as follows:

(1) as if subsections (a)(2) and (d)(1) were reinstated as they existed prior to enactment of the Bipartisan Budget Act of 2013 (Public Law 113–37); and

(2) in subsection (c), as if "\$6.00" were substituted for "\$5.60", and as if "has at least one segment that" were inserted before "originates".

(b) The Secretary of Homeland Security shall implement the fee increase authorized by subsection (a)(2)—

(1) beginning on January 1, 2015; and

(2) through the publication of notice of such fee in the Federal Register, notwithstanding section 9701 of title 31, United States Code, and the procedural requirements of section 553 of title 5, United States Code.

Explanation: The Department requests insertion of this provision that would be effective for fiscal year 2015 to authorize aviation security fees and to increase aviation passenger fees to align the costs of providing security services to those who benefit from the services.

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

Proposal to Insert New Section 544

SEC. 544. RAISING THE NUMERICAL LIMITATION ON U VISAS. Subparagraph (A) of section 214(p)(2) of the Immigration and Nationality Act (8 U.S.C. § 1184(p)(2)(A)), is amended by striking "10,000" and inserting "20,000".

Explanation: The Department requests insertion of this provision to raise the statutory cap for visa petitions under 8 U.S.C. § 1184(p)(2)(A) from 10,000 to 20,000.

Proposal to Insert New Section 545

SEC. 545. FUNDING FOR UNITED STATES CITIZENSHIP FOUNDATION. Notwithstanding section 286(u) of the Immigration and Nationality Act (8 U.S.C. 1356(u)), the Director of U.S. Citizenship and Immigration Services may pay up to \$3,000,000 of the premium processing fees described in such section 286(u) to the U.S. Citizenship Foundation in fiscal year 2015.

Explanation: The Department requests insertion of this provision to authorize the U.S. Citizenship and Immigration Services during fiscal year 2015 to use up to \$3 million in premium processing fees collected from certain filers seeking employment-based immigration benefits from USCIS to provide necessary start-up funding to the proposed U.S. Citizenship Foundation.

Proposal to Insert New Section 546

SEC. 546. DAM SAFETY ACT. The National Dam Safety Program Act, as amended (33 U.S.C. 467 note) is amended -
(a) In section 8(e) (33 U.S.C. 467f) by inserting after paragraph (6) the following new paragraphs: "(7) PERFORMANCE-BASED EVALUATION-FEMA shall establish performance measures for its assessment of State programs participating in the National Dam Safety Program. FEMA shall assess State performance under this section using these measures. FEMA shall establish targets for the States for the performance measures within 120 days of the enactment of this Act and may update them, as needed, each fiscal year. "(8) ALLOCATION- IN GENERAL.-Subject to subparagraphs (C) and (D), for each fiscal year, amounts made available under this subsection to carry out section 8 shall be allocated among the states as follows: "(A) One-third of the funds shall be awarded among states that qualify as eligible for assistance under this section. "(B) Two-thirds of the funds shall be awarded among states that not only qualify as eligible for assistance under this section, but also meet or exceed their target established for the performance measures referred to in section 8(e)(7). "(C) MAXIMUM AMOUNT OF ALLOCATION.- The amount of funds allocated to a State under this paragraph may not exceed the funds committed by the State to implement dam safety activities. "(D) DETERMINATION.-The Administrator shall determine the amount allocated to States."
(b) By redesignating sections 11 through 13, as sections 12 through 14, respectively, and by inserting after section 10 the following new section: "Sec.11.PUBLIC AWARENESS AND OUTREACH FOR DAM SAFETY. The Administrator, in consultation with other Federal agencies, State, and local governments, dam owners, the emergency management community, the

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

private sector, non-governmental organizations and associations, and universities and academia, and others as appropriate, shall carry out a nationwide public awareness and outreach program to provide risk information to the public related to the hazards of dam failures and related matters."

(2) striking subsections (c), (d) and (e); and

(3) redesignating subsection (f) as subsection (c).

Explanation: The Department requests insertion of this provision to provide for a nationwide public awareness and outreach program to provide risk information to Americans living and working downstream of high-hazard and significant-hazard potential dams. The information will assist emergency action planning and mitigate risk to the public from dam incidents and dam failures.

Proposal to Insert New Section 547

SEC. 547. Of the unobligated balance available to "Federal Emergency Management Agency, Disaster Relief Fund", \$200,000,000 are hereby permanently cancelled: Provided, That no amounts may be cancelled from amounts that were designated by the Congress as an emergency requirement pursuant to a concurrent resolution on the budget or the Balanced Budget and Emergency Deficit Control Act of 1985, as amended: Provided further, That no amounts may be cancelled from the amounts that were designated by the Congress as being for disaster relief pursuant to section 251(b)(2)(D) of the Balanced Budget and Emergency Deficit Control Act of 1985.

Explanation: : The Department requests insertion of this provision to rescind carryover budget authority from the Disaster Relief Fund that was not previously designated as an emergency or disaster relief requirement under the Balanced Budget and Emergency Deficit Control Act of 1985.

Proposal to Insert New Section 548

SEC. 548. (a) (1) For fiscal year 2015, the fees imposed in subsection (a) of section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)) shall be applied by substituting the following amounts for the amounts provided in such subsection:

(A) For paragraph (1), \$594;

(B) For paragraph (2), \$7.50;

(C) For paragraph (3), \$11.25;

(D) For paragraph (4), \$37.50;

(E) For paragraph (5), \$7.50 for the fee imposed in subparagraph(A) and \$2.60 for the fee imposed in subparagraph (B);

(F) For paragraph (6), \$7.50;

(G) For paragraph (7), \$188; and

(H) For paragraph (8), \$150.

(2) For fiscal year 2015, the dollar amounts in subsection (b) of section 58c of title 19, United States Code, shall be applied by substituting the following amounts for the amounts provided in such subsection:

U.S. Department of Homeland Security
Title V – Fiscal Year 2015 Explanation of Changes – General Provisions

- (A) For paragraphs (2) and (3), \$135;
- (B) For subparagraph (A) of paragraph (5), \$8,316;
- (C) For paragraph (6), \$2,100;
- (D) For subparagraph (A)(ii) of paragraph (9), \$1.36; and
- (E) For subparagraph (B)(i) of paragraph (9), not more than \$3.00 per individual airway bill or bill of lading.
- (3) As authorized by section 601(b) of the United States-Colombia Trade Promotion Agreement Implementation Act (Public Law 112–42) fees collected from passengers arriving from Canada, Mexico, or an adjacent island pursuant to section 13031(a)(5) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)(5)) shall be available until expended.
- (b) For fiscal year 2015, the fees imposed in section 286 of the Immigration and Nationality Act (8 U.S.C. 1356) shall be applied by substituting the following amounts for the amounts provided in such section:
- (1) For subsection (d), \$9; and
- (2) For paragraph (3) of subsection (e), \$9.

Explanation: The Department requests insertion of this provision to adjust fees for Customs and Border Protection to provide greater flexibility in carrying out its requirements and in the use of appropriated resources to meet frontline mission needs.

Proposal to Delete *Old* Section 573

[(RESCISSIONS)]

[SEC. 573. Of the funds appropriated to the Department of Homeland Security, the following funds are hereby rescinded from the following accounts and programs in the specified amounts: Provided, That no amounts may be rescinded from amounts that were designated by the Congress as an emergency requirement pursuant to a concurrent resolution on the budget or the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177), as amended—

- (1) \$14,500,000 from Public Law 111–83 under the heading "Coast Guard Acquisition, Construction, and Improvements";**
- (2) \$35,500,000 from Public Law 112–10 under the heading "Coast Guard Acquisition, Construction, and Improvements";**
- (3) \$79,300,000 from Public Law 112–74 under the heading "Coast Guard Acquisition, Construction, and Improvements";**
- (4) \$19,879,000 from Public Law 113–6 under the heading "Coast Guard Acquisition, Construction, and Improvements";**
- (5) \$35,000,000 from Public Law 113–6 under the heading "Transportation Security Administration Aviation Security";**
- (6) \$20,000,000 from Public Law 113–6 under the heading "Transportation Security Administration Surface Transportation Security";**
- (7) \$2,000,000 from "Transportation Security Administration Aviation Security" account 70x0550;**
- (8) \$977,000 from "Transportation Security Administration Research and Development" account 70x0553; and**

U.S. Department of Homeland Security

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Office of the Secretary and Executive Management

I. Appropriation Overview

A. Mission Statement for Office of the Secretary and Executive Management:

The Department of Homeland Security (DHS) Office of the Secretary and Executive Management (OSEM) provides leadership, direction, and management to the Department. OSEM establishes and implements policy and provides various support functions and oversight to all entities within the Department. OSEM also oversees the Department's ongoing efforts to integrate and consolidate its resources and operations in order to create a more seamless organization and align resources to the highest Department-wide priorities.

B. Budget Activities:

OSEM is a separate appropriation within Departmental Management and Operations (DMO) that provides resources for 12 separate Programs, Projects and Activities (PPAs) including: Immediate Office of the Secretary, Immediate Office of the Deputy Secretary, Chief of Staff (COS), Office of the Executive Secretary (ESEC), Office of the General Counsel (OGC), Office for Civil Rights and Civil Liberties (CRCL), Office of Public Affairs (OPA), Office of Legislative Affairs (OLA), Privacy Office (PRIV), Office of the Citizenship and Immigration Services Ombudsman (CISOMB), Office of Policy (PLCY), and the Office of Intergovernmental Affairs. Below are brief descriptive summaries of the PPAs.

Immediate Office of the Secretary: The Office of the Secretary's role is to provide executive leadership, management, direction, and oversight for the Department's Components. The Secretary represents DHS to the President, Congress, State, local, tribal, and territorial partners, and the general public.

Immediate Office of the Deputy Secretary: The Office of the Deputy Secretary supports the Secretary by providing leadership to the Department, especially regarding internal management and direction.

Chief of Staff: The Chief of Staff is responsible for coordinating policy initiatives and other actions of the Department's Components, Directorates, and offices.

Office of the Executive Secretary: ESEC supports the Offices of the Secretary and Deputy Secretary with management of their correspondence, decision documents, and other written communications; including briefing books, Congressional questions for the record, and testimony for all Departmental hearings. ESEC is charged with ensuring that all materials presented to the Secretary and Deputy Secretary for signature has been thoroughly cleared with all relevant Components.

Office of the General Counsel: The General Counsel is the chief legal officer for DHS and oversees and integrates more than 1,800 attorneys throughout the Department. OGC is responsible for ensuring that Departmental activities comply with applicable legal requirements, as well as establishing that the Department's efforts to secure the Nation are consistent with the civil rights and civil liberties of the public and observe the rule of law. OGC provides legal advice on areas such as national security, immigration, litigation, international law, maritime safety and security, transportation security, border security law, cyber security, fiscal and appropriations law, environmental law, and many others. OGC also provides legal services in several areas where the law intersects with the achievement of mission goals, such as the coordination of the Department's rulemaking activities, managing interdepartmental clearance of proposed legislation, and providing legal training for law enforcement officers. OGC provides legal counsel for all DHS offices (except those specifically excluded by statute).

Office for Civil Rights and Civil Liberties: CRCL supports the Department as it secures the Nation while preserving individual liberty, fairness, and equality under the law. CRCL performs four key functions to integrate civil rights and civil liberties into Departmental activities:

- Advising Department leadership, personnel, and partners about civil rights and civil liberties issues; ensuring respect for civil rights and civil liberties in policy decisions and in the implementation of those decisions.
- Communicating with individuals and communities whose civil rights and civil liberties may be affected by DHS activities, informing them about policies and avenues of redress, and promoting appropriate attention within the Department to their experiences and concerns.
- Investigating and resolving civil rights and civil liberties complaints filed by the public.
- Leading the Department's equal employment opportunity (EEO) programs and promoting personnel diversity and merit system principles.

Office of Public Affairs: OPA is responsible for managing the Department's external and internal communications. The office responds to national media inquiries, maintains and updates the Department's website, writes speeches for senior Department officials, and coordinates speaking events. OPA fosters strategic communication throughout the Department and with external stakeholders through development and coordination of major DHS announcements and rollouts as well as setting common goals to promote "One DHS" objectives. OPA manages the "If You See Something, Say Something™" campaign, which engages the public and key frontline law enforcement personnel to identify and report indicators of terrorism and terrorism-related crime to the proper transportation and law enforcement authorities. The office manages the Department's organizational identity program, which includes usage of the DHS seal and related guidelines. In addition, the office oversees the Department's employee communication activities, which include coordinating communications for Department-wide initiatives, town hall meetings between management and employees, and the operation and management of an intranet site. Per Homeland Security Presidential Directive (HSPD) 5, OPA's incident communications program guides overall Federal incident communication activity and coordinates with State, local, and international partners to ensure accurate and timely information is provided to the public during a crisis.

Office of Legislative Affairs: OLA serves as the Department's primary liaison to Congress. OLA advocates for the policy interests of the Administration and the Secretary. OLA also ensures that all DHS Components are actively engaged with Congress in their specific areas of responsibility. OLA

articulates views on behalf of DHS Components and their legislative initiatives. OLA responds to requests and inquiries from congressional committees, individual Members of Congress, and their staffs. OLA also participates in the Senate confirmation process for all DHS Presidential nominees.

Privacy Office: The Privacy Office protects the collection, use, and disclosure of Personally Identifiable Information (PII) and Departmental information. It ensures that appropriate access to information is consistent with the vision, strategic mission, and core values of the Department; and implements the policies of the Department to defend and protect individual rights, liberties, and information interests of the public. The Privacy Office has oversight of all privacy and disclosure policy matters, including compliance with the Privacy Act of 1974, the Freedom of Information Act, and the completion of privacy impact statements on all new programs and systems, as required by the E-Government Act of 2002 and Section 222 of the Homeland Security Act. The DHS Privacy Office is the first statutorily mandated Privacy Office within the Federal Government.

Citizenship and Immigration Services Ombudsman: CISOMB assists individuals and employers in resolving problems connected with pending United States Citizenship and Immigration Services (USCIS) cases. In addition, as required by statute, CISOMB identifies common problems experienced by individuals and employers when seeking USCIS services, and proposes changes to mitigate such problems and improve the delivery of immigration services. In accomplishing each of these missions, the CISOMB works impartially, soliciting information and feedback from USCIS, other government agencies, immigration benefits applicants, and the immigration stakeholder community.

Office of Policy: The Office of Policy (PLCY) serves as a central resource to the Secretary and other Department leaders for policy development and review, strategic planning and analysis, and facilitation of decision-making on the full breadth of issues that may arise across the dynamic homeland security enterprise. PLCY is responsible for strengthening our Nation's homeland security by developing DHS-wide policies, programs, and planning to promote and ensure the highest level of performance, quality, consistency, and integration in the execution of all homeland security missions. PLCY represents and coordinates the consolidated DHS position at White House interagency committee meetings. The Office develops and articulates the long-term strategic view of the Department and translates the Secretary's strategic priorities into the Quadrennial Homeland Security Review, DHS Strategic Plan, and other planning products that drive increased operational effectiveness through integration, prioritization, and resource allocation.

Office of Intergovernmental Affairs: IGA is responsible for communicating and coordinating State, local, tribal, and territorial (SLTT) government interactions throughout and across the Department. IGA promotes an integrated national approach to homeland security by coordinating and advancing Federal interaction with SLTT governments. IGA is responsible for continuing the homeland security dialogue with our SLTT partners, along with the national associations that represent them. IGA serves as the Secretary's primary point of contact for SLTT elected and appointed officials and their associations to ensure there are open lines of communications between the Department and its homeland security partners.

C. Budget Request Summary:

The Office of the Secretary and Executive Management requests 586 positions, 582.5 FTE, and \$128.769 million for FY 2015. The FY 2015 request results in a net increase of 23 positions, 19.5 FTE, and \$6.419 million from the FY 2014 Enacted. Adjustments to base of 5.419 million include:

- Increase of \$207 thousand for annualization of FY 2014 pay raise
- Increase of \$650 thousand for FY 2015 pay raise
- Increase of \$38 thousand for Working Capital Fund
- Increase of \$887 thousand for increased Retirement Contribution
- Increase of \$3.784 million for Restoration of Prior Year Reductions
- Decrease of \$147 thousand for Travel Efficiencies

The total program increase includes 5 positions, 2.5 FTE and \$1 million for Employment-based Case Inquires for the Office of Citizenship and Immigration Services Ombudsman.

Total Change 2014 to 2015	-	-	(100)

OSEM requests 6 positions, 6 FTE, and \$3.950 million in FY 2015 for the Immediate Office of the Secretary. Base adjustments include:

- Increase of \$3 thousand for annualization of FY 2014 Pay Raise
- Increase of \$11 thousand for FY 2015 Pay Raise
- Increase of \$12 thousand for increased Retirement Contribution
- Decrease of \$126 thousand in Efficiencies

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secretary is appointed by the President and confirmed by the Senate to lead DHS and act as the principal adviser to the President on homeland security matters. The Secretary ensures a coordinated national effort for the accomplishment of all DHS mission requirements, which include but are not limited to the prevention of terrorist attacks in the United States, the reduction of vulnerability to and minimization of impacts from catastrophic events, and the recovery from damage that may occur. The Secretary is a member of the Homeland Security Council, and serves as the principal spokesperson on homeland security issues for the Administration when testifying before the House Homeland Security Committee, the Senate Homeland Security and Government Affairs Committee, and the House and Senate Appropriations Committees.

CURRENT SERVICES PROGRAM DESCRIPTION:

CRCL provides DHS with advice on the full range of civil rights and civil liberties issues, investigates complaints by the public about civil rights and civil liberties violations, and offers recommendations to solve problems uncovered by those investigations. CRCL provides training and technical assistance to DHS personnel and SLTT partners and conducts outreach and engagement with communities whose civil rights and civil liberties are affected by DHS activities. CRCL is specifically involved in the oversight of ICE's 287(g) and Secure Communities programs by providing policy advice, investigations, and training to SLTT partners. CRCL also works on countering domestic violent extremism through community engagement initiatives and training for SLTT partners. The office acts as the DHS-designated single point of contact for human rights treaties and complaints. CRCL also facilitates U.S. Government-wide communication to community leaders after a security or other incident, through its Incident Community Coordination Teams. CRCL provides information to the public on the responsibilities and functions of, and how to contact, the Officer for Civil Rights and

Civil Liberties, including how to file civil rights and civil liberties complaints. It conducts administrative adjudication of disability discrimination claims under Section 504 of the Rehabilitation Act of 1973. CRCL leads the Department's Equal Employment Opportunity (EEO) and diversity programs and is responsible for DHS-wide policies, training, and complaint adjudication processes to promote EEO and diversity for all employees and applicants

- Increase of 1 position, 0.5 FTE, and \$111 thousand for Restoration of Prior Year Reductions

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Public Affairs (OPA) is responsible for oversight and management of all external and internal communications. On a daily basis, OPA responds to national media inquiries, maintains and updates the Department's website, writes speeches for principals and reviews and coordinates speaking events for Department officials. OPA fosters strategic communication throughout DHS and with external stakeholders. For the "If You See Something, Say Something™" campaign, OPA works with a variety of cities, states, and private sector partners, including universities, major sports leagues and entertainment venues to raise public awareness on indicators of terrorism and terrorism-related crimes, and to emphasize the importance of reporting suspicious activity to the proper state and local law enforcement authorities. OPA manages the DHS Organizational Identity Program, which provides guidelines for the proper use of the DHS seal and related identities. OPA oversees DHS employee communication activities, which include Connect and town hall meetings between management and employees. The Incident Communications Team coordinates incident communications with the White House, Federal departments, and agencies, and state, local, and international partners to ensure

accurate and timely information is provided to the public during an incident. Homeland Security Presidential Directive-5-Management of Domestic Incidents (HSPD-5) ensures that potentially life-saving information is provided to the public in a timely manner and mandates communicating emergency information to the public.

Program Changes include:

- Increase of 5 positions, 2.5 FTE, and \$1 million for Employment-based Case Inquires

CURRENT SERVICES PROGRAM DESCRIPTION:

The statutory mission of CISOMB is to assist individuals and employers in resolving problems with U.S. Citizenship and Immigration Services (USCIS) and to propose changes in USCIS's administrative practices. CISOMB accomplishes this mission through individual case assistance in the employment-based, family, and humanitarian areas; and by proposing impartial, operationally sound recommendations to USCIS. CISOMB engages in outreach to national and community-based organizations, trade and industry associations, faith-based communities, and immigration professionals. CISOMB also meets regularly with USCIS officials across the country, as well as with other Federal and State Government partners. CISOMB hosts an Annual Conference, and, by statute, provides Congress with a comprehensive Annual Report analyzing pervasive and serious problems affecting the delivery of immigration services.

Total Change 2014 to 2015	7	7	1,970

OSEM requests 180 positions, 180 FTE, and \$38.470 million in FY 2015 for the Office of Policy. Base adjustments include:

- Increase of \$62 thousand for annualization of FY 2014 Pay Raise
- Increase of \$196 thousand for FY 2015 Pay Raise
- Increase of \$6 thousand for Working Capital Fund
- Increase of \$276 thousand for increased Retirement Contribution
- Increase of 7 positions, 7 FTE, and \$1.430 million for Restoration of Prior Year Reductions
 - The proposed increase will restore positions that are responsible for preparing strategic inputs for the capabilities and requirements process and ensuring that strategic guidance is properly reflected in the various DHS decision processes across the broader acquisition life cycle. Specifically, these positions will enable the Office of Policy to serve as Executive Secretary for the new Department Strategy Council (DSC), prepare prioritized strategic input into the capabilities and requirements process, support Capability Based Assessments as part of the requirements process, prepare the Department's annual Integrated Planning Guidance in support of the resource allocation process, support Analyses of Alternatives, ensure strategy direction is appropriately reflected in the acquisition oversight process, and to serve on the executive steering committee and various working groups that oversee DHS decision processes.

CURRENT SERVICES PROGRAM DESCRIPTION:

PLCY serves as the Department's principal source of thought leadership, policy development, and decision analysis for DHS senior leadership, Secretarial initiatives, and for other critical matters that

may arise in a dynamic threat environment. This office leads the coordination, integration, and development of DHS-wide policies, programs, strategies, and plans across the Department's mission portfolios. Further, the office facilitates decision-making by providing timely advice and analysis to the Secretary and other Departmental leaders.

PLCY also represents the Department at White House interagency policy committee meetings on the areas in the mission portfolios and also represents DHS on strategic planning efforts and major interagency strategy reviews. The office develops long-term strategic priorities to increase operational effectiveness and mission execution. Furthermore, PLCY is charged with and provides the Department with an integrated and DHS-wide capability for strategy development, strategic planning, long-term assessment, and decision analysis, including statistical and economic analysis and risk assessment and modeling.

The office also leads the charge on several Congressionally mandated and authorized programs and responsibilities to include: the development and execution of the Quadrennial Homeland Security Review (QHSR); work with states to move forward on the security standards of the REAL ID Act; work on interagency reviews concerning cases brought before the Committee on Foreign Investments in the United States; and the delivery of several reporting requirements on immigration and certain border security statistics.

PLCY Integration and Implementation (PII) provides policy development and analysis across the Department's mission portfolios, including: counterterrorism; chemical, biological, radiological, and nuclear (CBRN); transborder security; immigration; resilience; and screening. The Assistant Secretary for PII serves as the Department's primary representative to the National Security Council (NSC) Counterterrorism, Transborder Security, Maritime, Resilience, and Weapons of Mass Destruction IPCs; the Assistant Secretary is also a key leadership official for interactions with Congress on these issues.

Private Sector Office (PSO) fosters strategic communications with leaders of businesses, trade associations, and other non-governmental organizations to create stronger relationships with DHS. PSO is the lead office and point of contact for advising the Secretary, Deputy Secretary, and Component heads on prospective programs, initiatives, and regulations, which relate to the private sector. PSO informs senior DHS leadership on the economic impact to the private sector from DHS activities across all five QHSR mission areas. In addition, PSO leads DHS in the promotion of public-private partnerships and best practices to improve the Nation's homeland security and aid in both economic and national security.

Office for State and Local Law Enforcement (OSLLE) serves as the Department's principal liaison to the non-Federal law enforcement community. As such, OSLLE is responsible for coordinating national-level policies related to non-Federal law enforcement's role in preventing, preparing for, protecting against, and responding to natural disasters, acts of terrorism, and other hazards within the United States.

The Office of Strategy, Planning, Analysis, and Risk (SPAR) provides the Department with an integrated and DHS-wide capability for strategy development, strategic planning, long-term assessment, and decision analysis, including statistical and economic analysis and risk assessment and

modeling. The Assistant Secretary for SPAR serves as the Department's primary point of contact for strategy and policy planning offices in DHS Components, other federal departments and agencies, and the White House. SPAR also represents DHS on NSC's Strategic Planning IPC and major interagency strategy reviews. SPAR is taking a leading role in developing a process for the Department to link strategy and policy with capabilities and requirements analysis, programming and budgeting, and major investment oversight. PLCY will direct the restored 7 positions, 7 FTE and \$1.430 million in FY 2015 funding to SPAR in support of this initiative, to include oversight of the Strategy Development phase, ensuring appropriate inputs are ready for the subsequent capabilities, and requirements analysis.

The Homeland Security Advisory Council is composed of external senior leaders who provide advice and recommendations to the Secretary on matters related to homeland security. The council's subcommittees address several key homeland security issues including: enhancing DHS's cybersecurity workforce; enhancing border-crossing infrastructure on our borders by establishing mechanisms for public/private partnerships; and improving information sharing with faith-based communities.

Office of International Affairs (OIA) plays a critical role in developing and achieving integrated foreign engagement driven by the Secretary's priorities. OIA administers the DHS Attaché program and coordinates the placement of component personnel abroad. It monitors and reviews the negotiation of all international agreements and arrangements and leads crosscutting negotiations on behalf of the Secretary, the Deputy Secretary, and the DHS Components. In coordination with other DHS components, OIA serves as the principal point of liaison with the Department of State and the diplomatic community. OIA develops, coordinates, and drives departmental strategies, plans, and activities for DHS to develop foreign partner security capabilities and international cooperative programs that align with the overarching DHS strategy.

OIA has four DHS HQ Attachés located in Brussels, Belgium; London, England; Mexico City, Mexico; and Ottawa, Canada who are fully funded within the Office of Policy's direct appropriated funding. DHS also has an HQ Attaché in Kabul, Afghanistan, who is fully funded through an interagency agreement with the Department of State. Provided in Appendix I is a detailed breakout of funding and funding sources associated with all DHS attaché positions and secondment positions across the Department.

- Increase of \$141 thousand for Restoration of Prior Year Reductions

CURRENT SERVICES PROGRAM DESCRIPTION:

IGA serves as the voice and advocate for the State, local, tribal, and territorial (SLTT) elected and appointed officials within the Department as well as the primary liaison between those officials and DHS leadership and senior officials. IGA's stakeholder community consists of the Nation's more than 500,000 elected and appointed officials.

These officials include governors, state homeland security advisors (HSAs), mayors, county executives, city and county appointed officials, leadership of the 566 federally recognized Native American and Native Alaskan tribes, emergency managers, and the various national associations that represent these officials. On a daily basis, IGA coordinates and consults with the Department's stakeholders in the homeland security enterprise as they develop and implement policy and budget decisions that impact SLTT homeland security efforts as well as the Department and our operations.

IGA manages communications with SLTT officials and coordinates outreach activities across the spectrum of Departmental issues, initiatives, and programs confronting all agencies and Components

of the Department. IGA also coordinates with counterpart Intergovernmental Affairs Offices within other Executive Branch agencies and the White House. IGA strives to ensure that elected and appointed government officials across the nation at the state, local, tribal and territorial levels are informed of DHS policies programs, and priorities. IGA coordinates messaging and activities with the other DHS stakeholder offices—including Private Sector Office, State and Local Law Enforcement, Public Affairs, and Legislative Affairs—to ensure that the full spectrum of our partners are engaged in the homeland security process.

Program Increase	0	0	0	0	0	0	5	3	1,000
Total Request	11	3	549	11	3	577	7	4	1,116

Description of Item

The Office of the Citizenship and Immigration Services (CISOMB) assists individuals and employers in resolving problems with U.S. Citizenship and Immigration Services (USCIS). USCIS issues immigration benefits, and serves employers primarily through its service center operations.

Employment-based immigration inquiries comprise approximately one third of CISOMB's caseload. CISOMB is on pace to receive approximately 6,000 inquiries during the 2014 Reporting Period (April 1, 2013 to March 30, 2014), which is 33% more than in the previous reporting year. CISOMB received approximately 4,500 inquiries in each of the previous two reporting periods. As of February 1, 2014, ten months into the 2014 reporting year, CISOMB received 5,035 inquiries, approximately 500 inquiries per month.

Justification

CISOMB requires that individuals and employers seeking assistance wait 60 days past USCIS processing times, so they can avail themselves of the USCIS customer service avenues. In many cases, applicants and petitioners already have waited months, if not years, to resolve their issues. In addition, CISOMB requires that, where possible, individuals and employers show evidence that they have sought to resolve their case by first contacting USCIS. Previously, CISOMB encouraged, but did not require, individuals and employers to take such steps.

With an increased caseload, it has become a challenge for CISOMB to meet its case processing performance goals. These goals are to review all incoming requests for case assistance within 30 days to provide expedited processing, where appropriate, and to take action to resolve 90% of case inquiries

¹ Currently, there are two teams that process requests for assistance, which are broken down into four main categories – employment, family, humanitarian, and general. In FY13, employment-based requests made up approximately 30% of all requests, and accordingly, staff spent approximately a third of their time on employment-based requests. At this time, there is not a team solely dedicated to assisting with employment-based requests.

within 90 days. The additional resources provided in this program increase will enable CISOMB to meet and exceed these performance goals, assuming case inquiries continue at expected levels.

Staffing

With the program increase, CISOMB will be able to hire five additional positions at an approximate cost of \$521,000² whose efforts will be devoted to employment-based analysis and casework. CISOMB will hire three Immigration Law Analysts, an Assistant Chief to lead a team specializing in employment-based issues, and one Management Program Analyst to develop reports to more effectively identify systemic trends including employment-based immigration issues. Specific positions and grade levels are as follows:

One GS-14, Assistant Chief of Employment (Lead Immigration Law Analyst)
One GS-13, Management Program Analyst
Two GS-13, Immigration Law Analysts
One GS-12, Immigration Law Analyst

With an increase in positions, CISOMB will be able to process inquiries more efficiently by specializing staff in specific areas of immigration, including employment-based matters. The faster CISOMB processes its inquiries, the more timely it can identify and address emerging trends.

Due to the savings from hiring the employees mid-year, CISOMB will use a portion of the funds from the program increase to continue development of the office's online case intake tool and case management system. In FY 2016 and beyond, funds not spent on Personnel Compensation & Benefits and WCF will be put towards technology development, as well as operations and maintenance; outreach; and training.

Technology

CISOMB will allocate approximately \$423,500 to enhance its online and case management systems, including a new online tool to capture systemic trends in employment and other immigration benefits areas. Stakeholders would be able to report trends through this mechanism, and the CISOMB would be able to run reports on various systemic issues to determine their prevalence and whether they are specific to certain regions of the country. CISOMB would also expand its casework analytics and reporting capabilities and implement an electronic customer satisfaction survey to measure the individual and employer experience in seeking assistance from the CISOMB's Office.

CISOMB currently spends between \$250k and \$300k on operations and maintenance for the existing online intake tool and case management system, and expects that there will be a minimal increase for these system enhancements.

Outreach/Travel

CISOMB will allocate approximately \$20,000 to make USCIS site visits and meet with employment-based stakeholders across the country. CISOMB will host roundtables in major metropolitan areas and meet with employers in various industries including academia, agriculture, construction, financial services, healthcare, hospitality, and information technology. The CISOMB and senior staff will travel

² The total cost of the five additional positions includes Working Capital Fund (WCF) costs. Ombudsman anticipates an upward adjustment in WCF costs in the mid-year review due to onboarding five additional employees in the April/May time period.

to the USCIS service centers in California, Nebraska, Texas, and Vermont that receive and adjudicate most employment-based immigration benefits.

With additional outreach to the employment-based immigration community, CISOMB will ensure that these stakeholders are aware of the CISOMB's case assistance services. Outreach to employment-based stakeholders is efficient as employers are often repeat users that file multiple inquiries with USCIS and the CISOMB's Office. This differs from outreach geared toward individuals and families who often file one-off or a small number of immigration benefits application/petitions.

Training

Approximately \$35,000 would be set aside to provide training to each new staff member. The Assistant Chief of Employment and Immigration Law Analysts will provide training for professional development and to enhance their employment-based immigration law knowledge. In the past, CISOMB has found that conferences sponsored by immigration business associations, trade organizations and bar associations provide staff not only with advanced immigration law training, but also with the opportunity to network and share information about the office. The management program analyst will provide training related to data mining, performance metrics, and technology (the CISOMB case management system is based on Microsoft's CRM/SharePoint applications, so this individual will need to be an expert in navigating these programs).

Impacts on Performance

With the program increase, CISOMB will be able to effectively manage its growing caseload, processing an additional 150 to 210 inquiries per month. These additional resources will ensure CISOMB meets its performance goals of reviewing each inquiry within 30 days and taking action to resolve 90% of the inquiries within 90 days.

These funds also will enable CISOMB to specialize its teams to achieve casework efficiencies. Analysts with in-depth knowledge of employment-based issues will be able to resolve inquiries more expeditiously, as well as identify systemic issues. The analysts dedicated to resolving employment-based inquiries will build relationships with USCIS Service Centers, which handle the processing of the majority of employment-based immigration benefits.

Enhancements to the online case tool will provide customers a simple way to report trends. The hiring of a management program analyst will provide CISOMB with more effective reporting. These additions will improve the way CISOMB identifies, tracks, and reports systemic issues, enabling CISOMB to make timely recommendations to USCIS that are then reported to Congress.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Office of the Secretary of Homeland Security, as authorized by section 102 of the Homeland Security Act of 2002 (6 U.S.C. 112), and executive management of the Department of Homeland Security, as authorized by law, \$[122,350,000]*128,769,000: Provided, That* not to exceed \$45,000 shall be for official reception and representation expenses: *Provided further, That* all official costs associated with the use of government aircraft by Department of Homeland Security personnel to support official travel of the Secretary and the Deputy Secretary shall be paid from amounts made available for the Immediate Office of the Secretary and the Immediate Office of the Deputy Secretary: [*Provided further, That* the Secretary shall submit to the Committees on Appropriations of the Senate and the House of Representatives, not later than 90 days after the date of enactment of this Act, expenditure plans for the Office of Policy, the Office of Intergovernmental Affairs, the Office for Civil Rights and Civil Liberties, the Citizenship and Immigration Services Ombudsman, and the Privacy Officer:] *Provided further, That* expenditure plans for [the offices in the previous provision] *the Office of Policy, the Office of Intergovernmental Affairs, the Office for Civil Rights and Civil Liberties, the Citizenship and Immigration Services Ombudsman, and the Privacy Officer* shall [also] be submitted at the time the President's budget proposal for fiscal year 2016 is submitted pursuant to section 1105(a) of title 31, United States Code.

Language Provision	Explanation
¹ ...[\$122,350,000] <u>\$128,769,000</u> ...	Dollar change only. No substantial change proposed.
[<i>Provided further, That</i> the Secretary shall submit to the Committees on Appropriations of the Senate and the House of Representatives, not later than 90 days after the date of enactment of this Act, expenditure plans for the Office of Policy, the Office of Intergovernmental Affairs, the Office for Civil Rights and Civil Liberties, the Citizenship and Immigration Services Ombudsman, and the Privacy Officer:]	Removed due to redundancy.

Immediate Office of the Secretary Mission Statement

The Office of the Secretary provides central leadership, management, and direction for the entire Department of Homeland Security. This office provides oversight for all offices within the Departmental Operations function as well as all other entities of the Department. It is the Secretary's role to serve as the top representative of Homeland Security to the President, Congress and the general public.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	552	514	661	147
11.3 Other than Full-Time Permanent	342	342	346	4
11.5 Other Personnel Compensation	4	4	4	-
11.8 Special Personal Services Payments	330	380	384	4
12.1 Civilian Personnel Benefits	186	170	244	74
Total, Salaries & Benefits	1,414	1,410	1,639	229

Salaries and Benefits fund compensation directly related to duties performed by Federal civilian employees. The FY 2015 request reflects an increase of \$229,000, which consists of \$11,000 for 1% pay inflation, \$3,000 for annualization of 2014 pay raise, \$12,000 for increased pension contributions, and a \$203,000 realignment of funds within the office to account for a new Secretary onboarding for a full year.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$1,485	\$1,485	\$1,359	(\$126)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2015 request reflects a savings of \$126,000 achieved by utilizing lower cost methods of transportation.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$325	\$371	\$305	(\$66)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2015 request reflects a decrease of \$66,000 due to a reduction in rent costs funded through the Working Capital Fund.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$572	\$688	\$551	(\$137)

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from DHS WCF and other government agencies including interagency service requirements. The FY 2015 request reflects a decrease of \$137,000 for a decrease to the Working Capital Fund charges.

Immediate Office of the Deputy Secretary Mission Statement

The Office of the Deputy Secretary directly supports the Office of the Secretary by providing leadership to the Department. This office focuses on internal management and direction, which ensures that the Department will continue to operate efficiently and effectively in carrying out its mission. It is the Deputy Secretary's role to provide internal oversight to all Departmental Operations, which allows the Secretary to focus more on external matters concerning DHS.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	425	355	350	(5)
11.3 Other than Full-Time Permanent	443	443	447	4
11.5 Other Personnel Compensation	44	44	44	-
12.1 Civilian Personnel Benefits	240	207	218	11
Total, Salaries & Benefits	1,152	1,049	1,059	10

Salaries and Benefits fund compensation directly related to duties performed by Federal civilian employees. The FY 2015 request reflects a net increase of \$10,000, which consists of \$11,000 for 1% pay inflation, \$3,000 for annualization of 2014 pay

raise, an increase of \$8,000 for increased pension contributions, and a decrease of \$12,000 due to a realignment of funds within the office for increased Working Capital Fund costs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$371	\$322	\$301	(\$21)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2015 request reflects a savings of \$21,000 achieved by utilizing lower cost methods of transportation.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$128	\$127	\$102	(\$25)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2015 request reflects a decrease of \$25,000 due to a decrease in GSA rent costs funded through the Working Capital Fund.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$31	\$17	\$0	(\$17)

Other services include contractual services with non- Federal sources that are not otherwise classified under Object Class 25. The FY 2015 request reflects a decrease of \$17,000 due to a realignment of funds within the office for increased non-rent Working Capital Fund costs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$177	\$217	\$271	\$54

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from DHS WCF and other government agencies including interagency service requirements. The FY 2015 request reflects an increase of \$54,000 for increased Working Capital Fund charges.

Chief of Staff Mission Statement

The Office of the Chief of Staff promotes the coordination of the agencies and directorates that have been consolidated into the Department of Homeland Security. The Office of the Chief of Staff is responsible for all operational functions that relate to the Immediate Office of the Secretary (budget, information technology, and personnel), and coordinates activities with the Department Headquarters continuity of operations. With the inherent challenges of a concurrent creation of a new department, reorganization, consolidation, and several new offices, the Office of the Chief of Staff seeks to streamline, coordinate, and deliver highly effective initiatives and policies that will ensure our safety, response capacity, and our freedoms.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	456	472	477	5
11.3 Other than Full-Time Permanent	687	667	674	7

Office for Civil Rights and Civil Liberties Mission Statement

The mission of the Office for Civil Rights and Civil Liberties (CRCL) is to protect civil rights and civil liberties, to support DHS by providing policy advice on the full range of civil rights and civil liberties issues, and to serve as an information and communication channel with the public regarding all aspects of these issues. Section 705 of the Homeland Security Act provides that the Officer for Civil Rights and Civil Liberties shall: Review and assess information alleging abuses of civil rights, civil liberties, and racial and ethnic profiling by employees and officials of the Department; and make public through the internet, radio, television, or newspaper advertisements information on the responsibility and function of, and how to contact, the Officer. Submit to the President of the Senate, the Speaker of the House of Representatives, and the appropriate committees and subcommittees of Congress through the Secretary on an annual basis a report on the implementation of this section, including the use of funds appropriated to carry out this section, and allegations of abuses described under subsection (a)(1) and any actions taken by the Department in response to such allegations.

Office of Public Affairs Mission Statement

The Assistant Secretary for Public Affairs oversees all external and internal communications for Homeland Security. On a daily basis, the Office of Public Affairs (OPA) responds to national media inquiries, maintains and updates the Department's web site, and coordinates speaking events for Department officials across the country. OPA also develops and manages various public education programs. The Office of Public Liaison, within OPA, fosters strategic communication with the Department's external stakeholders. The Department's organizational identity, including the Homeland Security seal and word mark, was designed and implemented by the Office of Public Affairs. OPA directs the Department's Incident Communications program that guides overall Federal incident communication activity and coordinates with State, local, and international partners to ensure accuracy and timely information to the public during a crisis.

Summary Justification and Explanation of Changes

The FY 2015 request reflects an increase of \$538,000, which consists of \$9,000 for the annualization of FY14 pay raise, \$39,000 for 1% pay inflation, \$31,000 for increased retirement contribution, \$111,000 and .5 FTE for a restoration of prior year reduction, and \$348,000 realignment within the office from rent and non-rent Working Capital Fund to account for the annualization of onboarding employees, promotions, and within-grade-increases.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$597	\$830	\$556	(\$274)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2015 request reflects a decrease of \$274,000 due to a reduction in GSA rent costs funded through the Working Capital Fund.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$359	\$359	\$311	(\$48)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2015 request reflects a decrease of \$48,000 attained through a reduction in scope for Bulletin News contract.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$708	\$824	\$799	(\$25)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from DHS WCF and other government agencies including interagency service requirements. The FY 2015 request reflects a decrease of \$25,000 for non-rent Working Capital Fund charges.

Privacy Officer Mission Statement

The Department of Homeland Security's Privacy Office protects the collection, use, and disclosure of personal and Departmental information. The Privacy Office ensures that appropriate access to information is consistent with the vision, mission, and core values of DHS, and implements the policies of the Department to defend and to protect the individual rights, liberties, and information interests of our citizens. Through internal education outreach and the establishment of internal clearance procedures and milestones for program development, the Privacy Office is helping DHS components to consider privacy whenever developing new programs or revising existing ones. The Privacy Office evaluates the use of new technologies to ensure that privacy protections are given primary consideration in the development and implementation of these new systems. In this process, DHS professionals have become educated about the need to consider and the framework for considering the privacy impact of their technology decisions. The Chief Privacy Officer and the staff review Privacy Act system notices before they are sent forward and ensure that they collect only those records that are necessary to support the DHS mission. The Privacy Office also guides DHS agencies in developing appropriate privacy policies for their programs and serves as a resource for any questions that may arise concerning privacy, information collection, or disclosure.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change

Citizenship and Immigration Services Ombudsman Mission Statement

The mission of the Citizenship and Immigration Service Ombudsman (CISOMB) is to assist individuals and employers in resolving problems with the United States Citizenship and Immigration Service (USCIS). Section 452 of the Homeland Security Act of 2002 requires that CISOMB assist individuals and employers in resolving problems with the Bureau of Citizenship and Immigrations Service, identify areas in which individuals and employers have problems in dealing with USCIS, and to the extent possible, propose changes in the administrative practices of the USCIS to mitigate problems.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	3,108	2,573	2,928	355
11.3 Other than Full-Time Permanent	27	28	28	-
11.5 Other Personnel Compensation	30	35	35	-
12.1 Civilian Personnel Benefits	950	917	1,085	168
Total, Salaries & Benefits	4,115	3,553	4,076	523

Salaries and Benefits funds compensation directly related to duties performed for the Office of Citizenship & Immigration Ombudsman by Federal civilian employees. The FY 2015 request reflects an increase of \$523,000, which consists of an increase of \$9,000 for the annualization of FY14 pay raise, \$30,000 for 1% pay inflation, increased retirement contribution of \$43,000, a restoration of prior year reduction of \$94,000 for 1 position, .5 FTE, program change of \$289,000 for 5 positions, 2.5 FTE, and \$58,000 realignment from Working Capital Fund and Other Goods and Services to account for within-grade-increases.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$66	\$66	\$86	\$20

Travel includes all costs for transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. FY15 request reflects an increase of \$20,000 for additional outreach to the employment-based immigration community; CISOMB will ensure that these stakeholders are aware of the Ombudsman's Office and the case assistance services it provides. Outreach to employment-based stakeholders must be efficient as employers are often repeat users that file multiple inquiries with USCIS and the Ombudsman's Office.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$453	\$450	\$465	\$15

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2015 request reflects an increase of \$15,000 due to an increase in GSA rent costs funded through the Working Capital Fund.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$53	\$76	\$101	\$25

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2015 request reflects a net increase of \$25,000, which consists of a \$10,000 realignment to personnel costs, and an increase of \$35,000 to provide professional development training to new personnel, enhancing their employment-based immigration law knowledge.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$576	\$731	\$1,360	\$629

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from DHS WCF and other government agencies including interagency service requirements. The FY 2015 request reflects a net increase of \$629,000, which consists of a non-rent Working Capital Fund decrease of \$27,000, and an increase of \$656,000 for enhancements to the online case management system and the estimated increased Working Capital Fund cost for new personnel.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$197	\$284	\$250	(\$34)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF. The FY 2015 request reflects a decrease of \$34,000 due to a realignment within the office to support increased Working Capital Fund costs.

Office of Policy Mission Statement

The Office of Policy is the primary coordinator of Department-wide policies, programs, and planning to ensure consistency and integration of missions throughout the entire Department. It provides the Department with a central office to develop and communicate policies across multiple components of the homeland security network and strengthens the Department's ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities. A central DHS policy office that bridges Headquarters, Components, and operating agencies improves communication among DHS entities, eliminates duplication of effort, and translates policies into timely action. The Office of Policy also serves as a single point of contact for internal and external stakeholders that will allow for streamlined policy management across the Department.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	18,095	17,242	18,427	1,185

Office of Intergovernmental Affairs Mission Statement

The mission of the office of Intergovernmental Affairs (IGA) is to act as an advocate for the State, local, tribal, and territorial officials within DHS and to operate as the primary liaison between those officials and the secretary and senior DHS leadership. IGA facilitates an integrated national approach to homeland security across a broad spectrum of issues confronting DHS by ensuring, coordinating, and advancing Federal interaction with State, local, tribal, and territorial governments.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	1,056	1,062	1,143	81
11.3 Other than Full-Time Permanent	132	139	140	1

23.1 Rental Payments to GSA	\$157	\$182	\$146	(\$36)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2015 request reflects a decrease of \$36,000 due to a reduction in GSA rent costs funded through the Working Capital Fund.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$478	\$429	\$501	\$72

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from DHS WCF and other government agencies including interagency service requirements. The FY 2015 request reflects a net increase of \$72,000, which consists of a \$58,000 decrease for non-rent Working Capital Fund charges and an increase of \$130,000 for interagency agreement costs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$36	\$25	\$36	\$11

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2015 request reflects an increase of \$11,000 for a realignment of funds within the office from non-rent Working Capital Fund.

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Under Secretary for Management

I. Appropriation Overview

A. Mission Statement for Under Secretary for Management:

The Department of Homeland Security (DHS) Management Directorate ensures delivery of effective and efficient business and management services throughout the Department, to enable the Department to achieve its mission to lead the unified national effort to secure America. It does so by providing policy, guidance, operational oversight and support, and innovative solutions for the management needs of the entire Department.

B. Budget Activities:

USM is an appropriation within Departmental Management and Operations (DMO) that provides resources for seven separate Programs, Projects, and Activities (PPAs) including: Immediate Office of the Under Secretary for Management, Office of the Chief Readiness Support Officer, the DHS Nebraska Avenue Complex Project, Office of the Chief Human Capital Officer, Human Resources Information Technology, Office of the Chief Procurement Officer, and Office of the Chief Security Officer. Below are brief descriptive summaries of each PPA:

Immediate Office of the Under Secretary for Management

The Immediate Office of the Under Secretary for Management's (OUSM) primary mission is to provide leadership and oversight for all Departmental management lines of business, including information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services.

Office of the Chief Readiness Support Officer

The Office of the Chief Readiness Support Officer (OCSRO) is responsible for the overall leadership, internal controls and oversight of Department-wide logistics; asset life-cycle management, including aircraft, motor vehicles, ships, boats and sensitive assets; real property; personal property; environmental management; historic preservation; energy; DHS Headquarters consolidation; reduction of the DHS facilities footprint Nationwide; and support of DHS Headquarters operations. The OCSRO focus is to deliver affordable readiness, which entails providing affordable support products and services needed to enable people across DHS to perform their missions effectively. The OCSRO team accomplishes this through building partnerships and collaboration, leveraging best practices, and fostering innovation.

DHS Nebraska Avenue Complex Consolidation Project

The Nebraska Avenue Complex (NAC) currently serves as the headquarters facility for DHS, as well as the location for many mission support functions. DHS continues to invest in this property to sustain our overall operational capabilities. The NAC investments will be leveraged as the

Department realigns the overall real estate portfolio to support the integration of DHS operations in the National Capital Region.

Office of the Chief Human Capital Officer

The Office of the Chief Human Capital Officer (OCHCO) provides overall management and administration for the Department's human capital policies, programs, and practices for attracting, retaining, and developing the skilled workforce needed to protect and secure our Nation. The work of the OCHCO is critical to supporting and enabling the Secretary's workforce strategy, which centers around four key goals: building an effective, mission-focused, diverse, and inspiring cadre of leaders; recruiting a highly qualified and diverse workforce; retaining an engaged workforce; and solidifying a unified DHS culture of mission performance, adaptability, accountability, and results.

Human Resources Information Technology

The Human Resources Information Technology (HRIT) program provides leadership and enterprise IT solutions to enable core HR functionality and data access efficiency. The program manages, in partnership with the Operational Components and the Office of the Chief Information Officer, the Department's HRIT portfolio and consolidates, integrates, and modernizes core HR systems by planning, acquiring, configuring, implementing, and supporting the ongoing operation of enterprise HRIT systems and services.

Office of the Chief Procurement Officer

The Office of the Chief Procurement Officer (OCPO) is responsible for the overall management, administration, and oversight of Department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. OCPO activities include oversight and strategic support; policy and acquisition workforce issues; procurement ombudsman and industry liaison; and, small and disadvantaged business utilization. The DHS procurement mission is to effectively deliver mission capability through the contracting of critical supplies and services.

Office of the Chief Security Officer

The Office of the Chief Security Officer (OCSO) leads the collaborative security program to safeguard DHS people, information, and property. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and, provides security support to DHS Components. The office manages operational security systems and Homeland Security Presidential Directive-12 card issuance for the Department. Additionally, the OCSO provides liaison support to the intelligence community on security matters affecting DHS.

C. Budget Request Summary:

The Under Secretary for Management (USM) requests 854 FTP, 854 FTE and \$195.286 million for FY 2015. This is a net decrease of 18 FTP/FTE and \$729 thousand from the FY 2014 Enacted Budget.

The USM Adjustments-to-Base include:

- An increase of \$0.731 million for the 2015 pay increase.
- An increase of \$0.279 million for the annualization of the 2014 pay raise.
- An increase of \$0.038 million for Working Capital Fund.
- An increase of \$1.057 million for increased retirement contributions.
- A decrease of \$0.522 million for efficiencies.
- A decrease of \$0.948 million for the non-recur of one-time costs associated with personnel security file scanning, cost increases for SSBI's, secure video teleconference, and physical security equipment and parts for the NAC.

Program Changes include:

- An increase of \$1.143 million in HRIT for Enterprise-wide Talent Management System.
- An increase of \$0.879 million in HRIT for Portfolio Management.
- A decrease of \$0.825 million in OCRSO Contractor Support.
- A decrease of \$0.007 million in NAC Contract Support.
- A decrease of \$0.784 million in OCHCO Contractor Support and Non-pay expenses.
- A decrease of 18 FTP/FTE and \$1.770 million in OCPO APCP.

III. Current Services Program Description by PPA

**Department of Homeland Security
Departmental Management and Operations
Office of the Under Secretary for Management (USM):
Immediate Office of the Under Secretary for Management
Program Performance Justification
(Dollars in Thousands)**

PPA: Immediate Office of the Under Secretary for Management

	Perm. Pos	FTE	Amount
2013 Revised Enacted	17	17	3,113
2014 Enacted	17	17	2,700
2015 Adjustments-to-Base	-	-	57
2015 Current Services	17	17	2,757
2015 Total Request	17	17	2,757
Total Change 2014 to 2015	-	-	57

The Immediate Office of the Under Secretary for Management (OUSM) requests 17 FTP, 17 FTE, and \$2.757 million for FY 2015. This is a net increase of \$57 thousand from the FY 2014 Enacted Budget.

OUSM Adjustments-to-Base include:

- Increase of \$17 thousand for the 2015 pay increase.
- Increase of \$5 thousand for the annualization of the 2014 pay raise.
- Increase of \$38 thousand for Working Capital Fund contributions.
- Increase of \$17 thousand for increased retirement contributions.
- Decrease of \$20 thousand in efficiencies gained through reductions in overall square footage and rent costs.

CURRENT SERVICES PROGRAM DESCRIPTION:

OUSM ensures the offices within the Management Directorate function effectively and efficiently in support of the Department. The requested funding will allow the OUSM to continue to: oversee the functions of the Management Directorate offices; further DHS efforts to enhance functional integration; respond quickly to queries from within and outside the Department; and, identify and track performance related to the responsibilities of the Department. The USM continues using an integrated approach to the management of strategic investments and resource allocation decisions to build a strong and accountable management foundation, remaining committed to demonstrating measurable, sustained progress over the coming years in all management functions.

2015 Program Change	-	-	(825)
2015 Total Request	110	110	29,272
Total Change 2014 to 2015	-	-	(728)

The Office of the Chief Readiness Support Officer (OCRSO) requests 110 FTP, 110 FTE, and \$29.272 million for FY 2015. This is a net decrease of \$728 thousand from the FY 2014 Enacted Budget.

OCRSO Adjustments-to-Base include:

- Increase of \$86 thousand for the 2015 pay raise
- Increase of \$43 thousand for annualization of the 2014 pay raise.
- Increase of \$120 thousand for increased retirement contributions.
- Decrease of \$152 thousand in efficiencies gained through reductions in overall square footage and rent costs.

Program Changes include:

- Decrease of \$825 thousand for contractor support and expenses.

CURRENT SERVICES PROGRAM DESCRIPTION:

OCRSO is responsible for the overall leadership, internal controls and oversight of Department-wide logistics; asset life-cycle management, including aircraft, motor vehicles, ships, boats and sensitive assets; real property; personal property; environmental management; historic preservation; energy; DHS Headquarters Consolidation; reduction of the DHS facilities footprint nationwide; and, support of DHS Headquarters operations.

OCRSO mission is achieved through the following programs:

Asset Management Program: The Asset Management Program provides policy and internal controls DHS-wide to support life-cycle management of all DHS assets and environmental sustainment programs. The organization is comprised of four major areas and focuses: sustainability & environmental programs, real property, personal property and mobile assets, and capital planning.

Operations Support: Operations Support provides effective delivery of Department administrative support services. The Office of Support Services integrates and centrally manages Corporate or shared services to allow common work practices, standardization, control and monitoring to ensure the corporate services comply with the laws and DHS policies, and provide economic benefit due to consolidating like functions and economies of scale. Office of Support Services provides the day-to-day services that support mail screening and delivery operations, the transit subsidy benefits program, employee parking, executive sedan, employee shuttle, executive dining facility, Federal Occupational Health clinics, occupational health and safety, and facilities management support. The approach of OCRSO is to strengthen these support services through an integrated portfolio approach and by building stronger relationships with other DHS support organizations while aggressively driving down costs without sacrificing readiness. The functional areas include facilities management, support services and HQ consolidation.

Affordable Readiness and Integration: Affordable Readiness and Integration serves as the focal point to collaborate on the efficiency of mission support activities across the Department. The primary functions of this organization include logistics integration, regional support coordination, and Departmental collaboration. This is achieved through identifying opportunities for shared mission support services across the Components, developing and implementing common business practices, achieving total asset visibility across all DHS asset categories and making data-driven decisions. The mission support activities impacted by this program include real estate, fuel, vehicles, aviation, and other mission support-related activities. The goal in each of these areas is to identify opportunities for greater efficiency (e.g., shared facilities, greater standardization of assets) and then to guide (and sometimes lead) the development and implementation of a plan to realize that efficiency. The efficiencies are focused on achieving affordable readiness – meeting mission needs at the lowest cost.

**Department of Homeland Security
Departmental Management and Operations
Office of the Under Secretary for Management (USM):
DHS HQ NAC Project
Program Performance Justification
(Dollars in Thousands)**

PPA: DHS HQ NAC Project

	Perm. Pos	FTE	Amount
2013 Revised Enacted	-	-	5,441
2014 Enacted	-	-	4,500
2015 Current Services	-	-	4,500
2015 Program Change	-	-	(7)
2015 Total Request	-	-	4,493
Total Change 2014 to 2015	-	-	(7)

The DHS Headquarters Project at the Nebraska Avenue Complex (NAC) requests \$4.493 million for FY 2015. This is a net decrease of \$7 thousand from the FY 2014 Enacted Budget.

Program Changes include:

- Decrease of \$7 thousand for contractor support and expenses.

CURRENT SERVICES PROGRAM DESCRIPTION:

The NAC currently serves as the headquarters facility for DHS. The NAC and other current locations continue to operate at nearly full capacity in order to meet the Department's current space demands. DHS's long-range headquarters consolidation plans include the retention of the NAC as a key location for Departmental programs. The NAC investments will be leveraged as the overall real estate portfolio is realigned to support DHS operations and integration in the NCR. Accordingly DHS will need to continue to invest in this property in order to sustain operational capabilities and use it as one of the sites for DHS Components within the National Capital Region (NCR).

2015 Total Request	114	114	21,253
Total Change 2014 to 2015	-	-	(747)

The Office of the Chief Human Capital Officer (OCHCO) requests 114 FTP, 114 FTE, and \$21.253 million for FY 2015. This is a net decrease of \$747 thousand from the FY 2014 Enacted Budget.

OCHCO Adjustments-to-Base include:

- Increase of \$97 thousand for the 2015 pay increase.
- Increase of \$41 thousand for annualization of the 2014 pay raise.
- Increase of \$149 thousand for increased retirement contributions.
- Decrease of \$250 thousand in efficiencies gained through the use of Blanket Purchase Agreements for purchases from Government accounts.

Program Changes include:

- Decrease of \$784 thousand for the reduction of contractor support and non-pay expenses.

CURRENT SERVICES PROGRAM DESCRIPTION:

OCHCO provides overall management and administration of the Department's human capital policies, programs, and practices for attracting, retaining and developing the skilled workforce needed to protect and secure our Nation. DHS must build a strategic workforce planning capability to serve as the foundation for a balanced workforce and build a pipeline of talent to ensure the continued development, recognition, and advancement of our current workforce. OCHCO is committed to implementing the DHS Workforce Strategy. This strategy outlines the human capital goals of the Department and the development and implementation of plans to address the inherent complexities and significant challenges the Department continues to face as it matures.

OCHCO's key programs are:

Human Capital Policy and Programs: Human Capital Policy and Programs develops and implements Department-wide policy, programs, and strategic human capital guidance. The program ensures policies reinforce the highest standards of commitment, performance excellence, integrity and accountability in terms of alignment with mission priorities and compliance with laws and regulations. Human Capital Policy and Programs represent the Department to external stakeholders, participates in government-wide working groups and task forces, and serves as the liaison to Office of Personnel Management on human capital initiatives.

Balanced Workforce: The Balanced Workforce Program Management Office is responsible for strategic planning for the DHS workforce. This includes ensuring the proper mix of federal and contract employees, determining the number of workers and specific competencies and skills needed to reduce the Department's mission risk, providing human capital data management and analysis to ensure appropriate data oversight, and driving workforce planning decisions.

Leader Development: OCHCO coordinates Department-wide training and development strategies, policy and programs to cultivate a capable workforce with the critical knowledge, skills, and abilities to lead DHS in mission accomplishment. The DHS Leader Development Program (LDP) provides an integrated framework that enables both Department-wide consistency and mission-related Component flexibility in fostering a DHS culture of leadership effectiveness. The purpose of the LDP is to create and sustain a high-performing, diverse, engaged, and inspiring cadre of effective leaders now and into the future. Other key learning and leader developmental activities include the Secretary's Honors Program, the Pathways Program, the Presidential Management Fellows Program, and the Rotations and Mentoring Programs. Learning and Leader Development, on behalf of OCHCO, also has oversight for the DHS Headquarters Training Center which centralizes three DHS HQ training operations in one location; including OCHCO's Learning and Development Institute. The Institute provides training, conference, and meeting space for all DHS Components and other Federal departments and agencies to optimize an environment that increases learning effectiveness.

Diversity and Inclusion: Diversity and Inclusion (D&I) partners with the Office for Civil Rights and Civil Liberties to provide Department-wide leadership and guidance on diversity and inclusion management, including: recruitment and outreach, career development and workplace inclusion, leadership commitment, and management accountability. D&I manages the Department's efforts regarding veteran's employment as required by Executive Order 13583. The DHS Veterans Employment Program Office develops and implements strategies to increase the number of veterans hired and employed by DHS. D&I also executes the DHS HQ Harassment Prevention Program, which includes a process independent of the HQ EEO complaint process to promptly investigate allegations of workplace harassment and provide prompt resolution and appropriate corrective action, when appropriate and necessary.

HRIT
Program Performance Justification
(Dollars in Thousands)**

PPA: HRIT

	Perm. Pos	FTE	Amount
2013 Revised Enacted	27	27	9,667
2014 Enacted	24	24	7,815
2015 Adjustments-to-Base	-	-	41
2015 Current Services	24	24	7,856
2015 Program Change	-	-	2,022
2015 Total Request	24	24	9,878
Total Change 2014 to 2015	-	-	2,063

The Human Resources Information Technology (HRIT) requests 24 FTP, 24 FTE, and \$9.878 million for FY 2015. This is a net increase of \$2.063 million from the FY 2014 Enacted Budget.

HRIT Adjustments-to-Base include:

- Increase of \$15 thousand for the 2015 pay increase.
- Increase of \$4 thousand for annualization of the 2014 pay raise.
- Increase of \$22 thousand for increased retirement contribution.

Program Changes include:

- Increase of \$1.143 million for the Enterprise-wide Talent Management System.
- Increase of \$879 thousand for HRIT Portfolio Management.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HRIT program, managed by Human Capital Business Systems (HCBS), was established to support the mission of consolidating, integrating, and modernizing the Department's HRIT infrastructure. HRIT provides the flexibility and management information that will allow the Department to evolve in response to changing business, legislative, and economic drivers.

The HRIT program drives efficiencies and reforms across the Department to achieve four strategic goals aimed at consolidating and strengthening decision support information across the Department:

- Optimize HRIT capabilities to support efficient Human Resources (HR) processes across DHS.

- Improve transparency, accountability, and efficiency of HRIT services to support the advancement of DHS Enterprise HR services.
- Strengthen and unify the Department's ability to collect and share actionable enterprise HR information in support of the DHS mission.
- Enhance operations support and service delivery for enterprise HR systems and services across the Department.

Benefits of this investment include portfolio management in terms of transparency into HRIT spend data, which will allow for the reduction of data calls and leverages the existing DHS reporting processes. This will reduce duplicative investments, identify potential opportunities for the reuse of HRIT assets and will help establish priorities for future investments. It will also provide analysis on Component investment into HR systems which is a core necessity for effective HRIT business case analysis, as well as a key driver for investment and consolidation decisions. In addition it will allow for optimized strategic to leverage purchasing power and eliminate the burden of managing duplicate contracts.

The development and implementation of consistent and consolidated HRIT systems across DHS is critical to achieving management integration. The HRIT program plans for, acquires and implements systems and services by leveraging existing enterprise solutions. This effort reduces redundancies and increases the functionality of HR systems across the enterprise. The program is governed by the HRIT Executive Steering Committee (ESC) established by the Deputy Secretary in January 2010.

Key Strategies and Action Plans:

The HRIT Strategic Plan FY 2012-16 established the direction and approach for achieving a prescribed shift toward Departmental/Federal HRIT systems and services. In FY 2015, HRIT will continue to move forward with projects identified in the FY13/14 Annual Operations plan such as Enterprise Talent Management System and the Balanced Workforce Assessment Tool. The FY13/14 Annual Operations Plan initiated projects based on the priorities established by the ESC and the funding available while aligning with the following key principles of HRIT Portfolio Management:

- **Enterprise Services:** Maintain the commitment demonstrated by executive stakeholders to achieve a major transformation for HRIT from a Component and system-centric model toward an enterprise services model where department and government-wide services are selected that meet the majority of the HR business needs across DHS. This shift will reduce HRIT redundancies and promote economies of scale to enhance the quality and consistency of every aspect of HRIT, promote seamless processing, and drive cost efficiencies.
- **Strategic Sourcing:** Enhance the use of strategic sourcing to leverage purchasing power and eliminate the burden of managing duplicate contracts. Continued access to a comprehensive DHS systems inventory and HRIT contract information is paramount to this effort. Identify and leverage solutions that currently exist within the Department, where possible, to reduce the cost and time to deliver enterprise services.
- **Governance:** Continue to engage and develop partnerships among HR, Training and IT leadership through the HRIT ESC, working groups (e.g. the HRIT Advisory Team) and management councils (e.g. the Human Capital Leadership Council and Training Leaders Council). The ESC will foster communication and collaboration among Components on the

planning and budgeting of the HRIT portfolio and investments; resulting in enterprise services that address Departmental needs efficiently and effectively.

- Investment Planning: Place a greater emphasis on developing investment strategies to drive cost reductions and improve budget alignment across the Department. Added levels of rigor in the planning process will help ensure Components better understand and prepare for the cost implications associated with the transition to enterprise services that benefit the entire Department.
- Project Execution: Actively involve stakeholders in the identification of core needs and drive toward common business processes and requirements that can be delivered using modular development to shorten the time to implement enterprise services. Adhere to the direction set forth in the DHS IT Strategic Plan, where appropriate, to align with key initiatives, such as the shift toward cloud computing in alignment with the Federal CIO's 25 point implementation plan. Institutionalize change management practices to increase success of enterprise systems and services implemented.

MAJOR ACQUISITIONS

DHS Human Resources Information Technology (HRIT):

The HRIT Investment mission, as outlined in the *Future Year Homeland Security Plan (FYHSP)* is to implement and manage a consolidated suite of modernized HRIT business solutions, reducing redundancies and increasing the functionality of HR systems across the Enterprise. HRIT funds are used to plan for, acquire, configure, and implement Commercial Off the Shelf (COTS)/ Government Off the Shelf (GOTS) packages and eGov/ Human Resources Line of Business (HRLoB) shared services to consolidate, modernize, and/or replace HRIT systems at the Enterprise-level. The program is governed by the HRIT Executive Steering Committee (ESC), supported by the Deputy Secretary within a January 15, 2010 memorandum. Upon successful acquisition and deployment to DHS components, the Operations and Maintenance (O&M) resource requirement are funded by Working Capital Fund (WCF) component contributions. The DHS Chief Human Capital Officer (CHCO) and Component Human Capital (HC) Executives, in partnership with the Chief Information Officer (CIO), have redefined a long-term strategic plan for HRIT through a Human Capital Segment Architecture (HCSA) study. The goal of HRIT is to execute the blue print as identified in the HCSA study and seek solutions that will reduce redundancy and save money for the Department. The program's objective is to make available contract vehicles by which HR offices can obtain needed services and systems; deploy existing systems; support systems through vendor management and in-house support. There remains a critical need for enterprise solutions in areas such as staffing, learning management, performance management and personnel accountability for continued operation, in the event of a declared emergency.

The HRIT program, which is funded through WCF in addition to funding HRIT investments, provides mission critical HR services in support of essential HR functions including providing support for payroll, time and attendance, training and other necessary HR functions.

HRIT program supports key enterprise projects including Data Management and Reporting, critical enhancements to the Balance Workforce Assessment Tool following 24 months of initial operation. These projects have reached significant milestones and accomplishments and provide DHS cost savings.

HRIT is currently in the early phase of Enterprise Talent Management System (ETMS) implementation. ETMS, a critical enterprise capability, is an integrated, enterprise capability for the automated administration of learning programs, training content and reporting of learning events. ETMS increases the ability for employees to locate and enroll in training courses and developmental opportunities across the Department. Maintaining funding for the Enterprise Talent Management System remains the priority that will require delaying current project timelines and deferring new and existing project initiatives that focus on enterprise contract consolidations with estimated cost savings.

This project is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- HRIT Appropriated \$9.878 million
- HRIT WCF Fee For Service \$55.946 million.

HRIT Appropriated:

FY 2013 PPA Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
\$9,667	\$7,815	\$9,878

FY 2015 HRIT Appropriated Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
FTEs (\$4,773)	Salaries and Expenses	This funding covers the government salaries, benefits, awards, travel, training and Working Capital Fund charges for the employees funded within this PPA. The 24 FTEs requested provide management and support for the consolidation, integration and modernization of the Department's HRIT infrastructure managed within this office and program management oversight and support for critical and mandatory HR IT Departmental activities (including time and attendance, payroll, personnel actions, and training).
Enterprise Talent Management System* (\$3,092)	Deployment, Implementation and Program Support	Consolidates nine Component-based Learning Management Systems (LMS) and automates Employee Performance Management (EPM) processes into a single Department-wide integrated LMS/EPM solution. ETMS also receives funding from the e-Training Working Capital Fund (WCF). The following reflects current projected available funding. ETMS is funded out of the e-Training WCF and the HRIT PPA for FY 2015: <div style="display: flex; justify-content: flex-end;"> <div style="text-align: right;"> HRIT Appropriated \$3.0 million E-Training WCF \$1.8million </div> </div>

		*ETMS is in the early stages of development and initial testing. As the project matures, resources, requirements and schedule implementation timelines are continually re-evaluated and reassessed to ensure the solution is effective for the entire enterprise.
Contractor, Integration Support and IT services (\$2,013)	Support for Key Enterprise Projects, Program and Project Support	Support for ongoing enterprise projects to include ETMS and Human Capital (HC) data management and reporting; HRIT Portfolio Management; new HRIT ESC approved projects as defined by the outcome of the HCSA. Obtaining DHS CIO services for Cloud Hosting and service related support for the Human Capital Data Warehouse.

**Department of Homeland Security

PPA: Office of the Chief Procurement Officer

	Perm. Pos	FTE	Amount
2013 Revised Enacted	359	359	70,105
2014 Enacted	353	353	65,000
2015 Adjustments-to-Base	-	-	806
2015 Current Services	353	353	65,806
2015 Program Change	(18)	(18)	(1,770)
2015 Total Request	335	335	64,036
Total Change 2014 to 2015	(18)	(18)	(964)

The Office of the Chief Procurement Officer (OCPO) requests 335 FTP, 335 FTE, and \$64.036 million for FY 2015. This is a net decrease of 18 FTP/FTE and \$964 thousand from the FY 2014 Enacted Budget.

OCPO Adjustments-to-Base include:

- Increase of \$310 thousand for the 2015 pay increase.
- Increase of \$105 thousand for annualization of the 2014 pay raise.
- Increase of \$391 thousand for increased retirement contributions.

Program Changes include:

- Decrease of 18 FTE and \$1.770 million for the Acquisition Professional Career Program (APCP).

CURRENT SERVICES PROGRAM DESCRIPTION:

The DHS Procurement mission is to effectively deliver mission capability through the contracting of critical supplies and services. OCPO is responsible for the overall management, administration, and oversight of Department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs; including direct management and oversight of the Office of Procurement Operations. OCPO activities include oversight and strategic support, policy and acquisition workforce, Procurement Ombudsman and Industry Liaison, and small and disadvantaged business utilization.

OCPO key programs are:

Acquisition Support and Oversight: OCPO is responsible for facilitating centralized hiring of the acquisition workforce; including the Acquisition Professional Career Program (APCP) for initial entry into select acquisition career fields, and strategic acquisition workforce planning to ensure succession, development, and retention of a professional workforce. They serve as the principle liaison for the acquisition community. They are responsible for developing and implementing a DHS acquisition oversight strategy in accordance with Management Directive (MD) 0784 and implementing internal controls for DHS's acquisition function in accordance with OMB Circular A-123. Finally, OCPO provides support to program managers Department-wide and assist in the development of a DHS-wide acquisition management system.

Strategic Initiatives: OCPO is responsible for developing DHS acquisition regulations and policies, developing proposed acquisition legislation, and responding to proposed acquisition legislation. They are responsible for the Department's implementation of the Federal Activities Inventory Reform (FAIR) Act of 1998, the Revised OMB Circular A-76 and the President's Management Agenda (PMA) Competitive Sourcing Initiative. Lastly, OCPO is responsible for managing the DHS strategic sourcing program and developing corporate strategies for the acquisition of shared commodities to achieve efficiencies and economies of scale.

Office of Small and Disadvantaged Business Utilization (OSDBU): In support of the Small Business Act to maximize small business procurement opportunities, the OSDBU assists, counsels, and advises small businesses of all types on procedures for contracting with the DHS. Additionally, the OSDBU works closely with each Departmental organizational element to implement the Department's small business procurement assistance program.

The Under Secretary for Management is continuing to lead an effort to improve the overall acquisition process, namely strengthening the early requirements development process and enhancing OCPO's ability to manage the implementation and execution of acquisition programs. The establishment and institutionalization of MD-102 and the Management Directorates Office of Program Accountability and Risk Management (PARM) have been instrumental in helping the Department establish a foundation of acquisition practices to govern how to manage DHS acquisition investments.

**Department of Homeland Security
Departmental Management and Operations
Office of the Under Secretary for Management (USM):
Office of the Chief Security Officer
Program Performance Justification
(Dollars in Thousands)**

PPA: Office of the Chief Security Officer

	Perm. Pos	FTE	Amount
2013 Revised Enacted	253	253	67,097
2014 Enacted	254	254	64,000
2015 Adjustments-to-Base	-	-	(403)
2015 Current Services	254	254	63,597
2015 Total Request	254	254	63,597
Total Change 2014 to 2015	-	-	(403)

The Office of the Chief Security Officer (OCSO) requests 254 FTP, 254 FTE, and \$63.597 million for FY 2015. This is a net decrease of \$403 thousand from the FY 2014 Enacted Budget.

OCSO Adjustments-to-Base include:

- Increase of \$206 thousand for the 2015 pay increase.
- Increase of \$81 thousand for annualization of the 2014 pay raise.
- Increase of \$358 thousand for increased retirement contributions.
- Decrease of \$100 thousand in efficiencies gained through the reduction of supplies and materials purchases.
- A non-recur of \$948 thousand in one time contract costs providing various security operational support and services.

CURRENT SERVICES PROGRAM DESCRIPTION:

OCSO provides security personnel trained to lead, govern, integrate, and manage the security functions of the Department. The Chief Security Officer serves as the chair of the DHS CSO Council, in consultation with the head security officials for each Component. OCSO provides security solutions in support of DHS missions and objectives, and implements Department-wide security programs, policies, and standards to effectively and efficiently safeguard DHS personnel, property, facilities, and information.

OCSO directly provides security services to the Components and offices within the DHS HQ organization, as well as delivers effective business security support services to each Component of the DHS HQ organization through the integration of the following security disciplines:

Administrative Security: OCSO implements and oversees policies, programs, and standards necessary to ensure the protection of collateral classified and sensitive but unclassified information; creates self-inspection programs that ensure classified and sensitive information is protected; and safeguards information for DHS, State and local fusion centers, major metropolitan police departments, and State emergency operations centers.

Internal Security and Investigations: OCSO administers security audits, inspections, and investigations involving alleged crimes against DHS or its employees, and allegations of illegal activities by DHS personnel; provides investigative and liaison support to the intelligence community on security matters affecting DHS.

Special Security Programs: OCSO provides security policy oversight, management, and guidance for the protection of Sensitive Compartmented Information (SCI) and information received from the intelligence community; provides administrative, industrial, and operational security programs for the handling and protection of SCI; and delivers security education and training.

Physical Security: OCSO manages and implements physical security policies, programs, and standards for DHS facilities; provides access control, physical barriers, surveillance equipment, and technical services.

Personnel Security: OCSO provides personnel security and suitability policies, programs, and standards, including procedures for granting, denying, and revoking access to classified information; initiates and adjudicates personnel security and suitability background investigations and periodic reinvestigations of applicants and appointees.

Systems Security: OCSO manages, supports, and coordinates the OCSO systems and related processes, and collaborates with the OCIO to secure the OCSO proprietary operational systems.

Identity Management: OCSO implements the Homeland Security Presidential Directive 12 (HSPD-12) requirement for a common identification standard for federal employees and contractors through the Working Capital Fund.

IV. Program Justification Changes

**Department of Homeland Security
Departmental Management and Operations
Office of the Under Secretary for Management (USM):
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: HRIT - Enterprise-wide Talent Management System
PPA: HRIT
Program Increase: Positions 0, FTE 0, Dollars \$1,143

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	1,143
Total Request	-	-	1,837	-	-	2,987	-	-	1,143

Description of Item

The Enterprise-Wide Talent Management System (ETMS) provides a technical solution for sharing information and offering courses across components to all DHS personnel. ETMS will consolidate nine separately Component-funded Learning Management Systems (LMS). HRIT has funded the migration of the DHS Components to the new ETMS solution starting in FY 2013.

Justification

In direct support of the Secretary's Efficiency Review to instill fiscal discipline, cut costs, and streamline human resources and information technology operations, the DHS Chief Human Capital Officer called for a review of the Department's LMS. The Homeland Security Studies and Analysis Institute was tasked to examine Department-wide LMS use and to consider alternate deployment strategies for a more cost-effective solution. During the same time period, the DHS Human Resources Information Technology (HRIT) Executive Steering Committee (ESC) commissioned the Human Capital Segment Architecture Project, which identified and prioritized 15 Strategic Improvement Initiatives for enterprise HRIT. The \$1.143 million will provide Components access to functionality to automate a largely manual process for Employee Performance Management (EPM).

Funding ETMS will allow visibility of cross-component training opportunities for employees directly supporting the DHS Workforce Strategy Goal #3 to retain an engaged workforce. ETMS enables the building of an effective, mission focused leadership cadre which directly supporting the DHS Workforce Strategy Goal #1. The Department can ensure that all employees are on valid performance plans that are appropriately aligned to the Department's strategic goals with the objective of improving

overall mission performance. Components will achieve an incremental increase on average of 5-15 percent per year above current baseline for the period FY 2014-FY 2018.

Addressing EPM was identified as one of the top priorities. In January 2012, the HRIT ESC directed the merge of LMS with EPM as a Department-wide contract vehicle for the acquisition of a comprehensive ETMS. The ETMS integrates two of the Department's most highly utilized and disparate systems into a single integrated solution for approximately 240,000 federal employees (LMS and EPM) and 158,000 contractors, as well as authorized state and local users (for LMS only). A formal business case analysis was completed in cooperation with the OCPO Strategic Sourcing Program Office, which analyzed the business rationale, benefits, and cost differential between maintaining the status quo and consolidating LMS and performance management capabilities into an enterprise-wide DHS Talent Management System. Under the status quo architecture, the Department spent in FY 2013 approximately \$15 million on learning management systems, performance management systems, and associated program support planned for within the scope of the ETMS Project. This amount includes expenditures for licensing fees, software maintenance, and operations and maintenance. Costs are accrued using multiple contracts across DHS that support enterprise LMS and performance management capability. If the Department were to consolidate into a single DHS enterprise system the resultant savings is conservatively estimated at \$0.5 million annually, with a total savings of \$2 million. This is based on historical discounts typically received by the Department for similar services and commodities of approximately 15-percent or more.

In addition, significant cost avoidance in supervisory man-hours for EPM of approximately \$8.1 million annually across DHS will result due to improved efficiency in employee work plan and appraisal preparation. Non-monetary benefits are important considerations in the business case analysis. For example, employee engagement is the extent to which employee commitment, both emotional and intellectual, exists relative to accomplishing the work, mission, and vision of the organization. This remains an area for improvement based on data collected in annual Federal Employee Viewpoint Surveys. In their analysis of the aforementioned 2011 survey, *The Partnership for Public Service* determined six of the top 10 agencies use a Talent Management System to support their learning development and employee performance management.

In summary, ETMS provides a more efficient LMS/EPM capability at a lower cost than is currently spent for a disjointed partial solution. The enterprise approach not only lowers operating costs, but also maximizes non-monetary benefits. DHS expects to achieve additional cost reductions by leveraging its volume purchasing, requesting discounts below the General Service Agreement Information Technology Schedule 70, and driving a number of process efficiencies to further reducing the cost of LMS/EPM systems and services across the Department, including:

- Dramatically improving the efficiency and reliability of both the employee performance management and learning management processes by providing a unified data structure that permits decision makers to easily create and view reports reflecting a holistic human capital management perspective;
- Improving the responsiveness and cost-effectiveness of the learning management process and enhance the effectiveness and efficiency of training design, delivery and administration; and
- Enhancing DHS and Component visibility; and, improving DHS and Component ability to respond quickly to changing conditions and information requests from oversight organizations.

Impact on Performance (Relationship of Increase to Strategic Goals)

ETMS will allow increased efficiency in delivering online training and professional development courses across the Department. DHS will have the ability to “push” training to its operational Components in order to comply with laws, titles, presidential directives, etc. ETMS will enable the managers, supervisors, and leaders to measure and report on learning and performance outcomes in a cost-effective manner.

Department of Homeland Security
Departmental Management and Operations
Office of the Under Secretary for Management (USM):
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: HRIT - Portfolio Management - HRIT
PPA: HRIT
Program Increase: Positions 0, FTE 0, Dollars \$879

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	4,636
Program Increase							-	-	879
Total Request	-	-	4,545	-	-	4,636	-	-	5,515

Description of Item:

The Human Resources Information Technology (HRIT) program remains steadfast in its mission to consolidate, integrate, and modernize the Department's HRIT infrastructure to provide the flexibilities and management information that will allow the Department to evolve in response to changing business, legislative, and economic drivers. To date, the HRIT program has focused on defining, acquiring and implementing enterprise-level services such as NFC's Payroll Processing, EmpowHR personnel action processing and Time and Attendance systems. In August 2011, the program completed a Human Capital Segment Architecture study (HCSA) to create a shared vision across the HR and IT communities, resulting in an HRIT "Blueprint" action plan and a five-year HRIT Strategic Plan (November 2011). The Strategic Plan prioritized the Department's needs and revised the way in which the program acquires and pays for HRIT enterprise services to advance the mission.

Justification:

DHS is requesting \$879 thousand in funding in support of HRIT Portfolio Management. The HCSA study resulted in the identification of 15 Strategic Improvement Opportunities of which there were 50 recommendations and 80 projects for potential HRIT initiatives. This funding will allow HRIT to continue identifying and moving forward with solutions to address the 80 projects identified by the HCSA.

**Department of Homeland Security
Departmental Management and Operations
Office of the Under Secretary for Management (USM):
Justification of Program Changes
(Dollars in Thousands)**

Program Decrease 1: Office of Chief Readiness Support Officer - Contractor Support - OCRSO
PPA: Office of the Chief Readiness Support Officer
Program Decrease: Positions 0, FTE 0, Dollars \$(833)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	3,430
Program Decrease							-	-	(833)
Total Request	-	-	3,275	-	-	3,430	-	-	2,597

Description of Item:

The Chief Readiness Support Officer (OCRSO) will reduce funding for contract support. This support is used to help identify areas in which DHS could reduce costs thus finding potential efficiencies and savings. OCRSO will also reduce funding in support of their systems capabilities for the OCRSO Data Warehouse.

Justification:

OCRSO will reduce contract support for OCRSO led programs which work to decrease costs and improve efficiencies across the DHS Components. Some examples of previous areas identified for review are: fuel integration, mail delivery alternatives, establishment of the HQ Support Services Center, Warehouse Integration and WCF business analysis.

OCRSO will further reduce system capabilities of the OCRSO Data Warehouse in order support critical DHS priorities. The contract support and Data Warehouse work will not be completely stopped but will be reduced in scope which will extend the timeline for these projects. Funding and support, both Federal and contractor, will be realigned as needed to support the OCRSO mission.

Impact on Performance (Relationship of Increase to Strategic Goals):

There will be minimal impact on OCRSO's performance.

**Department of Homeland Security
Departmental Management and Operations
Office of the Under Secretary for Management (USM):
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 2: DHS HQ NAC Project - Contractor Support - NAC
PPA: DHS HQ NAC Project
Program Decrease: Positions 0, FTE 0, Dollars \$(7)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	4,500
Program Decrease							-	-	(7)
Total Request	-	-	5,441	-	-	4,500	-	-	4,493

Description of Item:

The Office of the Chief Readiness Support Officer (OCRSO) is reducing funding for contractor support for the real property program at the Nebraska Avenue Complex (NAC).

Justification:

OCRSO is responsible for real property including DHS Headquarters operations to include: design, construction, furniture and move management, as well as other services. In order to support DHS's critical mission requirements OCRSO is reducing contractor support at the NAC. By reducing contractor support this will reduce the speed and efficiency that OCRSO currently delivers these services to operational stakeholders. OCRSO will continue to prioritize services as needed to ensure the continued support and safety of the NAC and the occupants.

Impact on Performance (Relationship of Increase to Strategic Goals):

OCRSO will still provide services to the NAC occupants; however, the funding reduction will cause a slight delay in schedule and responsiveness to execute office and furniture moves and scheduled upgrades to the facilities on the complex.

**Department of Homeland Security
Departmental Management and Operations
Office of the Under Secretary for Management (USM):
Justification of Program Changes
(Dollars in Thousands)**

Program Decrease 3: Office of Chief Human Capital - Contractor Support and Non-pay Expenses - OCHCO
PPA: Office of the Chief Human Capital Officer
Program Decrease: Positions 0, FTE 0, Dollars \$(784)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	8,373
Program Decrease							-	-	(784)
Total Request	-	-	9,244	-	-	8,373	-	-	7,589

Description of Item:

In order to support DHS mission critical priorities, OCHCO proposes to reduce contractor support and non-pay expenses (travel, training, and supplies).

Justification:

Currently 92-percent of the OCHCO Salaries and Expense budget supports the salaries and benefits of the workforce and the remaining eight-percent is used for expenses to maintain the office, including service contracts. OCHCO is proposing to reduce contractor support and non-pay expenses (travel, training and supplies) in order to support DHS's critical mission needs. OCHCO is planning to re-compete the requirement associated with the Federal Employee View Point Survey. Currently, this requirement is procured via an Inter-Agency Agreement (IAA) with OPM. Additionally, OCHCO recently awarded an HR Services Blanket Purchase Agreement that will allow OCHCO to procure services, with competitive pricing, to support a cross section of HR functional areas in lieu of OCHCO awarding IAAs to other agencies and incurring increasingly costly fees to provide the same service. Reductions will also be made to non-pay expenses such as travel, training, and supplies. OCHCO will continue to monitor travel and training using multiple stops for a trip and in-house or local training whenever possible.

OCHCO will continue to evaluate the organization to ensure we have the appropriate resources to support the Department's human capital priorities. Accordingly, the CHCO has been conducting strategic meetings with OCHCO and Departmental HR leadership teams to address priorities and ensure they are appropriately resourced.

Impact on Performance (Relationship of Increase to Strategic Goals):

The reduction to contractor support and non-pay expenses will not greatly impact on OCHCO's strategic goals. OCHCO will be able to absorb some of the contractor duties with their federal employees and will also realign resources to meet mission critical items.

Department of Homeland Security
Departmental Management and Operations
Office of the Under Secretary for Management (USM):
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 4: Office of Chief Procurement - APCP - OCPO
PPA: Office of the Chief Procurement Officer
Program Decrease: Positions (18), FTE (18), Dollars \$(1,770)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							150	150	23,899
Program Decrease							(18)	(18)	(1,770)
Total Request	150	150	28,265	150	150	23,899	132	132	22,129

Description of Item:

The President's March 4, 2009 memorandum on Government Contracting required agencies to improve acquisition practices and performance by maximizing competition and value, minimizing risk, and reviewing the ability of the acquisition workforce to develop, manage, and oversee acquisitions appropriately. Subsequent guidance from the Office of Management and Budget, including memorandum M-09-25 Improving Government Acquisition issued July 29, 2009, and the Office of Federal Procurement Policy (OFPP) Memorandum of October 27, 2009 Acquisition Workforce Development Strategic Plan for Civilian Agencies- FY2010-2014, provided guidance to agencies to strengthen the acquisition workforce and increase the civilian agency workforce by five-percent to more effectively manage acquisition performance. In support of OMB's emphasis on strengthening the Federal acquisition workforce, The Office of the Chief Procurement Officer (OCPO) was authorized 200 Acquisition Professional Career Program (APCP) FTE in FY 2010 to increase the Department's acquisition workforce capacity and capabilities. The increase was designed to mitigate the risks associated with gaps in either capacity or capability of the acquisition workforce and improve the effectiveness of the workforce.

Justification:

The APCP has served as an invaluable, Department-wide program to hire and develop entry level contract specialists. Hiring, developing, and retaining a competent and capable acquisition workforce has been a priority to OCPO. In order to support critical DHS priorities, OCPO will reduce the number of future participants by 18 FTP/ FTE in the APCP Program. OCPO will also curtail the development of new course offerings available to the APCP Program.

Impact on Performance (Relationship of Increase to Strategic Goals):

Reduced funding will decrease the Department's ability to attract and hire qualified members of the acquisition workforce as defined by the OFPP Act. Currently 36-percent of the acquisition workforce is eligible for retirement in FY 2014.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Office of the Under Secretary for Management, as authorized by sections 701 through 705 of the Homeland Security Act of 2002 (6 U.S.C. 341 through 345), [\$196,015,000] **\$195,286,000**¹, of which not to exceed \$2,250 shall be for official reception and representation expenses: Provided, That of the total amount made available under this heading, [\$4,500,000] **\$4,493,000**² shall remain available until September 30, [2018] **2019**³, solely for the alteration and improvement of facilities, tenant improvements, and relocation costs to consolidate Department headquarters operations at the Nebraska Avenue Complex; and [\$7,815,000] **\$9,878,000**⁴ shall remain available until September 30, [2015] **2016**⁵, for the Human Resources Information Technology program: *Provided further*, That the Under Secretary for Management shall, pursuant to the requirements contained in House Report 112-331, submit to the Committees on Appropriations of the Senate and the House of Representatives at the time of the President's budget proposal for fiscal year [2015] **2016**⁶ is submitted pursuant to section 1105(a) of title 31, United States Code, a Comprehensive Acquisition Status Report, which shall include the information required under the heading "Office of the Under Secretary for Management" under title I of division D of the Consolidated Appropriations Act, 2012 (Public Law 112-74), and quarterly updates to such report not later than 45 days after the completion of each quarter.

Immediate Office of the Under Secretary for Management Mission Statement

The Immediate Office of the Under Secretary for Management's primary mission is to provide leadership and oversight for all departmental management functions which include information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	1,497	1,187	1,216	29
11.3 Other than Full-Time Permanent	110	111	112	1
11.5 Other Personnel Compensation	39	39	39	-
12.1 Civilian Personnel Benefits	534	539	561	22
Total, Salaries & Benefits	2,180	1,876	1,928	52

The Immediate Office of the USM requests \$1,928,000 to fund the salaries and benefit costs for 17 FTEs, providing departmental leadership, management and oversight in FY 2015. This is a net increase of \$52,000 due to the annualization of the 2014 pay increase, the 2015 pay increase, and the increased retirement contributions.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$353	\$376	\$329	(\$47)

GSA Rent includes all payments to the General Services Administration (GSA) for rented space and related services. The FY2015 budget request includes a decrease of \$47,000 due to a reduction of overall square footage.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$436	\$376	\$428	\$52

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY2015 request includes an increase of \$52,000 for additional services anticipated.

Office of the Chief Readiness Support Officer Mission Statement

The mission of the Office of the Chief Readiness Support Officer (OCRSO) ensures USM offices function effectively and efficiently in support of the Department as a whole and in direct support of other USM offices.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	12,826	8,503	8,832	329
11.3 Other than Full-Time Permanent	478	89	89	-
11.5 Other Personnel Compensation	207	232	-	(232)
12.1 Civilian Personnel Benefits	3,842	2,598	2,750	152
Total, Salaries & Benefits	17,353	11,422	11,671	249

Salaries and benefits include costs for 110 FTEs in FY 2015. This is a net increase of \$249,000 and includes the annualization of the 2014 pay increase, the 2015 pay increase, and the increased retirement contributions.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$1,302	\$1,419	\$1,267	(\$152)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. There is a decrease of \$152,000 projected in FY 2015 due to space reductions.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$5,835	\$7,363	\$6,528	(\$835)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The decrease of \$835,000 in this account is reflective of a reduction to contractor support.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$2,140	\$2,065	\$2,067	\$2

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. There is an increase of \$2,000 in FY 2015 due to inflation.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$4,540	\$5,149	\$5,157	\$8

Purchases from Government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. This account reflects a \$8,000 increase due to inflation.

Office of the Chief Human Capital Officer Mission Statement

The Office of the Chief Human Capital Officer (OCHCO) provides overall management and administration for the Department's human capital policies, programs and practices for attracting, retaining and developing the skilled workforce needed to protect and secure our Nation.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	11,727	10,555	10,660	105
11.3 Other than Full-Time Permanent	623	617	617	-
11.5 Other Personnel Compensation	182	205	-	(205)
11.8 Special Personal Services Payments	166	-	-	-
12.1 Civilian Personnel Benefits	3,597	2,526	2,708	182
Total, Salaries & Benefits	16,295	13,903	13,985	82

Salary and Benefit costs support 114 FTEs. This is a net increase of \$82,000 from due to the annualization of the 2014 pay increase, the 2015 pay increase, and the increased retirement contribution.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$2,283	\$2,411	\$2,444	\$33

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2014 request includes a net increase of \$33,000 due to inflation.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$273	\$275	\$277	\$2

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. There is an increase of \$2,000 for FY 2015 due to inflation.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$4,016	\$5,110	\$4,246	(\$864)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. These costs represent OCHCO's costs for WCF excluding rent. There is a decrease of \$864,000 due to a reduction in services required as well \$250,000 which is due to efficiencies found using Blanket Purchase Agreements.

HRIT Mission Statement

The HRIT Investment's mission is to implement and manage a consolidated suite of modernized HRIT business solutions, reducing redundancies and increasing the functionality of HR systems across the Enterprise. HRIT funds the planning, acquisition, configuration, and implementation of COTS/GOTS packages and eGov/HRLoB shared services to consolidate, modernize, and/or replace HRIT systems at the Enterprise-level. The program is governed by the HRIT Executive Steering Committee (ESC), established per Deputy Secretary guidance. Once IT solutions have been acquired and deployed to DHS components, their Operations and Maintenance (O&M) is funded via Component contributions to Working Capital Funds (WCF).

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	2,090	1,548	1,563	15
11.5 Other Personnel Compensation	18	11	11	-
12.1 Civilian Personnel Benefits	601	427	453	26
Total, Salaries & Benefits	2,709	1,986	2,027	41

Salaries and Benefits includes costs for 24 FTEs. The FY 2015 Request includes an increase of \$41,000 in personnel compensation to fund the annualization of the 2014 pay increase, the 2015 pay increase, and the increased retirement contributions.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$4,128	\$3,065	\$4,248	\$1,183

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. There is an increase of \$1,183,000 in FY 2015 due to a reprioritization of funding requirements for contracts.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$2,300	\$2,217	\$3,056	\$839

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The net \$839,000 increase is due to contract reprioritization and the request for \$1,143,000 for the Enterprise-Wide Talent Management System.

Office of the Chief Procurement Officer Mission Statement

The Office of the Chief Procurement Officer (OCPO) is responsible for the overall management, administration, and oversight of Department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. OCPO activities include oversight and strategic support, policy and acquisition workforce, Procurement Ombudsman and Industry Liaison, and small and disadvantaged business utilization. The DHS Procurement mission is to effectively deliver mission capability through the contracting of critical supplies and services

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	28,465	28,269	27,398	(871)
11.3 Other than Full-Time Permanent	590	590	590	-
11.5 Other Personnel Compensation	261	264	267	3
12.1 Civilian Personnel Benefits	8,575	8,430	8,565	135
Total, Salaries & Benefits	37,891	37,553	36,820	(733)

The OCPO requests \$36,820,000 to fully fund the salaries and benefit costs for 335 FTEs. The net decrease of \$733,000 reflects the annualization of the 2014 pay increase, the 2015 pay increase, the increased retirement contributions, and a reduction of 18 FTE.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$3,115	\$3,536	\$3,426	(\$110)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. There is a decrease of \$110,000 in FY2015 due to space consolidation.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$13,553	\$13,649	\$13,701	\$52

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. There is an increase of \$52,000 due to inflation and increased contract requirements.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$8,907	\$4,283	\$4,029	(\$254)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. There is a decrease of \$254,000 in FY 2015 due to various administrative reductions.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$4,821	\$4,898	\$4,976	\$78

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY2015 budget requests an increase of \$78,000 associated with increased contract costs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.4 Operation and Maintenance of Facilities	\$88	\$88	\$89	\$1

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. There is an increase of \$1,000 due to inflation.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$150	\$152	\$154	\$2

Operation and maintenance of equipment include all payments for the operation and maintenance of equipment when done by contract with the private sector or another Federal Government account. There is a projected increase of \$2,000 in FY 2015 due to inflation.

Office of the Chief Security Officer Mission Statement

The OCSO leads the collaborative security program to safeguard the Department's people, information, and property so that the Department can secure the homeland. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; conducts investigations of criminal activities within or directed against DHS; and provides security support to DHS Components and operational security services to DHS HQ. The OCSO also manages and governs the operational security systems and HSPD-12 card issuance on behalf of the Department through the WCF.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	23,747	25,452	25,718	266
11.3 Other than Full-Time Permanent	-	61	62	1
11.5 Other Personnel Compensation	702	1,146	866	(280)
12.1 Civilian Personnel Benefits	6,937	7,648	8,082	434
Total, Salaries & Benefits	31,386	34,307	34,728	421

The OCSO requests \$34,728,000 to fully fund the salaries and benefit costs of 254 FTEs. The net increase of \$421,000 includes an annualization of the 2014 pay increase, the 2015 pay increase, and the increase of retirement contributions.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$3,833	\$4,343	\$4,666	\$323

The OCSO requests \$4,666,000 for all payments to General Services Administration (GSA) for rental of space and rent related services. The increase of \$323,000 is due to inflationary factors.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$9,750	\$4,623	\$4,183	(\$440)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2015 request includes a net decrease of \$440,000 due to a reduction in Nebraska Avenue visitor center operations, background investigation task orders, and completion of document scanning contract.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$20,133	\$20,047	\$19,440	(\$607)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2015 request includes a net decrease of \$607,000 due in part to the reduction of the NAC guard force operations, nonrecurring contracts, background investigations, and the foreign visitor management program.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$294	\$284	\$184	(\$100)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2015 request includes a decrease of \$100,000 as a result of the DHS Federal Government Strategic Sourcing Initiative for micropurchases and internal efficiency measures.

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Office of the Chief Financial Officer

I. Appropriation Overview

A. Mission Statement:

The mission of the Office of the Chief Financial Officer (OCFO) is to ensure that the funds necessary to carry out the Department's mission are obtained, allocated, and spent in support of the Department's priorities and in accordance with law and policies.

The DHS OCFO goals are to:

- Provide timely, accurate, and actionable financial information to decision makers and stakeholders.
- Integrate performance and develop program plans and budgets that are well-justified and balanced to support DHS priorities.
- Provide assurance that internal controls are effective.
- Provide quality, cost-effective financial management services and operations.
- Develop and maintain financial and resource management skillsets to ensure sustained achievement of the DHS CFO mission.
- Strengthen financial assistance accountability.

Under OCFO, the following Divisions fulfill these functions:

Budget:

- Issue guidance to the Department's Components to ensure that all phases of budget formulation and execution are effectively and efficiently completed;
- Determine that sufficient resources are available to support activities of the appropriate fiscal year;
- Administer the Department's budget, appropriations, and expenditures of funds;
- Collaborate with Program Analysis & Evaluation (PA&E) and DHS Components to formulate annual budget submissions, ensure these properly reflect DHS requirements, and assist in the presentation and defense of submissions to the Office of Management and Budget (OMB) and Congress;
- Coordinate and review budget execution for each Component and appropriation, conduct spend plan and execution reviews, and act on requests for modifications;
- Conduct special studies and analyses of execution of financial plans and recommend reprogrammings as necessary for effective funds utilization;
- Prepare budgetary reports as necessary or as required by OMB and Congress;
- Prepare the Secretary to testify on the budget request and coordinate responses to Questions for the Record;

- Track, monitor status, and validate budgetary information of reports to Congress required by appropriations bills;
- Ensure technical accuracy and consistency of Component budget materials in accordance with OMB or Congressional guidance;
- Manage and coordinate Components' input into MAX, the on-line budget preparation data system;
- Analyze budgetary impact of pending legislation, testimony, and other documents; and,
- Coordinate and review apportionments, reappropriations, and allotments for all DHS appropriations.

Program Analysis and Evaluation (PA&E):

- Develop and perform analyses and evaluations of alternative plans, programs, personnel levels, and budget submissions for the Department in relation to homeland security objectives, projected threats, vulnerability assessments, estimated costs, resource constraints, and the most recent homeland security strategy;
- Provide guidance and oversee the development of the Future Years Homeland Security Program (FYHSP) of the Department;
- Lead the performance measurement and reporting for DHS mission-oriented programs, and oversee preparation of the DHS performance plan and other performance reporting;
- Integrate performance measurement into strategic planning, resource allocation, program evaluation, evaluation of management personnel, and the culture of DHS;
- Act as the Deputy Performance Improvement Officer (PIO) in order to supervise performance management activities, provide advice on program performance goals, convene responsible parties to assess and improve program performance, and guide the use of performance measures in personnel performance appraisals;
- Develop and promote improved analytical tools and methods for analyzing homeland security planning and resource allocation;
- Establish policies for and oversee the integration of the planning, programming, and budgeting system of the Department;
- Coordinate with and support the Office of Policy on DHS long-term strategic planning; and
- Improve strategic analysis and Department-wide acquisition decision-making through capabilities and requirements analysis.

Financial Management:

- Develop and oversee Departmental financial management policy;
- Provide guidance for and oversee Financial Systems Modernization (FSM) efforts in conjunction with the Resource Management Transformation (RMT) Division;
- Coordinate the Department's participation in government-wide financial management initiatives;
- Manage the DHS Treasury Information Executive Repository (TIER);

- Prepare the Department's consolidated financial statements and other required financial information, including the Annual Financial Report;
- Provide guidance and oversight to DHS Components on accounting and financial reporting requirements and coordinate the annual audit of the Department's financial statements included in the Annual Financial Report; and
- Administer the DHS Bankcard Program (purchase, travel, and fleet), develop and document bankcard policy, provide training and internal controls to provide reasonable assurance that the objectives of the Bankcard Program are met, and ensure that fraudulent or improper use and untimely payment are identified in a timely manner and appropriate corrective action is taken.

Risk Management and Assurance:

- Implement the *Federal Managers' Financial Integrity Act* and its guidelines, *OMB Circular A-123: Management's Responsibility for Internal Control*, the *Chief Financial Officers Act*; the *DHS Financial Accountability Act*, and the *Improper Payments Information Act*;
- Lead the Department's assessment of internal controls;
- Coordinate the development and implementation of Mission Action Plans to address material weaknesses and other significant conditions;
- Issue guidance on and coordinate preparation of the Secretary's year-end Internal Control Assurance Statements; and
- Conduct reviews of key financial processes to ensure internal controls are designed and operating effectively, with the goal of identifying weaknesses before they become problems.

Financial Assistance Policy and Oversight:

- Advise senior DHS leadership regarding the situation-specific application of government-wide statutes, regulations, OMB circulars, Executive Orders, and DHS Financial Assistance Policy as these relate to use of federal funds;
- Define the DHS Financial Assistance Line of Business, including streamlining and standardizing business models and business processes and developing supporting technology;
- Lead the development of a DHS-wide, end-to-end financial assistance (grants) management system to ensure a transaction audit trail and improve financial assistance award reporting;
- Develop and distribute DHS Financial Assistance Policy for use across DHS to communicate legal requirements, regulation, circulars, Executive Directives, Comptroller General Decisions, and other legal issuances related to the use of federal funds;
- Provide oversight to ensure DHS and recipient compliance with requirements regarding the use of federal funds;
- Assess OMB Circular A-133: Audits of States, Local Governments and Non-Profit Organizations high risk audit findings, resolve high risk findings backlog, and develop Cost Policy to assist recipients in avoiding repeat high risk findings;
- Oversee the reporting requirements of the Federal Financial Accountability and Transparency Act of 2006 for the Department;

- Increase the accuracy, timeliness, and reliability of all DHS financial assistance award data and ensure any end-to-end system has auto reporting capabilities; including file transfer to public venues and robust ad hoc query capability;
- Develop and maintain Grant Officer/Assistance Officer standards and qualifications; and
- Articulate the steady state for an adequate centralized DHS Financial Assistance Policy and Oversight function.

Financial Operations:

- Oversee budget formulation and execution for Departmental Management and Operations (DMO) offices, including the Offices of the Secretary and Executive Management (OSEM) and the Under Secretary for Management (USM);
- Provide budget execution, accounting, and financial management and reporting services for DMO including managing apportionments, allotments, funds certifications, invoice processing, general ledger, payroll reconciliations, bank card, and travel;
- Oversee and manage the DHS Working Capital Fund (WCF);
- Perform internal audits and audit follow-up for DMO offices; and
- Provide reasonable assurance on internal controls over financial reporting and internal controls over operations.

GAO and OIG Audit Liaison:

- Coordinate the Department's engagement in Government Accountability Office (GAO) and Office of the Inspector General (OIG) audits; including entrance and exit conferences, and the Department's response to audit reports and findings;
- Track the Department's implementation of audit recommendations; and
- Provide oversight and guidance to Component-level GAO and OIG audit liaison offices and to DHS employees involved in audits, investigations, and inspections.

Resource Management Transformation:

- Provide guidance, training, integration assistance, and implementation of the new eTravel system (ETS2) for DHS;
- Provide guidance for and oversee Financial Systems Modernization (FSM) efforts in conjunction with the Financial Management (FM) Division; and
- Oversee and develop business intelligence activities and capabilities including developing executive reporting capabilities and implementing tracking databases.

Workforce Development:

- Provide the training and tools to support individual staff performance and career path development, and execute talent management initiatives to recruit the next generation of financial management leaders;
- Provide experiences and opportunities designed to establish a strong foundation in financial management disciplines to optimize career building at DHS; and
- Create a pipeline of strong candidates for senior financial management leadership roles at DHS.

C. Budget Request Summary:

The OCFO requests \$94.626 million, 216 full-time positions (FTP) and 212 full-time equivalents (FTE). This is an increase of \$19.078 million from FY 2014 Enacted when including the funds appropriated by a General Provision and managed by OCFO for DHS Financial Systems Modernization efforts. Program changes include an increase of \$1.461 million in support of the capabilities and requirements analysis and an increase of \$15.822 million for Component Financial Systems Modernization.

2014 Enacted	208	208	75,548
2015 Adjustments-to-Base	-	-	1,795
2015 Current Services	208	208	77,343
2015 Program Change	8	4	17,283
2015 Total Request	216	212	94,626
Total Change 2014 to 2015	8	4	19,078

CURRENT SERVICES PROGRAM DESCRIPTION:

OCFO ensures that the funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies. This mission is supported by the Budget, PA&E, and Financial Operations divisions. OCFO also provides guidance and oversight of the Department's budget, financial management, and resource management systems. This guidance and oversight is supported by the Financial Management, Risk Management and Assurance, Financial Assistance Policy and Oversight, GAO and OIG Audit Liaison, Resource Management Transformation, and Workforce Development divisions.

Adjustments to Base include:

- Increase of \$196 thousand for the 2015 pay raise.
- Increase of \$65 thousand for annualization of the 2014 pay raise.
- Increase of \$15 thousand for increased retirement contributions.
- Increase of \$1.605 million for personnel compensation right sizing.
- Decrease of \$86 thousand for efficiencies in travel and rent space.

Program Changes include:

- Increase of \$1.461 million and 8 FTP/4 FTE for the implementation of the capabilities and requirement analysis.
- Increase of \$15.822 million for Component Financial Systems Modernization.

IV. Program Justification Changes

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Financial Officer
Justification of Program Changes
(Dollars in Thousands)

Program Increase 1: Capabilities and Requirements Analysis

Program Increase: Positions 8, FTE 4, Dollars \$1,461

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							8	4	1,461
Total Request	-	-	-	-	-	-	8	4	1,461

Justification:

This funding is essential to implement improved investment lifecycle management. While requirements development occurs throughout DHS Components, no formal structural capacity to govern a Department-wide capabilities and requirements process exists. Ideally, major capital investment needs should flow from broader strategy, policy, and goals to determine the least costly or most effective solution for an intended level of investment. Formal governance structures and improved analysis of capability alternatives are necessary to ensure investments are set up to successfully deliver on operational needs and mission outcomes when initiated. In 2013, DHS CFO worked with Science and Technology (S&T), the Office of Acquisition Support and Operations Analysis (ASOA), and the Office of Policy to examine how assessments across Components of a capabilities baseline, future requirements, and lifecycle costs through portfolio management could be leveraged as a primary means of prioritizing capabilities and to inform tradeoffs in the allocation of program resources. This increase will allow the CFO to:

- Improve analytic capability and staff capacity to evaluate capability gaps, tradeoffs, and conduct cost effectiveness analysis. New staff will be drawn from a variety of diverse disciplines, including operations research with background in physics, economics, engineering, mathematics, or computer science. New personnel will work to identify capabilities that exist and develop portfolio baselines consistent with enterprise architecture portfolios. This will aid translation of joint capability decisions into resource allocation decisions.
- Coordinate with business partners (Policy, S&T/ASOA, DHS Budget, PARM, OCIO/EBMO) and operational Components.

- Develop repeatable management processes and doctrine for oversight of joint DHS capabilities and requirements development and assessment.
- Develop capabilities roadmaps to define the courses of action necessary to target wasteful duplication in the current capabilities landscape and assess affordable alternatives to fill gaps.
- Enable investment portfolio affordability analysis in advanced of programming and budgeting to inform targeted risk-based decisions.
- Introduce regimented approval of study plans for analyses of alternatives for enterprise requirements and capability development plans currently required under MD-102, Acquisition Management.
- Effectively integrate existing annual information technology portfolio reviews into investment lifecycle management.
- Inform knowledge management and business intelligence efforts directed at portfolio assessment.

These actions are essential to ensuring strategy drives prioritization of mission needs, selection of optimal solutions, and developing time phased resource plans in an integrated, transparent, and cost-effective manner.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Financial Officer
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Component Financial Systems Modernization

Program Increase: Positions 0, FTE 0, Dollars \$15,822

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	29,548
Program Increase							-	-	15,822
Total Request	-	-	-	-	-	29,548	-	-	45,370

Justification:

OCFO requests funding on behalf of DHS Components to support requirements related to Component migrations to new financial systems. Funds will be used for a number of items: the Discovery phase with a Federal Shared Service Provider, base requirement and design work, data migration and conversion, the first year of software licenses, basic organizational change management and training, user acceptance testing, and quality assurance and contractor support.

Requested funding will be used to support USCG, TSA, NPPD, and S&T who are seeking to transition to a financial management solution that eliminates operational constraints, fills existing mission gaps, complies with federal requirements and guidelines, and provides a fully automated, integrated, streamlined, and reliable core financial system. Funding is also requested for CBP in support of their transition to a shared service provider.

Without this funding DHS will be unable to support the migration of these Components to a financial system that will address areas such as systematic internal control weaknesses, audit readiness/sustainability and improve the Department's ability to leverage IT systems to effectively and efficiently process and report financial data.

DHS considers the FSM initiative a high priority and all stakeholders are committed to its success. DHS actions are ongoing and include:

- Establishing governance and senior level sponsorship at DHS Headquarters;
- Working with Components to draft Alternatives Analyses for their financial systems modernization initiative; and

- Working with Treasury's Office of Financial Innovation and Transformation to address financial systems needs for each DHS Component.

By closing capability gaps, the solution selected will reduce life cycle costs and enhance efficiency and effectiveness. When successful transition occurs, stakeholders will see elimination of unnecessary customizations, easier adoption of best practices and increased use of standard government processes that will allow USCG, TSA, NPPD, and S&T to focus on their core missions.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of the Office of the Chief Financial Officer as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113) [\$75,548,000] **\$94,626,000**:
Provided, That the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives at the time the President's budget proposal for fiscal year [2015] **2016** is submitted pursuant to section 1105(a) of title 31, United States Code, the Future Years Homeland Security Program, as authorized by section 874 of Public Law 107-296 (6 U.S.C. 454).

Office of the Chief Financial Officer Mission Statement

The mission of the Office of the Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, investment review, and resource management systems to ensure funds necessary to carry out the Department's missions are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	21,868	22,086	24,404	2,318

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	21,868	22,086	24,404	2,318
11.3 Other than Full-Time Permanent	997	1,007	1,017	10
11.5 Other Personnel Compensation	345	348	351	3
12.1 Civilian Personnel Benefits	6,722	6,789	7,571	782
Total, Salaries & Benefits	29,932	30,230	33,343	3,113

Salary and Benefit costs support 212 FTEs. The FY 2015 request includes 8 FTP/4 FTE for the implementation of the capabilities and requirement analysis, the annualization of the 2014 pay increase, the 2015 pay increase, and the increased retirement contributions.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$27	\$25	\$20	(\$5)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. There is a decrease of \$5,000 in FY 2015. OCFO's FY 2010 travel totaled \$125,000 and OCFO has exceeded the mandatory 30% travel reduction from their FY 2010 levels.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$2,803	\$2,876	\$2,795	(\$81)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. There is a decrease in FY 2015 of \$81,000 due to the reduction of the OCFO space at the Nebraska Avenue Complex.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$9,072	\$49,781	\$48,616	(\$1,165)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The decrease of \$1,165,000 is due to the obligation of carryover totaling \$17,906,000 in Financial Systems Modernization funding from FY 2013 for planned obligations in FY 2014.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$328	\$333	\$338	\$5

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. There is a \$5,000 increase in FY 2015 due to inflation.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$8,961	\$8,814	\$8,929	\$115

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. These costs represent OCFO's costs for WCF excluding rent. There is an increase of \$115,000 due to increases in the following activities: TIER, Transit, HSPD-12, Financial Statement and Internal Controls Audits, and Enterprise License Agreements.

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Office of the Chief Information Officer

I. Appropriation Overview

A. Mission Statement for Office of the Chief Information Officer:

The Department of Homeland Security (DHS) Office of the Chief Information Officer (OCIO), in collaboration with the DHS Chief Information Officer Council, is responsible for implementing the programs necessary to align DHS's Information Technology (IT) personnel, resources, and assets, including all systems and infrastructure, to support Department-wide missions and activities. OCIO's mission is to provide DHS and its partners with the IT services required to lead a unified national effort to prevent and deter terrorist attacks as well as protect against and respond to threats and hazards.

The Department's goals and priorities require IT capabilities and services to:

- Establish secure IT services and capabilities to protect the Homeland and enhance our Nation's preparedness, mitigation, and recovery capabilities;
- Strengthen and unify the Department's ability to share information and services internally and with Federal, State, local, tribal, international, and private industry partners;
- Improve IT service and program performance, transparency, accountability, and efficiencies through effective governance and enterprise architecture (EA); and
- Develop and implement a comprehensive approach to IT employee recruitment, development, retention, and recognition to ensure that the right personnel and skill sets are in place to achieve Department-wide excellence in IT delivery.

These goals directly align to the Office of Management and Budget's (OMB) *25 Point Implementation Plan to Reform Federal Information Technology Management*. Specifically, the DHS CIO is committed to implementing modular system development, improving performance on IT programs, implementing a "Cloud First" policy, and reducing the number of data centers. OCIO is driving consolidation of commodity IT, in particular IT infrastructure.

Per OMB memorandum M-11-29, *Chief Information Officer Authorities*, the role of Agency CIOs is changing from policymaking and infrastructure maintenance to managing by portfolio to deliver enterprise-wide IT solutions. The OCIO has implemented OMB's PortfolioStat process to identify opportunities to eliminate duplication, consolidate the acquisition and management of commodity IT services, and increase the use of shared-service delivery models. The CIO is also responsible for implementing an enterprise information security program to protect sensitive mission data through continuous monitoring of DHS networks, and developing an enhanced risk assessment process.

DHS continues the OMB TechStat review process for troubled IT programs and has implemented the process at the Component level. This process has improved the transparency of program health across the Department and is focused on identifying program risks and failures and taking corrective action in alignment with the tenets of IT reform.

To achieve its mission, OCIO is committed to recruiting talented, capable IT program managers that are held accountable for the performance of IT programs.

