To mitigate the risk associated with the cash flows in the first quarter of the federal fiscal year, CBP typically aims to set aside 10 percent of collections⁵ from the prior year in reserve as carryover. It should be noted that the 10 percent figure is only a best practice guideline. Further, the 10 percent amount provides enough revenue to sustain CBP operations during the first quarter of the fiscal year, which is typically a low collections period because of the aforementioned remittance schedule.

⁵ This practice is applied to other CBP fee accounts, including Agricultural Quarantine and Inspection Fees, Enforcement Fines, and Land Border fees.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Small Airport User Fee

I. Appropriation Overview

A. Mission Statement for Small Airport User Fee

The Small Airport User Fee is authorized under 19 U.S.C. 58b and administered under 19 U.S.C. 58c(b)(9)(A)(i). The Small Airport User Fee program supports CBP inspectional services at participating small airports on a fully reimbursable basis. The fee charged under this program is set forth in a Memorandum of Agreement (MOA) between the user fee airports and U.S. Customs and Border Protection (CBP). It may be adjusted annually as costs and requirements change.

B. Budget Activities

A User Fee Airport (UFA) is a small airport that has been approved by the Commissioner of CBP to receive, for a fee, the services of a CBP Officer (CBPO) for the processing of aircraft entering the United States including their passengers, and cargo. The applicant must meet the following criteria for UFA consideration:

- The volume or value of business at the airport is insufficient to justify the availability of inspectional services at such airport on a non-reimbursable basis.
- The current Governor of the State in which the airport is located declares support for the designation, in writing to the Commissioner of CBP.
- The requestor (e.g. airport authority) agrees to reimburse CBP for all costs associated with customs services, including all expenses of staffing a minimum of one full-time Officer.
- The requestor completes an Agriculture Compliance Agreement (ACA) with fixed base operators and garbage haulers for handling the international garbage.

The basic steps required in considering an application for designation as an UFA include:

- Receipt of a letter from the current Governor of the state supporting the user fee airport designation, addressed to the Commissioner.
- An initial site visit in which CBP officials discuss workload and services.
- A final site visit in which CBP officials verify that facilities are 85 percent complete and adequate for inspectional services to be provided.
- Completion of a MOA with CBP, which states the responsibilities, fees, and hours of service.
- Completion of an ACA with CBP for handling international garbage.

An approved UFA receiving CBP services is responsible for payment of the following fees:

- Per CBPO - \$140,874 for the first year and \$123,438 for succeeding years.
- Automatic Data Processing costs per CBPO - \$17,042 to \$21,062 (1st year) and \$13,620 to \$17,640 for succeeding years, depending on the location.
- Other associated costs, such as overtime.

The Small Airport User Fee provides funding for the full costs of inspectional services by CBPOs. As of December 16, 2013, CBP supported 49 small airports. There are numerous pending applications for UFA status:

Pending (10):

Cobb County Airport-McCollum Field (Kennesaw, GA)
Ellington Field (Houston, TX)
Griffiss International (Rome, NY)
Charlotte-Monroe Executive Airport (Monroe, NC)
South Texas International Airport (Edinburg, TX)
Marathon Airport (Marathon, FL)
Ocean Reef Airport (Key Largo, FL)
Witham Airport (Stuart, FL)
Lone Star Executive Airport (Conroe, TX)
South Bend Airport (South Bend, IN)

C. Budget Request Summary

In FY 2015, CBP requests 69 full-time equivalent employees and \$8,789,108 in anticipated collections for the Small Airport User Fee program. The projections are based on the number of CBPOs required to fulfill agreements with the small airports. Some agreements require more than one CBPO. CBP estimates collections as follows:

Exhibit 1: Collections by Fiscal Year (In thousands)¹

Small Airports Collections	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2014 Base	FY 2015 Request	FY 2016
	\$8,700	\$5,000	\$8,741	\$8,789	\$9,097

¹ For the purposes of accuracy, CBP has used the \$8.741 million base as the comparison in the FY 2014 Enacted column in the exhibits throughout this document. The FY 2014 enacted amount for \$5.000 million was a scoring error. Thus, CBP used the \$8.741 million as a base for comparison against the FY 2015 Request of \$8.789 million.

Small Airport User Fee
Program Performance Justification**
(Dollars in Thousands)

PPA: Small Airport User Fee

	Perm. Pos	FTE	Amount
2013 Revised Enacted	69	69	8,700
2014 Enacted	69	69	8,741
2015 Adjustments-to-Base	-	-	48
2015 Current Services	69	69	8,789
2015 Total Request	69	69	8,789
Total Change 2014 to 2015	-	-	48

CBP requests 69 full-time equivalent employees and \$8.789 million in anticipated collections. This request includes:

		Positions	FTE	Amount
Base	FY 2014 Enacted	69	69	8,741
Current Services	Increase in User Fee Collections			48
FY 2015 Request	Small Airports	69	69	8,789

CURRENT SERVICES PROGRAM DESCRIPTION:

The Small Airport User Fee program supports inspection services provided to participating small airports on a fully reimbursable basis. The amount charged is determined by how many CBP Officers are stationed at the port and whether it is a new or existing facility. Revenue from the Small Airport User Fee program funds processing of aircraft, passengers, and cargo entering the United States.

Small Airport User Fee Mission Statement

Small Airport Facilities is authorized under 19 U.S.C. 58b and administered under 19 U.S.C. 58C (b)(9)(A)(i). The User Fee Airports Program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The fee charged under this program is set forth in a Memorandum of Agreement between the small airport facility and the agency, and may be adjusted annually as costs and requirements change.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection COBRA Passenger Inspection Fee

I. Appropriation Overview

A. Mission Statement for COBRA Passenger Inspection Fee

The *Consolidated Omnibus Budget Reconciliation Act of 1985* (P.L. 99-272; COBRA) created a series of user fees to recover costs incurred by U.S. Customs and Border Protection (CBP). P.L. 99-272, codified as 19 U.S.C. 58c (a)(1-8), established processing fees for air and sea passengers, commercial trucks, railroad cars, private aircraft and vessels, commercial vessels, dutiable mail packages, broker permits, barges and bulk carriers from Canada and Mexico, cruise vessel passengers, and ferry vessel passengers.

Effective November 5, 2011, certain exemptions under the *Consolidated Omnibus Budget Reconciliation Act of 1985* (P.L. 99-272; COBRA) were eliminated. Section 601 of the *United States-Colombia Trade Promotion Agreement Implementation Act of 2011* (P.L. 112-42) lifted the exemption that excluded air and sea passengers from Canada, Mexico, and Caribbean and adjacent islands¹ from having to pay the COBRA air, sea, and cruise vessel (ferry passengers are still exempted) passenger fees. Due to the elimination of the exemptions, CBP collected additional COBRA revenue (the exemption went into place partially through the fiscal year (FY)) in FY 2012 and in FY 2013. CBP expects to collect \$180,000,000 in FY 2015.

Collections from COBRA user fees are made available through permanent/indefinite appropriation created by the aforementioned user fee statute with the exception of COBRA fees collected from the *United States-Colombia Trade Promotion Agreement Implementation Act of 2011*. The fees are deposited in the Customs User Fee Account (No Year) and are available only to the extent provided in Appropriations acts. The FY 2014 and FY 2015 fee collections associated with lifting the country exemptions are being requested as offsetting receipts. The FY 2015 Budget repeats the legislative proposal enacted in the FY 2014 Omnibus to make these fees collected in FY 2015 available to spend. In the FY 2015 Congressional Justification, these fee collections (\$110 million in FY 2014 and \$180 million in FY 2015) are treated as offsetting receipts to the S&E account.

B. Budget Activities

COBRA collections fund activities that are mandated by law. Supported by fee revenues, Customs and Border Protection officers (CBPOs) help ensure that all carriers, passengers, and their personal effects entering the United States are compliant with U.S. customs laws. To the extent that revenues are available, the estimated FY 2015 collections will fund the activities in

¹ Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Bermuda-United Kingdom, British VI-United Kingdom, Cayman Islands, Cuba, Dominica, Dominican Republic, Grenada and South Grenadines, Guadeloupe-France, Haiti, Jamaica, Martinique-France, Netherlands Antilles, St. Kitts and Nevis, St. Lucia, St. Vincent and North Grenadines, Trinidad and Tobago, Turks and Caicos Islands-United Kingdom

the COBRA statute; however, the fees are not legislatively set to fully recover these costs. Therefore, the estimated collections will only partially fund the authorized activities listed:

- All inspectional overtime;
- Premium pay;
- Civil Service Retirement and Disability Fund (agency contribution);
- Excess preclearance;
- Foreign language proficiency awards; and,
- Enhanced equipment and support.

The Office of Field Operations (OFO) of CBP uses overtime for inspectional activities and for seizure/arrest processing that goes beyond an employee's regular duty hours. The majority of OFO's inspectional overtime needs are often related to seasonal, daily, and after-hours operations. OFO implements a comprehensive inspectional overtime strategy to augment standard port of entry needs by adding flexibility to support changing operations as a result of surge and peak-time operations. Overtime flexibility ensures that sufficient staffing is available to administer the full range of inspection, intelligence analysis, examination, and law enforcement activities that relate to the arrival and departure of persons, conveyances, and merchandise at our nation's ports of entry.

Additionally, the travel industry requests the approval of services at new locations, new flights at existing locations, and/or to move flights to peak or outside normal operating hours (outliers). Peak arrivals can exceed current facility and CBP capacity, while outlier flights reduce available staff during peaks and/or further impact decreasing overtime budgets.

Based on the current Workload Staffing Model, OFO estimates that a CBPO performs 1,182 hours of frontline work a year. Every hour of overtime buys an additional frontline hour without additional administrative overhead.

Premium Pay and Civil Service Retirement and Disability Fund expenses include pay and compensation benefits that enable CBP to fully staff according to mission requirements on holidays and weekends and to compensate eligible employees for benefits governed by 19 U.S.C. 267 (overtime and premium pay for Customs Officers).

The *Trade Act of 2002* (P.L. 107-210) section 337, codified as 19 USC 58c (b) (9) (A) (ii) and (b) (9) (B), authorized the establishment of the Express Consignment Courier Facilities (ECCF) fee to reimburse CBP for the processing costs incurred at those facilities. The original fee was set at 66 cents per individual airway bill or bill of lading and was later increased to \$1 effective July 2008. Congress also mandated that 50 percent of the ECCF fee collection be transferred to the Treasury's General Fund. Because the ECCF fees are deposited in the Customs User Fee Account, for budgetary purposes, they are reported as part of the COBRA user fees. The fee rates under the current law are as follows:

Barge/Bulk Carrier Fee (\$110; \$1,500 cap): This fee applies to barge or bulk carrier arrivals in the United States from Mexico or Canada. A barge or bulk carrier is considered to be arriving from Mexico or Canada when all of its cargo was loaded in either country, even if the

vessel went to another country to discharge cargo prior to arriving in the United States. If all or part of the cargo was laden in another country, the vessel is considered to have arrived from that country (for user fee purposes only), even if the barge or bulk carrier called in Canada or Mexico to unlade and/or lade some cargo just prior to arriving in the United States.

Broker Permit (\$138 annually): Customs brokers are private individuals, partnerships, associations or corporations licensed, regulated, and empowered by CBP to assist importers and exporters in meeting federal import and export requirements.

Commercial Truck (\$5.50; \$100 cap): A driver, owner, agent, or other person in charge of the vehicle can pay a single arrival fee or prepay the fee by purchasing an annual transponder.

Commercial Vessel (\$437; \$5,955 cap): Masters, licensed deck officers, or pursers of commercial vessels of 100 net tons or more arriving within the limits of a U.S. port from a foreign location are required to pay regardless of the number of arrivals at U.S. Ports in the course of a single voyage.

Dutiable Mail (\$5.50): The addressee of each item of international mail that contains dutiable merchandise is required to pay the fee.

Passenger Commercial Air (\$5.50): Passengers arriving in the U.S. by commercial airline whose journeys originate in a place outside the U.S. are required to pay the fee.

Passenger Commercial Vessel (\$5.50; Cruise and Ferry \$1.93): Passengers arriving in the U.S. by commercial vessel are required to pay the fee. This fee is commonly known as a cruise or ferry vessel fee.

Private Vessel and Aircraft (\$27.50 annually): Master or other individual in charge of a private aircraft and private vessel is required to pay the fee.

Railroad Car (\$8.25; \$100 cap): Railroad companies moving or receiving loaded or partially loaded passenger or commercial freight rail cars into the U.S. are required to pay the fee for each loaded car. In lieu of this fee, an annual prepayment per calendar year may be made for each rail car.

Express Consignment Carrier Fee (\$1.00; \$0.50 CBP; \$0.50 remitted to Treasury): Carriers operating Express Consignment Facilities are required to pay the fee.

All COBRA fee rates were last adjusted in April 2007

C. Budget Request Summary

CBP requests 3,325 full-time equivalent employees and \$794,092,000 in FY 2015 for COBRA user fees and the ECCF fees to partially recoup the costs incurred for performing COBRA- related inspections. Of the \$794,092,000 in total collections, mandatory COBRA fees represent \$482,501,000, which includes ECCF collections of \$29,533,000. Revenue associated with the *United States- Colombia Trade Promotion Agreement Implementation Act of 2011* represents \$180,000,000 and discretionary COBRA fees (fee increases) represents \$131,591,000.

For FY 2014, the anticipated projected collections in COBRA fees from Canada, Mexico, Caribbean, and the adjacent islands, CBP is proposing to further offset its directly appropriated accounts by \$70 million. To avoid a shortfall, this offset requires the necessary legislative authority, which is requested as a general provision (similar to the provision enacted in the FY 2014 Omnibus), coupled with the requested budgetary scoring. This increase in collections will permit CBP to become more cost recoverable with its COBRA eligible costs, thereby reducing the need for directly appropriated funding.

Future year collections are based primarily upon international travel projections for passengers and all conveyances under COBRA. Additional factors such as anticipated economic growth and inflation were also considered.

Exhibit 1: COBRA and ECCF Collections (In thousands)

	FY 2015
COBRA	\$452,968
ECCF	29,533
Total, Regular Collections	\$482,501
COBRA – Fee Increase	\$123,537
ECCF – Fee Increase	\$8,054
Total, Fee Increase	\$131,591
COBRA FTA Collections	\$180,000
Total	\$794,092

This level reflects a legislative proposal in the President’s FY 2015 Budget to increase the commercial aircraft passenger and commercial vessel passenger components of the COBRA user fees by \$2 and

proportional increases to all other COBRA components. Assuming enactment by FY 2015, this proposal will increase collections by \$131 million, allowing CBP to hire up to 795 additional CBPOs.

User Fee	Additional Funding	Number of CBPOs
Increase for regular collections	\$131,591	795

Rationale for Proposed User Fee Increase

CBP's Fiscal Year 2013 Report to Congress on Resource Optimization at Ports of Entry, submitted with the FY 2015 Budget, and includes the results of the Workload Staffing Model (WSM) – the primary tool used by CBP to inform staffing decisions at POEs. The WSM identified a need for additional workforce capacity at our POEs today, assuming current processes, procedures, technology, facilities, and use of overtime. The 2,000 new CBPOs funded in the FY 2014 Omnibus will help address current gap in capabilities. Additionally, the WSM projects the need for additional staff in FY 2015 due to expanding facilities, technology deployments, and expected growth in travel and trade. Combined, CBP's total additional requirement through FY 2015 is the equivalent of nearly 2,400 additional personnel. This requirement can be met by a mix of CBPOs, mission and operational support staff, and technology.

To address these needs, the President's FY 2015 Budget requests funding for new hand-held screening equipment, resources to begin replacing large and small scale Non-Intrusive Inspection (NII) systems, and support for new CBPOs and support staff. While these requests are critical to increase efficiencies (e.g. hand-held inspection equipment) and prevent the loss of ground gained (e.g., replacement of aging NII equipment), the most notable step to address the workload need is additional CBPOs along with the appropriate level of mission and operational support staff. The President's Budget seeks Congressional approval for legislative proposals to increase current immigration and customs user fees, and to lift the IUF exemption on some sea passengers. These proposals will support an additional 2,000 CBPOs and 400 mission and operational support staff. The additional positions, along with the workforce multiplier impacts of technology deployments and transformation initiatives, fully support the WSM requirement.

Recent staffing deployments continue to indicate that additional CBPOs (realized through either new staff or the equivalent of new staff as a result of technology deployments or business transformation initiatives) reduces wait times and transaction costs for cross border travel and trade, improves cargo release time frames, and increases enforcement effectiveness. In fact, an additional 2,000 CBPOs is projected to add nearly 66,000 new jobs, add \$4 billion to GDP, and result in 46,000 more seizures of illegal items, including potentially over \$5.5 million in counterfeit and fraudulent goods. As part of its efforts to address the WSM results, CBP proposes raising three user fees associated with CBP processing: the Immigration User Fee (IUF), the *Consolidated Omnibus Budget Reconciliation Act of 1985* (COBRA) user fee, and Express Consignment Courier Facilities (ECCF) user fee.

Exhibit 2: Collections by Fiscal Year (In thousands)

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2014² Base	FY 2015 Request	FY 2016
Collections	\$448,684	\$500,134	\$465,285	\$482,501	\$500,443
FTA Revenue	\$0	110,000	\$110,000	\$180,000	\$221,686
Fee Increase	\$0	\$0	\$0	\$131,591	\$181,979
Collections with Fee Increase	\$448,684	\$610,134	\$575,285	\$794,092	\$904,108

Estimating and allocating COBRA collections

CBP uses trend analysis in conjunction with economic indicators to forecast collections. Trend analysis is primarily used to determine the periods within the fiscal year where travel volumes are affected by seasonal changes. To develop forecasts, CBP uses numerous sources and focuses mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. GDP and anticipated economic vitality of a region are two factors that are considered in detail.

The bulk of COBRA collections, mainly those attributable to international air travel, are remitted quarterly. The first remittance occurs annually in November and the collections are made available in December. CBP relies on carryover balances to address requirements during the first two fiscal months. In FY 2013, CBP carried over \$34.7 million, which equates to roughly eight percent of the FY 2013 projected collections. CBP mitigates the risks associated with COBRA cash flows by minimizing the reimbursement of costs incurred in the annual appropriations during the first two months of the fiscal year until the initial collections become available in December.

² The FY 2014 Base is the latest updated projection as of October 2013.

CURRENT SERVICES PROGRAM DESCRIPTION:

Effective November 5, 2011, certain exemptions under the *Consolidated Omnibus Budget Reconciliation Act of 1985* (P.L. 99-272; COBRA) were eliminated. Section 601 of the *United States-Colombia Trade Promotion Agreement Implementation Act of 2011* (P.L. 112-42) lifted the exemption that excluded air and sea passengers from Canada, Mexico, and Caribbean and adjacent islands³ from having to pay the COBRA air, sea, and cruise vessel (ferry passengers are still exempted) passenger fees. Due to the elimination of the exemptions, CBP collected additional COBRA revenue (the exemption went into place partially through the fiscal year (FY)) in FY 2012 and in FY 2013. CBP expects to collect \$180,000,000 in FY 2015.

³ Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Bermuda-United Kingdom, British VI-United Kingdom, Cayman Islands, Cuba, Dominica, Dominican Republic, Grenada and South Grenadines, Guadeloupe-France, Haiti, Jamaica, Martinique-France, Netherlands Antilles, St. Kitts and Nevis, St. Lucia, St. Vincent and North Grenadines, Trinidad and Tobago, Turks and Caicos Islands-United Kingdom

Proposals for Promoting Travel and Trade

Strengthening the U.S. economy through the promotion of travel and trade is a Presidential priority and the FY 2015 Budget includes the following proposals in support of this priority:

- Increasing COBRA (customs inspections) user fees to fund up to 795 more CBP officers;
- Increasing Immigration Inspection user fees to fund up to 1,205 more CBP officers; and
- Lifting a partial exemption to the IUF for sea passengers.

These proposals will address the gap in staffing identified in the FY 2013 Report to Congress on Resource Optimization at Ports of Entry by OFO's Workload Staffing Model (WSM). These new resources will reduce wait-times and increase seizures of illegal items and counterfeit goods.

Background on Legislative Proposal for Fee Increases

CBP is proposing a \$2.00 increase to the commercial aircraft passenger and commercial vessel passenger components of the COBRA user fees (and proportional increases to all other COBRA rates and caps) and to the Immigration Inspection User Fees.

The COBRA commercial aircraft passenger (currently \$5.50) and commercial vessel passenger fees (currently \$5.50 and \$1.93 for ferry/cruise passengers) were established in 1985 at a rate of \$5.00 per person (\$1.75 for ferry/cruise passengers). The rest of the COBRA fees were set at \$397 for commercial vessels (\$5,995 cap), \$5.00 for commercial trucks (\$100 cap), \$7.50 for railroad cars (\$100 cap), \$25.00 for private aircraft and private vessels; \$5.00 for dutiable mail, \$125 for Broker Permits; and \$100 for barges/bulk carriers (\$1,500 cap). ECCF was originally set at \$0.66 per airway bill or bill of lading in 2002.

Under the proposed increase, the rate would increase to \$7.50 for air and sea passengers and \$2.60 for cruise and ferry passengers. The rest of the COBRA fees are proposed for increases as follows: \$594 for commercial vessels (\$8,316 cap); \$7.50 for commercial trucks (\$135 cap); \$11.25 for railroad cars (\$135 cap); \$37.50 for private aircraft and private vessels; \$7.50 for dutiable mail; \$188 for Broker Permits; and \$150 for barges/bulk carriers (\$2,100 cap). ECCF is proposed to increase \$1.36 per airway bill or bill of lading.

If adjusted for inflation since 1985 using the Consumer Price Index (CPI), the fee would be \$10.83 in FY 2013 (latest year for CPI figures) for the air and commercial vessel passengers and \$3.79 for ferry/cruise passengers. If the rest of the COBRA fees were increased based upon CPI, they would be set as follows: \$859.91 for commercial vessels (\$12,985.35 cap); \$10.83 for commercial trucks (\$216.60 cap); \$16.25 for railroad cars (\$216.60 cap); \$54.15 for private aircraft and private vessels; \$10.83 for dutiable mail; \$270.75 for Broker Permits; and \$216.60 for barges/bulk carriers (\$3,249.05 cap).

In future requests, CBP will propose adjustments to COBRA fee rates using CPI.

In FY 2013, CBP recovered 50 percent of all COBRA eligible costs. Since the first quarter of FY 2010, average wait times have increased steadily by 7 minutes, with more dramatic increases experienced at international gateway airports. With the fee increase, CBP would potentially be able to recover 99 percent

of current COBRA eligible costs for customs inspectional activity in the air environment, 19 percent in the land environment, and 98 percent in the sea environment in FY 2015.

The projected cost recovery in FY 2015 assumes FY 2013 costs and service levels and does not take into consideration an estimated 3-4 percent growth in passenger volume in future fiscal years or infrastructure requirements assumed in CBP's Resource Optimization Strategy. Even with increasing volume and requirements in future fiscal years, the proposed increase in collections, a potential 27 percent increase in the air passenger environment alone assuming current service levels, will mean greater security, lower wait times, and increased services for those traveling to the United States.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

The General Provision language

- (a) (1) For fiscal year 2015, the fees imposed in subsection (a) of section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)) shall be applied by substituting the following amounts for the amounts provided in such subsection:
- (A) For paragraph (1), \$594;
 - (B) For paragraph (2), \$7.50;
 - (C) For paragraph (3), \$11.25;
 - (D) For paragraph (4), \$37.50;
 - (E) For paragraph (5), \$7.50 for the fee imposed in subparagraph (A) and \$2.60 for the fee imposed in subparagraph (B);
 - (F) For paragraph (6), \$7.50;
 - (G) For paragraph (7), \$188; and
 - (H) For paragraph (8), \$150.
- (2) For fiscal year 2014, the dollar amounts in subsection (b) of section 58c of title 19, United States Code, shall be applied by substituting the following amounts for the amounts provided in such subsection:
- (A) For paragraphs (2) and (3), \$135;
 - (B) For subparagraph (A) of paragraph (5), \$8,316;
 - (C) For paragraph (6), \$2,100;
 - (D) For subparagraph (A)(ii) of paragraph (9), \$1.36; and
 - (E) For subparagraph (B)(i) of paragraph (9), not more than \$3.00 per individual airway bill or bill of lading.
- (3) As authorized by section 601(b) of the United States-Colombia Trade Promotion Agreement Implementation Act (Public Law 112-42) fees collected from passengers arriving from Canada, Mexico, or an adjacent island pursuant to section 13031(a)(5) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)(5)) shall be available until expended.
- (b) For fiscal year 2015, the fees imposed in section 286 of the Immigration and Nationality Act (8 U.S.C. 1356) shall be applied by substituting the following amounts for the amounts provided in such section:
- (1) For subsection (d), \$9; and
 - (2) For paragraph (3) of subsection (e), \$9.

<p>(a) (1) For fiscal year 2015, the fees imposed in subsection (a) of section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)) shall be applied by substituting the following amounts for the amounts provided in such subsection: □</p> <p>(A) For paragraph (1), \$594; □</p> <p>(B) For paragraph (2), \$7.50; □</p> <p>(C) For paragraph (3), \$11.25; □</p> <p>(D) For paragraph (4), \$37.50; □</p> <p>(E) For paragraph (5), \$7.50 for the fee imposed in subparagraph (A) and \$2.60 for the fee imposed in subparagraph (B); □</p> <p>(F) For paragraph (6), \$7.50; □</p> <p>(G) For paragraph (7), \$188; and □</p> <p>(H) For paragraph (8), \$150. □</p> <p>(2) For fiscal year 2014, the dollar amounts in subsection (b) of section 58c of title 19, United States Code, shall be applied by substituting the following amounts for the amounts provided in such subsection: □</p> <p>(A) For paragraphs (2) and (3), \$135; □</p> <p>(B) For subparagraph (A) of paragraph (5), \$8,316; □</p> <p>(C) For paragraph (6), \$2,100; □</p> <p>(D) For subparagraph (A)(ii) of paragraph (9), \$1.36; and □</p> <p>(E) For subparagraph (B)(i) of paragraph (9), not more than \$3.00 per individual airway bill or bill of lading.</p>	<p>Language increases by \$2.00 the commercial aircraft passenger and commercial vessel passenger components of the COBRA user fees (and proportional increases to all other COBRA rates and caps).</p>
<p>(3) As authorized by section 601(b) of the United States-Colombia Trade Promotion Agreement Implementation Act (Public Law 112-42) fees collected from passengers arriving from Canada, Mexico, or an adjacent island pursuant to section 13031(a)(5) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)(5)) shall be available until expended.</p>	<p>This language repeats the provision that was enacted in the FY 2014 Omnibus to make these fees collected in FY 2015 available to spend.</p>
<p>(b) For fiscal year 2015, the fees imposed in section 286 of the Immigration and Nationality Act (8 U.S.C. 1356) shall be applied by substituting the following amounts for the amounts provided in such section:</p> <p>(1) For subsection (d), \$9; and</p> <p>(2) For paragraph (3) of subsection (e), \$9.</p>	<p>This section will be discussed in the Immigration Inspection User Fee budget justification.</p>

COBRA passenger inspection fee Mission Statement

Customs and Border Protection user fees are authorized under Title 19 U.S.C. 58c, fees for certain customs services. The fees were created by the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA). COBRA fees are made available through permanent /indefinite appropriation created by the user fee statute. CBP collects customs fees to cover the cost of providing customs inspections of commercial operations, including, but not limited to, all costs associated with commercial passenger, vessel, vehicle, aircraft, and cargo processing.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Immigration Inspection User Fee

I. Appropriation Overview

A. Mission Statement for Immigration Inspection User Fee (IUF)

The *Department of Justice Appropriation Act of 1987* (P.L. 99-591) authorized the collection of user fees from international passengers traveling into the United States. This fee is primarily used to fund inspection and detention services at air and sea ports-of-entry. This law, codified as 8 U.S.C. 1356(h), established the air and sea passenger fees to generate revenues that would reimburse the “expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels.”

After the creation of the Department of Homeland Security (DHS), most of the immigration inspection functions were transferred to U.S. Customs and Border Protection (CBP); however, the functions funded by the IUF for detention and removal of inadmissible aliens and other investigative activities were transferred to U.S. Immigration and Customs Enforcement (ICE). As a result, a Memorandum of Agreement (MOA) was established between CBP and ICE in 2004 to determine the allocation of fee collections between the two DHS Components. Although CBP retains 100 percent of Administrative Carrier Fines, CBP receives 82.63 percent of the Airline and Vessel User Fees. The remaining 17.37 percent of the existing Airline and Vessel User Fees go to ICE.

B. Budget Activities

Individuals seeking entry into the United States are inspected at ports of entry by Customs and Border Protection officers (CBPOs) who determine their admissibility. Often, these CBPOs are the first persons to welcome both visitors and citizens to the United States, while performing the full range of their inspectional duties. The inspection process includes all work performed in connection with the entry of aliens and U.S. citizens into the United States, including pre-inspection performed CBPOs outside of the United States. A CBPO is responsible for determining the nationality and identity of each applicant for admission and for preventing the entry of ineligible aliens, including criminals, terrorists, and drug traffickers, among others. U.S. citizens are automatically admitted upon verification of citizenship. Non U.S. citizens are questioned and their documents are examined to determine admissibility based on the requirements of U.S. immigration law.

Under the authority granted by the *Immigration and Nationality Act (INA)* (P.L. 89-236), as amended, a CBPO may question, under oath, any person coming into the United States to determine his or her admissibility. In addition, a CBPO has the authority to search, without warrant, the person and effects of any person seeking admission, when there is reason to believe that grounds of exclusion exist that would be disclosed by such a search.

The INA is based on the law of presumption: an applicant for admission is presumed to be an alien until he or she shows evidence of citizenship; an alien is presumed to be an immigrant until he or she proves that he or she fits into one of the non-immigrant classifications.

In FY 2015, the IUF will be used to fund a portion of the salaries, benefits, and overtime for the CBPOs performing immigration inspection, detention, and removal of inadmissible aliens. By statute, CBP appropriations can be reimbursed for the following activities:

- Providing immigration inspection and pre-inspection services;
- Providing overtime inspection services;
- Administration of debt recovery;
- Detection of fraudulent documents;
- Detention and Removal of inadmissible aliens; and,
- Asylum proceedings at airports and seaports.

The fee rates are as follows:

Passengers Aboard Commercial Aircrafts Originating in Foreign Countries: \$7

Passengers Aboard Commercial Vessels Originating in Foreign Countries: \$7; \$3 for passengers arriving from the U.S., Canada, Mexico, a state, Territory, or possession of the U.S. or adjacent islands.

C. Budget Request Summary

CBP requests 5,599 positions and 4,825 full-time equivalent employees and \$830,382,000 in FY 2015 for the IUF.

The Administrative Carrier Fines portion of IUF differs from the fines collected under the *Illegal Immigration Reform and Immigrant Responsibility Act of 1996* (P.L. 104-208). CBP receives 100 percent of the Administrative Carrier Fines and 82.63 percent of the Airline and Vessel User Fees. ICE receives 17.37 percent of the Airline and Vessel User Fees. The percentage split is based on existing collections and is reflected in an MOA between CBP and ICE.

CBP projected the FY 2015 collections (as well as other fiscal years) by taking into account future projections for international travel, both for air and sea passengers.

Exhibit 1: Collections by Fiscal Year¹

IUF	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2014 Base	FY 2015 Request	FY 2016 Estimate
Collections	\$586,048	\$598,235	\$607,732	\$630,218	\$653,652
Fee Increase	\$0	\$0	\$0	\$200,164	\$276,760
Total	\$586,048	\$598,235	\$607,732	\$830,382	\$930,412

The IUF collections are on a quarterly remittance schedule. The first major remittance occurs annually in February. The February collections will not be deposited until March 1. CBP relies on carryover balances to support inspectional activities during the first five fiscal months. CBP mitigates the risks associated with IUF funds availability flows by using IUF carryover from prior years during the beginning of the fiscal year then using current year funding for reimbursements as collections become available.

The funding level in exhibit 1 reflects legislative proposals in the President's FY 2015 Budget to increase IUF and lift a partial fee exemption for sea passengers. The first proposal would increase IUF by \$2.00, bringing the new fee amount to \$9.00. The second proposal, eliminating a partial fee exemption for sea passengers, would mirror the lifting of a COBRA fee exemption that was enacted in FY 2012. Currently, under the Immigration and Nationality Act, each sea passenger arriving in the United States is charged a \$7.00 fee if his or her journey originated from a place outside of United States other than certain, exempt regions. CBP proposes lifting the exemption for passengers traveling from those regions so that the same fee will be applied to all sea passengers. The additional revenue collected from these increases will fund up to 1,205 new CBP officers, which will reduce wait times at air and sea ports of entry, especially as cruise volumes continue to grow as projected in future years. In future budget requests, CBP will tie these fees to the Consumer Price Index so they keep pace with the rising costs of processing international trade and travel.

Rationale for Proposed User Fee Increase

CBP's Fiscal Year 2013 Report to Congress on Resource Optimization at Ports of Entry, submitted with the FY 2015 Budget, and includes the results of the Workload Staffing Model (WSM) – the primary tool used by CBP to inform staffing decisions at POEs. The WSM identified a need for additional workforce capacity at our POEs today, assuming current processes, procedures, technology, facilities, and use of overtime. The 2,000 new CBPOs funded in the FY 2014 Omnibus will help address current gap in capabilities. Additionally, the WSM projects the need for additional staff in FY 2015 due to expanding facilities, technology deployments, and expected growth in travel and trade. Combined, CBP's total additional requirement through FY 2015 is the equivalent of nearly 2,400 additional personnel. This requirement can be met by a mix of CBPOs, mission and operational support staff, and technology.

¹ The FY 2014 Base is the latest updated projection as of October 2013.

To address these needs, the President's FY 2015 Budget requests funding for new hand-held screening equipment, resources to begin replacing large and small scale Non-Intrusive Inspection (NII) systems, and support for new CBPOs and support staff. While these requests are critical to increase efficiencies (e.g. hand-held inspection equipment) and prevent the loss of ground gained (e.g., replacement of aging NII equipment), the most notable step to address the workload need is additional CBPOs along with the appropriate level of mission and operational support staff. The President's Budget seeks Congressional approval for legislative proposals to increase current immigration and customs user fees, and to lift the IUF exemption on some sea passengers. These proposals will support an additional 2,000 CBPOs and 400 mission and operational support staff. The additional positions, along with the workforce multiplier impacts of technology deployments and transformation initiatives, fully support the WSM requirement.

Recent staffing deployments continue to indicate that additional CBPOs (realized through either new staff or the equivalent of new staff as a result of technology deployments or business transformation initiatives) reduces wait times and transaction costs for cross border travel and trade, improves cargo release time frames, and increases enforcement effectiveness. In fact, an additional 2,000 CBPOs is projected to add nearly 66,000 new jobs, add \$4 billion to GDP, and result in 46,000 more seizures of illegal items, including potentially over \$5.5 million in counterfeit and fraudulent goods. As part of its efforts to address the WSM results, CBP proposes raising three user fees associated with CBP processing: the Immigration User Fee (IUF), the *Consolidated Omnibus Budget Reconciliation Act of 1985* (COBRA) user fee, and Express Consignment Courier Facilities (ECCF) user fee.

CURRENT SERVICES PROGRAM DESCRIPTION:

As established in an MOA between CBP and ICE, funds from the IUF account are used by CBP and ICE to recover some of the costs of immigration inspection services, detention, and removal of inadmissible aliens related to the inspection and pre-inspection services for commercial aircraft or vessels. CBP receives 100 percent of the Administrative Carrier Fines and 82.63 percent of the Airline and Vessel User Fees. ICE receives 17.37 percent of the existing Airline and Vessel User Fees. At air and sea ports of entry specifically, the fees cover some of the costs of immigration personnel, the maintenance and updating of systems to track criminal and illegal aliens in areas with high apprehensions, and the repair and maintenance of equipment. However, because these fees are statutorily set, their “buying power” diminishes each year if the fees are not adjusted for inflation.

Projected Performance Impact and Cost Recovery of IUF Increases

CBP currently faces several challenges in providing adequate staffing to meet mission requirements for CBPOs. These challenges are described in detail in CBP’s Resource Optimization at Ports of Entry, Fiscal Year 2013 Report to Congress, and include fluctuating user fee collections, expansion of workload including new or expanded facilities, and historic levels of travel volumes, up 12 percent since FY 2009, and projected to increase 3-4 percent each year for the next three years.

In order to help address these challenges, CBP proposes raising the IUF fee in order to generate funds to decrease the gap between CBP’s reimbursable immigration inspectional activity and the actual reimbursements from IUF. This will allow CBP to dedicate resources to increased CBPO hiring, which will result in improved immigration inspection services provided to those who pay this fee when traveling to the United States.

This proposal is part of CBP’s integrated Resource Optimization Strategy, which incorporates optimizing business processes to maximize current resources, identifying staffing needs, and exploring alternative funding strategies through a comprehensive funding plan to provide for additional CBP officers. The \$2.00 increase to IUF and elimination of the sea passenger exemption are expected to provide an additional \$200.2 million in revenue, which could fund up to 1,205 additional CBPOs. CBP is proposing, via the General Provisions, a \$2.00 increase to the commercial aircraft passenger and commercial vessel passenger Immigration Inspection User Fees. For illustrative purposes only (as decisions on allocation of new CBPOs have not been determined), the new CBP officers requested in the FY 2015 President’s budget are estimated to decrease peak wait times at some ports of entry by 30 minutes or more and have an estimated enforcement impact in increased seizures of \$92.6 million.

² The requested increase supports 1,205 CBPOs and 268 mission support personnel.

User Fee	Additional Funding (\$K)	Number of CBPOs
IUF	\$200,164	1,205

Recent staffing deployments continue to indicate that additional CBPO staffing reduces wait times and transaction costs for cross border travel and trade, improves cargo release time frames, and increases enforcement effectiveness. The following estimated outcomes of hiring 1,205 additional CBP officers could be expected:

- 22,402 more enforcement actions.
 - \$38,960,000 increase in drug seizure value.
 - \$2,678,500 increase in currency seizure value.
 - \$7,645,900 increase in trade penalty assessments.
 - \$2,435,000 increase in IPR seizures.
 - \$40,908,000 increase in liquidated damage assessments.
- \$92,627,400 in Total Economic Impact³**

Even with increasing passenger volume and inspection requirements in future fiscal years, the proposed increase in IUF fee rates will result in greater security, lower wait times, and increased services for those traveling to the United States.

The IUF commercial aircraft passenger and commercial vessel passenger fees were established in 1987 at a rate of \$6.00 per person and \$3.00 (established in 2003) for vessel passengers arriving from the U.S., Canada, Mexico, a state, Territory, or possession of the U.S. or adjacent islands . They were last increased in 2001, when the \$6.00 rate was increased to \$7.00 per passenger. Under the proposed \$2.00 increase, the rate would increase to \$9.00 for air and sea passengers and \$9.00 for vessel passengers arriving from the U.S., Canada, Mexico, a state, Territory, or possession of the U.S. or adjacent islands. If these fees had been adjusted for inflation since 1987 using the Consumer Price Index, the fee would be \$12.31 in FY 2013 for the air and commercial vessel passenger component and \$3.80 for vessel passengers arriving from the U.S., Canada, Mexico, a state, Territory, or possession of the U.S. or adjacent islands.

³ These statistics were formulated using impact statistics found in the 2013 Resource Optimization Report. Updates to these figures are pending the finalization of the National Center for Risk and Economic Analysis of Terrorism Events (CREATE) Study.

MAJOR ACQUISITIONS:

Infrastructure

Infrastructure is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- APHIS \$52.378 million
- COPPS \$141.150 million
- Information Technology \$186.787 million
- Global Entry \$0.003 million
- IUF \$90.121 million

OFO Facilities

OFO Facilities is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- APHIS \$26.052 million
- Facilities Program Management \$30.142 million
- Facilities, Construction, & Sustainment \$236.945 million
- IUF \$10.046 million
- Rent \$192.409 million

SAP

The Systems Applications and Products (SAP) database provides for accurate and timely processing of financial, property, and procurement transactions occurring on a daily basis that enable CBP to accomplish its mission. SAP is an integrated enterprise-wide resource planning (ERP) system that replaced ten stove-piped, outdated, and underperforming mainframe systems that CBP deemed insufficient and no longer suited to meeting data processing and reporting needs. SAP permits CBP to accomplish its mission with more efficiency than ever before as well as reduce functional gaps by closing material weaknesses identified during past audits of CBP Financial Statements required by the Federal Managers Financial Integrity Act.

SAP is proposed to be funded out of two PPAs in FY 2015, as follows:

- IUF \$2 million
- Administration \$12.540 million

IV. Program Justification Changes

N/A

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

The General Provision language

- (a) (1) For fiscal year 2015, the fees imposed in subsection (a) of section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)) shall be applied by substituting the following amounts for the amounts provided in such subsection:
- (A) For paragraph (1), \$594;
 - (B) For paragraph (2), \$7.50;
 - (C) For paragraph (3), \$11.25;
 - (D) For paragraph (4), \$37.50;
 - (E) For paragraph (5), \$7.50 for the fee imposed in subparagraph (A) and \$2.60 for the fee imposed in subparagraph (B);
 - (F) For paragraph (6), \$7.50;
 - (G) For paragraph (7), \$188; and
 - (H) For paragraph (8), \$150.
- (2) For fiscal year 2014, the dollar amounts in subsection (b) of section 58c of title 19, United States Code, shall be applied by substituting the following amounts for the amounts provided in such subsection:
- (A) For paragraphs (2) and (3), \$135;
 - (B) For subparagraph (A) of paragraph (5), \$8,316;
 - (C) For paragraph (6), \$2,100;
 - (D) For subparagraph (A)(ii) of paragraph (9), \$1.36; and
 - (E) For subparagraph (B)(i) of paragraph (9), not more than \$3.00 per individual airway bill or bill of lading.
- (3) As authorized by section 601(b) of the United States-Colombia Trade Promotion Agreement Implementation Act (Public Law 112-42) fees collected from passengers arriving from Canada, Mexico, or an adjacent island pursuant to section 13031(a)(5) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)(5)) shall be available until expended.
- (b) For fiscal year 2015, the fees imposed in section 286 of the Immigration and Nationality Act (8 U.S.C. 1356) shall be applied by substituting the following amounts for the amounts provided in such section:
- (1) For subsection (d), \$9; and
 - (2) For paragraph (3) of subsection (e), \$9.

<p>(a) (1) For fiscal year 2015, the fees imposed in subsection (a) of section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)) shall be applied by substituting the following amounts for the amounts provided in such subsection: □</p> <p>(A) For paragraph (1), \$594; □</p> <p>(B) For paragraph (2), \$7.50; □</p> <p>(C) For paragraph (3), \$11.25; □</p> <p>(D) For paragraph (4), \$37.50; □</p> <p>(E) For paragraph (5), \$7.50 for the fee imposed in subparagraph (A) and \$2.60 for the fee imposed in subparagraph (B); □</p> <p>(F) For paragraph (6), \$7.50; □</p> <p>(G) For paragraph (7), \$188; and □</p> <p>(H) For paragraph (8), \$150. □</p> <p>(2) For fiscal year 2014, the dollar amounts in subsection (b) of section 58c of title 19, United States Code, shall be applied by substituting the following amounts for the amounts provided in such subsection: □</p> <p>(A) For paragraphs (2) and (3), \$135; □</p> <p>(B) For subparagraph (A) of paragraph (5), \$8,316; □</p> <p>(C) For paragraph (6), \$2,100; □</p> <p>(D) For subparagraph (A)(ii) of paragraph (9), \$1.36; and □</p> <p>(E) For subparagraph (B)(i) of paragraph (9), not more than \$3.00 per individual airway bill or bill of lading.</p>	<p>Language increases by \$2.00 the commercial aircraft passenger and commercial vessel passenger components of the COBRA user fees (and proportional increases to all other COBRA rates and caps) and to the Immigration Inspection User Fees.</p>
<p>(3) As authorized by section 601(b) of the United States-Colombia Trade Promotion Agreement Implementation Act (Public Law 112-42) fees collected from passengers arriving from Canada, Mexico, or an adjacent island pursuant to section 13031(a)(5) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)(5)) shall be available until expended.</p>	<p>This section will be discussed in the COBRA Passenger Inspection Fee budget justification.</p>
<p>(b) For fiscal year 2015, the fees imposed in section 286 of the Immigration and Nationality Act (8 U.S.C. 1356) shall be applied by substituting the following amounts for the amounts provided in such section:</p> <p>(1) For subsection (d), \$9; and</p> <p>(2) For paragraph (3) of subsection (e), \$9.</p>	<p>Language increases by \$2.00 the IUF fee, bringing the new fee amount to \$9.00, and eliminate a partial fee exemption for sea passengers traveling from certain, exempt regions.</p>

Immigration Inspection User Fee Mission Statement

The Department of Justice Appropriation Act of 1987 (P.L. 99-591) authorized the collection of user fees for processing commercial air and sea passengers. This law codified as 8 U.S.C. 1356(h) established the two fees to generate revenues that would reimburse the appropriation for expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**U.S. Customs and Border Protection
Land Border Inspection Fee**

I. Appropriation Overview

A. Mission Statement for Land Border Inspection Fee

The *Department of Justice Appropriation Act of 1990* (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the Land Border Inspection Fees (LBIF) to recover the full costs incurred for the inspection services provided at land border ports of entry.

B. Budget Activities

The funds in the LBIF account are used to support the following CBP activities:

- Overtime inspection services;
- Expansion, operation, and maintenance of information technology systems for nonimmigrant control;
- The hiring of temporary and permanent CBP officers;
- Minor construction costs associated with the addition of new traffic lanes;
- Detection of fraudulent travel documents; and,
- Administrative expenses of account.

Collections from LBIF fund the salaries and benefits of CBP Officers, as well as operational and maintenance costs. The following fees are deposited into the LBIF account:

- Arrival/Departure Land Border (I-94): \$6
- Non-Immigrant Visa Waiver (I-94W): \$6
- Canadian Boat Landing Permit Individual (I-68): \$16 (individual); \$32 (family)
- NEXUS: \$50 (every 5 years)
 - o NEXUS replacement card: \$25
- Free and Secure Trade Program (FAST) Driver Application Fee: \$50 (every 5 years)
- Secure Electronic Network for Travelers Rapid Inspection (SENTRI): \$122.25 (individuals); \$160 maximum (families). Fee is for 5-year membership. In addition to application fee, SENTRI includes the following:
 - o Dedicated Commuter Lane Fees: \$80
 - o Dedicated Commuter Lane additional vehicle (DCL): \$42
- Replacement of Papers for Nonresident Mexican Crossing (I-190): \$26

The purpose of each fee is as follows:

I-94: This fee is assessed upon the completion of Form I-94 by foreign citizens that are being admitted to the United States under the nonimmigrant visa status. The fee is issued to visitors who hold a valid U.S. Visa or Border Crossing Card.

I-94W: This fee is charged to individuals who enter the U.S. under the Visa Waiver Program. The Visa Waiver Program allows visitors to travel to the U.S. for business or pleasure for 90 days or less without obtaining a visa. Beginning in FY 2014, CBP will cease collecting I-94W fees in the land environment due to advances in automation technology.

I-68 Canadian Boat Landing Permit (individual or family): This fee permits a boater to report their arrival into the United States telephonically without having to appear at a port-of-entry for an in-person inspection. The initial inspection involves an interview, checking the individual in the Interagency Border Inspection System, completion of the form I-68, and payment of the fee.

NEXUS: A joint U.S./Canada Trusted Traveler Program. Enrollment is available at certain northern border land Ports of Entry (POEs) and at all Canadian preclearance ports. NEXUS members are provided expedited entry into the United States and Canada. Applicants must voluntarily undergo a thorough biographical background check against criminal, law enforcement, customs, immigration, and terrorist indices of both Canada and the United States; a 10-fingerprint law enforcement check; and a personal interview with a CBP and Canada Border Services Agency (CBSA) officer. Once applicants are approved, they are issued an RFID enabled card that will identify their record and their status in the CBP and CBSA database upon arrival. The RFID-enabled card allows the traveler to use specified primary lanes at land border POEs that are reserved for NEXUS enrollee use. NEXUS members are automatically eligible to use Global Entry (GE) kiosks. At the Canadian preclearance airports, passengers use either a GE or NEXUS kiosks instead of dedicated lanes. NEXUS travelers qualify for trusted traveler status in all modes of travel (air, sea, and land). The introduction of WHTI lane technology has provided local managers with the flexibility to add and subtract dedicated lanes to fit traffic demand.

FAST Driver Application Fee: CBP Trusted Traveler Program. FAST is the cargo equivalent of the SENTRI and NEXUS facilitative programs in the passenger environment. Through FAST, importers, commercial carriers, truck drivers, and manufacturers who enroll in the program and meet agreed upon security criteria, including participation in the C-TPAT program, are granted expedited clearance at a POE. The FAST program supports a more secure supply chain and enables CBP to focus security efforts and inspections on high-risk commerce, where the attention is most needed.

Replacement of Papers for Nonresident Mexican Crossing (I-190): Citizens of Mexico must apply for a nonresident border crossing card on Form I-190.

SENTRI: CBP Trusted Traveler Program. On the southwest border, SENTRI provides expedited CBP processing for pre-approved, low-risk travelers. Applicants must voluntarily undergo: a thorough biographical background check against criminal, law enforcement, customs, immigration, and terrorist indices; a 10-fingerprint law enforcement check; and a personal interview with a CBP officer. Once applicants are approved, they are issued an RFID enabled card that will identify their

record and their status in the CBP database upon arrival at the U.S. POEs. SENTRI users have access to specific, dedicated primary lanes into the United States. Since 1995, the SENTRI program has grown to include a total of 19 lanes at the ten largest southern border POEs along the U.S./Mexico border. SENTRI members currently account for 19 percent of all cross southwest border traffic.

Dedicated Commuter Lane additional vehicle (DCL): If an approved participant wishes to register more than one vehicle for use in the SENTRI DCL lane (maximum of 4 vehicles), or an approved participant wishes to be registered in more than one vehicle (maximum of 8 persons per vehicle), an additional fee of \$42 per vehicle will be charged.

C. Budget Request Summary

CBP requests 284 full time equivalent employees and \$43,931,000 in FY 2015 for LBIF. This request will fund the salaries and benefits of CBPOs and related operational and maintenance costs. Based upon arrivals from Mexico and Canada into the U.S. under all Land Border Programs, CBP anticipates collecting the following amounts.

Exhibit 1: Collections by Fiscal Year (In thousands)¹

LBIF	FY 2013	FY 2014 Enacted	FY 2014² Base	FY 2015 Request	FY 2016 Estimate
Collections	\$40,616	\$42,941	\$42,241	\$43,931	\$45,565

Table 1: Transfer of FBI Fingerprinting Fees to Global Entry

	FY 2012 Actual Collections	FY 2013	FY 2014 Enacted	FY 2014 Base	FY 2015 Request	FY 2016
Land Border	\$29,099	\$40,616	\$32,635	\$42,241	\$43,931	\$45,565
Regular						
F.B.I.	9,048	-	10,306	-	-	-
Total	\$38,147	\$40,616	\$42,941	\$42,241	\$43,931	\$45,565
Global Entry (GE)	FY 2012 Actual Collections	FY 2013	FY 2014 Enacted	FY 2014	FY 2015	FY 2016
GE Collections	\$23,811	\$50,956	\$34,835	\$60,288	\$72,346	\$74,878
F.B.I.	-	12,970	-	15,706	18,847	19,507
Total	\$23,811	\$63,926	\$34,835	\$75,994	\$91,193	\$94,384

¹ Effective in FY 2013, the FBI fingerprinting fees are now managed under the Global Entry account. Of the \$42.9 million in enacted dollars for FY 2014, \$32.6 million are attributable to regular Land Border collections. In the FY 2014 enacted amount, the \$42.9 million figure assumed \$10.3 million in FBI fingerprinting fee revenue. Figures for FY 2014 Base, FY 2015 Request, and FY 2016 do not include revenue for FBI fingerprinting for the Land Border account. See Table 1 for a visual display of the transfer of FBI fingerprinting fees to the Global Entry account.

² CBP will cease collecting the I-94W portion of the Land Border account in FY 2014. Additionally, the FY 2014 Base is the latest updated projection as of October 2013.

Base	FY 2014 Enacted	284	284	42,941
Current Services	Increase in User Fee Collections			990
FY 2015 Request	Land Border Inspection	284	284	43,931

CURRENT SERVICES PROGRAM DESCRIPTION:

As authorized by law, LBIF are used to recover part of CBP's costs for its Trusted Traveler Programs (TTP) at land border ports of entry, including inspections of pedestrians, buses, passenger occupancy vehicles, and rail cars. It also includes antiterrorism efforts, dedicated lane programs, and forms processing.

The TTP are comprised of the following programs: NEXUS Highway and Air, SENTRI, FAST, and GE. Applicants apply online and enroll using the Global Online Enrollment System. The TTP programs are funded with a combination of Salary and Expenses and user fees (for additional information please refer to the Inspections, Trade and Travel Facilitation PPA as well as the TTP PPA). These programs help to improve the targeting, screening, and apprehension of high-risk international travelers, thereby preventing terrorist attacks and criminal activity while expediting the processing of legitimate travelers.

CBP's TTP provide expedited travel for pre-approved, low risk travelers through dedicated lanes and kiosks. Members are travelers who have voluntarily applied, paid a nonrefundable application fee, and provided personal data (including biometric information, photos, and fingerprints) to CBP. Participants go through a rigorous background check and screening before becoming approved members.

These programs help to identify low-risk, vetted travelers by the voluntary submission of an application and subsequent vetting using automated name and fingerprint-based checks of law enforcement databases, fingerprint/name checks, and an interview with a uniformed officer. Trusted Traveler Programs continue to expand in FY 2014. As of September 30, 2013, Trusted Traveler Programs have a total of 2,271,224 members. Currently, TTP is comprised of four programs NEXUS, SENTRI, FAST, and GE, which are discussed below.

Exhibit 2: Trusted Traveler Program Enrollments FY 2013 - FY 2015

	FY 2013	FY 2014 Projected Membership	FY 2015 Projected Membership
NEXUS	900,499	991,400	1,180,000
SENTRI	357,731	364,000	390,000
FAST	77,484	79,000	80,000
Global Entry	935,510	925,300	1,200,000
Totals	2,271,224	2,359,700	2,850,000

The Trusted Traveler Program has significantly increased its membership for the NEXUS, SENTRI, and GE programs. The NEXUS membership increase is due to the Beyond the Border initiatives involving increased outreach and its blitz operations (Enrollment Center blitzes and mobile enrollment blitzes resulted in a 19 percent membership expansion in FY 2013). The SENTRI program has seen an 18.5 percent membership expansion in FY 2013. The GE membership increase is due to the GE promotions; with a 117 percent membership expansion in FY 2013.

NEXUS Highway and Air

NEXUS, a joint U.S./Canada enrollment program at the northern border land POE and at all Canadian preclearance ports, identifies low-risk travelers through: a complete biographic check, an interview with a CBPO and a Canada Border Security Agency (CBSA) officer, and a fingerprint check. Once applicants are identified as low-risk they are enrolled in the NEXUS program and given a Radio Frequency Identification (RFID)-enabled card that is unique to the traveler. The RFID-enabled card allows the traveler to use specified primary lanes at land border POEs that are reserved for NEXUS enrollee use. At the Canadian preclearance airports, passengers use kiosks instead of dedicated lanes and iris scans are utilized to identify low-risk travelers rather than RFID-enabled cards. At the time of enrollment, travelers qualify for trusted traveler status in all modes of travel (air, sea, and land). The introduction of WHTI

lane technology has provided local managers with the flexibility to add and subtract dedicated lanes to fit traffic demand.

Cost Avoidance/Workforce Multiplier Effect

In FY 2013, the average NEXUS program lane processing time, 19 seconds, was two and a half times faster than vehicles processed at general lanes crossing the northern border (general lane times along the northern border average 49 seconds per vehicle). Although the per vehicle inspection time savings remained the same as in FY 2012 (30 seconds), the 12.4 percent increase in crossings in NEXUS lanes resulted in an additional savings equivalent to 3 CBPOs from the equivalent of 25 CBPOs achieved in FY 2012. This savings represents a cost avoidance value of approximately \$354,000 in salaries and benefits. Continued membership growth for this program will result in further efficiency.

Secure Electronic Network for Traveler's Rapid Inspection (SENTRI)

On the southwest border, SENTRI provides expedited CBP processing for pre-approved, low-risk travelers. Applicants must voluntarily undergo: a thorough biographical background check against criminal, law enforcement, customs, immigration, and terrorist indices; a 10-fingerprint law enforcement check; and a personal interview with a CBPO. Once applicants are approved, they are issued an RFID enabled card that will identify their record and their status in the CBP database upon arrival at the U.S. POEs. A sticker decal is also issued for the applicant's vehicle or motorcycle. SENTRI users have access to specific, dedicated primary lanes into the United States.

Since 1995, the SENTRI program has grown to include a total of 19 lanes at the ten largest southern border POEs along the U.S./Mexico border. SENTRI members currently account for 19 percent of all cross southwest border traffic.

Cost Avoidance/Workforce Multiplier Effect

In FY 2013, the average SENTRI lane processing time, 22 seconds, was almost 3 times faster than vehicles processed at general lanes crossing the southern border (general lane times along the southern border averaged 64 seconds per vehicle). This is an increase of 3 seconds, or 7.7 percent, savings per SENTRI crossing in FY 2013 (39 seconds in FY 2012 to 42 seconds in FY13). There was also an 8.6 percent increase (991,316) in the number of crossings in the SENTRI lane. The increase in volume and time savings resulted in additional inspection time savings equivalent to 17 CBPOs from FY 2012 (a cost avoidance value of approximately \$2.0 million in salaries and benefits).

Free and Secure Trade (FAST)

FAST is the cargo equivalent of the SENTRI and NEXUS facilitative programs in the passenger environment. Through FAST, importers, commercial carriers, truck drivers, and manufacturers who enroll in the program and meet agreed upon security criteria, including participation in the C-TPAT program, are granted expedited clearance at a POE. Using

electronic data transmission and transponder technology, CBP expedites clearance of approved trade participants. The FAST program supports a more secure supply chain and enables CBP to focus security efforts and inspections on high-risk commerce, where the attention is most needed.

Global Entry (GE)

CBP designed GE to allow for expedited clearance of pre-approved low-risk air travelers into the U.S. Through the use of automated kiosks placed in the Federal Inspection Services area of each identified airport, enrolled travelers are able to bypass queues and process through Passport Control without having to see a CBPO. This program facilitates entry into the United States and is especially beneficial to frequent international flyers. Refer to the Global Entry budget request for more information on the Global Entry user fee.

Cost Avoidance/Workforce Multiplier Effect

In FY 2013, there were almost 1 million additional uses of Global Entry and NEXUS Air kiosks; representing a 34 percent increase in usage over FY12 (3.3 million uses vs. 2.5 million). The increased use of these kiosks by travelers arriving in the United States resulted in savings equivalent to 60 CBPOs which is a marginal increase of 4 CBPOs from FY 2012. GE usage in FY 2013 increased throughput by 2.1 percent for all passengers, including the majority of passengers not in GE. In FY 2013, GE passengers have represented only 3.4 percent of total arriving air passengers as of June 30. However, when compared to the GE air passenger percentage of 2.68 percent in FY 2012, there is a clear increase which is projected to continue. Continued growth in GE will result in further efficiency.

Table 2: Global Entry Locations as of November 2013

United States and Territories			Canada
Atlanta	Las Vegas	Saipan	Calgary
Baltimore	Los Angeles	Salt Lake City	Edmonton
Boston	Miami	San Antonio	Halifax
Charlotte	Newark	San Diego	Montreal
Chicago	Minneapolis	San Francisco	Ottawa
Dallas/Ft. Worth	New York (JFK)	San Juan	Toronto
Denver	Orange County (John Wayne Airport)	Sanford, FL	Vancouver
Detroit	Orlando	Seattle	Winnipeg
Ft. Lauderdale	Philadelphia	Tampa	Ireland
Guam	Phoenix	Washington Dulles	Dublin
Honolulu	Portland		Shannon
Houston	Raleigh-Durham		

Select Adjustments to Base

Greater Reliance on Global Entry Fees: CBP plans to rely on Global Entry fees to fund Global Entry kiosks, rather than appropriated funding in the Trusted Traveler PPA. In the past, only S&E appropriations have been for new kiosks. Recently, Global Entry fees have been made available to purchase new kiosks. OFO can use these fees to fund program activity and for salary expenses of all positions required for trusted traveler programs.

Land Border Inspection Fee Mission Statement

The Department of Justice Appropriation Act of 1990 (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the fees to recov costs incurred in the following categories involving the operation of various pilot programs: Overtime inspection services; Expansion, operation, and maintenance of information technology systems for non-immigrant control; Hiring of temporary and permanent inspectors; Minor construction costs associated with the addition of new traffic lanes; Detection of fraudulent travel documents; and Administrative expenses of account.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	21,702	22,944	23,473	529

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Immigration Enforcement Fines

I. Appropriation Overview

A. Mission Statement for Immigration Enforcement Fines

The Immigration Enforcement Account was established under Section 382 of the *Illegal Immigration Reform and Immigrant Responsibility Act of 1996* (P.L. 104-208; IIRIRA). In addition to creating this account, IIRIRA also added new types of fines in order to include fines levied against aliens for failure to depart the United States if so ordered. Fines are also levied on carriers transporting passengers to the United States that violate element(s) of immigration law.

B. Budget Activities

Subject to the availability of funds, the fines collected are used to support the following CBP Officer activities: identification, investigation, apprehension, detention, and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border, in areas with high apprehensions, to deter illegal entry; and the repair, maintenance, and construction of border facilities.

C. Budget Request Summary

CBP requests \$752,000 in FY 2015 to support five full-time equivalents and operating costs of collecting enforcement fines. Because immigration violations are not easily quantifiable, enforcement-related collections are relatively fluid and difficult to forecast. Thus, CBP primarily utilizes real Gross Domestic Product (GDP) estimates to project future year revenue collections.

Exhibit 1: Estimated Collections **(In thousands)**

Enforcement Fines Collections	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2014¹ Base	FY 2015 Request	FY 2016 Estimate
	\$699	\$773	\$725	\$752	\$778

Estimating and Allocating Collections for Enforcement Fines:

CBP uses trend analysis in conjunction with economic indicators to forecast collections. Trend analysis is principally used to determine the periods within the fiscal year where travel volumes are

¹ The FY 2014 Base is the latest updated projection as of October FY 2014.

affected by seasonal changes. In developing forecasts, CBP uses numerous sources, and focuses mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. For IEF, international travel forecasts are the factors that are considered in greatest detail.

Immigration enforcement fines Mission Statement

The Immigration Enforcement account was established under Section 382 of the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996. Previously, similar fines were collected and deposited into the Immigration User Fee account. In addition to creating this account, IIRIRA also added new types of fines, such as those levied against aliens for failure to depart the United States after being so ordered. The authorized uses of this funds consist of: the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	474	524	510	(14)
11.5 Other Personnel Compensation	41	46	44	(2)
12.1 Civilian Personnel Benefits	184	203	198	(5)
Total, Salaries & Benefits	699	773	752	(21)

In 2015, a decrease of -\$21,000 is for anticipated changes in user fee collections.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Global Entry User Fees

I. Appropriation Overview

A. Mission Statement for Global Entry User Fees

The Global Entry Program is authorized under the *Consolidated Appropriations Act of 2008* (P.L. 110-161) Section 565(3) (A). The program establishes an international registered traveler program that incorporates technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. All applicants must be pre-approved and they must undergo a rigorous background check and interview before enrollment. Global Entry allows expedited clearance for pre-approved and low-risk travelers upon arrival in the United States. Though intended for frequent international travelers, there is no minimum number of trips necessary to qualify. Participants may enter the United States by using automated kiosks located at selected airports.

Section 565 (3) (B) of the *Consolidated Appropriations Act of 2008* authorized the imposition of a fee to recover the full cost of the program. The implementing regulation to establish an application fee was issued in November 2009 (74 FR 59936 (2009-11-19)). On the basis of cost estimates and enrollment projections, a charge of \$100 per application was deemed appropriate to generate necessary revenue to cover the full cost of processing Global Entry applications. The Office of Trade and Office of Field Operations of the U.S. Customs and Border Protection (CBP) initiated a fee study in Fiscal Year (FY) 2012 of the Trusted Traveler Programs (TTP) to include Global Entry, NEXUS, and SENTRI fees. Global Entry collections also include Federal Bureau of Investigation (FBI) Fingerprint Fee (applicable to SENTRI, NEXUS, FAST, and Global Entry): \$14.50 per applicant (\$17.25 for SENTRI applicants). This fee is charged to cover costs of FBI Fingerprint check for applications to SENTRI, NEXUS, FAST, and Global Entry programs.

Currently, Global Entry kiosks can be found in 34 international U.S. airports, 8 Canadian pre-clearance locations, and two pre-clearance locations in Ireland. Beginning in FY 2012, the *Asian- Pacific Economic Cooperation Business Travel Card* (P.L. 112-54) was developed as an extension to the Global Entry Program in response to the need for business people to gain streamlined entrance to the economies of the Asia-Pacific region. This enables business people to explore new business opportunities, attend meetings, and conduct trade and investment activities.

B. Budget Activities

CBP designed Global Entry to allow for expedited clearance of pre-approved, low-risk air travelers into the U.S. Through the use of automated kiosks placed in the Federal Inspection Services area of each identified airport, enrolled travelers are able to bypass queues and process

through Passport Control without having to see a CBP officer (CBPO). This program facilitates entry into the United States and is especially beneficial to frequent international flyers. Global Entry membership is valid for five years.

Exhibit 1: Global Entry Locations as of December 2013

United States and Territories			Canada
Atlanta	Las Vegas	Saipan	Calgary
Baltimore	Los Angeles	Salt Lake City	Edmonton
Boston	Miami	San Antonio	Halifax
Charlotte	Minneapolis	San Diego	Montreal
Chicago	Newark	San Francisco	Ottawa
Dallas/Ft. Worth	New York (JFK)	San Juan	Toronto
Denver	Orange County (John Wayne Airport)	Sanford, FL	Vancouver
Detroit	Orlando	Seattle	Winnipeg
Ft. Lauderdale	Philadelphia	Tampa	Ireland
Guam	Phoenix	Washington Dulles	Dublin
Honolulu	Portland	Washington, DC	Shannon
Houston	Raleigh-Durham		

In FY 2013, Global Entry expanded to include airports at Baltimore (BWI), Portland (PDX), and Tampa (TPA). In FY 2014 continued expansion will include the airport in Cincinnati (CVG). Additionally, CBP expanded the number of urban enrollment centers for the Global Entry program, which include locations in Houston, and Washington, D.C. In FY 2014, continued expansion of urban enrollment centers will include Cleveland.

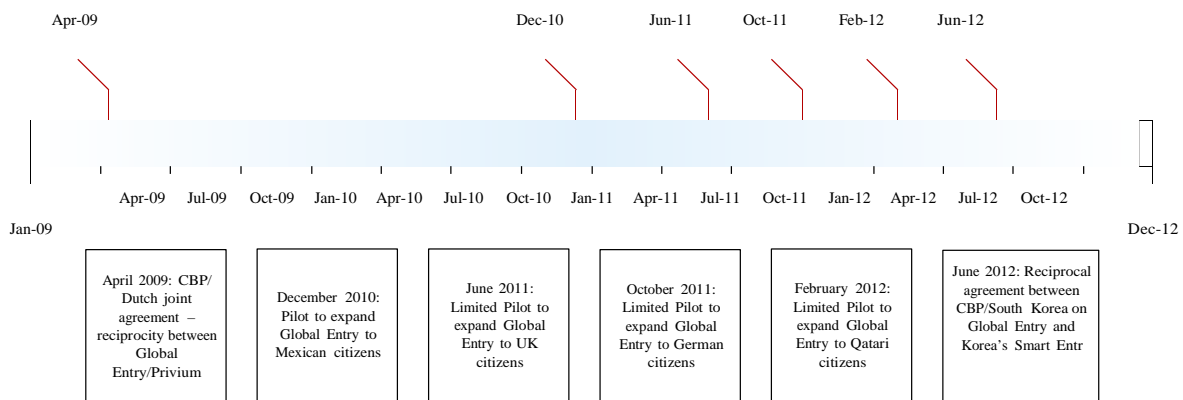

Global Entry applications and enrollments are growing quickly. Since the program's inception in FY 2008, CBP has accomplished the following:

- Starting in April 2009, CBP has operated a joint program with the government of the Netherlands that allows qualified U.S. citizens to join Privium, the Dutch trusted traveler program, and allows Dutch citizens to join Global Entry. Participants in this program must pass vetting by both CBP and the Netherlands government.
- On December 29, 2010, a Federal Register Notice was published announcing the expansion of Global Entry eligibility to Mexican Nationals. Participants in this pilot must pass vetting by both CBP and Mexican government officials.
- In June 2011, CBP began implementing a limited pilot with the United Kingdom (UK), allowing UK citizens to participate in Global Entry. UK applicants are subjected to vetting by both CBP and UK government officials.
- In October 2011, CBP began implementing a limited pilot with Germany, allowing German citizens to participate in Global Entry. German applicants are subjected to vetting by both CBP and German government officials.