B. Budget Activities:

OCIO activity functions are divided into four major Programs, Projects, and Activities (PPAs):

Salaries and Expenses

Salaries and Expenses is a crosscutting program that provides executive leadership, technology management, and acquisition and financial support functions to all offices within the OCIO. It covers payments for most Working Capital Fund (WCF) services, such as rent, mail services, contracting support, and financial management support received from other management lines of business. Funding for the Secretary's executive travel team which provides DHS leadership with secure telecommunications capabilities, is also included within Salaries and Expenses.

Information Technology Services

Information Technology Services (ITS) supports development, implementation, and maintenance of IT functional services, including enterprise architecture (EA), enterprise data management, information sharing, IT strategic policy and planning, performance measurement, capital planning and investment control (CPIC), and program/portfolio management. It also covers geospatial technologies, application delivery, enterprise hosting, and portal consolidation. ITS also includes the Office of Accessible Systems and Technology (OAST), which provides guidance and oversight to all DHS Components on implementing and maintaining initiatives to ensure electronic and technological information is accessible to DHS employees and customers with disabilities.

Infrastructure and Security Activities

Infrastructure and Security Activities (ISA) are a set of IT projects that provide integration and protection of DHS information. This PPA funds the DHS OCIO effort to continue to consolidate multiple disparate networks into DHS OneNet. ISA funds manage infrastructure support which includes support for network and data center services and DHS Component enterprise applications. ISA also provides funds to maintain Trusted Internet Connection (TIC) capability and move all network traffic behind the TIC. The DHS OCIO's immediate and long-term goal, executed through ISA, is to protect the Department's IT resources from cyber threats, provide One DHS Infrastructure platform, and foster information sharing across the Department and with external stakeholders, such as Federal, State, and local government agencies and their partners.

ISA also includes the IT security function, which sets IT security policy, and provides security architecture, certification and accreditation (C&A) remediation, Federal Information Security Management Act (FISMA) compliance and oversight, operations and maintenance

(O&M) for legacy infrastructure and new infrastructure investments, and IT awareness and training programs.

Homeland Secure Data Network

The Homeland Secure Data Network (HSDN) program enables agencies to collaborate and communicate effectively at a Secret-classified level among Federal and State governments and supporting entities. HSDN provides the capabilities to enable DHS to electronically collect, disseminate, and exchange both tactical and strategic Secret-level information throughout DHS and between DHS and its partners. The HSDN PPA also includes the Communications Security (COMSEC) Central Office of Record (COR) that develops and publishes policy and procedures for the operation and use of COMSEC equipment and cryptographic keying material within DHS, ensuring compliance with government-wide and Departmental policies and procedures. The HSDN PPA also includes funding for Sharing and Safeguarding Classified Information in response to Executive Order 13587, which directs structural reforms to improve information security across the Federal Government.

C. Budget Request Summary:

The OCIO requests \$256.343 million, 290 full-time positions (FTP) and 290 full-time equivalents (FTE). This is a net decrease of \$43.013 million and an increase of 16 FTE from FY 2014 Enacted.

Adjustments to Base include:

- Increase of \$122 thousand for Annualization of the 2014 pay raise.
- Increase of \$366 thousand for the 2015 pay raise.
- Increase of 16 FTE and \$0 for National Operations Center/Security Operations Center (NOC/SOC) program.
- Increase of \$2.347 million for Personnel Compensation Rightsizing.
- Increase of \$378 thousand for Increased Retirement Contributions.
- Increase of \$863 thousand for the Information Sharing Environment Office in the ISA PPA.
- Decrease of \$67 thousand for efficiencies.
- Decrease of \$313 thousand for reduction in Working Capital Fund contributions.
- Decrease of \$2.134 million in non-recurring Identity, Access, and Credential Management (ICAM) costs.
- Decrease of \$509 thousand for the Information Sharing Environment Office in the ITS PPA.
- Decrease of \$42.2 million in non-recurring Data Center Migration costs.

Program Changes include:

- Increase of \$6.976 million for Sharing and Safeguarding Classified Information.
- Decrease of \$873 thousand for the executive correspondence tracking system operations and maintenance and SharePoint hosting.
- Decrease of \$129 thousand in contractor support for the Continuity of Operations program and telecommunications for the Secretary.
- Decrease of \$5.560 million for information security and infrastructure activities.

- Decrease of \$2.280 million for IT governance across program and portfolio governance, enterprise architecture, geospatial, information sharing, and various centers of excellence.

¹FY 2013 Revised Enacted includes reprogrammings/transfers, and actual FTE/fee collections in FY 2013, as applicable.

III. Current Services Program Description by PPA

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Salaries and Expenses
Program Performance Justification
(Dollars in Thousands)

PPA: Salaries and Expenses

	Perm. Pos	FTE	Amount
2013 Revised Enacted	274	274	114,500
2014 Enacted	274	274	115,000
2015 Adjustments-to-Base	16	16	(19,427)
2015 Current Services	290	290	95,573
2015 Program Change	-	-	(129)
2015 Total Request	290	290	95,444
Total Change 2014 to 2015	16	16	(19,556)

The OCIO requests \$95.444 million for Salaries and Expenses. This is a decrease of \$19.556 million from the FY 2014 Enacted Budget.

The Adjustments-to-Base are as follows:

- Increase of \$122 thousand for Annualization of the 2014 pay raise.
- Increase of \$366 thousand for the 2015 pay raise.
- Increase of \$378 thousand for Increased Retirement Contributions.
- Increase of \$2.347 million for Personnel Compensation Rightsizing.
- Decrease of \$67 thousand for efficiencies.
- Decrease of \$313 thousand for reduction in Working Capital Fund contributions.
- Realignment of Applications Operations and Maintenance (\$10.423 million) to Information Technology Services PPA.
- Realignment of Infrastructure Transformation Program (\$2.008 million) to Infrastructure and Security Activities PPA.
- Realignment of Information Security Program (\$9.829 million) to Infrastructure and Security Activities PPA.

The Program Changes are as follows:

- Decrease of \$129 thousand in contractor support for the Continuity of Operations program and telecommunications for the Secretary.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Salaries and Expenses PPA provides funds for the Infrastructure Operations and the Records Management and Printing programs in addition to salaries and benefits, shared services, and payments to the DHS Working Capital Fund.

Infrastructure Operations

Infrastructure Operations (IO) includes initiatives for IT security and continuity operations, providing alternate sites with necessary IT communications capabilities to support emergency operations during periods of activation by the President or the DHS Secretary for Continuity of Operations (COOP). In accordance with *Presidential Decision Directive 67*, *Federal Continuity Directive 1 (FCD1)*, and *Homeland Security Presidential Directive (HSPD)-20: National Continuity Policy*, Federal agencies are mandated to develop COOP plans. A COOP facilitates the performance of, and is crucial to, the business continuity of the Department's critical systems. A COOP functions during an emergency or any other situation that may disrupt normal operation. As such, IT is a critical element of business continuity.

It is critical that DHS and its Components ensure information residing, created, received, transmitted within, and shared by the Department is secured in a manner compliant with Federal Acts, Memorandums, Circulars, Executive Orders, and Presidential Directives. OCIO has a leadership role in meeting legislative requirements and Executive directives regarding information security and using best practices to ensure the viability of systems supporting DHS business missions. OCIO is also responsible for ensuring systems and accompanying security controls and measures are functional and active, which is accomplished through use of security software residing on the DHS network.

Records Management and Printing

Under the Federal Records Act, DHS is mandated to properly preserve and protect Agency records and establish an agency records management program. The Department has established the DHS Records Leadership Council to assist the CIO in managing, overseeing and advising on the Department's records management policies, procedures, and operational effectiveness. The records program is leading the collaboration with Information Governance coalescing records, Freedom of Information Act Collection, and eDiscovery collection. The records program works closely with the Office of the Chief Privacy Officer and Office of General Counsel to develop a department-wide solution in meeting the information governance challenge.

The Department consolidated fragmented printing services into a single Service Level Agreement with the Customs and Border Protection (CBP) to process and provide all printing services for DHS Headquarters. This consolidation improved the Department's ability to provide quality and timely printing materials for DHS mission activities related to law enforcement, cybersecurity, science and technology, national protection and infrastructure and several other direct mission areas.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Information Technology Services
Program Performance Justification
(Dollars in Thousands)

PPA: Information Technology Services

	Perm. Pos	FTE	Amount
2013 Revised Enacted	-	-	26,964
2014 Enacted	-	-	34,000
2015 Adjustments-to-Base	-	-	7,780
2015 Current Services	-	-	41,780
2015 Program Change	-	-	(3,153)
2015 Total Request	-	-	38,627
Total Change 2014 to 2015	-	-	4,627

The OCIO requests \$38.627 million in FY 2015 for Information Technology Services. This is an increase of \$4.627 million from FY 2014 Enacted.

The Adjustments-to-Base are as follows:

- Decrease of \$2.134 million for a non-recur in Identity, Credential and Access Management (ICAM) costs.
- Decrease of \$509 thousand for the Information Sharing Environment Office.
- Realignment of \$10.423 million for Applications Operations and Maintenance from the Salaries and Expenses PPA.

The Program Changes are as follows:

- Decrease of \$2.280 million for IT governance across program and portfolio governance, enterprise architecture, geospatial, information sharing, and various centers of excellence.
- Decrease of \$873 thousand for the executive correspondence tracking system operations and maintenance and SharePoint hosting.

CURRENT SERVICES PROGRAM DESCRIPTION:

The IT Services PPA provides funding for the following eight programs:

Enterprise Architecture: Enterprise Architecture (EA) provides a "blueprint" for systematically defining DHS's baseline IT environment, target environment, and transition plan for implementing mission-critical capabilities. The program establishes a Department-wide roadmap to improve mission

effectiveness and efficiency, eliminate existing stove-piped systems, and increase system interoperability and information sharing. EA ensures the essential evolution of information systems and the development of a common IT environment.

Enterprise Data Management: The Enterprise Data Management Program provides the architectural guidance and governance for utilization of Departmental data assets. The Enterprise Data Management Office (EDMO) establishes the guidance and provides oversight for DHS data policy, data management, and data stewardship efforts. EDMO participates in efforts to investigate and identify new opportunities for managing and delivering mission-required data more effectively and efficiently. The program supports the development of the Department-wide roadmap for identifying trusted and reliable data to eliminate existing stovepipe data systems, and increases data systems interoperability and information sharing. Data architecture is the key governance tool to ensure mission needs drive technology investments. Through the use of data architecture practices and the Federal Enterprise Architecture Data Reference Model, EDMO expects to recommend realignment of key IT investments and acquisitions that will reduce maintenance costs of existing systems and drive common requirements for development of centralized services.

EDMO initiated development of cost models to identify the value of data management efforts. To date models have been developed for several different Component areas, Component Enterprise and Data Architecture team, data quality efforts for system modernization, and a back office business report generation team. This effort is continuing to work on cost models for several other data and architecture efforts.

EDMO holds the primary responsibility for the adoption, training, and implementation of the National Information Exchange Model (NIEM) within the Department. A national program supported by the Federal government, NIEM connects communities of people who share a common need to exchange information in order to advance their missions. The NIEM model is applied to support the development and dissemination of enterprise-wide information exchange standards and processes. These standards and processes enable Federal, State, local and tribal jurisdictions to share critical information effectively in emergency situations and support the daily operations of agencies throughout the nation. NIEM enables information reuse, management of information as an enterprise asset, and information sharing.

Geospatial Management: The Geospatial Information Office (GIO) serves as the central point of coordination for the alignment and integration of geospatial investments across the Department by providing oversight and guidance to DHS Components for geospatial policy and technology matters. The GIO executes a comprehensive program that enables the effective, collaborative, and integrated application of geospatial capabilities (e.g., infrastructure, software, data, and services). This provides DHS stakeholders the ability to integrate, analyze and visualize specific mission data from a mapping perspective. Such capabilities leverage base geographic data, mission specific data/infrastructure, satellite imagery, geo-coding services, and geo-analytical tools. DHS requires coordinated and, in some cases, consolidated enterprise geospatial solutions for emergency management, intelligence and operations, law enforcement, and other DHS mission objectives to ensure efficient and cost-effective shared usage of geospatial assets. The GIO provides the operational design, development and deployment of the DHS Common Operating Picture and Request for Information capabilities for situational awareness on behalf of Component mission requirements. GIO is a leader in the Program

Manager-Information Sharing Environment's (PM-ISE) initiatives to develop the Identity and Access Management (IdAM) Reference Architecture and Geospatial Interoperability Reference Architecture for government-wide alignment to maximize geospatial information sharing and drive cost efficiencies.

Identity, Credential, and Access Management: The Identity, Credential, and Access Management (ICAM) program funds the DHS ICAM Program Management Office (PMO). The ICAM PMO provides enterprise-level coordination and planning to enable the implementation of target state ICAM processes, policies (e.g., OMB Memorandum (M) 11-11), and technologies including implementing the use of the Smartcard required by Homeland Security Presidential Directive 12 (HSPD-12) for access to IT networks, systems, and applications; Public Key Infrastructure (PKI); Single Sign-on; and fine-grained access control in support of the DHS information sharing environment. The ICAM PMO is chartered to serve as the Departmental focal point for Federal policy, standards, and implementation guidance relating to ICAM. The ICAM PMO delivers Department-wide leadership and continuity by combining essential coordination between Components, leveraging existing ICAM investments, justifying and providing acquisition oversight for new ICAM investments. The ICAM PMO has developed a business case, architecture and transition strategy needed to establish enterprise single sign-on and the identity attribute hub capabilities starting in FY 2015.

Major Acquisitions

The ICAM program's purpose is to ensure that access to DHS facilities, systems, and applications is provided to departmental staff, contractors, partners, and valid users. Through appropriate identity verification, only authenticated and authorized people will gain access to systems and facilities. This preserves privacy rights and civil liberties. Secondly, the ICAM Program improves secure information sharing by restricting access to personnel with approved attributes or roles. Increased sharing occurs because the information owner has a high degree of trust that users with access have been vetted and are acting in their official capacities.

For HSPD-12, the role of the ICAM PMO is to satisfy the "IT" requirements of the HSPD-12 mandate, which is separate and apart from the OCSO-managed Program for "PIV" card issuance.

Funding addresses enterprise-wide requirements to meet the mandates of the OMB M-11-11 (DHS mandatory PIV network authentication) designed to improve the DHS cybersecurity posture by implementing mandatory use of the PIV Smartcard to authenticate to DHS networks across all components. Implementing enterprise services provide efficiencies across DHS for ensuring consistency in implementation via centralize oversight which in turn establishes technology standards to address the requirements of interoperability, interface, and integration with Component level efforts.

This program is funded through multiple PPAs in DHS for FY 2015 in the amount of \$27.722 million:

- OCIO – \$5.849 million
- USSS – \$205 thousand
- CBP – \$2.226 million
- FEMA – \$19.442 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
\$22,481	\$25,165	\$27,722

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
ICAM PMO Program and Engineering Support (\$1,828)	ICAM PMO Support	Provide program/project management and engineering support
HSPD-12 Support Services (\$2,180)	Enterprise Support Services	Operate and maintain enterprise HSPD-12 Logical Access – Mandatory PIV services
DHS PKI Services (\$1,502)	DHS PKI Management Authority	DHS PKI management services and Enterprise PKI Validation Services
Federal PKI Services (\$339)	Federal PKI Management Authority	PKI Federal Bridge – to continue use of PIV certificate
	MAX Authentication Services	Federated services between DHS and OMB MAX
Component Contributions (\$21,873)	Component ICAM: USSS (\$205) CBP (\$2,226) FEMA (\$19,442)	Component level ICAM efforts

* Funding profile includes OCIO appropriated funds as well as DHS Component ICAM budgets.

Applications Operations & Maintenance: The Applications Operations & Maintenance (AO&M) Program maintains and oversees the Department’s Private Cloud and enterprise services, which directly support OMB’s *25 Point Implementation Plan to Reform Federal Information Technology Management*. These services include the development, test, and production environments within both of the DHS enterprise data centers (EDCs) to support secure enterprise application services. The AO&M Program provides ongoing O&M of enterprise application services such as Enterprise Correspondence Tracking, Collaboration service such as Project Server as a Service (PSaaS), Workplace as a Service (WPaaS), and Case and Relationship Management as a Service (CRMaaS) for Headquarters and Components. This funding is also used to provide quality management and security functions to ensure the Enterprise Service Development Office (ESDO) deployed services meet Federal standards and IT best practices. Additionally, this funding provides enterprise authentication services to all Components allowing for enhanced DHS security posture and customer service capabilities for single sign-on and access to over 100 DHS applications. AO&M also provides support via the Project Management and Cloud Support Division for five private cloud services that will modernize and enhance our ability to share information and deliver technology to focus more on mission needs and less on support functions. This function provides change management, release and configuration control management, resolving systemic issues with the service and other support activities related to cloud services.

Enterprise Application Delivery: Enterprise Application Delivery (EAD) supports the Department’s aggressive move to a Cloud-based, on-demand set of service offerings as part of government-wide Data Center Migration and Cloud First strategies. The benefits of adopting Cloud-type architectures

include, but are not limited to a reduction in the time-to-market for new capabilities, increased efficiencies by reusing existing capabilities (e.g., platforms, code), enhanced adoption of green technologies, and streamlined governance requirements. EAD leads the transformation through innovation by planning and delivering secure, high-quality enterprise application services for DHS customers as part of the DHS Private and Public Cloud initiatives. The request ensures identified DHS CIO High Priority Initiatives (HPIs) are executed by establishing robust Cloud services which meet business requirements and by deploying a Department-wide service catalog to enhance the consumer experience for DHS services. These efforts are executed by the DHS Applications Services Council, consisting of DHS Component CIO representatives, who establish capabilities and service-level agreements required to achieve Cloud services. EAD funding also supports the development and deployment of the DHS mobile development environment within the Enterprise Data Centers. The mobile development environment directly supports the Digital Government Federal Mandate.

Program Management Support: The OCIO Enterprise Business Management Office (EBMO) provides program management support services to the OCIO, DHS management, and Component programs to maximize DHS IT program productivity. EBMO's program management support provides Departmental IT strategic planning, performance measurement, resource management and analysis, enterprise portfolio governance, program governance oversight, acquisition review assistance, policy and compliance, and IT Requirements Engineering Center of Excellence support services. The office is currently standing up Department-wide Executive Steering Committees (ESCs) to further enhance program governance of major IT investments. The ESCs are decision-making bodies that provide oversight and collaboration for respective programs. The ESCs membership consists of Senior Executive Leadership across the Department to ensure cross-functional participation. The ESCs roll up to one of the Department's Portfolio Governance Boards.

EBMO provides Capital Planning and Investment Control support to all Components to ensure effective resource allocation across the Department's IT investment portfolios. EBMO is responsible for conducting annual IT Portfolio Reviews, conducting program assessments and updating the Federal IT Dashboard with monthly cost, schedule and performance data, gathering information for and presenting DHS-led TechStats, providing best practices and guidance to programs as Centers of Excellence, submitting annual OMB Exhibit 300s and Exhibit 53s, and conducting Privacy Act initiatives.

Under the OCIO EBMO, the Electronic Government (e-Gov) Program coordinates DHS participation in crosscutting, government-wide programs. Under the e-Gov umbrella, the Department manages or participates in 20 e-Gov initiatives and lines of business (LoBs) such as eRulemaking, Grants Management, Financial Management, and Budget Formulation and Execution. These initiatives / LoBs drive continuous progress and improvement using internet-based technologies, which enable citizens and businesses to interact with the Federal Government more easily, increases public participation, and saves taxpayer dollars. The EBMO e-Gov team works with OMB, other Federal Agencies (e-Gov Initiative Managing Partners), and various other internal and external stakeholders to ensure the Department remains compliant with federal e-Gov policies and mandates. The e-Gov Program also includes the Open Government Directive to support the government's commitment to increase transparency of data, expand participation of the public, and improve cross-government collaboration through systems and Web sites such as USA.gov, USAspending.gov, Data.gov, and the Federal IT Dashboard.

The Office of Accessible Systems & Technology: The Office of Accessible Systems & Technology (OAST) is dedicated to guiding and supporting all DHS Components in removing barriers to information access and employment of qualified individuals with disabilities in accord with Section 508 requirements. OAST strives to ensure that electronic and information technology (EIT) procured, developed, maintained, or used is accessible to DHS employees and customers with disabilities through a range of policy, training, technical assistance, and compliance activities. Every DHS employee and customer must be able to readily access information and data relevant to their job or needs including those with disabilities.

The mission of OAST is to provide the strategic direction, governance, technical support, and training to ensure DHS employees and customers with disabilities have equal access to DHS information and data. OAST leads Department-wide implementation of Section 508, offers policy and program direction and technical assistance to DHS Components, provides and develops appropriate educational activities and resources, reviews acquisitions for Section 508 compliance, and evaluates and reports on DHS compliance with Section 508. In addition, OAST offers guidance and technical assistance to DHS personnel on reasonable accommodations.

The Program Management division is responsible for: strategic planning, administrative support, contract management, asset management, administrative operations, Accessibility Help Desk operations, training and education, and outreach and awareness.

The Services division is responsible for providing comprehensive, reliable, and repeatable Section 508 testing and remediation services to DHS and to support employees with disabilities through effective IT accommodations. The IT Governance division is responsible for ensuring DHS programs fulfill Section 508 accessibility requirements by monitoring and enforcing Section 508 compliance through DHS governance activities. The Accessibility Compliance Center of Excellence (ACCOE) is responsible for providing DHS IT Program Managers and their teams with support for Section 508 compliance. The ACCOE provides proven best practices, processes and standards, workforce training, and expert consultation support for Section 508 compliance. Program Managers have support from a network of Component-level Section 508 Coordinators and subject matter experts to assist with accessibility compliance for IT governance, testing, processes, tools, and risk reduction.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Infrastructure and Security Activities
Program Performance Justification
(Dollars in Thousands)

PPA: Infrastructure and Security Activities

	Perm. Pos	FTE	Amount
2013 Revised Enacted	-	-	106,841
2014 Enacted	-	-	87,200
2015 Adjustments-to-Base	-	-	(29,500)
2015 Current Services	-	-	57,700
2015 Program Change	-	-	(5,560)
2015 Total Request	-	-	52,140
Total Change 2014 to 2015	-	-	(35,060)

The OCIO requests \$52.140 million for this activity. This is a decrease of \$35.060 million from FY 2014 Enacted.

The Adjustments-to-Base are as follows:

- Increase of \$863 thousand for the Information Sharing Environment Office.
- Decrease of \$42.200 million in non-recurring Data Center Migration costs.
- Realignment of \$2.008 million for the Infrastructure Transformation Program from Salaries and Expenses PPA.
- Realignment of \$9.829 million for the Information Security Program from Salaries and Expenses PPA.

The Program Changes are as follows:

- Decrease of \$5.560 million for information security and infrastructure activities.

CURRENT SERVICES PROGRAM DESCRIPTION:

Information Security Program: Through the Information Security Program, the Chief Information Security Officer (CISO) ensures a secure and trusted computing environment, which enables the Department to use information systems resources effectively to achieve its mission.

The Information Security Program ensures protection of sensitive information and allows sharing of all mission-related data. It also ensures compliance with the Federal Information Security Management Act (FISMA) and with National Institute of Standards and Technology (NIST) security policies and

requirements. The Information Security Program develops and documents Departmental information security requirements; develops enterprise security management tools; and oversees the implementation of information security systems supporting Departmental Operations.

Specifically, the Information Security Program provides:

- **Security Policy** and guidance to ensure protection of DHS information resources that help secure the Homeland. The CISO provides a waiver and exception process to document and manage mitigation of system control weaknesses. The program also develops the Department-wide system configuration guidance that provides baseline security configuration for the Department's hardware and software.
- **Security Architecture** that supports development of secure enterprise information-sharing capabilities and their integration with the DHS Enterprise Architecture Technical Reference Model (TRM), System Engineering Life Cycle (SELC) methodology, and the Capital Planning and Investment Control (CPIC) and acquisition processes. The CISO supports the Department's mission by protecting its information and IT resources (e.g. systems, network resources, and supporting data).
- **Compliance and Technology** includes oversight, measurement, validation, and reporting of information systems security throughout the Department, including management of the FISMA System Inventory, Security Authorizations (SAs) and Plan of Actions and Milestones (POA&Ms), and IT audit management and Federal reporting. This includes FISMA reporting and the implementation of continuous monitoring for the Department.
- **DHS IT Security Awareness, Training, and Education** to ensure DHS complies with all Federal regulations and OMB and NIST guidance governing IT security training, and Departmental standardization of security training content development.
- **National Security Systems (NSS) Risk Management** to support risk acceptance and system authorization decisions for classified systems. The program supports secure integrated operations of classified systems and National Security Information across the Department and participates in National-level NSS governance. It also evaluates the operational risk posture and formulates effective risk management strategies and mitigations.

Information Sharing Environment Office: Under the Intelligence Reform and Terrorism Prevention Act (IRTPA), DHS is mandated to improve information sharing among Federal agencies and with State, local, tribal, territorial, and private industry partners. A key priority for the Department is maturing the Information Sharing Environment (ISE). The Information Sharing Environment Office (ISEO) is the organization responsible for developing and implementing policies, standards, guidelines, practices and solutions that enable the ISE. ISEO provides leadership, oversight, and management of the Homeland Secure Information Network (HSIN) program (per the MOU with the office of Operations Planning and Coordination), leads the National Information Exchange Model (NIEM) Joint Program Management Office (JPMO), leads the Information Sharing Environment (ISE) Suspicious Activities Reporting (SAR) technology initiative, and is responsible for guiding and supporting implementation of federated identity management with Sensitive But Unclassified (SBU) information sharing partners.

ISEO provides the plan and the ground rules for effective, efficient information sharing nationwide. Ultimately, the ISE—a key priority for the department—ensures that access to information is not a limiting factor when executing the Homeland Security (HLS) mission to keep the nation safe. ISEO advances the DHS ISE and includes the development of policy, standards, guidelines, governance, and solutions for and across DHS—including the Information Sharing Segment Architecture. ISEO acts as a representative for the Department to many external organizations, leads several interagency subcommittees and working groups—including two positions supporting a White House committee, and is seen as a thought leader and innovator by many of our information sharing partners.

The NIEM Program’s executive steering council is led by DHS, the Department of Justice, and the Department of Health and Human Services. In addition, all 50 states and 19 other Federal departments have reported commitments to use NIEM, including most recently the Department of Defense.

Use of NIEM is written into two laws that were passed by Congress and signed by the President in FY 2012 to support the information sharing needs of State and Local agencies and their Federal counterparts such as Department of Health and Human Services and the Department of Labor. The first law enacted was P.L. 112-34, Child and Family Services Improvement and Innovation Act. The second law was P.L. 112-96, Middle Class Tax Relief and Jobs Creation Act. The NIEM PMO is providing guidance, technical expertise, and NIEM’s reusable framework to support the successful implementation of these two initiatives.

Information Security & Infrastructure: The Information Security Infrastructure (ISI) program funds infrastructure improvements that enable the Department to reduce lag time and complexity in accessing data, creates a robust platform on which to quickly launch new capabilities, and provides a cost-effective and reliable IT infrastructure. The ISI supports Network Services (OneNet), Trusted Internet Connections (TIC), Policy Enforcement Points (PEPs), High Assurance Gateways (HAG), Email Services, and Data Center Services. The infrastructure improvements streamline and standardize the network environment, minimizing the number of overlapping elements, providing operational and security support, and developing a Department-wide network topology with centralized governance and standardized procedures. DHS infrastructure transformation includes the provision of capabilities to continuously monitor and maintain the DHS IT Infrastructure in an operational and secure state.

Infrastructure Transformation Program Operations: ITP is responsible for implementing the Department’s vision of “One Infrastructure”. ITP is a major DHS investment with a Life Cycle Cost Estimate (LCCE) of \$2.16 billion. ITP supports the DHS OCIO’s reliable, resilient, and secure DHS-wide data network that streamlines appropriate sharing and discovery of information within the Department and associated organizations, such as State and local law enforcement agencies. The core of this unified environment is the consolidation of legacy networks into one enterprise-wide, integrated network called OneNet. Major services provided under ITP include: DHS WAN services, including configuration management, engineering, technical requirements analysis and OneNet integration services; Network and security operations centers - Enterprise Network Operations Center (NOC) and Security Operation Center (SOC); Traffic modeling and performance analysis; Network Management and IP address administration.

The OneNet network and security operations centers monitor and manage DHS’s centralized systems and network infrastructure. Incident response and detection is coordinated and escalated within the

network security and computing service groups, depending on the nature of the breach or failure. The OneNet NOC works with Component NOCs, Enterprise Data Operations Centers, and the Enterprise Operations Center to coordinate service restorations and troubleshooting. DHS is implementing enhancements to OneNet to meet unique Component security requirements and OMB mandates. These enhancements include Trusted Internet Connections (TIC), High Assurance Gateways (HAG) and Policy Enforcement Points (PEP).

The HAG provides selected DHS personnel with access to malicious and prohibited websites that would typically introduce risks into the Enterprise. The HAG will allow access to information in a secure virtual environment, protect the user's workstation from any malicious attacks, and provide compensating controls for anonymous Internet site access.

Email services provide additional and comprehensive communication ability across DHS and to external Federal, State, local, tribal, international, and private sector partners. Email legacy systems are consolidated within DHS as the Email as a Service (EaaS) capability is deployed at the Enterprise Data Centers (EDC). Email services will enable personnel to access critical business communications and are designed to deliver greater security, availability, and reliability. Major email services include a consolidated DHS-wide Global Address List (GAL), a standard email-naming convention, and a DHS-wide email platform.

Data Center (DC) Development: DHS is in the process of consolidating the Department's legacy data centers into the Enterprise Data Center (EDC), known as DC1 and DC2. This is in alignment with the Federal Data Center Consolidation Initiative (FDCCI). Support at the EDC includes management and control of DC hardware, operating systems software, and environmental systems. In addition both DCs are prepared to support a higher density virtual environment from both an infrastructure and managed-service perspective. The DCs support the delivery of private cloud and "as-a-service" offerings to customers seeking a scalable and secure virtual environment of configurable computing resources that can be rapidly provisioned with minimal cost of ownership. DC1 and DC2 have the ability to continuously synchronize applications based upon mission requirements. The purpose of DC consolidation is to ensure DHS has a seamless disaster recovery capability and to significantly enhance the cyber security posture of DHS systems. DHS DC capabilities provide personnel the tools to successfully and efficiently manage service delivery and support activities.

Major services provided by DC1 and DC2 include capacity and availability management; system management and administration; hardware/software maintenance; facility monitoring, security management; and disaster recovery management and testing. Infrastructure and Security Activities fund DC consolidation and assist migrating legacy DC environments to the EDC. The Data Center Development program focuses on building capabilities at both DHS data centers.

DHS completed three facility consolidation activities from DHS primary legacy centers to the DHS enterprise data centers to include: FEMA in Plano, TX and NPPD Federal Protective Services (FPS) Mega-center sites in Denver and Philadelphia. In addition, there are continued migration efforts for USCIS Manassas Technology Engineering Consolidation Center (TECC), TSA Federal Air Marshalls (FAM) Atlantic City, as well as continued development of the common delivery platform environment at DC2 in support of the CBP Newington migrations.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Homeland Secure Data Network
Program Performance Justification
(Dollars in Thousands)

PPA: Homeland Secure Data Network

	Perm. Pos	FTE	Amount
2013 Revised Enacted	-	-	41,161
2014 Enacted	-	-	63,156
2015 Current Services	-	-	63,156
2015 Program Change	-	-	6,976
2015 Total Request	-	-	70,132
Total Change 2014 to 2015	-	-	6,976

The OCIO requests \$70.132 million for the Homeland Secure Data Network (HSDN) activity. This is an increase of \$6.976 million from FY 2014 Enacted.

The Program Changes are as follows:

- Increase of \$6.976 million for Sharing and Safeguarding Classified Information.

CURRENT SERVICES PROGRAM DESCRIPTION:

Homeland Secure Data Network (HSDN): HSDN enables Department of Homeland Security offices and Components, other Federal departments and agencies, and State, local and tribal entities to collaborate and communicate effectively at the collateral Secret-classification level. HSDN is the primary means for communicating classified Secret information with the national network of State and Major Urban Area Fusion Centers. HSDN is strengthening its relationship to Secret Internet Protocol Router Network (SIPRNet) to enable trusted access by Fusion Centers to SIPRNet resources, and is expanding its collaboration capabilities through applications like H-Space. The Executive Order 13587 *Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information* Senior Information Sharing and Safeguarding Steering Committee recognized HSDN as the primary Secret network for non-Defense and non-Intelligence Federal departments and agencies. HSDN is advancing its sharing and safeguarding posture by adopting the Department of Defense (DoD) as the Common Service Provider for hard-token based PKI authentication, advancing access management solutions, and improving auditing and monitoring capabilities.

As of June 2013, HSDN has established 519 sites, comprised of 4,636 workstations, across the United States. Since June 2013, the program has established user accounts for approximately 9,554 end-users who currently log on and exchange information across both HSDN and the broader Secret-level community in performing daily missions. Since July 2009, the number of HSDN workstations OCIO supports has increased by 94.3-percent and the number of HSDN sites that OCIO supports has increased by 284-percent. HSDN currently operates continuously 24 hours a day, 7 days a week.

System capabilities include the NOC, SOC, four-tiered help desk, data centers, system-wide telecommunications backbone, and enterprise applications, including office email and messaging in support of end-user mission requirements.

Major Acquisitions

HSDN is a classified wide-area network for DHS and its partners, providing effective interconnections to the intelligence community and federal law enforcement resources. With HSDN capabilities, DHS has the ability to collect, disseminate, and exchange both tactical and strategic intelligence and other homeland security information up to the SECRET level.

HSDN fills a critical capability gap. It enables the vital mission capability to communicate classified information at the secret level among DHS components, partners in the federal government and with appropriate entities in state and local government. The HSDN program provides a simplified mechanism for authorized user entities and their appropriately cleared staff to quickly acquire sophisticated tools and means to enable these communications. HSDN provides accredited end user terminals, links DHS components with one another and with external partners including DoD SIPRNet through accredited classified interconnections. It provides a common core infrastructure within which information is shared and analyzed, security monitored, and operations administered. This environment has proven scalable and extensible, supporting growing mission sets and an expanding body of users. It has grown to host enterprise applications and host particular mission specific applications that leverage classified information supplied from multiple sources connected through HSDN. The technical and management capabilities of the HSDN program have potential as a harmonizing foundation for cross-federal common classified secret capability, currently under study by the Sharing and Access Interagency Policy Committee. HSDN is planning mechanisms that strengthen information access control to those who are not only cleared but authorized for access based on their specific group and authorization attributes, ensuring appropriate control of information dissemination.

This project is proposed to be funded out of one PPA in FY 2015, as follows:

- Homeland Secure Data Network PPA: \$70.132 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
\$40,494	\$63,156	\$70,132

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
HSDN O&M (\$42,132)	State and Local Fusion Center Build Out or Relocation	Complete the installation of HSDN to State and Local Fusion Centers (SLFCs) and begin relocation of required operational sites.
	HSDN Enhancements	Implement the HSDN over broadband capability.
	Network Consolidation	Decrease costs through network consolidation/migration to HSDN.
	HSDN Deployment to New Sites	Deploy HSDN to 72 new sites to increase information sharing.
	Technology Refresh	Improve reliability through technology refresh.
	HSDN Maintenance Tech Refresh	Maintain and improve reliability of equipment through technology refresh.
Sharing & Safeguarding Classified Information (\$28,000)	Reduce Anonymity	Required to comply with Executive Order 13587 “ <i>Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information</i> ” by ensuring the DHS headquarters implements PKI Infrastructure that meets OMB IOC/FOC dates and can be sustained for overall use within the Department.
	Enterprise Audit	Required to comply with Executive Order 13587 “ <i>Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information</i> ” by ensuring the DHS headquarters implements technical controls on its networks that enforce log audit capabilities and result in an Enterprise Audit program.
	Insider Threat	Required to comply with Executive Order 13587 “ <i>Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information</i> ” by ensuring the DHS headquarters implements technical controls and monitoring capability on its networks that comply with the DHS insider threat program.
	Removable Media	Required to comply with Executive Order 13587 “ <i>Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information</i> ” by ensuring the DHS headquarters implements technical controls and policy on its networks that enforce removable media security controls.

	Access Control	Required to comply with Executive Order 13587 “ <i>Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information</i> ” by ensuring the DHS headquarters implements technical controls on its networks that enforce access controls based on attributes and PKI integration.
--	----------------	--

Communications Security: The Homeland Security Communications Security (COMSEC) Central Office of Record (COR) was established in accordance with national policy as delineated in the interagency *Committee on National Security Systems Instruction (CNSSI) 4005*. The DHS Management Directive 4300B provides guidance for administering the National Security Policies required to provide for accounting, safeguarding, and management control over COMSEC keying material, controlled cryptographic items, and secure communications equipment. The COR provides consolidated COMSEC accounting services and training, and assists in acquisition and maintenance of COMSEC equipment for the Department. Additionally, the COR develops and publishes policy and procedures for the operation and use of COMSEC equipment and cryptographic keying material within DHS, ensuring compliance with National and Departmental policies and procedures.

To comply with the joint DoD and National Security Agency (NSA) Crypto Modernization program, DHS continues to migrate legacy encryptors, and COMSEC accounting infrastructure. The transition to modern cryptographic equipment and account management includes systems such as the Network-Centric Key Management Infrastructure (KMI) and the COMSEC Accounting, Reporting Distribution System (CARDS), both of which are emerging and critical components of the Global Information Grid. This migration is essential to the success of the Department by enabling and equipping the DHS COMSEC COR and accounts to migrate to new systems affording DHS the opportunity to automate, streamline, and restructure the COMSEC distribution and accounting infrastructure.

Sharing and Safeguarding Classified Information: The Sharing and Safeguarding Classified Information program directly supports Executive Order 13587, which directs structural reforms to improve information security across the Federal Government. The program funds five DHS-wide initiatives related to safeguarding classified information: Removable Media, Reduce Anonymity, Insider Threat, Access Control, and Enterprise Audit.

Removable Media is supported by three activities: automated lock down of drives, data loss prevention, and system alerts, all of which prevent DHS networks and Information resources from being vulnerable to the mass removal of classified information.

Reduce Anonymity is supported by three activities: Hard token PKI, authentication, and consolidation of information resources. This is critical to DHS’s connection to all other Federal classified networks such as Joint Worldwide Intelligence Communications System (JWICS) and Secure Internet Protocol Router Network (SIPRnet). These programs enable DHS to ensure that DHS users, Federal agencies that use DHS HSDN and SLT Information sharing environment users gain access to mission critical data resident on servers that use PKI (e.g., DOD).

Access Control is supported by two activities: access control (the ability to gain access to needed resources) and data discoverability (the ability to find resources and only the resources one is allowed). This allows DHS to maintain interoperability with other Federal networks which have implemented controls. With this interoperability, DHS will be able to provide adequate access control.

Enterprise Audit is used to protect national intelligence, identify threats, detect and deter penetration of classified resources, and reveal misuse and identity usage trends; thereby tying all the other initiatives together. DHS will remain connected to other Department and agencies networks, (e.g., JWICS, SIPRnet) and comply with Federal mandates.

The final initiative, Insider Threat, is classified and additional information can be provided under separate cover.

IV. Program Justification Change

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Justification of Program Changes
(Dollars in Thousands)

Program Increase 1: Sharing and Safeguarding Classified Information (HSDN)
PPA: Homeland Secure Data Network
Program Increase: Positions 0, FTE 0, Dollars \$6,976

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	21,024
Program Increase							-	-	6,976
Total Request	-	-	-	-	-	21,024	-	-	28,000

Description of Item

This request supports Executive Order 13587, which directs structural reforms to improve information security across the Federal Government. The request funds five DHS-wide initiatives related to safeguarding classified information: Removable Media, Reduce Anonymity, Insider Threat, Access Control, and Enterprise Audit.

Justification

At this funding level, DHS will be able to meet the Administration's mandate, and continue to improve information security while also providing necessary protections across the Department's classified networks in response to safeguarding actions directed by the Senior Information Sharing and Safeguarding Steering Committee, as established under Executive Order 13587. The activities associated with Sharing and Safeguarding Classified Information will not only protect DHS data and resources from unauthorized disclosures, but will also preserve the ability of all users of DHS classified systems to access classified resources from partner departments and agencies at all classified domains.

DHS will use the requested \$6.976 million increase in Sharing and Safeguarding funding in FY 2015 to cover the rising cost of operations and maintenance (O&M) associated with the roll-out and implementation of numerous activities required by each initiative that took place in FY 2012, 2013, and 2014. These activities, which include the completion to Final Operating Capability (FOC) of the requirement for Removable Media, and the expected achievement of Initial Operating Capability (IOC) for Enterprise Audit, Reduced Anonymity, and the Insider Threat efforts by the end of 2014 all

have expanded O&M tails in FY 2015 and beyond as the projects continue to gain momentum and milestones are completed.

While the majority of the planned work toward FOC will still take place in FY 2015 and FY 2016, many tasks have already begun. In FY 2014 DHS surpassed many other Tier 1 agencies by being the first to issue Public Key Infrastructure (PKI) tokens through the use of the PKI shared services Common Service Provider on Secret networks, provided by DoD/DISA. Not only was the Department able to support the DoD in achieving the accomplishment of their IOC on schedule, but DHS has since led a series of interagency sessions on how to implement PKI and lessons learned for other Common Service Provider subscribers. In FY 2013 the Department also successfully implemented an initial enterprise inventory management database and continued to make progress on the implementation of centrally managed audit log aggregation capabilities.

In FY 2015 the PKI activities will begin to gradually transition into a static O&M state as the provisioning of new tokens becomes more streamlined. Ongoing O&M costs include contractor support for Registration Authority Officials, token management, auditing, and the Department's contribution to the DoD Common Service Provider. Other O&M costs associated with Removable Media and Enterprise Audit include licensing, monitoring, and software. Additionally, O&M costs resulting from classified network consolidation will also become necessary as the Department continues to reduce the number of Component classified networks and migrate those entities into the enterprise.

Impact on Performance (Relationship of Increase to Strategic Goals)

DHS will continue to make progress toward IOC and FOC, using existing money set aside for sharing and safeguarding to develop new attribute based solutions in support of the Access Control initiative and further build out PKI in support of Reduce Anonymity on Department classified networks. Other Sharing and Safeguarding activities include the enhancement of DHS audit and storage capabilities for detecting anomalous network activity and retaining audit records, establishing and expanding the use of cross-domain solutions to limit the use of removable media across classified domains, and further developing the infrastructure and policies for interoperable access controls that will restrict access to sensitive information to only authorized users while continuously supporting insider threat detection capabilities. The additional resources planned for FY 2015 for operations and maintenance will offset program costs, allowing more new activities to take place, and driving additional progress toward accomplishment of milestones.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 1: Executive Correspondence Tracking System O&M and SharePoint Hosting (ITS)
PPA: Information Technology Services
Program Decrease: Positions 0, FTE 0, Dollars \$(873)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	1,459
Program Decrease							-	-	(873)
Total Request	-	-	1,450	-	-	1,459	-	-	586

Description of Item

The Executive Correspondence Tracking (ECT) system provides Department-wide correspondence tracking in order to provide timely and consistent responses to the Congress, White House, Office of Management and Budget, Office of the Inspector General, General Accountability Office, and constituents.

The DHS Hosting operations and maintenance provide Department-wide and Headquarters support for SharePoint application requests, hosted data storage, and application authentication (App Auth) to ensure efficient, effective, and economical management of hosted applications, services, and capabilities.

Justification

The elimination of ECT (\$110 thousand) and DHS hosting (\$763 thousand) funding totals \$873 thousand for FY 2015. The loss of funds for the ECT funding will eliminate planned system upgrades and reduce contract support for that system. Although core operations will not be impacted, potential system outages could be lengthened due to less system support.

The reduction of O&M funds for DHS Hosting for FY 2015 may result in delayed responses for SharePoint requests, reduction in timely responses to customers for hosting requirements, trouble shooting, and meeting mission growth needs. Despite this decrease, available hosting funding will be prioritized to ensure that the most mission critical hosting requirements are met first.

Impact on Performance (Relationship of Increase to Strategic Goals)

Core ECT system capabilities will remain intact despite the reduction in funding and the reductions in DHS hosting will be minimized by careful prioritization of remaining funds.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 2: Contractor Support for COOP and Telecommunications for the DHS Secretary (S&E)
PPA: Salaries and Expenses
Program Decrease: Positions 0, FTE 0, Dollars \$(129)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	3,251
Program Decrease							-	-	(129)
Total Request	-	-	3,231	-	-	3,251	-	-	3,122

Description of Item

In accordance with Presidential Decision Directive 67, Federal Continuity Directive 1 (FCD1) and Homeland Security Presidential Directive (HSPD)-20: National Continuity Policy, Federal agencies are mandated to maintain a comprehensive continuity program. The OCIO continuity program supports continuity planning and operations that directly support the Under Secretary for Management directorate. The continuity program facilitates the performance of, and is crucial to, the business continuity of the Department's critical systems and ensures that critical systems function during an emergency or any other situation that may disrupt normal operation. The OCIO Continuity of Operations (COOP) program provides daily operations, COOP planning, and provides alternate sites with necessary IT communications capabilities to support emergency operations during periods of activation by the President or the DHS Secretary.

Justification

The Executive Telecom Services (ETS) facilitate secure and non-secure voice and video telecommunications for the DHS Secretary, the Deputy Secretary, and other designated DHS executive staff while travelling outside the National Capital Region. ETS also provides for secure and non-secure voice connectivity for the Secretary's and Deputy Secretary's official government-owned vehicles as well as their residences and the residences of their Chiefs of Staff.

Impact on Performance (Relationship of Increase to Strategic Goals)

Although this decrease will reduce contractor support provided by OCIO for emergency IT communications and may delay planned upgrades to equipment at the alternate COOP facility, resources will be carefully prioritized to minimize impact.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO) and Department-wide IT:
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 3: Information Technology Governance and Oversight (ITS)
PPA: Information Technology Services
Program Decrease: Positions 0, FTE 0, Dollars \$(2,280)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	28,693
Program Decrease							-	-	(2,280)
Total Request	-	-	30,396	-	-	28,693	-	-	26,413

Description of Item

IT governance is the cornerstone of offerings from the Information Technology Services PPA. Most of the program offices within the OCIO provide IT governance to other lines of business and across DHS Components. Governance is important to maintain compliance, issue policies, and ensure consistency of performance across DHS IT programs. IT governance takes several forms whether it is through Centers of Excellence (COEs), TechStats, program and portfolio reviews, enterprise segment architecture, geospatial requirements and services, or data tagging and aggregation, all of which will be reduced due to this program change.

Justification

The impacted offices within OCIO that perform IT Governance and Oversight include:

The Enterprise Business Management Office (EBMO), which provides Departmental IT strategic planning, enterprise architecture, IT performance measurement, IT resource management and analysis, enterprise portfolio governance, IT program governance oversight, IT acquisition review assistance, IT policy and compliance, and IT Requirements Engineering Center of Excellence support services.

The Information Sharing Environment Office (ISEO), which houses the Geospatial Concept of Operations (GeoCONOPS) program, facilitates IT governance of investments supporting the DHS Common Operating Picture (COP) and situational awareness capabilities for the Homeland Security Enterprise. This oversight ensures re-use of geospatial applications, data, services, and tools to increase mission effectiveness and efficiency. Two initiatives currently underway, per the White House, are data tagging and data aggregation.

The Office of Accessible Systems & Technology (OAST), which ensures that electronic and information technology (EIT) procured, developed, maintained, or used is accessible to DHS employees and customers with disabilities through a range of governance, policy, training, technical assistance, and compliance activities.

Impact on Performance (Relationship of Increase to Strategic Goals)

A reduction of \$900 thousand would reduce support for the Enterprise Architecture Center of Excellence (EA-COE), which supports program managers and Component EA organizations in the design, approval and implementation of appropriate business and technology EA throughout the Department. The EA-COE also supports the development of segment architectures to document the “as-is” state, the “target” state, and transition activities to support movement from as-is to target. In addition, the reduction may impact the compliance with GAO and OMB mandated activities associated with assessing and improving EA maturity.

A reduction of \$1 million to the Geospatial Management Office means that DHS operations will have less ability to manage COP investments and define critical technology requirements for National Operations, reduced ability to define and access mission critical datasets in a geospatial format to inform Homeland Security decision-makers, and less capacity to support information flows, situational reporting, and fusion of data into the DHS COP.

A reduction of \$281 thousand to ISEO will impact data-tagging and data- aggregation efforts, potentially impacting the Department's ability to rapidly present the information it contains on a person of interest across all its data holdings.

A reduction to the OAST budget of \$96 thousand will decrease program support and lessen the number of Section 508-related IT Program Reviews and Section 508-related IT Application Tests/Evaluations it will be able to conduct per year.

Despite these reductions, programs will be carefully managed to ensure based resources are effectively prioritized to minimize programmatic impacts wherever possible.

Total Request	-	-	52,974	-	-	35,595	-	-	30,035

Description of Item

The Information Security & Infrastructure (ISI) program funds Enterprise Projects Program/Performance Management. This contractor support is responsible for governance, financial, performance, and procurement support necessary to help mature the organization, policies, and procedures to better govern and competitively acquire enterprise network services (e.g., OneNet, IPv6, wireless/mobility, Quality of Service, Voice Over IP (VoIP), universal communication (UC), survivability, and data centers). The contractors also provide technical advice, guidance, and subject matter expertise in support of IT Infrastructure engineering technical reviews (e.g., IT Acquisition Reviews (ITAR)) as required. Program/Performance Management includes tasks such as:

- Providing independent technical analysis of current and planned acquisitions in alignment with the Information Technology Services Office (ITSO) provided review schedules.
- Providing technical advice, guidance, and subject matter expertise in support of the DHS HQ OneNet program office and associated network engineering efforts as required.
- Providing independent assessments and related special studies on an as-needed, short-deadline basis.

Justification

The business decision to reduce contractor support, rather than IT infrastructure is driven primarily by operational requirements driven by OCIO's service level agreements (SLAs) with its clients/Components.

Impact on Performance (Relationship of Increase to Strategic Goals)

This reduction to ISI activities would result in less contractor support in the areas mentioned above, and impact ITSO capability to perform independent technical analyses and assessments of network

services provided by DHS. It will also impact ITSO's ability to evaluate service quality and level of performance (e.g., tracking of current Service Level Agreements and the development of new performance measures), alignment to customer requirements (business, functional, and operational), adherence to performance and security standards and the Enterprise Architecture, and use of best industry practices and innovation. The affected activities include:

- Assessment of IT policies and procedures as they relate to DHS and CIO policies and procedures and industry best practices.
- Systems engineering assessments of current and future network services options to be offered DHS-wide in order to support DHS missions, highlighting seams and integration points for current, future, and legacy systems and contract vehicles (to include DHS Next Generation Information Technology (NGIT)).
- Technical and engineering support and recommendations for future IT infrastructure evolution and technical improvements. Continued Coordination and execution of the DHS mobility research lab (e.g., wide area networking, QoS, IPv6, wireless, 4G LTE, mobility lab capabilities, data centers).

Although the proposed reduction will impact DHS governance priorities, every effort will be made to efficiently use remaining resources to maintain robust oversight and governance of DHS IT programs.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

*For necessary expenses of the Office of the Chief Information Officer, as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113), and Department-wide technology investments [\$299,216,000], **\$256,343,000** of which [\$115,000,000] **\$95,444,000** shall be available for salaries and expenses; and of which [\$184,356,000] **\$160,899,000** to remain available until September 30, 2016, shall be available for development and acquisition of information technology equipment, software, services, and related activities for the Department of Homeland Security.*

Language Provision	Explanation
<i>[\$299,216,000], \$256,343,000 [\$115,000,000] \$95,444,000 [\$184,356,000] \$160,899,000</i>	Dollar changes only.

Salaries and Expenses Mission Statement

The Salaries and Expenses (S&E) PPA is a crosscutting program that provides technology-management, shared services, acquisition strategy, executive leadership support, process development, and business transformation to several offices within the DHS Office of the CIO.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	38,725	38,107	41,968	3,861
11.3 Other than Full-Time Permanent	248	200	200	-
11.5 Other Personnel Compensation	485	400	400	-
11.8 Special Personal Services Payments	183	183	183	-
12.1 Civilian Personnel Benefits	9,681	8,169	10,292	2,123
Total, Salaries & Benefits	49,322	47,059	53,043	5,984

The net \$5,984,000 increase is partially due to the rightsizing of personnel compensation, an increase for retirement contributions, the 2014 pay raise annualization, and the 2015 payraise.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$267	\$242	\$175	(\$67)

OCIO's request includes a savings of \$67,000 in travel which will be realized by reducing travel to conference and non-local training, combining site visits, and increasing the use of technology such as video conferencing. OCIO has exceeded the mandatory 30% travel reduction from their FY 2010 levels.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$7,278	\$10,939	\$7,238	(\$3,701)

GSA rent includes all payments to General Services Administration (GSA) for rental space and rent related services. Rent decreased by \$3,701,000 due to a review of the DHS rent program.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$1,108	\$1,138	\$1,009	(\$129)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The \$129,000 decrease is due to a reduction in upgrades planned for the Secretary's telecommunications at the continuity of operations (COOP) site.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
24.0 Printing and Reproduction	\$76	\$76	\$77	\$1

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The \$1,000 increase in printing is due to inflation.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$18,273	\$15,221	\$6,111	(\$9,110)

Advisory and Assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local government, tribes, etc. as well as from other units within the Federal Government). The \$9,110,000 decrease to advisory and assistance services is due to realignment of the Applications Operations and Maintenance,

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
--	----------------------------	--------------------	--------------------	------------------------------

Information Security Program, and Infrastructure Transformation Program from the Salaries & Expenses PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$24,800	\$27,918	\$26,124	(\$1,794)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The \$1,794,000 decrease is due to a lower projected FY 2015 Working Capital Fund (WCF) bill. This also includes the \$313,000 decrease to WCF contributions due to a deep dive into consumption-based billings such as wireless services, second laptops, and licenses.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.4 Operation and Maintenance of Facilities	\$4,415	\$4,180	\$485	(\$3,695)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The \$3,695,000 decrease to advisory and assistance services is due to realignment of the Applications Operations and Maintenance, Information Security Program, and Infrastructure Transformation Program from the Salaries & Expenses PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$6,491	\$6,017	\$873	(\$5,144)

Operation and maintenance of equipment includes costs for operation, maintenance, repair and storage of equipment, when done by contract with the private sector or another Federal Government account. The \$5,144,000 decrease in operation and maintenance of equipment is due to realignment of the Applications Operations and Maintenance, Information Security Program, and Infrastructure Transformation Program from the Salaries & Expenses PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.8 Subsistence & Support of Persons	\$1,735	\$1,405	\$0	(\$1,405)

Subsistence and support of persons includes a \$1,405,000 decrease due to realignment of the Applications Operations and Maintenance, Information Security Program, and Infrastructure Transformation Program from the Salaries & Expenses PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$701	\$771	\$275	(\$496)

The \$496,000 decrease in supplies and materials is due to realignment of the Applications Operations and Maintenance, Information Security Program, and Infrastructure Transformation Program from the Salaries & Expenses PPA.

Information Technology Services Mission Statement

The IT Services PPA supports development, implementation, and maintenance of: a comprehensive and integrated Enterprise Architecture, the information technology framework for the Department; IT program and portfolio governance; geospatial technologies; and information sharing.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$22,396	\$31,316	\$21,945	(\$9,371)

The \$9,371,000 decrease to advisory and assistance services is due to the obligation of prior year carryover, totaling \$9,207,627, in FY 2014 and a reduction in funding for GeoCONOPs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.4 Operation and Maintenance of Facilities	\$0	\$2,428	\$6,303	\$3,875

The increase of \$3,875,000 is due to realignment of the Applications Operations and Maintenance program from the S&E PPA.

Infrastructure and Security Activities Mission Statement

Infrastructure and Security Activities (ISA) are a set of IT projects that provides integration and protection of sensitive DHS information. ISA funds manage infrastructure support, which includes support for network and data center services and DHS Component enterprise applications, and also provides funds to maintain Trusted Internet Connection (TIC) capability and move all network traffic behind the TIC. It also provides funding for the Information Security Program.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$15,831	\$18,289	\$20,417	\$2,128

The increase of \$2,128,000 is due to the realignment of the Information Security Program and the Infrastructure Transformation Program from the S&E PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$91,010	\$75,152	\$30,737	(\$44,415)

The \$44,415,000 decrease is due to the FY 2014 obligation of prior year carryover (\$6,241,417), the removal of DCM (\$42,200,000) and the realignment of the Infrastructure Transformation Program from the S&E PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change

Homeland Secure Data Network Mission Statement

The Homeland Secure Data Network (HSDN) PPA contains funding for a classified wide area network for DHS and its components, with specific and controlled interconnections to the intelligence community and federal law enforcement resources. Program funding for sharing and safeguarding classified information is also included.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$0	\$25	\$15	(\$10)

The FY 2015 submission includes a \$10,000 decrease in travel.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$3,139	\$27,697	\$26,490	(\$1,207)

The \$1,207,000 decrease is partially due to a reduction in contractor support for the Sharing and Safeguarding Classified Information effort as most of the FY 2015 effort will be towards Operations and Maintenance.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$35,300	\$36,325	\$40,212	\$3,887

Operation and maintenance of equipment includes costs for operation, maintenance, repair and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2015 submission reflects a increase of \$3,887,000 largely due to the requested funding for Sharing and Safeguarding Classified Information.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$2,722	\$6,915	\$3,415	(\$3,500)

The \$3,500,000 decrease is due to a reduction in equipment for the Sharing and Safeguarding Classified Information effort as most of the FY 2015 effort will be towards Operations and Maintenance.

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations DHS Headquarters Consolidation Project

I. Appropriation Overview

A. Mission Statement:

The focus of the DHS Headquarters (HQ) Consolidation Project is the co-location of the Department through lease consolidation and build out of the St. Elizabeths campus. The DHS HQ Consolidation Project will enhance effectiveness by consolidation of HQ and Component executive leadership, operations coordination, policy and program management, and “mission execution” personnel who require a secure setting. DHS will optimize the real estate portfolio by increasing utilization efficiency integrating mobile workplace strategies.

The Management Directorate provides coordination, planning, policy, guidance, operational oversight, and innovative solutions for the management needs of the Department for the consolidated campus. The DHS HQ Consolidation Project appropriation allows the Department to provide overall management of the program.

B. Budget Activities:

The DHS HQ facilities portfolio is currently dispersed in over fifty locations throughout the National Capital Region, many with sub-optimal security protections. The Department will continue the development of the DHS Headquarters Consolidation at the St. Elizabeths Campus in a secure setting. The collocation of the Secretary’s Headquarters with Component Leadership will enhance command and control functions in the preparation for the response to natural disasters and terrorist attacks. This integrated approach will allow DHS to effectively communicate and engage in critical events as they occur and share such information to help secure America.

C. Budget Request Summary:

The Under Secretary for Management requests 0 positions, 0 FTE, and \$73.0 million for FY 2015. The FY 2015 request includes the following projects:

- St. Elizabeths construction costs for the Center Building (0 positions, 0 FTE, and \$57.7 million).
- St. Elizabeths campus operational support costs including rent, campus security guard force and Information Technology (IT) equipment Operations and Maintenance (O&M) (0 positions, 0 FTE, and \$15.3 million).

2015 Total Request	-	-	15,300
Total Change 2014 to 2015	-	-	15,300

The HQ Consolidation effort requests 0 FTP, 0 FTE and \$15.3 million in FY 2015 for St. Elizabeths campus support costs to include security and operational support costs.

Program Change:

- Increase of \$15.3 million for St. Elizabeths campus support costs

CURRENT SERVICES PROGRAM DESCRIPTION:

On August 5, 2013 the United States Coast Guard (USCG) began occupying the St. Elizabeths campus. The St. Elizabeths campus requires the continued services of a campus security guard force as well as funding for rent associated with the operation and maintenance of dedicated security IT equipment. The campus is designed to provide for the detection and deterrence of unlawful intrusion and for the protection of personnel, property, and information. In addition the campus requests these services to ensure the Level 5 security designation is maintained and provides for the proper security of personnel, property, and information. Through this funding, the St. Elizabeths campus will acquire certified contractor support to maintain systems operations, provide operational software licenses, parts to replace damaged or worn equipment, trouble call reporting, and response for critical system failures.

**Department of Homeland Security
Departmental Management and Operations
DHS Headquarters Consolidation Project

2015 Program Change	-	-	57,700
2015 Total Request	-	-	57,700
Total Change 2014 to 2015	-	-	22,700

The HQ Consolidation effort requests 0 FTP, 0 FTE and \$57.7 million in FY 2015 for St. Elizabeths campus construction.

Adjustments to Base:

- Decrease of \$35 million non-recur for St. Elizabeths construction costs

Program Change:

- Increase of \$57.7 million for St. Elizabeths construction costs

CURRENT SERVICES PROGRAM DESCRIPTION: The DHS mission is to lead a unified national effort to secure America. Yet the Department's legacy facilities are currently dispersed in over fifty locations throughout the National Capital Region (NCR), adversely impacting critical communication and coordination across DHS Components. To support the incident management and command-and-control requirements of the DHS mission, the Department will continue development of the DHS Consolidated Headquarters at St. Elizabeths Campus in a secure setting. Consolidation will allow the strategic realignment of the real property portfolio in the NCR to more effectively and efficiently support the DHS mission. In addition, consolidation will contribute to reduced facility costs and provide quality workspace to attract and retain the best professional workforce. Critical Phase 1 requirements for USCG FY 2013 occupancy have been completed. Phased relocation of USCG Headquarters commenced on August 5, 2013 and the move was completed November 2013.

The FY 2014 Omnibus Appropriation provided partial funding for the tenant requirements for the Center Building Complex, to include the physical construction of the tenant areas in the Center

Building portion only of the Center Building Complex. This request completes the IT infrastructure, IT equipment, outfitting, commissioning, decommissioning and move costs for the Center Building and the attached surrounding buildings comprising the Center Building Complex.

MAJOR ACQUISITION

The DHS HQ Consolidation Project-St. Elizabeths is designed to directly support the Department's strategic goal to Strengthen and Unify DHS Operations and Management. Continued development of the DHS Consolidated Headquarters at St. Elizabeths will allow the Department to enhance performance through improved communications, coordination and cooperation across all DHS Headquarters units. Consolidating will foster a "one-DHS" culture and optimize our prevention and response capabilities across the spectrum of operations. The DHS mission is to lead a unified national effort to secure America. Our mission demands an integrated approach to all hazards. Yet the Department's legacy facilities are dispersed over approximately 50 locations throughout the National Capital Region (NCR), sometimes with sub-optimal security protections and routinely impacting adversely critical communication, coordination, and cooperation across DHS components. To support the incident management and command-and-control requirements of our mission, the Department will continue development of the DHS Consolidated Headquarters at St. Elizabeths Campus to house executive leadership, operations coordination, policy and program management functions in a secure setting. Consolidation will allow the strategic realignment of the portfolio to more effectively and efficiently support the mission as organizations mature and new program requirements develop. In addition, consolidation will contribute to reduced facility costs, provide quality work space and other amenities to attract and retain the best professional workforce.

FY 2013 Activity Funding (\$ in thousands)	FY 2014 Activity Funding (\$ in thousands)	FY 2015 Activity Request (\$ in thousands)
\$27,514	\$35,000	\$57,700

FY 2015 Funding Breakout:

Program Area (\$ in thousands)	Sub-Program	Mission Need
Construction (\$57,700)	Phase 2A	GSA fee for oversight of the construction of tenant improvements in the base building (Management & Inspection) and Reimbursable Work Authorization (RWA)
		Furniture, fixtures and equipment for DHS occupancy in the Center Building Complex
		DHS-responsible costs for construction of improvements in the tenant areas in the remaining portions of the Center Building Complex.
		TIP costs design, implement, and test the IT and security infrastructure and equipment for the Center Building Complex.
		DHS-responsible costs for commissioning activities to support tenant spaces and move planning/execution for the Center Building Complex.

IV. Program Justification Changes

**Department of Homeland Security
Departmental Management and Operations
DHS Headquarters Consolidation Project
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: St. Elizabeths Construction
PPA: HQ Consolidation - St. Elizabeths

Program Increase: Positions 0, FTE 0, Dollars \$57,700

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	57,700
Total Request	-	-	27,514	-	-	35,000	-	-	57,700

Description of Item:

The FY 2015 request continues the St. Elizabeths development with the remaining funding required to complete the renovation of the Center Building Complex to house the Secretary's Office and key headquarters functions for command/control and daily operations of the department. The FY 2014 Omnibus Appropriation partially funded the tenant requirements for the Center Building Complex, to include the physical construction of the tenant areas in the Center Building portion. This request completes the IT infrastructure, IT equipment, outfitting, commissioning, decommissioning and move costs for the Center Building and the attached surrounding buildings comprising the Center Building Complex. Combined with the funding provided in 2014, the budget request represents a complete severable segment that can be completed and occupied without additional resources. It should be noted that the Center Building Complex renovation does not accommodate the entire DHS Headquarters facility needs currently housed at the Nebraska Avenue Complex. Future year requests will continue the build-out in similar sized severable segments.

Justification:

The DHS Headquarters facilities portfolio is scattered in over 50 locations throughout the National Capital Region, many with sub-optimal security protections. With the U.S. Coast Guard Headquarters complete and the FY 2014 Omnibus Appropriation provided to start the

Center Building Complex, it is critical the Department continue the development of the DHS Headquarters Consolidation at the St. Elizabeths Campus to complete and occupy these facilities. The collocation of the Secretary's Headquarters with Components will enhance command and control functions in the preparation for the response to natural disasters and terrorist attacks. This integrated approach will allow DHS to effectively communicate and engage in critical events as they occur and share such information to help secure America.

Impact:

This project directly supports the Department's Strategic Plan goal to Strengthen and Unify DHS Operations and Management. Continued development of the Consolidated DHS Headquarters campus at St. Elizabeths is vital to enhance command, control, planning and response to functions of the Department

Total Request	-	-	-	-	-	-	-	-	15,300

Description of Item:

The USCG Headquarters and the USCG Command (Operations) Center relocated to the St. Elizabeths campus in August 2013. Starting in FY 2014, the Department will fund operational support costs for rent within the Department Operations Center (DOC), a facility for security services and technology integration operations, as well as a security guard force service required to support the USCG at the St. Elizabeths campus. Funding was provided to the USCG for these costs in the FY 2014 Omnibus Appropriation. DHS is requesting that this funding be moved back into the DHS HQ Consolidation appropriation as it relates to the costs incurred by the DHS consolidation.

Justification:

The St. Elizabeths campus must maintain an Interagency Security Committee (ISC) standard for a Level 5 secure facility to support USCG Headquarters operations. The physical security concept of operations includes a layered defense strategy with a centrally managed security operations for efficiency and seamless integration of physical security between the USCG operational perimeter and the portions of the campus under current and future development. Rent costs for security operations and guard force support costs are required to manage the ISC Level 5 security program across the campus.

The Technology Integration Program (TIP) for the St. Elizabeths campus is designed to provide information technology enterprise architecture across the campus to support all of the components on a common framework or backbone. Integration of the USCG Dot Mil network with the DHS Dot Gov network requires careful and continued oversight and management to assure 24/7 availability of the networks to support operations. Funding for rent costs for an onsite IT Operations Center for campus enterprise management is essential to assure the availability of IT systems on a continuous basis and critical to support USCG Headquarters operations.

Impact on Performance:

The continued development of a consolidated DHS Headquarters campus at St. Elizabeths supports the goal to strengthen and mature DHS. By establishing and funding a new PPA for operational costs within the HQ Consolidation appropriation DHS will be able to streamline the management of operations for future occupants of St. Elizabeths.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses to plan, acquire, construct, renovate, remediate, equip, furnish, and occupy buildings and facilities for the consolidation of department headquarters at St. Elizabeths and associated mission consolidation, and to fund operational costs within the St Elizabeths Operations Center, \$73,000,000 to remain available until expended.

St. Elizabeths Support Costs Mission Statement

The purpose of the St. Elizabeths program is to consolidate the majority of the Department into a single site campus to effectively and efficiently support the Department's mission. The St. Elizabeths support costs allow the Department the required resources to manage these vital functions to support Component occupancy.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$0	\$0	\$3,515	\$3,515

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2015 request of \$3,515,000 is in support of the Office of the Chief Security Officer and Office of the Chief Information Officer space requirements. These costs were funded under the U.S. Coast Guard budget in FY 2014.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$0	\$0	\$11,785	\$11,785

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2015 request of \$11,785,000 is in support of the Office of the Chief Security Officer and the Office of the Chief Information Officer support of the U.S. Coast Guard occupation of the St. Elizabeths campus. These costs were covered in the U.S Coast Guard funds in FY 2014.

BUDGET REQUEST AND SUPPORTING INFORMATION

Working Capital Fund

I. Appropriation Overview

A. Mission Statement:

The Working Capital Fund's (WCF) mission is to deliver cost-effective support services throughout DHS. The goal of the Under Secretary for Management (USM) is to maintain and operate a fund that promotes economy, efficiency, accountability, and to apply best practices from the public and private sectors for improving organizational performance, operational efficiencies, and ensure full cost recovery of goods and services for selected DHS costs associated with agency-wide programs, activities, and services.

The WCF provides a mechanism for Enterprise-wide services to be allocated and recouped from the consuming Component. The WCF facilitates the delivery and oversight of these services and supports selected services, activities, and programs that benefit numerous DHS organizational Components.

The WCF is continually evaluating its programs and operations with the goal of achieving across-the-board economies of scale that result in increased efficiencies and cost savings by the Working Capital Fund Governance Board (WCFGB). The WCFGB sets policy, evaluates program requirements, and tracks performance outcomes for all existing and new WCF activities. The WCFGB is comprised of six permanent Deputy Chief Executive Officers (CXOs) and seven revolving Component representatives.

B. Budget Activities:

The key WCF activities are organized under the four active PPA categories listed below.

Fee for Service Activities

The largest PPA of the four PPAs, the Fee for Service activity includes 27 separate activities, which provide or coordinate delivery of a specific service or benefit to DHS Components. The benefit/cost for providing the WCF activity is tangible and is directly linked to a Component's use of services or products. These WCF activities are reimbursed for the provision of services, and have characteristics typical of a business enterprise. The costs for operating the "business" are reimbursed by billing customers for the provision of goods and services at rates that are briefed and approved by the WCFGB. Each fee for service activity is expected to recover its operational expenses, usually at a much lower cost, as the Components benefit from economies of scale. Examples include: GSA rent and real estate services, IT and telecommunication services, human resource services, procurement operations, and financial management services.

Government-wide Mandated Activities

Government-wide Mandated Activities include 14 activities which are Administration-sponsored initiatives managed by a designated Federal department to improve overall government performance. Customers are assessed for the cost of supporting the activity. The activities should also provide a direct benefit to participating Components. Examples include government-wide e-Government initiatives and the OMB-sponsored Interagency Councils such as Human Resources Line of Business, Financial Management Line of Business, and e-Gov Benefits.

DHS Crosscutting Activities

DHS crosscutting activities are Department-wide programs managed by a single office that yield some benefit to all DHS Components. Customers are assessed for the cost of supporting the activity. There are 3 activities within this PPA including Strategic Sourcing, Capital Planning and Investment Control, and CPO Shared Reporting. The actual costs of these programs are recouped by redistributing the costs to the Components based on their share of the discretionary budget, staffing or some other fair and equitable pro-rata basis.

WCF Management Activity

The WCF Management Activity is provides WCF operations and includes funding for the staff that develops WCF policies and procedures, formulates and executes the WCF budget, and facilitates dispute resolution of issues between service providers and customers.

C. Budget Request Summary:

The DHS WCF operating requirements for FY 2015 are estimated at \$690.7 million in reimbursable authority and 529 FTE. This is a net change of \$115 million and 1 FTE compared to the FY 2014 Enacted. This net change includes:

Adjustments to Base:

- \$42.2 million to non-recur reduction for Enterprise Data Center Migration,
- Increase of \$.5 million for FY 2015 Pay Raise
- Increase of \$.2 million for annualization of FY 2014 Pay Raise
- Decrease of \$27.4 in efficiencies

Program Changes:

- An increase of \$.05 million for the addition of Performance Management Line of Business (PMLoB), and
- An increase of \$18 million for the addition of CLAN Operations (previously reported within the NCRIO activity) and a corresponding decrease to the NCRIO activity
- Decrease of \$4.9 million for Shuttle Services due to the elimination of Shuttle routes for FEMA, USCG, and TSA,
- Decrease of \$35.2 million for NCRIO IT services not required for the Federal Protective Service (FPS) and USCG at St. Es
- Decrease of \$5.9 million in GSA Rent related activities,

- Decrease of \$0.4 million for the removal of Environmental Planning & Historic Preservation Decision Support System,

The WCF will continue all services and activities from the FY 2014 Enacted with the exception of Enterprise Data Center Operations and Maintenance O&M and Environmental Planning & Historic Preservation Decision Support System. The total decrease of \$115.3 million from FY 2014 to FY 2015 includes a decrease of \$102.8 million for Fee for Service Activities, \$11.8 million for Government-wide Mandated Activities, \$.7 million for DHS Crosscutting Activities, and \$.05 million for Working Capital Fund Operations.

III. Current Services Program Description by PPA

Department of Homeland Security
Working Capital Fund
Fee for Service Activity
Program Performance Justification
(Dollars in Thousands)

PPA: Fee for Service Activity

	Perm. Pos	FTE	Amount
2013 Revised Enacted	498	498	555,488
2014 Enacted	508	508	758,692
2015 Adjustments-to-Base	7	7	(56,264)
2015 Current Services	515	515	702,428
2015 Program Change	(1)	(1)	(46,522)
2015 Total Request	514	514	655,906
Total Change 2014 to 2015	6	6	(102,786)

The Working Capital Fund requests \$655.9 million and 514 FTE for the Fee for Service activity in FY 2015. This request includes a request to rename The FEDLINK activity to the Research Library & Information Services (RLIS) as the Library of Congress owns the term, the HQ Executive Leadership Development Program (HQ ELDP) activity to HQ Leadership Development Program (HQ LDP) activity as non-executives can take courses, and the transfer of IT services from NCRIO to CLAN Operations. Base adjustments include:

- Increase of \$.5 million for FY 2015 Pay Raise
- Increase of \$.2 million for annualization of FY 2014 Pay Raise
- Decrease of \$42.2 million for non-recur reduction of Enterprise Data Center Migration
- Decrease for efficiencies of \$25.6 million

Program Changes Include:

- Increase of \$10.8 million for the transfer of the e-Training activity from the Government-Wide Mandated Activities PPA to the Fee for Service PPA
- Increase of \$18 million for the addition of the secured IT services for the CLAN Operations activity, which was previously reported under the NCRIO activity
- Decrease of \$18 million for the removal of secured IT services from the NCRIO activity
- Decrease of \$.4 million for the Removal of Environmental Planning & Historic Preservation Decision Support System

- Decrease of \$5.9 million in GSA Rent space requirements for: OPS \$1.4 million, CIO for \$1.8 million, CSO and CRCL for \$.8 million; and a \$1.9 million reduction due to over projections in St. Elizabeth's rent payments
- Decrease of \$21.2 million for NCRIO IT services not required at St. Elizabeth's campus for USCG
- Decrease of \$14 million for NCRIO IT services not required for the Federal Protective Service (FPS)
- Decrease of \$4.9 million for Shuttle Services due to the elimination of Shuttle routes for FEMA, USCG, and TSA

CURRENT SERVICES PROGRAM DESCRIPTION:

GSA Rent – Fee for Service Activity - \$143.9 million

Description of Service: The WCF Rent Activity assists customers with initiating requests for new space and working with the General Services Administration (GSA) to identify, procure, and construct appropriate office space. The WCF Rent Activity also manages space assignments and growth requirements for all existing locations within the DHS National Capital Region (NCR) portfolio, as well as reducing the DHS footprint through consolidation and telework initiatives. Along with space management, the activity is also tasked with fairly allocating the rent costs incurred for each location among the components. Costs include rental payments to GSA, Federal Protective Service (FPS) charges, and funding reimbursable agreements with GSA for overtime utilities. Centrally managing these costs and transactions through the WCF enables the Department to provide greater efficiency to its Components.

Other responsibilities of the WCF Rent Activity include managing and forecasting space and budget requirements and developing Housing Occupancy Plans to maximize the utilization of space. As effective stewards of the GSA Rent Activity, a space/rent Analyst is assigned to each Customer in order to provide and meet all space related requirements, (i.e., reducing and expanding space by identifying personnel counts).

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Pricing Basis: Pricing is based on prior year actuals plus lease escalations between 1.01 and 1.04 for the future years. New locations are based on the Occupancy Agreement amounts and a base security charge of \$.74/sq. ft. plus escalation charges.

Cost Allocation Methodology: Customers are charged on the space they occupy in each building. The square footage is multiplied by the price per rentable square foot cost for each building. The per building rentable square foot price is based on GSA rent and includes FPS charges, overtime utilities, antenna charges, and DHS shared space.

Full Time Equivalent (FTE): This activity requires 5 FTE.

Research Library & Information Services (RLIS) – Fee for Service Activity - \$9.6 million

Description of Service: The FEDLINK activity has been renamed to Research Library & Information Services (RLIS) as the Library of Congress owns the term. The Department of Homeland Security (DHS) Library and Information Services mission is to provide DHS program managers and their end users with timely desktop access to mission critical, authoritative, commercial information content, products and services.

The activity was established in 2004 to implement DHS-wide information assets supporting decision making, enforcement, investigation, and research and academic information gathering activities of the DHS workforce.

The activity collaborates with the Library of Congress (LOC) program through which the LOC shares its expertise in information services and consolidates buying power for Federal agencies.

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: Pricing is based on stakeholders selected subscriptions and a cost proposal received from the vendor, plus 5% inflation charges.

Cost Allocation Methodology: The costing algorithm is based on three differing service types: enterprise-wide availability, account specific availability, and percentage of use.

Enterprise-wide Availability: Services are available enterprise-wide and made available to all DHS personnel as identified by Internet Protocol (IP) authentication. The cost distribution for these services is based on FTE numbers approved by the Office of the Chief Financial Officer. Examples of products provided under the enterprise-wide service plan include subscriptions to Leadership Directories, Newsbank, EBSCO, ASTM, National Fire and Protection Association, and the Oxford English Dictionary.

Account Specific Availability: Services are available based on specific account availability and accessed using vendor provided user names and passwords. The cost for these services is distributed based on the actual cost of the user subscription service including applicable LOC fees. West Government Services is one of the products provided under this type of service plan and only used by certain DHS Components.

Percentage of use: Under this service plan, products and subscriptions can be accessed by all DHS Components using their user names and passwords. The cost for these services is distributed to each component organization based on prior usage percentages related to the annual product cost. Westlaw is one of the products provided under this type of service plan.

Full Time Equivalent (FTE): This activity requires 4 FTE.

Finance & Accounting Shared Services – Fee for Service Activity - \$22.5 million

Description of Service: The Immigration and Customs Enforcement /Office of Financial Management (OFM) provide the following services for its DHS Component customers: Financial Processing,

Financial Analysis & Reporting, Financial Policy and Procedure, Administration, and External Reviews & Inquiries.

- Financial processing activities include: Cash management, Debit voucher processing, Reimbursable & receivables, IPAC & Non-224 (Collection and Disbursement), Obligation Management, Payroll Accounting, PCS Coordination, Government Cards Processing, Invoice Payment, FFMS On-site Support, collections and reimbursable agreements, and budgetary resources.
- Financial statements reporting and issue resolution include General ledger maintenance, DHS & Treasury Financial Reporting, Financial data management, Financial analysis, Audit Support, Trading Partner Reconciliation, and Capitalized Property.
- Financial Policies and Procedures: In conjunction with all involved parties, ICE supports the implementation of any new or modified financial management procedure for processing and reporting financial transactions. In addition, ICE works to establish appropriate policies, procedures, and standards for business process activities.
- Administration (including Customer Service): ICE provides administrative tasks associated with ongoing management and resourcing of financial operations on behalf of the DHS customers. Examples of these activities include Continuity of Operations Planning (COOP), customer outreach and evaluation of services, and financial management group meetings.
- External Reviews and Inquiries: When appropriate, ICE provides responses to financial management and reporting related questions and data requests from external sources including independent auditors, the Inspector General's Office (IG), Government Accountability Office (GAO), and Congressional offices and staff.
- Financial Systems: ICE provides financial system support tasks to include hosting and maintenance of Federal Financial Management System (FFMS); administration of contract for FFMS training; FFMS and E-travel User Access; FFMS and E-travel Help Desk; Support of DHS systems modernization efforts; and system updates and enhancements.

Managing Office: Immigration and Customs Enforcement (ICE)

Pricing Basis: Pricing is based on the actual cost derived from the Customer Billing Model (CBM) of the prior year plus a 2 percent inflation rate or inflation rate guidelines provided by the WCF.

Cost Allocation Methodology: The cost allocation methodology for this activity is based on the historical cost of providing the following seven categories of financial support to each participating component: (1) financial reports, (2) obligations and payment processing, (3) system usage, (4) receipts, (5) payroll, (6) overhead, and (7) travel and cash management services.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Financial Statement Audit – Fee for Service Activity - \$12.9 million

Description of Service: The DHS Office of the Inspector General (OIG) awards a contract to an independent Certified Public Accounting (CPA) firm to perform financial statement audit functions. The costs under the contract include travel and incidental expenses associated with the performance of the audit as permitted by the contract and maintained by the Office of the Inspector General as the Contracting Officer Representative (COR). The award is made under a GSA schedule contract.

The Office of the Chief Financial Officer coordinates and prepares the DHS consolidated financial statements and acts as primary liaison for the auditors. All DHS Departmental CFOs coordinate with the OCFO Director of Financial Management to prepare financial statements and satisfy the audit requirements.

The Office of the Inspector General is the COR for the Financial Statement Audit contract. The OIG provides oversight of the contract auditor and establishes the scope of the work in order to estimate cost information for performing the audit. The cost includes billable hours, travel and incidental expenses associated with the performance of the audit based on the scope of audit work to be performed each year.

Cost Allocation Methodology: The costs are a result of the Independent Auditor's billable hours, travel, and incidental costs associated with the performance of the audit as permitted by the contract maintained by the OIG as the Contracting Officer's Representative (COR). The OIG prepares the scope of work and the audit firm provides their estimate for completing the work. The cost allocation methodology is the estimated auditor's billable hours per Component multiplied by the hourly rate plus travel and incidental costs.

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: Pricing is based on prior year actual audit costs, which is derived by an estimate for the current year's audit contract submitted by the OIG.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Internal Control Audit - Fee for Service Activity - \$1.2 million

Description of Service: The DHS Office of the Inspector General (OIG) awards a contract to an independent Certified Public Accounting (CPA) firm to perform internal control audit functions. The costs include travel and incidental costs associated with the performance of the audit as permitted by the contract and maintained by the Office of the Inspector General as the Contracting Officer's Representative (COR). The award is made under a GSA schedule contract.

The Office of the Chief Financial Officer (OCFO) coordinates the assessment process to support management's assertion on internal controls and in this role acts as primary liaison for the auditors. All DHS Departmental CFOs coordinate with the Director of Financial Management in the preparation of and completion of the independent audit, and the Director of the Risk Management and Assurance

on management's assessment of internal controls.

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: Pricing is based on prior year actual audit costs, which is derived by an estimate for the current year's audit contract submitted by the OIG.

Cost Allocation Methodology: The costs are a result of the Independent Auditor's billable hours, travel, and incidental expenses associated with the performance of the audit as permitted by the contract maintained by the OIG as the Contracting Officer's Representative (COR). The OIG prepares the scope of work and the audit firm provides their estimate for completing the work. The cost allocation methodology is the estimated auditor's billable hours per component multiplied by the hourly rate plus travel and incidental costs.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Financial Management Support (Financial Operations) – Fee for Service Activity - \$3.9 million

Description of Service: Financial Services, within the Office of Financial Operations, is a line of business under the WCF that provides financial management services to the offices within the Office of the Secretary and Executive Management (OSEM), the Under Secretary for Management (USM), the Office of the Chief Financial Officer (OCFO), and the Office of the Chief Information Officer (OCIO). The WCF Financial Operations activity manages the processing of multiple types of financial documents and transactions for its customers as well as Fed Traveler Help Desk Support.

This funding provides the personnel and materials to perform the following activities:

- Procurement requisition operations and management;
- Invoice and Inter-governmental Payment and Collection System (IPAC) operations and management;
- Travel operations support and management;
- Payroll reclassification, reconciliation, and reporting management;
- End of Fiscal Year closeout coordination and support;
- Travel cards operations and management;
- Purchase card operations management; and
- Overall financial management services and oversight.

In addition, the Financial Management Support Activity supports internal control functions for HQ. The internal control function assess entity-level controls and conduct A-123 process assessments of financial reporting processes for General Ledger Management and oversees the reconciliation of the Fund Balance with Treasury for OSEM and USM offices. The internal control function helps the Office of Financial Operations meet the requirements of the Federal Managers' Financial Integrity Act and provide the required annual internal control assurance to the Secretary for Departmental Management offices.

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: Pricing is based on the projected cost of total staff and associated personnel support costs (supplies, travel, training), contract support costs required to maintain current services (based on prior years contract costs), and the projected assessments for shared service costs.

Cost Allocation Methodology: The cost allocation methodology is the percentage of FTEs per office utilizing Financial Management Support multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 32 FTE.

Bankcard Program - Fee for Service Activity- \$.1 million

DHS has selected Customs and Border Protection (CBP) as the servicing agent to provide a centralized invoicing and payment system for components within DHS. CBP has developed and implemented a system that supports the receipt of daily invoices for all of DHS.

This system assures payment of invoices within one business day of receipt, and provides transmission of an electronic file containing transaction data to each component's accounting system.

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: Pricing is based on a Memorandum of Understanding (MOU) between DMO and CBP, the servicing agent, and consists of personnel costs to process daily bankcard transactions.

Cost Allocation Methodology: The cost allocation methodology for this activity is based on an estimate of the time it takes CBP personnel to process daily bills for Components and the number of special reports requested by Components.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Treasury Information Executive Repository (TIER) – Fee for Service Activity - \$.7 million

Description of Service: The DHS CFO's office is responsible for creating the Department-wide financial statements. The Treasury Information Executive Repository (TIER) is the application used by the DHS OCFO to create automated Department-wide financial statements. TIER is critical for monthly, quarterly, and annual reporting requirements, meeting accelerated timeframes for financial statement audit deliverables and producing the Annual Financial Report. DHS's use of TIER has benefited the entire Department by the cost and resource savings involved in being able to produce financial statements in a timely, automated manner.

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: Pricing is based on the IT hosting and software licensing costs, which are set by the Office of the Chief Information Officer (OCIO) and external software vendors. The operations and maintenance support contract is based on an established firm, fixed-price contract with discounted rates.

Cost Allocation Methodology: The cost allocation methodology for this activity is average cost equally distributed to the 15 financial reporting Components.

Full Time Equivalent (FTE): This activity requires 0 FTE.

National Finance Center (NFC) Payroll/Services and Reporting – Fee for Service Activity - \$32.8 million

Description of Service: NFC provides the payroll operational support for the Department. The Department of Agriculture's National Finance Center (NFC) provides Payroll/Personnel services utilizing their legacy mainframe systems (payroll), WebTA (time and attendance) and EmpowHR PeopleSoft application (personnel). In addition, NFC provides Payroll/Personnel policy support and benefits reconciliation, tax reporting, and payroll problem resolution. NFC Payroll/Personnel services billed to DHS components include Earnings and Leave and Personnel Benefits statements, USDA OIG oversight of non-USDA Payroll processing, Payroll Operations branch support, claims, ad-hoc reporting, and debt management. Along with NFC Payroll/Personnel services and EmpowHR hosting, NFC provides hosting services for the WebTA (Time & Attendance) application.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on known requirements/changes for the budgeted FY. For example, the deployment of EmpowHR by FEMA has been built into internal documents for 2-3 years, in addition to changes in other cost categories.

Cost Allocation Methodology: Component's cost allocation methodology is based on cost drivers which include pieces of mail (e.g. leave and earning statements, W2, etc.), checked mailed, average number of employees paid, receivables established, claims processed, CPU minutes, number of manual garnishment accounts and NFC labor cost for the following:

COST AREA

Postage-Earnings and Leave and Personal Benefits
Statements
Treasury FMS Postage Charges for Single Address Checks
USDA OIG Oversight of Non-USDA Payroll Processing
Payroll Operations Branch Support
Tax Reporting
Payroll Policy Support
e-Pay Policy Support
Benefits Reconciliation and Liaison Area
Debt Management
Claims
Payroll Accounting
Certification
Ad-Hoc reporting (based on CPU Minutes used)
Data Center Operations (Other than FOCUS)
Payroll/Personnel Baseline Services

COST DRIVER

Pieces of mail
Checks mailed
Average # of employees paid*
Average # of employees paid*
Average # of employees paid*
Average # of employees paid*
Average # of employees paid*
Average # of employees paid*
Receivables established
Claims processed
Average # of employees paid
Average # of employees paid
CPU Minutes
Average # of employees paid
Average # of employees paid

3rd Party Garnishment Processing

of manual garnishment
accounts & NFC labor cost

** NFC adds together the number of employees paid for each pay period and divides by 26 for an average (which totals the number of pay periods in a year). For any given pay period, the number of active employees may increase or decrease so NFC decided to average the calculation cost.*

Full Time Equivalent (FTE): This activity requires 0 FTE.

HQ Human Capital Services -Fee for Service Activity- \$13.0 million

Description of Service: The HQ Human Capital Services (HCS) activity provides processing of personnel actions, employee labor relations and benefits services to HQ customers only. Examples of other services provided include: staffing and recruitment; position classification/position management; performance management; payroll and personnel action processing; employee and labor relations support; retirements and benefits support; time and attendance support; delegated examining unit (DEU) administration, audits and quality control services; Employee Assistance Program (EAP) services; and new employee and other leadership/supervisory training to support ongoing initiatives.

HCS also provides Executive Resource services which includes a broad range of operational support in assisting HQ offices in recruiting and hiring/on-boarding executives and political appointees. Some of these services consist of continued support and guidance upon entrance on duty; organization and coordination of statutory Executive Resource Boards; and Performance Review Boards to ensure adequate oversight of the Department's executive cadre.

The HQ HCS Team provides coordinated services to all DHS HQ customers, ensures timely and effective recruitment of staff, effectively manages the "on-board" staffing process including security clearances and collaboration with the Personnel Security Office), and supports the efficient facilitation of staff exiting DHS HQ.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on personnel support costs to maintain services in CYBERFEDS, Employee Retirement Services Tool, and USAStaffing systems.

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the percent of each HQ Component's FTE divided by the total number of participating Components' FTE multiplied by the total estimated cost of the activity.

Full Time Equivalent: This activity requires 81 FTE.

Human Capital Business Systems (HCBS) – Fee for Service Activity -\$8.2 million

Description of Service: The mission of the HCBS activity is to maintain and support DHS enterprise-wide human capital business systems and reduce costs by consolidating the number and variety of DHS human capital systems. The systems' capabilities meet the requirements specified by the user-

community and provide services in a timely and cost-effective manner by avoiding considerable duplicative costs if DHS components proceeded independently.

HCBS supports several enterprise-wide systems to include: web-based Time & Attendance; Personnel and Payroll; the Personnel Accountability System; and the Enterprise Integration Environment (EIE) which allows hosting and integration of enterprise application data.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on personnel support costs, and IT licenses.

Cost Allocation Methodology: Costs are based on three billable areas: (1) FTE costs for providing HCBS operational support; (2) operations and maintenance of the HR systems and hosting environment; and (3) estimated costs for operational support and reporting (contract labor hours).

The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's FTE divided by total participating Components' FTE multiplied by the total estimated cost of the activity. Customers will only be billed for the areas for which they receive service.

Full Time Equivalent: This activity requires 21 FTE.

Flexible Spending Accounts (FSA) Administrative Costs – Fee for Service Activity - \$1.3 million

Description of Service: FSAs are employee-funded accounts that are used by the employee account holders to pay for medical expenses and dependent care costs that are not reimbursed by another source. Contributions to the account come from an employee's pre-taxed salary. There is a fee that is charged by the administrator of these accounts. Effective FY 2008, the law requires that an agency pay these fees on behalf of their employees.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on the most recent bill received from OPM with an adjustment for inflation.

Cost Allocation Methodology: The cost allocation methodology is based on components' current year (at the time of planning) participation rates. The costs for this program are based on actual invoices received in October and March of each calendar year. The March bill includes employees of record as of January 1 of the calendar year. The October bill makes an adjustment for all new employees who have entered the program since January 1. The invoice process is managed by ADP Benefits and costs are billed to components based on actual invoices received from the vendor.

Full Time Equivalent (FTE): This activity requires 0 FTE.

DHS Senior Executive Service Candidate Development Program (SES CDP) – Fee for Service Activity - \$.9 million

Description of Service: The DHS Senior Executive Service Candidate Development Program (SES CDP) is a program approved by the Office of Personnel Management (OPM) which permits the certification of the executive qualifications of graduates by the OPM Qualifications Review Board (QRB) and selection for the SES without further competition. The DHS SES CDP serves as a cornerstone for sustaining a corporate leadership identity as directed in the DHS Strategic Plan, contributes to meeting our succession planning goals, and creates a high-quality SES leadership cadre. It is also a critical element in sustaining a “Green” rating on OMB’s Human Capital Scorecard.

The Department is consolidating its multiple Candidate Development Programs and the “One DHS” CDP is the only program offered. Candidates from across the Department are exposed to a core training program and will have the opportunity to participate in mentoring, developmental assignments, and other activities throughout the Department.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on personnel support costs to maintain services and the actual tuition for students.

Cost Allocation Methodology: The costs are allocated based on the percentage of SES slots a Component has relative to the total DHS SES (or SES equivalent) population excluding military.

Full Time Equivalent: This activity requires 4 FTE.

HQ Leadership Development Program (HQ LDP) – Fee for Service Activity - \$.3 million

The HQ Executive Leadership Development Program (HQ ELDP) activity has been renamed to HQ Leadership Development Program (HQ LDP) as non-executives can take both Treasury Executive Institute (TEI) and Federal Executive Institute (FEI) courses while employees aspiring to become executives may not take TEI courses. The purpose of the HQ Leadership Development Program (LDP) is to provide leadership training to leaders at DHS Headquarters who are GS-14s, 15s, or members of the SES and to provide them with executive-level training to close potential competency gaps. A well-executed Executive Leadership Program is a key element in sustaining a leadership community that shares information and implements processes with a common DHS focus. The HQ LDP includes the following programs:

- The Treasury Executive Institute (TEI) – TEI provides continuous learning and growth opportunities that meet the learning needs of Department executives, executive development candidates, and senior managers. TEI brings executives to the marketplace of ideas by exposing them to best practices in leadership models, new technologies, and executive competencies. TEI programs have provided both education and knowledge sharing opportunities among executives throughout the government since the creation of the Program in 1983. This Program is offered to DHS HQ Executives, GS-15s and GS-14s (at no additional charge).
- Federal Executive Institute (FEI) - The Leadership for a Democratic Society program, conducted by the Office of Personnel Management's Federal Executive Institute in Charlottesville, Va., helps executives develop broad corporate viewpoints, understand their constitutional roles, enhance essential skills, and improve government. Students link individual

development to improved agency performance. The program addresses the Executive Core Qualifications of leading change, leading people, building coalitions/communication, results driven and business acumen. This program is offered to DHS HQ Executives and GS-15s.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on a firm fixed price contract with the TEI and tuition cost for FEI.

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors: Pro-rata share based on the number of SESs at DHS HQ, (Note - TEI has not increased prices for four years).

Full Time Equivalent (FTE): This activity requires 0 FTE.

CIO/DHS Infrastructure Transformation (ITP) Program – Fee for Service Activity - \$66.2 million

Description of Service: Infrastructure Transformation Program (ITP) is a group of interrelated initiatives designed to improve the Department's IT infrastructure by unifying disparate Component information technology networks, platforms, and services into a set of enterprise-wide IT Services. ITP includes Network Services (OneNet), Email Services (Email as a Service (EaaS), Email Secure Gateway (EMSG), and the Trusted Internet Connection (TIC)/Policy Enforcement Points (PEP).

OneNet is the core unified environment and consolidation of legacy networks into one enterprise-wide, integrated network. OneNet provides the foundation for DHS's Information Sharing Environment (ISE). DHS's unclassified, classified, and secret networks utilize OneNet for information transport. Major services provided under OneNet include:

- DHS Wireless Access Network (WAN) services, including configuration management, engineering, technical requirements analysis and OneNet integration services
- Network and security operations centers - Enterprise Network Operations Center (NOC) and Security Operation Center (SOC)
- Traffic modeling and performance analysis
- Network Management and IP address administration

The OneNet network and security operations centers monitor and manage DHS's centralized systems and network infrastructure. Incident response and detection is coordinated and escalated within the network security and computing service groups, depending on the nature of the breach or failure. The OneNet NOC works with Component NOCs, Enterprise Data Operations Centers, and the Enterprise Operations Center to coordinate service restorations and troubleshooting. DHS is implementing enhancements to OneNet to meet unique Component security requirements and OMB mandates. These enhancements include TIC which includes High Assurance Gateways (HAG) and PEP.

The TIC initiative is the first of the President's Comprehensive National cyber security initiatives (HSPD-12/NSPD-54) and is led by OMB and DHS. The initiative is aimed at optimizing individual agency network services into a common solution for the Federal government. The TIC at the two

enterprise data centers (DC1 and DC2) provides security controls across four services: the Internet; VPN; Extranet; and Application hosting that meets or exceeds Trusted Internet Connection Access Provider (TICAP) standards. The TICs are under the control of the enterprise Security Operations Center (SOC) to ensure that the Department maintains the right balance between Internet access and security protections. Two specific initiatives within the TIC Services include the High Assurance Gateways (HAG) and Reverse Proxy. The HAG protects the user's workstation from any malicious content, as well as attempts to infiltrate the users' system. Reverse Proxy provides secure network connectivity to applications that are not physically co-located with the Trusted Internet Connections at the Department's two Enterprise Data Centers, DC1 and DC2. The HAG provides selected DHS personnel with access to malicious and prohibited websites that would typically introduce risks into the Enterprise. The HAG will allow access to information in a secure virtual environment, protect the user's workstation from any malicious attacks, and provide compensating controls for anonymous Internet site access.

Email Secure Gateway (EMSG) is part of the Department's defense in depth strategy. EMSG augments the security and protection provided by the TIC. The EMSG adds security protections to address malicious code possibly embedded within e-mails and prevents delivery of malicious code and other threats from entering into the DHS network.

PEP serves as the Component's trust zone gateway to the DHS enterprise and external sources, advancing the DHS's goal of unifying and maturing DHS through secure sharing and exchange of information. PEPs are a control point in the DHS network used to enforce policies, and monitor, capture, and playback network traffic. This reduces vulnerability and improves system access and implementation of information sharing policies across the Department through centralized change management.

Email as a Service (EaaS), is a trusted Enterprise email system service with a common address list hosted at the Enterprise Data Centers. EaaS provides additional and comprehensive communication ability across DHS and to external Federal, State, local, tribal, international, and private sector partners. EaaS provides Components access to a common, Sensitive-but-Unclassified email system that includes Enterprise directory services. This system establishes a DHS standard for Components to share calendars and schedule meetings across organizations and delivers centralized access to DHS employee information (e.g., name, email address, phone number, etc.). As a result of this initiative, legacy email systems will be made obsolete, thus reducing overall email support costs, while increasing email efficiencies.

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: Pricing is based on the ITP Network Services using the Independent Government Cost Estimates (IGCEs), Bill of Materials (BOM), and associated staffing required to support the maintenance and evolution of DHS One Net.

Cost Allocation Methodology: The cost of Component contributions is based on a prorated share of the Department's cost for IT Infrastructure Investment. Customer assessments equal the customer prorated share multiplied by total charges.

Full Time Equivalent (FTE): This activity requires 17 FTE.

Major Acquisitions

The Infrastructure Transformation Program (ITP) is a group of interrelated initiatives providing enterprise Information Technology (IT) Services for Network, Data Center, and Email to support the DHS Mission, Goals, and Objectives of strengthening the Homeland Security enterprise; improving cross-departmental management, policy and function integration; and, enhancing and integrating Departmental management functions. ITP is a group of interrelated initiatives designed to improve the DHS' Information Technology infrastructure by unifying individual Component IT networks, platforms and services into a set of Enterprise IT Services. This investment was designed to address issues identified in the following areas: 1) creates a secure, survivable enterprise network with centralized Network Operations Centers (NOC), Security Operations Centers (SOC) and governance, 2) establishes a common, reliable and standardized email communication system which provides a single enterprise Global Address List; and, 3) consolidates 43 primary Component Data Centers into two (2) physically secure, geographically diverse Enterprise Data Centers (EDCs). The two (2) EDCs offer services for: computing, applications, data storage management and disaster recovery.

ITP addresses a capability gap by improving DHS' Information Technology infrastructure by unifying individual Component IT networks, platforms and services into a set of Enterprise IT Services.

The ITP projects WCF activity is proposed to be funded out of a single PPA in FY 2015:

- WCF Fee For Service PPA: \$66.2 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
50,017	69,600	66,158

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Network Services (27,159)	OneNet Operations	The core OneNet infrastructure and the staffing required to support its maintenance and evolution
	NOC	Staffing element that is required to support a 24 x 7 incident management capability
	Program Management Operation Support	Provides contractual support for engineering infrastructure designs of the Network Services
	Policy Enforcement Points (PEP)	PEP are Operations and Maintenance charges
	Federal Labor & Assessments	Provides management, oversight and reporting requirements
Security Operations (38,999)	Security Operations	Supporting functions at DCs, software maintenance charges and Managed Trusted Internet Protocol Service (MTIPS) cost
	SOC	Covers security operations of OneNet.

	Trusted Internet Center (TIC)	TIC are Operations and Maintenance charges
	E-Mail Secure Gateway(EMSG)	EMSG provides the Enterprise foundation for e-mail hygiene across DHS network

Note: The FYSHP and Comprehensive Acquisition Status Report (CASR) include Data Center Migration and other OCIO appropriated funds. Displayed above is only ITP WCF information only.

National Capital Region Infrastructure Operations (NCRIO) – Fee for Service Activity - \$118.1 million

Description of Service: The National Capital Region Infrastructure Operations (NCRIO) serves the DHS Headquarters (HQ), select Department Components, and field offices for:

- Sensitive but Unclassified Network and internet/intranet access;
- Management and delivery of unclassified desktop computing applications, equipment, email, wireless; communications, video (VTC), voice (phone) and messaging;
- Communications security and information technology (IT) operations;
- Disaster planning and mitigation to ensure continuous operations.

The NCRIO manages and maintains all desktop applications for full functionality and continuous availability of unclassified networks, as well as full functionality of file and data storage and retrieval, printing, and remote access. The NCRIO coordinates management and delivery of these services, supports build-out of new facilities, and provides customer service through a 24/7 help desk.

The NCRIO delivers IT services to end users. It does so by subscribing to and integrating enterprise services with locally operated and maintained IT infrastructure. More specifically, the NCRIO subscribes to:

- Data Center hosting where it maintains its own user enclave for LAN A,
- OneNet WAN, TIC and PEP services,
- Enterprise services such as Email as a Service and Public Key Infrastructure.

In the past, the NCRIO has supported the Top Secret/Sensitive Compartmented Information (TS/SCI) “CLAN” network as well. The FY 2015 President’s Budget includes a program change to separate the management of the unclassified and Top Secret LANs, and move responsibility for managing the SCI network to the DHS Office of Intelligence and Analysis, a member of the Intelligence Community, to align management of that network with the oversight of the Director of National Intelligence, who is responsible for oversight of SCI networks as directed in Executive Order 12233 and National Security Directive 42. C-LAN has expanded in size and scope, and will continue to do so as the department consolidates its TS/SCI networks. Splitting the current NCRIO fund into separate WCF activities provides for better cost identification and control in both networks.

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: The budget for this activity is based on the number of users accessing each network and the hardware, software and services needed to support each network's infrastructure, security requirements, end user computing and telecommunications needs. The activity uses independent government cost estimates and industry IT benchmark data to evaluate the level of effort needed to

support each network. Historical actual cost estimates and current negotiated contract rates are also used to develop the annual operations and maintenance cost. Future year cost increases for growth in user base is estimated with historical FTE growth trends.

Cost Allocation Methodology: Costs are allocated among the participating organizational Components based on their total number of accounts on the network as determined by the Global Address List (GAL). For Unclassified Local Area Network (A-LAN), the non-discrete costs are shared across the total number of network accounts, with the Component being charged for their pro-rated share of the total network accounts. A Component's discrete costs; e.g. wireless and circuits, are billed directly to the Component based on their actual consumption of these services

Full Time Equivalent (FTE): This activity requires 71 FTE.

Major Acquisitions

The National Capital Region Infrastructure Operations (NCRIO) program serves the DHS Headquarters (HQ), select Department Components and field offices for network and internet/intranet access; management and delivery of desktop computing applications and equipment, email, wireless communications, video (VTC), voice (phone) and messaging; communications security; IT Security; and IT operations disaster planning and mitigation to ensure continuous operations. The NCRIO manages and maintains the standard DHS HQ enterprise systems and applications for full functionality and direct or remote availability across the Department of Homeland Security's HQ unclassified and classified networks. The NCRIO also provides DHS HQ users with file and data storage and retrieval, printing, and remote network access. The NCRIO coordinates management and delivery of these services and provides customer service through a 24/7 help desk.

The request for this WCF activity is proposed to be funded out of a single PPA in FY 2015:

- WCF Fee For Service: \$118.4 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
128,004	184,776	118,355

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
ALAN Fixed Infrastructure 108,036	IT Operations and Maintenance	Maintain IT Infrastructure for DHS HQ Components.
	End User Devices	Procure and maintain desktops, laptops, tablets, printers, etc.
	Software Operations and Maintenance	Procure and maintain approved software applications.
	Data Center	Provide application hosting, backup, and data recovery.
	LAN, Circuits, Telecommunications	Procure and maintain circuits and equipment required for connectivity to DHS networks and communications systems.
	IT Security	Provide and maintain secure applications and access to systems and data.
	Support Services	Support and resolve issues impacting IT functions and

ALAN Consumption Costs 10,319		capabilities.
	Federal Oversight	Provide oversight and program management for DHS HQ infrastructure operations.
	Cellular Wireless	Supply mobile, secure, voice, and data access for DHS HQ.
	Email as a Service	Provide reliable, cost effective email capability and support.
	Non Standard Software	Procure and maintain Component-specific applications.
	Dedicated Facility	Procure and maintain connectivity to Component-specific sites.

CLAN Operations (previously included with NCRIO) – Fee for Service Activity - \$18.0 million

Description of Service: The proposed CLAN activity would serve Top Secret/ Sensitive Compartmented Information (TS/SCI) Enterprise users at DHS Headquarters (HQ), select Department Major and Sub-Components and field offices for:

- TS/SCI network and internet/intranet access;
- Management and delivery of desktop computing applications, equipment, email, communications, secure video (VTC), voice (phone) and messaging for TS/SCI networks;
- Communications security and information technology (IT) operations; and
- Data Center, Disaster Recovery planning and mitigation to ensure continuous operations.

Under this proposal, the NCRIO will continue to manage and maintain all unclassified desktop applications for full functionality and continuous availability of unclassified networks, as well as full functionality of file and data storage and retrieval, printing, and remote access. The NCRIO coordinates management and delivery of these services, supports build-outs of new facilities, and provides customer service through a 24/7 help desk.

The proposed new activity authority will manage delivery of IT services to TS/SCI end users, subscribing to and integrating enterprise services with a locally operated and maintained IT enterprise infrastructure. More specifically, the CLAN WCF will subscribe to:

- Data Center hosting for CLAN infrastructure, data storage, applications and CORE functions;
- OneNet WAN, TIC and PEP services;
- Enterprise services such as Enterprise Cross Domain Services and Public Key Infrastructure; and
- Provide responsive compliant solutions to OMB and ODNI Information Sharing and Safeguarding (IS&S) directives/policies applicable to TS/SCI networks.

Managing Office: The C-LAN activity will be managed by the DHS Office of Intelligence and Analysis in coordination with CIO.

Pricing Basis: The budget for this activity is based on the number of users accessing each network and the hardware, software and services needed to support each network's infrastructure, security requirements, end user computing and telecommunications needs. The activity uses independent government cost estimates and industry IT benchmark data to evaluate the level of effort needed to support each network. Historical actual cost estimates and current negotiated contract rates are also used to develop the annual operations and maintenance cost. Future year cost increases for growth in user base is estimated with historical FTE growth trends.

Cost Allocation Methodology: Costs are allocated among the participating organizational Components based on their total number of accounts on the Classified network well as the total number of C-LAN devices (C-LAN desktop computers) that their office has. For the Classified Local Area Network (C-LAN), the non-discrete costs are shared across the total number of C-LAN network accounts, with the Component being charged for their pro-rated share of the total accounts. In addition, the costs associated with the C-LAN devices are added to the Component bill. The total costs for devices is shared across all offices that actually possess a C-LAN device.

Full Time Equivalent (FTE): This activity requires 2 FTE.

Enterprise License Agreements (formerly Microsoft) – Fee for Service Activity - \$98.6 million

Description of Service: This service allows Components to leverage DHS buying power by consolidating license requirements into a single enterprise-wide procurement. The activity further helps to decrease costs, reduce paperwork, and save time by eliminating the need for repetitive, individual purchases from vendors. The Department continues to pursue opportunities to benefit from economies of scale, moving from Component or office specific software or hardware licenses to larger enterprise licenses for common services. The four existing WCF ELAs are:

Microsoft: In the spirit of the Federal Acquisition Streamlining Act (FASA), DHS and Dell Marketing, L.P. decided to re-enter into a single Blanket Purchase Agreement (BPA) for a DHS-wide Microsoft Enterprise License Agreement to standardize office automation and communication applications across the Component agencies' existing IT environments. The account provides for the funding and management of the Microsoft Enterprise Agreement, which provides enterprise access to the Microsoft suite of products. The products include the software needed for individual desktops, laptops, and server platforms, such as MS Office, MS Project, MS Visio, MS Advanced Server, etc. This license agreement is utilized by all of DHS and this budget request reflects the contractual obligations of each of the Components.

Adobe: The Adobe BPA provides DHS desktops and servers with the suite of Adobe products, which reduce costs, eliminates inconsistent licensing, takes advantage of economies of scale to ensure the best pricing and streamlines the procedures required to procure all Adobe licenses for the Department. The Adobe BPA includes all Adobe products offered on the Adobe authorized resellers' GSA Schedule, and provides immediate Adobe Acrobat licensing for all DHS Components. This agreement is utilized by all of DHS. The request reflects the contractual obligations of each of the Components.

Oracle: The award of this DHS-wide ELA allows the DHS HQ and its Components to purchase Oracle software licenses, technical support services and training. The Department-wide vehicle not only allows for the timely renewal of software maintenance for the Department's (110,000+) Oracle licenses, but also allows for the purchase of additional software, software licenses, and software-associated products and services by Components when needed (and at greatly reduced prices) between consolidated purchase cycles.

Symantec: DHS negotiated a maintenance-only BPA for Symantec maintenance coverage for all DHS Components. The award of this DHS-wide ELA allows the DHS HQ and its Components to purchase

Symantec software maintenance, technical support services and training all existing maintenance, through co-termination of existing contracts.

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: Pricing is based on a Blanket Purchase Agreement (BPA), which includes maintenance cost on current software, support services, miscellaneous services, and software license agreement renewal.

Cost Allocation Methodology: The Algorithm is Total number of licenses owned x Pre-Negotiated Cost of Licenses + Administrative Costs. DHS Components make annual payments based on base licenses owned at the beginning of the contract. The administrative costs are added on to the base license cost to pay for support for the contract which includes FTE, benefits and WCF assessment charges.

Full Time Equivalent (FTE): This activity requires 3 FTE.

Major Acquisitions

The Enterprise License Agreement (ELA) activity allows Components to consolidate license requirements into a single enterprise-wide procurement to leverage DHS buying power. The activity further helps to decrease cost, reduce paperwork and save time by eliminating the need for repetitive, individual purchases from vendors. The Department continues to pursue opportunities to benefit from economies of scale, moving from Component or office-specific software or hardware licenses to larger enterprise licenses for common services. The four existing ELAs are:

- *Microsoft:* The account provides for the funding and management of the Microsoft Enterprise Agreement, which provides enterprise access to the Microsoft suite of products. The products include the software needed for individual desktops, laptops, and server platforms, and is utilized by all of DHS.
- *Adobe:* The account includes all Adobe products offered on the Adobe authorized resellers' GSA Schedule, and provides immediate Adobe Acrobat licensing for all DHS Components and is utilized by all of DHS.
- *Oracle:* The account allows for the timely renewal of software maintenance for the Department's (110,000+) Oracle licenses, the purchase of additional software, software licenses, and software-associated products and services by Components when needed (and at greatly reduced prices) between consolidated purchase cycles.
- *Symantec:* This account allows the DHS HQ and its Components to purchase Symantec software maintenance, technical support services and training all existing maintenance, through co-termination of existing contracts.

This Enterprise License Agreement WCF activity is proposed to be funded out of a single PPA in FY 2015:

- WCF Fee For Service: \$98.6 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
71,902	98,639	98,645

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Software (98,645)	Operations and Maintenance	This service allows Components to consolidate license requirements into a single enterprise-wide procurement to leverage DHS buying power.

Office of Procurement Operations – Fee for Service Activity - \$43.9 million

Description of Service: *Description of Service:* The DHS Office of Procurement Operations (OPO) provides full service acquisition support to HQ Components. This includes a range of activities from acquisition planning and awarding to contract administration. In addition, OPO provides acquisition management services for Department-wide acquisition initiatives identified by both the Chief Information Officer and the various commodity councils within DHS that promote cost savings and small business participation. OPO also awards and administers grants and cooperative agreements to support major research and development initiatives for DHS. As a business advisor, OPO provides a full spectrum of tools and support to ensure on-time and quality execution of acquisition requirements. OPO's focus is primarily the contracting functions; however, some of the support provided by OPO specializes in other organizational purposes such as small business support, cost and pricing, training support, systems support, workload/procurement metric tracking and business operations.

Managing Office: Office of the Chief Procurement Officer (OCPO)

Pricing Basis: Projected procurement personnel costs for authorized FTE and an average GS level. Estimated shared service costs, based on prior years, are added to the personnel costs.

Cost Allocation Methodology: Pricing is based on projected procurement personnel costs for 250 authorized FTE and an average GS level is used for a basis. Shared service costs are based on prior years, which are added to the personnel costs.

Full Time Equivalent (FTE): This activity requires 246 FTE.

HSPD-12 Infrastructure Support – Fee for Service Activity - \$21.9 million

Description of Service: HSPD-12 Infrastructure Support, through the Identity Management Division (IMD) of the Chief Security Officer, is a central headquarters program that is charged with managing HSPD-12 implementation across DHS through the issuance of a secure and reliable form of identification for its workforce, employees, and contractors located within an estimated 16,000 DHS facilities and sites. The IMD will provide the necessary guidance and tools to facilitate this Department-wide program, creating a unified approach and solution.

The IMD business activity supports DHS with services and technology to establish the DHS HSPD-12 infrastructure and issue credentials in the following areas:

- Identity Management System (IDMS)
- Card Management System (CMS)
- Enrollment and Card Issuance Work Stations (EIWS) including printers and work station consumables
- DHS Personal Identity Verification (PIV) Card Stock including Security Printing and laminate
- Installation and Maintenance of the EIWS
- Hosting, Backup, Disaster Recovery, and Test Environment Server Support
- Certification and Accreditation (C&A) Support
- Operations and Maintenance (O&M) Support including Service Support/Help Desk
- Appointment Scheduling Hosting and Support
- Onsite Training Support
- DHS Authoritative Databases Interface and Support
- Open Interfaces/Modules for HSPD-12/DHS IDMS and CMS
- Public Key Infrastructure (PKI) Certificates

These services have been and are currently provided for all DHS users of the Identity Management System. In addition, the IMD business activity coordinates:

- The card issuance functions at 322 DHS PIV Card Issuance Facilities nationwide
- HSPD-12 technology evaluation for future DHS use
- Continuous project management support for the deployment of EIWS to 4,9 DHS facilities/sites nationwide
- Vendor management and oversight of existing contracts
- Budget and financial management

Managing Office: Office of the Chief Security Officer (OCSO)

Pricing Basis: Pricing is based on the number of active identities in the DHS HSPD-12 Identity Management System (IDMS), which include costs associated with the collection/enrollment/sharing of biographic/biometric information, identity document validations, public key infrastructure (PKI) certificates, and the lifecycle management of DHS Personal Identity Verification (PIV) Cards.

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

1. Number of Federal and Contractor employees within each Component at the beginning of the fiscal year
2. Sum of all costs associated with the DHS PIV Card Program supporting Components
3. Percentage of Component identities compared to the DHS' total identities

Full Time Equivalent (FTE): The activity currently requires 9 FTE.

Major Acquisitions

In August 2004, the President signed HSPD-12 Policy for a Common Identification Standard for Federal Employees and Contractors (the Directive). The Directive requires the development and agency implementation of a mandatory, government-wide standard for secure and reliable forms of identification for Federal employees and contractors. HSPD-12 requires a secure and reliable form of identification that is; a) issued based on sound criteria for verifying an individual employees identity; b) resistant to identify fraud, tampering, counterfeiting, and terrorist exploitation; c) can be rapidly authenticated electronically; and, d) is issued only by providers whose reliability has been established by an official accreditation process. To comply with HSPD-12, DHS has developed an Identity Management System (IDMS) for issuing credentials that meet the requirements in accordance with National Institute of Standards and Technology (NIST) Federal Information Processing Standards 201-1.

This HSPD-12 WCF activity is proposed to be funded out of a single PPA in FY 2015:

- WCF Fee For Service \$21.9 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
23,000	21,915	21,929

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Identity Management System (10,129)	Credential Issuance and Management	Issuing and managing PIV credentials for all DHS employees and contractors
	Management and Tracking of Identity and Attributes	Aggregating, managing and correlating biometric and biographic data from various authoritative data sources
	Personnel vetting	Interfaces with existing processes for personnel vetting and adjudication to support the issuance, management and use of the PIV cards and associated attributes
	Logical and physical access systems	Integrate with the Departments logical and physical access directories; and reduce the transmission and re-keying of (Personally Identifying Information) PII and identity data by interfacing / integrating with authoritative data sources and dependent systems.
	Information discovery and audit	Track the status and disposition of PIV cards from manufacture to destruction; log all access, enforcing role based controls in compliance with FIPS 201 and DHS requirements
	Data Security and Segmentation	Protect all data elements in transit and at rest and support the segmentation of data based on DHS Component and Role
PIV Card Issuer (PCI) Operations (6,800)	PCI Facilities (PCIF) Oversight and Management	Program staff developing policies/procedures, overseeing PCIF sites, PIV equipment for PIV functions involving: (i) enrollment/identity proofing; (ii) card production; (iii) card activation/issuance; or (iv) maintenance.
	Training and Procedures	Program staff developing and providing PCI training for PCIF personnel with PIV responsibilities and functions

	PCI Assessments	Program Staff performing compliance assessments in accordance with requirements of FIPS 201, NIST SPs, Department and other supporting governance to ensure DHS PIV Cards are issued only by providers whose reliability has been established by an official certification and accreditation.
PIV Card Issuance (5,000)	Enrollment and Issuance Workstations (EIWS)	EIWS operations to support card activation, card printing, biometric fingerprint and facial image captures
	Light Activation Stations	Supports self-service PIV card updates, unlocks, and Personal Identification Number (PIN) resets
	Consumables	Provide card stock, security laminate, printer ribbon, badge holders

e-Training – Fee for Service Activity - \$10.8 million

Description of Service: In FY15, the e-Training activity has moved from the Government-Wide Activities PPA to the Fee for Service PPA. e-Training provides an enterprise approach to leveraging technology to support learning and development programs, initiatives, and capabilities. This includes an enterprise architecture approach to modernize and reduce the complexity of DHS Learning Management Systems (LMS); building enhanced capability through tools such as web conferencing; and closing existing and future gaps in structured learning opportunities by providing every DHS employee access to over 3,000 online courses and 12,000 online books. Benefits derived from this activity include:

- Centralized procurement of primary DHS LMS in use, providing greater visibility to CFOs, CIOs, and all DHS management regarding costs;
- Consistent, standardized delivery of all legislatively-mandated training to all DHS employees (and contractors where appropriate), launched IT security courses mapped to the Government Information Security Reform Act (GISRA) and the National Institute of Standards and Technology requirements;
- A 21st Century approach to training in critical areas such as Emergency Medical Technician training by assisting in the coordination of DHS Modeling and Simulation activity in regards to training; and
- Compliance with OPM and OMB requirements for reporting Enterprise Human Resources Integration training data for all DHS Federal civilian employees.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on personnel support costs to maintain services in ETMS, PMO, Plateau, Skillsoft, and EMS Training systems.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Full Time Equivalent (FTE) divided by DHS's total FTE (excluding military) multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 7 FTE.

Mail Services Fee for Service Activity - \$16.6 million

Description of Service: *Description of Service:* The Mail Service operates a Consolidated Remote Delivery Site (CRDS) for receiving, screening, processing, courier servicing, and delivery of safe mail to DHS Headquarters and Component HQ facilities in the National Capital Region (NCR). With the exception of the United States Secret Service (USSS), all DHS Components currently participate in the CRDS mail shared service support activity.

The CRDS currently receives and screens approximately 1.5 million pieces of inbound mail and delivers it to nearly 100 DHS mail delivery locations within the NCR. It processes over 8 million pieces of outbound mail and provides over 6,000 trips of courier services. The CRDS is also supported by an Inter-Agency Agreement with DHS Office of Health Affairs for biological detection services.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Pricing Basis: Pricing is based on current contracts negotiated with the service providers. The cost of mail services contract includes mail chemical, biological, radiological, nuclear and explosive screening, delivery services, onsite customer service, and courier services.

Cost Allocation Methodology: Pricing is based on a pro-rata share of the volume of mail delivered, the number of mail stops that receive mail, the number of locations with mail delivery, onsite customer service support, the number of courier services, and the cost of screening incoming mail for safety and security threats.

Full Time Equivalent (FTE): This activity requires 2 FTE.

Parking Services – Fee for Service Activity - \$1.1 million

Description of Service: The Parking Service is available to eligible DHS HQs employees based on space availability, parking need accessibility under American Disability Act (ADA); employee's position; employee's required work schedules; and funding approval from Office/Directorate. Permit types in order of priority are: Law Enforcement vehicles; official government vehicles (owned, leased, or rented); handicapped employees; executive parking; unusual work hours; and carpool/vanpool. There are currently nine (9) commercial parking garages providing over 275 parking spaces, one government-run parking garage providing 37 parking spaces, and one parking lot of 1,197 spaces

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Pricing Basis: Pricing is based on firm-fixed pricing, which includes garages that are within a 0.25 or 1 block radius from the DHS site. The contract is awarded by the number of unreserved and reserved spaces (handicap parkers only) for each DHS Headquarters organization.

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the number of spaces utilized.

Full Time Equivalent (FTE): This activity requires 1 FTE

Executive Sedan Services – Fee for Service Activity - \$1.7 million

Description of Service: The Executive Sedan Service provides transportation for authorized senior officials who travel between various locations during the course of official Government duties. It allows senior officials to conduct official business while in transit, which may not be possible on Metro or in taxicabs.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Pricing Basis: Pricing is based on the current BPA with selected service providers and vehicle leasing costs, which are in accordance with GSA's annual vehicle cost listings.

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on participant usage.

Full Time Equivalent (FTE): This activity requires 2 FTE

Shuttle Services – Fee for Service Activity - \$1.2 million

Description of Service: The Shuttle Service provides a safe and effective means of transporting employees between DHS buildings throughout the National Capital Region (NCR). The services consist of 6 routes (North, Tenley A/B, Glebe Rd, FEMA, and TSA) and are limited to the conduct of official business.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO).

Pricing Basis: Pricing is based on the negotiated BPA rates that include all personnel, storage, materials, supplies, vehicles (10-61 passenger), equipment, fuel, licenses, permits, authorizations, certifications, insurance, services and maintenance required to perform transportation functions for DHS and its components. Annual cost projections are based on estimated service hours for each route and vehicle type.

Cost Allocation Methodology: Cost allocation methodology is based on passenger capacity and hours of operation. BPA call types will be specified in each individual BPA Call.

Full Time Equivalent (FTE): This activity requires 1 FTE.

Transit Subsidy Services – Fee for Service Activity - \$5.6 million

Description of Service: The Transit Subsidy Program encourages Federal employees to commute to work via public transportation. This program provides a subsidy to all eligible Federal employees who commute to and from work on a regular basis using rapid transit, public or commuter buses, commuter rail, incorporated vanpools, or any combination of the above. This helps reduce petroleum

consumption, traffic congestion, and air pollution by taking vehicles off the road that are otherwise used in daily commuting.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Pricing Basis: Pricing is based on contract negotiations with the Sole Source Contract (The Washington Metropolitan Area Transit Authority - WMATA) and IAA with the Department of Transportation (DOT) service providers.

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on participant usage.

Full Time Equivalent (FTE): This activity requires 2 FTE.

National Defense University – Fee for Service Activity - \$.8 million

Description of Service: DHS faculty at the National Defense University (NDU) design, develop, and lead homeland security-related courses and events. The faculty arrange for an array of expert speakers from various homeland security areas to visit NDU as guest speakers. DHS faculty also lead an array of domestic and international trips and studies related to homeland security missions and concerns. In addition, DHS faculty serves as advisors/mentors to all DHS employees who are enrolled as Master's Degree candidates each year. In exchange, under the terms of a Memorandum of Understanding, DHS is able to select approximately 20 individuals each year to attend a war college. Employees are selected for specific colleges by an independent DHS selection panel that utilizes a matching process based upon the panel's review of the employees' academic qualifications, work experiences, and the needs of the Department.

The five colleges are the College of International Security Affairs (CISA), Industrial College of the Armed Forces (ICAF), Information Resources Management College (iCollege), Joint Forces Staff College (JFSC), and National War College (NWC). NDU has also developed a program at the John F. Kennedy Special Warfare Center and School in Ft. Bragg, NC. The diversity in campuses allows the University to offer a variety of master's degrees, graduate certificates, and continuing education programs. Unlike private colleges and universities these degree and certificate programs can be tailored to address the varied homeland security mission requirements of DHS. The program enhances DHS' strategic leadership and decision making in national, homeland, and international security.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on FTE, salary and benefits, and personnel costs such as shared services for 4 FTE's to maintain the service.

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

- One reserved slot for each operational Component, NPPD, and HQ, for a total of nine reserved slots.

- Costs for the remaining 11 slots are allocated based on each component's percentage of employees eligible to attend any of the colleges supported by the program. Eligible participants are GS-14 and GS-15 employees and TSA equivalents.

Full Time Equivalent (FTE): This activity requires 4 FTE.

Department of Homeland Security
Working Capital Fund
Government Wide Mandated Service Activity
Program Performance Justification
(Dollars in Thousands)

PPA: Government Wide Mandated Service Activity

	Perm. Pos	FTE	Amount
2013 Revised Enacted	5	5	31,728
2014 Enacted	7	7	31,567
2015 Adjustments-to-Base	(7)	(7)	(11,819)
2015 Current Services	-	-	19,748
2015 Program Change	-	-	53
2015 Total Request	-	-	19,801
Total Change 2014 to 2015	(7)	(7)	(11,766)

Working Capital Fund requests \$19.9 million and 0 FTE for this activity in FY 2015. Base adjustments include:

- Decrease - Transfer of the e-Training activity from the Government-Wide Activities PPA to the Fee for Service PPA of \$10.8 million
- Decrease for efficiencies of \$1 million

Program Changes Include:

- An increase due to the addition of the of Performance Management Line of Business (PMLoB) activity of \$.05 million

CURRENT SERVICES PROGRAM DESCRIPTION:

Interagency Council Funding - Government-Wide Mandated activity - \$.8 million

Description of Service: GSA provides oversight and administers the Interagency Council funds in consultation with the Chief Financial Officers Council, the Chief Information Officers Council, the Federal Acquisition Council and the Chief Human Capital Officers Council.

- Chief Financial Officers (CFO) Council funding supports the following activities:
 - Federal Audit Clearing House (FAC) - Disseminates audit information to Federal agencies and the public, supports OMB oversight and assessment of Federal award audit requirements, and assists Federal cognizant and oversight agencies in obtaining OMB Circular A-133 data and reporting packages.
 - Grants Streamlining – Implements P. L. 106-107, the Federal Financial Assistance

Management Improvement Act of 1999. It also proposes a standard format for Federal agency use in announcing discretionary grant and cooperative agreement funding opportunities.

- Chief Information Officers (CIO) Council funding supports the following activities:
 - A contract to support the Portfolio Management Office for the ongoing e-government initiatives efforts.
 - Federal Enterprise Architecture (FEA) —identifies and develops collaboration and consolidation opportunities across Federal agencies.
- Federal Acquisition Council (FAC) funding supports the following activities:
 - The Federal Competitive Sourcing Database (FCSD) facilitates comprehensive, consistent, and timely reporting of government actions related to competitive sourcing.
 - Acquisition Workforce Competency Development and Training - Funds the Acquisition Career Management Information System (ACMIS) database which provides workforce training data and OPM data to make strategic workforce decisions that affect the agency's training and certification requirements.
 - Government-wide Performance Measures for Socio-Economic Goals - Small business success is currently measured by meeting established statutory goals.
 - The Service Acquisition Reform Act (SARA), Acquisition Advisory Panel and Report to Congress - Section 1423 of SARA requires the Administrator of OMB's Office of Federal Procurement Policy to establish an advisory panel of recognized experts in acquisition law and policy to review laws and regulations regarding the use of commercial practices, performance-based contracting, the performance of acquisition functions across agency lines of responsibility, and the use of government-wide contracts.
 - Acquisition Center of Excellence - SARA mandates the development and maintenance of a Center of Excellence in Contracting for Services
- Chief Human Capital Officers Council (CHCO) funding supports the following activity:
 - CHCO website - Provides a vehicle for sharing and exchanging information of interest to the Federal human resource management community. The system provides a forum for the exchange of information among members of the Council in both a public and private manner.

Managing Partner: General Services Administration

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is pro-rata share based on the percent of each component's adjusted total budget (excluding grant funding) divided by DHS's total adjusted budget multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

USAJOBS - Government-Wide Mandated activity - \$1.1 million

Description of Service: The USAJOBS initiative is a government-wide initiative led by the Office of Personnel Management (OPM). All agencies fund their portion of this program (based on employment levels). Regulations contained in 5 CFR Parts 330, 333 and 335 implement section 4 of Public Law 1054-52 and authorizes OPM to charge fees to agencies in order to pay the cost of providing Federal employment information and services.

USAJOBS delivers state-of-the-art on-line recruitment services to job seekers, simplifying the process of locating and applying for Federal jobs. It delivers a number of job seeker focused features including intuitive job searching; clean, concise, understandable and attractive job announcements; on-line resume submission; applicant data-mining; and on-line feedback on status and eligibility.

Managing Partner: Office of Personnel Management

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

- Pro-rata share based on the percentage of each component's FTE divided by DHS' total FTE multiplied by the total estimated cost of the activity.
- This activity only benefits civilian personnel. Military FTE is not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Enterprise Human Resources Integration – Government-Wide Mandated activity - \$2.8 million

Description of Service: EHRI is a collaborative e-Government initiative designed to transform the way Federal HR Specialists and managers access human resource information and the way all Federal employees access their personnel file information. EHRI is in the process of replacing the current paper based Official Personnel Folder (OPF) with an electronic employee record for all executive branch employees, resulting in a comprehensive electronic personnel data repository covering the entire life cycle of Federal employment. In addition to streamlining personnel management actions, EHRI provides HR managers and specialists with powerful workforce analytic and planning capabilities.

Managing Partner: Office of Personnel Management

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: Component's cost allocation methodology is based on the following

factors:

- Costs for products and services will be recovered by EHRI from all agencies on an equitable basis related to the size and usage of each participating agency.
- Charges are based on distributing total EHRI costs to all clients on the basis of the number of Official Personnel Folder's or on the basis of actual cost, depending on the service.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Rulemaking – Government-Wide Mandated activity - \$.5 million

Description of Service: e-Rulemaking is a collaborative, interagency activity designed to establish a function. The activity consolidates rulemaking systems at the various departments and agencies and is centrally managed through a web-based environment offering functionality such as one-stop access, search capabilities, and public commenting. e-Rulemaking activities include:

- Expanding public understanding of the rulemaking process
- Improving the quality of Federal rulemaking decisions
- Increasing the amount, breadth, and ease of citizen and intergovernmental participation in rulemaking
- Administering Regulations.gov, a cross-agency, front-end Web application that posts and allows comments on proposed Federal agency rules
- Writing memoranda to the President's Management Council (PMC), directing agencies to include a link to Regulations.gov on agency homepages and in the synopsis of the notice of any regulatory action requesting public comment
- Posting the dockets for nearly 300 Federal agencies, including DHS, on EPA's online system.

Managing Partner: Environmental Protection Agency

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is pro-rata share based on the percent of each participating component's adjusted total budget (excluding grant funding) divided by DHS's total adjusted budget multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Human Resources Line of Business (HRLoB) – Government-Wide Mandated activity - \$.3 million

Description of Service: The Human Resources Line of Business (HR LOB) provides the Federal Government with an infrastructure to support pay-for-performance systems, modernized HR systems, and the core functionality necessary for the strategic management of human capital.

The HR LOB offers a cost-effective, standardized, and interoperable HR solution which allows Federal departments and agencies to work more efficiently and effectively, while providing managers and executives with an improved means to meeting strategic objectives. The HR LOB initiative seeks to accomplish the following four goals: 1) Improved Management, 2) Operational Efficiencies, 3) Cost Savings/Avoidance, and 4) Improved Customer Service.

By focusing on the strategic management of human capital and addressing duplicative HR systems and processes, the HR LOB initiative will enable faster decision-making and more informed policy-making capability; improved service ratio/response times and reduced cycle times; increased cost savings/avoidance through reducing duplicative software, hardware, and labor resources; and improved communication and responsiveness through enhanced quality, timeliness, accuracy and consistency.

Managing Partner: Office of Personnel Management

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

- Pro-rata share based on the percent of each component's FTE divided by DHS's total FTE multiplied by the total estimated cost of the activity.
- This activity only benefits civilian personnel. Military FTE is not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Benefits – Government-Wide Mandated activity - \$.2 million

Description of Service: The e-Gov Benefits activity provides a single point of access for citizens to locate and determine eligibility for government benefits and services, GovBenefits.gov. The site's core function is the eligibility prescreening questionnaire or "Benefit Finder." Answers to the questionnaire are used to evaluate a visitor's situation and compare it with the eligibility criteria for more than 1,000 Federally-funded benefit and assistance programs. Each program description provides citizens with the next steps to apply for any benefit program of interest.

Managing Partner: Department of Labor

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's civilian FTE divided by DHS's total civilian FTE multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Financial Management Line of Business (FMLoB) – Government-Wide Mandated activity - \$.2 million

Description of Service: The Financial Management Line of Business (FMLoB) goals are to define, analyze, and implement options that will enhance cost savings in the financial management systems, provide for standardization of business processes and data models, promote seamless data exchange between Federal agencies, and strengthen internal controls through integration of core financial and subsidiary systems. The FMLoB's current objective is to improve the cost, quality, and performance of financial management reducing the number of noncompliant systems by leveraging common standards, shared service solutions, and implementing other government-wide reforms that foster efficiencies in Federal financial operations.

Managing Partner: General Services Administration

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's adjusted total budget (excluding grant funding), divided by DHS' adjusted total budget and multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Geospatial Line of Business (GLoB) – Government-Wide Mandated activity - \$.2 million

Description of Service: The Geospatial LoB is designed to further refine the opportunities for optimizing and consolidating Federal geospatial-related investments to reduce the cost of government and, improve services to citizens. Cross-agency coordination of geospatial activities can identify, consolidate, and reduce or eliminate redundant geospatial investments. The Geospatial LoB will result in a more coordinated approach to producing, maintaining, and using geospatial data, and will ensure sustainable participation from Federal partners to establish a collaborative model for geospatial-related activities and investments.

Managing Partner: Department of Interior

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's adjusted total budget (excluding grant funding) divided by DHS's adjusted total budget multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Budget Formulation and Execution Line of Business (BFELoB) – Government-Wide Mandated activity - \$.1 million

Description of Service: The focus of the Budget Formulation and Execution Line of Business (BFELoB) is to build a “budget of the future” by promoting information sharing across government agency budget offices and building a “community of practice.” With this collaboration, the budget community can start to identify best practices for all aspects of budget formulation and execution. The BFELoB strives to find solutions that link budget formulation, execution, planning, performance, and financial information. Areas of particular interest include technology, budget performance integration, data collection and tracking, financial management integration, and human capital.

Managing Partner: Department of Education

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component’s adjusted total budget (excluding grant funding) divided by DHS’s adjusted total budget multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Integrated Acquisition Environment – Government-Wide Mandated activity - \$1.7 million

Description of Service: The e-Gov Integrated Acquisition Environment (IAE) is a Presidential e-Government initiative managed by GSA. IAE supports and automates the procurement process through the use of shared systems which are required by regulation.

Managing Partner: General Services Administration

Managing Office: Office of the Chief Procurement Officer (OCPO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the average percentage of each component’s number of procurement transactions, dollar value of procurement transactions and number of procurement personnel.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Disaster Management – Government-Wide Mandated activity - \$11.2 million

Description of Service: The e-gov Disaster Management (eDM) develops and provides direction in the use of Internet-based technologies to establish standards that are reusable, cost-effective, and mission focused. Additionally, the program strives to improve Emergency Management (public safety) response through more effective and efficient interoperable data communications. It also serves as a unified point of access to Disaster Preparedness, Mitigation, and Response and Recovery information. Among the initiatives are: 21st Digital Government Strategy, Web Content Management as a Service (WCMAaaS), GovDelivery, and Cloud Lifecycle Management. The 21st Digital Government Strategy focuses on web-based delivery by streamlining service via mobile applications. WCMAaaS focuses on a secure and compliant hosting environment by reducing costs, consolidating web-content management, and web-hosting services. GovDelivery improves integration with social media and websites by streamlining communication across email, Short Message Service (SMS), social media and other channels. Cloud Lifecycle Management provides secure data relay, monitoring/log management, tracking, and continuous integration & automation.

Managing Partner: Federal Emergency Management Agency

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's level of participation in disaster management divided by the total sum of all Component levels of participation in disaster management multiplied by the total estimated cost of the activity. Levels of participation are determined by measuring a Component's active participation in 16 sixteen elements of disaster management, as defined by Disaster Management e-Government Initiative Program Office within FEMA. The 16 elements of Disaster Management include the following: (1) transportation, (2) communications, (3) public works and engineering, (4) firefighting/incident command system, (5) information and planning, (6) mass care, (7) resource support, (8) health and medical services, (9) search and rescue, (10) hazardous materials, (11) food, (12) energy, (13) warnings and alerts, (14) research and development, (15) emergency/domestic preparedness, and (16) disaster relief. The 16 elements are the cost drivers for each component's assessment and because many Components are involved in various activities at different levels of participation, the cost for this activity is fairly uniform across the Components.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Integrated Acquisition Environment Loans and Grants– Government-Wide Mandated activity - \$.2 million

Description of Service: The Federal Funding Accountability and Transparency Act of 2006 (FFATA) requires OMB to "ensure the existence and operation of a single searchable website, accessible by the public at no cost that includes information on each Federal award. The law specifically requires a unique identifier for the entity receiving the award and of the parent entity of the recipient, should the entity be owned by another entity. Some contracts (and some grants) already require Data Universal

Numbering System (DUNS) numbers. This will allow those areas to feed information into the FFATA portal.

Managing Partner: General Services Administration

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's FTE, divided by DHS' total FTE and multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Integrated Financial Assistance Environment Government-Wide Mandated activity - \$.4 million

Description of Service: The e-Integrated Financial Assistance Environment Activity is a collaborative, interagency activity designed to establish common, automated, and integrated approaches to managing the Federal government's financial assistance function. The activity combines government-wide financial assistance systems, i.e., USA spending, Grants.gov, and the Federal Audit Clearinghouse System (FACS), at the various departments and agencies and is centrally managed by OMB through assignment of each system to an agency for day to day operations. Grants.gov creates a single portal for all Federal financial grant and cooperative agreement program applicants to find and apply for funding on-line. This provides electronic functionality for applicants while reducing paper-based processes that previously challenged the Federal grants and cooperative agreement program environment. FACS is the government-wide repository into which independent auditors post the annual OMB Circular A-133 Audits of federal financial assistance (FA) awardees for subsequent retrieval by federal agencies. USA spending is the site where all Federal award data is posted per the requirements set forth the Federal Financial Accountability and Transparency Act.

This activity is designed to reduce inefficiencies, meet e-Gov goals, and provide benefits to both citizens and the government. Specifically, the initiative enables the government to implement streamlining activities developed by the OMB lead Committee for Financial Assistance Reform (COFAR) on which DHS is one of the eight primary funding agencies represented.

Managing Partners: Grants.gov; Department of Health and Human Services;

USAspending.gov; OMB; and FACS: Commerce Department, Census Bureau Development

Managing Office: Office of the Chief Financial Officer (OCFO), Financial Assistance Policy and Oversight (FAPO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on systems' usage plus a base fee when appropriate.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Performance Management Line of Business (PMLoB) – Government-Wide Mandated activity - \$.05 million

Description of Service: The focus of the Performance Management Line of Business (PMLoB) is to facilitate transition from print-based Government Performance and Results Act (GPRA) performance plans and reports to a shared, web-based, Government-wide performance portal, as required by the GPRA Modernization Act (Sec 7 and Sec. 10), The PMLoB will help agencies efficiently meet legal requirements through a shared solution and avoid redundant stove-piped agency development and operations costs.

Managing Partner: PMLoB Steering Committee comprised of agency representatives, OMB, and GSA

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's adjusted total budget divided by DHS's adjusted total budget multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Department of Homeland Security
Working Capital Fund
DHS Cross Cutting Activities
Program Performance Justification
(Dollars in Thousands)

PPA: DHS Cross Cutting Activities

	Perm. Pos	FTE	Amount
2013 Revised Enacted	4	4	15,440
2014 Enacted	7	7	14,519
2015 Adjustments-to-Base	-	-	(711)
2015 Current Services	7	7	13,808
2015 Total Request	7	7	13,808
Total Change 2014 to 2015	-	-	(711)

The Working Capital Fund requests \$13.8 million and 7 FTE for DHS Cross-Cutting Activities in FY 2015. Base adjustments include:

- Increase of \$11 thousand for FY 2015 Pay Raise
- Increase of \$4 thousand for annualization of FY 2014 Pay Raise
- Decrease for efficiencies of \$.7 million

CURRENT SERVICES PROGRAM DESCRIPTION:

Capital Planning And Investment Control (CPIC) – DHS Crosscutting Activity- \$6.9 million

Description of Service: The Capital Planning and Investment Control (CPIC) activity is required to comply with budget preparation guidance provided by OMB Circular A-11 and management guidance provided by OMB Circular A-130. This Activity provides services to support these efforts, including automated tools to assist with portfolio analyses, document preparation, and document review and scoring, formal training, informational briefings, and remedial coaching to improve business case quality. It supports the project management offices in preparing decision packages for DHS investment review boards at key acquisition decision points in their projects' life cycle. CPIC is also the central point for the Department's response to OMB initiatives and priorities on investment management, currently focusing on such control phase areas as consolidation, earned value management, and periodic project review.

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: Pricing is based on operations, maintenance and annual modification support to the software applications that support CPIC reporting; annual licenses for software based on number of users; data center hosting fees for servers; number of FTE's needed to support scoring and work help desk tickets; number of planned training classes for system users.

Cost Allocation Methodology: The Component's cost allocation methodology is the number of Component Major Exhibit 300s divided by the total DHS Exhibit 300s minus the Contribution percentage of a Component. It is then multiplied by the total cost of the CPIC activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Strategic Sourcing – DHS Crosscutting Activity - \$1.9 million

Description of Service: The Strategic Sourcing Program Office (SSPO) is responsible for implementing a Department-wide approach to acquiring goods and services. SSPO provides DHS stakeholders economic and performance benefits through collaboration, rigorous analysis, and enterprise planning for acquisition initiatives. The SSPO collaborates with stakeholders to develop, deploy, and maintain sourcing strategies that enhance mission performance, improve acquisition efficiency, and optimize commodity management.

Managing Office: Office of the Chief Procurement Officer (OCPO)

Pricing Basis: Pricing is based on FTE, salary and benefits (which accounts for 80% of total funding requirement), and contractor support costs (which accounts for 20% of total funding requirement). Contractor support costs are negotiated through the competitive procurement process conducted by a DHS Contracting Officer.

Cost Allocation Methodology: Assessments are allocated to Components proportional to the average of the following two factors: (1) savings on DHS-wide contract vehicles and (2) spend excluding simplified acquisition (less than \$150,000, as defined in Federal Acquisition Regulations Part 2.101) spend. Data from Federal Procurement Data System-Next Generation is used to determine savings and spend by Component.

Full Time Equivalent (FTE): This activity requires 7 FTE.

CPO Shared Reporting – DHS Crosscutting Activity - \$4.9 million

Description of Services: The CPO Shared Reporting activity provides the DHS acquisition workforce with eProcurement systems and tools which leverage investment costs and promote competition, transparency, integrity and consistency.

Managing Office: Office of the Chief Procurement Officer (OCPO)

Pricing Basis: Pricing is based on existing contracts; system licensing fees; and necessary system security services, maintenance and operations. Systems include the Enterprise PRISM Instance, Enterprise Reporting Application, Electronic Procurement Information Center, Electronic Contract

Filing System, and Acquisition Planning and Forecast System. Contractual support includes licenses, hosting services (production, staging, training, testing and continuity of operations), Information Systems Security Services and systems maintenance and operations.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the average percentage of each Component's number of procurement transactions, dollar value of procurement transactions, and number of procurement personnel.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Department of Homeland Security
Working Capital Fund
Working Capital Fund Management Activity
Program Performance Justification

2015 Current Services	8	8	1,209
2015 Total Request	8	8	1,209
Total Change 2014 to 2015	-	-	(52)

Working Capital Fund requests \$1.2 million and 8 FTE for this activity in FY 2015. Base adjustments include:

- Increase of \$8 thousand for FY 2015 Pay Raise
- Increase of \$3 thousand for annualization of FY 2014 Pay Raise
- Decrease for efficiencies of \$.06 million

CURRENT SERVICES PROGRAM DESCRIPTION:

Working Capital Fund Operations – WCF Management Activity - \$1.2 million

Description of Service: The Working Capital Fund Operations office manages the WCF budget formulation and execution activities by providing policy and procedures over financial management reporting, analytical and business reviews, data analysis, governance and analytical/data analysis, and customer dispute resolution services. The office provides services to the activity managers as well as customer Components across DHS. The WCF delivers oversight of day to day activities, budget formulation and execution.

These services include the oversight of WCF activity budgets and performance of financial management duties and responsibilities; providing direction and assistance to program managers in the development of operating plans, budgets, and supporting documents relating to use of the WCF. The team coordinates with the Director of Financial Operations and makes recommendations on operating plans, rate structures, and activities to be supported by the fund. The staff facilitates Quarterly WCF Governance Board Meetings to provide oversight, guidance and recommendations for/from DHS senior leaders to customers. The team strives to establish working relationships between the Activity

Managers and the Components to provide transparency while improving the efficiency and effectiveness of WCF fiscal operations in accordance with the business and management services.

The WCF provides funds management oversight including cash management support, analysis and reconciliations, data analysis, billing and undelivered inquiries, to ensure accurate and timely use of funding. In addition, the team reviews financial reports for conformance with program and financial plans and inform senior management and program officials of trends and changes.

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: Pricing is based on 8 FTE personnel and benefits costs to maintain current service levels for managing the WCF, as well as shared service costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is the pro rata share based on the percentage of each components WCF assessment amount divided by the total WCF assessment multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 8 FTE.

IV. Program Justification Changes

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 1: NCR Infrastructure Operations
PPA: Fee for Service Activity
Program Decrease: Positions (2), FTE (2), Dollars \$(53,224)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							73	73	171,359
Program Decrease							(2)	(2)	(53,224)
Total Request	73	73	128,004	73	73	184,777	71	71	118,135

Description of Item

The National Capital Region Infrastructure Operations (NCRIO) provides the DHS Headquarters (HQ), select Department Components and field office end users IT network and internet/intranet access; management and delivery of desktop computing applications and equipment, email, wireless communications, video (VTC), voice (phone) and messaging; communications security and information technology (IT) operations disaster planning and mitigation to ensure continuous operations. The NCRIO manages and maintains all desktop applications for full functionality and continuous availability of unclassified and classified networks, as well as full functionality of file and data storage and retrieval, printing, and remote access. The NCRIO coordinates management and delivery of these services, supports build-out of new facilities, and provides customer service through a 24/7 help desk.

The NCRIO delivers IT service by subscribing to and integrating enterprise services with locally operated and maintained IT infrastructure. More specifically, the NCRIO subscribes to 1) Data Center hosting where it maintains its own user enclave for LAN A, 2) OneNet WAN, TIC and PEP services, and 3) enterprise services such as Email as a Service and Public Key Infrastructure. The NCRIO operates and maintains locally delivered IT services including 1) LAN and MAN data transport, 2) voice communications (land-line and cellular), 3) video, 4) end user computing, 5) remote access, 6) access management, 7) continuity of operations, and 8) security services. The NCRIO supports CLAN as well.

Justification

The previous FY 2014 President's Budget Request assumed that the NCRIO would provide IT support services to the St. Es campus tenants as well as IT support to the Federal Protective Service (FPS). Due to the United States Coast Guard (USCG) being the sole occupant at the St. E's campus, NCRIO WCF has helped USCG negotiate IT services outside the WCF. The FPS transition from the ICE IT service platform to the HQ IT service platform has not yet taken place because of contract negotiations and execution; therefore, these services are being covered by the component outside the NCRIO WCF. This requirement change has reduced the funding needed by \$35.2M.

In the past, the NCRIO has supported the Top Secret/Sensitive Compartmented Information (TS/SCI) "CLAN" network as well. The FY 2015 President's Budget includes a \$17.8M program change to separate the management of the unclassified and TS/SCI LANs. Responsibility for managing the TS/SCI network will be moved to the DHS Office of Intelligence and Analysis, a member of the Intelligence Community, to align management of that network with the oversight of the Director of National Intelligence, who is responsible for oversight of SCI networks as directed in Executive Order 12333 and National Security Directive 42. C-LAN has expanded in size and scope, and will continue to do so as the department consolidates its TS/SCI networks and aligns to the DNI's Intelligence Community Information Technology Enterprise (IC ITE). Splitting the current NCRIO fund into separate WCF activities provides for better cost identification and control in both networks.

Impact on Performance

The reductions as described should not negatively impact the performance service levels of the NCRIO activity. The change is to improve efficiency and oversight.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 2: GSA Rent
PPA: Fee for Service Activity
Program Decrease: Positions 0, FTE 0, Dollars \$(5,947)

Current Services Level							5	5	149,874
Program Decrease							-	-	(5,947)
Total Request	5	5	91,163	5	5	149,868	5	5	143,927

Description of Item

The General Services Administration (GSA) provides workspace and related services for over 100 Federal client agencies serving more than one million workers through the Public Buildings Service (PBS). They also provide related real estate services including the operation and maintenance of buildings and out-leasing programs. GSA's Computer Integrated Facility Management Program uses cutting edge technology to look at the buildings life cycle. Real estate services provided to clients appear in Federal agencies monthly electronic rent bills.

The Department has established a clearing account to expedite the payment of WCF GSA rent billings for the Department of Homeland Security headquarters offices, excluding the major Components, which pay their rent expenses directly to GSA. The monthly WCF bills include all GSA-controlled space that Department headquarters occupies, including parking spaces allotted to the Department.

Justification

The decrease in FY 2015 rent costs is related to the following:

- \$1.9 million reduction due to lower than anticipated rent costs at St. E's
- Reduction in space footprints as follows:
 - \$1.4M for OPS at 131 M Street, a reduction of 26,245 sq. ft.
 - \$1.8M for CIO at 131 M Street, a reduction of 32,601 sq. ft.
 - \$.8M for CSO and CRCL at L'Enfant Plaza, a reduction of 8,159 sq. ft.

Impact on Performance

There is no impact on performance.

Department of Homeland Security

(Dollars in Thousands)

Program Decrease 3: Shuttle Services
PPA: Fee for Service Activity
Program Decrease: Positions 0, FTE 0, Dollars \$(4,944)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							1	1	6,109
Program Decrease							-	-	(4,944)
Total Request	-	-	-	1	1	6,429	1	1	1,165

Description of Item

The Shuttle Service provides a safe and effective means of transporting employees between DHS buildings throughout the National Capital Region (NCR). The services consist of 3 routes (North, Tenley A/B and Glebe Rd) and are limited to the conduct of official business.

Justification

The decrease in FY 2015 in the Shuttle Service costs is primarily due to FEMA, TSA, and USCG removal from the Shuttle Services. They will be initiating their own Shuttle Services by using a Blanket Purchase Order (BPA).

Impact on Performance

The removal of FEMA, TSA and USCG will not impact performance for the remaining DHS HQ shuttle routes.

Department of Homeland Security

	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							1	1	445
Program Decrease							(1)	(1)	(445)
Total Request	-	-	-	1	1	445	-	-	-

Description of Item

The Office of the Chief Readiness Support Officer (OCRSO) will provide a centralized computerized system via the Environmental Planning & Historic Preservation Decision Support System (EP&HP DSS) activity to conduct environmental reviews of components and DHS HQ proposed actions in accordance with the National Environmental Protection Act.

Justification

As this system is still under development and is currently funded within the CRSO appropriated fund, it is not appropriate to move to the WCF. Development costs are not collected through the WCF, as it is operations & maintenance costs only. As such, CRSO briefed the Governance Board on the status of the program in September 2013 and at that time the system did not meet all component's needs or expectations. Therefore there is a need for additional development of the system to meet all present and future customer needs. CRSO is also working toward the CIO 'cloud environment', which will increase the production timeline.

Since the system is still in development and not at a steady state, CRSO will revisit, once the system is available for use, whether the WCF is the best mechanism.

Impact on Performance

If in the future, the costs, usage, and needs of the system become stable, OCRSO may revisit the opportunity for inclusion into the DHS Working Capital Fund.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 5: CLAN Operations
PPA: Fee for Service Activity
Program Increase: Positions 2, FTE 2, Dollars \$18,038

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							2	2	18,038
Total Request	-	-	-	-	-	-	2	2	18,038

Description of Item

The proposed CLAN activity would serve Top Secret/Sensitive Compartmented Information (TS/SCI) Enterprise users at DHS Headquarters (HQ), select Department Major and Sub-Components and field offices for:

- TS/SCI network and internet/intranet access;
- Management and delivery of desktop computing applications, equipment, email, communications, secure video (VTC), voice (phone) and messaging for TS/SCI networks;
- Communications security and information technology (IT) operations; and
- Data Center, Disaster Recovery planning and mitigation to ensure continuous operations.

The proposed new activity authority will manage delivery of IT services to TS/SCI end users, subscribing to and integrating enterprise services with a locally operated and maintained IT enterprise infrastructure. More specifically, the CLAN WCF will subscribe to:

- Data Center hosting for CLAN infrastructure, data storage, applications and CORE functions;
- OneNet WAN, TIC and PEP services;
- Enterprise services such as Enterprise Cross Domain Services and Public Key Infrastructure; and
- Provide responsive compliant solutions to OMB and ODNI Information Sharing and Safeguarding (IS&S) directives/policies applicable to TS/SCI networks.

Justification

In the past, the NCRIO has supported the Top Secret/Sensitive Compartmented Information (TS/SCI) “CLAN” network as well. The FY 2015 President’s Budget includes a program change to separate the management of the unclassified and TS/SCI LANs, and move responsibility for managing the TS/SCI

network to the DHS Office of Intelligence and Analysis, a member of the Intelligence Community, to align management of that network with the oversight of the Director of National Intelligence, who is responsible for oversight of SCI networks as directed in Executive Order 12333 and National Security Directive 42. C-LAN has expanded in size and scope, and will continue to do so as the department consolidates its TS/SCI networks and aligns to the DNI's Intelligence Community Information Technology Enterprise (IC ITE).

Impact on Performance

The change is to improve efficiency and oversight. Currently, the NCRIO funds both DHS's unclassified enterprise network (called ALAN) and DHS's TS/SCI network (called CLAN). A primary driver for splitting the current NCRIO fund into separate WCF activities is to be able to provide better cost identification (transparency) and control as DHS aligns CLAN to the Intelligence Community's Information Technology Enterprise (IC ITE). This will enable DHS to better take advantage of the IC ITE technology service offerings. Additionally, DHS has recently formed a DHS-wide Intelligence Systems Board (ISB) under the Homeland Security Intelligence Council (HSIC) that includes both intelligence mission and technology decision makers. As the CLAN WCF Program Manager, the ISB will provide direct oversight, alignment and governance of the TS/SCI investments at DHS and DHS's consumption of IC offerings.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 6: Performance Management Line of Business
PPA: Government Wide Mandated Service Activity
Program Increase: Positions 0, FTE 0, Dollars \$53

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	53
Total Request	-	-	53	-	-	-	-	-	53

Description of Item

OMB Guidance requires that major agencies provide funding to support e-development of a Performance Management Line of Business (PMLOB). This funding is to facilitate a transition from print-based Government Performance and Results Act (GPRA) performance plans and reports to a shared, web-based, Government-wide performance portal, as required by the Government Performance and Results Act Modernization Act (GPRAMA) (Sec. 7 and Sec. 10). The Government-wide performance portal will help agencies efficiently meet legal requirements through a shared solution and avoid redundant stove-piped agency development and operations costs. The final FY 2015 funding commitments and details regarding the shared solution will be determined in FY 2014 by a PMLOB Executive Steering Committee comprised of agency representatives, OMB, and GSA.

Justification:

Payment for PMLoB is mandated by OMB for all agencies and is intended to facilitate a transition from print-based GPRAMA performance plans and reports to a shared, web-based, Government-wide performance portal, as required by the GPRAMA (Sec. 7 and Sec. 10). This activity was funded in FY13; however, it was slated to be reprogrammed into the WCF permanently in FY14. Due to the timing of the enacted budget, the reprogramming did not occur, requiring the Department to request funding for FY15.

The GPRA Modernization Act changed several existing agency planning and reporting requirements, such as:

- Availability of an agency Strategic Plan, Annual Performance Plan, and performance updates through a central, Government-wide website.

- Availability of information on each program identified by agencies on a central website.
- Allow agencies to focus limited resources on the development of new strategic plans and preparations for strategic reviews;
- Allow time to pilot effective, efficient, and user-friendly ways to report the fuller corpus of Agency performance information;
- Automate the flow of agency information to a central website; and
- Operationalize the Performance Management Line of Business (PMLOB) with the General Services Administration.

Impact on Performance:

In FY 2014, the requirement to fund PMLoB was received after the submission of the FY 2014 President's Budget, resulting in a request in FY 2015.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

SEC. 504. The Department of Homeland Security Working Capital Fund, established pursuant to section 403 of Public Law 103–356 (31 U.S.C. 501 note), shall continue operations as a permanent working capital fund for fiscal year [2014] 2015: Provided, That none of the funds appropriated or otherwise made available to the Department of Homeland Security may be used to make payments to the Working Capital Fund, except for the activities and amounts allowed in the President’s fiscal year [2014] 2015 budget: Provided further, That funds provided to the Working Capital Fund shall be available for obligation until expended to carry out the purposes of the Working Capital Fund: Provided further, That all departmental components shall be charged only for direct usage of each Working Capital Fund service: Provided further, That funds provided to the Working Capital Fund shall be used only for purposes consistent with the contributing component: Provided further, That the Working Capital Fund shall be paid in advance or reimbursed at rates which will return the full cost of each service. Provided further, That the Committees on Appropriations of the Senate and House of Representatives shall be notified of any activity added to or removed from the fund: Provided further, That the Chief Financial Officer of the Department of Homeland Security shall submit a quarterly execution report with activity level detail, not later than 30 days after the end of each quarter.

Fee for Service Activity Mission Statement

DHS WCF activity managers provide or coordinate delivery of a specific service or benefit to DHS Components. The benefit/cost for providing the WCF activity is tangible and is directly linked to a Component's use of services or products. These WCF activities are reimbursed for the provision of services, and have characteristics typical of a business enterprise. The costs for operating the business are reimbursed by billing customers for the provision of goods and services at rates that are briefed and approved by the WCFGB. Each fee for service activity is expected to recover its operational expenses, usually at a much lower cost as the Components benefit from economies of scale. Examples include: GSA rent and real estate services, IT and telecommunication services, human resource services, procurement operations, and financial management services.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	72,737	74,959	76,093	1,134
11.3 Other than Full-Time Permanent	1,041	1,041	1,051	10
11.5 Other Personnel Compensation	389	479	454	(25)
12.1 Civilian Personnel Benefits	15,484	16,561	16,939	378
Total, Salaries & Benefits	89,651	93,040	94,537	1,497

The WCF's Fee for Service PPA requests a net increase of \$1.5M. The increase includes a 1% pay inflation of \$.7M for WCF activities with FTE. The increase of \$.9M for 7 FTE is a direct result of the e-Training activity move from the Government Wide PPA to Fee for Service PPA in FY15. This transfer is budget neutral between the PPAs. In addition, \$.174M is a decrease for the permanent removal of the EP&HP activity.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$167	\$199	\$186	(\$13)

This request reflects a decrease of \$.013M for costs related to the transportation of persons, subsistence of travelers, and incidentals in accordance to Executive Order 13589 directing agencies to spend at least 30% less on travel than the FY2010 actual cost.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$344	\$10	\$0	(\$10)

The FY15 request reflects a decrease of \$.010M for the removal of the EP&HP DSS activity, which included the transportation of environmental review materials for presentations to customers.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$81,038	\$134,958	\$131,989	(\$2,969)

In FY15, the WCF's Fee for Service PPA requests a net decrease of \$3M. This total includes a \$.6 decrease in cost for St. Elizabeths Occupancy Agreements, a decrease of \$2M for space reduction at 131 M Street that will be turned over to GSA in the early part FY14), a decrease of \$.004M for the removal of the EP&HP DSS activity, and an increase of \$5.3M for increased occupancy agreement as a result of the NPPD-OBIM reconfiguration.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$27,948	\$30,149	\$25,932	(\$4,217)

This request reflects a decrease of \$4.2M, of which \$1.2M is due to the reduction in NCRIO's IT Infrastructure services through more efficient management of inventory and new wireless services. Other decreases include anticipated reduction in overtime utilities in FY15 for GSA Rent, which is based on updated costs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
24.0 Printing and Reproduction	\$25	\$1,959	\$1,964	\$5

This request reflects an increase of \$.5M for card stock and training materials.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$28,439	\$22,812	\$20,765	(\$2,047)

The FY15 request reflects a decrease of \$2M, of which \$1.7M is due to decreased contract support for help desk and report writing services for the Procurement Operations Office and \$.3M is due to the decrease in NCRIO's Program Management Office support for contract consulting services that support the activity.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$24,648	\$74,204	\$67,706	(\$6,498)

The FY15 request reflects a decrease of \$6.5M. Mail service will deliver once a day, resulting in a cost reduction of \$.8M. A \$4.3M decrease is due to the elimination and reduction in shuttle routes. The remaining reductions is due to efficiencies realized in contract spending due to skill set improvement, resulting in fewer contractor costs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$92,100	\$102,858	\$100,774	(\$2,084)

This FY15 request reflects a decrease of \$2.1M, of which a \$1.8M decrease is a result of the NFC activity's reduction in contract spending by working with Components and USDA to reduce branch support. The remaining decrease is due to Procurement Operations reducing help desk support, report writing, and reductions in contract management for the ITP activity.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.5 Research and Development Contracts	\$0	\$152	\$0	(\$152)

The FY15 request reflects a decrease of \$.2M for Research and Development costs for EP&HP DSS, which are no longer required.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$202,771	\$291,586	\$205,588	(\$85,998)

The WCF Fee for Service PPA requests a net decrease of \$86M. The decrease to the O&M object class reflects the removal of EDC Migration of \$42.2M. A \$35.5M reduction for changes in service for Components for the NCRIO activity. \$7.3M reduction in ALAN operations and maintenance support due to decrease in customer base and a migration to a contractor operated business model for service delivery, as well as reducing the level of servers on demand (Windows, Unix, Mainframe) and software as a service (e.g. Email, SharePoint, Customer Relationship Management, Project Server).

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$1,194	\$2,298	\$2,221	(\$77)

In FY15, the WCF's Fee for Service PPA requests a decrease of \$.08M in response to the current fiscal climate and requirement to achieve savings.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$7,163	\$4,466	\$4,243	(\$223)

In FY15, the WCF's Fee for Service PPA requests a decrease of \$.2M in response to the current fiscal climate and requirement to achieve savings.

Government Wide Mandated Service Activity Mission Statement

Government-wide Mandated Activities are Administration-sponsored initiatives that are managed by a designated Federal department to improve overall government performance. Customers are assessed for the cost of supporting the activity. The activities should also provide a direct benefit to participating Components. Examples include the government-wide e-Government initiatives and the OMB-sponsored Interagency Councils such as Human Resources Line of Business, Financial Management Line of Business, e-Gov Benefits, and e-Gov Disaster Management.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	670	670	-	(670)
12.1 Civilian Personnel Benefits	261	261	-	(261)
Total, Salaries & Benefits	931	931	-	(931)

The FY15 reflects a decrease of \$.9M for the transfer of the e-Training Activity to the Fee for Service PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change

DHS Cross Cutting Activities Mission Statement

The DHS crosscutting activities are Department-wide programs managed by a single office that yield some benefit to all DHS Components, such as Strategic Sourcing. The actual costs of the programs are recouped by redistributing the costs to the Components based on their share of the discretionary budget, staffing or some other fair and equitable pro-rata basis.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	1,079	1,506	1,521	15
Total, Salaries & Benefits	1,079	1,506	1,521	15

The FY15 reflects an increase of \$.02M, to include 1% pay inflation for 7 FTE.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$14,251	\$12,920	\$12,194	(\$726)

The FY15 reflects a decrease of \$.7M corresponding to revisions made in contract requirements.

Working Capital Fund Management Activity Mission Statement

The WCF Management Activity includes funding for the staff that develops WCF policy and procedures, formulates and executes the WCF budget, and facilitates dispute resolution of issues between activity managers and customers.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	863	916	924	8
12.1 Civilian Personnel Benefits	217	221	224	3
Total, Salaries & Benefits	1,080	1,137	1,148	11

In FY15, the WCF Management's PPA requests an increase of \$.01M for the 1% pay inflation that supports projected salaries and benefits requirements for 8 FTE and 8 positions to perform the duties and responsibilities in managing the Working Capital Fund Operations Activity.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$161	\$0	\$52	\$52

The FY15 reflects an increase of \$0.05M to cover cost associated with program support needed for daily operations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$0	\$20	\$0	(\$20)

The FY15 reflects a decrease of \$.02M associated with cost savings measures undertaken by the WCF and Service Providers.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$6	\$98	\$7	(\$91)

The FY15 includes a decrease of \$.09M in response to the current fiscal climate and requirements to achieve savings.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$1	\$6	\$2	(\$4)

The FY15 reflects a decrease of \$.004M due to a decline of discretionary products needed to perform daily operations of managing the WCF.

BUDGET REQUEST AND SUPPORTING INFORMATION

ANALYSIS AND OPERATIONS

I. Appropriation Overview

A. Mission Statement for Analysis and Operations:

The Analysis and Operations appropriation provides resources supporting the Office of Intelligence and Analysis and the Office of Operations Coordination and Planning. While these two offices are distinct in their missions, they work closely together and collaborate with other DHS components to support the Department's mission of protecting the Homeland. The mission of the Office of Intelligence and Analysis is to provide homeland security intelligence to the Secretary, other government officials, and State, local, and private sector partners. The mission of the Office of Operations Coordination and Planning is to integrate DHS and interagency planning and operations coordination in order to prevent, protect, respond to, and recover from terrorist threats/attacks or threats from other man-made or natural disasters.

B. Budget Activities:

Office of Intelligence and Analysis (I&A) - I&A's mission is to equip the homeland security enterprise (HSE) with the intelligence and information it needs to keep the Homeland safe, secure, and resilient. I&A has a unique role as a central conduit for information sharing among the Intelligence Community (IC); federal entities; SLTT entities through the National Network of Fusion Centers (NNFC); and nontraditional partners to support the goals of the Quadrennial Homeland Security Review. This includes promoting an understanding of threats to the Homeland through intelligence analysis, coordinating the counterintelligence activities of the Department, collecting information and intelligence to support homeland security missions, managing intelligence for the HSE, and sharing the information necessary for action while protecting the privacy, civil rights, and civil liberties of all Americans.

Office of Operations Coordination and Planning (OPS) – OPS collaborates with other DHS Components to facilitate and enable the coordination of operations among our homeland security partners (e.g. Federal, SLTT, private sector, and international). OPS accomplishes this through robust information sharing mechanisms and department-level planning. Additionally, OPS ensures the resilience of DHS's overall mission through its leadership of the Department's continuity of operations program. OPS operates across the five incident management mission areas (prevent, protect, mitigate, respond, recover) and enables unity of effort throughout the homeland security enterprise.

C. Budget Request Summary:

The Analysis and Operations account requests 879 positions, 850 FTE and \$302.27 million for FY 2015. Please reference classified annex for detail.

BUDGET REQUEST AND SUPPORTING INFORMATION

Office of Inspector General Audits, Inspections and Investigations

I. Appropriation Overview

A. Mission Statement:

The Department of Homeland Security (DHS) Office of Inspector General (OIG) was established by the *Homeland Security Act of 2002* (P.L. 107-296), by amendment to the *Inspector General Act (IG ACT) of 1978*. The OIG has a dual reporting responsibility to the Secretary of DHS and to the Congress. The OIG serves as an independent and objective inspection, audit, and investigative body to promote economy, efficiency, and effectiveness in DHS's programs and operations, and to prevent and detect fraud, waste, and abuse in such programs and operations. The OIG's oversight extends to the Department's more than 200,000 employees and varied missions and programs worldwide. The requested resources are required to sustain on-going initiatives and maintain the level of oversight required by the scope, complexity, and the importance of DHS's mission, which is to secure a safer America resilient against terrorism and other potential threats. Based on direction from DHS, for fiscal year (FY) 2015, the OIG requests 725 full-time positions (FTP), 725 full-time equivalents (FTE) and \$145.457 million. This includes a transfer from the Federal Emergency Management Agency's (FEMA) Disaster Relief Fund (DRF) of \$24 million. The request is an increase of \$6.020 million over the FY 2014 Enacted.

Mission Statement

The OIG contributes to DHS's success by providing objective information to promote government management, decision making, and accountability. The OIG is an agent of positive change, focusing on eliminating waste, fraud and abuse, and on identifying problems and recommendations for corrective actions by agency leadership. The OIG provides the Department and the Congress with objective assessments of departmental programs and operations in order to make them more successful. The OIG provides Federal employees, contractors, and the public with an independent venue to report fraud, waste, and abuse that impact the Department.

The OIG conducts and supervises audits, inspections, special reviews, and investigations of the Department's programs and operations, including program and financial management, contract and grant activity, and disaster relief efforts. The OIG conducts these reviews to offer recommendations for improving the economy, efficiency, and effectiveness of the Department's operations and activities, when necessary; and to deter, identify, and address fraud, waste, and abuse. The OIG annually publishes a schedule of audits, inspections, and investigations that will assist the Department in fulfilling its mission and goals, and reports its findings to the Secretary, the Congress, and the public, when appropriate. The Inspector General's (IG) statements for the record and testimony may be accessed through our website at www.oig.dhs.gov.

B. Budget Activities:

The OIG has one budget for audits, inspections, and investigations; the request funds 725 FTE assigned to the following executive management and oversight teams:

The Executive Office consists of the IG, the Deputy IG, the Chief Operating Officer, a Chief of Staff, a Deputy Chief of Staff, a Senior Management Analyst, and a Special Assistant. It provides executive leadership to the OIG. The office has 7 FTE.

The Office of External Affairs (OEA) serves as primary liaison to members of Congress and their staffs, the White House and Executive Branch, and to other governmental agencies and entities involved in securing the Nation. OEA also is the principal point of contact for the OIG with all media outlets and the general public. The office staff responds to inquiries from the Congress and the White House; notifies the Congress about OIG initiatives, policies, and programs; and informs other governmental entities about OIG initiatives that affect their operations and activities. The office distributes correspondence and final audit, inspection, and special reports to the Congress and the White House. It also provides advice to the IG and supports OIG staff as they address Congressional and White House inquiries. OEA provides news organizations with accurate and timely information in compliance with legal, regulatory, and procedural rules and requirements. Additionally, OEA is responsible for an integrated communications approach, addressing external and internal communication functions. The office prepares and issues news releases, arranges interviews, and coordinates and analyzes information to support the OIG's policy development and mass communications needs. OEA ensures that information provided is current, accurate, and issued in a timely manner, promoting accountability and transparency in the work of the OIG. Furthermore, OEA provides counsel to the IG and other management officials on complex programmatic and public affairs issues that affect the OIG and its relationship with DHS, other Federal, State, and local government offices, the media, and the general public. The office has 6 FTE.

The Office of Counsel (OC) provides legal advice and guidance to the IG and other management officials. The office interprets laws, rules and regulations, reviews reports and correspondence, and further supports audits, inspections, and investigations by ensuring and conducting legal sufficiency reviews. OC represents the OIG in Equal Employment Opportunity actions, Merit Systems Protection Board actions, and claims filed under the *Federal Torts Claims Act*; represents OIG investigators in conjunction with the Department of Justice (DOJ) in *Bivens* actions; and assists DOJ with *Giglio* requests. The office reviews all DHS management directives and delegations to ensure protection of OIG authorities and compliance of applicable laws and regulations. The office serves as the OIG's designated ethics office, manages the OIG's *Freedom of Information Act* and *Privacy Act* responsibilities, furnishes attorney services for the issuance and enforcement of OIG subpoenas, and provides legal advice on OIG operations. The office has 14 FTE.

The Office of Integrity and Quality Oversight (IQO) is a new office that is aimed to improve the OIG's operations and enhance support of the DHS mission, programs and operations. Part of a comprehensive reorganization of the OIG, the new office's goal is to foster a more efficient and responsive OIG, revitalize oversight efforts, and better serve employees. The IQO manages matters

pertaining to the Hotline, Whistleblower Protection, and Ombudsman programs; investigative case files; compliance and quality assurance; and audit and inspection report quality. IQO ensures that the Hotline, Whistleblower Protection, and Ombudsman programs are transparent and function independently, that internal and external quality assurance matters such as peer reviews are executed timely and properly, and the quality requirements for investigative, audit, and inspections reports are fulfilled. IQO collects, analyzes, and distributes data concerning fraud and misconduct through our national hotline operation and the National Center for Disaster Fraud (NCDF). The Investigations Hotline Correspondence Unit continues improvements to its systems for receiving, routing, and responding to thousands of routine complaints each year which report allegations of criminal or administrative misconduct, theft of departmental funds, corruption by DHS employees or other serious misconduct involving DHS employees, contractors, grantees, and programs. The unit also receives and responds to Congressional and other official correspondence. This office has 19 FTE.

The Office of Management (OM) provides critical mission support functions, including strategic planning and budgeting; development and implementation of administrative directives; management of information and office automation systems; and oversight of personnel, training, procurement, security systems, and policy. It utilizes the Bureau of Fiscal Service to provide travel and accounting services on a reimbursable basis. The office also prepares the OIG's annual performance plans and the semiannual reports to the Congress. The office has 72 FTE.

The Office of Audits (OA) conducts and coordinates audits and program evaluations of the management and financial operations of DHS. Auditors examine the methods employed by agencies, bureaus, grantees, and contractors in carrying out essential programs or activities. The office evaluates whether established goals and objectives are achieved and resources are used economically and efficiently; ensures whether intended and realized results are consistent with laws, regulations, and good business practice; and determines whether financial accountability is achieved and the financial statements are not materially misstated. The office has 164 FTE.

The Office of Information Technology Audits (ITA) conducts audits and evaluations of DHS's information management, cyber infrastructure, and systems integration activities. The office reviews the cost effectiveness of acquisitions, implementation, and management of major systems, and telecommunications networks across DHS. The office evaluates the information systems and related architectures of DHS to ensure they are effective, efficient, and implemented according to applicable policies, standards, and procedures. The office assesses DHS's information security program as mandated by the *Federal Information Security Management Act*. The office also provides technical forensics assistance in support of the OIG's fraud prevention and detection mission. The office has 49 FTE.

The Office of Inspections (ISP) provides the IG with a means to analyze programs quickly and to evaluate operational efficiency, effectiveness, and vulnerability. This work includes special reviews of highly visible or sensitive issues that arise suddenly, as well as congressional requests and mandates for studies that require immediate attention. The nature of this work requires timely reporting to high-level audiences, including the Secretary and the Congress. The office has four specialty areas: science and technology, civil rights and civil liberties, intelligence oversight, and international operations, but may examine any area of the Department in an effort to strengthen and unify DHS operations and management systems and make recommendations that can help ensure that the Department programs

function efficiently, effectively, and with minimal vulnerability. The office is the lead organization in the OIG for monitoring DHS intelligence activities. DHS has two members of the Intelligence Community (IC) - the United States Coast Guard and the Office of Intelligence and Analysis, both of whom represent DHS's connection to the IC. Therefore, it is essential that the OIG provide oversight of their intelligence activities. OIG's goal is to ensure that the DHS intelligence enterprise conducts its operations according to law; that intelligence is appropriately shared among DHS components, other Federal agencies, and State and local stakeholders; and that initiatives such as fusion centers and protective security advisors operate effectively and efficiently. In this capacity, the office reports on the use of intelligence information within the Department, and coordinates the OIG's interaction with the multi-agency intelligence community. The office has 39 FTE.

The Office of Investigations (INV) conducts investigations into allegations of criminal, civil, and administrative misconduct involving DHS employees, contractors, grantees, and programs. These investigations can result in criminal prosecutions, fines, civil monetary penalties, and administrative sanctions and personnel actions. The office has broad investigative and oversight responsibilities which mirror departmental priorities in working to ensure the integrity of the Nation's immigration system, borders, ports of entry, and national transportation network. INV is committed to protecting the civil rights and liberties of all persons in the United States and investigates all referrals of detainee deaths involving unusual or suspicious circumstances, all on-duty incidents involving the discharge of a firearm by a DHS employee, and all credible allegations of criminal abuse of authority that result in the deprivation of rights or other serious criminal offense. Further, INV conducts investigations into allegations of gross misuse of classified information, privacy or law enforcement information and allegations of criminal misconduct in the administration of immigration benefits. In addition, INV oversees the integrity of programs that distribute DHS funds for routine operations; in response to disasters and disaster preparedness training and in association with programs used in the development of technologies critical to combating terrorism. The INV FEMA Support Unit maintains a liaison with FEMA and provides support to the NCDF by improving information access and communications, ensuring complaints are referred for investigation, and that prosecutions and recoveries are accurately tracked and documented. Additionally, INV continues to exercise important oversight responsibilities and monitors the investigative activity of the DHS Component Internal Affairs units who are tasked with investigating misconduct issues within the Department. The Forensic Threat Analysis Unit is responsible for analyzing investigative information and associating data to identify trends, patterns, locations, and individuals suspected of corrupt behavior. Evidence of criminality will be forwarded to field units for further investigation, enhancing our effectiveness in detecting and combating corruption. The office has 263 FTE.

The Office of Emergency Management Oversight (EMO) provides an aggressive and ongoing audit effort designed to ensure that disaster relief funds are being spent appropriately, while identifying fraud, waste, and abuse as early as possible. The office is an independent and objective means of keeping the Congress, the Secretary, the Administrator of FEMA, and other Federal disaster relief agencies fully informed on problems and deficiencies relating to disaster operations and assistance programs, and progress regarding corrective actions. EMO's focus is weighed heavily towards prevention, including reviewing internal controls, and monitoring and advising DHS and FEMA officials on contracts, grants, and purchase transactions before they are approved. This allows the office to stay current on disaster relief operations and provide on-the-spot advice on internal controls and precedent-setting decisions. The office coordinates with other Federal IG offices, meets with State

and local officials on audit and investigative matters, and advises contractors and grantees on compliance requirements. The office has 92 FTE.

C. Budget Request Summary:

The OIG requests 725 FTP, 725 FTE, and \$145.457 million for FY 2015. The FY 2015 OIG request includes \$1.0 million for training and \$0.423 million for supporting the Council of Inspectors General on Integrity and Efficiency (CIGIE). The OIG request reflects adjustments-to-base totaling \$2.468 million including increases of \$1.064 million for pay increase, \$0.267 for annualization of prior year pay increase, \$0.202 million for General Service Administration (GSA) rent, \$0.025 million for Working Capital Fund, and \$1.837 million for a required increase to the agency retirement contribution. The OIG base adjustment also includes decreases for efficiencies totaling \$0.927 million with \$0.468 million for communication and utilities, \$0.359 million for advisory and assistance services, and \$0.100 million for supplies and materials. We request a programmatic increase of \$3.552 million to fund the workforce development initiative. The OIG overall change from the FY 2014 Enacted is a \$6.020 million increase.

The OIG has determined that through a concentrated effort to reduce administrative expenses and by rebalancing its workforce, the OIG can support 725 FTE, 44 FTE more than the FY 2014 request.

D. Initial Budget Request:

The OIG submitted an initial request of \$170.6 million in funding to DHS at the beginning of the FY 2015 budget process. The request included program increases totaling \$26.9 million that consisted of five components:

- \$11.9 million to increase investigative services with 50 new positions and 25 FTE
- \$ 8.0 million to sustain EMO program with no increase in position or FTE
- \$ 5.8 million to build out GSA space with no increase in position or FTE.
- \$ 1.0 million for workforce development with no increase in position or FTE
- \$ 0.20 million for fixed cost-GSA rent with no increase in position or FTE.

However, complying with Departmental guidance, the OIG request was reduced to \$119.6 million in base resources and a \$16.8 million transfer from FEMA's DRF. The Office of Management and Budget's (OMB) passback settlement provided \$145.457 million in resources, an increase of \$6.020 over the FY 2014 Enacted and includes a \$24 million transfer from FEMA's DRF. This is \$25.1 million less than the initial request.

2015 Total Request	725	725	145,457
Total Change 2014 to 2015	44	44	6,020

The OIG requests 725 FTP, 725 FTE, and \$145.457 million for FY 2015. The FY 2015 OIG request includes \$1.0 million for training and \$0.423 million for supporting the CIGIE. The OIG's request reflects adjustments-to-base totaling \$2.468 million including increases of \$1.064 million for pay increase, \$0.267 for annualization of prior year pay increase, \$0.202 million for GSA rent, \$0.025 million for Working Capital Fund and \$1.837 million for a required increase to the agency retirement contribution. The OIG base adjustment also includes decreases for efficiencies totaling \$0.927 million with \$0.468 million for communication and utilities, \$0.359 million for advisory and assistance services, and \$0.100 million for supplies and materials. We request a programmatic increase of \$3.552 million to fund the workforce development initiative. The OIG overall change from the FY 2014 Enacted is \$6.020 million increase.

The OIG has determined that through a concentrated effort to reduce administrative expenses and by rebalancing its' workforce, the OIG can support 725 FTE, 44 FTE more than the FY 2014 request.

The Audits, Inspections and Investigations Program/Project Activity will achieve efficiencies through communications and utilities, contractual services and supplies and materials.

CURRENT SERVICES PROGRAM DESCRIPTION:

Specifically, the OIG's key legislated responsibilities, and the funds requested in FY 2015 are to:

- Promote economy, efficiency, and effectiveness in the management of the Department's programs and supporting operations;

- Conduct and supervise audits, investigations, and inspections relating to the Department's programs and support operations;
- Detect and prevent fraud, waste, and abuse;
- Review existing and proposed legislation and regulations and make appropriate recommendations;
- Maintain effective working relationships with other Federal, State, and local governmental agencies, and non-governmental entities regarding the mandated duties of the OIG;
- Inform the Secretary of Homeland Security and the Congress of serious problems and recommend corrective actions and implementation strategies;
- Comply with the audit standards of the Comptroller General of the Government Accountability Office (GAO) and avoid duplication of GAO activities; and
- Report violations of Federal criminal law to the U.S. Attorney General.

PROCUREMENT ACTIVITIES:

Not applicable.

Description of Item

The \$3.552 million requested increase in FY 2015 is for the Workforce Development initiative. It will provide quality training and encourage a knowledge management culture to maintain a highly professional and productive workforce that keeps pace with evolving technology and emerging risks to help the Department address challenges, both present and future.

Justification

The OIG is legislatively mandated to conduct and supervise audits, inspections and investigations relating to DHS programs and operations, with focus on promoting economy, efficiency, and effectiveness. Its oversight of DHS activities must result in products and services that are relevant, accurate, and timely as we assess how DHS is using taxpayer dollars. To achieve the mission and as part of OIG's strategic plan, one of the goals is to sustain our ability to change and improve by attracting, investing in, and maintaining a highly motivated, skilled, and agile workforce, and sustaining our employees' professional development. In accordance with the *IG Act*, the OIG is also required to comply with specific, mandated training requirements to ensure that all personnel have the necessary knowledge, skills and abilities to properly support its mission.

The OIG will transform current activities and create new, cutting-edge employee, technical, leader, supervisory development, and training programs that raise the levels of workforce competency, professionalism, and efficiency within the OIG. Specifically, the Workforce Development budget request will target:

- **A Balanced “Talent Management” Approach to Transparent Workforce Management**
 - Focused on aligning mission goals/strategy to workforce competencies
 - Competency Mapping for all job series/billets
 - Instituting process discipline with Performance Management and Individual Development Plan (IDP) focus
 - Targeting areas in need of improvement identified through the Federal Employee Viewpoint Surveys
 - Partner with Office of Personnel Management and other agencies on leadership and developmental training programs.

- **Systems Upgrades and Internal Controls**
 - Provide access to the state-of-the-art instructional presentation systems and media productions and equipment to produce packaged courses and training modules for use in headquarters and field locations
 - Focus process discipline on training needs (IDPs, Training Plans, etc.)
 - Performance and Learning Management System implementation (DHScovery replacement system)
 - Electronic Performance Appraisal System migration
 - Learning Portal enhancements
 - Incorporation of Mobile electronic Learning initiatives.

- **Competency Development and Mapping**
 - Alignment of mission goals and strategy to workforce development and performance management initiatives
 - Identification of future workforce training and development requirements and fill the gap between current and needed future competencies and skills. Develop and implement courses and programs to fill those gaps to accomplish the OIG’s mission and strategic plan.

Impact on Performance (Relationship of Increase to Strategic Goals)

The increase of \$3.552 million would enhance the OIG’s ability to support the strategic goal of maturing and strengthening DHS. The OIG will leverage cost-efficient and time-saving technologies, and in conjunction with CIGIE, establish a competencies-based program to ensure compliance with core mission and customized training services and learning management systems to meet mandatory and specialized training requirements for all staff. This program will encourage a knowledge management culture that will enable information sharing and collaboration that leverages the intellectual capital of the OIG. The OIG will examine the competencies of various positions within the OIG and provide guidance to managers on appropriate training that is required for each position, thereby increasing capabilities as well as improving internal coordination.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978 (5 U.S.C. App.), [\$115,437,000] \$121,457,000 of which not to exceed \$300,000 may be used for certain confidential operational expenses, including the payment of informants, to be expended at the direction of the Inspector General.

Note: Please see Exhibit A in FEMA's Disaster Relief Fund Congressional Justification for Appropriations Language transferring \$24 million to the OIG.

Explanation of Changes:

The FY 2015 request formalizes the transfer of \$24 million to the OIG for audits and investigations related to disasters.

B. FY 2014 to FY 2015 Budget Change

Department of Homeland Security Office of Inspector General FY 2014 to FY 2015 Budget Change (Dollars in Thousands)

	Pos.	FTE	Amount
FY 2013 Revised Enacted	683	681	\$137,910
FY 2014 Enacted	681	681	\$139,437

iii. Status of Congressionally Requested Studies, Reports and Evaluations

Department of Homeland Security U.S. Customs and Border Protection

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2006	10/11/2013	Security and Accountability Act of 2006 (P.L. 109-347), Section 232(c)	SAFE Port Act 232 – Full-Scale Implementation of Pilot Scanning System (Update 11) – Every six months, the Secretary shall submit a report describing the status of full-scale deployment under subsection (b) and the cost of deploying the system at each foreign port at which the integrated scanning systems are deployed.	In OMB Review. This report is not required by an Appropriations bill, but it is submitted to the Appropriations Committees (in addition to Authorization Committees).
2008	12/24/2013	FY 2008 Appropriations Act (House Report 110-497). Section 605	Sec. 605 POE Technology Demonstration (FY 2014) – Not later than 1 year after the date of the enactment of this Act, and annually thereafter, the Secretary shall submit a report on the activities carried out at each demonstration site under the technology demonstration program established under this section and include an assessment by the Commissioner of the feasibility of incorporating any demonstrated technology for use throughout U.S. Customs and Border Protection.	In DHS Final Clearance
2014	2/1/2014	House Report 113-91, page 32; Explanatory Statement, Division F, page 20	FY 2014 Circumvention of Duties: Imports from China – Consistent with past guidance, the Committee directs CBP to submit a report not later than February 1, 2014, on the extent and frequency of customs fraud, including circumvention of duties and misclassification on entries of imports of goods from China.	In DHS Final Clearance
2014	2/15/2014	Senate Report 113-77, page 43	ACE Quarterly Report (FY 2014) -- FY 2014 First Quarter – The Committee expects to continue receiving the ACE quarterly reports.	In DHS Review

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2014	2/15/2014	House Report 113-91, page 27; Explanatory Statement, Division F, page 16	CBP Staffing and Hiring FY 2014: Quarter 1 – The Committee directs CBP to continue submitting monthly staffing and hiring reports in the format used in prior fiscal years.	In DHS Review
2014	2/15/2014	House Report 113-91, page 27	FY 2014 Counter Abuse of Prescription Drugs Report – The Committee supports strongly CBP's efforts to combat prescription drug smuggling and abuse. CBP and ICE are directed to update the Committee on their activities, resources and challenges, including relevant information regarding the illicit transnational smuggling of generic oxycodone along the U.S.-Canada border. The report shall be submitted no later than February 15, 2014.	In CBP Review
2014	Alongside the FY 2015 Budget Submission	House Report 113-91, page 32; Explanatory Statement, Division F, page 20	Textile Transshipment Enforcement FY 2014 – The Committee includes \$4,750,000, to continue textile transshipment enforcement. The Committee directs CBP to ensure that the activities of the Textile and Apparel Policies and Programs Office, specifically seizures, detention, and special operations, are maintained at least at the level of those activities in prior years. The Committee directs CBP to update annually and submit a report with the budget request on the execution of its five-year strategic plan, consistent with prior year requirements.	In DHS Final Clearance

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2014	Alongside the FY 2015 Budget Submission	House Report 113-91, page 39; Explanatory Statement, Division F, page 22	FY 2014 Real Property Inventory Plan – CBP is directed to submit a real property inventory on an annual basis. As a component of this inventory, CBP is directed to provide an annual plan describing construction and major renovation initiatives and their costs. In addition, CBP is directed to rank LPOEs, including GSA's, in order of which are most critical to improve border security and facilitate trade and travel into and out of the United States.	In OMB Review
2014	Alongside the FY 2015 Budget Submission	Senate Report 113-77, page 48-49; Explanatory Statement, Division F, page 20	FY 2014 LPOE Modernization 5-Year Plan (FYs 2015-2019) – The Committee reminds CBP that the fiscal year 2012 Department of Homeland Security Act made permanent the requirement that a 5-year plan for all Federal land border ports of entry shall be submitted annually with the President's budget request. The Committee directs the Department to continue to work with the GSA on its nationwide strategy to prioritize and address the infrastructure needs at land border POEs and to comply with the requirements of the Public Buildings Act of 1959 (40 U.S.C. 3301) and seek necessary funding.	In OMB Review

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2014	Alongside the FY 2015 Budget Submission	House Report 113-91, page 35; Explanatory Statement, Division F, Section 551	<p>BSFIT FY 2014-FY 2017 Multi-Year Investment and Management Plan – The Committee recommends \$351,454,000 for BSFIT as requested, \$27,679,000 above the amount provided in fiscal year 2013. With this recommendation, the Committee continues its strong support of border security infrastructure and technology deployment to meet Border Patrol’s needs. Like last year, the Committee reminds CBP that it must submit an updated multi-year investment and management plan annually with its budget request.</p> <p>...</p> <p>In developing the multi-year investment and management plan, the Committee directs CBP to include an assessment of fixed versus mobile and airborne capabilities for border security surveillance, including the short- and long-term costs and benefits of different assets.</p>	In DHS Review
2014	Alongside the FY 2015 Budget Submission	House Report 113-91, page 34; Explanatory Statement, Division F, Section 551	<p>FY 2014-FY 2017 Multi-Year Plan for Information and Technology – IT capability is essential to mission success; however, little visibility has been provided into how this investment is managed. IT costs and requirements must be transparent in order for the Committee to adequately assess the requests. Therefore, statutory language is included requiring CBP to submit a multi-year investment and management for fiscal years 2014–2018.</p>	In CBP Review

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2014	Alongside the FY 2015 Budget Submission	House Report 113-91, page 29; Explanatory Statement, Section 551	Inspection and Detection Technology FY 2014-FY 2017 Multi-Year Investment and Management Plan – The Committee continues to require the multi-year investment and management plan required by law for investments and operations of radiation detection equipment and non-intrusive inspection systems to be submitted with the fiscal year 2015 budget request.	In CBP Review
2014	Alongside the FY 2015 Budget Submission	Senate Report 113-77, page 36	WSM / Resource Optimization at the POEs FY 2014 – The Committee remains concerned about CBP officer staffing levels for Northern Border ports of entry. The Committee believes that many of the concerns about Northern Border staffing could be allayed by more complete reporting to Congress about CBP’s Northern Border staffing plans. The Committee directs CBP to submit an updated resource allocation model with the fiscal year 2015 budget detailing specific staffing and funding for, and implementation of, planned Northern Border enforcement initiatives by port of entry.	In CBP Review
2014	Alongside the FY 2015 Budget Submission	Explanatory Statement, Division F, page 18	CBPO Staffing Expenditure Plan – To meet the workload created by the increasing volume of trade and travel, the bill provides \$255,715,000 to increase the CBPO workforce by not fewer than 2,000 new officers by the end of fiscal year 2015. Without adversely impacting mission support, the Department is directed to include, within its forthcoming budget proposal, funds sufficient to fully annualize the cost of all new CBPOs to be hired in fiscal year 2014, and to submit a description of the hiring process and timetable for bringing all of the new officers on board. A schedule for conducting background investigations and	In CBP Review

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
			polygraphs shall be included in the required expenditure plan.	
2014	3/18/2014	House Report 113-91, page 33	Short-Term Detention Standards and Oversight (FY 2014) – Additionally, the Committee directs CBP to report to the Committee not later than 60 days after the date of enactment of this Act on the standards governing the conditions of custody and what oversight mechanisms CBP employs to monitor short-term detention conditions and lengths of detention.	In OMB Review
2014	3/18/2014	Senate Report 113-77, page 32	FY 2014 Financial Plan – To help facilitate congressional oversight, CBP is directed to submit to the Committee within 60 days after the date of enactment of this act, a financial plan reflecting a detailed breakout of funding by office for each PPA in the “Salaries and Expenses” appropriation. This financial plan shall include a comparison by office to the prior year plan amount and actual expenditures for fiscal year 2013 and planned expenditures for fiscal year 2014.	In CBP Review

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2013	3/26/2014	Consolidated Appropriations Act FY 2013, Senate Report 112-169, Section 555	Reimbursable Fee Agreements, Second Semiannual Submission – CBP shall provide semiannual reports on each request received to enter into reimbursable fee agreements for the provision of CBP services and other related costs, the reasons for its approval or denial, the anticipated and actual revenue received, and the service provided, including number of CBP officers funded.	In CBP Review

iv. Schedule of Authorized/Unauthorized Appropriations by PPA

Department of Homeland Security U.S. Customs and Border Protection

Schedule of Authorized/Unauthorized Appropriations by Program Project/Activity (Dollars in Thousands)

Budget Activity	Last Year of Authorization	Authorized Level	Appropriation in Last Year of Authorization	FY 2015 Request
	Fiscal Year	Amount	Amount	Amount
Salaries and Expenses	2003	3,083,259 ¹	3,195,094 ²	8,326,386
Automation Modernization	2011 ³	N/A	N/A	812,410
Border Security Fencing, Infrastructure, and Technology ³	N/A	N/A	N/A	362,466
Air and Marine Interdiction, Operations, Maintenance, and Procurement	2011 ⁴	N/A	N/A	708,685
Construction and Facilities Management	2011 ⁵	N/A	N/A	482,205
Total Direct Authorization/Appropriation	N/A	\$3,083,259	\$3,195,094	\$10,692,152
Fee Accounts				\$520,544
- Small Airports				8,789
- COBRA – Discretionary				131,591
- COBRA - CFTA				180,000
- IUF – Discretionary				200,164
Total, Discretionary				11,212,696

Note:

¹ For FY 2004, P.L. 107-210, section 311(b)(1) authorized \$1,683,667,050 for Commercial Activities and section 311(a)(2) authorized \$1,399,592,400 for non-Commercial Activities; in FY 2002 “Such Sums” were authorized for Agriculture, Plant and Health Inspection Service, which received \$730,710,000 in appropriations; and in FY 2003 \$2,739,695,000 was authorized for Immigration and Naturalization Service – inspection, investigations, Border Patrol, detention and deportation only, and \$3,195,094 was appropriated as follows: \$2,862,094,000 for FY 2003 INS Salaries and Expenses appropriation, and \$333,000,000 for FY 2003 Wartime Supplemental Appropriations Act, P.L. 108-11. P.L. 109-347, for FY 2010: section 203(g)(3) \$37,485,000 for “Automated Targeting System”, and section 205(m) (3) \$153,300,000 for the Container Security Initiative. P.L. 109-347, for FY 2010, section 223(a)(3) authorized \$75,600,000 for Customs-Trade Partnership Against Terrorism (C-TPAT) and for FY 2012, section 223(b)(5) authorized \$21,000,000 for C-TPAT additional personnel; and 19 U.S.C. 2075, as amended, section 301(h)(3)(E) authorized up to 1000 additional Customs and Border Protection Officers, \$217,000,000.

² Total for Salaries and Expenses, including for unauthorized activities such as immigration inspection and enforcement, Border Patrol, air and marine enforcement operations, and agriculture inspections.

³ Authorized in the Full Year Continuing Appropriations Act, 2011 – it has been authorized by appropriation since at least 2002

⁴ Authorized in the Full Year Continuing Appropriations Act, 2011 – it has been authorized by appropriation since at least 1985.

⁵ Authorized in the Full Year Continuing Appropriations Act, 2011 – Authorized by appropriation since at least 2002. Covers multiple authorized programs.

Payroll and Workforce Assumptions Included in the FY 2015 Budget

The FY 2015 Budget supports the following frontline staffing levels, which make up more than 80 percent of our workforce:

- 21,370 Border Patrol Agents (BPAs);
- 25,775 CBP officers (CBPOs) (includes an additional 2,000 CBPOs funded by FY 2014 appropriations, as well as up to an additional 2,000 CBPOs supported by proposed increases to user fees);
- 2,414 Agriculture Specialists; and
- 1,138 Air and Marine Interdiction Agents.

CBP's FY 2015 budget includes the following additional position assumptions, which CBP may adjust as operational requirements dictate:

- 2,376 Trade and Revenue positions; and
- 85 Polygraph Examiners.

To further explain the distribution of the funding requested for salaries and benefits for these positions, the following charts detail the FY 2015 funding for these positions, broken out by PPA. There is also a chart that details expenditures by PPA, as well as a breakout of CBPOs and BPAs by grade.

Exhibit II: Display of Payroll Related Requirements for Select Positions by PPA

Funding Source (PPA/Fee) (All amounts represented as \$ in thousands)	CBPOs in Baseline (21,775)	CBPO Initiative (700 Annualiz.)	BPAs (21,370)	Agriculture Specialists (2,383)	Trade and Revenue Positions (2,263)	AIAs / MIAs (1,138)	Polygraph Examiners (85)	Select Positions Total	PPA Total
Headquarters, Management, and Administration									
Commissioner	\$126		\$1,284					\$1,410	\$27,245

<i>Construction and Facilities</i> <i>Management Appropriation</i> <i>(Subtotal)</i>									\$482,205

Funding Source (PPA/Fee) (All amounts represented as \$ in thousands)	CBPOs in Baseline (21,775)	CBPO Initiative (700 Annualiz.)	BPAs (21,370)	Agriculture Specialists (2,383)	Trade and Revenue Positions (2,263)	AIAs / MIAs (1,138)	Polygraph Examiners (85)	Select Positions Total	PPA Total
Discretionary Fee Accounts									
COBRA-CFTA	\$180,000							\$180,000	\$180,000
Small airport user fee	\$8,574							\$8,574	\$8,789
<i>Discretionary Fee Accounts (Subtotal)</i>	<i>\$188,574</i>							<i>\$188,574</i>	<i>\$188,789</i>
<i>Net Discretionary (Subtotal)</i>	<i>\$2,359,036</i>	<i>\$56,279</i>	<i>\$3,538,260</i>	<i>\$6,799</i>	<i>\$270,168</i>	<i>\$193,971</i>	<i>\$13,070</i>	<i>\$6,437,583</i>	<i>\$10,880,941</i>
Fee Accounts									
Immigration inspection user fee	\$443,741							\$443,741	\$630,218
Immigration enforcement fines	\$306							\$306	\$752
Electronic system for travel authorization fee	\$285							\$285	\$54,929
Land border inspection fee	\$41,105							\$41,105	\$43,931
COBRA passenger inspection fee	\$392,395							\$392,395	\$482,501
APHIS inspection fee	\$32,590			\$325,599				\$358,189	\$464,514
Global Entry user fee	\$1,780							\$1,780	\$91,192
Virgin Island fee	\$8,915							\$8,915	\$11,789
Puerto Rico collections	\$26,731							\$26,731	\$98,076
<i>User Fees (Subtotal)</i>	<i>\$947,848</i>			<i>\$325,599</i>				<i>\$1,273,447</i>	<i>\$1,877,902</i>
Grand Total	\$3,306,884	\$56,279	\$3,538,260	\$332,398	\$270,168	\$193,971	\$13,070	\$7,711,030	\$12,758,843

Notes:

- This chart does not include positions associated with the proposed user fee increases in COBRA and IUF. If those positions are added, CBP would onboard approximately 2,000 additional CBPOs. In FY 2015, these increases in fees are estimated to generate an additional \$331.775 million, which will support approximately \$97.941 million for CBPO pay, with the remaining for training, equipping, and support costs.
- The CBPO Initiative reflected above represents the annual cost of the 700 CBPOs, who are projected to onboard in FY 2014. The remaining 1,300 positions of the 2,000 initiative are projected to onboard in FY 2015 and are funded with FY 2014 funding that will not expire until September 30, 2015. Of the \$165.715 million that is not set to expire until September 30, 2015, \$54.281 million is related to CBPO pay, with the remaining for training, equipping, and support costs.
- Because the staffing requirements of programs funded by user fees (e.g., Global Entry and ESTA) and/or reimbursable authorities (e.g., user fee airports and reimbursable inspection services) are constantly changing and generally growing, the numbers of CBPOs may vary depending on demands.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Salaries and Expenses

I. Appropriation Overview

A. Mission Statement for Salaries and Expenses

As the frontline border agency in the U.S. Department of Homeland Security (DHS), U.S. Customs and Border Protection (CBP) has the dual mission of preventing suspected terrorists and terrorist weapons from entering the United States, while also facilitating the flow of legitimate trade and travel into and out of the United States. CBP ensures that all persons and cargo enter the United States legally and safely through official checkpoints and ports of entry (POE).

The Salaries and Expenses appropriation funds all operating costs associated with CBP's accomplishment of its dual mission. CBP achieves its mission using a combination of advanced information, risk assessment, appropriate scanning and other technologies, and by partnering with Federal, state, local, tribal, and foreign law enforcement agencies as well as private industry and international partners. CBP's over 60,000 highly-trained employees ensure that the agency performs its mission with vigilance, integrity, and professionalism.

B. Budget Activities:

Headquarters Management and Administration

The activities funded within the Headquarters Management and Administration Program, Project, and Activity (PPA) provide critical policy and operational direction, mission support, including equipment, training, and technical expertise to CBP frontline personnel.

Border Security Inspections and Trade Facilitation at the Ports of Entry (POE)

CBP uses the resources of this PPA to mitigate the threats from terrorists and to prevent contraband from entering the U.S. while facilitating the legal flow of people and trade. CBP achieves this mission by deploying CBP officers (CBPO) to the POEs and by using a combination of technology, intelligence, risk information, targeting, and international cooperation to screen inbound international cargo and travelers and, in targeted border areas, to screen departing export cargo. Additional attention to outbound travel along areas of the southwest border also helps prevent the exit of money and weapons for illegal purposes.

CBP has extended a zone of security beyond U.S. physical borders through the use of bilateral and private-sector partnerships, targeting, and by scrutinizing advance information on people and products coming into this country. CBP is cultivating "smart borders" through the use of technology, has established a layered defense strategy and created a unified, recognizable

presence at the border to combine and capitalize on the authorities and skills of our diverse workforce.

Several of the inspection activities performed at ports of entry and their associated costs are authorized to be reimbursed by user fee revenues that are remitted to CBP on quarterly or monthly basis. These reimbursements impact the Salaries & Expenses (S&E), Automation Modernization, and Construction and Facilities Management Appropriations.

To manage the funding relationship between S&E and user fees, CBP leverages the S&E appropriation to fund activities related to the performance of customs, immigration and agriculture inspections at ports of entry, and then reimburses S&E to the extent fees are available from the Immigrations, Agriculture Quarantine, and COBRA inspections fees, and other reimbursable programs such as Reimbursable Enhanced Inspection Services.

The Offices of Field Operations and International Trade, as well as various mission support programs, employ the above described approach to fund certain inspection activities, including direct and indirect costs.

Border Security and Control Between the Ports of Entry

This PPA funds the United States Border Patrol (USBP) and the Joint Field Command (JFC). In FY 2015, CBP will continue implementing a USBP operational approach focused on information, integration, and rapid response capabilities in performing the mission of securing America's borders. This new strategy involves USBP moving from a resource-dependent approach to border security to a risk-based approach that enables rapid response to areas of greatest risk in the immediate border area. USBP will deploy its capabilities to align with the threats along the border. This is an ongoing process that will continue to adapt as threats change.

The new strategic plan places risk management at the core of Border Patrol's strategic planning. Through enhanced situational awareness and intelligence (information); coordinated operations with Federal, state, local and international partners (integration); and the ability to respond quickly to changing threats (rapid response), USBP will be able to put the greatest capabilities in place to combat the greatest threats.

C. Budget Request Summary:

CBP requests 47,964 positions, 46,889 FTEs, and \$8,326,386,005 for Salaries and Expenses in FY 2015. In total, this represents a change of 728 positions, 299 FTE and \$180,818,000 from FY 2014 to FY 2015.

Program Increases:

Development and Expansion of ADIS Capabilities: This increase of \$11.8 million will provide enhancements to ADIS to meet customer requirements and improve system functionality. Enhancements include development of a non-production repository for reporting and analysis; enhanced matching algorithms improve data quality and assist in national security targeting;

provide for more timely data sharing with the Intelligence Community for national security; Integration of ADIS to the CBP Enterprise Service Bus to provide better interoperability with external customer systems.

NII Equipment Refresh and Recapitalization: CBP is requesting an increase of \$11.7 million to begin replacing or refurbishing the fleet of NII equipment. The requested funds will be used to refresh or refurbish six large scale and ten small scale systems and tool trucks to ensure the continued viability of the NII program.

Develop National Border Geo-Intelligence Strategy and Establish Southwest Border Tracking System: Of the \$11.0 million enhancement, \$6.0 million will allow CBP to establish a geospatial tracking system for use across the southwest border that will record the location of all apprehensions, gotaways, and turnbacks. This system will enhance Border Patrol's ability to identify traffic patterns, improve data collection on key performance measures, and inform daily decisions on deployments of personnel and equipment.

This includes partial development of a southwest border-focused change detection capability, validation of current low-risk designated areas that are prioritized based on sector requirement inputs, execution of the collection strategy, creation of appropriate intelligence reporting, and structuring these processes into a constant and sustainable method of supporting mission requirements. This capability will establish a routine and regular assessment of changes along the border.

Fuel Sharing Initiative: DHS's Chief Readiness Support Office (CRSO) is leading a cross-Component Fuel Sharing Initiative to reduce costs and increase efficiency. This one-time investment of \$10.7 million will be used for installation and maintenance of the Radio Frequency Identification (RFID) technology, fleet card readers, gas pumps, tank gauges, and connectivity upgrades. The purpose of the initiative is to enable any DHS Component vehicle to obtain fuel from any CBP-controlled fueling facility along or near the southwest border, to reduce reliance on commercial fueling stations, resulting in overall reduced fuel costs.

CBP Mobile Program: CBP is requesting \$8.3 million to support the CBP Mobile Program. The requested funds will be used to both add to existing capabilities and to enable critical refreshments, refurbishments, or replacements for aging or non-functional equipment.

Replace Legacy MVSS in Rio Grande Valley: CBP is requesting \$275,000 to fund staffing associated with MVSS upgrades requested in the Border Security, Fencing, and Tactical Infrastructure (BSFIT) appropriation.

Replace legacy RVSS in Rio Grande Valley: CBP is requesting \$275,000 to fund staffing associated with RVSS upgrades requested in the Border Security, Fencing, and Tactical Infrastructure (BSFIT) appropriation.

Program Decreases:

Personnel Reduction Associated with Import Safety Initiative: The program change eliminates approximately \$6.0 million dollars in recurring funding for the FY 2010 Import Safety initiative. The reduction of this recurring funding would not allow CBP to hire an additional 52 personnel to support the 2010 Import Safety Mandate. The re-scoping of CBP's Import Safety funding will reduce the number of OT initiatives that would increase the efficiency and effectiveness of CBP's Import Safety mission. CBP will absorb these cuts as part of ongoing Trade Transformation initiatives.

Legacy ADIS Support and Operations and Maintenance: In FY 2015, the Department proposes the following reductions to ADIS: (1) a \$1.167 million reduction to ADIS critical system change requests; and (2) a \$0.543 million reduction to Independent Verification and Validation (IV&V) support. IV&V support will be reduced to commensurate with the critical system change reduction.

Eliminate Upgrades to Customs-Trade Partnership Against Terrorism (C-TPAT) Web Portal: The reduction of \$1.5 million from C-TPAT will slightly delay implementation of the C-TPAT 2.0 web portal migration efforts. CBP will work to limit the operational impact of the reduction by working with partners –foreign and domestic, public and private on data collection and processing. Web portal development will continue, albeit at a much slower pace than anticipated.

D. Savings and Reductions:

Some of the efficiencies and reductions shown below are spread across multiple sub object class codes.

Other contract Services Efficiencies

\$3.9 million

CBP-wide Information Technology (IT) Efficiencies (\$1.6 million): This efficiency is a CBP-wide IT Standardization initiative that will identify a common set of standards for IT hardware, reducing the variation of devices and number of vendors, increasing the opportunity for volume purchase power behind larger buys. CBP has also identified savings across the agency in FY 2015 that will be achieved by further reducing the use of mobile electronic devices.

Professional Services Contracts – (\$1.8 million): This efficiency is a CBP-wide contracts savings initiative that will identify an across-the-board 5 percent cut to contract services in common service areas. The intent is to reduce the variation and number of contracts, increasing the opportunity for better-defined needs, stronger funding controls, and strategic sourcing.

Personal Protective Equipment – (\$0.5 million): This efficiency will be achieved through a reduction to personnel protective equipment. The Personnel Protective Equipment (PPE) includes, but is not limited to: rubber gloves, aprons, face masks, and eye protection. Currently, CBP has a large stockpile of PPE and does not need to restock PPE in the long term.

Rent, Communications, Utilities, and Miscellaneous Charges Efficiencies **\$21.0 million**

Rent Savings from Mobile Workforce Initiative – (\$20.0 million): CBP plans to achieve this efficiency by expanding its Mobile Work Initiative. Beginning in the National Capital Region, and potentially expanding nationwide, this initiative will allow CBP to reduce footprint and facilities-related costs, while ensuring that operations are not impacted. These efforts will result in a 5 percent reduction in CBP’s leased footprint beginning in FY 2015.

CBP-wide IT Efficiencies – (\$1.0 million): This efficiency is a CBP-wide IT Standardization initiative that will identify a common set of standards for IT hardware, reducing the variation of devices and number of vendors, increasing the opportunity for volume purchase power behind larger buys. CBP has also identified savings across the agency in FY 2015 that will be achieved by further reducing the use of mobile electronic devices.

Professional Services Contracts – (\$0.009 million): This efficiency is a CBP-wide contracts savings initiative that will identify an across-the-board 5 percent cut to contract services in common service areas. The intent is to reduce the variation and number of contracts, increasing the opportunity for better-defined needs, stronger funding controls, and strategic sourcing.

E: Legislative Initiatives:

CBP is responsible for securing America’s borders against threats, while facilitating legal travel, trade, and immigration. This critical mission is carried out through the diligence of CBP’s personnel, as well as the use of intelligence, targeting, technology, infrastructure, and a broad range of other assets and capabilities.

As the guardians of America’s borders, CBP is responsible for protecting the United States and the American people from the entry of dangerous goods and people. This includes ensuring that all persons and cargo enter the U.S. through official Ports of Entry (POE); do so legally and safely; preventing the illegal entry of persons and contraband, while facilitating the safe and efficient flow of commerce into the United States; and enforcing trade and tariff laws and regulations.

CBP recognizes the critical role that CBPOs play in ensuring border security, preventing terrorism, strengthening international cooperation, and in securing and facilitating the trade and travel that is vital to the Nation’s economy. CBP operates 329 POEs, welcoming travelers and facilitating the flow of goods essential to our economy 24 hours a day, 7 days a week. Each day, almost 1 million people arrive at U.S. POEs by land, sea, and air.

In FY 2013, the total passenger volume was 6.4 percent higher than in FY 2011, and commercial air passenger arrivals during the same time period increased by 9 percent¹. The total import value in FY 2013 was nearly 40 percent higher than FY 2009 – and we expect these trends to continue. It is CBP’s mission to ensure that these travelers and cargo shipments do not pose a threat to our national security and are processed in a timely and efficient manner in order to facilitate legitimate trade and travel.

¹ Source: CBP’s Operation Management Reporting Tool.

Recent staffing deployments continue to indicate that additional CBPO staffing reduces wait times and transaction costs for cross border travel and trade, improves cargo release time frames, and increases enforcement effectiveness. Additional staff also enables CBP to expand CBP inspection services at new locations and during additional time periods requested by public and private stakeholders. All of these benefits – particularly the reduction in wait times – have a positive impact on the Nation’s economy.

CBP currently faces several challenges in providing adequate staffing to meet mission requirements for CBPOs. These challenges are described in detail in CBP’s *Resource Optimization at Ports of Entry, Fiscal Year 2013 Report to Congress*, and include fluctuating user fee collections that are dependent upon passenger volume for approximately 35 percent of the OFO annual financial plan, the growth of existing facilities and the construction of new facilities, increasing demands from growing passenger and cargo volume, and new requests for service from private and public stakeholders. This is further complicated by a complex and expanding mission, including pre-departure targeting for risk management, international partnerships, and outbound operations. Fee revenues have not kept pace with this growth in workload at our POEs.

In response to these challenges and the current fiscal environment, CBP is executing an aggressive multi-pronged strategy to improve POE operations that includes optimizing current business processes through the use of automation, best practices, and travel and trade programs, which strengthen security and maximize limited CBPO work hours. As we pursue additional resourcing options, these Business Transformation Initiatives are intended to help mitigate the staffing need identified by the Workload Staffing Model (WSM) in the near term. The staffing requirements identified by the WSM, as well as CBP’s strategy for addressing these needs, are detailed in the *Resource Optimization at Ports of Entry, Fiscal Year 2013 Report to Congress*, which is intended to be read in conjunction with these proposals.

Need for Legislative Proposals

Despite the efficiency gains that CBP will achieve by continuing to streamline its current processes and an enacted increase in appropriated funding in FYs 2014 and 2015 for an additional 2000 CBPOs, CBP will still face staffing and infrastructure challenges in FY 2015 and beyond. Air passenger volume increased by four percent in FY 2013 (compared to 2012) – exceeding 80 million annual passenger international arrivals in FY 2013.

To more effectively support current operations and to enable CBP to support new requests for service, CBP is seeking Congressional support for a series of legislative proposals to identify alternative sources of funding to provide for additional CBPOs and infrastructure requirements. These proposals would complement the WSM by creating a mechanism for CBP to better facilitate the flow of international trade and travel and allow CBP to fund additional CBPOs.

Legislative Proposal Details

1. Immigration User Fee and the Consolidated Omnibus Budget Reconciliation Act User Fee Increase

As part of its efforts to address CBPO staffing challenges at POEs, CBP proposes raising two user fees associated with CBP processing: the Immigration User Fee (IUF) and the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA) user fee.

- Over the years, increases in the IUF and COBRA user fees have not kept pace with either inflation or the cost of CBP operations.
- The IUF air and sea passenger fee was authorized in 1987 at \$5.00 and is currently set at \$7.00. This fee was last updated in 2001. If this fee had been adjusted for inflation since its authorization using the Consumer Price Index, it would currently be set at \$12.31.
- The COBRA air and sea passenger user fee was established in 1985 at \$5.00 and is currently set at \$5.50. These fees were last updated in 2007. If this fee had been adjusted for inflation since it was established using the Consumer Price Index, it would currently be set at \$10.83.
- Increases to other applicable fees under COBRA are requested as well and adjusted based on a proportionate increase to include the annual cap amounts. For example, CBP is proposing a \$.36 increase to the Express Consignment Courier Facilities Fee (ECCF).
- Additional CBPOs at ECCFs will allow CBP to inspect packages and clear holds more quickly for both commercial and non-commercial shipments.

- Total air passengers have increased by 9 percent since FY 2008. Budgetary pressures are lessening the availability of overtime as a tool for leveraging existing resources.

Lift of immigration inspection user fee limitation and IUF increase

Under the Immigration and Nationality Act, each sea passenger arriving in the U.S. is charged a \$7.00 fee if his or her journey originated from a place outside of U.S., other than certain regions. The budget includes a proposal to lift the exemption for passengers traveling from those regions so that the same fee will be applied to all sea passengers. Lifting this fee limitation will bring collections more in line with the cost of conducting sea passenger inspections as well as help modernize and create more efficient and effective business processes and systems in the cruise environment.

The Budget includes a proposal to increase the immigration inspection user fee by \$2.00. The current fees are \$7.00 for air and commercial vessel passengers and \$3 for partially exempted commercial vessel passengers whose trips originate in Canada, Mexico, the U.S. Territories, and adjacent Islands. This fee is paid by passengers and is used to recover some of the costs related to determining the admissibility of passengers entering the U.S. Specifically, the fees collected support immigration inspections, personnel, the maintenance and updating of systems to track criminal and illegal aliens in areas with high apprehensions, asylum hearings, and the repair and maintenance of equipment. CBP has also identified several automation and technology development initiatives to improve its business processes related to cruise ship processing, should this fee increase be realized, including mobile devices for passenger processing; automated passport control and Global Entry Kiosks; and Entry/Exit Biometric technology development, all for the cruise environment.

Together, the additional revenue collected from these increases would also fund 1,205 new CBPOs, which will reduce wait times at air and sea ports of entry, especially as cruise volumes continue to grow as projected in future years. Future budget requests will include an annual increase to the IUF to adjust for inflation.

Projected Impact: Raising IUF and COBRA

- CBP has proposed a \$2.00 increase to both the IUF and COBRA air and sea passenger user fees, proportional increases in other COBRA fee categories, and the lifting of a sea passenger exemption for certain passengers whose journey originated in some locations. The IUF increase for both air and sea passengers is projected to provide approximately \$200 million in additional funding, supporting up to 1,205 additional CBPOs. The COBRA user fee increase is projected to provide approximately \$131.6 million in additional funding, supporting up to 795 additional CBPOs. Future budget requests will propose increases in line with the Consumer Price Index.
- The projected impact of raising the two user fees is summarized in the table below.

User Fee	Additional Funding (\$K)	Number of CBPOs
IUF	\$ 200,164	1,205
COBRA	\$ 131,591	795
Total	\$ 331,755	2,000

Addressing Stakeholder Feedback

CBP intends to pursue the following actions as a way to assess existing user fees and explore options for new user fees:

- Report on Use of User Fees and Associated Service Levels - CBP will provide an annual electronic report to the general public and interested stakeholders to provide transparency on the amount of reimbursable activity that occurred and how the fees were spent to support this activity. The report will also provide annual average wait time data for high volume port locations receiving additional COBRA and IUF fee resources in order to assess the connection between service levels and resources. Each port's current average wait time will be measured against wait time averages from the prior year to measure the impact that the additional resources have made with respect to service levels and other related economic benefits.
- Allocation of Resources - As part of its resource optimization efforts, CBP is committed to improving service levels by increasing efficiency and throughput. This will be informed by OFO's WSM and achieved through CBP's transformation efforts.
- Accounting for Inflation in User Fees - It is the Administration's intent to adjust the IUF and COBRA fee annually for inflation. Barring a change to the underlying statutes governing these fees that would authorize such an adjustment, future budget requests (beginning in FY 2016) will propose increases in line with the Consumer Price Index.

Travel Promotion Act

Pursuant to authority provided by the *Travel Promotion Act of 2009* (TPA), CBP began collection of a fee as part of the introduction of the Electronic System for Travel Authorization (ESTA) on September 3, 2010. The \$14.00 fee contains two parts. The first, currently set at \$4.00 by regulation, ensures recovery of the costs of administering the ESTA program only. The Travel Promotion Act also requires CBP to collect an additional \$10.00 fee from every approved applicant to fund the promotion of tourism in the U.S. This surcharge is credited to a separate account known as the Travel Promotion Fund, which funds the Corporation for Travel Promotion (CTP), a non-profit corporation established by the Act to promote tourism and travel to the U.S., now known as Brand USA.

II. Summary of FY 2015 Budget Estimates by Program/Project Activity (PPA)

CURRENT SERVICES PROGRAM DESCRIPTION:

The Headquarters Management and Administration (HQ M&A), Commissioner PPA funds the organizational body responsible for providing critical policy and operational direction and mission support to CBP front-line personnel. As part of the overall management of CBP, this office develops long-range management plans for the efficient and effective operation of the organization. The Office of the Commissioner develops and reviews CBP policy guidance, prescribes rules and regulations, and issues internal instructions to provide guidance to CBP

employees that are consistent with regulations and the authority delegated by the Department of Homeland Security. The Executive staff supports and develops new policy and plans in alignment with the Commissioner's priorities, simultaneously ensuring that CBP's financial and personnel resources are available, and aligned for the development, articulation, and implementation of CBP's current and future mission priorities and direction.

The Commissioner and senior staff represent CBP in all executive level negotiations and in presentations of CBP's position with other federal agencies, Congress, foreign governments, and non-government associations and groups affected by the administration and enforcement of CBP laws and regulations. Executive level advisors and staff provide advice in planning short- and long-range strategies, activities, and projects; including proposals for assignment of resources necessary for the completion of projects having national and international impact.

Key Mission Area	Key Functions and Capabilities	Funding (Dollars in Thousands)
	<p>mobilize, deploy, and manage CBP resources in response to incidents, regardless of cause;</p> <ul style="list-style-type: none"> • Coordinates with, collaborates with, and supports the CBP operational components to promote the transmission of time-sensitive, mission critical information and ensure that the CBP communication strategy is in alignment; • Leads the coordination of CBP assets to ensure the effective allocation of resources and provide management oversight and direction of programmatic functions for CBP Headquarters and field components to prepare for and mitigate the effects of catastrophic events, such as a hurricane or a weapon of mass destruction/effect incident; • Provides strategic and operational planning support, plan development, and joint operational coordination within CBP; across DHS; with the Department of Defense (DoD); and with Federal, State, local, and tribal partners; • Oversees the CBP corporate support to deploy and train personnel, oversees and conducts response operations, develops measures and coordinates and manages support for national level Special Event Assessment Rating (SEER) and National Special Security Events (NSSE) venues, such as the Democratic and Republican national conventions, Presidential Inauguration, G-8/NATO Summit Conference, etc.; • Develops and facilitates the implementation of the Integrated Federal Operational Plans for CBP, in accordance with PPD-8 (Enhanced National Security and National Resiliency); and • Ensures and facilitates “whole-of-government” participation, within CBP and with Federal, State, local and tribal authorities, for the development and implementation of strategic and operational plans that shape and sustain the continuity of national border security. <p>***A CBP Commissioner’s initiative exists to move responsibility for the Situation Room from OIIL to the JOD in FY 2014. The CBP Commissioner’s Situation Room is a 24 x 7 law enforcement operations center</p>	

Key Mission Area	Key Functions and Capabilities	Funding (Dollars in Thousands)
	that serves as CBP's reporting and information coordination center and facilitates communication between CBP Headquarters and the field elements of the operational offices by reporting on terrorism-related and other significant incidents from across the CBP complex. In FY 2013, the Commissioner's Situation Room received 11,111 unique Significant Incident Reports from the field, produced 1,952 High Priority Border Patrol emails, 1,216 OFO emails, and 208 Air and Marine emails to senior leadership. The Situation Room responded to 404 Requests for Information from the DHS National Operations Center and produced 359 SPOT reports on critically sensitive incidents that warranted the attention of the DHS Secretary.	

Above amounts are estimates of funding to be spent on each function in the Office of The Commissioner.

Description of Select Adjustments to Base

Pay Adjustment for Workforce Sustainment: CBP is managing its workforce to best support our frontline and mission-critical needs. The pay adjustment for workforce sustainment includes salary dollars to maintain staffing in the critical support areas. This adjustment will enable CBP to sustain mission support positions to ensure that CBP's uniformed staff can remain dedicated frontline mission priorities, rather than being pulled into support activities. This increase represents \$1.5 million of the overall \$6.5 million adjustment.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A Chief Counsel PPA funds mission critical legal advice, representation, and counsel to CBP. The Office of Chief Counsel (OCC) handles all legal and ethics issues involving CBP's global operations, both domestic and foreign. The OCC PPA funding is essential to allowing CBP to lawfully execute its critical mission of protecting our homeland, while facilitating legitimate trade and travel.

The Chief Counsel is the chief legal officer of CBP and reports to the General Counsel, Department of Homeland Security, through a Deputy General Counsel. The Chief Counsel also serves as the CBP Ethics Officer and is the principal legal advisor to the Commissioner of CBP, CBP's senior executives and managers, and employees in their official capacities. OCC

attorneys provide legal services to CBP officials in matters relating to the activities and functions of CBP. OCC's comprehensive legal services to CBP include representing the agency in offensive and defensive litigation before federal courts, such as the Court of International Trade, the federal district courts and courts of appeal, and immigration courts; and representing the agency in all third-party administrative hearings, including those before the Merit Systems Protection Board (MSPB), Equal Employment Opportunity Commission (EEOC), Federal Labor Relations Authority (FLRA), arbitrators, administrative law judges for broker-related proceedings, and the Government Accountability Office (GAO) for procurement protest proceedings. OCC also assists with the collection and protection of revenue; provides appropriations and fiscal law advice; reviews contractual, procurement, and real property actions; ensures compliance of proposed agency actions and policies with legal requirements; trains CBP officials in a myriad of law enforcement, trade, and ethics matters, and prepares and reviews legislative proposals.

OCC has three major functional areas: Ethics, Labor and Employment; Enforcement; and Trade and Finance. Each functional area is supervised by an Associate Chief Counsel (Senior Executive Service or SES) at Headquarters, whose offices specialize in that functional area. In the field, Associate (SES) and Assistant Chief Counsels are located in major cities across the United States, providing "one-stop" legal services in all functional areas to CBP field managers in their geographic areas of responsibility. There are 28 offices within OCC, 27 in field locations, employing approximately 320 attorneys and support staff.

OCC does not set agency policy or priorities but supports agency priorities and initiatives as set forth by the Commissioner and senior executive management across the organization, often on tight deadlines and on matters of high visibility and great significance for the agency's mission. The current "in house counsel" model for legal services is one in which the agency pays salaries, benefits and expenses for a set number of attorneys and legal staff, and all requests for legal services and ethics advice are handled by OCC without additional cost. Funding provided to OCC is used to support all the resources needed to provide these legal and ethics services.

Legal and Ethics Services	<ul style="list-style-type: none"> Provide comprehensive, "one-stop" legal and ethics services to CBP. 	\$45,663

Performance

2013 Workload Statistics

- There are 28 offices within OCC, 27 field locations, employing 281 attorneys and support staff (as of the end of FY 2013).

- 281 attorneys and support staff opened over 42,291 new matters. In addition, 35,311 operation Streamline cases were also handled, bringing the overall case load to 77,602 matters in FY 2013.
- In FY 2013, OCC attorneys opened 915 new administrative cases, a 34 percent increase from FY 2012. This reflects a 51 percent increase in arbitrations and a 63 percent increase in MSPB cases. OCC attorneys reviewed 367 procurement files and provided advice on an additional 164 procurement matters, a 66 percent increase over FY 2012, and also reviewed 230 ethics matters, a 170 percent increase over FY 2012.
- In FY 2013, OCC attorneys recovered nearly \$29.4 million in outstanding revenue and \$2.8 million in liquidated damages.^[1]

Significant Recent Legal Work

- **ADCVD Litigation Strategy:** CBP is charged with collecting hundreds of millions of dollars in antidumping and countervailing duties (ADCVD) imposed by the Department of Commerce. OCC actively assists CBP with all aspects of ADCVD collections, from policy development to administrative collections to litigation. More than \$270.2 million in outstanding ADCVD debts have been referred to DOJ for litigation;
- **Duty Collection:** A predominant challenge to CBP is compelling importers and sureties to timely pay duties, taxes, and fees that are owed. A significant amount of CBP's collections litigation is against sureties, who have all the rights and remedies that are available to the principal on an import bond. OCC has also worked with CBP offices to improve regulations governing customs bonds to ensure that the integrity of bonds will not be compromised as the agency transitions to a fully electronic bonding environment.
- **Immigration:** OCC attorneys provided significant legal services on a range of immigration matters. OCC attorneys remain actively involved with the DHS Office of General Counsel (OGC) teams handling state immigration laws responses, unaccompanied alien children issues, and comprehensive immigration reform (CIR) efforts.
- **International Cooperation and Negotiations:** OCC provides substantial guidance and support to CBP operational offices to facilitate international cooperation on border security matters, including the negotiation and drafting of agreements and arrangements. Such initiatives include preclearance, information sharing, the Container Security Initiative, Secure Freight Initiative, operational liaison programs, Immigration Advisory Program (IAP), and trusted traveler and shipper programs. In recent years, this support has been provided in relation to the negotiation of new preclearance agreements, and the re-negotiation of existing agreements, with the governments of Aruba, Ireland, Bermuda, and most recently, Abu Dhabi, United Arab Emirates.
- **Jones Act:** OCC's trade and procurement/acquisition portfolio continues to grow both in size and variety, including Jones Act issues, contract reviews, GAO protests, environmental issues, broker and other customs law matters, classification disputes, bankruptcy, duty and fee collections, and similar matters.
- **Condemnation/Fence Cases:** OCC attorneys continue to provide ongoing advice and litigation support in over 200 condemnation cases in the Rio Grande Valley (RGV), the

^[1] This number is not the total amount deposited into the U.S. Treasury as a result of OCC's efforts, but represents a large sample of our FY 2013 results.

Western District of Texas, and California. OCC attorneys worked with DOJ and the United States Army Corps of Engineers (Corps) to reduce the initial value estimates and deposits made with the Court. These attorneys also works with DOJ and the Corps to recoup payments made to landowners who, through extensive and complex title research, are found not to be the rightful property owners.

- **Intellectual property rights (IPR):** IPR issues remain a significant portfolio, as does asset forfeiture more generally. OCC attorneys worked with other CBP offices on proposed legislation that would permit the agency to share information about and samples of possibly IPR violative imports and exports with rights holders.
- **Reimbursable Fee Agreements:** OCC attorneys gave practical legal advice that helped defray CBP's costs through several avenues, supporting greater border security. OCC attorneys worked closely with client offices to negotiate and implement the "Section 560" reimbursable fee agreements which were enacted as part of the FY13 rest-of-the-year appropriation.

FY 2015 Initiatives

- Increase use of OCC attorneys designated as Special Assistant U.S. Attorneys (SAUSAs) for consequence delivery;
- Expansion of skill and expertise in anticipation of increased IPR work (e.g., copyright, trademark, ITC exclusion orders); and,
- Development and delivery of Immigration Authorities legal training for academy students.