- In February 2012, CBP began implementing a limited pilot with Qatar, allowing Qatari citizens to participate in Global Entry. Qatari applicants are subjected to vetting by both CBP and the Qatari government.
- On June 12, 2012, CBP implemented a trusted traveler arrangement with the Republic of Korea. The arrangement allows qualified U.S. citizens to join the Smart Entry Service (SES), the Republic of Korea's trusted traveler program, and allows Korean citizens to join Global Entry. Participants in this arrangement must pass vetting by both CBP and the Republic of Korea.

As of September 30, 2013, Global Entry has 981,213 active enrolled members which is a 67 percent increase over FY 2012 membership.

Exhibit 2: Timeline of Global Entry Agreements and Pilots

CBP has signed joint statements with Australia, Israel, New Zealand, Panama, and Saudi Arabia, laying the framework for the development of trusted traveler arrangements with each of these countries. CBP is working with representatives from these governments to develop individual bilateral arrangements to enable trusted travelers from either country to receive expedited clearance when traveling.

Cost Avoidance/Workforce Multiplier Effect

In FY 2013, GE kiosks have been used approximately 2.8 million times, through September 30, 2013, producing an inspection time savings equivalent to 44 CBPOs (a cost avoidance value of approximately \$5.2 million in salaries and benefits). GE usage in FY 2013 increased throughput by 2.1 percent for all passengers, including the majority of passengers not in GE. In FY 2013, GE passengers represented only 5.16 percent of total eligible arriving passengers. However, when compared to the GE air passenger percentage of 2.68 percent in FY 2012, there is a clear increase which is projected to continue. Continued growth in GE will result in further efficiency.

Global Enrollment System (GES)

CBP has developed GES for all CBP Trusted Traveler Programs (TTP) to be operational on the CBP national network. GES has integrated the independent CBP enrollment and validation processes into a single solution, and it provides a more efficient platform to share data and perform real-time watch list and lookout checks.

GES also reduces the redundancy of maintaining several application processes, and it allows for a quicker and more accurate application process. CBP has developed a single online, paperless application process to support the GES and will allow a traveler to apply to multiple programs online. The on-line application Global On-Line Enrollment System supports all TTP applications.

The program has been used as a basis for cooperation with other nations and other agencies in order to further expedite passenger processing. For example, Global Entry participants can join the Fast Low Risk Universal Crossing program, offered by the Netherlands to provide preferred treatment at the Amsterdam Airport.

The Global Entry user fee is used to support the full cost of the program, including the direct and indirect costs of CBPOs at enrollment centers, the technology required to administer the program, the cost of help desk, the cost of producing the Radio-Frequency Identification (RFID) cards, and the fingerprinting fees charged by the FBI.

C. Budget Request Summary

CBP requests \$91,192,000 in FY 2015 for Global Entry. The budget request is based upon anticipated increase in enrollment of 20 percent in FY 2015. All projections take into account expansion of the Global Entry program and the opening of additional enrollment centers.

As the Global Entry program continues to expand from a successful pilot to a permanent trusted traveler program, CBP continues to increase individual enrollment as well as the number of nations eligible to participate in the program. This has allowed greater numbers of low-risk travelers to efficiently move through security screening and give CBP personnel the ability to put greater focus on higher risk travelers. Due to the successful expansion of Global Entry, an additional \$4,000,000 above the request was provided by Congress to facilitate continued growth of the program and to purchase, deploy, and manage approximately 100 additional kiosks and commence a targeted marketing campaign to further enrollment.

Exhibit 3: Collections by Fiscal Year

Global Entry (GE)	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2014 Base¹	FY 2015 Request	FY 2016 Estimate
GE Collections	\$50,956	\$34,835	\$60,288	\$72,346	\$74,878
F.B.I. Fingerprinting Fee Collections ²	12,970	<i>See footnote below</i>	15,706	18,847	19,507
Total Collections	\$63,926	\$34,835	\$75,994	\$91,192	\$94,385

¹ For the purpose of accuracy, CBP has used the \$75,994,000 base as the comparison in the FY 2014 enacted column in the exhibits throughout this document. The FY 2014 enacted amount for \$34.835 million was a projection made in 2012 for the FY 2014 President's Budget. The Global Entry program has expanded greatly since that time and now also includes collections for the F.B.I. Fingerprinting fees. Thus, CBP used the \$75.994 million as a base for comparison against the FY 2015 Request of \$91.192 million.

² Effective in FY 2013, the FBI fingerprinting fees are now managed under the Global Entry account. The fingerprint component was initially managed under the Land Border account.

FY 2015 Request	Global Entry	51	51	91,192

CURRENT SERVICES PROGRAM DESCRIPTION:

The program authorizes the use of technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. The application fee is set at \$100 per applicant to cover the costs of the program. These items include the costs of CBPOs at the enrollment centers, equipment such as kiosks, software, and help desk support, the cost of producing the RFID cards, and background investigations via an interagency agreement with the FBI.

MAJOR ACQUISITIONS:

CBP Infrastructure is the Information Technology (IT) backbone that supports all of CBP's systems. The systems supported by CBP Infrastructure allow for a unified border presence and provide more efficient and effective information sharing amongst trade and law enforcement agencies. The CBP

Infrastructure Program supports the performance goals in the DHS Strategic Plan specifically by securing and managing our borders, safeguarding and securing cyberspace, and assisting in the collection of customs revenue and enforcement import/export controls.

Infrastructure is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- APHIS \$52.378 million
- COPPS \$141.150 million
- Information Technology \$186.787 million
- Global Entry \$0.003 million
- IUF \$90.121 million

Global Entry User Fees Mission Statement

The Global Entry Program is authorized under the Consolidated Appropriations Act of 2008 (P.L. 110-161) Section 565(3)(A). The Program established an international registered traveler program that incorporated available technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. In addition, Section 565 (3)(B) of the Consolidated Appropriations Act of 2008 authorized the imposition of a fee to recover the full cost of the Program. The current fee rate has been set at \$100 per applicant.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Electronic System for Travel Authorization Fee

I. Appropriation Overview

A. Mission Statement for Electronic System for Travel Authorization Fee

P. L.110-53, or the *Implementing Recommendations of the 9/11 Commission Act of 2007* (or the Act) established an electronic authorization system to pre-screen aliens prior to arrival in the United States. This mandate was made operational by the creation of the Electronic System for Travel Authorization (ESTA). ESTA operates under informed compliance, requiring all Visa Waiver Program travelers to obtain authorization prior to travel. The Visa Waiver Program allows visitors to travel to the U.S. for business or pleasure for 90 days or less without obtaining a visa.

Section 711 (h)(3)(B) of the Act authorizes the Secretary of the Department of Homeland Security (DHS) to establish a fee via regulation to recover the cost of operating and administering ESTA. U.S. Customs & Border Protection (CBP) conducted a fee study and, in August 2010, published the results in an interim final rule. The fee of \$14 is broken into two parts:

1. **Processing Fee:** All applicants requesting an electronic travel authorization are charged \$4.00 for the processing of the application. Revenue from the processing fee is retained by CBP to fund the costs of operating ESTA, largely system and personnel costs. In FY 2015, the CBP budget request for ESTA only includes the processing fee collection.
2. **Surcharge:** If the application is approved and the individual receives authorization to travel to the United States under the Visa Waiver Program, an additional \$10.00 will be charged. If the electronic travel authorization is denied, the individual is only charged for the processing portion of the application, \$4.00. In FY 2015, revenue from the \$10 surcharge is not available for CBP use. This revenue is reserved for the U.S. Travel and Tourism Advisory Board, also known as Brand USA, (under the U.S. Department of Commerce) to enhance the international competitiveness of the U.S. travel and tourism industry and increase its exports. This surcharge is set to expire at the end of FY 2015. The FY 2015 CBP Budget request for ESTA does not include this surcharge collection.

The authorization to travel to the United States is valid for a 2-year period, and travelers pay only once during the 2-year period.

The Budget also reflects a mandatory legislative proposal, which will be sent separately from the Budget, to permanently extend authorization of the travel promotion surcharge and reallocate the revenue collected to support BrandUSA and CBP. Through FY 2015, \$100 million of the total surcharge revenue collected may be used by BrandUSA in support of travel promotion activities. This proposal would extend the authorization, beginning in FY 2016, and reallocate the revenue from the \$10 surcharge with 80 percent directed to BrandUSA and 20 percent to CBP. For FY 2016, total revenue for the \$10 surcharge is estimated to be \$142 million, of which \$114 million will support BrandUSA's efforts to promote international travel to the U.S. thereby increasing U.S. tourism

exports and \$28 million will be provided to CBP to add up to 125 new CBP officers to reduce wait times for travelers entering the U.S.

B. Budget Activities

ESTA collections fund operational costs to administer the ESTA program and maintain information technology (IT) equipment. The costs of the revenue program funds the salaries and benefits of personnel, overtime, and the costs to maintain kiosks and other IT equipment.

The Implementing Recommendations of the 9/11 Commission Act of 2007 (P.L.110-53) required DHS to implement an electronic travel authorization system and other measures to enhance the security of the Visa Waiver Program. ESTA adds a layer of security that allows DHS to determine, in advance of travel, whether an individual is eligible to travel to the United States under the Visa Waiver Program and whether such travel poses a law enforcement or security risk. The following countries participate in the ESTA program:

Exhibit 1: ESTA Locations as of 2013

Andorra	Germany	Lithuania	San Marino
Australia	Greece	Luxembourg	Singapore
Austria	Hungary	Malta	Slovakia
Belgium	Iceland	Monaco	Slovenia
Brunei	Ireland	The Netherlands	Spain
Czech Republic	Italy	New Zealand	Sweden
Denmark	Japan	Norway	Switzerland
Estonia	Latvia	Portugal	Taiwan
Finland	Liechtenstein	Republic of Korea	United Kingdom
France			

Exhibit 2: ESTA Program Activities as of September 30, 2013

ESTA Statistics	
Number of Member Nations	37
Total Number of Visa Waiver Program Applicants since program inception	64.44 million
FY 2013 Compliance Rate	99.59%
FY 2013 Denial Rate	0.37%

C. Budget Request Summary

CBP requests 110 full-time equivalent employees and \$54,929,000 in FY 2015 for ESTA to fund the direct and indirect costs of performing ESTA activities. These costs include, but are not limited to, salaries, benefits, overtime, travel, supplies, and equipment. This estimate is supported by the U.S. Department of Commerce's projection of an increase of 4 percent inbound travel volume in FY 2014 and FY 2015, the fact that Taiwan has been recently added to the Visa Waiver Program, and the possibility of adding to the program. The potential addition of Chile is also in the very near future. When taking international travel projections into account (in addition to the factors mentioned above), CBP projects the following amounts in user fee collections.

Exhibit 3: Estimated Collections

ESTA Collections	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2014¹ Base	FY 2015 Request	FY 2016 Estimate
	\$51,079	\$55,168	\$52,969	\$54,929	\$56,972

Cost Avoidance/Workforce Multiplier Impact

CBP will continue to enhance ESTA, a program that requires all nationals or citizens of Visa Waiver Program countries who plan to travel to the United States for temporary business or pleasure to have an approved ESTA application prior to boarding. The program realized continued savings in CBPO resources in FY 2013. There was a 40 percent increase (9,922 applications) in the denial of ESTA applications in FY 2013 (total 34,958); as a result, CBP did not have to conduct lengthy secondary inspections or process refusals of admission for these individuals. The increased denials resulted in the marginal increase of 19,844 inspectional hours which is equivalent to 17 CBPOs (an aggregate to the 103 CBPOs saved in FY 2012) and \$2.0 million in salaries and expenses. Additionally, it is projected that OFO will benefit from an additional \$3.3 million in cost avoidance through FY 2015 as a result of the ESTA program (33,096 inspection hours equaling 28 CBPO FTEs above FY 2013 savings).

¹The FY 2014 Base is the latest updated projection as of October 2013.

2014 Enacted	110	110	55,168
2015 Adjustments-to-Base	-	-	(239)
2015 Current Services	110	110	54,929
2015 Total Request	110	110	54,929
Total Change 2014 to 2015	-	-	(239)

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP requests 110 full-time equivalent employees and \$54.929 million in FY 2015 for ESTA. The request also includes:

		Positions	FTE	Amount
Base	FY 2014 Enacted	110	110	55,168
Current Services	Decrease in User Fee Collections			(239)
FY 2015 Request	ESTA	110	110	54,929

CURRENT SERVICES PROGRAM DESCRIPTION:

All passengers from countries that are part of the Visa Waiver Program are required to submit an application via ESTA to determine eligibility to travel to the United States. A passenger whose ESTA application has been rejected must apply for a visa before traveling to the United States. ESTA counterbalances vulnerabilities inherent in visa-free travel by adding a layer of advance scrutiny that enables CBP frontline personnel to focus even more on the small population of potentially dangerous travelers.

Electronic System for Travel Authorization Fee Mission Statement

P.L. 110-53, or the *Implementing Recommendations of the 9/11 Commission Act of 2007* (or the Act) established an electronic authorization system to pre-screen aliens prior to arrival in the United States. This mandate was made operational by the creation of the Electronic System for Travel Authorization (ESTA). ESTA operates under informed compliance, requiring all Visa Waiver Program Travelers to obtain authorization prior to travel. The Visa Waiver Program allows visitors to travel to the U.S. for business or pleasure for 90 days or less without obtaining a visa.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection APHIS User Fees

I. Appropriation Overview

A. Mission Statement for APHIS User Fees

Section 2509 of the *Food, Agriculture, Conservation and Trade Act of 1990* (P.L. 101-624) authorized the United States Department of Agriculture (USDA) to collect user fees for various services. The law codified, as 21 U.S.C. 136a, established seven types of Plant Protection and Quarantine (PPQ) user fees, six of which are the Agricultural Quarantine and Inspection (AQI) fees, known as the Animal and Plant Health Inspection Service (APHIS) user fees. These fees are collected to recover the costs of providing inspectional activities for international arrival of passengers, conveyances, animals, plants, and agricultural goods at ports of entry. This authority established fees on five modes of international passenger and conveyance transportation:

1. international air passengers
2. commercial aircraft
3. commercial vessels
4. commercial trucks
5. commercial loaded rail cars

The *Homeland Security Act of 2002* (P.L. 107-296) transferred certain inspection functions from the USDA to the Department of Homeland Security (DHS). The intent of the revenues from these fees is to achieve full cost recovery for the agriculture quarantine inspection (AQI) function. Section 421(f) of the *Homeland Security Act of 2002* mandates that CBP and USDA agree on a periodic transfer of funds from the latter to the former. Under a Memorandum of Agreement between CBP and USDA, CBP receives approximately 60.64 percent of the collections from the APHIS user fee.

In FY 2013, the revenues from the current fee level covered 77 percent of CBP's costs incurred in providing the inspectional activities associated with the passengers and conveyances that are subject to fees. USDA conducted a comprehensive fee review to determine the appropriate fee rates associated with this program and submitted a notice for proposed rulemaking (NPRM) for review. While APHIS controls the release date, the Budget assumes implementation of a final rule by the end of Q1 FY 2015.

Protecting our Homeland, specifically the agricultural health of our nation, is the dual responsibility of APHIS and CBP. This joint responsibility is performed seamlessly, with APHIS responsible for promulgation of rule and regulation and CBP responsible for policy implementation and conducting examinations for AQI operations. CBP Agriculture Specialists, strategically deployed at POEs, are the experts and technical consultants in the areas of

inspection, intelligence, analysis, examination, and law enforcement activities related to the importation of agricultural/commercial commodities and conveyances at the various POEs.

Our critical mission requires application of a wide range of federal, state, and local laws and agency regulations when determining the admissibility of agriculture commodities, while preventing the introduction of harmful plant pests, foreign animal diseases, and potential agro-terrorism into the United States. In addition to CBP's partnership with APHIS, CBP Agriculture Specialists work in tandem with a number of other governmental agencies, including the U.S. Fish and Wildlife Service and the Centers for Disease Control and Prevention, to help prevent the introduction of zoonotic diseases associated with the importation of animals, animal products, and animal by-products. CBP Agriculture Specialists enforce endangered species regulations on plant imports.

The mission of the CBP Agriculture Specialist is vital. The Agriculture industry is the largest employing sector in the U.S. with more than \$1 trillion in economic activity annually. The greatest risks to success of this industry are exotic plant pests and foreign animal diseases. Currently, invasive species cause an estimated \$136 billion in lost agriculture revenue annually.

The fees will be used for international air passenger, commercial aircraft clearance, commercial vessel, commercial truck, and loaded rail car agricultural inspection and AQI regulatory enforcement activities. After implementation of the new fee rule, the revenues from these fees are to be used to partially reimburse the cost incurred in providing agriculture quarantine inspection activities

According to APHIS, if the Mediterranean fruit fly and Asian long horned beetle, two major agricultural pests, were left unchecked, they would result in several billions of dollars in agriculture production loss annually. Similarly, if foot-and-mouth disease or Exotic Newcastle disease were to become established in the United States, foreign trading partners could invoke trade restrictions and producers would suffer devastating losses. In addition to the APHIS contributions to protect the health of U.S. agriculture in the international trade arena, CBP has developed and implemented advanced science-based training programs and interfaced with our importing and trade community to ensure agricultural imports meet stipulated entry requirements.

In FY 2013, CBP Agriculture Specialists seized over 1.6 million prohibited plant and animal products, and intercepted over 161,000 pests that were submitted to USDA for identification.

To highlight the importance of the CBP agriculture mission, one harmful pest intercepted by CBP Agriculture Specialists is the Asian gypsy moth (AGM) (*Lymantria dispar*), named for its home continent. The AGM is a voracious pest of trees that poses a major threat to forest habitats in North America. If established in the United States, each AGM female could lay egg masses that in turn could yield hundreds of voracious caterpillars with appetites for more than 500 species of trees and shrubs. AGM defoliation would severely weaken trees and shrubs, killing them or making them susceptible to diseases and other pests. Caterpillar silk strands, droppings, destroyed leaves, and dead moths would be a nuisance in homes, yards, and parks. In the East, European gypsy moths defoliate an average of about 4 million acres each year, causing

millions of dollars' worth of damage. If AGM were to become established in the United States, the damage could be even more extensive and costly due to the ability of AGM females to fly long distances (up to 25 miles), making it probable that the AGM could quickly infest and spread throughout the United States.

From 2008 to 2013, CBP Agriculture Specialists intercepted live AGM egg masses on 89 vessels, 18 containers, and four steel break bulk shipments, preventing the spread of this invasive, and economical and environmentally catastrophic pest.

CBP Agriculture Specialists require the use of APHIS and CBP databases to record inspectional examination findings and provide agricultural data for risk analysis and operational oversight. Although CBP Agriculture Specialists must input data into both agencies' systems at this time, the Agriculture Programs and Trade Liaison (APTL) office is working on a business transformation initiative to develop an Agriculture Integrated Database Management System to prevent dual input of data and eliminate duplicative efforts, to improve data quality for operational decision making, and to optimize resources.

CBP Agriculture Specialists are professionals on the frontlines of America, protecting agriculture security, and are committed to continued improvement of the APHIS program. Within CBP, the Office of Field Operations, APTL, will be working with the USDA to strengthen the Agriculture Canine Program, to develop a strategic plan for agriculture programs, improve agricultural data integrity and reliability, complete the Agriculture Resource Allocation Model for CBP Agriculture Specialists, and identify additional agriculture related performance measures.

CBP Technicians assist CBP Agriculture Specialists by preparing complex broker-importer cases for decision and by reviewing declaration and cargo manifests. CBP Technicians also support both CBP Agriculture Specialists and CBP Officers (CBPO) in performing primary agriculture inspections and in the inspection, processing, and examination of passengers, baggage, and cargo by operating scanning equipment and processing data into various automated systems.

B. Budget Activities

APHIS fees reimburse the costs of:

- Salaries and benefits, including overtime, for CBP Agriculture Specialists;
- Salaries and benefits, including overtime, for CBPO's performing agriculture inspection services; and,
- Support costs for these staffs including, rent, supplies, equipment, and other contractual services.

Salaries and benefits comprise approximately 96 percent of the obligations in this account. Fee Rates for APHIS are currently set to:

Aircraft Clearance (\$70.75): An APHIS user fee will be charged for each commercial aircraft which is arriving, or which has arrived and is proceeding from one United States airport to

another under a Bureau of Customs and Border Protection “Permit to Proceed.” Each carrier is responsible for paying the APHIS user fee.

Commercial Truck (\$5.25; \$105 annual decal): The driver or other person in charge of a commercial truck that is entering the customs territory of the United States and that is subject to inspection must, upon arrival, proceed to Customs and pay an APHIS user fee for each arrival.

Commercial Vessel (\$496; \$7,440 maximum): The master, licensed deck officer, or purser of any commercial vessel, which is subject to inspection, shall, upon arrival, proceed to Customs and pay an APHIS user fee.

Passenger Commercial Air (\$5.00): Each passenger aboard a commercial aircraft, who is subject to inspection upon arrival from a place outside of the customs territory of the United States, must pay an APHIS user fee.

Railroad Car (\$7.75; \$155 prepaid): An APHIS user fee will be charged for each loaded commercial railroad car which is subject to inspection upon each arrival. The railroad company receiving a commercial railroad car in interchange at a port of entry or, barring interchange, the railroad company moving a commercial railroad car in line haul service into the customs territory of the United States, is responsible for paying the APHIS user fee. If the APHIS user fee is prepaid for all arrivals of a commercial railroad car during a calendar year, the APHIS user fee is an amount 20 times the APHIS user fee for each arrival.

C. Budget Request Summary

In FY 2015, CBP requests 2,956 full-time equivalent employees and \$464,514,000 for APHIS to partially fund the direct and indirect costs of performing the APHIS activities. These costs include, but are not limited to salaries, benefits, overtime, travel, supplies, and equipment costs for CBP Agriculture Specialists, CBPOs, and CBP technicians who perform APHIS-related functions. CBP’s intent is for the full costs of APHIS activities to be recovered through fees and we will continue to work with USDA to ensure that routine reviews are conducted to assess costs against the fee levels.

Future year collections are projected as follows, based upon no change in the current fees and the anticipated transfers from the USDA. All collection estimates for APHIS also take into account future forecasts for international travel and conveyances.

Exhibit 1: Collections by Fiscal Year (In thousands)

APHIS Collections	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2014¹ Base	FY 2015 Request	FY 2016 Estimate
	\$366,370	\$355,216	\$362,526	\$371,814	\$389,850
Fee Increase	N/A	N/A	N/A	\$92,700	\$128,680
Collections with Fee Increase	\$366,370	\$355,216	\$362,526	\$464,514	\$518,530

APHIS fee rates are set by USDA and CBP's share of these fees is determined by a codicil agreement with USDA each year. USDA is required by law to fully recover its costs associated with the APHIS program. CBP typically receives 60 to 63 percent of the total collections. The amount received by CBP does not cover CBP's costs of providing agriculture inspection services.

Greater Cost Recovery due to AQI Fee Increase

CBP anticipates receiving an additional \$92.7 million from APHIS in FY 2015. USDA completed a comprehensive fee study on its fees in FY 2012. In FY 2013, USDA drafted the updated regulation to adjust the user fee rates. At the time of this budget submission, the new regulation has not been published; however, the Budget assumes full implementation will occur by the end of Q1 FY 2015. This \$92.7 million projection is based on that assumption. This increase of \$92.7 million will be used to recoup the full agriculture inspection costs incurred in CBP's S&E, Automation Modernization, and Construction and Facilities Management appropriations in FY 2015. This additional \$92.7 million will allow CBP to recoup approximately \$50.563 million in S&E, \$29.005 million in Automation, and \$13.132 million in the Construction and Facilities Management appropriations.

¹ For the purposes of accuracy, CBP has used the \$362.526 million base as the comparison in the FY 2014 Enacted column in the exhibits throughout this document. The FY 2014 enacted amount for \$355.216 million was a projection made in 2012 for the FY 2014 President's Budget. The FY 2014 USDA and CBP Codicil is set at \$362.526 million. Thus, CBP used the \$362.526 million as a base for comparison against the FY 2015 Request of \$464.514 million.

Exhibit 2: CBP AGI Fee Cost Recovery

	FY 2013²	FY 2014	FY 2015
FY 13 Sequester Transfer	\$16,778	\$0	\$0
Transfers	\$349,591	\$362,526	\$464,514
Total APHIS Collections	\$366,369	\$362,526	\$464,514
Costs	\$454,625	\$479,010	500,127
Deficit	(105,034)	(\$116,484)	(\$35,613)
Cost Recovery	77%	76%	93%

² \$16.8 million additional funding received in FY 2013 for sequester relief. Though received in FY 2013, the \$16.8 million was not executed. The \$16.8 million has been marked as a permanent sequester and is not available to CBP.

FY 2015 Request	APHIS	2,956	2,956	464,154

CURRENT SERVICES PROGRAM DESCRIPTION:

APHIS funds will be used for international air passenger, commercial aircraft clearance, commercial vessel, commercial truck (per crossing and annual decal), and loaded rail car agricultural inspection and enforcement activities. The revenues from these fees are to be used to partially reimburse the cost incurred in providing agriculture inspection activities.

While CBP's top priority for the FY 2015 budget is addressing the gap between current frontline CBP officer staffing and the staffing needs identified by the Workload Staffing Model (WSM), it is recognized that it is unlikely that this gap will be addressed solely through appropriations.

CBP and the USDA completed reviewing existing fee rates in FY 2013. The objective of the review is to ensure that fee rates are set at a level that recovers the full cost of performing agriculture inspection

services. After a comprehensive review of program resource requirements, USDA drafted and will publish a NPRM regarding the user fee rates. Rate adjustments for the APHIS fees are set in regulation and do not require legislative language, but CBP's WSM takes a comprehensive review of staffing requirements and the APHIS fee adjustments will be important to ensure sustainability of agriculture inspection services in the future.

MAJOR ACQUISITIONS:

Infrastructure

CBP Infrastructure is the Information Technology (IT) backbone that supports all of CBP's systems. The systems supported by CBP Infrastructure allow for a unified border presence and provide more efficient and effective information sharing amongst trade and law enforcement agencies. The CBP Infrastructure Program supports the performance goals in the DHS Strategic Plan specifically by securing and managing our borders, safeguarding and securing cyberspace, and assisting in the collection of customs revenue and enforcement import/export controls. The Infrastructure Program has implemented data center modernization to improve performance and increases reliability and bandwidth expansion and the modernization of routers and switches to enhance network availability and improve CBP's security posture.

Infrastructure is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- APHIS → \$52.378 million
- COPPS → \$141.150 million
- Information Technology→ \$186.787 million
- Global Entry → \$0.003 million
- IUF → \$90.121 million

OFO Facilities

OFO Facilities is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- APHIS → \$26.052 million
- Facilities Program Management → \$30.142 million
- Facilities, Construction, & Sustainment→ \$236.945 million
- IUF → \$10.046 million
- Rent → \$192.409 million

APHIS User Fees Mission Statement

Section 2509 of the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorized USAD to collect user fees for various services. The law codified as 21 U.S.C. 136 established seven types of Plant Protection and Quarantine (PPQ) user fees, six of which are the Agricultural Quarantine and Inspection (AQI) fees, known to CBP as the APHIS user fees. The six established processing fees are for international air passengers, commercial aircraft clearance, commercial vessels, commercial trucks, commercial truck decals, and loaded rail cars. The revenues from these fees are used to reimburse 77 percent of the costs incurred in providing the inspectional activities associated with the passengers and conveyances that are subject to fees.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Puerto Rico Trust Fund

I. Appropriation Overview

A. Mission Statement for the Puerto Rico Trust Fund

The Puerto Rico Trust Fund (PRTF) is established by 48 U.S.C. § 740, which states, in pertinent part: “The duties and taxes collected in Puerto Rico...less the cost of collecting the same shall be paid into the Treasury of Puerto Rico to be expended as required by law for the government and benefit thereof.” As per this primary statute, U.S. Customs and Border Protection (CBP) acts as Puerto Rico’s sole customs service. CBP and the Homeland Security Investigation (HSI) directorate of U.S. Immigration and Customs Enforcement (ICE) also perform investigative law enforcement activities under statute, 48 U.S.C. § 1469c. This secondary statute provides any U.S. government agency or instrumentality the authority to provide additional services to Puerto Rico, at the Government of Puerto Rico’s behest, on a reimbursable basis.

The primary mission of Customs and Border Protection officers (CBPOs) is to screen all people, vehicles, and goods entering the United States, while facilitating the flow of legitimate trade and travel into and out of the United States. Their mission also includes carrying out traditional border-related responsibilities, including narcotics interdiction, enforcing immigration law, protecting the nation’s food supply and agriculture industry from pests and diseases, and enforcing trade laws.

Collections in Puerto Rico, less the costs of collecting duties and taxes, are transferred to Puerto Rico’s Treasury (Hacienda) to be expended as required by law for the Government of Puerto Rico. CBP continues to focus on its agricultural, immigration, and counter-terrorism missions in Puerto Rico. These additional expenses, as well as overtime, are reimbursed with their respective Consolidated Omnibus Budget Reconciliation Act user fees, Immigration Inspection User Fees, and Agriculture Quarantine and Inspection user fees.

B. Budget Activities

CBP administers the PRTF and retains a portion of the funds to pay for expenses associated with the CBP mission in Puerto Rico. CBP annually transfers funding from PRTF to ICE for investigative and enforcement duties it performs in Puerto Rico. The reimbursement from the PRTF to ICE is based on a biennial agreement negotiated with the Government of Puerto Rico. This transfer, however, is subject to the availability of funds in the PRTF. PRTF funding is used to support the following component agencies within DHS: CBP Office of Field Operations, CBP Office of Information and Technology, CBP Office of Air and Marine, and the U.S. Immigration and Customs Enforcement Homeland Security Investigations directorate. The remaining balances in excess of eligible expenses are remitted to the Government of Puerto Rico.

For CBP, most of the PRTF collections support the costs of performing collection and inspection duties in Puerto Rico. This includes the salaries and benefits of personnel, contractual services, information technology, equipment, and technical support.

C. Budget Request Summary

CBP requests 292 full-time equivalent employees and \$98,076,000 in actual collections in Fiscal Year 2015 for the PRTF. These projections are based upon multiple factors underlying the economy of Puerto Rico.

In FY 2013, an importer in Puerto Rico disputed duties collected by CBP at the Court of International Trade. The disputed duties are being recognized as contingencies in the event they must be paid out to the importer following the dispute. This is in compliance with the Statement of Federal Financial Accounting Standards which requires federal agencies to recognize any future cash outflow which is likely to occur and is measurable as a contingent liability. CBP is closely monitoring the disputed duty collection activity in FY 2014 and will continue to update collection projection as amounts materialize.

Table 1: Collections by Fiscal Year (In thousands)¹

PRTF	FY 2013 Revised*	FY 2014 Enacted	FY 2014** Base	FY 2015 Request	FY 2016 Estimate
Collections	\$254,086	\$98,602	\$97,589	\$98,076	\$98,096

*Includes \$56 million in accounts payable.

**Collections do not include contingent liabilities.

Estimating and allocating collections from the PRTF:

CBP uses trend analysis in conjunction with economic indicators to forecast collections. Trend analysis is principally used to determine the periods within the fiscal year where travel volumes are affected by seasonal changes. In developing forecasts, CBP uses numerous sources, and focuses mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. Gross Domestic Product and anticipated economic vitality of a region are two factors that are considered in great detail.

PRTF collections are monitored monthly and adjusted as economic indicators are reviewed. Travel initiatives such as the *Travel Promotion Act of 2009*, the American Express endorsement of the Global Entry Program, and free trade agreements such as those with Colombia, Panama, and Korea will be studied independently throughout the year to address the impact to global trade and travel. In addition, the unemployment rate and inflation are taken into consideration to determine to what extent these factors might have on the forecast process.

¹ The FY 2014 Base is the latest updated projection as of October 2013.

Puerto Rico Trust Fund Mission Statement

The duties and taxes related to the Puerto Rico Trust Fund are authorized under Title 48 U.S.C. § 740. The duties and taxes collected in Puerto Rico, less the costs of providing inspection and law enforcement services, are paid into the treasury of Puerto Rico, to be expended as required by law for the Government of Puerto Rico and the benefit thereof. These funds are intended to combat criminal elements that have focused on Puerto Rico as a gateway to illegally introduce narcotics into the mainland of the U.S.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Virgin Islands Fees

I. Appropriation Overview

A. Mission Statement for the Virgin Islands Deposit Fund

The United States Virgin Islands (USVI) is an unincorporated territory of the United States. The unincorporated status establishes the USVI as outside of the more specific customs territory of U.S. Section 36 of the *1936 Organic Act*, codified as 48 U.S.C. § 1406i. This Act gives U.S. Customs and Border Protection (CBP) the authority to collect duties and taxes levied by the USVI Legislature that are deposited into the Virgin Islands Deposit Fund (VIDF) for use as revenue for the USVI. Under 19 U.S.C. § 1469c, CBP may also provide reimbursable services to the USVI at the USVI's behest. This reimbursable arrangement is denoted in a 1994 Memorandum of Agreement (MOA), which outlines the services provided by CBP and the funding sources to be used in their execution. Per these two statutes, CBP deducts the costs of collection and other agreed upon services in the 1994 MOA from the VIDF, and then remits the remaining funds to the USVI.

The primary mission of Customs and Border Protection officers (CBPOs) is to screen all people, vehicles, and goods entering the United States, while facilitating the flow of legitimate trade and travel into and out of the United States. Their mission also includes carrying out traditional border-related responsibilities, including narcotics interdiction, enforcing immigration laws, protecting the nation's food supply and agriculture industry from pests and diseases, and enforcing trade laws.

The VIDF funds the costs of pre-inspection services and the inspection of passengers departing to the continental United States. CBP's presence in the USVI, however, is not unlike that of any other U.S. port of entry. Specifically, CBP focuses on intercepting illegal immigrants and combating criminal elements that have focused on the USVI as a gateway to illegally introduce narcotics into the U.S. mainland. CBP continues to focus on its agricultural, immigration, and counter-terrorism missions in the USVI. These additional expenses are reimbursed with their respective Immigration Inspection User Fee and Agriculture Quarantine and Inspection user fee sources.

B. Budget Activities

CBP collects duties and taxes in the USVI on behalf of the Government of the USVI; the revenue is used to reimburse the Office of Field Operations for the costs incurred to perform pre-inspection services and the inspection of passengers departing to the continental United States. In addition, VIDF funding is considered part of CBP's reimbursable program, thus it is not included as part of the Budget's appendix.

For CBP, the costs of performing duty collection and passenger inspection in the USVI include the salaries and benefits of personnel, contractual services, information technology, equipment, and technical support. After the cost of CBP operations are taken into consideration, any remaining or unused funds in the VIDF must be remitted to the Government of the USVI.

C. Budget Request Summary

CBP requests 61 full-time equivalent employees and \$11,789,000 in FY 2015 for the VIDF. This estimate is for USVI customs duties charged on goods imported from within U.S. customs territory.

Exhibit 1: Collections by Fiscal Year (In thousands)

VIDF Collections	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2014¹ Base	FY 2015 Request	FY 2016 Estimate
	\$11,672	\$11,302	\$11,730	\$11,789	\$11,791

Estimating and allocating collections in the Virgin Islands

CBP uses trend analysis in conjunction with economic indicators to forecast collections. Trend analysis is principally used to determine the periods within the fiscal year where travel volumes are affected by seasonal fluctuations. In developing forecasts, CBP uses numerous sources and focuses mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. Gross Domestic Product and anticipated economic vitality of a region are two factors that are considered in great detail.

The unexpected closure of the Hovensa refinery proved to have a permanent impact on the economy of the USVI. It is expected that this will have a negative impact to the USVI both in tourism and trade. Over 2,000 direct and indirect jobs are expected to be affected and will potentially reverse any anticipated growth in the region for some time.

¹ The FY 2014 Base is the latest updated projection as of October 2013.

Virgin Islands Fees Mission Statement

The United States Virgin Islands (USVI) are a territory of the United States, but are considered an independent customs territory. Section 36 of *the 1936 Organic Act*, codified as 48 U.S.C. § 1406i, gives Customs and Border Protection (CBP) the ability to administer USVI fees at its own discretion. CBP may also provide reimbursable services to the USVI under 19 U.S.C. § 1469c. The reimbursable arrangement is denoted in the 1994 Memorandum of Agreement, which outlines the duties provided by CBP and the funding sources to be used in the execution of those duties. The USVI fee collections fund the costs of customs services and the inspection of passengers departing to the continental United States. CBP's presence in the USVI is to intercept illegal immigrants and to combat criminal elements that have focused on the USVI as a gateway to illegally introduce narcotics into the U.S. mainland. CBP continues to focus on agricultural inspections and counter-terrorism in the USVI as well.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	3,670	3,554	3,707	153
11.3 Other than Full-Time Permanent	29	28	29	1
11.5 Other Personnel Compensation	2,125	2,057	2,147	90
12.1 Civilian Personnel Benefits	3,320	3,215	3,354	139
Total, Salaries & Benefits	9,144	8,854	9,237	383

In 2015, an increase of \$383,000 is for anticipated changes in user fee collections.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$64	\$62	\$65	\$3

In 2015, an increase of \$3,000 is for anticipated changes in user fee collections.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$515	\$499	\$520	\$21

In 2015, an increase of \$21,000 is for anticipated changes in user fee collections.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$152	\$147	\$153	\$6

In 2015, an increase of \$6,000 is for anticipated changes in user fee collections.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$923	\$894	\$932	\$38

In 2015, an increase of \$38,000 is for anticipated changes in user fee collections.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$643	\$622	\$649	\$27

In 2015, an increase of \$27,000 is for anticipated changes in user fee collections.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$137	\$133	\$138	\$5

In 2015, an increase of \$5,000 is for anticipated changes in user fee collections.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$88	\$85	\$89	\$4

In 2015, an increase of \$4,000 is for anticipated changes in user fee collections.

Automation Modernization	-	-	31,223	-	-	34,900	-	-	26,000	-	-	(8,900)	-	-	26,000	-	-	(34,900)
Construction	-	-	4,993	-	-	5,000	-	-	-	-	-	(5,000)	-	-	-	-	-	(5,000)
Breached Bond Detention Fund	-	-	71,152	-	-	65,000	-	-	65,000	-	-	-	-	-	-	-	-	-
Student Exchange and Visitor Program	387	278	130,843	387	355	145,000	387	355	145,000	-	-	-	-	-	-	-	-	-
Immigration Inspection User Fees	-	-	236,773	-	-	135,000	-	-	135,000	-	-	-	-	-	-	-	-	-
Subtotal, Enacted Appropriations and Budget Estimates	22,021	19,769	5,627,660	20,960	19,332	5,614,361	20,972	19,374	5,359,065	12	42	(255,296)	12	6	(149,815)	-	36	(105,481)
Less: Rescissions			(6,776)			(3,698)												
Net, Enacted Appropriations and Budget Estimates:	22,021	19,769	5,620,884	20,960	19,332	5,610,663	20,972	19,374	5,359,065	12	42	(255,296)	12	6	(149,815)	-	36	(105,481)

1/ The FY 2013 Revised Enacted amount for the Salaries and Expenses appropriation includes a transfer of \$43,904,763, which was approved on June 13, 2013.

2/The funding level displayed in the FY 2013 Revised Enacted column for Breached Bond differs from the amount reported in the FY 2015 President's Budget Appendix and DHS's financial statements. The FY 2013 Revised Enacted includes spending authority for Breached Bond, while the President's Budget Appendix reflects collections made by ICE in FY 2013 (not including the first \$8 million provided to the General Fund).

3/The funding level displayed in the FY 2013 Revised Enacted column for Immigration Inspection User Fees differs from the FY 2015 President's Budget Appendix. The funding level displayed includes additional congressionally-approved spending authority from prior-year balances, authorized on June 13, 2013.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**U.S. Immigration and Customs Enforcement
Salaries and Expenses**

I. Appropriation Overview

A. Mission Statement for Salaries and Expenses:

Programs funded through the Salaries and Expenses account contribute to the U.S. Immigration and Customs Enforcement (ICE) mission of bringing a unified and coordinated focus to the enforcement of federal immigration and customs laws. ICE uses the resources in Salaries and Expenses to enforce immigration and customs laws by investigating, detaining, and prosecuting criminals and aliens who pose a risk to national security and public safety.

B. Budget Activities:

Management and Administration

Management and Administration (M&A) provides a range of mission and operational support for ICE. M&A oversees ICE's budget, expenditures, accounting, finance, and procurement. M&A is responsible for all human resources services, workforce recruitment, equal employment opportunity, and training for all employees and special agents. M&A oversees all information technology systems, facilities, and property and equipment, as well as the Office of Firearms & Tactical Programs (OFTP), formerly known as the National Firearms and Tactical Training Unit (NFTTU), which ensures that ICE, U.S. Customs and Border Protection (CBP), and the Federal Protective Service (FPS) have the necessary firearm, protective equipment and training to carry out their missions. In addition, M&A identifies and tracks the agency's performance measurements to ensure that ICE meets its priorities, missions, and goals.

Legal Proceedings

The Office of the Principal Legal Advisor (OPLA) provides the legal advice, training, and services required to support the ICE mission. As the legal representative for the United States Government at immigration court hearings, OPLA attorneys handle a variety of immigration-related issues that range from contested removals to custody determinations and applications for administrative relief. Additionally, OPLA provides legal advice in customs-related enforcement actions, represents the Government in Merit System Protection Board and Equal Employment Opportunity hearings, provides ethics advice, and handles matters involving commercial and administrative law.

Homeland Security Investigations

Homeland Security Investigations (HSI) is responsible for disrupting and dismantling transnational criminal organizations engaged in smuggling and other cross-border criminal

activities that seek to exploit America's legitimate travel, trade, financial and Immigration systems for illicit purposes. HSI is comprised of three Program/Project Activities (PPA):

Domestic Investigations

Domestic Investigations enforces trade and immigration laws through the investigation of activities, persons, and events that may pose a threat to the safety or security of the United States and its people. The program also investigates illegal trafficking in weapons (including weapons of mass destruction), the smuggling of narcotics and other contraband, human smuggling and trafficking, money laundering and other financial crimes, fraudulent trade practices, identity and benefit fraud, child exploitation, and health and public safety dangers.

International Affairs (OIA)

OIA represents the Department of Homeland Security's (DHS) largest investigative law enforcement presence abroad and helps protect the Nation beyond its borders with 75 offices in 48 countries. Through International Investigations and its Visa Security Program (VSP), OIA works with foreign counterparts to identify and combat criminal organizations before they can adversely impact the United States.

Intelligence

The Office of Intelligence develops, processes, analyzes, and disseminates relevant information and intelligence needed to support executive management and investigative units. Information is gathered to identify threats, patterns, trends, methods, and organizations related to transnational crimes. This information supports law enforcement efforts and investigations across ICE, DHS and many levels of government.

Enforcement and Removal Operations

Enforcement and Removal Operations (ERO) is responsible for enforcing our Nation's immigration laws by identifying and apprehending removable aliens, detaining these individuals when necessary, and removing them from the United States. ERO is comprised of five PPAs:

Custody Operations Program – Custody Operations provides safe, secure, and humane detention of removable aliens who are held in government custody because they present a risk of flight, a risk to public safety, or are subject to mandatory detention. ICE carefully monitors which aliens are detained to ensure its detention space is used to best support border security and public safety.

Fugitive Operations Program – Fugitive Operations locates and apprehends fugitive aliens in the United States. ICE strives to identify and apprehend all fugitives, with an emphasis on those aliens posing the greatest risk to public safety. This creates a deterrent to potential absconders and promotes the integrity of the immigration process.

Criminal Alien Program (CAP) – CAP identifies criminal aliens incarcerated within federal, state, and local correctional facilities. To ensure that these criminal aliens are removed rather than released into the community, ICE strives to secure a final order of removal prior to the termination of their sentences. Upon completion of their criminal sentences, aliens are transferred into ICE custody to be removed from the United States. CAP is also responsible for the day-to-day management of IDENT/IAFIS interoperability (Secure Communities), previously managed by Comprehensive Identification and Removal of Criminal Aliens (CIRCA) program.

Alternatives to Detention Program (ATD) – ATD places lower-risk aliens under various forms of intensive supervision or electronic monitoring rather than in detention. These systems can be a cost-effective way to ensure individuals’ appearances for immigration hearings and for removal. This program also significantly lowers the risk that aliens ordered removed will become fugitives.

Transportation and Removal Program (TRP) – TRP provides for the safe and secure transportation of aliens in ICE custody and the removal of aliens from the United States.

C. Budget Request Summary:

ICE requests \$4,988,065,000, 20,585 positions, and 19,019 full-time equivalents (FTE) in Fiscal Year (FY) 2015 for the Salaries and Expenses appropriation.

Program Change Requests

ICE requests program changes for the Salaries and Expenses appropriation in the following key areas:

- **FOIA Analyst Enhancement.....\$964,000 6 FTE**
This request will provide ICE with 12 additional full-time personnel, to process the current and projected workload of Freedom of Information Act (FOIA) requests in 2015.
- **CBP to ICE Detainee Transfer.....\$2.5M 0 FTE**
This request will allow ICE to further expedite the transfer of CBP apprehended and detained individuals in high volume areas, such as the Southwest border, to ICE’s custody.
- **Detention Reform Outreach.....\$1.42M 0 FTE**
This request will allow ICE to continue its development and provision of training and stakeholder outreach related to the Prison Rape Elimination Act (PREA) and subsequent guidance, the application of Performance Based National Detention Standards (PBNDS) at detention facilities, the use of segregation and applicable guidance, and other Administration detention reform initiatives.

- **Fugitive Operations Increase.....\$1.83M 0 FTE**
This request will allow ICE to undertake 589 additional immigration enforcement priorities or highest-threat cases from the fugitive backlog list.
- **Criminal History Information Sharing Program.....\$600,000 0 FTE**
This request will allow ICE to expand its Criminal History Information System (CHIS) and provide its foreign partners in the Caribbean and Central America with valuable information on criminal convictions on foreign nationals before their removal from the United States.
- **Efficiencies in Detention and Alternatives to Detention.....(\$183.1M) (0 FTE)**
This request provides funding for an average daily detention bed level of 30,539 at a rate of \$119 per day. This level is sufficient to detain those whose detention is required by law (i.e., “mandatory detainees”) and higher priority aliens, including those individuals who pose a danger to national security or a risk to public safety, including aliens convicted of crimes, with particular emphasis on violent criminals, felons, and repeat offenders. Lower-risk, non-mandatory aliens who otherwise would have been detained only to satisfy a higher mandated average daily detention level will be placed in the ATD program.

D: Efficiencies and Reductions

Advisory and Assistance Services Efficiencies

(\$38.3) million

Detention Bed and Healthcare Savings (\$18.3 million) ICE will achieve savings of \$18.3 million in FY 2015 by bringing contract guard staffing levels at Service Processing Centers (SPC) in line with nationwide detention standards.

Administrative Savings and Servicewide Reductions (\$20.0 million) ICE has identified efficiencies in information technology (IT) spending that will achieve \$20.0 million of net savings in FY 2015. These savings will be achieved through elimination of several IT contracts and contractor conversions in the Office of the Chief Information Officer (OCIO), resulting in lower IT costs for all ICE programs.

2015 Program Change	12	6	964
2015 Total Request	1,662	1,484	198,602
Total Change 2014 to 2015	12	6	6,693

CURRENT SERVICES PROGRAM DESCRIPTION:

The four offices within Personnel Compensation and Benefits, Service, and Other Costs (PC&B) - Office of the Assistant Secretary (OAS), the Office of Professional Responsibility (OPR), the Office of the Chief Financial Officer (OCFO) and the Office of Acquisition Management (OAQ) - lead ICE-wide initiatives to ensure the effective stewardship of public funds; the integrity of the workforce; and enterprise-wide strategic management.

FY 2015 Request

In FY 2015, ICE requests \$198.6 million, 1,662 positions, and 1,484 FTE for PC&B. The FY 2015 request reflects an increase of \$6.7 million from the FY 2014 Enacted amount. The FY 2015 request, as compared to FY 2014, includes:

- Increase of \$1.6 million for pay inflation;
- Increase of \$3.2 million for agency FERS contributions;
- Increase of \$875 thousand for a GSA rent increase;
- Increase of \$825 thousand for maintenance and repair at ICE-leased facilities;
- Increase of \$144 thousand for fleet recapitalization;

- Increase of \$723 thousand as an adjustment to ICE's Working Capital Fund assessment to fund to following activities: Treasury Information Executive Repository (TIER), Transit Subsidy, HSPD-12, Financial Statement Audit, Internal Control Audit, and Enterprise Licenses Agreements;
- Increase of \$964 thousand for 12 additional FOIA personnel (described in more detail in the programmatic change section); and
- Decrease of \$1.7 million for cost savings associated with reduced IT contracts;

In FY 2015, the PC&B offices will spend \$152.8 million on salaries and benefits, and \$45.8 million on general expenses to support the ICE operational programs. This includes purchasing law enforcement equipment, providing basic and advanced training to HSI special agents and ERO officers, processing FOIA requests, investigating allegations of misconduct involving employees of ICE and CBP, and overseeing physical and operational security for ICE employees and facilities.

Description

The Office of the Assistant Secretary

The OAS directs the planning and execution of the agency's objectives outlined in the ICE strategic plan. This includes both operational and management support to meet the day-to-day organizational needs, as well as long-term agency goals. The operational support areas provide leadership and the coordination of all of ICE's operational components, address operational challenges, and support ICE's continued

OFTP provided armory services (firearms and ammunition) to over 62,000 DHS agents and officers.

growth and development as a premier law enforcement agency. The management support areas provide coordination for the administrative and managerial components of ICE. Offices that comprise the OAS are responsible for human capital,

congressional relations, public affairs, policy, diversity and civil rights, training and development, FOIA activities, privacy, and firearms and tactical training run by the OFTP.

The Office of Professional Responsibility

OPR investigates allegations of both criminal and administrative misconduct involving employees and contractors of ICE and CBP. OPR conducts independent inspections of ICE offices, operations, and processes to review the agency's organizational health, effectiveness, and efficiency. OPR manages the Personnel Security

OPR implemented a tracking process for detention-related allegations. Information obtained through this process is used to better inform ICE leadership of trends, patterns, analysis and oversight at specific detention facilities.

Unit, which ensures that all ICE applicants are properly screened prior to entering on duty, and the Security Management Unit, which oversees physical, communication and operational security for ICE employees and facilities. In addition, the OPR Office of Detention and Oversight investigates all allegations of detainee abuse and/or detainee deaths referred by DHS, the Office of Civil Rights and Civil Liberties (CRCL), and the Joint Intake Center.

OHSR Alignment

3.2 Prevent Unlawful Immigration

2.3 Disrupt and Dismantle Transnational Criminal Organizations

1.1 Prevent Terrorist Attacks

ICE Strategic Plan Alignment

4.4 Use Resources Wisely

The Office of the Chief Financial Officer

OCFO manages ICE's financial and physical assets, promotes integrity and accountability, delivers financial management services, provides facilities and property management services, and manages the development, execution and monitoring of sound performance-based budgets. In FY 2015 ICE has requested multi-year funds to maintain, construct and perform lease hold improvements at ICE owned or leased facilities. With these funds, ICE will reduce facility related costs by increasing the accuracy of obligations and decreasing the risk of lapsed funding. This will be accomplished by obligating design costs in the first year. ICE will have more accurate estimates of the project cost after receiving the design documents. With the flexibility of multiyear money, ICE can then obligate the construction costs with more accuracy. This normally takes place after the first year of the project.

OCFO maintains a funds control policy and budget execution handbook for all ICE programs and continues to advance the accuracy and sophistication of its managerial cost accounting model, which is compliant with Federal Accounting Standards Advisory Board (FASAB) standards. Additionally OCFO manages all audits for ICE and is leading the transition from the legacy ICE financial management system to a Shared Service Provider (SSP). OCFO also completed a study of the detention bed sourcing process to improve the cost-effectiveness of bed space operations and understand ICE's exposure to contingent liabilities. The project will result in an analysis of alternatives for detention space sourcing strategies by evaluating cost, risk, and implementation feasibility.

The Office of Acquisition Management (OAQ)

In FY 2013, OAQ awarded 10,784 contract actions valued at \$2.33 billion.

OAQ is a customer-focused organization with an enterprise-wide, strategic approach to procurement. OAQ leads ICE's effort to strategically source major contracts, including detention beds and transportation. OAQ also operates as a full business partner with internal and external organizations and serves as a strategic asset dedicated to improving the agency's overall business performance.

FY 2015 Planned Activities

In FY 2015, ICE will:

- Conduct the Train-the Trainer instructor certification courses that consist of 89 weeks, 445 days, totaling 3,560 hours of training. Through these courses, ICE law enforcement personnel are taught the skills needed to provide firearms and use of force instruction to law enforcement personnel in the field, administer the quarterly demonstration of proficiency requirements, and manage the inventory of sensitive property such as firearms, ammunition, and intermediate force weapons.
- Provide 21 weeks, of tactical team training. Tactical team training includes initial and specialized follow-on training for ICE Special Response Teams (SRTs).
- Process approximately 52,000 FOIA requests when including the additional six FTEs.
- Investigate allegations of criminal conduct involving ICE, CBP and United States Citizen and Immigrations Services (USCIS) employees and enhance collaboration with DHS Office of

Inspector General (OIG) and CBP International Affairs (IA) counterparts for a more efficient use of investigative resources.

- Continue efforts to find efficiencies in the delivery of mission support services to ICE by consolidating mission support functions to maximize limited resources and implement process improvements.
- Develop an acquisition governance policy to ensure adequate oversight of major acquisition programs and consolidation of enterprise requirements.
- Implement ICE-wide workforce and succession planning strategies/processes to ensure ICE has a sufficient talent pool of future leaders and bench strength needed for future mission success.
- Focus on improving internal controls over financial reporting and operations by expanding upon the agency risk assessment to identify risks early and implement corrective action before they become audit findings.
- Conduct analysis with SSP to define gaps in people, process, system capabilities between consolidated requirements and the service provider offerings.
- Use a risk-based approach to inspect detention facilities, including for non-compliance with ICE detention standards and promptly investigate all detainee allegations related to these standards.
- Continue to conduct compliance inspections for 287(g) Agreement activities.

Total Change 2014 to 2015	-	-	7,119

CURRENT SERVICES PROGRAM DESCRIPTION:

The OCIO, within the Headquarters Managed Information Technology Investment (HMITI) program, provides IT services and products that enable ICE and other DHS components to meet their respective missions. In FY 2013, OCIO supported over 30 planned application releases, completed the successful migration of 2,225 email boxes and 904 blackberry devices for Federal Protective Service (FPS) users from the ICE e-mail to the DHS e-mail, and deployed 12,772 replacement Smart Phone/Devices.

FY 2015 Request

In FY 2015, ICE requests \$150.9 million, 391 positions and 331 FTEs for the OCIO HMITI program to provide IT infrastructure and support to over 19,000 ICE personnel in 818 locations.

The FY 2015 request reflects an increase of \$7.1 million from the FY 2014 Enacted amount. The FY 2015 request, as compared to FY 2014, includes:

- Increase of \$508 thousand for pay inflation;
- Increase of \$340 thousand for a GSA rent increase;
- Increase of \$89 thousand for maintenance and repair at ICE-leased facilities;
- Increase of \$696 thousand for agency FERS contributions;
- Increase of \$8.0 million for IT contractor conversions, resulting in a net \$20 million cost savings across ICE; and
- Decrease of \$2.5 million from termination of one-time costs.

In FY 2015, OCIO HMITI will spend \$56 million on salaries and benefits, and \$94.9 million to develop new IT solutions, purchase equipment, and provide maintenance and oversight to the existing IT infrastructure.

Description

OCIO operates around the clock seven days a week to meet the mission needs of ICE's 19,000 employees, including over 14,000 law-enforcement agents and officers, across the United States and around the world. OCIO delivers the services, tools, and capabilities that ICE users depend on every day to enforce our nation's laws. Through this program, OCIO:

- **Connects users to systems, law-enforcement partners, and each other:** OCIO provides continual support for the ICE agency wide-area, local-area, and wireless networks that ICE users rely on to access computer systems and share information with our federal, state, local and tribal law-enforcement partners. OCIO also provides full operational support for voice communications systems and video conferencing systems.
- **Delivers the data and the systems ICE users require to do their job:** ICE users access mission-critical IT systems and data every day. The HMITI program enables OCIO to manage and operate the infrastructure required to deliver the data and systems. OCIO provides web-hosting environments, manages the data center environment, and provides data management to store, transmit, retrieve, and present the data that powers the ICE mission.
- **Deploys, maintains, and secures IT infrastructure:** The HMITI program provides OCIO with the resources to deliver secure end-to-end support to end-users. OCIO regularly refreshes computers and hardware, file and print servers, local area networks, cables, and switches.
- **Delivers technology strategic direction, standards and compliance principles:** OCIO assess all new ICE IT requirements and emerging technologies to deliver cost-effective and mission aligned tools and services. The HMITI program also manages the ICE IT Enterprise Architecture, Research and Development, engineering standards for the ICE IT Infrastructure enterprise and standardizes portfolio, program, and project oversight and reporting.

QHSR Alignment

4.1 Create a Safe, Secure, and Resilient Cyber Environment

3.2 Prevent Unlawful Immigration

2.3 Disrupt and Dismantle Transnational Criminal Organizations

1.1 Prevent Terrorist Attacks

ICE Strategic Plan Alignment

3.1 Detaining and Removing Aliens Seeking Illegal Entry

FY 2015 Planned Activities

In FY 2015, ICE will:

- Begin tactical communication upgrades for ICE Southwest Border operational regions (San Antonio, Houston, El Paso, and Phoenix). This will allow ICE to upgrade its current radios – which are outdated – to new digital P25 equipment. Radio infrastructure will be upgraded to

support the new equipment. Providing upgraded radio equipment and infrastructure significantly enhances officer safety in the field.

- Complete LAN upgrades for 825 ICE switches that would bring ICE into compliance with Internet Protocol version 6 (IPv6), an internet standard that delivers greater security and operational efficiency.
- Reorganize OCIO to streamline and consolidate resources and improve delivery of product and customer service. This new structure will allow ICE to proactively plan IT needs, and focus on core IT mission-support requirements, mission-critical systems, and DHS High Priority Initiatives that will enhance officer safety and apprehension of criminals. With this reorganization, OCIO expects to be able to realize over \$20 million in anticipated contract labor-hour reductions.
- Implement remote access and data-at-rest encryption using a Personal Identity Verification (PIV) card. PIV cards access will make ICE systems safer by enabling two authentication factors, which strengthen ICE network and equipment security. This effort helps ICE meet the goals of Homeland Security Presidential Directive-12 (HSPD-12).
- Provide the delivery of IT equipment and services to the 36 state and local law enforcement entities participating in the 287(g) program.

Procurement Activities

IT Infrastructure (Atlas)

The IT Infrastructure Program enhances ICE's technology foundation, maximizes workforce productivity, secures the IT environment, and improves information sharing. It consists of the architectural design, acquisition, integration, operations and maintenance of the ICE IT foundation. It supports the agency wide-area, local-area, and wireless networks, voice communications systems, web-hosting environment, data center infrastructure, database management, tactical communications, and all associated infrastructure. The investment delivers IT products and services that provide systems availability required to enable ICE and DHS to achieve the mission. Beneficiaries include all of the ICE user community and ICE's partners in federal, state and local law enforcement.

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)

CURRENT SERVICES PROGRAM DESCRIPTION:

OPLA is the largest legal program in DHS and the exclusive legal representative for the U.S. government in exclusion, deportation, and removal proceedings before the Department of Justice's Executive Office for Immigration Review (EOIR). OPLA provides legal advice, support and training to all ICE components. ICE has assigned attorneys full-time to work at the U.S. Attorneys Offices (USAO) as Special Assistant U.S. Attorneys (SAUSA). These attorneys prosecute criminal immigration and customs cases in federal court.

In FY 2013, OPLA established its first comprehensive performance management framework. The objective of the performance management framework is to enable OPLA to capture, quantify, and justify its resource requirements by connecting OPLA's budget and staffing alignment with its operational outputs and performance measures. This will help to ensure that OPLA is appropriately staffed, and that the staff is in the correct operational divisions within OPLA.

FY 2015 Request

In FY 2015, ICE requests \$214.7 million, 1,272 positions, and 1,218 FTEs for OPLA. The FY 2015 request reflects an increase of \$9.1 million from the FY 2014 Enacted amount. The FY 2015 request as compared with FY 2014 includes:

- Increase of \$1.8 million for pay inflation;
- Increase of \$3 million for agency FERS contributions;
- Increase of \$1.1 million for a GSA rent increase;
- Increase of \$471 thousand for maintenance and repair at ICE-leased facilities;
- Increase of \$17 thousand for fleet recapitalization;
- Increase of \$5.5 million for prior year enhancement;
- Decrease of \$1.9 million for cost savings associated with IT contractor conversions; and
- Decrease of \$933 thousand from termination of one-time costs associated with the FY 2014 OPLA attorney enhancement.

The FY 2015 request includes \$169.1 million for salaries and benefits to support over 900 attorneys and \$45.6 million to fund general expenses that protect Americans from unlawful immigration and cross-border crime.

Description

OPLA provides legal advice, training, and services in support of ICE's mission. OPLA attorneys appear in hearings involving criminal and other aliens, terrorists, and human rights abusers, as well as provide critical legal support to ICE components focusing on customs, criminal law, ethics, procurement, appropriations, labor law, tort claims, federal litigation, information disclosure, and other administrative issues.

ICE field attorneys represent the U.S. government in exclusion, detention, and removal proceedings before the Board of Immigration Appeals (BIA). ICE Headquarters attorneys support field work and also provide legal advice on national security, human rights and criminal issues. It also provides legal counsel and training to ERO and HSI on a wide variety of matters, including conditions of detention, removal, customs, and criminal laws. OPLA also coordinates with the DOJ on federal litigation involving tort claims, *Bivens* claims, and statutory and constitutional claims seeking injunctive relief.

ICE has assigned 38 attorneys to the USAOs as full-time SAUSAs, for which there is no reimbursement to ICE, to prosecute immigration and customs related crimes in federal court. Placing SAUSAs in strategic locations within the USAO allows ICE to increase the prosecution of criminal cases important to its mission. Most convictions secured by the ICE SAUSAs relate to unlawful acts, improper entry, re-entry of removed aliens, bringing in and harboring aliens, and immigration fraud.

Major Directorates

Field Legal Operations (FLO) – FLO is a headquarters directorate that oversees 26 ICE Offices of the Chief Counsel (OCC). The OCCs have over 750 attorneys who represent the government in immigration proceedings and handle over 300,000 immigration-related cases annually before EOIR. OCC cases include contested removals, custody determinations, and applications for protection or relief from removal. In addition, the 26 OCCs provide legal advice to ICE operations through

OHSR Alignment

4.1 Create a Safe, Secure, and Resilient Cyber Environment

3.2 Prevent Unlawful Immigration

2.3 Disrupt and Dismantle Transnational Criminal Organizations

1.1 Prevent Terrorist Attacks

ICE Strategic Plan Alignment

3.4 Protect the Integrity of the Immigration System

embedded HSI attorneys as well as labor and employment law issues. Further, the OCCs conduct prosecutorial discretion reviews consistent with ICE's civil enforcement priorities.

Homeland Security Investigations Law Division (HSILD) - HSILD is composed of three sections that specialize in providing legal advice and training to HSI special agents, as well as litigation support and legal guidance on HSI matters to OPLA field offices:

- National Security Law Section (NSLS) - NSLS provides legal advice, training, and litigation oversight for cases involving international terrorism, counter-terrorism, espionage, classified evidence, and other national security matters. NSLS attorneys work closely with other law enforcement and intelligence agencies, including the Federal Bureau of Investigation (FBI) and the Central Intelligence Agency (CIA), and act as liaisons with the DOJ, Department of State (DOS), and the U.S. Intelligence Community on national security issues.
- Human Rights Law Section (HRLS) - HRLS coordinates ICE's litigation efforts with other intelligence agencies, foreign governments, international criminal tribunals, and non-governmental organizations to provide legal advice in the identification, investigation, prosecution and removal of individuals involved in human rights abuses, including genocide, extrajudicial killings, persecution, the recruitment or use of child soldiers, and torture. HRLS currently has a caseload of over 1,800 cases involving individuals from approximately 100 different countries.
- Criminal Law Section (CLS) - CLS provides counsel on HSI legal issues, including border search authority, international and domestic agreements with law enforcement agencies, worksite enforcement, financial crimes, narcotics and contraband smuggling, searches and seizures, export crimes, child exploitation, and undercover operations. CLS directly supports the Cyber Crimes Center (C3), National Intellectual Property Rights Coordination Center, Bulk Cash Smuggling Center (BCSC), and the OIA.

Enforcement and Removal Operations Law Division (EROLD) – EROLD is composed of two sections that specialize in providing legal advice and training to ERO officers and agents, as well as litigation support and legal guidance on ERO matters to OPLA field offices.

- Enforcement Law Section (ELS) - ELS provides legal advice and training to operational divisions, including CAP, the Juvenile and Family Residential Management Unit, the Fugitive Operations Unit, and the HSI Student and Exchange Visitor Program. Attorneys provide advice and legal counsel on significant immigration enforcement related issues including, but not limited to: requirements of the 4th Amendment, rapid repatriation of criminal aliens, 287(g) delegation of immigration authority, and the authorities related to the detention of families and/or unaccompanied alien children. ELS also manages the litigation of civil and/or criminal denaturalization cases assigned to the Office of Immigration Litigation.
- Detention and Removal Law Section (DRLS) - DRLS provides legal advice, counsel and training on issues including, but not limited to, detainee medical and mental health care, detention officer authorities, expedited removals, detainees, deferred actions, alternatives to detention, and continued detention under specialized authorities. DRLS also provides legal and

procedural guidance to the Office of Detention Policy and Planning regarding liability and/or litigation risks that could impact detention reform initiatives and new policies.

Immigration Law & Practice Division (ILPD) – ILPD has four areas of responsibility: (1) providing immigration law advice and counsel to the OCCs, ICE programs and leadership, the DHS Office of General Counsel and other agencies; (2) providing specialized advice on sensitive issues related to refugee status, asylum, Temporary Protected Status, withholding of removal, the Convention Against Torture and helping to make asylum fraud prevention tools available to the OCCs; (3) overseeing OPLA’s advocacy before EOIR and its appellate caseload before the BIA; and (4) monitoring immigration-related Federal circuit court and Supreme Court developments, and working with DOJ to address immigration cases on appeal to the circuit courts of appeals.

District Court Litigation Division (DCLD) – DCLD adjudicates claims against ICE personnel brought under the Federal Tort Claims Act, coordinates with DOJ on a range of district court litigation involving ICE liability or challenging agency enforcement authorities, and works to achieve settlement of such matters, when appropriate, to mitigate agency legal and financial exposure.

Other OPLA divisions include the Commercial and Administrative Law Division, the Government Information Law Division, the Labor and Employment Law Division, and the Ethics Office.

FY 2015 Planned Activities

In FY 2015, ICE will:

- Continue to transition its OCCs to full-service operations to ERO and HSI clients. Implementation of this full-service model will enhance the Chief Counsels’ relationships with their Special Agent in Charge (SAC), Field Office Directors (FOD) and their managerial staffs, and ensure that the OCCs are fully engaged in, and current with, all the legal issues, policies and procedures faced by HSI and ERO personnel in the execution of their duties.
- Significantly enhance operational capabilities by refining the way that OPLA tracks cases and by providing timely and accurate case and workload data and relevant performance measures.
- Provide clear outputs and assist in developing performance based budgeting. Further, OPLA will continue to coordinate with EOIR and U.S. Citizenship and Immigration Services (USCIS) to improve docket scheduling and recognize other efficiencies in immigration court with the goal of increasing the number of priority cases handled.
- Continue to pursue improvements to the expeditious handling of cases involving alternate removal methods such as stipulated and reinstated orders of removal.

CURRENT SERVICES PROGRAM DESCRIPTION:

ICE enforces over 400 federal statutes and uses its authority to investigate all types of immigration and customs violations, and to deter, disrupt and dismantle transnational criminal organizations (TCO), terrorist organizations, and other malicious actors.

As an investigative arm of DHS, ICE works closely with local, tribal, state, federal, and international law enforcement partners to ensure national, public, and border security. ICE special agents use their legal authorities to investigate immigration and customs violations such as human rights violations; narcotics smuggling and distribution; weapons smuggling and the smuggling of other types of contraband; money laundering and financial crimes; cyber-crimes; human trafficking and smuggling; transnational gangs; child exploitation; worksite enforcement; intellectual property violations; commercial fraud; export violations; and identity and benefit fraud that occur both at the border and within the interior of the United States.

During April 2013, ICE, in conjunction with the Federal Bureau of Investigations (FBI), investigated the Boston marathon bombing. 100 ICE Special Agents, including computer forensic agents which worked around the clock to identify the two suspects. ICE agents were on the scene assisting in the apprehension of the 2nd suspect, evacuating families from neighboring houses, and interviewing victims and families in three local hospitals. ICE continues to support this ongoing investigation with Threat Analysis Reports on relationships to the suspects as well as actionable leads.

FY 2015 Request

In FY 2015, ICE requests \$1,644.6 million, 8,333 positions, and 7,775 FTE for the Domestic Investigations program. The FY 2015 request reflects a decrease of \$27.7 million from the FY 2014 Enacted amount. The FY 2015 request, as compared to FY 2014, includes:

- Increase of \$12.4 million for pay inflation;
- Increase of \$16.5 million for agency FERS contributions;
- Increase of \$11.5 million for a GSA rent increase;
- Increase of \$10.4 million for maintenance and repair at ICE-leased facilities;
- Increase of \$6 million for fleet recapitalization;
- Decrease of \$12.2 million for cost savings associated with reduced IT contracts; and
- Decrease of \$72.2 million for termination of one-time costs associated with enhancements and non-reoccurring costs in FY 2014.

In FY 2015, Domestic Investigations will spend \$1,299.7 million on salaries and benefits and \$344.9 million on general expenses to support ICE's investigative mission. This includes contractual support for wiretap and surveillance services, the purchase of equipment and supplies to maintain field operations at 26 SAC offices nationwide, equipment for undercover operations, and travel related to open investigations. Domestic Investigations will also continue to provide leads to develop investigations of individuals who overstay their visas or potentially pose a threat to national security. ICE field operations use these leads to identify, locate, and remove aliens who have overstayed their visas and mitigate threats to national security.

Description

Domestic Investigations is divided into four programs: National Security Investigations, Financial, Narcotics & Special Operations Investigations, Transnational Crime and Public Safety Investigations, and Investigative Services. Domestic Investigations program expenditures fall into four broad investigative areas: Illicit Trade, Illicit Travel, Illicit Finance, and Investigative Support. A breakdown of spending between these four areas is shown below.

OHSR Alignment

1.1 Prevent Terrorist Attacks

2.3 Disrupt and Dismantle Transnational Criminal Organizations

3.2 Prevent Unlawful Immigration

4.1 Create a Safe, Secure, and Resilient Cyber Environment

ICE Strategic Plan Alignment

2.0 Protect the Borders Against Illicit Trade, Travel and Finance

Associated HPPG/GPRA/Management Measures

Percent of transnational child exploitation or sex trafficking investigations resulting in the disruption or dismantlement of high-threat child exploitation or sex trafficking organizations or individuals

Percent of transnational gang investigations resulting in the disruption or dismantlement of high-threat transnational criminal gangs

Percent of transnational drug investigations resulting in the disruption or dismantlement of high-threat transnational drug trafficking organizations or individuals

Number of employers audited, sanctioned, or arrested for violating immigration-related employment laws or otherwise brought into compliance with those laws

National Security Investigations

- The National Security Unit (NSU)** integrates ICE's national security investigations and counterterrorism responsibilities under a single overarching umbrella unit. The National Security Investigations Division (NSID) leads the effort to identify, disrupt and dismantle transnational criminal enterprises and terrorist organizations that threaten the security of the United States. For example, the NSU investigates aliens who overstay non-immigrant visa terms and are involved in illegal activities such as terrorism, drug smuggling, money laundering, transnational criminal organizations, and the export of precursor chemicals. The NSU also oversees Domestic Investigations' participation in the Joint Terrorism Task Forces (JTTF), which are charged with dismantling terrorist organizations, and investigating, detecting, interdicting, prosecuting and removing terrorists. Similarly, the National Targeting Center (NTC) Section works in conjunction with CBP to notify ICE field offices of persons of national security interest who are Terrorist Screening Data Base and Terrorist Identities Datamart Environment encounters.

ICE is the largest federal contributor to the JTTF program and has more than 300 Special Agents assigned to 103 JTTFs nationwide. Since 2007, ICE agents assigned to JTTFs have made 1,710 criminal arrests and 2,592 administrative arrests.
- The Counter-Proliferation Investigations (CPI) Program** oversees a broad range of investigative activities related to the illegal procurement of U.S. military/defense products and sensitive technology, including weapons of mass destruction. CPI also manages Project Shield America, a broad outreach program to private industry and the academic community to prevent the illegal export of sensitive munitions and strategic technology. CPI is also a contributor to Program Global Shield, an international initiative in conjunction with the World Customs Organization, which seeks to track and disrupt the illicit shipment of precursor chemicals used in the manufacturing of improvised explosive devices. Together, CPI domestic and foreign-based efforts enforce U.S. laws involving the export of sensitive technologies, weapons, and controlled dual-use goods as well as exports to sanctioned or embargoed countries.

- **The National Security Integration Center (NSIC)** is the primary national security and counterterrorism planning component for ICE. NSIC consists of two distinct sections: The Department of Defense and Interagency Strategic Coordination Section (DISCS) and Visa Security Section (VSS). DISCS's mission is to provide strategic and programmatic direction of ICE engagement with the Department of Defense (DoD) and other US agencies, provide training to interagency partners and facilitate ICE submissions for DoD funding and support. The Visa Security Section (VSS) further develops and operates the PATRIOT visa security program in partnership with CBP and DOS. This multidisciplinary program works directly with interagency partners to identify visa applicants and recipients who have been identified as potential threats to national security.

- **The Counterterrorism and Criminal Exploitation Unit (CTCEU)** proactively scrutinizes known or suspected terrorists and their associates, identifies terrorist criminal enterprises, prevents terrorists and other criminals from exploiting the nation's immigration system, and provides ICE expertise to the various law enforcement agencies and the intelligence community. CTCEU is comprised of the Terrorist Tracking Pursuit Group and the SEVIS Exploitation Section.

ICE implemented Project Campus Sentinel, a program which proactively reaches out to academic institutions that enroll visiting foreign students to build mutual partnerships that target potential fraud and visa exploitation as well as to identify foreign students who may pose threats or become radicalized. To date, ICE has conducted nearly 2,000 outreach visits across all 50 states, Puerto Rico, and Guam.

- **The Overstay Analysis Unit (OAU)** seeks to prevent nonimmigrant visitors from exploiting the nation's immigration system by identifying visitors who violate their immigration status by overstaying the terms of their admission. OAU accomplishes its mission through research and analyses of system identified leads of possible overstay violators. OAU creates lookouts on validated leads of out-of-country violators which are used by DOS and CBP officers to make visa issuance and port of entry admissions decisions. Additionally, OAU works in conjunction with the CTCEU by providing validated in-country overstay leads for possible law enforcement action.

- **The Human Rights Violator and War Crimes Unit (HRVWCU)** oversees investigations

The unit's goal is to deny safe haven in the United States to human rights violators. The HRVWCU has identified over 35,000 human rights violators from across the globe, has prevented 129 human rights violators from entering the United States and facilitated the revocation of 105 non-immigrant visas.

involving torture, genocide, extrajudicial killings, recruitment of child soldiers, war crimes, extreme forms of religious persecution, and immigration and visa fraud where the underlying offense is based on human rights abuses and war crimes. The HRVWCU is also home to the Human Rights Violators and War Crimes Center, a multi-agency effort to identify, target, prosecute, and remove human rights violators from the United States.

- **The Federal Export Enforcement Coordination Center (E2C2)** is an interagency center consisting of 9 departments and 28 federal agencies spanning federal law enforcement, border interdiction, licensing, DOD and the intelligence community. ICE serves as the Director of the E2C2. The E2C2 was designated by the President as the primary forum within the federal

government for executive departments and partner agencies to coordinate, de-conflict, and enhance their export enforcement efforts to detect, prevent, disrupt, investigate, and prosecute violations of U.S. export control laws.

Financial, Narcotics & Special Operations Investigations

- **ICE's Border Enforcement Security Task Forces (BEST)**

play a key role in the government's efforts to enhance border security. ICE leads 35 BEST units throughout the United States; these units comprise members from ICE, CBP, as well as other federal, state, local, tribal and international law enforcement officials. The BESTs leverage federal, state, local, tribal and international law enforcement and

intelligence resources in an effort to identify, disrupt, and dismantle organizations that seek to exploit vulnerabilities along the U.S. borders and threaten the overall safety and security of the American public. The BEST program is designed to increase information sharing and collaboration among the participating agencies, focusing toward the identification, prioritization, and investigation of emerging or existing threats.

Recently a San Diego BEST Tunnel Task Force conducted a long term criminal investigation and discovered a sophisticated subterranean tunnel crossing in Mexico, resulting in the seizure of 30 tons of marijuana.

- **The Illicit Finance and Proceeds of Crime Unit** works with the private sector, regulatory agencies, domestic and foreign law enforcement partners as well as international organizations to build the capacity among all pertinent parties in the United States and abroad to identify and investigate complex financial crimes and money laundering.

- **The Trade Transparency Unit (TTU)** focuses on the exploitation of international trade systems, including their financial mechanisms to launder illicit proceeds. The TTU analyzes trade and financial data to identify trade transactions and other information that do not follow

ICE netted a \$1.26 billion money laundering forfeiture by HSBC for illegally conducting transactions on behalf of customers and for failing to maintain an effective anti-money laundering (AML) program.

normal patterns, and then works with international partners to identify crimes such as money laundering, customs fraud, contraband smuggling, as well duty and tax evasion. These international partnerships offer another means of linking global customs and law enforcement agencies together to combat transnational crime.

- **The National Bulk Cash Smuggling Center (BCSC)** provides intelligence and investigative support to federal, state, and local officers involved in the interdiction of bulk cash smuggling and the transportation of illicit criminal proceeds. Domestic Investigations examines and exploits evidence obtained during border encounters, traffic stops, and other law enforcement interactions. The BCSC targets TCOs who seek to avoid traditional financial institutions by repatriating illicit proceeds through an array of methods including commercial and private aircraft, passenger and commercial vehicles, maritime vessels, and pedestrian border crossings.

ICE's Cross Border Financial Investigations Training Program (CBFIT) provides foreign countries with the capability to effectively conduct financial investigations and address transnational and cross-border crimes. To date, over 100 CBFIT training visits have been provided to over 50 foreign countries.

Transnational Crime and Public Safety Investigations

The Document and Benefit Fraud Task Forces (DBFTFs): target criminal enterprises and individuals who attempt to compromise the integrity of the immigration system through document and

Operation Island Express, disrupted and dismantled a transnational document fraud organization trafficking in Puerto Rican birth certificates and U.S. Social Security cards. The investigation uncovered an extensive criminal enterprise operating in at least 33 states, Puerto Rico, and several countries. To date, the investigation has resulted in 154 indictments for criminal activity

benefit fraud. In partnership with federal, state and local law enforcement agencies, nineteen DBFTFs maximize resources, eliminate duplication of efforts, and conduct more effective investigations. Fraudulent documents, in terms of the immigration system, give an appearance of legitimacy and are primarily used by those illegally present in the U.S. for employment purposes. Benefit fraud is an extremely lucrative form of fraud that can enable terrorist and criminals to exploit the legitimate immigration process and obtain legal status in the United States. Both types of fraud damage the immigration system by undermining public trust and confidence in the

system.

- **The Extraterritorial Criminal Travel Strike Force and the ICE Trafficking in Persons Programs** coordinate field office investigations to target human smuggling and trafficking organizations both domestically and internationally with our domestic and international partners. By working closely with our partners, Domestic Investigations moves aggressively to counter the vulnerabilities posed by human smuggling organizations, and works diligently to rescue the victims of human trafficking and bring to justice those that perpetrate these crimes.

Investigative Services

- **The Undercover Operations Unit (UOU)** is responsible for providing guidance and oversight for all Domestic Investigations undercover activity. The use of undercover operations allows the agency to combat threats posed by TCOs through covert infiltration of these organizations by a specialized cadre of ICE special agents. The UOU's responsibilities include programmatic management & oversight of ICE's undercover documents, confidential informant disclosures, undercover training programs, lures, notional documents, the undercover review committee, and other programs impacting ICE's covert investigative activities.

Domestic Investigations employs a comprehensive worksite enforcement strategy to reduce the pull of illegal employment, ease pressure at the border, and protect employment opportunities for the nation's lawful workforce. ICE's worksite enforcement strategy consists of a three-pronged approach utilizing enforcement (criminal arrests of employers), compliance (Form I-9 Employment Eligibility Verification inspections, civil fines and debarment) and the ICE Mutual Agreement between Government and Employers program (IMAGE) to create a culture of compliance.

- **The HSI Forensic Laboratory (HSI-FL)** provides a broad range of forensic, intelligence, and

Due to the rise in transnational gang membership and the resulting increase in gang violence in both urban and suburban communities nationwide, Domestic Investigations developed and implemented anti-gang initiatives focused on violent criminal activities and on crimes with a nexus to the border. Since the inception of Operation Community Shield in February 2005, ICE special agents have arrested more than 32,415 street gang members and associates linked to more than 2,300 different gangs. More than 418 of those arrested were gang leaders and more than 4,494 were MS-13 gang members or associates. Through this initiative nationally, ICE has seized more than 5,254 firearms.

investigative support services for ICE, DHS, and many other U.S. and foreign law enforcement agencies. The HSI-FL offers specialized services which include travel and identity document authentication and analysis, fingerprint processing and identification, expert witness testimony, support to field officers, and training on the detection of fraudulent travel and identity documents.

Investigative Support

- **The Cyber Crimes Center (C3)** leads ICE's efforts to identify, disrupt, and dismantle criminal organizations engaged in criminal activity facilitated by the use of computers, electronic media, or

cyberspace. Trains, guides and assists ICE's 11 regional forensic laboratories, and more than 250 Computer Forensics Agents (CFAs) assigned to field offices located throughout the world.

- **The National Intellectual Property Rights Coordination Center (IPR Center)** protects the public's health and safety, the U.S. economy, and the war fighter by combating predatory and unfair trade practices that threaten the global economy. The IPR Center brings together 21 partners in a task force setting to include federal investigative agencies as well as international partners from Interpol, Europol and the governments of Canada and Mexico to leverage the resources, skills, and authorities of each participating agency to provide a comprehensive response to IP theft. These partners focus cooperatively on enforcement of intellectual property; commercial fraud including cases where commercial importations of cargo involved false statements and deceptive business practices; and increasing global outreach to build and maintain partnerships with industry and law enforcement, coordinating domestic and international capacity building programs, and raising public awareness.

Operation Engine Newity is an ICE, CBP and FBI collaborative effort to target the illegal importation, distribution, and sale of counterfeit automotive parts. The health and safety hazards posed by counterfeit airbags, brakes, ignition and fuel systems components and other safety items could potentially affect every person who travels in a motor vehicle.

FY 2015 Planned Activities

In FY 2015, ICE will:

- Continue its interagency efforts with DHS, DOJ, and members of the Intelligence Community (IC) in Operation Retroject, an enhanced, retroactive vetting of all Iraqi refugees who have entered the United States since 2007. Operation Retroject identifies previously unknown or undetected national security-related derogatory information on individuals in the U.S. who have been granted refugee status.

- Work to expand the BCSC by applying a task force model that includes other federal entities, leverages developing technologies to exploit intelligence and facilitate identification of criminal networks, and expands BCSC's analytical capabilities by reviewing domestic and international currency transaction reports for possible financial investigatory leads.
- Continue to enhance and expand the Trade Fraud Program. Domestic Investigations will expand joint ICE-CBP post-investigative analysis reporting to identify repeatable systematic schemes and techniques; enhance CBP and ICE's capabilities to conduct commercial trade fraud investigations through the development of additional training courses such as force labor and textile and in-bond diversion; and establish additional Trade Enforcement Coordination Centers in Newark, NJ; Miami, FL; Detroit, MI; Houston, TX; Chicago, IL; Laredo, TX; and Atlanta, GA.
- Continue to study how to field a Human Rights Violators Rapid Response Team as detailed in Presidential Study Directive 10. This effort will initially focus on analyzing information and intelligence to identify human rights violators to both prevent their entrance into the United States as well as to work with international partners and criminal tribunals in their prosecution. Later developments will see this team deploy globally and work with U.S. and foreign partners to gather evidence, identify witnesses, and conduct witness and victim interviews in areas where human rights violations, war crimes, atrocities, genocide, and torture have occurred.
- Expand its IP efforts by expanding investigatory support and leveraging enforcement operations with state and local law enforcement agencies.
- Partner with the National Crime Prevention Council to distribute intellectual property tool kits to state and local law enforcement to better guide them when they encounter counterfeit and intellectual property violations.
- Continue to participate as the U.S. Representative of the Virtual Global Taskforce, which is an international alliance of law enforcement agencies and private industry sector partners working together to prevent and deter online child sexual abuse.

Procurement Activities:

Enforcement Information Sharing (EIS)

Enforcement Information Sharing (EIS) is an umbrella program that supports the common goal of providing information sharing capabilities between the law enforcement community and DHS partners. EIS enhanced the information sharing web service and identified new external partners to further close the sharing capability gap so information can easily be shared across federal, state, local, and tribal law enforcement entities. EIS creates a centralized access point for ICE and other DHS task forces, agents, and analysts to conduct investigations and identify relationships among over 290 million records from eight DHS data sources as well as access to over 14,000 law enforcement partners across the United States. EIS is currently in the operations and maintenance (O&M) phase. Note: See CASR for full description.

CURRENT SERVICES PROGRAM DESCRIPTION:

OIA has 75 offices in 48 countries¹ and works to disrupt and dismantle TCOs that seek to exploit America's legitimate trade, travel, and financial systems by engaging in human smuggling and trafficking, in the smuggling of narcotics, money, weapons, and sensitive technologies, and in the sexual exploitation of children, including child sex tourism. OIA partners with foreign and domestic counterparts to conduct international law enforcement operations and removals.

FY 2015 Request

In FY 2015, ICE requests \$101.2 million, 302 positions, and 243 FTE for the ICE OIA to support operations and investigations at the Attaché offices around the world. The FY 2015 request reflects a decrease of \$4.8 million from the FY 2013 Revised Enacted amount and an increase of \$1.5 million from the FY 2014 Enacted amount. The FY 2015 request, as compared to FY 2014, includes:

- Increase of \$498 thousand for pay inflation;
 - Increase of \$511 thousand for agency FERS contributions;
 - Increase of \$433 thousand for a GSA rent increase;
 - Increase of \$431 thousand for maintenance and repair at ICE-leased facilities; and
 - Increase of \$233 thousand for fleet recapitalization.
- Decrease of \$619 thousand for cost savings associated with reduced IT contracts;

¹ In addition, OIA has eight personnel assigned to the Department of Defense which are co-located at the Unified Combatant Commands and the Joint Inter-agency Task Forces.

In FY 2015, the ICE OIA will spend \$62.4 million on salaries and benefits, and \$38.9 million on general expenses to support ICE's international investigations and activities.

Description

The ICE Attaché offices around the world conduct law enforcement operations and provide investigative support to domestic offices in combating transnational crime. They support other U.S. government components and initiatives, refer requests from host country law enforcement agencies to appropriate U.S. agencies, and serve as advisor to U.S. missions. OIA provides training and conducts outreach to foreign officials and coordinates with foreign counterparts to share information under negotiated bilateral agreements and mutual legal assistance treaties. OIA conducts and coordinates training for law enforcement officials through International Law Enforcement Academies. These offices are staffed by ICE special agents, deportation liaison officers, also known as Assistant Attachés for Removal (AARs), and foreign service nationals who enhance the investigative and administrative ability of our overseas offices with their bicultural and bilingual skills.

Assistance with Removal and Repatriation

Through the use of dedicated AARs deployed at critical locations abroad, OIA coordinates the return of removable aliens with host governments and facilitates transits and country clearances. In collaboration with ICE ERO, AARs coordinate with host-country governments to return aliens who have final orders of removal. This coordination accelerates the removal process and

Operation Firewall is a comprehensive interdiction and investigation-focused enforcement operation targeting the movement and smuggling of bulk currency in and through Mexico, Central, and South America via cargo, commercial flights, and private aircraft. Since inception, ICE has seized over \$633 million dollars in bulk currency and has participated in the arrest of approximately 1,504 people involved in the smuggling of bulk currency.

reduces detention costs by reducing the number of detention days and daily bed expenses incurred before removal. ICE and DOS engage with foreign governments to reinforce their commitment under international law to accept the return of their citizens, even as the number of returned criminals increases. OIA works through problematic repatriation and removals by providing support for country clearances and then coordinating removals with the ICE flight operations unit. OIA also reduces ICE's average length of stay and bed costs through expanded use of the Electronic Travel Document (eTD) system, which reduces the time it takes to issue travel documents. OIA pursues collaborative international strategies by participating in multilateral forums with partner countries to discuss alien removal issues (e.g., Five Country Conference, Regional Conference on Migration, Shared Border Accord Coordinating Committee, and others). OIA also trains ICE representatives overseas on complex removal issues.

QHSR Alignment

1.1 Prevent Terrorist Attacks

2.3 Disrupt and Dismantle Transnational Criminal Organizations

3.2 Prevent Unlawful Immigration

4.1 Create a Safe, Secure, and Resilient Cyber Environment

ICE Strategic Plan Alignment

1 Prevent Terrorism and Enhance Security

2 Protect the Borders Against Illicit Trade, Travel and Finance Target Drug Trafficking

Illicit Pathways Attack Strategy

Through the Office of Intelligence, OIA created the Illicit Pathways Attack Strategy (IPAS) to dismantle and disrupt the networks and pathways used by TCOs. TCOs use these networks and pathways for money laundering, weapons and bulk-cash smuggling, the export and theft of intellectual property and protected technologies, and human trafficking and smuggling. By dismantling these networks, ICE targets the infrastructure and profits generated by TCOs. The IPAS expands ICE's operations outside the U.S. in order to stop the trade of illicit goods and people before they reach the U.S. The strategy also aims to strengthen ICE's interagency cooperation with key law enforcement agencies and international partners such as CBP, DOJ, DOS, Department of Defense (DOD), and Interpol.

Transnational Criminal Investigative Units

OIA establishes the Transnational Criminal Investigative Units (TCIU) or "vetted units" in host countries, to build international consensus, multilateral cooperation and partnerships to defeat organized crime. TCIUs are special host country investigative units that assist ICE with investigations in source and transit countries. TCIUs are multi-disciplined units comprised of foreign prosecutors and customs, immigration, intelligence and law enforcement officials who are vetted to ensure that shared information and operational activities are not compromised. ICE coordinates the activities of the TCIUs, in collaboration with foreign investigative counterparts, to deter, disrupt and dismantle TCOs and individuals perpetrating a wide range of crimes including: human trafficking and smuggling, child labor and sexual exploitation, illegal arms trafficking, proliferation of sensitive technology, intellectual property rights violations, commercial fraud, money laundering, bulk cash smuggling, and narcotics trafficking.

ICE currently oversees 8 TCIUs around the globe. The majority of these units are located in Central and South America, however, in early FY2014 ICE trained the latest TCIU located in Afghanistan.

FY 2015 Planned Activities

In FY 2015, OIA will:

- Focus on U.S./Mexico cross-border threats and global illicit pathways, including contraband smuggling, arms trafficking, money laundering, bulk cash smuggling, human smuggling and trafficking, to include special interest aliens, and transnational gangs.
- Evaluate its worldwide investigative resources, through an analysis of global threats, current ICE coverage, and agency priorities, to reallocate resources in locations that pose the greatest threat, investigative opportunity, and host nation connectivity to the U.S.
- Review current processes and procedures, and evaluate areas for potential cost savings to improve efficiencies.

Total Change 2014 to 2015	-	-	313

CURRENT SERVICES PROGRAM DESCRIPTION:

ICE's Visa Security Program (VSP) deploys uniquely trained and experienced ICE special agents overseas to high-risk visa issuance posts to identify potential terrorist and criminal threats before they reach the United States. Visa Security Units (VSU) are currently operating at 20 ICE attaché offices in 16 countries.

FY 2015 Request

In FY 2015, ICE requests \$31.9 million, 76 positions, and 61 FTE for the VSP. The FY 2015 request reflects an increase of \$313 thousand from the FY 2014 Enacted amount. The FY 2015 request, as compared to FY 2014, includes:

- Increase of \$126 thousand for pay inflation;
- Increase of \$127 thousand for agency FERS contributions;
- Increase of \$30 thousand for a GSA rent increase;
- Increase of \$114 thousand for maintenance and repair at ICE-leased facilities; and

- Decrease of \$84 thousand for cost savings associated with reduced IT contracts.

In FY 2015, the VSP will spend \$18.3 million on salaries and benefits, and \$13.5 million on general expenses to support the VSP at headquarters and 20 overseas posts.

Description

The VSP protects the U.S. against terrorists and criminal organizations by preventing foreign nationals who pose a threat to national security from entering into or residing within the United States. The VSP identifies and closes vulnerabilities in our immigration and customs processes as well as modernizes the information technology (IT) capability for screening visa applications. ICE's presence overseas via the VSP is vital to protecting the U.S. and its resources from harm and exploitation because it maintains the relationships with foreign law enforcement that are required to combat and disrupt the efforts of terrorist and criminal organizations.

Special agents assigned to the VSP work closely with the DOS and take a hands-on approach in conducting visa security activities at 20 overseas posts. These activities include, but are not limited to, examining visa applications for fraud; initiating investigations; coordinating with law enforcement partners; and providing law enforcement training and advice to U.S. consular officials.

Many visa security screening activities involve face-to-face interaction and on-the-ground follow-up which can only be conducted overseas. Agents assigned to the VSP follow up on investigative leads by coordinating with foreign government law enforcement agencies to verify a visa applicant's true country of origin; identify any criminal arrests, convictions, or potential affiliations with terrorist or criminal organizations; confirm any derogatory information found during data screening; and substantiate recommendations to deny visas to high risk individuals or "clear" eligible applicants incorrectly associated with such derogatory information.

In addition to determining whether a given applicant is eligible for a visa, vetting by ICE special agents generates additional law enforcement value, including:

- *Creation of watch-list records;*
- *Identification of new terrorist tactics or fraud schemes;*
- *Generation of intelligence products;*
- *Revocation of fraudulent petitions; and*
- *Initiation of investigations leading to arrest, seizure, prosecution.*

OHSR Alignment

1.1 Prevent Terrorist Attacks

2.3 Disrupt and Dismantle Transnational Criminal Organizations

3.2 Prevent Unlawful Immigration

4.1 Create a Safe, Secure, and Resilient Cyber Environment

ICE Strategic Plan Alignment

1 Prevent Terrorism and Enhance Security

The VSP also seeks to identify terrorist or criminal threats by conducting targeted, in-depth vetting of individuals who apply for U.S. visas overseas. The Security Advisory Opinion Unit (SAOU) participates in interagency checks of visa applicants by conducting checks of derogatory information on visa applicants and liaising with other participating agencies to coordinate a unified visa determination. Through SAOUs, the VSP fosters coordinated decision-making, provides classified research assistance across DHS and DOS, and utilizes law enforcement expertise and analysis to maximize the efficiency of the visa process.

To guide future expansion and the deployment of VSP personnel, ICE has collaborated with DOS to develop a list of high-risk visa-issuing locations. Deployment schedules are dependent on DOS approval and factors such as scheduling site visits to plan and coordinate facilities build out of communications; securing government housing or DOS-approved leased housing; procuring and deploying armored vehicles and other specialized equipment; recruiting and staffing ICE positions including foreign nationals; coordinating specialized training; identifying educational requirements for dependents of ICE agents; and scheduling deployment of staff and families from the United States. VSP posts become fully operational when all infrastructure/IT systems are in place and all staff are deployed.

The VSP is establishing IT connectivity with CBP and DOS to automate links between DHS and DOS systems. This interface will allow for visa applications to be screened through the CBP's Automated Targeting System-Passenger, resulting in 100 percent visa screening.

FY 2015 Planned Activities

In FY 2015, ICE will

- Continue to use IT solutions to increase ICE's efficiency in screening, vetting, and recording visa applications. ICE aims to increase screening capabilities by enhancing the existing PATRIOT technology to cover all visa issuing posts worldwide. This modernization effort will enable all ICE Attaché offices to perform visa security operations.

CURRENT SERVICES PROGRAM DESCRIPTION:

The ICE Office of Intelligence (Intel) collects, analyzes, and shares timely and accurate intelligence on illicit trade, travel, and financial activity with a U.S. nexus, in coordination with other DHS Intelligence Enterprise members and the intelligence community. Intel produces intelligence reports and finished intelligence to support ICE investigations, and ongoing operations. In addition, Intel maintains one of the Department's largest agency-wide secure data communication infrastructures. Intel also prepares ICE for agency-wide continuity of operations, emergency response, and crisis management and manages a 24/7 joint intelligence and operations operation.

FY 2015 Request

In FY 2015, ICE requests \$77.1 million, 468 positions, and 368 FTE for Intel. The FY 2015 request reflects an increase of \$2.7 million from the FY 2014 Enacted amount. The FY 2015 request, as compared to FY 2014, includes:

- Increase of \$566 thousand for pay inflation;
- Increase of \$774 thousand for agency FERS contributions;
- Increase of \$798 thousand for a GSA rent increase;
- Increase of \$1.0 million for maintenance and repair at ICE-leased facilities;
- Increase of \$155 thousand for fleet recapitalization; and
- Decrease of \$584 thousand for cost savings associated with reduced IT contracts.

In FY 2015, Intel will spend \$58.9 million on salaries and benefits, and \$18.1 million on general expenses to support intelligence activities and lead ICE emergency preparedness and response efforts.

Description

Intel collects, processes, analyzes, and disseminates relevant and timely information and intelligence needed to support executive management, investigative missions and enforcement operations. Intel gathers information to identify threats, patterns, trends, methods, and organizations related to transnational crimes, national security, and force protection and officer safety.

Intel establishes and disseminates guidance, analytic tools, and intelligence training standards; coordinates with DHS, the U.S. intelligence community, and other U.S. and foreign law enforcement intelligence partners; produces strategic intelligence assessments in support of agency and department decision makers; provides tactical intelligence collection and reporting services; and manages the Joint Intelligence Operations Center (JIOC) to provide 24x7 situational awareness for ICE. Additionally, Intel manages the ICE National Emergency Management Division, leads all ICE emergency planning and response efforts, and operates the Classified Connectivity Program Management Office to deploy classified data connectivity throughout ICE.

In FY 2013, ICE partnered with CBP to replace the capabilities of ICE's Intelligence Fusion System (IFS) with the Analytical Framework for Intelligence (AFI) platform managed by CBP. AFI increases analytic collaboration, cooperation, and efficiencies through enhanced and integrated information sharing. There is a significant cost saving as well: the IFS cost for operations was \$3.2 million annually; by partnering with CBP, AFI will cost ICE just \$250 thousand per year for operations and maintenance.

Intel responds to intelligence needs based on formal and ad hoc requests by HSI investigative units, ERO officers, ICE senior leadership, other intelligence customers within ICE and DHS, and from the intelligence and law enforcement communities. Additionally, Intel supports the following programmatic areas: Southwest Border, Human Smuggling and Public Safety, Contraband Smuggling, Illicit Finance and Trade Fraud, Counter-Proliferation Intelligence, National Security/Terrorism.

OHSR Alignment

1.1 Prevent Terrorist Attacks

2.3 Disrupt and Dismantle Transnational Criminal Organizations

3.2 Prevent Unlawful Immigration

4.1 Create a Safe, Secure, and Resilient Cyber Environment

ICE Strategic Plan Alignment

1.2 Remove Individuals Posing a Security Threat

Intel performs its mission through the following functional areas:

- **The Intelligence Collection and Operations Division (COD)** identifies and addresses information gaps and collection challenges, influences intelligence community collection priorities

and resources, and facilitates the rapid and responsible sharing of time-sensitive information. This division manages the ICE JIOC, a 24x7 situational awareness center, and the ICE Reports Officer program that identifies and shares intelligence with partner agencies in the U.S. and select foreign locations. The COD/JIOC also provides 24x7 monitoring of the ICE Blue Force Tracker and real-time operational support to the ICE Personnel Recovery Program.

- **The Analysis Division** uses all source information to analyze information that affects ICE operations and DHS components, as well as our federal, state, local, tribal and international law enforcement partners. The division develops strategic level intelligence assessments to support ICE-wide decision making. ICE shares these assessments with its partners as they contain vital information for the broader law enforcement and intelligence communities.
- **The Intelligence Mission Management Division** oversees Intel's external customer engagements, strategic planning, classified connectivity, and liaison activities with the DOD, the intelligence community, and international partners. The Classified Connectivity Program supports enhanced information sharing by facilitating an efficient deployment of classified connectivity within ICE and between ICE and its partners. This Division is also responsible for coordinating and managing the Office of Intelligence Training Program for the intelligence cadre, including ICE Basic Intelligence Training, Basic Intelligence and Threat Analysis Course, training and deployment of the AFI, and continuous learning program.
- **The National Emergency Management Division** leads all ICE emergency planning and response efforts. The division coordinates with 27 ICE program offices to plan for possible incidents, train, and conduct exercises. The division is responsible for ensuring that the ICE Alternate Operating Facility is always prepared to support a contingency.
- **The Human Smuggling and Trafficking Center (HSTC)** supports greater integration and overall effectiveness in the U.S. government's efforts to combat human smuggling and trafficking in persons, and clandestine terrorist travel. The HSTC brings together federal agency subject matter experts from policy, law enforcement, intelligence, and diplomatic arenas to work together and leverage expertise and authorities to combat these global threats.

The Human Smuggling and Public Safety Unit within the Office of Intelligence engages in multi-agency partnerships including government entities such as the DOJ, the Central Intelligence Agency, and the National Security Agency to identify and repair international travel vulnerabilities exploited by criminal travel networks.

FY 2015 Planned Activities

In FY 2015, ICE will:

- Support the increase in focus by Domestic Investigations on Commercial Trade Fraud investigations, and will continue to support the Administration's strategy to combat TCOs at the Human Smuggling and Trafficking Center.
- Focus on enhancing collection management, analytic techniques, dissemination capabilities, product quality, and training provided to personnel engaged in intelligence activities.

- Develop strategic, operational, and tactical collection strategies aimed at gathering intelligence that satisfies national requirements, maintaining global situational awareness to receive, coordinate, and disseminate classified and unclassified information, and facilitating the exchange of law enforcement and national intelligence, and participating in any National Level Exercise for emergency preparedness.

Total Change 2014 to 2015	-	-	(201,857)

CURRENT SERVICES PROGRAM DESCRIPTION:

Custody Operations manages approximately 250 detention facilities across the country, which in FY 2015 is funded to house an average of 30,539 aliens per day.

FY 2015 Request

In FY 2015, ICE requests \$1,791.913 million, 5,391 positions, and 5,095 FTE for the Custody Operations program. The FY 2015 request reflects a decrease of \$201.9 million from the FY 2014 Enacted. The FY 2015 request as compared to FY 2014, includes:

- Increase of \$6.6 million for pay inflation;
- Increase of \$9.4 million for agency FERS contributions;
- Increase of \$5.6 million for a GSA rent increase;
- Increase of \$7.8 million for maintenance and repair at ICE-leased facilities;
- Increase of \$1.3 million for fleet capitalization;
- Increase of \$1.4 million for the development and provision of training and stake holder outreach for the Prison Rape Elimination Act (described in more detail in the programmatic change section).
- Decrease of \$7.0 million for cost savings associated with reduced IT contracts;
- Decrease of \$18.3 million from savings by aligning staffing levels at the Service Processing Centers with the nationwide detention standards;
- Decrease of \$53.4 million for termination of one-time costs; and
- Decrease of \$155.3 million by reducing detention beds from 34,000 to 30,539 (described in more detail in the programmatic change section).

In FY 2015, Custody Operations will spend \$707.8 million for salaries and benefits and \$1,084.1 million for general expenses to maintain 30,539 detention beds at an average rate of \$119/day. Of the 30,539 beds, 27,938 beds are funded through the Custody Operations PPA and 2,601 beds are paid for from fee sources (Breached Bond Detention Fund and Immigration Inspection User Fees).

The requested level of 30,539 detention beds accommodates mandatory and non-mandatory priority detainees (including non-mandatory Level 1 and 2 criminals). This allows ICE to ensure the most cost-effective use of Federal dollars by focusing the more-costly detention capabilities on priority and mandatory detainees, including individuals who pose a danger to national security or a risk to public safety, with particular emphasis on violent criminals, felons, and repeat offenders. This strategy allows ICE to place low-risk, non-mandatory detainees in lower cost alternatives to detention programs, which may include electronic monitoring and intensive supervision.

Description

Custody Operations provides policy guidance for, and oversight of, the administrative custody of a highly diverse alien detainee population. Custody Operations operates these detention operations as efficiently and effectively as possible to ensure the safety, security, and appropriate care of aliens in ICE's custody.

OHSR Alignment

3.2 Prevent Unlawful Immigration

3.2.4 Arrest, detain, prosecute, and remove

ICE Strategic Plan Alignment

3.1 Detaining and Removing Aliens Seeking Illegal Entry

Associated APG/GPRA/Management Measures

Average daily population of illegal aliens maintained in detention facilities

Average length of stay in detention of all convicted criminal aliens prior to removal from the United States

Estimated average bed cost per day

Percent of detention facilities found in compliance with the national detention standards by receiving an inspection rating of acceptable or greater on the last inspection

Bed Space Management

Custody Operations acquires and manages detention capacity in three facility types:

- ***Inter-Governmental Service Agreements (IGSAs) and Intra-Government Agreements (IGAs).*** ICE obtains detention bed space through inter-governmental service agreements with state and local governments and through intra-government agreements with the U.S. Marshall Service (USMS). Approximately 69 percent of ICE's detained population is housed at IGSA or IGA facilities with an average daily population of 23,449 for FY 2013. In FY 2013, there were approximately 239 IGSAs and IGAs in 46 states.

Florence, AZ Service Processing Center

- ***Service Processing Centers (SPCs).*** ICE owns six secure detention facilities, called Service Processing Centers, located in Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Los Fresnos, Texas; and Miami, Florida. The SPCs are dedicated facilities housing 11 percent of the detained population with an average daily population of 3,642 through FY 2013. SPCs provide ICE with valuable flexibility by providing administrative space as well as courtroom and processing space. The availability of this additional space reduces the time and resources required to process aliens.
- ***Contract Detention Facilities (CDFs).*** ICE utilizes seven dedicated contract detention facilities to house approximately 17 percent of ICE's detained population with an average daily population of 5,710 in FY 2013. While not owned by ICE, CDFs are operated by private industry vendors solely for ICE purposes. ICE is prepared to increase usage of facilities with a tiered rate structure per diem that offer cost reductions as the level of the detained alien population increases.

FY 2005 – FY 2013 figures represent the actual average daily population maintained by ICE during the fiscal year.
 FY 2014 is the number of beds mandated in the Enacted Appropriation. FY 2015 is the number of beds proposed in the President's Budget

Detention Bed Costs

The cost of detaining an alien each day varies by region and facility type. Bed costs have several components, including all expenses incurred for direct detention bed acquisition, detention guard services, meals provided to detainees, welfare items, detainee health care and indirect costs such as overhead costs and facility maintenance.

The most significant detention cost driver is the average length of stay (ALOS) for an alien before his or her removal. ALOS is the length of detention for aliens in ICE custody, to include the adjudication process and any appearances before EOIR, leading to a final order of removal. The graph below shows how ICE has decreased ALOS since FY 2009. In 2013, ICE experienced an increase in ALOS due to efficiencies in the removal process that decreased the amount of removals ICE captured under the short-term Alien Transfer Exit Program.

ICE continuously works with EOIR to expedite the legal review with full regard for due process while targeting a reduction in the ALOS. ICE continues a DHS and DOJ cross-agency performance partnership to test specific initiatives that will promote efficiencies in the immigration court process and significantly reduce ALOS and alien processing expenses.

Note: In 2013, ICE experienced an increase in ALOS due to efficiencies in the removal process that decreased the amount of removals ICE captured under the short-term Alien Transfer Exit Program.

Multi-Year Bed Funding Pilot

In FY 2015 ICE requests that \$45 million of Custody Operations funding be multi-year funds (five years). Multi-year funding allows ICE to agree to base periods greater than one year; allows for minimum guarantees spanning more than one fiscal year; and allows ICE to obligate any cancellation fee in its entirety during the initial fiscal year. ICE would use these incentives to receive better rates from vendors in contract negotiations. Market research indicates that a shift to a contract with a five year base period and a five year option period rather than a base year and four one year options would result in a one percent gross price break that would compound over the life of the contract. As this price break compounds over a ten year life cycle the government saves progressively more over time.

ICE will review the detention portfolio and institute multi-year bed pilots at up to five facilities². All multi-year funds including recuperated cancellation fee(s) will be spent on detention beds. For example, ICE could offer the pilot facility vendor a fee for cancelling for convenience in the first year of a contract with a five year base period. In turn, ICE would get a better rate from the vendor for reduced risk. As time elapses on the contract life cycle, the cancellation risk goes down for the vendor. Correspondingly, a straight line, prorated portion of the cancellation fee would be de-obligated and recuperated by ICE annually. A contract with a five year base period and a full (100 percent) fee for cancelling for convenience in the first year would see the fee reduced by 20 percent in the second year of the five-year base period. In this example, the 20 percent recuperated cancellation fee would be reused for detention beds. If ICE doesn't cancel for convenience in the five-year period, it would recuperate the entire fee.

² The \$45 million multi-year funds (five years) would be used for with cancellation fees only at facilities that have an existing guaranteed minimum (GM). In a facility where ICE has a GM, the government pays for beds whether the beds are used or not. These facilities would be insulated from cancellation risk because of their strategic location and GM written into the contracts. ICE has 14 facilities with ADP over 400 that have guaranteed minimums that are viable for this pilot.

ICE will balance the implementation of the pilot with continued consideration of detention reform, enforcement priorities, and other law enforcement operational considerations.

Healthcare

Healthcare (medical and public health) for detainees is managed by the Health Service Corps (IHSC) through comprehensive health screening and the provision of direct patient care services at IHSC staffed facilities and through consultation and compliance reviews at non-IHSC staffed facilities. IHSC also arranges for off-site community-based care for the entire detained population, as necessary. IHSC is working on several initiatives focused on monitoring quality and improving access to health care services while modernizing health care operational capabilities, and strengthening accountability and decision making. In FY 2013, ICE had 847 IHSC medical staff located in 21 facilities nationwide that included 26 Field Medical Coordinators (FMC) who oversaw detainee health issues and monitored standards at non-IHSC staffed detention facilities.

- **Transition to ICE Infrastructure Server Network:** ICE efforts by ICE regarding detainee health care include: transitioned 11 IHSC staffed clinics on the legacy network to full operating capability (FOC) on the ICE IT network. Transition activities will continue in FY 2014 for the remaining 10 clinics.
- **Field Medical Coordinators.** IHSC implemented a Field Medical Coordinator (FMC) initiative to better manage and oversee health care provided to detainees in non-IHSC staffed facilities. IHSC supplemented staff at the 24 ICE Field Offices with a qualified FMC that provides consultation advice to ICE Field Office Directors (FOD) on medical issues within their Area of Responsibility (AOR). During FY 2013 the FMCs were fully integrated with FOD operations. Additional governing documents were developed to reflect the increase in duties and responsibilities, and an increase in the staffing posture has been proposed to address the workload at some of the bigger AORs.
- **Mental Health.** IHSC initiated development of the first transitional mental health unit at the Krome SPC in Miami, FL. The unit addresses the mental health needs of detainees not requiring full hospitalization, but who have medical conditions significant enough to avoid housing in the general population with other detainees.
- **Electronic Health Records (eHR).** ICE procured a comprehensive eHR system to improve the delivery, monitoring, and recording of detainee health care encounters. eHR implementation ensures state-of-the-art communication among its 21 staffed clinics. ICE awarded a vendor contract in September 2012 with coordinated configuration work completed during the first 9 months of contract award.

Detention Standards Compliance Oversight

ICE ensures detention facilities used to detain aliens do so in accordance with ICE national detention standards. National standards are tailored to meet the unique needs of ICE's detainee population, with a focus on quality medical care, access to counsel, visitation, religious practices, language translation and interpretation, and other detainee services.

In 2010, in response to an ICE initiative on Immigration Detention Reform, ICE established an on-site Detention Compliance Oversight Program that complements the inspections program. This on-site program consists of 40 Detention Service Managers/Detention Standards and Compliance Officers (DSMs/DSCOs) who are posted at key ICE detention facilities to provide daily review of facility compliance to ICE's standards and resolve facility issues and concerns. In many cases, problems and issues are remedied on the spot by DSMs/DSCOs. In other instances, the DSMs/DSCOs collaborate with the local field office staff to generate and implement remedial plans. In addition, the DSMs/DSCOs also ensure corrective actions are taken to address deficiencies identified by the Office of Detention Oversight (ODO) and other oversight entities, such as CRCL. These on-site managers are vital in contributing to a reduction in detainee grievances, improved standards compliance, and an increase in the overall final ratings. In FY 2013, there were 54 total facilities under the purview of the program, comprising over 80 percent of ICE's average daily detention population.

One-hundred percent of ICE detention facilities received an inspection rating of acceptable or greater during the annual review through FY 2013. Facilities found not to be in compliance with the standards are afforded an opportunity to correct the identified deficiencies. When deficiencies are not corrected, ICE removes all detainees under its custody from the facility and refrains from utilizing the facility until such time as it is brought into compliance with ICE detention standards.

Detention Reforms

Detention reform is an ongoing initiative to tailor the conditions of immigration detention to its unique purpose. The present immigration detention system grew at an unprecedented rate over the past 15 years. Many of these facility beds are jails designed for penal - not civil - detention. ICE has a series of comprehensive detention reforms underway designed to ensure that detention conditions are safe, secure, and humane including:

- **Revised Detention Standards.** In February 2012, ICE released its newest national detention standards, known as the 2011 Performance-Based National Detention Standards (PBNDS 2011). The revised standards improve medical and mental health services, increase access to legal services and religious opportunities, improve communication with detainees with limited English proficiency, and improve the process for reporting and responding to complaints, and increase visitation. Implementation of PBNDS 2011 continues as a multi-year process involving contract modifications with priority being given to those facilities housing the largest population of ICE detainees. Currently the proportion of ICE detainees housed in facilities that operate under PBNDS 2011 is approximately 50 percent and continues to increase.
- **Risk Classification Assessment.** ICE completed its nationwide deployment of the new automated Risk Classification Assessment (RCA) in FY 2013, and will assess the tool's

effectiveness for improving transparency and uniformity in detention custody and classification decisions, aiding in identifying vulnerable populations, and promoting the prioritization of detention resources. The RCA contains objective criteria incorporating factors reflecting the agency's civil enforcement priorities and any special vulnerabilities that may impact custody and classification determinations to guide the decision-making of ICE officers and their supervisors regarding whether an alien should be detained or released, and, if detained, the alien's appropriate custody classification level.

- **Development of New Detention Facilities.** In March 2012, ICE opened the Karnes County Civil Detention Center in Texas, the first facility designed and built based on ICE's civil detention reform principles. The facility features innovative and cost-effective designs and new approaches to construction materials, staffing, and operations, plus greater freedom of movement, contact visitation, and medical and mental health services. New facilities have also been completed in the Los Angeles and Newark AORs to offer improved conditions of confinement for low-risk detainees. Those facilities are Adelanto for Los Angeles and Delaney Hall for Newark. In addition, the Essex facility in the Newark AOR was also expanded.
- **Reduction in Detainee Transfers.** ICE has made great strides in reducing long distance transfers of detainees by increasing detention capacity where it is most needed. This ensures that detainees can remain close to their families and attorneys, and also prevents disruptions to ongoing immigration proceedings, which has the effect of lengthening an alien's detention. In January 2012, ICE issued a Transfer Directive that builds on the successful reduction of long-distance transfers, by ensuring that when transfers are necessary, they are prioritized to minimize the long-distance transfers of detainees with family members, local attorneys, or pending immigration proceedings in the area where they are detained.

FY 2015 Planned Activities

In FY 2015, ICE will:

- Provide funding for a yearly average daily population of 30,539 in detention facilities;
- Achieve an estimated average bed cost of \$119.00 per day;
- Achieve compliance with the national detention standards by a thorough inspection program; and,
- Promote the parental interests directive with advocacy groups, legal providers, victims' rights organizations, family courts, and child welfare systems.

Procurement Activities

Electronic Health Record (eHR) System

The objective of the electronic Health Records (eHR) System is to replace multiple systems and manual processes and develop a centralized electronic Health Records system that supports comprehensive medical services management for Immigration and Customs Enforcement (ICE) detainees. The eHR System will enable full lifecycle oversight and management of detainee healthcare. The centralized eHR will streamline the care provided to detainees, automate medical documentation

reducing staff paper workloads, enhance medical management and oversight, enhance the standardization of care provided to detainees, reduce risk and legal liability of the overall system, and improve the accuracy and timeliness of Enforcement and Removal Operations (ERO), ICE Health Service Corps (IHSC) metrics. Note: See CASR for full description.

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)

Program Area (Funding in \$\$\$ thousands)	Sub-Program (Funding in \$\$\$ thousands)	Mission Need
Operations and Maintenance (O&M) (5,401)	Budgetary Resources: Direct Labor: 2,386 Other Direct Costs (ODCs): 2,446	Funding in FY 2015 will be used for O&M support of the eHR system. eHR is designed to effectively administer and oversee healthcare services delivered to detainees in ICE custody, improve the quality of care delivered, and expand the availability of medical information to all providers. eHR contributions to mission delivery supports DHS Mission Objectives 3.1 and 3.2 ensuring compliance with and consistently implementing ICE policy in the field and providing safe and humane detention conditions. (Source: Exhibit 300).
	GFTE (569)	Represents OCIO program GFTE only – does not include ERO IHSC clinical or management staff

Detention and Removal Operations Modernization (DROM)

The DROM Program is an ERO initiative to modernize its IT systems to further improve ERO's business processes for the detention and removal of illegal aliens from the United States. A major goal accomplished was the replacement of the legacy case management system with ENFORCE Alien Removal Module (EARM). With the delivery of EARM and other applications, the Program has reduced the length of detention, promoted information sharing, and streamlined business operations. Key enhancements included faster data access, improved data sharing, and improved forecasting and real-time trends analysis.

The DROM Program has deployed 14 major releases and currently developing a release to evolve EARM into a true portal, creating a single point of entry to access ATD tracking, bond processing, travel document generation, fugitive tracking, custody determination through risk classification, and other ERO activities. Upon completion of the release, the Program will move into sustainment phase.

2015 Total Request	748	700	131,591
Total Change 2014 to 2015	-	-	2,789

CURRENT SERVICES PROGRAM DESCRIPTION:

Fugitive Operations identifies, locates and apprehends priority aliens who have absconded from a removal order. Fugitive Operations focuses its enforcement activities on at-large criminal aliens as well as on those aliens who pose a threat to national security or to the community.

FY 2015 Request

In FY 2015, ICE requests \$131.6 million, 748 positions, and 700 FTE for Fugitive Operations. The FY 2015 request reflects an increase of \$2.8 million from FY 2014 Enacted amount. The FY 2015 request, as compared to FY 2014, includes:

- Increase of \$1.1 million for pay inflation;
- Increase of \$1.4 million for agency FERS contributions;
- Increase of \$716 thousand for a GSA rent increase;
- Increase of \$1.7 million for maintenance and repair at ICE-leased facilities;
- Increase of \$195 thousand for fleet capitalization;
- Increase of \$1.8 million for fugitive operations (described in more detail in the programmatic change section);
- Decrease of \$3.0 million from termination of one-time costs; and
- Decrease of \$1.1 million for cost savings associated with reduced IT contracts.

In FY 2015, Fugitive Operations will spend \$112.7 million on salaries and benefits and \$18.9 million on general expenses to fund the 129 FOTs and the Fugitive Operation Support Center (FOSC). The FOSC analyzes the outstanding cases of U.S. fugitive aliens and the at-large criminal alien population as recorded in the Enforce Alien Removal Module (EARM) in order to assist the National Fugitive Operations Program (NFOP) in locating aliens or to determine that a case should be closed.

Description

The NFOP was launched in 2003 with eight FOTs nationwide. Today, ICE has 129 FOTs deployed nationwide that plan and conduct in-depth reviews on fugitive cases, giving priority to fugitive criminal aliens and cases that pose a threat to public safety. The FOTs utilize well-developed methods and techniques to locate and arrest these priority targets as with the location and arrest of immigration fugitives. These cases are prioritized based on criminality and threat to public safety.

In April 2013, Fugitive Operations conducted Operation Safe Neighborhoods, a nationwide criminal alien operation focusing on priority targets deemed to be a direct threat to the safety and welfare of children. This six day operation resulted in 3,044 arrests including 2,747 convicted criminal aliens, 224 immigration fugitives and 73 individuals with outstanding criminal warrants of arrest.

Fugitive Operations Teams

Each of the 24 ICE field offices has at least one operational FOT. In total, ICE has 129 FOTs that are operational and conduct enforcement activities across the United States. Enforcement activity involves analysis and cross-referencing of records; surveillance; investigative interviews; liaising with federal, state and local public safety agencies as well as foreign government representatives; administration of subpoenas; and execution of both administrative and criminal warrants to make arrests. Actions to remove fugitives include: physical arrests; detainers placed on individuals located in a federal, state or local facilities; docket management including case category changes that result in a fugitive being removed from the backlog; and case closures.

In November 2013, Los Angeles Fugitive Operations and the U.S. Marshals arrested a Spanish national with Interpol Red Notice for Murder. Subject is wanted for the alleged murder of his girlfriend and dismemberment of her body.

Operations Return to Sender, Secure Streets and Cross Check are the primary enforcement operations utilized by the FOTs. These operations along with other specialized initiatives such as the Sex Offender Alien Removal (SOAR) operations, the Joint Effort initiative, and Interpol's 'Far Away' program have allowed the NFOP to attain the highest criminal arrest percentage since the inception of the program. In FY 2013, FOTs achieved a 75 percent criminal arrest rate, the highest since the inception of the program.

Initiatives employed by the FOTs include:

- *Operation Return to Sender:* An interior enforcement initiative that applies an organized and methodical approach to the identification, location and arrest of ICE fugitive aliens.
- *Operation Secure Streets:* An initiative to locate and arrest aliens who have been convicted of violations involving operating a motor vehicle while under the influence.

- *Operation Cross Check*: The operational umbrella for all other focused enforcement efforts that target other specific alien populations, such as at-large criminal aliens convicted of violent crimes.
- *Probation and Parole*: A program to identify, locate, and arrest criminal aliens on probation and parole.
- *Joint Effort*: An initiative that combines the resources and expertise of ICE with local law enforcement agencies to arrest fugitive aliens, including criminal aliens, and previously removed aliens.

- *Operation SOAR*: A coordinated foreign-born sex offender enforcement operation that builds on ICE's ongoing efforts to target the worst criminal aliens and remove them from local communities.
- *FAR Away*: An initiative liaison with Interpol to develop investigative leads and provide support to the FOTs in the location and arrest of foreign fugitive, or Fugitive Aliens Removal (FAR) cases—foreign nationals who are wanted for crimes committed abroad and are now at-large in communities in the United States.

On March 15, 2013, Washington Fugitive Operations arrested an El Salvadorian national with an INTERPOL red notice for Aggravated Kidnapping, Aggravated Robbery, and Attempted Aggravated Murder in El Salvador. Subject was a reentry after removal.

- *Most Wanted Program (MWP)*: A program that aids in the location and arrest of dangerous fugitives and at-large criminal aliens, develops community support by providing visibility and fostering awareness of our public safety mission, and

builds cooperative relationships with law enforcement partners through the exchange of mutually beneficial information aimed at removing these threats from local communities.

- *Operation Material Support (OMS)*: A collaborative effort of the NFOP, the FOSC, and the Operations and Intelligence Coordination Unit (OICU) aimed at identifying and apprehending removable criminal aliens who are suspected of having provided material support to a DOS designated foreign terrorist organization and/or otherwise pose a national security threat through a known history of supporting a non-designated organization involved in terrorist acts.
- *No Safe Haven*: A collaborative effort between the Fugitive Operations Division, NFOP/FOSC and the ICE National Security Investigations Division, Human Rights Violators and War Crimes Unit (HRV), to identify aliens who have received Final Orders of Removal and have failed to depart the United States. Specifically those aliens that have been determined to be associated with human rights violations and war crimes abroad.

- *Closing the Gap*: A public safety/information sharing initiative aimed at identifying sources of information of mass validated data at the federal, state, local and tribal level, which could identify priority aliens who are/have been involved in illicit criminal activity through affiliation/membership in a variety of security threat groups.
- *In Plain Sight*: A public safety initiative aimed at collaborating with internal stakeholders at ICE and other federal agencies to identify an efficient approach to developing acceptable policies, procedures and training to govern social media/open source information use within ICE, while ultimately protecting public privacy and government information systems.

FOT cases may also be developed through referrals from various sources, including the ICE TIPLINE, Interpol, the FOSC, USCIS referrals, other DHS components, and other law enforcement agencies. FOT members attend specialized training that includes ICE policy and guidance, immigration law, arrest techniques, and program-specific training to enable them to conduct operations specific to Fugitive Operations, including high-profile escapes, high-risk entries, and service of criminal warrants, and the location and arrest of foreign fugitives wanted abroad and found at-large in the United States.

Fugitive Operations Support Center

The FOSC serves as a national enforcement operations center providing ICE law enforcement staff with critical information on the identity, immigration history, criminal history, and location of high-priority aliens and provides direct support to the NFOP and FOTs.

The FOSC administers a proprietary and complex data system that serves as a foundation to correlate and analyze a wide-range of person-specific information. Various FOSC processes synthesize extensive amounts of data into actionable information used by FOTs to arrest aliens who pose a threat to our communities.

The FOSC leverages technology to achieve enforcement goals, employing technical systems and data sharing to increase capabilities to identify and remove aliens that pose a threat to our communities. In addition, the technical expertise and partnerships with law enforcement agencies enables the FOSC to support data integrity by analyzing the accuracy of cases within EARM, the primary case management data system. The FOSC addresses interoperability challenges associated with government databases by employing IT solutions that electronically examine large amounts of data. For example, the FOSC can quickly identify large groups of cases that contain indicators reflecting adjustment to a legal status, departure from the United States, incarceration, or other relevant factors previously unknown to officials in the field. This data is provided to field personnel who review the FOSC information and improve the accuracy of this enforcement data.

As part of the re-alignment of resources for probation and parole responsibilities from HSI to ERO, the FOSC has developed specific processes to effectively address this critical enforcement need to support the identification, arrest, and removal of these criminal aliens from the United States. The FOSC receives, reviews, and analyzes probation and parole data for criminal aliens and returns results to the FOTs. This also assists local probation and parole law enforcement resources by identifying cases that should be removed from the United States.

Fugitive Backlog by Fiscal Year

October 1, 2006	632,726
October 1, 2007	594,756
October 1, 2008	557,761
October 1, 2009	534,497
October 1, 2010	506,332
October 1, 2011	479,773
October 1, 2012	469,157
October 1, 2013	469,151

FY 2015 Planned Activities

In FY 2015, ICE will:

- Continue to conduct targeted enforcement operations focusing on at-large criminal aliens, criminal fugitives, aliens previously removed from the United States, and aliens found to be a threat to public safety, such as members of transnational street gangs, child sex offenders, and aliens with violent criminal histories;
- Continue to leverage partnerships with law enforcement counterparts on the identification of criminal aliens including those on probation and parole, foreign fugitives and transnational gang members, in order to increase public safety in U.S. communities.
- Conduct national and regional Cross Check Operations and other targeted enforcement operations in line with ICE priorities; and
- Focus the efforts of the FOOSC on proactive ICE priority alien analysis and close-in enforcement targeting services to field units. This will be accomplished through the use of enhanced technology, mass-data information networking with law enforcement and compliance partners, and the review and correlation of data available to DHS for exploitation and investigative development through proprietary systems and external sources.

CURRENT SERVICES PROGRAM DESCRIPTION:

The CAP identifies priority aliens prior to their release from incarceration. In addition, CAP is responsible for locating and apprehending dangerous criminal aliens who may have already been released from incarceration before ICE could respond.

FY 2015 Request

In FY 2015, ICE requests \$322.4 million, 1,711 positions, and 1,534 FTE for CAP. The FY 2015 request reflects an increase of \$28.3 million from the FY 2014 Enacted amount. The FY 2015 request, as compared to FY 2014, includes:

- Increase of \$2.7 million for pay inflation;
- Increase of \$3.8 million for agency FERS contributions;
- Increase of \$935 thousand for a GSA rent increase;
- Increase of \$3.6 million for maintenance and repair at ICE-leased facilities;
- Increase of \$517 thousand for fleet capitalization;
- Increase of \$600 thousand for the Criminal History Information System (CHIS, described in more detail in the programmatic change section);
- Increase of \$26.0 million to transfer the remaining CIRCA funds to CAP due to the completion of nationwide deployment of interoperability;
- Decrease of \$2.5 million for cost savings associated with reduced IT contracts; and
- Decrease of \$7.4 million for termination of one-time costs.

In FY 2015, CAP will spend \$194.2 million on salaries and benefits, and \$102.2 million on general expenses to support priority goals. This funding includes \$13.9 million in funding for personnel, travel, training and other administrative expenses for the 287(g) program.

Description

The mission of the CAP is to provide ICE-wide direction and support in the biometric and biographic identification, arrest and removal of those aliens who are incarcerated within federal, state, and local prisons and jails, as well as at-large criminal aliens. The identification and processing of incarcerated criminal aliens, before release from jails and prisons, decreases or eliminates the time spent in ICE custody and reduces the overall cost to the federal government. Integral to the effective execution of this program is the prosecution of criminal offenders identified by ICE officers during the course of their duties. ICE, in conjunction with the USAOS, actively pursues criminal prosecutions upon the discovery of offenses of the nation's criminal code and immigration laws.

In FY 2013, CAP executed multiple surges at all 24 field offices. These operations focused on identifying incarcerated aliens that were subject to removal that had not yet been placed in removal proceedings. Also integral to the effective execution of CAP is the prosecution of criminal offenders identified by ERO officers during the course of their duties. Together with the United States Attorney’s Offices, CAP pursues criminal prosecutions upon the discovery of offenses of the nation's criminal code and immigration laws thereby enhancing public safety and providing a significant deterrent to recidivism.

Through CHIS, ICE/ERO will electronically provide participating countries with certain criminal conviction information of foreign nationals who have a final removal order, and were convicted of certain felonies, prior to their removal to that nation. One resulting benefit of CHIS includes additional time for the participating country to conduct a more comprehensive screening of individuals prior to their arrival to determine what risk they present. It will also allow for foreign criminal conviction information to be used by ICE to better identify criminals within the alien population.

OHSR Alignment

3.2 Prevent Unlawful Immigration

2.3 Disrupt and Dismantle Transnational Criminal Organizations

1.1 Prevent Terrorist Attacks

ICE Strategic Plan Alignment

3.1 Detaining and Removing Aliens Seeking Illegal Entry

Associated HPPG/GPRA/Management Measures

Number of aliens removed convicted of the most serious crimes (level 1 offenders)

Number of convicted criminal aliens removed per fiscal year

Percent of aliens arrested or charged who will be electronically screened through the Secure Communities program

Risk-Based Approach

CAP uses a risk-based approach that places priority on jails and prisons that have the highest population of self-proclaimed foreign born nationals. CAP screens 100 percent of all intakes at the more than 4,300 Federal, state and local prisons and jails. CAP works to ensure that ICE enforcement priorities are followed and that detainers are issued for cases involving felony convictions or felony charges; three or more prior misdemeanor convictions; misdemeanors involving violence, sexual abuse or other serious conduct; or cases that pose a significant risk to national security, border security, or public safety.

CAP Personnel

CAP officers screen biometric and biographic leads received from Secure Communities Interoperability and other law enforcement agencies of prison and jail populations to identify priority aliens and place them into removal proceedings. CAP officers also investigate at-large criminal aliens who circumvented the interview and screening process. When an alien is identified and found to be amenable to removal through either a screening or an interview, a detainer is lodged if such action is in accordance with agency priorities and guidelines. Subsequently, in appropriate cases, CAP initiates proceedings to remove the alien from the United States.

There are more than 1,200 CAP Officers (excludes support personnel, 287(g), etc.) that monitor over 4,300 facilities and respond to more than 1.25 million biographic and biometric immigration alien queries forwarded by the LESC.

Initiatives

Automated Biometric Identification System (IDENT)/Integrated Automated Fingerprint Identification System (IAFIS) interoperability

- IDENT/ IAFIS is a biometric screening process that is consistent and efficient in the identification of criminal and other priority aliens. ICE leveraged an already-existing Federal information-sharing partnership between US-VISIT and the FBI that helps to identify criminal aliens at arrest or book-in without imposing new or additional workload on state and local law enforcement agencies. It has been fully deployed in all state and local jurisdictions, as well as Federal agencies, to include the DOD. Full deployment of IDENT/IAFIS interoperability has led to an increase in the number of criminal and other priority aliens identified and arrested.

The CIRCA funds transferred to CAP in FY 2015 will be used by the ICE Law Enforcement Systems and Analysis (LESA) division to deliver tools, studies, and recommendations to assist in the planning and decision-making (strategic, business, and operational) of ICE activities, particularly those relating to the apprehension and removal of criminal aliens. These tools will assist ICE leadership in the development of a performance-based program and budget that will result in a more efficient use of CAP resources through the modernization of immigration enforcement.

- **The Law Enforcement Support Center (LESC)** operates 24 hours a day/seven days a week to

The LESOC, located in Williston, Vermont, operates a communications center that provides National Crime Information Center confirmations within 10 minutes to law enforcement agencies 24 hours a day, 7 days a week.

provide timely and accurate information to law enforcement agencies on the identity and immigration status of individuals who have been arrested or who are under investigation for criminal activity. LESOC technicians have ready access to a wide range of databases and intelligence resources. In addition, the LESOC analyzes and disseminates information received from the public about suspicious or criminal activity. Information obtained from the public via ICE's toll-free tip hotline is analyzed by the professional law enforcement staff at the LESOC and quickly forwarded to ICE field units for investigation or other action, if law enforcement professionals determine that enforcement action is appropriate.

- **The Rapid REPAT Program** offers selected criminal aliens incarcerated in U.S. prisons and jails the opportunity to accept early release in exchange for voluntarily returning to their country of origin. Aliens who have been convicted of non-violent offenses may receive early conditional release if they have a final order of removal and agree not to return to the United States. Eligible aliens must agree to waive appeal rights associated with their state convictions. If aliens re-enter the country following removal under the Rapid REPAT program, state statutes may provide for revocation of parole and incarceration for the remainder of the alien's original sentence. Additionally, aliens illegally re-entering may face additional federal charges and penalties. Rapid REPAT also helps participating states reduce the costs associated with detention.
- **The Violent Criminal Alien Section (VCAS)** screens recidivist criminal aliens encountered through ICE's enforcement efforts and local law enforcement to seek criminal prosecution of criminal aliens to mitigate the risk of future recidivism and to enhance the integrity of the U.S.

immigration system. Integral to success in this effort is the collaboration with the Offices of the United States Attorney's to prosecute these criminal offenders.

FY 2015 Planned Activities

In FY 2015, ICE will:

- Transition the remaining infrastructure components of Secure Communities, the ERO/Law Enforcement and Statistical Analysis Unit (LESA) into CAP;
- Increase coverage of all federal facilities housing foreign born nationals.
- Identify the risks and resource requirements needed to increase state prison/jail coverage.
- Increase CAP Surge Enforcement Team (CAPSET) deployments as necessary while continuing analysis of field office needs; and

CURRENT SERVICES PROGRAM DESCRIPTION:

Through federal officers and contract technology and case management staff, the ATD program manages the supervision cases of approximately 22,000 people on a daily basis³. To ensure the most cost-effective use of Federal dollars, ICE has aligned its capabilities with immigration enforcement priorities and policies so that mandatory and priority individuals (such as violent criminals and those who pose a threat to national security) are kept in detention, while low-risk, non-mandatory detainees are enrolled in ATD programs, including electronic monitoring and supervision. This alignment places low-risk individuals that would be detained only to meet an arbitrary, mandated detention minimum into full-service ATD, which has a proven track record for participants' compliance with removal orders.

³ While a significant funding increase was received for FY 2013, it did not become available for use until late in the Fiscal Year and significant program expansion was difficult.

FY 2015 Request

In FY 2015, ICE requests \$94.1 million, 191 positions, and 170 FTE for the ATD program. The FY 2015 request reflects an increase of \$2.7 million from the FY 2014 Enacted amount. The FY 2015 request, as compared to FY 2014, includes:

- Increase of \$244 thousand for pay inflation;
- Increase of \$363 thousand for agency FERS contributions;
- Increase of \$176 thousand for a GSA rent increase;
- Increase of \$509 thousand for maintenance and repair at ICE-leased facilities;
- Increase of \$51 thousand for fleet capitalization;
- Increase of \$1.8 million for ATD Full-Service Capacity; and
- Decrease of \$397 thousand for cost savings associated with reduced IT contracts.