Description of Select Adjustments to Base

Pay Adjustment for Workforce Sustainment: CBP is managing its workforce to best support our frontline and mission-critical needs. The pay adjustment for workforce sustainment includes salary dollars to maintain staffing in the critical support areas. This adjustment will enable CBP to sustain mission support positions to ensure that CBP's uniformed staff can remain dedicated frontline mission priorities, rather than being pulled into support activities. This increase represents \$1.8 million of the overall \$6.5 million adjustment.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Congressional Affairs (OCA) is responsible for working with the United States Congress on behalf of CBP. It is OCA's responsibility to ensure that CBP is responsive to Members of Congress and their staff, and to committees and subcommittees having jurisdiction over CBP's mission sets, programs, and activities. OCA is also responsible for educating Members, staff, and committees on programs, initiatives, and authorities through various means of outreach. In addition, OCA advises CBP leadership on congressional activities, implements CBP's legislative agenda, and supports DHS's congressional activities related to CBP.

It is essential for OCA to maintain comprehensive knowledge of all agency programs and activities, and to stay abreast of all routine, special, or urgent Congressional interests. OCA collaborates with congressional staff on legislation, casework, and numerous inquiries spanning

the broad scope of the agency's operations, including border security, trade, and travel. In addition, OCA coordinates with Members, staff, and committees to provide reports, briefings, hearings, and visits. In order to fulfill these responsibilities, OCA has dedicated teams focused on the following areas: Budget and Appropriations; Border, Air, and Marine Operations; Trade and Agriculture; Field Operations and Intelligence; Strategic Planning and Outreach; and, Mission Support.

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
Budget and Appropriations	<ul style="list-style-type: none"> • The branch collaborates regularly with congressional staff from the House and Senate Committees on Appropriations. 	\$529
Border, Air and Marine Operations	<ul style="list-style-type: none"> • The branch collaborates regularly with congressional staff from the following committees: <ul style="list-style-type: none"> • House Homeland Security Committee • Senate Homeland Security and Governmental Affairs Committee • House and Senate Judiciary Committees 	\$399
Trade Policy and Agriculture	<ul style="list-style-type: none"> • The branch collaborates regularly with congressional staff from the following committees: <ul style="list-style-type: none"> • Senate Finance Committee • House Ways and Means Committee • House and Senate Agriculture Committees • Senate Commerce, Science & Transportation Committee • House Energy and Commerce Committee 	\$264

Strategic Planning and Outreach	<ul style="list-style-type: none"> • The Strategic Planning and Outreach Branch supports CBP's legislative and programmatic initiatives by proactively promoting greater understanding of, and increased support for, CBP operations, programs, policies, and initiatives among Members of Congress, 	\$264

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
	<p>congressional committees, and their staffs. The branch works in close partnership with CBP leadership and the Department of Homeland Security.</p> <ul style="list-style-type: none"> • The branch assists in articulating the long-term priorities of CBP leadership, strengthens collaboration among CBP component offices, and formulates integrated strategies for garnering congressional understanding and support. The branch also provides critical assessments of proposed strategic congressional action, and examines key strategic issues. • In support of OCA's outreach activities, the branch prepares various media to communicate CBP's programs, operations, policies, and priorities to Congress. The branch coordinates activities and events aimed at increasing congressional understanding of CBP's mission, operations, challenges, and successes. 	
Mission Support Branch	<ul style="list-style-type: none"> • The Mission Support Branch is the OCA lead for inter-office coordination of taskings, correspondence, reports, and FOIA requests. The branch manages OCA's budget planning and execution process, the creation of internal OCA policy, and CBP directives concerning congressional matters. OCA hiring practices, facility issues, and equipment, supplies and inventory maintenance are controlled by the Mission Support Branch. The branch provides support to the Assistant Commissioner and Deputy Assistant Commissioner and, through student interns and volunteers, office staff. • Through the correspondence process, the Mission Support Branch works with congressional District Office staff to accept, review, and provide updates on inquiries submitted by the Member's constituents. 	\$529

Above amounts are estimates of funding to be spent on each function in the Office of Congressional Affairs.

Congressional Staffer Academies

The CBP Congressional Staffer Academies (CSA) are a semi-annual, congressional outreach program designed to increase Congress' knowledge of the varied responsibilities of CBP by providing an informative field experience for congressional staff. CSAs provide insight into CBP operations and responsibilities with respect to border and national security. Participants

gain hands-on, real-life field experiences that mimic the activities of CBP agents and officers. These academies are invaluable in giving staff members a thorough perspective of the many tools and enforcement techniques that CBP personnel use to successfully execute CBP's mission. These CSAs are conducted twice a year and alternate between the southern and northern borders.

Congressional participants are selected from congressional offices and committees that have a direct interest in CBP funding and oversight matters. CSAs are tailored to the audience and specific operational aspects of the featured field locations and include instructors from Offices of Congressional Affairs, Field Operations, Border Patrol, and Air & Marine. This level of collaboration demonstrates the overlapping law enforcement roles of each office and showcases CBP's layered approach to national security. The intangible benefits of CSAs further CBP priorities and enhance congressional understanding of CBP operations and programs. CSAs are critical to ongoing proactive efforts to build close working relationships with congressional authorizers and appropriators.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A Internal Affairs PPA funds the Office of Internal Affairs (IA), which exercises oversight authority for all aspects of CBP security including operational, personnel, and facilities, as well as the CBP counterintelligence (CI) program (including cyber protection). IA's mission is to promote the integrity and security of the CBP workforce. IA performs and manages a wide variety of functions and programs distributed among seven divisions: Personnel Security, Investigative Operations, Integrity Programs, Credibility Assessment, Operational Field Testing, Security Management, and Management Inspections, as well as the Counterintelligence Operational Liaison Group. The primary responsibilities of each division/group are listed below.

- **Counterintelligence Operational Liaison Group:** Formulates and implements policies, practices and procedures that make the foreign penetration of CBP more difficult to accomplish and easier to detect.
- **Personnel Security Division:** Initiates and adjudicates background investigations (BI) on all CBP applicants, employees, and contractors.
- **Investigative Operations Division:** Conducts investigations of alleged criminal and serious, non-criminal misconduct on the part of CBP employees.
- **Integrity Programs Division:** Serves as the research, analysis, and education component of IA.
- **Credibility Assessment Division:** Conducts applicant screening polygraph examinations.
- **Operational Field Testing Division:** Assesses and evaluates the integrity of CBP's multilayered security systems.
- **Security Management Division:** Provides oversight for physical, information, industrial, and operations security programs.
- **Management Inspections Division:** Conducts inspections that provide CBP executive management with information concerning the effectiveness and efficiency of operations, programs, and areas of special interest or priority.

IA conducts investigations of alleged criminal and serious non-criminal misconduct on the part of all CBP employees. The office coordinates its internal investigative activity with the Department of Homeland Security's Office of Inspector General, U.S. Immigration and Customs Enforcement's (ICE) Office of Professional Responsibility, the Federal Bureau of Investigation, and numerous other Federal, state, and local law enforcement authorities.

IA has implemented a strategy, which integrates prevention, detection, and investigation capabilities to deter, disrupt, and respond to corruption and serious misconduct in the CBP workforce. The strategy employs:

- Improved personnel security screening of prospective CBP employees;
- Polygraph examinations of law enforcement candidates as mandated by the *Anti-Border Corruption Act of 2010* (P.L. 111-376);
- Application of behavioral and analytical research tools to identify potential indicators of corruption;
- Intelligence-driven investigative responses to instances of criminal corruption and serious misconduct on the part of CBP employees; and

- Research (data) and analysis (behavior) conducted by the Integrity Programs Division designed to detect corruption, develop data/intelligence to drive the focus of integrity investigations, and apply “Insider Threat” methodologies for advanced detection of possible integrity threats.

A top priority for IA is remaining current with the initiation of all periodic reinvestigations (PR) for all CBP law enforcement personnel and conducting polygraph examinations on 100 percent of all law enforcement applicants before being hired for such positions as mandated by the *Anti-Border Corruption Act of 2010*. As an efficiency measure, the polygraph examinations are placed at the beginning of the applicant screening process, prior to the scheduling the full background investigation, to ensure investigative resources are only being expended on viable candidates. Those who do not successfully complete the polygraph examination are no longer considered for employment with CBP, which allows CBP to avoid the costs associated with conducting BIs on unsuitable Law Enforcement Officer (LEO) candidates.

Exhibit 2: Internal Affairs FY 2015 Funding Request by Division

Key Mission Areas	Key Functions and Capabilities	Estimated Funding (Dollars in Thousands)
Credibility Assessment	Polygraphs	\$14,813
Personnel Security	Background and Periodic Re-investigations	\$55,174
Investigative Operations	Conduct & Integrity Investigations	\$35,372
IA Management and Other Programs	Analyses, Assessments, Evaluations, and Inspections; Security	\$34,782

Above amounts are estimates of funding to be spent on each function in the Office of Internal Affairs.

Performance

Corruption of the CBP workforce is a national security issue. Corruption adversely affects the successful execution of the CBP mission and CBP’s ability to secure the borders while facilitating lawful trade and travel. IA is responding to the threat of workforce corruption and misconduct in a variety of ways to more effectively and efficiently deal with the problem.

Between FY 2009 and FY 2013 (as of 9/30/2013), CBP IA:

- Opened in excess of 130,000 background investigations;
- Administered in excess of 21,000 polygraph examinations; and
- Received and documented in excess of 33,000 allegations of CBP employee misconduct or other reportable matters and completed in excess of 6,500 internal affairs investigations.

Working Capital Fund Activity

CBP's Working Capital Fund (WCF) costs that are paid from the HQ M&A Internal Affairs PPA are provided below. Additional WCF costs are paid from the HQ M&A Administration and Training and Development PPAs, as well as the Automation Modernization appropriation.

CBP Office	Working Capital Fund (CBP)	FY 2015 Anticipated Charges
IA	HSPD12	\$ 5,595,705
	HQ M&A, Internal Affairs Total	\$ 5,595,705

Description of Select Adjustments to Base

Pay Adjustment for Workforce Sustainment: CBP is managing its workforce to best support our frontline and mission-critical needs. The pay adjustment for workforce sustainment includes salary dollars to maintain staffing in the critical support areas. This adjustment will enable CBP to sustain mission support positions to ensure that CBP's uniformed staff can remain dedicated frontline mission priorities, rather than being pulled into support activities. This increase represents \$1.7 million of the overall \$6.5 million adjustment. For the Internal Affairs PPA, this also provides an adjustment in FY 2015 to account for positions no longer expected to be attrited in FY 2014.

Greater Cost Recovery due to Increase AQI Fee Increase: CBP anticipates receiving an additional \$92.7 million from APHIS in FY 2015. USDA completed a comprehensive fee study on its fees in FY 2012. In FY 2013, USDA drafted the updated regulation to adjust the user fee rates. At the time of this budget submission, the new regulation has not been published; however, USDA expects that the full implementation will take place in FY 2015. This \$92.7 million projection is based on the assumption that a fee increase will be implemented starting in the second quarter of FY 2015. This increase of \$92.7 million will be used to recoup additional agriculture inspection costs incurred in CBP's S&E, Automation Modernization, and Construction and Facilities Management appropriations in FY 2015. This additional \$92.7 million will allow CBP to recoup approximately \$50.563 million in S&E, \$29.005 million in Automation, and \$13.132 million in the Construction and Facilities Management appropriations. Of the \$50.563 in S&E, \$3.737 will be recouped in the Internal Affairs PPA.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A, Public Affairs PPA funds the Office of Public Affairs (OPA), which is responsible for informing and managing the flow of information to the public about CBP and its missions, accomplishments, and ongoing operations. OPA primarily accomplishes this through its Major Market Media, Multi-Media Productions, Strategic Outreach Support, CBP Information Center/Business Intelligence Center, and Liaison to Television and Movie Productions divisions.

Exhibit 1: Public Affairs Key Functions and Capabilities by Key Mission Area

Key Mission Areas	Key Functions and Capabilities	Associated Funding
Major-Market Media	<ul style="list-style-type: none">• Researches and provides requested CBP information, pitches CBP stories, hosts media visits, organizes interviews, coordinates and clears statements, researches and clears press releases, prepares CBP spokespersons, responds to breaking news, and responds to critical incidents.	\$3,919
Multi-Media Productions	<ul style="list-style-type: none">• Composes, scripts, produces, and delivers useable minutes of multi-media product, including live broadcasts, videos, webcasts, audio recordings, graphics, and photo imagery.	\$1,829
Strategic Outreach Support	<ul style="list-style-type: none">• Manages CBP formal presentations for outward facing events, including participation in conferences, trade symposiums, and targeted emphasis programs;• Manages all CBP internal and external facing web content, web appearance, and web currency; and• Manages CBP's history programs.	\$2,612
CBP Information Center / Business Intelligence Center	<ul style="list-style-type: none">• Accepts for action and organizes the response to all requests for information and complaints from CBP clients, customers, and stakeholders; and• Analyzes client/customer intake and provides analysis to CBP offices.	\$2,352
Liaison to Movie and Television Productions	<ul style="list-style-type: none">• Manages all CBP interaction with commercial television production ventures; pitches story concepts and reviews proposals; coordinates approvals and on-site interaction between production companies and CBP offices.	\$2,352

Above amounts are estimates of funding to be spent on each function in the Office of Public Affairs.

While it is not a separate mission area, another key OPA activity is to serve as the coordinating office for CBP's Blue Campaign. The CBP effort to combat human trafficking stretches across CBP and includes efforts from USBP and OFO, as well as those of OPA itself. Moreover, CBP works in conjunction with partners such as foreign embassies and the private sector in an effort to raise awareness of this issue and help train personnel to combat human trafficking. Examples of specific CBP campaign programs include No Te Engañes – an international campaign to raise awareness among potential victims by depicting the harsh realities of the crime, as well as the Blue Lightning Initiative – an outreach program to US commercial airline crew that assists in training them to identify human trafficking in airports and during flights. USBP and OFO are also involved in many daily operations that combat human trafficking as part of their core mission. For example, OFO has a total population of 417 canine teams devoted to dealing with human smuggling and narcotics. This has led to tangible results in detecting smuggled aliens. In FY 2012, CBP OFO canine teams found 41 people being smuggled into the United States, and this number escalated to 73 people in FY 2013. USBP has fully integrated their

efforts into daily operations. BPAs receive training for identifying possible human trafficking incidents when they encounter suspects, and agents screen/interview all unaccompanied minors for human trafficking in accordance with the Trafficking Victims Protection Reauthorization Act of 2008.

Description of Select Adjustments to Base

Pay Adjustment for Workforce Sustainment: CBP is managing its workforce to best support our frontline and mission-critical needs. The pay adjustment for workforce sustainment includes salary dollars to maintain staffing in the critical support areas. This adjustment will enable CBP to sustain mission support positions to ensure that CBP's uniformed staff can remain dedicated frontline mission priorities, rather than being pulled into support activities. This increase represents \$896,000 of the overall \$6.5 million adjustment.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A, Training & Development PPA funds the Office of Training & Development (OTD), which provides mission critical training for all employees, other than BPAs and CBPOs.

The Training at the Ports of Entry and Training Between the Ports of Entry PPAs support the training of CBPOs and BPAs.

The Office of Training and Development is responsible for the centralized leadership and direction of all training programs for the CBP workforce. OTD manages CBP's National Training Plan (NTP), which prepares employees to carry out the core missions of CBP by providing basic and advanced training based on identified agency and organizational requirements.

OTD establishes and upholds standards for designing, developing, delivering, and evaluating training to ensure the agency's training programs are transparent, accountable, and legally defensible. OTD also maintains a robust distance learning program (the Virtual Learning Center) that enables CBP to deliver hundreds of training courses to CBP personnel in an efficient and cost effective manner.

This PPA funds basic, advanced, and supervisory/management/leadership training for a wide range of CBP employees; training course development and maintenance costs; operating costs for CBP's on-line training, course scheduling, and management systems; and salaries and benefits for OTD's mission support activities. Funding levels requested for this area in FY 2015 will enable CBP to achieve targeted FY 2015 staffing levels for positions covered under this PPA, and maintain mission critical skills and certifications of existing employees.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A Technology Innovation and Acquisition PPA funds the Office of Technology Innovation & Acquisition (OTIA), which provides a central office for two major functions essential to the future effectiveness of CBP. First, it is charged with ensuring that all border security technology efforts are properly focused on mission outcomes and are well integrated across CBP. Second, it is charged with strengthening CBP's expertise and effectiveness in acquisition and program management of contractor-delivered products and services. The office is responsible for providing the necessary training to its acquisition workforce. OTIA administers policy and acquisition oversight for all CBP program management offices, and will develop a standard requirements coordination process for CBP. The Office is also responsible for providing management oversight for major acquisition programs, including evaluating success, risk management, identifying redundancies, and quality assurance.

The Assistant Commissioner for OTIA is CBP's Component Acquisition Executive (CAE). The CAE is the senior acquisition official responsible for implementation of management and oversight of all CBP acquisition processes and programs. The CAE synchronizes these processes with those of the Head of the Contracting Activity (HCA) and those of the CBP Chief Information Officer (CIO). The CAE's other responsibilities include tracking the extent to which requisite resources and support are provided to Program Managers to ensure successful and effective acquisitions, managing CBP's acquisition portfolio to ensure consistency with DHS missions and strategic goals, and executing Acquisition Decision Authority responsibilities when delegated. The CAE seeks to develop a capable, mature, efficient, and effective organization for acquisition governance and execution.

Total	25,374	100.00%

OTIA Mission Statement

The mission of OTIA is to conduct and facilitate the effective identification, acquisition, and lifecycle support of products and services, while driving innovation to improve CBP's mission performance in securing the border and facilitating the lawful movement of goods and people.

OTIA Vision Statement

OTIA is a recognized center of expertise and partner of choice for program management, acquisition, and innovation. OTIA recognizes and rewards excellence, provides program-centric

services, and consistently delivers innovative products and services that continually improve CBP performance.

OTIA performs this mission by providing the following services and expertise through the following capabilities:

Exhibit 2: Technology, Innovation, & Acquisition Key Functions and Capabilities by Division

OTIA Functional Area	OTIA Key Functions and Capabilities	Funding (Dollars in Thousands)
Assistant Commissioner	<ul style="list-style-type: none"> • Assistant Commissioner (AC) is charged with ensuring that all of CBP's technology efforts are properly focused on mission and are well integrated across CBP; • Responsible for oversight of strengthening CBP's expertise and effectiveness in acquisition and program management of contractor-delivered products and services; • AC serves as the CBP's Component Acquisition Executive (CAE) and is responsible for implementation of management and oversight of all CBP acquisition processes and programs; synchronizes these processes with the contracting and procurement processes from the Head of Contracting Activity (HCA) and the information technology processes from the CBP Chief Information Officer (CIO); • The Mission Support Division (MSD), led by the Chief of Staff, is committed to being a premier, mission focused customer-oriented organization that provides to meet the needs of OTIA employees; and • MSD supports OTIA by providing guidance and offering solutions on a broad range of functions within human capital and technology support. 	\$1,806

OTIA Functional Area	OTIA Key Functions and Capabilities	Funding (Dollars in Thousands)
Acquisition Policy and Oversight	<ul style="list-style-type: none"> Assists the Assistant Commissioner to develop and promulgate appropriate governance structures, policies, and procedures in furtherance of the overall goals and objectives of OTIA; Serves as Executive Secretariat to defined governance structures that support OTIA's roles in acquisition oversight, resource management, and technology innovation; Administers and monitors CBP's Acquisition Certification program in collaboration with DHS for all acquisition functional areas of expertise; Develops human capital strategies to strengthen CBP's acquisition and technology innovation competencies, to include enhancement of the qualifications and capabilities of the acquisition workforce; Serves as the liaison with DHS on acquisition and program management related councils and working groups; and, Establishes, implements and oversees acquisition improvement initiatives; and Provides formal training for program managers. 	\$2,407
Acquisition Management	<ul style="list-style-type: none"> Provides focused support and guidance to CBP program and project offices concerning acquisition and procurement processes, for pre/post-award Commodity/Services and Sustainment contracting activities; formulation of acquisition strategies, and acquisition documentation. 	\$1,805
Systems Engineering	<ul style="list-style-type: none"> Provides systems engineering products for OTIA program/projects including all test and evaluation (T&E) activities; environmental impact and systems security analysis/planning; and modeling and simulation analysis support; Provides guidance and mentoring for the SE processes through participation in Integrated Product Teams (IPTs) and leading Technical Review Teams; 	\$5,115

OTIA Functional Area	OTIA Key Functions and Capabilities	Funding (Dollars in Thousands)
Systems Engineering	<ul style="list-style-type: none"> • Applies systems engineering with Lead Technical Authority (LTA) for all CBP non-IT program and project Systems Engineering Life Cycle technical reviews; • Develops, manages, and executes industry best practices in Technical Management and Technical Processes; • Establishes and coordinates alignment of all program/project requirements and technologies to the CBP and DHS Enterprise Architectures through architectural analysis; and, • Serves as the principal liaison between DHS Office of Science and Technology (S&T) and CBP. 	
Program Management	<ul style="list-style-type: none"> • Develops strategic plans and initiatives to meet the current and future acquisition requirements for Level I, II, and III acquisitions; • Serves as a strategic acquisition and program management advisor for mission programs; • Implements, oversees and ensures that CBP acquisition programs comply with acquisition policies and procedures; • Provides oversight of CBP mission program and project offices; • Works closely with the Office of Integration and Analysis to ensure risk-based and gap analyses and adequate requirements gathering are conducted and analyzed; and, • Provides direct and indirect technical and operational advice and support to Procurement Directorate (PD) staff in the Office of Administration (OA) for pre-award and post-award activities. • Provides direct oversight of the CBP Transportation Program, which provides an integrated system of detainee transportation and security along the southwest border. This program significantly reduces the numbers of CBP officers and agents that would be used in securing and transporting 	\$8,373

OTIA Functional Area	OTIA Key Functions and Capabilities	Funding (Dollars in Thousands)
	illegal detainees, allowing them to focus on their traditional law enforcements operations.	
Business Operations	<ul style="list-style-type: none"> • Provides guidance and oversight on all business and financial management related aspects; • Creates and implements cost estimating tools, processes and training; • Maintains controls over financial reporting, integrates operational requirements with strategic planning in order to create program targets that align resources to prioritized CBP and DHS strategic goals; and, • Composes congressionally mandated reports, including expenditure plans, multi-year investment and management plans, and congressional justifications. 	\$2,859
Logistics and Sustainment	<ul style="list-style-type: none"> • Performs life cycle management and oversight of OTIA program technology logistics and sustainment following successful government acceptance; • Manages and oversees the OTIA depot operations program used for the repair and supply chain support of border enforcement technology; • Manages and oversees the OTIA in-service engineering activity charged to manage system technical baselines deployed in the field; • Manages and oversees the software support activity charged with the sustainment and management of system software and firmware deployed in the field; • Manages and oversees the OTIA asset management program providing visibility and accountability to fulfill field supply chain needs and financial reporting requirements; and, • Establishes and promulgates policy to ensure logistics and sustainment considerations are included in all acquisition processes and decision making. 	\$1,956

OTIA Functional Area	OTIA Key Functions and Capabilities	Funding (Dollars in Thousands)
Operational Integration & Analysis	<ul style="list-style-type: none"> • Supports end-user organizations with processes, tools, and subject matter expertise so that the end users can properly identify, document, and gain approval for their requirements; • Establishes processes, procedures, and products to assist in the identification, documentation, and validation of operational requirements that cross CBP operational organizations; • Assists the end users in establishing and documenting the intended purpose, use, and concept of operations (CONOPS) for proposed goods and services that would meet an operational requirement; • Provides test and evaluation expertise to ensure project readiness and to assist end users in their determination of a system's worthiness; and, • Coordinates closely with the CBP's program and management offices to review the progress of CBP programs and projects, ensure end-users are kept informed of status, enable end-user participation and involvement in key program and project management activities, and increase the likelihood that delivered goods and services are consistent. 	\$1,053
TOTAL		\$25,374

Above amounts are estimates of funding to be spent on each function in the Office of Technology Innovation and Acquisition.

Description of Select Adjustments to Base

Realignment of Transportation Program Management Office: In FY 2015 \$622,000 will be transferred to the Technology Innovation and Acquisition PPA to fund 4 support positions in the Transportation Program Management Office (TPMO). The TPMO will support USBP by managing a transportation contract that reduces the numbers of agents that would be used in securing and transporting illegal detainees, and allows them to focus on their traditional law enforcements operations.

Realignment to Establish TARS Program Management Office: In FY 2015 \$885,000 and 6 FTEs will be transferred to the Technology Innovation and Acquisition PPA to fund additional FTEs needed to establish the TARS Program Management Office (PMO). The TARS PMO will manage a contract that will allow TARS to detect compliant and non-compliant low-altitude aircraft attempting to smuggle narcotics or other contraband into the U.S.

MAJOR ACQUISITIONS:

Block 1

The main mission for Block 1 Sustainment is increased situational awareness and persistence surveillance across the Tucson and Ajo Stations within the Tucson Sector. Block 1 technology supports U.S. Customs and Border Protection (CBP) agents and officers to effectively detect, identify, classify and resolve illegal incursions at the border. Block 1 includes a deployment of towers with a suite of integrated day and night cameras, radars, unattended ground sensors and a communications package. Block 1 also includes an initial version of a common operating picture, which is the system that integrates the sensors, and displays the results at a command center. Block 1 covers approximately 53 miles of international border in Arizona.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered “mixed non-IT/IT.”

Block 1 is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- BSFIT Operations & Maintenance \$17.202 million
- Technology Innovation and Acquisition \$0.421 million

Integrated Fixed Towers (IFT)

Integrated Fixed Towers (IFT) is a system that provides automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. In threat areas where mobile surveillance systems cannot be a viable and/or long term solution, IFTs equipped with sensor suites and communication equipment, can be deployed to provide automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. When multiple IFT units are integrated into a system with a common operating picture (COP), Border Patrol will be able to increase situational awareness and be able to monitor a larger area of interest. With an IFT system, a single COP operator can maintain persistent surveillance over a large area whereas previously, multiple agents exposed to threats were required to provide coverage in the same amount of area.

IFT is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- BSFIT Operations & Maintenance \$25.002 million
- Technology Innovation & Acquisition \$1.587 million

Mobile Surveillance Capabilities (MSC)

The purpose of the MSC is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers. Capabilities are detection, identification, and tracking of items of interest (IOI's) until successfully culminating in a law enforcement conclusion. Sensory equipment may include electro - optical/infrared (EO/IR) cameras, ground surveillance radars (GSR), laser range finders, laser illuminators, global positioning systems (GPS), and command, control, communication (C3) systems.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered "mixed non-IT/IT."

MSC is proposed to be funded out of two PPAs in FY 2015, as follows:

- BSFIT Operations & Maintenance \$12.581 million
- Technology Innovation & Acquisition \$0.278 million

Northern Border Remote Video Surveillance Systems (NBRVSS)

The Northern Border RVSS (NB - RVSS) systems consist of day night cameras attached to fixed towers, which allows the Border Patrol to monitor border activity through video transmissions to a control room. This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. The NB - RVSS towers have expanded the coverage at the Northern Border where highly trafficked and illegal activities exist.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered "mixed non-IT/IT."

NBRVSS is proposed to be funded out of two PPAs in FY 2015, as follows:

- BSFIT Operations & Maintenance \$10.362 million
- Technology Innovation & Acquisition \$0.421 million

Remote Video Surveillance Systems (RVSS)

A Remote Video Surveillance System (RVSS) is a remotely controlled system of either daylight or infrared cameras mounted to a permanent structure. The images are transmitted, monitored, and recorded at a central location. This system is deployed to monitor large spans of the international border or Critical Transit Nodes. This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. These additional RVSS towers will expand the coverage of the RVSS system in Arizona in areas that are highly trafficked with illegal activities.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered mixed non-IT/IT.

RVSS is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- BSFIT Development & Deployment \$44.880 million
- BSFIT Operations & Maintenance \$1.889 million
- Technology Innovation & Acquisition \$1.298 million

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A, Intelligence and Investigative Liaison PPA funds the Office of Intelligence and Investigative Liaison (OIIL), which administers CBP's intelligence and targeting programs. These programs support a flexible enforcement capability that anticipates and detects potential threats to our security, economy, and public safety. Serving as a powerful partner that connects law enforcement and intelligence communities, these programs develop, provide, and coordinate

capabilities to support CBP's primary mission to secure our borders while facilitating legitimate trade and travel. CBP's intelligence and targeting programs work to:

- Detect threats away from our borders;
- Identify travelers and shipments according to the threat they pose;
- Integrate and coordinate our intelligence and targeting capabilities; and,
- Establish stronger partnerships with domestic and foreign partners.

CBP's strategic approach, both at and between the ports of entry, relies on risk management. Segmenting the flows of people and goods by the risk they pose allows CBP to focus law enforcement efforts on the relatively small fraction of goods and people that pose a threat to public safety and economic prosperity. This strategy depends on reliable and timely intelligence and information for success, from which informed judgments can be made about the risk posed by people and goods that we encounter. Effective intelligence not only involves the identification of known threats and hazards, but also facilitates the identification of unknown dangerous people and goods that, because of their anonymity, often pose a greater threat to the security and safety of our country, citizens, and interests. CBP's intelligence and targeting capabilities are force multipliers and have proven their return on CBP's investment.

OIIL provides CBP front line operators and decision-makers with current, relevant situational awareness and facilitates operational responses for all crimes, threats, and hazards throughout the various CBP areas of responsibility (AOR), by using resources such as the Intelligence Coordination Team (ICT) in Detroit, the Tucson Intelligence and Operations Coordination Center (IOCC), the 24/7 National Intelligence Watch, and OIIL personnel at the El Paso Intelligence Center (EPIC). Through the collection and production of intelligence and analytical products, OIIL provides intelligence and deploys technical, analytical, targeting, and collection management tools in support of front line border operations to all geographic AORs.

It is through the commitment and dedication of OIIL personnel that DHS and CBP have the capability to provide protective measures on a day-to-day basis. CBP has become a leader in innovation and development of methodologies and techniques dedicated towards thwarting any attempts to penetrate our nation's borders and attacking our critical infrastructure. Additionally, CBP continues to develop its layered risk management approach to safeguarding U.S. borders from threat by land, air, and sea. This multi-layered strategy accounts for legislative and regulatory initiatives, international and trade-organization partnerships, improved automation support, new detection technologies, enhanced personnel training, and a combination of local and national targeting expertise. CBP recognizes that no single strategy or risk assessment is 100 percent effective and accurate, so it focuses on layering multiple initiatives together to accomplish its mission. CBP works aggressively with government partners, foreign and domestic, to make improvements regarding data timeliness and quality, which augments the abilities of highly trained CBP personnel by providing them the ability to use cutting edge technology for targeting, detecting, and securing terrorists, or implements of terrorism destined to the United States.

	<p>information and data collected; and</p> <ul style="list-style-type: none"> • Provides reporting to drive operational planning in the Detroit area of responsibility (AOR).
<p>El Paso Intelligence Center (EPIC)</p>	<ul style="list-style-type: none"> • Collaborates with interagency resources in order to collect all relevant, actionable, and perishable information to enhance interdiction and attract investigative resources to the CBP mission; • Identifies the most effective way to mitigate risks imposed by TCOs through utilization of a risk-based management system that allows for a greater ability to enhance situational awareness, identify TCO threats, tactics, and procedures and reveal vulnerabilities in existing enforcement layers; • Identifies and fills intelligence gaps, and provide tactical intelligence to law enforcement operations, including CBP's frontline personnel in the AOR. • Facilitates the timely and expeditious sharing of criminal information and intelligence between and among participating agencies to provide critical information and support; • Directly supports the Joint Field Command (JFC), the South Texas Campaign (STC), and the New Mexico/West Texas Alliance to Combat Transnational Threats (ACTT) across the entire spectrum of threats; and • Responds to RFI and analytical targeting training from OFO and OBP units in the AOR.
<p>Intelligence and Operations Coordination Center (IOCC)</p>	<ul style="list-style-type: none"> • Centralized location for CBP field leadership to plan and coordinate joint operations and share intelligence with CBP operational components and their partners, to enable CBP to transform into a more intelligence driven organization and to ensure continuity and sustainability of national border security; • Establishes a single venue for increased operations coordination while facilitating the flow of classified and unclassified information to CBP components and their partners, to strengthen communications and relationships, and to establish a unified enforcement posture at and between the ports of entry; • Aids field leadership in directing joint operations and establishing the primary focus to determine the direction and tempo of joint operations and establish priority intelligence requirements in the AOR; • Strives to meet the integrated priorities and goal of the IOCC to coordinate intelligence and operations across all three CBP operational components, creating synergy and optimizing the potential for each component's organic intelligence assets to rapidly disseminate information to all operators and leaders with a focus on smart operations and efficient resource allocation. • Provides a CIP and a Common Operating Picture (COP) to make

Key Mission Areas	OIIL Key Functions and Capabilities
	<p>recommendations to leadership in operational decision making;</p> <ul style="list-style-type: none"> • Works with Federal, state, local, tribal, or international partners to establish relationships to effectively engage other agencies with interests and assets in the AOR; and • Coordinates and provides liaison support to facilitate cross-organizational operations, CBP operations involving non-CBP elements from throughout the IC, and international, state, local, and tribal partners and authorities.

MAJOR ACQUISITIONS:

Analytical Framework for Intelligence (AFI)

The goal is to provide a suite of “force multiplication” tools that automate CBP analyst tasks regarding data access, query and information retrieval, analysis, and reporting. AFI will be fully integrated with other endeavors that seek to accomplish similar but discretely different or additional objectives, such as the CBP Intelligence and Operations Framework System (IOFS), ICEPIC, SBInet, and other intelligence analysis applications currently in planning or production stages, to ensure such initiatives complement one another and avoid unnecessary duplication

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
18,337	23,337	23,388

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
AFI System Development (21,837)	Analyze/fuse/disseminate terrorism information	AFI has evolved into a data analysis and intelligence product creation and dissemination platform that supports multiple DHS components, specifically Customs and Border Protection (CBP) and Immigration and Customs Enforcement (ICE).
	Prevent illegal import and entry	AFI leverages existing legacy systems and provides an enhanced query, analysis, production, collaboration, and dissemination tool.). The AFI system provides additional capabilities to DHS in the gathering, analysis, information sharing, and reporting of critical intelligence information within DHS and other law enforcement partners.
Homeland Secure Data Network Infrastructure	Analyze/fuse/disseminate terrorism information	The HSDN Infrastructure Buildout project provides for additional facilities throughout the country where CBP personnel can access HSDN and the (eventual) Secret version of AFI.

Buildout (1,551)		
---------------------	--	--

Automated Targeting System (ATS)

Automated Targeting System (ATS) is a web-based enforcement and decision support tool that incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. It allows CBPOs to focus their efforts on cargo shipments and passengers that most warrant further attention. The ATS systems have allowed the CBPOs to process large volumes of data efficiently, which was previously a gap within the targeting environment. As volumes of data increase in people, cargo and conveyances, officers require increasingly efficient access to information and more information on which to base critical admission decisions. The systems investments are also intended to address data quality improvements, including entity and name resolution to ensure that efforts are focused on those persons and cargo that truly present a threat to the homeland.

ATS is proposed to be funded out of two PPAs in FY 2015, as follows:

- Automated Targeting Systems \$108.533 million
- Intelligence/Investigative Liaison \$1.562 million

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A, Administration PPA provides critical policy and operational direction and mission support to CBP front-line personnel. Administration M&A funding is essential to carrying out CBP's dual mission of securing America's borders against terrorist threats, while facilitating legitimate travel, trade, and immigration. The Offices of Human Resources Management (HRM) and Administration are funded in this PPA. This PPA also funds CBP Workman's Compensation and a portion of the DHS Working Capital Fund. Included in the \$386.793 million is \$1.735 million that is a net amount associated with mission support hiring related to the FY 2014 CBPO Initiative, as well as the FY 2014 Managed Hiring reduction. These have not yet been distributed to a program office.

Office of Human Resources Management

HRM provides centralized human resources support to approximately 60,000 CBP employees, both nationwide and overseas. HRM recognizes that its first priority is to support the CBP mission and is committed to being a strategic and tactical partner in achieving the Agency's mission. HRM provides human resources services that support CBP leadership, addresses the operational requirements of CBP program offices, and meet the needs and expectations of CBP employees.

HRM's operational scope is broad and requires addressing numerous challenges, including: operating in a constrained fiscal environment; competing for talent while maintaining congressionally mandated frontline staffing levels; and delivering quality services under the pressure of growing workloads, balanced with a continuing focus on accountability and results.

HRM strives to deliver timely and efficient customer-centric support, services, and solutions that are responsive to changing mission requirements, operational conditions, and stakeholder needs. HRM provides strategic leadership to effectively meet its customers' human resource requirements by:

- Recruiting, assessing, and hiring candidates to maintain a highly skilled, diverse, and mission-ready workforce;
- Leveraging technology to improve human resources business processes and service delivery;
- Providing medical, benefit, retirement, and worklife advisory services;
- Promoting a safe and healthy work environment;
- Facilitating workforce and organizational effectiveness, including Agency integration and reorganization efforts;
- Administering and guiding implementation of human capital policies; and

- Managing CBP's labor and employee relations programs.

Exhibit 1: HRM Funding Request by Key Mission Area:

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
Human Resources Executive Policy Formulation	<ul style="list-style-type: none"> • HRM manages a centralized human resources program for all U.S. Customs and Border Protection (CBP) employees nationwide and overseas; • HRM supervises all matters involving human resources, including: organizational structure, staffing, pay administration, benefits, workplace safety, personnel actions, and employee relations. HRM also assists employees by providing recruitment services, retention support, benefits support, and employee assistance programs; • Through human capital planning and utilization, HRM meets its customers' operational needs by providing strategic leadership to ensure the efficient and effective delivery of HR services to CBP; and • This item includes internal HRM processes, such as budget and property administration, communications management, records management, safety and security. 	\$3,227
Staff Acquisition	<ul style="list-style-type: none"> • Develop strategies to attract, assess, and ensure hiring of the best-qualified applicants; and • Continually improve hiring processes and practices that allowed CBP to: <ul style="list-style-type: none"> ○ Reduce hiring costs and the time-to-hire; ○ Leverage technology; and ○ Achieve process efficiencies. 	\$30,686
Human Resources Strategy Development and Systems Management	<ul style="list-style-type: none"> • Improves the development and management of processes that serve its customers. <ul style="list-style-type: none"> ○ HRM is committed to using information technology, Business Process Management (BPM), and a flexible approach to the design and implementation of its process workflows. 	\$7,093
Employee Benefits	<ul style="list-style-type: none"> • HRM provides CBP employees with comprehensive human resources advisory and consultative services and program management; and • Working primarily in the areas of benefits, workers' compensation, medical and fitness, employee support, retirement, and work life, this division works to ensure a supportive work environment that "cares for CBP's workforce: mind, body, and soul." 	\$10,237

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
Occupational Safety and Health Activities Management	<ul style="list-style-type: none"> • HRM manages a comprehensive national/international safety program, which includes radiation detection at ports and stations, medical surveillance services and personal protective equipment for frontline employees, and safety training in the use of heavy machinery and occupational safety. 	\$9,615
Organization and Position Structures Management	<ul style="list-style-type: none"> • Serves as internal organizational design and effectiveness experts to all CBP managers; • The Organizational Design Division, in providing organizational design expertise and cross-HRM coordination, enables CBP to effectively and efficiently meet the needs of our ever-changing environment. 	\$1,251
Labor and Employee Relations	<ul style="list-style-type: none"> • HRM monitors and integrates the development and implementation of CBP labor and employee relations (LER) programs to facilitate an effective CBP workforce and thus, mission accomplishment; • HRM is the sole authority within CBP for management of LER activities, has direct line authority over HQ and Field LER staff, and assures national level program direction; • HRM provides oversight and evaluation of the management of subordinate organizations, assuring through supervisors that adequate internal controls and performance measures are instituted; • HRM establishes service-wide policies, programs, and procedures to facilitate effectiveness and operational consistency in areas such as leave administration, performance management, awards, grievances and complaints, fitness for duty, and family friendly initiatives; and • HRM is also responsible for establishing and operating systems to collect employee relations program data and for the analysis and reporting of such data. The staff advises on trends and emerging third party decisions that dictate changes in program direction and develops programs and policies accordingly. 	\$15,638
Workman's Compensation	<ul style="list-style-type: none"> • The CBP workers' compensation program is managed by the Office of Human Resources Management (HRM). • The program assists employees who are injured or 	\$68,806

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
	<p>become ill because of their employment with CBP as they file claims under the Federal Employees' Compensation Act (FECA), and represents the Agency in providing information related to claims.</p> <ul style="list-style-type: none"> • HRM works to reduce the impact of work-related injuries and illnesses on employees by ensuring payment of appropriate FECA benefits, manages CBP's workers' compensation claims process, returns employees to duty as quickly as possible and controls program costs. 	

Above amounts are estimates of funding to be spent on each function in the Office of Human Resources Management.

Office of Administration

The Office of Administration (OA) serves an integral role as the mission support core for CBP by providing the necessary goods and services required by operational personnel and business partners to fulfill mission goals. This includes essential financial management services; budgeting; all asset-related programs, including fleet, uniforms, personal property, and seized and forfeited property; mail; and the CBP printing program. OA also serves as the accountability office for CBP and assesses and evaluates the strategic and programmatic performance to assist leadership in understanding how performance, cost, and risk intersect within CBP.

Exhibit 2: OA FY 2015 Funding Request by Key Mission Area

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
Fleet Program	<ul style="list-style-type: none"> • Funds the acquisition of approximately 949 replacement vehicles in FY 2015; • Manages the fleet lifecycle from acquisition to disposal, including on-going public and private sector fleet lifecycle management review that allows CBP to continuously incorporate best practices, which are designed to improve analysis, reduce operating costs, and increase program effectiveness. Average age of the CBP fleet serves as a general indicator of overall fleet health. As the included chart depicts, CBP is quickly approaching ideal average age thresholds; and • Implements a fuel sharing program that will enable any CBP or ICE vehicle to obtain fuel from CBP-controlled fueling facilities along the Southwest 	\$50,777

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
	border. Part of the initiative will include an upgrade to CBP fueling technology across the Southwest border, allowing CBP and ICE to obtain fuel at the least expensive total price without negatively impacting operational and mission capabilities.	
Uniform Program	<ul style="list-style-type: none"> Funds the acquisition of uniforms and manages the uniform program supply chain, acquisition and contract management required to outfit CBP uniformed personnel with the necessary apparel and equipment for their safety and visibility during the execution of their mission. 	\$41,440
Seized Vehicle Contract	<ul style="list-style-type: none"> Provides policy, guidance, and contract/supply chain management for approximately 12,500 vehicles valued at \$10,000 or less that are seized or forfeited annually along the southwest border. CBP manages custody and disposition of seized and forfeited vehicles through a contract with services that include towing, entry into the Seized Asset and Case Tracking System database, storage, inventory, and ultimately disposition. 	\$11,430
General Order Merchandise Contract and Financial Management	<ul style="list-style-type: none"> Provides program and contract management for the disposition approximately 1,850 property items abandoned annually at CBP Ports of Entry. Revenue from sales of abandoned property covers all contract and administrative costs of program. 	\$1,654
Personal Property Program Management	<ul style="list-style-type: none"> Provides program management and oversight for CBP personal property (approximately 695,000 assets valued at over \$7 billion) through its sustainable lifecycle, to include accurate accounting of property, efficient utilization of property resources, and integration of property records with financial accounting and reporting. 	\$2,414
Revenue Collection	<ul style="list-style-type: none"> Maintains 30,000 Automated Clearing House accounts to enable the electronic collection of \$34.5 billion from importers and brokers; Collects and apply 300,000 checks, Fed Wire, and Federal agency payments totaling \$2.2 billion; Prepares 20,000 reimbursable bills to collect \$10 million for CBP Ports of Entry; Processes 160,000 Internal Revenue Service excise tax bill collections totaling \$1.5 billion and collect \$400 million in fees for the Army Core of Engineers; 	\$15,337

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
	<ul style="list-style-type: none"> • Maintains 360 cash registers and reconcile 10,000 daily deposit differences to support \$1.5 billion in collection activities at the CBP Ports of Entry; • Reviews 9,000 certifications annually for the <i>Continued Dumping Subsidy Offset Act of 2000</i> and issue 1,200 disbursements to harmed domestic producers; • Maintains over 170,000 continuous bonds securing revenue totaling over \$15.5 billion in 2013; • Initiates debt collection on 50,000 accounts receivables and 2,600 dishonored payments totaling \$130 million in collections annually; • Reconciles over 12 million credit card transactions that support fees collected from the traveling public; and, • Issues and renew 120,000 transponders annually collecting over \$20 million. 	
Financial Management	<ul style="list-style-type: none"> • Provides and supports the CBP core financial mixed systems including systems operations and maintenance, upgrades, and user support; • Provides financial management services as required by OMB Circular A-11, including budgeting, accounting, and investment analysis; • Provides effective and efficient payroll services for the unique pay circumstances encountered by CBP; • Operates and maintains CBP's Enterprise Resource Planning (ERP) system for integrated financial, procurement, and property management thereby eliminating many paper processes and improving efficiencies in several business areas while allowing CBP to continue its outstanding financial performance with unqualified audit opinions since 2004; • Provides stewardship of over \$10 billion in appropriated resources and \$40 billion in collections by overseeing CBP's internal controls over financial reporting as required by OMB Circular A-123, the <i>Federal Managers Financial Integrity Act of 1982</i> (P.L. 97-255; FMFIA), and <i>Federal Financial Management Improvement Act of 1996</i> (P.L. 104-208; FFMIA); and, • Coordinates and oversees the annual audit of CBP's financial statements and the annual consolidated 	\$32,678

Above amounts are estimates of funding to be spent on each function in the Office of Administration.

*The real property programs managed by the Office of Administration are funded by the Rent PPA and the Construction and Facilities Management appropriation.

Revenue

The Office of Administration processes all CBP Revenue. The collection of all revenue is significant in ensuring the efficient flow of legitimate trade and travel. The graph below shows the continuous growth of CBP revenue over the last 5 years. This growth is due to many factors, including an increase in collection types (duties, taxes, user fees), new collection programs legislated by Congress, and increases in imports and inspections. CBP anticipates the revenue from collections to grow over the next five years based on this current FY 2009-FY 2013 data.

Exhibit 3: Revenue Collections

Vehicle Fleet

The Average Vehicle Age performance measure provides a composite view of the CBP fleet. This measure is used to provide a general health indicator of the motor vehicle fleet. The target average age is 3-6 years, dependent upon vehicle type and mission. CBP vehicles have a life cycle replacement/life expectancy requirement ranging from 6 to 10 years. Based on the size of the CBP fleet inventory, the replacement of vehicles in accordance with these requirements would mandate CBP to maintain a vehicle composition of older and newer vehicles reflecting a target average age of between 3-6 years, dependent upon vehicle type and mission.

Exhibit 4: CBP Vehicle Average Age

**FY 2011 through FY 2013 are actuals. FY 2014 and FY 2015 are projections.*

Description of Select Adjustments to Base:

Greater Cost Recovery due to Increase AQI Fee Increase: CBP anticipates receiving an additional \$92.7 million from APHIS in FY 2015. USDA completed a comprehensive fee study on its fees in FY 2012. In FY 2013, USDA drafted the updated regulation to adjust the user fee rates. At the time of this budget submission, the new regulation has not been published; however, USDA expects that the full implementation will take place in FY 2015. This \$92.7 million projection is based on the assumption that a fee increase will be implemented starting in the second quarter of FY 2015. This increase of \$92.7 million will be used to recoup additional

agriculture inspection costs incurred in CBP's S&E, Automation Modernization, and Construction and Facilities Management appropriations in FY 2015. This additional \$92.7 million will allow CBP to recoup approximately \$50.563 million in S&E, \$29.005 million in Automation, and \$13.132 million in the Construction and Facilities Management appropriations. Of the \$50.563 in S&E, \$4.969 will be recouped in the Administration PPA.

MAJOR ACQUISITIONS:

Mobile Assets Program

The U.S. Customs and Border Protection (CBP) Mobile Assets Program Management Office (MAPMO) coordinates the acquisition and disposal of the vehicles used by the CBP Offices to carry out their operations in support of the DHS mission. These vehicles are acquired, configured and deployed to support detection, interdiction, enforcement and support activities at and between the ports of entry throughout the United States of America and U.S. territories. The CBP Fleet facilitates the various activities necessary to achieve the primary mission including; training, transportation, technology installations, and other support activities. MAPMO provides a diverse and agile fleet tailored toward operational-specific requirements that allow CBP to protect the nation through securing its borders and ports of entry.

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Acquisitions (49,864)	Mobile Asset Program - Mission Support	Procure and deliver Mission Support vehicles in support of the CBP mission.
	Mobile Asset Program – Office of Air and Marine (OAM)	Procure and deliver Law Enforcement vehicles in support of CBP's critical detection, interdiction and law enforcement missions for the Office of Air and Marine.
	Mobile Asset Program – US Border Patrol (USBP)	Procure and deliver Law Enforcement vehicles in support of CBP's critical detection, interdiction and law enforcement missions for the US Border Patrol.
	Mobile Asset Program – Office of Field Operations (OFO)	Procure and deliver Law Enforcement vehicles in support of CBP's critical detection, interdiction and law enforcement missions for the Office of Field Operations.
	Mobile Asset Program – Office of Information Technology (OIT)	Procure and deliver Law Enforcement vehicles in support of CBP's critical detection, interdiction and law enforcement missions for the Office of Information Technology.
	Fuel Sharing Program	Enable DHS vehicles, which are located near southwest border CBP bulk fueling sites, to use lower cost bulk fuel as an alternative to procuring fuel at commercial fueling stations. This program will significantly reduce overall DHS fuel costs.
Salaries (2,511)	Salaries – Mobile Assets Program Support	Program Personnel Salaries in support of the Mobile Asset Program

Systems Applications and Products (SAP)

The Systems Applications and Products (SAP) database provides for accurate and timely processing of financial, property, and procurement transactions occurring on a daily basis that enable CBP to accomplish its mission. SAP is an integrated enterprise-wide resource planning (ERP) system that replaced ten stove-piped, outdated, and underperforming mainframe systems that CBP deemed insufficient and no longer suited to meeting data processing and reporting needs. SAP permits CBP to accomplish its mission with more efficiency than ever before as well as reduce functional gaps by closing material weaknesses identified during past audits of CBP Financial Statements required by the Federal Managers Financial Integrity Act.

This construction project is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- IUF \$2 million
- Administration \$12.540 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)

	GSA Rent Increase			22,096
FY 2015 Request	Rent Total			409,490

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP requests \$409.490 million in FY 2015 for the Rent PPA. This PPA provides the required resources to assure that CBP's leased portfolio supports our mission of securing Americas borders, while facilitating legitimate travel, trade, and immigration. The Rent PPA supports the rent and rent-related costs at these leased facilities, which includes recurring rent expenses, security services provided by the Federal Protective Service (FPS), and the approved changes to support the overall mission effectiveness of the facilities. In addition, the Rent PPA funds standard utility and operational costs, as well as overtime utilities, at General Services Administration (GSA) leased facilities that are not part of the delegation of authority of GSA-owned Land Ports of Entry (LPOEs) to CBP.

CBP currently leases 20 million square feet of space across over 1,500 facilities. As shown in Chart 1, this reflects an increase of almost 10 percent in square footage since FY 2012. The increases reflect the additional square footage required to meet expanding and evolving mission needs.

Exhibit 1: CBP's Leased Portfolio Square Footage¹

¹ Includes square footage of GSA-owned LPOEs in the delegation of authority to CBP. The LPOEs remain under GSA ownership and are still part of CBP's leased footprint.

CBP leases a diverse array of operational and mission support facilities that support all of CBP's real property portfolios, including Air and Marine Facilities, Border Patrol Facilities, Field Operations Facilities and Mission Support Facilities. Facilities within the leased portfolio include: Marine Units, National Marine Training Centers, Unmanned Aerial Systems (UAS), and Air Branches and Units supporting the Office of Air and Marine (OAM); Sector Headquarters facilities, Border Patrol Stations, Forward Operating Bases, and checkpoints supporting the Office of Border Patrol (OBP); field offices and POEs supporting the Office of Field Operations (OFO); and mission support facilities (MSF) comprised of administrative office space and laboratories belonging to mission support offices. The Rent PPA also funds resources for the rent costs associated with over 900 Tactical Communications (TACCOM) leases at the northern and southern borders and throughout the United States, which facilitate communications and house critical surveillance equipment.

The planned allocation of FY 2015 Rent PPA funds is shown in Exhibit 2.

Exhibit 2: Rent PPA FY 2015 Spend Plan (\$ in Thousands)

Lease Type	OAM	OBP	OFO	MSF	Total	Percent of Total
GSA-Owned Lease	217	6,182	94,491	41,844	142,734	35%
GSA-Leased Lease	2,627	39,455	76,156	84,721	202,959	49%
Direct Leases	9,088	9,658	0	89	18,835	5%
FPS Security Costs	2,376	769	20,170	21,647	44,962	11%
Total Rent PPA	14,308	56,064	190,817	148,301	409,490	
Percent of Total	3%	14%	47%	36%		

The core rent activities within each of these lease types includes:

- GSA Rent – \$347 million (84 percent), representing the majority of CBP’s rent budget, will fund leases that have been negotiated through the General Services Administration for GSA-owned and GSA-leased facilities nationwide. This will also fund anticipated costs for overtime utilities and maintenance activities at GSA-owned and GSA-leased facilities. These charges typically support 24-hour facilities, such as Border Patrol Stations;
- Direct Leases – \$19 million (5 percent) will fund leases that CBP enters into directly with commercial lessors, most of which support OAM and OBP; and
- Security Charges (Federal Protective Services) – \$45 million (11 percent) will fund rent-related costs for building security services provided by FPS.

To fund these core rent activities at the required funding level, CBP will leverage user fees to supplement CBP’s rent appropriation. In order to mitigate the risk that user fees will not supplement CBP’s rent appropriation to the level at which mandatory rental obligations are met, CBP is implementing several new initiatives to meet all obligations and ensure mission readiness. CBP is actively pursuing ways to reduce the leased space footprint, and therefore the overall rent costs, through several initiatives.

- Implementation and Expansion of the Mobile Workforce Initiative – In April 2011, CBP initiated a mobile workforce pilot at the Field Operations Facilities, Washington, DC-based office. Upon implementation in July 2012, CBP realized a 36 percent reduction in office space with a return on investment after about 18 months and annual rent and operating cost savings of \$290 thousand, representing an annual net decrease of approximately 41 percent. There were additional metrics captured that identified increased employee engagement and cross-functional communication. In an effort to realize further space reductions, CBP will be expanding its Mobile Workforce Initiative, using lessons learned from the pilot, to other offices within the National Capital Region (NCR), specifically those offices supporting the Office of Administration, and mission support offices in Indianapolis, Indiana; Laguna Niguel, California; and Euless, Texas.
- Space Reduction and Efficiencies Requirements and Goals – In alignment with federal government-wide initiatives to reduce overall square footage, including the Office of Management and Budget’s (OMB) Freeze the Footprint policy and the June 2010 Presidential Directive “*Disposal of Unneeded Federal Real Estate*,” CBP is leveraging information technology and workplace transformation initiatives to realize operational efficiencies, which are anticipated to ultimately reduce CBP’s square footage. By reducing square footage in both the owned and leased real property portfolios, cost savings will be realized in the Construction and Facilities Management appropriation and the Rent PPA. At this stage in the planning efforts, specific cost savings amounts have not been identified. CBP has already made significant progress to identify locations for space reductions with a current focus on mission support office space and warehouses. In FY 2013, CBP reduced its square footage in the National Capital Region (NCR) by over 150,000 square feet in mission support space. This reduction of square footage, 7 percent in the NCR, also exceeded the DHS Chief Readiness Support Officer’s FY 2013 performance objective of realizing a space reduction in the NCR of greater than 5 percent and an overall reduction of between 2 and 5 percent.

- **Rent Requirements Governance** – In an effort to align governance policies with the needs of the leased portfolio, a rent governance process has been implemented to review space requirements, identify efficiencies within the Rent PPA, and assure all space needs align with overarching governance and policy. The *CBP Rent Control Policy* aims to target out-year savings and identify measures to improve rent space utilization. By identifying delayed starts, new lease adjustments, facility closures and updated program requirements, CBP reduced the overall rent need by \$44 million in FY 2013.

Description of Select Adjustments to Base

CBP Mobile Workforce Initiative Efficiency: CBP plans to achieve \$20 million in savings by expanding its Mobile Workforce Initiative. Beginning in the National Capital Region, and potentially expanding nationwide, this initiative will allow CBP to reduce footprint and facilities-related costs, while ensuring that operations are not impacted. These and other efforts will result in a reduction in CBP's leased footprint in the coming years.

GSA Rent Increase: The request includes an adjustment of \$22.096 million for increased costs for CBP for rent and rent-related building charges for GSA facilities in support of OAM, OBP, OFO, and Mission Support offices. This adjustment is due to the increase in space for new facilities that replaced existing facilities or were required space additions due to mission need. The adjustment also is utilized to cover increased base costs due to rent escalations and rent-related charges, including utilities and FPS.

Exhibit 3 identifies the permanent transfers into the Rent PPA from CBP's Operational Business Partners' accounts. In FY 2015, a total of \$1.592 million was transferred into the Rent PPA to fund rent-related activities.

Exhibit 3: Rent PPA: FY 2015 Permanent Business Partner Transfers

FY 2015 Permanent Business Partner Transfer	PPA (From)	PPA (To)	OCC (To)	Amount
Remaining Rent Costs (Air & Marine: McAllen and Laredo)	Air & Marine O&M	Rent	Other than GSA Space Rental	\$73,500
Remaining Rent Costs (Air & Marine: St. Augustine)	Air & Marine O&M	Rent	Other than GSA Space Rental	\$8,300
Remaining Rent Costs (Border Patrol: Tucson Warehouse)	BSFIT O&M	Rent	Other than GSA Space Rental	\$1,209,000
Remaining Rent Costs (Border Patrol: Northern SBINet)	BSFIT O&M	Rent	Other than GSA Space Rental	\$301,052
Total				\$1,591,852

MAJOR ACQUISITIONS:

Mission Support Facilities

The Mission Support Facilities (MSF) PMO develops, plans, executes, and sustains the facilities and infrastructure inventory necessary to support the mission of the CBP Mission Support Offices nationwide. These facilities include administrative offices, training centers, laboratories, warehouses, tactical communications sites, and consolidated/co-located facilities/campuses. The Mission Support PMO also manages CBP Consolidation/DHS Co-Location Facilities, Residential Housing, all National Capital Region Facilities and any Facilities impacted in a National Emergency. The focus of the MSF PMO is shifting from lease acquisition of new space for relocations or expansions for business partners to sustainability function managing maintenance and repair of owned facilities, administering leases of existing space, and reconfigurations where necessary to modify functional spaces to support additional staffing where expansions are no longer feasible.

This construction project is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- Facilities Program Management \$15.781million
- Facilities, Construction, & Sustainment \$50.818 million
- Rent \$148.301 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
206,304	204,170	214,900

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Sustainment of Owned Property (25,543)	Building Operations and Services	Includes the expense costs associated with the purchase of critical utilities including water, electricity, natural gas, sewage. Additional costs are for the execution of operational contracts including custodial services, pest services, snow removal, waste disposal and grounds maintenance.
	Maintenance	Includes the expense costs associated with the execution of CBP's regional maintenance contracts that focus on preventative maintenance to assure assets reach the end of the intended useful life; additional maintenance costs that preserve or sustain an asset in current working conditions; the execution of the Facility Condition Assessment program that assesses the "health" of CBP's owned portfolio and targets key deficiencies that must be addressed; and scheduled renewal activities that replace an asset at the end of its intended useful life as to avoid complete failure and disruptions to mission operations.
	Repairs	Includes the expense costs associated with restoring real property assets to its previously functional status or at the very least to a level where it can perform its designated purpose. These activities often reactionary to an immediate need such as a roof leaking or an HVAC system that has broken. In the most

		extreme of instances, the asset may be beyond repair and will have to be replaced immediately.
Phase II of the National Targeting Center (NTC) Consolidation (18,000)	Furniture, Fixtures and Equipment (FF&S)	Part of CBP's one current real property investment occurring in FY 2015, the NTC project consolidates the NTC-P and the NTC-C into one single facility to enable CBP to operate 24/7 in order to identify both passengers and cargo that poses a threat to national security. The FF&E costs are associated with the installation and out-fit of the new facility that includes the installation of security systems, the purchase and installation of furniture for CBP personnel at the new facility and the final installation of any additional fixtures that might be required to assure the facility is operational.
	OIT Voice and Data Cabling	These costs include the installation of OIT voice and data cabling so that personnel property including phones and computers along with IT assets can be fully functional in the new consolidated space.
	Move Costs	As described above, the completed NTC consolidation project will include the consolidating of two facilities into one. The move costs are associated with the physical relocation of equipment and personnel from the existing space to the new facility. Due to the specialized mission at the National Targeting Center there is critical equipment that must be moved to allow the new facility to be fully operational
Leasing Activities (7,275)	Forced Moves and Lease Renewals-in-Place	Includes the expense costs paid from the FC&S PPA associated with lease renewals with no expansion and mandatory re-locations. These activities include fitting out a new leased space due to a forced move. Fitting out requires the installation of IT and LAN systems, installation or upgrades of security systems, and the altering of space to meet the operational need. For those renewals in place, activities include the upgrade of existing systems to meet new security or IT regulations.
Rent Costs for Leased Facilities (148,301)	Rent	Includes the expense costs associated with the payments required to be made by CBP to an owner of facility as established through Occupancy Agreements. These costs include the base rent and standard and above-standard operating expenses including utilities and Federal Protective Services.
Program Oversight and Management (15,781)	Program Oversight and Management	Includes the expense costs for the Government employee salaries and benefits; CBP's Integrated Workplace Management System, TRIRIGA; energy and environmental initiatives that allow CBP to realize cost-savings through innovative environmental and energy solutions; and other operational costs including office supplies and program support. Government employees execute and support every aspect of the Border Patrol Facilities program. TRIRIGA enables CBP to integrate real property and project management functions for the portfolio lifecycle into a single web-based platform. This system allows CBP to make more informed and comprehensive decisions for all aspects of CBP's real property inventory. During these austere budget times this allows CBP to make cost-effective decisions that also sustain CBP's facilities throughout the lifecycle of the asset.

Border Patrol Facilities

The Border Patrol Facilities Program (BPFP) directly supports CBP's Border Patrol agents and houses technology needed to fulfill CBPs mission. The program provides Border Patrol Stations, Sector Headquarters, Permanent Checkpoints, and Remote Forward Operating bases that are strategically placed near the areas of highest illegal activity which allows agents and special teams to respond quickly and maintain maximum time on patrol. The facilities are provided through new construction, lease acquisition, alterations, and maintenance, repairs, and operations, as well as rent and leasing activities. Operational impact, agent safety, cost effectiveness, and the conditions of existing facilities are evaluated to prioritize the investment in this program. The BPFP maintains, upgrades, and constructs facilities, including BP stations; sector headquarters; checkpoints; and remote forward operating bases.

Border Patrol Facilities is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- Facilities Program Management \$40.245 million
- Facilities, Construction, & Sustainment \$83.123 million
- Rent \$54.554 million

OFO Facilities

This Program oversees facilities and infrastructure management for the Office of Field Operations (OFO) to ensure the timely and effective planning, delivery, operation, and sustainment of the portfolio of facilities and infrastructure for OFO, as well as rent and lease management activities. It administers financial management, communications, data collection and reporting for all programs and projects related to the OFO facilities portfolio. The OFO Facilities Modernization Initiative will address the needs within CBPs port of entry facilities portfolio to fully support CBP operations. More specifically, this initiative will address serious deficiencies at land ports of entry such as dilapidated and undersized buildings, inefficient site configuration and congestion, and deferred maintenance.

OFO Facilities is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- APHIS \$26.052 million
- Facilities Program Management \$30.142 million
- Facilities, Construction, & Sustainment \$236.945 million
- IUF \$10.046 million
- Rent \$192.409 million

CURRENT SERVICES PROGRAM DESCRIPTION:

Structure of Current Services Program Description

The Inspections and Trade and Travel Facilitation (ITTF) PPA is the primary funding source of CBP's activities to protect the people and economy of the United States by preventing the entry of terrorists and instruments of terror; enforce immigration, agriculture and trade laws and regulations, while facilitating the movement of legitimate people and goods through our borders. Therefore, to facilitate the development of current services descriptions, the PPA groups, functions, and programs are classified in four categories: 1) An overview of the Office of Field Operations (OFO), including descriptions of key functions and operational outputs; 2) description of travel programs, 3) description of the trade program, including an overview of the Office of International Trade (OT); and 4) description of select CBP programs that support travel and trade activities.

The ITTF PPA will enable OFO and OT to meet the mission requirement, as stated in the previous paragraph. More specifically, ITTF will support three sets of critical positions at levels legislatively established or set by policy decisions. In the case of CBPOs, CBP Agriculture Specialists, and Customs Revenue positions, as defined by the *Homeland Security Act of 2002*, Section 412³, the portion of the requested PPA total for OFO is \$2,688.353 million with 18,141 FTE; the portion of the requested PPA total for OT is \$142.519 million with 928 FTE. The

³ These positions include Import (including National) Specialists, Entry Specialists, Drawback Specialists, International Trade Specialists, Financial Systems Specialists; Fines, Penalties, and Forfeitures Specialists, Customs Auditors and Attorneys (Office of Trade, Regulations and Rulings).

additional 666 FTE which are reflected in the total are associated with the hiring of 1,300 CBPOs and the associated mission support that are funded in the FY 2014 enacted appropriation, with funding made available through September 30, 2015.

Exhibit 1: Inspections and Trade Facilitation FY 2015 Funding Request Breakout

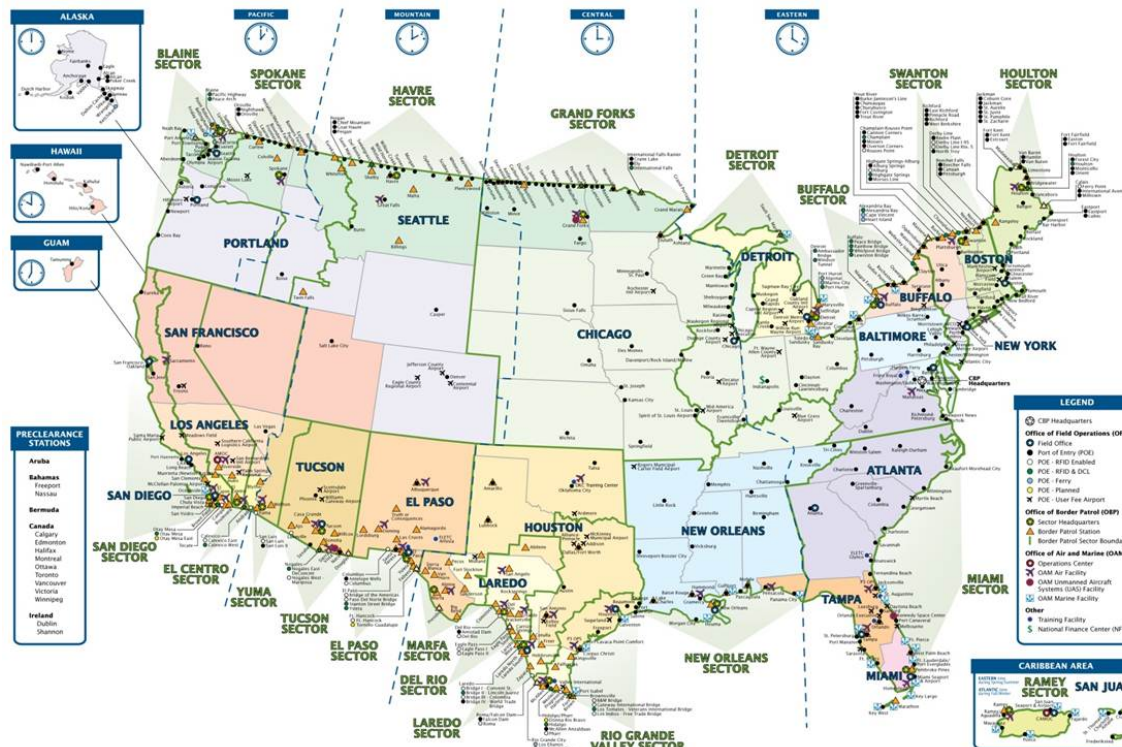

Inspections, trade, and travel facilitation at the ports of entry	FY 2015 Request (\$000)	% of Total
CBPO Salary and Benefits	2,136,525	75.47%
Agriculture Specialist Salary and Benefits	6,799	0.24%
Trade and Revenue Salary and Benefits	270,168	9.54%
Other Salary and Benefits	203,982	7.21%
Non-Personnel Costs	213,399	7.54%
Total	2,830,872	100.00%

Office of Field Operations⁴

OFO is the law enforcement component within CBP responsible for carrying out CBP's complex and demanding border security mission at all POEs. OFO manages the lawful access to our Nation and economy by securing and expediting international trade and travel. OFO operates 329 POEs and 16 Preclearance offices in Canada, the Caribbean, Ireland, and the United Arab Emirates (Abu Dhabi). CBPO's protect the people and economy of the United States by preventing the entry of terrorists and instruments of terror, as well as welcome travelers and facilitate the flow of goods essential to our economy 24 hours a day, 7 days a week. OFO personnel are the face at the border for all cargo and visitors entering the United States. At POEs, CBP enforces the anti-terrorism, import and export laws and regulations of the U.S. federal government and conducts immigration policy and programs. Ports also perform agriculture inspections to protect the U.S. from potential carriers of animal and plant pests or diseases that could cause serious damage to the U.S. crops, livestock, pets, and the environment. Each day, almost 1 million people arrive at U.S. POEs by land, sea, and air. The portion of resources from this PPA assigned to OFO is \$2,688.353 million with 18,141 FTE.

⁴ OFO's operational programs are also included the following PPAs: International Cargo Screening; Customs-Trade Partnership Against Terrorism (C-TPAT); Inspection and Detection Technology; National Targeting Center; and Trusted Traveler Programs.

Exhibit 2: CBP Office of Field Operations - Field Offices and Service Ports

Since CBP was established in 2003, OFO's mission requirements have expanded to meet changing security objectives and accommodate fluctuations in global trade and international travel. Since the recession in 2008, there have been significant increases in inbound travel and trade volumes. CBP processed more than 362 million passengers in the land, sea, and air environments in FY 2013, up from 351 million in FY 2012. International air passenger volume increased by over 21 percent between FY 2009 and FY 2013 and is currently at a record level. CBP estimates more than 110 million international air passenger arrivals in FY 2015. In FY 2013, \$2.38 trillion worth of goods were processed through the POEs. Inbound trade volume grew by more than 16 percent between FY 2009 and FY 2013 and is expected to exceed previous records in the air, land, and sea environments in FY 2015. See Exhibits 3 and 4 below.

Exhibit 3: Travel Volumes at POEs -Actuals Through FY 2013
 (*Land includes pedestrian, car, bus, rail and truck)

Exhibit 4: Trade Volumes at POEs -Actuals Through FY 2013

CBP developed the Resource Optimization Strategy to transform travel and trade processes while optimizing resources into more efficient business practices. In April 2013, in coordination with the President’s Fiscal Year 2014 Budget Request, CBP released a report, “*Resource Optimization at Ports of Entry*,” that highlights OFO’s efforts to transform business practices at

the POEs to achieve greater security and efficiency. The report also includes OFO's Workload Staffing Model which assists CBP in determining staffing requirements and validates CBPO operational demands.

In FY 2015, OFO seeks to preserve frontline staffing, continue passenger process reengineering, sustain and enhance workforce multiplier programs and implement business transformation initiatives while identifying alternative sources of funding. The travel and trade workload at the POEs is increasing and could introduce additional potential threats that must be mitigated to protect and ensure the United States' security and economic competitiveness. While modest increases in the number of CBPOs have had a positive impact, OFO continues to face a myriad of challenges. OFO anti-terrorism and enforcement mission challenges include: mitigating increased wait times; responding to requests for new/expanded services; and, increased cost requirements in a declining budget environment. The most pressing challenge is the cost of frontline staff that continues to increase significantly. Given the current fiscal landscape, OFO must continue to enhance and expand its current workforce multiplier programs in order to expedite trade and travel more efficiently.

Economic Implications

CBP is one of the largest revenue sources for the Federal government. CBP collected more than \$42 billion in revenue during FY 2013, an increase of 39.3 percent since FY 2009.

Exhibit 5: Revenue Measures

International travel and trade is vital to the U.S. economy. International visitors infuse the U.S. economy with funds by purchasing U.S. goods and services. In 2012, international visitors spent a record-breaking \$165.6 billion on U.S. travel and tourism-related services, an increase of 8.7 percent when compared to 2011. All of those purchases are considered U.S. exports that ultimately support America's trade balance. Increased travel and tourism continues to play an important role in the US economy. Between January and April 2013, the latest period for which

figures are available, international visitors have spent an estimated \$57.9 billion on U.S. travel and tourism-related services, an increase of 8 percent when compared to the same period last year. International visitors spent an estimated \$15.3 billion on travel and tourism-related activities in November 2013; injecting nearly \$165 billion into the U.S. economy since January 2013, an increase of approximately 9 percent. In addition, intellectual property industries account for \$5.06 trillion in value added (increases to GDP), or 34.8 percent of U.S. gross domestic product. Intellectual property rights violations cause financial losses for rights holders and legitimate businesses around the world.

The Agriculture industry is the largest employing sector in the U.S. with more than \$1 trillion in economic activity annually. The greatest risks to the success of this industry are exotic plant pests and foreign animal diseases. Currently, invasive species cause an estimated \$136 billion in lost agriculture revenue annually.

Economic Impact of Wait Times at POEs

The airport wait times increased nearly 11 percent in FY 2013 from FY 2012. Land border wait times for vehicles (passenger and commercial) decreased 1.27 percent and 1.95 percent, respectively, while pedestrian wait times increased 4.81 percent from FY 2012. Recent research shows that there is a clear economic impact from reducing wait times at POEs. Long wait times at the POEs can cause delays and travel time uncertainty for automobiles, trucks, pedestrians, and air passengers. The delays can add to supply chain and transportation costs for commercial companies and also serve as a deterrent to trade and cross border travel. As a result, wait time reduction can be a significant economic stimulus for trade and travel.

The extent to which wait times affect the local and national economy was most recently studied by the National Center for Risk and Economic Analysis of Terrorism Events (CREATE), a DHS Center of Excellence. CREATE issued report in February 2013 titled “The Impact on the U.S. Economy of Changes in Wait Times at Ports of Entry.”⁵ Their analysis found that an increase or decrease in staffing at the POEs has an impact on wait times and, therefore, on the U.S. economy. The impacts begin with changes in tourist and business travel expenditures and with changes in freight costs. These changes, in turn, translate into ripple or multiplier effects in port regions and the overall U.S. economy. In summary, CREATE found that the impacts on the U.S. economy of adding 33 CBPOs (their baseline) and the resulting reduction to wait times result in a \$65.8 million increase in Gross Domestic Product (GDP), \$21.2 million in opportunity cost savings, and 1,094 annual jobs added. While the U.S. Travel Association found that every 33 overseas travelers creates one new American job (Travel Means Jobs, 2012)⁶, CREATE’s findings equate to 33 new American jobs per CBPO added.

CBPOs and CBP Agriculture Specialists: Duties and Responsibilities

CBPOs and CBP Agriculture Specialists perform the full range of inspection, intelligence analysis, examination, and law enforcement activities related to the arrival and departure of

⁵ “The Impact on the U.S. Economy of Changes in Wait Times at Ports of Entry,” National Center for Risk and Economic Analysis of Terrorism Events (CREATE), University of Southern California, released April 4, 2013.

⁶ “U.S. Travel Answer Sheet,” United States Travel Association, released June 2012.

persons, conveyances, and merchandise at ports of entry. These enforcement activities prevent the entry of terrorists, harmful pests and diseases, illegal drugs and contraband, illegal aliens, and importations/exportations contrary to law and trade agreements from entering/exiting the United States. CBP personnel interpret the laws and regulations of a wide variety of Federal, state, and local agencies, relating to the admissibility of people, cargo, and conveyances. In addition to its own laws and regulations, CBP enforces over 400 laws on behalf of over 40 other U.S. Government agencies.

Individuals seeking entry into the United States are inspected at POEs by CBPOs who determine their admissibility. The inspection process includes all work performed in connection with the entry of aliens and U.S. citizens into the United States, including pre-inspection performed by CBPOs deployed outside the United States. An officer is responsible for determining the nationality and identity of each applicant for admission and for preventing the entry of ineligible aliens, including criminals, terrorists, and drug traffickers, among others. Aliens are questioned and their documents are examined to determine admissibility based on the requirements of U.S. immigration law.

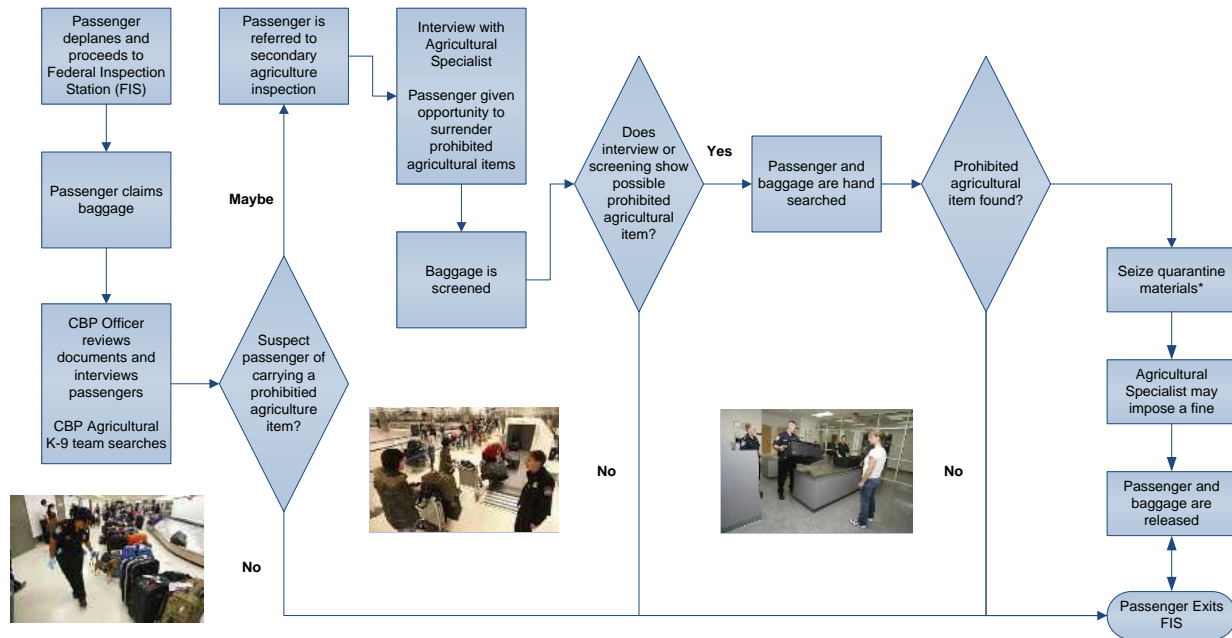

CBPOs and CBP Agriculture Specialists facilitated more than \$2.3 trillion in legitimate trade during FY 2013 while enforcing U.S. trade laws that protect the economy, the health, and the safety of the American people. CBP accomplishes this through close partnerships with the trade community, other government agencies, and foreign governments. CBPOs and CBP Agriculture Specialists enforce trade issues related to Anti-Dumping and Countervailing Duty, agriculture, import safety, Intellectual Property Rights, Penalties, Revenue, and Textiles and Wearing Apparel.

To carry out CBP's agricultural border inspection duties, CBP Agriculture Specialists are trained to serve as experts in agriculture, border intelligence, analysis, and examination and enforcement activities. Each year, millions of pounds of fresh fruits, vegetables, cut flowers, herbs, and other agricultural items enter the United States via commercial shipments from around the world. CBP Agriculture Specialists are trained to detect potential threats in passenger baggage, truckloads, trainloads, and containers of agricultural imports that could potentially threaten U.S. agriculture, our natural resources, and our economy. CBP Agriculture Specialists at U.S. POEs and international mail facilities target, detect, intercept, and prevent the entry of these potential threats before they have a chance to do any harm. Annually, CBP Agriculture Specialists intercept tens of thousands of actionable pests, meaning those identified through scientific risk assessment and study as being dangerous to the health and safety of U.S. agricultural resources.

Exhibit 6: Commodity Shipments vs. Pests Submitted FY 2012 - FY 2013 (In Thousands)

	FY 2012	FY 2013
Total Commodity Shipments	1,733.64	1,800.74
Total Pests Intercepted	174	161

Exhibit 7: Primary and Secondary Stages of the Agriculture Inspection Process

Securing and Expediting Travel

The international traveler process and the border entry traveler process involve many stakeholders working together to develop travel policy, set priorities, operate daily travel procedures at home and abroad, and address security and safety concerns. Experienced CBPOs and CBP Agriculture Specialists use their expertise and experience to target and process travelers, review travel documents, and interact with the traveling public to enforce and ensure compliance with U.S. laws.

Exhibit 8: Key Programs Facilitating the Travel Process

SECURING AND EXPEDITING TRAVEL	
Electronic System for Travel Authorization (ESTA)	Electronic applicant screening in advance of travel to U.S.
Entry/Exit Transformation Office	Enhance integrity of the immigration system by providing assurance of identity on foreign nationals arriving and departing the U.S.
Immigration Advisory Program (IAP)	Identify national security risk entries and issues no board recommendations to airline carriers.
Western Hemisphere Travel Initiative (WHTI)	Joint initiative program with the Department of State (DOS) to ensure secure documentation requirements are enforced.
Preclearance	Inspect U.S. bound travelers in overseas locations

SECURING AND EXPEDITING TRAVEL	
	relieving congestion at U.S. gateway airports and extending U.S. borders outward.

To expedite the processing of travelers, CBPOs deploy pre-departure screening through a myriad of programs and activities. The National Targeting Center (NTC), in particular, screens relevant traveler and cargo information prior to their departure. This approach is a key part of CBP's layered security strategy to protect the homeland by extending U.S. borders outward to identify and mitigate threats, interdict possible terrorists, other *mala fide* travelers, and suspect cargo before they can board or be laden on a conveyance destined for the United States. To learn more about the NTC's pre-departure screen process, please review the section entitled "National Targeting Center."

CBP is still facing increasing volumes in the passenger and cargo environments. Since 2009, we have seen growth in both trade and travel. Total passenger volume in FY 13 was 6.4 percent higher than in FY 2011, and non-immigrant arrivals during the same time period increased by nearly 9 percent. Total import value in FY 2013 was nearly 40 percent higher than FY 11 – and we expect these trends to continue. For FY 2015, total air passenger volume is estimated to increase four percent (approximately 3.7 million air passengers) at the top 10 U.S. airports when compared to FY 2012 data. The overall average wait time is estimated to increase nearly 10 percent. To address this increasing passenger volume and workload, OFO has identified six innovative and transformative initiatives in the traveler environment that provide a smarter use of available resources in response to growing challenges:

1. Expansion of Benefits and Locations of Trusted Traveler/Trade Programs: These programs facilitate travelers, while helping CBP redirect resources to screening other high risk, unknown travelers and enforcement [e.g. NEXUS, Secure Electronic Network for Traveler's Rapid Inspection (SENTRI), and Global Entry (GE)]. The NEXUS and SENTRI programs process travelers in vehicles 2 – 3 times faster than vehicles in general lanes and GE members are removed from general queuing lanes altogether. In FY 2013, the Trusted Traveler Programs saved the equivalent of 24 CBPOs (aggregate to the equivalent savings of 187 CBPOs in FY 2012). This is a savings of \$2.8 million in salaries and benefits.
2. Growing of Operational Best Practices: These programs enable CBP to effectively use resources that efficiently facilitate travel (e.g. Pedestrian Ready Lanes, Active Lane Management, and Model Ports). The growth in Radio Frequency Identification (RFID) saturation has enabled the rapid expansion of Ready Lanes; 22 crossings now offer a Ready Lane. Ready Lanes more efficiently process vehicles (12-18 seconds faster per vehicle) and in conjunction with Active Lane Management can reduce participant wait times up to 50 percent. As a compliment to this initiative, the first pedestrian Ready Lane opened in December 2011. The percentage of pedestrians processed by Ready Lane kiosks has been less than 10 percent since April 2013, making this an opportunity for expansion. Since then large pedestrian crossings such as Brownsville, Nogales, Calexico, Laredo and San Ysidro enable Ready Lanes to process 33 percent of all pedestrian traffic. Average pedestrian Ready Lane cycle time is 30 seconds, compared to 46 seconds for general lanes. This expansion

and the efficient management of Ready Lanes resulted in \$4 million in officer labor (equivalent of 34 CBPOs and over 40,000 inspection hours).

3. **Automated Passport Control:** APC kiosks allow United States and Canadian citizens to voluntarily provide advanced information prior to the primary inspection. After the information is entered into a kiosk, the individual must proceed to a CBPO for an enforcement interview and clearance. In FY 2013, APC kiosks were deployed to the Vancouver International Airport Preclearance facility, Chicago O'Hare International Airport, and Montreal Trudeau International Airport Preclearance facility. In the initial months of FY 2014, APC kiosks were deployed to John F. Kennedy International Airport, Dallas-Ft. Worth International Airport, Miami International Airport, and the Preclearance facility at Toronto Pearson International Airport. For the month of October 2013, the average wait time at these APC locations was 17 minutes, which is 36 percent lower than October 2012 (average wait time was 27 minutes). In FY 2014, APC kiosks will be deployed to at least two additional airports and seaports. APC capability will expand to include Visa Waiver Program travelers to the United States in FY 2014 as well.
4. **Pre-Travel Authorization:** This increases security and reduces wait times resulting in significant cost avoidance and reduced data entry (e.g. ESTA). The Electronic System for Travel Authorization (ESTA) Program also realized continued savings in CBPO resources in FY 2013. There was a 40 percent increase (9,922 applications) in the denial of ESTA applications in FY 2013; as a result, CBP did not have to conduct lengthy secondary inspections or process refusals of admission for these individuals. The increased denials resulted in the marginal increase of 19,844 inspectional hours from FY 2012, which is equivalent to an additional 17 CBPOs and \$2.0 million in salaries and expenses in FY 2013.
5. **Forms Automation:** This automation improves the accuracy of data entry while creating a substantial cost avoidance and increasing efficiencies (e.g. I-94, General Declaration, Customs Declaration, I-418). In September 2013, CBP began hosting the Paperless General Declaration system, which allows participating carriers to be exempt from the requirement to submit a paper CF-7507 (Aircraft General Declaration) upon arrival at U.S. POEs. CBPOs spend an average of 90 seconds processing a general declaration which is required for each arrival and departure of a conveyance. This Business Transformation Initiative is being implemented in phases with the initial phase focusing on arriving commercial passenger aircraft with 85 percent of the arriving commercial passenger flights immediately eligible for the program. CBP estimates the automation of this form will save over 10,000 inspection hours or the equivalent of 9 CBPOs in FY 2014. This savings should increase in FY 2015 as additional conveyances (general aviation/cargo carriers) become eligible for the program. In FY 2013, CBP automated the I-94 in the air and sea environment. The elimination of the paper form I-94 decreased the time spent processing visitors from non-visa waiver countries arriving on commercial airlines by an average of 6 seconds when comparing the same time frame in calendar year 2012. This savings is the equivalent of 17 CBPOs and the cost avoidance of \$2.0 million in salaries and expenses in FY 2013. CBP also avoids approximately \$15 million in data entry costs previously incurred processing the forms each year. The automation of the I-418 is still in the pilot phase; therefore, specific performance measures are unavailable for FY 2013 and FY 2014. OFO will continue efforts to automate other forms in FY 2015.
6. **POE Processing Innovations:** This enhances security, reduces wait times, and allows more efficient use of officer time. POE processing innovations include: Automated Passport

Control; mobile devices; Port Radiation Inspection, Detection, and Evaluation; Radiation Portal Monitor Optimization, and Entry/Exit Transformation.

Reimbursable Services Fee Agreements

In FY 2013, the CBP Reimbursable Fee Agreement program was established under the authorities provided in Section 560 of the *Consolidated and Further Continuing Appropriations Act, 2013* (Act), which authorized the Commissioner of CBP to enter into a maximum of five reimbursable services fee agreements for CBP enhanced inspectional services by December 31, 2013. The authority granted by Section 560 complements OFO's larger Resource Optimization Strategy (ROS), as it identifies alternative funding sources to support the rise in requests for additional inspection services at U.S. ports of entry. Reimbursable fee agreements are an example of public-private partnerships, which are designed to address the increased demands on CBP's existing resources and enhance services to stakeholders in all of CBP's operational environments. Over the past several years, CBP has realized record increases in passenger and cargo volumes which have quickly outpaced CBP's ability to sufficiently staff ports of entry.

To determine which locations would be selected for agreements CBP reviewed applications submitted by public and private entities and selected the following stakeholders to participate in the program:

- Dallas/Fort Worth International Airport;
- The City of El Paso, Texas;
- South Texas Assets Consortium;
- Houston Airport System; and
- Miami-Dade County.

Under Section 560 authority, these agreements were to be used to provide new CBP services at locations not currently serviced by CBP, or to enhance services at locations where such services are already provided; however, in already existing CBP-serviced air facilities, the agreements only provide for overtime services. In addition, Section 560 defined "services" to include only customs and immigration inspection-related processing.

In FY 2014, Congress expanded public-private partnership authorities for CBP in Section 559 of the *Consolidated Appropriations Act of 2014*, allowing CBP to enter into additional reimbursable fee agreements and to accept donations of real or personal property (including monetary donations) or non-personal services at POEs under the jurisdiction, custody, and control of CBP and General Services Administration. Although there are no limitations on the number of agreements for the land and sea environments, CBP is limited to five per year over five years in the air environment. While Congress continued to limit reimbursement for overtime services only in the air environment, the new authority expanded applicable "services" to include agricultural processing and border security services.

Electronic System for Travel Authorization

ESTA is a program that allows DHS to pre-authorize travelers to the United States who are eligible to travel under the Visa Waiver Program. Nationals of 37 eligible countries complete an online application seeking authorization to travel to the United States. For additional information regarding ESTA, please see the section on User Fees.

Travel Promotion Act

Pursuant to authority provided by the *Travel Promotion Act of 2009*, CBP began collection of a fee as part of the introduction of the Electronic System for Travel Authorization (ESTA) on September 3, 2010. The \$14.00 fee contains two parts. The first, currently set at \$4.00 by regulation, ensures recovery of the costs of administering the ESTA program only. The Travel Promotion Act also requires CBP to collect an additional \$10.00 fee from every approved applicant to fund the promotion of tourism in the United States. This part of the fee is credited to a separate account known as the Travel Promotion Fund, which funds the Corporation for Travel Promotion (CTP); a non-profit corporation established by the Act to promote tourism and travel to the United States, now known as Brand USA.

The Administration proposes to permanently extend the authorization to collect the surcharge, which is scheduled to expire September 30, 2015. Under the proposal, 80 percent of the amount collected will be allocated to BrandUSA (listed below as governmental receipts), and 20 percent will be allocated to CBP. In FY 2016, total collections from the surcharge are projected to be \$142 million. Of this amount, \$28 million would go to CBP with the remainder going to BrandUSA. These funds will support BrandUSA's efforts to promote international travel to the U.S., thereby increasing U.S. tourism exports, and the hiring of 125 new officers by CBP, which will reduce wait times for travelers entering the U.S.

Entry/Exit Transformation Office (EXT)

The CBP entry/exit transformation office was established as part of the *DHS 2013 Appropriations Act*, which transferred funding and personnel from the Office of Biometric Identity Management (OBIM) to CBP. The congressional intent of this transfer was to centralize the entry/exit mission at one location rather than being dispersed among various components. The Act provided \$12,284,000 to the Office of Field Operations to support salaries and expenses associated with entry/exit policy and operations.

The mission of EXT is to enhance the integrity of the immigration system by providing assurance of identity on foreign nationals arriving and departing the United States. The program goals are to:

1. Enhance the existing biographic entry/exit system by increasing and improving the availability of exit data for decision-makers and for matching to entry data;
2. Identify and implement operational solutions of biometric technologies to support a biometric entry/exit program in the air and sea environments; and,

3. In partnership with other DHS components, identify and sanction those who violate immigration laws, including overstaying in the United States.

Enhanced screening through improved biographic information (Arrival and Departure Information System (ADIS):

In FY 2014 the ADIS program was transferred from the Office of Biometric Identity Management (OBIM) to CBP⁷. ADIS was initially deployed October 1, 2002 to implement a fully automated entry and exit control system for every alien arriving or departing the United States by air or sea under the Visa Waiver Program (VWP). ADIS contains biographic data on foreign nationals traveling to the U.S., and primarily supports the missions of Entry/Exit reconciliation and admissibility associated with visa/non-visa overstays. This system processes over 2.6 million transactions per day to create person-centric records that consolidate travel history and alterations to immigration status associated with admissibility. ADIS is the only federal government system that provides a comprehensive record of non-U.S. citizens' immigration status, including information identifying those that stayed longer than their allotted time, or left the country after staying longer than their allotted time. Visa overstay leads are referred to U.S. Immigration and Customs Enforcement for action. In addition to serving CPB and ICE, ADIS shares data with U.S. Citizenship and Immigration Services, the Transportation Security Agency, the Department Of State, and various Intelligence Community agencies.

Cost Avoidance/Efficiencies/Workforce Multiplier Impact

EXT enables DHS and CBP to automate manual processes associated with entry and exit operations, as well as enhance screening through transformative biometrics.

1. Automate manual processes: DHS spends significant funding each year manually matching entry and exit records on instances in which biographic information either does not match or there is no exit data available, resulting in an apparent overstay. As EXT moves ahead with its programs to increase the exit data available and improve the data's accuracy, manual activities will be significantly reduced. Each instance of an apparent overstay costs \$40 to manually review. Based on Phase 1 of the US/Canada land border entry/exit program, approximately 200,000 apparent overstays would be eliminated providing an estimated cost avoidance of \$8 million annually. Document Validation is expected to have a similar effect in terms of matching entry and exit records in an automated fashion that previously required manual review.
2. Enhanced screening through transformative biometrics: Emerging biometric technologies deployed for biometric exit could have a transformative impact on the entry process by facilitating travelers that are known to CBP without compromising security. Emerging technologies such as facial recognition and iris scans are significantly faster than fingerprint technology and provide flexibility in implementation options. While CBP would not replace fingerprint collection entirely due to the security benefits provided, using additional biometrics for subsequent verification of travelers could save significant time. CBP is

⁷ As per the 2014 Consolidated Appropriations Act.

working with the DHS Science and Technology Directorate through FY 2014 to test emerging biometric technologies in a closed environment.

CBP Mobile

In FY 2013, over 500 mobile devices were in use supporting numerous core mission areas, including the handheld license plate/document reading device (MC75A) for land border; the Enforcement Link Mobile Operations (ELMO); flexible, web-based applications for all passenger and cargo processing, and SEEK, a comprehensive, multimodal identification and enrollment platform for Border Patrol. The use of mobile devices has directly led to over 1,000 enforcement actions, including identification of subjects of National Crime Information Center warrants and the interdiction of undocumented aliens, narcotics interdictions, unreported currency, and weapons violations. In FY 2013, the use of the ELMO device by OFO in both passenger and cargo operations resulted in the reduction of over 23,000 inspection hours, that is the equivalent of 20 CBPOs and \$2.4 million in salaries and benefits.

Exhibit 9: Notable Improvements to CBP Operations from CBP Mobile

Immigration Advisory Program/Joint Security Program

The Immigration Advisory Program (IAP) was created by CBP in 2004 to prevent terrorists and high-risk or improperly-documented travelers from boarding commercial aircraft destined to the United States.

Building upon the IAP concept, CBP launched the Joint Security Program (JSP) in 2009, partnering with host country law enforcement to identify air passengers linked to terrorism, narcotics, weapons, undocumented currency, and human smuggling. Both the IAP and JSP coordinate closely with air carriers, other U. S. government agencies, and foreign partners.

The IAP focuses upon the screening of U.S.-bound passengers, coordinating with air carriers to issue no-board recommendations for high-risk or improperly-documented travelers.

JSP officers work in tandem with host government law enforcement to jointly engage targeted travelers arriving into and departing from the host country (U.S.-bound and foreign-to-foreign commercial flights).

Exhibit 10: IAP and JSP Operational Locations

With advance support from the National Targeting Center-Passenger (NTC-P), IAP and JSP officers are uniquely positioned to confirm watchlisted travelers and to assess the potential risk of non-watchlisted individuals identified through roving, scenario- and intelligence-based targeting.

Since initiating operations in 2004, IAP and JSP officers have issued 20,080 no board recommendations for high-risk and improperly-documented travelers. Each no board recommendation saves CBP expenses associated with the additional processing required for improperly documented or inadmissible passengers at a U.S. POE and in many cases prevents a person who may be a risk to national security from boarding a U.S. bound flight. The categories of JSP successes show disruption to the flow of high risk passengers and contraband likely headed to the U.S. and the interception of the proceeds of illicit activity and organized crime.

Exhibit 11: IAP/JSP Successes^[4]

IAP/JSP Successes		
Action	FY 2013	FY 2004 - FY 2014 YTD
U.S. Bound No Boards	3,501	20,723
Improper Traveler Documentation	1,984	14,988
Fraudulent Documents	41	425
Potential High-Risk Traveler Interviews	1,380	4,673
Alien Smugglers	8	41
Terrorist Screening Database Matches	68	534
TSA No Fly Matches	20	62

Exhibit 12: JSP Successes from September 2009 through FY 2014 YTD^[5]

	JSP Mexico		JSP Panama	
	FY 2013	Total	FY 2013	Total
Fraudulent Documents	41	278	124	375
Fugitives Intercepted	122	274	226	310
Narcotics Violations	6	12	26	54
Illicit Currency	1	4	19	41

Cost Avoidance/Efficiencies/Workforce Multiplier Impact

The cost avoidance associated with IAP and JSP no board recommendations versus adverse action processing costs at the POEs is approximately \$2,500 per admissibility action. To date, IAP/JSP no-board recommendations have enabled airlines to avoid \$33.1 million in potential fines (calculated at \$1,650 per passenger). These recommendations have resulted in estimated cost avoidance to CBP of \$36.7 million in costs associated with the detention and removal of inadmissible passengers (originally calculated in FY 2004 at \$1,507 per passenger; revised and calculated in FY 2012 at \$2,499.34 per passenger). Combined cost avoidance to carriers and CBP in FY 2013 exceeded \$14.5 million.

^[4] Exhibit 10 includes combined IAP/JSP statistics for U.S.-bound flights. The FY 2014 data is current as of November 29, 2013.

^[5] Exhibit 11 includes statistics for JSP Mexico and Panama (joint engagement with host country) on non U.S.-bound flights.

Western Hemisphere Travel Initiative/Land Border Integration (WHTI/LBI)

WHTI is the joint DOS and DHS initiative implementing a key 9/11 Commission recommendation and the statutory mandates of the *Intelligence Reform and Terrorism Prevention Act of 2004* (P.L. 108-458). WHTI has established document requirements for travelers entering the United States who were previously exempt, including citizens of the United States and Canada. The WHTI requirements for air travelers went into effect in January 2007 and compliance continues to be high -- over 99 percent for U.S. and Canadian citizens. WHTI secure document requirements were successfully implemented on June 1, 2009, at all of the Nation's POEs.

Since the implementation of the statutory initiative, the WHTI program remains vital to CBP's efforts to achieve a 100 percent query rate against the national security and law enforcement watch lists for all travelers. These queries (up from just 5 percent in 2005), add a layer of security by

FY 2013 WHTI Query Rates (9/30/13)	
Northern Border	99.3%
Southern Border	96.8%
National Average	97.7%

providing CBP the ability to perform criminal wants/warrants (NCIC) checks, including additions to the terrorist watch list, and identifying travelers who may be a threat to national security. Today, over 99 percent of all inbound traffic is processed by 2nd generation license plate readers (LPRs), Radio Frequency Identification (RFID) readers, and improved processing applications. WHTI technology combined with the increase of RFID enabled documents automated most law enforcement queries – simultaneously reducing inspection time and adding a layer of security through authentication. Today, CBP performs law enforcement queries for 98 percent of travelers at the land border, compared to only 5 percent in 2005. The use of RFID-enabled travel documents has rapidly increased – 50 percent of all law enforcement queries during September 2013 were initiated from RFID-enabled documents and in San Diego Field Office the rate of queries increased to 71 percent. As of September 30, 2013, more than 22.8 million RFID-enabled travel documents have been issued to travelers, an increase from 17.4 million on September 30, 2012.

CBP has capitalized on the initial success of WHTI and technical capability through the continued implementation of the “Triangle Strategy.” This strategy implements and expands innovative technologies and processes at the land border through the integration of inbound, outbound, and Border Patrol checkpoint processing by sharing information between core operations to improve targeting capabilities. The Triangle Strategy is being achieved via an integrated approach that includes:

- Active Lane Management (ALM) – efficiently allocates available officers and booths by re-designating primary vehicle lanes as either Ready Lanes or Dedicated Commuter Lanes (DCL) based on current traffic conditions and infrastructure limitations.
- Pedestrian Reengineering – applies a hybrid WHTI solution, which includes traveler kiosks to improve pedestrian queuing and automates travel document queries in advance of the traveler's arrival. Results at the initial five pedestrian sites where kiosks have been deployed:

- Rapidly growing traffic share: The new kiosks now process 33 percent of all southwest border pedestrian traffic and over 60 percent of the traffic at the seven deployed locations.
- 35 percent faster processing: The Ready Lane kiosks expedite pedestrian processing an average of 35 percent (30 seconds for kiosk pre-processing compared to 46 seconds for general processing).
- Shorter border waits: At the five locations with the new kiosks, Ready Lane pedestrian travelers wait an average of 7 minutes compared to general lane pedestrians who wait an average of 17 minutes in the passenger queue.
- Outbound Automation – deploys a variety of mobile, fixed, and tactical LPR solutions that support pulse and surge outbound operations through advanced information. The current fixed and mobile technologies that automate license plate and document law enforcement queries have been deployed to 41 southwest border locations. These solutions have provided real time information which has led to the following enforcement actions in FY 2013:
 - \$22.3 million in currency seizures
 - 911,184 grams of narcotics
 - 2,447 seizure arrests
- Border Patrol Checkpoint automation – an integrated extension of WHTI technology (fixed and tactical license plate readers and mobile devices to automate document and license plate queries) have been deployed to 26 Border Patrol checkpoints. From October 1, 2012, to November 1, 2013, six tactical and one fixed deployment have been completed. These capabilities ensure that border-centric information is available in real time as tactically required across all mission areas.

Cost Avoidance/Efficiencies/Workforce Multiplier Impact

The enhanced transformative efforts at the land border equates to \$5.10 savings in opportunity costs for every traveler (wait time savings) when \$1.00 is spent for the Land Border Integration Team. For instance, a Ready Lane is a primary vehicle lane dedicated to travelers who possess RFID-enabled documents. ALM is the approach of monitoring incoming traffic and making adjustments to lane designations as needed. ALM is analogous to management of toll booths on a highway. Trusted Traveler Lanes are similar to EZ Pass lanes, Ready Lanes to exact change lanes, and general lanes would be similar to full service lanes. The successful deployment of vehicle Ready Lanes has resulted in a decrease of process time, improved vehicle throughput, and reduced border wait time. Ready Lanes efficiently process inbound vehicles 12 - 18 seconds faster than general lanes, increase vehicle throughput by up to 25 percent, and reduce overall wait times by 50 percent when compared to general lanes. The increase in efficiency also resulted in additional CBPO savings in FY 2013 equivalent to 20 CBPOs and a cost avoidance of \$2.4 million (total 42 CBPOs savings in FY 2013 vs. 22 CBPO savings in FY 2012).

Preclearance

Preclearance relieves congestion at U.S. “gateway” airports, reduces airline delays, and a ‘domestic style arrival’ at U.S. airports provides a more efficient transfer for travelers. Preclearance improves CBP’s ability to protect the American homeland by extending our borders and preventing terrorists, terrorist instruments, and other national security threats from gaining

access to the United States. Additionally, Preclearance protects U.S. agricultural infrastructure from foreign pests, disease, and global outbreaks; fosters cooperation with foreign (host) authorities in diplomatic, law enforcement, and international security issues; and supports economic interests by improving travel and commerce with the United States.

Preclearance provides for the inspection and clearance of commercial air passengers prior to departure from sixteen locations in six foreign countries and six time zones in support of CBP's extended border strategy. Preclearance locations include Aruba; Bermuda; Freeport and Nassau, Bahamas; Calgary, Edmonton, Halifax, Montreal, Ottawa, Toronto, Victoria, Vancouver, and Winnipeg, Canada; and Dublin and Shannon, Ireland. Preclearance will began operations in Abu Dhabi, United Arab Emirates, in early 2014. This is the first expansion of Preclearance since 2006.

Exhibit 13: FY 2013 International Footprint - Preclearance

A Preclearance inspection is essentially the same inspection an individual would undergo at a U.S. POE, except that it is conducted outside of the United States. Travelers inspected and cleared overseas do not have to undergo a second CBP inspection upon arrival in the U.S. All mission requirements are completed at the Preclearance POE prior to departure, including customs, immigration, and agriculture inspections. In FY 2013, Preclearance processed 15.99 million travelers at international Preclearance locations.

Exhibit 14: Preclearance Travelers Processed FY 2011 – FY 2013

Cost Avoidance/Efficiencies/Workforce Multiplier Effect

Preclearance locations operate with a reduced, layered enforcement posture when compared with that of a typical U.S. air POE. For example, Preclearance locations do not have to assign resources for cargo, trade, or outbound enforcement responsibilities. Because CBPOs at preclearance locations are dedicated primarily to air passenger processing only, they process, proportionately speaking, approximately 60 percent more passengers than their stateside counterparts. In addition, the average cost to inspect and clear a passenger prior to entering the U.S. is approximately 30 percent less than the cost to perform the same inspection at domestic airports.

Overall, Preclearance locations produce a higher annual average rate of inadmissible interceptions than U.S. POEs. These passenger interceptions result in cost avoidance for the U.S. government in terms of detention, processing, and repatriation, as well as support costs generally associated with domestic apprehensions. The U.S. government avoided approximately \$24.1 million in detention costs that would have been incurred based on 9,629 inadmissible interceptions that were made at Preclearance locations in FY 2013.

Securing and Expediting Trade

Office of Field Operations

The international trade process involves many stakeholders working together to develop trade policy, set priorities, operate daily import and export procedures at home and abroad, address security and safety concerns, and deliver and use imported goods.

CBP controls trade through the POEs as goods arrive at the border. CBP maximizes trade processing by applying a mix of frontline staffing, technology, and programs that maximize the

staffing and technology resources. Experienced CBPOs; CBP Agriculture Specialists; Import Specialists; National Import Specialists; Entry Specialists; Drawback Specialists; and Fines, Penalties, and Forfeitures Specialists use their expertise to target, examine cargo, review entry documentation, collect duties, and interact with the importing community to enforce and ensure compliance with U.S. trade laws.

As in the passenger and travel environment, CBP has been looking at a number of business transformation initiatives to apply in the trade environment that provide a smarter use of available resources in response to growing challenges. Below are transformation initiatives that are being considered and/or implemented to mitigate some of the challenges:

1. CBP and Pacific Northwest National Laboratory, in coordination with the Domestic Nuclear Detection Office, have developed a near-term, low-cost approach to make Radiation Portal Monitor (RPM) operations more effective and efficient. The initiative focuses the existing RPMs capabilities on defined threat detection and minimizes alarm response to benign radiological material present in commerce. This approach will reduce overall risk and allow CBP to implement more efficient operational concepts. For example, it provides near-term operational enhancements while CBP completes long-term efforts to address RPM life cycle replacements. If implemented in FY 2014 at the largest sea POEs, this initiative could reduce inspection time by 44,000 hours annually. This equates to a value of \$1.4 million per year to commercial trade. The implementation of this initiative will also allow CBP to shift up to 100 CBPOs to other enforcement missions and support a long-term reduction in secondary RPMs avoiding future acquisition and maintenance costs of up to \$44 million over 10 years.
2. CBP is working to provide a proof of concept for a focused screening/scanning method, which will allow CBP cargo officers to remotely view and evaluate Radiation Detection Equipment scans and Non-Intrusive Inspection images. The PRIDE 2.0 application intends to incorporate data from RAD/NUC scanning and NII imaging systems at CBP POEs. It is also intended to improve the processing of data in support of analysis, targeting, and automated capture/long term storage of the data. This new application also intends to integrate with Automated Targeting System (ATS) and Cargo Enforcement Reporting and Tracking System (CERTS), eliminating the need for duplicative exam data entry into separate systems.

Centers for Excellence and Expertise (CEE): Innovation in Trade Enforcement

As of June 2013, CBP has successfully implemented this initiative by opening all 10 planned CEEs. With these Centers established, CBP has covered the full range of products imported into the United States, as shown below in Exhibit 15.

CBP is transforming trade processing to find efficiencies for both CBP and the international trade community. Leading the way in these efforts are CBP's CEEs that provide centralized processing for the Trade community using a team of industry-focused CBP experts located virtually nationwide. The CBP employees at the CEEs protect the U.S. economy by identifying risks, preventing harmful products from entering into U.S. commerce, and by recovering lost revenue due to unfair or illegal trading practices.

By having a dedicated industry CEE, the international trade community now has one location responsible for processing importations for a particular industry. This enhances uniformity of decisions. The small/medium-sized businesses can contact the CEE on any importing questions they have. The Centers also collaborate with other government agency partners to resolve issues.

Exhibit 15: Centers for Excellence and Expertise by Industry

Center Industries

Anti-Terrorism Contraband Enforcement Teams (A-TCET)

Over 3,000 CBPOs were assigned to the A-TCET in FY 2013. CBP established these teams in 2003, uniting the former Contraband Enforcement Teams, Manifest Review Units, Non-Intrusive Inspection (NII), Canine, and Outbound teams to form a single A-TCET. The A-TCET works closely with the Passenger Enforcement Rover Team and Passenger Analysis Unit teams to coordinate all enforcement activities. Although the primary mission of A-TCET teams is anti-terrorism, their activities encompass all types of contraband, including items such as narcotics, currency, weapons, and counterfeit goods.

Non-Intrusive Inspection Conveyance Inspections

Since examinations with NII equipment are much faster than manual inspections, NII conveyance searches (which include large-scale x-ray and gamma ray imaging systems, radiation detection equipment, small-scale baggage x-ray systems, and portable and hand-held devices) are important tools that help CBPOs fulfill their mission. Without NII equipment, CBPOs would be dependent on labor intensive and time consuming manual inspections. The NII equipment inventory is funded by the Inspection and Detection Technology PPA. The Inspections, Trade, and Travel Facilitation PPA primarily represents salary and benefits costs associated with the NII Conveyance Inspections activities at the POEs.

Exhibit 16: NII Exams Performed on Inbound Cargo FY 2008 - FY 2013

Exhibit 17: Radiation Portal Monitor Exams Performed on Inbound Cargo from FY 2008 - FY 2013 (excluding Express Consignment Courier Facility (ECCF) mail scanned)

Cost Avoidance/Efficiencies/Workforce Multiplier Impact

NII Technology exams require a fraction of the time required by a manual CBPO exam, which creates a workforce multiplier effect. A typical manual cargo inspection requires three people working a minimum of 2 hours on average to complete. A typical large-scale NII examination requires three personnel an average of 8 minutes to complete, saving approximately 112 minutes per inspection.

In FY 2013, CBP conducted approximately 7.1 million NII exams in the land, air, and sea environments. If NII technology had not been used to conduct these exams, the same workload would have required approximately 7,000 CBPOs as opposed to only 500 CBPOs utilizing NII technology. The NII utilization policy shifted from volume-based scanning to threat-based scanning that aligns with risk reduction resulting in a 6 percent decrease in examinations but a 36 percent increase in NII-related seizures.

Additionally, CBP's Proof of Concept (PoC) to determine the feasibility of an integrated concept of operation (CONOP) in the cargo environment was successfully demonstrated in September at Long Beach, CA (Pier T). This PoC assessed the viability of integrating Radiation Detection Equipment (RDE) and NII equipment, and communication via a centralized interface in a Command Center to provide a workforce multiplier by creating a more efficient, less labor intensive inspection process. Also demonstrated was the use of CBP Technicians to perform non-law enforcement duties such as "ground guides." The success of this PoC during the last quarter of FY 2013 at a seaport supports developing a long-term pilot of the integrated CONOP at a land border POE in FY 2014. The potential CONOP savings is up to \$16 million by using GS-5 technicians as ground guides and \$2 million if gates are remotely operated.

OFO Special Programs

Canine Enforcement Program (CEP)

CBP's CEP plays a crucial role in anti-terrorism and interdiction efforts. CBP has established and deployed a world-class detector dog program to augment existing technology while establishing cutting edge detection capabilities. OFO canine teams are strategically assigned to POEs around the United States and to Preclearance stations abroad. CBPOs use specially trained detector dogs in interdiction and to support specialized programs aimed at combating the terrorist threat at the Nation's borders, international airports, and seaports. OFO has approximately 736 CBPOs and CBP Agriculture Specialists dedicated to OFO canine enforcement operations across the nation. CBPOs use specially trained detector dogs in interdiction and to support specialized programs aimed at combating the terrorist threat at the Nation's borders, international airports, and seaports. CBP Agriculture Specialist Canine Handlers and their canines serve a vital role in detecting fruits, vegetables, meats, or other prohibited items that may carry animal and plant diseases or pests entering the United States, intentionally or by accident, that can cause serious damage to America's crops, livestock, pets, environment, and economy.

Exhibit 18: FY 2013 Office of Field Operations Canine Teams by Type

Select Inspection Programs

Outbound Program

The Outbound Program oversees current and developing long-term strategies for U.S. outbound operations at all POEs; including land crossings, airports, international mail and express courier facilities, and seaports for CBP. The program mandate also includes addressing the escalating violence in Mexico.

The program efforts include ensuring that CBPOs are:

- Trained to conduct outbound operations;
- Possess adequate outbound facilities, equipment, and technology;
- Work with international and other government law enforcement agencies as appropriate; and
- Leverage trade/traveler partnerships programs and the use of automated targeting systems to identify high risk exports/travelers while facilitating the flow of legitimate trade and travelers.

On the southwest border, CBP employs a risk based strategy for outbound operations, that are normally short in duration; periodic outbound inspections followed by periods without inspections. This allows for the immediate stand-down of outbound inspections to manage traffic flow departing the POE.

Exhibit 19: National Statistics for Program Seizures

National Outbound Program (OFO Seizures) from FY 2009 through FY 2013						
	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	Total
Illicit Currency	\$ 53,800,000	\$ 45,700,000	\$ 47,300,000	\$ 31,700,000	\$ 36,850,312	\$ 215,350,312
Firearms	437	2,351	2,016	649	2,767	8,220
Firearms Parts (OTHER Property under ARMS)	6,100,000	96,200	67,200	7,400	16,877	6,287,677
Ammunition Rounds	2,200,000	7,300,000	1,900,000	214,000	387,165	12,001,165

Advanced Targeting Unit (ATU)

The primary focus of the ATU is to identify shipments that pose a possible threat to the national security of the United States and determine the CBP operational response to those potential threats. The primary and imminent threat relates to terrorists and instruments of terrorism. Other threats include smuggling of narcotics and other contraband, alien smuggling, fraudulent documents, agricultural threats, and shipments that pose a threat to the economic security of the United States.

Agriculture Programs and Trade Liaison (APTL)

APTL provides leadership, expertise, and innovation to defend the U.S. from the threats of agricultural and biological terrorism (or Ag/bio-terrorism). APTL is also responsible for safeguarding and protecting American agriculture from the risks associated with the entry, establishment, or spread of plant pests and pathogens, noxious weeds, and foreign animal diseases.

The Agriculture program receives funding from the Salary and Expenses appropriation and user fees. Refer to the Animal and Plant Health Inspection Service (APHIS) budget request for more information on the APHIS user fee.

Development of the Agricultural Model

APTL is continuing efforts to establish the CBP Agriculture Specialist Resource Allocation Model in order to ensure that adequate CBP Agriculture Specialists are staffed at the highest risk ports for introducing pests and disease into the U.S. In Fiscal Year 2013, CBP completed the CBP Agriculture Specialist Resource Allocation Model. CBP is currently working to validate the model with an independent contractor. This model incorporates risk assessments and workload activities, including the agriculture canine program. The agriculture inspections also reduce the foreign pests and disease vulnerability to the agriculture sector. Currently, DHS estimates that invasive species cause \$136 billion in lost agricultural revenue every year. As noted in the APHIS budget request, CBP and the Department of Agriculture (USDA) are reviewing existing fee rates to ensure they are set at a level that recovers the full cost of

performing agricultural inspection services. A comprehensive review of program resource requirements conducted by USDA and its contractor, with input from CBP, is complete. USDA is proceeding with the notice of proposed rulemaking and the notice should be issued in early 2014.