In FY 2015, ATD will spend \$23.6 million on salaries and benefits, and \$71.1 million on contractual support and equipment for the Full-Service and Technology-Only programs.

Description

The ATD program consists of two components: the Full-Service component and the Technology-Only component. All participants in the ATD program are at least 18 years of age.

ATD Participant Levels⁴

Fiscal Year	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013 ⁵
Average Daily Participant Level	17,586	16,532	17,957	23,034	22,090

OHSR Alignment

3.2 Prevent Unlawful Immigration

2.3 Disrupt and Dismantle Transnational Criminal Organizations

1.1 Prevent Terrorist Attacks

ICE Strategic Plan Alignment

3.1 Detaining and Removing Aliens Seeking Illegal Entry

⁴ The ATD program received a funding increase in FY 2013; however due to when ICE received the funds, significant program expansion was difficult.

⁵ Data is from the BI daily count population reports.

ATD Participation Determination

The ATD program provides an enhanced monitoring option for those aliens for whom ICE, or an immigration judge, has determined that detention is neither mandated nor appropriate. ATD is employed where an individualized case review determines that the alien may need a higher level of supervision than provided by the less restrictive release conditions associated with a bond, Order of Release on Recognizance, or an Order of Supervision alone. The ATD officer or agent will consider a number of factors when determining eligibility for ATD enrollment, and what option (Full-Service or Technology Only) is most appropriate. These factors include, but are not limited to:

Currently, the average cost of placing a participant in an ATD program component is \$0.30 for the technology-only component and \$8.49 for the full-service component. The average cost per participant per day in FY 2013 was \$4.73⁶.

- Stage in the removal process;
- Assets/property;
- Community and family ties;
- Legal representation;
- Criminal history;
- Compliance history; and,
- Humanitarian concerns.

Full-Service (FS) Program

In the FS program, contractors monitor participants using a combination of case management and technological monitoring. FS is more supervision intensive, and thus more costly, than other forms of ATD. Therefore, FS is generally used until a pattern of compliance is established. A participant may also be placed on FS from lower levels of supervision if he or she is found to be non-compliant or if the participant is preparing to depart the United States. A participant may be assigned to one of two forms of technological monitoring: the use of a global positioning system unit or enrollment in telephonic reporting voice verification program. For all participants that are assigned to the FS program, the contractor case specialist will perform duties that include but are not limited to:

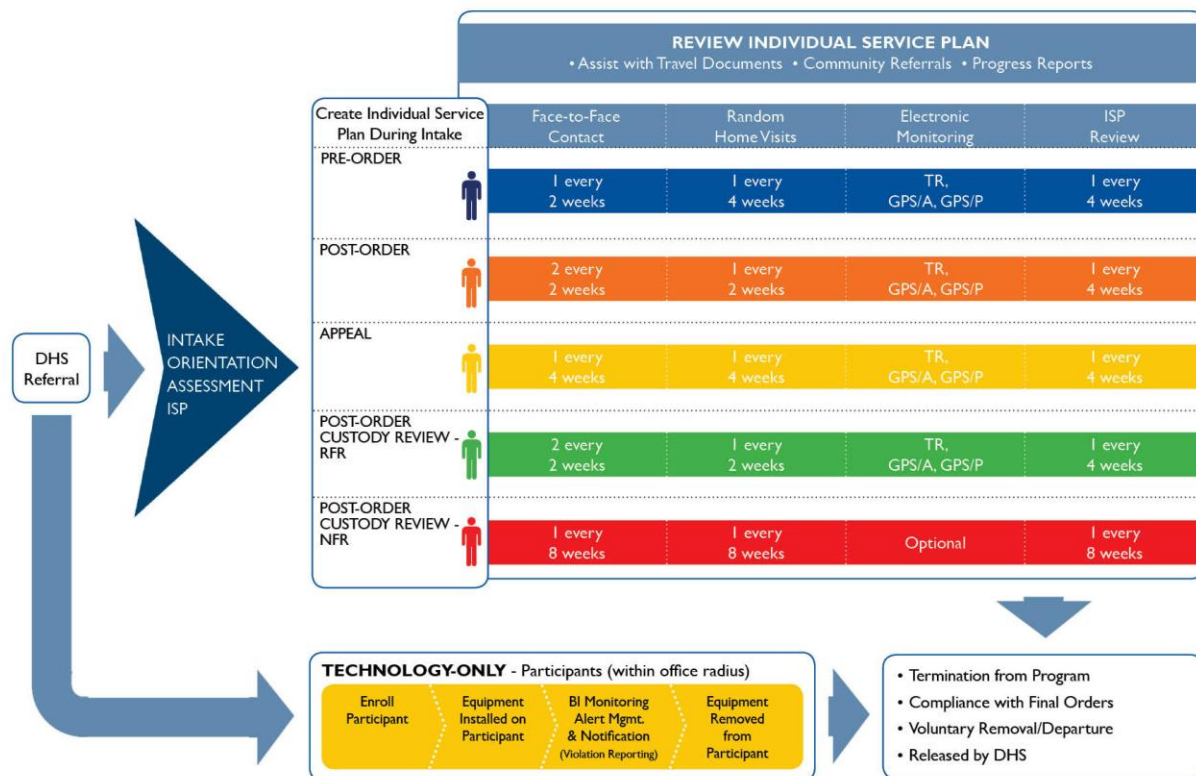

- Scheduled office visits;
- Unannounced home visits;
- EOIR case tracking through proceedings;
- Technology assignment at ICE discretion;
- Identification and resolution of all electronic monitoring alerts and violations;
- Community service referrals (e.g. medical, legal, translations services, etc.);

FS programs are currently available in 44 locations nationwide. The FS range of availability is determined on a location by location basis and the average range of service is within 65 miles from an ICE office.

The FS program features five stages of supervision for program participants, which are based upon their current stage in immigration court proceedings. Depending on the stage of supervision that the

⁶ Cost based on BI's monthly billing in FY2013.

participant is assigned, the contractor will conduct varying levels of scheduled office visits and home visits.

Technology-Only (TO) Program

TO services are available at all 24 field offices and ICE sub-office locations that have a trained ATD officer or agent. TO can be used when FS is not available or is not necessary for the program participant. In the TO program, ICE officers provide the case management services to participants that are typically handled by the contractor case specialist in the FS component. Of those offices that maintain an active TO component, the average caseload per office is 154 participants.⁷

The principal difference between the FS and TO programs is the contractor case specialist. ICE determines which program to use in a given case based on flight risk, likelihood of imminent removal, and prior compliance history, among other factors.

FY 2015 Planned Activities

- Continue to prioritize aliens for ATD who present the highest risk of flight with an emphasis on aliens who fall into a stated priority category but who are not appropriate to maintain in detention.
- Participant level will include aliens not subject to mandatory detention in order to focus costly detention space on criminal and priority aliens.
- Provide supervision of non-mandatory aliens through the lower-cost ATD program.

⁷ Based on the TO population and office ratio as of 9/30/2013. Data is from the BI's weekly population reports.

2015 Total Request	40	40	229,109
Total Change 2014 to 2015	-	-	(47,816)

CURRENT SERVICES PROGRAM DESCRIPTION:

The TRP supports ICE's mission by coordinating the removal of aliens from the United States who are subject to final orders of removal. TRP manages an extensive network of domestic and international flight routes, and supports domestic ground transportation.

FY 2015 Request

In FY 2015, ICE requests \$229.1 million, 40 positions, and 40 FTE for TRP. The FY 2015 request reflects a decrease of \$47.8 million from the FY 2014 Enacted funding level. The FY 2015 request as compared to FY 2014 amount, includes:

- Increase of \$56 thousand for pay inflation;
- Increase of \$85 thousand for agency FERS contributions;
- Increase of \$35 thousand for maintenance and repair at ICE-leased facilities;
- Increase of \$12 thousand for fleet capitalization;
- Increase of \$2.5 million for transfer of CBP-detained apprehended and detained individuals to ICE custody (described in more detail in the programmatic change section);
- Decrease of \$44 thousand for cost savings associated with IT contractor conversions;
- Decrease of \$20.9 million for termination of one-time costs for enhancement and non-

OHSR Alignment

3.2 Prevent Unlawful Immigration

3.2.4 Arrest, detain, prosecute, and remove

ICE Strategic Plan Alignment

3.5 Achieve Efficiency in the Removal Process

- reoccurring costs in FY 2014; and
- Decrease of \$29.5 million for reduced transportation requirements due to a reduction in detention beds (described in more detail in the programmatic change section).

In FY 2015, TRP will spend \$8.3 million on salaries and benefits and \$220.8 million on general expenses associated with the removal of an estimated 176,700 convicted criminal aliens primarily through contractual arrangements with commercial and charter air carriers managed by the ICE Air Operations Division.

Description

TRP coordinates the safe and secure transportation of aliens in ICE custody and their removal from the United States. In collaboration with ICE OIA and the DOS, ICE plans, defines and projects requirements; establishes memoranda of understanding (MOU) and repatriation agreements; and executes removal operations. TRP carries out its responsibilities through the Removal Management Division (RMD) and ICE Air Operations (IAO).

Removals and Returns by Type			
	Criminal*	Non-Criminal	Total
FY2008	114,415	254,806	369,221
FY2009	136,126	253,708	389,834
FY2010	195,772	197,090	392,862
FY2011	216,698	180,208	396,906
FY2012	225,390	184,459	409,849
FY 2013*	216,810	151,834	368,644

*Level 1 Criminals: FY2010 64,466; FY2011 75,086; FY2012 77,954; FY2013 74,159
(Data as of 9/30/13 as provided by LESA/STU.)

In FY 2012, TRP began developing methodologies to identify and prioritize nations who delay or who fail to cooperate in the timely return of their nationals. Delays in returning aliens to their countries of origin generate significant expenses to ICE due to increased detention stays. Additionally, these delays also present potential threats to public safety when ICE is unable to affect the alien's removal and is forced to release them into the United States.

Additionally, TRP conducted an assessment of further utilizing its airbase in Alexandria, Louisiana by expanding it into a staging facility. Leveraging and expanding the existing capacity for staging removals may potentially yield transportation efficiencies beginning in FY 2015.

Removal Management Division (RMD)

RMD supports field offices, ICE Attachés, and foreign embassies and consulates for travel document and removal related issues to ensure the safe and orderly removal of aliens from the United States through its Travel Document Unit (TDU). TDU also has oversight of the electronic Travel Document

System (eTD) and conducts liaison with governmental and non-governmental organizations, approximately 200 embassies and consulates within the United States, foreign governments and law enforcement organizations worldwide.

RMD's Post Order Custody Review Unit (POCRU) provides nationwide guidance and is responsible for providing case management support for aliens subject to a final order of removal. POCRU's primary focus is the oversight of the POCR process, which includes custody determinations pursuant to 8 C.F.R. 241 relating to aliens pending removal from the United States and those designated as national security threats or specifically dangerous. POCRU also adjudicates official requests for deferred action relating to aliens identified as cooperating witnesses and confidential informants.

ICE Air Operations (IAO)

ICE Air Operations (IAO) manages all aspects of flight operations for removals including scheduling flights, forecasting operational needs, and assisting with the coordination between foreign governments and embassies. The staff assigned to ICE Air, oversee aviation safety, standardization, and training. IAO provides services to all ICE field offices conducting regular flight operations from hubs in Arizona, Florida, Louisiana, and Texas.

IAO transports and removes aliens through the use of both air charters and commercial airlines: Air charter flights are used to remove aliens to countries with a high volume of removals; Special air charters are employed to accommodate aliens with medical conditions and high-profile removals; Commercial flights are used to facilitate the transfer, staging and removal of aliens via land ports of entry and for flights abroad.

Since 2006, ICE has transported or removed hundreds of thousands of aliens using air charter services. ICE procures the vast majority of air charter services from vendors through the General Services Administration Schedule. This innovative arrangement provides ICE cost effective and highly flexible flight

services. As a result, ICE can adjust rapidly to changing requirements such as dates, times, and operating locations.

IAO currently accomplishes commercial removals with the assistance of support services contract personnel but will be transitioning this work to government performance during FY 2014. Support services include: coordinating airline reservations, and requesting country clearances through both the Secure Message and Routing Terminal cabling system and the Department of State's electronic Country Clearance system.

Staging Location	FY 2011 Cost Per Flight Hour	FY 2012 Cost Per Flight Hour	FY 2013 Cost Per Flight Hour
San Antonio	\$7,857	\$7,747	\$8,027
Alexandria	\$8,377	\$8,167	\$8,967
Mesa	\$7,997	\$7,887	\$8,407
Miami	\$7,327	\$7,897	\$7,825
AVERAGE	\$7,890	\$7,925	\$8,307

ICE Ground Transportation

ICE's ground transportation activities support alien pick-ups, transfers, and removals. Transportation network performance directly affects other ICE operational areas, including Custody Management, Field Operations, Enforcement, and Repatriation. ICE's ground transportation network is currently decentralized,, whereby field offices control the majority of their own ground transportation networks and assets. Only four of the contracts are dedicated transportation contracts with the remaining services provided by detention contracts with a ground component. The Top 5 Field Offices (Los Angeles, San Francisco, San Antonio, Atlanta, and Seattle) account for approximately 54 percent of the total ground transportation spending.

FY 2015 Planned Activities

In FY 2015, ICE will:

- Coordinate the removal of an estimated 176,700 convicted criminal aliens; and
- Continue to utilize and refine the TRP removal strategy to maximize cost savings.

IV. Program Justification Changes

Department of Homeland Security
U.S. Immigration and Customs Enforcement
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Increase 1: FOIA Analyst Enhancement
PPA: Personnel Compensation and Benefits, Service, and Other Costs
Program Increase: Positions 12, FTE 6, Dollars \$964

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							1,650	1,478	197,638
Program Increase							12	6	964
Total Request	1,827	1,615	252,298	1,650	1,478	191,909	1,662	1,484	198,602

Description of Item:

ICE requests an increase of \$964,000 for 12 new positions that will process FOIA requests and reduce the projected backlog of requests in FY 2015. These new positions will also support ICE in FOIA-related litigation such as fee related issues and adequacy of the searches.

Justification:

The mission of ICE's FOIA office is to allow any individual the right to maximum disclosure of ICE's agency records and to respond to these requests in a timely manner. Under FOIA, ICE must respond to requests within 20 business days after the receipt of the request. ICE's failure to respond during this time period acts as a constructive denial and allows the plaintiff to file a complaint in Federal Court. ICE is responsible for paying for the attorney fees resulting from FOIA litigation out of its own budget. Accordingly, program offices' appropriated funds could be negatively affected by ICE's untimely response to FOIA requests.

Impact on Performance (Relationship of Increase to Strategic Goals):

Since 2012, ICE has incurred an estimated \$2.7 million in litigation costs and paid out \$795,181 in attorney fees from cases dealing with constructive denials (ICE failed to respond within the statutory mandated time of 20 business days) or search inadequacies (the agency's search for information was incomplete). The hiring of additional personnel will not only allow each FOIA analyst more time to conduct an in-depth preliminary review of each request, but it will facilitate the processing of a greater

number of complex cases in a shorter amount of time. This processing will help reduce the cost of litigation, which is estimated over \$2.5 million in FY 2015 and the number of possible constructive denials, which amounts to 99.8% or \$752,180 of all attorney fees ICE has paid out since 2012. These funds will also help the FOIA office to identify inadequacies in searches and records before they become the subject of an appeal or litigation. The FOIA office will be better equipped to contact the requester and discuss narrowing scopes to possibly avoid fee related litigation.

Program Increase 2: Detention Reform Outreach
PPA: DRO - Custody Operations

Program Increase: Positions 0, FTE 0, Dollars \$1,420

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase							-	-	1,420
Total Request									1,420

Description of Item:

In FY 2015 ICE requests \$1.4 million for the development and provision of training and stakeholder outreach related to the Prison Rape Elimination Act (PREA) and subsequent applicable guidance, the application of Performance Based National Detention Standards (PBNDS) at detention facilities, the use of segregation and applicable guidance, and other Administration detention reform initiatives.

Justification:

Many of the facilities utilized by ICE for immigration detention are jails designed for penal detention. Over the past several years, ICE has undertaken a series of comprehensive detention reforms designed to ensure that conditions of confinement are based on a civil, rather than a penal, model and offer enhanced detainee access to legal representation, medical care, and other detainee services. These reforms are intended to facilitate individual detention determination-based factors, such as threat to the community, criminal history, risk of flight, immigration status, medical and mental health needs, and special vulnerabilities. ICE has made substantial progress in a number of critical areas, including consolidation of facilities, aligning bed space with apprehensions, reducing detainee transfers, improving medical delivery, reducing costs, and developing and implementing safe and secure civil detention principles. To supplement this priority, ICE developed enhanced Performance Based National Detention Standards-2011 (PBNDS 2011) to improve conditions of confinement and detainee access services for individuals housed in ICE custody.

Currently there are 25 facilities fully compliant with the new PBNDS 2011, to include 21 dedicated facilities (housing ICE detainees only) and 4 non-dedicated facilities. Sixty (60) facilities have contractually agreed to adopt the requirements of the PBNDS 2011 Standard 2.11, "Sexual Abuse and

Assault Prevention and Intervention”. The PBNDS 2011 compliant facilities detain 53 percent of the ICE average daily population (ADP), while facilities compliant with the PBNDS 2011 standard 2.11 provide 70 percent coverage of the ICE ADP.

ICE will utilize the additional funding within the FY 2015 request to continue the implementation of PBNDS 2011 to other ICE facilities and to increase stakeholder outreach, training, and implementation of the priority detention reforms initiatives, including segregation reviews and the prevention of sexual abuse or assault, across the detention facility network. A new primary initiative will be the implementation of PREA requirements and PREA certification at ICE facilities following the anticipated promulgation of DHS’s PREA regulations. ICE funding may be in the form of one-time, up-front outlays or responses to requests from facilities for Equitable Rate Adjustments as they implement changes to their facility operations or staffing requirements in order to accommodate ICE's enhanced standards and optimal requirements.

Impact on Performance (Relationship of Increase to Strategic Goals):

ICE will increase detention facilities adherence to the Agency Priority Goal (APG) and Government Performance Results Act (GPRA) goal of “*detention facility compliance with national detention standards.*”

Department of Homeland Security
U.S. Immigration and Customs Enforcement
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Increase 3: CBP to ICE Detainee Transfer
PPA: DRO - Transportation and Removal Program
Program Increase: Positions 0, FTE 0, Dollars \$2,500

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase							-	-	2,500
Total Request									2,500

Description of Item:

ICE requests \$2.5 million in FY 2015 for the TRP to transfer all CBP-apprehended and detained individuals to ICE custody within all statutory and agreed upon timeframes.

Justification:

CBP Detainee Transfer to ICE:

The Transportation and Removal Program, and all other ICE enforcement programs, coordinate closely with other federal law enforcement entities. For example, as published in the *Immigration Enforcement Action of 2012*, the current apprehension process dictates that “*aliens who enter without inspection between ports of entry and are apprehended by the U.S. Border patrol (BP) of CBP may be removed, permitted to return to their country, or issued a Notice to Appear (NTA) before the immigration court. Aliens issued a charging document are either transferred to ICE for detention pending a hearing or released on their own recognizance.*”

The FY 2015 request will allow ICE to ensure the timely transfer of CBP-apprehended and detained individuals into ICE custody. ICE will work with CBP to ensure policies outlining the timely transfer of aliens are clearly documented and made available to law enforcement staff within both agencies.

Impact on Performance (Relationship of Increase to Strategic Goals):

ICE will enhance coordination with its federal law enforcement partner and dedicate appropriate resources to meeting the performance measures set forth in the Agency Priority Goals. Streamlining

activities ensures the safety and security of the nation's citizens and meets the requirements of the DHS Quadrennial Homeland Security Review Mission #3—*enforcing and administering our immigration laws*.

Department of Homeland Security
U.S. Immigration and Customs Enforcement
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Increase 4: Increase to Fugitive Operations
PPA: DRO - Fugitive Operations
Program Increase: Positions 0, FTE 0, Dollars \$1,827

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase							-	-	1,827
Total Request									1,827

Description of Item:

The FY 2015 request includes an increase of \$1.827 million in Fugitive Operations for additional fugitive operations to address the highest immigration enforcement priorities and the highest-threat cases on the fugitive backlog list.

Justification:

The National Fugitive Operations Program (NFOP) identifies, locates, and arrests removable aliens who are at-large within the United States, focusing on criminals and those who pose serious threats to public safety. The Fugitive Operations Support Center (FOSC) serves as the operational component of the NFOP's strategy to advance the public safety efforts for Enforcement and Removal Operations (ERO) across U.S. communities. The FOSC analyzes information from multiple sources and provides investigative lead packages and technical support to ICE law enforcement officers in the field.

The FY 2015 request provides \$1.827 million above the DHS request for additional fugitive operations. The requested funding will address the highest immigration enforcement priorities and the highest-threat cases on the fugitive backlog list. Without these funds ICE will be unable to undertake 589 enforcement priorities from the fugitive backlog list.

These funds will help ensure the most effective utilization of probation and parole data, and efficiently deliver operational support to the field to identify and arrest criminal aliens on probation and parole. ICE will further utilize the additional funding to be more efficient in data sharing capabilities and management of the technical systems and software that drive identification efforts. The NFOP, in collaboration with the FOSC, will broaden information sharing efforts to identify public safety threats,

including aliens convicted of or wanted for serious crimes. The NFOP will expand its reach to domestic and foreign law enforcement agencies involved in tracking persons known to be engaged in criminal gang activity, human rights and war crimes violations, threats to international/national security, child abuse, sex offenses, kidnapping/abduction, homicide, aggravated assault, and weapons offenses. Along with existing efforts, these additional funds will be applied to further decrease the fugitive backlog by funding field operations to increase arrests in areas with high criminal activity.

Impact on Performance (Relationship of Increase to Strategic Goals):

ICE enforcement priorities continue to address the need to make the country safer by removing the criminal alien population that poses a threat to our communities and public safety. Because of their attempts to use aliases and relocate in order to elude law enforcement and continue criminal activity, criminal aliens are more difficult to locate than non-priority aliens and require the additional expenditure of resources. Additional fiscal resources will enable the NFOP to support public safety efforts by increasing criminal alien removals from the U.S. through the location and arrest of these criminals.

Department of Homeland Security
U.S. Immigration and Customs Enforcement

Justification of Program Changes
(Dollars in Thousands)

Program Increase 5: Criminal History Information Sharing Program
PPA: DRO - Criminal Alien Program
Program Increase: Positions 0, FTE 0, Dollars \$600

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase							-	-	600
Total Request									600

Description of Item:

In FY 2015 ICE requests \$600,000 for the Criminal History Information Sharing (CHIS) program. The requested increase will fund the operations and maintenance (O&M) costs of CHIS.

Justification:

The Criminal History Information Sharing program (CHIS) is a DHS-led information sharing initiative between the United States Government (USG) and international partners. The purpose of CHIS is to provide valuable criminal history information on deportees being returned from ICE to external countries in advance of the transport departure from the U.S. The CHIS information gives foreign law enforcement officials additional time to conduct more comprehensive screening and vetting of individuals with a criminal background before their arrival in-country.

On January 14, 2014, the ICE Chief Information Officer and Enforcement and Removal Operations (ERO) Executive Associate Director signed an Interagency Agreement with the Department of State to fund the deployment of the CHIS initiative through June of 2015 to six Central American and Caribbean countries. These countries are El Salvador, Guatemala, Honduras, Dominican Republic, Jamaica, and the Bahamas. El Salvador will be the first to be deployed under this agreement. The agreed times for additional deployments under the agreement are scheduled for August and December of 2014, and April, August and December of 2015.

A draft Memorandum of Cooperation (MOC) as well as Standard Operating Procedures (SOP) have been circulated to the Office of Principal Legal Advisor, ICE Privacy, and the El Salvadorian government in preparation for the deployment of CHIS to that country. Reviews of the documents are

ongoing with all entities, including the Federal Bureau of Investigation (FBI), to ensure the appropriate legal, technological, and privacy aspects are being addressed within the deployment timeframe. Once the MOC and SOP have been approved by ICE and the FBI, it will be presented to the Office of General Counsel and the El Salvadorian representatives for review and signature prior to the tentatively scheduled deployment of CHIS within El Salvador.

Currently, ICE is working with the El Salvadorian Ministry of Foreign Affairs and the Ministry of Justice and Public Safety to determine technical and logistical requirements in preparation of the deployment.

Impact on Performance (Relationship of Increase to Strategic Goals):

CHIS will establish an improved process for the sharing of law enforcement data for the administration of criminal justice in order to interdict criminal acts and suppress criminal activities and threats to domestic security in foreign countries. ERO, in collaboration with the OCIO, will develop and deploy an enhanced CHIS platform within the 2014-15 calendar years.

Department of Homeland Security
U.S. Immigration and Customs Enforcement
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 1: Efficiencies in Detention and Alternatives to Detention
PPA: DRO - Custody Operations
DRO – Alternatives to Detention
DRO - Transportation and Removal Program
Program Decrease: Positions 0, FTE 0, Dollars \$(183,127)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Decrease							-	-	(183,127)
Total Request									183,127

Description of Item:

The FY 2015 request includes a total net reduction of \$183.127 million between the Custody Operations, ATD, and TRP PPAs. The reduction of 3,461 detention beds from the FY 2014 level of 34,000 to 30,539 in the FY 2015 request correlates to a \$155.324 million decrease to Custody Operations and \$29.519 million decrease to TRP. The FY 2015 request also includes an increase of \$1.716 million to ATD for additional full-service capacity to accommodate aliens that would have otherwise been detained.

ICE's FY 2015 request supports funding for 30,539 beds at a rate of \$119 per day.

Justification:

Bed Reduction:

The requested level of 30,539 detention beds in FY 2015 allows ICE to accommodate the current mandatory population as well as the non-mandatory Level 1 and 2 criminal populations. This level ensures the most cost-effective use of Federal dollars by focusing the more-costly detention capabilities on priority and mandatory detainees, including individuals who pose a danger to national security or a risk to public safety, with particular emphasis on violent criminals, felons, and repeat offenders. This strategy allows ICE to place low-risk, non-mandatory detainees in lower cost alternatives to detention programs, such as electronic monitoring and intensive supervision.

The reduction of \$155.324 million in FY 2015 for Custody Operations is based on funding 30,539 beds at a rate of \$119 per day. The reduction in beds has been made in coordination with a reduction in transportation funding or contracts. Consistent with its stated enforcement priorities and recent policy guidance, ICE will continue to detain aliens that fall into ICE's civil enforcement priorities or are subject to mandatory detention by statute, while shifting lower-risk aliens into the ATD program.

ATD Full Service Capacity:

The funding increase will allow lower-risk individuals who have been detained in the past to be placed in Full Service ATD. This allows ICE to base detention and ATD decisions upon existing priorities without the need to accommodate a mandatory minimum.

ICE will utilize the FY 2015 request to increase alien participation in all components of the ATD program. Appropriate levels of case management and monitoring will be applied based upon flight risk and compliance history. Developing lower cost methods for monitoring and supervising low-risk aliens continues to be an important aspect of the overall strategy to reduce costs at DHS.

The below chart represents the historical average costs per participant per day for each of the two ATD components: the Full-Service (FS) component and Technology-Only (TO) component. Based upon funding increases, the ATD program will have the ability to achieve the projected maximum capacities.

Fiscal Year	FY 2012	FY2013	FY2014	FY2015
Average Daily Participant Level	23,034	22,090	36,491	37,650
Average Daily Cost Per Participant	\$4.35	\$4.73	4.73*	4.73*
FS	\$8.04	\$8.49	\$8.49*	\$8.49*
TO	\$0.28	\$0.30	\$0.30*	\$0.30*

**Assuming population breakdown and pricing is the same in future years.*

Impact on Performance (Relationship of Decrease to Strategic Goals):

ICE prioritizes its resources by focusing on those aliens who pose the greatest risk to public safety and national security. ICE will detain all aliens that fall into ICE's civil enforcement priorities or are subject to mandatory detention by statute, while shifting lower-risk aliens into the ATD program. This will continue to support the efforts to increase the number of criminal aliens as a percentage of those who are removed from the United States. Additionally, ICE will achieve improved efficiency by increasing use of the Alternatives to Detention program by applying the most appropriate levels of case management and monitoring based upon risk and compliance history.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of immigration and customs laws, detention and removals, and investigations, including intellectual property rights and overseas vetted units operations; and purchase and lease of up to 3,790 (2,350 for replacement only) police-type vehicles; [\$5,229,461,000] **\$4,988,065,000**; of which not to exceed \$10,000,000 shall be available until expended for conducting special operations under section 3131 of the Customs Enforcement Act of 1986 (19 U.S.C. 2081); of which not to exceed \$11,475 shall be for official reception and representation expenses; of which not to exceed \$2,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security; of which not less than \$305,000 shall be for promotion of public awareness [of the Cyber Tipline and related] activities *related* to [counter] **countering** child exploitation; of which not less than \$5,400,000 shall be used to facilitate agreements consistent with section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)); ***of which not to exceed \$40,000,000 shall remain available until September 30, 2017 for maintenance, construction and lease hold improvements at owned and leased facilities***; and of which not to exceed \$11,216,000 shall be available to fund or reimburse other Federal agencies for the costs associated with the care, maintenance, and repatriation of smuggled aliens unlawfully present in the United States: *Provided*, That none of the funds made available under this heading shall be available to compensate any employee for overtime in an annual amount in excess of \$35,000, except that the Secretary of Homeland Security, or the designee of the Secretary, may waive that amount as necessary for national security purposes and in cases of immigration emergencies: *Provided further*, That of the total amount provided, \$15,770,000 shall be for activities to enforce laws against forced child labor, of which not to exceed \$6,000,000 shall remain available until expended: *Provided further*, That of the total amount available, not less than \$1,600,000,000 shall be available to identify aliens convicted of a crime who may be deportable, and to remove them from the United States once they are judged deportable: *Provided further*, That the Secretary of Homeland Security shall prioritize the identification and removal of aliens convicted of a crime by the severity of that crime: [*Provided further*; That funding made available under this heading shall maintain a level of not less than 34,000 detention beds through September 30, 2014]: *Provided further*, That of the total amount provided, not less than [\$2,785,096,000] **\$2,569,125,000** is for [detention] **enforcement** and removal operations, including transportation of unaccompanied minor aliens, ***of which \$45,000,000 shall remain available for ICE custody operations until September 30, 2019***: ***Provided further, That any recuperated detention bed contract cancellation fee will only be used for the procurement of detention beds***: *Provided further*, That of the total amount provided, \$10,300,000 shall remain available until September 30, [2015] **2016**, for the Visa Security Program: *Provided further*, That not less than \$10,000,000 shall be available for investigation of intellectual property rights violations, including the National Intellectual Property Rights Coordination Center: *Provided further*, That none of the funds provided under this heading may be used to continue a delegation of law enforcement authority authorized under section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)) if the Department of Homeland Security Inspector General determines that the terms of the agreement governing the delegation of authority have been violated: *Provided further*, That none of the funds provided under this heading may be used to continue any contract for the

provision of detention services if the two most recent overall performance evaluations received by the contracted facility are less than “adequate” or the equivalent median score in any subsequent performance evaluation system: *Provided further*, That nothing under this heading shall prevent U.S. Immigration and Customs Enforcement from exercising those authorities provided under immigration laws (as defined in section 101(a)(17) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(17))) during priority operations pertaining to aliens convicted of a crime: *Provided further*; That without regard to the limitation as to time and condition of section 503(d) of this Act, the Secretary may propose to reprogram and transfer funds within and into this appropriation necessary to ensure the detention of aliens prioritized for removal.

Language Provision	Explanation
¹ [\$5,229,461,000] \$4,988,065,000	Dollar change only. No substantial change proposed.
² of which not less than \$305,000 shall be for promotion of public awareness [of the Cyber Tipline and related] activities <i>related</i> to [counter] countering child exploitation	The specific reference to the Cyber Tipline is removed. Funds will continue to be used for promoting public awareness of activities related to countering child exploitation.
³ <i>of which not to exceed \$40,000,000 shall remain available until September 30, 2017 for maintenance, construction and lease hold improvements at owned and leased facilities;</i>	Over the next 5 years, ICE has an average of 47 leases expiring each year. For each expiring lease, there is a corresponding space acquisition project. The operational monies are one-year funds. The narrow window of funding does not align with the construction process, resulting in lapsed funding and an increase in project costs.
⁴ [<i>Provided further</i> ; That funding made available under this heading shall maintain a level of not less than 34,000 detention beds through September 30, 2014]	Removes language requiring the maintenance of a minimum number of average daily detention beds. The number of beds maintained should be based on actual need, to include those for whom detention is mandated by law, and those non-mandatory individuals for whom ICE has determined detention is a priority.
5 [\$2,785,096,000] \$2,569,125,000	Dollar change only. No substantial change proposed.
6 [detention] enforcement	Clarification that the funds are for “enforcement” and removal operations to more accurately reflect ICE’s organization structure.

<p><i>7 of which \$45,000,000 shall be provided for ICE custody operations and shall remain available until September 30, 2019: Provided further; That any recuperated detention bed contract cancellation fee will only be used for the procurement of detention beds</i></p>	<p>Currently, ICE procures 64 percent of its beds via dedicated facilities with 73 percent of this total provided from two service providers. ICE requests multi-year funds (five years) for a portion of Custody Operations funding to facilitate better rate negotiations. ICE's detention service providers have indicated a willingness to bring their rates down by one percent compounding over the life of the contract. Multi-year funding permits ICE to agree to base periods, and minimum guarantees spanning more than one fiscal year; and to obligate any cancellation fee in its entirety during the initial fiscal year. Any recuperated cancellation fee will only be used for detention beds.</p>
<p>8 That of the total amount provided, \$10,300,000 shall remain available until September 30, [2015] 2016, for the Visa Security Program</p>	<p>Year change only. No substantial change proposed.</p>

Personnel Compensation and Benefits, Service, and Other Costs Mission Statement

ICE Management and Administration (M&A) resources provide for top-level agency-wide management in the following areas: the Offices of the Assistant Secretary, Professional Responsibility, Chief Financial Officer, and Acquisition Management. The M&A activities include executive and overall leadership direction, strategic planning, policy development, and administrative support for the human, financial, information, and physical resources required to facilitate the operational capabilities of a productive ICE workforce.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	109,509	103,468	104,209	741
11.3 Other than Full-Time Permanent	1,977	939	946	7
11.5 Other Personnel Compensation	8,491	7,112	7,157	45
12.1 Civilian Personnel Benefits	39,447	36,921	40,440	3,519
Total, Salaries & Benefits	159,424	148,440	152,752	4,312

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary, or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits include life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, retirement, retention and other incentives.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$2,622	\$1,542	\$1,627	\$85

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$84	\$143	\$151	\$8

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$17,296	\$7,142	\$7,533	\$391

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$380	\$92	\$97	\$5

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$3,393	\$1,959	\$2,066	\$107

Communication, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
24.0 Printing and Reproduction	\$1	\$14	\$15	\$1

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$32,985	\$10,353	\$10,919	\$566

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$5,211	\$6,090	\$6,424	\$334

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$5,397	\$9,373	\$9,886	\$513

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

Headquarters Managed IT Investment Mission Statement

The ICE Office of the Chief Information Officer (OCIO) provides information technology services and products that enable ICE and DHS to meet their mission. The OCIO is committed to providing excellent and efficient service to customers in order to fulfill their IT needs. In order to meet these goals, the OCIO has developed a number of critical IT initiatives that will help ICE to modernize its IT systems, adapt and conform to modern IT management disciplines, as well as provide IT solutions throughout ICE.

Legal Proceedings Mission Statement

ICE Legal Proceedings (also referred to as the Office of the Principal Legal Advisor or OPLA) provides the legal advice, training, and services required to support the ICE mission while defending the immigration laws of the United States in the administrative and federal courts and is the legal representative for ICE. OPLA is the DHS legal component within ICE that is authorized to represent the Government in immigration proceedings that end up in immigration courts.

Domestic Investigations Mission Statement

The Office of Domestic Investigations' mission is to defend the Nation by enforcing trade and immigration laws through investigations that target the people, money, and materials that support terrorist and other criminal activities.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	735,958	750,061	755,466	5,405

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	735,958	750,061	755,466	5,405
11.3 Other than Full-Time Permanent	4,032	1,680	1,691	11
11.5 Other Personnel Compensation	140,462	145,968	146,993	1,025
12.1 Civilian Personnel Benefits	366,712	376,607	395,540	18,933
Total, Salaries & Benefits	1,247,164	1,274,316	1,299,690	25,374

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary, or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits include life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, retirement, retention and other incentives.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$7,385	\$16,922	\$14,666	(\$2,256)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$641	\$1,465	\$1,270	(\$195)

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$124,120	\$115,181	\$99,827	(\$15,354)

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$650	\$460	\$398	(\$62)

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$24,716	\$27,065	\$23,457	(\$3,608)

Communication, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
24.0 Printing and Reproduction	\$2	\$37	\$32	(\$5)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$30,550	\$43,233	\$37,470	(\$5,763)

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$32,516	\$69,556	\$60,285	(\$9,271)

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$18,726	\$19,439	\$16,848	(\$2,591)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.4 Operation and Maintenance of Facilities	\$38,800	\$34,673	\$30,051	(\$4,622)

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal government account.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.6 Medical Care	\$430	\$409	\$354	(\$55)

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$38,729	\$20,153	\$17,466	(\$2,687)

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal government account.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$8,883	\$16,329	\$14,153	(\$2,176)

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

International Investigations Mission Statement

The Office of International Affairs (OIA) includes offices in 49 countries. International Investigations represents the international assets of all ICE programs and collaborates with U.S. Citizenship and Immigration Services, U.S. Customs and Border Protection, and other DHS components. OIA liaises with foreign governments and international partners to facilitate the enforcement of U.S. customs and immigration laws beyond our borders in an effort to interdict criminals and prevent or disrupt criminal activity.

Summary Justification and Explanation of Changes

Visa Security Program Mission Statement

The Visa Security Program (VSP) represents ICE's front line in protecting the United States against terrorist and criminal organizations. VSP enhances the security of visa issuance at high-risk overseas posts by deploying trained special agents to identify and investigate potential terrorist and criminal threats before they reach the United States and interdicting those who would exploit the legal visa process.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	8,798	8,292	8,350	58
11.3 Other than Full-Time Permanent	28	28	28	-
11.5 Other Personnel Compensation	1,960	1,786	1,799	13
12.1 Civilian Personnel Benefits	8,466	8,007	8,160	153
Total, Salaries & Benefits	19,252	18,113	18,337	224

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary, or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits include life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, retirement, retention and other incentives.

Intelligence Mission Statement

The Office of Intelligence focuses on data and information related to the movement of people, money, and materials into, within, and out of the United States to provide accurate and timely reporting to ICE leadership and field agents in support of enforcement operations. ICE's intelligence functions are managed by a highly trained team of professionals with expertise in data and threat analysis, languages, financial investigations, counterterrorism and a number of other areas. ICE intelligence professionals process information from a variety of sources to provide assessments of patterns, trends, and new developments in a wide range of law enforcement areas. These include the following areas: terrorism, human smuggling and trafficking, money laundering and financial crimes, drug smuggling, cyber-crimes, identity and document fraud, and arms trafficking.

Summary Justification and Explanation of Changes

DRO - Custody Operations Mission Statement

Immigration enforcement authorities apprehend potentially removable aliens. In many cases, these aliens must be detained while they go through immigration proceedings and until they are removed. Often the number of apprehensions exceeds the detention space available and ICE Enforcement and Removal Operations must prioritize which cases will be detained. Custody Operations provides safe, secure, and human confinement for these aliens. It also ensures that aliens in ICE custody appear for their immigration hearings, and then for their subsequent removal.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change

DRO - Criminal Alien Program Mission Statement

The Criminal Alien Program (CAP) ensures that aliens are not released back into the community before they are removed from the United States. Through the CAP, ICE officers interview incarcerated aliens to determine whether they are amenable to immigration proceedings. If a case receives a final order of removal, ICE officers will immediately take that alien into custody upon completion of his or her criminal sentence and then prepare that case for removal.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change

DRO - Alternatives to Detention Mission Statement

The Alternatives to Detention program places low-risk aliens under various forms of intensive supervision rather than traditional detention as a cost-effective way to ensure their appearance for an immigration hearing or for removal. This program lowers the risk that aliens will be fugitives.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2015 budget.

ICE requests \$0.0 and 0 FTE for the FY 2015 DHS Balanced Workforce Strategy.

Position Type	FY 2013 Revised Enacted		FY 2014 Base		FY 2015 Annualization		FY 2015 Follow On		FY 2015 Increase		TOTAL FY 2014 – FY 2015 DHS Balanced Workforce Strategy	
	Pos.	FTE	Pos.	FTE	Pos.	FTE	Pos	FTE	Pos.	FTE	Pos	FTE
Total	-	-	-	-	-	-	-	-	-	-	-	-

Note: The above-referenced figures reflect that at this time, ICE has no confirmed requirement to establish new FTE above current staffing levels as a result of Balanced Workforce Strategy analyses that have been completed. As ongoing and future Balanced Workforce Strategy analyses are completed, the requirements for new FTE/positions performing work in FY 2013 will be adjusted accordingly.

FY 2015 DHS Balanced Workforce Strategy

In FY 2015, ICE is not requesting any additional funding to hire Federal employees associated with the Balanced Workforce Strategy (BWS) Program. BWS hiring decisions were coordinated to be achieved within ICE's reduced spend plans. Specific timelines for Federal employees to enter on duty and contracts to end are made on a case-by-case basis balancing operational needs, fiscal resources, and contracting constraints. ICE has executed its roll-off/roll-on strategy to avoid contractor/federal staff overlap.

Termination and reduction-based cost avoidance has been achieved on many of the contracts that ICE BWS has reviewed and directly contributes to the spending reduction goals necessary for ICE to meet affordability and cost reduction targets. ICE has implemented a comprehensive, strategic approach to focus on areas of over-investment and redundant functions and used the BWS process to downsize and balance our workforce to achieve affordability and efficiency goals.

L. Schedule of Service Wide Costs by Program/Project Activity

Program/Project Activity	FY 2013	FY 2014	FY 2015	FY 2014 to
	Revised Enacted	Base	Request	FY 2015 Change
	Amount	Amount	Amount	Amount
Personnel Compensation and Benefits, Services, and Other Costs	35,869	31,677	31,967	290
Headquarters Managed IT Investment	17,858	14,226	14,357	131
Legal Proceedings	35,037	35,286	35,609	323
Domestic Investigations	297,452	307,525	310,339	2,813

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement Automation Modernization

I. Appropriation Overview

A. Mission Statement for Automation Modernization:

The U.S. Immigration and Customs Enforcement (ICE) Automation Modernization account supports ICE TECS Modernization Program under the Law Enforcement Systems Modernization project and the Consolidated ICE Financial Solution (CIFS) (formerly Financial Systems Modernization).

The Automation Modernization account allows ICE to improve information sharing with the Department of Homeland Security (DHS) and other partner organizations. These initiatives strengthen information availability, improve case management capability, and enhance financial management and audit practices across ICE.

B. Budget Activities:

ICE TECS Modernization

ICE and U.S. Customs & Border Protection (CBP) components are undertaking an effort to modernize the legacy TECS mainframe system. The ICE TECS Modernization Program will deliver the primary investigative case management tool for ICEs special agents. More than 6,800 ICE Special Agents work on investigating a wide range of domestic and international activities arising from the illegal movement of people and goods into, within and out of the United States. The modernized system will provide ICE agents improved functionality to conduct case management activities and increased flexibility to meet evolving mission needs. The modernized system will incorporate new technologies and provide agents with key features such as: personalized homepages, agent case dashboards, linking of subject records, conducting structured and unstructured searches, improved oversight tools for supervisors, and enhanced interfaces for information sharing.

These include Investigative Case Management (including Bank Secrecy Act data access, Money Laundering reporting and tracking, and Telephone Link analysis), Intelligence Reporting and Dissemination, Management Reporting and Workflow, Security and Oversight, Shared Services, Data Management, and Infrastructure Acquisition and Deployment.

Consolidated ICE Financial Solution (CIFS)

The CIFS initiative will allow ICE to replace its legacy core financial system by acquiring financial management services from a Shared Service Provider (SSP). This initiative will assist ICE in achieving and sustaining unqualified financial audit opinions and performing effective financial management.

C. Budget Request Summary:

In FY 2015, ICE requests \$26,000,000 to continue the modernization of its information technology and systems infrastructure for the following program initiatives:

ICE TECS Modernization.....\$21M (0 FTE)

This request will fund the development and deployment activities for the Initial Operating Capability (IOC) for the ICE TECS Modernization program. . At this funding level, the program is targeting to become independent of the legacy TECS mainframe and achieve IOC by the end of FY 2015.

Consolidated ICE Financial Solution (CIFS).....\$5M (0 FTE)

The FY 2015 request will allow ICE's Project Management Office (PMO) to be fully staffed and oversee efforts associated with the transition to the SSP(s). The program office is responsible for overseeing the contracts and necessary services required to support the migration effort (e.g., data clean-up and conversion, business process re-engineering, training, interface development and implementation) for ICE and its five customers.

III. Current Services Program Description by PPA

**Department of Homeland Security
U.S. Immigration and Customs Enforcement
Automation Modernization
Program Performance Justification**
(Dollars in Thousands)

PPA: Automation Modernization

	Perm. Pos	FTE	Amount
2013 Revised Enacted	-	-	31,223
2014 Enacted	-	-	34,900
2015 Adjustments-to-Base	-	-	(34,900)
2015 Current Services	-	-	-
2015 Program Change	-	-	26,000
2015 Total Request	-	-	26,000
Total Change 2014 to 2015	-	-	(8,900)

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2015, ICE requests \$26 million for Automation Modernization to improve information sharing with DHS and other partner organizations.

The FY 2015 request reflects a decrease of \$5.2 million from the FY 2013 Revised Enacted amount and a decrease of \$8.9 million from the FY 2014 Enacted amount. The FY 2015 request includes a \$34.9 million reduction for the termination of one-time costs and a \$26 million increase for TECS Modernization and the CIFS.

Program Description

In FY 2015, ICE will fund two Automation Modernization initiatives.

TECS Modernization

ICE and CBP Components are undertaking an effort to modernize the legacy TECS mainframe system. The ICE TECS Modernization program will deliver the primary investigative case management tool (PATRIOT) for ICEs special agents. More than 6,800 ICE Special Agents work on investigating a wide range of domestic and international activities arising from the illegal movement of people and goods. The PATRIOT system will provide ICE agents

QHSR Alignment

4.1 Create a Safe, Secure, and Resilient Cyber Environment

3.2 Prevent Unlawful Immigration

2.3 Disrupt and Dismantle Transnational Criminal Organizations

1.1 Prevent Terrorist Attacks

improved functionality to conduct case management activities and increased flexibility to meet evolving mission needs. The modernized system will incorporate new technologies and provide agents with key features such as: personalized homepages, agent case dashboards, linked subject records, structured and unstructured searches, improved oversight tools for supervisors, and enhanced interfaces for information sharing. If ICE is unable to achieve mainframe independence by FY 2015, it will assume responsibility for maintaining the legacy TECS system and incur an annual \$28 million operations and maintenance cost starting in FY 2016.

CIFS

The CIFS initiative will allow ICE to replace its legacy core financial system by acquiring financial management services from a Shared Service Provider (SSP). The SSP will host and operate the core financial system for ICE and its customers. This will provide ICE greater control over its current and legacy data and greater ability to meet its reporting requirements for internal and external customers. The SSP will integrate core functionalities that will reduce manual data entry requirements and create new efficiencies for ICE and its customers. Moving to an SSP will also meet OMB guidance for federal agencies on how they acquire core financial systems.

FY 2015 Planned Activities

TECS Modernization

The TECS Modernization program will complete development of the Investigative Case Management (ICM) functionality. The program will also complete all testing and deployment of the IOC of the ICM system and achieve independence from the legacy TECS mainframe by the end of FY 2015.

CIFS

ICE's PMO will be fully staffed and oversee efforts associated with the transition to the SSP(s). The program office will oversee the contracts and necessary services required to support the migration effort (e.g., data clean-up and conversion, business process re-engineering, training, interface development and implementation) for ICE and its five customers. It will also support the requirements gap analysis work with the SSP to assist ICE and customers in facilitating work to analyze the impact of operating in an SSP environment (i.e., conforming to the existing SSP capabilities by changing business processes).

IV. Program Justification Changes

**Department of Homeland Security
U.S. Immigration and Customs Enforcement
Automation Modernization
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: TECS Case Management Modernization
PPA:
Program Increase: Positions 0, FTE 0, Dollars \$21,000

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	21,000
Total Request	-	-	-	-	-	-	-	-	21,000

Description of Item:

The TECS Modernization system will be the primary case management tool for ICE Special Agents. The ICE TECS program will focus on implementing case management functionality in two phases. Phase 1 will focus on Core Case Management and discontinuing the use of the legacy TECS by the end of FY15. Phase 2 will focus on Comprehensive Case Management.

Justification:

The ICE TECS Modernization program is a multiyear program to modernize legacy TECS case management functionality. This program supports ICE's mission of serving as the primary investigative arm of DHS as well as creating a law enforcement and criminal justice information sharing environment among federal, state, local, tribal, and international Law Enforcement Agencies (LEAs). The current legacy TECS system is mainframe-based and supported by technology that is aging, costly, and difficult to sustain, especially due to the limited availability of subject matter experts for ongoing support. The ICE TECS Modernization program will provide:

- An ICE-specific law enforcement and criminal justice information resource;
- The ability to better enable investigative and intelligence operations;
- Corresponding management activities and information sharing;

- Modernized, web-based tools to support information collection, analysis and management operations;
- The capability to seamlessly access and create discrete data linkages with DHS and other LEA information resources.

The TECS Modernization program will enable ICE to avoid incurring an annual O&M cost of \$28 million starting in FY 2016 by achieving mainframe independence in FY 2015, and will complete development of the ICM functionality. The program will also complete all testing and deployment of the Initial Operating Capability (IOC) of the ICM system.

Impact on Performance (Relationship of Increase to Strategic Goals):

The modernized TECS system will strengthen and unify DHS operations and management by increasing interoperability and improving operations, resource utilization and management decision making. The ICE portion of this effort, under the ICE TECS Modernization Program, will be a new Investigative Case Management System that replaces ICE's use of legacy TECS.

TECS Modernization functional improvements will include:

- Collaborative access and information sharing with other law enforcement agencies (federal, tribal, state and local);
- Enhanced search capabilities through structured and unstructured queries;
- Increased data quality and integration through auto population of data between systems and removal of duplicate data entry;
- Improved case management functionality through visually linking subjects and personalizing the user homepage for quick access to desired information;
- Streamlined delivery of intelligence-driven and other situational data to the front line;
- Automation of support for investigative, law enforcement and intelligence reporting and dissemination of unclassified information; and
- Updated user interface that will consolidate and streamline processes and simplify user interactions.

Additional technical improvements will include:

- Interoperability with other systems, including TECS Portal, EID Arrest GUI for Law Enforcement (EAGLE), Arrival Departure Information System (ADIS), Financial Crimes Enforcement Network (FinCEN), Authoritative ICE Data Warehouse (AIDW), Criminal Alien Investigation Initiative (CAII) and external systems;
- Alignment with DHS/ICE architecture standards for long-term sustainability;
- Reduced support costs and flexibility to quickly meet evolving mission needs; and
- Provide an environment with limited outages.

Department of Homeland Security
U.S. Immigration and Customs Enforcement
Automation Modernization
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Consolidated ICE Financial Solution
PPA:
Program Increase: Positions 0, FTE 0, Dollars \$5,000

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	5,000
Total Request	-	-	-	-	-	-	-	-	5,000

Description of Item:

This initiative will allow US Immigrations and Customs Enforcement (ICE) to replace the legacy core financial system that it owns and operates by acquiring financial management services from a Shared Service Provider (SSP). The SSP ICE selects will host and operate the core financial system for ICE and its customers.

ICE requests \$5 million to allow ICE's PMO to be fully staffed and oversee efforts associated with the transition to the SSP(s). The program office is responsible for overseeing the contracts and necessary services required to support the migration effort (e.g., data clean-up and conversion, business process re-engineering, training, interface development and implementation) for ICE and its five customers. It will also support the requirements gap analysis work with the SSP to assist ICE and customers in facilitating work to analyze the impact of operating in an SSP environment (i.e., conforming to the existing SSP capabilities by changing business processes).

Justification:

ICE is currently responsible for operating and maintaining a core financial system (CFS) and servicing the financial management requirements of five DHS customer components (i.e., United States Citizenship and Immigration Services, Science and Technology, National Protection and Programs Directorate, Office of Health Affairs, and DHS Management). ICE currently operates and maintains a financial system that is a single proprietary application that captures and records financial data in the General Ledger to provide support for tracking and recording transactions through the financial process for ICE and its customers. The system is the official financial system of record for ICE and its customers and supports the creation of the DHS consolidated financial statements.

Due to the proprietary nature of the software, there is currently one vendor able to support the financial system. The current financial system has additional operational constraints, including:

- Inability to support the requirements of the Financial Management System End State described by the DHS OCFO Office of Financial Management Financial Management System Standards published in March 2012;
- Lack of ready access to financial data for reporting and decision making; and
- Lack of integration with other business systems, such as procurement and asset management.

To address these challenges, as well as leverage existing financial management systems infrastructure, ICE is planning a migration to a SSP. The benefits of CIFS include:

- Improving users' experience by (1) providing an ability to enter and update data once, and avoid multiple logon of systems; (2) providing near real-time access across financial, acquisition, and asset management domains, and (3) enhance ease of use with modernized systems and training;
- Improving audit outcomes and data visibility by: (1) enabling financial reporting consistency; (2) reducing material weaknesses and deficiencies; and (3) ensuring appropriate financial controls are embedded into processes and monitored by governance bodies;
- Leveraging financial management solutions via SSPs whenever appropriate to obtain access to integrated systems; gain the flexibility to redeploy government and contractor resources from system operations and maintenance to data analysis and enhancement as needed; and optimize productivity improvements from improved user experiences.

Impact on Performance (Relationship of Increase to Strategic Goals):

The modernization of the ICE financial system directly supports Goal 4 of the ICE Strategic Plan: Constructing an Efficient, Effective Agency. Migration to a SSP will integrate core functionalities which currently run on disparate systems reducing manual data entry requirements and creating new efficiencies for ICE and its customers. Additionally, it will allow ICE to have greater control over its current and legacy data, a greater ability to meet its reporting requirements for internal and external customers, and will meet OMB guidance for federal agencies on how they acquire core financial systems.

V. Exhibits and Other Supporting Material

Automation Modernization Mission Statement

The Automation Modernization account allows ICE to improve information sharing with DHS and other partner organizations. The initiatives under Automation Modernization strengthen information availability, improve case management capability, and enhance financial management and audit practices across ICE. In FY 2015, ICE will fund two Automation Modernization initiatives - TECS Modernization and Financial Systems Modernization.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$51	\$530	\$425	(\$105)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$664	\$12,606	\$9,388	(\$3,218)

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$0	\$43	\$0	(\$43)

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$30,500	\$21,700	\$16,166	(\$5,534)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**U.S. Immigration and Customs Enforcement
Construction**

I. Appropriation Overview

A. Mission Statement for Construction:

U.S. Immigration and Customs Enforcement (ICE) maintains 18 ICE-owned and directly leased facilities and provides housing, processing, medical, administrative, and support facilities needed to assist and meet the needs of ICE Enforcement and Removal Operations, other ICE programs, and Department of Homeland Security tenants. The Construction account funds are available until expended.

B. Budget Activities:

With the Construction account, ICE has the authority to plan, design, and construct housing and processing, medical, administrative, and support facilities to support the detention of aliens, as well as perform repair and alteration of existing structures.

C. Budget Request Summary:

In FY 2015, ICE will use existing resources to accomplish critical repairs and maintenance. Critical projects include: items that pose a health or safety issue, items such as additional space in processing, medical, administrative, and support facilities, and capital and non-capital improvement projects to replace critical systems that are approaching their maximum life expectancy.

(Dollars in Thousands)

PPA: Construction

	Perm. Pos	FTE	Amount
2013 Revised Enacted	-	-	4,993
2014 Enacted	-	-	5,000
2015 Adjustments-to-Base	-	-	(5,000)
2015 Current Services	-	-	-
2015 Total Request	-	-	-
Total Change 2014 to 2015	-	-	(5,000)

CURRENT SERVICES PROGRAM DESCRIPTION:

Construction resources are authorized for necessary expenses to plan, construct, renovate, equip, maintain, and repair ICE-owned facilities necessary for the administration and enforcement of the laws relating to customs and immigration. These ICE-owned facilities support the detention of aliens including general housing, medical screening, processing, administrative support and legal proceedings. These facilities accommodate approximately 11 percent of the detained population with an average daily population of 3,642 at the end of FY 2013. In addition, ICE-owned facilities are utilized to support ICE field operations such as investigations, legal and administrative support functions. This includes Homeland Security Investigations, the Office of the Principal Legal Advisor, the Office of Professional Responsibility, the Office of Firearms & Tactical Programs (OFTP), and others. The ICE-owned portfolio consists of approximately 1.5 million square feet of space at 18 sites.

ICE owns and operates six secure detention facilities, called Service Processing Centers (SPCs), and related mission operations. The active SPC locations are: Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Miami, Florida; and Los Fresnos, Texas. Other ICE-owned facilities include space for Border Enforcement Security Task Forces, Criminal Alien Program teams, the OFTP, and tactical communications and other office space at these locations for ICE programs: Aguadilla, Puerto Rico; San Pedro, California; Altoona, Pennsylvania; Broadview, Illinois; Calipatria, California; Fishkill, New York; Guam; Honolulu, Hawaii; Huntsville, Texas; Oakdale, Louisiana; St. Thomas, U.S. Virgin Islands; and St. Croix, U.S. Virgin Islands.

ICE Construction Program funds are multi-year, non-expiring funds. ICE annually reviews prior year spending to recover and redirect funds to accomplish critical repair and maintenance projects. Critical projects include the repair, replacement, or alteration of facilities to address health and safety as well as mission critical operational issues. Additionally, capital improvement projects are needed to replace critical systems that are approaching or have exceeded their maximum life expectancy (deferred maintenance). This includes updating mechanical systems and other important infrastructure necessary to maintain ICE operations.

In FY 2015, ICE will use available balances to perform the most critical repairs and alterations to maintain ICE-owned facilities to prevent building structures and systems from becoming severely defective and eventually costing substantially more to repair.

N/A

G. Capital Investment and Construction Initiative Listing

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 and other immigration statutes authorize ICE to detain aliens who are charged with immigration violations, have entered the United States illegally, or have been ordered to leave the country. These aliens can be detained while their immigration proceedings are administered, which in turn facilitates their proper and expedient removal from the country.

The ICE Construction Program provides construction, maintenance, sustainment, and expansion of housing, processing, medical, administrative, and support facilities needed to support the detention of aliens. These projects are part of an ongoing capital investment program that is intended to meet the growing national demand for detention capacity. ICE continues to address the need for bed space and support facilities required to handle the processing and removal of aliens during immigration proceedings, relative to the total number of potentially removable aliens in the country.

Facility Repair & Alterations

1. Project Description, Justification, and Scope

Repair and alteration projects are continually identified at existing ICE-owned facilities. These projects are not capital construction projects, but maintenance, repair, and alteration projects necessary to maintain government-owned facilities and ensure they comply with safety and health code requirements in support to ICE tenant activities.

2. Significant Changes

In FY 2015, carryover funds within the Construction account will be used for deferred maintenance, emergency repairs and alterations, and approved capital improvements. Only critical repairs will be funded.

3. Project Schedule

	Work Initiated	Work Completed	Physical Start	Physical Complete	Total Estimated Cost (000)	Total Project Cost (000)
FY 2015 Budget Request	N/A	N/A	10/01/2014	9/30/2015	\$0.0	\$0.0

4. Schedule of Project Funding (Dollars in Thousands)

	Prior	FY 2013	FY 2014	FY 2015	Total
Obligation (actual and planned)	\$26,318	\$4,993	\$5,000	\$0	\$36,311
Expenditure (actual and planned)	\$26,318	\$4,993	\$5,000	\$0	\$36,311

5. Cost Estimate Detail and Changes (Dollars in Thousands)

	Current Estimate	Previous Estimate
Construction: \$0		
Other costs: \$0		
Project total for FY15: \$0		

6. Method of Performance

All detention projects are currently planned, managed, and monitored by the ICE Chief Financial Officer, Office of Facilities Administration (OFA). ICE entered into a MOU with the United States Army Corps of Engineers (USACE) to provide environmental documentation, planning, design, construction, procurement, and project management services.

7. Compliance with Applicable Public Laws, Regulations, Standards, and Executive Orders

The USACE is responsible for ensuring ICE projects comply with all applicable laws, code compliance, regulations and standards. The services being provided by USACE are managed and monitored by ICE/OFA.

ICE projects must comply with the following life-safety codes and standards:

- Local building codes or the latest edition of one of the model building codes, and the most current International Building Code
- National Fire Protection Association Standard 101 Life Safety Code
- National Electric Code

ICE OFA must also comply with the ICE Detention Design Guidelines (2002 edition), and the ICE Detention Construction Guidelines (2004 edition).

Handicapped accessibility codes and standards apply to ICE facilities as follows:

- Facilities must comply with the Uniform Federal Accessibility Standards, Federal Standard 795
- Facilities must also comply with the Americans with Disabilities Act Accessibility Guidelines.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**U.S. Immigration and Customs Enforcement
Student and Exchange Visitor Program**

I. Appropriation Overview

A. Mission Statement for Student and Exchange Visitor Program:

U.S. Immigration and Customs Enforcement (ICE) Student and Exchange Visitor Program (SEVP) enhances national security by collecting, maintaining, and providing reliable information on foreign students, exchange visitors, and the schools and exchange programs that host them. SEVP is an enforcement tool that keeps our Nation safe while facilitating the participation of students and exchange visitors in academic programs in the United States.

B. Budget Activities:

Through SEVP, ICE administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, and J visa classifications) in the United States. SEVP trains and conducts outreach to SEVIS users such as designated schools officials (DSOs) to ensure students are eligible for their visas and maintain their eligibility. The Counter Terrorism and Criminal Enforcement Unit (CTCEU) uses SEVIS to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools or otherwise violate the terms of their visa status. The CTCEU identifies and investigates schools and exchange visitor programs that are not in compliance with regulatory requirements, as well as crimes and fraud perpetrated by criminals and potential terrorists attempting to gain access to the United States through exploitation of SEVP non-immigrant visa status.

C. Budget Request Summary:

ICE requests \$145,000,000, 387 positions, and 355 full-time equivalents (FTEs) for SEVP in FY 2015. The requested funds will provide the resources necessary to fund base requirements for salaries, benefits, and operational expenses.

2015 Total Request	387	355	145,000
Total Change 2014 to 2015	-	-	-

CURRENT SERVICES PROGRAM DESCRIPTION:

SEVP is a bridge for various government organizations that have an interest in information on foreign students and exchange visitors. SEVP is progressing towards a risk-based framework to inform program activities and priorities, and has implemented strategies to address all of the recommendations from the 2012 U.S. Government Accountability Office (GAO) audit, including:

- Revised process to ensure consistency when accepting Letters in Lieu of Accreditation.
- Prioritizing all 10,000 schools based on risk and monitoring state licensing and accreditation status based on degree of associated risk.
- Developed new guidance for the certification of flight schools. ICE will only certify flight schools that hold Federal Aviation Administration (FAA) Part 141/142 certification and will not certify schools that hold provisional FAA certification status or no certification at all.
- Enhanced collaboration between SEVP, the CTCEU, and ICE Field Offices based on revised Standard Operating Procedures between the three units/programs.
- Proposed policy regulation changes to close vulnerabilities regarding non-compliant schools and students.

FY 2015 Request

In FY 2015, ICE requests \$145 million, 387 positions, and 355 FTE for SEVP. This is the same authority level requested in FY 2014. ICE will predominantly expend prior year balances and some FY 2015 fee collections to fund SEVP payroll and operations in FY 2015. Prior year carryover balances are funds collected, but not spent due to sequestration (SEVP must carryover the amount sequestered each year), delays in planned acquisitions, recruitment of field representatives and school recertification analysts, and to allow SEVP to have funds in the first two quarters of the next fiscal year when SEVP fee collections are at their lowest.

SEVP will spend \$44.8 million on salaries and benefits and \$100.2 million in general expenses related to SEVP operations and the CTCEU.

Description

Through SEVP, ICE enhances national security resilience by working to secure the student visa system from exploitation by terrorists, criminals and non-immigrants. As part of this effort, SEVP manages the School Certification Program, facilitates the F and M visa program, and administers the SEVIS system, a web-based system that maintains information on international students and exchange visitors (F, M, and J visa classifications) in the United States. The result is an information system that provides information to ICE, the Department of State (DOS) (manager of the J visa program), U.S. Customs and Border Protection, and U.S. Citizenship and Immigration Services, as well as a number of other federal enforcement agencies. SEVP also engages and trains SEVIS users and stakeholders on immigration laws and SEVP policies and procedures.

Furthermore, the CTCEU uses SEVIS to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools. The CTCEU also uses SEVIS to identify student visa fraud, possible criminal and terrorist activity, and schools and exchange visitor programs that are not in compliance with regulatory requirements.

School Recertification Program

Every two years, SEVP recertifies participating schools in accordance with the Enhanced Border Security and Visa Entry Reform Act of 2002. When schools fail to comply with policies or regulations, SEVP may withdraw certification, which prohibits bringing additional international students to the United States and disallows the continued enrollment of existing international students. To recertify a school, SEVP may visit the school on-site to verify compliance with reporting, retention and recordkeeping requirements.

As of February 17, 2014, ICE recertified 6,824 schools and withdrew certification for 2,037 schools. There are also 1,128 schools that SEVP is recertifying and 96 schools that have received certification end dates.

Field Representatives

ICE has developed a Field Representative Initiative to recruit and train a nationwide cadre of field representatives to engage stakeholders of the student visa program. The field representatives will become subject-matter experts regarding SEVP policies and regulations, and the SEVIS process and compliance requirements to maintaining recertification. In turn, the Field Representatives will train stakeholders in the process as well as inform of changes and improvements made to the SEVIS system.

The Field Representatives will be located near ICE Special Agent-In-Charge offices across the United States to ensure proximity and availability to stakeholders. These engagements will not only foster communication between ICE and SEVIS stakeholders, including over 10,000 SEVP certified schools, but it will also foster optimal compliance amongst stakeholders and improve the data integrity in the SEVIS system. In FY 2014, SEVP has already hired two Section Chiefs and hired and begun training 15 field representatives to deploy by FY 2014. SEVP plans to hire and train 15 additional field representatives by the end of FY 2014.

Counterterrorism and Criminal Exploitation Unit

CTCEU analyzes and refers school fraud criminal investigation leads to the respective ICE field office. During FY 2013, CTCEU analyzed 2,485,726 SEVIS leads, reviewed 2,475 academic institutions for possible identification of fraud anomalies, referred 169 academic schools, 209 flight schools, and 3,147 leads on SEVIS violators to ICE field offices for criminal investigation.

In FY 2014, CTCEU plans to increase the number of school reviews conducted, resulting in an estimated increase of CTCEU-identified fraudulent school referrals to HSI field offices for investigation of 10 percent compared to FY 2013. In FY 2015, CTCEU will continue to analyze and refer school fraud criminal investigation leads to the respective ICE field offices.

The CTCEU also runs the Agent/SEVIS School Outreach Program. This outreach program educates stakeholders about potential SEVP exploitations and provides subject matter expertise to partnering agencies when exploitation is suspected. During FY 2013, ICE Special Agents initiated 581 outreach presentations to SEVP-approved academic institutions nationwide.

SEVIS Modernization

One of SEVP's key tools to prevent the exploitation of F, M, and J visas is the SEVIS system. SEVIS is a web-based system that collects and provides real-time, up-to-date information on F, and M students and J exchange visitors and their dependents. SEVIS collects information on schools and program sponsors that are authorized to provide certificates of eligibility to F and M students and J exchange visitors. ICE uses SEVIS to help identify individuals who are a threat to national security and who are violating immigration laws or their visa status. Furthermore, ICE uses SEVIS to help identify and prosecute criminal organizations that are smuggling, transporting and harboring illegal aliens into the United States. In addition to ICE, other agencies within the Department of Homeland Security, the DOS, and the DOJ can access SEVIS.

In cooperation with the DHS Acquisition Review Board and in accordance with the February 14, 2013, Acquisition Decision Memorandum (ADM), SEVP is working to address SEVIS's remaining national security vulnerabilities through 2018. This includes stabilizing operations, adding necessary functionalities, and developing a project plan with a modular approach to update SEVIS. In FY 2015, SEVIS stabilization releases will continue and are planned through FY 2018. SEVP will continue to close vulnerabilities through the deployment of system functionality enhancements, and identify and prioritize long-term systems operations and development needs and options. Based on current stakeholder priorities, SEVP anticipates the development and deployment of the following functionality enhancements in FY2015 to reduce vulnerabilities related to institutional fraud; training and data quality; and financial information:

SEVP Fees

All SEVP operations, including CTCEU agents involved with SEVP, are fully funded by fees SEVP collects from schools, students, and exchange visitors. All prospective students and exchange visitors seeking an F, M or J visa are required to pay a SEVP processing fee. Current fees are \$200 for F and M visas and, depending on the purpose of the exchange visitor's visit, \$180 or \$35 for J visas.

Statutory and regulatory guidance requires SEVP to review its fee structure every two years to ensure that the costs of the services are fully captured by fees assessed on those receiving the services. ICE completed the latest fee study in the second quarter of FY 2012 and concluded that no immediate fee increase will be required for FY 2013-FY 2014. SEVP has started a new fee study FY 2015 and plans to have it finished by April 2014 for the FY 2015 – FY 2016 program fees.

FY 2015 Planned Activities

In FY 2015, ICE will,

- Hire and train the remaining 30 field representatives for a total of 60 field representatives nationwide.
- Assign a cadre of representatives to visit schools and academic institutions. The field representatives will answer questions from DSOs and students, review student files, conduct site visits, train DSOs, ensure the integrity of the data collected in the SEVIS databases, and complete other duties pertaining to the academic community and SEVP interface. These representatives will represent ICE in their unified outreach efforts to over 10,000 schools, 30,000 DSOs, and nearly 1 million nonimmigrant international students.
- Continue modernizing SEVIS by closing vulnerabilities through the deployment of system functionality enhancements and identifying and prioritizing long-term systems operations and development needs and options.
- Work on the recertification of schools to reduce the backlog caused by the delay in hiring analysts for the School Certification Unit.

Procurement Activity:***Student & Exchange Visitor Information System (SEVIS)***

The Student and Exchange Visitor Information System (SEVIS) is a web-based system that tracks information on nonimmigrants who are participating in the U.S. education system or designated exchange visitor program throughout the duration of their approved stay. Nonimmigrants may temporarily come to the US to study under three classes of admission: F for academic and language students, M for vocational students, and J for exchange visitors. SEVIS collects and maintains information on schools, exchange visitor programs, nonimmigrant students, exchange visitors, and their dependents.

Through SEVIS, SEVP maintains, analyzes, and provides information to ensure only legitimate foreign students or exchange visitors gain entry to the United States. The result is an information system that provides timely information to DoS, U.S. Customs and Border Protection (CBP), U.S. Citizenship and Immigration Services (USCIS), and ICE as well as a number of other federal law enforcement agencies.

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)

Student Exchange and Visitor Program Mission Statement

The Student Exchange and Visitor Program (SEVP) administers the School Certification Program and manages the Student Exchange and Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, and J visa classifications) in the United States. SEVIS is designed to keep our nation safe while facilitating the participation of foreign students and exchange visitors seeking to study in the United States.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	25,979	26,129	26,318	189
11.3 Other than Full-Time Permanent	105	76	77	1
11.5 Other Personnel Compensation	4,643	4,699	4,732	33
12.1 Civilian Personnel Benefits	12,625	12,931	13,678	747
Total, Salaries & Benefits	43,352	43,835	44,805	970

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary, or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits include life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, retirement, retention and other incentives.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$208	\$512	\$507	(\$5)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$8,568	\$9,242	\$9,154	(\$88)

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$755	\$798	\$790	(\$8)

Communication, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$20,475	\$24,472	\$24,237	(\$235)

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$12,368	\$21,232	\$21,028	(\$204)

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$5,929	\$3,991	\$3,953	(\$38)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.4 Operation and Maintenance of Facilities	\$139	\$126	\$124	(\$2)

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal government account.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$35,194	\$35,730	\$35,387	(\$343)

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal government account.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.8 Subsistence & Support of Persons	\$232	\$275	\$273	(\$2)

Subsistence and Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$987	\$1,820	\$1,802	(\$18)

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$1,009	\$1,915	\$1,897	(\$18)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
32.0 Land and Structures	\$1,579	\$939	\$930	(\$9)

Land and Structures includes the costs for land and interests in land; buildings and other structures; roads; additions to buildings; nonstructural (or resource) improvements, such as fences and landscaping; and fixed equipment additions and replacements.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**U.S. Immigration and Customs Enforcement
Breached Bond Detention Fund**

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). This Act amended Section 286 of the Immigration and Nationality Act of 1952, as amended, by establishing in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund. The first \$8 million in breached cash and surety bonds collected are allocated to the General Fund. All collections in excess of \$8 million are deposited as offsetting collections into this fund.

B. Budget Activities:

Amounts deposited into the Breached Bond Detention Fund can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in their obligations, and for expenses associated with the detention of criminal and illegal aliens. Funds remain available until expended.

C. Budget Request Summary:

In FY 2015, ICE requests \$65,000,000 for new collections and corresponding spending authority. ICE uses this money as part of its overall detention budget, and in FY 2015, \$60 million of this funding will allow ICE to fund an estimated 1,381 detention beds and related costs such as healthcare and compliance oversight.

¹The funding level displayed in the FY 2013 Revised Enacted column differs from the amount reported in the FY 2015 President's Budget Appendix and DHS's financial statements. The FY 2013 Revised Enacted includes spending authority for Breached Bond rather than collections made by ICE in FY 2013, which is reflected in the FY 2015 President's Budget Appendix, of which the first \$8 million in breached cash and surety bonds collected are allocated to the General Fund.

2015 Total Request	-	-	65,000
Total Change 2014 to 2015	-	-	-

CURRENT SERVICES PROGRAM DESCRIPTION:

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). This Act amended Section 286 of the Immigration and Nationality Act of 1952, as amended, by establishing in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund.

The first \$8,000,000 in breached cash and surety bonds collected are allocated to the General Fund. All collections in excess of \$8,000,000 are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in their obligations, and for expenses associated with the detention of criminal and illegal aliens.

In FY 2015, ICE will use \$60,000,000 of these resources to fund 1,381 detention beds. The remaining resources will be used to support the Bond Management Unit (BMU), administration of the Breached Bond program, and other allowable costs. The BMU supports field operations by providing guidance related to immigration bond management, and ensures field compliance with bond laws, regulations, policies, and procedures through training, site visits, and technical oversight. The BMU also coordinates with other ICE programs to facilitate the timely resolution of bond litigation issues, as well as financial reporting to ICE leadership.

Breached Bond Detention Fund Mission Statement

The Breached Bond Detention fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of \$8,000,000 posted under the INA, which are recovered by the Department of Justice, are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**U.S. Immigration and Customs Enforcement
Immigration Inspection User Fees**

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

The Immigration and Customs Enforcement (ICE) Immigration Inspection User Fee account is a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry as codified in 8 U.S.C. 1103, 1356, Section 286, the Immigration and Nationality Act. These fees finance a portion of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air and sea ports. Funds in the Immigration Inspection User Fee account remain available until expended.

B. Budget Activities:

The Immigration Inspection User Fee will fund 1,220 detention beds in Fiscal Year (FY) 2015.

C. Budget Request Summary:

ICE requests \$135,000,000 in spending authority for FY 2015. The requested funds will finance a portion of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports.

III. Current Services Program Description by PPA

**Department of Homeland Security
U.S. Immigration and Customs Enforcement
Immigration Inspection User Fees
Program Performance Justification**
(Dollars in Thousands)

PPA: Immigration Inspection User Fees

	Perm. Pos	FTE	Amount
2013 Revised Enacted	-	-	236,773
2014 Enacted	-	-	135,000
2015 Current Services	-	-	135,000
2015 Total Request	-	-	135,000
Total Change 2014 to 2015	-	-	-

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2015, ICE requests \$135 million budget authority and no positions or FTE for Immigration Inspection User activities. This is the same authority level requested in FY 2014.

The Immigration User Fee account was established as a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry. These fees finance a portion of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports. These ICE operations encompass:

- expanding, operating, and maintaining information systems for non-immigrant control;
- detecting fraudulent documents used by passengers traveling to the United States;
- investigating crimes relating to admissibility and establishing the government's legal position regarding all detentions;
- representing the government in all legal proceedings involving immigration and admissibility;
- transporting detained aliens who arrive at air and sea ports-of-entry to immigration legal proceedings;
- providing detention and removal services for inadmissible aliens arriving on commercial aircraft or vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry;
- providing training and technical assistance to commercial airline and vessel personnel regarding detection of fraudulent documents; and

- program oversight and management.

In FY 2015, ICE will use \$53,000,000 of the requested resources to fund 1,220 detention beds and related expenses such as healthcare. The remainder of the funds will be split between other expenses such as investigations, legal proceedings, intelligence gathering, alien transportation, and systems for non-immigrant control.

¹In FY 2013, there were 95 FTEs from the Office of the Principal Legal Advisor (OPLA) associated with Immigration Inspection User Fee (IIUF). ICE has reclassified funds in IIUF's Personnel and Compensation Benefit object classes in order to capture the hours performed by OPLA. The 95 FTEs are included in the Legal Proceedings' personnel count in the Salaries and Expenses document.

Immigration Inspection User Fees Mission Statement

The Immigration User Fee account was established as a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry. These fees are used to recover some of the costs of ICE operations to deter, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into

the United States through air or sea ports.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	16,560	-	-	-
11.3 Other than Full-Time Permanent	226	-	-	-
11.5 Other Personnel Compensation	13	-	-	-
11.8 Special Personal Services Payments	13	-	-	-
12.1 Civilian Personnel Benefits	6,070	-	-	-
Total, Salaries & Benefits	22,882	-	-	-

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits including life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, recruitment, retention and other incentives.

¹FY13 Revised Enacted funding includes 0.132% Across-the-Board Rescissions, Sequestration, and Reprogrammings/Transfers for appropriated funds. The fees represent actual collections in FY 2013, and do not include reductions from sequestration of funds in FY 2013 (i.e., \$104 million sequestered in Aviation Security fees and \$4 million sequestered in Vetting fees). The FTP reflects enacted FY13 levels, and FTE reflects actual FTE used in FY13.

²FY14 Enacted funding does not include the 7.2% sequestration of mandatory accounts, and the Aviation Security Passenger fee reflects updated estimates from the enacted level.

³The deficit reduction portion of Aviation Passenger Security fee in the FY14 Revised Enacted (\$390 million) and the FY15 Request (\$1.19 billion) is not included in the TSA charts above.

RESCISSION OF PRIOR YEAR FUNDS	---	(25,035)	---	---	---	(25,035)	---	(59,209)	---	---	---	(59,209)	---	---	---	---	---
Net, Direct Appropriations and Budget Estimates	54,129	4,833,000	---	---	54,129	4,833,000	55,698	4,835,779	---	---	55,698	4,835,779	53,664	4,157,200	---	---	53,664
FY13 Revised Enacted funding includes 0.132% Across-the-Board Rescissions, Sequestration, and Reprogrammings/Transfers for appropriated funds. The fees represent actual collections in FY 2013, and do not include reductions from sequestration of funds in FY 2013 (i.e., \$104 million sequestered in Aviation Security fees and \$4 million sequestered in Vetting fees). The ETE reflects enacted FY13 levels and ETE reflects actual ETE used in FY13. FY14 Enacted funding does not include the 7.2% sequestration of mandatory accounts, and the Aviation Security Passenger fee reflects updated estimates from the enacted level. The deficit reduction portion of Aviation Passenger Security fee in the FY14 Revised Enacted (\$390 million) and the FY15 Request (\$1.19 billion) is not included in the TSA charts above.

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Aviation Security

I. Appropriation Overview

A. Mission Statement for Aviation Security:

The Aviation and Transportation Security Act (ATSA), P.L. 107-71, enacted on November 19, 2001, established the Transportation Security Administration (TSA) to protect the Nation's transportation systems to ensure the freedom of movement for people and commerce. The Aviation Security appropriation consists of programs whose primary focus is to secure aviation transportation. The path to achieving this mission has evolved in the years since the September 11th attacks. Enhancements in aviation security have included emphasis in explosives detection training and technology, modifications to the prohibited items list, segmenting the passenger population based on risk, and changes to TSA security screening protocols.

B. Budget Activities:

Screening Operations

Screening Operations includes the Programs, Projects and Activities (PPAs) that support the pay, training, outfitting, and operating costs for the Transportation Security Officer (TSO) workforce. Funding is also included for checkpoint support, purchase, installation, and maintenance of screening equipment, to include Advanced Imaging Technology (AIT), Explosives Detection Systems (EDS) and Explosives Trace Detection (ETD) machines.

Aviation Direction and Enforcement

Aviation Direction and Enforcement includes activities that ensure TSA continues to build a strong security regulation and enforcement presence on-site at the Nation's commercial airports. Funding requested supports air cargo and airport and airline regulation compliance through scheduled and risk-based special inspections, explosives detection canines, international programs, quality assurance programs, Federal Air Marshals (FAMS), and airport management administrative support staff.

Terrorism in the aviation domain is an enduring and highly adaptive threat. Terrorists study our vulnerabilities to learn how to exploit procedural and technological security gaps to increase the lethality and political impact of their attacks. Aviation continues to be a target of coordinated terrorist activity and despite all efforts and advances in intelligence, technology, and screening processes, the threat to the U.S. transportation sector remains high. Examples include the 2010 attempted bombing of a cargo jet using a bomb disguised as an ink jet cartridge, the 2009 attempted attack of Northwest Airlines Flight 253 from Amsterdam to Detroit on Christmas Day, an alleged terrorist plot to detonate liquid explosives onboard multiple aircraft departing from the United Kingdom for the United States in August 2006, and terrorists' intended attacks on U.S.-bound flights originating from multiple foreign airports in December 2003.

TSA employs a multi-layered, risk-based, intelligence-driven approach to its security and counter-terrorism mission. TSA continues to undertake efforts to test and deploy security protocols to increase security while improving the passenger experience at aviation security checkpoints by applying risk-based, intelligence-driven screening procedures and enhancing its use of technology. TSA's approach is based on the following guiding principles:

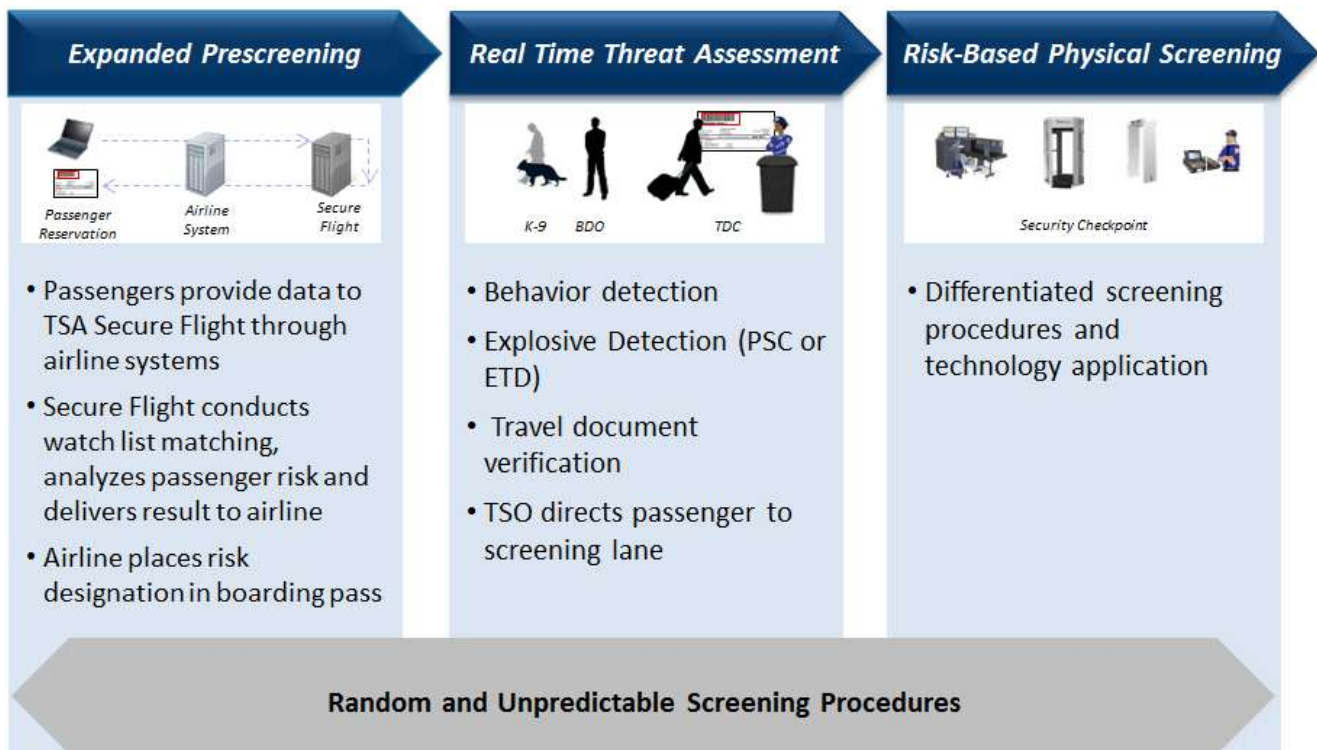

- The majority of airline passengers are low risk;
- The more information available on each passenger, the easier it is to assess risk;
- Behavior detection and interviewing techniques should be strengthened in the screening process;
- TSA must accelerate its efforts to optimize screening processes and use of technology to gain system-wide efficiencies; and,
- Increase security by focusing on unknowns, while expediting known or trusted travelers.

The vision of risk-based security is to increase overall aviation system security by focusing on high-risk and unknown passengers while expediting known or trusted travelers. In an effort to continuously improve aviation transportation security, TSA undertakes new initiatives to focus its resources and improve the passenger experience at aviation security checkpoints.

TSA's risk-based security approach reflects a variety of diverse initiatives and efforts that enhance the effectiveness and efficiency of screening operations while improving the customer experience. One of the most visible, TSA Pre✓™, places more focus on pre-screening individuals in order to expedite the checkpoint screening experience. First implemented as a proof of concept in October 2011, TSA Pre✓™ has since expanded from 40 airports in FY 2013 to more than 100 airports nationwide providing dedicated TSA Pre✓™ screening lanes. Eligible participants include U.S. citizens, Lawful Permanent Residents (LPRs) and foreign citizens who are members of the U.S. Customs and Border Protection (CBP) Global Entry; U.S. citizens, LPRs and Canadian citizens in the CBP NEXUS program, and U.S. citizens and LPRs in the CBP SENTRI program. Certain airline frequent fliers, military personnel (active duty, National Guard, and Reserve), Members of Congress, individuals who enroll directly in TSA Pre✓™, and certain other trusted populations are also eligible for expedited screening under the TSA Pre✓™ initiative. On a flight-by-flight basis, Secure Flight also conducts risk assessments on passengers who can be identified as low risk and, as a result, are eligible to receive the TSA Pre✓™ expedited screening. Expedited physical screening is also afforded to TSA Pre✓™ eligible travelers in standard screening lanes at airports unable to sustain a dedicated TSA Pre✓™ lane. In addition, individuals 12 years old and under and 75 years old and older are also afforded expedited screening at all TSA screening lanes by allowing them to leave on shoes and light jackets.

Once TSA determines a passenger is eligible for TSA Pre✓™ expedited screening, their low-risk status is contained in the passenger's boarding pass. Many of the airlines participating in the program print TSA Pre✓™ on the boarding passes of eligible passengers. TSA reads the barcode at designated checkpoints and the passenger may be referred to a TSA Pre✓™ lane where they will undergo expedited screening. TSA Pre✓™ expedited screening procedures include options such as no longer removing shoes, leaving laptops in their bag, leaving on light jackets/outerwear and belts, and leaving 3-1-1 compliant liquids/aerosols/gels in the carry-on bag. No passenger is guaranteed to receive

expedited screening, and all passengers are subject to random and unpredictable screening measures throughout the airport.

As of January 2014, dedicated TSA Pre✓™ lanes are provided over 100 U.S. airports. At the beginning of December 2013, TSA exceeded the priority goal of having at least 35 percent of the nearly 1.8 million daily passengers screened by TSA eligible for expedited physical screening. During the calendar year 2014, TSA will continue to build upon this success to further the percent increase of daily passengers eligible to receive expedited screening by the end of calendar year 2014. TSA has a variety of endeavors planned for calendar year 2014 to promote risk-based security objectives, the focus of which includes the following initiatives:

- Full implementation of the TSA Pre✓™ Application Process. This program which began during the first week of December 2013, provides travelers the ability to apply directly for participation in the TSA Pre✓™ program. TSA plans to open 300 enrollment centers across the nation during the first quarter of calendar year 2014.
- Expanding the Known Crewmember (KCM) Initiative, which allows officers to verify identity and employment status of airline flight crews and providing expedited screening at designated access points currently at 29 U.S. airports.
- Expanding beyond the current nine U.S. air carriers participating in TSA Pre✓™ to include certain foreign air carriers.
- Extending eligibility for TSA Pre✓™ to nearly 2.2 million DOD members of the military, including active duty, National Guard, Reserve, and U.S. Coast Guard personnel.

Airport security checkpoints are only one part of a multi-layered system for aviation security. Other parts, both seen and unseen by the public, include intelligence and analysis, BDOs, explosives detection canine teams, Federal Air Marshals, and closed-circuit television monitoring. In order to retain a certain element of randomness to prevent terrorists from gaming the system, TSA always incorporates random and unpredictable security measures throughout the airport and no individual will be guaranteed expedited screening. Expanding expedited screening and aligning our technology and risk-based security programs improves aviation security by providing expedited physical screening to travelers evaluated as lower risk and more attention to passengers who present an unknown or higher risk to the aviation system. By modifying the physical security requirements at the checkpoint for lower risk travelers, TSA is also able to improve the travel experience for these travelers and is fundamental to TSA's evolution to a high-performing counterterrorism organization.

C. Budget Request Summary:

The Transportation Security Administration requests 54,708 positions, 50,318 FTE, and \$5,683,304,000 in gross discretionary appropriated funding for the Aviation Security appropriation in FY 2015. This appropriation also includes an additional \$250 million in mandatory fee collections for a total budget authority of \$5,933,304,000. The total adjustment-to-base includes a decrease of 580 positions and 522 FTE, an increase of \$829,712,000 in appropriated funding, and a decrease of 1,924 positions, 1,740 FTE and \$129,143,000 in program changes including:

- Decrease of \$19,910,000 for reducing Playbook Operations;
- Decrease of \$94,843,000 to leverage efficiencies gained from Risk Based Security (RBS);
- Decrease of \$4,873,000 for FFDO efficiencies;
- Decrease of \$19,517,000 for Federal Air Marshals; and
- Increase of \$10,000,000 for EDS restoration of base.

Included in the total ATBs referenced above is a transfer of the Federal Air Marshals (FAMS) appropriation into the Aviation Security appropriation, including positions, FTE and \$803,909,000 in funding. This consolidation of FAMS into Aviation Security better reflects TSA's organization and management structure and will enable the Agency to more rapidly apply its law enforcement and related resources to meet emerging threats. The remaining appropriated FAMS funding was transferred to the Surface Transportation Security appropriation for the Visible Intermodal Prevention and Response Program.

Also included in the total ATBs is a transfer of \$6.698 million from the Surface appropriation and a reprogramming including 143 FTE and \$24.593 million from the Air Cargo PPA as part of the consolidation of the canine program into Aviation Regulation and Other Enforcement.

The FY 2015 Net Discretionary Request of \$2,865,011,000 includes offsetting discretionary fees totaling \$2,818,293,000.

TSA's request includes a proposal to increase offsetting revenue collections by \$615 million through adjustments to the Passenger Fee from \$5.60 per one-way trip to \$6.00 per one-way trip and reinstates

the Carrier Fee. The proposal will further align the cost of passenger security operations to the direct beneficiaries of this security service and provide TSA greater financial flexibility to satisfy aviation security costs.

¹FY13 Revised Enacted funding includes 0.132% Across-the-Board Rescissions, Sequestration, and Reprogrammings/Transfers for appropriated funds. The fees represent actual collections in FY 2013, and do not include reductions from sequestration of funds in FY 2013 (i.e., \$104 million sequestered in Aviation Security fees and \$4 million sequestered in Vetting fees). The FTP reflects enacted FY13 levels, and FTE reflects actual FTE used in FY13.

²FY14 Enacted funding does not include the 7.2% sequestration of mandatory accounts, and the Aviation Security Passenger fee reflects updated estimates from the enacted level.

³The deficit reduction portion of Aviation Passenger Security fee in the FY14 Revised Enacted (\$390 million) and the FY15 Request (\$1.19 billion) is not included in the TSA charts above.

III. Current Services Program Description by PPA

**Department of Homeland Security
Transportation Security Administration
Aviation Security:
Screening Partnership Program
Program Performance Justification
(Dollars in Thousands)**

PPA: Screening Partnership Program

	Perm. Pos	FTE	Amount
2013 Revised Enacted	-	-	139,873
2014 Enacted	-	-	158,190
2015 Adjustments-to-Base	-	-	(3,618)
2015 Current Services	-	-	154,572
2015 Total Request	-	-	154,572
Total Change 2014 to 2015	-	-	(3,618)

TSA requests \$154.6 million in FY 2015 for the Screening Partnership Program:

Adjustments-to-Base:

- Decrease of \$5.0 million non-recur from FY 2014 increase.
- Increase of \$316 thousand for annualization of the FY 2014 Pay Raise Increase of \$1.066 million for the 2015 pay raise.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Screening Partnership Program (SPP) was established under Section 108 of ATSA to permit an airport operator to request screening services through a private screening company. Private screening contractors are to perform equal to or better than Federal screening operations under Federal oversight following the same operating procedures, which are continuously updated to ensure both Federal and private screening airports are able to mitigate any new threats which have been identified.

SPP followed a two-year pilot program with five airports mandated by ATSA. In accordance with 49 USC § 44920, all U.S. airports with a Federal screening presence have been eligible to apply to SPP since the conclusion of the pilot program in 2004. There are currently 14 airports participating in the program.

The original five (5) pilot airports, which still participate in SPP are:

- San Francisco International Airport;
- Kansas City International Airport;

- Greater Rochester International Airport;
- Jackson Hole Airport; and,
- Tupelo Regional Airport.

As of January 2014, nine (9) additional airports are participating in SPP, for a total of 14. These are:

- Sioux Falls Regional Airport;
- Key West International Airport;
- Charles M. Schulz-Sonoma County Airport;
- Roswell Industrial Air Center; and
- Five airports in Montana:; Sidney Richland Regional; Dawson Community Airport; L.M. Clayton Airport; Wokal Field; and, Havre City County Airport.

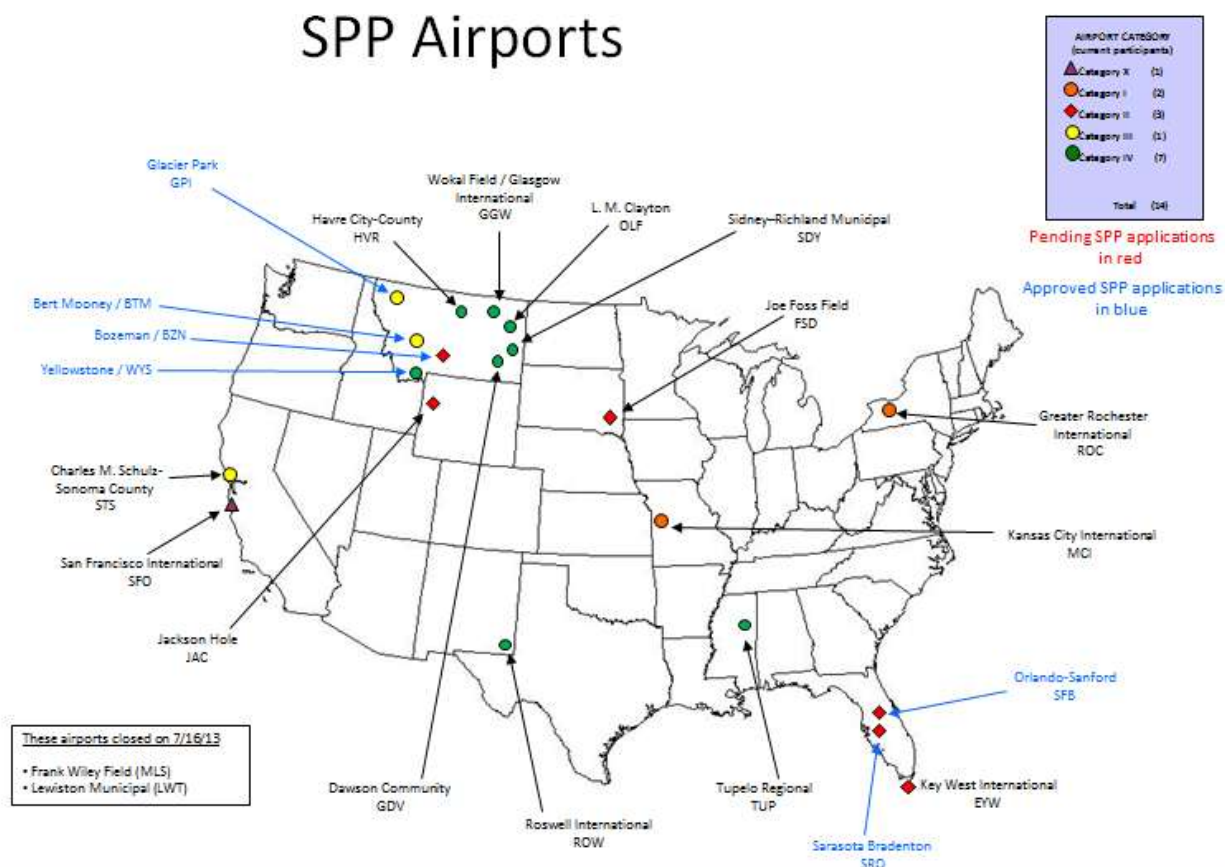

In July of 2013, Lewistown Municipal Airport and Frank Wiley Field, both in Montana, stopped commercial air service after the air carrier's Essential Air Service contract with the Department of Transportation was terminated.

Additionally, TSA is currently in the process of procuring SPP contracts for six (6) airports;

- Yellowstone Airport, Montana (approved January 2012, expected award May 2014)
- Glacier Park International Airport, Montana (approved June 2012, expected award May 2014)
- Bert Mooney Airport (Butte), Montana (approved August 2012, expected award May 2014)
- Bozeman Yellowstone International Airport, Montana (approved August 2012, expected award May 2014)
- Orlando Sanford International Airport, Florida (approved June 2012, expected award August 2014)
- Sarasota Bradenton International Airport, Florida (approved May 2013, expected award September 2014)

The FAA Modernization and Reform Act of 2012 requires TSA to approve an airport's application to participate in SPP if approval will not compromise security, detrimentally affect cost efficiency, or detrimentally affect screening effectiveness of passengers or property. Since enactment of the Act, TSA has met the statutory requirements, and has adjudicated and approved six (6) applications. One airport, Sacramento International in California withdrew its application after it was approved.

The following map lists the current and potential SPP Airports:

MAJOR ACQUISITIONS:

Screening Partnership Program

The Screening Partnership Program procures screening services from qualified private companies at TSA airports. As required by statute, the program provides airports with a process to "opt-out" and request TSA use private screening companies instead of Federal screeners. The program also provides the business infrastructure capable of acquiring, deploying, and supporting the management of private screening resources at airports. Private screeners must pass TSA training, maintain TSA certification, and follow TSA's screening procedures. Private screening performance must "be equal to or greater than the level provided by Federal personnel, and private screeners must receive compensation "not less than" the compensation received by Federal screeners. SPP addresses a capability gap by providing airports with a process to request TSA use private screening companies instead of Federal ones and then procure, deploy, and manage those companies. SPP maintains services at 14 airports (units) and is in the process of adding 6 additional airports.

The Screening Partnership Program investment is to be funded out of multiple PPAs in FY 2015, as follows:

- Screening Partnership Program PPA \$154.572 million
- Airport Management and Support PPA \$1.350 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
141,166	159,540	155,922

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Maintenance – \$155,922	Screening Services	49 U.S.C. § 44920 requires TSA, under certain conditions, to contract private companies to screen passengers and baggage at airports which have requested that screening be conducted by private rather than Federal screeners.

TSA Requests 49,012 positions, 44,849 FTE, and \$2.953 billion in FY 2015 for Screener PC&B:

Adjustments-to-Base:

- Decrease from realignment of 7 positions/FTE and \$745 thousand to Screener Training and Other for the Office of Professional Responsibility
- Decrease from realignment of 22 positions, 21 FTE and \$2.970 million to Airport Management and Support for the Behavior Detection and Analysis Division
- Increase of \$7.579 million for annualization of the 2014 pay raise
- Increase of \$22.710 million for the 2015 pay raise
- Decrease of 430 positions, 387 FTE and \$21.910 million from savings associated with in-line EDS installations
- Increase of \$18.607 million for retirement contribution.

Program Changes:

- Decrease of 320 positions, 288 FTE and \$18.033 million for reduction in Playbook Operations
- Decrease of 1,520 positions, 1,368 FTE and \$85.896 million in leveraged efficiencies from Risk Based Screening

CURRENT SERVICES PROGRAM DESCRIPTION:

Passenger and baggage screening protects commercial air travelers by detecting and removing dangerous or deadly objects that individuals attempt to smuggle onto aircraft on their person and in

carry-on or checked baggage. TSA's screening process must strike the appropriate balance between preventing security breaches and maintaining the efficient movement of law-abiding passengers through the security checkpoints while ensuring compliance with civil liberties and civil rights laws, regulations, Executive Orders and policies and privacy laws and regulations. After passenger check-in, Transportation Security Officers (TSOs) use various types of electronic detection and imaging machines, including Advanced Imaging Technology (AIT), Explosives Trace Detection (ETD) equipment, Advanced Technology (AT-2) X-ray machines, Walk-Through Metal Detectors (WTMD), and hand-held metal detectors. At the checkpoints, TSOs may perform physical searches of carry-on baggage and pat-down searches of airline passengers, crew, and airport employees. This is in conjunction with the use of behavior recognition techniques and the validation of travel documents. Passengers with disabilities, medical conditions or other circumstances can call TSA Cares hotline approximately 72 hours ahead of travel and TSA Cares will coordinate checkpoint support with a TSA Customer Service Manager located at the airport.

In 2007, TSA began deploying state-of-the-art AITs. This technology can detect a wide range of threats to transportation security in a matter of seconds to protect passengers and crews. Imaging technology is an integral part of TSA's effort to continually look for new technologies that help ensure travel remains safe and secure by staying ahead of evolving threats. AIT equipment meets national health and safety standards, and screening is safe for all passengers. TSA has implemented strict measures to protect passenger privacy, which is ensured through the anonymity of the image. Additionally, AIT screening is optional for all passengers; however, if a passenger opts out, they will be subject to comparable screening.

TSA is undertaking efforts to focus its resources and improve the passenger experience at security checkpoints by applying new intelligence-driven, risk-based screening procedures and enhancing its use of technology. This approach is based on the following premises:

- The majority of airline passengers are low risk;
- By having passengers voluntarily provide more information about themselves, TSA can better segment the population in terms of risk;
- Behavior detection and interviewing techniques should be strengthened in the screening process;
- TSA must accelerate its efforts to optimize screening processes and use of technology to gain system-wide efficiencies; and,
- Increase security by focusing on unknowns; expedite known and trusted travelers.

By placing more focus on prescreening, TSA is able to expedite physical screening for known passengers while increasing system-wide effectiveness. A number of initiatives will further enable TSA to reach its goal of expanding expedited screening for known populations in order to focus on those that are unknown. Some of the risk-based security initiatives TSA has implemented are as follows:

- Modified Screening for Active Duty U.S. Service Members
- Modified Screening for Passengers 12 and Under
- Modified Screening for Passengers 75 and Older
- Eliminating physical screening for Veterans on chartered Honor Flights
- Providing modified screening to Wounded Warriors

- Using Managed Inclusion to identify passengers for TSA Pre ✓™ through use of Passenger Screening Canines and Behavior Detection Officers
- TSA Pre ✓™ Expedited Screening

TSO Workforce

ATSA established the employment standards for security screening personnel. Security screening personnel - both private and Federal - are required to be U.S. citizens; pass a background investigation; and have a high school diploma, a general equivalency diploma, or sufficient experience. Newly hired officers must undergo extensive training and be certified to screen passengers and baggage through the use of detection equipment. The screening workforce is subject to ongoing training and testing requirements. Failure to pass any phase of training or a certification examination is grounds for employment termination.

TSOs are just one of the various layers of security needed to thwart the threats to the aviation system. TSA has added more specialized security positions with different skill sets, such as Travel Document Checkers (TDCs) and Behavior Detection Officers (BDOs) to enhance the level of security and to move security beyond the checkpoint environment. TSA has seen the benefits of these new positions in providing a career path for TSOs, which has had a direct impact on reducing attrition and enabling TSA to retain a more tenured TSO workforce.

Section 603 of the Bipartisan Budget Act of 2013 signed into law on December 26 requires TSA to continue monitoring airport exit lanes to the same degree it was doing so on December 1, 2013. Currently, approximately two-thirds of the airport operators control access at exit lanes by using technology or personnel (direct employees or contractors). TSA's FY 2015 Request includes funds for exit lane staffing at those airports where the airport operator does not provide access control. Staffing of exit lanes for access control remains a function that does not require personnel qualified and trained as screener personnel. The approximate cost to TSA of performing these access control functions in FY 2015 is \$93 million. TSA intends to continue to assess options for realizing efficiencies and appropriately satisfying access control functions.

The TSO budgeted FTE levels are broken down as follows:

TSO Budgeted FTE by Job Title ¹

Job Title	Band	FY 2013 FTE	FY 2014 FTE	FY 2015 Request FTE ^{2/}
TSO	D,E	32,551	31,502	29,887
Lead /Master	F	6,615	6,402	6,158
Supervisory/Expert TSO	G	4,850	4,694	4,515
BDOs	F,G,H,I	3,131	3,131	3,131
Managers	H, I	1,209	1,191	1,158
TOTAL		48,356	46,920	44,849

1/ The TSO workforce is composed of approximately 12,000 part time TSOs and 36,000 full time TSOs.

2/ FY 2015 FTE includes approximately 1,525 FTE associated with exit lane access control.

TSO FTE Allocated to Security Duties

Job Duty	FY 2013 FTE	FY 2014 FTE	FY 2015 Request FTE ^{1/}
TDC	2,001	2,001	2,001
Playbook	1,654	1,654	1,366
BDOs	3,131	3,203	3,131
Checkpoint/Other	41,570	40,062	38,351
TOTAL	48,356	46,920	44,849

1/ FY 2015 FTE includes approximately 1,525 FTE associated with exit lane access control.

Job Descriptions:

- TSO – Front-line workforce performing checkpoint security, document checking, airport employee screening and unpredictable security measures.
- Lead TSO (LTSO)/Master TSO – Provides intermediary leadership at the checkpoint. Master TSOs can also perform training duties and operate in airport coordination centers.
- Supervisory TSO (STSO)/Expert TSO – Supervises checkpoint operations. Expert TSOs can also perform training duties and operate in airport coordination centers.
- BDO – Performs Screening Passengers by Observation Technique (SPOT) duties.
- Transportation Security Manager (TSM) – Performs overall oversight duties of security operations.

TSA has installed labor-saving technology in many airports around the country. Most notably, in-line checked baggage systems have reduced the staffing required for baggage checks and have reduced costly workplace injuries. These efficiencies have allowed TSA to invest in other effective security measures, such as TDCs, Playbook, BDOs, and Transportation Security Specialists – Explosives (TSS-Es). Please see the table below for a cumulative list of reinvested resources.

In-Line Savings (dollars in millions)		
	FTE	Dollars ¹
Cumulative through FY13	3,105	\$189.426

¹ Estimated Dollars based on weighted average of TSOs, Leads and Supervisory TSO Salaries

Within-Base Growth of Security Programs			
	Total Budgeted FTE	Self Funded FTE	% of FTE Self Funded
Travel Document Checker	2,001	1,086	54%
Target Random Security Plays	1,654	904	55%
Behavior Detection Officers	3,131	2,326	74%
TSS-Es (<i>funded in Airport Management PPA</i>)	406	297	73%
TOTAL	7,192	4,613	64%

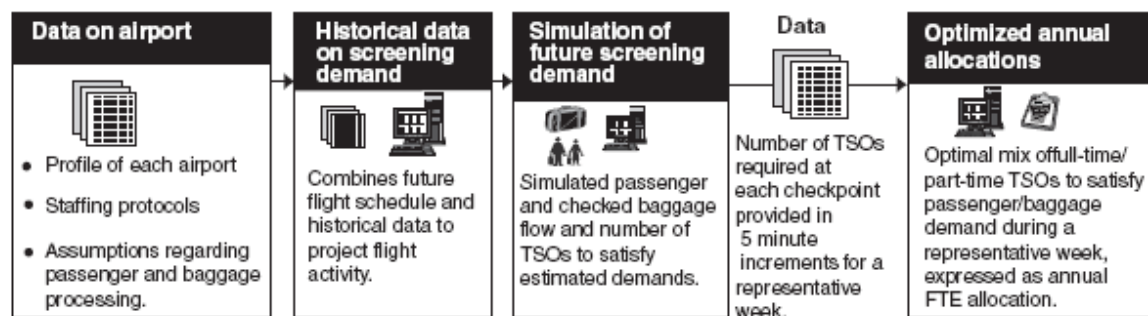

In addition, the FY 2015 request includes \$22.491 million in savings as a result of in-line systems.

Workforce Initiatives

TSA determines and allocates FTE to the airports through the Staffing Allocation Model (SAM). This is a robust process run by each airport scheduling operations officer which utilize:

- Official Airline Guide flight data representing airport specific flight activity;
- Airport specific facility layout and equipment configuration details, to include presence of TSA Pre✓™ lanes;
- Input of program offices and risk analysis;
- A discrete event simulation model to project staffing requirements; and
- An airline industry accepted scheduling application to apply workforce scheduling requirements.

Annual TSO Allocation Process

Source: GAO analysis of TSA Staffing Allocation Model.

The model is constantly refined to determine the most efficient and effective allocation of the TSO workforce. Through the staff modeling process, TSA has been able to identify operational and efficiency gains made possible through better scheduling, increased use of part-time and split shift employees, technology improvements, and improved management practices. Recently, as RBS initiatives continue to expand, TSA is able to align passenger screening resources based on risk assessments. The model is adjusted to account for efficiencies relating to RBS initiatives such as dedicated TSA Pre✓™ lanes and the resulting increased processing speed at standard lanes. As well, TSA has moved airline flight crew traffic to dedicated Known Crew Member lanes that are further allowing us to expedite the passenger screening and thereby reduce the FTE requirements. TSA identified RBS efficiencies in this budget request; prior year efficiencies have been used to assist in expanding security initiatives such as:

TDC Program - The TDC Program is an added layer of security at all 450 Federalized airports, including Screening Partnership Program (SPP) airports, to verify an individual's identity and their travel documents before allowing entry into the security screening checkpoint to access the sterile area or board an aircraft. TDC-qualified TSOs are positioned in front of the checkpoint and use black lights and magnifying loupes to validate boarding passes and authenticate various forms of acceptable photo ID presented by passengers, airport and airline personnel, and law enforcement officers. TDCs also make a visual comparison of the individual with the ID photograph, and ensure the boarding pass presented was issued to that individual, for that day's travel and from the correct airport. Any suspect or questionable ID issues are relayed to the STSO for resolution and the Identity Verification Coordination Center to verify the individual's identity to continue.

Behavior Detection and Analysis — Behavior detection and analysis is an additional layer of security, using behavior observation and analysis techniques to identify potentially high-risk individuals who may pose a threat to transportation security. Behavior detection and analysis provides a real-time threat analysis by employing non-invasive techniques for identification. When integrated with other elements of risk-based security, the capability yields valuable return on investment allowing for greater efficiency and effectiveness at the screening checkpoint. TSA's program is based on behavior pattern recognition techniques used by security personnel across the world and supported by scientific research. Certified Behavior Detection Officers (BDOs) work in pairs, typically in and around security checkpoints throughout the airport. The Department of Homeland Security (DHS)'s Science and Technology Directorate completed a study in April 2011 to examine the validity of TSA's

current procedures called Screening of Passenger by Observation Technique (SPOT). This research examined the extent to which using the SPOT Referral Report and its indicators leads to correct screening decisions at the security checkpoint. The findings revealed that SPOT is nine times more effective than random selection at identifying high-risk passengers – those attempting to defeat the security screening process – yielding greater classification accuracy and fewer false positives. This is the first ever large scale validation effort for a behaviorally-based screening program. In 2012, TSA Office of Security Capabilities initiated further review of the program contracting with a third party, independent group of subject matters experts under the American Institutes for Research (AIR) Contract. TSA anticipates the optimized behavior detection procedures to begin testing by the third quarter of FY 2014, using robust test and evaluation methods similar to the operational testing conducted in support of technology acquisitions. TSA should have sufficient information on the performance of the new processes to update the national behavior detection employment strategy within 6 months of the commencement of the tests. The estimated completion date is December 31, 2014. Consistent with other AIR studies, all work will be subject to an independent panel review.

Playbook – Playbook is designed as a comprehensive, flexible deployment system of countermeasures that are coordinated at the local airport level in order to respond quickly to emergency conditions or hostile acts. It's supported through local decision-making between the Airport Operator and the Federal Security Director (FSD). Playbook involves working collaboratively with stakeholders and coordinating the assets of TSA, local law enforcement, and other DHS agencies to improve an airport's overall security posture.

The Aviation Screening Assessment Program (ASAP) – This program measures TSO screening performance using realistic and standardized assessment scenarios. The primary purpose of ASAP is to provide statistical data to determine reasons for failure within the checkpoint and checked baggage screening process. ASAP test results provide critical data to TSA leadership that helps with the improvement of aviation security and the identification of vulnerabilities across screening operations. There are two (2), six-month test cycles per year.

Visible Intermodal Prevention and Response (VIPR) teams – These teams may consist of TSOs, BDOs, Transportation Security Inspectors, TSS-Es and Federal Air Marshals. Their duty is to screen passengers, look for suspicious behavior and act as a visible deterrent in all modes of the transportation sector, including aviation, mass transit and maritime. Continually strengthening of stakeholder relationships and increasing reliance on risk-based decision making has expanded the reach and capability of TSA's VIPR teams. In FY 2015, VIPR funding is consolidated under the Surface Transportation Security appropriation.

Career Progression Program

TSA continues its focus on career progression for TSOs. As the TSA mission has evolved, TSA created higher-level positions for TSOs such as BDOs. TSA's adoption of Risk Based Security (RBS) will further evolve the skill sets of TSOs, which is anticipated to lead to a smaller more capable workforce with appropriate grade restructuring.

TSA provides career-advancement tools and resources in its online system called Security Officer Advancement Resources. These resources include a career toolbox, training opportunities, and detailed overviews of what makes a TSO competitive for positions within TSA and across DHS. TSA supplements this service with career coaching and the Career Resident Program. The Career Resident Program is an entry level, full-time, career development program designed to capitalize on the technical expertise and agency knowledge resident in the field and to create a mechanism for TSOs and field personnel selection for career opportunities other than the current TSO/LTSO/STSO career path. In addition, TSA has partnered with community colleges to provide TSOs and uniformed officers the opportunity to work toward a TSA Homeland Security Certificate and/or an associates' degree in Homeland Security or related field.

The career progression structure allows TSA to distinguish and retain the more experienced and top performing TSOs. Test results show a positive correlation between longevity and performance, including detection ability, screening efficiency, and customer service. As threats evolve and increase in complexity, the advanced skills of the TSA workforce are necessary to stay ahead of terrorist capabilities.

Historical Attrition Rates:

Attrition Type	Work Schedule	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013
Voluntary	Full-Time ONLY	5.3%	4.2%	4.3%	5.1%	6.3%
Voluntary	Part-Time ONLY	15.5%	12.9%	13.2%	17.4%	21.2%
Voluntary	TOTAL	7.7%	6.2%	6.8%	8.5%	10.2%

Workers' Compensation

TSA continues to aggressively reduce U.S. Department of Labor Office of Workers' Compensation Program costs through strategies of prevention, education, case management, and nurse intervention. TSA field operations are required to develop a local safety program targeted at inspections, hazard recognition and analysis, hazard abatement, and injury documentation. TSA's Office of Occupational Safety, Health and Environment (OSHE) provides field support to the Nation's airports to develop their safety programs. OSHE provides, through the Online Learning Center, 11 safety courses aimed at injury prevention. The national nurse case management program has successfully assisted TSOs in returning to employment in a shorter time. The Periodic Roll Initiative, established in April 2007 is a joint effort with the Nurse Case Management team where all of the long-term disability (Periodic Roll) cases are examined for opportunities to return employees to work when medically feasible.

The President's Safety, Health, and Return to Employment Initiative requires Federal agencies to reduce the Total Case Rate and Lost Time Case Rate by three percent each fiscal year. As noted in the chart below, TSA has exceeded its goal of reducing the number of TSO injuries and illnesses, and in FY 2015, TSA will seek to continue the trend of reducing numbers of TSO injuries and illnesses. In

addition, TSA's Workers' Compensation has decreased by over \$12 million from FY 2006 to FY 2013.

TSO Injury Rate

	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	Percent Change FY 2005 - FY 2013
Total Case Rate (TCR)	29.06	16.46	13.93	10.15	7.55	7.16	5.50	5.45	4.90	- 83.14%
Lost Time Case Rate (LTCR)	12.89	8.94	7.19	5.14	3.53	3.37	2.76	2.60	2.33	- 81.92%

Collective Bargaining

In 2010, the Federal Labor Relations Authority (FLRA) issued a decision directing an election regarding exclusive representation of TSA bargaining unit employees. TSA bargaining unit employees are full-time and part-time non-supervisory personnel performing screening functions (TSOs and LTSOs, Master and Expert TSOs, including BDOs, Security Training Instructors (STIs), and Equipment Maintenance Technicians). On February 4, 2011, the TSA Administrator, in accordance with his statutory authority to establish the terms and conditions of employment for TSOs, issued a Determination providing a framework for TSOs to vote on whether they wanted exclusive representation for limited collective bargaining on non-security employment issues. In June 2011, the FLRA certified the American Federation of Government Employees (AFGE) as the exclusive representative of the TSA bargaining unit.

Thereafter, TSA and AFGE engaged in limited collective bargaining on the 11 issues subject to collective bargaining as set forth in the Determination:

1. Performance Management process
2. Awards and Recognition process
3. Attendance Management process
4. Shift and Annual Leave Bid process
5. Shift Trade policy
6. Transfer policy
7. Process for work status change from full time to part time and vice versa
8. Uniforms and uniform allowances
9. Selection process for special assignments
10. Parking subsidies
11. Facilities and services within the control of TSA management

On August 2, 2012, TSA announced that it reached its first collective bargaining agreement with AFGE. The agreement affects approximately 44,000 TSA employees and was ratified by bargaining unit employees on November 9, 2012.

Department of Homeland Security
Transportation Security Administration
Aviation Security:
Screener Training and Other
Program Performance Justification
(Dollars in Thousands)

PPA: Screener Training and Other

	Perm. Pos	FTE	Amount
2013 Revised Enacted	66	92	213,075
2014 Enacted	88	84	226,857
2015 Adjustments-to-Base	56	55	1,941
2015 Current Services	144	139	228,798
2015 Program Change	-	-	(2,508)
2015 Total Request	144	139	226,290
Total Change 2014 to 2015	56	55	(567)

TSA requests 144 positions, 139 FTE, and \$226.3 million in FY 2015 for the Screener Training and Other PPA:

Adjustments-to-Base:

- Increase from transfer of 8 FTP/FTE and \$1.208 million from Surface Transportation Security Staffing and Operations PPA for the TSA Academy
- Increase from realignment of 27 FTP and 26 FTE from Airport Management to Screener Training and Other to consolidate TSA Academy personnel in one PPA
- Increase from realignment of 7 FTP/FTE and \$745 thousand from Screener PC&B to Screener Training and Other to support Office of Professional Responsibility
- Increase of \$35 thousand for annualization of the 2014 pay raise
- Increase of \$121 thousand for the 2015 pay raise
- Decrease of \$286 thousand as part of total In-line system savings of \$22.491 million
- Increase of 14 FTP/FTE to correct current FTP/FTE in PPA
- Increase of \$118 thousand for retirement contribution.

Program Changes:

- Decrease of \$436 thousand for reduction of Playbook Operations
- Decrease of \$2.072 million for leveraged efficiencies from Risk Based Security.

CURRENT SERVICES PROGRAM DESCRIPTION:

This activity provides the resources to support new and recurring training requirements for the Transportation Security Officer (TSO) workforce, as well as other direct costs associated with screening operations.

The following table provides the components of this PPA.

(dollars in millions)

	FY 2014 Enacted	FY 2015 Request
Transportation Security Officer Training	\$95.2	\$99.6
Screeners Consumables, Uniforms, and Other	\$ 97.7	\$92.7
National Deployment Office (NDO)	\$ 22.0	\$22.0
Environmental Management Program	\$ 12.0	\$12.0
Total	\$226.9	\$226.3

Transportation Security Officer (TSO) Training: \$99.6 million

Given the ever changing threats that face the aviation domain, screener training is constantly evolving. TSO training is comprised of a compendium of courses that includes basic training for initial hires, on-the-job training, lead and supervisor technical training, recurrent training, advanced technical skills training, remedial training, and return-to-duty training. All new hires receive a combination of instructor-led, hands-on, and web-based training. Recurrent and specialized training courses are provided by either classroom instruction or the TSA Online Learning Center (OLC). TSA uses a measurement and evaluation process to ensure training programs meet established objectives and standards. Training effectiveness is assessed using a four-level model measuring trainee reaction, learning, behavior, and results. TSA also conducts assessments to ensure a high level of instructional quality is maintained.

In April 2012, TSA established the TSA Academy located at the Federal Law Enforcement Training Center (FLETC) in Glynco, GA and joined more than 92 partner organizations who train at FLETC. The Academy's initial course offering was the Essentials of Supervising Screening Operations (ESSO) led by a dedicated group of instructors and facilitators including Academy staff, Federal Air Marshals (FAM), Federal Security Directors (FSD), and members of the FLETC Leadership Institute. The course was designed and developed for delivery to our more than 4,500 Supervisory Transportation Security Officers (STSO). By the end of FY 2013 over 100 ESSO classes will have been conducted yielding approximately 3,000 graduates. In October 2012, the Compliance training operations (formerly held at the Federal Aviation Administration's Mike Monroney Aeronautical Center in Oklahoma City, OK and other locations throughout the Nation), were also consolidated at the Academy. This group is on-pace to train approximately 600 Transportation Security Inspectors, Supervisors, and Managers in FY 2013. Most recently, the Security Training Instructor (STI) certification course was added to the Academy's offerings.

In the third quarter of FY 2014, TSA added a newly developed course for its Lead TSOs (LTSO), to continue to build the capabilities of its front line management team. The course for the LTSOs is titled

the Essentials of Leading Screening Operations (ELSO). Modeled after the ESSO course, this course includes both operational and leadership components, focused on the specific responsibilities of an LTSO. This is the first Instructor Led course that TSA has specifically developed for the LTSO cadre, comprised of over 6,200 LTSOs nationwide. It is anticipated that this training will continue throughout FY 2014, and into FY 2015.

Additional expansion would include the potential for New Hire Training, specialty training for Transportation Security Specialists – Explosives, Behavior Detection Officers, Leadership Training, and various other courses yet to be determined.

Training under this PPA includes:

- **New Hire Training Program (NHTP):** The bulk of the security training funding provides for design, development and delivery of classroom instruction on checkpoint procedures and strategy, to include the tenants of passenger engagement effective communications, principles, policies, and fundamentals of risk based security, as well as on-the-job training and certification required by ATSA. NHTP is a multi-media training course which includes web-based training (to include image interpretation), included within and supported through a minimum of 40 hours of instructor-led training, which also includes supported hands-on equipment-specific labs and role-play scenarios to maximize the adult learning experience... The NHTP course for those who will be screening checked baggage modules include on-screen alarm resolution protocol training for new hires at those airports equipped with Explosives Detection Systems (EDS), using specific equipment in place at their duty location. TSA designs, develops and delivers training in support of all screening technologies, to include Advanced Imaging Technology (AIT) for screening persons, Advanced Technology (AT-2) X-ray for screening checkpoint carry-on items, Explosives Trace Detection (ETD) equipment for screening persons, checked baggage and checkpoint carry-on items; and other screening technologies deployed to support the passenger screening process.

TSO New Hire Training

Metric	Min. Hrs	Evaluation Components
Checkpoint TSO-one ETD		
Phase I Web-based Training	8.00	Job Knowledge Checks
Phase II Instructor-led Training	47.50	Job Knowledge Tests/Practical Demonstrations/Image Interpretation Tests
Phase III On-the-Job Training	75.00	Image Mastery Test
Total Hours	130.50	Certified Checkpoint TSO
Checked Baggage EDS/OSARP ^{1/}		
Phase I Instructor-led Training	59.50	Job Knowledge Tests and Practical Demonstrations
Phase II On-the-Job Training	83.00	Practical Demonstration Test Image Test-Operator Qualification test
Total Hours	142.50	Certified Checked Baggage EDS/OSARP TSO
Dual Function Officer (DFO) ETD only		
Phase I Web-based Training	8.00	Job Knowledge Checks
Phase II Instructor-led Training	63.50	Job Knowledge Tests/Practical Demonstrations/Image Interpretation Tests
Phase III On-the-Job Training	110.00	Image Mastery Test Practical Demonstration Test
Total Hours	181.50	Certified DFO TSO
Dual Function Officer (DFO) with EDS/OSARP Certification		
Phase I Web-based Training	8.00	Job Knowledge Checks
Phase II Instructor-led Training	86.00	Job Knowledge Tests/Job Knowledge Practical Demonstrations/Image Interpretation Tests
Phase III On-the-Job Training	128.00	Operator Qualification Test/Checked Baggage Practical Demonstration TEST/Image Mastery Test
Total Hours	222.00	

^{1/} OSARP = On-Screen Alarm Resolution Protocol

- **Recurrent In-Service Training:** All TSOs are required to undergo recurrent security training to ensure they maintain proficiency of skills learned during basic training. Additionally, in-service training courses are designed to keep the workforce up-to-date with procedural changes; use of new/updated technologies introduced into the screening operations; support tools and equipment used by the TSOs in the performance of their duties; building new capabilities; enhancing skills; and identifying new threat items. This training is planned and communicated through an annual National Training Plan.
- **Essentials of Leading Screening Operations Course:** This is a course developed for Lead TSOs (LTSOs) that will be delivered at FLETC in Glynco, GA by TSA Academy staff members. The technical and leadership competence of LTSOs is a critical component of workforce effectiveness and retention. TSA is developing and will begin delivery of a two-week course to include sessions focused on the technical and operational responsibilities of the LTSOs. This course is being designed to provide tools needed to allow LTSOs to successfully support the TSO workforce and Supervisory TSOs (STSOs) in the execution and management of the daily operations and challenges faced at checkpoint and/or checked baggage screening locations. TSA also conducts other task specific courses to provide ongoing skills enhancement and technical expertise training to their LTSOs at their home airports. Delivery is scheduled to begin in FY 2014 and continue throughout FY 2015.
- **Essentials of Supervising Screening Operations (ESSO) Course:** This course is delivered to Supervisory TSOs (STSOs) at FLETC by members of the TSA Academy and FLETC. This course achieves two important goals: 1) to professionalize the Agency's approach to training delivery; and 2) to provide front line supervisors with core knowledge and critical job skills that enable them to contribute to the success in critical areas such as employee integrity, responsibility and performance. The training is delivered over two weeks and focuses on the legal authorities governing TSA's search processes; risk based approach to security and security measures based on analysis of intelligence, threat, and capabilities; and the mission, vision and core values of the TSA. During this course, three days are focused on developing leadership skills through understanding behavioral diversity (using the Dominance, Inducement, Submission, and Compliance Model), which gives STSOs an individual understanding of their specific communications and leadership style, along with understanding of how they can use that information to become more effective leaders. The training emphasizes effective communications, coaching and mentoring, but also technical requirements of the STSO position including interactive team projects which culminates with a Capstone exercise.
- **Leadership Training:** This training supports the requirements of 5 Code of Federal Regulations (CFR) 412.202 Systematic Training and Development of Supervisors, Manager, and Executives. Leadership training programs have been developed and are deployed for different levels of TSOs. All leadership training programs cover topic areas such as communications skills, managing employee performance, coaching and mentoring, basic employee relations, supervisory responsibilities in managing safety, and diversity training, and team building. Examples of such programs are:

- The Real Time Leadership Skills program - a course of study designed for approximately 175 team leads annually that include LTSOs, Expert BDOs, and Security Training Instructors (STIs);
 - Foundations of Leadership program - basic leadership training for the 975 STSOs;
 - Leading Through Change - an introductory course for first line supervisors on implementation of the adopted Union Contract – 175 training opportunities;
 - Leading from the Middle – leadership training for mid-level airport managers – 130 seats;
 - Leading People and Managing Operations – a program for managers to strengthen their technical, managerial and leadership skills – 175 seats.
- **Expanding Skills and Critical Thinking Training:** This strategy focuses on the interaction and communication between TSAs workforce and the public. Every TSO working at the checkpoint receives training that consolidates the latest methods for explosives detection, as well as the human factors that can affect security. These training events will help TSOs become more analytical and less "check-list oriented." In FY 2011/2012, TSA designed and delivered a communications course for its officers and managers to help them work through difficult interactions so that they can effectively complete the screening process. In FY 2012, TSA designed, and delivered Behavior Awareness Training to build upon the principles of critical thinking and effective communications. This course was designed to help officers understand how to use their operational experience and situational awareness to be able to articulate and react to anomalous behavior. In FY 2013, TSA designed and implemented the next phase of developmental training, initially focusing on resolution of anomalies identified during AIT screening. This course will help officers understand how "Investigative Skepticism" can contribute to effectively clearing an anomaly identified during secondary searches. This training will be expanded to all checkpoint officers involved in secondary searches and will be completed in FY 2014. Planning is underway to identify appropriate content for a skills enhancement course in 2015 that will continue to build the capabilities of its officer workforce.
 - **Travel Document Checker (TDC) Training:** This curriculum provides training for all TSOs and other TSA personnel assigned to conduct checks of travel documents and verify identification for individuals seeking access through a screening checkpoint. The curriculum includes training on Standard Operating Procedures, detecting fraudulent documents, utilizing document checking technology, and recognizing acceptable forms of identification. The training will continue to be updated as needed.
 - **Transportation Security Managers (TSM) Technical Training Course:** The technical and leadership competence of TSMs is critical to TSA objectives that serve to protect the traveling public by preventing and/or deterring any deadly or dangerous objects from being transported onto aircraft. TSA developed and deployed an initial course to strengthen TSMs' technical and managerial skills and provide tools needed to successfully manage the daily operations. During FY 2014, TSA initiated a needs analysis to determine the content and delivery format for a follow on course for TSMs, to create consistency throughout its front line leadership in meeting the learning objectives established during the newly deployed STSO training, and LTSO training.

The TSM is a critical member of the front line leadership team, and building a professional and cohesive leadership team for the TSO workforce is essential to the professional development of the workforce and TSA's continuing efforts to adopt security procedures and policies to support its RBS platform. This training will continue to build on the effectiveness of the TSM and their ability to respond to and assess the potential impact of all unresolved issues at the checkpoint and in checked baggage screening locations.

- **Behavior Detection Officer (BDO) Training:** This curriculum provides training in behavior observation and analysis for the purpose of identifying passengers exhibiting behaviors indicative of hostile intent. This program, known as Screening Passengers by Observation Techniques (SPOT), is performed by BDOs at all major airports. The curriculum for this program will continue to be upgraded and updated annually to include additional techniques and/or information related to the field of behavior detection.
 - **BDO Recurrent In-Service Training:** All BDOs are required to undergo recurrent security training to ensure they maintain proficiency of skills learned during basic training. Additionally, in-service training courses are designed to keep the workforce up-to-date with procedural changes introduced into the screening operations; and building new capabilities; enhancing skills.
 - **BDO National Training Team Training and Certification:** All National Training Team (NTT) instructors receive training on the technical content of courses that the NTT teaches including, but not limited to: BDO SPOT Basic Training and BDO Refresher Training.
- **Transportation Security Specialist-Explosives (TSS-E) Training:** TSS-Es require specialized training in improvised explosives devices and, physical security in all modes of transportation. These in-house explosives experts provide a capability for a rapid response to assist with advanced alarm resolution at checkpoints and in checked baggage screening areas. They also provide on-site explosives and improvised explosives device (IED) familiarization training to TSOs to enhance their IED and IED components recognition skills. TSS-Es are multimodal assets that train and advise Federal, State, and local government responders and provide training and explosives vulnerability assessment assistance to industry. All TSS-Es are former military or law enforcement bomb disposal technicians.
- **Transportation Security Inspector (TSI) Training:** TSIs are responsible for conducting inspections of regulated parties to ensure compliance with federal security regulations in place to protect the Nation's transportation systems and ensure freedom of movement for people and commerce. In addition to receiving basic training, TSIs receive additional specialized training specific to aviation, cargo, and surface modes. Training is targeted to ensure TSIs are cognizant of RBS policy and procedures, equipping them with an enhanced capability to respond and deploy to heightened security conditions/levels, security incidents, national special security events, and national disasters. TSIs also conduct investigations of non-compliance with security regulations, and are multimodal assets that assist Federal, State, and local entities with

implementation of security measures to mitigate the threat. TSI training is now held at the TSA's Training Academy Branch at FLETCs facility in Glynco, GA.

- **Security Training Instructor (STI):** This training supports the permanent TSA in-house instructor certification program. TSA provides skills enhancement training to the STI workforce to ensure they are able to effectively deliver technical training. With the movement towards more interactive facilitated training in support of adult learning, TSA continues to develop training that supports the development of the STIs so they are better prepared to deliver and interact with class participants. STI training is now held at the TSA's Training Academy Branch at FLETCs facility in Glynco, GA.
- **Training Aids/Training Tools:** Due to the ever changing threat from terrorism and the terrorist adaptation to security and screening procedures, TSA is constantly developing and updating training curriculum and training aids. As new threats emerge, some of the existing training, and the training aids tool sets have to be quickly upgraded. TSA employs a variety of automated training and testing tools to enhance TSO skills, including simulated computer based image interpretation practice sessions, and simulated weapons and IED kits designed to support local testing and hands-on familiarization. TSA also develops "Threat in the Spotlight" training briefing documents for TSOs and their supervisors, which describes and shows actual pictures and x-ray images of threats found by TSOs at airports or from other intelligence resources.
- **Emerging Technology Training:** This training supports the operational evaluation and deployment of emerging screening technologies for passengers, as well as carry-on and checked baggage. Working with the equipment manufacturers, TSA designs and develops a comprehensive training course for each technology that will support operational tests and evaluations of emerging technologies. TSA finalizes the training materials needed for those emerging technologies that are determined to be operationally effective and efficient for wide scale deployment. The training must not only cover the technical aspects of operator interface and screening capabilities associated with the equipment, but also the Standard Operating Procedures, screening policies and alarm identification and resolution to ensure TSOs are knowledgeable, skilled, and prepared to operate the specific technologies and apply the appropriate screening procedures.
- **Training Evaluation:** TSA uses a measurement and evaluation process to ensure that training programs meet established objectives and standards. TSA training effectiveness is assessed using three levels of measuring trainee reaction, learning, behavior, and results. TSA also conducts assessments to ensure that a high level of instructional quality is maintained. TSA continually strives to improve their methodology for evaluating training to ensure it meets current industry standards:
 - Level 1 Evaluation (trainee reaction): Completed at the end of the training program. Level 1 evaluation data results are reviewed to determine if course content or delivery should be modified;

- Level 2 Evaluation (learning): Fulfilled via a test or demonstration at the completion of a training program. The OLC is the repository for these results. Scores achieved indicate level of learning achieved; and,
- Level 3 Evaluation (transfer/behavior): Analysis of the data collected through this effort helps to determine if training is resulting in a transfer of skills and/or knowledge to the job. A Level 3 evaluation is conducted after the participant has had at least 6 months on-the-job for the position and/or tasks for which he or she was trained. The Level 3 includes an inquiry sent to participants and their supervisors. Level 3 evaluations are conducted as determined appropriate.
- **Associates Program:** TSA's Associates Program provides additional skills to the workforce and provides cutting-edge professional training and development that is critical for TSOs to fully accomplish the TSA mission and fulfill its vision. It also provides for career development and supports overall retention efforts by offering three (3) Community College accredited courses as stepping stones for attainment of an Associate's Degree in a Homeland Security discipline. This program was first piloted in FY 2008, and is currently represented at 134 airports, partnering with 88 colleges. During the period of Spring 2012 to Fall 2013, the program grew 15 percent across the Agency with 4,400 TSOs (10 percent of the workforce) participating. At present, slightly less than half of the participating TSOs have completed all three courses and 850 TSOs have completed additional college courses. In FY 2014 and FY 2015, TSA will expand the use of Distance Learning to reach out to the smaller airports as well as expand classroom opportunities to medium to large airports.
- **Learning Management System (LMS):** The TSA's learning management system (LMS) is the official system of record for TSA training. TSA uses the LMS to: deliver online training to all TSA employees; define and assign required training by job role; manage registration and scheduling for instructor-led training; maintain records of completed training for compliance purposes; integrate with systems for job knowledge tests and simulations; provide access to self-paced online courses for employee professional development; and produce both predefined as well as ad hoc reports regarding training records.
- **Enhanced Security Training:** TSA plans to change the delivery of up to 1,000 of the current leadership, technical, and ancillary training courses to TSOs and managers. This training will be centrally delivered in comparison to the distributed locations approach currently undertaken. Among other benefits, the consolidation of training will improve training quality, timeliness, consistency, uniformity, and standardization.
- **Annual Proficiency Reviews:** All TSOs, LTSOs, STIs, BDOs and STSOs must participate in an Annual Proficiency Review (APR) to ensure that they meet all of the qualifications and performance standards required to perform their screening duties as required by ATSA. The APR includes Technical Proficiency assessments that focus on image recognition, proper screening techniques, job knowledge, and the ability to identify, detect, and locate prohibited items. Technical proficiency is measured in the following ways:

- Measuring Image Proficiency – One Image Mastery Assessment per year administered using the X-ray simulation;
- Measuring Practical Skills – A series of Practical Skills Evaluations, including the detection of prohibited items, of all TSOs every year;
- Measuring On-Screen Alarm Resolution Protocol (OSARP) Proficiency – One OSARP assessment per year administered using the Employee Assessment Management System (EAMS) software; and
- Measuring Job Knowledge – One Standard Operating Procedures Assessment per year administered using EAMS.