APTL Integrated Database Management System (AIDMS)

The CBP agriculture mission lags behind in the CBP modernization program towards electronic data filing and paperless entry processing. APTL and CBP Agriculture Specialists have USDA requirements that are differ from other CBP requirements and agriculture cargo entry reviews rely on hard copies of permits, certificates, notices of entry and manifests filed by trade. Thirty percent of CBP Agriculture Specialists workload is spent on manual, flawed, and duplicative entry of trade data into the APHIS Agriculture Quarantine Activity System databases. APTL will continue to work with CBP Office of Information and Technology to develop an APTL Integrated Database Management System (AIDMS) that will:

- Seamlessly and cost-effectively integrate CBP and APHIS systems and processes;
- Eliminate manual data entries by CBP Agriculture Specialist at U.S. POEs;
- Provide the infrastructure for cataloging, screening, and analyzing critical data for agriculture risk targeting and generating key performance metrics; and,
- Satisfy the Government Accountability Office recommendations to improve data collection for agriculture quarantine inspection operations.

Office of International Trade (OT)

The CBP Office of International Trade (OT) leads and manages the development of mechanisms that support key elements of U.S. trade policies and are implemented through the development of programs, guidance, regulations, and rules, and other compliance mechanisms executed by OFO at POEs. The portion of resources from this PPA assigned to OT is \$148.533 million with 973 FTE.

OT is comprised of five operational directorates to fulfill its mission in the most efficient and effective manner.⁸ These directorates perform key functions that produce commercial benefits below. Please note that the table is limited to operational directorates to the exclusion of mission support:

Exhibit 20: OT Operational Directorates*

Directorate	Key Functions	Commercial Benefits
Commercial Targeting and Enforcement (CTE)	<ul style="list-style-type: none"> • Uses large scale analytical support to assist in the detection and disruption of fraudulent activities • Formalize the strategic case development process and 	<ul style="list-style-type: none"> • Improved analytical support, data collection and correlation, analysis, risk management techniques • Development and reporting

⁸ The following customs revenue positions are assigned to the Office of Trade: Attorneys, Customs Auditor, and International Trade Specialists.

Directorate	Key Functions	Commercial Benefits
	supporting immediate enforcement actions <ul style="list-style-type: none"> • Provide semiannual broker examination opportunities • Provide strategic trade performance measures and trade related information and analysis that develops models and reporting systems in support of trade transformation initiatives 	systems that will reduce the number of nonproductive examinations <ul style="list-style-type: none"> • Utilize analytical techniques on a large scale basis rather than an individual entry approach • Semiannual broker examination opportunities permit the increase of broker facilities provided to the importing community
Regulations and Rulings (R&R)	<ul style="list-style-type: none"> • Technical legal support, advice, and guidance for CBP trade and border operations • Uniform interpretation and application standards for trade laws • FOIA compliance • All regulatory documents and Federal Register notices for CBP. 	<ul style="list-style-type: none"> • Uniform and impartial application of trade laws and facilitation of the flow of legitimate trade • Increase transparency in CBP rules and procedures relating border security, trade compliance for the benefit of the trade community, CBP personnel and other government agencies
Regulatory Audit (RA)	<ul style="list-style-type: none"> • Examines the records, accounts and internal controls of entities to ascertain the accuracy and potential liability for duties, fees and/or taxes due to the United States government 	<ul style="list-style-type: none"> • Protects government revenue • Ensures compliance with trade laws • Facilitates legitimate trade • Protects the security and safety of American businesses and citizens from harmful goods • Supports commercial fraud enforcement with ICE/HSI
Trade and Policy Programs (TPP)	<ul style="list-style-type: none"> • Develops CBP trade policy • Conducts national operations on multiple source countries, commodities, and threats; coordinates with industry and other agencies to develop national operations 	<ul style="list-style-type: none"> • Defined priority trade issues of IPR, Antidumping and Countervailing Duties (AD/CVD), Textiles, Trade Agreements, Import Safety & Centers for Excellence and Expertise (CEEs)
Automated Commercial Environment (ACE) Business Office (ABO) ⁹	<ul style="list-style-type: none"> • Makes all business decisions concerning ACE, including requirements collection, prioritization, and communications 	<ul style="list-style-type: none"> • Ensures all stakeholders from the trade community and government are actively involved in the planning, development, deployment, and maintenance of ACE.

⁹ The ACE Business Office is funded with Salaries and Expenses appropriation and not with funding authorized under the Automation Modernization appropriation.

Directorate	Key Functions	Commercial Benefits
		<ul style="list-style-type: none"> Please refer to the Automation and Modernization section for a further description of the ACE program

*Excludes Resource Management Division, which provides human resources and administrative support.

Revenue Collection

Among the different directorates in OT, the Regulatory Audit Division (RA) is responsible for recovering revenue for CBP. RA audit efforts and recommendations have contributed to the collection of duties, fees, interest, and penalties to the Federal government, as follows:

Exhibit 21: Regulatory Audit Results

Total	2009	2010	2011	2012	2013
Audits Completed	345	379	384	374	424
Recommended Recoveries	\$51,560,720	\$51,766,869	\$81,594,460	\$52,933,536	\$132,893,885
Collections (Current and Prior Year Audits)*	\$27,636,734	\$37,222,383	\$43,528,614	\$38,994,208	\$88,474,832
Penalties**	\$1,617,770	\$4,292,995	\$3,811,096	\$1,110,143	\$947,780
Work in Progress	233	267	308	263	266

*Collections include duties, fees, and interest paid to the Federal government.

**Although RA does not recommend penalties, CBPOs are able to consider penalties as a result of audit findings.

Priority Trade Issues (PTI)

OT is responsible for critically important programs that have been segmented into five PTIs, each highlighted below: Intellectual Property Rights (IPR), Textiles and Apparel, Antidumping and Countervailing Duties (AD/CVD), Import Safety, Trade Agreements.

I. Intellectual Property Rights

The trade in counterfeit and pirated goods threatens America's innovation economy, the competitiveness of our businesses, the livelihoods of U.S. workers, and, in some cases, national security and the health and safety of consumers. The trade in these illegitimate goods is associated with smuggling and other criminal activities, and often funds criminal enterprises. CBP protects businesses and consumers every day through an aggressive Intellectual Property Rights (IPR) enforcement program.

CBP's strategy to enforce IPR is based on the pillars of facilitation, enforcement, and deterrence. In implementing this strategy, CBP has deployed new tools to more quickly determine the authenticity of suspected counterfeit goods, and is partnering with the private sector in an effort to transform IPR risk assessment by identifying low-risk shipments. To better equip its officers

to enforce IPR, CBP launched a new Integrated IPR Field Training program in FY 2012, and conducted 80 sessions through mid-FY 2013, when further sessions were cancelled due to sequestration. CBP has conducted numerous special IPR enforcement operations, including operations with foreign customs authorities, to increase IPR seizures.

OT, in collaboration with OFO and U.S. Immigration and Customs Enforcement/Homeland Security Investigations (ICE/HSI) successfully implemented the IPR Strike Unit (IPR SU) pilot at the Ports of Los Angeles/Long Beach and San Francisco. The IPR SU is designed to conduct site visits soon after infringing goods are identified at the Port, and focuses on real time and informed compliance in order to build better cases against IPR violators. In FY 2013, the IPR SU Teams in Los Angeles and San Francisco investigated ten companies, resulting in six controlled deliveries and search warrants; over \$10.7 million in seizures; Assistant U.S. Attorney involvement in three cases; and pending IPR penalty actions. CBP is a founding partner in the National IPR Coordination Center, and its largest source of criminal investigative leads. As illustrated in the chart below, CBP's IPR strategy has resulted in a 61 percent increase in seizures from 2009 to 2013.¹⁰

Exhibit 22: IPR-Related Seizures

II. Antidumping & Countervailing Duties (AD/CVD)

To protect U.S. commerce against imported merchandise that is sold at an unfairly low or subsidized price, and to facilitate the legitimate flow of imports, CBP is conducting a 5-year strategic plan, that maximizes our resources on detection and evasion enforcement through

¹⁰ CBP experienced an 8 percent decline in IPR seizures in FY 2012 due to a shift from enforcement against small shipments of counterfeit goods to concentration on the websites, which traffic in counterfeit goods. While this strategic shift will produce fewer IPR seizures in the short-term, it will produce a long-term decrease in the overall flow of counterfeit goods into domestic commerce. OT, however, experienced a slight increase in FY 2013 due to special IPR enforcement operations.

advanced targeting and analysis and streamlines our administrative process. OT uses automation, identification of high risk transactions; verification of evasion followed by swift penalty actions; and develops new ways to share information with our trade partners.

OT is also collaborating with OFO and ICE/HSI, to develop AD/CVD surges to address potential AD/CVD risk at an early stage for multiple companies grouped by industry or commodity. For example, to combat AD/CVD evasion, CBP created a Re-Engineering Dumping Team to discuss the import process, identify threats and vulnerabilities, and to determine how to enhance targeting and enforcement for entries subject to AD/CVD. OT has also collaborated with OFO and ICE/HSI to implement an AD/CVD surge process to target high risk companies identified due to potential evasion activities, trade allegations or congressional interest. Teams comprised of OT Auditors, International Trade Specialists and OFO Import Specialists focus on new or recent AD/CVD orders, industries of interest, or known high risk importers. In FY 2013, OT completed two AD/CVD surges. In addition, as part of the enforcement strategy, OT completed 88 assignments involving AD/CVD with recommended recoveries of over \$66.9 million.

III. Textiles and Apparel

Textile and apparel imports account for more than \$116 billion annually. These commodities are subject to high duty rates and account for 41 percent of all duties collected. CBP has developed an enforcement strategy to identify and address various forms of fraud, including false trade preference program claims for duty free treatment, false invoicing, false marking, false claims of origin, misclassification, mis-description, undervaluation of products, and smuggling. The graph below shows the estimated amount of revenue recovered as a result of violations on textile shipments over the past five years in relation to both Free Trade Agreements (FTA) and lack thereof (Non-FTA).

Exhibit 23: Textiles-Related Recovered Revenue

In FY 2013, CBP collected \$4.5 million in recovered revenue, nearly half of which was related to verifications conducted on shipments claiming preferential duty under one of the many complex trade programs. CBP also executed a special operation on apparel from China, targeting fraud schemes involving invalid importers of record and undervaluation, resulting in recovered revenue of approximately \$780,000.

CBP's Textile Production Verification Team (TPVT) program is one of the most effective tools for executing CBP's enforcement strategy. These teams conduct factory visits to verify origin and compliance with trade preference programs. In FY 2013, CBP visited 143 targeted factories in eight countries and found 36 percent were either unable to substantiate production or compliance with a trade program, or were in clear violation of a trade program. The continued success of the TPVT program relies on experienced personnel to target and conduct these detailed factory visits and recordkeeping reviews abroad.

As part of the CBP enforcement strategy, OT completed 45 textile-related audits in 2013 with recommended recoveries of over \$7.2 million. In addition, OT has established a textile working group that is an inter-disciplinary panel of CBP specialists coordinated through OT headquarters, to identify targets and develop enforcement strategies for textile and apparel importations and issues.

IV. Import Safety

Today, CBP helps to implement nearly 500 laws and regulations on behalf of 47 federal agencies at the border to ensure the health and safety of American consumers. Since 2008, OT and the Consumer Product Safety Commission have conducted joint product safety audits and inspections to look at an importer's controls over product safety destruction orders and penalty proceedings. While CBP continues to combat import safety risk on a daily basis, 2015 will be a critical year for CBP and for import safety. While the Import Self-Assessment Product Safety pilot program and the Commercial Targeting and Analysis Center (CTAC) are strong examples of what can be accomplished, CBP will do more in the coming fiscal year to promote import safety by

- 1) Leading the implementation of One U.S. Government at the Border;
- 2) Enabling lawful trade and strengthening comprehensive enforcement by integrating capabilities across the Federal enterprise; and
- 3) Reducing cost and administrative burdens to the trade community by refining partnerships and to create new processes for the regulatory framework.

As illustrated by the following chart, CBP has increased import safety seizures by 23 percent over the past five years.¹¹

¹¹ CBP experienced a 25 percent decline in import safety seizures in FY 2013 due to a refinement in its data processing. For FY 2013, the import safety working group within OT produced a more focused definition of the term 'Import Safety' for reporting purposes, which led to a decline in reported statistics. The Commercial Targeting and Analysis Center (CTAC) decreased targeted physical exams during FY2013, as part of CBP increased focus on trade outreach efforts as a means to better address non-compliance issues. As a result, CTAC dedicated a significant percentage of its resources to IPR-related import safety issues, which are now captured within the 'IPR Seizure' metric instead of counting under import safety.

Exhibit 24: Import Safety Seizures

V. Trade Agreements

OT is responsible for providing subject matter expertise for international trade negotiations as well as implementing and administering all free trade agreements, including the development of policy guidance for CBP field offices. In FY 2013, FTA accounted for over \$676 billion, excluding textiles and apparel representing approximately 28 percent (by value) of all imports. The United States currently has Free Trade Agreements with 20 countries and is currently negotiating the Trans-Pacific Partnership Agreement with ten participating countries. Canada and Mexico joined these negotiations in FY 2013, and Japan participated in a portion of the eighteenth round of negotiations, which took place in July 2013. As new agreements are negotiated and finalized, it will be paramount to address their complexities in order to minimize any potential loss of revenue.

Description of Select Adjustments to Base:

Greater Cost Recovery due to Increase AQI Fee Increase: CBP anticipates receiving an additional \$92.7 million from APHIS in FY 2015. USDA completed a comprehensive fee study on its fees in FY 2012. In FY 2013, USDA drafted the updated regulation to adjust the user fee rates. At the time of this budget submission, the new regulation has not been published; however, USDA expects that the full implementation will take place in FY 2015. This \$92.7 million projection is based on the assumption that a fee increase will be implemented starting in the second quarter of FY 2015. This increase of \$92.7 million will be used to recoup additional agriculture inspection costs incurred in CBP's S&E, Automation Modernization, and

Construction and Facilities Management appropriations in FY 2015. This additional \$92.7 million will allow CBP to recoup approximately \$50.563 million in S&E, \$29.005 million in Automation, and \$13.132 million in the Construction and Facilities Management appropriations. Of the \$50.563 in S&E, \$36.568 will be recouped in the Inspections, Trade, and Travel Facilitation PPA.

Consolidation of funding for the Office of International Affairs: This transfer realigns \$571,000 for the Office of Internal Affairs (INA) out of the Inspections, Trade, and Travel PPA into the Other international Programs PPA. This realignment fulfills the request by Congress to consolidate funding for INA primarily in the Other International Programs PPA, with some funds remaining in the International Cargo Screening PPA.

Consolidation of Funding for the Office of International Trade: This transfer realigns \$956,000 for the Office of International Trade (OT) out of the International Cargo Screening PPA and into the Inspections, Trade, and Travel PPA. This realignment fulfills the request by Congress to consolidate funding for OT to be funded out of the Inspections, Trade, and Travel PPA.

Greater Cost Recovery due to Increased COBRA FTA Collections: With the anticipated projected collections in COBRA fees from Canada, Mexico, the Caribbean, and the Adjacent islands, CBP is proposing to further offset its directly appropriated accounts by \$70 million. To avoid a shortfall, this offset requires the necessary legislative authority, which is requested as a general provision, coupled with the requested budgetary scoring. This increase in collections will permit CBP to become more cost recoverable with its COBRA eligible costs, thereby reducing the need for directly appropriated funding.

Pay Adjustment for Workforce Maturation: This PPA contains a \$110.6 million increase that is part of the overall \$194.6 million “Pay Adjustment for Workforce Maturation.” The majority of this additional funding is because of changes in the requirements associated with Border Patrol Agents (BPA) and CBPOs. The journeyman initiative and low attrition rates mean more promotions and Within-Grade Increases (WIGIs). The compensation (base salary, benefits, premium pay and overtime) associated with these increases is considerable. In FY 2015, compensation is expected to compose approximately 73 percent of the total CBP budget. In the past, CBP has realigned funding from non-pay categories to pay to provide the funding needed to sustain the BPA and CBPO floors; however further reductions to non-pay and mission support pay funding is becoming increasingly difficult to do without adverse operational impacts. This adjustment allows CBP to meet these pay requirements.

MAJOR ACQUISITIONS:

Land Border Integration (LBI)

Under Land Border Integration (LBI), CBP is capitalizing on the success of Western Hemisphere Travel Initiative (WHTI) by reusing the capabilities developed for inbound vehicles in other mission areas: pedestrian inbound, vehicle outbound, and Border Patrol checkpoints. CBP is further leveraging these capabilities by integrating systems and sharing data across these missions. This integrated approach and expanded scope is reflected in the program name change

from WHTI to LBI. WHTI provides advanced information, streamlines documentation requirements, assembles comprehensive travel histories and enhances intelligence and targeting rules. LBI will continue expansion of initial operating capabilities for pedestrian and outbound. LBI addresses a capability gap by providing advanced information, streamlining documentation requirements, assembling comprehensive travel histories and enhancing intelligence and targeting rules.

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
74,000	73,971	74,019

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
O&M (60,000)	Radio Frequency Identification (RFID) / License Plate Reader (LPR) Integration O&M	Monitor/maintain/upgrade/repair deployed RFID/LPR technology processing travelers entering the U.S. via the land border.
	Enhanced Driver's License O&M	Maintain access to State and Canadian Province driver's license data to verify travelers entering the U.S. via the land border.
	Software Application O&M	Maintain/update software used by CBPOs to process travelers entering the U.S. via the land border.
	Technical IT PMO	Maintains PMO overseeing IT portion of investment.
	Data Center O&M	Maintain hardware, software, and communications links in data center used to support deployed technology and software applications.
Program Management (14,019)	PMO Operations	Provides management oversight for program, policy direction, planning, administration, and reporting.
	Related Activities	Provides for identification, evaluation, and testing of activities related to the LBI program to determine ability to improve traveler processing at the border.
	Management and Contingency Reserve	Provides for unforeseen events, emergent problems, legislative requirements, and evaluation of new technologies and techniques.

FY 2015 Request	International Cargo Screening Total	231	221	69,173

CURRENT SERVICES PROGRAM DESCRIPTION:

The International Cargo Screening (ICS) PPA primarily supports OFO and secondarily the Office of International Affairs (INA). ICS enables the implementation of a key part of CBP's layered cargo security strategy by deploying multidisciplinary teams to foreign seaports. These teams target and examine high-risk cargo before it is placed on vessels bound for the United States. The Container Security Initiative (CSI) and the Secure Freight Initiative (SFI) inspection

activities protect global trade lanes and systems between overseas points of origin and the United States. The process enables greater security through collaboration.

The synergy between the CSI and SFI programs have resulted in a blended approach to targeting and inspecting high-risk cargo before reaching a U.S. port. The coordination of these programs will allow CBP to optimize its resources and efforts to synchronize, streamline, and advance operations and technology in a more efficient manner with limited resources. The portion of the requested PPA total for OFO is \$62.328 million with 197 FTE; the portion of the requested PPA total for INA is \$6.845 million with 24 FTE.

Total	69,173	100.00%

Office of Field Operations

Container Security Initiative

The CSI program was established in January 2002, and has been part of the government's strategy to secure the nation from the potential terrorist threat of using maritime cargo containers. CBP has focused substantial attention and resources over the last several years on securing goods being transported within maritime containers. As a result, CBP has strengthened its multi-layered security measures, more effectively securing and facilitating the large volume of goods arriving in the United States each year. Security risks are reduced by leveraging programs such as CSI for the integrated scanning of high-risk cargo, the Customs-Trade Partnership Against Terrorism (C-TPAT), and the Importer Security Filing (often called "10+2") for the advance collection of manifest and import data to enhance targeting. CBP's layered and risk-based approach provides that, at a minimum, 100 percent of high risk cargo is examined through a number of measures, including screening, scanning, physical inspection, or resolution by foreign authorities. In addition, CBP has strengthened automated targeting systems and enhanced the quality and timeliness of the commercial data upon which those systems rely.

The CSI program continues to foster partnerships with other countries and trading partners to inspect high-risk shipments before they are loaded on vessels bound for the U.S. CBP, through CSI, ensures effective coordination with host countries by conducting periodic risk evaluations of ports to assess the level of staffing and other resource needs. CBP encourages interagency cooperation by developing a capacity to collect and share information and trade data gathered from CSI ports.

Exhibit 2: CSI/SFI Ports as of September 2013¹²

Hong Kong	Hong Kong		Manzanillo		

Using technology to scan high-risk cargo, CSI ensures rapid scanning without impeding the flow of trade. CSI technology includes large-scale X-ray, gamma ray machines, and radiation detection devices. In FY 2013, CSI and SFI reviewed 11,228,203 bills of lading and conducted 103,999 exams of high risk cargo in cooperation with the host government.

Cost Avoidance/Workforce Multiplier Impact

The CSI program has encouraged other governments to increase their security strategy and awareness. In FY 2013, CSI and SFI performed 103,999 exams at foreign port locations. Although the CSI program has been operational for over 10 years, there has never been an instance where a WME/WMD has been detected in a container that has arrived in the US from a CSI port. There are other successes that cannot be directly measured such as cooperation with foreign governments and deterrence. Due to the cooperative implementation of the security strategy, CSI is more efficient and cost effective. By utilizing a variety of CSI models (reciprocal arrangements, remote technology, Customs Mutual Assistance Agreements, etc.) and

¹² The CSI program has identified some efficiencies that is allowing the program to expand to Aqaba, Jordan, early in 2014.

reorganizing or reducing staff overseas, further cost savings have been achieved while continuing to enhance cooperation with foreign governments.

CSI is a critical component of the overall layered security strategy. In an effort to secure the global supply chain, CBP relies on large scale NII and Radiation Detection Equipment to mitigate high risk cargo and ensure cargo destined for or arriving in the U.S. is safe and secure. CBP examines high-risk cargo from vessels destined for the United States in a foreign port prior to lading. The cost for performing these exams domestically would be approximately \$234 million. Cargo exams conducted in the U.S. can potentially cost from \$2,500 to \$3,000 per exam. Frequently, the U.S. charges a higher rate to perform exams domestically as compared to the charge for the same exams performed at foreign locations, despite the additional costs incurred from CBPOs being stationed at foreign ports. For example, some Asian ports do not pass on the costs for exams to the shipper/importer, while others charge approximately \$1,000 per exam and the examination cost is passed on to the shipper/importer. This cost avoidance by the importer with the same security helps benefit the shipper and expands the security zone abroad.

CSI Operational Models

To maintain a more cost effective screening process, in FY 2015, CSI will continue to evaluate each foreign port and implement a hybrid of different operational models designed around the uniqueness of each foreign port. Operational models will include traditional inspectional staffing with CBP personnel at foreign ports, remote targeting utilizing hubs in foreign locations, and remote targeting from the National Targeting Center (NTC) with no foreign personnel and reciprocal arrangements.

In addition, the implementation of hybrid operational models has produced efficiencies that will enable CBP to expand CSI to additional countries and ports of strategic interests within the confines of the budget requested for the International Cargo Inspection PPA.

The following three conditions have and will be used to determine the composition and/or combination of operational models to be deployed at current and future CSI locations:

- Monitor overseas deployments and ensure that the proper numbers of personnel are stationed at each foreign port where the traditional inspectional model is utilized;
- Maintain optimum staffing levels at the NTC to augment targeting at foreign ports to ensure 100 percent review of all shipments prior to lading on a vessel destined to the U.S.; and
- Expand targeting beyond the traditional weapons of mass effect to include trade violations and other trans-national criminal activity, which will be dependent on the host country's willingness to expand targeting beyond the current declaration of principles.

Secure Freight Initiative

SFI was established to test the feasibility of scanning 100 percent of all containers destined for the United States using RPMs and NII scanners. SFI personnel perform the following steps within the process:

1. Electronically transmit scanned images and information to the NTC for evaluation and analysis;
2. Resolve all radiation alarms according to alarm resolution procedures;
3. Utilize the information collected to enhance the Automated Targeting System (ATS) or other relevant programs; and
4. Store the information for later retrieval and analysis.

CBP continues to scan 100 percent of all U.S. bound cargo from Port Qasim, Pakistan, and continues to showcase the success of the SFI program in a country where the government and terminal operators are very supportive of the initiative. In FY 2015, SFI will maintain operations in Port Qasim, Pakistan. CBP continues to explore options for upgrading the equipment in Port Qasim.

Office of International Affairs

Overseas Program

This PPA includes the portion of the Overseas Program that specifically supports CSI and SFI. Attachés provide support to multiple overseas programs, including, but not limited to, CSI and SFI. Beginning in FY 2013, the funding associated with activities performed by the Attaché offices outside of CSI and SFI changed from the International Cargo Screening PPA to the Other International Programs PPA. As a result, the International Cargo Screening PPA funds only the Attaché offices that directly support the international cargo screening programs, CSI and SFI. This alignment of resources better represents the overall efforts of Attachés.

The CBP Attachés perform the following duties in support of international cargo screening:

- Fulfill the role of CBPOs for cargo security and trade facilitation purposes;
- Serve as liaisons to other U.S. government agencies and host government authorities on related to cargo security matters of interest for CBP; and
- Support and provide oversight for all CBP personnel and program in foreign locations, including CSI, SFI, and capacity building efforts.

In FY 2013, CBP Attachés' international engagements with foreign partners helped increase trade compliance, resulting in:

- 95.41 percent of petroleum industry imports compliant with U.S. trade laws;
- 96.89 percent compliance rate for Customs Trade Partnership Against Terrorism (C-TPAT) members with established C-TPAT security guidelines; and
- 97.66 percent of imports compliant with U.S. trade Laws.

The partnerships with foreign governments/agencies, international organizations, and U.S. agencies supported by CBP Attachés enhance CBP’s ability to mitigate and avoid risks related to cargo security, and trade enforcement. More concretely, the Attachés foment strong relationships with CSI and SFI host government officials and allow CBP to facilitate customs reform and modernization through training and technical assistance. These partnerships also facilitate information-sharing with a focus on areas of mutual interest to both CBP and its foreign counterparts, such as preventing, detecting, and interdicting illegal shipments.

Description of Select Adjustments to Base

Pay Adjustment for Workforce Maturation: This PPA contains a \$1.55 million increase that is part of the overall \$194.6 million “Pay Adjustment for Workforce Maturation”. The majority of this additional funding is because of changes in the requirements associated with BPAs and CBPOs. The journeyman initiative and low attrition rates mean more promotions and Within-Grade Increases (WIGIs). The compensation (base salary, benefits, premium pay and overtime) associated with these increases is considerable. In FY 2015, compensation is expected to compose approximately 73 percent of the total CBP budget. In the past, CBP has realigned funding from non-pay categories to pay to provide the funding needed to sustain the BPA and CBPO floors; however further reductions to non-pay and mission support pay funding is becoming increasingly difficult to do without adverse operational impacts. This adjustment allows CBP to meet these pay requirements.

Consolidation of Funding for the Office of International Trade: This transfer realigns \$956,000 for the Office of International Trade (OT) out of the International Cargo Screening PPA and into the Inspections, Trade, and Travel PPA. This realignment fulfills the request by Congress to consolidate funding for OT to be funded out of the Inspections, Trade, and Travel PPA.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Other International Programs PPA supports CBP's international mission of securing the global supply chain and the global travel network. These efforts require that CBP coordinate its efforts with the private sector, foreign governments, and other federal agencies. Establishing relationships and building capacity at the international level allows CBP to identify, intercept, and neutralize threats to the U.S. before they reach the country's borders. CBP implements these

international programs through the Office of International Affairs (INA), which leads the CBP's overseas efforts through its two operations, International Partnership Programs and the Overseas Program.

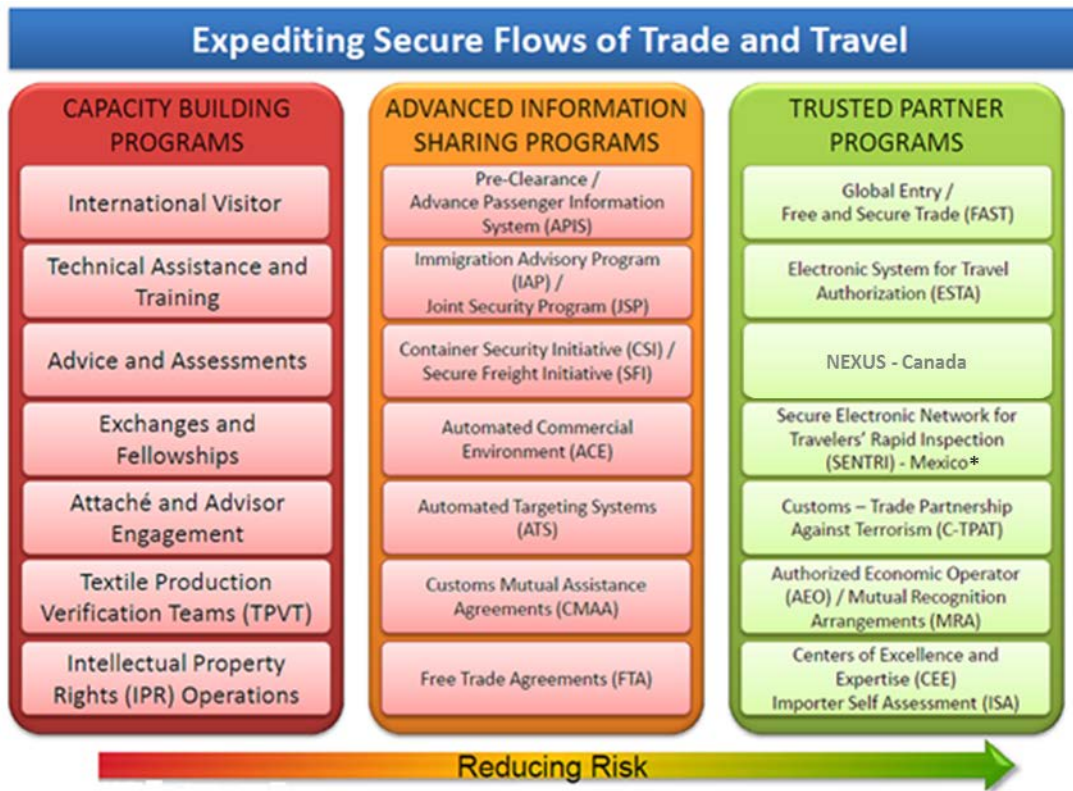

Exhibit 1: Other International Programs FY 2015 Funding Request Breakout

Border Security Inspections and Trade Facilitation - Other International Programs	FY2015 Request (\$000)	% of Total
CBPO Salary and Benefits	527	2.05%
BPA Salary and Benefits	2,148	8.36%
Other Salary and Benefits	20,142	78.35%
Non-Personnel Costs	2,889	11.24%
Total	25,706	100.00%

*FY 2015 Salary & Benefits costs for Locally-Employed Staff (LES) at overseas locations is \$1.5 million.

The following flow chart illustrates how CBP, through its international programs, creates, and fosters these relationships, which provide for the secure flow of people and cargo across U.S. borders. CBP international programs are critical to the success of these efforts by building and maintaining the relationships with these entities that make possible crucial CBP programs, such as the Electronic System for Travel Authorization (ESTA), Global Entry, the Automated Commercial Environment (ACE), the Immigration Advisory Program (IAP), and the Customs – Trade Partnership Against Terrorism (C-TPAT), as well as White House priorities, such as free trade agreements and operations related to intellectual property rights.

Exhibit 2: INA Trade & Travel Facilitation

*Though SENTRI is a unilateral program, it is an element of enhanced cooperative efforts with the Government of Mexico which INA facilitates.

CBP focuses on building a foundation with capacity building and target-training programs in countries where we perceive there is a high risk due to limited detection and targeting infrastructure. Once these efforts have been completed and a given country has established satisfactory security infrastructure, CBP will engage in more advanced information sharing programs with that particular nation. In countries that have completed these programs, or that already have a long-standing relationship with the U.S., CBP focuses on implementing Trusted Partner Programs.

International Partnership Programs

INA administers several international *partnership* programs, including, but not limited to, the Asia-Pacific Economic Cooperation, the International Law Enforcement Academies, the Colombia-Andean Initiative, the Export Control and Border Security Program, Reconstruction and Stabilization Assistance, and liaison with the World Customs Organization. The key CBP objectives for these international partnership programs include:

- Develop, promote, and implement CBP's international strategy;
- Negotiate international agreements and other instruments, such as bilateral agreements and letters of intent for CBP;
- Advance CBP's international policy initiatives in international forums; and

- Develop and maintain strategic international relationships.

Capacity building and technical assistance programs have equipped international customs administrations with the tools to control their own borders more effectively, especially in the Western Hemisphere (Mexico and Panama). Enlisting the support and participation of the trade industry has helped to address trade violations, ushering in an unprecedented era of expedited commerce and trusted shipper and traveler programs. CBP recognizes that wherever our engagement is strongest overseas, our programs are also markedly more effective and successful.

In Canada for example, CBP Attachés support the CBP mission worldwide, and foreign governments benefit by having in-country expertise to bring about improved international supply chain security, expanded cargo security awareness and expediting the legitimate flow of passengers and cargo between countries. The CBP Attaché Office in Canada contributed significantly to the two following programs from the President's Beyond the Border Initiative:

- Trusted trader program: CBP and Canada Border Service Agency (CBSA) now have a harmonized process that allows a new highway carrier applicant applying to one program Customs Trade Partnership Against Terrorism (C-TPAT) or CBSA's Partners in Protection (PIP) to join the other program without having to fill out an additional application. A harmonized process for selected PIP or C-TPAT participants went into effect June 2013 where members now enjoy a seamless, single application and easy enrollment into the program they are not currently in. Also, new applicants initial validation (although owned by a single administration) will be performed jointly (by CBP and CBSA) to show the new partner how their program participation will be fully coordinated; and
- Cargo pre-inspection: CBP began Phase I of a truck cargo pre-inspection pilot on June 17, 2013 at the Pacific Highway crossing adjacent to Surrey, British Columbia (BC). The project is a collaborative effort by CBP, CBSA and Public Safety Canada under the U.S/Canadian "Beyond the Border: A Shared Vision for Perimeter Security and Economic Competitiveness" initiative. Transport Canada and the BC Ministry of Transport are also participating in the pilot. Phase I of the pilot is designed as a "proof of concept" to determine the viability of assigning CBPOs to Canadian border crossings to pre-inspect southbound trucks, drivers and cargo prior to arrival into the United States. It will also test the viability of developed technologies and joint U.S.-Canada procedures to conduct CBP primary truck processing in Canada. CBP will monitor wait times and provide traffic mitigation as needed.

Only trusted traders participating in CBP's Free and Secure Trade (FAST) program will be eligible to use the dedicated CBP pre-inspection commercial primary booth located on the Canadian side of the border. Participation is not mandatory. Pre-inspection in Canada will include radiation screening and basic primary processing. Secondary inspections, when required, will continue in the POE. The pilot will continue in Blaine POE for up to six months and will operate Monday through Friday between 8 a.m. to 4 p.m. Phase II will test the feasibility of reducing cargo wait times.

Additionally, CBP works closely with the Departments of State and Defense in our capacity building efforts. CBP/INA identifies, develops, implements, and coordinates specialized training

and developmental assistance programs for foreign customs and other law enforcement officials and organizations. INA further provides in-country training and advisory support teams for broad-based customs reform and modernization of the customs services provided by the host country which ensures CBP, and thus the U.S., are represented at overseas posts and can influence and enforce trade and travel policies throughout the world.

Finally, CBP develops international agreements with partner countries as the first step in any exchange of information between CBP and our foreign partners.

Exhibit 3: CMAAs Created FY 2007 to FY 2014

Europe	European Community
Middle East	Jordan
Western Hemisphere	Canada

Many countries begin with capacity building programs before moving to an agreement, such as a Customs Mutual Assistance Agreement (CMAA). The CMAA provides a legal framework whereby information can be shared in cases of breaches of customs legislation and fraud. These agreements have led to closer cooperation on a whole range of issues, such as:

- **China:** To deliver concrete Intellectual Property Rights (IPR) enforcement results, CBP and the General Administration of Customs of the People's Republic of China (GACC) established an IPR working group and conducted a joint IPR enforcement operation between March 15 and April 15, 2013. The joint IPR enforcement operation targeted counterfeit consumer electronics with a focus on USB cables, lighting, cell phones, and headphones, primarily in express carrier, mail, and air cargo. Through use of the CMAA, information on counterfeit shipments was shared on a real-time basis throughout the course of the operation, and referrals were made to U.S. Immigration and Customs Enforcement-Homeland Security

Investigations for criminal investigation. The operation was highly successful yielding 1,735 seizures of 243,000 counterfeit consumer electronics; and

- European Union (EU): U.S. Customs Service and the European Communities signed a Customs Mutual Assistance Agreement (CMAA) in 1997. Within the CMAA, customs authorities of the United States and the then European Communities (now European Union) agreed to develop customs cooperation of the widest possible scope. It is also states that this cooperation should cover all matters relating to the application of customs legislation. Using the CMAA as its umbrella document, CBP and the European Union negotiated a non-binding arrangement in 2012 for Mutual Recognition Arrangement (MRA) of their respective facilitated trade partnership programs. This MRA serves as the operational document in which mutual recognition is implemented. Within the MRA language, it states that all cooperation is conducted in accordance with the CMAA.

The CMAA is one of the key foundational milestones that further initiatives can be built upon, such as CBP “trusted partner” programs and other advanced programs.

INA completed six international agreements in FY 2013, and plans to further increase international agreements in the coming fiscal years with ten in FY 2014 and eleven in FY 2015.

Overseas Program

The Overseas Program operates CBP programs and activities overseas that secure U.S. interests abroad, while also facilitating lawful trade, travel, and immigration. To meet these goals, CBP Attachés:

- Serve as the primary representatives of the CBP Commissioner in-country, informing the U.S. ambassador or consular officer at post about CBP programs and capabilities;
- Fulfill the role of CBPOs for security, immigration, and trade facilitation purposes;
- Serve as liaisons to other U.S. government agencies and host government authorities on any and all matters of interest to CBP;
- Support and oversee all CBP personnel and programs in-country, including the IAP, C-TPAT, and capacity building efforts; and
- Handle inquiries and requests for CBP assistance from the trade industry and the traveling public, including on issues such as intellectual property rights, transportation letters, mala fide intercepts, and fraudulent documents.

Exhibit 5: CBP Attaché Workload

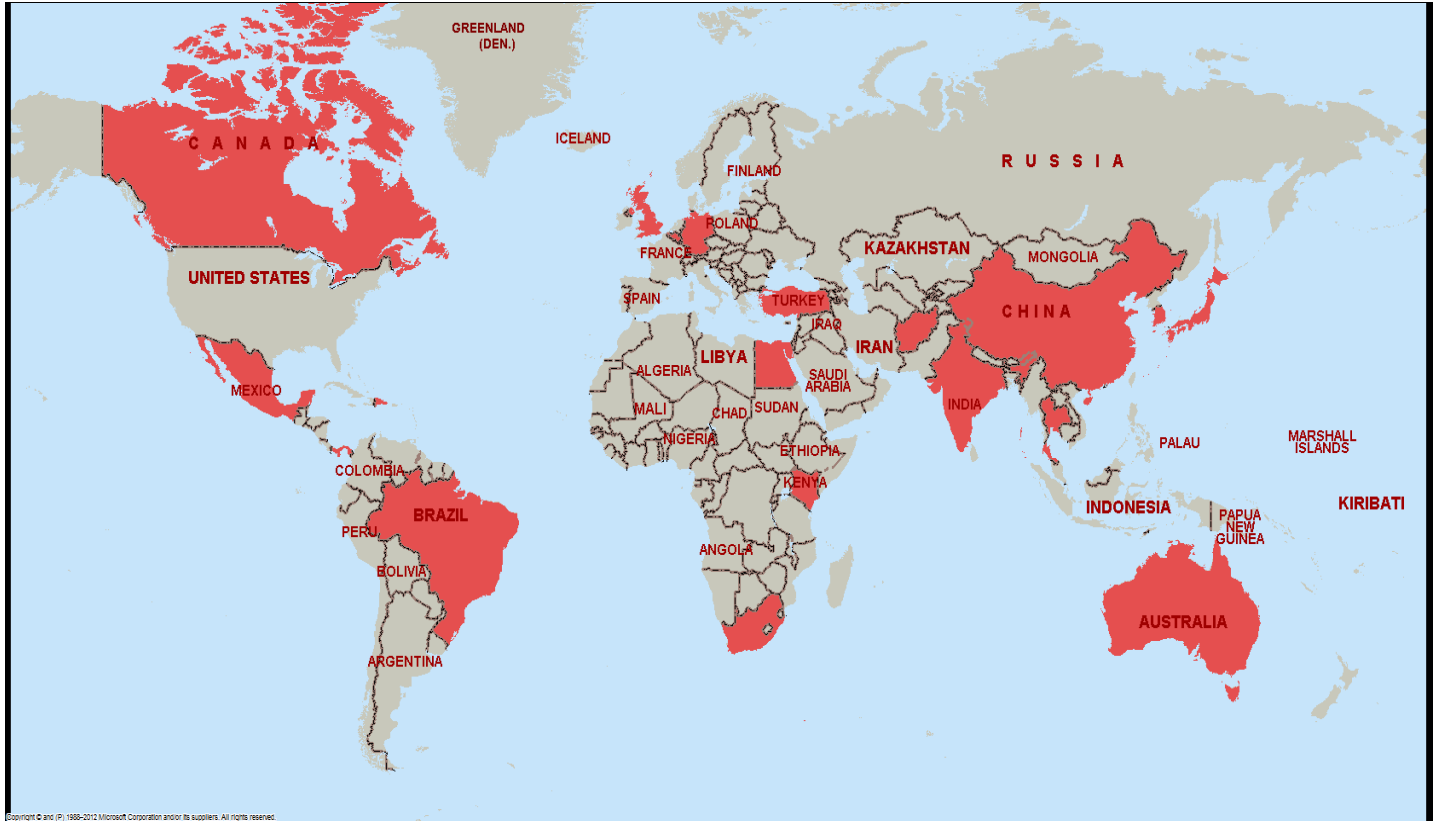

Office Workload	FY 2012	FY 2013
Transportation letters	4,555	3,418
Approved	3,793	2,386
Denied	762	1,032
Assistance to DoS vetting visa applicants, subjects of interest	5,953	4,379
Other mission inquiries, requests for action	5,498	10,532
Carrier liaison, public inquiries	37,473	25,945
Firearms in-transit requests	724	3,448
Country clearance requests	4,324	2,534

Beijing, China	New Delhi, India	Singapore, Singapore	Abu Dhabi, United Arab Emirates

Regional Strategy

By FY 2015, INA expects to complete a transition from a country-specific to a regional approach to international engagements. Under the regional approach, the office of a CBP Attaché is responsible for a portfolio of neighboring countries within that office's assigned region, rather than limiting responsibility to one individual nation. The Attaché maintains situational awareness and reports on emergent incidences within the designated Area of Responsibility (AOR). The Attaché is also a resource for both visiting and permanent CBP personnel in the region. The new regional strategy allows CBP to better leverage relationships in the region, cultivate regional expertise in headquarters, and realize efficiencies and savings through a more coordinated regional capacity building, targeting centers, and trade transformation efforts. The regional approach better aligns with CBP's goals by focusing on activities that build foreign relationships, enhance commercial opportunities, secure more opportunities to exchange information, and increase CBP capacity to detect and interdict threats from abroad.

INA's regional engagement is divided into 5 regions: Europe, Africa, Asia Pacific, the Middle East, and the Western Hemisphere, with priority currently placed on the latter three. INA will support CBP goals for each region by focusing on activities in FY 2015 that will build foreign relationships, enhance commercial opportunities, secure more opportunities to exchange information, and increase CBP capacity to detect and interdict threats from abroad. In addition, INA is further addressing certain areas of interest in each of the three the priority regions: In the Middle East region, INA is focusing on terrorism; in the Western Hemisphere, INA is concentrating on transnational criminal organizations; and in Asia, the INA priority is international trade.

Description of Select Adjustments to Base

Pay Adjustment for Workforce Sustainment: CBP is managing its workforce to best support our frontline and mission-critical needs. The pay adjustment for workforce sustainment includes salary dollars to maintain staffing in the critical support areas. This adjustment will enable CBP to sustain mission support positions to ensure that CBP's uniformed staff can remain dedicated frontline mission priorities, rather than being pulled into support activities. This increase represents \$596,000 of the overall \$6.5 million adjustment.

Consolidation of funding for the Office of International Affairs: This transfer realigns \$571,000 for the Office of Internal Affairs (INA) out of the Inspections, Trade, and Travel PPA into the Other international Programs PPA. This realignment fulfills the request by Congress to consolidate funding for INA primarily in the Other International Programs PPA, with some funds remaining in the International Cargo Screening PPA.

FY 2015 Request	C-TPAT Total	127	123	40,841

CURRENT SERVICES PROGRAM DESCRIPTION:

C-TPAT is CBP's flagship customs-business partnership program safeguarding the world's trade industry from terrorists and weapons of mass effect, and maintaining the economic health of the U.S. and its neighbors. Started in November 2001 with just seven major importers, today, C-TPAT boasts over 10,662 members as of September 30, 2013, which include importers, U.S./Canada highway carriers, U.S./Mexico highway carriers, rail and sea carriers, licensed U.S. customs brokers, U.S. marine port authority terminal operators, freight consolidators, ocean transportation intermediaries, Mexican and Canadian manufacturers, and Mexican long-haul carriers.

C-TPAT is part of CBP's layered security approach. By extending the U.S. zone of security to the point of origin, the customs-trade partnership allows for better risk assessment and targeting, resulting in allocation of inspectional resources to more questionable high risk shipments.

CBP worked closely with logistics and trade security experts to create the C-TPAT minimum-security criteria (MSC). The MSC are a set of security procedures designed to prevent a supply chain breach. The criteria are flexible, allowing for different business sizes/models to participate in the program. Supply Chain Security Specialist (SCSS) and C-TPAT participants jointly validate security measures and procedures documented in the Supply Chain Security Profile. When requested, the SCSS also coordinates and provides training to foreign programs during regular foreign validation schedules. In exchange for meeting the established security criteria, members receive incentives and benefits such as expedited processing, lower risk scores, and use of the FAST lanes. Exhibit 1 shows the FY 2015 funding request breakout and Exhibit 2 shows the flow of cargo through the C-TPAT supply chain conveyance process.

C-TPAT is currently working on the development of an Exporter entity for C-TPAT to support the President's National Strategy for Global Supply Chain Security and the President's National Export Initiative. It is anticipated that C-TPAT for Exports will be launched in the summer of FY 2014. This will lead to an increase in domestic validation visits for the C-TPAT program.

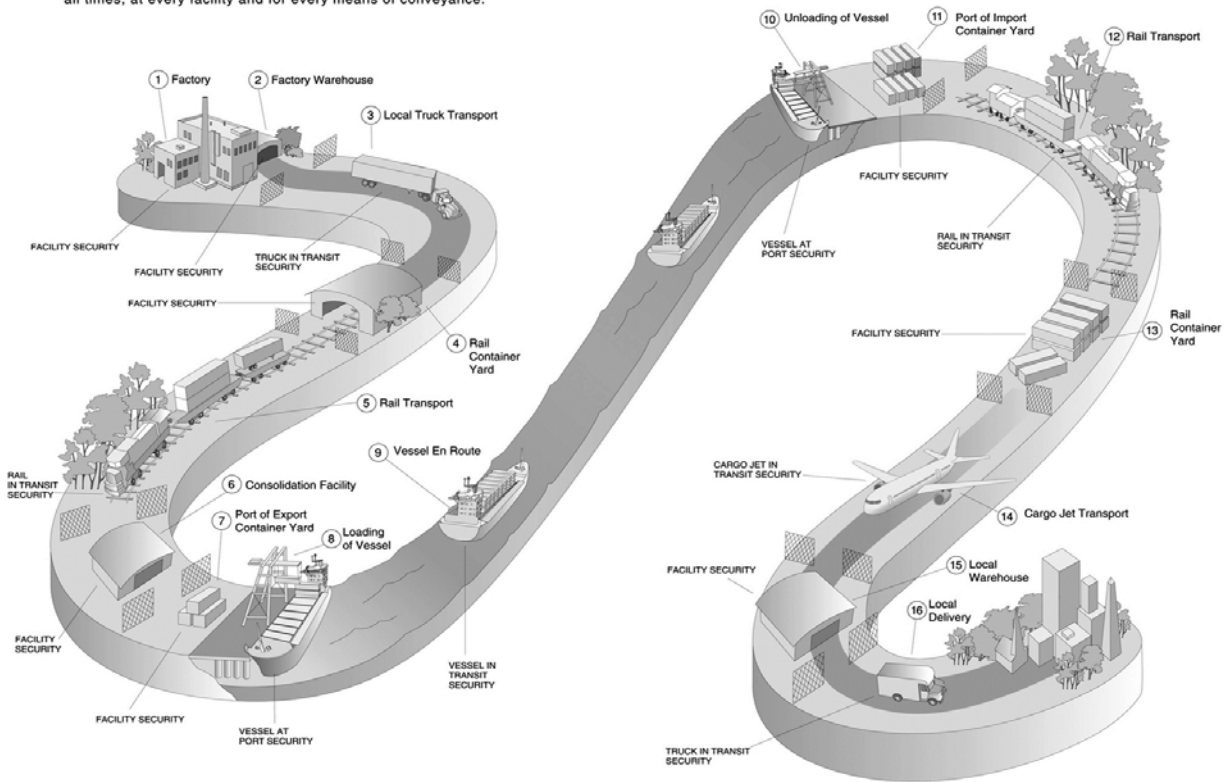

Exhibit 1: C-TPAT FY 2015 Funding Request Breakout

C-TPAT	FY 2015 Request (\$000)	% of Total
CBPO Salary and Benefits	1,735	4.25%
Other Salary and Benefits	28,329	69.36%
Non-Personnel Costs	10,777	26.39%
Total	40,841	100.00%

Exhibit 2: C-TPAT Cargo Supply Chain Conveyance Process

SECURITY AND THE SUPPLY CHAIN

Securing the supply chain means providing appropriate security at all times, at every facility and for every means of conveyance.

C-TPAT completed over 2,300 validations and conducted 2,293 on-site visits (1,383 foreign and 910 domestic) through September 30, 2013. Exhibit 3 shows the FY 2008 to FY 2013 year to date C-TPAT membership. The number of C-TPAT members has increased by over 16 percent.

Exhibit 3: C-TPAT Membership from FY 2008 - FY 2014 YTD¹³

CBP is harmonizing existing trusted trader programs (C-TPAT/supply chain security and Importer Self-Assessment/trade compliance). This approach will increase efficiencies for CBP, partner agencies, trade, and foreign partners, while further aligning with the World Customs Organization Framework of Standards to Secure and Facilitate Global Trade.

Cost Savings/Efficiencies/ Workforce Multiplier Effect

The C-TPAT program covers over 50 percent of all imports entering the U.S. commerce via supply chains. Since C-TPAT importers are four to six times less likely to undergo security related examinations, CBP can redirect resources to high risk cargo. Additionally, containers inspected from trusted partners who participate in this trade-focused initiative are seven times less likely to undergo resource-intensive secondary examinations and benefit from reduced transaction costs. Without C-TPAT, there would be a negative ripple effect in the layered enforcement strategy resulting in increased workloads for the other components, consequently requiring additional spending for staff and/or overtime to manage the increased number of non-certified supply chains.

C-TPAT complements other efforts such as NII and CSI. To continue the current success rate of the C-TPAT program and maintain secure facilitation of the flow of goods into the United States, CBP will:

- Ensure that existing and new C-TPAT partners fulfill their commitments by verifying that agreed upon security measures have been implemented¹⁴;

¹³ FY 2014 data as of December 1, 2013.

¹⁴ The *Security and Accountability for Every Port Act of 2006 (P.L. 109-347)* provides the statutory framework for the C-TPAT program and imposes strict oversight requirements.

- Work with C-TPAT partners to finalize minimum applicable supply chain security criteria and security best practices;
- Send C-TPAT teams around the globe to visit partners, their vendors, and vendors' plants to validate that supply chain security meets C-TPAT minimum security criteria. The teams also ensure that best practices and procedures used are reliable, accurate, effective, and meet the agreed upon security standards; and
- Provide tools and create incentives for the private sector to join C-TPAT, which is a prerequisite for the FAST program and other CBP expedited processing programs.

As a result of C-TPAT's approach to global supply chain and in conjunction with the WCO, several countries have established their own customs-business partnership programs known as Authorized Economic Operator (AEO) programs.

CBP has signed seven¹⁵ Mutual Recognition Arrangements (MRA). The essential concept of mutual recognition is that C-TPAT and the foreign program have established a standard set of security requirements which allows one business partnership security program to recognize the validation findings of the other program. This leads to a series of benefits to both customs administrations and to the private sector participants. An additional benefit will be that a foreign site visit will not be required by C-TPAT and CBP will be able to allocate those resources towards higher risk areas.

Additionally, C-TPAT has been working with other government agencies to streamline trusted trader programs and to identify overlaps in efforts, which could produce potential efficiencies for all departments. Specifically, during the past year C-TPAT conducted a joint pilot with the Transportation Security Administration's Known Shipper Program. C-TPAT has also consulted with the Department of Commerce, U.S. Coast Guard, the Food and Drug Administration, and the U.S. Department of Agriculture to further streamline trusted trader programs. Similar to the MRA, streamlining trusted trader programs will provide additional benefit to the trade community as fewer validation visits are required and government agencies will be able to allocate resources to areas with higher risk.

Description of Select Adjustments to Base

Pay Adjustment for Workforce Maturation: This PPA contains a \$1.48 million increase that is part of the overall \$194.6 million "Pay Adjustment for Workforce Maturation". The majority of this additional funding is because of changes in the requirements associated with BPAs and CBPOs. The journeyman initiative and low attrition rates mean more promotions and Within-Grade Increases (WIGIs). The compensation (base salary, benefits, premium pay and overtime) associated with these increases is considerable. In FY 2015, compensation is expected to compose approximately 73 percent of the total CBP budget. In the past, CBP has realigned funding from non-pay categories to pay to provide the funding needed to sustain the BPA and CBPO floors; however further reductions to non-pay and mission support pay funding is becoming increasingly difficult to do without adverse operational impacts. This adjustment allows CBP to meet these pay requirements.

¹⁵ The first MRA was signed with New Zealand in 2007. The others were signed as follows: Canada (2008), Jordan (2008), Japan (2009), Korea (2010), EU (2012), Taiwan (2012).

CBP requests \$5.811 million in FY 2015 for the Trusted Traveler Programs (TTP) PPA

Trusted Traveler Programs		Positions	FTE	Budget
Base	FY 2014 Enacted			5,811
FY 2015 Request	Trusted Traveler Programs Total			5,811

CURRENT SERVICES PROGRAM DESCRIPTION:

The Trusted Traveler Programs PPA supports the operations and maintenance of critical Pre-Arrival Processing activities. These activities are comprised of the following programs: NEXUS, SENTRI, FAST, and Global Entry (GE). The TTP are funded with a combination of Salaries and Expenses and user fees. Although GE and ESTA are fee funded programs they are noted in this PPA because they are trusted traveler programs. For more information on the GE and ESTA programs, please refer to user fee justifications. The TTP help to improve the targeting, screening, and apprehension of high-risk international travelers, thereby preventing terrorist attacks and criminal activity, while expediting processing of legitimate travelers.

Trusted Traveler Programs are predicated on thorough vetting of travelers who have voluntarily applied for membership, paid an enrollment/application fee, and provided personal data (including biographic information, photos, and fingerprints) to CBP, who then performs rigorous background checks. Individuals joining Global Entry through a CBP arrangement with their country of citizenship must successfully pass vetting conducted by their home government based on a mutually identified vetting standard.

Trusted Traveler Programs

TTP help to identify low-risk, vetted travelers by the voluntary submission of an application and subsequent vetting using automated name and fingerprint-based checks of law enforcement databases and an interview with a uniformed officer. The TTP continue to expand in FY 2013. As of September 30, 2013, Trusted Traveler Programs have a total of 2,271,224 members. Currently, TTP are comprised of four programs NEXUS, SENTRI, FAST, and GE that are discussed below.

Exhibit 1: Trusted Traveler Program Enrollments FY 2013 - FY 2015

	FY 2013	FY 2014 Projected Membership	FY 2015 Projected Membership
NEXUS	900,499	991,400	1,180,000
SENTRI	357,731	364,000	390,000
FAST	77,484	79,000	80,000
GE	981,213	925,300	1,200,000
Totals	2,316,927	2,359,700	2,850,000

The Trusted Traveler Programs have significantly increased its membership for the NEXUS, SENTRI, and GE programs. The NEXUS membership increase is due to the Beyond the Border initiatives involving increased outreach and its blitz operations (Enrollment Center blitzes and mobile enrollment blitzes resulted in a 19 percent membership expansion in FY 2013). The SENTRI program has seen an 18.5 percent membership expansion in FY 2013. The GE membership increase is due in large part to the GE promotions; with a 67 percent membership expansion in FY 2013.

NEXUS

NEXUS, a joint U.S./Canada enrollment program at the northern border land POE and at all Canadian preclearance ports, identifies low-risk travelers through: a complete biographic check, an interview with a CBPO and a Canada Border Services Agency (CBSA) officer, and a fingerprint check. Once applicants are identified as low-risk they are enrolled in the NEXUS program and given a Radio Frequency Identification (RFID)-enabled card that is unique to the traveler. The RFID-enabled card allows the traveler to use specified primary lanes at land border POEs that are reserved for NEXUS use. At the Canadian preclearance airports, passengers use kiosks instead of dedicated lanes and iris scans are utilized to identify low-risk travelers rather than RFID-enabled cards. At the time of enrollment, travelers qualify for trusted traveler status in all modes of travel (air, sea, and land). The introduction of WHTI lane technology has provided local managers with the flexibility to add and subtract dedicated lanes to fit traffic demand.

Cost Avoidance/Workforce Multiplier Effect

In FY 2013, the average NEXUS land border lane processing time, 19 seconds, was two and a half times faster than vehicles processed at general lanes crossing the northern border (general lane times along the northern border average 49 seconds per vehicle). Although the per vehicle inspection time savings remained the same as in FY 2012 (30 seconds), the 12.4 percent increase in crossings in NEXUS lanes resulted in an additional savings equivalent to 3 CBPOs over the savings of 25 CBPOs achieved in FY 2012. This savings represents a cost avoidance value of approximately \$354,000 in salaries and benefits. Continued membership growth for this program will result in further efficiency.

Secure Electronic Network for Traveler's Rapid Inspection (SENTRI)

On the southwest border, SENTRI provides expedited CBP processing for pre-approved, low-risk travelers. Applicants must voluntarily undergo: a thorough biographical background check against criminal, law enforcement, customs, immigration, and terrorist indices; a 10-fingerprint law enforcement check; and a personal interview with a CBPO. The RFID-enabled card allows the traveler to use specified primary lanes at land border POEs that are reserved for SENTRI use.

Since 1995, the SENTRI program has grown to include a total of 19 lanes at the ten largest southern border POEs along the U.S./Mexico border. SENTRI members currently account for 19 percent of all cross southwest border traffic.

Cost Avoidance/Workforce Multiplier Effect

In FY 2013, the average SENTRI lane processing time, 22 seconds, was almost 3 times faster than vehicles processed at general lanes crossing the southern border (general lane times along the southern border averaged 64 seconds per vehicle). This is an increase of 3 seconds, or 7.7 percent, savings per SENTRI crossing in FY 2013 (39 seconds in FY 2012 to 42 seconds in FY 2013). There was also an 8.6 percent increase (991,316) in the number of crossings in the SENTRI lanes. The increase in volume and time savings resulted in additional inspection time savings equivalent to 17 CBPOs from FY 2012 (a cost avoidance value of approximately \$2.0 million in salaries and benefits).

Free and Secure Trade (FAST)

FAST is the cargo equivalent of the SENTRI and NEXUS facilitative programs in the passenger environment. Through FAST, importers, commercial carriers, truck drivers, and manufacturers who enroll in the program and meet agreed upon security criteria, including participation in the C-TPAT program, are granted expedited clearance at a POE. Using electronic data transmission and transponder technology, CBP expedites clearance of approved trade participants. The FAST program supports a more secure supply chain and enables CBP to focus security efforts and inspections on high-risk commerce, where the attention is most needed.

Global Entry (GE)

CBP designed GE to allow for expedited clearance of pre-approved low-risk air travelers into the U.S. Through the use of automated kiosks placed in the Federal Inspection Services area of each identified airport, enrolled travelers are able to bypass queues and process through Passport Control without having to see a CBPO. This program facilitates entry into the United States and is especially beneficial to frequent international flyers. Please refer to the Global Entry budget request for more information on the Global Entry user fee.

Cost Avoidance/Workforce Multiplier Effect

In FY 2013, there were almost 1 million additional uses of Global Entry and NEXUS Air kiosks, representing a 34 percent increase in usage over FY 2012 (*3.3 million uses vs. 2.5 million*). The increased use of these kiosks by travelers arriving into the United States resulted in savings equivalent to 60 CBPOs which is a marginal increase of 4 CBPOs from FY 2012. GE usage in FY 2013 increased throughput by 2.1 percent for all passengers, including the majority of passengers not in GE. In FY 2013, GE passengers have represented only 5.16 percent of total eligible passengers arriving as of September 30th; however, when compared to the GE air passenger percentage of 2.68 percent in FY 2012, there is a clear increase which is projected to continue. Continued growth in GE will result in further efficiency.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Inspection and Detection Technology PPA contains funding for the CBP Non-Intrusive Inspection (NII) Technology that supports CBPs goals of enforcement and facilitation of legitimate trade and travel. CBP seeks to acquire, deploy, maintain, refurbish, and replace its NII technologies while meeting the requirements of CBPOs and BPAs for safe, effective, and reliable Radiation Detection Equipment (RDE) and NII systems at and between approximately 350 land border ports, Border Patrol checkpoints, airports, seaports, and international locations. Solutions to meet these demands must be effective and efficient in an ever-changing and evolving threat environment.

Terrorists, drug cartels, and other entities/individuals pursuing their own illicit agendas seek to exploit the vulnerabilities of the U.S. POEs and Border Patrol checkpoints, often using inbound cargo, conveyances, and travelers in ways never before conceived. CBP is strengthening the most effective tools and sustaining required capabilities by using threat and requirements-based deployment and by the elimination or reassignment of underused technologies. This approach results in the ability to sustain specific capabilities in the precise locations. The strategies for accomplishing this are: 1) re-validate minimum NII/ RDE requirements in the field; 2) reallocate available technology resources to address the highest risk gaps; 3) decommission unneeded/unused and un-repairable equipment from inventory; and, 4) strengthen the integration of inspection and detection technologies into CBP's layered enforcement strategy.

The current inventory of NII imaging systems shown in Exhibit 1 is aging and will require replacement in the future; however, analysis has shown that most of the imaging equipment will be functional past the vendors expected 10-year life cycle estimate. By the end of FY 2014, 94 large scale imaging systems will exceed this 10-year expected life.

**Small Scale NII: X-Ray (Baggage-Parcel & X-Ray Vans), BSRs

Data Source: CBP/ITB/ETP Raw Data (December 2013)

NII technology is a cornerstone of CBP's multi-layered enforcement strategy. Technologies currently deployed at and between our Nation's POEs include large-scale X-ray and Gamma-ray imaging systems, Radiation Portal Monitors (RPMs), handheld and wearable radiation detection and identification devices, and a variety of other portable and handheld technologies.

As CBP continues to extend the life cycle of these systems, the operations and maintenance costs in future years may increase. CBP will also continue to refine NII requirements as port specific threat based requirements evolve. The out-year funding requirements will be estimated based on sustainment of security goals, while maintaining and facilitating legitimate commercial traffic through our nation's ports of entry.

Cost Avoidance/Workforce Multiplier Impact

NII technology dramatically enhances the ability of CBP to inspect cargo and conveyances for components of weapons of mass effect and other articles and instruments used in support of terrorist activities, narcotics, and undeclared currency while facilitating legitimate commercial traffic through our nation's ports of entry. In 2013, CBP conducted over 2.6 million exams of cargo truck and seaport containers using inspection technology; relying solely on physical inspections would have required an increase in staff by over 5,400¹⁶ to manage the workload. When compared to a physical search, the time to conduct a secondary examination time is reduced by an average of 112 minutes, which equates to approximately 5.79 million hours for 3.1 million entries. The estimated cost avoidance per exam is \$309 (approximately \$957 million annually).

CBP does not rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood of detecting a nuclear or radiological weapon or elements of these weapons, and illegal aliens or other contraband being smuggled across the U.S. borders. NII technologies are viewed as force multipliers that enable CBPOs to screen or examine a larger portion of the stream of commercial traffic while maintaining the flow of legitimate trade, cargo, and travelers.

As of December 2013, CBP has 308 large-scale imaging systems deployed at and between our POEs. CBP has also deployed a total of 462 small-scale NII systems, 4,058 hand held devices, 1,384 RPMs, 2,810 Radiation Isotope Identification Devices (RIIDS), and 29,387 Personal Radiation Detectors (PRDs). This equipment is used to facilitate trade, while maintaining security with over 5 million NII scans and over 60 million RDE scans per year of cargo and passenger conveyances as shown in Exhibit 2.

¹⁶ This number increases to approximately 7,000 when including the exams conducted in the air environment.

Exhibit 3: Radiation Portal Monitor Exams Performed on Inbound Cargo from FY 2008 - FY 2013 (excluding Express Consignment Courier Facility (ECCF) mail scanned)

As a Business Transformation Initiative, CBP and Pacific Northwest National Laboratory, in coordination with the Domestic Nuclear Detection Office, have developed a near-term, low-cost approach to make RPM operations more effective and efficient. The initiative will be implemented in FY 2014 and focuses the existing RPMs capabilities on defined threat detection and minimizes alarm response to benign radiological material present in commerce. This approach will reduce overall risk and allow CBP to implement more efficient operational concepts. For example, it provides near-term operational enhancements while CBP completes long-term efforts to address RPM life cycle replacements. If implemented at the largest sea POEs, this initiative could reduce inspection time by 44,000 hours annually. This equates to a value of \$1.4 million per year to commercial trade. The implementation of this initiative will also allow CBP to shift up to 100 CBPOs to other enforcement missions and support a long-term reduction in secondary RPMs avoiding future acquisition and maintenance costs of up to \$44 million over 10 years.

Each year, DNDO coordinates a number of POE reconfigurations in which the lanes of traffic that contain NII equipment and/or RPMs, as well as the infrastructure associated with these technologies, are moved or altered. Additionally, a number of port expansions occur where new lanes of traffic require the addition of new technologies.

The Operations and Maintenance (O&M) funding for NII provides maintenance support at approximately 600 locations throughout the U.S. and its territories.

MAJOR ACQUISITIONS:

Non-Intrusive Inspection (NII)

The Non-Intrusive Inspection (NII) Systems Program (large scale and small scale) supports the CBP mission to ensure that our borders are secure. It specifically supports that part of the mission that is focused on preventing terrorists and terrorist weapons from entering the United States and interdicting potentially dangerous or illegal cargo from being smuggled into the country while facilitating the flow of legitimate trade and travel. The NII Systems Program supports CBPs interdiction and security efforts by providing technologies that help CBP officers and agents examine a large volume of traffic safely, quickly and effectively to detect a wide range of contraband that is imported using a variety of conveyances. The program is vital to the CBP layered enforcement strategy.

CURRENT SERVICES PROGRAM DESCRIPTION:

The National Targeting Center (NTC) supports CBP's goal to employ an enhanced targeting strategy that effectively and efficiently segments cargo and travelers according to the potential threat they pose. The NTC integrates the Agency's diverse intelligence capabilities into a cohesive data enterprise enabling CBP to serve the Nation as a premier intelligence-driven border law enforcement agency. The NTC provides advanced targeting, research, and coordination between numerous domestic and international law enforcement and intelligence agencies in support of the CBP anti-terrorism mission. The NTC provides around the clock tactical targeting and analytical research in both the passenger and cargo arenas. Additionally, the NTC manages the Analytical Management Systems Control Office (AMSCO), which uses

automated systems and targeting strategies to examine large amounts of crossing, referral, and results data to develop methodologies for identifying anomalies that may be indicative of integrity, procedural, performance, or training issues.

The mission of the NTC is to “prevent dangerous and unlawful travelers and goods from entering and exiting the country by effectively screening, reviewing, identifying, and segmenting low and high-risk passengers and cargo across all international modes of transportation, inbound and outbound, in order to carefully identify, target, and coordinate examination of the small percentage of shipments and travelers that may be connected to terrorism or other transnational crimes, such as narcotics smuggling, human trafficking, merchandise counterfeiting, and money laundering.”

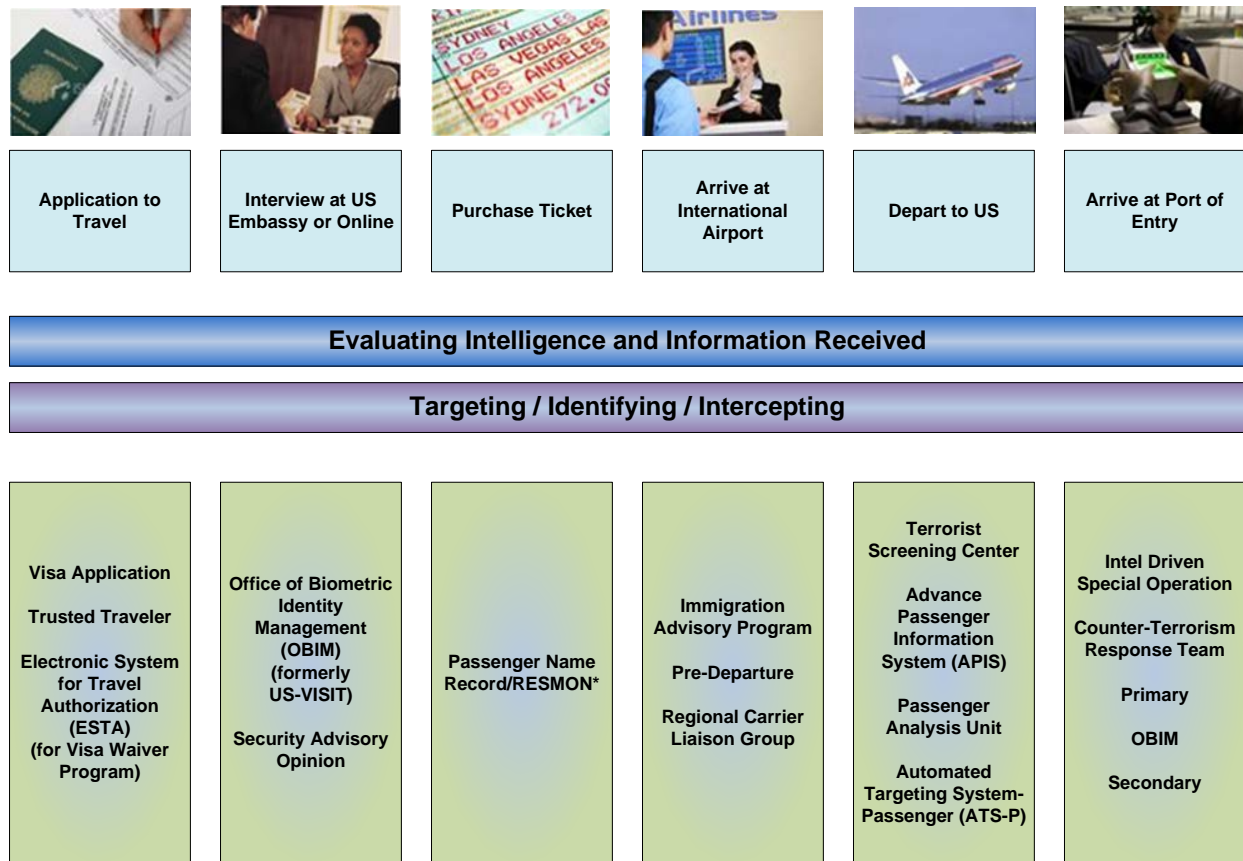

Exhibit 1: National Targeting Center FY 2015 Funding Request Breakout

CBPO Salary and Benefits	42,405	60.07%
Other Salary and Benefits	21,407	30.33%
Non-Personnel Costs	6,780	9.60%
Total	70,592	100.00%

Passenger Targeting

In order to make risk-based operational decisions before a passenger boards an aircraft, and continuing until the traveler enters the United States, CBP leverages all available advance information on in-bound passengers. Throughout the travel process – 1) application to travel, 2) making the reservation, 3) check-in, and 4) boarding at a foreign point of origin- CBP devotes its resources to identifying the highest threats, including those who may not have been exposed by the intelligence community. As a result of advance travel information, CBP assesses passenger risk ahead of time, often days before a traveler boards a plane. Concurrently, the visa process administered by the Department of State is also a source of information. For travelers under the Visa Waiver Program, CBP has the opportunity to evaluate their risk via the Electronic System for Travel Authorization (ESTA). CBP performs a traveler risk assessment when tickets are purchased, reservations confirmed and during flight check-in. Currently, in all cases before an international flight departs for the United States from a foreign point of origin, the airline transmits passenger and crew manifest information to CBP. CBP’s National Targeting Center then reviews traveler information to identify travelers who could be determined inadmissible upon arrival. Exhibit 2 depicts the international passenger travel process and the NTC travel-related programs in place to effectively screen, review, identify, and segment low and high-risk passengers.

Exhibit 2: NTC's Passenger Targeting Processes

Conduct Pre-Departure Screening

The NTC screens relevant traveler and cargo information prior to their departure. This approach is a key part of CBP's layered security strategy to protect the homeland by extending U.S. borders outward to identify and mitigate threats, interdict possible terrorists, other *mala fide* travelers, and suspect cargo before they can board or be laden on a conveyance destined for the United States.

The NTC leverages all available advance passenger data including Passenger Name Record (PNR) and Advance Passenger Information System (APIS) data, records of previous travel, intelligence, and law enforcement information, as well as open source information in its efforts to identify high-risk travelers. This information is also matched against targeting rules developed by subject matter experts based on actionable intelligence derived from current intelligence reporting and other law enforcement information. Exhibit 3 identifies core NTC programs designed to screen, review, identify, and prevent high-risk and inadmissible passengers from boarding U.S. bound aircraft.

Exhibit 3: Core NTC Passenger Related Activities

Program	Description
Pre-Departure Targeting	Prevents high-risk and inadmissible travelers from boarding U.S. bound aircraft through various targeting methods and by working with carriers and U.S. government representatives overseas.
Immigration Advisory Program	IAP officers stationed at overseas airports work jointly with the host governments to conduct interviews of potential targets identified by NTC and make admissibility decisions for passengers attempting to travel to the United States.
Visa Re-Vetting and ICE/DOS Pre-application vetting	NTC continuously checks U.S. issued visas against derogatory information and records pertaining to terrorism and inadmissibility. NTC also works jointly with ICE and DOS to check visa applications against derogatory information at the time of submission to DOS and prior to issuance of the visa.
Office of Alien Smuggling Interdiction	Deters, detects, and disrupts illegal migration to the United States by analyzing smuggling routes and working with domestic and foreign partners to identify and prosecute smugglers.
Regional Carrier Liaison Group (RCLG)	Assists NTC in denying boarding to high risk and inadmissible travelers at non-IAP locations by working directly with the carriers to resolve questions/concerns regarding a traveler's admissibility.
Electronic System for Travel Authorization	Requires all aliens who plan to travel to the United States under the Visa Waiver Program (VWP) to obtain an electronic travel authorization prior to boarding a U.S.-bound commercial flight or cruise ship. The NTC conducts continuous re-vetting of all approved ESTAs, screening them against derogatory information and records pertaining to terrorism and inadmissibility.
United Kingdom Border/ National Border Targeting Centre/ International Targeting Center	Enhances border security for all involved countries by exchanging critical passenger information in order to disrupt the movement of criminals and terrorists, deter alien and contraband smugglers, and identify those using fraudulent or stolen travel documents.
Biometric Watch List	NTC serves as the encounter management center regarding biometric matches to Department of Defense derogatory information for internal and external DHS stakeholders. NTC identifies individuals based on biometric matches to derogatory information related to terrorism, criminality, or other grounds of inadmissibility.

Exhibits 4, 5, and 6 identify key statistics related to passenger travel targeting activities. Passengers denied boarding, visa applications revoked/not approved, and biometric denials are key outcomes related to passenger targeting.

Exhibit 4: NTC Passenger Statistics For FY 2013¹⁷

Program	Number of Records Reviewed	Number of Passengers Denied Boarding	Number of Applications Received	Number of Applications Revoked

Biometric Encounters	Total Biometric Denials	Totals Biometric Watchlist Promotions
8,483	2,298	16,395

Cost Avoidance/Workforce Multiplier Impact:

Pre-Departure Targeting continues to produce security and efficiency dividends. In FY 2013, CBP identified 11,225 passengers who would be inadmissible upon arrival to the United States and were denied boarding at foreign departure locations. The 11,225 denials resulted in an estimated cost avoidance of \$28.06 million to CBP in adverse action processing and removal costs associated with inadmissible travelers arriving at U.S. ports of entry. This targeting work

¹⁷ The data represented includes only the NTC initiated offloads and does not capture the additional work being performed by the offloads generated by the RCLG and IAP officers. The final FY 2013 numbers accurately depict the complete number of offloads generated by CBP as a whole to include the RCLG with the NTC Pre-Departure team and the IAP officers working overseas with the NTC IAP team.

¹⁸ Ibid.

also alleviated field operational requirements equivalent to 19 CBPOs, avoiding \$2.2 million in staffing requirements for CBP. Please note that NTC cost avoidance includes the Pre-Departure Targeting/RCLG number of 7,724.

Cargo Targeting

NTC cargo targeting is a critical part of CBP's layered enforcement strategy. NTC's cargo targeting Area of Responsibility (AOR) is international in scope. NTC leverages classified, law enforcement, commercial, and open source information to proactively target and coordinate examinations of high-risk cargo in all modes of transportation. NTC cargo targeting activities also includes providing high-quality research, support, and remote targeting operations to 58 international Container Security Initiative (CSI) ports and one Secure Freight Initiative (SFI) port, domestic units, and other government agencies. NTC has established partnerships and liaisons with numerous federal agencies in order to gain information to identify and examine cargo shipments that may pose a threat to the United States. Furthermore, NTC cargo activities support the assistance of other countries in developing systems to manage anti-terrorism and security threats by hosting foreign Customs officials under the International Fellowship Program. In addition to supporting CBP's primary mission, NTC cargo targeting is responsible for conducting strategic and operational analysis in a continual effort to identify and counter narcotics smuggling, agricultural threats, money laundering, trafficking in illicit weapons, and other threats to the physical and economic security of the United States. Exhibit 7 below depicts NTC's cargo targeting processes against which it applies its core activities and programs to proactively target and coordinate examinations of all high-risk cargo.

Exhibit 7: NTC's Cargo Targeting Processes

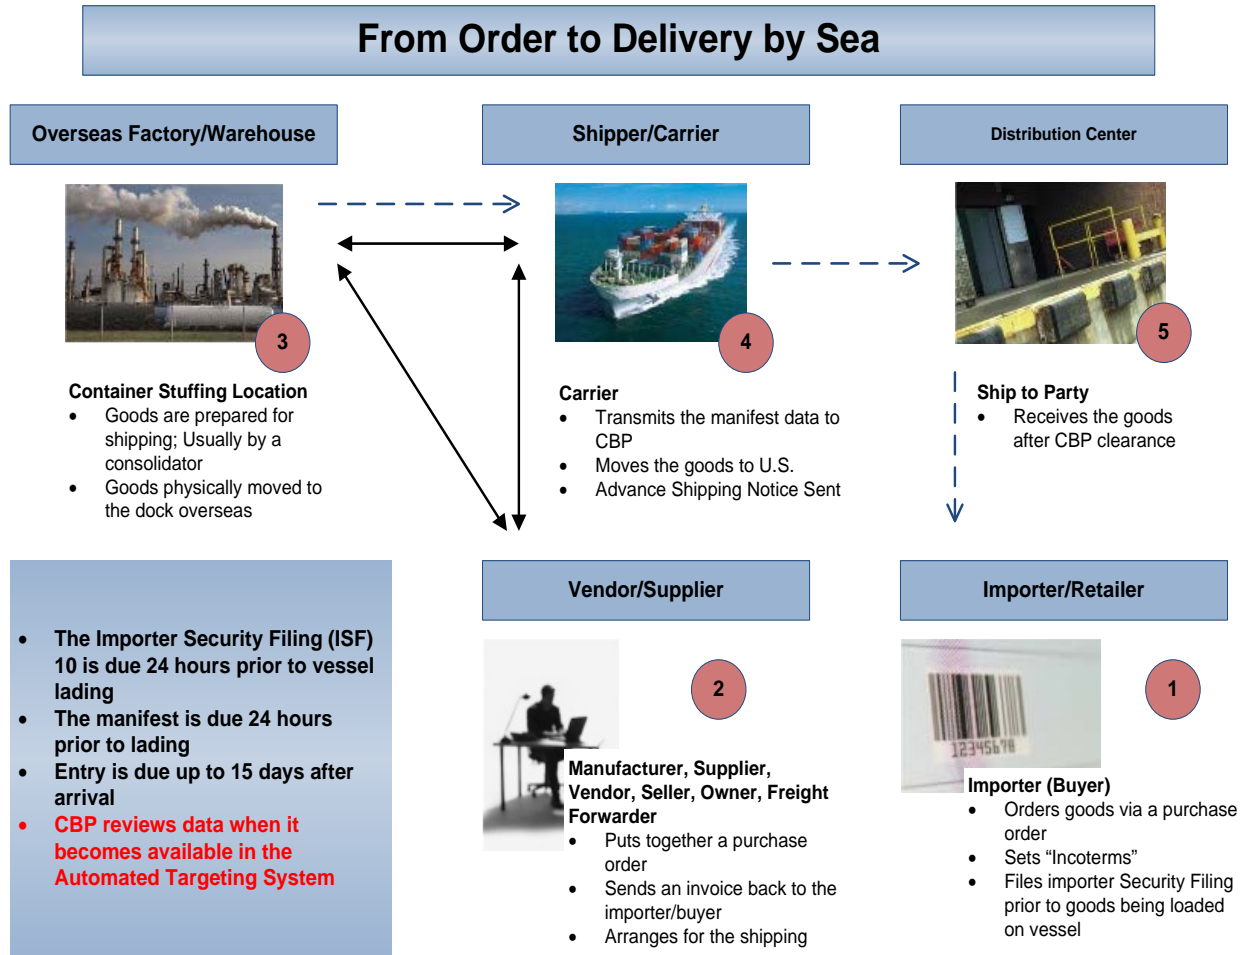

Exhibit 8 describes the NTC core cargo-related anti-terrorism activities and programs relating to cargo movements in all modes of transportation, both inbound and outbound.

Exhibit 8: NTC Core Cargo Related Activities

Program	Description
Outbound Targeting	Conducts daily outbound and in-transit cargo reviews to identify shipments destined to high risk or in-transit countries suspected to be involved in the smuggling of weapons, controlled chemicals, and military goods as well as strategic equipment used in the production of Weapons of Mass Effect (WME).
Pre-Departure Screening of Cargo	Provides in-depth cargo research and analysis of positive Terrorist Screening Database passengers, provides targeting analysis and support to CBP domestic and Container Security Initiative (CSI) ports, and provides targeting assistance to active federal investigations in collaboration with liaisons stationed at NTC.

Program	Description
Air Cargo Advanced Screening (ACAS)	Targets and mitigates high risk air cargo prior to lading on commercial aircraft. Participation includes the express couriers UPS, FedEx, DHL, TNT; passenger carriers Delta Airlines, Lufthansa, Air Canada, as well as freight forwarder DHL Global Forwarding.
Agriculture/Bioterrorism Cargo Screening	Supports tactical targeting, research, follow-up, reporting, analysis, coordination, and automated risk management, including targeting and researching trade activities related to agriculture and bioterrorism.
National Initiative for Illicit Trade Enforcement (NIITE)	NIITE is a joint ICE Homeland Security Investigations (HSI) and CBP initiative to target shipments for counter-proliferation, narcotics, currency smuggling, and other concerns by tracking suspect shipments using carrier websites. It utilizes new automated tools to conduct digital surveillance and target suspect shipments.
Container Security Initiative (CSI)/Secure Freight Initiative (SFI)	NTC CSI serves as a targeting and communication center on behalf of all foreign CSI Ports. NTC CSI coordinates overseas examination requests in collaboration with the CBP Port of intended arrival in the U.S. NTC CSI also assumes bill review and targeting responsibilities at CSI foreign locations where resources are not deployed (Australia; New Zealand; Haifa and Ashdod, Israel; Halifax, Montreal, and Vancouver, Canada; and Piraeus, Greece). NTC CSI is also responsible for all daily operations in SFI Port Qasim, Pakistan, which is monitored via closed-circuit television from NTC.
International Cargo Targeting Fellowship Program (ICTFP)	The ICTFP is established to exchange information, share and refine targeting techniques, and increase each country's capability to target and eliminate criminal trade activity on a global scale. The collaboration with international partners is accomplished by hosting foreign customs officials and Officer Exchange Programs.
Cargo Targeting Unit (CTU)	The CTU is the primary point of contact for ports of entry providing 24x7 intake services to handle special research requests, targeting of high risk cargos, and screening of businesses and individuals involved in the shipment of goods that may have connections to terrorism.
Tactical Trade Targeting Unit (T3U)	The T3U coordinates CBP's tactical trade targeting assets and closely collaborates with ICE/HSI to rapidly support investigations and increase interdictions domestically and abroad through sustained, coordinated actions that focus on CBP's Priority Trade Issues (PTI).

Exhibit 9 identifies key statistics related to cargo targeting activities specifically displaying the sizable volume of manifests reviewed on a daily basis and the results of conducting those assessments. The total number of seizures resulting from cargo targeting operations in FY 2013 was over 800 with a value of over \$129 million.

Exhibit 9: NTC Cargo Statistics For FY 2013¹⁹

¹⁹ NTC has established a data warehouse for statistical reporting which is supported by a dedicated statistician to ensure consistently accurate data. Adjustments in figures from OMB submission are result of adjusted methodology for extracting data.

Targeting Integrity Related Activities

Analytical Management Systems Control Office (AMSCO)

The Analytical Management Systems Control Office (AMSCO) develops innovative techniques to identify potential misconduct issues among frontline CBP personnel. The AMSCO team applies sophisticated analytical techniques to sort through massive amounts of CBP transactional data for anomalies and patterns indicative of potentially corrupt behavior. AMSCO scans and analyzes the anomalies in CBP transactional data in order to identify potential integrity issues. If outliers start to appear, based upon the evaluation of the data and further research, AMSCO will provide these findings to the proper investigative entity for further action. In addition, AMSCO has developed and deployed the Enforcement Linked Mobile Operation red flag (ELMOrf) to the POEs within the San Diego (excluding San Ysidro), Tucson, El Paso, and Laredo Field Offices. ELMOrf is a data-driven technological tool utilized to monitor and improve adherence to CBP policy among frontline staff and supervisors. ELMOrf provides OFO frontline supervisors real time visibility into the processing transactions being conducted by CBPOs working primary operations at the POEs. AMSCO has developed many key indicators that tend to be predictive of corrupt behavior. Utilizing these indicators as sensors against historic crossing data allows AMSCO to identify actions of potentially corrupt personnel.

Description of Select Adjustments to Base

Pay Adjustment for Workforce Maturation: This PPA contains a \$3.14 million increase that is part of the overall \$194.6 million “Pay Adjustment for Workforce Maturation”. The majority of this additional funding is because of changes in the requirements associated with BPAs and CBPOs. The journeyman initiative and low attrition rates mean more promotions and Within-Grade Increases (WIGIs). The compensation (base salary, benefits, premium pay and overtime) associated with these increases is considerable. In FY 2015, compensation is expected to compose approximately 73 percent of the total CBP budget. In the past, CBP has realigned funding from non-pay categories to pay to provide the funding needed to sustain the BPA and CBPO floors; however further reductions to non-pay and mission support pay funding is becoming increasingly difficult to do without adverse operational impacts. This adjustment allows CBP to meet these pay requirements.

Consolidate OFO Targeting Funding: The transfer of \$755,000 from the Automated Targeting System (ATS) PPA in the Automation Modernization Appropriation to the National Targeting Center (NTC) PPA in the Salaries and Expenses Appropriation is requested to properly align automated system requirements to the use targeting information by the NTC cargo and passenger-related activities. The Analytical Management Systems Control Office (AMSCO) within the NTC is responsible for using automated systems to screen, review, and identify data anomalies to ensure the accuracy of data entered by CBP law enforcement personnel in order to segment potential integrity concerns. The expertise, systems technology and automation necessary for the completion of work by AMSCO is developed, contained and maintained within the NTC.

CURRENT SERVICES PROGRAM DESCRIPTION:

The OTD is responsible for the Training at the Ports of Entry PPA, which supports basic, advanced, and supervisory/management/leadership training for new and incumbent CBPOs, Agriculture Specialists, Import Specialists, and Entry Specialists assigned to the ports of entry. The training provided establishes and sustains the proficiency of those directly responsible for the front line mission of CBP. Funding levels requested for this training in FY 2015 will enable

CBP to achieve targeted FY 2015 staffing levels for these positions, and maintain mission critical skills and certifications of existing employees assigned to the ports of entry.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Border Security Control PPA provides funding for the United States Border Patrol (USBP) and the Joint Field Command (JFC).

USBP Background

Since its creation in 1924, USBP has been responsible for patrolling along U.S. borders and has grown to a force of over 21,000 agents. The recent surge in the number of BPAs began with the *Illegal Immigration Reform and Immigrant Responsibility Act of 1996* (P.L. 104-208, *IIRIRA*), which required an expansion of the existing force of 5,942 BPAs by 1,000 agents per year through 2001. By September 11, 2001 over 9,800 BPAs were on duty.

The terrorist attacks of September 11, 2001 resulted in the passage of the *USA Patriot Act* (P.L. 107-56), which mandated a tripling of the number of BPAs along the northern border and enhancements in border security. In March 2003, USBP was transferred to the Department of Homeland Security from the Immigration and Naturalization Service, and consolidated into a newly created agency, CBP.

The Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458) authorized a dramatic increase in the number of BPAs from approximately 10,000 in 2004 to over 20,000 agents by 2011. The *Emergency Supplemental Border Security Appropriations Act, 2010* (P.L. 111-230) and the *Consolidated Appropriations Act, 2012* (P.L. 112-74) have established 21,370 agents as the staffing floor for USBP.

USBP Mission

The mission of USBP is to secure America's borders. This is accomplished by preventing terrorists and terrorist weapons, people, and contraband from entering the United States illegally between the ports of entry, and by disrupting and degrading the activities of transnational criminal organizations. USBP coordinates and integrates its activities with OFO and the Office of Air and Marine within CBP.

USBP Strategy

In FY 2015, CBP will continue the implementation of a new USBP approach focused on information, integration, and rapid response capabilities in performing the mission of securing America's borders. This strategy involves USBP moving from a resource-dependent approach to border security to a risk-based approach that enables rapid response to areas of greatest risk in the immediate border area. USBP will deploy its capabilities to align with the threats along the border. This is an ongoing process that will continue to adapt as threats change.

The FY 2012 - FY 2016 strategic plan places risk management at the core of USBP's strategic planning. Through enhanced awareness and intelligence (information); coordinated operations with Federal, state, local, and international partners (integration); and the ability to respond quickly to changing threats (rapid response), USBP will be able to put the greatest capabilities in

place to combat the greatest threats. Field commanders will adopt risk-management as a core planning principle. All sectors will identify their greatest risk and employ sector-specific plans for mitigating risk, using information, integration, and rapid response. In areas characterized as low risk, Geospatial Intelligence (GEOINT) resources will be used to enhance and maintain situational awareness along the U.S. border. GEOINT can be described as gathering and analyzing imagery and geospatial information for the purpose of detecting change within specific geographical areas of the border environment. GEOINT change detection capability is a tactical strategy using various techniques to gather information and intelligence in low threat areas. This allows the Border Patrol to continue focusing capabilities on areas where the highest risk exists, but ensures that any threat adaptation can be identified quickly through information and intelligence culminating in appropriate steps being taken to rapidly minimize any new risk. GEOINT products from OAM and OIIL are a key requirement for gaining and maintaining situational awareness along the U.S. border; they are also finite. The Border Patrol must be prepared to rely upon traditional tactics, techniques, and procedures to facilitate situational awareness in remote, low risk areas. These techniques include (but are not limited to) periodic reconnaissance patrols, sign-cutting operations, and the deployment of mobile detection, monitoring, and surveillance resources. The Border Patrol will also continue to use the Consequence Delivery System (CDS) – a targeted enforcement initiative – to reduce recidivism, targeting a recidivism rate of 17 percent or less in 2015

The Border Patrol uses a risk-based decision making process in its Operational Planning mission analysis. The methodology tracks and assesses threats, vulnerabilities, consequences, and capabilities of the USBP and its adversaries. This process will be used by all sectors and, over time, will enable decision makers to gain a better understanding of how capabilities directly contribute to the Border Patrol's ability to mitigate risk in specific areas and affect employment of resources in those areas. This mission analysis will also help determine whether USBP can reduce capability, such as technology and manpower requirements, in a given area that could be better utilized in another area of high risk. Analysis will enable the Border Patrol to make better investment decisions for resourcing through the identification of operational requirements. This process will ultimately make the Border Patrol more flexible in its ability to reduce capabilities from secured areas of the border and reposition them to areas of greater risk, without creating vulnerabilities to other border areas.

Budget Activities

The Border Security Control PPA is broken into four cost areas: Salary and benefits for BPAs; Salary and Benefits for some CBPOs; Salary and Benefits for Operational Support personnel; and Non-Personnel costs. The FY 2015 request is depicted below.

Exhibit 1: Border Security and Control FY 2015 Funding Request Breakout

Border Security and Control	FY 2015 Request (\$000)	% of Total
BPA Salary and Benefits	3,499,094	90.14%
Other Salary and Benefits	108,961	2.81%
Non-Personnel Costs	273,960	7.06%
Total	3,882,015	100.00%

Border Patrol agent salary and benefits represents the largest portion of the Border Security Control PPA, at approximately 88 percent of the PPA, and has experienced significant growth over the past few years due to the maturation of the agent workforce. USBP experienced a significant increase in agent end-strength during the period of FY 2007 through FY 2011 and the agents hired during that timeframe are now achieving journeyman status and receiving commensurate pay. Additionally, in FY 2010, the full performance grade level for Border Patrol agents was increased from GS-11 to GS-12. Combined with the low attrition rates that USBP has experienced in the past few years, the increase in full performance level has resulted in significant costs for pay maturation. Pay maturation is magnified for frontline personnel due to the overtime and premium pay required to support a 24x7 mission, and the law enforcement benefits that agents receive. Pay maturation continues when agents reach the full performance grade level, as agents receive within grade increases. The increased end strength combined with grade maturation results in continuous growth in pay and benefits costs for more than 5 years after the agent's initial entry on duty. Trying to accommodate the pay increases during the past few years of fiscal austerity has presented a challenge to USBP and CBP.

Mission Support Personnel Salary and Benefits funds the 1,840 non-uniformed personnel within USBP. These personnel provide support in the areas of budget, workforce management, acquisitions, and numerous other support type functions that are required by USBP, this allows agents to focus on front-line duties requiring law enforcement expertise. The majority of the Mission Support personnel serve at USBP Sectors and stations supporting the front-line mission, and a small number, approximately 5 percent, serve at USBP headquarters, providing the necessary agency-level support. Mission Support personnel in the aggregate cost less than Border Patrol agents and are a cost-efficient alternative to USBP agents for the duties they perform; however, Mission Support personnel levels have decreased significantly during the past few years. These decreases in mission support staffing levels have been necessary to fund the rising cost of BPAs and maintain the congressionally-mandated floors for Border Patrol agents. Critical Mission Support positions have been temporarily filled by USBP agents due to hiring freezes and manpower reductions. While USBP is able to accomplish the mission, it does so at a higher cost than if the positions were filled with non-uniformed personnel. The use of agents to perform these mission support roles must be limited as these activities do not constitute the core law enforcement functions required of a Border Patrol agent.

Non-salary costs in the table below include the fuel and maintenance of USBP vehicles, USBP enforcement systems, expenses related to permanent change of station relocations of agents, the CBP Transportation Program, support for the USBP Horse Patrol and canine units, office supplies, and contracted support activities. All of these are essential in enabling USBP agents to accomplish their missions. In FY 2010, funding for Non-personnel accounts was \$505 million,

which was approximately 14 percent of the USBP budget. In FY 2015, Non-personnel accounts are projected at \$263 million, 6.7 percent of the USBP budget, a drop in funding of approximately 48 percent. These reductions restrict USBP's ability to effectively support USBP agents, operational activities, relocations, and legacy technologies. Examples of reduced agent support include delaying replacement and/or reducing sustainment of copiers, fax machines, etc., elimination of practice ammunition for agents in preparation of qualifications. Urgent and compelling operational needs would be affected; some examples are: a threat/need emerges for which no funding was allocated (RGV Infra-Red MILCAMs and relocation of the El Paso Aqueduct Project cameras in EL Paso due to new Highway construction are examples); USBP's ability to relocate agents to areas of emerging threat have been reduced; relocation incentives have been eliminated and projected moves to fill vacancies in USBP sector leadership positions have been deferred for lack of funding. Finally, there are legacy technologies that USBP purchased prior to incorporation into CPB that are not part of the BSFIT funding stream and Non-personnel funding is used to maintain and support such systems. The reduction in funding hinders USBP ability to maintain these systems.

Exhibit 2: USBP Financial plan comparison FY 2010 to FY 2015

CBP Intra-agency Relationships

USBP relies heavily upon other offices within CBP to provide essential support. As a front-line agency, USBP is essentially focused on its Border Security mission, and many of the supporting missions are assigned to other CBP offices. OAM provides airlift, med-evacuation, aerial surveillance and reconnaissance to USBP operations. The Office of Administration procures vehicles and other major end-items for USBP, and leases and maintains facilities. The Office of Information Technology provides the information management backbone upon which USBP law enforcement databases and systems operate, and is responsible for procuring information technology equipment for USBP. OTIA is responsible for procuring and maintaining tactical infrastructure and ground-based surveillance equipment that assists USBP in securing the border. While not directly affecting USBP, its budget, and operations, reductions in funding to these offices do eventually incur second and third order effects on the operations of USBP by delaying the replacement of worn-out vehicles and equipment, slowing the fielding of new technologies, or reducing the overall ability to provide support to USBP.

Overview of Organization

Manpower/Personnel

USBP will maintain a staffing level of 21,370 BPAs by the end of FY 2015, the current Congressionally-mandated floors. The current mission support authorized staffing level is 1,840 and represents a decline of 71 personnel from FY 2012 levels and a drop of 305 since FY 2011.

Exhibit 3: USBP Agents and Operational Support

	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>2016</u>
BPAs	20,558	21,444	21,391	21,370	21,370	21,370
Ops Spt Pers	2,145	1,911	1,772	1,840	1,840	1,840

(Note: FY 2011-2013 represents actual end-strength at close of fiscal year. FY 2014-2016 represents authorized end-strength.)

Although technology provides enhanced detection capability throughout the operational environment of USBP and serves as a force multiplier, it requires BPAs on the ground executing actions against identified targets. For every detection and identification resulting from technology, there must be an accompanying action from an agent to detect, respond, and resolve illegal activities. As technology employment intensifies, it will continue to increase CBP's detection capabilities and may require a re-balancing of agent resources in the future. Supporting the employment of planned technology is important in increasing CBP's detection capabilities, and as a direct result, increasing mission success.

In compliance with Congressional guidance, USBP is developing a Manpower Requirement Determination (MRD) process that collects and analyzes the human capital needed to perform USBP missions. The MRD process will establish a methodology to develop human capital requirements that is verifiable, repeatable, and defensible. The initial goal of the MRD process is to standardize operational forces within USBP and provide senior managers the information required to make informed decisions regarding human capital requirements. USBP began development of the MRD process in FY 2013 and plans to complete the analysis and begin implementation of the results in FY 2015. While Congress directed USBP to develop a manpower determination model there was no specific timeframe directed for its completion or implementation.

USBP HQ Organization

USBP is led by the Office of the Chief who oversees Special Operations, Enforcement Systems and three divisions: the Operations Division; the Strategic Planning, Policy, and Analysis Division; and the Mission Support Division.

- The Operations Division is responsible for provided direction and support to USBP sectors nationwide; it maintains continuous communications with sectors to obtain a national perspective on operations; responds to emerging threats by deploying resources in a timely and appropriate fashion; and manages nation-wide programs to ensure standardization throughout the USBP.
- The Strategic Planning, Policy and Analysis Division is responsible for developing polices and standard operating procedures, conducting strategic planning, developing performance measures, and reviewing statistical data.
- The Mission Support Division is responsible for the business operations that are necessary for USBP to function. Areas of responsibility include programming, budgeting, and analysis; human resources/workforce management; logistics; training; and agent support.

Each division directs numerous programs in support of the 20 Border Patrol Sectors responsible for all enforcement efforts.

Structure

USBP Sectors: The 20 Border Patrol Sectors serve as the primary regional command structure. There are 19 within the continental United States, and one in Puerto Rico. Each is headed by a sector chief and designated staff. Similar to USBP headquarters, the sector staff is responsible for programs in support of the numerous Border Patrol stations within their sector. Nationwide, there are 139 Border Patrol stations that report to their respective Sectors. The Border Patrol station is the basic geographic command structure within a sector and is the primary operational element of the Border Patrol. It is from Border Patrol stations that the men and women of the Border Patrol deploy to 12 Forward Operating Bases, operate 35 checkpoints, and conduct the various other duties to protect America 24 hours a day 7 days a week.

Special Operations Group (SOG)

The Special Operations Group is a specially trained and equipped team that provides critical support to DHS, CBP, and USBP in rapidly responding to emergent and/or unusual law enforcement situations that require special tactics and techniques, including search, rescue, and medical response capabilities via land, air, and sea. SOG is comprised of three components: Border Patrol Search, Rescue, and Trauma Team (BORSTAR); Border Patrol Tactical Team (BORTAC); and the Mobile Response Team (MRT). The command and support staffs for the

teams are located at the Special Operations Group in El Paso, Texas where SOG also maintains administrative control over all special operations personnel and MRT throughout the Border Patrol. The SOG is described in greater detail later in this document.

Operations

In FY 2013, USBP national operations seized approximately 2,430,000 pounds of marijuana, a 6 percent increase from FY 2012 and apprehended 420,789 illegal aliens, a 15 percent increase from FY 2012.

The Tucson Sector is the most active Border Patrol Sector. In FY 2013, Tucson Sector seized more than 1,193,000 pounds of marijuana, which accounts for 49 percent of the marijuana seized nationwide, and apprehended more than 120,900 illegal aliens, which accounts for 29 percent of all OBP apprehensions. In FY 2012, the Tucson Sector apprehended 120,000 illegal aliens, a 3 percent reduction from FY 2011, and seized approximately 1,015,000 pounds of marijuana, a 2 percent reduction from FY 2011. In FY 2011, Tucson Sector agents seized more than 1,039,000 pounds of marijuana, which accounted for 41 percent of the marijuana seized nationwide, and arrested more than 123,000 illegal aliens, which accounted for more than 36 percent of all OBP apprehensions.

The Rio Grande Valley Sector, the second-most active sector, apprehended 154,453 illegal aliens and seized 797,249 pounds of marijuana in FY 2013. This represents 37 percent of all OBP apprehensions and 33 percent of the marijuana seized nationwide. In FY 2012, the Rio Grande Valley Sector apprehended 97,762 illegal aliens and seized 886,000 pounds of marijuana. This represents 27 percent of all USBP apprehensions and 39 percent of the marijuana seized nationwide.

A comprehensive set of USBP statistics for Fiscal Year 2013 are provided below:

Exhibit 6: U.S. Border Patrol Statistics by Border FY 2013

	Southwest Border	Northern Border	Coastal Border	Nationwide Total
Apprehensions	414,397	3,230	3,162	420,789
Mexicans	265,409	1,672	653	267,734

Currency Value	\$4,750,598	\$944,377	\$308,361	\$6,003,336

Note: Apprehension Data includes Deportable Aliens Only Data Source: EID as of 9/30/13

*Other Drugs include all OBP drug seizures excluding Marijuana, Cocaine, Heroin, Methamphetamine, & Ecstasy.

Standard Operations

Line Watch

Line Watch is the most basic operation that USBP agents perform. It involves patrolling the border, whether by vehicle, foot, or on horseback; tracking of illegal entrants; and intercepting and apprehending illegal entrants. In areas with high levels of activity, agents may use advanced technology to assist in their surveillance, such as Mobile Video Surveillance Systems (MVSS) or Remote Video Surveillance Systems (RVSS). During periods of limited visibility, agents may use Night-vision goggles (NVG) or Infra-red (IR) cameras to assist in detecting illegal entrants.

Processing/Detention/Transportation

Agents also perform other tasks beside Line Watch, especially once illegal entrants are apprehended. These include the processing of the illegal entrants and seized items such as drugs, vehicles, and currency, and ensuring that these are properly accounted for. Agents are also responsible for detaining and transporting illegal entrants.

Forward Operating Bases (FOB)

USBP's 12 FOBs are strategically placed permanent or semi-permanent facilities in forward or remote locations used to sustain tactical operations. These FOBs provide housing to agents on a 24-hour basis. The use of FOBs directly supports USBP's mission of gaining, maintaining, and expanding effective control of the Nation's borders. FOBs are strategically located to allow USBP agents to rapidly respond and counter shifts in illicit cross-border traffic and provide a cost-effective, secure staging facility that allows agents to be forward deployed in remote and difficult to access areas. FOBs are now used wherever USBP has a need to extend its reach by raising effectiveness and efficiency levels, as their presence has been successful in lowering response times and disrupting smuggling activity in remote areas.

Traffic Checkpoints

USBP continues to use multi-tiered enforcement capabilities to increase the certainty of arrest of those who pose a threat to the U.S. This includes the use of traffic checkpoints along the major routes of egress from our Nation's borders. USBP uses both permanent and tactical checkpoints in its operations. Permanent checkpoints include established structures along major thoroughfares. Tactical checkpoints are mobile assets that are moved throughout a sector on an as-needed basis.

Currently, there are 35 permanent traffic checkpoints strategically located on routes of egress leading away from our Nation's borders. Each checkpoint is operationally integrated with other enforcement efforts to increase the USBP's detection and interdiction capabilities. In traffic checkpoint locations, Transnational Criminal Organizations (TCO) must use other tactics, such as secondary staging areas and circumvention routes, which disrupt and degrade their operations. This also gives the USBP additional time and distance to detect, deter, and interdict them.

In FY 2013, USBP checkpoints seized approximately 342,000 pounds of marijuana and made 9,510 apprehensions. Checkpoint operations account for approximately 14 percent of USBP national marijuana seizures and approximately 2 percent of USBP national apprehensions.

High-Intensity/High Profile Activities

CBP also uses the Arizona Alliance to Combat Transnational Threats (AZ ACTT), New Mexico/West Texas Alliance to Combat Transnational Threats (NM/WTX ACTT), South Texas Campaign (STC), and Surge Operations to secure the border. These are described below.

Arizona Alliance to Combat Transnational Threats

The AZ ACTT is an enforcement approach that leverages partnerships, capabilities, and resources between DHS Components, federal agencies, state and local actors, and tribal governments. This operation increases the certainty of arrest of those who enter illegally at and between the POEs, in order to reduce smuggling and crimes associated with smuggling in Arizona. The mission of the AZ ACTT:

DHS along with international, Federal, state, local and tribal interagency partners will implement intelligence driven operations in the Arizona – Sonora Area of Operation to deny, degrade, disrupt, and dismantle the illegal activities of transnational criminal organizations in order to establish a secure and safe border environment and improve the quality of life of affected communities throughout the state of Arizona.

AZ ACTT operations have targeted the Sonora border area to deny criminal organizations from operating along approximately 80 miles of the Arizona border. The enforcement strategy of the AZ ACTT is a five-faceted approach based on collaboration, intelligence coordination, unity of effort, prioritized focus, and sustained efforts.

New Mexico/West Texas Alliance to Combat Transnational Threats (NM\WTX ACTT)

The NM/WTX ACTT was established along the entire state of New Mexico and 17 counties in West Texas, to include the Big Bend Sector. The mission of the NM/WTX ACTT:

The New Mexico/West Texas Alliance to Combat Transnational Threats Unified Command will conduct coordinated law enforcement/ intelligence activities and information sharing with partner agencies and the Government of Mexico in order to increase border security and support their efforts to reduce levels of violence.

The six strategic goals identified as priorities to facilitate the success of the NM/WTX ACTT mission are:

- Identify and detain cartel “trigger men” and facilitators;
- Deny safe haven to Transnational Criminal Organizations (TCO) members and their associates;
- Ramp-up crime prevention and deterrence efforts;
- Enable more prosecutions;
- Establish accepted intelligence protocols; and
- Enhance efforts with our strategic partners in the NM/WTX Area of Responsibility (AOR).

This multi-agency collaborative initiative leverages a myriad of law enforcement resources via intelligence driven operations (IDO) in order to deny, disrupt, degrade, and dismantle TCOs operating in the NM/WTX AOR. The NM/WTX ACTT is comprised of 11 different U.S. agencies and has been instrumental in developing and formalizing a mechanism for sharing information with the Government of Mexico (GoM), as it increased coordinated law enforcement/intelligence efforts for a unified response against TCOs. Through established agency liaison groups between ICE’s Homeland Security Investigations Assistant Attaché Ciudad Juarez and the El Paso Sector International Liaison Unit, bi-national border security-related information is shared in multiple forums. In addition to information sharing, bi-national operations have increased in participation and frequency. Coordinated bi-national efforts include operations at the POEs, parallel border boundary patrols, bi-national functional exercises and large-scale events, such as the Annual El Paso Sun Bowl game.

NM/WTX ACTT operations such as Operation No Refuge, has denied safe haven to TCO members and associates in the U.S. As of September 2012, approximately 1,957 targets of interest have been identified under Operation No Refuge and 80 of the targets have been encountered in the NM/WTX ACTT AOR, fostering safer communities throughout the area.

Beginning in FY2013, data reporting for ACTT activities changed and is only available nationwide. During FY 2013, ACTT efforts resulted in 2,592 apprehensions and the seizure of 59,395 pounds of marijuana, 8 grams of methamphetamines, and 33 firearms.

South Texas Campaign (STC)

In August 2011, USBP initiated the STC in the South Texas Corridor (Del Rio, Laredo, and Rio Grande Valley Border Patrol Sectors, and Houston and Laredo Field Offices). The STC seeks to mitigate risk by establishing a secure environment through operational integration of bi-national efforts to deprive TCOs of the ability to exploit the South Texas Corridor. The current focus of STC is on the establishment of joint interagency, integrated targeting teams (JTT) within the South Texas Corridor. The objective of JTTs is to provide oversight for the STC Unified Command targeting of TCOs. The purpose of the STC is to ensure that the unified effort in the South Texas Corridor employs targeted and focused enforcement based on risk, a Consequence Delivery System, Operational discipline, coordination, and integration of intelligence, interdiction, and investigation against prioritized targets.

The intended outcomes of the STC include, (i) diminishing the capacity of TCOs to use major smuggling routes and commercial conveyances and force a displacement in their smuggling and transportation methods; (ii) depriving TCOs of resources and forcing them into a more costly/vulnerable continuous state of reorganization; (iii) diminishing the presence/influence of TCOs throughout the South Texas Corridor; and (iv) achieving and maintaining the operational initiative.

Due to the work of the STC, RGV continues to be the predominant area of activity with 154,453 apprehensions in FY 2013. RGV accounts for more than 66 percent of all the USBP apprehensions in the South Texas Corridor [the Laredo Sector (LRT) accounts for 50,749 and the Del Rio Sector (DRT) accounts for 23,510], and has experienced the most significant rate of change nationwide (58 percent increase from FY 2012). It is important to note that, as of the end of FY 2013, arrests of OTMs in RGV were up 94 percent from FY 2012. OTM Despite this increase in apprehensions, the Border Patrol sectors within the South Texas Corridor have recidivist rates that are lower than the southwest border average of 16 percent. Specifically, RGV, LRT, and DRT have recidivist rates of 12, 12, and 7 percent respectively. Further examination of STC apprehensions reveals that, of those arrested in FY 2013, 96,178 were first time USBP apprehensions, which represented more than half of the total number of first time USBP apprehensions.

Apprehensions**

Exhibit 10: Recidivism

Sector	Recidivist Rate
Southwest Border	16%
RGV	12%
LRT	12%
DRT	7%

Surge Operations

USBP's strategy for implementing surge operations across the southwest border is based on threats, risks, vulnerabilities, and the resources of partner agencies. Surge operations proactively address intelligence, seasonal migration, and smuggling trends. Unlike ACTT operations, which encompass a large area and are sustained indefinitely, surge operations are short term and address small areas. They involve short-term deployments of additional resources and technology to target areas that require, or may potentially require, a heightened presence based upon risk assessment. These operations increase the probability of preventing terrorists and their weapons from illegally entering the U.S. between the POEs and assists in the reducing of crime in border communities.

Key USBP Programs and Capabilities

Following are programs managed by USBP and funded directly by USBP.

Horse Patrol

The Horse Patrol has been an integral element of USBP since its inception in 1924. USBP currently maintains a herd of approximately 367 horses along the southwest and northern borders, along with 263 active certified riders. The Horse Patrols allow access to areas lacking the necessary infrastructure for road-borne transportation or areas where access by vehicles is

environmentally prohibited. Many private land-owners are restricting vehicular access by USBP due to noise and environmental impacts, making horses the only viable patrol alternative.

Over the past few years, USBP has taken steps to significantly reduce costs associated with the Horse Patrol. USBP has an agreement with the Bureau of Land Management (BLM) to acquire wild mustangs captured on federal lands reducing acquisition costs. Currently, there are 216 mustangs throughout the USBP Horse Patrol. Federally owned facilities are being constructed or acquired to reduce boarding costs with private contractors. USBP intends to develop a partnership with the North American Mounted Unit Commanders Association to conduct cross-organizational training at a nominal expense.

In FY 2013, a standardized Instructor and Basic Rider training program was implemented. Additionally, a standardized reporting system was established to ensure consistent and applicable metrics are captured moving into FY 2014.

The projected budget for the USBP Horse Patrol in FY 2015 is \$2.5 million. Apprehension and seizure data for FY 2013 are:

Exhibit 11: Horse Patrol Statistics

USBP Horse Patrol	Amount
Apprehensions	19,149
Marijuana Seized (lbs)	95,081
Firearms seized	11

Off-Road Vehicles

USBP has been utilizing Off-Road Vehicles (ORV) for patrolling for many years. These vehicles include all-terrain vehicles, utility vehicles, snowmobiles, dirt bikes, and personal watercraft. Prior to FY 2013, procurement and training were decentralized to the sector level with a resulting mix of non-standardized vehicles and personal protective equipment. This has made maintenance inefficient due to lack of commonality of repair parts and has hindered USBP's ability to re-allocate equipment between sectors, again due to the lack of commonality.

In FY 2013, USBP established a national-level program office to centrally manage the USBP ORV programs. This program office worked with subject matter experts and the Office of Training and Development to develop a standardized ATV Instructor and Basic Rider course available for export to sectors and import at the Border Patrol Academy. Additionally, the program established a National ORV Policy to standardized safety requirements and procedures for all USBP Off-Road Vehicles. The policy is currently pending negotiations with the NBPC prior to implementation.

Exhibit 12: Off-Road Vehicles

ORV Types	Number
All-Terrain Vehicles	1,518
Utility Vehicles	146
Snowmobiles	167
Dirt Bikes	70
Personal Watercraft	49

Canine Program

The USBP Canine program began in 1986 with the acquisition of 4 canines to assist agents in what were then the McAllen and Laredo sectors. Canines are used to detect concealed humans and narcotics in vehicles, primarily at traffic checkpoints. The importance of USBP canines has increased over the last several years with the addition of permanent and tactical checkpoints. USBP currently has 956 canines deployed at 20 Sectors and the Special Operations Group. In FY 2013, there were over 10,000 Canine-assisted seizures for many different types of drugs that had a narcotic appraisal value of almost \$977 million.

Exhibit 13: Canine Program

Canine Locations	Number
Southwest Border	840
Northern Border	70
Coastal	11
Total	924

Exhibit 14: Border Patrol Narcotic Seizures with Canine Assist FY 2013

Canine Assisted	
Drug Type	Quantity
Marijuana	934,026 (lbs)
Cocaine	3,980 (lbs)
Heroin	9,471 (ounces)
Methamphetamine	343 (lbs)
Concealed Humans	90,997
Currency Value	\$7,266,986
Total Narcotic Appraisal Value	\$977,532,497

In some sectors along the northern border, USBP canine assets are the only CBP canine assets available; therefore the Office of Field Operations must rely on USBP assets.

SOG

In support of the USBP National Strategy, the SOG provides day-to-day emergency support functions (ESFs) for DHS, CBP, and USBP and responds to national level incidents, as outlined in the National Response Framework.

Organization of the SOG

SOG is comprised of three components: BORSTAR, BORTAC, and MRT. The command and support staffs for these teams are located at the SOG headquarters in El Paso, Texas where SOG also maintains administrative control over all special operations personnel and MRT throughout the Border Patrol. The Sector Chiefs maintain tactical control of special operations personnel and MRT for day-to-day operations. The Chief of the Border Patrol can move special operations personnel at his discretion to address high threat or rescue operations within or outside the Continental U.S. (CONUS/OCONUS). When Special Operations and MRT personnel are detailed outside their respective sectors, both administrative and tactical control remains with the Chief of the Border Patrol through his proxy (SOG Director or USBP Special Operations Headquarters Branch Chief). SOG personnel also conduct international training and capacity building operations to enhance the capabilities of our foreign border security law enforcement partners.

SOG Team Descriptions and Mission Deployments

BORSTAR:

BORSTAR is a core operational component of the USBP SOG. In support of the USBP Strategic Plan, BORSTAR provides rapid response law enforcement, search, rescue, and tactical medical capabilities for USBP. BORSTAR plans, prepares, and trains to neutralize imminent threats to national security. National level incidents include the possibility of widespread bio-terrorism and other pandemic perils that remain a paramount concern for CBP and other federal, state, and municipal entities. Additionally, BORSTAR provides mutual assistance to local, county, state, tribal, and Federal entities by responding to enforcement and search and rescue requirements, acts of terrorism, potential terrorism, and natural disasters throughout the United States.

In addition to providing day to day support to Border Patrol sector operations, during FY 2013, BORSTAR has been deployed in support of 8 OCONUS missions with 62 days being the average length of OCONUS deployment. OCONUS missions were conducted in Belize, Panama, Costa Rica and Mexico. During this same time frame, BORSTAR deployed in support of 8 CONUS missions with an average length of deployment of 19 days. CONUS missions were conducted in RGV, Tucson, San Diego, Yuma and El Paso sectors.

BORTAC:

BORTAC is a core operational component of the USBP Special Operations Group. BORTAC provides a tactical rapid response capability, at a national level, to resolve emergent, high-risk, and unusual law enforcement situations by employing specialized skills, weapons, and tactics. BORTAC supports the National Border Patrol Strategic Plan by matching capabilities to emerging threats, through planning, training, and tactical deployment. This increases USBP's

ability to respond to specific terrorist and criminal threats and incidents, and supporting the traditional USBP mission. BORTAC has developed partnerships with the FBI Hostage Rescue Team (HRT) and ICE. BORTAC will continue to foster these relationships as they support the Border Patrol Strategic Plan for a whole-of-government approach to joint operations.

In addition to providing day to day support to Border Patrol sector operations, over the past fiscal year, BORTAC has been deployed in support of 13 OCONUS missions with an average length of deployment of 75 days. OCONUS missions were conducted in Moldova, Panama, Honduras, Costa Rica, Guatemala, Kenya, Ukraine, and Peru. During this same time frame, BORTAC deployed in support of three CONUS missions with an average length of deployment of 28 days. CONUS missions were conducted in the San Diego (SDC) and Tucson (TCA) sectors as well as Playas, New Mexico.

MRT:

In support of the USBP National Strategy for enhanced mobility and intelligence-driven response capabilities, the MRT provides a flexible and tiered-response capability to counter the emerging and evolving threats along the challenging operational areas of our Nation's borders. The MRT provides a national group of organized, trained, and equipped USBP agents capable of rapid movement to regional and national incidents, and events in support of priority CBP operations. The MRT responds to intelligence driven targets and shifts in local cross-border criminal activity, as deemed necessary by the USBP Chief Patrol agents. Last fiscal year, the MRT deployed to North Dakota to assist Federal Emergency Management Administration (FEMA) during Red River flooding. During this deployment, MRT agents performed numerous law enforcement functions in support of the depleted local police force. These functions included welfare checks, manning security check-points, traffic control operation, and responding to calls for assistance as needed. In addition to responding to national incidents, the MRT provides continuous operational support to Border Patrol sectors.

Exhibit 15: SOG Component Personnel Numbers

SECTOR	BORSTAR Personnel			BORTAC Personnel			Overall Total
	Total	Active	Reserve*	Total	Active	Reserve*	
OTD/ART**	1	0	1	5	0	5	6

TOTALS	282	231	51	266	211	55	548

* Active status agents possess active, up-to-date training qualifications and can be immediately called upon and utilized for day-to-day operations. Reserve status agents have previously attained required training qualifications but have elected not to participate in current, day-to-day operations since they occupy management positions which may preclude participation; however these agents can still be called upon in the event of a national emergency.

** OTD-ART = Border Patrol Academy; OTD-ART/HF =Advanced Training Center; CCEP = Canine Center El Paso

Exhibit 16: Mobile Response Team by Sector

SECTOR	Total	Active	Inactive
Tucson	85	81	4
El Paso	122	122	0
Rio Grande Valley	95	95	0
San Diego	106	106	0
TOTALS	408	404	4

Exhibit 17: FY 2012 SOG Seizure and Apprehension Statistics

SOG Team	Rescues	Seizures				Apprehensions
		Marijuana (lbs)	Vehicles	Weapons	Currency	Aliens
BORTAC		57,439	126	65	\$276,345	1,921
BORSTAR	907	45,566	80	4		12,016
MRT		97,398	84	10	\$22,681	16,431

- BORTAC apprehensions included 4 armed suspects and 11 lookouts. BORTAC weapons seizures included 4000 rounds of ammunition and 478 AK magazines.

Response Time

The USBP SOG units are on an operational cycle that ensures that teams are available for rapid response to National Special Security Events (NSSE), National Response Framework, and Counter-Terrorism (CT) events. The units are on a four hour call-up, which means that, once notified, they will be ready to deploy in four hours. Response time to emergent events will vary from 24 to 72 hours in CONUS and 72 hours to 5 days OCONUS. Moving forward, SOG is looking to enhance its special operations mobile response capability and response times by working with CBP Office of Air and Marine (OAM) to co-locate air assets at SOG, which would optimize training opportunities, minimize risk, and reduce costs.

Enforcement Systems and Geospatial Intelligence (GEOINT) Usage

USBP currently employs multiple enforcement systems to facilitate the detection and apprehension of illegal aliens. However, the Border Patrol lacks a consistent ability across the southwest border to collect and aggregate data into a coherent common operating picture. The \$6 million requested in the President's Budget will allow CBP to establish additional geospatial tracking capabilities through the expansion of enforcement system infrastructure which will be deployed across the entire border. This enhanced system will more consistently record the location of apprehensions, gotaways, and turnbacks and expand the Border Patrol's ability to identify traffic patterns, visualize key performance measures, and make effective tactical decisions on daily personnel and equipment deployments. It will allow agents and commanders to maintain an active record of sign-cutting and tracking operations, drag road status and sign-cutting detections, including agent and suspect status, track disposition, and results. This system will build from existing systems and data capabilities such as the Intelligent Computer Assisted Detection (ICAD) application and the Enterprise Geospatial Information Services (eGIS). ICAD is USBP's primary system for tracking agent dispatch and monitoring unattended ground sensors (UGS). ICAD's functions include agent dispatch and status monitoring, sensor alerting; operational command and control, and situational awareness. eGIS visually depicts CBP resources to facilitate situational awareness. Multiple detection assets, including UGS and remote video surveillance systems (RVSS) are integrated to provide real-time view of activity and provide the framework for advanced situational awareness and planned internal and external sharing of operational data. The expansion of these capabilities support the Border Patrol's shift to a risk-based strategy by providing the on-the-scene commander with better and more real-time data on which to base decisions.

Consequence Delivery System (CDS)

The USBP conducts operations along southwest, northern, and coastal U.S. borders. Each area has unique circumstances that afford the Border Patrol a range of applicable consequences for use in response to cross-border illegal activity. The Border Patrol has objectively evaluated these unique environs across the border and concluded that border security can be enhanced through a concerted analysis to improve consequence application and effect using a process called the Consequence Delivery System – in order to further disrupt the smuggling cycle and continue the recent progress that has been made to enhance security along the Nation's borders.

CDS is an initiative that began conceptually in FY 2010 and was fully implemented across the southwest Border Patrol Sectors by the end of FY 2012. During FY 2012, CDS was expanded to the northern and coastal Border Patrol Sectors, as well as to southwest border OFO offices, with full implementation achieved by the end of FY 2013. CDS implements an aspect of targeted enforcement promoted in the FY 2012-2016 Border Patrol Strategic Plan. Previously, consequences were applied based on the viability of consequence programs and the demands of a high volume of illegal aliens. Today, through the application of CDS, consequences are applied through advanced analysis of consequence programs and alien classification to yield the greatest impact.

CDS standardizes the decision making process, guiding management, and agents through a process designed to uniquely evaluate the circumstances of each apprehension of a subject, and apply the best consequence for that individual to break the smuggling cycle and influence the subject against future illegal entry attempts. The seven categories of classifications – First Apprehension; Family Unit; Second/Third Apprehension; Persistent Alien; Suspected Smuggler; Targeted Smuggler; and Criminal Alien – are paired with the most appropriate consequence options and range from administrative voluntary repatriation to criminal prosecution.

Exhibit 18: Post-apprehension Indicators – Recidivism

Exhibit 19: Outcome Indicator – Recidivism Rate and Average Apprehensions per Recidivist

Using CDS analysis in FY 2013, the Border Patrol increased the percentage of apprehensions that resulted in a more effective and efficient consequence, identified by CDS, from 59 percent in FY 2011, to 89 percent. Subsequently, the overall recidivism reported for the subjects apprehended on the southwest border fell from 24 percent in FY 2010, prior to CDS implantation, to 16 percent in FY 2013, and the average number of apprehensions for recidivists fell from 2.66 in FY 2010 to 2.41 in FY 2013.

Consequence Options:

Operation Against Smugglers Initiative on Safety and Security (OASISS) is a bilateral criminal prosecution agreement between the U.S. and the Government of Mexico (GoM). Since 2005, OASISS allows for Mexican citizens found smuggling aliens in the U.S. to be prosecuted by the GoM.

Streamline is a criminal prosecution program targeting individuals who illegally enter the U.S. Streamline is a multi-agency effort that relies heavily upon the collaborative efforts of CBP, the U.S. Magistrate, the Federal Judiciary, the U.S. Attorney's Office, the U.S. Marshals Service, ICE, and the Department of Justice (DOJ) Executive Office of Immigration Review (EOIR).

Quick Court is a joint CBP and DOJ effort. CBP works with EOIR to increase the efficiency of immigration court hearings by placing aliens in removal proceedings in immigration courts close to the border, eliminating the need to acquire detention space to hold an alien while awaiting an appearance before an Immigration Judge. As in other immigration proceedings, an administrative final order of removal issued to the alien generally results in a ten year bar to legal re-entry. Further, when a subject who was previously removed is re-arrested, he or she is subject to a federal criminal charge of felony re-entry under 8 U.S.C. § 1326.

The Alien Transfer Exit Program (ATEP) repatriates aliens through geographic areas different from that of their entry location to disrupt future coordination with smugglers after their arrest and removal. ATEP is designed to disrupt the smuggling cycle that often reunites removed aliens with their hired smugglers to attempt another illegal entry.

Expedited Removal proceedings are initiated against aliens who are present without admission and encountered by an immigration officer within 100 air miles of the U.S. border, and have not been physically present in the U.S. for the 14-day period immediately before their arrest. Aliens processed for expedited removal procedures are not detained pending a hearing before an immigration judge, but are immediately processed for a formal administrative removal order. If an alien, expeditiously removed, returns illegally, he or she may be considered for criminal prosecution (Illegal Re-entry after Removal).

Reinstatement of Removal provides the ability to reinstate a previously executed removal order with respect to aliens who illegally reenter the United States. If an alien is found to have reentered the United States after removal, the prior order of removal is reinstated from its original date and is not subject to review. In most cases, it is not necessary to detain aliens processed for reinstatement pending a hearing before an immigration judge. Reinstatement does not preclude criminal prosecution in accordance with local procedures and guidelines.

Voluntary Return is used at the discretion of BPAs and their supervisors to allow an alien to depart voluntarily from the U.S. in lieu of being subject to removal proceedings.

Warrant of Arrest / Notice to Appear is used when BPAs make an arrest and the alien is to be detained in DHS custody pending a hearing before an immigration judge.

Exhibit 20: CDS – SWB Apprehensions

Southwest Border Sector Apprehensions

International/Community Efforts

Latin America

In support of the DHS Strategy for Engagement in Latin America, USBP is providing support and is complementing the CBP International Strategy by leveraging the resources of partner nations through capacity building, advisory support, training, technical assistance, improved information exchange, and shared best practices in order to augment border security efforts in the United States. In its strategy, DHS specifically highlights the key importance of U.S. collaboration with both Mexico and Central America, due to the increase in TCOs, gangs, and drug trafficking organizations, human trafficking and smuggling networks, widespread corruption, and the use of the region as a global transit zone for illicit activities.

USBP will continue to support CBP's INA with partner nations and provide short term advisors to be detailed to Central America. Advisors have been deployed to the United States Embassies in Panama, Costa Rica, Honduras, Guatemala, and Belize through sponsorship by the Department of State's International Narcotics and Law Enforcement Affairs. Host nations receive border and operational capabilities assessments and subject matter expertise in the area of border enforcement operations.

Successful engagements include:

- Establishing a Regional Border Protection Training Program in Panama;
- Maintaining the USBP International Liaison Unit that creates positive working relationships and alliances with foreign counterparts to increase border security, and the Operation against

Smugglers Initiative on Safety and Security program that enables the prosecution of alien smugglers across the southwest border;

- Coordinated deployment of Federal Police and U.S. Border Patrol assets along respective sides of the border during periods of increased illicit activity; and
- The Border Violence Protocols that created a bi-national response mechanism for incidents of violence along the southwest border through (i) law enforcement procedures and best practices; (ii) response to incidents of violence; (iii) joint threat assessments; (iv) coordinated patrols; (v) communications; (vi) Border Violence Prevention Group; and (vii) oversight.

Immigration Advisory Program/Joint Security Program

As part of CBP's layered enforcement strategy, USBP augments OFO's Immigration Advisory and Joint Security Programs with personnel. IAP focuses on enhancing the safety of air travel by preventing terrorists and other high-risk travelers from boarding commercial aircraft bound for the United States and reducing the number of improperly documented passengers from traveling to the United States. JSP advises and assists in the implementation of advance passenger information targeting operations. JSP's expertise facilitates the identification of travelers who do not possess the proper documentation to enter or transit the United States, Mexico, and Panama. Both programs are established in the Western Hemisphere preventing terrorists, criminals or inadmissible aliens from boarding U.S. bound flights, prohibiting entry into the U.S. and eliminating the costs associated with removal proceedings, transportation back to the country of origin, and the penalties applied to the airline.

International Border Enforcement Team (IBET) Shadow Program

The United States and Canada IBET Shadow Program is jointly led by the USBP and the Royal Canadian Mounted Police (RCMP). It is part of the CBP International Visitor Program and is used to demonstrate how a cross border bi-national working relationship can make vast improvements to border security. It is designed to allow foreign counterpart border agencies gain exposure and learn the best practices and management programs of USBP. Many Eastern European countries have shown great interest in the IBET approach to border security, including the Ukraine, Croatia, Bosnia, Macedonia, Serbia, Albania, and Montenegro. The IBET Shadow Program is a unique program between the United States and Canada intended to show the close cooperation and integration on border security issues between the two countries; there are no plans at this time to expand the program to include any other foreign countries.

CBP Critical Capabilities

As mentioned earlier, USBP is supported in accomplishing its mission by other offices within CBP. These offices provide essential support services that allow USBP to concentrate on its core missions; nonetheless they have a critical role in the success or failure of the USBP to accomplish its border security mission. These programs are funded in PPAs other than the Border Security Control PPA and their program details are described in their respective PPA narratives; however, USBP believes it is essential to discuss these programs so that their criticality to USBP operations and the impact of program reductions is understood.

Tunnels

The first documented cross-border tunnel was detected in 1990. Since that time, over 160 tunnels have been discovered along the borders, with the vast majority occurring in the San Diego and Tucson sectors. These tunnels have been discovered through the efforts of CBP, ICE/HSI, DEA, and local law enforcement agencies. The overall objective of the DHS Tunnel Program is to identify, acquire, and implement operational solutions to support tunnel prediction capability, detection, and projection of the trajectory of cross-border tunnels, safely confirm and map tunnels, and coordinate tunnel threat operations. In 2010, USBP was designated as the lead agency for the CBP Tunnel Detection and Technology Program. USBP has enlisted assistance from CBP's Office of Technology Innovation and Acquisition (OTIA) to support tunnel technology acquisition and the creation of a formal tunnel program of record.

TACCOM

The TACCOM program office is responsible for approximately \$275 million of Land Mobile Radio (LMR) assets and is the backbone of USBP communications operations. Funding for the TACCOM program is provided to OIT and OTIA. Currently, a significant portion of USBP LMR assets (Spectra and Spectra Plus radios) are no longer supported by the manufacturer; USBP acquired all available spare parts for these units, which have now been completely depleted. This has forced OBP to purchase new replacement radios which are incompatible with existing installation kits, incurring labor costs to remove the old installation kits and install the new kits. By FY 2018, the remaining portion of USBP LMR assets (Motorola XTL5000) will no longer be supported.

- Total Portables: 22,000 (Production of these radios ceased as of September 2013 and will no longer be supported by industry by 2018)
- Total Mobiles: 11,533 (Production of these radios ceased as of September 2013 and will no longer be supported by industry by 2018)
- Total Legacy Radios: 10,796 (outdated)

Technology (MSC/MVSS/RVSS)

The Technology Liaison Office within USBP works with OTIA to develop operational requirements for technological assets, monitors current project status, and recommends reassignment or redeployment of technology assets. These assets are procured and sustained with Border Security Fencing, Infrastructure, and Technology (BSFIT) funding from OTIA. These assets include Mobile Surveillance Capability (MSC), MVSS, and RVSS. Many of these systems are reaching the end of their expected life cycle and require replacement. The Arizona Technology plan was to be the initial step towards replacing these aging assets.

CBP Transportation Program

CBP does not have sufficient organic capability to transport and guard illegal aliens apprehended at and between the POEs. The CBP Transportation Program was developed to provide an integrated system of detainee transportation and security along the southwest border, northern

border, coastal borders, and the air, land, and sea POEs. This program reduces the numbers of officers and agents that would be used in securing and transporting illegal detainees and allows them to focus on their traditional law enforcements operations. In FY 2013, OTIA was designated as Executive Agent, replacing USBP, and funding was transferred to OTIA beginning in FY 2014. Funding for the CBP Transportation program has been significantly reduced, from \$70 million in FY 2012 to \$32 million in FY 2013, and increased to \$45 million in FY 2014.

Aerial/Marine/Riverine Support

This support is provided by the Office of Air & Marine (OAM). OAM provides airlift, surveillances, observation, and medical evacuation support to US BP. This support allows BPAs rapid access to remote locations along the border as needed. Aerial support provided by OAM to OBP is depicted below.

Exhibit 21: OAM Support Hours for the Border Patrol:

Hours Allocated	FY 2011	FY 2012	FY 2013
Flight Hours	58,197	66,299	53,179
Marine and Riverine Support Hours	85,414	102,724	99,645

Fleet Management Program

The Mobile Assets Program Management Office (MAPMO) is responsible for the acquisition and disposal of vehicles used by CBP offices. The USBP vehicle fleet represents approximately 70 percent of the CBP fleet; the mobility provided by this fleet is critical to enabling USBP to accomplish its mission of securing the border. Without adequate, reliable transportation, USBP agents would be essentially desk-bound. Through FY 2012, MAPMO funding levels essentially allowed for the replacement of all vehicles as they reached their expected service life. Current and programmed funding levels do not sustain a viable vehicle replacement program over the long-run.

NII/RAD NUC

The Non-Intrusive Inspection/Radiation Nuclear Detection (NII/RAD-NUC) program manages the deployment of Z Back-Scatter Vans, Fiberscopes, Busters, Radioisotope Identification Devices (RIID), and Personal Radiation Detectors throughout USBP. USBP radiation detection equipment (RDE) capability is focused on station and checkpoint operations. NII and RDE are seen as force multipliers, allowing agents to scan larger portion of the stream of traffic for contraband and illegal entrants. USBP is currently at full operational capability for Personal Radiation Detectors (PRD) and RIIDs; however, USBP RIIDs and PRD's are near or past their expected service life and require replacement. The Domestic Nuclear Detection Office (DNDO) is appropriated funding for the development of the global nuclear detection architecture, development, and acquisition of RN detection equipment, and DHS operational components are appropriated funds for Operations and Maintenance (O&M) of NII and RDE; however, advances

in Radiation detection technology will better serve the needs of the USBP, by increasing the efficiency and effectiveness of detection operations.

In addition to the key capabilities described above, there are additional capabilities provided by other CBP offices, such as facilities sustainment by the OA's Facilities Management & Engineering, new agent recruitment by HRM, and new agent training and agent professional development provided by the OTD. These and other capabilities support and assist USBP in accomplishing its mission of securing the borders.

Training and Professional Development

OTD is responsible for centralized leadership and direction of all CBP training programs. OTD ensures that all training efforts support the CBP mission and strategic goals, meet the needs of a diverse and dispersed workforce, and contribute to measurable outcomes and results. OTD establishes standards and policies for designing, developing, delivering, and evaluating training. The U.S. Border Patrol Academy under the direction of a Chief Patrol Agent is primarily responsible for Border Patrol agent basic training, as well as specific specialized training and instructor certification.

CBP policy requires agents to undergo periodic qualifications of firearms proficiency and annual use of force training/certification. Failure to successfully complete these periodic qualifications results in the de-authorization to carry a firearm and/or use intermediate force devices. Periodic qualifications are administered by certified Firearms Instructors and Use of Force Instructors at the Border Patrol sectors. All Use of Force instructors are required to attend training for initial certification, and recertification training every five years.

The Use of Force Policy Division (UFPD) is responsible for the development and articulation of all CBP use of force policy.

In supporting the tasks, functions, and mission requirements of each CBP operational component, UFPD seeks to research, evaluate and procure the best possible equipment for utilization in the field. UFPD also provides comprehensive management and life cycle accountability for tactical equipment and body armor. Additionally, OTD and UFPD provide replenishment of Use of Force equipment and resources, to include ammunitions, and funding for these requirements is essential for officer safety and maintaining established proficiencies and policies.

UFPD has developed appropriate controls, standards, best practices and policies in order to enhance the safety and performance of enforcement personnel.

CBP policy also requires all agents be issued personal protective body armor. CBP strongly encourages the use of body armor while performing law enforcement duties, and requires personal to wear body armor during certain instances such as firearms training and qualifications. Body armor that has exceeded its expiration date or has become unserviceable must be replaced. The current life-cycle for issued body armor is five years.

Conclusion

In FY 2015, USBP will continue to further its mission by using a variety of programs and initiatives to support strategic objectives. USBP is committed to continuing the southbound land border enforcement efforts to combat the smuggling of firearms and currency to Mexico. A major future objective of the Border Patrol is to ensure that its workforce is highly mobile so that it can rapidly adjust to changes in the border security environment. USBP will continue to reevaluate its existing programs and planned initiatives as the threats and vulnerabilities to border security change in response to newly deployed border enforcement resources.

Performance

The Border Patrol is developing performance goals to frame its unique contribution to comprehensive border security. These new measures are not intended to be the sole measures to assess border security. There are some of a suite of measures that already exist or are in development, that when combined provide a comprehensive picture of the state of border security.

Two of these measures are already developed and being reported as FY 2013 *Government Performance and Results Act* (P.L. 103-62, GPRA) measures:

- Percent of people apprehended multiple times (also called the recidivism rate); and
- Average number of apprehensions for persons with multiple apprehensions (also called average number of apprehensions per recidivist).

A third measure will be reported as a GPRA measure beginning in FY 2014:

- Interdiction effectiveness rate.

The interdiction effectiveness rate measure reports the percent of detected illegal entrants who were apprehended or turned back after illegally entering the United States between the ports of entry on the Southwest border. The Border Patrol achieves this desired strategic outcome by maximizing the apprehension of detected illegal entrants or, confirming that illegal entrants return to the country from which they entered; and by minimizing the number of persons who evade apprehension and can no longer be pursued.

The formula for calculating the interdiction effectiveness rate is:

$$(\text{apprehensions} + \text{turn-backs}) / (\text{apprehensions} + \text{turn-backs} + \text{got-a-ways})$$

To fully implement risk-informed, intelligence-driven operations that focus Border Patrol's capabilities against prioritized threats, the Border Patrol must consistently enhance and maintain situational awareness through a comprehensive understanding of the threat environment. Situational awareness provides an in-depth picture of current operating conditions within a specific region of the border and facilitates predictive analysis. Given the importance of gaining

and maintaining situational awareness, the following two-pronged approach is used in describing the “state of the border.”

The interdiction effectiveness rate noted above is utilized in corridors characterized by significant cross border entries. The Border Patrol addresses these areas with a deployment density approach. The deployment density approach leverages CBP’s organic capabilities against the greatest threats along the U.S. border. This requires a flexible force to deploy and redeploy Border Patrol resources as threats migrate to other areas.

In areas characterized as low risk, Geospatial Intelligence (GEOINT) resources are used to enhance and maintain situational awareness along the U.S. border. GEOINT can be described as gathering and analyzing imagery and geospatial information for the purpose of detecting change within specific geographical areas of the border environment.

GEOINT capabilities typically come from high altitude aerial platforms equipped with intelligence, surveillance, and reconnaissance technology (ISR), such as the Office of Air and Marine’s (OAM) Unmanned Aircraft System (UAS). The use of these assets requires significant collaborative efforts with OAM and the Office of Intelligence and Investigative Liaison (OIIL). GEOINT change detection capability allows the Border Patrol to continue focusing capabilities on areas where the highest risk exists, but ensures that any threat adaptation can be identified quickly through information and intelligence culminating in appropriate steps being taken to rapidly minimize any new risk. GEOINT is a critical element to validating all cross border activity, or the absence thereof, for accurate state of the border assessment.

Joint Field Command-Arizona

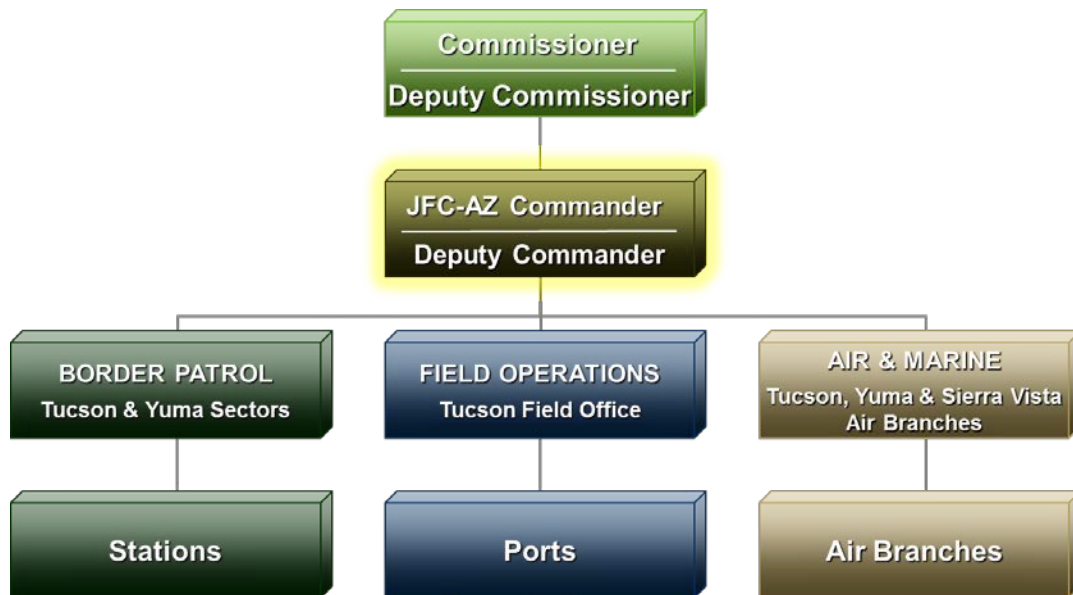

The Joint Field Command of Arizona (JFC-AZ) reports directly to the Office of the Commissioner and was created to provide leadership and a central point of contact for the operations of all CBP components located within Arizona. The JFC-AZ Commander has oversight for all CBP operational resources and assets within Arizona and serves as the principal link between field component leadership and the Commissioner. CBP components include the Tucson and Yuma Border Patrol Sectors; the Tucson Field Office; and the Tucson, Yuma and Sierra Vista Air Operation Branches. JFC-AZ provides strategic guidance and makes operational decisions in real time that were once made independently by each component’s respective Headquarters Office. JFC-AZ expands operational capacities and maximizes operational effectiveness and capabilities by integrating a cohesive team through shared information and resources. Integrating the planning and execution of mission objectives results in better border security, and the ability to protect the American public against terrorists, transnational criminal organizations and their smuggling operations, and the ability to secure and expedite lawful trade and travel.

JFC-AZ is operationally responsible for approximately 6,700 employees from various CBP components. The area of responsibility for the JFC-AZ covers a large diverse geographical area that incorporates the entire state of Arizona, parts of California, and is the largest CBP corridor/area for operations. The JFC-AZ leverages all CBP operational components of the Office of Field Operations, Office of Border Patrol, and the Office of Air and Marine by providing a single point of integration for all operations and planning throughout Arizona. The

JFC-AZ utilizes intelligence resources and assets of all CBP components as well as other federal, state, local, and tribal agencies to mitigate risks, threats, intelligence gaps, and operational gaps in the operational environment. The JFC-AZ houses the Joint Intelligence and Operations Center (JIOC), which is the center for all command, control, and communications for CBP operations in AZ. While the JIOC is made up of members from each of the CBP operational components, the operations are not limited to CBP only.

Below is a diagram of the reporting structure of JFC-AZ with the component offices and a map of the CBP components operating within Arizona.

Exhibit 17: JFC-AZ Reporting Structure

Map of CBP Arizona Components under JFC-AZ Operational Control

Blue = Office of Field Operation Headquarters (Tucson) and Ports

Green = Border Patrol Headquarters (Tucson & Yuma) and Stations

Brown = Air & Marine Operation Branches (Tucson, Yuma, & Sierra Vista)

Highlighted below is a list of ongoing key integration efforts within the JFC-AZ:

Exhibit 18: JFC – AZ Integration Efficiencies

Description	Ongoing Efforts
<p>Joint Intelligence & Operations Center (JIOC)</p> <p>Serves as the unclassified communication hub for CBP components and law enforcement partners in Arizona. Maintains situational awareness and serves as the principal coordination element for the execution of air-to-ground support to CBP field elements. Provides field components and CBP leadership with a current and coordinated picture of on-going and emerging activities in the JFC-AZ area of responsibility to enhance information management and augment decision making.</p>	<ul style="list-style-type: none"> • Joint Operations Center: Serves as the liaison between the field and the Predator Operations Center, as well as the other CBP air platforms, and facilitates intelligence collection as well as interdiction efforts between air platforms and ground units when illegal activities have been detected both at and between the POEs; • Emergency Operations Center: Maximizes incident response efficiency when the need to stand up arises. This is a vital facet during natural disasters or other critical incidents that provides continuity of operations as well as communication across multiple components on the federal, state, tribal and local level; • Reporting: JIOC serves as the single point of contact for all JFC reporting to CBP and DHS executive management and is the unclassified communications hub that provides a direct connection to field personnel, local leadership, and tactical commanders by providing consolidated reporting in order to provide a complete CBP picture of the operational environment; • Air/Ground Coordination: Zone Coordinators (ZCs) receive support requests from the field when targets are detected. The JIOC determines priorities and assigns air support accordingly. ZCs serve as the link between the JIOC and field entities to ensure real time situational awareness for accurate prioritization of field support. The Air Coordinator, working with the ZCs and Watch Commander, directs the air assets to support the field; and • Blue Force Tracking: Air Coordinators use the CBP Air Marine Operations System, Satellite Tracking System, and OAM radio system in conjunction with the CDO for air safety Blue Force Tracking. Watch Commanders use Gotham software and trackers for personnel on travel to Mexico.
<p>Air Integration Strategy</p> <p>Provides standardized processes for aviation operations within CBP in Arizona through the Executive Air Council (EAC) consisting of senior CBP leadership which provides strategic guidance to the Arizona Aviation Tactical Operations Group.</p>	<ul style="list-style-type: none"> • Arizona Aviation Tactical Operations Group: Provides standardization for air operations in Arizona; convenes on a weekly basis to bring together all aviation support providers and CBP staff planners to conduct operational aviation planning and create a weekly Air Tasking Order/flight schedule; and uses a threat based/intelligence driven planning model to prioritize aviation support within the JFC-AZ area of responsibility; and • Executive Air Council: Ensures aviation operations align with the strategic goals and objectives of the JFC-AZ Commander and JFC-AZ Campaign Plans and makes decisions regarding priorities when JFC components have competing requests.
<p>Targeting Enforcement Unit</p> <p>Established to impact Transnational Criminal Organizations (TCOs), family members and their associates through identification, visa revocation, intelligence collection, and the facilitation of investigations by CBP and its partners.</p>	<ul style="list-style-type: none"> • Target Analysis: Leveraged to garner intelligence, identify potential targets for visa revocation, as well as pinpoint individuals, and companies that are amenable for the Drug Enforcement Administration and the Office of Foreign Asset Control investigations by identifying TCO personnel, and their family members and associates.

Exhibit 18: JFC – AZ Integration Efficiencies

Description	Ongoing Efforts
	<ul style="list-style-type: none"> • Visa Revocation Program: Provides intelligence targeting to identify individuals involved with TCOs and use Non-Immigrant Visas (NIV) to traverse through the POEs in support of criminal activity; works with Department of State to have NIV revoked; and • Anti-Gang Initiative: Disrupts the ability of foreign members of Outlaw Motorcycle Gangs from traveling to the United States.
Integrated Canine Council Manages the finite canine resources and maximizes their effectiveness by providing strategic and integrated support and coordination within CBP in Arizona.	<ul style="list-style-type: none"> • Integrated Canine Council Charter: Sets forth the guidelines and directives for monthly council meetings attended by CBP component leadership involved in canine operations in Arizona; • Integrated Canine Operations: Backfills canine shortages with component assets to maximize efficiency and utilization; • Canine Shortfalls: Establishes priorities in monthly council meetings to address and rectify support issues in canine/handler assets, trainer assets, and proper kennel facilities; and • Integrated Training: Affords CBP component trainers and canine teams the ability to cross-train with other canine assets.
Joint Planning Team Serves as a planning hub for CBP components in Arizona and as the principal coordination element for the development of Campaign Plans, Integrated Operations Orders and Concept of Operations Plans.	<ul style="list-style-type: none"> • Conducts bi-weekly meetings with all CBP components to discuss past, current and future operations, successes, and lessons learned; and • Conducts planning with CBP components and Department of Defense/Military planning teams to create JFC-AZ Campaign Plans, further synchronizing border security efforts in Arizona.
JFC-AZ Intelligence Enterprise Initiates intelligence capabilities to support the CBP mission and JFC-AZ objectives for the Arizona area of responsibility, through integrated and unified execution of the CBP Intelligence Cycle.	<ul style="list-style-type: none"> • Develops JFC-AZ Priority Intelligence Requirements and component collection plans; • Expands and leverages collection management capabilities through Intelligence, Surveillance, and Reconnaissance (ISR) data; • Distributes Annual Joint Regional Threat Assessment (Sonora / Arizona area of responsibility); • Fuses information sharing with components and state, local, federal, and tribal partners, to include bi-national counterparts; • Expands situational awareness capabilities throughout the Arizona area of responsibility; • Develops and introduces Common Intelligence Picture/Common Operating Picture of the Arizona area of responsibility; and • Maintains analytical collaboration with investigative agencies.
Foreign Operations Branch Provides program leadership and coordinates the integrated execution of the JFC Commander's intent with respect to Bi-National operations efforts throughout the JFC-AZ area of responsibility.	<ul style="list-style-type: none"> • Coordinates with CBP components and other governmental agencies as required on the planning and execution for all high level bi-national operations; • Establishes and maintains partnerships at all levels of government, both foreign and domestic, to identify common issues and concerns while proactively seeking solutions to the mutual benefit of all parties; and • Coordinates/participates in the quarterly Border Violence Prevention Protocol meetings as well as other high-level meetings with the Government of Mexico.

Exhibit 18: JFC – AZ Integration Efficiencies

Description	Ongoing Efforts
Incident Management Integrates JFC-AZ CBP response efforts and ensures CBP emergency preparedness to significant events beyond the scope of steady state operations.	<ul style="list-style-type: none"> • Devolution: JFC-AZ is designated as the primary devolution site for the Office of the Commissioner (OC) in the event of a catastrophic emergency allowing CBP to manage and direct its critical primary mission essential Headquarters functions and operations under the direction and leadership of a designated Commissioner or Acting Commissioner. The Devolution Response Group, made up of JFC-AZ staff members, conducts exercises, and advises on new roles, responsibilities, and limitations during a devolution event; • Incident Management: Executes policy, strategic planning, and administrative actions through integrated component positioning of emergency equipment, personnel, and supplies; and • Continuity of Operations: Exercises plans in accordance with program guidelines and serves as liaison with local, state, and federal organizations
Joint Information Center Provides official CBP information to accredited news organizations, mass media, published professional journals, and stakeholder groups within the JFC-AZ's area of responsibility.	<ul style="list-style-type: none"> • Integrates all CBP public affairs offices in Arizona into a central communications component; • Increases public understanding and expands employee awareness of CBP's border security, trade and travel efforts, and efficiencies in Arizona; and • Enhances tactical messaging in Mexico and Central America by establishing relationships with media in the interior of Mexico and other Latin American Countries
Community Engagement Implements several initiatives aimed at keeping community members, civic leaders and key stakeholders informed about CBP efforts.	<ul style="list-style-type: none"> • Provides corporate approach to engaging Members of Congress versus component-specific; • Establishes relationships and partnerships with Trade Community, ranchers, law enforcement, local elected leadership, and the tribal community; • Hosts meetings for trade industry, Cattle Growers Association, and Congressional staffers on mission, operations, and challenges; and • Integrates Community Service programs such as citizen's academies, drug awareness programs, stakeholder meetings, and recruitment/ career fairs.

Descriptions of Selected Adjustments to Base:

Workforce Maturation: This PPA contains an \$84.010 million increase that is part of the overall \$194.6 million "Pay Adjustment for Workforce Maturation". The majority of this additional funding is because of changes in the requirements associated with BPAs and CBPOs. The journeyman initiative and low attrition rates mean more promotions and Within-Grade Increases (WIGIs). The compensation (base salary, benefits, premium pay and overtime) associated with these increases is considerable. In FY 2015, compensation is expected to compose approximately 73 percent of the total CBP budget. In the past, CBP has realigned funding from non-pay categories to pay to provide the funding needed to sustain the BPA and CBPO floors; however further reductions to non-pay and mission support pay funding is becoming increasingly

difficult to do without adverse operational impacts. This adjustment allows CBP to meet these pay requirements.

Realignment of Transportation Program Management Office: In FY 2015 \$622,000 will be transferred to the Technology, Innovation, and Acquisition PPA to fund 4 support positions in the Transportation Program Management Office (TPMO). The TPMO will support USBP by managing a transportation contract that reduces the numbers of agents that would be used in securing and transporting illegal detainees, and allows them to focus on their traditional law enforcements operations.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Training and Development (OTD) is responsible for The Training Between the Ports of Entry PPA, which supports basic, advanced, and supervisory/management/leadership training for new and incumbent Border Patrol agents. The training provided establishes and sustains the proficiency of those directly responsible for the front line mission of CBP. Funding levels requested for this training in FY 2015 will enable CBP to achieve targeted FY 2015 Border Patrol agent staffing levels and maintain mission critical skills and certifications of incumbent Border Patrol agents.

Canine	<ul style="list-style-type: none"> Training for Border Patrol agent canine teams operating along the U.S. border between ports of entry and at Border Patrol Checkpoints. This includes canine teams trained in the disciplines of Basic Detection, Concealed Human/Narcotics Detection, Search and Rescue, Human Remains Detection, and Special Response. 	169	301	301
Special Operations Groups	<ul style="list-style-type: none"> Training for the Office of Field Operations Special Response Teams and Border Patrol's BORTAC and BORSTAR teams is funded under this PPA. This includes training new/replacement team members, as well as training to maintain the skills/certifications of existing team members. 	307	1,490	1,490
Riverine Training	<ul style="list-style-type: none"> This training is required for Border Patrol agents to serve as a vessel commander in the riverine environment. Border enforcement operations are frequently conducted in such an environment and skilled use of Border Patrol vessels is required by certified operators. 	111	140	140
Anti-Terrorism/Counter Terrorism	<ul style="list-style-type: none"> This training provides Border Patrol agents advanced interviewing skills to identify potential threats (terrorists, drugs, currency, and weapons). 	162	700	700
Instructor Training	<ul style="list-style-type: none"> This training is required for CBP to maintain a sufficient cadre of certified, quality instructors to deliver basic and advanced training to new and incumbent Border Patrol agents. 	211	567	567

Training Between the Ports Programs	Descriptions	Training Seats Filled for FY 2013	Training Seats Planned for FY 2014	Training Seats Projected for FY 2015
Supervisor/ Leadership Training	<ul style="list-style-type: none"> Training for first- and second-line Border Patrol agent supervisors is funded under this PPA. This training provides these supervisors the technical and supervisory skills required to effectively lead agents under their command. 	171	1,029	600

IV. Program Justification Changes

**Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Fuel Sharing Initiative
PPA: Administration
Program Increase: Positions 0, FTE 0, Dollars \$10,733

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	10,733
Total Request	-	-	-	-	-	-	-	-	10,733

Description of Item

The Department's Chief Readiness Support Office (CRSO) is leading a cross-Component Fuel Sharing Initiative to reduce costs and increase efficiency. The purpose of the Initiative is to enable any DHS Component vehicle to obtain fuel from any CBP-controlled fueling facility along or near the Southwest Border of the U.S. The immediate goal is to reduce reliance on commercial fueling stations, resulting in overall reduced fuel costs.

Justification

There are 48,562 vehicles owned by DHS and controlled by various DHS Components, and the fuel for operating those vehicles is obtained from either a Component-specific fueling station or a commercial gas station. It is far more expensive to obtain fuel from a commercial facility and many DHS fleet vehicles are not equipped nor authorized to access DHS-owned fueling facilities. Of those vehicles that do have access to these facilities, most are limited to a single Component-controlled facility. This forces vehicle operators to obtain fuel from a commercial source when the vehicle is not proximate to its assigned fueling station.

This one-time investment of \$10.7 million will be used for Installation and maintenance of the Radio Frequency Identification (RFID) technology, fleet card readers, gas pumps, tank gauges, and connectivity upgrades. The 141 fueling stations owned by DHS are operated by individual Components (130 are controlled by CBP alone), but vehicles may only be fueled at their Component-specific fueling facility (and each vehicle is assigned to just a single

station). Transactional and policy barriers contribute to the inefficiency created by these fueling station limitations. These shortcomings force operators to buy more costly commercial fuel or take time away from supporting missions by traveling further distances. Despite these fuel-sharing challenges, DHS operating Components must be able to obtain fuel at the least expensive price without negatively impacting operational capabilities. Building on the successes already realized with the Fuel Sharing Pilot between CBP and ICE in the El Paso Sector, it has been determined that 106 CBP fueling stations be upgraded with the needed infrastructure to enable access and consumption for 36 percent of the DHS vehicle fleet in the Southwest Border.

Impact on Performance (Relationship of Increase to Strategic Goals)

The fuel sharing initiative will allow Components to obtain fuel at the least expensive price and will result in more than \$14 million in savings annually, beginning in FY 2015. Further, the investment will be recouped within the first two years of full operation.

.

Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: NII Equipment Refresh & Recapitalization
PPA: Inspection and Detection Technology
Program Increase: Positions 0, FTE 0, Dollars \$11,700

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							38	38	112,166
Program Increase							-	-	11,700
Total Request	38	38	115,407	86	86	112,004	38	38	123,866

Description of Item

The requested \$11.7 million increase will support the acquisition of new equipment and maintenance of the current inventory of NII imaging systems, which are aging. Although analysis has shown that most of the imaging equipment will be functional past the expected 10-year lifecycle predicted by the vendors, 101 imaging systems will exceed this 10-year expected lifecycle by the end of FY 2014. Of these 101 imaging systems, only seven large scale systems will be retired. By using new risk-based criteria, decommissioning seven systems will produce operation impacts that are manageable. This will leave 94 systems that will exceed the 10-year expected lifecycle.

Project Schedule:

Milestone	Projected Completion Date
Six Large-scale NII Recapitalization	September 2016
Ten Small-scale NII Recapitalization	September 2016

Primary Contractor(s):

To be determined

Project Location(s):

To be determined based on exact equipment replacement selected. Equipment is replaced based on locations with the most critical need.

Justification

The average operating life cycle of NII systems was estimated at 10 years when fielded. CBP's goal is to maintain NII systems at an operational availability of 95 percent, which will be an increasing challenge as the inspection equipment continues to age. In FY 2013, CBP exceeded this goal with an average large-scale (LS) NII system availability of 96.8 percent. To maintain a reliable and effective inventory of NII systems and Radiation Detection Equipment (RDE,) CBP tries to replace aging equipment when it reaches the end of its operating life, and before having to make significant investments in refurbishing such equipment (e.g., repair or refurbishment cost exceeding the standard of 65 percent of replacement value). CBP monitors the maintenance activity of each system and has compiled a list of systems that need to be replaced.

CBP is requesting an increase of \$11.7 million to begin replacing or refurbishing the fleet of over 308 large scale imaging systems, 462 small scale imaging systems, 1,387 Radiation Portal Monitors, 2,810 Radiological Isotope Identification Devices, and 29,387 Personal Radiation Detectors. In addition to improving CBP's ability to detect illegal goods and materials, such as potential nuclear and radiological threats, NII equipment reduces the time it takes to conduct inspections, thereby facilitating legitimate trade and travel. Annually, the capabilities brought by this fleet result in 5.79 million inspectional hours saved, which is the equivalent of adding over 5,400 more CBPOs at a cost of \$957.0 million. The requested funds will be used to refresh or refurbish six large scale and ten small scale systems and tool trucks.

By the end of FY 2014, 94 large-scale and 215 small-scale NII systems will exceed the 10-year threshold and need to be replaced to maintain current security level and coverage.

Impact on Performance (Relationship of Increase to Strategic Goals)

CBP will use a comprehensive acquisition strategy that optimizes its resources (e.g., full and open competition and bundled long-term maintenance options with the equipment purchase) and supports the ongoing effort to increase operational efficiencies through port leadership collaboration, innovation, technology capabilities, and expedited cargo processes to facilitate trade and travel. Our acquisition strategy is based on obsolescence analysis, maintenance analysis, and port-by-port profile reviews. These port reviews included analysis of volume, densities of commodities, staffing, etc., to help us deploy the best combination of systems (within the constraints of the footprint) at the port. The Non-Intrusive Inspection Division transitioned to a threat-based NII systems utilization standard in FY 2013, resulting in a 15 percent increase in NII-related contraband seizures.

Without replacing and only refurbishing these systems, CBP increases the risk that the technology and requisite subcomponents already deployed may become obsolete. Thus, CBP will incur increased O&M costs, and potential downtime may affect the effectiveness of examinations at POEs. Additional possible impacts include: decreased NII imaging capabilities at POEs, increased labor costs for overtime if CBPOs conduct manual examinations instead of examinations with NII equipment, and a potential rise of illicit cargo and goods entering the U.S.

DHS QHSR:

Mission 2: Securing and Managing Our Borders

Goal 2.1: Effectively Control U.S. Air, Land, and Sea Borders

Objective: Prevent Illegal Entry

Goal 2.2: Safeguard Lawful Trade and Travel

(Dollars in Thousands)

Program Increase 3: Develop National Border Geo-Intelligence Strategy
PPA: Border Security Control
Intelligence/Investigative Liaison
Program Increase: Positions 8, FTE 6, Dollars \$11,000

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							8	6	11,000
Total Request	-	-	-	-	-	-	8	6	11,000

Description of Item

The enhancement of \$11 million (8 positions) will allow CBP to fund the development of a National Border Geo-Intelligence strategy, which consists of two major components. First, \$5 million will fund the development of a change detection capability for the National Border Geo-Intelligence Strategy. This portion of the enhancement includes partial development of a southwest border-focused change detection capability, validation of current low-risk designated areas that are prioritized based on sector requirement inputs, execution of the collection strategy, creation of appropriate intelligence reporting, and structuring these processes into a constant and sustainable method of supporting mission requirements. Second, \$6.0 million of this enhancement will allow CBP to establish a geospatial tracking system for use across the southwest border that will allow CBP to record the location of all apprehensions, gotaways, and turnbacks. This enhancement fulfills a national level situational awareness reporting requirement and supports the Border Patrol's risk-based strategy of allocating assets to high-risk areas.

Justification

Change Detection Capability: CBP requires a sustainable capability that includes an in-house staffing model to build internal analytic resources. Formalized cooperation with our partners is also necessary to provide persistent surveillance, systematic analysis, and increased situational awareness along all our borders, and eventually in the littorals.

The change detection component of this enhancement will provide an enduring assessment of the U.S. border, by establishing a routine and regular assessment of changes along the border. This initiative includes formalized cooperation with our partners to provide surveillance, systematic analysis, and increased situational awareness along all the borders, and eventually in the

littorals. Working with the Office of Intelligence and Investigative Liaison (OIIL), these funds will enhance Border Patrol's ability to identify traffic patterns, improve data collection on key performance measures, and inform daily decisions on deployments of personnel and equipment by leveraging the change detection capabilities. Operationally, this capability will enable CBP to focus the organization's efforts against prioritized threats. It is a step toward achieving robust, integrated, steady-state deployment density and geospatial intelligence operations along the U.S. border.

This capability will require a multi-phase implementation approach to establish a 24 hour/7 day per week capability through August 2020 that will incorporate an in-house staffing model for an internal capability, as well as support from our external partners. Change detection provides enhanced situational awareness so emerging threats can be identified and operationalized as they occur, ensuring continued risk adaptation. This increase in situational awareness provides quantifiable data and additional confidence in the activity level of the border. Success is based on CBP's ability to validate what are believed to be low-risk areas, properly allocate assets to high-risk areas through density deployment, and monitor any shift from low to high-risk.

Geospatial Tracking System: The Geospatial Tracking System will consist of the ICAD 4 Tracking and Signcutting module and Enterprise Geospatial Information Systems applications. As an agency, we are challenged to more accurately track gotaway and turnback traffic along the border. The ICAD 4 Tracking and Signcutting Module is a capability shared between the Intelligent Computer Assisted Detection (ICAD or I4) and Enterprise Geospatial Information Services (eGIS) applications to more comprehensively understand these critical activity trends. The primary system of record within USBP is ICAD, which uses eGIS as its geographic display mechanism. The Tracking and Signcutting Module will allow operators, agents and commanders to maintain an active record of signcutting and tracking operations, and their related activities in real time.

The module will allow the monitoring of drag road status and sign detections, agent and suspect group status, track disposition and results. As suspect activity is detected and reported via tactical radio communications (or other standard means), the activity is updated in ICAD along with the existing update to agent status. Activity details are then displayed and/or updated in eGIS allowing commanders to view the tactical activity alongside other pertinent CBP specific data such as previous enforcement activity, current sensor activity, tactical infrastructure, timely imagery and real-time weather and blue force data (where available). Targeted map products, analyses and customized toolsets will also be available using a secure, collaborative information-sharing capability. This module is intended to meet current national situational awareness and reporting requirements and to adapt field requirements demonstrated in various sector applications current operating independently.

The successful implementation of these CBP operational enhancements requires extensive coordination between OIIL and USBP, as well as our external partners. Working together within this enterprise, we can continuously develop and employ the best possible threat and risk management intelligence information to the field.

Impact on Performance (Relationship of Increase to Strategic Goals)

A key driver behind this process is a standing requirement by Border Patrol field commanders for near real-time, integrated information along the border that allows for situational awareness, and a continual reassessment capacity to determine low and critical threat areas. This requirement is outlined in the 2012-2016 Border Patrol Strategic Plan. It is considered a critical measure that allows the Border Patrol to focus capabilities on prioritized threats. The collaboration between USBP and OIIL in the development and execution of this Vulnerability Assessment, using the CBP Intelligence Cycle for this specific standing requirement, brings timely, focused, and dynamic information to each Sector. This enhancement supports the following strategic goals:

DHS QHSR:

Mission 2: Securing and Managing Our Border

Goal 2.1: Secure U.S. Air, Land, and Sea Borders and Approaches

Objective 2.2.1: Prevent Illegal Entry

Mission 2: Securing and Managing Our Border

Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations

Program Increase 4:

CBP Mobile Program

PPA:

Inspections Trade and Travel Facilitation

Program Increase:

Positions 0, FTE 0, Dollars \$8,300

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	10,800
Program Increase							-	-	8,300
Total Request	-	-	-	-	-	10,800	-	-	19,100

Description of Item

The increase in funding will allow CBP to continue to enhance enforcement efforts, transform CBP business practices, and provide improvements and efficiencies to CBP operations at air, land, sea, and in between the borders. Areas of focus include continuing to develop mobile applications, which ensure integrity on the front lines; facilitate trade; and achieving efficiencies in the maritime environment. Specifically, the funding will enable:

- Realization of improvements in cargo inspection process, and reductions in cargo-cycle and trade wait times;
- Expansion of mobile biometric capture capability in the maritime environment;
- Planning for automated mobile processing of vessel and general aviation crew and passengers; and
- Elimination of existing obsolete mobile platforms and evaluation of future mobile device platforms.

Project Schedule:

Milestone	Projected Completion Date
Integrity Focus - Enforcement Link Mobile Operations – Red Flag (ELMOrf) development	<ul style="list-style-type: none"> • ELMOrf Airport Pilot Application Development (Planning, Requirements Gathering, and Analysis) – 2nd Quarter FY 2015; • ELMOrf Border Patrol Pilot Application Development (Planning, Requirements Gathering, and Analysis) – 3rd Quarter FY

	2015; • ELMOrf Air Pilot Application Development (Pilot Review, User Acceptance Testing) 4th Quarter FY 2015; and • ELMOrf Border Patrol Pilot Application Development (Pilot Site selection and execution planning) 4th Quarter FY 2015.
Maritime Efficiencies - Enforcement Link Mobile Operations Passenger (ELMOp) development for Smart Phone	• ELMOp Smart Phone Application Development (Planning, Requirements Gathering, and Analysis) 3rd Quarter FY 2015; and • ELMOp Smart Phone Application Development (Prototype Review, User Acceptance Testing) 4th Quarter FY 2015.
Trade Facilitation - Enforcement Link Mobile Operations Cargo (ELMOc) development for Tablet	• ELMOc Application Testing on Tablet – 2nd Quarter FY 2015; • ELMOc on Tablet Device Expanded Pilot Testing – 3rd Quarter FY 2015; and • ELMOc User Acceptance Testing Completion – 4th Quarter FY 2015.

Primary Contractor(s):

TBD – pending contract award

Project Location(s):

Various locations

- ELMOrf Air Pilot – John F. Kennedy International Airport, NY. Following successful pilot, expansion to:
 - Hartsfield-Jackson Atlanta International Airport (ATL);
 - Logan International Airport (BOS);
 - Chicago O’Hare International Airport (ORD);
 - Dallas Fort Worth International Airport (DFW);
 - Fort Lauderdale-Hollywood International Airport (FLL);
 - George Bush Intercontinental Airport (IAH);
 - Los Angeles International Airport (LAX);
 - Miami International Airport (MIA);
 - Newark Liberty International Airport (EWR);
 - Detroit Metropolitan Airport (DTW);
 - San Francisco International Airport (SFO);
 - Dulles International Airport (IAD);
 - Orlando International Airport (MCO);
 - Seattle-Tacoma International Airport (Sea-Tac); and
 - San Juan Luis Munoz Marin International Airport (SJU).
- ELMOrf Border Patrol Pilot (– southwest Border Sector);
- ELMOp Smart Phone Application Pilot (TBD pending contract award) Maritime pilot sites under initial evaluation are within the following Field Offices:

- Atlanta;
- Boston;
- Chicago;
- Detroit;
- Houston; and
- Los Angeles.
- ELMOc Tablet Device Pilot (TBD pending contract award). Pilot sites under initial evaluation are in the following Field Offices:
 - New Orleans;
 - New York;
 - San Francisco; and
 - Tampa.

Justification

CBP has a clear requirement to be able to perform inspections of travelers and cargo on reliable, up-to-date mobile device platforms, and to ensure the integrity and security of the CBPOs that perform them.

Enforcement Link Mobile Operations – Red Flag (ELMOrf) devices were developed for Land Border Integration (LBI) as an enhancement to the Targeting Framework (TF), and was deployed to address the specific problem of thwarting the efforts of persons and organizations that are attempting to influence CBPOs to allow illicit goods and subjects into the country. Expansion of this capability to the airport and Border Patrol environment in 2015 would further enhance security and integrity. Enhanced Enforcement Link Mobile Operations Cargo (ELMOc) devices enable officers to enter inspection results in real time and remove “holds” for arriving cargo in the Automated Targeting System (ATS) at the point of inspection. This eliminates return trips to the office and reentry into ATS. At seaports, ELMOc helps automate the paper-based vetting process of passengers and crew on board. For large ships, the savings can be several hours for multiple officers. The onboard processing saves approximately 15 minutes per arrival. Enforcement Link Mobile Operations Passenger (ELMOp) devices enable law enforcement queries in real time (outbound and inbound travelers) and variable location processing.

Impact on Performance (Relationship of Increase to Strategic Goals)

The efficiency of these systems is directly related to their availability and accuracy. This increase supports the continued improvement/expansion of this mission critical capability and greatly enhances CBP’s ability to effectively execute its overall mission of securing our nation’s borders. CBP has estimated that operational improvements will be experienced in all service areas. Specifically, the use of mobile technology in the cargo environment provides the capability to automatically release holds at the point of inspection. This capability eliminates return trips and reentering data in systems, which conservatively results in a 5 minute reduction in inspection time. Further, the trucking and shipping industries should save on operating costs as goods are moved to market faster.

This funding allows CBP to effectively:

- *Increase Situational Awareness* – Advances the benefit of real-time information in field environments to increase officer/agents' safety and ability to interdict criminals;
- *Increase Passenger Efficiencies* – Expands the capability to streamline passenger processing in all mission areas without compromising security; and
- *Enhance Trade* – Reduces trade wait times by releasing travelers and cargo immediately upon completion of an inspection/examination, which results in more efficiency which translates to a cost savings to the trade industry and the public.

Program Increase							-	-	11,800
Total Request	-	-	-	7	7	16,732	7	7	28,532

Description of Item

This requested increase of \$11.8 million in the Inspections, Trade, and Travel Facilitation PPA, is part of the \$13 million total enhancement request for ADIS, and will fund improved capability and provide enhancements to the Arrival and Departure Information System (ADIS). These enhancements allow CBP to meet customer requirements and improve system functionality. Improvements include development of a non-production repository for reporting and analysis; enhanced matching algorithms that improve data quality and assist in national security targeting; and Integration of ADIS to the CBP Enterprise Service Bus to provide better interoperability with external customer systems. These enhancements provide for more timely data sharing with the Intelligence Community for national security. The remaining \$1.2 million is requested in the Information Technology PPA within the Automation Modernization appropriation, and is for staffing.

Project Schedule:

Milestone	Projected Completion Date
All activities to be on contract	Q4 FY 2015
All capabilities delivered	Q3 FY 2016

Primary Contractor(s):
TBD pending award; recent similar work was performed by –
CSC and Lawrence Livermore National Labs (LLNL)

Project Location(s):
TBD

Key Events:

N/A

Justification

ADIS is the DHS system that identifies those who have violated immigration laws by overstaying their lawful period of admission to the United States. Matching arrival and departure records is crucial to the integrity of the U.S. immigration system as it allows DHS to know which foreign nationals are in the U.S. at any particular time, and which ones are violating certain terms of immigration law. The health and abilities of the ADIS system are therefore critical to the DHS strategic goal of fairly implementing U.S. immigration laws.

The requested program change will enable CBP to provide matching entry and exit records' data more efficiently and frequently. New capabilities to be gained by this enhancement will address GAO's findings (most recently in 2013) on DHS' inability to match entry and exit records.²⁰

ADIS data has been deemed a National Security priority by the Intelligence Community as it relates to Entry/Exit data. ADIS receives numerous requests for data related to extraction and reporting metrics. All reporting completed today requires the main production system to provide this data. This increases time frames and requires immense coordination with O&M contractors to fulfill business objectives unrelated to maintaining the existing IT architecture. This enhancement will provide increased capability to provide more secure and real-time information to the DHS stakeholder community, and will facilitate these exchanges without impacting the main production system. This increase will enhance the Department's capability to collect, gather, and access relevant information to identify people and their immigration history to support other federal law enforcement and intelligence community priorities.

Impact on Performance (Relationship of Increase to Strategic Goals):

This enhancement improves CBP's ability to safeguard lawful trade and travel; manage the risk of people and goods in transit; prevent unlawful immigration; and arrest, detail, prosecute, and remove unlawful entrants. CBP will be able to provide more efficient exchanges of data among other DHS and federal partners directly connected to the ADIS system, such as the Department of State, ICE, and USCIS. This additional capability will strengthen DHS/CBP tools to carry out the mission of enforcing immigrations laws and managing risks in a more effective fashion by greatly reducing the likelihood of a false positive overstay information being generated, resulting in improved usage of resources.

DHS QHSR:

Mission 2: Securing and Managing Our Border

²⁰ DHS is statutorily required to provide overstay rates by country on an annual basis; however, DHS has been unable to do so since 1992, due to a lack of confidence in the data and DHS's inability to match entry and exit records.

Goal 2.2: Safeguard Lawful Trade and Travel

Objective: Manage the risk posed by people and goods in transit

Mission 3: Enforcing and Administering Our Immigration Laws

Goal 3.2: Prevent Unlawful Immigration

Objective: Prevent entry or admission

(Dollars in Thousands)

Program Increase 6: Replace Legacy MVSS in Rio Grande Valley
PPA: Technology, Innovation and Acquisition
Program Increase: Positions 3, FTE 2, Dollars \$275

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							3	2	275
Total Request	-	-	-	-	-	-	3	2	275

Description of Item

The requested increase of \$275,000 will allow CBP to hire 3 positions in support of the \$43.275 million requested enhancement to replace legacy Mobile Video Surveillance Systems (MVSS) in the Rio Grande Valley sector, which included in the BSFIT appropriation. The support of the MVSS program is critical as the systems improve USBP operations in the field by providing situational awareness on the southwest border.

Justification

This enhancement will allow the MVSS program to meet the Office of Border Patrol's MVSS requirements for the Rio Grande Valley (RGV) Sector. Prior to this enhancement, the MVSS program was only funded to support four MVSS units in the RGV sector. The additional funding will allow 39 MVSS systems to replace the legacy systems within the RGV Sector. The MVSS currently used on the southwest border require a technical refresh approximately every five years.

The MVSS enables USBP to efficiently monitor selected Areas of Coverage (AoC) within an Area of Interest (AoI) and is the preferred solution in certain urban, rural, and remote areas that are difficult to access and monitor with other systems. The South Texas Corridor effectively operates legacy MVSS; however, these systems are at the end of their lifecycle.

These MVSS will be deployed to provide surveillance when intelligence indicators signal that Items of Interest (IoI) are in or are approaching an area. In addition, the MVSS will augment fixed surveillance systems that have line-of-sight coverage gaps caused by existing infrastructure, terrain, or vegetation. While day use can occur, most MVSS operations will occur

at night. Each system will require one agent for operation of the system and one or more agent(s) to respond to any detected traffic.

Based on an assessment completed in August 2012 by the USBP and OIT, the MVSS is the only mobile surveillance system that can be deployed in the South Texas Corridor. This assessment focused on evaluating the effectiveness of the Mobile Surveillance System (MSS) technology in RGV, Laredo (LRT), and Del Rio (DRT) sectors, including each sector's site elevation, permissible line-of-sight, and radar-detection and thermal/day camera capabilities. The assessment determined that MSS units had limited operational application with the South Texas Corridor because of the lack of elevation, hindered fields of view, and blocked radar return signals. Though the video capabilities of these platforms proved effective within these areas, the radar capability rendered little usefulness.

Impact on Performance (Relationship of Increase/Decrease to Strategic Goals)

The MVSS systems will provide USBP with increased situational awareness and the ability to detect, identify, and track Items of Interest (IOIs) along the southwest border. These improved capabilities directly support the following DHS strategic goals and objectives:

DHS QHSR:

Mission 2: Securing and Managing Our Border

Goal 2.1: Effectively Control U.S. Air, Land and Sea Borders: Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce.

Objective 2.1.1: Prevent Illegal Entry: Prevent the illegal entry of people, weapons, dangerous goods, and contraband, and protect against cross-border threats to health, food, environment, and agriculture, while facilitating the safe flow of lawful travel and commerce.

Objective 2.1.2: Prevent Illegal Export and Exit: Prevent the illegal export of weapons, proceeds of crime, and other dangerous goods, and the exit of malicious actors.

Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Increase 7: Replace Legacy RVSS in Rio Grande Valley
PPA: Technology, Innovation and Acquisition
Program Increase: Positions 4, FTE 2, Dollars \$275

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							7	7	1,652
Program Increase							4	2	275
Total Request	7	7	1,004	7	7	992	11	9	1,927

Description of Item

The requested increase of \$275,000 will allow CBP to hire 4 positions in support of the \$45.275 million requested enhancement to replace legacy Remote Video Surveillance Systems (RVSS) in the Rio Grande Valley sector, which is included in the Border Security, Fencing, Infrastructure, and Technology (BSFIT) appropriation. The support of the RVSS program is critical because the systems improve USBP operations in the field by providing situational awareness on the southwest border.

Justification

The enhancement of \$45.275 million will allow the RVSS Upgrade program to deploy the RVSS capability to eight Areas of Responsibility (AORs) within the Rio Grande Valley (RGV) sector within two to four years from contract award. This enhancement will allow the RVSS Upgrade Program to meet USBP's requirements to support RVSS Upgrade planning and deployment efforts in the RGV Sector. Funding for the RVSS Upgrade program will allow for the replacement of the current analog, aging system with a more secure, better performing, digital video surveillance system that will improve operations in the RGV Sector.

Prior to RVSS deployment, up-front planning will need to be completed. This planning includes completing engineering lay-downs, camera view shed analysis, site visits, environmental assessments, and real estate acquisitions. U.S. Border Patrol Station Command and Control (C2) room modifications and station communication tower construction will also be required before the RVSS Upgrade sensor tower construction and technology deployment options can be executed.

Impact on Performance (Relationship of Increase/Decrease to Strategic Goals)

The RVSS systems will provide USBP with increased situational awareness and the ability to detect, identify, and track IOIs along the southwest border. These improved capabilities directly support the following DHS strategic goals and objectives:

DHS QHSR:

Mission 2: Securing and Managing Our Border

Goal 2.1: Effectively Control U.S. Air, Land and Sea Borders: Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce.

Objective 2.1.1: Prevent Illegal Entry: Prevent the illegal entry of people, weapons, dangerous goods, and contraband, and protect against cross-border threats to health, food, environment, and agriculture, while facilitating the safe flow of lawful travel and commerce.

Objective 2.1.2: Prevent Illegal Export and Exit: Prevent the illegal export of weapons, proceeds of crime, and other dangerous goods, and the exit of malicious actors.

Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 1: Eliminate Upgrades to C-TPAT Web Portal
PPA: C-TPAT
Program Decrease: Positions 0, FTE 0, Dollars \$(1,500)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							127	123	42,341
Program Decrease							-	-	(1,500)
Total Request	127	123	38,622	127	123	40,912	127	123	40,841

Description of Item:

The reduction of \$1.5 million from C-TPAT will result from the delayed implementation of the C-TPAT 2.0 web portal migration efforts. The Operations and Maintenance for this portal is estimated at \$1.6 million in FY 2014. The reduction of \$1.5 million will nearly eliminate the funding for this upgrade.

Justification:

CBP proposes to delay the implementation of the C-TPAT 2.0 web portal in order to achieve a savings of \$1.5 million. This and other program reductions are being implemented in order to ensure CBP's law enforcement staffing costs are fully funded. A fundamental underlying assumption is that CBP will adhere to a variety of staffing floors (i.e., minimum staffing levels) in FY 2015. These staffing floors cover over 80 percent of the workforce and approximately 85 percent of the agency payroll. These costs are increasing for the following reasons: the continued maturation of the newly hired workforce, including their promotions to full-performance journeyman; the increase of the journeyman grade for agents and officers; the low attrition rates; and increased cost of workforce benefits, such as retirement and healthcare. Thus, to accommodate increasing payroll demands for a workforce that is largely dictated by statutory requirements, CBP has made reductions across the agency while working to minimize operational impacts.

Impact on Performance (Relationship of Decrease to Strategic Goals):

The reduction in funding for the C-TPAT Portal system will limit or delay the program's ability to continue with planned initiatives. The current plan for the C-TPAT 2.0 web portal is that it should be operational in four phases. Phase I is to be launched in late Spring 2014. All

functionality for Phases 2-4, which includes programming that would allow for the automated implementation and management of the trusted trader program, harmonization with Canada, ongoing projects between CBP and other Government agencies, and future work with the U.S. exporting community, would likely be delayed up to 4 years.

The portal is the centralized data collection site for C-TPAT partners and the sole format for accepting and processing C-TPAT applications. It is also the data collection mechanism for validation results of C-TPAT Partners and the feedback mechanism for partners to respond to any actions resulting from the validation.

CBP will work to limit the operational impact of the reduction by working with partners –foreign and domestic, public and private on data collection and processing. Web portal development will continue, albeit at a slower pace than anticipated. CBP must continue manual processing of applications, which could cause relatively minor delays in processing, in some cases.

DHS QHSR:

Goal 2.2: Safeguard Lawful Trade and Travel: Ensure security and resilience of global movement systems

Objective 2.2.1: Secure key nodes: Promote the security and resilience of key nodes of transaction and exchange within the global supply chain.

Objective 2.2.2: Secure conveyances: Promote the security and resilience of conveyances in the key global trading and transportation networks.

Objective 2.2.3: Manage the risk of people and goods in transit: People seeking to come to the United States, as well as goods in transit, must be positively identified and determined not to pose a threat to this country or the larger global movement system as far in advance as possible.

Justification of Program Changes
(Dollars in Thousands)

Program Decrease 2: Reduce Personnel Associated with Import Safety Activities
PPA: Inspections Trade and Travel Facilitation
Program Decrease: Positions (52), FTE (52), Dollars \$(5,952)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							1,002	986	150,043
Program Decrease							(52)	(52)	(5,952)
Total Request	998	1,004	132,455	1,002	986	150,045	950	934	144,091

Description of Item:

The program change eliminates approximately \$6.0 million dollars in recurring funding for the FY 2010 Import Safety initiative. The reduction of this recurring funding would not allow CBP to hire an additional 52 personnel to support the 2010 Import Safety Mandate. The re-scoping of CBP's Import Safety funding will reduce the support to the Commercial Targeting and Analysis Center (CTAC). An offset to the Import Safety Initiative will prevent the hiring of the six primary series that support the CTAC: International Trade Specialists (analysts), Customs and Border Protection Officers (perform exams at port level), Import Specialists (merchandise classification), Paralegals (process enforcement cases), and Fines, Penalties, and Forfeitures Officers (process enforcement actions). CBP will absorb these cuts as part of ongoing Trade Transformation initiatives.

Justification:

The re-scoping of CBP's Import Safety funding will reduce the number of OT initiatives that would increase the efficiency and effectiveness of CBP's Import Safety mission. Specifically, the reduction of this recurring funding would not allow OT to hire an additional 52 personnel to support the ongoing One U.S. Government at the Border initiative. Specific efforts that would be affected include enhancing interagency information sharing, establishing effective partnerships, and enhancing trade processing through automation (single window). The single window enables international traders to submit standardized information and documents at a single entry point.

Impact on Performance (Relationship of Decrease to Strategic Goals):

Reducing CBP's import safety funding may diminish its ability to properly support the partner agencies. Currently, there are five full-time CBP International Trade Specialist (ITS), and CBP Supervisory ITS supporting the targeting and analytical needs of the partner agencies at the CTAC. CBP's inability to increase staff to match that of its partner agencies has negatively affected its ability to support the import safety mission. As a result, each partner agency could experience fewer operations and in turn fewer enforcement successes.

CBP plans to manage these cuts as part of ongoing Trade Transformation initiatives. One such initiative is the enhanced relationship between the Office of Field Operations National Targeting Center and the continued growth of the Centers of Excellence and Expertise (CEE).

DHS QHSR:

Goal 2.1: Effectively Control U.S. Air, Land, and Sea Borders: Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce.

Objective 2.1.1: Prevent illegal entry: Prevent the illegal entry of people, weapons, dangerous goods, and contraband, and protect against cross-border threats to health, food, environment, and agriculture, while facilitating the safe flow of lawful travel and commerce.

Current Services Level							7	7	16,732
Program Decrease							-	-	(1,710)
Total Request	-	-	-	7	7	16,732	7	7	15,022

Description of Item:

In FY 2015, the Department proposes the following reductions to ADIS: (1) a \$1.167 million reduction to ADIS critical system change requests; and (2) a \$0.543 million reduction to Independent Verification and Validation (IV&V) support.

CBP uses critical system change requests and IV&V on ADIS to: 1) perform adaptive maintenance on the system; 2) validate that software delivered to CBP satisfies functional, technical, operational, and interface requirements; 3) verify the security posture of the system through proper implementation of security controls; and 4) confirm deployment readiness ensuring that the releases will not negatively impact system performance once deployed to the operational environment causing degradation of services to ADIS customers.

Justification:

CBP will reduce critical system change requests and IV&V support for ADIS in FY 2015. System change requests will be limited to mission critical and break fixes. IV&V support will be reduced to commensurate with the critical system change reduction.

Impact on Performance (Relationship of Decrease to Strategic Goals):

A reduction in ADIS funding by \$1.7 million may eliminate the adaptive and perfective maintenance and place ADIS in a fully operations and maintenance status. The loss of these capabilities may delay systems changes, such as those associated with improved matching rules and optimized use of new data sets, such as Mexican APIS.

CBP will mitigate the risk associated with this reduction by reducing the number of times system changes are performed, and the number of times break fixes will be pooled and performed. Perfective changes to accommodate new user/customer requirements will be reviewed on a case by case basis, possibly being delayed until adequate funding becomes available; however, CBP will implement the reduction in a strategic manner taking into account the risk factors, customer requirements and maintaining minimum targeted threshold requirements.

DHS QHSR:

Goal 2.2: Safeguard Lawful Trade and Travel; Manage the risk of people and goods in transit; Prevent entry or admission.

Goal 3.2: Prevent Unlawful Immigration; Arrest, detail, prosecute and remove.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of laws relating to border security, immigration, customs, agricultural inspections and regulatory activities related to plant and animal imports, and transportation of unaccompanied minor aliens; purchase and lease of up to 7,500 (6,500 for replacement only) police-type vehicles; and contracting with individuals for personal services abroad; [\$8,145,568,000] **\$8,326,386,000**¹; of which \$3,274,000 shall be derived from the Harbor Maintenance Trust Fund for administrative expenses related to the collection of the Harbor Maintenance Fee pursuant to section 9505(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 9505(c)(3)) and notwithstanding section 1511(e)(1) of the Homeland Security Act of 2002 (6 U.S.C. 551(e)(1)); [of which \$165,715,000 shall be available until September 30, 2015, solely for the purpose of hiring, training, and equipping new U.S. Customs and Border Protection officers at Ports of Entry]²; of which not to exceed \$34,425 shall be for official reception and representation expenses; of which such sums as become available in the Customs User Fee Account, except sums subject to section 13031(f)(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(f)(3)), shall be derived from that account; of which not to exceed \$150,000 shall be available for payment for rental space in connection with preclearance operations; of which not to exceed \$1,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security: Provided, That for fiscal year [2014] **2015**³, the overtime limitation prescribed in section 5(c)(1) of the Act of February 13, 1911 (19 U.S.C. 267(c)(1)) shall be \$35,000; and notwithstanding any other provision of law, none of the funds appropriated by this Act may be available to compensate any employee of U.S. Customs and Border Protection for overtime, from whatever source, in an amount that exceeds such limitation, except in individual cases determined by the Secretary of Homeland Security, or the designee of the Secretary, to be necessary for national security purposes, to prevent excessive costs, or in cases of immigration emergencies: *Provided further*, that the Border Patrol shall maintain an active duty presence of not less than 21,370 full-time equivalent agents protecting the borders of the United States in the fiscal year.

Language Provision	Explanation
¹ [\$8,145,568,000] <u>\$8,326,386,000</u>	Dollar change only. No substantial change proposed.
² [of which \$165,715,000 shall be available until September 30, 2015, solely for the purpose of hiring, training, and equipping new U.S. Customs and Border Protection officers at Ports of Entry]	Removal of language related to hiring of CBPOs in Fiscal Years 2014 and 2015. Does not need to be repeated in 2015.
³ [2014] <u>2015</u>	Fiscal year change only. No substantial change proposed.

Rent Mission Statement

CBP leases a substantial portion of its real property assets through GSA and also by direct lease delegation to non-federal sources. This PPA includes funds to support the rental of facilities, space, buildings, structures, and land along with rent-related building charges and services, including utilities and services provided by the Federal Protective Service (FPS). The Rent PPA supports the Office of Border Patrol, Office of Field Operations, Office of Air and Marine, and the Mission Support activities.

Inspections Trade and Travel Facilitation Mission Statement

The purpose of Inspections, Trade and Travel Facilitation at Ports of Entry (POEs) is to facilitate the flow of legitimate travel and trade across U.S. borders, while ensuring that threats to the United States are not allowed entry, using technology, intelligence and risk information, targeting, and international cooperation in the screening of entering international cargo and travelers and departing export cargo. This program reduces the potential of terrorists, instruments of terror, and contraband from entering our country, while facilitating the legal flow of people and trade by deploying CBPOs, agricultural specialists, and import specialists to the ports of entry. The goal of this program is to improve compliance with trade regulations and other mandatory import/export guidance while increasing the security of the United States.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	1,460,777	1,576,983	1,602,632	25,649
11.3 Other than Full-Time Permanent	5,935	5,550	5,783	233

International Cargo Screening Mission Statement

International Cargo Screening (ICS), which includes CBP's Container Security Initiative (CSI) and Secure Freight Initiative (SFI), enhance the security of maritime containerized shipping from exploitation by terrorists. ICS's goal is three-fold: (1) to expand operations to new critical international seaports; (2) to secure and improve operations at existing ports; and (3) to encourage global efforts to enhance maritime container security through capacity building. Working with foreign administrations, CSI is designed to achieve a more secure maritime trade environment while ensuring the need for efficiency in global commerce. The three core elements of the program are: (1) establishing security criteria and identify high-risk containers; (2) scanning those containers identified as high-risk prior to arrival at U.S. ports; (3) using technology to quickly scan high-risk containers.

Other International Programs Mission Statement

The goal of Other International Programs is to extend the U.S. zone of security beyond U.S. Borders by promoting international border security and global standards. In this arena, CBP implements programs and initiatives that support the U.S. Government's objectives in anti-terrorism, border security, non-proliferation, export controls, immigration and capacity building. This program's efforts foster and facilitate legitimate international trade, increase compliance, build alliances to combat trans-national crime, reduce corruption, strengthen border controls, promote the rule of law and enhance economic stability throughout the world. This is accomplished through the development and maintenance of collaborative relations with foreign governments, the development of international strategies, and representation of CBP positions in various international forums, international technical assistance and training, and the negotiation of international agreements.

C-TPAT Mission Statement

The Customs-Trade Partnership Against Terrorism (C-TPAT) is a partnership between the Federal government and private industry. It is an effort that CBP has undertaken with the business community to secure the supply chain. The goal of C-TPAT is to develop and maintain a secure supply chain, from factory floor to port of entry, which enables CBP to facilitate trade and ensure safe and secure borders. C-TPAT is designed to use and enhance the security processes and procedures currently employed by the trade community and ensure that international shipments are not compromised or diverted by terrorists or their accomplices.

Trusted Traveler Programs (TTP) Mission Statement

CBP's trusted traveler programs enhance the agency's ability to expedite the process and facilitate known, low risk trusted travelers arriving into the United States by allowing CBPOs additional time to focus on higher risk, unknown travelers; develop and implement national policies related to trusted traveler programs; provide guidance to the field locations on the operation of trusted traveler programs; strategize the growth of current programs and the development and implementation of new programs; and respond to congressional and industry inquiries of trusted traveler program related matters.

Inspection and Detection Technology Mission Statement

The CBP reliance on Non-Intrusive Inspection (NII) technology to secure the borders has become more and more critical. In conjunction with CBP's many other initiatives (24-Hour and Trade Act rules, Automated Targeting System (ATS), Container Security Initiative (CSI), Customs-Trade Partnership Against Terrorism (C-TPAT) etc.), NII is part of a multi-layered approach which allows CBP to work smarter and faster in recognizing potential terrorist threats. These complementary layers enhance security and protect our nation. CBP has long recognized that an adversary can defeat any single system or device. For this reason, CBP cannot rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood that a nuclear or radiological weapon, weapons grade material, illegal aliens, or other contraband being smuggled across the United States borders will be detected. NII technologies are viewed as force multipliers that enable CBPOs to screen or examine a larger portion of the stream of commercial traffic while maintaining the flow of legitimate trade, cargo and travelers. Since 9/11, NII technology has been the cornerstone of the CBP multi-layered enforcement strategy. Technologies currently deployed to our nation's land, sea and airports of entry include large-scale X-ray and gamma-ray imaging systems, as well as a variety of portable and handheld technologies, to include radiation detection technology.

Systems for Targeting Mission Statement

At the core of CBP's ability to achieve its critical border security objectives and maintain the flow of lawful commerce is CBP's ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law abiding travelers and commerce to continue to their destination without unnecessary delay. Legislation and regulatory action, such as the Trade Act of 2002 and the Safe Port Act, respectively, have made it mandatory to provide advance information about passengers and goods arriving in the U.S. CBP uses computer technology and rule-based applications to analyze the data provided on passengers and shipments arriving in the U.S. CBP applies its targeting methods against the data to determine which passengers or shipments need to be segregated for a closer look and possibly inspection. The main platform CBP uses to analyze arriving passenger and shipment data is the Automated Targeting System (ATS). ATS is a web-based enforcement and decision support tool that is the cornerstone for all CBPs targeting efforts. ATS incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. In this way, ATS allows CBPOs to focus their efforts on cargo shipments and passengers that most warrant further attention. ATS standardizes names, addresses, ship names, and similar data so these data elements can be more easily associated with other business data to form a more complete picture of a passenger, import, or export in context with previous behavior of the parties involved. Every passenger and shipment processed through ATS is subjected to a real-time risk evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering.

National Targeting Center Mission Statement

The priority mission of the U.S. Customs and Border Protection's National Targeting Centers is to provide around-the-clock tactical targeting and analytical research support for CBP anti-terrorism efforts. The NTC facilities are primarily staffed by CBPOs, border patrol agents, and field analysis specialists who are experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments. The NTC staff develops tactical targets from raw intelligence in support of the CBP mission to detect and prevent terrorists and terrorist weapons from entering the United States. NTC supports all CBP field elements, including CSI personnel stationed in countries throughout the world, with additional research assets for passenger and cargo examinations.

Training at the Ports of Entry Mission Statement

The Office of Training and Development exists to develop and deliver basic, mid, and advanced level training programs for all CBP employees, especially mission critical occupations (e.g., CBPOs, Agricultural Specialists, Imports Specialists, and Entry Specialists) at the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of combating terrorism, improving border security, improving inspection and control, and facilitating trade.

Border Security Control Mission Statement

The Office of Border Patrol (OBP) has been delegated with the authority and responsibility to deliver the Executive Branch Program for Border Security and Control between the Ports of Entry. The primary purpose of this program is to prevent the entry of terrorists and their instruments of terror, illegal immigrants, and contraband, while facilitating the legitimate flow of people, goods, and services on which the economy depends. The program will be accomplished through the judicious use of resources including personnel, surveillance technology, communications, transportation, facilities, and mission support activities. Border Patrol agents deter uncontrolled entry into the interior of the U.S. by: the rapid detection, interception, and apprehension of illegal entrants at or near the border; interdicting or deterring illegal aliens, drug smugglers, potential terrorists and criminals from attempting illegal entry between ports-of-entry; and causing persons seeking admission into the U.S. to present themselves at designated ports for inspection.

Training Between the Ports of Entry Mission Statement

The Office of Training and Development exists to provide core operational training for Border Patrol Agents whose primary responsibility lies between the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of safeguarding the borders of the United States. This training ensures that CBP is able to rapidly deploy a highly motivated, well-trained workforce, both on a temporary and permanent basis, who can quickly respond to potential terrorist threats, shifts in smuggling patterns and other national security threats.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Border Security Fencing, Infrastructure, and Technology (BSFIT)

I. Appropriation Overview

A. Mission Statement for Border Security Fencing, Infrastructure, and Technology:

The Border Security Fencing, Infrastructure, and Technology (BSFIT) appropriation supports the Department of Homeland Security (DHS) and U.S. Customs and Border Protection (CBP) missions by delivering operationally appropriate, agile, and cost-effective detection and surveillance technology systems, Tactical Infrastructure (TI), and Tactical Communications Modernization (TACCOM). These technology systems enhance CBP's situational awareness and its ability to respond to and resolve illegal activity.

Additionally, investments in surveillance technology, in particular, have a workforce multiplier effect. Prior to recent investments in technology, many U.S. Border Patrol (USBP) agents provided situational awareness through detection related duties. The methods used are labor intensive, often very tedious, and typically cover only a small fraction of the terrain that needs to be covered. These activities also expose the agents to considerable dangers risking their lives every time they are out in the field. With the deployment of fixed and mobile surveillance capabilities, agents gain situational awareness automatically at the patrol stations. They can now target their response actions in a focused manner, direct the response team to the best interdiction location, and warn them of any additional danger otherwise unknown along the way.

As a result, these investments have a two-fold impact, both increasing visibility on the border and increasing Border Patrol's operational capabilities and safety. These investments lead to more accurate and timely information, which is critical to CBP's risk-based operational strategy. By gaining sufficient situational awareness, CBP can determine the activity level in all border regions, monitor evolving threat patterns, and strategically deploy assets (agents and technology) based on threat.

DHS's border security mission, as outlined in the 2010 Quadrennial Homeland Security Review (Mission II – Securing and Managing Our Borders), is to prevent the illegal flow of people and goods across U.S. air, land, and sea borders, while expediting the safe flow of lawful trade and commerce, and disrupting and dismantling transnational criminal organizations. DHS has an objective of substantially increasing situational awareness at the Nation's borders in order to help detect and classify potential threats and effectively resolve them. In addition, DHS has made building our existing partnerships with our North American neighbors a priority in order to collaboratively address threats. Correspondingly, the mission of CBP, as outlined in the agency's Mission Statement, is to safeguard the American homeland at and beyond our borders, protect the American public against terrorists and instruments of terror, and enforce U.S. laws, while fostering our Nation's economic security through lawful international trade and travel.

Technology improves CBP's operational effectiveness on the Southwest border in demonstrable and compelling ways. For example, in the Tucson areas, the SBInet Block 1 Deployments contribute to:

- Increased situational awareness, driving high(-er) probabilities of successful law enforcement resolution of illegal border incursions as measured by a dramatic decrease in “got aways.” The persistent surveillance and detection capabilities of the Block 1 system provide an unprecedented level of situational awareness resulting in significantly fewer BPAs being required to conduct surveillance activities and more USBP agents being available to respond and interdict border intrusions;
- Increased agent safety by providing tactical advantage to the field agents. The Block 1 system provides “over watch” where agents in the station can monitor agents in the field and provide real time threat information, such as if a group has narcotics, if they are armed, or even their tactics;
- Decreased illegal border activity in targeted areas of the border (i.e., deterrence), evidenced by 50-70% reductions in observed attempts to enter illegally, fewer citizen and rancher complaints of property destruction and related crime, reemerging vegetation, the disappearance of thousands of pounds of garbage left behind by illegal groups, over networks of once-prominent smuggling trails; and
- Increased operational efficiency by relying less on personnel to perform surveillance functions, thereby freeing up personnel to respond to and resolve illegal activity (primary mission focus).

Another CBP goal for border enforcement is to secure the northern border, littoral borders, and associated airspace. The northern border spans thousands of miles where Federal law enforcement personnel assets are limited; therefore, intelligence, aviation assets, partnerships, and technology are essential to addressing threats and reducing vulnerabilities. Moreover, CBP continues to evaluate the conditions and risks along the U.S. borders in order to effectively address changing vulnerabilities and adjust priorities as required.

BSFIT Portfolio:

The BSFIT technology portfolio, including the Arizona Technology Plan, is managed by the Office of Technology Innovation and Acquisition (OTIA) Program Management Office (PMO). BSFIT technology programs deliver detection and surveillance systems to both the southwest and northern borders – increasing situational awareness and assisting law enforcement personnel in identifying and resolving illegal activity. The TI program is managed by the CBP Office of Administration Border Patrol Facilities and TI (BPFTI) PMO, and consists of projects that provide persistent impediments (fencing, gates, etc.) and agent access (roads, bridges, drainage, etc.) to the border. TACCOM is managed by the Office of Information and Technology (OIT) Wireless Systems Program Office (WSPO), and provides expanded digital, secure communications capabilities that enable CBP agents and officers to coordinate activities, thereby enhancing agent safety.

Table 1: Border Security Fencing, Infrastructure, and Technology Portfolio

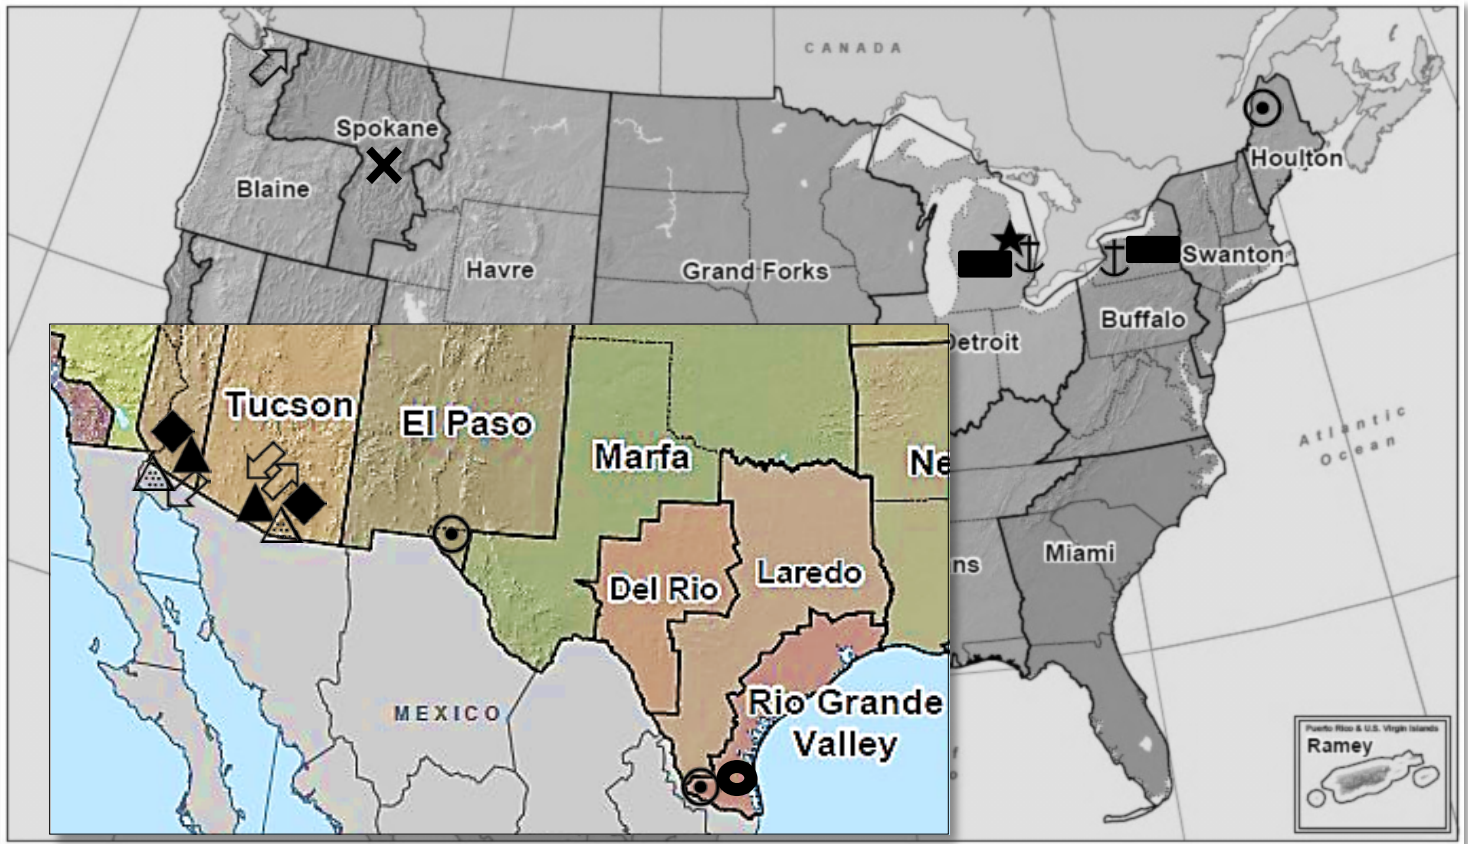

Programs	Projects/Activities	CBP Office*
Arizona Technology Plan	<ul style="list-style-type: none"> • Integrated Fixed Towers (IFT) • Remote Video Surveillance System (RVSS) • Mobile Video Surveillance System (MVSS) ** • Agent Portable Surveillance System (APSS) • Mobile Surveillance Capability (MSC) • Thermal Imaging Devices (TID) 	Office of Technology Innovation and Acquisition (OTIA)
Other Southwest Border (SWB)	<ul style="list-style-type: none"> • Ultra-Light Aircraft Detection (ULAD) • Unattended Ground Sensors (UGS) 	OTIA

Northern Border (NB)	<ul style="list-style-type: none"> • Air & Maritime Domain Awareness (AMDA) Projects • Operations Integration Center (OIC), Detroit • Land Air Maritime Border (LAMB) Project • RVSS 	OTIA
Fielded Technology Systems	<ul style="list-style-type: none"> • Block 1 • Mobile Surveillance System (MSS) • Legacy RVSS & Scope Trucks • Static Remote Video Surveillance • Border Intrusion Surveillance System • Trailered Remote Video Surveillance 	OTIA and OIT Field Support
Innovative Technology Demos & Pilots	<ul style="list-style-type: none"> • Secure Transit Corridor • Cross Border Tunnel Threat (CBTT) • Broadband Communication Demonstration 	OTIA

*OTIA manages the BSFIT Portfolio. BSFIT Portfolio Programs are executed inside and outside of OTIA.

**Four MVSS units that were originally planned for Arizona will be deployed to Texas due to emerging threats, but will still be managed as part of the Arizona Technology Plan.

For detailed information regarding the BSFIT technology portfolio, see the FY 2014-2017 Multi-Year Investment and Management Plan. This Plan was compiled pursuant to language set forth in the *Fiscal Year (FY) 2014 Consolidated Appropriations Act* (P.L. 113-7676) referencing the *FY 2012 Department of Homeland Security (DHS) Appropriations Act* (P.L. 112-74). The Multi-Year Plan highlights CBP's surveillance and communications investment projects.

The Arizona Technology Plan:

Over the past few years, CBP began the deployment of the Arizona Technology Plan, a multi-year effort to provide a cost-effective mix of technology solutions across all of Arizona. The deployment of the Arizona Technology Plan completes Phase IA of a CBP Analysis of Alternatives (AoA) and focuses on the Tucson and Yuma Border Patrol Sectors. The Arizona Technology Plan includes IFT, RVSS, MVSS, APSS, MSC, and TID (Figure 2).

The AoA was divided into three phases: Phase IA, Phase IB, and Phase II. As mentioned above, Phase IA consists of the Arizona Technology Plan. Phase IB focuses on the San Diego, El Paso, and Rio Grande Valley Sectors. Phase II focuses on the El Centro, Marfa, Del Rio, and Laredo Sectors. Technology options identified in Phases IB and II were found to be suitable based on different threats, geographic areas, and terrain.

To complete the Arizona Technology Plan, CBP awarded a major contract on February 26, 2014 to acquire and deliver IFT systems to previously determined priority Border Patrol station Areas of Responsibility (AoRs).¹ An

IFT system is a network of towers that consist of surveillance equipment (e.g., ground surveillance radars and surveillance cameras) mounted on fixed (i.e., stationary) towers, all necessary power generation and communication equipment to support these towers, and Command and Control Center equipment (including one or more operator workstations) capable of displaying information received from surveillance towers on a Common Operating Picture (COP). For remote, difficult terrain areas, the IFTs were selected to enhance security of high-traffic corridors that are tactically advantageous to the smugglers and traffickers, but also to maintain security and situational awareness with persistent, wide-area surveillance. The IFT system will assist agents in detecting, tracking, identifying, and classifying Items of Interest (IoIs) along our Nation's borders through a series of fixed surveillance towers and Command and Control Center equipment that displays information on a COP.

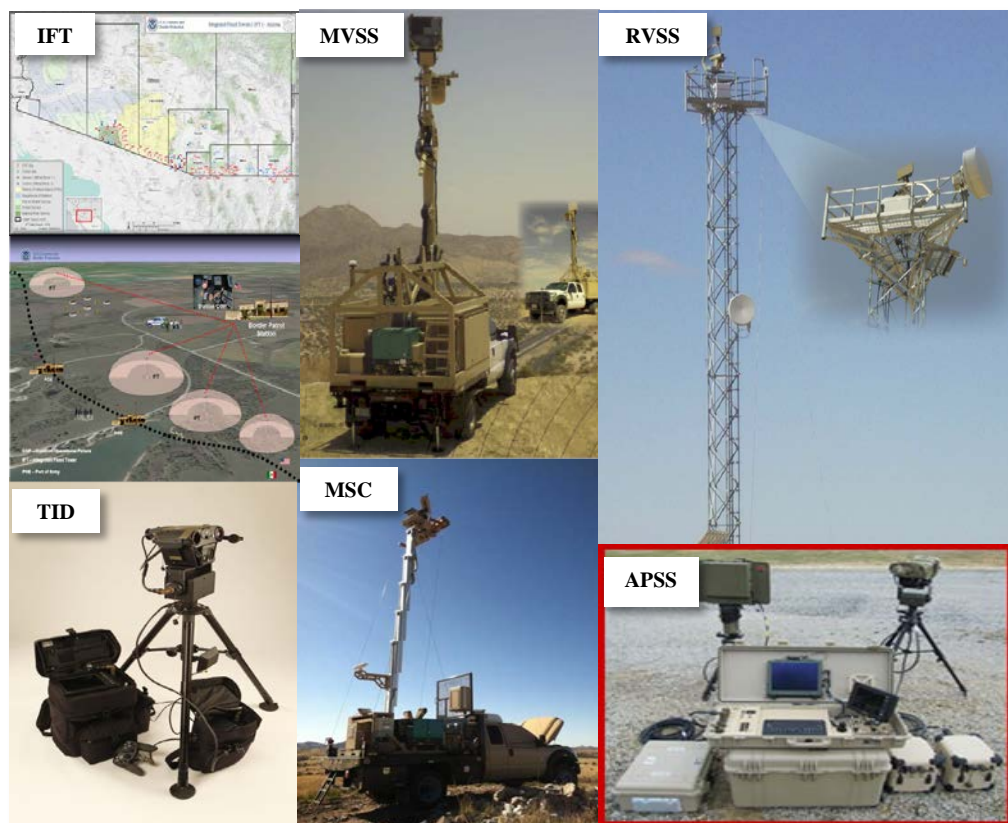

Figure 2: The Arizona Technology Plan (ATP) Solution

The IFT contract was awarded February 26, 2014 and deliveries will commence in FY 2015. CBP's IFT acquisition strategy is to procure, deploy, and test the first AoR deployment as quickly as practical

BPA's often rely on legacy capabilities, such as sign cutting, scope trucks, and technologies that are near the end of their life cycle, all of which are proven methodologies, but they can place BPAs at risk in obscured, difficult to access locations. To further secure America's borders and strengthen current

¹ OTIA and OBP understand the FY14 Omnibus to require certification by the Chief of USBP (B1), following the first IFT AOR deployment (Nogales) and again prior to and following the second IFT AOR deployment. OTIA and OBP briefed staff of the House and Senate Appropriation Committees on February 25, 2014 in regard to the FY14 Omnibus language and CBP's intent to meet the requirement following the deployment of the first AOR as outlined here. At OBP request, the schedule is being modified to make the second and third deployments on TON (Ajo and Casa Grande) vice the previously planned Douglas and Sonoita. This change will result in a delay of the second deployment until FY 2017. CBP believes this will provide sufficient time for B1 to evaluate and certify the first deployment, meeting the requirements in the FY14 Omnibus.

capabilities, enhanced technology is required. As USBP has seen with the technology deployments along the borders, technology enhancements, such as IFTs, are a critical force multiplier. This force multiplier increases agent safety, situational awareness, and operational effectiveness. By detecting and identifying the threat from a safe distance, USBP agents are able to determine the time, method, and location of an interdiction. This capability gives BPAs a pivotal operational advantage. An increase in situational awareness translates into more accurate and timely information that contributes to agents' ability to rapidly respond to threats as they appear. In addition, BPAs are able to prioritize threat activity and respond to higher threats with the appropriate response.

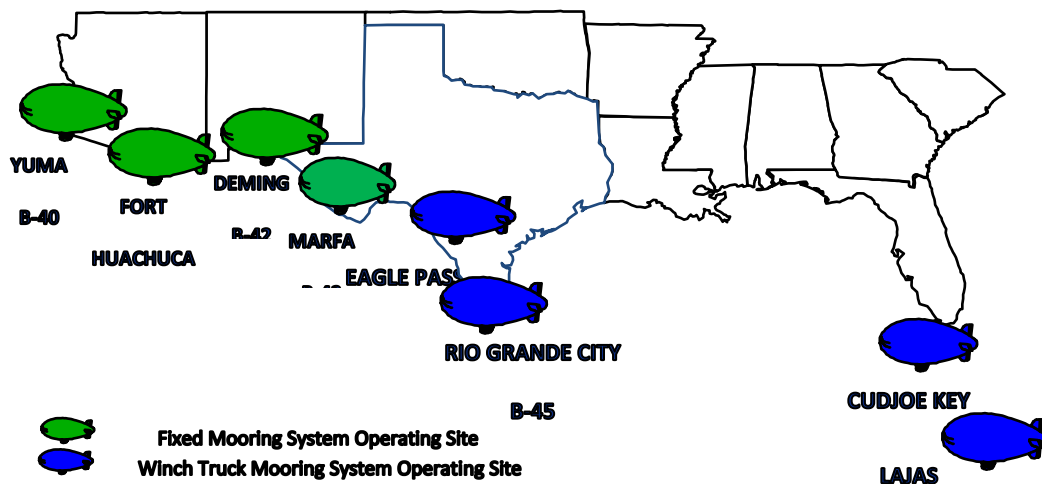

Rio Grande Valley (RGV):

The FY 2015 budget requests \$89.450 million to the BSFIT account for new border surveillance technology within the RGV Sector. This funding will support the acquisition of mobile surveillance systems - Mobile Video Surveillance Systems (MVSS). It will also provide for the deployment of Remote Video Surveillance System (RVSS) Upgrades to RGV in two to four years from contract award. Up-front planning, C2 room modifications, and station communication tower construction will be required before RVSS Upgrade sensor tower construction and technology deployment options can be executed. Providing MVSS and RVSS capabilities in RGV will yield multiple mission benefits for USBP. With the deployment of these technologies, USBP will gain greater situational awareness and will have the ability to effectively detect, identify, and track Items of Interest (IoIs) along the Southwest border.

Tethered Aerostat Radar System (TARS):

In FY 2012, the Department of Defense (DoD) notified DHS that DoD would no longer operate the Tethered Aerostat Radar System (TARS) Program, as it was no longer a mission requirement for the DoD. TARS are fixed-site, aerostat-based radar systems that provide air surveillance across sections of the U.S.-Mexico Southern border (Figure 4). They are designed to detect compliant and non-compliant low-altitude aircraft that are attempting to smuggle narcotics or other contraband into the U.S. Because TARS is an important capability that provides visibility for CBP along the southern border, DHS and CBP agreed to take over the program beginning in FY 2014.

Figure 3: TARS Site Locations

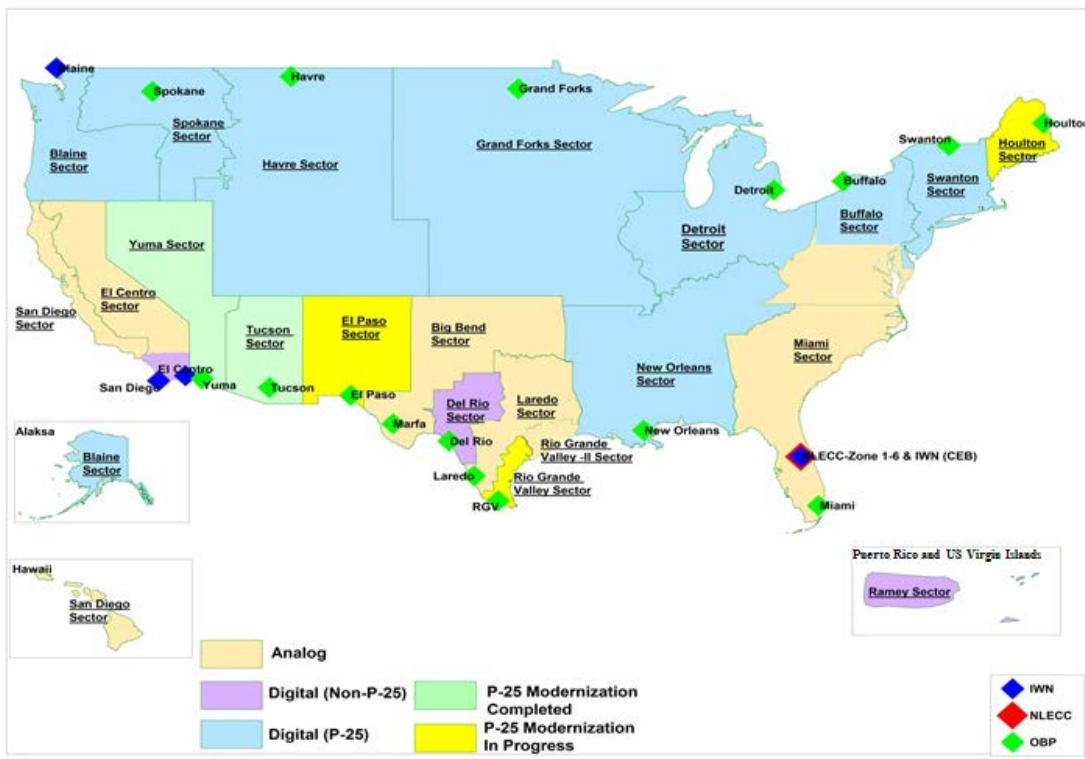

Tactical Communications Modernization (TACCOM) and Digital in Place (DIP):

In addition to progress with acquiring and deploying surveillance systems and technologies, CBP is investing in modernization of the national tactical communications infrastructure for several DHS law enforcement activities. Recent activities focused on expanding communications coverage and capacity, while adopting secure, digital technologies. Tactical communications capabilities are essential to coordinating mission activities and protecting the safety of over 44,000 CBP law enforcement agents and officers. These agents and officers operate in remote areas where commercial communications do not exist; therefore, their tactical radio is often their only communications channel to colleagues and CBP headquarters that allows them to coordinate activities or summon assistance. In addition, it is critical that CBP agents and officers have radio systems capable of interoperating with other federal, state, local, and tribal entities to improve security along the U.S. borders.

The Digital In Place (DIP) project uses funds formerly planned for the Laredo Focus Area Modernization to refresh all remaining CBP analog land mobile radio (LMR) equipment nationwide to the digital Project 25 Tactical Communication Modernization (P25) interoperability standard with Advanced Encryption Standard and Over-the-Air Rekeying capabilities. The DIP approach does not involve new site build-out (maintaining current capacity and coverage). As such, many of the cost drivers and schedule delays inherent in a full-scale modernization effort can be avoided. This approach addresses CBP's immediate need for a P25 Advanced Encryption Standard platform and would allow CBP to achieve all the operational, training, and sustainment benefits of working from a common, unified, and digitized platform.

Figure 4: TACCOM Project Overview

Northern Border:

Technology investments funded by BSFIT are deployed along the Northern Border, including Blaine, Spokane, Detroit, and Buffalo sectors. Past northern border technology deployments included the Northern border RVSS, the Operational Integration Center (OIC), as well as other deployments and demonstrations. The RVSSs allow Border Patrol to monitor border activity through video transmissions to a control room. The Aircraft Video Down Link (AVDL) program enhances and expands information sharing among CBP's operational components by providing the CBP Office of Air and Marine (OAM) with the ability to transmit and receive real-time, full-motion video to ground stations. The Low-Flying Aircraft Detection (LFAD) project will provide area surveillance for low-flying aircraft in rural and semi-urban areas.

Northern Border demonstrations and deployments explore how to best integrate various sensors, border security organizations, and mission operations to optimize border security in a vast, geographically challenging environment. The OIC in Detroit maximizes operational effectiveness by leveraging local and state law enforcement agencies and existing technologies (such as information feeds from cameras and radars) that are deployed across vast areas of the border.

Tactical Infrastructure:

To help Border Patrol secure borders between the POE, the Border Patrol Facilities and TI Program Management Office plans, constructs, and maintains various physical components designed to help Border Patrol fulfill its primary homeland security mission. These TI components vary—from roads, fencing, bridges, and crossovers; to lights, electrical components, and drainage structures; to vegetation and debris removal; and to towers (excluding technology)—but the primary goal remains constant: to help Border Patrol Agents (BPAs) prevent terrorists and terrorist weapons from entering the U.S.

The TI PMO provides Border Patrol with long-term planning, construction, and maintenance capabilities of tactical components. In support of other Border Patrol mission elements, the pedestrian and vehicle fences provide persistent impedance by slowing, delaying, and acting as a Border Patrol force multiplier. Infrastructure repairs have enabled Border Patrol's timely and effective response as well. Roads, ramps, crossovers, and bridges provide improved access so that BPAs can more readily respond to potential events. Permanent lighting, debris, and vegetation removal provide BPAs with greater visibility.

B. Budget Activities:

The BSFIT appropriation consists of two PPAs:

- **Development and Deployment (D&D):** D&D funds provide for the activities associated with acquisition programs, such as procurement, technical, and program management support; systems engineering services; advanced technology development; operational test and evaluation support; and assessment and mitigation activities associated with deploying technology.
- **Operations and Maintenance (O&M):** O&M funds provide logistics support – supply, maintenance, repair, and training services – to operate and maintain all border surveillance

technology deployments, as well as legacy surveillance and communication systems. In addition, O&M funds maintenance and repair for TI. A combination of government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, critical property, spare parts storage, inventory records management, field services, repairs, and training.

C. Budget Request Summary:

DHS requests \$362,466,000 for the FY 2015 BSFIT appropriation. The FY 2015 BSFIT request will fund acquisition, delivery, and sustainment of prioritized border security capabilities and services for CBP's front-line agents and officers. Funding will also be used to respond to changing threats and evolving operational needs. The Department's FY 2015 BSFIT request includes funding for the following:

- **Deployment and Development (\$110.594 million):** Provides for the activities associated with acquisition programs, such as procurement, technical, and program management support; systems engineering services; advanced technology development; operational test and evaluation support; and environmental planning, assessment, and mitigation activities associated with deploying technology.
- **Operations and Maintenance (\$251.872 million):** Provides logistics support, supply, maintenance, repair, and training services to operate and maintain border surveillance technology systems, as well as legacy surveillance and communication systems. In addition, this funding also supports the maintenance and repair for TI. A combination of government and contractor logistics activities provides maintenance management, system support analysis, call center operations, asset management, spare parts storage, management and inventory records, field services, and training.

D. Savings and Reductions:

Some of the efficiencies and reductions shown below are spread across multiple sub-object class codes.

Other Contract Services Efficiencies

\$0.28 million

CBP-wide IT Efficiencies (\$0.04 million): This efficiency is a CBP agency-wide IT standardization initiative that will identify a common set of standards for IT hardware, reducing the variation of devices and number of vendors while increasing the opportunity for volume purchase power behind larger buys. CBP has also identified savings across the agency in FY 2015 that will be achieved by further reducing the use of mobile electronic devices.

Professional Services Contracts (\$0.24 million): This efficiency is a CBP agency-wide contracts savings initiative that will identify an across-the-board 5% cut to contract services in common service areas. The intent is to reduce the variation and number of contracts, increasing the opportunity for better-defined needs, stronger funding controls, and strategic sourcing.

CURRENT SERVICES PROGRAM DESCRIPTION:

O&M funds support recurring requirements related to life cycle logistics—supply, maintenance, repair, and training services—to operate and maintain border surveillance technology systems, as well as legacy surveillance and communication systems. A combination of government and contractor logistics activities will provide maintenance management, system support analysis,

call center operations, asset management, spare parts storage, management and inventory records, field services, and training.

O&M funds maintenance and repair (M&R) services for all types of Tactical Infrastructure (TI) (Figure 5), to include maintenance and repair of fences and gates, roads and bridges, lighting and electrical components, drainage structures and grates as well as the removal of vegetation and debris along the Southwest Border. M&R is conducted primarily through Comprehensive Tactical Infrastructure Maintenance and Repair (CTIMR) contracts which use a tracking system to capture and store requirements in order to easily identify and plan future work. O&M funding provides M&R services for the real property associated with tower-based systems, including M&R of the sites, mechanical and electrical components, fuel tanks, racks, and other components, and may even include the replacement of the entire physical tower itself.

Figure 5: Tactical Infrastructure (TI) *The primary goal of TI is to assist BPAs in preventing terrorists and weapons from entering the U.S.. The pedestrian fences and vehicle fences provide persistent impedance by slowing, delaying, and acting as a force multiplier to prevent illegal cross-border activity. Also, infrastructure repairs have improved the timeliness and effectiveness of BPAs response. Roads, ramps, crossovers, and bridges provide improved access so that agents can more readily respond to potential events. Permanent lighting, debris, and vegetation removal provide visibility to Border Patrol agents.*

Legacy RVSS are crucial to the Border Patrol, as they are already deployed and used across the southwest border. RVSS legacy systems have outlived their expected life cycle and

requirements for repairs have greatly increased. CBP will undergo a review to determine an appropriate refresh plan to for these assets.

The Tethered Aerostat Radar System (TARS) program (Figure 6) is a multi-mission capability that supports both counter-narcotic enforcement and air domain awareness missions. The TARS program has assisted CBP with interdicting suspect aircraft for over 20 years. TARS units are currently in operation along the U.S.-Mexico border and support both counter-narcotic enforcement and air domain awareness missions. As a transfer from DoD, TARS funding of \$35.6 million will provide O&M support in FY 2015 for the eight TARS sites. Six sites are located on the Southwest border, one site is in Florida, and one site is in Puerto Rico. Program funding would support full operations and maintenance for TARS sites via a contract that provides for a 24/7 TARS Control Center, logistics center, and depot support for government-furnished, prime mission, and ancillary equipment. Program funding further supports minor equipment sustainment modifications and upgrades and acceptance testing for all aerostats. Funding also allows for the purchase of special purpose vehicles, helium, utilities, support agreements, leases, as well as the delivery of surveillance data. The TARS program will provide a unique look-down capability from an altitude of 10,000 feet permitting a vast detection range of 200 nautical miles with a single system. No other capability exists today that provides visibility at this altitude level.

Figure 6: TARS

To support the deployment of MVSS and RVSS capabilities in the RGV sector, O&M funding increased in FY2015. This funding will help maintain these technologies, which provide crucial situational awareness to a priority sector along the Southwest border.

O&M funding will be permanently transferred to other accounts in FY2015:

- \$4.176 million will be transferred to OIT's Automation Modernization appropriation in FY 2015 to fund 33 positions that historically have provided IT support to BSFIT programs;
- \$1.807 million will be transferred to the S&E Technology, Innovation, and Acquisition PPA (\$885 thousand, 6 FTEs) and the Air & Marine Appropriation (\$922 thousand, 6 FTEs) PPAs to fund 12 additional FTEs needed to support the TARS program; and
- \$1.510 million will be transferred the S&E Rent PPA to fund rent associated with the Northern Border (\$301 thousand) and Block 1 (\$1.209 million) programs.

Table 2 is a summary of the O&M funding levels anticipated for the major investments in the BSFIT Portfolio for FY 2015. As previously stated, O&M funding will be used for M&R services and to support recurring requirements based on life cycle logistics. O&M costs are forecasted to increase over the next several years in anticipation of technology deployment.