Screener Consumables, Uniforms, and Other: \$92.7 million

Consumable supplies are critical materials used by TSOs to ensure effective screening of passengers, carry-on, and checked baggage. These consumable supplies include disposable gloves, sample swabs/wands, reactant materials, and baggage inserts, which both notify passengers that their bag has been inspected and provide contact information in the event of a problem. In addition, TSA provides uniforms to new hires, as well as replacement uniforms to all TSOs through the annual allowance program. With the ratification of the collective bargaining agreement in FY 2012, TSA provides an annual replacement allotment valued at \$154, a uniform allowance of to \$317 and provides TSOs with more uniform options.

In addition, The Aviation and Transportation Security Act mandates annual proficiency review of TSOs to ensure they continue to meet all qualifications and standards required to perform screening duties. TSA requires applicants for TSO positions demonstrate that they are medically/physically qualified. The Periodic Medical Re-certification Program will ensure that TSOs continuously meet job oriented medical standards critical to the performance of their mission essential duties. Currently TSOs are evaluated against medical guidelines during the hiring process and at any time thereafter when a medical condition is identified as potentially interfering with job performance. This new program will require TSOs to be medically re-evaluated, on a periodic and recurring basis, regardless of whether any medical or physical impediment to performance is identified. Medical case management, ongoing quality assurance review and random verification will supply necessary validity to program self-assessment questionnaires. In addition to being necessary to assure the medical fitness and performance abilities of the workforce, this program will offer an opportunity to improve the general wellness and reduce on-the-job injury rates of the TSO workforce through identification and mitigation of health and fitness issues.

National Deployment Office (NDO): \$22.0 million

The NDO mitigates and reduces risk where other means are unavailable by providing Federal Security Directors (FSDs) additional security personnel. The NDO provides TSOs, BDOs, and other operations personnel to FSDs for security screening support during crisis response and recovery operations, peak seasonal demands, special security events, risk mitigation or other activities that require higher-than-normal security related staffing levels, while protecting the Nation's transportation system. Each request for NDO support is analyzed from a cost/benefit/risk perspective to ensure the optimal use of these limited security personnel resources. For various types of disaster response operations, the NDO is responsible for deploying 14 Transportation Security Advance Teams, which include 210 personnel, and 43 Transportation Security Support Teams, which include 925 personnel.

Environmental Management Program: \$12.0 million

This program provides for the disposition of hazardous materials and abandoned personal property collected by TSA at checkpoints, as well as the maintenance of the environmental management system. TSA has an extensive and complex program to safely and securely identify, sort, store, and protect assets; as well as to remove and dispose of hazardous and voluntarily abandoned property. TSA's national hazardous materials disposal program protects the traveling public from exposure to hazardous materials and complies with Federal, State, and local environmental regulations and laws.

**Department of Homeland Security
Transportation Security Administration
Aviation Security:
Checkpoint Support
Program Performance Justification**
(Dollars in Thousands)

PPA: Checkpoint Support

	Perm. Pos	FTE	Amount
2013 Revised Enacted	61	46	109,106
2014 Enacted	60	57	103,309
2015 Adjustments-to-Base	-	-	160
2015 Current Services	60	57	103,469
2015 Total Request	60	57	103,469
Total Change 2014 to 2015	-	-	160

TSA requests 60 positions, 57 FTE, and \$103.5 million in FY 2015 for the Checkpoint Support PPA.

Adjustments-to-Base:

- Increase of \$22 thousand for annualization of the 2014 pay raise
- Increase of \$67 thousand for the 2015 pay raise
- Increase of \$71 thousand for retirement contributions

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of the PPA's Current Services:

(dollars in millions)

	FY 2014 Enacted	FY 2015 Request
Checkpoint Technology	\$98.3	\$98.5
Advanced Surveillance Program	\$5.0	\$5.0
Total	\$103.3	\$103.5

The TSA's checkpoint support program provides the resources required to test, evaluate, integrate, and deploy passenger screening and carry-on baggage screening capabilities. This includes technologies, checkpoint reconfigurations, closed circuit television (CCTV) surveillance equipment, and the operational integration of systems at approximately 2,300 passenger checkpoint lanes in our Nation's

airports. TSA developed a strategic plan to enhance screening through improved checkpoint technology that will refine passenger security for aviation. This initiative extends beyond the airport checkpoint and considers the end-to-end passenger experience to improve security and increase efficiency. The focus is on a layered security and risk-based screening approach, including improved explosives detection and enhanced hostile intent detection. TSA's RBS initiatives are driving changes to processes and technology needs at the checkpoint, affecting the types of lanes present at a checkpoint and number of Transportation Security Equipment and Transportation Security Officers needed to operate the checkpoint.

Current technologies that have been deployed include Enhanced Walk-through Metal Detectors (WTMD) that screen persons for metallic weapons such as guns or knives; Explosives Trace Detection (ETD) units, which are used to test for explosive residue on selected carry-on items that allow for increased security and an added layer of random screening within the sterile area; Bottled Liquids Scanners (BLS), which screen bottles to determine if they contain explosives or benign liquids; Chemical Analysis Devices (CAD), which are small devices used to identify suspect substances; Advanced Technology (AT-2) systems, which are X-ray systems with advanced visual detection capabilities that use multi-view capabilities or automated explosives detection capabilities; and Advanced Imaging Technology (AIT). Additionally, the Credential Authentication Technology (CAT), which digitally validates the ID used by the traveling public, will begin deployment in FY 2015.

The Federal Aviation Administration and Reform Act of 2012 mandated that TSA use AIT equipped with Automated Target Recognition (ATR) software for screening passengers. In FY 2013, TSA removed all non-ATR units from the field to comply with the Act. All of the current AIT fleet is equipped with ATR software, and ATR is a requirement for all future AIT procurements. TSA is currently testing the next generation, reduced-size AIT-2 systems. TSA anticipates AIT-2 systems will provide several new capabilities to include:

- Improved anomaly detection
- Decreased image processing time and improved passenger throughput
- Reduced-size (i.e. smaller footprint unit) system configuration. While the performance characteristics of both the full-size and reduced-size units remain the same, the reduced-size configuration offers relief in terms of system width and height to airports with limited checkpoint floor space.

In FY 2013, TSA began the AIT-2 qualification test and evaluation process. In FY 2014, TSA will conduct operational test and evaluation of the AIT-2 systems. Upon successful completion of testing, TSA will procure and deploy additional units to help achieve full operational capability (FOC) and meet RBS needs.

Checkpoint Technology: \$98.5 million

This request includes funding to test, procure, and install new screening equipment to further extend explosives and prohibited item detection at airport checkpoints and to update existing equipment with such enhancements as AT-2 tier upgrades. Funds will also be used for program, engineering, and technical support and travel, original equipment manufacturer training, warehousing, consumables, and

refurbishing equipment, to provide functionality and performance enhancements, as well as for life-cycle replacements for units reaching the end of their useful life. In FY 2015, TSA will begin life cycle replacement for checkpoint screening equipment reaching the end of their expected service life.

TSA analyzes the integration of new and modified systems and concepts of operation to ensure operational effectiveness and suitability prior to full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment under the proposed concept of operations, in the field under a variety of environmental conditions. In particular, this includes:

- Operational Test and Evaluation (OT&E) in support of regulatory and policy decisions;
- OT&E as part of the acquisition process for items procured by TSA, including Early Utility Assessments, Initial OT&E, and follow-on OT&E over the project lifecycle;
- Pilots, concept demonstrations, and field experimentation in support of mission area analyses, concept of operations development, process optimization and improvement, and workforce / vector characterizations; and
- Testing and Evaluation (T&E) capabilities development to improve the quality and utility of evaluation products.

The following chart depicts TSA's checkpoint equipment purchase status relative to the FOC. Once a technology reaches its FOC, additional equipment purchases support recapitalization efforts.

Technology	FOC ¹	Actual Purchases To Date	% of FOC After Purchases To Date	Planned Purchases with Prior Year Funds	Planned Purchases with FY 2014 Funds	Planned Purchases with FY 2015 Funds	PLANNED PURCHASES TOTAL	% OF FOC AFTER TOTAL PURCHASES
Advanced Imaging Technology ²	930	749	81%	150	0	25	924	99%
NextGen Explosives Trace Detector	2,820	1,395	49%	550	0	0	1,945	69%
Advanced Technology ³	2,215	1,647	74%	550	0	85	2,282	100%
Credential Authentication Technology ⁴	1,450	0	0%	800	600	50	1,450	100%
Bottled Liquids Scanner ⁵	1,660	1,690	Reached FOC 2013	0	0	300	1,990	100%
Boarding Pass Scanning System	1,400	1,400	Reached FOC 2013	0	0	0	1,400	100%
Chemical Analysis Device	255	255	Reached FOC 2012	0	0	0	255	100%

¹ FOC for all technology will be formally reassessed annually due to the impact of RBS initiatives such as TSA Pre ✓™ programs which are impacted by the degree of passenger voluntary enrollment and participation.

² TSA purchased a total of 1000 AITs, which include 251 Rapiscan units that were removed from field operations in FY 2013 to comply with the Federal Aviation Administration and Reform Act of 2012 mandate that AITs must have ATR installed. TSA has reserved non-expiring carryover funds to procure FOC of AIT once the requirement has been finalized.

³ At the end of FY 2013, TSA awarded a contract to Rapiscan for 550 AT units. In December 2013, the contract was terminated for default. TSA plans to recomplete the award in FY 2014.

⁴ The 9 CAT/BPSS systems previously procured are not included in these calculations.

⁵ In FY 2013, BLS procurements achieved the FOC, which was 1690. Due to RBS initiatives, the FOC has been reassessed and updated to 1660.

Checkpoint Technology Average Costs per Unit

Technology	Average Costs (\$000)
Advanced Imaging Technology - 2	\$130.0 (Est)
NextGen Explosives Trace Detector	\$32.5
Advanced Technology	\$120.0
Credential Authentication Technology	\$25.0 (Est)
Bottled Liquids Scanner	\$35.0
Chemical Analysis Device	\$50.0

TSA continues to seek opportunities to obtain cost savings throughout the procurement and deployment process for checkpoint technology including leveraging quantity discounts and using available qualified product lists to conduct competitive procurements. TSA will closely coordinate with airports to ensure product delivery orders can be managed to reduce warehouse inventories and associated shipping and/or storage costs.

Advanced Surveillance Program: \$5.0 million

The Advanced Surveillance Program (ASP) provides additional security capabilities, such as CCTV surveillance equipment, as part of TSA's layered approach to risk based screening. This is accomplished by partnering with transportation authorities to expand their existing surveillance systems. In doing so, the Federal Government gains the ability to observe and detect people and property moving through the security screening process and facilities. Advanced surveillance systems have proven to be a key component in the "best practices" of the security industry worldwide. They provide threat identification, situational awareness, deterrence, and loss prevention, investigative and legal activities along with standard management functions within the checkpoint areas to include exit lanes, sterile areas, and queue lanes. ASP promotes a cooperative partnership and sharing of information between Federal and local authorities and provides invaluable coordination for command and control for first responders in the event of an incident or threat. In FY 2015, ASP funding is planned for projects at Nashville International Airport (BNA) and Colorado Springs Airport (COS). The EDS Procurement and Installation PPA also includes funding to support these ASP projects in baggage handling areas.

	Projects Completed with Prior Year Funds	Projects to be Completed with FY 2015 Funds
Advanced Surveillance Program Projects	98	2

MAJOR ACQUISITIONS:

Passenger Screening Program

The Passenger Screening Program (PSP) identifies, tests, procures, deploys, and sustains equipment that detects threats concealed on people and in their carry-on items as they enter the airport terminal sterile area through the passenger screening checkpoints. The envisioned security system is an

optimized, integrated, and layered mix of networked systems that address known and emerging threats and vulnerabilities. Currently, PSP is composed three capability areas: People Screening, Carry-on Baggage Screening, and Layered Security. While increasing screening effectiveness through this layered approach, PSP also balances other operational considerations such as maximizing checkpoint efficiency; mitigating privacy and dignity concerns; maintaining operational affordability; and addressing deployment, maintenance, and other life cycle issues. PSP is now evaluating the next generation of detection systems that address opportunities to strengthen current screening capabilities.

The Passenger Screening Program investment is to be funded out of multiple PPAs in FY 2015, as follows:

- Checkpoint Support PPA \$92.7 million
- Screening Technology Maintenance PPA \$77.7 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
172,847	167,704	170,365

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Planning - \$13,439	Technology and Engineering Initiatives	Funds planning and oversight of testing, engineering initiatives, and test and evaluation in support of passenger and carry-on baggage screening equipment
Acquisition - \$78,755	Purchase of Transportation Security Equipment (TSE)	Funds support the procurement of security equipment to screen passengers and carry-on baggage at passenger checkpoint lanes
	Integration and Installation of TSE	Funds support the installation of security equipment in the checkpoint environment throughout the nation's airports
Maintenance - \$78,171	Transportation Security Equipment Maintenance	Funds the preventive and corrective maintenance activities required to maintain the operation of deployed checkpoint passenger screening equipment upon expiration of the warranty period
	Transportation Security Equipment Disposal	Funds the disposal of checkpoint passenger screening equipment

Security Technology Integrated Program

The Security Technology Integrated Program (STIP) is an agency-wide data management system that connects screening equipment to an Enterprise Manager (EM), which enables TSA to address challenges in data management, threat response, and equipment maintenance. STIP provides the management and monitoring capabilities required by TSA via the STIP EM, which offers a central location for the storage and analysis of officer and equipment performance data such as Threat Image Projection (TIP) scores and baggage throughput. STIP will meet the information collection, retrieval,

and dissemination requirements of the PSP and EBSP programs, as well as address potential areas of improvement within operations and maintenance for airport security equipment.

The Security Technology Integrated Program investment is to be funded out of multiple PPAs in FY 2015, as follows:

- Checkpoint Support PPA \$5.6 million
- EDS Procurement and Installation PPA \$8.5 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
15,587	12,892	14,106

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Planning - \$682	Checkpoint security technology	Funds planning for all current and future STIP activities (such as deployment, connectivity, data management, storage, and analysis) related to checkpoint screening technologies
	Checked baggage screening technology	Funds planning for all current and future STIP activities (such as deployment, connectivity, data management, storage, and analysis) related to checked baggage screening technologies
Acquisition - \$6,476	Checkpoint security technology	Funds will be used for development, integration, and deployment of STIP enablement and centralized and automated software upgrades for checkpoint screening technologies
	Checked baggage screening technology	Funds will be used for development, integration, and deployment of STIP enablement and centralized and automated software upgrades for checked baggage screening technologies
Maintenance - \$6,948	Checkpoint security technology	Funds used for the management and oversight of the STIP EM system which consists of back-end server and associated network infrastructure to optimize screening effectiveness and availability
	Checked baggage screening technology	Funds used for the management and oversight of the STIP EM system which consists of back-end server and associated network infrastructure to optimize screening effectiveness and availability

2015 Program Change	-	-	10,000
2015 Total Request	126	118	84,075
Total Change 2014 to 2015	2	2	10,230

TSA requests 126 positions, 118 FTE, and \$84.1 million in FY 2015 for the EDS Procurement and Installation PPA.

Adjustments-to-Base:

- Increase of 2 FTP/FTE for the management of TSA's warehouse activities
- Increase of \$47 thousand for annualization of the 2014 pay raise
- Increase of \$142 thousand for the 2015 pay raise
- Increase of \$142 thousand for retirement contributions
- Decrease of \$100 thousand for anticipated savings from reductions to non-mission critical travel and training, contract efficiencies, and /or supplies

Program Changes:

- Increase of \$10 million for base restoration of one-time reduction in FY 2014

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides a breakout of checked baggage funding for FY 2014 and FY 2015, including \$84.1 million in appropriated funds and \$250 million from the Aviation Security Capital Fund (ASCF).

(dollars in millions)

	Funding Source	FY 2014 Enacted	FY 2015 Request
Purchase of Checked Baggage Equipment		107.1	139.6
	<i>ASCF</i>	<i>107.1</i>	<i>139.6</i>
	<i>Discretionary</i>	-	-
Installation		212.7	190.5
	<i>ASCF</i>	<i>142.9</i>	<i>110.4</i>
	<i>Discretionary</i>	<i>69.8</i>	<i>80.1</i>
Advanced Surveillance Program (ASP)	<i>Discretionary</i>	4.0	4.0
Total ^{1/}		\$323.8	\$334.1

^{1/} Includes mandatory funding of \$250 million from the Aviation Security Capital Fund (ASCF).

The FY 2015 request will be used to test, evaluate, procure, and deploy electronic baggage screening technology systems. TSA's Electronic Baggage Screening Program (EBSP) is responsible for ensuring that 100 percent of all checked baggage is screened with Explosives Detection Systems (EDS) or a suitable alternative. The two primary technologies acquired and deployed are EDS and Explosives Trace Detection (ETD) devices. TSA's activities related to purchasing and installing EDS and ETD systems consist of some or all of the following, depending on the equipment and specific location: 1) operational testing and evaluation (OT&E), 2) equipment purchase, 3) site survey and design, 4) site preparation, 5) facility modification, 6) warehousing and shipping, 7) equipment installation, integration, and multiplexing, 8) independent verification and validation testing, and 9) program support.

Prioritization - TSA was able to ensure the screening of all checked baggage by December 2003 per the Aviation and Transportation Security Act of 2001 (ATSA) (PL 107-71) mandate. After that time, TSA's focus was expanded to ensure that all airports' screening zones use the most efficient technologies and resources to screen checked baggage. As of January 2014, 100% of CAT IV airports and 94% of all CAT X-III airports are screening with the most efficient technologies for their screening configuration. TSA does not anticipate receiving applications from the airports that could bring CAT X-III airports to 100% since these projects are required to be funded through a cost share agreement between TSA and the airport. If an airport is unable to participate in an in-line project, TSA cannot impose an in-line baggage screening project on the airport. The following chart shows the breakdown of airports, by category, and their level of project completion.

Program progress relative to EDS/ETD deployment and facility modifications
Projections through FY 2014 ¹

	Total Number of TSA Airports ²	Entire Airport Completed	Some Screening Areas with Completed Systems	Total Number of Airports with Some Completed Systems	Percentage of Airports with Some Completed Systems
CAT X	28	18	9	27	96%
CAT I	57	39	7	46	81%
CAT II	81	78	2	80	99%
CAT III	128	118	6	124	97%
CAT IV ³	154	154	0	154	100%
Total	448	407	24	431	96%

¹ Projects planned to be completed with funds enacted through FY 2014

² Based on TSA Threat Category listing as of February 20, 2014.

³ CAT IV airports that conduct primary screening with ETDs are considered complete.

As of January 2014, TSA had nearly 1,800 EDS units deployed at airports nationwide. A large portion of the EDS and ETD fleet was deployed in 2002 and 2003 to meet the 100% checked baggage screening requirements of the ATSA (PL 107-71). While TSA made considerable progress toward deploying the most efficient technologies based on airports' screening configurations, in FY 2012 it shifted its focus to recapitalization and optimization projects. Many EDS and ETDs are reaching the end of their useful lives because they cannot be upgraded to the next level of detection without significant costs or operational impacts to TSA. Equipment is prioritized for replacement based on its ability to reach the next level of detection, age, maintenance history, and operational performance. This change in emphasis reduced TSA's focus on funding new in-line system facility modification projects and increased the funding requirements for the purchase and installation of new equipment to replace the aging fleet. As a result, TSA requested legislative changes to restrictions on the use of funding received from the Aviation Security Capital Fund (ASCF), which previously restricted the use of funds to facility modifications at airports. Upon legislative approval in FY 2012 through FY 2014, TSA has used ASCF funds for the procurement and installation of EDS equipment required for its recapitalization effort in addition to facility modifications. TSA is requesting the legislative change again in FY 2015.

Recapitalization and Optimization - Recapitalization addresses the programmatic and project-specific elements requisite for EDS and ETD life cycle replacement. Recapitalization efforts focus on a like-for-like replacement of existing equipment with minimal additional modifications. Optimization refers to efforts that also include significant system changes designed to enhance safety and security,

improve performance, increase efficiency, reduce operating costs, and address personnel considerations associated with in-line EDS. To address the significant need to recapitalize the existing EDS and ETD fleet, TSA has developed a formal recapitalization plan. The recapitalization plan:

- Identifies and defines the processes needed for implementing a successful recapitalization and optimization effort;
- Defines information needs and sources to support the plan, and technical decisions for prioritization, scheduling, resource planning, and execution;
- Ensures process consistency across all projects; and
- Defines and prioritizes a list of eligible recapitalization and optimization projects.

Technology - EDS equipment can exist in two configurations: stand alone or in-line. Stand-alone systems are currently located in airport lobbies and “behind the scenes” in baggage handling areas. In-line configurations integrate the EDS equipment into the baggage handling system. TSA benefits from operational improvements associated with this type of automation. For instance, working conditions for Transportation Security Officers (TSOs) can improve with in-line systems as alarms can be resolved in quieter, dedicated spaces that are properly designed for the alarm resolution function, and inline systems also contribute to reduced TSO injury rates. Continuous improvements are required to enhance threat detection, increase equipment reliability, reduce downtime, extend service life, and eliminate TSO safety hazards in order for TSA to substantially improve the effectiveness and efficiency of the deployed screening equipment.

In FY 2010, TSA began a competitive procurement effort for EDS that involves rigorous processes for establishing requirements, testing the products, evaluating the tests, and weighing the value of available options to determine which combination of factors provide the best solution. TSA is using the competitive procurement effort as the primary tool for driving the technological changes necessary to achieve improved security and increased performance at a lower life cycle cost. TSA initiated an incremental development strategy for systems to allow for the purchase and deployment of EDS with highest threat detection and other technical capabilities available. The strategy provides new and existing vendors with an open opportunity to submit equipment for certification and testing. At this time, TSA only utilizes Reduced-size EDS and Medium-speed EDS. The High-speed EDS units will begin Developmental Testing in FY 2014.

EDS technologies are classified as follows:

- High-speed (HSEDS): Throughput > 900 bags per hour (bph)
- Medium-speed (MSEDS): $400 < \text{Throughput} \leq 900$ bph
- Reduced-size (RSEDS): $100 < \text{Throughput} \leq 400$ bph

ETDs are used both as primary and secondary screening methods (i.e., resolving EDS alarms) and are designed to detect explosives residue left on an item. ETDs are the second largest component of equipment cost within the EBSP program.

Purchase of Checked Baggage Equipment: \$139.6 million

The FY 2015 request includes funding to support the purchase of 109 MSEDs for deployment in our Nation's airports. Purchases in FY 2015 are planned to support projects where prior year funding completed facility modifications and to purchase units to replace aging equipment in the field. TSA will continue implementation of its Incremental Development Strategy to allow vendors to refine their automatic detection algorithms so that increasingly effective equipment types can become certified and qualified for purchase by TSA. In this way, TSA provides opportunities for near term deployment of screening equipment utilizing enhanced screening detection standards and at the same time provides future procurement windows to increase both efficiency and effectiveness standards as new threats emerge. Efforts will continue toward reducing purchase costs through competitive procurements in addition to the implementation of contracts for EDS and ancillary equipment that incorporate direct shipping to airports instead of warehouses. TSA will also continue to pursue potential equipment upgrades capable of extending the life of existing equipment as part of its effort to contain procurement costs.

The following table provides a breakout of planned technology purchases in FY 2014 and 2015:

(dollars in millions)*

	FY 2014 Enacted			FY 2015 Request		
Equipment Type	Planned Purchases	Cost/Unit	Projected Costs	Planned Purchases	Cost/Unit	Projected Costs
ETD	-	-	-	250	\$0.04	\$8.8
Reduced- Size EDS	7	\$0.4	\$2.7	-	-	-
Medium Speed EDS	87	\$1.2	\$104.4	109	\$1.2	\$130.8
Total	94		\$107.1	359		\$139.6

**Amounts may be off slightly due to rounding*

Installation: \$190.5 million

The FY 2015 request includes funding for installation. Installation funding supports the multi-year Letter of Intent and Other Transaction Agreement project requirements and the installation of electronic baggage screening equipment in the Nation's airports. In addition to equipment installation, integration, and multiplexing, installation activities include independent verification and validation testing, site survey and design, facility modification, site preparation, warehousing and shipping, OT&E, and program support. TSA will continue efforts to reduce and avoid program support costs via improvements to data and document management and processing systems.

Installation funding is also used to evaluate the impact of new security technologies, procedures, and policies. TSA analyzes the integration of new and modified systems and concepts of operation to ensure operational effectiveness and suitability prior to full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative

systems under realistic conditions, including operation by those who will use the equipment under the proposed concept of operations in the field under a variety of environmental conditions. In particular, this includes:

- OT&E as part of the acquisition process for items procured by TSA;
- OT&E in support of regulatory and policy decisions in areas such as air cargo and surface transportation;
- Pilots, concept demonstrations, and field experimentation in support of mission area analyses, concept of operations development and workforce characterization; and
- Testing and Evaluation (T&E) capabilities development to improve the quality and utility of evaluation products.

Advanced Surveillance Program: \$4.0 million

The Advanced Surveillance Program (ASP) provides additional security capabilities, such as closed circuit television (CCTV) surveillance equipment, as part of TSA’s layered approach to risk based screening. This is accomplished by partnering with transportation authorities to expand their existing surveillance systems. In doing so, the Federal Government gains the ability to observe and detect people and property moving through the security screening process and facilities. Advanced surveillance systems have proven to be a key component in the “best practices” of the security industry worldwide. They provide threat identification, situational awareness, deterrence, loss prevention, investigative and legal activities along with standard management functions within the checked baggage areas. ASP promotes a cooperative partnership and sharing of information between Federal and local authorities and provides invaluable coordination for command and control as well as first responders in the event of an incident or threat. In FY 2015, ASP funding is planned for projects at Nashville International Airport (BNA) and Colorado Springs Airport (COS). The Checkpoint Support PPA also includes funding to support these ASP projects within the checkpoint areas to include exit lanes, sterile areas, and queue lanes.

	Projects Completed with Prior Year Funds	Projects to be Completed with FY 2015 Funds
Advanced Surveillance Program Projects	98	2

MAJOR ACQUISITIONS:

Electronic Baggage Screening Program

The Electronic Baggage Screening Program (EBSP) identifies, tests, procures, deploys, installs, sustains, and recapitalizes Transportation Security Equipment (TSE) across all Federalized airports to ensure 100% screening of checked baggage. The EBSP supports screening to minimize the risk of personal injury or death, or damage or loss of property due to terrorist or criminal activity. It reduces costs and improves security screening efficiency through automation of processes to detect and prevent the introduction of explosives materials, weapons, and other dangerous articles into commercial aircraft. Key objectives are: increasing threat detection capability; improving checked baggage screening efficiency; replacing aging Explosives Detection System (EDS) and Explosive

Trace Detection (ETD) units; and using competitive procurement contracts for new and viable technologies. Key components include the deployment of new TSE to respond to emerging threats, and the recapitalization of deployed TSE.

The Electronic Baggage Screening Program investment is to be funded out of multiple PPAs in FY 2015, as follows:

- EDS Procurement and Installation PPA \$51.9 million
- Screening Technology Maintenance PPA \$216.8 million
- Aviation Security Capital Fund PPA \$250.0 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
510,985	515,828	518,696

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Planning - \$34,678	Technology and Engineering Initiatives	Funds planning and oversight of testing, engineering initiatives, and test and evaluation in support of checked baggage screening equipment operations
Acquisition - \$266,363	Purchase of Transportation Security Equipment (TSE)	Funds support the procurement of checked baggage screening equipment (EDS and ETDs) to fulfill facility modification agreements and/or to support the equipment recapitalization effort
	Installation of TSE	Funds support the installation of checked baggage screening equipment (EDS and ETDs) throughout the nation's airports
Maintenance - \$217,655	TSE Maintenance	Funds the preventive and corrective maintenance activities required to maintain the operation of deployed checked baggage screening equipment upon expiration of the warranty period.
	TSE Disposal	Funds the disposal of checked baggage screening equipment

Security Technology Integrated Program

The Security Technology Integrated Program (STIP) is an agency-wide data management system that connects screening equipment to an Enterprise Manager (EM), which enables TSA to address challenges in data management, threat response, and equipment maintenance. STIP provides the management and monitoring capabilities required by TSA via the STIP EM, which offers a central location for the storage and analysis of officer and equipment performance data such as Threat Image Projection (TIP) scores and baggage throughput. STIP will meet the information collection, retrieval, and dissemination requirements of the PSP and EBSP programs, as well as address potential areas of improvement within operations and maintenance for airport security equipment.

The Security Technology Integrated Program investment is to be funded out of multiple PPAs in FY 2015, as follows:

- Checkpoint Support PPA \$5.6 million
- EDS Procurement and Installation PPA \$8.5 million

Funding tables for this investment are included in the Checkpoint Support PPA.

**Department of Homeland Security

(Dollars in Thousands)

PPA: Screening Technology Maintenance

	Perm. Pos	FTE	Amount
2013 Revised Enacted	-	-	292,645
2014 Enacted	-	-	298,509
2015 Adjustments-to-Base	-	-	(4,000)
2015 Current Services	-	-	294,509
2015 Total Request	-	-	294,509
Total Change 2014 to 2015	-	-	(4,000)

TSA requests \$294.5 million for the Screening Technology Maintenance PPA.

Adjustments-to-Base:

- Decrease of \$4.0 million from contract efficiencies and reduced equipment levels

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of the PPA's Current Services:

(dollars in millions)

	FY 2014 President's Request	FY 2015 Request
Checked Baggage Equipment Maintenance	\$221.7	\$215.8
Checkpoint Equipment Maintenance	74.8	76.7
Disposal ^{1/}	2.0	2.0
Total	\$298.5	\$294.5

^{1/} Disposal amount is allocated evenly between Checked Baggage and Checkpoint Equipment.

Funding in this PPA supports the maintenance and disposal of Transportation Security Equipment (TSE) in the Nation's airports. Maintenance is essential to preserve the operational capability of security technology equipment. During the warranty period, the Original Equipment Manufacturer

(OEM) is responsible for all preventive and corrective maintenance actions as specified in each technology acquisition contract. The OEM warranty period for major TSE begins when the equipment passes a Site Acceptance Test (SAT). Once warranties expire (normally after 24 months), all TSA checkpoint and checked baggage screening equipment is under a maintenance contract throughout its life cycle. Most maintenance is performed by contractor Field Service Technicians working for the OEMs or a third party Maintenance Service Provider. Preventive maintenance is performed according to the manufacturer's recommended schedule (e.g., monthly, annually, etc.). Corrective maintenance support is provided 24 hours a day, 7 days a week, to perform unplanned corrective repairs in the field. Maintenance contracts include labor costs for all preventive and corrective maintenance, as well as material costs for repair parts or consumables (e.g., Explosives Trace Detection (ETD) unit swabs). In FY 2015, the funding in this PPA will support maintenance services, through firm fixed price contracts, for over 12,000 pieces of security equipment that have come out of OEM warranty. The reduction in the FY 2015 request is due in part to contract efficiencies and equipment removals.

Checked Baggage Equipment Maintenance: \$215.8 million

This request includes funding for preventive and corrective maintenance activities required to maintain the operation of deployed checked baggage screening systems. These costs include labor; repair parts; packaging and transportation of repair parts; initial consumables for ETDs; tools, test equipment and calibration; maintenance training; and related logistics, data management, safety, occupational health, and environmental management functions.

Below are detailed projected maintenance costs for checked baggage screening equipment. The FY 2015 fielded quantities are subject to change based on the timing of procurements and deployments. Because the warranty period begins after successful SAT and because units are fielded throughout the year, the number of units in and out of warranty varies throughout the fiscal year. The FY 2015 requirement represents the projected maintenance cost for those units no longer under warranty, not the unit cost for the total number of fielded units.

Equipment ^{1/}	FY 2015 Fielded Quantity	Average Number of Units Out of Warranty	Average Number of Units In warranty	FY15 Requirement
Explosives Detection Systems (EDS)				
CTX-5500	220	144	76	\$ 17,244,089
CTX-9000	316	219	97	\$ 39,979,251

Excepted Maintenance/Call Center/Environment Issues				\$ 9,625,396
Support Services				\$ 3,631,250
Total Maintenance Requirement				\$ 215,776,504
Disposal				\$ 1,000,000

^{1/}The make/model of the equipment is subject to change based on actual acquisitions.

Checkpoint Equipment Maintenance: \$76.7 million

This request includes funding for the preventive and corrective maintenance activities required to maintain the operation of deployed passenger screening security equipment. These costs include labor; repair parts; packaging and transportation of repair parts; initial consumables for ETDs; tools, test equipment and calibration; and maintenance training.

Below are detailed projected maintenance costs for passenger screening systems. The FY 2015 fielded quantities are subject to change based on the timing of procurements and deployments. Because the warranty period begins after successful SAT and because units are fielded throughout the year, the number of units in and out of warranty varies throughout the fiscal year. The FY 2015 requirement represents the projected maintenance cost for those units no longer under warranty, not the unit cost for the total number of fielded units.

Equipment ^{1/}	FY 2015 Fielded Quantity	Average Number of Units Out of Warranty	Average Number of Units In warranty	FY15 Requirement
ETD				
IonScan 400B	254	254	0	\$ 2,732,532
Itemiser DX	1575	1300	275	\$ 7,772,700
Ionscan 500DT	971	696	275	\$ 7,138,872

Spectrum	0	0	0	\$ -
Credential Authentication Technology (CAT)				
TBD	500	0	500	\$ -
Boarding Pass Scanning Systems (BPSS)				
NCR, DESKO, IER	1400			\$ 280,000
Chemical Analysis Device (CAD)				
First Defender	255	174	81	\$ 1,422,900
Checkpoint Equipment Subtotal				\$ 66,126,068
Call Center/Excepted Maintenance/Program Management				\$ 7,968,346
Support Services				\$ 2,638,082
Total Maintenance Requirement				\$ 76,732,496
Disposal				\$ 1,000,000

^{1/}The make/model of the equipment is subject to change based on actual acquisitions.

^{2/} The fielded quantity does not include 251 Rapiscan AIT units, which TSA removed from the field to comply with the Federal Aviation Administration and Reform Act of 2012 mandate that AITs must have Automated Target Recognition capability installed.

Disposal: \$2.0 million

This request includes funding for the disposal of equipment. Security equipment is decommissioned when evolving operational requirements (e.g., higher screening throughput), technological advancements (e.g., improved detection capability), or supportability problems (e.g., frequent failures) dictate the need for replacement. Sometimes equipment is redeployed to satisfy screening requirements at other airports or loaned to partner nations based on requirements from the TSA Office of Global Strategies. Upon request, security equipment that is not redeployed is offered to other DHS and Federal agencies, or returned to manufacturers for credit on future procurements. Otherwise, surplus equipment is provided to the Defense Logistics Agency (DLA) Disposition Services for salvage and destruction. This budget includes funding to remove Sensitive Security Information and hazardous material from disposal equipment and for DLA disposal services.

MAJOR ACQUISITIONS:

Passenger Screening Program

The Passenger Screening Program (PSP) identifies, tests, procures, deploys, and sustains equipment that detects threats concealed on people and in their carry-on items as they enter the airport terminal sterile area through the passenger screening checkpoints. The envisioned security system is an optimized, integrated, and layered mix of networked systems that address known and emerging threats and vulnerabilities. Currently, PSP is composed three capability areas: People Screening, Carry-on Baggage Screening, and Layered Security. While increasing screening effectiveness through this layered approach, PSP also balances other operational considerations such as maximizing checkpoint efficiency; mitigating privacy and dignity concerns; maintaining operational affordability; and addressing deployment, maintenance, and other life cycle issues. PSP is now evaluating the next generation of detection systems that address opportunities to strengthen current screening capabilities.

The Passenger Screening Program investment is to be funded out of multiple PPAs in FY 2015, as follows:

- Checkpoint Support PPA \$92.7 million
- Screening Technology Maintenance PPA \$77.7 million

Funding tables for this investment are included in the Checkpoint Support PPA.

Electronic Baggage Screening Program

The Electronic Baggage Screening Program (EBSP) identifies, tests, procures, deploys, installs, sustains, and recapitalizes Transportation Security Equipment (TSE) across all Federalized airports to ensure 100% screening of checked baggage. The EBSP supports screening to minimize the risk of personal injury or death, or damage or loss of property due to terrorist or criminal activity. It reduces costs and improves security screening efficiency through automation of processes to detect and prevent the introduction of explosives materials, weapons, and other dangerous articles into commercial aircraft. Key objectives are: increasing threat detection capability; improving checked baggage screening efficiency; replacing aging Explosives Detection System (EDS) and Explosive Trace Detection (ETD) units; and using competitive procurement contracts for new and viable technologies. Key components include the deployment of new TSE to respond to emerging threats, and the recapitalization of deployed TSE.

The Electronic Baggage Screening Program investment is to be funded out of multiple PPAs in FY 2015, as follows:

- EDS Procurement and Installation PPA \$51.9 million
- Screening Technology Maintenance PPA \$216.8 million
- Aviation Security Capital Fund PPA \$250.0 million

Funding tables for this investment are included in the EDS Procurement and Installation PPA.

PPA: Aviation Regulation and Other Enforcement

	Perm. Pos	FTE	Amount
2013 Revised Enacted	1,732	1,549	337,163
2014 Enacted	1,658	1,584	354,437
2015 Adjustments-to-Base	(44)	(35)	(5,784)
2015 Current Services	1,614	1,549	348,653
2015 Total Request	1,614	1,549	348,653
Total Change 2014 to 2015	(44)	(35)	(5,784)

TSA requests 1,614 positions, 1,549 FTE and \$348.7 million in FY 2015 for the Aviation Regulation and other Enforcement PPA:

Adjustments-to-Base:

- Decrease from transfer of 194 FTP/185 FTE and \$26.964 million to Surface Transportation Security appropriation for VIPR consolidation
- Decrease from transfer of \$2.0 million to Intelligence and Vetting appropriation for TSA Risk Knowledge (TSARK) Center expansion
- Decrease from realignment of 14 FTP/FTE and \$3.5 million to Air Cargo PPA to consolidate international inspectors
- Decrease from realignment of \$3.0 million to Airport Management and Support PPA for the Automatic Detection and Processing Terminal (ADAPT) contract
- Decrease from realignment of 6 FTP/FTE to Airport Management and Support PPA for TSOC positions
- Decrease of \$9.9 million non-recurring from Office of Global Strategies payroll
- Decrease of \$1.3 million for anticipated savings from reductions to non-mission critical travel and training, contract efficiencies, and/or supplies
- Increase from transfer of \$6.698 million from Surface Transportation Security appropriation to consolidate Canine Program funding
- Increase from realignment of 149 FTP/143 FTE and \$24.593 million from Air Cargo PPA to consolidate Canine Program funding
- Increase of \$553 thousand for annualization of the 2014 pay raise
- Increase of \$1.582 million for the 2015 pay raise
- Increase of 21 FTP/FTE and \$5.0 million from annualization of FY 2013 enacted canine increase
- Increase of 6 FTE and \$500 thousand for annualization of 12 additional canine teams from 2014
- Increase of \$1.954 million for retirement contributions.

CURRENT SERVICES PROGRAM DESCRIPTION:

Aviation Regulation is responsible for providing law enforcement and regulatory presence at airports to ensure compliance with required security measures and response to security incidents. It also provides an international component to foster consistency in worldwide security requirements and ensure compliance with TSA requirements and International Civil Aviation Organization (ICAO) baseline standards.

The following table provides the components of this PPA:

(dollars in millions)

	FY 2014 Enacted	FY 2015 Request
Domestic Regulatory Inspection	\$78.9	\$79.8
International Programs		
International Inspection and Enforcement	\$16.0	\$12.6
International Operations	\$58.6	\$49.1
Airport Law Enforcement & Assessments	\$69.8	\$70.3
National Explosives Detection Canine Team Program (NEDCTP)	\$89.9	\$127.4
General and Commercial Aviation	\$12.4	\$9.5
Visible Intermodal Prevention and Response (VIPR)	\$28.8	\$0
Total	\$354.4	\$348.7

Domestic Regulatory Inspection and Enforcement: \$79.8 million

The mission of the regulatory inspection program is broad and involves the evaluation of the security integrity of the 448 U.S. airports and a combined total of over 1,500 domestic and international carriers that operate in the United States. These inspectors also conduct periodic inspections of over 7,500 Indirect Air Carriers (IACs) operating in the United States.

Over the past few years, TSA's inspector community has made significant efforts to ensure that various airport inspections are scheduled in a way that balances and maximizes oversight while identifying possible efficiencies in scheduling. Analysis of inspection data as well as risk scores are used to drive and prioritize inspection activity and take into account various factors, including the latest intelligence information.

The following chart provides historical and current information on the total number of Transportation Security Inspector (TSI) positions. This PPA includes 1,045 TSI-Aviation Domestic Inspectors, of which 310 are Canine Handlers; 48 TSI-Aviation International Inspectors; and 15 TSI International Repair Station Inspectors.

	FY 2013	FY 2014	FY 2015
Aviation Regulation	984	966	1,045
Domestic Inspectors	654	654	672 ¹

Domestic Canine Inspectors ²	178	190	310
VIPR Inspectors	75	45 ¹	0 ¹
International Inspectors ³	62	62	48
International Repair Station Inspectors	15	15	15
Air Cargo	681	681	577
Domestic Inspectors	500	500	496 ⁴
Domestic Canine Inspectors	120	120	0 ²
International Inspectors	61	61	81 ^{3,4}
Surface	379	300	319
Domestic Inspectors	225	225	272 ⁵
VIPR Inspectors	154	75 ⁵	0 ⁵
Multi-Modal VIPR Inspectors	0	0	47 ^{1,5,6}
Total Inspectors	2,044	1,947	1,941

¹Based on a reassessment of the Aviation VIPR program, it was determined the program would optimally operate by having 26 dedicated VIPR Inspectors (one per VIPR location) plus one inspector at the Joint Coordination Center (JCC) compared to the prior allocation of resources which used shared inspector resources to conduct both VIPR operations and compliance activities. Out of the previous 45 Aviation VIPR inspector allocation, 27 will move to multi-modal VIPR inspectors in the Surface Transportation Security appropriation and 18 will be realigned to domestic aviation inspection activities to more properly reflect the work they are conducting.

²Includes an additional 12 passenger screening canine inspector positions in both the FY 2013 and FY 2014 enacted appropriations. It also reflects the consolidation of all Canine Teams into the Aviation Regulation and Other Enforcement PPA.

³Aviation Regulation international inspectors in FY 2013 and FY 2014 reduced to 62, from 64 as noted in the FY 2014 Congressional Justification, due to a technical correction. In FY 2015, 14 positions shifted from Aviation Regulation to Air Cargo, due to the consolidation of the inspector workforce.

⁴Reflects 4 Air Cargo domestic inspector positions and 2 non-inspector positions transferring to 6 Air Cargo international inspector positions to manage the international operations of the Air Cargo Advance Screening Pilot.

⁵Based on a reassessment of the Surface VIPR program, it was determined the program would optimally operate by having 26 dedicated VIPR Inspectors (one per VIPR location) plus two inspectors at the JCC compared to the prior allocation of resources which used shared inspector resources to conduct both VIPR operations and compliance activities. Out of the previous 75 Surface VIPR inspector allocation, 28 will move to multi-modal VIPR inspectors in the Surface Transportation Security appropriation and 47 will be realigned to domestic surface inspection activities to more properly reflect the work they are conducting.

⁶Reflects the consolidation of VIPR into the Surface Transportation Security appropriation as well as the reduction of 8 inspectors.

Aviation TSIs (TSI-As) have an essential role in executing local annual inspection plans based on the national inspection plan. As part of their inspection responsibilities, TSI-As review records and files pertaining to criminal history records checks performed pursuant to Federal law. The inspectors also review records and files to ensure compliance of indirect air carriers; private passenger and/or cargo charters; and airmen and aircrew with security requirements. In addition to inspections, TSI-As also perform testing to determine compliance with transportation security regulations. The TSI-As investigate incidents related to violations of TSA regulations, security directives, and approved security programs. Inspectors deliver technical briefings and provide assistance to the aviation industry in interpreting agency policies to ensure compliance with rules. Inspections are both scheduled and random and may include one or all of the critical security elements required by TSA.

Through October 2013, TSA completed over 7,725 airport inspections, 14,925 aircraft operator inspections and 3,368 foreign air carrier inspections. To ensure the adequacy and integrity of security at airports, TSIs evaluate the types of fences, lighting, and locks being used, among other important

security measures through visual and hands-on inspection. Based on these assessments inspectors will recommend enhancements, where appropriate, for non-regulated airports/facilities, including general aviation landing facilities and airports, and for aircraft operators. Areas of emphasis for inspection and/or assessment include: access control systems, security identification systems, surveillance systems, law enforcement response capabilities, physical security of aviation facilities and aircraft.

Inspectors are given the authority to initiate enforcement actions against airports, air carriers, and indirect air carriers where compliance violations have occurred or corrections have not been made. This includes misconduct of employees that threaten the security of an airport and/or aircraft.

Beginning in FY 2013, the regulatory inspection and enforcement program began conducting two types of comprehensive inspections - “targeted comprehensives” will be conducted annually and “comprehensives” will be conducted bi-annually of all airports, aircraft operators, flight schools, repair stations, and foreign air carriers at domestic airports. “Targeted” comprehensive inspections are focused inspections relying largely on operational performance for determining compliance (i.e. testing). This captures the risk-based security model and will be conducted annually. “Comprehensive” inspections consist of the previously described “targeted” inspection and in addition bring into play the support element of security requirements (i.e. records, signage, etc.). This further extends the risk-based security model and will be conducted bi-annually.

Additionally, in FY 2013 the regulatory inspection and enforcement program began new enhanced testing protocols. The “Compliance Security Enhancement Through Testing” (COMSETT) Program increases the types and frequency of testing, while engaging the regulated party in partnership programs for mitigating vulnerabilities to security.

International Programs (including International Inspection and Operations): \$61.7 million

TSA’s Office of Global Strategies (OGS) promotes alignment and consistency between the security requirements of the U.S. and foreign governments and is responsible for all facets of the Agency’s activities at foreign locations. The program’s primary statutory and regulatory responsibilities focus on identifying and mitigating security risks to transportation modes used extensively by U.S. citizens and foreign governments. When a new threat or vulnerability emerges, TSA must coordinate with both foreign governments and industry on the implementation of appropriate responses to mitigate the likelihood of a successful attack. TSA takes a leadership role as a permanent U.S. member in the regional and international organizations concerned with transportation security [i.e., ICAO, the Group of Eight (G8) Transportation Security Subgroup, and the European Civil Aviation Conference (ECAC)].

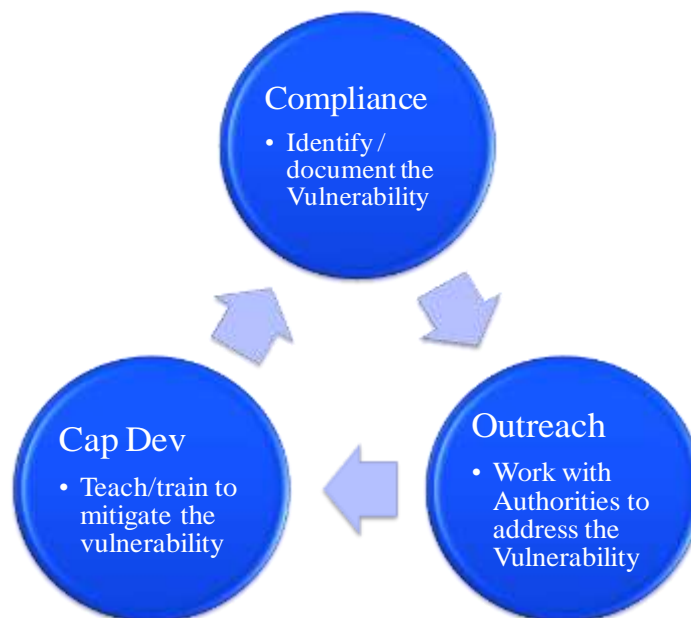

TSA strives to lead worldwide improvements in transportation security using a multi-layered approach, which includes:

- Liaison activity and representation with over 100 foreign governments, on-site liaison activity and representation in 26 foreign countries currently. In FY 2014, TSA will shift one TSAR position from Hawaii (responsible for the Asia Pacific Islands) to the Africa Middle East Region (AME) (location TBD) and increase on-site foreign liaison to 27 countries;
- Evaluation and documentation of vulnerabilities at nearly 300 last point of departure airports and over 1,600 air carrier stations located in foreign countries around the world;

- Liaison activity and representation with approximately 220 foreign air carriers and 95 domestic carriers with international operations;
- Industry guidance and outreach to guide U.S. aircraft operators' international service;
- Active leadership within the regional and international community that comprises the world's transportation security expertise engaged in policy development;
- Capacity building program for nations needing assistance in order to meet international standards; and
- National cargo security program (NCSP) recognition efforts with over 50 countries.

TSA seeks to work proactively by forging strong relationships and alliances with our foreign and industry partnerships. TSA focuses on enhancing operations with a nexus to the United States by identifying risk through compliance, mitigating risk through outreach, engagement and capacity development, and responding to incidents as they occur.

IDENTIFICATION OF RISK

As the understanding of the threat picture evolves, mitigation efforts are continuously evaluated and re-assessed to determine their efficacy in reducing the threat. As identified in the Transportation Sector Security Risk Assessment, international aviation represents the highest risk category. As a result, outreach and engagement with foreign partners, industry, and within the interagency is necessary to ensure policies are understood, implemented, and sustained. As the threats evolve and shift between international locations, TSA must be proactive in evaluating, assessing and shifting staff and resources to ensure that mission coverage is located where needed. These reassignments ensure the proper assets are in place to reduce and mitigate evolving threats. Each region presents its own challenges, but shared best practices, lessons learned with our partners, and a combined analysis of risks enhance TSA's ability to affect change globally.

Transportation Security Administration Representatives (TSARs) - TSARs serve as on-site administrators/coordinators for the TSA response to terrorist incidents and threats to U.S. citizens and assets at foreign transportation modes. The TSARs also serve as principal policy advisors on transportation security affairs to U.S. Ambassadors and other U.S. and foreign government officials. TSARs handle all modes of transportation and are responsible for ensuring the National Civil Aviation Security Programs meet international standards for aviation security. TSARs also facilitate the TSA compliance effort by planning and coordinating airport risk analysis and assessments.

TSARs			
Location^{1,2}	Number	Location	Number

Total 29			

1. All locations are subject to space availability at Embassies and country approval.

2. TSA also assigns a point of contact to the ICAO to work collaboratively towards the development of global aviation security standards.

Pre-Clearances - At 15 airports (eight in Canada, two in The Bahamas, one in Bermuda, one in Aruba, two in Ireland, and one being added in Abu Dhabi (second quarter FY 2014), CBP officers pre-clear passengers and baggage for entry into the United States. Inspection procedures, which are identical to U.S. port of entry screening, involve immigrations, customs, and agriculture screening. Pre-cleared international flights arrive at a U.S. domestic gate and passengers deplane directly into the sterile area at more than 65 U.S. airports without having another U.S. government inspection. Upon arrival at the U.S. domestic terminal facility, the traveler may either connect to a U.S. domestic flight or they may leave the airport. In order to permit these passengers to bypass TSA screening, TSA must ensure that the screening measures applied to passengers and their carry-on baggage at the pre-clearance foreign airport is equivalent to those measures performed at domestic U.S. airports. Determination of comparability entails extensive negotiation with the host government and frequent observations and analysis of operations.

Capacity Development - TSA's Capacity Development mission is the risk-based, measurable, and sustainable reduction of global aviation security risk by enhancing international aviation security

performance and building capability through assistance delivery. An important part of this effort is aviation security training conducted in response to risks and threats identified by a number of entities (Department of Homeland Security, Anti-Terrorism Assistance Program, Department of State (DOS), Department of Transportation, and the Organization of American States (OAS)/Inter-American Committee Against Terrorism). In addition to assisting these entities, TSA provides sponsored civil aviation training that mitigates vulnerabilities identified during foreign airport assessments and/or support TSAR country risk mitigation plans.

TSA training is available to both foreign government and non-governmental entities responsible for performing or overseeing security measures. Listed below are some opportunities available that both enhance and develop individuals in these fields:

- Auditor/Inspector Techniques;
- Cargo Security Management;
- Essential Instructor Skills Workshop;
- Excellence in Screening Techniques;
- Incident Management and Response;
- Instructional Systems Design;
- Preventive Security Measures and
- Risk Management Workshop

Aviation security training is conducted on-site in the requesting country, at an international airport or alternate training venues. TSA solicits the assistance of men and women across the agency who have a desire to serve as instructors and provide assistance as experts to nations in need.

Multilateral Engagement on Countries of Interest [Aviation Security Sustainable International Standards Team (ASSIST)] - TSA is developing a cadre of strategic capacity development partners to supplement its internal efforts to raise the baseline of transportation security and effectively address the needs of partner nations to build sustainable institutions and practices. TSA is working with the U.S. Government and international partners (such as the ICAO, the OAS, the DOS) to identify opportunities for coordinated or joint training and synchronize training sustainment engagement activities. These multilateral efforts focus on Africa, the Latin America/Caribbean area, and the Asia-Pacific regions in light of the exponential growth in traffic and commerce from these regions to the United States, as well as concerns about the security of transiting U.S. passengers and cargo.

Transportation Security Specialists (TSSs) - TSA identifies vulnerabilities at foreign locations through two primary means: assessments of foreign airports and inspections of air carriers that fly from those airports.

Under 49 United States Code (U.S.C.) 44907, TSA is charged with assessing all foreign airports with flights to the United States and those from which U.S. air carriers operate (regardless of the destination). TSA has a cadre of TSSs who visit the nearly 300 airports at one- to three-year intervals. Frequency of the visits is based on risk computations of current threat, documented vulnerabilities, and flight data. During the assessments, TSA evaluates the security posture of the airport in accordance with security standards established by the ICAO. The observations focus on screening (e.g. passengers, accessible property, and checked bags), access control (e.g., fence integrity, badge display

and control, vehicle access), aircraft security (e.g., ensuring the aircraft was guarded against any unauthorized access), cargo security (e.g. screening, chain of custody, facility security, personnel security), catering, and quality control (e.g., ensuring that screeners were properly trained).

Annual visits are conducted to ensure that all U.S. air carriers operate in compliance with TSA regulations identified in the Aircraft Operator Standard Security Program (AOSSP) and supporting Security Directives (SDs). TSA also inspects foreign air carriers that fly to the United States from each airport that they operate to ensure compliance with the Model Security Program and supporting Emergency Amendments (EAs). At airports where the vulnerability shortfalls have been documented as particularly egregious, these inspections occur semi-annually.

TSA has a spectrum of responses available to mitigate issues identified during these visits. Options range from providing on-the-spot correction recommendations, to conducting formal training, to recommending enacting a Public Notice that the airport does not implement adequate security measures, to suspending service. These last two responses are usually only considered when all other attempts have failed in assisting the airport or host government to improve security. Interim measures may also include issuance of site-specific SDs and EAs (that require additional measures by the regulated air carriers) or repeated visits by TSSs to evaluate progress.

The TSS and program analysts enable TSA to continue airport assessments, air carrier inspections, and in the very near future, foreign repair stations audits. In FY 2013, TSA evaluated staffing levels for efficiencies and determined that the Los Angeles Regional Operations Center (ROC) could be combined with the Honolulu ROC. This shift places staff closer to their area of responsibility and provides a permanent decrease in staff's travel time and travel dollars for inspections / assessments.

TSS	
Location¹	Number
Miami	29
Frankfurt	28
Dallas	23
Singapore	10
Dulles (AME Region) ²	8
Honolulu	16
Cargo HQ ³	25
HQ	5
TOTAL	144

¹The Los Angeles ROC was closed in September 2013

²AME ROC location currently at Dulles until a location in region is determined

³6 positions shifted from OSO and 4 field positions

Due to space restraints at Embassies, TSA distributed the TSS as depicted in the chart above. The five headquarters staff are made up of TSS Desk Officers, Global Compliance Director and Deputy Director.

Foreign Repair Station Inspection Program - TSA is required under Vision 100 (49 U.S.C. 44924) to establish security regulations for foreign and domestic aircraft repair stations and to conduct audits of foreign repair stations. The Aviation Repair Station Security Notice of Proposed Rule Making

(NPRM), TSA-2004-1713 RIN 1652-AA38, proposes security requirements for repair stations that are certificated by the Federal Aviation Administration (FAA) and codifies TSA's inspection authority.

This program serves to ensure the security of maintenance, overhaul, repair and assembly work conducted on air carrier aircraft and components at foreign and domestic repair stations. This will be achieved through specific inspection activities including security reviews and audits, vulnerability assessments and surveys. Implementation of the Vision 100 legislation for repair stations will allow FAA to certify new repair stations regulated under 14 CFR part 145.

TSA issued a NPRM for aircraft repair station security that clarifies the agency's inspection authority and imposes security requirements for both domestic and foreign repair stations, notably pertaining to control access for aircraft. Efforts include, but are not limited to, conducting voluntary reviews for security enhancement of the 707 non-US based foreign repair stations. The Final Rule was published January 13, 2014 and effective February 27, 2014. The Repair Station Inspection program will utilize a risk-based methodology to schedule repair station security inspections.

International Industry Representatives (IIRs) - IIRs serve as TSA's principal representative to the international aviation industry. The role of the IIR has become increasingly involved with ever-increasing threats against civil aviation emerging from outside the United States. As more stringent rules, requirements, and procedures have been imposed on foreign air carriers and U.S. aircraft operators with scheduled or public charter operations to and from the United States from foreign locations, the role of the IIR has expanded exponentially. The IIRs provide regulatory oversight and guidance to each foreign air carrier/U.S. aircraft operator and are responsible for ensuring that air carriers understand and comply with U.S. regulations and TSA-accepted security programs and initiatives.

In FY 2014 and planned for FY 2015, there are seven headquarters support personnel that support the sixteen IIRs and one Foreign Repair Stations Program Specialist. They serve as the TSA oversight, communication, and coordination link for the industry and IIRs when resolving highly sensitive security issues associated with international incidents, and develop and analyze the risk assessments and metrics. They communicate intelligence information, assist in the preparation and distribution of DHS/TSA policies and plans for threats to worldwide transportation security systems, and assist IIRs with technical direction for both foreign air and cargo carriers. As the table below indicates, IIRs are placed globally to assist TSA outreach efforts in locations with foreign partners. The IIR locations are determined by regional need, country approval and embassy space.

IIRs	
Location	Number
Abu Dhabi, UAE	1
Asia Pacific Islands (Hawaii)	1
Beijing, China	1
Caribbean/Central America (Miami)	2
Frankfurt Germany	3
Mexico (Dallas)	1
Ottawa, Canada	1
Singapore, Singapore	1

Warsaw, Poland	1
IIRs (HQ) ¹	4
Foreign Repair Station Specialist (HQ)	1
HQ (support)	7
Total	24

¹HQ IIRs work with industry corporate offices located in the U.S.

The number of active foreign air carriers fluctuates per year as new carriers either begin or cease operations to the United States. As of January FY 2014, there are approximately 220 non-U.S. air carriers and approximately 121 U.S. aircraft operators with international operations, which creates a 21-to-1 ratio of air carriers per IIR.

Airport Law Enforcement & Assessments: \$70.3 million

Law Enforcement Officer (LEO) Reimbursement Program - In accordance with ATSA, TSA established Other Transaction Agreements (OTA) with state and local law enforcement agencies to provide uniformed officers at passenger security checkpoints under the flexible response authorities granted to TSA. These agreements provide financial assistance to partially reimburse airports throughout the United States for post 9/11 law enforcement hours. They ensure that a consistent law enforcement presence is always available to deter suspicious activity and respond quickly in the event of a breach of security at designated checkpoints.

In FY 2013, TSA funded 317 cooperative agreements that included the following LEO patrol and response hours:

Airport Category	Hours
I	567,041
II	481,019
III	317,081
IV	209,318
X	860,506
Total	2,434,965

In FY 2014 and FY 2015, TSA will continue to improve program efficiencies and maximize the use of available program funds by reviewing participants' actual annual expenditures and adjusting award levels accordingly. The review process will include site visits to a select number of airports during the course of the fiscal year to ensure operational and fiscal compliance.

The chart below shows LEO Agreements data for FY 2014 and FY 2015:

Fiscal Year	Number of Agreements	Total Allocated Funding	LEO Service Hrs	Avg Hourly Rate¹
2014 ²	324	\$45,856,799.00	2,458,649.00	\$20.00
2015 ³	324	\$45,856,799.00	2,458,649.00	\$20.00

¹ Average of the maximum reimbursable rate for each airport category

² Number of Participants has not been finalized

³ Anticipated full FY funding level

Assistant Federal Security Directors for Law Enforcement (AFSD-LEs) - In addition to these agreements, AFSD-LEs further coordinate and support TSA's security efforts with local law enforcement. AFSD-LEs partner with law enforcement officials from other Federal, State, and local agencies to address significant issues, share intelligence and ensure the safety of airports. AFSD-LEs are assigned to a hub airport, but most are also responsible for spoke airports in their district.

There are currently 103 AFSD-LEs covering 275 airports. These strategically placed positions provide an additional layer of support to airports. They also help to mitigate response times for investigations and to ease congestion at the checkpoint.

Security Assessments - Joint Vulnerability Assessments (JVAs) are a joint effort undertaken by TSA and FBI with the purpose of assessing current and potential threats to commercial air transportation facilities within the United States. The process is a direct result of the increasing threats to aviation, which prompted Congress to pass Section 310 of the Federal Aviation Reauthorization Act of 1966. Section 310 requires the FAA and the FBI to conduct joint threat and vulnerability assessments of security at U.S. airports. This responsibility was transferred to TSA under ATSA. The program conducted 23 JVAs in FY 2013 and plans to conduct 15 JVAs in both FY 2014 and FY 2015.

Man-Portable Air Defense System (MANPADS) Vulnerability Assessments (MVAs) are designed to enhance security of air transportation by minimizing the potential for missile or stand-off weapons attack against aircraft. In accordance with NSPD-47/HSPD-16 and the *National Strategy for Aviation Security*, the program is designed to deter, detect, and mitigate the MANPADS threat, and provide oversight and guidance on the development and implementation of MANPADS mitigation plans at commercial airports. The program conducted 15 MVAs in FY 2013 and plans to conduct 15 MVAs in both FY 2014 and FY 2015.

TSA also conducts international MANPADS Assist Visits (MAV) in accordance with NSPD-47/HSPD-16, and in collaboration with the Department of State, to partner with international allies on joint international assessments that are appropriate and mutually beneficial to the U.S. Government and the host nation. These visits are similar to the domestic MANPADS Vulnerability Assessments and are conducted at foreign airports at the host country's request to identify and define potential launch locations in areas surrounding the airport by using known terrorist methodology and weapon employment tactics and capabilities. The program conducted 6 MAVs and 9 MANPADS Outreach/Training Initiatives in FY 2013. The program plans to conduct 6 MAVs and 12 Outreach/Training Initiatives in both FY 2014 and FY 2015.

National Explosives Detection Canine Team Program (NEDCTP): \$127.4 million

TSA's NEDCTP trains and deploys certified explosives detection canine teams to deter and detect the introduction of explosive devices into the transportation system. Each team is composed of a specially trained canine and either a TSA or State and local law enforcement handler. Bomb threats cause disruption of air, land, and sea commerce and pose an unacceptable danger to the traveling public. Explosives detection canine teams are proven and reliable resources in the detection of explosives and are a key component in a balanced counter-terrorism program. Fostering partnerships throughout the Federal Government, State and local law enforcement, and the international community is a key element of TSA's mission.

State and local law enforcement participants are funded through contractual agreements known as Other Transaction Agreements (OTA). The OTA is a collection of documents, one of which is known as The Statement of Joint Objectives (SOJO). The SOJO outlines the roles and responsibilities associated with the participant and NEDCTP. The OTA also addresses certification standards, guidelines, procedures, logistical support and coordination for all canine matters relating to the TSA Program. Through OTAs and reimbursable (formerly cooperative) agreements, TSA provides funding for training, certification and maintenance of the explosives detection capable canines, training for the handlers, and partial reimbursement of handlers' salaries and other costs.

The operation of TSA led Passenger Screening Canine (PSC) teams in the airport passenger environment is an effective and efficient way to screen the general public in mass numbers or peak periods when applying RBS expedited screening initiatives. The PSC detection methodology relies on the canine's ability to process air currents and detect carried or body worn explosives whether someone is moving or still. The canine handler is trained to read the canine's behavioral changes to identify the source of an explosives odor without knowledge of the targeted subject and follow the vapor wake to the explosive source.

Most recently, TSA rolled out a new risk-based initiative in which PSC teams conduct screening of individuals entering screening checkpoints with an active TSA Pre✓™ lane. This initiative, known as Managed Inclusion (MI), provides an additional layer of explosives screening of all individuals entering the checkpoint and enables TSA to provide an expedited screening process for randomly selected passengers determined to be low risk.

TSA received an increase in appropriation funds from Congress in March 2013 for an additional 52 teams, of which 12 teams will be Federal PSC and 40 will be multi-modal State and Law Enforcement led.

TSA received a funding enhancement in January 2014 for an additional 12 teams, all of which will be Federal PSC teams.

To increase operational efficiency and effectiveness, in FY 2015 TSA is proposing to consolidate all canine assets under the Aviation Regulation PPA and deploy canine teams as multi-modal explosives detection canine teams. This will allow TSA maximum flexibility to utilize the teams in any transportation environment as needed in response to changes in intelligence or capability requirements. For instance, since achieving 100 percent of air cargo screening, canines may be better deployed in other modes. From an operational perspective, the multimodal teams represent the effective and efficient operational deployment scenario. Multimodal teams can be moved easily between transportation modes in response to threats or as part of TSA's risk-based security requirements. This consolidation allows TSA to better align the canine program with the TSA risk-based security concept.

Explosives Detection Canine Team Assignments

Type	Function	FY 2014		FY 2015	
		Teams	Locations	Teams	Locations
State and Local Law Enforcement Teams (Legacy)	Aviation & Air Cargo ^{1,2}	511	79	0	0
	Multi-Modal ²	27	8	675	106

	Surface ²	137	19	0	0
Total State and Local Law Enforcement Teams		675	106	675	106
Federal Teams (Proprietary)	Multi-Modal	46	13	166	28
	Passenger Screening	144	36	144	36
	Air Cargo ²	120	15	0	0
Total Federal Teams		310	64	310	64
Total All Explosives Detection Canine Teams³		985	170	985	170

1. 75 percent of funding is from Aviation Regulation and 25 percent of funding is from Air Cargo in FY14.
2. In FY 2015, canine program is being consolidated as all multi-modal in the Aviation Regulation PPA.
3. Minor adjustments among functions may occur as a normal response to fluctuating capability requirements.

General and Commercial Aviation: \$9.5 million

TSA coordinates aviation security efforts with airlines, airports, and within the general aviation community.

Commercial Airlines - The Commercial Airlines program is responsible for 69 U.S. certificated aircraft operators. This activity includes the TSA/Aircraft Operator Corporate liaison function, development of new aviation security policy, and management of existing policy for necessary modification or elimination based on the evolving threat against full program commercial airlines. Assigned to multiple commercial airlines, Principal Security Specialists (PSSs) act as the TSA representative to provide the industry with supporting interpretations, clarifications, and assessments of the regulations. TSA monitors the specific operator's compliance level and takes action when a trend is identified. PSSs are subject matter experts on their assigned carriers, including approvers of carrier's security training programs provided to the flight deck and cabin crew, and ground security coordinators. Additionally, TSA provides vital subject matter expertise for critical incident management during times of national emergencies and conduct outreach to airlines when developing aviation security measures to mitigate threats.

Commercial Airports - TSA builds relationships with the commercial airport industry and oversees the development of policies and programs to enhance security at the Nation's commercial airports. TSA actively engages members of the commercial airport industry on security issues with the intent to lessen the burden on the operator but at the same time not lessen overall security results.

General Aviation (GA) - TSA coordinates aviation security efforts with airlines, airports, and within the general aviation community. GA includes corporate operators, recreational and private aircraft, and charter operations; private and public use of general aviation airports, airmen, and airspace. TSA works collaboratively with industry and government stakeholders to develop innovative methods to enhance security and to develop, disseminate, and consistently apply a framework of appropriate and feasible security standards. TSA uses a threat based and risk management approach to develop strategies, policies, plans, and programs to reduce the security risks and vulnerabilities associated with GA operations.

Additionally, the Intermodal Security Training & Exercise Program (I-STEP) convened a GA strategic engagement planning team in FY 2013 to enhance TSA's engagement with GA stakeholders and evaluated five GA homeland security core capabilities. I-STEP GA security exercises involved 98

participants from 28 organizations and produced 24 GA security lessons learned and 32 Improvement Recommendations. Over 20,000 GA assets were organized in I-STEP GA Analytic Tools to improve situational awareness and understanding of GA assets and risks. In support of this effort, TSA developed and shared with industry a comprehensive summary report for the initiative, including summarized results of the exercises, descriptions and results of the analytical tools, and key takeaways from each engagement element.

TSA is issuing a new rule 49 CFR Parts 1564 and 1566, to harmonize the security requirements for domestic and foreign GA aircraft with a maximum certificated take-off weight of 30,000 pounds or more, engaged in civil operations of an aircraft not for compensation or hire. The GA Security Supplemental NPRM new rule will affect TSA by:

- Updating 49 CFR Part 1546, to harmonize the Twelve-Five and Private Charter requirements for foreign air carriers with the existing Twelve-Five and Private Charter requirements in 49 CFR Part 1544 for U.S. aircraft operators; and
- Updating 49 CFR Part 1560 (Secure Flight), that requires 49 CFR Parts 1544, 1546, and 1564 to conduct passenger vetting in a manner prescribed by TSA.

Visible Intermodal Prevention and Response (VIPR) - Historically, the VIPR Program has received funding in three appropriations: the FAMS, Aviation Security, and Surface Transportation Security. This request realigns funding from the Aviation Security appropriation into TSA's Surface Transportation Security appropriation. The consolidation of funding into one appropriation will increase transparency on analysis and reporting, and will result in more efficient management of business processes.

MAJOR ACQUISITIONS:

National Explosives Detection Canine Team Program

NEDCTP trains and deploys TSA certified explosives detection canine teams to deter and detect the introduction of explosive devices into the transportation system. Each team is composed of a specially trained canine and either a TSA or State and local law enforcement handler. Fostering partnerships throughout the Federal Government, State and local law enforcement, and the international community is a key element of NEDCTP's mission.

State and local law enforcement participants are funded through contractual agreements known as Other Transactional Agreements (OTA). The OTA is a collection of documents, one of which is known as The Statement of Joint Objectives (SOJO). The SOJO outlines the roles and responsibilities associated with the participant and NEDCTP. The OTA also addresses certification standards, guidelines, procedures, logistical support and coordination for all canine matters relating to the TSA Program. Through OTAs, TSA provides funding for training, certification and maintenance of the explosives detection capable canines, training for the handlers, and partial reimbursement of handlers' salaries and other costs.

The operation of TSA led Passenger Screening Canine (PSC) teams in the airport passenger environment is an effective and efficient way to screen the general public in mass numbers. The PSC detection methodology relies on the canine's ability to process air currents and detect, carried or body worn explosives whether someone is moving or still. The canine handler is trained to read the canine's behavioral changes to identify the source of an explosives odor without knowledge of the targeted subject and follow the vapor wake to the explosive source. The NEDCTP anticipates meeting the FY 2013 921 budgeted team number by the end of calendar year 2014 and training the 52 newly enacted FY 2013 teams by the end of FY 2015.

Most recently, TSA rolled out a new risk-based initiative in which PSC teams conduct screening of individuals entering screening checkpoints with an active TSA Pre✓™ lane. This initiative, known as Managed Inclusion (MI), provides an additional layer of explosives screening of all individuals entering the checkpoint and enables TSA to provide an expedited screening process for randomly selected passengers.

The National Explosives Detection Canine Team Program investment is to be funded out of the Aviation Regulation and Other Enforcement PPA in FY 2015, as follows:

- Aviation Regulation and Other Enforcement \$125.488 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
119,887	124,503	125,488

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Maintenance (125,488)	Sustainment of the National Explosives Detection Canine Teams	<p>The NEDCTP's mission is to deter, prevent, and detect the introduction of explosives into the Nation's transportation environment. TSA certified NEDCTP Teams search aircraft, terminals, passengers, cargo, luggage, vehicles, freight, mass transit rail, and mass transit buses, and maritime vessels.</p> <p>The FY 2015 request supports 675 State and Local Law Enforcement Teams (Legacy) and 310 Federal Teams (Proprietary).</p> <p>The funding allows TSA to purchase and train the canine, provide in-depth training for the handler, handler salaries, care for the canines, and pre-designated logistical items such as vehicles.</p>

**Department of Homeland Security
Transportation Security Administration
Aviation Security:
Airport Management and Support
Program Performance Justification**
(Dollars in Thousands)

PPA: Airport Management and Support

	Perm. Pos	FTE	Amount
2013 Revised Enacted	3,082	2,864	532,584
2014 Enacted	3,127	3,009	587,000
2015 Adjustments-to-Base	-	-	13,050
2015 Current Services	3,127	3,009	600,050
2015 Program Change	(81)	(81)	(8,316)
2015 Total Request	3,046	2,928	591,734
Total Change 2014 to 2015	(81)	(81)	4,734

TSA requests 3,046 positions, 2,928 FTE and \$591.7 million in FY 2015 for the Airport Management and Support PPA:

Adjustments-to-Base:

- Decrease from transfer of 1 FTP/FTE to the Transportation Security Support appropriation, IT PPA as a correction from FY 2014 Request
- Decrease from realignment of 27 FTP/26 FTE to the Screener Training and Other PPA to consolidate TSA Academy positions in one PPA
- Increase from realignment of 22 positions, 21 FTE and \$2.970 million from Screener – PC&B PPA to provide additional positions for Behavior Detection and Analysis Division
- Increase from realignment of 6 FTP/FTE from Aviation Regulation & Other Enforcement PPA for TSOC positions
- Increase from realignment of \$3.0 million from Aviation Regulation & Other Enforcement PPA for ADAPT contract
- Increase of \$856 thousand for annualization of the 2014 pay raise
- Increase of \$2.591 million for the 2015 pay raise
- Decrease of \$167 thousand as part of a total In-line savings of \$22.491 million
- Increase of \$4.0 million for Risk Based Security contracts
- Increase of \$2.608 million for retirement contributions.
- Decrease of \$2.808 million for anticipated savings from reductions to non-mission critical travel and training, contract efficiencies, and/or supplies

Program Changes:

- Decrease of 14 FTP/FTE and \$1.441 million for reduction of Playbook Operations
- Decrease of 67 FTP/FTE and \$6.875 million in leveraged efficiencies from Risk Based Security

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of this PPA.

(dollars in millions)

	FY 2014 Enacted	FY 2015 Request
Federal Security Directors (FSD) Staff and Headquarters	\$350.5	\$354.4
Transportation Security Operations Center (TSOC)	\$21.9	\$25.1
Airport Parking, Fleet Services, and Transit Benefits	\$26.6	\$26.3
Airport Rent and Furniture	\$188.0	\$185.9
Total	\$587.0	\$591.7

Federal Security Directors (FSD) Staff and Headquarters: \$354.4 million

This funding supports the salaries and benefits of FSDs and their staff, as well as travel, training, and contract requirements support. There are currently 120 FSD positions located throughout the Nation's airports. The current list of airports by category is as follows:

Airports by Category	
CAT X	28
CAT I	57
CAT II	81
CAT III	128
CAT IV	154
Total	448

In addition, this funding provides for headquarters positions that direct the policy, analysis, and administration of aviation screening.

FSDs and staff are critical to supporting the front line operations of the TSOs. To streamline the administrative operations and gain efficiency at the airports, larger airports have been designated as hubs. These hubs provide security direction, administrative support, and staffing/personnel as needed to smaller, lower staffed airports (spokes). For example, Boston-Logan International Airport is the hub for seven spoke airports (Bedford-Hanscom, Barnstable, Martha's Vineyard, Nantucket, Provincetown, Westover and Worcester airports).

FSDs and staff travel frequently between the hubs and spoke airports. Funding for airport management and staff provides the proper direction, support, and staff at the spokes to ensure efficient and effective operations.

FSDs and staff develop operational strategies to make the screening process more efficient for the traveling public especially during peak travel seasons. They continue to be the central reference point on policy development, information technology, training, performance management, finance, and human resources to support the mission of TSA.

TSA adapts to a dynamic and changing environment with industry accepted scheduling and modeling programs. These applications allow TSA to efficiently determine and schedule the TSO workforce at the Nation's diverse airports. By accurately predicting, executing, and measuring the number of TSOs required, TSA ensures that the public has a positive experience while maintaining the proper number of TSOs at each airport.

This activity also includes funding for Transportation Security Specialist – Explosives (TSS-Es). The TSS-E program strengthens the security of the Nation's transportation systems by providing frequent interaction with and formal training to TSOs to increase their ability to recognize potential Improvised Explosive Devices (IEDs) and IED components. TSS-Es are highly skilled individuals who have undergone military or law enforcement training in the rendering safe of improvised explosive devices and explosive ordnance. This program provides preventative measures against IEDs while reducing costly airport delays and closures. The TSS-E Program currently operates at the Nation's largest 124 airports.

TSS-Es provide subject matter expertise to TSA and its stakeholders on explosive threats to the Nation's infrastructure. Although TSS-Es are assigned to selected FSD staffs they have regional responsibilities making them available to all FSDs within their region to assist in multi-modal explosives security issues. TSS-Es conduct explosives vulnerability assessments in all transportation modes, participate in aviation related Joint Vulnerability Assessments and Man-Portable Air Defense Vulnerability Assessments. They assist in the development of mitigation plans, conduct tailored explosives recognition and response training, and develop exercises for all transportation modes. TSS-Es also provide transportation specific expertise to the FBI Explosives Unit and the National Transportation Safety Board during investigations where explosives are suspected or confirmed.

Transportation Security Operations Center (TSOC): \$25.1 million

The TSOC is located at TSA's Freedom Center in Northern Virginia. It provides 24/7/365 coordination, communications, collaboration of intelligence and domain awareness for all DHS transportation-related security activities worldwide. The TSOC correlates and fuses real-time intelligence and operational information, ensuring unity of action in the prevention of, and response to, terrorist-related incidents across transportation modes. It features a Watch Floor with 5 separate Pods:

- Command Duty Officer (CDO) Pod – Receives continuous reporting from and coordinates with TSA field personnel and TSA Coordination Centers, has Security Watch Standers from FAMS, Aviation, Rail and Mass Transit, Highways, Maritime, Air Cargo and Postal and Shipping Sectors, and serves as a liaison with the DHS National Operations Center (NOC);
- Joint Communication Center Pod (VIPR Operations) - Coordinates and monitors all VIPR operations conducted throughout the U.S. and coordinates the deployment of all TSA assets in support of non-routine operations;
- Crisis Action Team Pod - Allows command of a multi-modal attack and serves in a surge capacity for the CDO Pod during incidents or national security events;

- National Capital Region Coordination Center Pod - A nine member agency collaborative effort to oversee the security of the National Capital Region by coordinating operations among the agencies concerned with preventing and/or responding to violations of the restricted airspace; and,
- TSA Office of Information Technology Cyber Security Pod – Responds to all threats to the TSA Network.

The TSOC provides direct lines of communications for the immediate notification from the public. These reporting requirements are in line with the 9/11 Commission Act Recommendations. The TSOC is TSA's primary interface to the Department of Homeland Security National Operations Center for all transportation security issues and events.

TSOC ensures the Agency is prepared for major incidents and disasters by developing deliberative response plans, policies and procedures that govern TSA's Critical Incident Management system, providing training, and continually exercising those persons involved in incident management to ensure readiness. Lastly, the TSOC ensures TSA capability exists to operate from alternative facilities under the Continuity of Operations (COOP).

In FY 2013, the Program assumed reporting and performance responsibility the Automatic Detection and Processing Terminal (ADAPT) Program due to a realignment from the Office of Security Policy and Industry Engagement (OSPIE). TSA uses the ADAPT system to access Federal Aviation Administration (FAA) radar feeds and various government and commercial databases to verify flight operations to, from, within and over the National Airspace System; The Program continued oversight for the Airspace Authorization Unit which provides remote operations to support the Airspace Security Operations Command Center (ASOCC) during designated DHS, National Special Security Event(s) (NSSE) such as the Democratic and Republican National Conventions and other events as needed.

Airport Parking, Fleet Services, and Transit Benefits: \$26.3 million

This program currently provides parking at 31 participating airports for field staff. In addition, TSA provides transit benefits for more than 11,000 field office employees and provides fleet services for 3,500 vehicles.

Airport Rent and Furniture: \$185.9 million

In support of its field operations, TSA leases over 3.5 million square feet of space with more than 700 leases at TSA's 448 airports in addition to off-airport locations. On-airport space is used for mission-critical direct TSO support, such as break rooms, lockers, emergency coordination rooms and training facilities. These airport leases are typically short-term, requiring frequent re-negotiation. The annual rent is set by the local airport authority based on formulas to recapture operating costs, capital improvements, and major repairs. Annual increases are generally far greater than the change in the Consumer Price Index or any other general economic measure. Airport rent is far more expensive and far less predictable than general office space in other commercial buildings. TSA also manages a Checkpoint License program under which airports are reimbursed for the cost of providing electrical service to the TSA equipment and operations at the checkpoint, as well as providing janitorial and trash removal service to the TSA checkpoints.

MAJOR ACQUISITIONS:

Performance Management Information System

The Performance Management Information System (PMIS) is the designated TSA performance management system and provides the following capabilities: 1) Tools for the federalization of airports to collect and report measures as required by the Aviation and Transportation Security Act (ATSA) (P.L. 107-71); 2) Analytical expertise to TSA organizations in the measurement of unit performance and improvement 3) A repository for reporting congressionally mandated wait time data by airport and by checkpoint on a daily basis.

The Performance Management Information System investment is funded out of the Airport Management and Support PPA in FY 2015, as follows:

- Airport Management and Support PPA \$7.902 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
8,885	7,894	7,902

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Maintenance - \$7,902	Tools for the federalization of airports to collect and report measures as required by the Aviation and Transportation Security Act (ATSA) (P.L. 107-71) Performance Measurement Information System (PMIS)	Funds operating costs for the Enterprise Performance Management Platform (EPMP), including the Performance Measurement Information System (PMIS); the Airport Information Management (AIM) System to assist airports in managing their day-to-day business; Performance Information Management System (PIMS), a state-of-the-art tool which supports analysis, dashboarding, graphing, and reporting of the PIMS data warehouse; and Visible Intermodal Protection and Response (VIPR) Information Manager (VIMS), a suite of integrated data entry screens hosted in EPMP to assist OLE/FAMS and OSO in managing VIPR activities. AIM and VIMS are built inside of PIMS, allowing real-time business intelligence and operational performance.
	Analytical expertise to TSA organizations in the measurement of unit performance and	Funds operating costs for PMIS Base Support Contract to provide metrics creation, metrics reporting, and training and help desk support to the TSA enterprise. AIM application support hosted in

	improvement	<p>EPMP to assist airports in managing their day-to-day business. Provides airports a consistent national interface with headquarters' support. Transportation Security Administration (TSA) has the need for a performance measurement data collection and reporting capability. This capability provides timely performance information on security activities in the field and supports our airport Federal Security Directors (FSDs) as they manage their operations. Screener supervisors and Federal Security Directors are able to provide daily performance data. FSDs, Headquarters staff and TSA Executives will monitor operational data as reported through this capability. This capability captures and generates reports of critical performance data to inform TSA operations and enable public performance reporting.</p>
	A repository for reporting congressionally mandated wait time data by airport and by checkpoint on a daily basis.	<p>Funds recurring Contract Off The Shelf (COTS) annual maintenance support for Performance Information Management System (PIMS). PIMS today reports on data from 18 TSA data sources, including wait time data.</p> <p>Funds operating costs for Information System Security Officer (ISSO) Contract to provide cybersecurity support.</p>

Aviation Security:
FFDO and Flight Crew Training
Program Performance Justification
(Dollars in Thousands)**

PPA: FFDO and Flight Crew Training

	Perm. Pos	FTE	Amount
2013 Revised Enacted	44	37	23,421
2014 Enacted	41	39	24,730
2015 Adjustments-to-Base	-	-	143
2015 Current Services	41	39	24,873
2015 Program Change	(3)	(3)	(4,873)
2015 Total Request	38	36	20,000
Total Change 2014 to 2015	(3)	(3)	(4,730)

TSA requests 38 positions, 36 FTE, and \$20.000 million in FY 2014 for the Federal Flight Deck Officer (FFDO) Program and Flight Crew Training PPA:

Adjustments-to-Base:

- Increase of \$15 thousand for annualization of the FY 2014 pay raise
- Increase of \$44 thousand for the 2015 pay raise
- Increase of \$84 thousand for retirement contributions

Program Change:

- Decrease of \$4.873 million for Federal Flight Deck Officer Efficiencies

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of this PPA.

	FY 2014 Enacted	FY 2015 Request
Federal Flight Deck Officer	\$24.5	\$19.8
Crew Member Self Defense	\$0.2	\$0.2
Total	\$24.7	\$20.0

The FFDO program was created by the Arming Pilots Against Terrorism Act of 2003 (APATA – P.L. 107-296), which authorizes the deputation of qualified airline pilots to act as Federal law enforcement officers in order to defend the flight decks of aircraft against acts of criminal violence or air piracy. This voluntary program provides a combination of law enforcement training in firearms proficiency, self-defense tactics, authority, use-of-force, and decision-making in defense of both commercial and cargo aircraft. In FY 2015, TSA will implement an Inactive Reserve Force of pilots that predominately fly international flights. Information on the number of FFDOs and the size of the Inactive Reserve Force is Sensitive Security Information and will be provided under separate cover upon request.

The Crew Member Self Defense Program was established via the Vision 100 – Century of Aviation Reauthorization Act (FAA Reauthorization Act) in 2004. The Act requires TSA to develop and make available to flight and cabin crewmembers a voluntary, advanced self-defense training program as another means of safeguarding the civil aviation system.

Within base resources, TSA will continue to train new FFDOs, provide program oversight through monitoring and tracking firearms and firearm requalifications, monitoring schedule changes of daily missions, and resolving incidents.

Total Change 2014 to 2015	(135)	(129)	(15,412)

TSA requests 668 positions, 642 FTE, and \$106.9 million in FY 2015 for the Air Cargo PPA:

Adjustments-to-Base:

- Decrease of 149 FTP, 143 FTE, and \$24.593 million to the Aviation Regulation PPA to consolidate canine funding
- Increase of 14 FTP/14 FTE and \$3.5 million from the Aviation Regulation PPA to consolidate international air cargo inspectors
- Increase of \$226 thousand for annualization of the 2014 pay raise
- Increase of \$577 thousand for the 2015 pay raise
- Increase of \$5 million due to increased inspections and compliance efforts to transition Air Cargo Advance Screening (ACAS) from pilot stage to an operational program
- Increase of \$678 thousand for retirement contributions
- Decrease of \$800 thousand for anticipated savings from reductions to non-mission critical travel and training, contract efficiencies, and/or supplies.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Aviation and Transportation Security Act of 2001 charges TSA with the implementation of statutory requirements for ensuring the security of transportation systems and passengers when cargo is transported by air.

The following table provides the components of this PPA.

(dollars in millions)

	FY 2014 Enacted	FY 2015 Request
Air Cargo Policy Programs	\$15.2	\$25.4
Air Cargo Screening Technologies	\$11.3	\$11.0
Air Cargo Inspectors	\$66.1	\$70.5
Canine Program (Air Cargo) ¹	\$29.7	-
Total	\$122.3	\$106.9

¹Canine funding consolidated in the Aviation Regulation and other Enforcement PPA in FY 2015.

Air Cargo Policy Programs: \$25.4 million

The program is responsible for securing the air cargo supply chain including cargo, conveyances, and people. The air cargo transportation system consists of 448 domestic airports, approximately 200 air carriers, and approximately 4,100 indirect air carriers and shippers. TSA focuses on two primary security threats related to the air cargo transportation system: (1) introduction of an explosive device on a passenger aircraft, and (2) the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

The *Implementing Recommendations of the 9/11 Commission Act of 2007* (9/11 Act) required TSA to implement a system to ensure that 100 percent of all cargo on passenger aircraft is screened at a level commensurate with checked baggage. To meet this requirement, TSA employed two phases for screening air cargo: one phase for cargo departing U.S. airports, and the other phase for international inbound cargo.

As of August 1, 2010, 100 percent of all cargo transported on a passenger aircraft departing U.S. airports are required to be screened. As of December 3, 2012, TSA required 100 percent screening of international inbound air cargo on passenger aircraft using a risk based approach to screening. Requirements incorporate the Trusted Shipper concept, which was originally set forth in the May 2011 Security Directives (SD) and Emergency Amendments (EA) issued in response to the attempt to conceal explosives in an all-cargo aircraft bound for the United States from Yemen. Achieving 100 percent screening of all inbound air cargo carried on passenger aircraft fulfills a requirement of the 9/11 Act and further strengthens global supply chain security. In addition, TSA has implemented the Trusted Shipper concept for all-cargo carriers, and requires them to screen 100 percent of all elevated risk cargo to the same standards as those required for passenger carriers.

TSA continues to regulate approximately 1,140 Certified Cargo Screening Facilities (CCSFs) in the Certified Cargo Screening Program (CCSP). TSA developed the CCSP to support the requirement for industry to screen 100 percent of air cargo transported on passenger aircraft from U.S. airports. In FY 2013 and FY 2014 to date through January 2014, CCSP facilities screened approximately 61 percent and 56 percent, respectively, of the cargo uplifted in the United States by weight on passenger aircraft. CCSP allows screening of cargo at points throughout the supply chain by an approved CCSF prior to the arrival of the cargo at airport. Under the CCSP, TSA certifies cargo screening facilities located throughout the United States to screen cargo prior to providing it to airlines for shipment on passenger flights. Participation in the program is voluntary and enables vetted, validated, and certified supply

chain facilities to comply with the 100 percent screening requirement. TSA conducts comprehensive re-certifications for each CCSF every three years.

In support of systems for the enhanced screening of international air cargo, TSA and the CBP continue to implement the ACAS pilot to collect data, refine targeting procedures, and establish appropriate communication systems to test pre-departure advanced information collection, threshold targeting, and TSA-required screening and response procedures at non-U.S. locations. ACAS allows TSA and CBP to receive advance security filing cargo data as a means for targeting cargo shipments inbound to the United States that may present a high risk and require additional physical screening under the appropriate regulatory framework and protocols. In 2013, there were 74 entities participating in the ACAS pilot, with over 92 million shipments successfully assessed. TSA and CBP have encouraged participation by all segments of industry to ensure that various industry operational models are evaluated and factored into the development of requirements for technology and policy. TSA and CBP continue to refine technical, procedural, and policy requirements for the use of ACAS and continue to work toward transitioning the pilot to a mandatory program through rulemaking once sufficient information has been collected and analyzed to ensure the operational feasibility of ACAS as a mandatory program. ACAS will provide a vehicle for targeting, but it will not replace the TSA physical screening requirements of the 9/11 Act for passenger aircraft. To date TSA has funded its participation in this pilot through the use of one-time carryover money in the Air Cargo PPA. In FY 2015, the request includes an additional \$5 million in base funding to transition ACAS from a pilot to program status.

Air Cargo Screening Technologies: \$ 11.0 million

The FY 2015 request supports the qualification and evaluation of existing and emerging air cargo screening technologies and procedures to determine suitability, effectiveness, and feasibility for use in air cargo screening environments. Cargo screening faces unique challenges due to a wide variance in commodities, volume, throughput, and facility characteristics for each screening entity. No single technology is appropriate for every screening scenario. TSA has authorized a suite of technologies and associated screening protocols from which screening entities may choose on the basis of their unique requirements and commodities.

The below technologies are currently approved for use by industry to screen air cargo on passenger and all cargo aircrafts unless otherwise noted:

- Explosives Trace Detection (ETD) units
- Non Computer Tomography (CT) X-Ray (small, medium, and large aperture) systems
- Advanced Technology (AT) X-Ray (small, medium, and large aperture) systems
- Explosives Detection Systems (EDS)
- Electronic Metal Detection (EMD) units
- Carbon Dioxide (CO₂) monitors

TSA publishes authorized screening equipment on the TSA Air Cargo Screening Technology List (ACSTL). The ACSTL is published on a secure website accessible by the regulated parties, which industry references when making their procurement decisions. TSA does not procure or deploy

equipment for the air cargo industry. Instead, industry is required to purchase, use, and maintain systems authorized by TSA and listed on the ACSTL.

The current TSA ACSTL contains 109 pieces of cargo screening equipment, including 23 large aperture X-Ray technologies for screening skid-level configurations. The following chart depicts the equipment on the TSA Air Cargo Screening Technology List:

Technology Type	TSA Air Cargo Screening Technology List for Passenger and All Cargo Aircraft - Version 8.8 ¹								
	Qualified ²			Approved ³			In Qualification Testing and Evaluation ⁴		
X-Ray	<i>Small</i>	<i>Med</i>	<i>Large</i>	<i>Small</i>	<i>Med</i>	<i>Large</i>	<i>Small</i>	<i>Med</i>	<i>Large</i>
	28	29	23	2	1	0	9	9	2
ETD	3			0			5		
EMD	3	2	1	0	0	0	1	1	1
EDS	0	15	0	0	0	0	0	0	0
CO ₂ Monitor	0	2	0	0	0	0	0	0	0

¹ Technology list as of 1/09/14

² Qualified technology specifies equipment, by technology, which has undergone a formal TSA sponsored test process and is deemed qualified for screening operations. All parties should purchase equipment from the qualified section of the ACSTL.

³ Approved technology specifies equipment, by technology, which has been conditionally approved for screening operations and is currently undergoing or scheduled for qualification test activities. This equipment has up to 36 months from the date when it was added to the approved technology section to successfully pass TSA's qualification test. If it is unable to pass qualification activities within the prescribed 36 months, it will be removed from the approved technology section at the prescribed expiration date. Due to this fact, regulated parties who procure equipment from the approved technology section do so at their own risk.

⁴ This section includes all devices that are currently in any step of the Air Cargo Screening Qualification Testing (ACSQT) process. Devices that have successfully undergone laboratory testing are moved to the Approved section of the ACSTL while they undergo field testing. As such, the devices listed in the Approved section of the chart are also included in the Qualification Testing and Evaluation section.

TSA continues to evaluate the operational efficacy of these technologies to accommodate the cargo screening volumes currently required to support the 100-percent screening mandate. TSA is also evaluating other technologies for air cargo screening, including mass spectroscopy and palletized cargo screening systems, as well as supply chain integrity technologies (SCIT). Outcomes of DHS and TSA field testing and evaluation and the IAC CCSP requirements may result in modifications or additions to this list. TSA has also issued screening protocols for use of these technologies. The protocols detail screening methodologies for each technology type and provide guidance on which technologies can be used for specific commodity classes.

Air Cargo Inspectors: \$70.5 million

Domestic Cargo Inspections - TSA Transportation Security Inspectors-Cargo (TSI-Cs) perform compliance inspections; including special emphasis inspections, focused inspections, and air cargo surges (weeklong compliance enforcement surges focused on Indirect Air Carriers (IACs), air carriers, and Certified Cargo Screening Facilities (CCSFs) within a single metropolitan area); along with investigations and tests of air carriers and IACs. TSA TSI-Cs also perform educational outreach to assist air carriers and IACs in complying with air cargo security mandates. TSI-Cs are located at 121 airports with high cargo volumes in the United States.

Air Cargo Inspectors enforce statutory and regulatory requirements and provide guidance to industry on securing air cargo. Inspectors ensure that air carriers (passenger and all-cargo) and indirect air carriers meet their operational responsibility by implementing the security requirements issued by TSA. This includes maintaining a TSA-approved security program that describes the security policies, procedures, and systems that must be implemented in order to comply with TSA security requirements. These requirements include measures related to the acceptance, handling, and inspection of cargo; training of employees in security and cargo inspection procedures; testing employee proficiency in cargo inspection; and access to cargo areas and aircraft.

TSA provides compliance oversight of 311 domestic aircraft operators and foreign air carriers as well as 4,100 IAC and over 1,000 CCSF. Each year, TSA inspectors carry out planned and random inspections targeting these foreign and domestic air carriers and IACs. In addition, inspectors conduct monthly cargo surges at airports and IAC facilities with a risk-based approach to scheduling that address specific identified vulnerabilities. TSA also promotes the full compliance with security requirements through outreach programs and collaboration with industry.

The FY 2014 Compliance Work Plan outlines goals for inspecting regulated entities based upon risk at the station level, in addition to the minimum entity inspection requirements. TSA calculates risk scores for airlines (which include both passenger and all-cargo), IACs, and CCSFs. Security Index scores are utilized in FY 2014 to focus Inspector time during all field activities, including cargo surges, Special Emphasis Inspections (SEIs) and testing. At a high-level, TSI-Cs conduct inspections based on following risk schema:

- Previous inspection and test results;
- Previous investigation/non-compliance history;
- Operation volumes; and
- Intelligence and other special considerations.

National Targeting Center-Cargo (NTC-C) and the Cargo Targeting Unit (CTU) - Since FY 2010, TSA has maintained a presence with Customs and Border Protection at the NTC-C to increase information sharing between TSA and other agencies involved in the identification and mitigation of high-risk cargo. The NTC-C is able to utilize known terrorist information received from National Targeting Center-Passenger (NTC-P) and conduct in-depth research in various systems to identify cargo shipments and businesses linked to these individuals.

- *Domestic Targeting* - In FY 2014, TSA plans to increase staff at the NTC-C through internal re-alignments to focus on domestic cargo. This realignment will allow TSIs-C to perform

numerous tasks in support of the domestic cargo security mission. In FY 2014 and FY 2015, these initiatives will include:

- Conducting domestic security reviews of high-risk air cargo shipments referred from field inspectors during Cargo Risk Based Inspection Technique (CRBIT) activities;
- Assisting in cargo alarm resolution through research;
- Conducting in-depth research on new IAC and CCSF applicants;
- Conducting Security Threat Assessment verifications for field inspectors and the Office of Law Enforcement Federal Air Marshal Service (OLE FAMS) Investigative Risk and Analysis Division (IR&A);
- Developing inspection and testing protocols for Cargo Surges, using the various systems available to them to focus the surge activity on higher risk entities.

Additionally, in FY 2014 and FY 2015, TSA CTU plans to leverage resources at the NTC-C to develop a Risk-Based Inspection Tool to be used to direct CRBIT and canine risk-based activities.

International Air Cargo Security (including Air Cargo Inspectors) - Air cargo security, especially those measures applied to goods carried on passenger aircraft, remains important to DHS. TSA continues several efforts to ensure that cargo destined for the United States is subjected to the required level of screening. These efforts include:

- Participating on the ICAO International Cargo Workgroup and focusing on the full spectrum of cargo security issues such as determining acceptance of other countries' cargo programs, identifying best practices for dissemination to other cargo experts, and incorporating all-cargo operations into the Compliance Work Plan;
- Ensuring that the FY 2015 Work Plan reflects a comprehensive review of all airports and carriers involved in transporting cargo directly to the United States;
- Implementing the airport assessment methodology for those airports providing only cargo operations/service to the United States; and,
- Conducting visits to all airports and air carrier stations involved in transporting cargo on passenger aircraft to the United States.

International Cargo Inspections - During FY 2013, passenger flights from 140 foreign airports in 86 countries transported cargo to the United States. More than 3.5 billion pounds of cargo arrived on these conveyances and another 4.9 billion pounds was transported by all-cargo aircraft departing from 111 foreign airports in 60 countries. A significant amount of these cargo loads did not originate at these departure airports, but were initiated at locations sometimes two, three, or more airports before their final movement to the United States—necessitating a thorough understanding and verification of security measures of the cargo supply chain. Of particular concern is the preponderance of countries that currently screen cargo, but do not use the type of equipment or the specific techniques required by TSA. The Transportation Security Specialists – Cargo (TSSs-C) cadre has enabled TSA to conduct on-site visits at each location to determine whether the interim measures put in place by the airport or government sufficiently mitigate the ongoing threat.

TSA is charged with verifying the security measures applied to international inbound air cargo and does so through deployment of its TSSs C. The verification procedures include a series of on-site audits of foreign airports, air carrier cargo facilities, and off-airport sites which accept, handle, and screen air cargo. Verification procedures are conducted at every foreign last point of departure airport

at least annually, with interim activities scheduled for the higher-priority sites. These activities include reviews of each air carrier's quarterly self-audit, evaluation of all Regulated Agent or Authorized Representative Agreements, and proper use of approved screening methods.

In FY 2014, TSA has 61 international inspector positions funded through the Air Cargo PPA. These field positions are distributed among the six ROCs, which are located in Miami, Dallas, Singapore, Frankfurt, Honolulu, and Northern Virginia.

Because of the functional approach, which utilizes existing TSSs and TSSs-C, TSA was able to accomplish the following in FY 2013:

- 812 inspections of U.S. passenger aircraft operators
- 484 inspections of foreign passenger air carriers
- 221 inspections of U.S. all-cargo aircraft operators
- 107 inspections of foreign all-cargo air carriers

All TSSs are cross-trained to perform cargo inspections and general inspections for time and expense efficiencies depending where they are located globally. In order to facilitate the management of and provide efficiencies in the international inspector workforce, the FY 2015 request realigns \$3.5M from the Aviation Regulation PPA to the Air Cargo PPA. Given this realignment as well as other internal TSA shifts, in FY 2015, TSA will have 81 international air cargo inspectors funded through the Air Cargo PPA.

National Cargo Security Program (NCSP) Recognition - Through NCSP recognition, TSA determines if a foreign government's air cargo security program is commensurate with current U.S. air cargo security standards introducing efficiencies for both government and private industry by reducing duplicative requirements, allowing screening to be completed earlier in the supply chain, and permitting the optimal use of distributed screening locations so that screening can occur at various nodes along the supply chain. These assessed measures include the type of technology used to conduct the screening, the amount of cargo screened, and the processes used to resolve any identified issues.

NCSP recognition enables TSA to leverage the host government's oversight capabilities to verify air carrier screening operations and data.

As of December 2013, TSA has established NCSP recognition with 37 countries. This includes all of 28 EU Member States, Switzerland, Japan, New Zealand, Canada, Australia, Israel, the Republic of Korea, Iceland, and South Africa. Another five countries are in the process of being evaluated or are implementing the recommendations resulting from on-site reviews. NCSP countries account for approximately 68 percent of the air cargo volume (by weight) transported on passenger aircraft bound for the United States. In addition to those NCSPs formally recognized by TSA, additional countries are being evaluated or are currently implementing TSA recommendations resulting from the visits and assessments. The priorities for NCSP outreach has expanded to include those countries from which a high volume of air cargo originates.

National Explosives Detection Canine Security Program (K9SP) Recognition - The effectiveness of canines in detecting certain explosives is widely recognized, and numerous countries and organizations have initiated programs to capitalize on this screening method. However, the

capabilities of the various canine programs vary widely around the world. For example, not all programs are designed to detect the same types of explosives. During FY 2013, TSA developed a National Explosives Canine Detection Canine Security Program (K9SP) recognition process. The K9SP recognition process evaluates and recognizes K9SPs in foreign countries for use in aviation security, to include screening of air cargo, passengers and other individuals, checked baggage, and accessible property. In FY 2014 and FY 2015, TSA will continue K9SP recognition efforts with key aviation security partners.

ACAS Pilot - In FY 2011 and FY 2012, TSA staffed the NTC-C ACAS unit with 10 detailed TSIs-C, working side by side with CBP officers to target high-risk air cargo shipments as part of the ACAS pilot initiative. This partnership with CBP involves obtaining manifest information on cargo destined for the United States well before being loaded on the inbound flight. TSA and CBP have developed response protocols that have been implemented when high-risk cargo is identified. Through this pilot and use of the risk identifiers developed within ATS, TSA is able to ascertain the countries that are the sources of the highest percentage and greatest number of potentially high-risk shipments. With the additional personnel, TSA has been able to more accurately calculate the level of risk associated with particular airports and deploy to those sites to physically observe response protocols and verify necessary actions, as appropriate. In FY 2014, TSA will work with CBP for the adjudication of the NPRM.

Strengthening International Air Cargo Security Requirements - TSA has expanded its outreach and engagement with ICAO the World Customs Organization, the Universal Postal Union, and influential Member States involved in each entity to strengthen supply chain security. Through the implementation of more robust international standards, TSA ensures progress toward a more secure environment that does not slow or stall the movement of legitimate commerce. For instance, TSA will engage with ICAO to develop new Standards and Recommended Practices in the area of air cargo security. In FY 2013, TSA engaged significantly with ICAO to develop new Standards and Recommended Practices (SARPS) in the area of air cargo security that became effective for all ICAO Member States in July 2013.

Canine Program (Air Cargo) - To increase operational efficiency and effectiveness, in FY 2015 TSA is proposing to consolidate all canine assets under the Aviation Regulation and Other Enforcement PPA in the Aviation Security appropriation and deploy canine teams as multi-modal explosives detection canine teams. This will allow TSA maximum flexibility to utilize the teams in any transportation environment as needed in response to changes in intelligence or capability requirements.

MAJOR ACQUISITIONS:

Air Cargo Security

The Air Cargo Security investment funds the operation of three major IT systems that implement multiple security layers of TSA's layered approach to air cargo security. The investment contains the Indirect Air Carrier Management System (IACMS), Known Shipper Management System (KSMS), and Freight Assessment System (FAS). This investment also supports two minor systems, the Data Application Tool and Security Threat Assessment Tool. These systems work to confirm the identity and business legitimacy to assess the risk of companies shipping goods on passenger aircraft; verify 100% screening of domestic and international air cargo to TSA standards, as required by law; vet individuals in security sensitive positions to reduce the risk from insider threats; and facilitate TSA's efforts to ensure entities transporting and screening air cargo employ appropriate security procedures.

The Air Cargo Security investment is to be funded out of the Air Cargo PPA in FY 2015.

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
21,361	21,366	21,369

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Planning - \$73	Freight Assessment System (FAS)	Funds planning and oversight for all FAS activities.
	Indirect Air Carrier Management System (IACMS)	Funds planning and oversight for all IACMS activities.
	Known Shipper Management System (KSMS)	Funds planning and oversight for all KSMS activities.
Acquisition - \$3,855	Indirect Air Carrier Management System (IACMS)	Expands access to authorized representatives, a key stakeholder requirement, which significantly reduces workload for regulated parties.
	Known Shipper Management System (KSMS)	Provides capability for real-time known shipper vetting using web services, enabling regulated parties to better integrate vetting into their business processes. Provides the capability to vet shippers from Mexico and Canada, reducing the need to perform manual verification visits, significantly reducing regulatory costs for regulated parties.
Maintenance - \$17,441	Freight Assessment System (FAS)	Funds operating costs for FAS, which provides an oversight mechanism to verify that all cargo is being screened as required by the Implementing Recommendations of the 9/11 Commission Act.
	Indirect Air Carrier Management System (IACMS)	Funds operating costs for IACMS, which manages the IAC certification and renewal process, ensuring that IACs implement standard security programs that reduce terrorism risk. IACMS also enables IACs and Air Carriers to obtain Security Threat

		Assessments for their employees and authorized representatives, vetting individuals to reduce the threat of insiders introducing explosive or incendiary devices into the air cargo supply chain.
	Known Shipper Management System (KSMS)	Funds operating costs for KSMS, which verifies the identity and assesses the risk of companies shipping goods on passenger aircraft, reducing the likelihood of a shipper introducing an explosive or incendiary device into commerce.

Department of Homeland Security
Transportation Security Administration
Aviation Security:
Federal Air Marshals
Program Performance Justification
(Dollars in Thousands)

PPA: Federal Air Marshals

	Perm. Pos	FTE	Amount
2013 Revised Enacted	-	-	-
2014 Enacted	-	-	-
2015 Adjustments-to-Base	-	-	819,731
2015 Current Services	-	-	819,731
2015 Program Change	-	-	(19,517)
2015 Total Request	-	-	800,214
Total Change 2014 to 2015	-	-	800,214

TSA requests \$800.214 million in FY 2015 for the Federal Air Marshals PPA:

Adjustments-to-Base:

- Increase from transfer of \$803.909 million from the Federal Air Marshal Service appropriation
- Increase of \$1.703 million for annualization of the 2014 pay raise
- Increase of \$4.984 million for the 2015 pay raise
- Increase of \$9.135 million for retirement contributions

Program Change:

- Decrease of \$19.517 million for a reduction to FAMS

This request includes a realignment of funding from FAMS into a single PPA under the Aviation Security appropriation. This consolidation of FAMS into Aviation Security better reflects TSA's organization and management structure for aviation security operations, and better enables TSA to apply resources to emerging threats and changing circumstances, while ensuring oversight and visibility between PPAs. Realigning FAMS within the Aviation Security appropriation more clearly displays it as a substantial element of TSA's budget partially offset by passenger fee collections.

For reference, the following chart shows the historical FAMS PPAs for FY 2013 – FY 2015:

	FY 2013 Revised Enacted	FY 2014 Base	FY 2015 Request¹
Management & Administration	\$769.8	\$708.0	\$709.4
Travel & Training	104.8	110.6	105.5
Total	\$874.6	\$818.6	\$814.9

¹FY 2015 breakout provided for display purposes only and includes \$800.2M requested in Aviation Security and \$14.7M requested in Surface Transportation Security

As a comparison, below is a chart depicting FAMS funding less VIPR for FY 2013 - FY 2015:

	FY 2013 Revised Enacted	FY 2014 Base	FY 2015 Request¹
Management & Administration	\$757.1	\$694.6	\$694.7
Travel & Training	104.0	109.1	105.5
Total	\$861.1	\$803.7	\$800.2

¹FY 2015 breakout provided for display purposes only and includes only funds requested in Aviation Security. Please see Surface Transportation Security for more information about VIPR funds.

CURRENT SERVICES PROGRAM DESCRIPTION:

The FAMS PPA funds the FAMS's payroll costs, supports all operational and infrastructure requirements, and training and travel expenses. The vast majority of this PPA funds the salaries for FAMS and the civilian workforce to provide the vital protective and law enforcement services necessary for both domestic and international air travel as well as other transportation related security activities.

The PPA also supports the continuing development and maintenance of the Service's infrastructure, internal business processes, and systems that enable FAMS to seamlessly perform the integrated set of functions that make up their mission. In addition to the activities detailed below, this PPA provides funding for workforce management activities; and maintenance of facilities in the Washington, D.C. area, Atlantic City, NJ, 22 field and 4 Resident Agent in Charge offices across the country; program infrastructure and logistics support such as vehicles, communications, duty equipment, and physical security. In FY 2015, the FAMS will continue to explore consolidation and support efficiencies commensurate with workforce adjustments.

For display purposes, the following table provides the components and associated funding levels in this PPA minus the \$14.7 million in VIPR funding historically funded by FAMS and transferred to the Surface Transportation appropriation FY 2015.

(dollars in millions)

	FY 2014 Base	FY 2015 Request
Payroll, Compensation and Benefits	\$664.6	\$663.3
General Expenses	28.5	31.4
Travel	103.8	100.1
Training	6.8	5.4
Total	\$803.7	\$800.2¹

¹ FY 2014 Base does not include the \$11.1M in PC&B and \$3.6M in GE funds associated with the VIPR program and transferred to the Surface Transportation Security appropriation in FY 2015.

Key programs of the PPA include:

Joint Terrorism Task Force (JTTF) - The FAMS is a full participant in the JTTF, a nation-wide counter-terrorism enforcement program managed by the Federal Bureau of Investigation (FBI). The JTTF targets terrorism-related criminal threats against the United States and its interests. Since 2002, the FAMS has been an active full-time partner in the JTTF. The FAMS's personnel are assigned to partner with other task force member agencies to provide support during investigations of aviation and other transportation-related threats. The working relationships between the FAMS and other task force participants enable real-time information sharing. Further, it enhances both short-term decision making during immediate critical threats and long-term strategic decision making during the evolution of ongoing threats, such as the 2010 printer cartridge bomb plot.

Visible Intermodal Prevention and Response (VIPR): - Historically, the VIPR Program has received funding in three appropriations: the Federal Air Marshals (FAMS), Aviation Security, and Surface Transportation Security. This request realigns funding from the Aviation Security appropriation (which includes FAMS funding) into TSA's Surface Transportation Security appropriation. The consolidation of funding into one appropriation will increase transparency on analysis and reporting, and will result in more efficient management of business processes.

Travel: \$100.1 million

This portion funds all travel necessary to perform domestic and international mission coverage, mission essential training, and other business-related travel in support of FAMS operational and programmatic goals. The FAMS schedules the coverage of high-risk flights according to a concept of operations that incorporates threat, vulnerability, and consequence. Each year, the FAMS continues to provide priority flight coverage operations in accordance with their Concept of Operations.

Training: \$5.4 million

Through its training programs, the TSA Office of Training and Workforce Engagement /Law Enforcement and Industry Training Division (OTWE/LEITD) provides effective learning environments and opportunities to the TSA Office of Law Enforcement/Federal Air Marshal Service (OLE/FAMS) by utilizing current and relevant curricula and training methodologies to enable and challenge FAMs, and other transportation security professionals, to perform their duties and responsibilities in a highly effective and efficient manner.

Upon entry into the FAM Training Program, FAM trainees undergo an intensive 16.5-week training program conducted at FLETC in Artesia, NM and at the FAMS Training Center (FAMSTC) in Atlantic City, NJ. The training component provides for all associated training requirements to include FLETC-related expenses, role player contracts, hotel lodging contracts for Atlantic City-based classes, training supplies, firing range fees, training gear, equipment, and clothing. Once assigned to a field office, FAMs undergo recurrent, in-service training to maintain the necessary skill base and firearms certification levels on a quarterly basis. Currently, the FAMS has the highest firearms qualification score of any Federal agency (85 percent or 255/300).

Additional training offered by OTWE/LEITD includes a robust FAMS Field Office Recurrent Training Program, which requires all mission status FAMs to complete 160 hours of recurrent training a year. The training is designed to maintain and enhance perishable tactical skills critical to the success of the FAMS mission. The OTWE/LEITD is also responsible for providing instructor development courses for instructors placed at field offices as well as those assigned to various training centers. This is accomplished through a series of train-the-trainer courses offered at the FAMSTC that focus on supporting the FAMS mission.

Department of Homeland Security
Transportation Security Administration
Aviation Security:
Aviation Passenger Security Fee
Program Performance Justification
(Dollars in Thousands)

PPA: Aviation Passenger Security Fee

	Perm. Pos	FTE	Amount
2013 Revised Enacted ¹	-	-	(1,628,626)
2014 Enacted ^{2,3}	-	-	(1,733,522)
2015 Adjustments-to-Base	-	-	(536,654)
2015 Current Services	-	-	(2,270,176)
2015 Program Change	-	-	(128,117)
2015 Total Request	-	-	(2,398,293)
Total Change 2014 to 2015	-	-	(664,771)

¹ FY 2013 Revised Enacted reflects actual collections. Of those collections, \$84.987 million was sequestered.

² The deficit reduction portion of Aviation Passenger Security fee in the FY14 Revised Enacted (\$390 million) and the FY15 Request (\$1.19 billion) is not included in the chart above.

³ FY 2014 Enacted Aviation Passenger Security fees reflect updated estimates from enacted level.

CURRENT SERVICES PROGRAM DESCRIPTION:

TSA proposes restructuring the September 11th Security Fee (Passenger Fee) in FY 2015 to achieve total collections of \$3.8 billion, which includes the Aviation Security Capital Fund (ASCF), funds designated for mandatory deficit reduction, and the additional revenue generated by the proposed fee restructuring. Total collections will both increase the offset to the discretionary costs of aviation security and provide mandatory savings to be deposited in the general fund for the purposes of deficit reduction. The increased offset to the discretionary aviation security costs in FY 2015 would be \$195.167 million. In addition, \$1.19 billion will be applied toward deficit reduction, pursuant to the Bipartisan Budget Act of 2013. Revenue estimates assume the restructured Passenger Fee would be implemented beginning in the second quarter of FY 2015.

The proposal replaces the current statutory fee limit of \$5.60 per one-way trip with a statutory fee limit of \$6.00 per one-way trip in 2015 with annual incremental increases of 50 cents from 2016 through 2018 resulting in a fee of \$7.50 in 2018 and thereafter. The proposed fee would increase collections by an estimated \$11.5 billion over 10 years. Of this amount, \$6.1 billion would be applied to increase offsets to discretionary costs of aviation security and the remaining \$5.4 billion would be treated as mandatory savings and deposited in the general fund. In 2025 and beyond, all additional fee revenue from the restructuring would be applied as discretionary offsets. The restructuring would allow TSA the financial flexibility to meet its increasing aviation security costs and better aligns the costs of passenger security operations to the direct beneficiaries of this unique security service.

¹ FY13 Revised Enacted funding represent actual collections in FY13, and does not include sequestered funds.

² FY14 Enacted funding does *not* include the 7.2% sequestration of mandatory accounts.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Aviation Security Capital Fund (ASCF), first established in fiscal year 2005, is authorized through fiscal year 2028 by the 9/11 Bill. The ASCF supports the installation of optimal screening systems at airports and the purchase and installation of Explosives Detection System (EDS) equipment. In fiscal year 2015, TSA continues to request to use the ASCF for the purchase and installation of EDS equipment.

MAJOR ACQUISITIONS:

Electronic Baggage Screening Program

The Electronic Baggage Screening Program (EBSP) identifies, tests, procures, deploys, installs, sustains, and recapitalizes Transportation Security Equipment (TSE) across all Federalized airports to ensure 100% screening of checked baggage. The EBSP supports screening to minimize the risk of personal injury or death, or damage or loss of property due to terrorist or criminal activity. It reduces costs and improves security screening efficiency through automation of processes to detect and prevent the introduction of explosives materials, weapons, and other dangerous articles into commercial aircraft. Key objectives are: increasing threat detection capability; improving checked baggage screening efficiency; replacing aging Explosives Detection System (EDS) and Explosive Trace Detection (ETD) units; and using competitive procurement contracts for new and viable technologies. Key components include the deployment of new TSE to respond to emerging threats, and the recapitalization of deployed TSE.

The Electronic Baggage Screening Program investment is to be funded out of multiple PPAs in FY 2015, as follows:

- EDS Procurement and Installation PPA \$51.9 million
- Screening Technology Maintenance PPA \$216.8 million
- Aviation Security Capital Fund PPA \$250.0 million

Funding tables for this investment are included in the EDS Procurement and Installation PPA.

Total Request	56,025	48,938	3,661,441	54,526	50,013	3,847,383	52,536	48,218	3,790,802

Description of Item:

The FY 2015 request includes a reduction of \$94.8 million in the Aviation Security appropriation and \$5.2 million in the Transportation Security Support appropriation for a total of \$100 million in savings related to RBS. Since its inception, TSA has significantly reduced terrorist threats through a multi-layered approach to security. TSA continues to undertake efforts to test newer security protocols to improve the passenger experience at aviation security checkpoints by applying risk-based, intelligence-driven screening procedures and enhancing its use of technology.

The vision of RBS is to increase overall aviation system security by focusing on high-risk and unknown passengers while expediting known or trusted travelers. In an effort to continuously improve aviation transportation security, TSA undertakes new initiatives to best align passenger screening resources based on risk assessments.

Justification:

As of January 2014, TSA expanded its initial rollout goal of 40 major airports in FY 2013 to over 100 airports with dedicated TSA Pre✓™ lanes. TSA's priority for FY 2014 and FY 2015 is to build upon this success with a goal of increasing the percentage of individuals provided expedited screening by the end of calendar year 2014 to 50%. TSA has a variety of endeavors implemented for the end of calendar year 2014 to promote risk-based security objectives, the focus of which includes the following initiatives:

- Providing expedited screening to populations that intelligence deems as low-risk, including children under 12 and adults over 75.
- Expanding the Known Crew Member Initiative, which allows officers to quickly identify airline employees and provide expedited screening at designated access points. Expanding air carrier participation in TSA Pre✓™ and providing transportability of TSA Pre✓™ eligibility across all participating carriers.
- Providing TSA Pre✓™ enrollment to existing known and trusted populations including Department of Defense, Members of Congress, Federal Judges, and other cleared Federal Government personnel.
- Implementing Managed Inclusion at airports with Passenger Screening Canine (PSC) teams. Managed Inclusion enables passengers to qualify for expedited screening in a TSA Pre✓™ lane which uses canines to select travelers not already part of a trusted traveler program. Behavior Detection Officers (BDOs) are participating in this process to ensure that passengers exhibiting behavioral indicators (that may indicate high-risk) are sent to standard screening and excluded from the Pre✓™ lane.
- Extending expedited screening benefits to eligible travelers on outbound international flights.

Although the primary driver for risk-based security endeavors is to improve security, as these initiatives expand throughout the aviation security system, TSA anticipates gaining some efficiencies at the checkpoint which include reduced screening personnel and corresponding support costs. These efficiencies can be found through the use of TSA Pre✓™ lanes that use walk through metal detectors (WTMD) in lieu of Advanced Imaging Technology (AIT as a primary screening device). AITs require additional staff to operate in comparison to WTMDs, but provide more thorough screening for high-risk or unknown passengers. Through the use of TSA Pre✓™ lanes and security procedures that expedite screening, such as allowing passengers to leave on light jackets/outerwear and belts , , TSA can process a larger volume of passengers more quickly. Additionally, TSA will be able to screen the same number of passengers within the current wait times or better, enabling the closure of some standard lanes, reducing personnel requirements.

Impact on Performance (Relationship of Increase to Strategic Goals):

The requested funding level is sufficient to meet security screening requirements within current or better wait times.

**Department of Homeland Security
Transportation Security Administration
Aviation Security:
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 2: Reduce Federal Air Marshals (FAMS)
PPA: Federal Air Marshals
Program Decrease: Positions 0, FTE 0, Dollars \$(19,517)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	819,731
Program Decrease							-	-	(19,517)
Total Request	-	-	-	-	-	-	-	-	800,214

Description of Item:

The primary focus of the Federal Air Marshal Service (FAMS) is to detect, deter, and defeat terrorist or other criminal or hostile acts targeting U.S. carriers, airports, passengers, and crew. TSA requests a decrease of \$19.5 million to the FAMS. This reduction is proposed to be taken in the Aviation Security appropriation as it coincides with the request to transfer FAMS funding into the Aviation Security appropriation in FY 2015. This reduction will include \$17.1 million from payroll and \$2.4 million from general expenses.

Justification:

This reduction will not adversely impact aviation security as this proposal will allow TSA to direct limited appropriated funding to risk-based programs and focus resources on high-risk and unknown passengers. FAMS will continue coverage of high priority flights and utilize intelligence and Secure Flight data for mission scheduling.

The FAMS will implement this \$19.5 million program decrease by reducing operational and infrastructure activities, such as mission travel, training, logistics, personnel security, and supplies. FAMS will also continue its hiring freeze that has been in place since 2011 in order to reduce personnel costs through attrition.

In FY 2015 TSA intends to continue a phased field office consolidation to more effectively and efficiently conduct highest priority security operations.

Impact on Performance (Relationship of Increase to Strategic Goals):

The FAMS will continue to focus on coverage of high-risk flights.

Department of Homeland Security
Transportation Security Administration
Aviation Security:
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 3: Federal Flight Deck Officer Efficiencies
PPA: FFDO and Flight Crew Training
Program Decrease: Positions (3), FTE (3), Dollars \$(4,873)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							41	39	24,873
Program Decrease							(3)	(3)	(4,873)
Total Request	44	37	23,421	41	39	24,730	38	36	20,000

Description of Item:

TSA requests a decrease of 3 FTP, 3 FTE, and \$4.873 million to the Federal Flight Deck Officer and Flight Crew Training programs.

Justification:

In FY 2015, TSA is requesting \$20 million to continue to equip, train, and support a volunteer corps of Federal Flight Deck Officers whose purpose is to defend the flight decks of aircraft against acts of criminal violence and air piracy. The FY 2015 budget request for FFDO and Flight Crew Training Program in line with TSA's focus to prioritize risk-based layers of security.

In FY 2015, TSA will implement the following efficiencies in the FFDO Program:

- Implementation of an Inactive Reserve Force of pilots that predominately fly international flights. Information on the number of FFDOs and the size of the Inactive Reserve Force is Sensitive Security Information and will be provided under separate cover upon request.
- Consolidation of requalification facilities from 27 to 20 sites. The following location are currently being considered: Honolulu, HI; St. Louis, MO; Las Vegas, NV; Los Angeles, CA; Philadelphia, PA; Cincinnati, OH; and, Detroit, MI.
- Elimination of unfilled FTEs.

Impact on Performance (Relationship of Increase to Strategic Goals):

The FY 2015 request level will adequately fund the Federal Flight Deck Officer and Flight Crew Training program. This proposed reduction will not impact the current levels of aviation security, as TSA will continue to prioritize and implement risk-based layers of security.

Description of Item:

The FY 2015 Request includes a reduction of \$20.0 million a result of reducing Playbook operations at selected airports. These reductions include \$19.9 million in the Aviation Security appropriation and \$90 thousand in the Transportation Security Support appropriation. Playbook is designed as a comprehensive, flexible deployment system of countermeasures that are coordinated at the local airport level in order to respond quickly to emergency conditions or hostile acts.

Playbook, which is part of the various security layers at our Nation's airports, serves to mitigate both passenger and insider threats using proven tactics, techniques and procedures. The FTE for Playbook are allocated to airports based on several risk criteria such as: Civil Aviation Threat Assessment Score, number of Secure Identification Display Area Badge holders, International Flights, number of Enplanements, and Federal Air Marshals uncovered high risk flights.

Justification:

As TSA places greater emphasis on risk based security initiatives, TSA can reduce the resources devoted to Playbook while maintaining the layer of security with a more targeted focus on risk.

Impact on Performance (Relationship of Increase to Strategic Goals):

TSA will continue to maintain Playbook activities narrowing the focus of Plays to cover specific threats.

Department of Homeland Security
Transportation Security Administration

Program Increase							-	-	10,000
Total Request	122	105	87,141	124	116	73,845	126	118	84,075

Description of Item

The FY 2015 Request includes a \$10 million increase to the EDS Procurement and Installation PPA. The funding will support TSA's recapitalization efforts for its aging checked baggage screening equipment fleet and will help ensure that checked baggage is screened with the latest threat detection capabilities.

Justification

TSA successfully ensured the screening of all checked baggage by December 2003 per the Aviation and Transportation Security Act of 2001 (ATSA) (PL 107-71) mandate. As of January 2014, TSA had nearly 1,800 Explosives Detection System (EDS) units deployed at airports nationwide. Many EDS and ETDs are reaching the end of their useful lives because they cannot be upgraded to the next level of detection without significant costs or operational impacts to TSA. Therefore, TSA has shifted its focus to recapitalization and optimization of the aging fleet.

Over the past several years, TSA has relied on its large carryover balance to help address the recapitalization and optimization efforts for checked baggage screening equipment. However, TSA aggressively decreased its EDS carryover balances by the end of FY 2013. The requested increase will allow TSA to continue to make considerable progress toward deploying equipment with the latest capabilities in order to protect the nation's transportation systems from threats.

Impact on Performance (Relationship of Increase to Strategic Goals)

A \$10 million increase to the EDS Procurement and Installation PPA would allow to TSA to continue software upgrades needed to reduce security vulnerabilities by enhancing detection capabilities for homemade explosives and reducing false alarm rates, for approximately 400 Medium-speed Explosives Detection System (MSEDS) units located at twenty-eight (28) Category X and I airports. The software upgrade initiatives currently have an estimated cost of \$7 million. Additionally, the increase will allow for TSA to continue the purchase and installation efforts of two (2) MSEDS units for previously executed recapitalization facility modifications, which is estimated to cost approximately \$3 million.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Transportation Security Administration related to providing civil aviation security services pursuant to the Aviation and Transportation Security Act (Public Law 107–71; 115 Stat. 597; 49 U.S.C. 40101 note), [\$4,982,735,000] \$5,579,083,737, to remain available until September 30, [2015] 2016; of which not to exceed \$7,650 shall be for official reception and representation expenses: *Provided*, [That of the total amount made available under this heading, not to exceed \$3,894,236,000 shall be for screening operations, of which \$372,354,000 shall be available for explosives detection systems; \$103,309,000 shall be for checkpoint support; and not to exceed \$1,088,499,000 shall be for aviation security direction and enforcement: *Provided further*, That of the amount made available in the preceding proviso for explosives detection systems, \$73,845,000 shall be available for the purchase and installation of these systems: *Provided further*,] That any award to deploy explosives detection systems shall be based on risk, the airport's current reliance on other screening solutions, lobby congestion resulting in increased security concerns, high injury rates, airport readiness, and increased cost effectiveness: *Provided further*, That security service fees authorized under section 44940 of title 49, United States Code, shall be credited to this appropriation as offsetting collections and shall be available only for aviation security: *Provided further*, That the sum appropriated under this heading from the general fund shall be reduced on a dollar-for-dollar basis as such offsetting collections are received during fiscal year [2014] 2015 so as to result in a final fiscal year appropriation from the general fund estimated at not more than [\$2,862,735,000] \$2,760,790,737: *Provided further*, That notwithstanding section 44923 of title 49, United States Code, for fiscal year [2014] 2015, any funds in the Aviation Security Capital Fund established by section 44923(h) of title 49, United States Code, may be used for the procurement and installation of explosives detection systems or for the issuance of other transaction agreements for the purpose of funding projects described in section 44923(a) of such title: [*Provided further*, That none of the funds made available in this Act may be used for any recruiting or hiring of personnel into the Transportation Security Administration that would cause the agency to exceed a staffing level of 46,000 full-time equivalent screeners: *Provided further*, That the preceding proviso shall not apply to personnel hired as part-time employees:] *Provided further*, That not later than 90 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a detailed report on—

- (1) the Department of Homeland Security efforts and resources being devoted to develop more advanced integrated passenger screening technologies for the most effective security of passengers and baggage at the lowest possible operating and acquisition costs, including projected funding levels for each fiscal year for the next 5 years or until project completion, whichever is earlier;
- (2) how the Transportation Security Administration is deploying its existing

passenger and baggage screener workforce in the most cost effective manner;
and

(3) labor savings from the deployment of improved technologies for passenger and baggage screening and how those savings are being used to offset security vulnerabilities:

Provided further, That [not later than April 15, 2014,] the Administrator of the Transportation Security Administration shall submit to the Committees on Appropriations of the Senate and the House of Representatives, a *semiannual* report

[that]**updating information on a strategy to increase the number of air passengers eligible for expedited screening, including:**

[(1) certifies that one in four air passengers that require security screening by the Transportation Security Administration is eligible for expedited screening without lowering security standards; and]

[(2) outlines a strategy to increase the number of air passengers eligible for expedited screening to 50 percent by the end of calendar year 2014, including—]

[(A)]**(1)** specific benchmarks and performance measures to increase participation in Pre-Check by air carriers, airports, and passengers;

[(B)]**(2)** options to facilitate direct application for enrollment in Pre-Check through the Transportation Security Administration's Web site, airports, and other enrollment locations;

[(C)]**(3)** use of third parties to pre-screen passengers for expedited screening;

[(D)]**(4)** inclusion of populations already vetted by the Transportation Security Administration and other trusted populations as eligible for expedited screening;
and

[(E)]**(5)** resource implications of expedited passenger screening resulting from the use of risk-based security methods: [*Provided further*, That information provided under this subsection shall be updated semiannually:]

Provided further, That Members of the United States House of Representatives and United States Senate, including the leadership; the heads of Federal agencies and commissions, including the Secretary, Deputy Secretary, Under Secretaries, and Assistant Secretaries of the Department of Homeland Security; the United States Attorney General, Deputy Attorney General, Assistant Attorneys General, and the United States Attorneys; and senior members of the Executive Office of the President, including the Director of the Office of Management and Budget, shall not be exempt from Federal passenger and baggage screening.

Language Provision	Explanation
¹ ...[\$4,982,735,000] <u>\$5,579,083,737.</u>	The Budget proposes a total of \$5,683,304,000 in discretionary funding for Aviation Security. Of this amount, an estimated \$2,818,293,000 is financed by offsetting collections from Passenger and Air Carrier Security fees collected in FY 2015, while \$104,220,263 is requested made available from offsetting collections sequestered in FY 2013 under a separate General Provision.
² ...[2015] <u>2016...</u>	Fiscal year change only. No substantial change proposed.
³ ...[That of the total amount made available under this heading, not to exceed \$3,894,236,000 shall be for screening operations, of which \$372,354,000 shall be available for explosives detection systems; \$103,309,000 shall be for checkpoint support; and not to exceed \$1,088,499,000 shall be for aviation security direction and enforcement: <i>Provided further</i> , That of the amount made available in the preceding proviso for explosives detection systems,\$73,845,000 shall be available for the purchase and installation of these systems: <i>Provided further:</i>]...	Removing sub-appropriation language. The PPA descriptions provide clearer explanation of budgetary authority per activity and having both PPA and sub-appropriation generally leads to confusion.
⁴ ...[2014] <u>2015...</u>	Fiscal year change only. No substantial change proposed.
⁵ ...[\$2,862,735,000] <u>\$2,760,790,737</u>	The Budget proposes a total of \$5,683,304,000 in discretionary funding for Aviation Security. Of this amount, an estimated \$2,818,293,000 is financed by offsetting collections from Passenger and Air Carrier Security fees collected in FY 2015, while \$104,220,263 is requested made available from offsetting collections sequestered in FY 2013 under a separate General Provision.
⁶ ...[2014] <u>2015...</u>	Fiscal year change only. No substantial change proposed.
⁷ ...[<i>Provided further</i> , That none of the funds made available in this Act may be used for any recruiting or hiring of personnel into the Transportation Security Administration that would cause the agency to exceed a staffing level of 46,000 full-time equivalent screeners: <i>Provided further</i> , That the preceding proviso shall not apply to personnel hired as part-time employees]	Language not necessary
⁸ ... [not later than April 15, 2014,]	Requirement will be met in FY 2014
⁹ ... [that]	No substantial change proposed.
¹⁰ ... updating information on a strategy to increase the number of air passengers eligible for expedited screening, including:	Requirement will be met in FY 2014
¹¹ ...[(1) certifies that one in four air passengers that require security screening by the Transportation Security Administration is eligible for expedited screening without lowering security standards; and]	Requirement will be met in FY 2014
¹² ...[(2) outlines a strategy to increase the number of air passengers eligible for expedited screening to 50 percent by the end of calendar year 2014, including—]	Requirement will be met in FY 2014

INITIATIVE #1
TSA – ELECTRONIC BAGGAGE SCREENING PROGRAM (EBSP)

1. Project Description, Justification and Scope

The Transportation Security Administration's (TSA) Electronic Baggage Screening Program (EBSP) provides the technology to enable prevention of catastrophic loss from terrorist or criminal activity through deterrence, detection, mitigation, and prevention of explosives or other prohibited and dangerous items in checked baggage on commercial aircraft. EBSP is responsible for full life cycle management of screening equipment utilized for screening checked baggage for concealed explosives. The primary detection technologies, or Transportation Security Equipment (TSE), used by EBSP are

Explosives Detection Systems (EDS) and Explosives Trace Detection (ETD). EBSP is part of the TSA vision of layered security.

EBSP was established to meet the congressional mandate for 100 percent screening of aviation-checked baggage in the National Airspace System for explosives by electronic or other approved means. This mandate was established in the 2001 Aviation and Transportation Security Act (P.L. 107-71). TSA's mission is to protect the Nation's transportation systems to ensure freedom of movement for people and commerce. The EBSP ensures that the TSA mission is achieved through a risk-based prioritized requirements methodology and through development, testing, procurement, deployment, and lifecycle management of checked baggage TSE screening technologies. By utilizing screening activities that minimize the risk of personal injury or death, or damage or loss of property due to acts of terrorism or criminal activity directed at aviation transportation, the program directly supports TSA's goals of protecting the transportation system from dangerous people and items that threaten its security, managing risks to critical transportation infrastructure, and strengthening the TSA's operations and management. Key objectives of the program include: increasing threat detection capability, improving checked baggage screening efficiency, replacing aging EDS and ETD units, and utilizing competitive procurement contracts for new and viable technologies. The primary beneficiaries of the EBSP are the traveling public; the TSA Office of Security Operations, whose staff manages the daily operations of deployed TSE; commercial airlines; and airport authorities. EBSP is currently dependent on the Department of Homeland Security Science and Technology Directorate's Transportation Security Laboratory for certification of the screening equipment and research and development of emerging screening technologies. The TSA Security Technology Integrated Program (STIP) is being executed to enable remote maintenance and monitoring of the deployed screening equipment, as well as enabling a dynamic risk-based security capability through remote upgrades and toggling of threat detection algorithms.