Table 2: Major Investments

Key Projects	Key Capabilities	Funding Dollars in Thousands
Block 1	<ul style="list-style-type: none"> • Main mission for Block 1 Sustainment is increased situational awareness and persistent surveillance across the Tucson and Ajo Stations within the Tucson Sector. • Supports BPAs and officers to effectively detect, identify, classify, and resolve illegal incursions at the border. • Deployment of towers with a suite of integrated day and night cameras, radars, unattended ground sensors, and a communications package. • An initial version of a common operating picture, which is the system that integrates the sensors, and displays the results at a command center. • Covers approximately 53 miles of international border in Arizona. • The transition of Integrated Logistics Support (ILS) elements from the current Contractor Maintenance and Logistics Support (CMLS) contract with Boeing is the main cost and schedule driver in FY 2014. The Block 1 Maintenance Task Order (BMTO) is the final task order on the SBInet Indefinite Delivery, Indefinite Quantity (IDIQ) and it ends on March 16, 2014. The transition involves moving away from CMLS to Organic Government sustainment. 	\$ 15,260
Facilities Management & Engineering Tactical Infrastructure (FM&E BPFTI PMO)	<ul style="list-style-type: none"> • Primary goal of the TI program is to manage Border Patrol's long-term planning, construction, maintenance, and repair activities for TI to include fence, roads, bridges, towers, lighting, vegetation and debris removal, drainage, and gates. • Provides USBP with persistent impedance, access to, and visibility of cross-border activity. • TI maintenance and repair activities have been streamlined by the use of regional CTIMR contracts along the Southwest border. • At this time, three of the four CTIMR contracts have been awarded with the fourth awaiting protest resolution. 	\$ 48,994

Key Projects	Key Capabilities	Funding Dollars in Thousands
Integrated Fixed Towers (IFT)	<ul style="list-style-type: none"> • IFT is a system that provides automated, persistent wide-area surveillance for the detection, tracking, identification, and classification of illegal entries. • In threat areas where mobile surveillance systems cannot be a viable and/or long-term solution, IFTs, equipped with sensor suites and communication equipment, can be deployed to provide automated, persistent wide-area surveillance for the detection, tracking, identification, and classification of illegal entries. • When multiple IFT units are integrated into a system with a common operating picture (COP), Border Patrol will be able to increase situational awareness and be able to monitor a larger area of interest. • Awarded contract on February 26, 2014 , with the base quantity IFT system installed in Border Patrol Station Nogales AoR occurring in the third quarter of FY 2015. 	\$ 25,002

Key Projects	Key Capabilities	Funding Dollars in Thousands
<p>Tactical Communications (TACCOM) Modernization</p> <p>Digital In Place (DIP)</p>	<ul style="list-style-type: none"> • CBP operates and maintains one of the largest Land Mobile Radio (LMR) tactical voice communications infrastructures in the Federal Government in order to support their mission of securing the nation's borders against illegal entry of people and goods, while managing legitimate travel and trade. • Tactical communications capabilities are essential to coordinating mission activities and protecting the safety of over 44,000 CBP law enforcement agents and officers who operate in remote areas where their radio is often the only communications channel to coordinate activities or summon assistance. • Originally TACCOM I was intended to upgrade all the focus areas on the Southwest border, but because of schedule delays, costs, and evolving technology, TACCOM I has been re-evaluated to be limited to Rio Grande Valley, El Paso, and Houlton. • The Digital In Place (DIP) program will perform a one-for-one replacement to all narrowband systems nationwide to P25 standards and Advanced Encryption Standard encryption. • DIP upgrades will allow systems to be operable and maintainable until the next-generation systems are developed and put in place. • DIP will not extend current coverage or capacity, but will allow narrowband systems to be digital. • DIP will include the following focus areas: Swanton, Laredo, Del Rio, San Diego, El Centro, Marfa, Blaine, Spokane, Grand Forks, Havre, Miami, New Orleans, Ramey, Buffalo, and Detroit. 	<p>\$ 25,850</p>

Key Projects	Key Capabilities	Funding Dollars in Thousands
Northern Border Remote Video Surveillance System (NB - RVSS)	<ul style="list-style-type: none"> • The NB - RVSS consist of day/night cameras attached to fixed towers, which allow USBP to monitor border activity through video transmissions to a control room. • Enhance situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. • Expands the coverage at the Northern border where highly trafficked and illegal activities exist. • Transitioned to organic Government sustainment. • Funding is used to continue operations and maintenance of the RVSS systems in Buffalo and Detroit. <ul style="list-style-type: none"> ○ In Buffalo, there are five towers and video at Headquarters, covering 17 miles along the Niagara River in New York. ○ In Detroit, there are 11 towers and video at Headquarters, covering 35 miles along St. Clair River in Michigan. 	\$ 9,783

Key Projects	Key Capabilities	Funding Dollars in Thousands
Remote Video Surveillance System (RVSS)	<ul style="list-style-type: none"> • RVSS is a remotely controlled system of either daylight or infrared cameras that are mounted to a permanent structure. The images are transmitted, monitored, and recorded at a central location. • This system is deployed to monitor large spans of the international border or Critical Transit Nodes. • This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. • These additional RVSS towers will expand the coverage of the RVSS system in Arizona in areas that are highly trafficked with illegal activities. At the current time, prior year funding is being executed in acquisition of the RVSS system. • The RVSS Upgrade Program plans to add an additional 20 new RVSS camera sites/towers, as well as upgrade 47 existing RVSS camera sites and 6 communication relay sites in Arizona. • The RVSS Upgrade Program will deploy the RVSS capability to eight Areas of Responsibility (AORs) within the RGV Sector. • The camera configuration at each RVSS site varies depending on USBP operational needs and the geographical area such as urban, suburban, or rural. • Contract was awarded to General Dynamics One Source LLC on July 26, 2013, with Initial Operational Capability and Full Operational Capability projected for the third quarter of FY 2014 and the first quarter of FY 2015, respectively. 	\$ 1,889

Key Projects	Key Capabilities	Funding Dollars in Thousands
Mobile Surveillance Capabilities (MSC)	<ul style="list-style-type: none"> • The purpose of the MSC is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers. • Capabilities are detection, identification, and tracking of items of interest (IoI) until successfully culminating in a law enforcement conclusion. • Sensory equipment may include electro - optical/infrared (EO/IR) cameras, ground surveillance radars (GSR), laser range finders, laser illuminators, global positioning systems (GPS), and command, control, and communication (C3) systems. • Delivery and deployment of the 33 ICx units was completed in September 2013. Sixteen additional ICx MSC units are planned to be ordered and delivered by the third quarter of FY 2015. 	\$ 12,581

Key Projects	Key Capabilities	Funding Dollars in Thousands
Tethered Aerostat Radar System (TARS)	<ul style="list-style-type: none"> • TARS is a multi-mission capability that supports both the Counterdrug and Air Defense missions. • When the DoD notified DHS in FY 2012 that they would no longer operate the TARS program, DHS and CBP agreed to take over the program beginning in FY 2014 as it provides visibility for CBP along the entire Southern border. • Provides long-range detection and monitoring of low-level air, maritime, and surface narcotic traffickers, as well as a unique look-down capability (10,000 feet) permitting a vast area of coverage (200 nautical miles) with a single unit. This look-down capability addresses the terrain masking and curvature of the earth issues associated with ground-based radar systems. • Also offers a distinct visual deterrent to illicit air traffic and is a critical component of the Air & Marine Operations Center's (AMOC) bi-national interdiction operations with Mexico. • The prime contractor for TARS is Exelis, with Northrop Grumman responsible for the data network. • The TARS Request for Information (RFI) for commercial radar capabilities is planned for March 2014. • The program plans to exercise FY 2015 O&M contract options in September 2014. • 12 FTE will support the TARS program via funding which will transfer from BSFIT O&M to the Technology Acquisition and Innovation and Air & Marine Salaries PPAs. 	\$ 35.600

MAJOR ACQUISITIONS

Block 1

The main mission for Block 1 Sustainment is increased situational awareness and persistence surveillance across the Tucson and Ajo Stations within the Tucson Sector. Block 1 technology supports U.S. Customs and Border Protection (CBP) agents and officers to effectively detect, identify, classify and resolve illegal incursions at the border. Block 1 includes a deployment of towers with a suite of integrated day and night cameras, radars, unattended ground sensors and a communications package. Block 1 also includes an initial version of a common operating

picture, which is the system that integrates the sensors, and displays the results at a command center. Block 1 covers approximately 53 miles of international border in Arizona.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered “mixed non-IT/IT.”

Block 1 is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- BSFIT Operations & Maintenance \$15.260 million
- S&E Technology Innovation and Acquisition \$ 421 thousand

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
23,714	22,704	15,681

FY 2015 Funding Breakout:

Program Area (\$\$\$ thousands)	Resource Types	Mission Need
Block 1 (\$15,260)	Investment Maintenance	Includes the expense costs associated with supporting the SBInet Block 1 Sustainment (Block 1).
Block 1 (\$421)	Salaries	Support Program Management Office, funding captured in S&E Technology Innovation and Acquisition PPA.

Integrated Fixed Towers (IFT)

Integrated Fixed Towers (IFT) is a system that provides automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. In threat areas where mobile surveillance systems cannot be a viable and/or long term solution, IFTs equipped with sensor suites and communication equipment, can be deployed to provide automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. When multiple IFT units are integrated into a system with a common operating picture (COP), Border Patrol will be able to increase situational awareness and be able to monitor a larger area of interest. With an IFT system, a single COP operator can maintain persistent surveillance over a large area whereas previously, multiple agents exposed to threats were required to provide coverage in the same amount of area.

IFT is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- BSFIT Operations & Maintenance \$25.002 million
- S&E Technology Innovation & Acquisition \$1.587 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
93,321	86,816	26,589

FY 2015 Funding Breakout:

Program Area (\$\$\$ thousands)	Resource Types	Mission Need
Integrated Fixed Towers (\$25,002)	Investment Maintenance	Includes the expense costs associated with IFTs.
Integrated Fixed Towers (\$1,587)	Salaries	Support Program Management Office, funding captured in S&E Technology Innovation and Acquisition PPA.

Tactical Communications (TACCOM) Modernization

CBP is responsible for securing the nation's borders against illegal entry of people and goods while facilitating legitimate travel and trade. To support this mission, CBP operates and maintains one of the largest Land Mobile Radio (LMR) tactical voice communications infrastructures in the Federal government. Tactical communications capabilities are essential to coordinating mission activities and protecting the safety of over 44,000 CBP law enforcement agents and officers. These agents and officers operate in remote areas where their radio is often their only communications channel to coordinate activities or summon assistance. By improving coverage, capacity, reliability, and encryption, the modernization effort provides critical communications support to the agents and officers who secure the nation's borders.

TACCOM is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- Automation Information Technology \$ 3.757 million
- BSFIT Operations & Maintenance \$25.850 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
59,932	57,905	29,607

FY 2015 Funding Breakout:

Program Area (\$\$\$ thousands)	Resource Types	Mission Need
Tactical Communication Modernization (\$25,850)	Investment Maintenance	Includes the expense costs associated with providing CBP the resources necessary to meet their responsibility for securing U.S. borders against illegal entry of people and goods while managing legitimate travel and trade.
Tactical Communication Modernization (\$3,757)	Salaries	Support Program Office, funding captured in S&E Technology Innovation and Acquisition PPA.

Mobile Surveillance Capabilities (MSC)

The purpose of the MSC is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers. Capabilities are detection, identification, and tracking of items of interest (IOI's) until successfully culminating in a law enforcement conclusion. Sensory equipment may include electro - optical/infrared (EO/IR) cameras, ground surveillance radars (GSR), laser range finders, laser illuminators, global positioning systems (GPS), and command, control, communication (C3) systems.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered “mixed non-IT/IT.”

MSC is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- BSFIT Operations & Maintenance \$12.581 million
- S&E Technology Innovation & Acquisition \$ 278 thousand

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
5,874	5,874	12,859

FY 2015 Funding Breakout:

Program Area (\$\$\$ thousands)	Resource Types	Mission Need
Mobile Surveillance Capabilities (\$12,581)	Investment Maintenance	Includes the expense costs associated with the MSC whose purpose is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers.
Mobile Surveillance Capabilities (\$278)	Salaries	Support Program Management Office, funding captured in S&E Technology, Innovation, and Acquisition PPA.

Northern Border Remote Video Surveillance Systems (NB - RVSS)

The Northern Border RVSS (NB - RVSS) systems consist of day night cameras attached to fixed towers, which allows the Border Patrol to monitor border activity through video transmissions to a control room. This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. The NB - RVSS towers have expanded the coverage at the Northern Border where highly trafficked and illegal activities exist.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered “mixed non-IT/IT.”

NBRVSS is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- BSFIT Operations & Maintenance \$9.783 million
- S&E Technology Innovation & Acquisition \$ 421 thousand

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
6,714	6,610	10,204

FY 2015 Funding Breakout:

Program Area (\$\$\$ thousands)	Resource Types	Mission Need
Northern Border Remote Video Surveillance System (\$10,362)	Investment Maintenance	Includes the expense costs associated with the Northern Border RVSS (NB - RVSS) systems.
Northern Border Remote Video Surveillance System (\$421)	Salaries	Support Program Management Office, funding captured in S&E Technology, Innovation, and Acquisition PPA.

Remote Video Surveillance Systems (RVSS)

A Remote Video Surveillance System (RVSS) is a remotely controlled system of either daylight or infrared cameras mounted to a permanent structure. The images are transmitted, monitored, and recorded at a central location. This system is deployed to monitor large spans of the international border or Critical Transit Nodes. This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. These additional RVSS towers will expand the coverage of the RVSS system in Arizona in areas that are highly trafficked with illegal activities.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered mixed non-IT/IT.

RVSS is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- BSFIT Development & Deployment \$44.880 million
- BSFIT Operations & Maintenance \$ 1.889 million
- Technology Innovation & Acquisition \$ 1.298 million

FY 2015 Funding Breakout:

Program Area (\$\$\$ thousands)	Resource Types	Mission Need
Remote Video Surveillance Systems (\$1,889)	Investment Maintenance	Includes the expense costs associated with the RVSS systems which include day-night cameras attached to fixed towers, which allows the Border Patrol to monitor border activity through video transmissions to a control room.
Remote Video Surveillance Systems (\$1,298)	Salaries	Support Program Management Office, funding captured in S&E Technology Innovation and Acquisition PPA.
Remote Video Surveillance Systems (\$44,880)	Development & Deployment	Includes the development and deployment costs associated with the RVSS systems.

SUMMARY OF FY 2015 O&M FUNDING LEVELS:

Table 3 is a summary of the O&M funding levels anticipated for the BSFIT Portfolio for FY 2015. As previously stated, O&M funding will be used for M&R services and to support recurring requirements based on life cycle logistics. O&M costs are forecasted to increase over the next several years in anticipation of technology deployment. O&M costs are also expected to increase due to the CBP adoption of the TARS Program, which was previously managed through DoD.

Table 3: Summary of FY 2015 O&M Funding Request Levels (\$ in millions)	
Project	FY 2015 Request
Fielded Systems	
Block 1	15.3
OIT Legacy	27.4
Integrated Logistics Support	14.9
Tethered Aerostat Radar System	35.6
Subtotal	93.2
Arizona Technology Plan and RGV	
Integrated Fixed Towers	25.0
Agent Portable Surveillance System	2.2
Mobile Surveillance Capability	12.6
Mobile Surveillance System	8.5
Mobile Video Surveillance System	20.1
Remote Video Surveillance System	1.9
Thermal Imaging Devices	0.1
Unattended Ground Sensors	0.2
Ultra-Light Aircraft Detection	0.7
Subtotal	71.3
Northern Border Projects	
Air Maritime Domain Awareness	1.3
Land Air Maritime Border	1.1
Northern Border (NB) – RVSS	9.8
Subtotal	12.2
TACCOM	
TACCOM Maintenance	25.9
Tactical Infrastructure (TI)	
TI Maintenance	49.0
Total O&M	251.6

Discussion of Selected Adjustments-to-Base

Transfer to Automation to Insource Contract Positions: In FY 2015, OIT in coordination with the CBP Office of Technology Innovation and Acquisition (OTIA) requests authorization to federalize 33 mission-critical positions to support IT activities related to Border Security Fencing, Infrastructure, and Technology (BSFIT), including Block 1, the Mobile Surveillance System, and Northern Border-1. OTIA's BSFIT appropriation currently funds contractors to perform these critical BSFIT-related IT services. OTIA's BSFIT appropriation will be permanently reduced by \$4.176 million in FY 2015 and OIT's Automation Modernization appropriation will increase by \$4.176 million in FY 2015 to support the federalized positions.

Realignment for TARS Operational and Program Management: In FY 2015 \$1.807 million will be transferred to the Technology Innovation and Acquisition PPA (\$885 thousand, six FTEs) and the Air & Marine Operations & Maintenance PPA (\$922 thousand, six FTEs) to fund 12 additional FTEs needed to establish the TARS Program Management Office (PMO). The TARS PMO will manage a contract that will allow TARS to detect compliant and non-compliant low-altitude aircraft attempting to smuggle narcotics or other contraband into the U.S.

FY 2015 Request	D&D Total			110,594

CURRENT SERVICES PROGRAM DESCRIPTION:

D&D funds new investments and surveillance and detection technologies, including sensor systems, radars, and day/night cameras, to improve CBP operational forces' ability to detect, identify, classify, and track illegal entries and items of interest across all border environments. These systems are deployed on fixed structures, mobile platforms (i.e., wheeled vehicles), and directly on the ground.

D&D further provides for related activities, such as technical support, systems engineering services, prime contractor program management, advanced technology development, Operational Test & Evaluation support, and environmental planning, assessment, and mitigation activities associated with deploying technology and tactical infrastructure (TI).

Integrated Fixed Towers (IFT) provide the persistent surveillance and Command, Control, Communication, Coordination, and Intelligence capabilities needed by CBP. This provides for the

automated, wide-area surveillance necessary to detect, track, identify, and classify illegal entries, which allows BPAs to respond in a timely and efficient manner.

The original plan to upgrade technology and extension past Arizona has been delayed; however, CBP plans to initiate the acquisition of technologies outside of Arizona, including planning, analyses, and leveraging of information already identified in the completed *SBI_{net}* AoA as funding becomes available. The FY 2015 Budget requests \$89.450 million for the deployment of MVSS and RVSS Upgrades in the RGV Sector. \$69.529 million in FY 2015 D&D funding will be used to introduce increased capability to the RGV sector through the deployment of the MVSS systems. The replacement of 15 systems that are at the end of their lifecycle and the enhancement of 28 systems will allow the MVSS Program to meet the U.S. Border Patrol's MVSS request for RGV sector. Each MVSS will provide a day/night surveillance capability that can be deployed on USBP 4x4 vehicles, wherever they can safely maneuver. The MVSS will be deployed to provide surveillance when intelligence indicators signal that items of interest (IoIs) are in or approaching an area. In addition, the MVSS will augment fixed surveillance systems that have line-of-sight (LoS) coverage gaps caused by existing infrastructure, terrain, or vegetation. While day use can occur, most MVSS operations will occur at night. In regard to RVSS, \$44.880 million in D&D funding will allow the RVSS Upgrade Program to initiate the deployment of infrastructure for the RVSS Upgrade capability to eight Areas of Responsibility (AORs) within the Rio Grande Valley (RGV). Deployment of the required C2 rooms and Station communication towers will occur in FY15 & FY16. Prior to deployment, up-front planning will need to be completed. This planning includes completing engineering lay-downs, camera view shed analysis, site visits, environmental assessments, and real estate acquisitions. U.S. Border Patrol Station Command and Control (C2) room modifications and station communication tower construction will also be required before the RVSS Upgrade sensor tower construction and technology deployment options can be executed. Funding for the RVSS Upgrade program will allow for the replacement of the current analog aging system, with a more secure, better performing digital video surveillance system in the RGV Sector. This will improve USBP operations. In addition, the new and upgraded RVSS systems will provide for enhanced detection, identification and classification of threats, and the ability to track IoIs through a law enforcement resolution.

As a result of the pause in the development and deployment budget for the DIP project in FY 2015, CBP will delay the completion of modernizing its existing Land Mobile Radio (LMR) systems with state-of-the-art digital technology that complies with Project 25 (P25) standards in the following focus areas: El Centro, Havre, Blaine, Grand Forks, and Spokane until the FY 2017 to 2018 timeframe. The modernization provides narrow-banding, mandated by NTIA, and Advanced Encryption AES encryption to protect radio communications from scanning, and Global Positioning System (GPS)-supported Blue Force Tracking to track agent and officer location and safety. In addition, it is important to note that a large amount of CBP's LMR systems have components that are between 10 to 20 years old. CBP may incur increased expenses for the sustainment of out-of-life-cycle equipment and the unavailability of parts which can affect CBP officers and agents. Interoperability between all CBP Office of Border Patrol (OBP), Office of Field Operations (OFO) and Office of Air Marine (OAM) with federal, tribal, state and local partners via the Radio IP System (RIPS) would also be delayed. Additionally, RIPS introduces open standards interfaces that will provide CBP with options for replacing aging, embedded proprietary solutions.

The CBP contracts savings initiative will identify a five percent reduction across all contract services in common service areas. The intent of this initiative is to reduce the variation and number of contracts, increasing the opportunity for better-defined needs, stronger funding controls, and strategic sourcing. A portion of OTIA Professional Services was reduced as some existing contract services were deemed outdated or were not essential to the operational mission accomplishment, as well as potential duplication.

SUMMARY OF FY 2015 D&D FUNDING LEVELS:

Table 4 is a summary of the D&D funding levels anticipated for the BSFIT Portfolio for FY 2015, showing the funding for this Office as divided amongst key mission areas. As previously stated, D&D funding will be used for creating, testing, and deploying detection and surveillance technology systems; conducting environmental planning, assessment, and mitigation activities; and modernizing TACCOM. In addition, CBP will provide for technology management.

Table 4: Summary of FY 2015 D&D Funding Levels

Key Projects	Key Capabilities	Funding Dollars in Thousands
RGV Deployments: MVSS and RVSS Upgrade	Provides funding to deploy MVSS and RVSS capabilities the the RGV Sector. MVSS technology provides a day/night surveillance capability that can be deployed on USBP 4x4 vehicles. In addition, it enables USBP to efficiently monitor selected AoCs within an AoI and is the preferred solution in certain urban, rural, and remote areas that are difficult to access and monitor with other systems. RVSS systems provide for increased situational awareness, early detection of border incursions, enhanced identification and classification of threats, and the ability to track IoIs through a law enforcement resolution. These systems also increase situational awareness along the Southwest border.	\$69,529
Other Technology and Management <ul style="list-style-type: none"> • Support Contracts • Southwest Field Office 	Provides necessary funds to augment government personnel with additional manpower/contractor support to provide special program management skills and expertise not readily available in the government workforce, particularly systems engineering services, contractor PMO support, advanced technology road mapping, and modeling and simulation.	\$ 27,477
Technology Management	Utilize technology management contractor support to perform formal mission area analyses to assess broad surveillance needs and opportunities in all border regions. The analysis and studies would focus on potential investments that are currently unfunded. The intent is to determine which options are viable and valuable, and to petition for additional investment funding for these acquisitions in future cycle.	\$ 13,588

IV. Program Justification Changes

**Department of Homeland Security
U.S. Customs and Border Protection
Border Security Fencing, Infrastructure, and Technology
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Replace Legacy RVSS in Rio Grande Valley
PPA: Development and Deployment
Operations and Maintenance
Program Increase: Positions 0, FTE 0, Dollars \$45,750

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	1,019
Program Increase							-	-	45,750
Total Request	-	-	500	-	-	16,600	-	-	46,769

Description of Item:

The \$45.750 million enhancement represents an increase to the Remote Video Surveillance System (RVSS). The new and upgraded RVSS will provide for increased situational awareness, early detection of border incursions, enhanced identification and classification of threats, and the ability to track Items of Interest (IoIs) through a law enforcement resolution.

RVSS Project Schedule:

Milestone	Projected Completion Date
RGV Planning, Real Estate and Environmental Assessment Activities	FY 2015 – FY 2017
RGV Command and Control Room Modification and Station Communication Tower Construction	FY 2015 – FY 2016

Primary Contractor(s):

To Be Determined: Currently, the RGV Sector planning, real estate, and environmental assessment activities are contracted through the CBP Facilities Management and Engineering (FM&E) directorate within the Office of Administration with various contracts. The RGV Command and Control (C2) room modifications and station communications tower construction are also contracted through FM&E with various contracts.

Project Location(s): Rio Grande Valley Sector, Texas

Key Events:

RGV Sector planning, real estate, and environmental assessment activities with FM&E to commence in FY 2015, with anticipated completion in FY 2017. Eight RGV Station C2 rooms and communications towers to be constructed in FY 2015 – FY 2016.

Justification

The enhancement of \$45.750 million will allow the RVSS Upgrade program to deploy the RVSS capability to eight Areas of Responsibility (AORs) within the Rio Grande Valley (RGV) sector within two to four years from contract award. This enhancement will allow the RVSS Upgrade Program to meet USBP's requirements to support RVSS Upgrade planning and deployment efforts in the RGV Sector. Funding for the RVSS Upgrade program will allow for the replacement of the current analog, aging system with a more secure, better performing, digital video surveillance system that will improve operations in the RGV Sector.

Prior to RVSS deployment, up-front planning will need to be completed. This planning includes completing engineering lay-downs, camera view shed analysis, site visits, environmental assessments, and real estate acquisitions. U.S. Border Patrol Station C2 room modifications and station communication tower construction will also be required before the RVSS Upgrade sensor tower construction and technology deployment options can be executed.

Impact on Performance

The RVSS upgrade from the current analog system to a more secure digital system will improve USBP operations in the field. Furthermore, the upgraded and new RVSS units deployed to the RGV sector will provide OBP with increased situational awareness and the ability to detect, identify, and track IOIs along the southwest border. These improved capabilities directly support the following DHS strategic goals:

DHS QHSR:

Mission 2: Securing and Managing Our Border

Goal 2.1: Effectively Control U.S. Air, Land and Sea Borders: Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce.

Objective 2.1.1: Prevent Illegal Entry: Prevent the illegal entry of people, weapons, dangerous goods, and contraband, and protect against cross-border threats to health, food, environment, and agriculture, while facilitating the safe flow of lawful travel and commerce.

Objective 2.1.2: Prevent Illegal Export and Exit: Prevent the illegal export of weapons, proceeds of crime, and other dangerous goods, and the exit of malicious actors.

Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Replace Legacy MVSS in Rio Grande Valley
PPA: Development and Deployment
Operations and Maintenance
Program Increase: Positions 0, FTE 0, Dollars \$43,700

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	1,083
Program Increase							-	-	43,700
Total Request	-	-	-	-	-	644	-	-	44,783

Description of Item:

The requested increase of \$43.700 million will allow CBP to purchase 39 Mobile Video Surveillance Systems (MVSS). Each MVSS will provide a day/night surveillance capability that can be deployed on USBP 4x4 vehicles, wherever they can safely maneuver. The request also includes an increase of \$275,000 in the S&E technology, innovation, and acquisition PPA. The funding will allow CBP to hire 3 positions in support of the \$43.7 million requested enhancement to replace legacy MVSS in the Rio Grande Valley sector.

Project Schedule:

Milestone	Projected Completion Date
MVSS Contract Award	July 2014
39 Systems Delivered	Q1 FY 2016

Primary Contractor(s): Unknown until the MVSS contract is awarded in July 2014 and obligated in FY15.

Project Location(s):
Rio Grande Valley Sector, Texas

Key Events:

Two MVSS will be delivered 6 months after contract award and will undergo extensive first article testing events before final acceptance. System acceptance is expected in third quarter of FY 2015 at which time a delivery order will be placed for the remaining systems. Final delivery is expected in the first quarter of FY 2017.

Justification

This enhancement will allow the MVSS program to meet the Office of Border Patrol's MVSS requirements for the Rio Grande Valley (RGV) Sector. This enhancement will introduce increased capability to the RGV sector through the deployment of the MVSS systems. The replacement of 15 systems that are at the end of their lifecycle and the enhancement of 28 systems will allow the MVSS program to meet the USBP's MVSS request for RGV sector. Prior to this enhancement, the MVSS program was only funded to support four MVSS units in the RGV sector. The additional funding will allow 39 MVSS systems to replace the legacy systems within the RGV Sector. The MVSS currently used on the southwest border require a technical refresh approximately every five years.

The MVSS enables USBP to efficiently monitor selected Areas of Coverage (AoC) within an Area of Interest (AoI) and is the preferred solution in certain urban, rural, and remote areas that are difficult to access and monitor with other systems. The South Texas Corridor effectively operates legacy MVSS; however, these systems are at the end of their lifecycle.

These MVSS will be deployed to provide surveillance when intelligence indicators signal that Items of Interest (IoI) are in or are approaching an area. In addition, the MVSS will augment fixed surveillance systems that have line-of-sight coverage gaps caused by existing infrastructure, terrain, or vegetation. While day use can occur, most MVSS operations will occur at night. Each system will require one agent for operation of the system and one or more agent(s) to respond to any detected traffic.

Based on an assessment completed in August 2012 by the USBP and OIT, the MVSS is the only mobile surveillance system that can be deployed in the South Texas Corridor. This assessment focused on evaluating the effectiveness of the Mobile Surveillance System (MSS) technology in RGV, Laredo (LRT), and Del Rio (DRT) sectors, including each sector's site elevation, permissible line-of-sight, and radar-detection and thermal/day camera capabilities. The assessment determined that MSS units had limited operational application with the South Texas Corridor because of the lack of elevation, hindered fields of view, and blocked radar return signals. Though the video capabilities of these platforms proved effective within these areas, the radar capability rendered little usefulness.

Impact on Performance

The MVSS will improve OBP operations in the field by replacing current systems that have reached the end of their lifecycle. Furthermore, the MVSS will provide OBP with situational awareness and the ability to detect and identify IoIs along the southwest border. This enhancement supports the following DHS goals and objectives:

DHS QHSR:

Mission 2: Securing and Managing Our Border

Goal 2.1: Effectively Control U.S. Air, Land and Sea Borders: Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce.

Objective 2.1.1: Prevent Illegal Entry: Prevent the illegal entry of people, weapons, dangerous goods, and contraband, and protect against cross-border threats to health, food, environment, and agriculture, while facilitating the safe flow of lawful travel and commerce.

Objective 2.1.2: Prevent Illegal Export and Exit: Prevent the illegal export of weapons, proceeds of crime, and other dangerous goods, and the exit of malicious actors.

U.S. Customs and Border Protection
Border Security Fencing, Infrastructure, and Technology
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 1: Environmental Mitigation
PPA: Development and Deployment
Program Decrease: Positions 0, FTE 0, Dollars \$(1,765)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	1,765
Program Decrease							-	-	(1,765)
Total Request	-	-	-	-	-	1,765	-	-	-

Description of Item

The \$1.765 million reduction represents a decrease to Environmental Mitigation in FY 2015.

Justification

In addition to manpower and technology increases, tactical infrastructure (TI) serves as an additional tool that allows BPAs to perform even more effectively. Constructing and operating tactical infrastructure is a key aspect of CBP's efforts to fulfill its mission to secure the border. Roads, low-water crossings, temporary and permanent vehicle barriers, pedestrian barriers, stadium lighting, fencing, and bridges provide access, increase safety, and enhance our law enforcement capabilities along the border. CBP has been steadfast in building, operating, and maintaining TI in an environmentally responsible manner, and collaborates with local government, state, Native American, and Federal land managers, as well as with the interested public, to identify, understand, and to the extent possible, minimize impacts to the environment.

CBP has worked closely with the Department of Interior (DOI) and the Department of Agriculture (USDA), collaborating to fulfill our enforcement mission while respecting and enhancing the environment. Funding for environmental mitigation is managed by CBP as part of the Border Security Fencing, Infrastructure, and Technology (BSFIT) account. The reduction in requested funding represents a \$1.765 million decrease in FY 2015 to bio-monitoring, re-vegetation efforts, habitat restoration and reintroduction, and the implementation of construction alterations.

In addition to funding the environmental mitigation associated with DOI, BSFIT D&D also funds individual programs' environmental planning, assessment, and mitigation activities, which will not be affected by this decrease. Completion of infrastructure along the border, as well as identifying and

minimizing potential impacts, has been a high priority for DHS and CBP. This reduction to environmental mitigation represents a low risk to current or future infrastructure projects and mitigation efforts, and to the operational areas they support.

Impact on Performance

CBP will monitor the impact of this program change on a regular basis upon and after implementation, and will continuously seek to make alternative changes/solutions to maintain appropriate capability needs along the Southwest and Northern borders, to ensure mission requirements are met.

DHS QHSR:

Mission 2: Securing and Managing Our Border

Goal 2.1: Effectively Control U.S. Air, Land and Sea Borders: Prevent the illegal flow of people and goods across U.S. air, land, and sea borders while expediting the safe flow of lawful travel and commerce.

Operations and Maintenance Mission Statement

O&M funds support recurring requirements related to life cycle logistics-supply, maintenance, repair, and training services-to operate and maintain border surveillance technology systems, as well as legacy surveillance and communication systems. A combination of Government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, spare parts storage, management and inventory records, field services, and training. In addition, O&M provides maintenance and repair (M&R) services for all types of TI, both legacy and newly constructed, to include maintenance and repair of fences, gates, roads, bridges, drainage structures, grates, lighting, electrical systems, and debris removal. O&M also includes the development and implementation of a tracking system to capture and store data so that future maintenance work can be clearly identified and planned. Finally, O&M provides M&R services for the real property associated with tower-based systems, including M&R of the site itself, mechanical and electrical components, fuel tanks, racks, and other components, and may even include the replacement of the entire physical tower itself.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$280	\$75	\$1,630	\$1,555

Development and Deployment Mission Statement

D&D funds support new investments and surveillance and detection technologies, including sensor systems, radars, and day/night cameras, to improve CBP operational forces' ability to detect, identify, classify, and track illegal entries and items of interest across all border environments. These systems are deployed on fixed structures, mobile platforms (i.e. wheeled vehicles), and on the ground. Additionally, D&D provides for related activities, such as technical support; systems engineering services; prime contractor program management; advanced technology development; Operational Test & Evaluation support; and environmental planning, assessment, and mitigation activities associated with deploying technology and TI.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Automation Modernization

I. Appropriation Overview

A. Mission Statement for Automation Modernization:

The Automation Modernization appropriation provides critical information technology support to CBP front-line personnel. The CBP automation framework is comprised of the Automated Commercial Environment (ACE), Information Technology (IT), and Critical Operations Protection and Processing Support (COPPS), and Automated Targeting PPAs.

ACE is one of the most significant automation efforts CBP has undertaken to date. It is being developed and deployed in phases. The deployed ACE capabilities have already yielded tangible benefits to CBP, over forty government agencies, and the trade community. As ACE functionality is introduced, the associated segments of its predecessor, the Automated Commercial System (ACS), are being retired.

On February 19, 2014, the President signed an Executive Order on *Streamlining the Export/Import Process for America's Businesses*, which requires the completion and use of the International Trade Data System (ITDS) by December 2016. Meeting this goal requires all Federal agencies with roles in export/import processes to transition from paper-based to electronic data collection, allowing businesses to transmit, through an electronic "single-window," the data required by the U.S. government to import or export cargo. Currently, businesses must submit data to multiple agencies through various means. Implementation of this Executive Order will save business time and money, and dramatically reduce the number of forms they have to fill out to import or export cargo. In order to meet this deadline, CBP must deliver the core ACE capabilities that support these collections by the end of Calendar Year 2016. CBP will meet this deadline by developing and deploying useful segments of capability. As each segment is completed, users will have more robust, manageable, and accessible tools to aid in securing U.S. borders, facilitating legitimate trade, and targeting illicit goods. For example, there will be more efficient government decision-making associated with goods arriving at the border, reducing the time for clearing goods from many days to, in some cases, seconds, dramatically increasing the flow of legitimate commerce across our borders. Incremental development and deployment will be obtained by using an agile development methodology and framework. Product backlogs, as identified and prioritized by CBP internal customers, will define the capabilities needed for ACE core functionality. Such capabilities include but are not limited to: Cargo Release, Entry Summary Edits, Exports, ITDS, and Air Manifest. The program has made great progress reducing ACE Operations and Maintenance (O&M) costs.

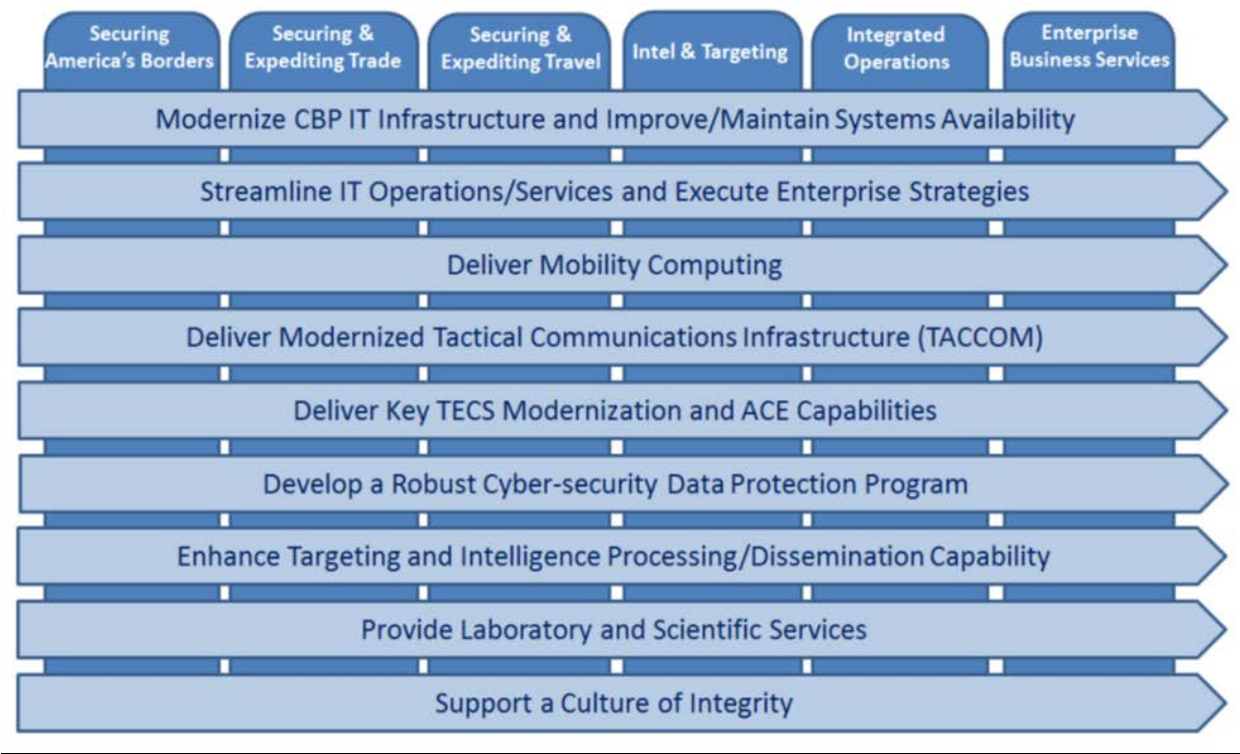

CBP manages the operational availability of its IT infrastructure via COPPS and the new annual infrastructure PPA. These funds support most of the funding necessary to operate and maintain CBP's IT infrastructure and mission-critical IT. COPPS funds also support the multi-year modernization of TECS, a key system for border enforcement that shares information concerning people who are inadmissible or may pose a threat to the United States. COPPS further supports Terrorism Prevention

Systems Enhancement (TPSE), which focuses on enhancing system infrastructure and the supporting enterprise services that enhance continuity of operations.

CBP’s priority mission is keeping terrorists and terrorist weapons from entering the United States, while also identifying and interdicting other types of illegal entries and contraband. To do so, CBP must identify high-risk travelers and dangerous cargo, while securing and facilitating legitimate trade and travel, and enforcing hundreds of U.S. laws at the border. CBP accomplishes its mission through a number of agency assets, including CBP’s targeting enterprise. Funding in the Automated Targeting System (ATS) supports the CBP efforts to maximize resources in a more efficient and cost-effective manner through the use of technology, data, and risk-based programs.

The Office of Information and Technology (OIT) supports all CBP users by providing integrated, comprehensive technical support that facilitates both CBP and DHS missions. OIT is responsible for the development, acquisition, testing, and maintenance of new and legacy applications (both government and commercial), and ensures the reliability of CBP’s data infrastructure, which transmits critical data to and from CBP and DHS data centers to CBP agents and officers on the front-line.

Figure 1: OIT Mission Priorities¹

¹ In addition to Auto Mod funding, OIT is additionally supported by APHIS and Immigration User Fees.

B. Budget Activities:

Automated Commercial Environment (ACE)/ International Trade Data System (ITDS)

ACE was created by Title VI of the *North American Free Trade Agreement Implementation Act*, (P.L. 103-182, commonly referred to as the Modernization Act of December 1993) to modernize import processing. Since that time other elements of customs modernization, such as enforcement and ITDS, have been added to enhance national border security. ITDS assists PGA in making use of ACE to support their border security, product safety, and international trade missions by helping the PGA design, develop, and integrate their requirements into ACE Cargo Release functionality. ITDS also provides guidance on the legal implications of PGA integration into ACE and serves as a forum for agency issues. Through ITDS, ACE provides a “single window” for filing and facilitating the exchange of trade and transportation information to improve business operations and facilitate lawful trade. A total of 47 government agencies are currently participating in the ACE/ITDS initiative.

CBP has aligned ACE with the DHS Quadrennial Homeland Security Review (QHSR) Mission 2: Securing and Managing our Borders, by reducing the country’s vulnerability to changing threats without diminishing economic security and by providing threat awareness, prevention, and protection for the homeland. Specifically, ACE provides DHS personnel with automated, modernized tools and information to help them decide, before a shipment reaches U.S. borders, what cargo should be targeted because it poses a potential risk and what cargo should be expedited because it complies with U.S. laws. Like ACS, ACE also supports the revenue collection activity through its account management and revenue collection functionality.

Information Technology (IT)

Funding for some IT in the CBP Salaries and Expenses Appropriation was realigned to Automation Modernization in the FY 2013 enacted appropriation. IT includes funding for most OIT divisions: Border Enforcement and Management Systems Division, Passenger Systems Program Directorate, and a small portion of Cargo Systems Program Directorate, OIT’s business support offices as well as some infrastructure costs incurred by Enterprise Networks & Technology Support Directorate and Enterprise Data Management & Engineering Directorate. In addition, IT funds direct operational support provided by OIT’s Laboratories and Scientific Services Directorate and approximately 50 percent of OIT’s direct staff costs.²

Critical Operations Protection and Processing Support (COPPS)

COPPS funding supports COPPS IT infrastructure, TECS modernization, and Terrorism Prevention Systems Enhancement (TPSE). COPPS provides a significant portion of funding to operate and maintain CBP’s IT infrastructure and the mission-critical IT systems used to secure the borders while facilitating legitimate trade and travel. The TECS Modernization Program is a multi-year project dedicated to modernizing TECS, which will improve and sustain DHS and other Federal agency screening capabilities into the future, and support new screening requirements and capabilities. TECS modernization will provide critical border enforcement and POE processing capabilities. TECS is a

² Additional OIT FTE and associated Salaries & Benefits costs are funded by IUF and APHIS user fees.

key tool for sharing passenger data information to determine the admissibility of individuals. TPSE focuses on enhancing system infrastructure and provides continuous, uninterrupted availability of operational systems.

Automated Targeting System (ATS)

ATS is a critical decision support tool that is the cornerstone for all CBP targeting efforts. CBP uses ATS to improve the collection, use, analysis, and dissemination of intelligence to target, identify, and prevent potential terrorists and terrorist weapons from entering the United States, and identify other violations and violators of U.S. law. In this way, ATS allows CBPOs to focus their efforts on travelers and cargo shipments that most warrant further attention. ATS standardizes names, addresses, conveyance names, and similar data so these data elements can be more easily associated with other business data to form a more complete picture of a traveler, import, or export in context with previous behavior of the parties involved. Every traveler and all shipments are processed through ATS, and are subject to a real-time, rule-based evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering. On a typical day, CBP, using ATS, conducts 100 percent risk assessments on the nearly one million travelers and over 66,000 containers entering at our air, land, and sea POEs.

C. Budget Request Summary:

In FY 2015, DHS requests \$812,410,000 and 1,581 positions and 1,527 FTE for Automation Modernization.

D. Efficiencies and Reductions:

Some of the efficiencies and reductions shown below are spread across multiple sub object class codes.

Other contract Services Efficiencies

\$2.25 million

Professional Services Contracts (\$2.0 million): This efficiency is a CBP agency-wide contracts savings initiative that will identify an across-the-board 5 percent cut to contract services in common service areas. The intent is to continue momentum to make new contract awards at more competitive labor categories, than the current legacy contracts that are still in place today beyond their originally intended period of performance.

CURRENT SERVICES PROGRAM DESCRIPTION:

ACE/ITDS is a CBP program designed to modernize the business processes and information technology systems essential to securing U.S. borders, facilitating the flow of legitimate shipments, and targeting illicit goods. ACE modernizes and enhances trade processing with features that provide account-based, consolidated, and automated border processing. It provides a centralized online access point to connect CBP, participating government agencies (PGA), and the trade community. ACE interfaces with and consolidates information from targeting, the Automated Commercial System (ACS), border enforcement systems, and PGA systems. ITDS is the mechanism for coordinating intergovernmental involvement with ACE.

ACE/ITDS benefits include:

- Single window for end-to-end trade processing lifecycle for CBP, PGA, and the trade community;
- Enhance cargo control business processes for imports and exports;

- Reduction of costly labor- and paper-intensive activities;
- Reporting of trade data to multiple agencies via a single, secure, Internet based portal;
- Improve operational processes and update policies and regulations associated with the trade modernization effort;
- Enhance revenue collection capability; and
- Ability to view and manage trade activity from a national account perspective.

In addition, ACE allows other government agencies to better fulfill the mandate set forth under the *Security and Accountability For Every Port Act of 2006* (P.L. 109-347), which requires agencies with licensing and admissibility requirements to participate in ITDS. ACE is the platform through which the vision and goals of the ITDS will be achieved by facilitating collection and distribution of standard electronic import and export data required by all Federal agencies that participate in ITDS. Once fully utilized, ACE will provide unprecedented interagency coordination and information sharing, ultimately making ACE the “single window” for the collection and dissemination of trade data.

CBP plans to finish core trade processing capabilities in ACE by the end of calendar year 2016. At that time, ACS will be fully decommissioned, except for its support of deposit and collection activity, which will likely continue until at least FY 2019. Such activity is responsible for \$40 billion in revenue annually, including:

- Cargo processes such as formal duty collection from importers and fees from international air, rail, and sea carriers;
- Non-cargo collection processes such as fees collected from the Traveling Public and Reimbursable Services provided by CBP; and
- Collections for enforcement actions that are managed in the Seized Asset and Case Tracking System and collected and deposited in ACS.

In FY 2013 and FY 2014, CBP will prepare to decommission the rest of ACS by achieving cost efficiencies in Operations and Maintenance (O&M) requirements and redirecting those savings to additional development. In FY 2013, DHS approved CBP's program re-baseline and plan that includes decommissioning of cargo capabilities on ACS. ACE implemented this plan during the fourth quarter 2013 and will complete development in 2016. Estimated savings in cost efficiencies is projected to be around five million annually and will be reinvested toward completing core ACE functionality.

Capabilities Delivered:

To date, ACE has deployed capabilities, which address the first four of the following five planned phases for the cargo business processing lifecycle:

1. Pre-arrival (manifests are submitted prior to cargo entering United States (U.S.);
2. Arrival (cargo arrives at U.S. Port of Entry);
3. Cargo release (CBP releases cargo for consummation);
4. Post-release (Entry Summaries are submitted, if they have not been pre-filed, reviewed, and liquidated, so that issues associated with payments of duty, taxes, and fees can be resolved); and
5. Collections (collecting duties, fees, and taxes of imports and exports).

Table 1 below indicates Entry Summaries filed from the latter half of FY 2009 through FY 2013. Filing Entry Summary's is a key component of the Post-Release process. ACE Entry Summary processing capabilities have been incrementally deployed since third quarter 2009.

Table 1: Total Entry Summaries Filed

* The FY 2009 data marker represents the latter half of that fiscal year, when ACE deployed entry summary capabilities.

The following table shows total revenue collected, broken down by Duties, Taxes and Fees (or Miscellaneous Collections):

Table 2: Total Revenue Collections Through ACE⁴

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013
Total Revenue Collected	\$29,529,729,864	\$32,023,009,855	\$37,180,898,372	\$39,404,171,101	\$41,345,291,006
Actual Duty Collections	\$23,445,340,326	\$25,629,936,745	\$29,830,547,586	\$31,160,245,897	\$31,245,631,876
Actual Taxes	\$2,460,572,052	\$2,722,274,659	\$2,855,564,187	\$3,000,169,532	\$3,000,285,167
Actual Misc. Collections	\$3,623,817,486	\$3,670,798,451	\$4,494,786,599	\$5,243,755,672	\$7,099,373,963

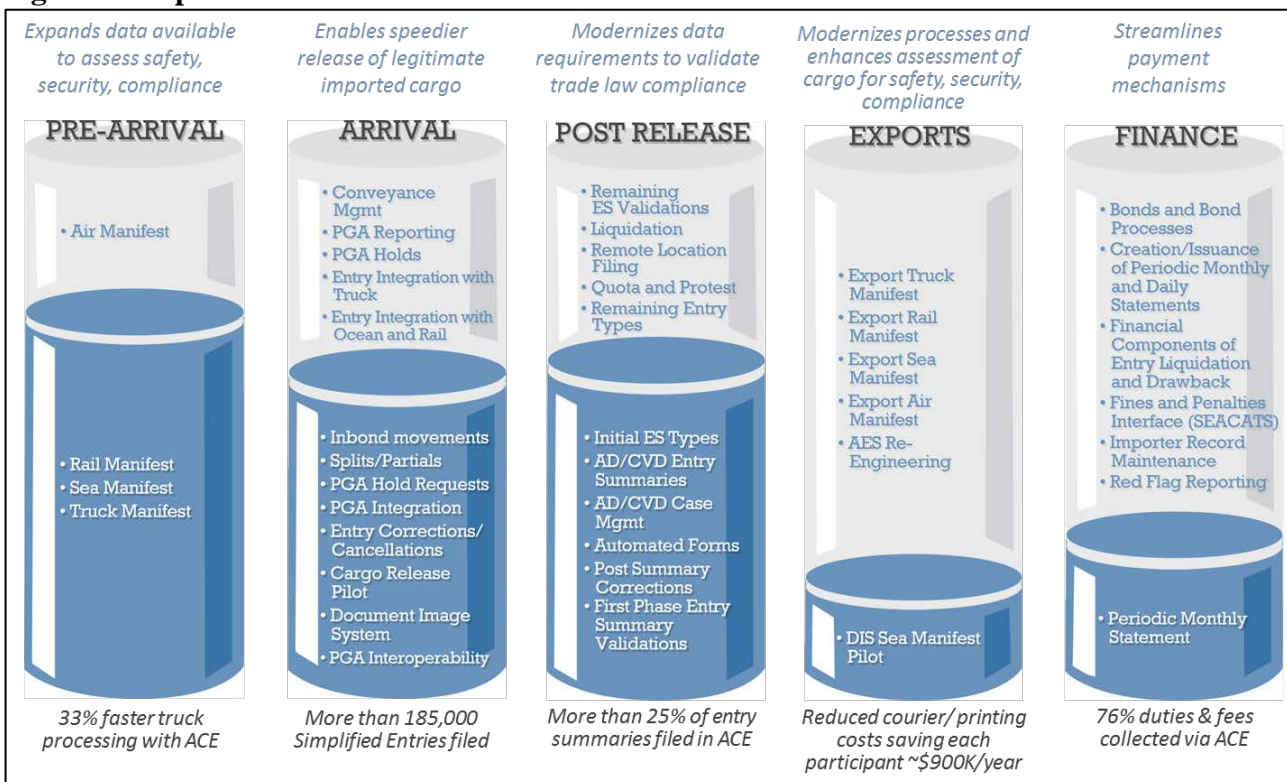

⁴ Total Revenue Collections represents the total revenue collected by CBP including custodial and entity revenue. ACE represents a small but growing portion of the total revenue CBP collects each year. The percentage of revenue collected by ACE increases by the capabilities ACE deploys. ACE is on track to meet Executive Order –Streamlining the Export/Import Process for America's Businesses deadline of December 31, 2016. At that time, ACE will be a primary system for capturing revenue at CBP.

CBP is further undertaking a modernization of the revenue collection process by improving financial management, increasing efficiencies, and strengthening operational performance through an integrated management infrastructure. The overall modernization process is comprised of three main components:

1. Achieve a long-term revenue management solution that enables CBP to collect, deposit, and report revenue more efficiently while limiting factors that compromise data integrity and the overall health of financial management.
2. Modernize revenue business processes and replace outdated financial systems to (a) improve the trade community's ability to do business with CBP; (b) provide better access to revenue financial information for CBP management and the Trade community; and (c) support financial reporting needs internal and external to CBP.
3. Strengthen financial processes that support the electronic collection of \$34.5 billion in entry collections today on cargo imports and contribute to a strong financial and analytical discipline within CBP.

Figure 1 below illustrates ACE capabilities that have been deployed and those planned for release. Deployed capabilities are assembled in the lower portion of the lifecycle phase in which they occur.

Figure 1: Capabilities Delivered in ACE

MAJOR ACQUISITIONS

Automated Commercial Environment (ACE)

ACE will form a comprehensive system that enables CBP to interact, manage, and oversee the import and export data, enforcement systems and cargo related financial management in order to provide end-to-end visibility of the entire trade cycle. With more automated tools and information CBP will be able to decide, before a shipment reaches U.S. borders, what cargo to target for further investigative action because it poses a potential risk, and what cargo to expedite because it complies with U.S. laws. Cargo Release through ACE will provide full and integrated import processing, which is not possible in the current legacy cargo system. Full and integrated import processing includes being the single window for the international trade community to electronically transmit import data needed by CBP and PGAs to assess the safety, security and compliance of cargo, track and hold suspect cargo, and quickly approve the release of legitimate cargo into the US.

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
128,566	140,762	141,061

FY 2015 Funding Breakout:

Program Area (\$\$\$ thousands)	Sub-Program	Mission Need
Disaster Recovery (2,595)	Data Center 1	Supports facilities, operations, and Disaster Recovery at Stennis.
	Data Center 2	Includes costs allocated to ACE for new, consolidated ACE infrastructure at the DHS data center in Clarksville, Virginia.
Operations & Maintenance (O&M) (58,291)	HW/SW Purchases	Provides technology refresh on older hardware and software.
	Hardware Maintenance	Provides assistance from the respective vendors to overcome any issues related to their hardware.
	Software Maintenance	Provides assistance from the respective vendors to overcome any issues related to their software.
	Infrastructure Support	Provides support for ACE Training, Certification, Development, Testing, and Production Environments.
	Network and Security Operations	Provides ACE systems with access control, monitoring, and reporting as well as support for ACE network infrastructure.
	Technology & Account Services Desk	Supports over 14,600 clients and the trade user community 24 hours a day and 365 days a year in bilingual (English/Spanish) language. Additionally, it supports the demands of the agile teaming requirements.

	Contract Closeouts	Provides funding needed to close out old ACE O&M contracts.
	Program Management	Costs for contractor labor to provide independent verification and validation (IV&V) of ACE infrastructure requirements and plans.
Production Application Maintenance (PAM) (12,387)	Application Maintenance	Provides ACE Production application maintenance such as fixing defects & making system enhancements to address user needs or other critical requirements & provides emergency Level 2 & 3 Help Desk services to address trouble tickets.
Communications, Training, and Business Transformation (CTBT) (4,223)	CT & BT Contract Support	Provides change management, field readiness, stakeholder engagement, and communications management support. Additional support includes assistance in supporting the Microsoft infrastructure to leverage CSPD's collaboration tools.
	HW/SW Purchases	Provides the funding to purchase E-learning tools used for trainings/demos and Photoshop software to be used for edits to the DIS Infographics.
	Travel	Travel costs associated with ACE outreach, training, and deployment
	Logistics	Costs associated with ACE related communications to stakeholders, webinars, and security services and incidental expenses related to TSN Plenary Sessions.
	Software Maintenance	Provides for the software renewals for continued access to certain software used for ACE communications, training, and business transformation.
	ACE Training Support	Provides training and support for ACE Production Applications (such as training, user guides, and other end-user support materials).
ACE Program Office Operations (14,505)	ACE Salaries	Salaries and fringe benefits for CBP employees supporting the ACE program.
	ACE Operating Costs	Provides for supplies, communications equipment, IT equipment, software, local travel, professional development, and other miscellaneous costs necessary to meet ACE program needs.
	Program Management Support Labor	Provides a full range of program management support to include financial management cost estimating, and acquisition program management.
ACE Product Backlog (49,060)	Application Development	Includes a variety of application development functions, including development and testing of new functionality, corrective and adaptive maintenance, and architecture and engineering services to support development.
	SME Travel	SME Travel supports the needs of development by

		providing teams with working professionals knowledgeable of day to day operations.
	O&M Tail	Provides operations & maintenance support for cargo systems applications and simplified entry
	Architecture & Engineering	Supports A&E functions such as providing high level system design, ensuring individual team designs integrate into system design, providing for design of common technical services, and insuring compliance with DHS/CBP Architecture.
	Test & Evaluation	Support contract required to conduct any operational test and evaluation events for the ACE program.
	HW/SW Purchases	Provides the funding to purchase development and testing activities that will provide a measure of execution times for sub-components of the systems.
	ACS Rehosting/ Migration Analysis	ACS Rehosting provides a means of moving existing ACS functionality from the legacy proprietary mainframe environment to a less expensive commodity environment faster and less expensively than rewriting all of the applications

Discussion of Selected Adjustments-to-Base

CBP requests to realign \$26 million in the non-pay base of the ACE PPA in order to adjust for planned award of major contracts for support services and hardware/software procurements required to support ACE program priorities. This realignment of funds does not alter the distribution between pay and non-pay within ACE or between ACE and another PPA. As such, it does not appear in the Schedule B display. This movement of funds is intended to enable the acquisition of hardware/software to support ACE priorities.

*Additional OIT pay costs are offset by immigration and agriculture user fees.

The CBP Office of Information and Technology (OIT) is funded within this PPA. OIT supports CBP by providing integrated, comprehensive technical support that facilitates both CBP and DHS missions. OIT is responsible for developing, acquiring, testing, and maintaining new and legacy applications (both government and commercial), and for ensuring the reliability of CBP's data infrastructure, which transmits critical data to and from CBP and DHS data centers to CBP agents and officers on the front-line. CBP's Information Technology applications contribute to CBP's multi-layered defense (data, inspection technology, and uniformed personnel), which enables users to connect to CBP's mission-critical applications at the CBP and/or DHS data centers. These applications also enable users to connect to a vast array of data related to operational areas of passenger and cargo processing, targeting, and border enforcement, as well as mission support areas of finance, human resource, and training.

Figure 1: OIT and the CBP Mission

OIT's responsibilities are broad and its stakeholders are diverse. OIT works to keep CBP mission-capable through efficient and cost-effective technology solutions and through services and scientific support. OIT's current operations and the challenges are significant. These challenges include aging infrastructure, complex customer needs, and increasing data demands. The numerous functions and services provided by the various OIT Divisions are described in greater detail below.

Table 1: Services provided by Information Technology

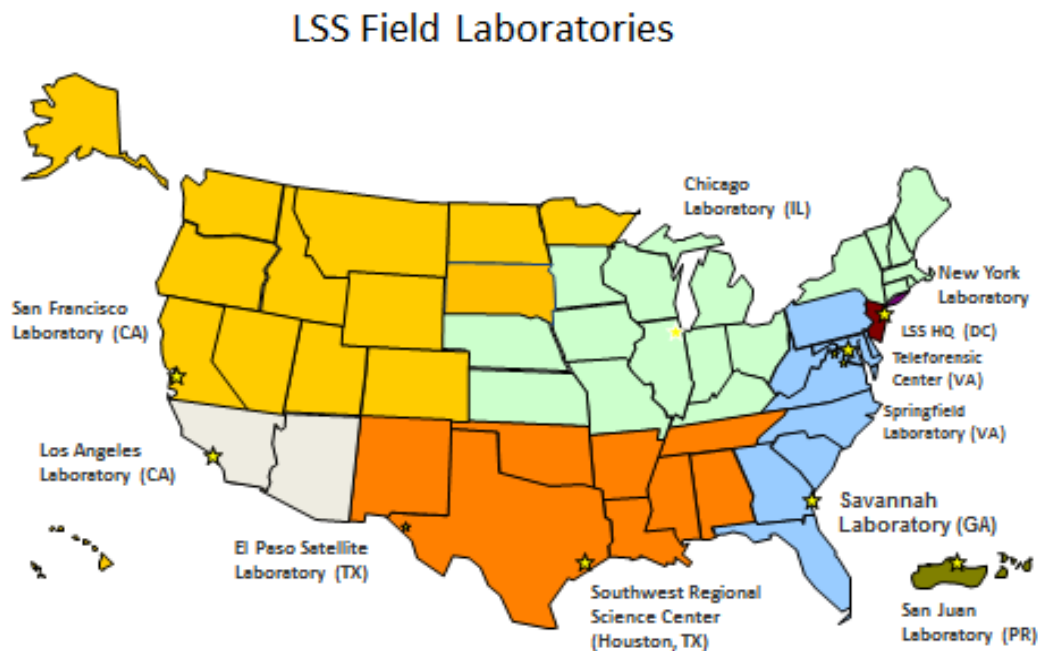

Division	Functions/Services
Border Enforcement and Management Systems Division	<ul style="list-style-type: none"> Supports CBP's activities by developing government software application systems that respond to the requirements of the Border Patrol; Includes the Enforcement Application for CBP; This system also maintains and ensures integration of CBP's financial, human resource, and mission support applications used for pay, officer scheduling, and travel; and Funding for BP Enforcement applications such as eGIS and ICAD are within the BSFIT appropriation.
Cargo Systems Program Directorate	<ul style="list-style-type: none"> Facilitates the flow of cargo at POEs through the development, operations, and maintenance of CBP's mission-critical trade systems; and Automated Export System is also funded within the Automation Modernization annual infrastructure PPA.
Passenger Systems Program Directorate	<ul style="list-style-type: none"> Facilitates the flow of people through the development, deployment, operations, and maintenance of numerous passenger applications that enable advanced passenger screening,

Division	Functions/Services
	<p>consolidated trusted traveler programs, and in-bound passenger screening. These applications provide critical information to the front-line to screen and vet passengers before departure and upon arrival at POEs. CBP's passenger processing systems enabled CBPOs to vet and screen 351.5 million pedestrians and passengers and over 98 million aircraft passengers at POEs in FY 2012. PSPD is also responsible for enrolling and processing applicants in the trusted traveler programs (Global Entry, NEXUS, SENTRI, and FAST);</p> <ul style="list-style-type: none"> • Supports other agencies outside CBP, including U.S. Citizenship & Immigration Services (USCIS) and Immigration & Customs Enforcement (ICE). In coordination with other law enforcement agencies, the program maintains, updates, and disseminates advance traveler information and lookout data in real time. These applications also provide entry and exit data to intelligence agencies and to the Office of Biometric Identity Management formally US-VISIT; and • Supports connectivity services to the FBI National Crime Information Center (NCIC) and to state data centers via the National Law Enforcement Telecommunications System. OIT supports Transportation Security Administration (TSA) by providing one central communication hub for carriers via DHS Router, which sends data to TSA and CBP as appropriate.
Wireless Systems Program Division	<ul style="list-style-type: none"> • Responsible for the land mobile radio infrastructure and subscriber equipment used by more than 40,000 CBP law enforcement agents and officers in the course of their duties. Exiting systems have gaps that may affect the operational efficiency of CBP's officers and agents performing their daily missions; and • Primary funding for wireless radio enhancement/upgrade is funded within the BSFIT appropriation.
Field Support Directorate (FSD)	<p>Provides customer support to CBP users throughout the day with support for CBP's operational systems and infrastructure. With staff dispersed throughout the United States who provide on-site support to CBP employees, Field Technology Officers are OIT's primary interface with CBP customers around the world. FSD services and maintains CBP's technology systems, networks, and equipment to minimize all systems' downtime. FSD is also responsible for the maintenance, repair, installation, and operation of a wide range of highly complex voice and data communications systems, video surveillance equipment, sensor intrusion systems, and Non-Intrusive Inspection (NII) devices.</p>
Enterprise Networks & Technology Support Directorate	<ul style="list-style-type: none"> • Responsible for enterprise architecture, design, and management of CBP network infrastructures. ENTSD provides operational technology support to all CBP field locations, technology

Division	Functions/Services
	<p>training, enterprise wide area network, security operations and helpdesk services. ENTSD provides local area network, wireless, surveillance and detection technology support to all CBP field offices, performs field outreach, manages field modernization projects, and oversees all field deployments. ENTSD is working to modernize CBP field locations by deploying a common wireless communications infrastructure and a consistent desktop configuration across all of CBP, while improving network diversity and survivability; and</p> <ul style="list-style-type: none"> • ENTSD provides reliable and responsive technology systems, tools, and services in unwavering support of the CBP mission to protect the country with goals of improved availability of critical systems, improved customer satisfaction and increased integration across teams and technologies.
Enterprise Data Management & Engineering Directorate (EDMED)	<ul style="list-style-type: none"> • Provides innovative IT services and solutions to CBP and DHS users by engineering solutions that provide optimal IT data integrity and accessibility that ensures performance quality, reliability and system availability which supports the protection of U.S. borders and the facilitation of legitimate trade; • Uses industry and government best practices to integrate business and technical solutions across OIT. EDMED provides its DHS and CBP users with enterprise architecture design and management, systems engineering, data center operations and services, strategic planning, security program management, technology evaluation and integration, audit coordination, and enterprise process management; and • Funded from both the Automation Modernization IT PPA and from the COPPS PPA.
Laboratories and Scientific Services Directorate (LSSD)	<ul style="list-style-type: none"> • Forensic and scientific arm of CBP, which provides forensic and scientific testing for Trade Enforcement, Weapons of Mass Effect, Intellectual Property Rights, and Narcotics Enforcement; • Staff in LSSD Headquarters, as well as eight field laboratories located throughout the U.S., one national research laboratory, and one teleforensics laboratory with the latter two located in Virginia (see Figure 5 below). In addition there are several mobile laboratories that are used at borders for random trade surges and for on-site emergency response and programmatic on-site border security operations. A specially trained laboratory forensic “jump team,” which can be activated at a moment’s notice to provide crime scene investigation, documentation, and testing for cases involving possible terrorist activity; and • Funded primarily through the Automation Modernization annual Infrastructure PPA. LSSD support provided to CBP’s NII program is funded through the CBP annual Salaries and Expense NII PPA.

Division	Functions/Services
OIT Support Organizations	OIT has several support organizations that provide support to all OIT program and support organizations. The Financial Management Division provides program, financial, and asset management oversight. The Workforce Management Division provides human resource and facility support. The Transformation Management Support Division (TSMD) is working to define and plan to meet future requirements from a human resource and acquisition perspective. The Chief of Staff provides coordination and oversight of OIT operations in support of the Chief Information Officer. Lastly, the Technology Directorate and Chief Security Officer serve to ensure that technologies approved and introduced to the CBP network meet the required architecture and security requirements to secure CBP's network and critical data.

Figure 2: Laboratories and Scientific Services Directorate – Field Locations

Working Capital Fund Activity

CBP's Working Capital Fund (WCF) costs that are paid from the IT PPA are provided below. Additional WCF costs are paid from the S&E appropriation.

CBP Office	Working Capital Fund (CBP)	FY 2015 Anticipated Charges
OIT	Research Library & Information Services (RLIS)	\$ 2,406,755
	CIO/DHS Infrastructure Transformation Program	\$ 17,876,078
	Enterprise License Agreements	\$ 25,725,151
	NCR Infrastructure Operations	\$ -
	CLAN Operations	\$ 1,727,887
	OIT/Automation Modernization Total	\$ 47,735,871

Organizational Performance

OIT is responsible for overseeing and managing CBP's information technology (IT) infrastructure that supports over 60,000 CBP employees, other government agencies, and CBP travel and trade partners to manage, control, and protect the country's borders at and between POEs. CBP is responsible for protecting over 5,000 miles of border with Canada, 1,900 miles of border with Mexico, and 95,000 miles of shoreline. On a daily basis, CBP's IT infrastructure and applications process an average of 992,242 passengers and pedestrians and 307,511 conveyances; enable over 1,100 apprehensions for illegal entry and the seizure of 12,000 pounds of narcotics; and prevent the entry of 4,819 harmful agricultural pests, plants, and animals. This translates into the daily processing of more than 21 billion messages and nearly 30 billion database queries with OGAs, passenger carriers, cargo brokers, trade representatives, and airlines.

CBP accomplishes its mission through a comprehensive enforcement strategy that depends on vast IT infrastructure. OIT operates the IT infrastructure, repairs and maintains equipment deployed domestically and abroad, troubleshoots daily incidents, ensures security of the infrastructure, develops new capabilities in support of the mission, and provides lab and forensic support. The implementation and sustainment of business processes is achieved through the design, development, programming, testing, implementation, training, and maintenance of automated systems.

OIT manages all of CBP computer facilities and systems including the hardware, software, data, video and voice communications, and related financial resources. In addition, OIT is responsible for identifying and evaluating new technologies for applications in support of CBP business processes. CBP IT infrastructure directly enables operational outcomes by providing real-time access to critical applications and data back within seconds. CBP's IT systems allow frontline officers and agents to process millions of passengers and pedestrians arriving internationally, by air, sea, and land across U.S. borders; and to process truck, rail, and sea containers, and shipments of goods, while collecting more than \$112 million per day in fees, duties, and tariffs.

CBP's IT infrastructure and applications process daily more than 21 billion messages and 50 to 55 billion database queries with other governmental agencies, passenger carriers, cargo brokers, trade representatives, and airlines, a volume of daily queries among the highest in the world.

MAJOR ACQUISITIONS

Advance Passenger Information System (APIS)

The Advanced Passenger Information System (APIS) is used to review air, sea, train, and limited bus passengers and crew in an effort to identify high-risk individuals, and facilitate the clearance process for legitimate travelers. *The Aviation and Transportation Security Act (ATSA)* became law on November 19, 2001. Section 115 of ATSA requires commercial air carriers to provide APIS data for inbound passengers and crewmembers before their arrival in the United States. Principal beneficiaries include CBP, Transportation Security Administration, and commercial air carriers. The APIS program is focusing on limited enhancement of functionality, data examination and improvement, support for carrier submissions, and coordination with TECS Modernization development of Manifest Processing module of High Performance Primary Query and Manifest Processing (HPPQ&MP). APIS will be modernized with an accompanying conversion of data under TECS Modernization.

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
2,374	2,370	2,382

FY 2015 Funding Breakout:

Program Area (\$K)	Sub-Program	Mission Need
Design (0)		
Development (0)		
Maintenance (2,382)		This area includes administration and training, travel, contractor services support, and program coordination and continuity associated for the program during the sustainment. APIS maintenance activities also include eAPIS, which is a web-based internet accessible function(s) developed to allow air carriers and vessels that operate without advance departure control systems, and iAPIS that is a web-based user interface that allows end-users to tailor reports, make ad hoc data queries, generate compliance reports, and perform trend analysis. Executive management will be able to review carrier performance more easily through the use of the Business Objects Dashboard Manager, which provides a graphical representation of the data. iAPIS will eventually automate the labor-intensive manual pre-penalty process

Arrival and Departure Information System (ADIS)

Operate and maintain automated arrival and departure identification services currently provided by the Arrival and Departure Information System (ADIS) at the levels of performance negotiated in the Service Level Agreements.

ADIS is proposed to be funded out of two PPAs in FY 2015, as follows:

- Inspections, Trade, and Travel Facilitation \$26.867 million

- COPPS \$2.099 million

Tactical Communications (TACCOM) Modernization

TACCOM is proposed to be funded out of two PPAs in FY 2015, as follows:

- Information Technology \$ 3.757 million
- BSFIT Operations & Maintenance \$25.850 million

Infrastructure

Infrastructure is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- APHIS \$52.378 million
- COPPS \$141.150 million
- Information Technology \$186.787 million
- Global Entry \$0.003 million
- IUF \$90.121 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
480,830	495,175	470,439

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Operations and Maintenance (470,439)	Data Center Services (DC)	Facilities and computer equipment used for storage, management, and dissemination of electronic customs and trade data and information used to support missions of DHS and authorized law enforcement partners.
	Desktop Services (Desk)	The acquisition, deployment, and ongoing support of the technology associated with the desktop computing environment for CBP personnel at more than 1,300 locations.
	Email Services (Email)	Provision of email services to more than 65,000 CBP employees worldwide.
	Help Desk Services (Help)	Support service that troubleshoots problems with computers and other information technology products in response to CBP's workforce of more than 60,000, as well as public users of the Global Online Enrollment System.
	Network Services (Net)	Network communication line/bandwidth, routers, firewalls, intrusion detection and other security infrastructure enabling CBP personnel to access mission critical data and information resources.
	Program Management (PM)	Strategic planning, risk management, budget oversight and acquisition management for the CBP Infrastructure Program.
	Site Services (Site)	The field resources deployed to provide on-site IT infrastructure user support at more than 1,300 locations

		including land/air/sea ports of entry, labs, and offices.
	Video Services (Video)	Video conferencing capabilities that allow more than 300 CBP sites to instantly “meet” perform corporate training, conduct interviewing, recruit new personnel, conduct daily meeting and project management and connect to courtroom depositions.
	Voice Services (Voice)	Land line services, telephone devices, VOIP appliances, servers, handsets and software added to CBP’s data network to allow voice communications between CBP’s ports of entry and offices nationwide.
	Wireless Services (Wireless)	Provision of pagers, cellular telephones, wireless local area networks, wireless wide area networks, cellular phones, satellite networks, and DHS computers and/or laptops with wireless modems to enable CBP personnel at ports of entry, on remote border locations, and in local/region/HQ offices to conduct vital communication when not at conventional desk locations.

Discussion of Selected Adjustments-to-Base

Transfer from BSFIT to Insource Contract Positions: In FY 15, OIT in coordination with the CBP Office of Technology Innovation and Acquisition (OTIA) requests authorization to federalize 33 mission-critical positions to support IT activities related to Border Security Fencing, Infrastructure, and Technology (BSFIT), including Block 1, the Mobile Surveillance System, and Northern Border-1. OTIA’s BSFIT appropriation currently funds contractors to perform these critical BSFIT-related IT services. OTIA’s BSFIT appropriation will be permanently reduced by \$4.176M in FY15 and OIT’s Automation Modernization appropriation will increase by \$4.176M in FY15 to support the federalized positions.

Greater Cost Recovery due to AQI Fee Increase: CBP anticipates receiving an additional \$92.7 million from APHIS in FY 2015. USDA completed a comprehensive fee study on its fees in FY 2012. In FY 2013, USDA drafted the updated regulation to adjust the user fee rates. At the time of this budget submission, the new regulation has not been published; however, USDA expects that the full implementation will take place no later than the end of Q1 FY 2015. This \$92.7 million projection is based on the assumption that a fee increase will be implemented starting in the second quarter of FY 2015. This increase of \$92.7 million will be used to recoup additional agriculture inspection costs incurred in CBP’s S&E, Automation Modernization, and Construction and Facilities Management appropriations in FY 2015. This additional \$92.7 million will allow CBP to recoup approximately \$50.563 million in S&E, \$29.005 million in Automation, and \$13.132 million in the Construction and Facilities Management appropriations.

	FY15*	FY14	FY13	FY12	FY11	FY10
Transfers	\$464,514,000	\$362,525,867	\$349,590,985	\$344,805,278	\$319,115,786	\$312,227,127
Costs	\$500,127,000	\$479,010,000	\$454,625,265	\$479,009,843	\$469,906,633	\$455,446,398
Deficit	\$(35,613,000)	\$(116,484,133)	\$(105,034,280)	\$(134,204,565)	\$(150,790,847)	\$(143,222,271)
Recovery	93%	76%	77%	72%	68%	69%

CURRENT SERVICES PROGRAM DESCRIPTION:

The Critical Operations Protection and Processing Support (COPPS) PPA supports:

- **COPPS IT Infrastructure (\$134.275 million):** Operation and maintenance of a complex network of hardware, software, data switches, and routers, and engineering and data center services, that must be in place to transmit screening, targeting, terrorist watch list, and apprehension data from CBP's mission-critical IT systems to the front line.
- **TECS Modernization (\$50 million):** Multi-year project that will enhance CBP's passenger screening capabilities by developing and deploying a modernized TECS to transition to the CBP common IT infrastructure, and to better meet operational needs of CBP officers at POEs.
- **Terrorism Prevention Systems Enhancement (TPSE) (\$10 million):** Provides for backup redundancy of data at the DHS data center to ensure availability of operational systems all day,

every day to meet processing and storage/backup requirements for passenger screening requirements.

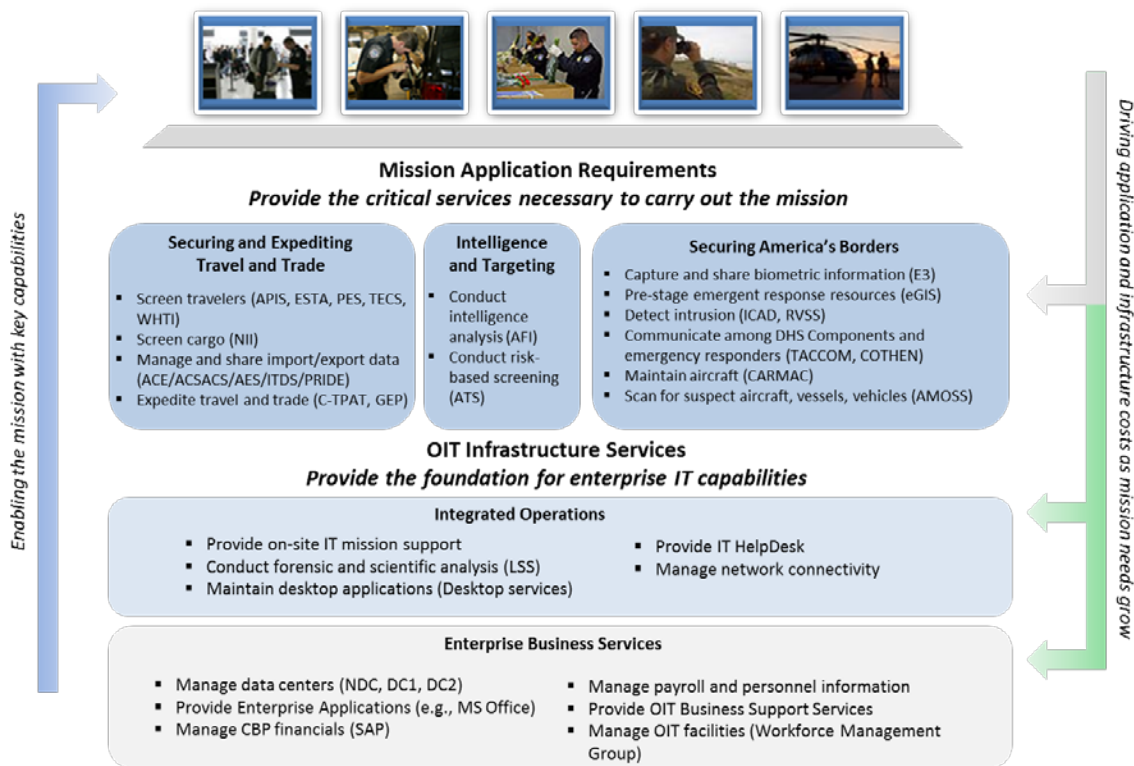

COPPS IT Infrastructure

COPPS funds a significant portion of the funding needed to operate and maintain CBP IT infrastructure and the data network that supports the storage, transmission, and delivery of all data used to determine the admissibility of persons and cargo from CBP and DHS data centers to the front lines. A complex network of field equipment hardware, software, data routers, and switches is required in each of CBP's 1,200 field locations to connect users to the data centers, which provide storage, retrieval, engineering, network monitoring, and other capabilities.

CBP IT infrastructure supports the daily operations and maintenance requirements of mission support personnel and provides connectivity and data transmission for users within CBP, PGAs, and CBP trade and travel partners. It enables users to connect to mission critical applications (hosted at CBP and DHS data centers) and also connects users to a vast array of data related to the operational areas of passenger and cargo processing, targeting, and border enforcement, as well as the mission support areas of finance, human resources, and training.

Data and the flow of information are critical to the CBP mission, as CBP officers and agents send and receive billions of passenger and cargo queries each day to determine admissibility abroad and at POEs. By providing thousands of employees in the field with critical intelligence and targeting data, to managing all aspects of tactical communications, COPPS applications serve as a force multiplier for the frontline to obtain quick assessment of admissibility, while promoting efficiency and agility.

Figure 1: Growth in mission requirements places new demands on IT applications and has a corresponding cost impact on the IT infrastructure

To address the emergence and proliferation of new technologies, OIT is actively working to review its capabilities and change its processes for service delivery. OIT has undertaken efforts to simplify and migrate its production applications on future state standard architecture, and has started to migrate applications to DHS data centers. These migration efforts will continue, with funding provided in the DHS Chief Information Officer's budget.

CBP relies on DHS migration funding to move and transform existing legacy applications from CBP's National Data Center to the new standard operating platform at the DHS data centers, which, when fully implemented, will minimize the risk of application outages and reduce the cost of future operations and maintenance to meet mission needs with reduced budgets. OIT has sought to modernize, upgrade, and standardize the operating environment at Data Centers 1 and 2 to reduce operating costs in advance of migration. Now that migration has begun, CBP must continue to move its productions applications from the CBP National Data Center to the two DHS data centers so that CBP is not left with production applications in multiple environments that will be more costly to sustain in the future.

CBP is looking to migrate all legacy mainframe applications to the new environment to avoid significant cost increases expected in future years when contracts for legacy technologies that exist primarily for CBP are due to be renegotiated. If not migrated by FY 2015, CBP will require significant upgrades in technology and software licensing that will exceed budget available (see chart). OIT is

currently testing various methods of re-hosting mainframe applications, and migrating old software code.

CBP infrastructure serves a variety of federal, state, local, and international government agencies. Furthermore, all of CBP’s major mission-critical systems, applications, and programs, as well as mission support applications, depend upon IT infrastructure to access and transmit data from some 3,600 CBP facilities to the CBP National Data Center (NDC). On a typical day, CBP systems process data from over 1,000,000 inbound passengers; 350,000 passenger vehicles; 60,000 truck, rail, & sea containers; 2,500 aircraft; 550 vessels; and 85,000 merchandise entries; and collect over \$74 million in revenue. Such a workload demands quick data responses from CBP’s IT infrastructure. The systems assist CBPOs in identifying potential threats, including terrorists, weapons of mass destruction, and bioterrorism. They also provide the means by which U.S. criminal and trade laws are enforced and provide the capability to collect tariffs and taxes related to international trade and commerce.

The majority of COPPS supports on-going necessary operations and maintenance of network engineering services, data center services, the Technical Support Desk (help desk), annual hardware/software licensing and maintenance, and e-mail. Network Services include the hardware, software, and communication services that allow any two computers or other devices to quickly and effectively exchange data. These services are described in greater detail below.

Table 1: Services provided by COPPS

Services	
Data center services	<ul style="list-style-type: none"> • The facilities used for equipment and the storage, management, and dissemination of electronic data and information to users; • Data center operations include the management and oversight of data center facilities and computer operations activities, such as validating and documenting any change made to production systems, providing email services, and incident reporting from the Situation Room; and • Supports CBP activities all day, every day. Other PPAs such as ACE and Targeting also provide funding for data center services.
Help desk services	<ul style="list-style-type: none"> • Provides information, assistance, and 24x7x365 support to

	troubleshoot problems with computers and other information technology products; and The Technology Service Center is the initial single point of contact for reporting system, application, email, LAN, communications, and hardware problems for CBP IT worldwide.
Hardware	<ul style="list-style-type: none"> Includes backup generators, scanners, hand held computers, a network operations center, Local and Wide Area Networks, routers, encryptors, gateways, firewalls, mainframe computers, workstations, file/email/database/application servers, modems, and Value Added Network (VAN) connections; and Software includes application development tools, Operating Systems, Program and Configuration Management tools, Office Automation tools, Section 508 tools, testing tools, LAN/WAN administration tools, and other management tools.
Email Services	<ul style="list-style-type: none"> Includes the acquisition, deployment, and ongoing support for email platform hardware and software; and Examples of costs included in email services are system software (e.g. Microsoft Outlook), hardware (servers, workstations, storage – Storage Area Network (SAN), tape backup), diagnostic tools, troubleshooting tools, antivirus, intrusion detection, and management tools for change, configuration, and release management.

TECS Modernization (\$50 million)

TECS Modernization is also funded within the COPPS PPA. TECS is a key passenger border enforcement system for CBP and DHS, which plays an essential role in the screening of travelers entering the U.S. as well as supporting the screening requirements of other federal agencies. Modernizing TECS functionality is critical to CBP's border enforcement mission. The current TECS system is more than 20 years old and uses hardware and software technology that will be increasingly difficult to support. Completing TECS Modernization reduces CBP's reliance on unsupportable mainframe technology and costly third party software licenses for which CBP is one of the few remaining customers. Reliance on these old technologies increases the risk of failure and inability to meet future anticipated increased operational demand, for critical border security functions for CBP, DHS, and other government agencies that depend on TECS for their daily operations. The multi-year TECS Modernization projects described in Table 2 will update and improve the system.

Table 2: TECS Modernization Projects

TECS Modernization Projects	
Secondary Inspection	<ul style="list-style-type: none"> Consolidates and replaces the functionality of three legacy processes for supporting passport control (immigration), baggage control, and agriculture inspections as well as the ability to view the results of previous secondary inspections; Modernizes inspection logs, where additional information is documented regarding physical inspection of travelers, vehicles, or their belongings;

TECS Modernization Projects	
	<ul style="list-style-type: none"> • Provides single sign on and data transfer with the adverse actions application providing officers a “holistic” secondary inspection capabilities; and • Migrates the secondary inspection data from the legacy system to the target databases.
High Performance Primary Query	<ul style="list-style-type: none"> • Supports person and vehicle searches to better integrate available data within TECS, provides fast response times and near real time availability of lookout records when entered into legacy TECS for primary inspections; • Advance Passenger Information System (APIS) will also be modernized under this project; and • First TECS Modernization project to initiate the migration of data from the legacy system to the target databases.
Travel Document and Encounter Data	<ul style="list-style-type: none"> • Provides improved functionality for querying and validating travel documents and encounter data for passengers and conveyances; and • Project will support the migration of travel document and encounter data from the legacy system to the target databases.
Lookout Record Data and Services	<ul style="list-style-type: none"> • Migrates mainframe-based lookout records to target infrastructure and provide CBP and will support the creation and maintenance of the lookout records; and • Supports internal CBP systems and external agencies with access to lookout records and TECS screening/vetting via services.
Primary Inspection Processes	<ul style="list-style-type: none"> • Completes modernization for existing primary applications (Air, Sea, and Land), transitioning data and processing off of the legacy system and onto the modernization infrastructure and target databases; and • Business operations will be modernized to support random referral and operational messaging to primary officers.

The multi-year Modernization project will employ an incremental approach that addresses seven objectives as established in the CBP Mission Needs Statement:

1. Reduce the possibility of missing someone who should be intercepted by improving data integration and search capabilities. TECS Modernization will improve both the integrity of data as well as search capabilities so front-line CBP officers can effectively make border crossing decisions;
2. Improve access to person-centric information by Government officials. Improved access through graphical user interface search results that can be sorted and filtered easily by the user unlike the static results TECS provides today. TECS Modernization will provide an updated system with better access, improved information sharing, and tighter security over sensitive person-centric information;
3. Improve the effectiveness and efficiency of secondary inspections by combining 3 legacy functions into one CBP function. It also provides integration with other systems sharing data and not requiring the officer to sign into the other system but allowing them to move seamlessly between the two systems. Secondary now provides secondary officers with the

same information viewed by primary officers to make the referral. TECS Modernization will simplify and streamline one of the most important CBP functions, Secondary Inspections. TECS Modernization will eliminate the need to re-enter redundant data and make it easier for end users to do their jobs;

4. Improve flexibility to incorporate new capabilities and respond to evolving threats. TECS Modernization will provide a more modular environment, more receptive to changes for meeting critical business objectives;
5. Provide a highly reliable and scalable system with quick response times that meet the Key Performance Parameters for transferring lookout data from legacy to modern in under 30 seconds and having a 1 second response time for high performance primary query. TECS Modernization is built on a much more scalable foundation so that CBP can grow and meet new emerging requirements;
6. Eliminate dated technologies that are no longer able to support the CBP mission over the long term. TECS Modernization will provide newer technologies that make it easier to maintain the system without taking the entire system down which disrupts critical field activities; and
7. Comply with CBP and DHS mandates such as Service Oriented Architecture. TECS Modernization will significantly improve how components and functions can be combined and configured into an overall compliant architecture.

TECS provides critical POE border enforcement and is the primary lookout record database for all of DHS. TECS currently:

- Provides subject record “watch list” processing for DHS and other agencies (this includes maintenance of lookout records and vetting services against these records with PGAs and international partners);
- Supports primary and secondary inspections for persons and conveyances at the POEs;
- Tracks crossing history for persons and conveyances;
- Receives and processes more than one million passenger manifests from carriers every day;
- Provides screening services for more than 20 PGAs, trusted traveler programs, ESTA, and supports targeting analysis;
- Supports more than 70,000 users from over 20 federal agencies responsible for screening to determine benefits, traveler processing, investigations, case management, and intelligence;
- Provides entry/exit data to other systems/agencies;
- Provides a real time interface with Federal Bureau of Investigation’s National Criminal Information Center (NCIC) and Integrated Automated Fingerprint Information System (IAFIS) for on-line-queries of wants/warrants and criminal history records;
- Provides a real-time interface to National Law Enforcement Telecommunications System (Nlets) for on-line queries of driver’s licenses, vehicle registration and state wants/warrants from all 50 states and Canada;
- Provides a real time interface with the US-VISIT Automated Biometric Identification System (IDENT) system for collection and verification of fingerprints of non-U.S. citizens;

- Provides a real-time interface to travel document issuing authorities (the travel document photos and biographic data are displayed at primary and secondary inspection, and made available for data share with other federal stakeholders as provisioned in the memoranda of understanding. These issuing authorities include the Department of State, U.S. Citizenship and Immigration Services, CBP's Trusted Traveler Programs, departments of motor vehicles of states and Canadian provinces with enhanced driver's licenses, and tribal authorities);
- Processes over two million transactions daily; and
- Supports the case management solution for ICE investigations including functions such as Investigative Case Management, Money Laundering Tracking and Reporting, Casino and Bank Secrecy Act data, Telephone Analysis and other functionalities unique to ICE's mission.

Terrorism Prevention Systems Enhancements (\$10 million)

The Terrorism Prevention Systems Enhancement (TPSE) operations and maintenance is also funded within the COPPS PPA. The program was initiated in FY 2008 to ensure uninterrupted availability of IT systems and monitoring in the passenger and targeting areas by enhancing critical IT infrastructure. The infrastructure enhancements implemented at CBP's National Data Center (NDC), the two DHS Data Centers, and the targeted POEs, improved availability and reliability. The program enhances CBP's efforts to provide uninterrupted availability of operational systems to meet the processing as well as storage and backup requirements for passenger screening. On-going sustainment ensures that continuous passenger systems operations are in place to meet the mission demand and withstand threats which could compromise system availability.

MAJOR ACQUISITIONS

TECS Modernization

The focus of CBP TECS Mod is to improve the technological and data sharing functions at and between the Ports of Entry (POEs) and to improve Primary and Secondary Inspection processes at border POEs. CBP TECS Mod will also modernize the core TECS subject record and support services for all TECS users. This modernization effort includes new applications and host system components that are specific to the CBP mission. TECS Modernization addresses performance gaps that exist in the Legacy TECS. CBP will accomplish this investment through modernization and enhancement of five major system applications processes.

Program Area (\$000 – Estimate*)	Sub-Program	Mission Need
Design (0)		
Development (\$14,000)		<p>FY15 will complete the TECS Mod development in the four areas of:</p> <ul style="list-style-type: none"> - Secondary Inspection (SI) supports processing of travelers referred from primary inspection for either enforcement or administrative reasons. - High Performance Primary Query (HPPQ) is a high performance service of the modernized TECS to support Primary Query functions and to modernize manifest processing. - Travel Documents and Encounter Data (TD ED) provides for the conversion of travel document data from the Department of State, USCIS, state, and provincial governments and crossing data. - Lookout Record Data and Services (LRDS) migrates lookout records creation and maintenance to modernized infrastructure and provides access via modern services. <p>FY15 will continue the development of Primary Inspections Project (PIP) which modernizes the primary and alternate inspection processing.</p> <p>TECS Mod supports the CBP goals of securing and facilitating legitimate travel. TECS is critical to CBP, DHS and other Federal agencies to provide information on people, vehicles, vessels and aircraft that may pose a danger to the security of the US.</p>
Maintenance (\$35,589)		<p>FY15 will maintain the functionality already deployed in the 5 key areas listed under development. This includes contractor services support, data center operations, hardware and software licenses, training, travel and program coordination and continuity associated for the program during the sustainment. Keeping the modernized TECS running supports the CBP goals of securing and facilitating legitimate travel. TECS is critical to CBP, DHS and other Federal agencies to provide information on people, vehicles, vessels and aircraft that may pose a danger to the security of the US.</p>
Security (\$413)		<p>This program area address the provision of security services for the TECS MOD program, including security planning, programming and support, and Certification and Accreditation (C&A), and privacy considerations. Security is critical to TECS to protect the law enforcement and privacy data in TECS and maintain active auditing.</p>

Infrastructure

Infrastructure is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- APHIS \$52.378 million
- COPPS \$141.150 million
- Information Technology \$186.787 million
- Global Entry \$0.003 million
- IUF \$90.121 million

CURRENT SERVICES PROGRAM DESCRIPTION:

ATS consists of six modules that focus on exports, imports, passengers, and crew (airline passengers and crew on international flights, passengers and crew on sea carriers), private vehicles crossing at land borders, and import trends over time. ATS assists CBPOs at the borders to effectively and efficiently identify cargo, individuals, or conveyances that may present additional risk to the United States. The six modules are:

1. ATS-Inbound – serves as the decision support tool for inbound targeting of cargo;
2. ATS-Outbound – targets outbound cargo and assists in identifying exports posing a high risk of containing goods requiring specific export licenses, narcotics, or other contraband;
3. ATS-Passenger (ATS-P) – used at all U.S. airports and seaports receiving international flights and voyages to evaluate passengers and crewmembers prior to arrival or departure;
4. ATS-Land (ATS-L) – provides analysis and rules-based risk assessment of private passenger vehicles crossing the nation's borders;

5. ATS-Trend Analysis and Analytical Selectivity – improves CBP’s ability to examine, locate, and target for action violators of U.S. laws, treaties, quotas, and policies regarding international trade; and,
6. ATS-International - provides foreign custom authorities with automated cargo targeting capabilities and provides a systematic medium for exchanging best practices and developing and testing targeting concepts.

CBP’s efforts are parsed into four primary categories:

OIL Personnel	System Hardware & Software Upgrades	Targeting Methodology Improvements	Infrastructure Improvements
<ul style="list-style-type: none"> - Identification, development, implementation, and refinement of mechanisms for various targeting methodologies and responding to security-related operational and real time events; and - Expand targeting coverage to more completely analyze and make improvements to targeting capabilities, coordinate intelligence, and support architectural improvements. 	<ul style="list-style-type: none"> - Network improvements; - Security and monitoring; - Geospatial tools; - Discovery and exploration tools; and - New proprietary data sources. 	<ul style="list-style-type: none"> - Advanced targeting capabilities to include Entity Resolution, Predictive Modeling and Visualization, Intelligence Driven Targeting, and Machine Learning; - Cargo targeting methodology refresh including capture of findings information and support to outbound targeting; - Integration of trade interfaces for screening and targeting; - Automated Targeting System – current maintenance/enhancements and future engagement with international partners; - Land border pedestrian rule development, deployment, and validation; - Targeting effectiveness metrics; - Threshold targeting; and - Continuous vetting capabilities. 	<ul style="list-style-type: none"> - Failover/Disaster recovery of the ATS modules; - ATS hardware and software upgrades including high availability appliances; infrastructure and circuits technology refresh; data center infrastructure refresh; - Maximum redundancy and network diversity; and - Other critical O&M costs associated with CBP Targeting Enterprise (including, but not limited to, periodic technology refreshes and other necessary hardware/software upgrades.

CBP’s targeting systems allow CBP to confirm identity in order to interdict watchlisted individuals and assist in identifying previously unidentified, or "unknown," high-risk travelers, cargo shipments, and conveyances by using intelligence-driven targeting rules. These automated targeting rules are developed by subject matter experts and are based on actionable intelligence derived from current Intelligence Community reporting or other law enforcement information available to CBP. The rules are not designed to determine a traveler’s risk using a weighted score or rank, but rather, focus on risk factors, travel scenarios, or affiliations that may indicate an elevated level of concern.

Although the primary focus of the targeting programs is to identify terrorist operatives and/or mitigate terrorism threats, targeting rules are also used to support CBP’s mission of enforcing the laws of the United States at the borders. This includes targeting for individuals or businesses who may be involved in other criminal activity, such as narcotics or currency smuggling, or travelers seeking illegal entry into the United States through, for example, visa fraud or human smuggling.

A large number of rules are included in the ATS modules that encapsulate sophisticated concepts of business activity, which help identify suspicious or unusual behavior. The ATS rules are constantly evolving to both meet new threats and refine existing rules. ATS applies the same methodology to all individuals to preclude any possibility of disparate treatment of individuals or groups. ATS is consistent in its evaluation of risk associated with individuals and is used to support the overall CBP intelligence and law enforcement mission. CBP's targeting programs assisted in the identification and/or apprehension of suspects in the following terrorist cases and the total number of high risk travelers and cargo identified:

- **September 2009:** Najibullah Zazi plotted an attack against the New York City subway system; CBP identified both of Zazi's previously unknown co-conspirators.
- **October 2009:** David Coleman Headley was arrested and pled guilty to plotting attacks in Copenhagen and conducting surveillance in support of the November 2008 attacks in Mumbai, India; CBP identified Headley using partial name and travel routing provided by the Federal Bureau of Investigation (FBI).
- **May 2010:** Faisal Shahzad attempted to detonate a Vehicle Borne Improvised Explosive Device in Times Square, NYC. Shaahzad trained in Pakistan, and was influenced by radical Yemeni cleric Anwar al-Aulaqi; CBP's encounter reporting was pivotal in identifying Shahzad through his Passenger Name Record (PNR) telephone number.

In order to make risk-based operational decisions before a passenger boards an aircraft, and continuing until the traveler enters the United States, CBP leverages all available advance information on in-bound passengers. As a result of advance travel information, CBP assesses passenger risk ahead of time, often days before a traveler boards a plane. Throughout the travel process – from reservation, to check-in, to boarding at a foreign point of origin – CBP devotes its resources to identifying the highest threats, including those who may not have been exposed by the Intelligence Community. The visa process, run by the Department of State (DOS), provides one source of information, and for travelers under the Visa Waiver Program, CBP has the opportunity to assess their risk via the Electronic System for Travel Authorization (ESTA). CBP assesses travelers' risk when they purchase their ticket and/or make a reservation, and when they check-in for their flight. Currently, in all cases before an international flight departs for the United States from a foreign point of origin, the airline transmits Advance Passenger Information (API) for passenger and crew to CBP.

Exhibit 1: High Risk Travelers Identified

Fiscal Year	APIS	VISA	ESTA
2008	245,854	-	-
2009	250,320	-	-
2010	250,811	8,217	-

2012	313,717	28,624	139,923
Sub Total	1,358,322	49,186	198,966
TOTAL	1,606,474		

Note: VISA and ESTA Hotlists do not go back 5 years.

Exhibit 2: High Risk Cargo Identified

Fiscal Year	Number of Shipments Identified
2008	441,543
2009	482,625
2010	528,614
2011	594,821
2012	694,757
TOTAL	2,742,360

The targeting programs continue to identify high-risk travelers, cargo shipments, and conveyances for inspection and examination. CBP is also partnering with other agencies, domestic and foreign, on using the methodology of the targeting programs to identify suspects in other environments. The progress and outcome of these initiatives are highly dependent on the participation of foreign partners and available funding, including funding streams from DOS and Department of Defense (DoD) initiatives. These include the following ongoing long-term projects:

- **The Global Advance Passenger Information (API)/Passenger Name Record (PNR) Project:** This project builds upon CBP's experience with the more established API processes in place with Mexico and the Caribbean Community.
- **The Automated Targeting System – Global (ATS-G):** This provides CBP and prospective partners with a platform on which to share best practices on the use of traveler data, and to ultimately collaborate on risk-assessment methodologies and passenger targeting rules.
- **The International Targeting Center (ITC):** The ITC is a joint/collaborative targeting initiative currently being piloted at CBP's NTC-P. The pilot is being led by CBP, but includes participation of the United Kingdom Border Force and Canada Border Services Agency, with both Australia and New Zealand considering joining. Its purpose is to improve the collective targeting capability by co-locating targeting personnel. Co-located personnel will have the ability to draw upon pooled knowledge, such as shared data on individuals intending to travel or who are en route in real-time and shared situational awareness.
- **Initiatives with International Organizations and Counterpart Customs Administrations:** CBP is pursuing several initiatives with international organizations and counterpart customs administrations to improve cargo targeting practices. The purpose of these consultations is to promote cargo targeting best practices and risk management methodologies. Many of these customs administrations are either in the planning stages of procuring or developing an automated cargo targeting system, or are seeking to improve their current systems. CBP technical experts analyze the current practices and technical capabilities and make recommendations for additional system features.
- **World Customs Organization (WCO) Cargo Targeting System (CTS):** The Department of State has issued a grant to the WCO to develop the CTS, which is being distributed to WCO member administrations for the purpose of identifying high-risk cargo shipments. One condition of the grant is that the WCO must “collaborate closely” on the project with CBP. CBP has provided user and functional requirements for the system through its design and development phases. The first version of the system focuses on vessel container cargo. In May 2013, the WCO installed the system in two pilot locations: the Bahamas and Jamaica. CBP is supporting the pilot by providing

training and technical assistance. After the conclusion of the pilot in October 2013, the WCO and CBP will promote greater use of the CTS by other customs administrations and vessel carriers.

- **High-Risk Cargo Shipments:** CBP is working with a number of foreign authorities to process their cargo data through CBP's ATS to identify high-risk cargo shipments. These authorities transmit their data to ATS, which then processes the data and provides risk assessment evaluations. CBP may then collaborate with representatives from the foreign authority on the appropriate operational protocol if a high-risk shipment is identified. The ATS user interface for representatives from these authorities is termed ATS-I.
- **Air Cargo Advance Screening (ACAS):** ACAS is a program developed as a result of the October 2010 failed attempted plot of Al-Qaeda in the Arabian Peninsula in the air cargo environment. The purpose of ACAS is to ensure foreign air cargo is screened prior to loading on the aircraft. Participants from the air cargo environment have volunteered to transmit seven data elements for CBP risk assessment analysis. CBP and the Transportation Security Administration (TSA) are continuing discussions with the stakeholders of the air cargo community (including express consignment carriers, freight forwarders, and passenger carriers) to expand participation in the program.
- **ATS and Vetting:** CBP is currently pursuing a project with other DHS and non-DHS stakeholders to use ATS as a vetting service for visa overstays, refugee applications, and visa pre-adjudications. These three project areas are conceptually similar, may overlap, and may use common resources, but are distinct and separate in their purpose. The projects also have common stakeholders both inside and outside of DHS. Thus, by relying on the ATS current methodologies, proven workflows and procedures, these three projects can be accomplished without the need to develop new processes.

FY 2013 Milestones:

- **Global API-PNR:** DHS and CBP continued to identify new strategic partners for the Global API-PNR project. Strategic partners in Central America and Africa will be sought to augment existing partnerships in the Middle East and the Pacific Rim.
- **ITC:** Canada and the United Kingdom are expected to continue participation at the ITC, with Australia due to join. New Zealand is expected to evaluate Australia's experience closely.
- **ATS Common Vetting Project:** CBP continued its ATS common vetting project by establishing benchmarks and realignment of ATS priorities to better reflect vetting needs across DHS.
- **Cargo Targeting Technical Discussions:** In collaboration with DOS, CBP continued to provide technical assistance regarding cargo targeting best practices to foreign customs administrations including Mexico, France, Sweden, Colombia, Panama, Abu Dhabi, Taiwan, Macau, China, New Zealand, Nigeria, and Kenya.
- **WCO Cargo Targeting System (CTS):** CBP continued to provide technical support and advice to the WCO throughout the development, testing, deployment, and monitoring phases of the WCO-sponsored CTS for distribution to WCO member administrations. CBP will also promote greater use of the CTS by other customs administrations and vessel carriers.
- **ATS-I:** CBP continued to support the use of ATS-I by the representatives of Mexico and France, and will pursue expansion of the program with Colombia, Panama, and Abu Dhabi.
- **ACAS:** CBP is working collaboratively with TSA to develop the ACAS program, solicit input from trade partners, address challenges, and continue discussion on the transmission of the seven data elements required to conduct risk analysis and mitigate potential threats.

Future targeting system enhancements will focus on increasing data collection from internal and external sources and improving geographical unit interface display capabilities. Targeting improvements will enable continuous, incremental improvement of ATS, helping to replace unproductive inspections and vetting operations (false positives) with more productive and effective enforcement activities (successful seizures/apprehensions) and expansion to better mitigate known and emerging threats.

Enhancement and expansion of CBP's targeting enterprise will provide front line personnel with the ability to provide comprehensive risk assessments on the large volume of regulatory and commercial data generated by commercial entities, states, and other government agencies, in order to verify the identity of businesses, cargo, and persons using and crossing our borders. This can be achieved by rapidly institutionalizing deployed stop-gap measures by developing the advanced analytics capabilities to augment the "officer developed algorithms."

MAJOR ACQUISITIONS

Automated Targeting System (ATS)

Automated Targeting System (ATS) is a web-based enforcement and decision support tool that incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. It allows CBP officers to focus their efforts on cargo shipments and passengers that most warrant further attention. The ATS systems have allowed CBP officers to process large volumes of data efficiently, which was previously a gap within the targeting environment. As volumes of data increase in people, cargo and conveyances, officers require increasingly efficient access to information on which to base critical admission decisions. The systems investments are also intended to address data quality improvements, including entity and name resolution to ensure that efforts are focused on those persons and cargo that truly present a threat to the homeland.

ATS is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- Automated Targeting Systems \$108.533 million
- Intelligence/Investigative Liaison \$1.562 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
106,016	116,992	110,095

FY 2015 Funding Breakout:

	Maximize compliance with U.S. trade laws	<ul style="list-style-type: none"> • Government travel, government training, purchase card, Configuration Management support, SELC support, Testing support, Security support • System O&M (Rule Maintenance and Integration Support): Rule updates, refreshes to maintain system configurations with internal and external data feeds to maintain optimal targeting efforts, and updates performed through quarterly releases.
	Prevent illegal import and entry	Unified Passenger: Migration of the ATS-P Targeting Engine to WebLogic using Java Enterprise technologies. This will consolidate code across multiple functional streams to improve consistency and maintainability improving hotlists through better resolution of flight legs and travelers across flights.
	Strengthen transportation security	<ul style="list-style-type: none"> • Infrastructure Hardware: Equipment refreshes to maintain an ever increasing bandwidth and storage capability. Major equipment includes servers, switches, and expansion racks. • Infrastructure Software: License renewals and purchases to continue existing targeting efforts and maintain optimal program and operational performance. Software include Business Objects, SAS, RedHat, HP LoadRunner, Ontology, etc.

Discussion of Selected Adjustments-to-Base

The transfer of \$755 thousand from the Automated Targeting System (ATS) PPA in the Automation Modernization Appropriation to the National Targeting Center (NTC) PPA in the Salaries and Expenses Appropriation is requested to properly align automated system requirements which use targeting information for NTC cargo and passenger-related activities. The Analytical Management Systems Control Office (AMSCO) within the NTC is responsible for using automated systems to screen, review, and identify data anomalies to ensure the accuracy of data entered by CBP law enforcement personnel in order to segment potential integrity concerns. The expertise, systems

technology, and automation necessary for the completion of work by AMSCO is developed, contained, and maintained within the NTC.

IV. Program Justification Changes

**Department of Homeland Security
U.S. Customs and Border Protection
Automation Modernization:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Development and Expansion of ADIS Capabilities
PPA: Critical Operations Protection and Processing Support
Program Increase: Positions 5, FTE 2, Dollars \$1,200

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollar s (\$000)	Pos	FTE	Dollar s (\$000)	Pos	FTE	Dollar s (\$000)
Current Services Level							5	5	899
Program Increase							5	2	1,200
Total Request	-	-	-	5	5	899	10	7	2,099

Description of Item

The \$1.2 million requested increase in the Information Technology PPA, is part of the \$13 million total request for ADIS enhancement and will fund 5 positions within the Office of Information and Technology. This staff will oversee and manage the work required to deliver and sustain the enhanced ADIS capabilities that are associated with the \$11.8 million initiative that is requested in the Inspections, Trade, and Travel Facilitation PPA within the Salaries and Expenses appropriation.

Justification

ADIS is the DHS system that identifies those who have violated immigration laws by overstaying their lawful period of admission to the United States. Matching arrival and departure records is crucial to the integrity of the U.S. immigration system as it allows DHS to know which foreign nationals are in the U.S. at any particular time, and which ones are violating certain terms of immigration law. The health and abilities of the ADIS system are therefore critical to the DHS strategic goal of fairly implementing U.S. immigration laws.

The requested program change will enable CBP to provide matching entry and exit records' data more efficiently and frequently. New capabilities to be gained by this enhancement will address GAO's findings (most recently in 2013) on DHS' inability to match entry and exit records.⁵

ADIS data has been deemed a National Security priority by the Intelligence Community as it relates to Entry/Exit data. ADIS receives numerous requests for data related to extraction and reporting metrics. All reporting completed today requires the main production system to provide this data. This increases time frames and requires immense coordination with O&M contractors to fulfill business objectives unrelated to maintaining the existing IT architecture. This enhancement will provide increased capability to provide more secure and real-time information to the DHS stakeholder community, and will facilitate these exchanges without impacting the main production system. This increase will enhance the Department's capability to collect, gather, and access relevant information to identify people and their immigration history to support other federal law enforcement and intelligence community priorities.

Information contained within ADIS will be used to establish the biographic baseline for which biometric improvements will be measured against, as ADIS is used to fuse biographic and biometric entry/exit data. ADIS is critical to CBP planning and implementation of enhancements to achieve entry/exit goals through existing and future capabilities. CBP will use ADIS to validate and improve entry/exit data integrity and advance immigration status reporting capabilities. ADIS currently supports Entry/Exit programs associated with US – Canada border crossing data sharing, as well as vetting of shared Mexican APIS fight manifest data and is the Department's enterprise system for determining overstays.

Impact on Performance (Relationship of Increase to Strategic Goals):

This enhancement improves CBP's ability to safeguard lawful trade and travel; manage the risk of people and goods in transit; prevent unlawful immigration; and arrest, detail, prosecute, and remove unlawful entrants. CBP will be able to provide more efficient exchanges of data among other DHS and federal partners directly connected to the ADIS system, such as the Department of State, ICE, and USCIS. This additional capability will strengthen DHS/CBP tools to carry out the mission of enforcing immigrations laws and managing risks in a more effective fashion by greatly reducing the likelihood of a false positive overstay information being generated, resulting in improved usage of resources.

DHS QHSR:

Mission 2: Securing and Managing Our Border

Goal 2.2: Safeguard Lawful Trade and Travel

Objective: Manage the risk posed by people and goods in transit

Mission 3: Enforcing and Administering Our Immigration Laws

⁵ DHS is statutorily required to provide overstay rates by country on an annual basis; however, DHS has been unable to do so since 1992, due to a lack of confidence in the data and DHS's inability to match entry and exit records.

Goal 3.2: Prevent Unlawful Immigration

Objective: Prevent entry or admission

V. Exhibits and Other Supporting Material

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for U.S. Customs and Border Protection [for operation and improvement of]¹ automated systems, including salaries and expenses, [\$340,105,000, to] **\$812,410,000**² remain available until September 30, [2016] **2017**³; and of which not less than [\$138,794,000] **\$141,061,000**⁴ shall be for the development of the Automated Commercial Environment.

¹ [for operation and improvement of]	Inserted by Congress in FY13 enacted budget as part of Congress's inclusion of OIT S&E in Automation Modernization under IT PPA.
² [\$340,105,000, to] <u>\$812,410,000</u>	Reflects Congressional inclusion of OIT S&E in Automation Modernization under Information Technology (IT) PPA in FY13 enacted budget as well as shift of ATS PPA from Salaries & Expenses appropriation to Automation Modernization appropriation. In addition, propose to shift of IT and ATS from single to multi-year funding to increase mission effectiveness and for consistency with the other two Automation Modernization PPAs, ACE, and COPPS. As with COPPS and ACE, IT and ATS are used to sustain and deliver mission critical technological capabilities to front-line law enforcement and are dependent on complex technology acquisitions that can easily take more than a year to award. Shifting IT and ATS to multi-year funding would ensure consistency across Automation Modernization and enable funding to be directed to the highest priority IT and ATS mission requirements to address current threats and vulnerabilities.
³ [2016;] <u>2017</u> ;	Fiscal year change only. No substantial change proposed.
⁴ [\$138,794,000] <u>\$141,061,000</u>	Dollar change only. No substantial change proposed.

ACE/ITDS Mission Statement

ACE will provide tools and enhance the business processes that are essential to securing the U.S. borders from terrorists by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. ACE capabilities have been designed to identify potential risks, analyze information prior to arrival of people and cargo, and provide intelligence in easy-to-use formats. As a web-based system, ACE will provide users from government and the trade community with new, more efficient ways of accessing, processing, and sharing trade-related information.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	7,777	8,972	9,215	243
11.3 Other than Full-Time Permanent	-	122	123	1
11.5 Other Personnel Compensation	-	254	255	1
12.1 Civilian Personnel Benefits	4,368	2,743	2,950	207
Total, Salaries & Benefits	12,145	12,091	12,543	452

An increase of \$91,000 is for 2015 Pay Raise. An increase of \$31,000 is for Annualization of 2014 Pay Raise. An increase of \$68,000 is for the FY 2014 Pay Raise. An increase of \$109,000 is for Increased Retirement Contributions. An increase of \$153,000 is for Adjust FTE to Reflect Current Staffing.

Information Technology Mission Statement

The CBP Office of Information and Technology (OIT) is funded within this PPA. OIT supports CBP by providing integrated, comprehensive technical support that facilitates both CBP and DHS missions. OIT is responsible for developing, acquiring, testing, and maintaining new and legacy applications (both government and commercial), and for ensuring the reliability of CBP's data infrastructure, which transmits critical data to and from CBP and DHS data centers to CBP agents and officers on the front-line.

Automated Targeting Systems Mission Statement

At the core of CBP's ability to achieve its critical border security objectives and maintain the flow of lawful commerce is CBP's ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law abiding travelers and commerce to continue to their destination without unnecessary delay. Legislation and regulatory action, such as the Trade Act of 2002 and the Safe Port Act, respectively, have made it mandatory to provide advance information about passengers and goods arriving in the U.S. CBP uses computer technology and rule-based applications to analyze the data provided on passengers and shipments arriving in the U.S. CBP applies its targeting methods against the data to determine which passengers or shipments need to be segregated for a closer look and possibly inspection. The main platform CBP uses to analyze arriving passenger and shipment data is the Automated Targeting System (ATS). ATS is a web-based enforcement and decision support tool that is the cornerstone for all CBPs targeting efforts. ATS incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. In this way, ATS allows CBP officers to focus their efforts on cargo shipments and passengers that most warrant further attention. ATS standardizes names, addresses, ship names, and similar data so these data elements can be more easily associated with other business data to form a more complete picture of a passenger, import, or export in context with previous behavior of the parties involved. Every passenger and shipment processed through ATS is subjected to a real-time risk evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering.

Summary Justification and Explanation of Changes

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Construction and Facilities Management

I. Appropriation Overview

A. Mission Statement for Construction and Facilities Management:

The Construction and Facilities Management (C&FM) account provides the resources for critical facilities and associated infrastructure and personnel, that enable CBP's mission of securing America's borders, while facilitating legitimate trade, travel, and immigration. Constructing and maintaining CBP's physical infrastructure is essential to keeping facilities operationally viable for frontline and mission support functions. Real property specialists plan and implement the C&FM Program by determining the most effective facilities solutions to meet the operational needs of agents, officers, pilots, and other CBP personnel. The account supports a vast and diverse real property portfolio, consisting of more than 4,300 owned and leased buildings and structures, over 26 million square feet of building space, over 1,500 towers, and approximately 4,600 acres of land throughout the United States.

Over 60,000 CBP employees secure the Nation's borders at and between the official ports of entry (POE). CBP protects more than 5,000 miles of border with Canada, 1,900 miles of border with Mexico, and 95,000 miles of shoreline. The success of CBP's mission depends heavily on the effectiveness of facilities and infrastructure that support the operational and administrative requirements of the Office of Border Patrol (OBP), Office of Air and Marine (OAM), Office of Field Operations (OFO), and Mission Support offices.

CBP requires a diverse facilities portfolio to meet its broad range of operating environments, spanning the northern and southwestern land borders and southeast coastline in both metropolitan and remote areas. These physical assets serve as economic gateways and critical enforcement tools to counter a wide range of threats to the Nation. Figure 1 shows a map of the facilities and associated infrastructure supporting CBP's operational and mission support components, and Table 1 provides a detailed list of the facilities portfolio by office.

B. Budget Activities:

Resources for CBP's Construction and Facilities Management Program are consolidated in the C&FM appropriation and the S&E Rent PPA. The C&FM account consists of the Facilities Construction and Sustainment (FC&S) PPA and the Program Oversight and Management (PO&M) PPA, which are discussed in detail in the following paragraphs. Together, these three PPAs capture CBP's costs for facilities, program support, and rent requirements.

¹ CBP's portfolio spans a diverse collection of facilities that comprise roughly 26 million square feet nationwide, of which 25 percent is owned by CBP. The remaining 75 percent of CBP facilities are provided through GSA-owned federal and commercial leased space, direct leases, free space, and interagency agreements.

Facilities Construction and Sustainment

The FC&S PPA provides resources for all necessary activities supporting the construction, acquisition, sustainment, and leased space management of CBP's facilities portfolio. This includes, but is not limited to:

- sustainment activities including building operations, maintenance and repairs (BOMR);
- rent payments for Land Ports of Entry;
- environmental and energy compliance including the remediation of firing ranges;
- building system installations as required by lease renewals and forced moves;
- property improvements, modernization, expansions, and alterations;
- real estate acquisition and disposal;
- construction and demolition of real property assets;
- portfolio planning activities; and,
- project management and execution support.

In FY 2014, CBP and GSA will undertake a pilot program that delegates operations and maintenance responsibilities along with minor repair and alterations below the prospectus threshold to CBP for a portion of the GSA-owned Land Ports of Entry (LPOE) inventory. The distinctive nature of LPOEs as mission-oriented, operational assets of CBP, as well as national trade and transportation infrastructure, differentiate this part of the portfolio from other federal buildings managed by GSA. The overall goal of the pilot is explore the transfer of the real property responsibilities for these mission-specific facilities to improve and integrate border security through the alignment of infrastructure with operational priorities. This in turn will allow for faster delivery of services tailored to the specific needs of operational components and the ability to execute an effective service model that will be more responsive to changing priorities and critical operations. Rent will be paid to GSA out of the C&FM appropriation for all LPOE delegation-eligible pilot facilities with CBP receiving a rebate back from GSA to execute the operations, maintenance, and below prospectus minor repairs and alterations of these facilities.

The FC&S PPA also includes funding to support CBP tunnel remediation, the process whereby discovered cross-border tunnels are physically secured and rendered unusable. Table 2 displays the number of tunnels that CBP remediated along the Southwest border from FY 2009 to FY 2013.

Table 2: Illicit Cross-border Tunnels Remediated – FY 2009 to FY 2013²

FY 2009	FY 2010	FY 2011	FY 2012	FY 2013
27	16	18	13	7

² The table includes all types of illicit cross-border tunnels: point-to-point tunnels; tunnels connecting to existing municipal drain systems; and complex, as well as simplistic, tunnel variations.

Program Oversight and Management

The PO&M PPA provides salaries and benefits for Government personnel, planning and program services and support, as well as environmental and energy management programs and studies. This PPA enables government and support personnel to successfully implement enterprise-level program objectives and ensures strategic alignment across CBP's Construction and Facilities Management Program. Additionally, these resources fund the necessary programs to support enterprise-level tools, planning, and procedures for effective and efficient management of CBP's facilities portfolio, as well as CBP rent and tactical infrastructure.

C. Budget Request Summary:

CBP requests \$482,205,000 and 486 full-time equivalent (FTE) employees for the FY 2015 Construction & Facilities Management appropriation. This request includes a net adjustments-to-base increase of \$25.927 million, which supports the consolidation of the National Targeting Center (NTC), the continued consolidation of facility-related activities into the C&FM appropriation and additional facility requirements associated with new CBP officers.

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP requests \$385.137 million in FY 2015 for the Facilities Construction and Sustainment (FC&S) PPA, which supports the Construction and Facilities Management Program. This PPA provides the facilities solutions and associated infrastructure required to secure America's borders, while facilitating legitimate travel, trade, and immigration. FC&S delivers critical logistical and operational support to agents, officers, pilots, and other CBP personnel that operate out of CBP's facilities on a daily basis.

The CBP facilities portfolio has experienced unprecedented growth to accommodate the surge in CBP personnel and asset deployments in recent years. Since FY 2010, CBP’s owned square footage has increased by 40 percent to 6.2 million square feet. The portfolio will continue to expand as 39 major projects in-progress (as of FY 2013 Quarter Four) will be completed by the end of FY 2016. By FY 2015, new facilities coming online will increase the portfolio plant replacement value⁴ (PRV) from \$2 billion to \$2.9 billion. The increasing PRV, directly associated with the increase in square footage and completed projects, also means that CBP will have increased sustainment obligations to assure that the newly acquired and modernized facilities can effectively support the execution of day-to-day operations.

Exhibit 1 shows that from FY 2010 to FY 2015 CBP’s portfolio of owned facilities increased by 40 percent, while FC&S funding is projected to decrease by 14 percent from FY 2010 funding levels.

Exhibit 1: Facilities Portfolio Growth and FC&S Funding – FY 2010 to FY 2015

During this same time span, the baseline requirement to sustain CBP facilities, identified as “FC&S Sustainment Needs” in Exhibit 1, is anticipated to increase by over 103 percent from \$166 million in FY2010 to \$338 million in FY 2015. To determine the baseline sustainment need for CBP’s portfolio, CBP uses industry standards set by the Federal Facilities Council (FFC). Exhibit 2 outlines the FFC methodology to calculate CBP’s *core sustainment requirements* and the FY 2015 baseline based on the portfolio PRV, which yields a total baseline requirement of \$338 million in FY 2015. Please reference Exhibit G for additional information on the FFC methodology.

⁴ PRV represents the cost to replace the existing facilities assets portfolio using current construction costs and building standards.

Exhibit 2: Core Facilities Sustainment Requirements – FY 2015 Baseline
(\$ in Thousands)

Sustainment Activity		Baseline Requirement
Building Operations and Services	<i>5% of PRV</i>	145,421
Maintenance and Repairs	<i>4% of PRV</i>	116,337
Building Systems and Recapitalization	<i>2% of PRV</i>	58,168
Lease Renewals and Forced Moves	<i>4% of Rent Bill</i>	18,000

Note: Baseline sustainment requirements are based on the
FY 2015 projected portfolio PRV of \$2.9 billion.

In FY 2015, the FC&S PPA will fund mainly sustainment of the existing real property inventory for CBP's operational and mission support components, along with rental cost for LPOEs. Due to competing priorities, CBP will be unable to meet the recommended baseline sustainment requirement and must implement new portfolio strategies to ensure the physical infrastructure does not impact mission readiness. Specifically, CBP will prioritize sustainment services so that facilities remain open and in working order. This includes funding basic maintenance activities and building operations, such as janitorial, pest control, and waste disposal, at the lowest functional levels. CBP will respond to an increased number of emergency repairs as facilities and building systems break down. In FY 2013 over \$11 million in FC&S funding was obligated to address specific repair needs at CBP-owned facilities including repairing a disabled HVAC unit and replacing another HVAC unit at a vehicle maintenance facility in Imperial, CA; repairing the bathrooms and plumbing systems at the Tucson Air Branch; and addressing roof and plumbing systems repairs at CBP Housing units.

Core sustainment requirements funded in FY 2015 will include basic building operations, Regional Maintenance Contracts, Facility Condition Assessments, emergency repairs and replacements, tunnel remediation, and costs associated with lease renewals and forced moves. Building operations and services include utilities, trash, septic, and snow removal, among others. Regional Maintenance Contracts address maintenance requirements of all CBP facilities in a region under a single contract. Emergency repairs and replacements involve an immediate need for restoration of an asset to working functionality, or replacement of damaged or deteriorated materials or assets, such as interior flooring or malfunctioning security systems. One-time costs for leased space include moving needs for a forced move, physical security requirements, voice and data cabling infrastructure updates, and limited configuration of space to exclude aesthetic refreshes. Additionally, the FC&S PPA will fund building operations, maintenance, and repairs (BOMR) services and rent costs for facilities to be included in the LPOE delegation of authority.

In FY 2014, CBP and GSA will undertake a pilot program that delegates operations and maintenance responsibilities along with minor repair and alterations below the prospectus threshold to CBP. During this time GSA will continue to budget and execute capital projects above the prospectus level, as well as retain leasing responsibilities. As part of this pilot, CBP will continue to pay full rent to GSA and receive a rent rebate for the operations, maintenance and those repairs and alterations below the prospectus level that are to be executed by CBP through the Construction and Facilities Management appropriation.

Exhibit 3 provides a crosswalk of the FY 2013 – 2015 spend plans for the FC&S PPA by facility activity. The increase in building operations and services reflects the growing number of facilities

coming online along with cost-inflation factors. The increased allocation for lease renewals and forced moves addresses emerging mission needs to keep facilities up to standard. Decreased maintenance funds allow CBP to cover increasing requirements in other areas, mainly building operations and lease renewals/forced moves. Additionally, Regional Maintenance Contracts create economies of scale, reducing funding requirements. Investments in critical infrastructure in FY 2014 and FY 2015 support CBP's top priority operations by consolidating the NTC facilities. The decrease for LPOE delegation activities reflects greater cost recovery for eligible expenses at the LPOEs due to AQI Fee Increase. Note that the allocation between activities is subject to change to ensure CBP's highest priority facilities requirements are funded.

Exhibit 3: FC&S PPA – FY 2013 to FY 2015 Spend Plan Crosswalk

(\$ in Thousands)

Activity	FY 2013	FY 2014	FY 2015
Tunnel Remediation	1,339	1,500	1,500
Environmental and Energy Compliance	9,581	10,469	9,900
Building Operations & Services	80,239	106,611	120,727
Maintenance	41,666	33,720	24,867
Repairs	11,736	6,796	12,615
LPOE Delegation Activities	-	183,876	176,744
Lease Renewals and Forced Moves	8,507	10,666	20,784

Total	86,497	232,552	15,270	50,818	385,137

CBP is pursuing opportunities that meet mission goals in the current fiscal environment while realizing cost-saving efficiencies. Alternative sources of financing are a primary focus and with the enactment of the *Consolidated Appropriations Act of FY 2014* (P.L. 113-76), CBP, in collaboration with GSA, was given authorization to pursue a pilot program to accept donations of real property through Section 559. CBP and GSA may use these donations to facilitate numerous activities associated with ports of entry including land acquisition, construction, repair and alterations, sustainment and fit-out. CBP is working to identify the donation process and specific locations for the pilot program in collaboration with GSA. CBP will submit an evaluation plan with the initial results to Congress pursuant to legislative requirements in P.L. 113-76. Negotiations with the private entities and local governments at the identified project locations will lead to the transference of project design and construction costs to the private partner therefore minimizing the required funding from CBP and also assuring missions are not impacted. Prior to this official authority, in FY 2013, CBP was able to successfully enter into a Public Private Partnership for the Peace Bridge, New York LPOE with the Buffalo and Fort Erie Public Bridge Authority. Other CBP cost and space saving efforts include the following:

- Cost efficient sustainment solutions – CBP has numerous efforts underway that reduce sustainment costs. Through the centralized utilities effort, which channels almost all utility bills through one office, CBP has identified efficiencies and reduced CBP’s overall utility costs. The centralized utilities initiative began with a pilot program in FY 2012 with OBP and included the centralization of processing and payments of approximately 1,300 electricity, propane, heating oil natural gas, water, and sewage accounts. The 395 facilities which took part in the pilot program realized cost savings of \$1.260 million in FY 2012. Regional Maintenance Contracts have been executed at a large portion of CBP’s owned facilities. Rates have been negotiated as bundled services therefore reducing the overall costs and improving response times to emergency repairs due to the critical location of the maintenance contractors. CBP conducts Facility Condition Assessments at its owned facilities which enable CBP to target the facilities with the most pressing needs and provide more accurate out-year budget requests based on the conditions of the assets allowing CBP to be more proactive rather than reactive to needs in the portfolio.
- Standard space designs – Specifically utilized in the planning, design and construction of CBP-owned Border Patrol Stations, standard design has reduced delivery times while also decreasing design costs and improving cost estimates for the full lifecycle of the facility. CBP will also be implementing space designs and examining alternatives that abide by the numerous real

property reduction mandates including OMB's Freeze the Footprint policy for office and warehouse space.

- Mobile Workforce – CBP is expanding its mobile work efforts throughout its mission support focused offices in the National Capital Region and other select offices. In FY 2012 and 2013, the initial pilot realized total cost savings of over \$1.3 million in the CBP rent bill and operational budget, while improving communication between personnel.
- Consolidation and Co-locations – CBP is in the process of evaluating its space usage across the National Capital Region and evaluating opportunities to increase its space utilization rate through consolidation and mission integration. The results of these master planning efforts for regions such as the National Capital Region will be a decrease in overall square footage and operational costs and an increase in mission effectiveness. CBP is also examining and in the initial planning stages of other consolidations outside of the National Capital Region. In addition to reviewing the National Capital Region, CBP is consolidating multiple Office of Border Patrol facilities, including the Swanton Headquarters facility, storage facility and the old Swanton Border Patrol Station, into the newly constructed Swanton Border Patrol Station. Through consolidation, CBP will be able to reduce its footprint by over 23,000 square feet and realize \$550,000 in annual rent savings.

Facilities Construction and Sustainment – Select Adjustments to Base

This PPA includes adjustments to base increases of \$16.000 million for the LPOE Delegation of Authority and Sustainment Activities, \$289 thousand for the facility activities associated with the increased CBPO staffing, and \$4.800 million for the NTC Consolidation Project Phase II, along with a decrease of \$13.132 million for APHIS Full Cost Recovery Fee, and a \$9.341 million realignment of funds to the Program Oversight and Management (PO&M) PPA.

The \$16.000 million provides for rent cost increases associated with LPOE facilities coming online in FY 2015, and critical sustainment requirements of CBP's existing real property portfolio. The largest LPOE facility delivery in FY 2015 is the completion of Phase I of the San Ysidro LPOE, located in California, which is one of the busiest LPOEs in the United States. The additional funding will ensure CBP can meet its contractual obligations to GSA for rent associated with the LPOEs, thereby enabling CBP officers to operate out of the LPOEs to conduct their law enforcement functions. Resources for sustainment requirements of the existing portfolio will address critical needs for repairs at Border Patrol facilities, Facilities Condition Assessments (FCAs) of CBP-owned facilities, and mandatory relocation and build-out of Field Operations facilities. Specifically, funding will ensure deficiencies at the Border Patrol facilities are addressed, including deteriorated roofs in danger of collapse, so that the physical infrastructure is capable of supporting core mission functions; enable CBP to accurately assess the highest priority deficiencies and life safety violations that must be immediately addressed; and allow Field Operations personnel to operate out of appropriately configured space that meets mission needs while avoiding unplanned rent costs and delays in opening new facilities.

The \$4.800 million for the NTC Consolidation Project in addition to the \$13.2 million in the base will enable CBP to execute Phase II of the project at a total cost of \$18 million in FY 2015. Phase II includes the build-out and outfitting of the consolidated NTC facility. This consolidation will result in

an improved space that better meets the mission needs of the organization and its people, including strategic co-location of appropriate groups, and will improve the NTC's mission effectiveness.

The request includes a reduction of \$13.132 million for the Greater Cost Recovery due to AQI Fee Increase which is assumed to be effective by the end of December 2014. The fees are collected to recover the costs of providing inspectional services of passengers, conveyances, animals, plants and agricultural goods at ports of entry. The \$13.132 million represents the portion of the larger APHIS Full Cost Recovery Fee Increase that will be reimbursed to cover the facility costs incurred through these inspections including rent and the sustainment of the ports of entry. This reduction increases CBP's overall reliance on user fees to cover core facility activities for the ports of entry, specifically rent obligations which must be paid. If the recovered fees are less than what is expected, CBP will have to divert funding from other core sustainment activities to cover its rent obligations.

The request also includes an increase of \$289 thousand for the facility requirements associated with the CBP Officer increase as authorized in the *Consolidated Appropriations Act, 2014* (P.L. 111-83) which states to "meet the workload created by the increasing volume of trade and travel the bill provides \$255.715 million to increase the CBPO workforce by not fewer than 2,000 new officers by the end of FY 2015." The \$289 thousand will support the increased recurring utility and sustainment costs associated with the additional personnel assigned to existing facilities.

The realignment of \$9.341 million from FC&S PPA is necessary to fund critical PO&M activities at fully operational levels. This funding will be used to fully execute essential programs related to Energy and Environmental Management programs. Funding these essential programs ensures CBP will be in compliance with a multitude of laws, regulations, Executive Orders, and Federal mandates. This realignment will allow CBP to participate in the key industry memberships, including Construction Management Association of America, Corporate Executive Board-Real Estate Board, and the Federal Facilities Council, to provide CBP with the leading practices for managing its real property program.

Exhibit 5 identifies the permanent transfers into the FC&S PPA from CBP's Operational Business Partners' accounts. In FY 2015, a total of \$2.222 million was transferred into the FC&S PPA for facilities related activities.

Exhibit 5: FC&S PPA—FY 2015 Permanent Transfers

FY 2015 Permanent Business Partner Transfer	PPA (From)	PPA (To)	OCC (To)	Amount
Utilities for CBP-owned facilities (Office of Field Operations)	Office of Field Operations	Facilities Construction & Sustainment	Utilities	\$2,010,567
Building Operations and Services (Office of Field Operations)	Office of Field Operations	Facilities Construction & Sustainment	Operations & Maintenance of Facilities	\$211,901
Total				\$2,222,468

MAJOR ACQUISITIONS:

Border Patrol Facilities

The Border Patrol Facilities Program (BFPF) directly supports CBP's Border Patrol agents and houses technology needed to fulfill CBPs mission. The program provides Border Patrol Stations, Sector Headquarters, Permanent Checkpoints, and Remote Forward Operating bases that are strategically placed near the areas of highest illegal activity which allows agents and special teams to respond quickly and maintain maximum time on patrol. The facilities are provided through new construction, lease acquisition, alterations, and maintenance, repairs, and operations, as well as rent and leasing activities. Operational impact, agent safety, cost effectiveness, and the conditions of existing facilities are evaluated to prioritize the investment in this program. The BFPF maintains, upgrades, and constructs facilities, including BP stations; sector headquarters; checkpoints; and remote forward operating bases. Note: See CASR for full description..

Border Patrol Facilities is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- Facilities Program Management \$44.672 million
- Facilities, Construction, & Sustainment \$86.497 million
- Rent \$56.064 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
166,131	163,469	187,233

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Sustainment of Owned Property (71,097)	Building Operations and Services	Includes the expense costs associated with the purchase of critical utilities including water, electricity, natural gas, sewage. Additional costs are for the execution of operational contracts including custodial services, pest services, snow removal, waste disposal and grounds maintenance.
	Maintenance	Includes the expense costs associated with the execution of CBP's regional maintenance contracts that focus on preventative maintenance to assure assets reach the end of the intended useful life; additional maintenance costs that preserve or sustain an asset in current working conditions; the execution of the Facility Condition Assessment program that assesses the "health" of CBP's owned portfolio and targets key deficiencies that must be addressed; and scheduled renewal activities that replace an asset at the end of its intended useful life as to avoid complete failure and disruptions to mission operations
	Repairs	Includes the expense costs associated with restoring real property assets to its previously functional status or at the very least to a level where it can perform its designated purpose. These activities often reactionary to an immediate need such as a roof leaking or an HVAC system that has broken. In the most extreme of instances, the asset may be beyond repair and will have to be replaced immediately.

Tunnel Remediation (1,500)	Tunnel Remediation	Includes the expense costs required to remediate any breaches in border security along the northern and southern borders caused by underground tunnels
Environmental and Energy Compliance (9,900)	Environmental and Energy Compliance	Includes the expense costs associated to comply with environmental laws, regulations and Executive Orders along with the removal of pollution and contaminants to assure the health and safety of CBP personnel and the general public. These efforts include the clean-up of underground storage tanks, the installation of new water pipes and the clean-up of firing ranges.
Rent Costs for Leased Facilities (56,064)	Rent	Includes the expense costs associated with the payments required to be made by CBP to an owner of facility as established through Occupancy Agreements. These costs include the base rent and standard and above-standard operating expenses including utilities and Federal Protective Services.
Leasing Activities (4,000)	Space Consolidation	Includes funding for the consolidation of the leased Swanton Border Patrol Sector Headquarters, storage facility and older Swanton Border Patrol Station into the newly constructed Station that was completed in FY 2013. Funding will be used specifically for the costs to move of personnel and assets along with the fit-out of space at the facilities for the additional personnel.
Program Oversight and Management (44,672)	Program Oversight and Management	Includes the expense costs for the Government employee salaries and benefits; CBP's Integrated Workplace Management System, TRIRIGA; energy and environmental initiatives that allow CBP to realize cost-savings through innovative environmental and energy solutions; and other operational costs including office supplies and program support. Government employees execute and support every aspect of the Border Patrol Facilities program. TRIRIGA enables CBP to integrate real property and project management functions for the portfolio lifecycle into a single web-based platform. This system allows CBP to make more informed and comprehensive decisions for all aspects of CBP's real property inventory. During these austere budget times this allows CBP to make cost-effective decisions that also sustain CBP's facilities throughout the lifecycle of the asset.

OFO Facilities

OFO Facilities is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- APHIS \$26.052 million
- Facilities Program Management \$29.951 million
- Facilities, Construction, & Sustainment \$232.552 million
- IUF \$10.046 million
- Rent \$190.817 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
381,604	480,767	489,418

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Sustainment of Owned Property and the Delegation of Authority Ports of Entry (223,043)	Building Operations and Services	Includes the expense costs associated with the purchase of critical utilities including water, electricity, natural gas, sewage. Additional costs are for the execution of operational contracts including custodial services, pest services, snow removal, waste disposal and grounds maintenance.
	Maintenance	Includes the expense costs associated with the execution of CBP's regional maintenance contracts that focus on preventative maintenance to assure assets reach the end of the intended useful life; additional maintenance costs that preserve or sustain an asset in current working conditions; the execution of the Facility Condition Assessment program that assesses the "health" of CBP's owned portfolio and targets key deficiencies that must be addressed; and scheduled renewal activities that replace an asset at the end of its intended useful life as to avoid complete failure and disruptions to mission operations.
	Repairs	Includes the expense costs associated with restoring real property assets to its previously functional status or at the very least to a level where it can perform its designated purpose. These activities often reactionary to an immediate need such as a roof leaking or an HVAC system that has broken. In the most extreme of instances, the asset may be beyond repair and will have to be replaced immediately.
	LPOE Delegation of Authority Activities	Includes the expense costs associated with the building operations, maintenance, repairs and rent costs to GSA for Land Ports of Entry that are being considered as part of the Delegation of Authority. At this time in FY 2014 the scope, including the number of facilities to be included as part of the full implementation, along with the number of facilities and costs with a phased approach is still in negotiation between GSA and CBP.
Leasing Activities (9,509)	Forced Moves and Lease Renewals-in-Place	Includes the expense costs paid from the FC&S PPA associated with lease renewals with no expansion and mandatory re-locations. These activities include fitting out a new leased space due to a forced move. Fitting out requires the installation of IT and LAN systems, installation or upgrades of security systems, and the altering of space to meet the operational need. For those renewals in place, activities include the upgrade of existing systems to meet new security or IT regulations.
Rent Costs for Leased Facilities (190,817)	Rent	Includes the expense costs associated with the payments required to be made by CBP to an owner of facility as established through Occupancy Agreements. These costs include the base rent and standard and above-standard operating expenses including utilities and Federal Protective Services.
Additional funding sources (36,098)	APHIS and IUF Fees	Funding will be used to cover facility related activities, including rent and sustainment activities that support inspection functions performed by CBP officers at ports of entry.
Program Oversight and Management (29,951)	Program Oversight and Management	Includes the expense costs for the Government employee salaries and benefits; CBP's Integrated Workplace Management System, TRIRIGA; energy and environmental initiatives that allow CBP to realize cost-savings through innovative

		environmental and energy solutions; and other operational costs including office supplies and program support. Government employees execute and support every aspect of the Border Patrol Facilities program. TRIRIGA enables CBP to integrate real property and project management functions for the portfolio lifecycle into a single web-based platform. This system allows CBP to make more informed and comprehensive decisions for all aspects of CBP's real property inventory. Allows CBP to make cost-effective decisions that also sustain CBP's facilities throughout the lifecycle of the asset.
--	--	--

Mission Support Facilities

The Mission Support Facilities (MSF) PMO develops, plans, executes, and sustains the facilities and infrastructure inventory necessary to support the mission of the CBP Mission Support Offices nationwide. These facilities include administrative offices, training centers, laboratories, warehouses, tactical communications sites, and consolidated/co-located facilities/campuses. The Mission Support PMO also manages CBP Consolidation/DHS Co-Location Facilities, Residential Housing, all National Capital Region Facilities and any Facilities impacted in a National Emergency. The focus of the MSF PMO is shifting from lease acquisition of new space for relocations or expansions for business partners to sustainability function managing maintenance and repair of owned facilities, administering leases of existing space, and reconfigurations where necessary to modify functional spaces to support additional staffing where expansions are no longer feasible.

This construction project is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- Facilities Program Management \$15.781million
- Facilities, Construction, & Sustainment \$50.818 million
- Rent \$148.301 million

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP requests 486 FTE and \$97.068 million in FY 2015 for the PO&M PPA, which provides resources to maximize operational efficiencies and guide strategic initiatives of the Construction and Facilities Management Program. This PPA includes salaries and operational resources for Federal real property personnel. The inclusion of salaries and operational requirements in this PPA provides necessary flexibility to allocate resources to the highest priority requirements of CBP's real property portfolio. This alignment, and the associated flexibility between pay and non-pay requirements, allows CBP to consistently plan, finance, acquire, manage, oversee, and administer the Construction and

Facilities Management Program to best fulfill mission needs. The FTEs funded by the PO&M PPA also support Border Patrol tactical infrastructure activities funded by the Border Security, Fencing, and Infrastructure Technology (BSFIT) appropriation, and rent activities funded by the Salaries and Expenses appropriation Rent PPA.

CBP aligns the PO&M workforce to its real property portfolio strategy. To this end, CBP is transitioning the focus of its workforce from project management to facilities management to address the growing sustainment needs of CBP's newly acquired facilities and the existing portfolio. CBP real property personnel offer architectural, environmental, energy, real estate, and engineering services, along with long-term strategic planning expertise. These highly skilled specialists strengthen operational support and enhance efficiencies for CBP's multifaceted facilities portfolio, as well as CBP rent and tactical infrastructure. Since FY 2010, the real property program has consolidated functions previously dispersed across CBP, such as management of utilities, rent, tower leasing, and sustainment services. Centralizing these functions allows CBP to manage its real property portfolio efficiently, while enabling operational offices to focus solely on their frontline responsibilities.

Resources in the FY 2015 PO&M PPA provide for several critical areas of the Construction and Facilities Management Program, including Government employee salaries and benefits; CBP's Integrated Workplace Management System, TRIRIGA; energy and environmental initiatives; and program-level operational requirements and services. TRIRIGA enables CBP to integrate real property and project management functions for the portfolio lifecycle into a single web-based platform. This system provides critical data to inform cost-effective decision making to sustain CBP facilities over the long-term. The system also improves CBP's ability to enhance energy efficiencies, including tracking LEED requirements, which permits CBP to comply with regulations for energy efficiency. CBP-wide energy and environmental initiatives and studies also ensure that CBP complies with energy and environmental laws, regulations, Executive Orders, and Federal mandates. This mitigates the risk of violations or lawsuits which could impact operational components. Operational requirements and services funded by PO&M equip real property personnel to manage CBP's facilities in the most economical, efficient manner through recertification training, access to industry-leading best practices, and professional communications and management services.

Table 6 provides a crosswalk of the FY 2013 – 2015 PO&M PPA by activity. Note that the allocation between activities is subject to change to ensure CBP's highest priorities for critical facilities solutions are funded.

Exhibit 6: PO&M PPA – FY 2013 to FY 2015 Spend Plan Crosswalk
(\$ in Thousands)

Activity	FY 2013	FY 2014	FY 2015
Government Salaries and Benefits	29,999	55,796	57,204
TRIRIGA Maintenance	8,848	3,854	9,085
Environmental and Energy Initiatives	5,025	5,250	10,725
Operational Requirements and Services	7,284	15,980	20,054
Total	51,156	80,880	97,068

The PO&M PPA provides funding for personnel and resources required to conduct and implement numerous environmental, energy, and planning initiatives that allow CBP to meet mission goals while realizing cost-savings and environmental goals. These personnel and resources help to ensure and improve CBP's compliance with the Endangered Species Act, the National Historic Preservation Act, the National Environmental Policy Act, as well as numerous Executive Orders and other Federal mandates. Environmental and energy assessments, audits, and studies funded through the PO&M PPA have allowed CBP to improve the energy efficiency and sustainability of its facilities. Currently, 39 percent of CBP-owned and direct-leased square footage is LEED-certified. CBP is expanding its centralized utilities management to include the entire CBP portfolio, realizing administrative cost-savings and economies of scale. These cost savings allow CBP to redirect funds to the highest priority sustainment activities. CBP has made substantial progress in its Energy Intensity Reduction efforts since FY 2010 as shown in Chart 2. In FY 2012, CBP realized annual savings in energy intensity of \$5.5 million in CBP-owned facilities and actual reductions exceeded target reductions by 12 percent.

Chart 2: DHS Scorecard Measure: Energy Intensity Reduction – FY 2010 to FY 2012⁵

Additionally, the PO&M PPA provides funding for the personnel and resources required to pursue CBP's space reduction and cost saving initiatives including the Office of Management and Budget's (OMB) Freeze the Footprint policy and the June 2010 Presidential Directive "*Disposal of Unneeded Federal Real Estate*." CBP personnel are reviewing space utilization rates and developing master plans for the consolidation space and also leveraging information technology and workplace transformation solutions to realize operational efficiencies, which are anticipated to ultimately reduce CBP's square footage. An early example of these efforts includes the CBP-piloted Mobile Work Initiative in the National Capital Region (NCR) that was completed in FY 2013. Through this effort CBP was able to reduce costs and space. CBP personnel will be using this model and other innovative solutions to further reduce space in the NCR and nationally.

⁵ Percent reduction is from base year FY 2003. Energy unit measure is British Thermal Units/Gross Square Footage.

Program Oversight and Management – Select Adjustments to Base

The PO&M PPA includes a \$9.341 million realignment request from the FC&S PPA and an increase of \$5.000 million to fully support TRIRIGA at fully functional levels.

The realignment of \$9.341 million from FC&S PPA is necessary to fund critical PO&M activities at fully operational levels. This funding will be used to fully execute essential programs related to Energy and Environmental Management programs. Funding these essential programs ensures CBP will be in compliance with a multitude of laws, regulations, Executive Orders, and Federal mandates. This realignment will allow CBP to participate in the key industry memberships, including Construction Management Association of America, Corporate Executive Board-Real Estate Board, and the Federal Facilities Council, to provide CBP with the leading practices for managing its real property program.

The \$5.000 million will allow CBP to fully support TRIRIGA, including necessary upgrades, system modifications, and user training. The additional funding will ensure CBP facility managers and budgeting personnel can use the information maintained in TRIRIGA to formulate out-year planning requirements, manage facilities inventory and track in real-time the identification and subsequent remediation of documented deficiencies. Through TRIRIGA system upgrades and training, CBP will be able to track the backlog of maintenance and repair consistently in real time, vice relying solely on periodic assessments. Without these required funds, CBP will be unable to complete necessary upgrades to the TRIRIGA system to realize the full capability of the system inclusive of additional modules that will increase CBP's ability to support the tracking and support of the real property inventory. Additionally, CBP will be unable to perform all of the required training for its user. CBP users would not receive all of the required training, including tailoring online classes, which would hinder the ability of staff to efficiently and effectively use TRIRIGA.

Exhibit 7 identifies the permanent transfers into the PO&M PPA from CBP's Business Partners' accounts. In FY 2015, a total of \$377 thousand was transferred into the PO&M PPA for real property personnel consolidation.

Exhibit 7: PO&M PPA: FY 2015 Permanent Business Partner Transfers

FY 2015 Permanent Business Partner Transfers	PPA (From)	PPA (To)	OCC (To)	Amount
Consolidation of Sustainment Personnel	Office of Training and Development	Program Oversight & Management	Personnel Compensation	\$293,069
Consolidation of Sustainment Personnel	Office of Training and Development	Program Oversight & Management	Personnel Benefits	\$83,524
Total				\$376,593

**Department of Homeland Security
U.S. Customs and Border Protection
Facilities Management
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Increase for OBP Deferred Maintenance and Consolidation
PPA: Facility Construction and Sustainment
Program Increase: Positions 0, FTE 0, Dollars \$8,900

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	74,223
Program Increase							-	-	8,900
Total Request	-	-	66,879	-	-	73,251	-	-	83,123

Description of Item:

The requested increase of \$8.9 million will provide necessary funding for the facilities operations and maintenance program for CBP's real property portfolio funded out of the FC&S PPA. This PPA enables CBP to effectively execute facility solutions for operational components' mission needs and to maintain over 26 million square feet of CBP's real property inventory. Requested funding will enable CBP to address a portion of its significant deferred maintenance backlog, focusing on identified deficiencies at the Office of Border Patrol (OBP) facilities in critical mission areas along the northern and southern borders. Additionally, resources will fund the consolidation of OBP facilities in Swanton Sector, Vermont. This includes consolidating the leased Swanton Sector Headquarters facility, Swanton storage and the old Swanton Border Patrol Station into the newly constructed Swanton BPS that was completed in FY 2013.

The allocation of the requested \$8.9 million increase is shown in the table below. (Note that the allocation between activities is subject to change as cost estimates and project details are further refined).

Activity	Cost (\$ in Thousands)
OBP Deferred Maintenance Projects	\$ 4,900
Swanton Consolidation	\$ 4,000
Total	\$ 8,900

Justification

The proposed increase will allow CBP to allocate funding directly to critical building systems, such as HVACs and roofs, that are beyond the intended useful life and are at risk of failure and must be replaced, along with addressing other facility issues including inadequate plumbing systems, broken doors and windows, and developing mold on water pipes. In FY 2013, through Facility Condition Assessments performed at 35 percent of CBP-owned facilities, \$144 million of deficiencies were identified. This portion of the \$8.9 million increase will assist in reducing that backlog by addressing the highest priority needs in FY 2015. This increase will not only positively impact the backlog of deferred maintenance needs, but also minimize the potential “down-time” at OBP facilities due to complete failure of a critical building system. Any down-time at OBP facilities would impact the ability of Border Patrol agents to perform their essential law enforcement functions without critical infrastructure support. The additional funding will assure the continued safety and security for the general public and CBP personnel operating out of those facilities.

Additional funding will also be used for the Swanton consolidation project which will allow for the termination of costly leases for the Sector Headquarters and Swanton Storage facilities thus saving CBP rent funds in the future. The funding will address the moving of personnel and equipment from existing facilities to the new facility along with the fit-out including installation of LAN and equipment for the new personnel that will be consolidated to the new Border Patrol Station.

Impact on Performance (Relationship of Increase to Strategic Goals)

The increase allows CBP to address 3 percent of its currently identified \$144 million backlog of deficiencies and past due renewals and consolidate facilities in Swanton that reduces CBP’s overall footprint and realizes rent savings.

This increase will assure that CBP continues to meet the DHS Strategic Goal: Preventing Terrorism and Enhancing Security and CBP Strategic Goal 1: Secure the Nation’s borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel. By using \$4.9 million to address the identified issues assures that the operational mission performed at OBP facilities is not negatively impacted.

Furthermore, the Swanton consolidation will reduce the overall footprint of CBP facilities in compliance with the May 2012 OMB memorandum titled “Promoting Efficient Spending to Support Agency Operations.” This consolidation will reduce CBP’s footprint by more than 23,000 square feet and provide a rent savings of nearly \$550,000 annually.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses to plan, acquire, construct, renovate, equip, furnish, operate, manage, and maintain buildings, facilities, and related infrastructure necessary for the administration and enforcement of the laws relating to customs, immigration, and border security, including land ports of entry where the Administrator of General Services has delegated to the Secretary of Homeland Security the authority to operate, maintain, repair, and alter such facilities, and to pay rent to the General Services Administration for use of land ports of entry, [\$456,278,000] **\$482,205,000¹** to remain available until September 30, [2018: *Provided*, That the Commissioner of U.S. Customs and Border Protection shall submit to the ~~Committees on Appropriations of the Senate and the House of Representatives~~, at the time the President's budget proposal for fiscal year 2015 is submitted pursuant to section 1105(a) of title 31, United States Code, an inventory of the real property of U.S. Customs and Border Protection and a plan for each activity and project proposed for funding under this heading that includes the full cost by fiscal year of each activity and project ~~proposed and underway in fiscal year 2015~~ **2019²**. CONSTRUCTION AND FACILITIES INITIATIVES

1. Project Description, Justification, and Scope

The CBP C&FM account provides the facilities solutions and associated infrastructure required to obtain and maintain operational control of the border. It addresses the requirements for new, modernized, expanded, and sustained facilities to fulfill immediate mission-driven operational needs; accommodates increasing capacity demands associated with new agent, officer, pilot, and asset deployments; provides resources to modify and/or correct deficiencies within existing facilities and structures; and allows CBP to proactively manage the real property inventory and facilities portfolio. The FY 2015 request focuses mainly on sustainment activities of CBP's Construction and Facilities Management Program. The FY 2015 budget submission also provides funding for the build out and outfitting of the National Targeting Center facility to enhance mission operations.

2. Significant Changes

The FY 2015 request includes the centralization of facilities resources from across CBP operational and mission support components into the C&FM account. Consolidating facilities resources in this account allows CBP to manage its facilities portfolio more efficiently by funding the highest priorities while enabling offices to focus solely on their core mission responsibilities and can also yield significant cost savings and achieve efficiencies for the Construction and Facilities Management Program. The FY 2015 request includes an annualization for the National Targeting Center to enhance mission operations.

3. Project Schedule

6. Method of Performance

CBP's Facilities Management & Engineering (FM&E) Directorate provides the facilities, infrastructure and related services to CBP's operational components, known as Business Partners, in direct support of their law enforcement and other mission focused functions. As the agent of CBP's multi-billion dollar real property portfolio, it is FM&E's responsibility to be CBP's trusted and valued steward of real property and environmental solutions and services. To best meet this goal, FM&E has aligned its four Program Management Offices (PMOs) to the operational components within CBP. The PMOs include Air and Marine Facilities, Border Patrol Facilities and Tactical Infrastructure (BPFTI), Field Operations Facilities, and Mission Support Facilities.

Through the PMO structure, FM&E is a driver and active participant in the lifecycle of CBP facilities from the time an operational requirement is identified through acquisition, construction, sustainment, and finally in the disposal of the asset at the end of its useful life. In support of the portfolio lifecycle,

FM&E is responsible for assuring that facilities can support the operational components in addressing their evolving missions in a changing threat environment. FM&E's work includes the identification, planning and execution of building operations; maintenance, repairs; construction and alterations; leasing actions associated with renewals and forced moves; environmental and energy compliance and initiatives; portfolio and master planning; tunnel remediation and the historic preservation of qualifying facilities.

As part of the planning and execution process that supports the sustainment of CBP's portfolio, FM&E determines its baseline sustainment needs, for the near term and into the out-years, using industry standards. FM&E specifically uses the Federal Facilities Council (FFC) standard which is based on the Plant Replacement Value (PRV) of the portfolio; CBP's PRV is \$2.9 billion in FY 2015. The FFC standards identify four areas of facilities sustainment activity and the required funding level; CBP's baseline sustainment requirement totals \$338 million in FY 2015. FM&E will then use these industry standards as a guide as the Directorate aligns its sustainment strategy and needs within available funding levels. The following outlines each area of facilities sustainment activity based on FFC standards and the associated funding requirement in FY 2015:

- *Building Operations and Services (5% of PRV and equivalent to \$145million)*
Building Operations and Services are the required day-to-day activities needed to keep CBP-owned facilities open and functional. Activities include: utility costs, pest extermination, waste disposal, grounds upkeep, janitorial services and snow removal.
- *Maintenance and Repairs (4% of PRV and equivalent to \$116 million)*
Maintenance and Repairs includes the required recurring sustainment activities including the routine maintenance of plumbing and heating systems along with the unplanned repairs that may deem a building system, such as fire suppressing sprinkler systems, non-operational. This also includes remediation efforts to address fire-life safety, OSHA and ADA violations.
- *Building Systems Recapitalization (2% of PRV and equivalent to \$58 million)*
Building Systems Recapitalization assures that facility support systems, such as Information Technology, HVAC, security, plumbing and electrical, are compliant and modernized to meet mission needs. The funding will be required either at the end of the assets useful life so the system can be replaced or throughout the assets lifecycle as systems need to be modernized to assure that systems meet mission needs.
- *Lease Renewals and Forced Moves (4% of the Rent Bill and equivalent to \$18 million)*
Lease Renewals and Forced Moves activities are the one-time costs associated with renewing CBP's leased facilities in place or relocating to a new facility. These costs include putting in place the necessary infrastructure to support daily mission operations including perimeter security infrastructure, physical security alarms, cabling, voice, data and IT infrastructure equipment and fixtures and furniture.

Using the FFC standards as a guide, FM&E identifies the minimum 'must have' sustainment requirements to assure the real property portfolio is operationally viable, especially for the day-to-day operational and maintenance contracts at CBP-owned facilities. As the portfolio has grown significantly over the past fiscal years, FM&E continues to pursue cost-efficient efforts to assure that

all CBP-owned facilities are appropriately maintained and operational and extend the useful life of the facility. These cost reducing efforts include regional maintenance contracts, which have proved to reduce overall costs and improve response times to emergency repairs. The day-to-day maintenance efforts may be part of a larger regional contract that supports facilities of multiple Business Partners or are included in a contract designed specifically for the type of facility of a particular portfolio depending upon the location and type of facility. FM&E is constantly reevaluating its approach to sustainment and will consistently review, realign and establish the appropriate levels of service and associated costs to assure facilities are operational and functional.

During the lifecycle of a facility, specific, unbudgeted, issues may arise that must be addressed including repairs or premature replacement of a non-functioning building system. As part of the FFC standards and fiscal planning, PMOs will account for these unexpected issues as part of their overall budget request based off historical figures and the current state of the facilities. These deficiencies are identified through Facility Condition Assessments (FCAs) which are performed on a three-year cycle at CBP-owned facilities. FCAs represent the source metrics for CBP's overall Facility Condition Index (FCI). The FCI allows FM&E to evaluate the health of its owned facilities portfolio. An FCA identifies the condition of the asset, deficiencies, and when renewals will need to be performed as a result of the asset reaching the end of its useful life.

While the FCAs represent one portfolio-wide source, many of the deficiencies are identified through regular site visits to the facilities and recurring, direct communication between the Business Partner and the PMO. Furthermore, through some of its operational and maintenance contracts, FM&E has set up call centers and work ticket systems for facility managers and users to identify and report repair and maintenance needs throughout the course of the fiscal year. When budgeting for repairs and replacements, FM&E records its deficiencies in its integrated workplace management system called TRIRIGA, which allows FM&E to integrate real property and project management functions necessary to manage the lifecycle of the real property portfolio in a single web-based technology platform. TRIRIGA helps to identify needs and assists in the development and execution of spend plans.

For capital facility projects that exceed a \$1 million threshold, FM&E requires a Requirements Documentation and Alternatives of Analysis (RDAA) justification for each project in order for the identified facility solution to be considered for potential funding. Capital projects involve construction, significant alterations to an existing facility, and lease acquisitions that include major tenant improvements. These requirements are most often communicated to the Business Partner through a Mission Need Statement that will require a facility solution to accommodate a change in mission requirements. This may include the relocation of personnel or assets or an increase or refocus of mission in a particular location. The PMO will then determine the facility solution that is the most cost-efficient while also meeting the needs of the operational component. Through the development of the RDAA package, the PMO will scope, schedule and analyze various ownership alternatives including lease versus owned, co-locations, consolidations, interagency agreements, and public private partnerships.

The RDAA package is used as justification at two points during FM&E's budget request process:

1. The RDAA is used to inform the Capital Facilities Investment Plan (CFIP) which identifies and prioritizes the major, out-year, unfunded real property needs as part of the five-year Resource

Allocation Plan (RAP) process. Submitted annually to the Commissioner or Deputy Commissioner, the CFIP aligns numerous strategic documents including CBP Integrated Planning Guidance, the CBP Office of Program Development's Programming Guidance, and takes into account the mission impacts and political sensitivities of the operational components. The CFIP is first prioritized using a real property orientated grading criteria and then is reviewed at numerous levels of governance including FM&E senior leadership, the Mission Directors of the Business Partners, and the CBP Assistant Commissioners and Chiefs. The Commissioner or Deputy Commissioner then gives final approval which represents leadership concurrence with CBP's real property priorities.

2. In development of the Budget Year spend plan, the RDAA is used to justify the funding of near-term, discrete project requirements that do not support the sustainment of the existing portfolio. As with the CFIP, these projects are over the \$1 million threshold and developed in response to a Business Partner need. At this point in the budget process, the scope, schedule and cost are finely defined and are ready for execution as soon as funding becomes available. The thoroughly defined RDAA is crucial for FM&E leadership in determining whether a capital project should be given funding over other sustainment requirements. Major CBP programmatic focuses, such as an expansion of mobile work or facility projects that result in a positive return on investment, are factored into the leadership decision.

As, both sustainment and mission facility requirements are identified through recurring maintenance and operations contracts, FCAs, direct communication with the Business Partner or Mission Need Statements, the requirement is classified within FM&E's Category Matrix. These categories include:

- building operations;
- maintenance;
- repairs;
- construction;
- alterations;
- leasing actions associated with lease renewals and forced moves;
- environmental and energy;
- planning;
- tunnel remediation; and
- historic preservation.

These categories are then broken down into sub-categories which provide more detail into the actual activity. Special Identifiers are then used as a third tier and are the most finite level of identification used to distinguish those projects with a particular focus; for example, addressing fire-life safety violations or major strategic initiatives or policies, such as space consolidation.

After identifying the requirements and the associated category of the facility activity, projects are submitted to FM&E leadership for funding consideration. Due to the extensive needs across the real property portfolio, requirements are prioritized using FM&E's Integrated Planning Guidance (IPG), which is aligned to CBP's IPG, FM&E's Strategic Plan and other strategic documents within DHS and CBP. For FY 2015, the primary drivers by which facility requirements were prioritized for funding were:

- meeting legal and regulatory obligations, and providing safe and secure facilities for CBP employees and the general public;
- carrying out stewardship responsibilities by ensuring appropriate maintenance and operations of the existing footprint;
- providing facilities support for mission critical strategic CBP initiatives;
- developing initiatives that produce lifecycle cost savings; and,
- abiding by “Freeze the Footprint”.

After prioritization and approval from the Business Partners through the Facilities Management Council, FM&E leadership finalizes the upcoming Budget Year Spend Plan which includes the funded facility projects for that fiscal year. Leadership will consider any political factors and pressing needs that may have arisen during the requirement development process.

After project requirements are analyzed, prioritized, approved for funding, and appropriated funds, FM&E executes procurements through the CBP Office of Procurement, U.S. Army Corps of Engineers (USACE), and U.S. General Services Administration (GSA) for the execution of its capital and some sustainment work. Due to the recent transfer of wage-grade personnel from the Border Patrol to the BPFTI PMO, some sustainment activities at Border Patrol facilities are executed directly by FM&E personnel. Additionally, through a memorandum of agreement, USACE provides services to CBP on an as needed basis. These services include consolidated program management services for real estate planning and acquisition, planning and programming, environmental planning and compliance, design and cost engineering, construction and warranty enforcement, and integrated occupancy services.

During the year of execution, approved facilities projects are tracked through Program Management Reviews, conducted by FM&E leadership, on a bi-monthly basis for each PMO portfolio. Projects in-progress, which may be completed over several fiscal years, are consistently tracked and reported by project managers in the field. This tracking monitors the project delivery for alterations construction and leasing activities through industry standards, including each project’s schedule, scope, and budget. Obligation plans and project completion schedules are tracked within the CBP accounting system and FM&E’s integrated workplace management system, TRIRIGA. These systems include modules that store specific information on all aspects of each asset. The real property profile performance data can be used to produce financial, procurement, real property, and project indices for measuring the performance of the assets and the services that support it.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Air and Marine Interdiction

I. Appropriation Overview

A. Mission Statement for Air and Marine Interdiction:

CBP protects the Nation through the coordinated use of integrated air and marine forces to detect, interdict, and prevent acts of terrorism and the unlawful movement of people, illegal drugs, and other contraband toward or across the borders of the United States. The CBP Office of Air and Marine's (OAM) core competencies include air and marine interdiction, air and marine law enforcement, and air and national border domain security.

OAM has a staff of over 1,700 personnel, including pilots and aircrew, air and marine law enforcement officers, operations specialists, logistics and maintenance support personnel, and administrative personnel. Mission critical assets for FY 2015 are: 213 aircraft (including fixed wing, rotary helicopters, and unmanned aircraft systems), 305 marine vessels, the Air and Marine Operations Center (AMOC), fixed and mobile surveillance equipment, ground vehicles, training facilities, maintenance facilities, aircraft hangars, and marine facilities located along the land and maritime borders and at key interior support locations.

B. Budget Activities:

The Air and Marine Interdiction appropriation is comprised of three major Program, Project, and Activities (PPAs): Salaries and Expenses, Operations and Maintenance, and Procurement.

Funding for the Office of Air and Marine is divided amongst the following key functions and capabilities:

Key Mission Areas and/PPA	Key Functions and Capabilities	Funding (Dollars in Thousands)
Salaries & Expenses	Salaries and Expenses funds salaries and benefits for OAM's personnel force, permanent change of station (PCS), overtime/premium pay, ammunition, tactical law enforcement gear and equipment, administrative training and travel, and school tuition for dependents of employees in foreign countries.	293,016
Operations and Maintenance	The Operations and Maintenance PPA funds aircraft and marine vessel maintenance and logistic support, training, fuel, material repairs, operating base support, and engineering.	362,669

Key Mission Areas and/PPA	Key Functions and Capabilities	Funding (Dollars in Thousands)
Procurement	Procurement funds are used to purchase new aircraft and marine vessels and to recapitalize existing assets to extend service lives, enhance mission effectiveness and/or lower life-cycle maintenance costs.	53,000

Treasury Account Symbol	Amount (in millions)	Purpose of Funds by PPA	Projected Obligation Date
70 X 0544	\$43.1	Proc \$35.4M, O&M \$7.7M	Proc FY14 Q2-4, O&M FY14 Q2-4
70 3/5 0544	\$8.2	O&M \$8.2M	FY14 Q2-4
70 2/4 0544	\$13.1	Proc \$12.3M, O&M \$8M	Proc FY14 Q2-4, O&M FY14 Q2-3

C. Budget Request Summary:

DHS requests \$708,685,000 for FY 2015 Air and Marine Interdiction. This request includes \$53.0 million for procurements, \$362.669 million to Operations and Maintenance, and \$293.016 million for Salaries and Expenses. This funding level is -\$96.383 million less than FY 2014.

D. Savings and Reductions:

Some of the efficiencies and reductions shown below are spread across multiple sub object class codes.

Other contract Services Efficiencies

\$0.36 million

Efficiencies (\$0.15 million): This efficiency is a CBP agency-wide IT Standardization initiative that will identify a common set of standards for IT hardware, reducing the variation of devices and number of vendors, increasing the opportunity for volume purchase power behind larger buys. CBP has also identified savings across the agency in FY 2015 that will be achieved by further reducing the use of mobile electronic devices.

Professional Services Contracts (\$0.21 million): This efficiency is a CBP agency-wide contracts savings initiative that will identify an across-the-board 5 percent cut to contract services in common service areas. The intent is to reduce the variation and number of contracts, increasing the opportunity for better-defined needs, stronger funding controls, and strategic sourcing.

II. Summary of FY 2015 Budget Estimates by Program/Project Activity (PPA)

CURRENT SERVICES PROGRAM DESCRIPTION:

OAM supports the DHS Strategic Plan (FY 2012 – FY 2016), Mission 2, *Securing and Managing Our Borders*, Goal 2.1 to *Secure U.S. Air, Land, and Sea Borders*, and the Five Year Homeland Security Program (FYHSP) *Securing America's Borders*, by preventing contraband, illegal migrants, terrorists and terrorist weapons from entering the U.S. It includes the personnel that perform the mission.

In the latter half of FY 2013, OAM initiated an assessment of the efficiency and effectiveness of its force laydown to determine where assets, people, and maintenance support should be concentrated in order to continue meeting CBP and DHS mission needs within the resources projected for the out-years. The assessment clearly showed a mismatch of aircraft types, numbers, and crew along the Northern Region, and a growing gap in support along the Southwest Region, in particular the Rio Grande Valley. The evolving mission along the Northern Region now calls for a smaller number of light helicopters and light aircraft, best suited for surveillance missions and support for investigations conducted mainly by Immigration and Customs Enforcement (ICE), the Federal Bureau of Investigations (FBI), the Drug Enforcement Agency (DEA), and state and local law enforcement, and also ideal for Border Patrol support. The exception was the Great Lakes region and the operating areas around Bellingham, WA, where longer range maritime missions still required more capable, twin-engine aircraft. At the same time, OAM recognized a rapidly growing Border Patrol support mission around McAllen and Laredo, TX, reflected in a dramatic rise in the operating tempo through FY 2013 and into FY 2014. The border security mission needs were initially met by temporary assignments of aircraft and crew, as well as maintenance and logistics personnel, from branches and units in the general area of responsibility. The best available information pointed to the need for a more permanent solution, so in late FY 2013 OAM began a gradual re-alignment of assets and people from the Northern Region to the Southwest Border.

The implementation of the re-alignment will take between three and five years, and will be budget neutral. Each year, trade-offs will be conducted among staffing, permanent change of station (PCS) actions, and premium / weekend overtime pay needed to support prime time operations in order to re-balance OAM to the mission and its operating tempo. It should be emphasized that no Northern Region branches or units will be closed, but the aircraft, marine vessel, and staffing mix will change.

Unrelated to the re-alignment, OAM will close the UAS launch site at Canaveral AFS, FL, in favor of operating the two unmanned aircraft assigned there from Corpus Christi, TX, and Sierra Vista, AZ. Over time, the inefficiency of the Canaveral operation became apparent and the need to have additional UASs closer to the Southwest Border became compelling. Moving these UASs to the Southwest Border allows OAM to more effectively employ the new Vehicle Dismount and Exploitation Radar (VADER) broad area sensor over the land border, and coordinate maritime UAS operations in the Gulf, along the coast of California, and to the drug Source and Transit Zones in the Eastern Pacific and Gulf, from South America to the coasts of Mexico and the U.S.

CURRENT SERVICES PROGRAM DESCRIPTION:

Aviation and Marine Missions, Operating Levels, and Readiness

OAM supports a variety of missions and receives assignments from a variety of mission owners, consistent with DHS and CBP priorities, effectively utilizing the available intelligence on threats and how they are evolving, as well as the experience of the air and marine field leaders. OAM conducts periodic reviews and assessments of its missions, their operational requirements, and resource distributions that inform its long term strategy and dictate annual changes to asset deployments, staffing assignments, and flight hour allocations. Each year, based on available funds, OAM allocates flight hours and associated fuel funding to the branch levels, and for each aircraft type. In general, OBP is allocated 72 percent of all flight hours for border security missions, while ICE is given a fairly consistent 11 percent. All other federal agencies (FBI, DEA, USSS, DOD, DOE, and DOI) are

generally allocated about 12 percent, while state, local, and tribal law enforcement activities are given up to 5 percent.

Support for the Federal Emergency Management Administration (FEMA) varies greatly from year-to-year and is generally provided above appropriated levels because recovery efforts related to man-made and natural events are reimbursable under the Stafford Act (PL 100-107). Within these percentages, the P-3 long range patrol aircraft allocation to the Joint Interagency Task Force – South (JIATF-S) for drug source and transit zone missions varies from 8 percent to 10 percent each year, depending on available resources, while Unmanned Aircraft Systems (UAS) operations are growing and the program comprises 7 – 8 percent of the total hours for the last two years.

OAM operations and maintenance budgets are driven by the number of operating sites supported, the types and numbers of aircraft (along with their ages), and the operating tempo. They are also influenced by industry inflation, which can exceed inflation in other sectors of the economy by a few percentage points. Within the total O&M budget for a given year, fixed costs consume most of the available funding and include maintenance and logistics contracts with their associated work forces, directed programs, such as Long Range Radar, inter-agency or foreign partner agreements, base operating expenses, and training. Variable costs, such as fuel, spare parts, travel, the repair of repairable components, and other consumable supplies average near 20 percent of the total. In the short term, variable cost funding levels determine the available flight hours and levels of aircraft and marine vessel readiness. Over the long term, funding levels can drive changes to fixed cost components, requiring a more or less permanent change to operating locations, support contracts, asset levels, and staffing as well as to OAMs operating tempo and mission sets. As mentioned above, OAM conducted an operational assessment in the second half of FY 2013 that concluded a re-alignment of assets and personnel was needed in order to more efficiently support CBP and DHS priority missions. The FY 2015 request for O&M funding shows little change at the macro level, but at the branch and unit level will reflect the ongoing migration of resources to the Southwest Border.

Air and Marine Mission Sets

OAM's implementation strategies are based on positioning CBP's aviation and maritime assets to provide expertise and responsiveness in several strategic mission sets, each critical to the overall success of priority CBP and national missions. The Budget supports maintaining flight hours in FY 2015 at the same level as FY 2013. OAM will continue to provide support to CBP's primary missions along the Southwest Border, the drug Source and Transit Zones, and the Secretary's priority mission in and around Puerto Rico. The following mission sets reflect OAM's core competencies:

- Air to Land Enforcement – Involves the capability to search, detect, identify, track, and respond to suspect ground targets of interest moving by vehicle or on foot. Interdiction can occur on approach to the land border, at crossing points, or after the border has been breached. Air to land interdiction is conducted in all geographic conditions and at all borders.
- Air to Air Enforcement – Involves the capability to search, detect, track, and sort airborne suspect targets of primarily general aviation aircraft. In a national security role, this serves the function of determining hostile intent of the suspect aircraft. Air interdiction is conducted over both land and sea in all weather conditions and operating environments. This mission includes,

but is not limited to, an apprehension capability far before a suspect air target approaches the border, as the border is crossed, and well into interior airspace.

- Water to Water Enforcement – Involves the capability to search, detect, identify, and track waterborne suspect targets of interest. Marine interdiction can involve an integration of aviation and maritime asset capabilities. Waterborne apprehensions include, but are not limited to, preventing persons or items from illegally entering the United States from foreign ports of call.
- Air and Marine Domain Awareness - Involves the employment of OAM's reconnaissance, surveillance, and target acquisition (RSTA) capabilities to provide situational awareness in all operating environments. This includes determining suspect targets requiring enforcement actions. OAM has ground based, airborne, and coastal/riverine RSTA capabilities with hemispheric reach to manage this capability.
- Major National Natural and Man-Made Events – Involves OAM's response to natural disaster areas to assist in recovery operations and to fly low-level damage surveillance missions over varied terrain, airspace security over national events including the Presidential Inauguration, political conventions, and major public events such as the Super Bowl.

Flight Hours

As indicated above, annual flight and float hours are projected for each budget request, then allocated to the branch and aircraft type levels as funds are appropriated each year. OAM must also adjust the flight hours allocated based on when funds become available. Table 1 provides the flight hour history for OAM, along with a preliminary projection for FY 2015.

Table 1: OAM Flight Hours FY 2006 – FY 2015

**Program Flight Hours: FY 2014 Allocated and the FY 2015 Budget Request

	106,070	100.0%	94,857	100.0%	81,045	100.0%	73,576	100.0%	90,735	100.0%	73,474	100.0%

Note 1: OAM originally estimated FY 2013 Enacted flight hours at 80,000; however an operations slow-down in response to sequestration in March 2013, along with the interval between budget enactment and the apportionment of funds, left insufficient time in FY 2013 to reach 80,000 hours. The hours above reflect the attendant adjustment.

Note 2: The P-3 Program received \$2.5M in forfeiture funds, including S&E for weekend/night pay, to increase flight hours above the allocated amount.

Note 3: The FY 2014 enacted budget provided funding sufficient to increase flight hours to 107,000 hours, however, funds were not apportioned until February, leaving insufficient time to execute all of the hours; the 90,735 shown above is the amended objective.

Note 4: The FY 2015 President's Budget provides for funding sufficient to restore flight hours to FY 2013 levels; slightly more should be achievable, as shown, if funds are apportioned in the first quarter of the year.

As with flight hours, float hours vary based on budget and vessel availability. Table 2 shows underway hours for FY 2012, FY 2013 and FY 2014. It is expected that FY 2015 float hours will be comparable to those in FY 2014.

Table 2: Marine Vessel Underway Hours

	FY 2012 Actuals	FY 2013 Actuals	FY 2014 Projected	FY 2015 Projected
Coastal	46,586	43,442	45,000	45,000
Riverine	77,514	67,949	70,000	70,000
Total	124,100	111,391	115,000	115,000

Readiness

Since the award of the national maintenance contract in FY 2010, readiness has generally improved over time. Initial backlogs of repairs and material orders, work force shortages, and better subcontract management have enabled OAM to ensure quality maintenance, better logistic support, and more responsive turn-around times for maintenance actions. Early issues with the material condition of the aircraft assigned to the southwest border that were not maintained under the legacy central

maintenance contract have been overcome, though OAM still uncovers unauthorized repairs during major phase inspections that pre-date OAM and, in the worse cases, the aircraft are retired earlier than planned. However, industry-wide just-in-time management approach that limits shelf stock, shift and overtime work, and the size of contractor work forces, have resulted in long lead time for new spare parts, longer repair times at industrial depots, and higher costs. OAM has some advantages in logistic support since its aircraft are either military or commercial variants and can be supported for their expected lifetimes, however, competition for spares and repair services can be an obstacle to improving readiness. The overall readiness objective for OAM is 80 percent, as expressed in its commercial support contracts; however, achieving that objective depends directly on available resources and the ability to shift assets and people where they are needed.

Graph 1 shows readiness trends since the new national maintenance contract went into full effect in FY 2011. While the overall trend is positive, exceeding the 80 percent objective for substantial periods of time, the upward spike in readiness in the middle of FY 2013 was due to a drop in the operating tempo that allowed the maintenance and logistic support to “catch-up.” However, the trend has been downward for the last half of FY 2013. The main reason for the downturn is the rapid expansion of operations in Texas, specifically in the Rio Grande Valley. The operating tempo for the sector has now exceeded that of Tucson, AZ, and there were insufficient assets, crew, maintenance personnel, and spares to cover the demand. In addition, mandatory phased maintenance inspections “stacked-up” as assets were rotated from other branches and units to supplement the small number of aircraft in McAllen and Laredo. In response, OAM hired temporary FAA-certified maintenance technicians, worked with the aircraft manufacturers to accelerate spares deliveries, and provided parts “pack-ups” for the phased inspections. In the Southeast Region, the main readiness issue involves major phase inspections for the DHC-8 patrol aircraft and ongoing issues with the older twin engine patrol aircraft, due for retirement by the end of FY 2014. The DHC-8 inspection is at the depot level and this is the first time they are being accomplished on the OAM aircraft. Initial inspections were taking in excess of two months, prompting OAM to seek assistance from commercial depots that routinely care for the over 2,000 DHC-8 series aircraft in use across North America. In addition, substantial investments in DHC-8 radar system spare parts made in FY 2012 and FY 2013 will begin delivering in the fall of 2014, and should, with the reduced depot inspection time, drive DHC-8 readiness up. Black Hawk readiness across the two southern regions will only improve after all UH-60A models are recapped and converted to UH-60L models.

Graph 1: Logistics and Maintenance (L&M) Aircraft Fleet Data¹

Table 3 displays detailed O&M budget allocations for FY 2011 through the projection for FY 2015 that support both readiness and the flight hour levels discussed above. As can be seen, just minor funding changes in key variable cost areas can affect the flight hours achieved and the support needed to maintain readiness.

OAM expects to have sufficient O&M carryover and recoveries in FY 2013 to support increases to the national maintenance contract, the P-3 maintenance contracts, UAS operations, the national marine contract, and fuel in FY 2014. Until the final carryover and recoveries are calculated, and the final budgets are determined for FY 2014, the flight hour forecast for the year will remain unchanged

¹ Aircraft figures shown in the graph differ from the planned aircraft retirements shown in the Procurement PPA section because contract actions are required to adjust the National Maintenance Contract scope of work.

Table 3: O&M Budget Allocations

	Enacted				Request
	FY 2011	FY 2012	FY2013	FY 2014	FY 2015

	Sensor Upgrades for Tactical Aircraft			9,300
FY 2015 Request	Air & Marine Procurement	0	0	53,000

CURRENT SERVICES PROGRAM DESCRIPTION:

Procurement investment funds are used to purchase new aircraft and marine vessels and recapitalize existing assets to extend their service lives, enhance mission effectiveness, and lower maintenance costs.

In August 2006, when the original Strategic Air and Marine Plan (StAMP) was submitted to Congress, four specific objectives were delineated:

- to unify and integrate CBP Air (and later, Marine) and all of its forces;
- to enhance border security and surveillance;

- to recapitalize aging aviation and marine assets, creating a more flexible and responsive air and marine force; and,
- to continue support for traditional missions, specifically support for ICE investigations and drug Source, Transit, and Arrival Zone missions under the integrated command of the Joint Interagency Task Force South (JIATF-S).

Over the past eight years, CBP has initiated 14 distinct programs and projects directly tied to, or in association with, the StAMP. As a result, significant progress has been made toward replacing or recapitalizing aged aircraft and marine vessels, and providing CBP with a highly effective and flexible range of assets, supporting sensors, and equipment. The following is a summary of the assets and supporting capabilities delivered to date:

A. Helicopters

- 20 EC-120 Light Observation Helicopters
- 46 AS-350 Light Enforcement Helicopters
- 6 UH-60L/M Black Hawk Medium Lift Helicopters (recapitalized and new)
- 3 S-76B Medium Lift Helicopters (received from the Drug Enforcement Administration)
- 3 UH-119 Huey Air Mobility Helicopters

B. Fixed-Wing Aircraft

- 5 DHC-8 medium range patrol aircraft
- 9 P-3 long range patrol aircraft (service life extensions completed)
- 6 KA-350CER Multi-role Enforcement Aircraft (MEAs)
- 10 Predator B / Guardian Unmanned Aircraft Systems (UAS)
- 3 Upgraded C-550 twin-jet interceptors

C. Marine Vessels

- 26 SAFEBoat (33-foot and 38-foot)
- 6 Interim Coastal Interceptor Vessels (CIVs)
- 1 Prototype New Generation Coastal Interceptor Vessel (CIV)
- 4 Prototype Riverine Shallow Draft Vessels (RSDV)
- 12 Midnight Express Interceptors (service life extensions completed)
- 12 Coastal Enforcement Vessels
- 12 airboats

D. Capabilities and Support

- Various sensors, downlink capabilities, and enhanced operating picture software
- A new national aviation maintenance contract
- Processing, Exploitation, and Dissemination Cells at the Air and Marine Operations Center and National Air Security Operations Center – Grand Forks
- BigPipe downlink video distribution network
- 2 new broad area electronic sensors on contract for delivery in early FY 2015

Over the final years of the StAMP, CBP will continue to recapitalize its aged UH-60A helicopters through the U.S. Army, continue to purchase additional KA-350CER MEAs, and complete the last two remaining marine vessel procurements. Though the StAMP will officially end in FY 2016, it is expected that the UH-60 and KA-350 programs will continue with low level production rates that will

take those programs well into the late 2020s. The marine vessel programs are expected to go into full production in FY 2014, and should conclude before the official end date of the StAMP in FY 2016.

Aged Aircraft Investigation

The Final Phase

FY 2014 is the last year of the aged aircraft investigation effort which commenced in FY 2010. The investigations involved:

1. Service life assessments by aircraft type to determine the risk of keeping the assets in operation;
2. Increased maintenance inspections and repairs to ensure that operations could continue safely and to help determine when risks had grown too great; and,
3. Visibility into aging aircraft trends to help determine when types/models might be retired.

The initial investigations targeted three specific assets that were experiencing age-related problems and might be retired in the near term. Since OAM had increasing mission requirements at the time, and new and upgraded aircraft deliveries lagged, OAM attempted to keep each type of aircraft in service for as long as possible. Over time, the aged aircraft investigations and new aircraft deliveries converged, and OAM began to retire larger numbers of aircraft, including entire types and models.

In FY 2012, aircraft retirements began to accelerate in response to growing concerns over corrosion, stress cracks, unauthorized structural repairs that pre-dated the formation of OAM, and material failures. By early FY 2013, several type/model/series of aircraft were purged from the inventory. The following chart displays all aircraft types/models retired through the end of FY 2014 when the effort will formally end. A small number of older model Black Hawk helicopters will remain in the inventory until they can be recapitalized or retired.

Table 2: Aircraft Inventory by end of Aged Aircraft Investigation

**U.S. Customs and Border Protection

Total Request	-	-	20,500	-	-	43,000	-	-	43,700

Description of Item

The budget requests \$43.7 million for two King Air (KA)-350CER Multi-Role Enforcement Aircraft (MEA).

- | | |
|-----------------------------|---|
| 1. MEA Production Aircraft | \$ 8.5M |
| 2. Sensors | \$ 4.5M |
| 3. Communications Equipment | \$ 1.0M |
| 4. Systems Integration | \$ 7.85M (Includes a/c mods and missionization) |
| Total | \$21.85M |

Project Schedule:

Milestone	Projected Completion Date
Acquire 2 MEA's	FY 2016

Primary Contractor(s): Sierra Nevada

Project Location(s): Hagerstown, MD

Key Events: The MEA contract will be re-competed.

Justification

The Multi-role Enforcement Aircraft Program

The MEA was introduced to fill the gaps created by the end of the DHC-8 medium range patrol aircraft production line, the termination of the PC-12 single-engine aircraft contract, and the planned retirement of at least 26 aging twin-engine patrol aircraft that CBP inherited from a variety of sources. The MEA is a multi-role aircraft with a multi-mode radar for use over water and land and for air-to-air situational awareness. It also has an Electro-Optic/Infrared sensor, basic and advanced Law Enforcement

Technical Collection packages, and Ku-Band and Iridium downlink system capabilities which allow for communication by voice and sensor data anywhere in its operating area in near real time. It is the most capable new, twin-engine aircraft to be purchased by CBP. A total of eight aircraft have been ordered, with three in operation in San Diego, California, and Jacksonville, Florida. Three additional aircraft should be delivered by October 2014 and the ninth by January 2015. Funds for the minimum production quantity of two per year are included in the President's FY 2014 and FY 2015 requests, with deliveries expected a little over a year after the orders are placed. By the end of FY 2015 a total of 12 aircraft would be either delivered or in production.

Impact on Performance (Relationship of Increase to Strategic Goals)

This aircraft and associated sensor capabilities provide direct support to CBP efforts to secure the Nation's borders. Unlike the older, less capable aircraft they are replacing, the MEA addresses threats along the border from the land and sea. Apprehensions and seizures will increase through the use of this aircraft because the aircraft is more capable than the aircraft it has replaced. It has more flight endurance, a marine search radar, electro-optical infrared camera system, and a satellite communications system. The aircraft has begun operations off the Southern California coast to respond to growing threats from the go-fast vessels attempting to reach the coast of California and deposit bulk cocaine where it can be quickly distributed inland. During FY 2013, the two aircraft deployed to the southwest border have flown 729.4 hours of Reconnaissance, Surveillance, and Target Acquisition (RSTA) missions.

Funding for the minimum production quantity of two aircraft per year will ensure the MEA production line will not close. This funding will ensure OAM would not have to reconfigure the mission operating system through a new contractor, at considerable cost, and contend with supporting a mixed fleet of "old" and "new" aircraft configurations.

Department of Homeland Security
U.S. Customs and Border Protection
Air and Marine Interdiction
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Sensor Upgrades for Tactical Aircraft
PPA: Procurement
Program Increase: Positions 0, FTE 0, Dollars \$9,300

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	9,300
Total Request	-	-	-	-	-	3,500	-	-	9,300

Description of Item

The budget requests \$9.3 million to purchase up to nine sensors for up to three tactical aircraft sensor replacements.

Project Schedule:

Milestone	Projected Completion Date
EO/IR Sensor Order	30 days after Receipt of Funding
EO/IR Sensor Receipt	90 days after Receipt of order by OEM at a rate of 2 EO/IR sensors per month
Special Tools procurement	60 days after order submitted
Training	30 days after receipt of 1st EO/IR sensor
EO/IR Acceptance	One week after receipt (dependent on completion of training)
Deployment	2 weeks after acceptance (dependent on training and acceptance)
Obsolete EO/IR disposition	As EO/IR sensors are deployed

Primary Contractor(s):

Defense Support Services (DS2): Contractor Logistics Support (CLS) provider
Original Equipment Manufacturer as determined via procurement method

Project Location(s):

- 1) Washington, DC
- 2) Jacksonville, FL
- 3) CBP Southwest Region, United States area of operations.

Justification

As the Strategic Air and Marine Program is drawing to a close, OAM must begin to replace and upgrade multiple types of sensors on aircraft slated for continued service, but not included in the overall ten year recapitalization effort. These sensors are obsolete and/or no longer supportable through traditional spare parts or maintenance sources, and the effort should not be considered a capability increase. Initially, OAM will replace or upgrade sensors on a one-for-one basis just to maintain current inventory levels. Over time, and consistent with available funding, additional spare sensors may be purchased to account for industry repair lead times in order to improve operational readiness.

U.S. Customs and Border Protection Office of Air and Marine

Aircraft Sensor Replacement Summary Costs & Phasing FY 2015 Plan (\$ Millions)

			Quantities
Sensors	To Replace	Aircraft Type(s)	FY 2015
TBD High Def EO/IR	Safire II EO/IR Ultra-LE EO/IR Ultra 7500/B EO/IR Ultra 8500 EO/IR	AS-350B2 Light Helicopter	5
		AS-350B2/3 Light Helicopter	5
		AS-350B2/3 Light Helicopter	
		AS-350B2/3 Light Helicopter	
		C-206 Light Patrol Aircraft	
MX-15HDi EO/IR	MX-15 EO/IR	DHC-8 Multi-role Patrol Acft	
		PC-12 Single-Engine Patrol Acft	
TBD High Def EO/IR	Star Safire II / HD	AS-350B2/3 Light Helicopter	4
		UH-60L/M Black Hawk	
Total Sensors			14
Estimated Cost			15.2
FY 2015 OMB Submit			9.3
Funds from Exchange / Sales			5.9
Delta Shortfall			0.0

Notes:

- 1) The Electro-Optical/Infrared (EO/IR) high definition cameras shown as TBD in the first column will be purchased competitively; or via IAA to access another Government Agency's contract
- 2) The estimated costs could change depending on the results of the procurement via competitive or other Government Agency's contract, EO/IR sensor configuration and when units are purchased;
- 3) OAM will standardize sensors within aircraft types, and across types when feasible, over time;
- 4) The delta funding from exchange / sales is estimated, and no guarantee that all funds shown will be available; a shortfall in any year will cause a slip in purchases into the following year or beyond;
- 5) UH-60L/M Black Hawks and Multi-role Patrol Aircraft (MEA) are outfitted with new sensors during recap / production.
- 6) Only 3 C-550 jet interceptors have new sensors; once a decision is made on the future end-state of the aircraft, additional sensors may be replaced.

Key Points:

- The overall sensor replacement and upgrade effort of 70 sensors and 97 tactical radios will take place over multiple years;
- The sensors and equipment being replaced are obsolete or cannot be logistically supported through normal supply channels;
- As a part of the effort, OAM will work to standardize sensor configurations across aircraft types to reduce maintenance and logistics costs, and to increase operational flexibility;
- The cost of a replacement or upgrade varies from \$800 thousand to over \$1 million per unit; and,
- During FY 2015, OAM expects to replace at least 9 sensors at an average cost of \$1 million each; these include the SAFIRE II and Ultra-Media LE Low Light (UM-LE) electro optical / infrared (EO/IR) day/night cameras on the older AS-350 Light Enforcement Helicopters, located across the country, but mainly on the Southwest Border.

CBP aircraft are operating with EO/IR sensors that are up to 35 years old. The technology used to produce these older sensors is obsolete, which renders them marginally effective in comparison to newer EO/IR systems. Sixty-nine percent of CBPs sensors are no longer in production and 46 percent of the EO/IR sensors owned by CBP are no longer supported by the original equipment manufacturer (OEM), and can only be supported through parts cannibalization.

Newer, more capable sensors provide better detection and identification capabilities, greater stand-off ranges for more covert operation and safety, and laser range finder and illumination functionality, which enhance mission coordination between airborne and ground agents. Newer sensors are fully supported by OEMs for software upgrades and integration with other new, mission-enhancing technologies.

Impact on Performance (Relationship of Increase to Strategic Goals)

With the replacement EO/IR sensors, aircraft will not have to share assets, thereby decreasing the risk of damage during system swap-outs. Additionally, operational missions will be flown with a sensor, greatly increasing operational effectiveness, especially during night missions when criminal activity is highest. The sensors provide greater surveillance and situation awareness over ground and maritime borders, and enable CBP to more effectively and efficiently secure and manage the Nation's borders.

Current Services Level							-	-	391,918
Program Decrease							-	-	(29,249)
Total Request	-	-	367,750	-	392,000	-	-	-	362,669

Description of Item

The budget requests a \$29.2M decrease to the CBP flight hour program which will reduce the FY 2014 level from 90,735 hours to approximately 73,474 hours in FY 2015.

Justification

The FY 2015 President's Budget supports an estimated 73,474 flight hours for all borders and all missions performed by OAM, maintaining the level of flight hours realized in FY 2013. The FY 2014 enacted budget provided funding sufficient to increase flight hours to 107,000, however, funds were not apportioned until February, leaving insufficient time to execute all the hours; OAM expects to reach 90,735 hours in FY 2014. OAM will continue to prioritize deployments to meet the needs of DHS and CBP. Additionally, OAM recognizes that both the return on investments of new aircraft and the accelerated retirement of older, more expensive to operate and maintain aircraft, help reduce some flight costs. These factors contribute to OAM's ability to maximize the use of available funds.

The discussion that follows will describe how operations are supported today, and how they might be accommodated by the requested budget:

Over the southwest border (SWB), OAM provides direct support to Border Patrol agents on the ground, and is responsible for interdicting general aviation and maritime threats over the border and approaching the coast. Mission planning will be much more focused and tied to high confidence sensor hits, visually verified VADER detections, or based on solid intelligence. Missions based on uncertain intelligence will likely be a lower priority as CBP maximizes investments in sensor technologies, other border surveillance equipment, and applications of geospatial data to prioritize deployment decisions.

Even though ICE missions will still be supported, the level of support will likely decline as each sector weights its mission priorities. ICE support declines by 6 percent in FY 2013 and though the decrease was consistent with the overall decrease for the year, FY 2015 could see ICE support decline in a disproportionate way in some sectors due to higher priority border security mission needs. OAM expects that support to other federal (e.g., FBI, DEA, and ATF), state, and local may also decrease, except where missions are complimentary or officer safety is involved.

Along the southeast coastal region (SER), where the mission is maritime interdiction plus ICE support in and around major cities, air branch flight hour allocations may drop going into FY 2015. The flight hour reductions may also impact maritime patrols along the oil rig line in the Gulf of Mexico.

Over the last seven years, CBP has disrupted over 1.2 million pounds of bulk cocaine passing through the drug source, transit, and arrival zones of the eastern Pacific, Caribbean, and Gulf of Mexico. The maritime mission in the source and transit zones is being augmented with the Guardian UAS, and early results show a similar drug shipment disruption rate similar to the P-3, of 22 pounds per flight hour.

Impact on Performance (Relationship of Decrease to Strategic Goals)

Although impacts have been fully discussed above, below are summary bullets.

Projected reductions in OAM flight hour funding may reduce the level of support provided to the following activities:

- aerial surveillance to OBP; and,
- fewer requests for airlift support may be granted.

Department of Homeland Security
U.S. Customs and Border Protection
Air and Marine Interdiction
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 2: Reduction to Flight Hours (S&E)
PPA: Salaries and Expenses

Current Services Level							1,720	1,717	296,516
Program Decrease							-	-	(3,500)
Total Request	1,719	1,744	273,460	1,714	1,711	286,818	1,720	1,717	293,016

Description of Item

The budget requests a \$3.5 million decrease to flight hours. This reduction should be considered a companion request with the flight hour reduction program change as they go hand in hand. All discussions and impacts presented in the flight hour program decrease apply equally to this request.

Justification

The FY 2015 President's Budget request funding for flight hours to maintain FY 2013 levels to support both operations along the southwest border and operations within the Transit Zone.

Impact on Performance (Relationship of Decrease to Strategic Goals)

May reduce the level of support provided to the following activities:

- PCS moves;
- potential decrease in staffing from the 1,742; and,
- overtime.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for the operations, maintenance, and procurement of marine vessels, aircraft, unmanned aircraft systems, and other related equipment of the air and marine program, including operational training and mission-related travel, the operations of which include the following: the interdiction of narcotics and other goods; the provision of support to Federal, State, and local agencies in the enforcement or administration of laws enforced by the Department of Homeland Security; and, at the discretion of the Secretary of Homeland Security, the provision of assistance to Federal, State, and local agencies in other law enforcement and emergency humanitarian efforts, [\$805,068,000] **\$708,685,000; of which [\$286,818,000] \$293,016,000 shall be available for salaries and expenses; and of which [\$518,250,000] \$415,669,000 shall¹** remain available until September 30, [2016] **2017²**: *Provided*, That no aircraft or other related equipment, with the exception of aircraft that are one of a kind and have been identified as excess to U.S. Customs and Border Protection requirements and aircraft that have been damaged beyond repair, shall be transferred to any other Federal agency, department, or office outside of the Department of Homeland Security during fiscal year [2014] **2015³** without the prior notice to the Committees on Appropriations of the Senate and the House of Representatives [*Provided further*, that the Secretary of Homeland Security shall report to the Committees on Appropriations of the Senate and the House of Representatives, not later than 90 days after the date of enactment of this Act, on any changes to the 5-year strategic plan for the air and marine program required under this heading in Public Law 112-74].⁴

¹ ... [\$427,701,000] \$708,685,000; of which \$293,016,000 shall be available for salaries and expenses; and of which \$415,669,000 shall...	Change reflects the movement of air and marine related salaries and expenses to the air and marine account and to treat the salaries and expenses amounts as one-year funds.
² ... [2016] 2017 ...	Fiscal year change only. No substantial change proposed.
³ ... [2014] 2015 ...	Fiscal year change only. No substantial change proposed.
⁴ [<i>Provided further</i> , that the Secretary of Homeland Security shall report to the Committees on Appropriations of the Senate and the House of Representatives, not later than 90 days after the date of enactment of this Act, on any changes to the 5-year strategic plan for the air and marine program required under this heading in Public Law 112-74]	This report was submitted to Congress in December 2012 followed by an update in 2013. Propose deletion of requirement.

1. Project Description, Justification and Scope

Project Description

In the summer of 2006, CBP OAM developed and submitted to Congress a Strategic Air Plan that defined the end state for the nation-wide air service based on ongoing threat assessments and mission requirements determined by the agency and higher authority. In 2007, this plan was updated to incorporate the CBP marine service and the Unmanned Aircraft System (UAS) Program, and was re-named the Strategic Air and Marine Program (StAMP). The separate UAS PPA was formally merged into the CBP OAM Procurement PPA in FY 2007.

In April 2010, CBP accelerated the transition of StAMP from an acquisition program to a sustainment program. While no new types of acquisition are planned, aged assets will be maintained in operating condition as long as they are safe to fly. CBP will continue to standardize the types of aircraft and marine vessels, emphasizing the use of multi-mission assets that can be deployed to multiple locations as the threat changes over time. The OAM Procurement PPA is used to acquire new aircraft and marine vessels, upgrade older aircraft and vessels to extend their service lives, purchase new aircraft and marine sensors, acquire UASs, enhance surveillance and data/video distribution and sharing capabilities, and support the expansion of aviation and marine mission capabilities along the borders, in response to ongoing threat assessments and mission assignments directed by higher authority. FY 2016 marks the end of the StAMP program, with only two remaining aircraft and two remaining vessel

procurements.

CBP has established new Planning, Programming, Budgeting and Accountability (PPBA) processes, along with a new line of business budget structure, that will supersede the StAMP and provide the framework and analyses needed to determine future funding needs for aviation and marine elements supporting homeland security missions.

Program Justification

CBP protects the American people and the Nation's critical infrastructure through the coordinated use of integrated air and marine forces to detect, interdict and prevent acts of terrorism and the unlawful movement of people, illegal drugs and other contraband toward or across the borders of the United States. Terrain, weather, and distance are significant obstacles along much of the southern, northern, and coastal borders. CBP OAM support acts as a force multiplier, allowing personnel and equipment to be transported efficiently and effectively, ground and maritime interdiction missions to be supported, air interdiction missions to be executed, and interior investigations to be supported. OAM also provides rapid-response relocation of personnel and equipment to safeguard people and critical infrastructure from acts of terrorism, natural disasters and other emergencies. The Air Safety and Life Extension Contract supports the aircraft that makes it possible for CBP OAM to perform this mission.

2. Significant Changes

The funds requested will enable continued support for program operations through FY 2015.

3. Project Schedule

	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015

6. Method of Performance

1	Is there a project (investment) manager assigned to the investment?	If so, what is his/her name?
	Yes	John A. Wells
2	Is there a contracting officer assigned to the investment?	If so, what is his/her name?
	Yes	Susan Baptist
3	Is there and Integrated Project Team (IPT)?	If so, list the skill set represented.
	Yes	The IPT is comprised of individuals from the CBP Office of Air and Marine, Office of Administration, Office of Information and Technology, Technology Systems Program Office, Office of Chief Counsel, Office of Technology Innovation and Acquisition, and Office of Border Patrol representing systems acquisition, project management, systems engineering, legal review and test and acceptance.
4	Is there a sponsor/owner for this investment?	If so, identify the sponsor/process owner by name and title and provide contact information.
	Yes	Randolph D. Alles, Assistant Commissioner, Office of Air and Marine.

Fiscal Year	Strategic Goal(s) Supported	Performance Measure / Type	Explanation or Description	Target or Goal	Actual Performance Results	Performance Metric Improvement
2013	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Percent of detected conventional aircraft incursions resolved along all borders of the United States Long Term/ Output	The measure represents the percent of conventional aircraft, once detected visually or by radar, that are suspected of illegal cross border activity and are brought to a successful law enforcement resolution. In some cases, Office of Air and Marine assets are launched to interdict the aircraft. In most cases, resolution of the aircraft identity is made by the Air and Marine Operations Center (AMOC) working with interagency partners such as the Federal Aviation Administration (FAA). If the incursion is deemed legal, OAM considers the incursion resolved. If not resolved, AMOC working with our partners including OAM assets - could not identify the target and is thus considered illegal.	100 percent	99 percent	<p>OAM will not likely ever achieve a 100% resolution on aircraft incursions without a substantial investment in 1) additional sensors providing detection and continuous tracking throughout the border environment 2) personnel to monitor and evaluate the tracks and 3) a sufficient force of quick response assets to “resolve” the incursions.</p> <p>With these limiting factors in consideration, AMOC continuously improves processes and partnerships and ingests new technologies that can mitigate our vulnerabilities and gaps thus reducing the number of “unresolved” aircraft incursions.</p>

2013	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Percent of air support launches accomplished to support Homeland Security missions Long Term/ Output	A primary and important measure for Air and Marine is its capability to launch an aircraft when a request is made for aerial support. This measure captures the percent of all requests made for air support to which the program was able to respond.	>95 percent	96 percent	
2013	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Percent of Joint Interagency Task Force – South (JIATF-S) annual mission hour objective achieved	CBP Air and Marine’s core competencies are air and marine interdiction, air and marine law enforcement, and air domain security. In this capacity, the Office of Air and Marine (OAM) targets the conveyances that illegally transport narcotics, arms, and aliens across our borders and in the Source, Transit and Arrival Zones. In support of Source and Transit Zone interdiction operations, the Air and Marine Strategic Air Asset Program (P-3, Dash 8, Chet, and C12M fixed wing aircraft, Blackhawk rotor wing and Guardian UAS) have a	100 percent	100 percent	

			dedicated minimum of 7,200 hours a year in support of Joint Interagency Task Force – South.

Operations and Maintenance Mission Statement

The Office of Air & Marine (OAM) is responsible for the protection of the borders of the United States. OAM identifies, deters, interdicts, and investigates acts of terrorism and smuggling arising from unlawful movement of people and goods into and out of the United States with an integrated and coordinated air and marine force. OAM has historically conducted missions along the southern borders of the United States, Mexico, South America and the Caribbean. Since September 11, 2001, OAM has established a presence along the northern border. OAM has a staff of over 1,895 pilots, law enforcement officers, operational support, and administrative positions. Mission critical assets consist of aircraft (including fixed wing and rotary helicopters), marine vessels, P-3 surveillance aircraft, surveillance equipment, maintenance facilities and hangers. With the transfer of the Unmanned Aircraft Vehicles (UAS) and Border Patrol assets, U. S. Customs and Border Protection (CBP) has been able to achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets.

Procurement Mission Statement

The Office of Air & Marine (OAM) is responsible for the protection of the borders of the United States. OAM identifies, deters, interdicts, and investigates acts of terrorism and smuggling arising from unlawful movement of people and goods into and out of the United States with an integrated and coordinated air and marine force. OAM has historically conducted missions along the southern borders of the United States, Mexico, South America and the Caribbean. Since September 11, 2001, OAM has established a presence along the northern border. OAM has a staff of over 1,895 pilots, law enforcement officers, operational support, and administrative positions. Mission critical assets consist of aircraft (including fixed wing and rotary helicopters), marine vessels, P-3 surveillance aircraft, surveillance equipment, maintenance facilities and hangers. With the transfer of the Unmanned Aircraft Vehicles (UAS) and Border Patrol assets, U. S. Customs and Border Protection (CBP) has been able to achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets.

Salaries and Expenses Mission Statement

The purpose of Air and Marine Salaries is to apply the skills and expertise of CBP air and marine personnel to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States. Having aircraft and vessels along the borders reduces the quantity of drugs entering the U.S. and minimizes threat levels. The goal of this program is to deny the use of air, land and coastal waters for conducting acts of terrorism and other illegal activities against the United States.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change

Overview

CBP User Fee collections in FY 2015 are projected to be approximately \$2.4 billion for all accounts (reimbursable and direct fee accounts). CBP's reimbursable accounts "reimburse" initial expenses incurred in the annual salaries and expenses appropriation, while the direct accounts "directly" support specific programs. Therefore, direct account funds do not reimburse CBP's annual appropriation. For example, funds received under the Puerto Rico Trust Fund finance a majority of the cost of CBP operations in Puerto Rico. CBP user fees include Immigration Inspection user fees (IUF), fees under the Consolidated Omnibus Budget Reconciliation Act of 1985 (P.L. 99-272; COBRA), Animal and Plant Health Inspection Service (APHIS)/Agriculture Quarantine Inspection (AQI) fees, Land Border Inspection Fees (LBIF), the Small Airport Account, Global Entry, Electronic System for Travel Authorization (ESTA), and Immigration Enforcement Fines (IEF).

The collections are primarily composed of charges assessed on passengers, conveyances, and merchandise. Taxes and duties assessed under the Puerto Rico Trust Fund and U.S. Virgin Islands (USVI) Deposit Fund (VIDF) make up the remainder. Fees are charged to recover the costs of inspecting people, goods, and conveyances entering the United States and U.S. territories. Further, CBP also imposes fees for certain international trusted traveler and visa waiver programs. For instance, the Global Entry program fee supports the costs of the expedited processing of international travelers participating in the program upon their arrival to the United States. The ESTA fee helps to implement the program and was established to determine whether any law enforcement or security risks exist in permitting travelers from visa waiver program countries to enter the United States to seek admission under the Visa Waiver Program prior to their departure.

CBP User Fees are forecasted each year in preparation for the President's Budget. The projections are modified as necessary throughout the year in congruence with changes in the domestic and global economies. The current forecast for FY14 and FY15 are as follows.

User Fee Overview

(\$ in thousands)

User Fee	FY 2013 Actual Collections	FY 2014 Projections ¹	FY 2015 Projections
Small Airports	\$8,700	\$8,741	\$8,789
COBRA –Discretionary Fee increase	-	-	131,591
COBRA – Free Trade Agreement ²	-	110,000	180,000
Immigration User Fee - DISCRETIONARY	-	-	200,164
Subtotal, Discretionary Fees	\$8,700	\$118,741	\$520,544
COBRA	\$421,221	\$436,806	\$452,968
Express Consignment Carrier (ECCF)	27,463	28,479	29,533
Subtotal, Mandatory COBRA and ECCF	\$448,684	\$465,285	\$482,501
Land Border Inspection	40,616	42,241	43,931
Immigration Enforcement Fines	699	725	752
Puerto Rico Trust Fund ³	254,086	97,589	98,076
Immigration User Fee	586,048	607,732	630,218
Animal & Plant Heal Inspection Services (APHIS) ⁴	366,370	362,526	464,514
ESTA	51,079	52,969	54,929
Global Entry	63,926	75,994	91,192
Virgin Islands Deposit Fund	11,672	11,730	11,789
Subtotal, Remaining Mandatory Fees	\$1,374,496	\$1,251,506	\$1,395,401
Total, Fees	\$1,831,880	\$1,835,532	\$2,398,446

¹ Amounts may differ from FY 2014 Enacted figures in some cases. The projections are considered updates from previously enacted figures for FY 2014

² Amounts available for CBP operations

³ FY 2013 Puerto Rico Trust Fund collections include Janssen related activity (\$166 million). The Janssen activity is the result of a contingent liability resulting from litigation of duties deposited into the Puerto Rico Trust Fund at the Court of International Trade. CBP is monitoring these collections in FY 2014 and will adjust projections as necessary.

⁴ CBP anticipates receiving an additional \$92.7 million from APHIS in FY 2015. USDA completed a comprehensive fee study on its fees in FY 2012. In FY 2013, USDA drafted the updated regulation to adjust the user fee rates.

Prior Rate changes

The table below displays CBP's user fee portfolio by account, statutory authority, and subtype. Additionally, the current rates charged to passengers and conveyances are listed along with prior rates. Lastly, the date of the last rate change is listed.

Account	Fee	Prior Rates (Before the last rate increase)	Current Rates (Unit Fee/Annual Cap)	Statutory Authority	Date of Last Rate Change
COBRA				19 USC 58c	Legislative change occurred on October 2004. However, all COBRA individual fees were increased by 10 percent beginning April 1st, 2007. 72 Fed. Reg. 3730 (Jan. 26, 2007). The listed fees reflect the higher rate per 19 CFR 24.22.
	Commercial Vessels	\$397/\$5,955	\$437/\$5,955		
	Commercial Trucks	\$5.00/\$100	\$5.50/\$100		
	Railroad Cars	\$7.50/\$100	\$8.25/\$100		
	Private Aircraft (Decal)	\$25.00	\$27.50		
	Private Vessel (Decal)	\$25.00	\$27.50		
	Commercial Aircraft Passenger (User Fee)	\$5.00	\$5.50		
	Commercial Vessel Passenger (User Fee – Non Exempt)	\$5.00	\$5.50		
	Commercial Vessel Passenger - Exempt	\$1.75	\$1.93		
	Dutiable Mail	\$5.00	\$5.50		
	Broker Permit	\$125	\$138		
	Barges and Other Bulk Carriers	\$100/\$1,500	\$110/\$1,500		

Account	Fee	Prior Rates (Before the last rate increase)	Current Rates (Unit Fee/Annual Cap)	Statutory Authority	Date of Last Rate Change
ECCF	Carriers operating Express Consignment Facilities are required to pay the fee.	\$0.66	\$1.00 (.50 CBP	19 USC 58c	<p>Increased in July 2007. The Express Consignment Fee reimbursement rate of \$0.66 per airway bill was authorized in Section 337 of P.L. 107-210 in FY 2002. The law stipulated that the fee could be increased to a maximum of \$1, again with half going to the Treasury's General Fund. The fee was increased to \$1 effective July 9, 2007. See 72 Fed. Reg. 31,719 (June 8, 2007); 19 C.F.R. § 24.23.</p>
			+ .50 Treasury)		

Account	Fee	Prior Rates (Before the last rate increase)	Current Rates (Unit Fee/Annual Cap)	Statutory Authority	Date of Last Rate Change
MPF				19 USC 58c	<p><u>Increased October 2011.</u> H.R. 2832 (codified as P.L. 112-40) raised the Ad Valorem rate by to 0.3464 percent (from 0.21 percent), which equated to a 65 percent increase. Under P.L. 112-40, the increased rate is effective from FY 2012 to the beginning of FY 2016. H.R. 3080, the U.S.– Korea Free Trade Agreement Implementation Act (codified as P. L. 112- 41), extends the increase from FY 2016 to FY 2021.</p>
	Formal Entries (merchandise with a value over \$2,000)	\$25 minimum fee (entries valued below \$11,905)	\$25 minimum fee (entries valued below \$11,905)

Account	Fee	Prior Rates (Before the last rate increase)	Current Rates (Unit Fee/Annual Cap)	Statutory Authority	Date of Last Rate Change
APHIS				<p>21 U.S.C. 136a. Section 2509 of the <i>Food, Agriculture, Conservation and Trade Act of 1990</i> (P.L. 101-624). Homeland Security Act of 2002 (P.L. 107-296) transferred certain inspection functions from the USDA to the Department of Homeland Security (DHS). Under a Memorandum of Agreement between CBP and USDA, CBP receives approximately 60.64 percent of the collections from the APHIS user fee.</p>	<p>Rates were last adjusted in FY 2010 for Commercial Vessels, 2006 for Commercial Trucks, 2007 Railroad Cars, 2009 for Aircraft Clearance, and 2006 for Passenger Commercial Air. The AQI user fees contained in that interim rule covered fiscal years (FYs) 2005 through 2010. A final rule affirming the interim rule without change was published in the Federal Register on August 24, 2006.</p>
	Commercial Vessel	\$494 (\$7,410 Max)	\$496 (\$7,440 Max)		
	Commercial Truck	\$5.00 (\$100 annual decal)	\$5.25 (\$105 annual decal)		
	Railroad Car	\$7.50 (\$150 prepaid)	\$7.75 (\$155 prepaid)		
	Aircraft Clearance	\$70.50	\$70.75		

Account	Fee	Prior Rates (Before the last rate increase)	Current Rates (Unit Fee/Annual Cap)	Statutory Authority	Date of Last Rate Change
	Passenger Commercial Air	\$4.95	\$5		
IUF				8 U.S.C. 1356(h). Department of Justice Appropriation Act of 1987. Carrier fines collected for violations of sections 243(c), 271, and 273 of the Immigration and Nationality Act of 1952 are deposited into the IUF account.	<u>Rates increased November 2001.</u> Section 109 of the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 2002, (P. L. 107-77 dated November 28, 2001) increased the user fee from \$6 to \$7. \$3 exempt component established in 2002.
	Commercial Aircraft Passenger (User Fee)	\$6	\$7		
	Commercial Vessel Passenger (User Fee – Non Exempt)	\$6	\$7		
	Commercial Vessel Passenger (Cruise/Ferry)	\$3	\$3		
LBIF				8 U.S.C. 1356(q)	Various dates for rate increases. The fees for Dedicated Commuter Lanes have been in effect since 1996
	Arrival/Departure Land Border (I- 94)	\$6	\$6		
	Non-Immigrant Visa Waiver (I- 94W)	\$6	\$6		

Account	Fee	Prior Rates (Before the last rate increase)	Current Rates (Unit Fee/Annual Cap)	Statutory Authority	Date of Last Rate Change
	Canadian Boat Landing Permit Individual (I-68)	\$16 (individual); \$32 (family)	\$16 (individual); \$32 (family)		when 8 CFR 103.7 was amended to add them. The fees for I-68, I- 94/94W, and I- 190 have been in effect since 1995 when 8 CFR 103.7 was amended to add them. NEXUS, SENTRI, and FAST rates were established in FY 2002. SENTRI converted from requiring renewal every 2 years to requiring renewal every 5 years as of October 30, 2006.
	NEXUS	NEXUS \$50 (every 5 years)	NEXUS \$50 (every 5 years)		
	NEXUS replacement card	\$25	\$25		
	Free and Secure Trade Program (FAST) Driver Application Fee	\$50 (every 5 years)	\$50 (every 5 years)		
	Secure Electronic Network for Travelers Rapid Inspection (SENTRI)	\$122.25 (includes \$14.50 fingerprinting fee under Global Entry) (individuals); \$160 maximum (families): Fee is for 2- year membership	\$122.25 (includes \$14.50 fingerprinting fee under Global Entry) (individuals); \$160 maximum (families): Fee is for 2- year membership		
	In addition to SENTRI application fee, SENTRI includes the following:				
	SENTRI - Dedicated Commuter Lane Fees	\$80	\$80		
	SENTRI - Dedicated Commuter Lane additional vehicle (DCL):	\$42	\$42

Account	Fee	Prior Rates (Before the last rate increase)	Current Rates (Unit Fee/Annual Cap)	Statutory Authority	Date of Last Rate Change
Virgin Islands	Not CBP governed fees. Duties and taxes levied by the USVI Legislature that are deposited into the Virgin Islands Deposit Fund (VIDF) for use as revenue for the USVI	The United States Virgin Islands (USVI) is an unincorporated territory of the United States. The unincorporated status establishes the USVI as outside of the more specific customs territory of U.S. Section 36 of the 1936 <i>Organic Act</i> , codified as 48 U.S.C. § 1406i. This Act gives U.S. Customs and Border Protection (CBP) the authority to collect duties and taxes levied by the USVI Legislature that are deposited into the Virgin Islands Deposit Fund (VIDF) for use as revenue for the USVI		Agreement between CBP and USVI. Section 36 of the 1936 Organic Act, codified as 48 U.S.C. § 1406i. Under 19 U.S.C. § 1469c, CBP may also provide reimbursable services to the USVI at the USVI's behest. This reimbursable arrangement is denoted in a 1994 Memorandum of Agreement	Aug. 8, 1994. Fees under authority of the USVI Government
Global Entry	Enrollment Fee	\$100 per applicant	\$100 per applicant	<i>Consolidated Appropriations Act of 2008</i> (P.L. 110-161) Section 565(3) (A). The implementing regulation to establish an application fee was issued in November 2009 (74 FR 59936 (2009-11-19)).	The implementing regulation to establish an application fee was issued in November 2009 (inception) (74 FR 59936 (2009-11-19)).

Account	Fee	Prior Rates (Before the last rate increase)	Current Rates (Unit Fee/Annual Cap)	Statutory Authority	Date of Last Rate Change
	F.B.I. Fingerprint Fee (applicable to SENTRI, NEXUS, FAST, and Global Entry)	\$14.50 per applicant; (\$17.25 for SENTRI applicants)	\$14.50 per applicant; (\$17.25 for SENTRI applicants)		
ESTA	Processing Fee	\$4.00	All applicants requesting an electronic travel authorization are charged \$4.00 for the processing of the application. Revenue from the processing fee is retained by CBP to fund the costs of operation. The CBP budget request for ESTA only includes the processing fee collection.	P. L.110-53, or the Implementing Recommendations of the 9/11 Commission Act of 2007	September 2010 (inception)

Account	Fee	Prior Rates (Before the last rate increase)	Current Rates (Unit Fee/Annual Cap)	Statutory Authority	Date of Last Rate Change
	Surcharge	\$10.00	If the application is approved and the individual receives authorization to travel to the United States under the Visa Waiver Program, an additional \$10.00 will be charged. Revenue from the surcharge fee is not available for CBP use. This revenue is reserved for the U.S. Travel and Tourism Advisory Board, also known as Brand USA		

FY 2013 Obligations by Budget Object Class

- In FY 2013, majority of the gross obligations were incurred to support salaries and benefits. In FY 2015, CBP expects to use the user fees in a similar fashion that majority of the user fees will be used to support the personnel costs of law enforcement officers performing agricultural, customs, and immigration inspectional activities.

Personnel Compensation	\$ 1,085	66%
Personnel Benefits	365	22%
Other Contractual Services	89	5%
Rent, Communication, and Utilities	50	3%
Equipment	20	1%
Printing and Reproduction	12	1%
Supplies and Materials	7	0%
Transportation of Things	5	0%
Travel and Transportation of Persons	4	0%
Total Gross Obligations	\$ 1,637.9	100%

Current Services – Agency mission(s) supported by fees

These activities involve Customs and Border Protection officers (CBPOs) ensuring that all carriers, passengers, and their personal effects entering the United States are compliant with:

- **Consolidated Omnibus Reconciliation Act (COBRA) and Express Consignment Carrier Fees** - U.S. customs laws
- **Animal, Plant, Health Inspection Services (APHIS)** - Agricultural health of the U.S.
- **Immigration User Fees (IUF) and Immigration Enforcement Fines (IEF)** - U.S. immigration laws
- **Land Border Account** - Inspection services provided at land border ports of entry

CBP User Fees also support funding requirements for specific programs, certain Trusted Traveler Programs, and areas with a CBP presence:

- **Global Entry** - Expedited clearance of pre-approved low-risk air travelers into the U.S.
- **Electronic System for Travel Authorization (ESTA)** - Determines the eligibility of visitors to travel to the U.S. under the Visa Waiver Program (VWP)
- **Puerto Rico Trust Fund** - Screen all people, vehicles, and goods entering Puerto Rico, while facilitating the flow of legitimate trade and travel into Puerto Rico
- **Virgin Islands Deposit Fund** - Screen all people, vehicles, and goods entering Puerto Rico, while facilitating the flow of legitimate trade and travel into Puerto Rico
- **Small Airport User Fee** - Inspection services provided to participating small airports on a fully reimbursable basis

Background and Fee Execution

User financing in the form of user fees, user charges, or excise taxes is one approach to financing federal programs or activities. User fees assign part or all of the costs of these programs and activities—the cost of providing a benefit that is beyond what is normally available to or consumed by the general public—to the identifiable users/beneficiaries of those programs and activities. Since user fees represent a charge for a service provided by the government or for a benefit from a government program, payers expect and deserve a tight correlation between their payments and the cost of providing the services or benefits, and they have expectations about the quality of the related services or benefits.

CBP User Fees are either collected directly by CBP or by an outside party, or then remitted to CBP. CBP's air passenger user fees (primary source of fee revenue) are collected by ticket-issuing agent (e.g., carrier, travel agent, tour wholesalers, or other parties issuing tickets or travel documents) collects the fees and remits them to CBP. The carrier or tour wholesaler should remit payments within 31 days after the close of each quarter. Other Fees are remitted directly to CBP without the assistance of an additional party.

To achieve this objective, CBP uses the activity-based costing (ABC). The major processes for an ABC accounting are: (1) identifying the activities performed to produce outputs, (2) assigning or mapping resources to activities, (3) identifying the outputs for the activities performed, and (4) assigning activity costs to the outputs.

The ABC assigns both direct and indirect costs to the mission activities. Each CBP user fee program is made up with multiple mission activities. CBP employs ABC to capture the cost information of the user fee programs. The ABC delineates the funding profile of each user fee program. The funding profile details the funding sources used to carry out the user fee activities and thus identifies the user fee programs which are not full cost recovery. CBP collects user fees for services provided by CBP and other agencies from the trade and travel community. Statutory authority determines how an agency can use collections from user fees. Under CBP's current fee rate structure, the revenue from user fees do not fully recover the costs of performing agricultural, customs, and immigration inspections. Thus, costs for these activities in excess of fee revenue are funded by appropriated funding. In the FY 2015 President's Budget, CBP is

proposing fee increases for its COBRA and IUF fees, and proposing to remove the partial IUF fee exemption for sea passengers traveling from certain regions.

Depending on the situation for the fiscal year, CBP must adhere to budgetary rules in order to execute revenue from user fees. In the event of a sequester, CBP must operate within available resources from prior year fee carryover and current year revenue to maintain operations. Additionally, CBP follows guidelines for executing fee funding during continuing resolution situations. In short, CBP must operate within appropriated funding levels as specified by Congress during continuing resolution and sequestration scenarios.

In general, there are multiple considerations that govern the use of the fees. More specifically, statute dictates whether the user fee collections may be dedicated to a related program or, alternatively, must be deposited into the general fund of the U.S. Department of the Treasury (Treasury) where the collections remain unavailable for the agency's use.

In addition, user fees may support multiple federal agencies. Generally, an agreement between the involved agencies dictates how fees can be allocated to each agency depending on the costs each incurs in providing the service or benefit. User fee collections represent a significant portion of the CBP budget and are critical in meeting the agency's mission. CBP's annual financial plan includes estimated funding amounts and allocates these amounts to various components of CBP based on eligible expenses for the following mission-related activities. These activities are summarized below:

- **Front-line CBP activities:** Guarding the nation's physical and economic security. Fee funding assists in funding the costs of inspections for legal access to the United States and protecting the U.S. borders, while facilitating international trade, travel, mission-support activities; and preventing the entry of persons and weapons of terror into the United States.
- **User Fee business processes:** The design, development, programming, testing, implementation, training, and maintenance of CBP automated systems related to user-fee funded programs.
- **Financial management and accountability:** Accounting, budgeting, revenue collection, and performance management.
- **Overseeing the effectiveness and efficiency of CBP operations.**
- **Investigative and security functions and programs:** Applicant and employee background investigations and clearances pertaining to certain user fees programs.
- **CBP training programs:** Centralized leadership and direction of all CBP training programs. Ensure that all training efforts support the CBP mission and strategic goals, meet the needs of a diverse and dispersed workforce, and contribute to measurable outcomes and results

- **Human Resources:** Promoting and enabling mission accomplishment through human capital planning and utilization of strategic leadership to CBP employees.
- **Critical Infrastructure:** Integrated air and marine forces to detect, interdict, and prevent acts of terrorism and the unlawful movement of people, illegal drugs, and other contraband toward or across the borders of the United States.

Additionally, U.S. Immigration and Customs Enforcement (ICE) receives a portion of IUF collections as its primary mission implicates specific eligible expenses under the governing statute, 8 U.S.C. § 1356(h)(2)(A), concerning certain detention and removal services, and removal and asylum proceedings. ICE and CBP, among other things, provide law enforcement support to detect and remove those individuals who are inadmissible under 8 U.S.C. § 1182(a), including those who are inadmissible by attempting to unlawfully enter the United States by avoiding inspection at air and sea ports of entry. The portion of IUF fees transferred to ICE finance a portion of the costs of Immigration and Customs Enforcement (ICE) operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports. These ICE operations encompass, among others, providing detention and removal services . . . for any alien who is inadmissible under section 1182(a) of this title who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry' 8 U.S.C. 1356(h)(2)(A)(v).

Each year, several thousand passengers are determined to be inadmissible at air and sea ports of entry by CBP, transferred to ICE, and processed through the Immigration Enforcement Lifecycle. ICE is also permitted to request reimbursement for aliens who are inadmissible under 8 U.S.C. § 1182(a) due to avoiding inspection at air or sea ports of entry. Currently the user fee collections are split between ICE and CBP with ICE receiving 17.37 percent and CBP receiving 82.63 percent.

User Fee Projection Methodology

CBP relies primarily upon two economic indicators to make fee revenue estimates: Gross Domestic Product (GDP) and international travel forecasts. These two indicators strongly correlate to fee revenue. International travel forecasts are particularly important when estimating fee revenues because the largest portion of fees derives from those charged to travelers arriving in the United States from abroad. Two such fees include CBP's COBRA fees and CBP's share of the IUF fees. These two fees are generally remitted to CBP by the ticket-issuing agents on a quarterly basis. U.S. Immigration and Customs Enforcement uses 17.37 percent of the IUF fee collections to defray certain detention, removal, and other related expenses. On average, more than 80 percent of the total COBRA fee collections and more than 90 percent of IUF collections are attributable to air passengers arriving in U.S. ports of entry. An increase or decrease in international travel to the United States will yield a comparable increase or decrease in fee revenue.

In forecasting the future year international travel outlook, CBP leverages multiple sources. A major source of data is projections published by the Office of Travel and Tourism Industries,

which is a Federal tourism office managed under the U.S. Department of Commerce. The international travel forecasts published by the Office of Travel and Tourism Industries take into account multiple economic indicators, which are indexed into the projection forecast. These figures include inputs from traditional indicators, such as GDP, planned airline capacity, and employment rates. The forecasts take into account other measurable items as well, including currency exchange rates, stock market trends, and the effects of the Travel Promotion Act of 2009 (P.L. 111-145, §9). This Act was enacted to enable the Federal government to work with the private sector to promote international travel to the United States. For all fees driven by international travel, CBP assumes collections will mimic the patterns projected in the travel forecast. For fees not correlated to the international travel, CBP believes GDP and historical trends provide the best support for projecting future year revenue.

CBP also focuses on the economies of specific regions of the United States to project revenue in certain accounts. Puerto Rico and the U.S. Virgin Islands each have unique fiscal structures. More specifically, the revenues in the Puerto Rico Trust Fund and Virgin Island Deposit Fund are duties collected for the entry of goods into Puerto Rico and the U.S. Virgin Islands, respectively. Thus, CBP relies on indicators provided by the Government Development Bank for Puerto Rico and the Government of the Virgin Islands to construct future-year revenue outlays. Government and Economic Reports for Puerto Rico utilize Gross National Product as opposed to GDP estimates for that account.

In 2013, CBP contracted with a private firm to initiate a study examining CBP's fee portfolio. The goal of the study was to refine the current projection methodology for CBP fee revenue, while accomplishing a number of additional goals: providing a more accurate projection of CBP fee revenues, improving execution year monitoring of revenue, and enhancing future year budgeting abilities. At this time, CBP is assessing which of the multiple projection alternatives contained in the study will provide the most accurate projections in the future.

Carryover Maintenance

One of the long-standing challenges in managing CBP's user fee portfolio is maintaining sufficient user fee carryover (unused balances from prior years) throughout the course of the year. Under the current laws governing COBRA and IUF, two major CBP accounts, the bulk of the collections from these accounts are remitted to CBP on a quarterly basis. A ticket-issuing agent (e.g., carrier, travel agent, tour wholesalers, or other parties issuing tickets or travel documents) collects the fees and remits them to CBP. Under 19 U.S.C. 58c and 8 U.S.C. 1356, ticket-issuing agents remit collections to CBP under schedules specified by each statute. While the two statutes contain substantial similarities, one notable feature unique to the IUF is that its fourth-quarter remittance (of the calendar year) from airline passengers must be remitted to CBP 10 days before the end of the Federal fiscal year (September 20). The next significant remittance, which includes the remainder of calendar-year fourth-quarter collections collected after – i.e., not remitted by – the previous September 20 deadline, is not required to be remitted to CBP until the first business day of March in the next year.

Because of the timing of this payment structure, cash flows occur unevenly when observed on a monthly basis during the course of the federal fiscal year (October through September). The

exception for the fiscal year first quarter (October to December) remittance further delays the remittance schedule for IUF. The last IUF remittance to CBP (September 20 of each year) is often fully expended in the same fiscal year (i.e., by September 30 of each year) in order to support costs related to immigration inspections in that year. As stated above, the next major IUF remittance to CBP does not occur until the beginning of March of the following year.

FY 2013 Fee Collections (in thousands)		
Month	COBRA	IUF
October	\$16,291	\$5,380
November	82,218	279
December	11,183	311
Quarter 1	\$109,692	\$5,970
January	\$12,573	\$13,686
February	85,017	157,231
March	3,086	1,209
Quarter 2	\$100,676	\$172,126
April	\$17,038	\$21,481
May	103,205	141,544
June	2,496	602
Quarter 3	\$122,739	\$163,627
July	\$15,662	\$18,405
August	97,127	133,698
September	2,788	92,222
Quarter 4	\$115,577	\$244,325
Total	\$448,684	\$586,048