The EBSP also funds efforts studying the integration of new technologies into existing systems to ensure operational effectiveness and suitability before full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment in the field in a variety of environmental conditions. EBSP conducts:

- Operational test and evaluation as part of the acquisition process for items procured by TSA, and
- Pilots, demonstrations, and field experimentation in support of mission area analyses, concept of operations development and workforce characterization.

2. Significant Changes

TSA's FY 2015 request is \$518.7 million for EBSP.

TSA's successful focus on meeting the 100 percent screening mandate led to an uneven age distribution in the current TSE fleet. The EBSP plans to replace EDS and ETD units based on prioritization criteria to efficiently maintain the 100 percent screening mandate while working toward achieving steady-state equipment replacement. It is also pursuing efficiencies aimed at maximizing equipment utilization and extending equipment life.

3. Project Schedule

Projects	Fiscal Quarter and Year		Total Estimated Completion Cost (\$000)	Total Project Cost (\$000)
	Project Start	Project Complete		
(FY02-FY07) Program initiation (MNS, ConOps draft); Deployed systems for facility mods, Strategic Program Plan, & NEXGEN. Updated Strategic Plan, LCCE, CBA, Deployment Schedule; Performed program/tech mgmt, system deployment, & O&M, per deployment plan	Q1 2002	Q1 2008	2,665,061	2,610,186

(FY15) Maintenance	Q1 2015	Q4 2015	216,777	-
Total			\$11,953,567	\$9,342,816

*FY02 – FY15 excludes STIP and Advanced Surveillance Program (ASP)

*FY11 – FY15 excludes Surface and Cargo

*Maintenance amounts include costs for equipment disposal

4. Schedule of Project Funding (Dollars in Thousands)

Projects (Appropriation: Aviation Security)	Prior **	FY 2013	FY 2014	FY 2015	Total
Program Operations and Management & Engineering Initiatives	1,107,159	74,085	149,168	85,957	1,416,369
LOI / OTA	3,369,784	88,902	0	0	3,458,686
EDS Purchase and Installation	4,011,280	133,353	143,972	215,962	4,504,567
Maintenance	1,919,835	214,645	222,688	216,777	2,573,945
Total Project Expenditures	10,408,058	510,985	515,828	518,696	11,953,567

*FY02 – FY15 excludes STIP and ASP

*FY11 – FY15 excludes Surface and Cargo

*Maintenance amounts include costs for equipment disposal

* * EDS Purchase and Installation includes all program funding except maintenance for FY02-FY08 due to past history reporting

5. Cost Estimate Detail and Changes (Dollars in Thousands)

Description of Milestone	Initial Total Cost (\$000)	Planned Total Cost (\$000)	Actual Total Cost (\$000)	Explanation of Difference Between Current and Previous Estimate
(FY02-FY07) Program initiation (MNS, ConOps draft); Deployed systems for facility mods, Strategic Program Plan, & NEXGEN. Updated Strategic Plan, LCCE, CBA, Deployment Schedule; Performed program/tech mgmt, system deployment, & O&M, per deployment plan. Maintained equipment	4,723,501	4,723,501	4,624,101	Airport scheduling delays slowed deployment of equipment.

(FY08) Perform program management, system deployment, O&M, tech management, and maintenance utilizing strategic plan	758,487	758,487	747,906	Airport scheduling delays slowed deployment of equipment.
(FY09) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan; and perform operations and maintenance utilizing strategic plan.	1,482,823	1,482,823	1,401,779	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award.
(FY10) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan; and perform operations and maintenance utilizing strategic plan.	1,260,174	1,260,174	1,315,637	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award.
(FY11) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan and for recapitalization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.	742,770	742,770	525,688	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award.
(FY12) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for recapitalization and	699,903	699,903	380,666	Airport scheduling delays slowed deployment of equipment, and acquisition of

optimization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.				EDS equipment delayed due to competitive award
(FY13) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for recapitalization and optimization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.	685,957	685,957	347,039	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award
(FY14) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for recapitalization and optimization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.	515,828	515,828		Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award

*FY02 – FY15 excludes STIP and ASP

*FY11 – FY15 excludes Surface and Cargo

*Maintenance amounts include costs for equipment disposal

6. Method of Performance

EBSP is currently in a mixed acquisition life cycle phase, focusing predominately on the produce/deploy/support phase of the acquisition process. The EBSP expenditure plan is submitted to Congress annually.

An Integrated Master Schedule (IMS) was recently developed and implemented for the EDS Competitive Procurement project. A comprehensive IMS that covers all projects within EBSP is under development and will be complete in Q4 FY 2013. Additionally, progress against major project milestones in the Acquisition Program Baseline is reported to DHS on a regular basis.

Operational performance will be measured based on the following criteria:

- 100 percent electronic screening of checked baggage for explosives at all commercial airports nationwide
- Percent of checked baggage screened with EDS that maximize security, effectiveness, and efficiency
- Cost per bag screened
- Operational availability of baggage screening equipment
- Customer satisfaction

7. Related Annual Funding Requirements

(Dollars in Thousands)

	FY 2015	
	Current Estimate	Previous Estimate
N/A (All operations and maintenance are included in program cost estimates.)	N/A	N/A
Total	N/A	N/A

8. Budget Allocation to Programs

Program	Allocated Budget (\$000)	
	FY 2014	FY 2015
EDS/ETD Purchase & Install	293,140	301,919
Screening Technology Maintenance	222,688	216,777
Total	515,828	518,696

*FY02 – FY15 excludes STIP and ASP

*FY11 – FY15 excludes Surface and Cargo

*Screening Technology Maintenance includes Disposal costs

9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

This program is mandated under the Aviation and Transportation Security Act (P.L. 107-71) which requires 100% screening of checked baggage by EDS or an equivalent standard.

INITIATIVE #2
TSA – PASSENGER SCREENING PROGRAM (PSP)

1. Project Description, Justification and Scope

The Passenger Screening Program (PSP) serves as the TSA's Program Management Office responsible for aviation checkpoint security equipment for the Nation's airports. PSP's mission is to provide technologies that assist Transportation Security Officers in denying entry to potential threats directed against the air transportation network. PSP's mission aligns to TSA's mission of protecting the Nation's transportation systems to ensure the freedom of movement for people and commerce and the DHS mission of Preventing Terrorism and Enhancing Security, by embodying two associated goals into program operations: Preventing Terrorist Attacks and Managing Risks to Critical Infrastructure. PSP protects the travelling public and adapts to evolving security conditions by identifying and evaluating risks to passenger screening checkpoints and mitigating threats to infrastructure including terminals, aircraft, and checkpoints. PSP consists of three security technology portfolios: people screening technologies, carry-on screening technologies, and layered security technologies. Each portfolio consists of subordinate security technology projects that focus on specific threat mitigation systems. PSP-managed technologies screen over two million passengers and their carry-on items for weapons, explosives, and prohibited items at approximately 450 Federalized airports nationwide each day. Program objectives include increasing detection, limiting false alarms, enhancing efficiency, consolidating equipment footprint, and centralizing results monitoring to support checkpoint staffing reductions. To realize these goals, PSP is moving from independently-functioning technologies to optimized, integrated technologies that are easier to upgrade via software upgrades. The system-of-systems security architecture will enable TSA to address both known vulnerabilities and emerging threats in the most comprehensive manner possible. PSP balances its duties with considerations such as passenger privacy, dignity, safety, and health, while maintaining affordability, deployment, maintenance, and other life cycle issues. Accomplishments include the replacement of legacy systems and the deployment of emerging technologies. Current technologies that have been deployed include Enhanced Walk-through Metal Detectors (WTMD); Explosives Trace Detection (ETD) units; Bottled Liquids Scanners (BLS); Chemical Analysis Devices (CAD); Advanced Technology-2 (AT-2) systems; and Advanced Imaging Technology (AIT) with Automated Target Recognition (ATR) capability. Additionally, the Credential Authentication Technology (CAT), which digitally validates the ID used by the traveling public, is expected to begin LRIP in deployment in FY2015 at full rate production.

2. Significant Changes

TSA's FY 2015 request includes \$170.4 million for PSP. This request includes funding to purchase AT-2, AIT-2, and BLS units and to develop next generation checkpoint screening solutions.

3. Project Schedule

	Fiscal Quarter and Year		Estimated Completion Cost	Total Project Cost
Projects	Project Start	Project Complete	(\$000)	(\$000)

(FY15) Personnel Cost and Benefits	Q1 2015	Q4 2015	\$8,768	-
TOTAL			\$2,631,125	\$2,095,306

*Excludes STIP and ASP

* Maintenance amounts include costs for equipment disposal

4. Schedule of Project Funding

(Dollars in Thousands)

Projects (<i>Appropriation: Aviation Security</i>)	Prior	FY 2013	FY 2014	FY 2015	Total
Planning and Testing	61,344	15,447	13,000	13,000	102,791
Procurement and Deployment	1,607,029	71,258	70,273	70,865	1,819,425

Operations and Support (Maintenance)	420,327	77,999	75,821	77,732	651,879
Personnel Cost and Benefits	31,509	8,143	8,610	8,768	57,030
Total Project Expenditures	2,120,209	172,847	167,704	170,365	2,631,125

*Excludes STIP and ASP

* Maintenance amounts include costs for equipment disposal

5. Cost Estimate Detail and Changes

(Dollars in Thousands)

Description of Milestone	Planned Total Cost	Actual Total Cost	Explanation of Difference
Procurement and Deployment (FY06)	94,148	82,732	Program received quantity discount and awards lower than estimate; funds reallocated between activities
Procurement and Deployment (FY11)	300,791	257,321	Funds were reallocated between programs and activities
Operations and Support (Maintenance) (FY11)	76,000	72,528	Less deployments; funds reallocated to other maintenance requirements
Procurement and Deployment (FY12)	166,971	117,635	Funds were reallocated between programs and activities

* Only significant differences are listed

**Excludes STIP and ASP

6. Method of Performance

Expenditures are approved based on an overall PSP expenditure plan that is submitted to Congress annually.

Operational performance will be measured based on the following criteria:

- Percent of Airports with BLS Coverage
- Percent of Checkpoint Lanes with AT Coverage
- Operational Availability for Carry-on Baggage Screening Equipment
- Percent of Checkpoint Lanes with AIT Coverage

7. Related Annual Funding Requirements

(Dollars in Thousands)

	FY 2015	
	Current Estimate	Previous Estimate
N/A (All operations and maintenance are included in program cost estimates.)	N/A	N/A
Total	N/A	N/A

8. Budget Allocation to Programs

Program	Allocated Budget (\$000)	
	FY 2014	FY 2015
Checkpoint Support*	83,273	83,865
Screening Technology Maintenance**	75,821	77,732
Total	167,704	170,365

*Excludes STIP and ASP

**Screening Technology Maintenance includes equipment disposal costs

9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

This program is mandated under the Aviation Transportation and Security Act of 2001 (P.L. 107-71), which requires screening of all passengers and property including carry-on baggage and other articles that will be carried aboard a passenger aircraft.

Federal Air Marshals Mission Statement

The FAMS PPA funds the FAMS's payroll costs, supports all operational and infrastructure requirements, and training and travel expenses. The vast majority of this PPA funds the salaries for FAMs and the civilian workforce to provide vital protective and law enforcement services necessary for both domestic and international air travel as well as other transportation related security activities. The PPA also supports the continuing development and maintenance of the Service's infrastructure, internal business processes, and systems that enable FAMs to seamlessly perform the integrated set of functions that make up their mission. The FY 2015 request includes a realignment of funding from FAMS into a single PPA under the Aviation Security appropriation. This consolidation of FAMS into Aviation Security better reflects TSA's organization and management structure for aviation security operations

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	-	-	360,705	360,705
11.3 Other than Full-Time Permanent	-	-	12,521	12,521
11.5 Other Personnel Compensation	-	-	103,675	103,675
11.8 Special Personal Services Payments	-	-	623	623
12.1 Civilian Personnel Benefits	-	-	185,795	185,795
Total, Salaries & Benefits	-	-	663,319	663,319

The FY 2015 Salaries and Benefits request includes an increase of \$664,597,000 for a transfer from the Federal Air Marshals appropriation, an increase of \$6,687,000 for pay COLA, an increase of \$9,135,000 for retirement contribution, and a decrease of \$17,100,000 for a FAMS reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$0	\$0	\$100,089	\$100,089

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The bulk of these costs directly support Federal Air Marshal domestic and international mission travel, which is the primary mission of the Service. Also included in this object class are travel costs related to training, conference attendance, and site visits. The FY 2015 request reflects the transfer from the Federal Air Marshals appropriation and a decrease for a FAMS Reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$0	\$0	\$79	\$79

Transportation of things includes all costs associated with the care of items in the process of being transported, as well as other services associated with the transportation of things. The FAMS uses this object class series for central billing and for the shipment of goods between Headquarters and Field Offices. The FY 2015 request reflects the transfer from the Federal Air Marshals appropriation and a decrease for a FAMS Reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$0	\$0	\$1,021	\$1,021

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2015 request reflects the transfer from the Federal Air Marshals appropriation and a decrease for a FAMS Reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$0	\$0	\$5,357	\$5,357

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The majority of the FAMS' commercial office leases for Headquarters and field offices are included in this category. The FY 2015 request reflects the transfer from the Federal Air Marshals appropriation and a decrease for a FAMS Reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$0	\$0	\$4,271	\$4,271

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FAMS uses this object class series for PDA and cell phone air time and general office utilities such as metered gas, electricity, water usage, etc. The FY 2015 request reflects the transfer from the Federal Air Marshals appropriation and a decrease for a FAMS Reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
24.0 Printing and Reproduction	\$0	\$0	\$3	\$3

Printing includes all costs for printing and reproduction obtained from private sector or other federal entities. The FY 2015 request includes a transfer from the Federal Air Marshals appropriation.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$0	\$0	\$3,960	\$3,960

Advisory and assistance services primarily include services acquired by contract from non-Federal sources (i.e., the private sector, foreign governments, State and local governments, tribes, etc.). The FY 2015 request reflects the transfer from the Federal Air Marshals appropriation and a decrease for a FAMS Reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$0	\$0	\$8,892	\$8,892

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25.1. The FAMS uses this series for additional support for the Mission Scheduling and Notification System, support services for other elements (including contractors supporting contracting/procurement efforts) within the Service. The FY 2015 request reflects the transfer from the Federal Air Marshals appropriation and a decrease for a FAMS Reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$0	\$0	\$4,376	\$4,376

Purchases from Government Accounts include costs for purchases from other Federal agencies or accounts that are not otherwise classified. For the FAMS, this includes IT Support for the entire FAMS, facility maintenance support from the FAA, office equipment maintenance and security clearances. The FY 2015 request reflects the transfer from the Federal Air Marshals appropriation and a decrease for a FAMS Reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.4 Operation and Maintenance of Facilities	\$0	\$0	\$895	\$895

Operation and maintenance of facilities includes all payments for the operation and maintenance of facilities when done by contract with either the private sector or another Federal Government account. The FAMS uses this object class series for custodial services and facility build out/enhancements of current leases. The FY 2015 request reflects the transfer from the Federal Air Marshals appropriation and a decrease for a FAMS Reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.6 Medical Care	\$0	\$0	\$532	\$532

The FY 2015 request reflects the transfer from the Federal Air Marshals appropriation and a decrease for a FAMS Reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$0	\$0	\$1,629	\$1,629

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal account. The FY 2015 request reflects the transfer from the Federal Air Marshals appropriation and a decrease for a FAMS Reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$0	\$0	\$3,101	\$3,101

Supplies and materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FAMS uses this series for IT supplies and materials, office supplies and fuel. The FY 2015 request reflects the transfer from the Federal Air Marshals appropriation and a decrease for a FAMS Reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$0	\$0	\$2,690	\$2,690

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. Included in this total are costs for IT equipment and software, furniture and other office equipment. The FY 2015 request reflects the transfer from the Federal Air Marshals appropriation and a decrease for a FAMS Reduction.

Screening Partnership Program Mission Statement

The Screening Partnership Program (SPP) allows an airport operator to submit an application to have screening carried out by a qualified private screening company. The contractor must perform under federal oversight and the contracted screeners must perform at the same or at a higher performance levels as federal TSOs.

Summary Justification and Explanation of Changes

EDS Procurement and Installation Mission Statement

EDS Procurement and Installation funds the purchase, deployment, and installation of electronic baggage screening equipment in the Nation's airports. The deployment of this equipment is a key component of TSA's ability to ensure the security of the air transportation system. Installation is an integral cost associated with the deployment of equipment that enhances the security of the air transportation system.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change

Aviation Regulation and Other Enforcement Mission Statement

The purpose of Aviation Regulation and Other Enforcement is to provide activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the nation's commercial airports. Funding requested under this decision unit supports airport regulation compliance through domestic and international inspections, K-9 units, international outreach programs to ensure alignment and consistency in security requirements of the United States and those of the other nations to ensure transportation system integrity; and reimbursements provided to State and local law enforcement for support provided at commercial airport checkpoints.

Airport Management and Support Mission Statement

Airport Management and Support provides funding for each Federal Security Director and staff at each hub airport along with the headquarters personnel who direct the policy, analysis, and the administration of aviation screening and airport security. In addition, this PPA supports aviation functions at TSA's Transportation Security Operations Center. These offices and positions are critical to supporting the front-line operations of our TSOs.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	244,117	242,581	242,847	266
11.3 Other than Full-Time Permanent	514	514	516	2

Air Cargo Mission Statement

The Air Cargo program operates through compliance activities, regulatory efforts, and outreach initiatives. TSA uses a threat-based risk management approach based on two threats: 1) introduction of an explosive device on a passenger aircraft, and 2) the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2015 request includes a net decrease of \$598,000 for adjustments-to-base, transfer in of OGS funding, and consolidation of canine funding into the Aviation Regulation PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$164	\$153	\$137	(\$16)

GSA rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2015 request reflects a net decrease of \$16,000 for adjustments-to-base, transfer in of OGS funding, and consolidation of canine funding into the Aviation Regulation PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$101	\$93	\$83	(\$10)

Other rent includes all payments to non-Federal sources for rental space, land, and structures. The FY 2015 request reflects a net decrease of \$10,000 for adjustments-to-base, transfer in of OGS funding, and consolidation of canine funding into the Aviation Regulation PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$98	\$92	\$83	(\$9)

Communications, utilities, and miscellaneous charges include all payments for rental or leasing of information technology equipment and services, postal services and rentals, and utility services. The FY 2015 request reflects a net decrease of \$9,000 for adjustments-to-base, transfer in of OGS funding, and consolidation of canine funding into the Aviation Regulation PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
24.0 Printing and Reproduction	\$11	\$10	\$9	(\$1)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The printing provides educational materials, training aids, and regulatory guidance. The FY 2015 request reflects a net decrease of \$1,000 for adjustments-to-base, transfer in of OGS funding, and consolidation of canine funding into the Aviation Regulation PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$11,030	\$10,260	\$9,202	(\$1,058)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. These services support the Air Cargo Systems development, operation, and support Known Shipper Management System, Indirect Air Carrier Management System and Air Cargo Risk Based Targeting. The FY 2015 request reflects a net decrease of \$1,058,000 for adjustments-to-base, transfer in of OGS funding, and consolidation of canine funding into the Aviation Regulation PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$3,267	\$3,039	\$2,726	(\$313)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2015 request reflects a net decrease of \$313,000 for adjustments-to-base, transfer in of OGS funding, and consolidation of canine funding into the Aviation Regulation PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$352	\$328	\$294	(\$34)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2015 request reflects a net decrease of \$34,000 for adjustments-to-base, transfer in of OGS funding, and consolidation of canine funding into the Aviation Regulation PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.6 Medical Care	\$138	\$128	\$115	(\$13)

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2015 request reflects a net decrease of \$13,000 for adjustments-to-base, transfer in of OGS funding, and consolidation of canine funding into the Aviation Regulation PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$130	\$121	\$109	(\$12)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2015 request reflects a net decrease of \$12,000 for adjustments-to-base, transfer in of OGS funding, and consolidation of canine funding into the Aviation Regulation PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$1,239	\$1,152	\$1,033	(\$119)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2015 request reflects a net decrease of \$119,000 for adjustments-to-base, transfer in of OGS funding, and consolidation

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
--	----------------------------	--------------------	--------------------	------------------------------

of canine funding into the Aviation Regulation PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$1,021	\$950	\$852	(\$98)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2015 request reflects a net decrease of \$98,000 for adjustments-to-base, transfer in of OGS funding, and consolidation of canine funding into the Aviation Regulation PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
41.0 Grants, Subsidies, and Contributions	\$10,397	\$9,673	\$8,676	(\$997)

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2015 request is a net decrease of \$997,000 associated for adjustments-to-base, transfer in of OGS funding, and consolidation of canine funding into the Aviation Regulation PPA.

Aviation Security Capital Funds Fees Mission Statement

The Aviation Security Capital Fund was extended by the 9/11 Bill and is authorized through 2028. The Aviation Security Capital Fund supports the installation of optimal screening systems at airports and, with the enactment of the FY 2012 through FY 2014 Appropriations Bill, funds equipment purchases and installation.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
Total, Salaries & Benefits	-	-	-	-

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$185,850	\$133,000	\$228,400	\$95,400

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. As provided in the FY 2012 through FY 2014 appropriations Bills, the Aviation Security Capital Fund can be used for equipment purchases and installations as well as facility modifications. Funding in Advisory and Assistance Services is used to fund equipment installation.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$64,150	\$117,000	\$21,600	(\$95,400)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. As provided in the FY 2012 through FY 2014 appropriations Bills, the Aviation Security Capital Fund can be used for equipment purchases and installations as well as facility modifications. Funds are requested in FY 2015 for equipment purchase.

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Surface Transportation Security

I. Appropriation Overview

A. Mission Statement for Surface Transportation Security:

Mission Statement

The Transportation Security Administration (TSA) is mandated to protect the surface transportation system and to ensure the freedom of movement and the security of people and commerce. This mission is accomplished largely by a consortium of Federal, State, local, and private entities coordinated by TSA to optimize resources in a risk-based approach to security. In addition to sector and modal planning and coordination, TSA provides operational deterrence support through surface security inspectors and Visible Intermodal Prevention and Response (VIPR) teams. TSA also provides other protective resources such as: training; personnel funding; screening and detection programs; voluntary guidelines and best practices; regulations; security and process standards; vulnerability and risk assessment teams; and subject matter expertise to the Federal Emergency Management Agency (FEMA) for surface transportation security grant programs. TSA's surface transportation responsibilities also include coordination of the government and industry activities to identify and address unacceptable risk associated with all hazards affecting the Postal and Shipping Sector.

Various statutes and executive directives require that transportation risk reduction activities be determined and implemented collaboratively in accordance with strategic plans developed with security partners. These combined efforts play an essential role in DHS's mission to prevent terrorist acts within the United States, to reduce vulnerability to terrorism, to minimize the damage from potential attacks and disasters, and to improve system resilience after an incident. The surface domain includes:

- 1) Over 9 billion passenger trips on publicly operated mass transit per year; approximately 751 million passengers traveling on commercial buses each year ; and 24 million students daily on school buses traveling more than 4 million miles annually.
- 2) Over 168,000 miles of railroad track; 3.9 million miles of roads (including 46,717 miles of interstate highway and 114,700 miles of National Highway System roads); 604,000 highway bridges each over 20 feet of span; 366 highway tunnels each over 100 meters in length, and over 2.6 million miles of pipeline.
- 3) Nearly 800,000 shipments of hazardous materials transported every day (95 percent by truck).
- 4) The Marine Transportation System consisting of waterways, ports, and their connections, as well as commercial and recreational vessels, vehicles, and system users, such as importers and exporters. This system is geographically vast, with 95,000 miles of shoreline, 25,000 miles of rivers and canals, and is the primary transportation mode providing connectivity between the United States and global economies; 99 percent of overseas trade by volume enters or leaves the United States by ship.

The threat to surface transportation security has been growing over the past decade. Surface transportation remains an attractive target both globally (witness the bombings in Madrid in 2004; London in 2005; Mumbai in 2006; and Moscow in 2004 and 2010) and within the United States. For example: in 2007 four individuals planned to attack pipelines at the John F. Kennedy Airport; in 2008 there was a threat to New York City commuter rail; in 2009, a potential terrorist planned to bomb the New York City subway; in 2010, an individual left a car with gas, propane, fertilizer, and firecrackers at Times Square in New York City; and another potential terrorist was arrested in a sting operation in October 2010 for plotting against the Washington Metropolitan Area Transit Authority. To counter the dynamic, yet enduring nature of the threat to surface transportation, TSA, its government partners, and industry owners and operators have committed to improve the security and resilience of the transportation system.

TSA plays a pivotal role in strengthening Surface Transportation Security. The *Implementing Recommendations of the 9/11 Commission Act of 2007* (9/11 Act) requires TSA to take specific measures to strengthen specific modes of transportation by conducting modal security assessments, requiring modal security plan development, providing guidelines for modal security training, and conducting exercise activities to reinforce those security plans. Additionally, the Administration's 2010 Surface Transportation Priority Security Assessment designates TSA as the lead agency for implementing 17 of the report's 20 recommendations, and requires TSA to support the lead agency for two additional recommendations. The Surface Transportation Security budget request for FY 2015 reflects TSA's continuing efforts to improve surface transportation security pursuant to these requirements.

B. Budget Activities:

This appropriation includes two major programs, Surface Transportation Security Staffing and Operations, and Surface Transportation Security Inspectors and VIPR (formerly, Surface Transportation Security Inspectors and Canines).

Surface Transportation Security Staffing and Operations - Provides funding for the coordination among all surface security stakeholders of processes and programs to identify and remediate unacceptable risks to critical infrastructure from all types of hazards; and develop a regulatory framework and the administrative policy for national security strategies, plans, and programs that identify innovative solutions and best practices.

Surface Transportation Security Inspectors and VIPR - Employs a cadre of inspectors to assess compliance, national program delivery, and provide outreach on security assets in the surface transportation system. Deploys VIPR teams in all modes of transportation to detect and deter potential terrorist activities. These resources interact daily within the transportation network to enhance security measures and are available for surge operations during times of heightened security.

C. Budget Request Summary:

The Transportation Security Administration requests 905 positions, 860 FTE, and \$127,637,000 for FY 2015. The total adjustment-to-base includes an increase of 252 positions, 240 FTE, and \$29,912,000. The request also includes a program decrease totaling 48 positions, 48 FTE, and \$10,893,000 for VIPR efficiencies.

II. Summary of FY 2015 Budget Estimates by Program/Project Activity (PPA)

Department of Homeland Security Transportation Security Administration Surface Transportation Security:

III. Current Services Program Description by PPA

**Department of Homeland Security
Transportation Security Administration
Surface Transportation Security:
Staffing and operations
Program Performance Justification
(Dollars in Thousands)**

PPA: Staffing and operations

	Perm. Pos	FTE	Amount
2013 Revised Enacted	158	126	35,651
2014 Enacted	157	147	35,262
2015 Adjustments-to-Base	(20)	(20)	(5,887)
2015 Current Services	137	127	29,375
2015 Total Request	137	127	29,375
Total Change 2014 to 2015	(20)	(20)	(5,887)

TSA requests 137 positions, 127 FTE, and \$29.4 million in FY 2015 for the Staffing and Operations PPA:

Adjustments-to-Base:

- Decrease from transfer of 12 positions/12 FTE and \$4.937 million to the Intelligence and Vetting Appropriation (Intelligence PPA) for the TSA Risk Knowledge (TSARK) Center (formerly, Mission Risk Knowledge (MRK) Center)
- Decrease from transfer of 8 positions/8 FTE and \$1.208 million to the Aviation Security Appropriation (Screener Training and Other PPA) for the TSA Academy
- Decrease of \$100 thousand for anticipated savings from reductions to non-mission critical travel and training, contract efficiencies, and/or supplies.
- Increase of \$55 thousand for annualization of the 2014 pay raise
- Increase of \$145 thousand for the 2015 pay raise
- Increase of \$158 thousand for retirement contribution

CURRENT SERVICES PROGRAM DESCRIPTION:

TSA, in accordance with the Aviation and Transportation Security Act, is responsible for assessing security threats, vulnerabilities, and consequences in all surface transportation modes. Further, TSA is charged with identifying needed security enhancements for surface transportation and related infrastructure, as well as developing security plans, and issuing and enforcing regulations to improve modal security. Homeland Security Presidential Directive (HSPD)-7 and Presidential Policy Directive (PPD)-8 expand TSA's security responsibilities to include coordination of preparedness, response, and recovery activities for all hazards threatening the critical infrastructure and systems that comprise the Transportation Systems Sector.

Other key strategic plans and requirements documents driving TSA's security efforts are the Executive Order to Strengthen Surface Transportation, the Intelligence Reform and Terrorism Prevention Act of 2004, the National Infrastructure Protection Plan, the 9/11 Commission Act of 2007, and the DHS Strategic Plan. The following activities are supported by Staffing and Operations:

Staffing and Operations FY 2015 Request

(dollars in millions)

	FY 2014 Enacted	FY 2015 Request
Cross-modal Activities (Including Maritime, Postal & Shipping)	\$11.5	\$9.5
Mass Transit Activities (Including Passenger, Rail & Bus)	\$5.7	\$4.7
Freight Rail Activities	\$4.8	\$4.0
Pipeline Activities	\$4.4	\$3.7
Highway and Motor Carrier Activities	\$9.0	\$7.5
Total	\$35.4	\$29.4

Cross-modal Activities (Including Maritime, Postal & Shipping): \$9.5 million

National Transportation Strategies, Plans and Reports: TSA will revise the Transportation Systems Sector Specific Plan, based on direction and guidance from the revised National Infrastructure Protection Plan, developed in response to PPD 21. The agency is also required to develop an annual report on the sector. These documents reflect multiple strategies, plans and reports for the protection of transportation assets to meet planning and reporting requirements required by the Intelligence Reform and Terrorism Prevention Act of 2004, and the 9/11 Act. The legislation requires that strategies, plans and associated reports are developed in collaboration with Federal, state, local, tribal, and territorial governments, owners and operators of transportation infrastructure, private sector stakeholders, and non-profit employee representative organizations. TSA strives to minimize the overlap in planning and reporting requirements and to provide a unified process for its stakeholders.

Intermodal Security Training Exercise Program (I-STEP): I-STEP assists TSA and the Transportation Systems Sector in complying with the *Implementing Recommendations of the 9/11 Commission Act*, specifically by conducting a security exercise program for security partners in Mass Transit, Freight Rail, Highway & Motor Carriers, and Pipeline sectors. I-STEP enables security partners to enhance security capabilities, build partnerships, and gain insights in transportation security to prevent and deter acts of terrorism. I-STEP focuses on building and sustaining security preparedness to protect the traveling public, enhance national resilience, and identify capability gaps and needed resources. In the past year, I-STEP continued to play an integral role in TSA's efforts to develop security policies and plans that reduce the risk of catastrophic terrorist attacks.

In FY 2013, TSA adopted I-STEP's MRK Center prototype as a TSA-wide common operating picture to provide a centralized portal that secures, analyzes, and shares risk data across TSA, providing the same risk view from headquarters to the local level, to better understand the nation's risk posture. This new capability is called the TSARK Center and is supported by the Office of Intelligence and Analysis. This request realigns funding for the TSARK Center under the Intelligence and Vetting Appropriation (Intelligence PPA).

I-STEP's Security Measures and Resources Toolbox organized thousands of transportation security best practices gathered from TSA and security partners in a convenient filtering tool and shared it with

Federal, state and local, private sector, and international partners via the Homeland Security Information Network (HSIN). I-STEP operationalized a new TSA Surface Risk-Based Security Strategy to identify desired security outcomes and used Operations-based exercises to test if operators are meeting them. TSA expanded its exercise planning capacity by introducing a public-facing, on-line exercise planning and information management system capable of supporting all modes in the transportation system. This system specifically assists stakeholders in planning their own training exercises and enhancing preparedness in addition to those exercises conducted through I-STEP.

In FY 2014 and FY 2015, I-STEP will engage industry to secure nationally-significant transportation infrastructure and assist security partners develop outcome-based policies and plans for risk-based priorities. Engagement approaches will seek to improve linkages between public and private sector partners within and across modal industries to enhance regional transportation security efforts. I-STEP will solicit information from stakeholders to identify security best practices that assist partners in continuously improving the risk posture of transportation systems serving the Nation.

Mass Transit Activities (Including Passenger, Rail & Bus): \$4.7 million

Stakeholder Collaboration: The vast majority of mass transit and passenger rail systems in the United States are owned and operated by units or agencies of local government. This fact distinguishes mass transit and passenger rail from other modes of transportation and sets special conditions on the Federal Government's interactions with mass transit and passenger rail operators. TSA's work to enhance and sustain the security of the rail mode focuses on creating lines of communication among transit agencies, collecting and disseminating best practices and threat information, identifying common vulnerabilities, and sharing proven and emerging countermeasures to mitigate those vulnerabilities. TSA works closely with the transit and passenger rail operators to engage in practical and coordinated planning to meet security contingencies; set grant funding priorities; assist agencies in implementing plans and documenting their strengths; and identify and address opportunities for security enhancements. Examples of stakeholder collaboration can be found below:

- The objective of the **Mass Transit and Passenger Rail-Government Coordinating Council (MTPR-GCC)** is to coordinate transportation security strategies and activities and to establish policies, guidelines and standards, and to develop program metrics and performance criteria for the Mass Transportation mode. The MTPR-GCC fosters communication across government and between the government and private industry in support of the Nation's homeland security mission. The MTPR-GCC acts as the counterpart to the private, industry-led "Sector Coordinating Council" (SCC) for the Mass Transit and Passenger Rail mode to review and develop mode-wide security programs necessary to protect the nation's transportation sector. The MTPR-GCC will address transit (e.g. intra-city bus, light rail, elevated train, and subway), and commuter and long-distance rail (e.g. Long Island Railroad and Amtrak) conveyances as outlined in the National Strategy for Transportation Security (NSTS) and NSTS Update. TSA and the Department of Transportation-Federal Transit Administration (FTA) serve as co-Sector Specific Agencies for the MTPR-GCC. In this role, TSA collaborates with FTA to host meetings, develop agendas, and work with Transportation Sector secretariat support on logistics of the meetings.
- **The Transit Policing and Security Peer Advisory Group (PAG)** is formed under the auspices of the Sector Coordinating Councils (SCC) authorized under HSPD-7. The PAG brings together the expertise of 21 transit police chiefs and security directors from mass transit systems across the United States and acts as an effective communication

instrument and liaison group with TSA and other Federal governmental agencies. TSA supports the PAG by hosting monthly teleconferences, ensuring the PAG is kept apprised of significant matters of security or security policy. The PAG is chartered to meet, discuss, and confer at least annually with the TSA Administrator regarding matters of transit security and grant funding.

- **International Working Group on Land Transportation Security (IWGLTS)**

Expanding cooperation in surface transportation security around the world culminated in creating an international working group on land transportation security which primarily focuses on passenger rail and mass transit security. There are approximately 20 member states represented, and IWGLTS meets twice a year in a member country. IWGLTS members will submit smart practices in the mitigation area, vote on their acceptance or rejection, and compile and disseminate accepted practices. TSA is then able to share final work products with the U.S. transit industry.

Cybersecurity: Securing the transportation cyber environment requires effective collaboration among various security stakeholders and partners. While cybersecurity risks cannot be completely eliminated, government and private sector organizations can work together to mitigate cybersecurity risk through maintaining and enhancing continuous awareness, and promoting voluntary, collaborative, and sustainable community action. Critical cyber systems in the mode have been identified, and government partners and industry stakeholders continue to collaborate to identify vulnerabilities and develop tools to improve the mode's preparedness posture, by ensuring the management of cybersecurity risk through promoting outreach, awareness, and industry engagement.

Standards Development: TSA has continued engagement with the American Public Transportation Association (APTA) to develop a set of recommended public transportation standards to enhance security in transit systems. This effort, led by APTA's Security Standards Policy and Planning Committee, has also included security professionals from the industry, business partner representatives, and the Federal Government. The objective of this program is to develop, implement and maintain standards, to achieve performance efficiency in transit system design and operation. There were 15 Mass Transit and Passenger Rail standards completed in FY 2013 and a similar number is expected to be completed in FY 2014 and FY 2015.

Policy, Regulations, and Guidelines: TSA continues to develop intelligence-driven, operationally-sustainable, risk-based policies that reduce total cost of security for the mass transit industry. The policies are developed with trusted operator input and in cooperation with mass transit federal partners. The 9/11 Act required regulations be developed for training programs and security plans. TSA is developing outcome-based regulations to fulfill those requirements. Where guidelines may be more effective and efficient, TSA is developing documents to assist the mass transit industry raise their security level.

To further advance these efforts, working in close collaboration with the Transit Policing and Security PAG and with the Office of Strategy, Planning, Analysis & Risk in the Department of Homeland Security's Office of Policy, TSA Surface Division has developed a strategy to enhance the public's perception of the safety and security of MTPR transportation; to facilitate the free movement of people and goods throughout the transportation system; to assure that the privacy and civil liberties of MTPR passengers, employees and others who properly engage the transportation system are appropriately protected; and to eliminate or limit casualties in the event of a terrorist attack. TSA is developing

similar strategies across the other modes to help industry understand reporting significant security incidents with uniformity.

Infrastructure Protection: DHS/TSA MTPR has identified critical infrastructure assets of national concern through the Top Transit Asset List (TTAL). The TTAL consists of nationally critical infrastructure assets vital to the functionality and continuity of a major transit system so that their incapacitation or destruction would have a debilitating effect on security, national economic security, public health or safety, or any combination thereof. The TTAL specifically includes critical underwater tunnels, stations, and bridges. TSA MTPR manages the TTAL (including additions), coordinates structural blast assessments of TTAL assets (with Lawrence Livermore National Laboratory), and helps inform the Federal Emergency Management Agency (FEMA)/TSA Transit Security Grant Program (TSGP) on the remediation status of the TTAL and also in the review of TTAL-related TSGP project applications.

R&D Support (DHS Science and Technology (S&T) funded project): The Resilient Tunnel Project is being conducted for the DHS S&T Directorate to develop and transition technology for a rapidly deployable tunnel plug to seal underground tunnels in the event of emergency. The project is being performed by a multi-organizational team including Pacific Northwest National Laboratory, West Virginia University, and industrial partner ILC Dover, all with oversight from the transit industry. Other active stakeholders include potential technology end-user organizations. TSA helps coordinate the project with transit industry stakeholders based on industry interest and needs. The project is being conducted in phases including initial proof of principle, plug system design concept refinement, and system transition readiness phases. The team expects by FY 2015 there will be a full prototype developed and ready for installation

Assessments: TSA's Baseline Assessment for Security Enhancements (BASE) program is a security and risk assessment of mass transit and passenger rail systems nationally, performed by Surface Transportation Security Inspectors (TSI-Ss). The assessments are conducted on a voluntary basis and with emphasis on the 100 largest systems based on passenger volume, which collectively accounts for over 80 percent of all users of public transportation.

The process is built around 17 Security and Emergency Management Action Items developed in a joint effort between TSA, FTA and transit officials through the Mass Transit and Passenger Rail SCC. Assessment results enable TSA to establish a security profile and baseline posture for transit or passenger rail security programs, track improvements or diminutions from the baseline, and determine future program decisions and needs. They inform risk mitigation priority development and determine allocations of financial resource allocations, particularly the transit security grants. Since the program inception, over 120 mass transit and passenger rail agencies have undertaken the BASE assessment, which is conducted on a periodically recurring basis. Including reassessments, the total number of BASE assessments exceeds 270. Of these assessments, over 150 have been completed on the largest 55 systems while over 120 have been completed on smaller agencies.

TSA created a BASE advisory panel comprised of mass transit subject matter experts (SMEs), APTA, FTA and transit agencies to adjust the BASE tool by adding and/or modifying topics, and removing redundant or outdated questions. TSA requested the SCC to conduct outreach to transit systems for feedback on the BASE program, specifically as it relates to the 17 Security Action Items currently used as the foundation for the assessments. The panel used the feedback to help determine the modifications and adjustments that need to be made to the BASE. A smaller working group was developed to execute the advisory panel recommendations.

Information Sharing: TSA continues to assure preparedness through multi-faceted information sharing networks to disseminate timely, accurate intelligence and security advisories and alerts with MTPR sector stakeholders to ensure the management of risk through promoting outreach, awareness, and industry engagement.

- **Public Transit-Information Sharing Analysis Center (PT-ISAC)** - DHS/TSA provides funding to APTA as the designated lead to operate the Public Transit-Information Sharing Analysis Center (PT-ISAC). The partnership of TSA, APTA and FTA has been working collaboratively through the SCC/GCC to streamline the information-sharing environment within public transit and eliminate redundancy. Products disseminated by the PT-ISAC include the Security Awareness Messages (SAMs) and the Transit and Rail Intelligence Awareness Daily (TRIAD), which enhance the security of the domain by sharing threat and vulnerability information and preventive security measures.
 - **Transit and Rail Intelligence Awareness Daily (TRIAD)** - The SCC/GCC's "Security Information Sharing Working Group" and the Association of American Railroads subsequently adopted the "Transit and Rail Intelligence Awareness Daily (TRIAD)" as the daily information sharing analysis platform for Surface Transportation/Public Transportation Information Sharing Analysis Center (ST/PT-ISAC) security related notifications to be distributed throughout the modes. The TRIAD provides ISAC participants with a quick, easy-to-read synopsis in three fundamental areas – suspicious activities, terrorism and counterterrorism analysis.
 - **Security Awareness Messages (SAMs)** - SAMs include voluntary protective measures, such as unpredictable inspections, surveillance and increased checks, and other methods of visible deterrence activities. These messages are created and vetted by TSA and other government agencies, and then distributed to industry through the PT-ISAC communication mechanism in place. SAMs are also posted on the HSIN.
 - **HSIN Web-based Portal** - The Surface Transportation (ST) and Public Transit (PT) ISACs work collaboratively with and maintain access to the government's HSIN system. The ST & PT-ISAC library maintains sector specific, as well as general information on security, threat, standards, best practices, and countermeasures. The TSA intelligence on HSIN provides an effective and timely means with which to share information and collaborate with operating officials, law enforcement personnel, and security directors from all transportation modes. The expertise and experience of existing private/public transportation security sectors is leveraged to improve the resilience of the Nation's transportation infrastructure.

Freight Rail Activities: \$4.0 million

Infrastructure Criticality Tool: TSA has refined and enhanced the critical infrastructure risk assessment tool. This tool is designed to measure the criticality and vulnerability of freight rail bridges and tunnels in the United States and serves as the factual and analytical baseline from which to develop and propose security enhancements and mitigation strategies for critical railroad infrastructure.

Critical Infrastructure Assessments: Utilizing a standard methodology and in collaboration with the infrastructure owners, TSA conducts assessments of potentially critical bridges and tunnels. These

assessments inform the owners of identified vulnerabilities and recommendations for vulnerability mitigation. The assessments also provide a means to rank these bridges and tunnels in terms of overall relative risk. Twenty eight railroad infrastructures were assessed in FY 2013, and since the initiation of this program in 2009, a total of 286 critical railroad infrastructures have been assessed.

Toxic Inhalation Hazard (TIH) Transportation Risk Reduction: TSA, in cooperation with industry stakeholders, established the TIH risk reduction program to objectively measure the security risk associated with the rail transportation of TIH materials through High Threat Urban Areas (HTUA). The program's objectives are to reduce the dwell time of rail cars carrying TIH materials and implement positive security measures by rail carriers. An estimated risk reduction of 92 percent was achieved in FY 2013 when compared against FY 2009. TSA has worked with owners and offerers of railroad cars used in the transportation of TIH materials through various avenues to install electronic tracking devices on rail cars transporting TIH materials. This technology provides TSA with domain awareness of TIH shipments and optimizes the time spent on TIH risk surveys, as the data acquired from the tracking devices provides more detailed information on the location and movement of TIH rail cars than was previously available.

Rail Transportation Security Compliance: On November 26, 2008, TSA issued a final rule (49 CFR Part 1580) on rail transportation security covering freight railroad carriers, shippers of rail security sensitive materials (RSSM), and receivers of RSSM located within an HTUA. The Rail Transportation Security Rule establishes procedures for the secure transfer of custody between railroads and at points of origin and delivery in HTUAs. The rule also requires the appointment of Rail Security Coordinators, the reporting of location and shipping information of RSSM rail cars, and the reporting of significant security concerns to TSA. TSA's surface inspector workforce monitors compliance with the provisions of the regulation. The Freight Rail program office supports the inspection force with training and enforcement guidance.

Railroad Self Assessment of Vulnerability (RSAV) tool: In accordance with Section 1512 of the 9/11 Act, TSA developed the RSAV as a mechanism that railroads can use to evaluate the criticality and vulnerability of an identified set of railroad assets. In FY 2014, the RSAV will be made available to railroads for their use in conducting vulnerability assessments and developing security plans.

Tank Car Vulnerability: To better understand and quantify the vulnerability of rail tank cars carrying TIH materials, TSA, DHS S&T Transportation Security Lab and the Federal Bureau of Investigation funded supplemental testing of the potential impact of a .50-caliber armor piercing bullet; an explosively formed projectile; an improvised explosive device (IED); a vehicle borne IED; and a pipe bomb on the TIH material rail tank car. The testing, focused on the tank jacket and tank shell, and was conducted by the Naval Surface Warfare Center Carderock Division at the U.S. Army Aberdeen Proving Ground. A private sector company donated two TIH rail tank cars for use in this testing. TSA is currently building upon the lessons learned from the first tests through an Interagency Agreement with the U.S. Army Aberdeen Test Center to test and evaluate the effects of ballistic and IED threats to the tank car head shields. In FY 2014, TSA will address a remaining gap by studying the vulnerability of the protective housing and the product valves inside the housing at the top of railcar.

RSSM car location and predictive tool: The Surface Transportation Automated Response Service (STARS) was developed to provide timely updates on all RSSM shipments, including TIH. The RSSM railcars are depicted at their most recent reported location in order to assist inspection and survey scheduling. STARS operates 24 hours a day, 7 days a week, 365 days a year ingesting geo location updates which are transmitted by GPS-enabled TIH railcars with a one-to-six hour frequency. The GPS messages are assimilated with Car Location Messages from RSSM railcars and mapped to

enable a visual depiction of railcar locations. STARS data layers include facility location identification and enables inspectors to accurately predict the optimum time and day to schedule survey and inspections. By including a time based 30 day rolling facility matrix, STARS is able to document by day and hour the number of TIH railcars at over 250 railroad locations within HTUAs and is capable of being expanded to include additional locations. Over 450 TSA employees and 48 Office of Security Operations Compliance offices are authorized for access. TSA plans to continue to operationalize this concept in order to improve the efficiency of TSA's inspection force and enhance its ability to assess risk in the rail transportation of security-sensitive materials.

Pipeline Activities: \$3.7 million

Critical Facility Security Review (CFSR): TSA intends to continue its assessment program for critical pipeline facilities. Utilizing the criteria contained in the TSA Pipeline Security Guidelines, pipeline operators have updated their listings of facilities essential to system operations. Under the CFSR Program, TSA evaluates the physical security of 90 – 100 of these pipeline facilities annually.

Corporate Security Review (CSR): On an annual basis, TSA conducts 12 CSRs of natural gas and hazardous liquid transmission and natural gas distribution pipeline systems within the United States. This allows the program to revisit a company every four years to assess the current status of the company's security efforts and gauge progress from previous reviews.

Stakeholder Collaboration: TSA has established a highly effective working relationship with its industry and government partners through the Pipeline Sector and Government Coordinating Councils. TSA is also an active participant in the Energy Sector Oil and Natural Gas Coordinating Council. To provide pipeline industry personnel with additional insight into current activities and policies, TSA conducts monthly stakeholder conference calls and co-sponsors, with Natural Resources Canada, an annual International Pipeline Security Forum. TSA has developed three security related CD/DVD training programs for use by pipeline operators: Pipeline Security Awareness; Pipelines: Countering IEDs; and Protecting Pipeline Infrastructure: The Law Enforcement Role.

Cybersecurity: In coordination with the Department of Homeland Security Office of Cybersecurity and Communication and pipeline industry personnel, TSA has facilitated the Cybersecurity Assessment and Risk Management Approach (CARMA) initiative. This program aims to assist the pipeline industry in developing a prioritized list of risks to business functions from cyber-attacks and a prioritized list of activities to address those risks. The initiative is intended to assure alignment of national policy and industry-identified successes and concerns. TSA will continue to coordinate with Federal and industry partners to identify and mitigate risks to industrial control systems.

TSA has also directly supported a number of targeted cybersecurity outreach campaigns. TSA has worked with members of the law enforcement, homeland security and intelligence communities to shape and validate the analysis of cyber-specific threat information. In addition, TSA has supported the timely dissemination of relevant classified and unclassified threat information to pipeline asset operators. TSA will continue to participate with other Federal agencies and pipeline system operators in this security effort.

Exercises: I-STEP conducts exercises relevant to pipeline operators' challenges and risks in order to promote security awareness and encourage collaboration with security partners. The exercises conducted with pipeline operators have been well received and have proven to be valuable to the industry. Upon completion of each exercise, TSA provides the participating pipeline company with an after-action-report that identifies strengths and areas for improvement. To enhance the preparedness of

pipeline companies, TSA has a goal of conducting at least two I-STEP exercises with operator security personnel annually in FY 2014 and FY 2015.

Highway and Motor Carrier Activities: \$7.5 million

Highway Infrastructure Assessments: TSA developed a comprehensive significant infrastructure (bridges and tunnels) vulnerability assessment program to identify and rank significant assets, identify vulnerabilities, and quantify costs for hardening structures and replacing each structure. In FY 2015, TSA plans to complete modifications required on aggregate reports on both bridge and tunnel assessments. The detailed structural tunnel methodology and assessment tool will be finalized in FY 2015.

Commercial Vehicle Rental Assessment Initiative: TSA Highway Motor Carrier (HMC) has proposed a proof of concept initiative to determine data and system requirements for potential development of a program to vet commercial vehicle rental transactions through the Terrorist Watch List. The risk reduction value of this program will affect 9 of the 23 highway security scenarios identified in the Transportation Sector Security Risk Assessment (TSSRA) 2.0 and could reduce the risk to these scenarios by up to 20 percent. This initiative proposes the collection of transaction records for recently completed rentals and subsequent TSA vetting of the renter against watch lists. This will establish data availability as well as optimum types of data for maximum vetting use. TSA is working with the industry's trade association, the Truck Leasing and Rental Association and the TSA's Transportation Worker Identification Credential Program. A three to six-month records analysis and summary period is anticipated.

Over-the-Road-Bus Baggage Screening Equipment Loan Initiative: This initiative is a continuation of a pilot completed with Greyhound in 2010 - 2011 and consists of TSA offering through a loan program older but serviceable baggage and personnel screening equipment to the motorcoach industry for use in specific terminals. With the potential of screening 90 million of the estimated 750 million passengers per year riding motorcoaches and reaching 3 of 6 possible motorcoach TSSRA scenarios, this could reduce risk by approximately 12.5 percent at minimal costs. Additionally, key components of this public and private sector collaborative initiative include processes and methodologies needed to accurately measure the total amount of risk reduction gained when engaging the 12 Risk Mitigating Activities comprising the cornerstone of the TSA Administrator's Risk Based Security initiative.

Passenger Vehicle Active Shooter Standards Establishment and Training Initiative: Working with leaders of the commercial bus and motorcoach industry, TSA proposes to participate in the development of a training tool to address "active shooters" within the highway passenger carrier industry in FY 2015. While training materials addressing the threat exist for environments such as schools and offices, none have been developed to propose solutions in the confined environment of a motorcoach or school bus. TSA will work with national industry organizations and law enforcement personnel with the expectation that a training curriculum and video will be produced.

Highway BASE Assessment Program: Highway BASE is a comprehensive assessment of highway and motor carrier operators. The BASE assessment is comprised of security and response assessment areas. The program is focusing on operators identified by risk-based data from private and public sources. The results of the assessment program will be used for annual updates to modally focused, risk-based, security action item lists; resource allocation in the Highway and Motor Carrier mode; continued risk-focused deployment of TSA's VIPR programs in the highway mode; and maintaining updated tools for use by industry in the modal tool boxes.

Stakeholder Collaboration: TSA coordinates closely with industry stakeholders through the Critical Infrastructure Partnership Advisory Council meetings that are held quarterly as well as with teleconferences held with each of the four highway modal industry groups of trucking, motor coach, school bus, and infrastructure. Additional areas of stakeholder collaboration include the modal training program development, the planning and execution of modally-focused security exercise programs through TSA's I-STEP office, and TSA's VIPR team operations deployment.

Grant Oversight and Management Activities:

Grants Programs: TSA provides subject matter expertise and assists FEMA in the development of grant guidance and review of grants related to surface transportation security. The 2015 President's Budget proposes to reform the grant structure into a reformed National Preparedness Grant Program (NPGP), which is designed to develop, sustain, and leverage core capabilities across the country in support of national preparedness. NPGP will prioritize the development and sustainment of core capabilities as outlined in the National Preparedness Goal. Particular emphasis will be placed on building and sustaining capabilities that address high consequence events that pose the greatest risk to the security and resilience of the United States and can be utilized to address multiple threats and hazards. TSA will provide subject matter expertise for passenger rail and mass transit security programs in support of NPGP. TSA activities in support of NPGP include: assisting FEMA in the development of grant funding priorities and allocation methodologies; issuing guidance; and evaluating and recommending individual projects in the areas of intercity bus, freight rail, mass transit, ferry, and passenger rail systems.

First Observer™ Program: The First Observer™ Program is the premier anti-terrorism domain awareness training program for surface transportation security professionals to identify, observe, assess, and report potential terrorist or suspicious activities. Training is free, and is accessible 24/7 through a web-based training portal. TSA works with internal experts and industry to identify emerging security training needs and develop new training modules; examine if existing training should be refreshed; and ensures compliance with the 9/11 Act Security Training Rule.

SURFACE TRANSPORTATION INITIATIVE MATRIX

	Threat, Vulnerability, Consequence	Baseline Standards	Assessments	Close Gaps
Freight Rail	<p>For the freight rail mode, the overarching strategic security goal is to reduce the risk associated with the transportation of potentially dangerous cargoes by rail, and to increase the resiliency of the railroad network. The primary strategic objectives to achieve this goal are: 1) reduce the vulnerability of cargo; 2) reduce the vulnerability of the network; and 3) reduce the consequences of attack.</p> <p>TSA will through onsite, fact based, analytical assessments, identify those assets that are critical to the resiliency of the national freight rail network and then collaboratively develop with the industry a strategy to measurably increase the resiliency of the network.</p>	<p>TSA achieved its annual goal of reducing the remaining risk associated with Toxic Inhalation Hazard dwell time in HTUAs an additional 5% by the end of FY 2013 when compared to the revised baseline year of FY 2009. Compared to the base year, a total reduction of 92% has been realized at the end of FY 2013.</p>	<p>Critical Infrastructure: Since the initiation of this program, a total of 286 railroad bridges and tunnels have been assessed. In FY 2015, TSA plans to re-evaluate certain bridges and tunnels to benchmark the effectiveness vulnerability mitigation measures</p> <p>Operational Assessments: In FY 2015, TSA plans to continue the assessment of high population, high traffic volume rail corridors.</p>	<p>In FY 2015, working with the industry, TSA will evaluate all currently-in-place measures, both procedural and physical, to ensure that baseline standards and risk-reduction metrics continue to be valid. For those standards or metrics in need of revision, TSA will work with the industry to implement risk based, cost effective measures.</p> <p>TSA also plans to develop and implement a process to facilitate the electronic reporting of significant security concerns by regulated parties; standardize report criteria; and enhance report analysis capability.</p>
Mass Transit	<p>TSA's Mass Transit & Passenger Rail strategy consists of the following three objectives: 1) increase visible deterrence through the deployment of canine teams, passenger screening teams and anti-terrorism teams; 2) increase infrastructure resiliency by protecting the most critical tunnels, stations and bridges; 3) fully engage the public and transit operators in the counterterrorism mission.</p> <p>These objectives are achieved through the BASE program; identification of critical assets; and development of communication architecture to allow for efficient and effective communication to our security partners.</p>	<p>The BASE program is a security assessment of mass transit and passenger rail systems nationally. The assessments are conducted on a voluntary basis and with emphasis on the 100 largest systems based on passenger volume. The 17 Security and Emergency Management Action Items were developed by TSA, FTA and transit officials engaged through the Mass Transit SCC. Assessment results help establish a baseline which identifies security priorities for transit and passenger rail security programs.</p> <p>Cyber security was incorporated into the existing BASE program as an action item for FY13.</p>	<p>In FY2013, 32 security assessments were completed. In FY 2014, 26 security assessments are projected to be completed, and in FY 2015, 20 assessments are planned.</p> <p>In coordination with DHS and industry, TSA identified the top 67 mass transit and passenger rail assets. These assets were selected using criteria such as asset type, passenger flow, and iconic value. Understanding what physical security measures are in place at these assets and developing plans to close security gaps is a major priority going forward.</p>	<p>Augment security in mass transit and passenger rail through risk-based VIPR operations. In FY 2013, over 10,000 VIPR operations occurred in surface modes of transportation, 90% in mass transit.</p> <p>Assure preparedness through multi-faceted information sharing networks to disseminate timely, accurate intelligence and security advisories and alerts while also conducting multiple regional I-STEP exercises.</p>
Highway	<p>TSA is completing assessments on the trucking (non-HAZMAT), motor coach, and school bus modes through the use of the BASE Assessment Program and the analysis of the aggregate results of these assessments.</p> <p>TSA is also completing structural security assessments of up to 60 significant highway infrastructures with full analysis and aggregate reporting for specific bridge and tunnel types.</p>	<p>TSA is focusing on continued development and maintenance of Baseline Standards in all four Highway Motor Carrier (HMC) sub-areas through the HMC BASE Program.</p> <p>TSA has developed Security Action Items (SAI) that are intended to provide affected highway industries with baseline security foundations that can act as guidance and practical security risk reduction activities.</p>	<p>Additionally, since 2010, TSA HMC has completed vulnerability assessments on 48 critical infrastructures (highway bridges and tunnels) including risk-based component level analysis of security mitigation strategies. Five to 10 additional structures are planned to be completed in FY-2014/15. The infrastructure assessments also capture cost data to replace the existing structure and costs to implement the recommended security mitigation strategies.</p>	<p>TSA HMC is currently encouraging stakeholders to implement Security Action Items (SAIs). TSA is also encouraging stakeholders to have front-line employees complete voluntary security training either internally or using the TSA supplied First Observer® training program.</p> <p>TSA continues to coordinate highway motorcarrier risk-based VIPR operations and I-STEP security exercises with industry stakeholders and, as well as distribute modal counterterrorism guides and other HMC security materials.</p>

SURFACE TRANSPORTATION INITIATIVE MATRIX

	Threat, Vulnerability, Consequence	Baseline Standards	Assessments	Close Gaps
Pipeline	<p>TSA annually identifies and ranks the nation's highest risk pipeline systems based on analysis of total equivalent energy transported, system vulnerability and threat. TSA's risk reduction programs are guided by this ranking.</p>	<p>TSA issued the Pipeline Security Guidelines, which are used as the basis for ongoing Corporate Security Reviews (CSRs) and Critical Facility Security Reviews (CFSRs).</p>	<p>TSA has conducted a total of 144 pipeline CSRs. Seven CSRs were accomplished in FY 2013. TSA will conduct 12 CSRs annually in FY 2014 and FY 2015.</p> <p>In FY 2013 TSA completed 40 critical facility reviews. In FY 2015 90 - 100 facility reviews will be conducted.</p> <p>TSA conducts CSRs and CFSRs with pipeline operators.</p>	<p>Conducted the Cybersecurity Assessment and Risk Management Approach (CARMA) program within the pipeline industry. This effort provides a roadmap for sector cyber risk management activities and complements asset and facility-based security assessments by providing strategic cyber risk context to vulnerability and site assessments. TSA will continue to coordinate with Federal and industry partners to identify and mitigate risks to industrial control systems.</p> <p>Conduct the ninth annual International Pipeline Security Forum in conjunction with Canadian government counterparts to raise industry security awareness and discuss best practices.</p> <p>The goal for both FY 2015 and FY 2016 is to conduct two pipeline I-STEP exercises per year.</p>
Cross Modal	<p>All port facilities and vessel operators have conducted self-assessments per USCG regulatory requirements. USCG has also conducted risk assessments of all ports, including those with passenger vessel operations.</p> <p>USCG's database, Maritime Security Risk Assessment Model, has identified high-risk ferry systems. TSA has entered into a sharing agreement with USCG for risk assessment information.</p> <p>TSA is seeking to use exercise results to benchmark assessments and supplement data for risk prioritization to inform resource allocation, Security Grants, standards development and DHS R&D funds.</p>	<p>OSPIE provides federal leadership as the co-chair of the Transportation Systems SSA to protect critical transportation infrastructure and enhance system resilience as directed by DHS and the President.</p> <p>OSPIE prepares the Transportation Systems Sector Specific Plan implementing risk management and R&D processes and programs for addressing risk and improving resilience across the transportation sector.</p> <p>OSPIE resources and maintains processes for engagement of other government entities and industry owners and operators in sector-wide protection and resilience policy-making, planning, programming, and performance measures as required by legislation and executive directives.</p> <p>OSPIE produces, in collaboration with stakeholders, the Sector Annual Report which incorporates multiple reports to congress describing progress reducing risks to the nation's transportation systems and services including those required by the Aviation Transportation Security Act, the Intelligence Reform and Terrorism Prevention Act, the 9/11 Act, and the critical infrastructure presidential directive.</p> <p>The Cross Modal Division provides economic analysis for regulatory standards development in all modes of transportation. Standards for training, security planning and vulnerability assessments for surface modes are currently being developed.</p> <p>Maritime standards are developed by USCG. OSPIE contributes to these standards with resources and expertise. USCG security regulations require security assessments, designated security officers, and mandated screening of passenger vessels.</p>	<p>IAW 9/11 Act, the Intermodal Security Training and Exercise Program (I-STEP) provides exercise processes and technologies for application in various modes of transportation.</p>	<p>Continue to disseminate security training and informational materials:</p> <ul style="list-style-type: none"> - Deliver 22,000 Intermodal training DVDs through FY 2014. <p>Conduct 15-20 I-STEP exercises in FY14 with at least 130 exercises completed through FY14.</p> <p>Leverage I-STEP to identify risk priorities, improvement opportunities and desired security outcomes; test if operators are meeting goals; and drive improvements in a coordinated series of stakeholder engagement activities.</p>

**Department of Homeland Security
Transportation Security Administration
Surface Transportation Security:
Surface Inspectors and VIPR
Program Performance Justification**
(Dollars in Thousands)

PPA: Surface Inspectors and VIPR

	Perm. Pos	FTE	Amount
2013 Revised Enacted	649	508	86,364
2014 Enacted	544	521	73,356
2015 Adjustments-to-Base	272	260	35,799
2015 Current Services	816	781	109,155
2015 Program Change	(48)	(48)	(10,893)
2015 Total Request	768	733	98,262
Total Change 2014 to 2015	224	212	24,906

TSA requests 768 positions, 733 FTE, and \$98.3 million in FY 2015 for the Surface Inspectors and VIPR PPA:

Adjustments-to-Base:

- Increase from the transfer of 269 FTP, 257 FTE, and \$41.662 million from the Aviation Security and Federal Air Marshal Service (FAMS) appropriations to consolidate VIPR funding (194 FTP, 185 FTE, and \$26.964 million from the Aviation Regulation PPA and 75 FTP, 72 FTE, and \$14.698 million from the FAMS appropriation)
- Decrease from the transfer of \$6.698 million to the Aviation Security appropriation (Aviation Regulation PPA) to consolidate Canine Program funding
- Decrease of \$600 thousand for anticipated savings from reductions to non-mission critical travel and training, contract efficiencies, and/or supplies
- Increase of \$532 thousand for the retirement contribution
- Increase of \$160 thousand to annualize the 2014 pay raise
- Increase of \$743 thousand for the 2015 pay raise
- Increase of 3 FTP/3FTE to correct current FTP/FTE in PPA

Program Changes:

- Decrease of 48 FTP, 48 FTE, and \$10.893 million from VIPR efficiencies

CURRENT SERVICES PROGRAM DESCRIPTION:

The Surface Transportation Security Inspector and VIPR PPA (formerly, Surface Transportation Security Inspectors and Canines) provides resources for the Surface Compliance program and Surface VIPR program. TSA proposes to rename the PPA to reflect the move of canine resources to the Aviation Security appropriation and the consolidation of all VIPR resources to the Surface Transportation Security appropriation.

The following table provides the components and associated funding levels of this PPA.

(dollars in millions)

	FY 2014 Enacted	FY 2015 Request
Surface Security Inspectors	\$33.0	\$37.7
Visible Intermodal Prevention and Response (VIPR) ¹	\$33.7	\$60.6
National Canine Program (NCP) ²	\$6.7	\$0
Total	\$73.4	\$98.3

1. Increase reflects the consolidation of all VIPR funding into the Surface Transportation Security Appropriation, Security Inspectors and VIPR PPA.
2. Decrease reflects the consolidation of all canine assets under the Aviation Regulation and Other Enforcement PPA which is in the Aviation Security Appropriation.

Surface Security Inspectors: \$37.7 million

Surface inspectors are a unique and critically important Federal inspection and security assessment program with responsibilities in United States surface transportation security. With emphasis on freight railroads; mass transit; passenger rail; highway motor carriers; and to a limited extent, pipelines; the SCB has set out to enhance security preparedness in an industry that is the largest transporter of passengers in the country.

The following chart provides historical and current information on the total number of Surface, Aviation, and Cargo Transportation Security Inspectors (TSIs) positions across TSA. Not all of these positions are currently filled. This chart reflects the proposed consolidation of all canine resources under the Aviation Regulation PPA within the Aviation Security appropriation and the consolidation of all VIPR resources under the Surface Inspectors and VIPR PPA within the Surface Transportation Security appropriation.

	FY 2013	FY 2014	FY 2015
Aviation Regulation	984	966	1,045
Domestic Inspectors	654	654	672 ¹
Domestic Canine Inspectors ²	178	190	310
Domestic VIPR Inspectors	75	45 ¹	0 ¹
International Inspectors ³	62	62	48
International Repair Station Inspectors	15	15	15

Air Cargo	681	681	577
Domestic Inspectors	500	500	496 ⁴
Domestic Canine Inspectors	120	120	0 ²
International Inspectors	61	61	81 ^{3,4}
Surface	379	300	319
Domestic Inspectors	225	225	272 ⁵
VIPR Inspectors	154	75 ⁵	0 ⁵
Multi-Modal VIPR Inspectors	0	0	47 ^{1,5,6}
Total Inspectors	2,044	1,947	1,941

1. Based on a reassessment of the Aviation VIPR program, it was determined the program would optimally operate by having 26 dedicated VIPR Inspectors (one per VIPR location) plus one inspector at the Joint Coordination Center (JCC) compared to the prior allocation of resources which used shared inspector resources to conduct both VIPR operations and compliance activities. Out of the previous 45 Aviation VIPR inspector allocation, 27 will move to multi-modal VIPR inspectors in the Surface Transportation Security Appropriation and 18 will be realigned to domestic aviation inspection activities to more properly reflect the work they are conducting.

2. Includes an additional 12 passenger screening canine inspector positions in both the FY 2013 and FY 2014 enacted appropriations. It also reflects the consolidation of all Canine Teams into the Aviation Regulation and Other Enforcement PPA.

3. Aviation Regulation international inspectors in FY 2013 and FY 2014 reduced to 62, from 64 as noted in the FY 2014 Congressional Justification, due to a technical correction. In FY 2015, 14 positions shifted from Aviation Regulation to Air Cargo, due to the consolidation of the inspector workforce.

4. Reflects 4 Air Cargo domestic inspector positions and 2 non-inspector positions transferring to 6 Air Cargo international inspector positions to manage the international operations of the Air Cargo Advance Screening Pilot.

5. Based on a reassessment of the Surface VIPR program, it was determined the program would optimally operate by having 26 dedicated VIPR Inspectors (one per VIPR location) plus two inspectors at the JCC compared to the prior allocation of resources which used shared inspector resources to conduct both VIPR operations and compliance activities. Out of the previous 75 Surface VIPR inspector allocation, 28 will move to multi-modal VIPR inspectors in the Surface Transportation Security Appropriation and 47 will be realigned to domestic surface inspection activities to more properly reflect the work they are conducting.

6. Reflects the consolidation of VIPR into the Surface Transportation Security Appropriation as well as the reduction of 8 inspectors.

Transportation Security Inspectors - Surface (TSI-Ss) are deployed through a risk-based approach and provide coverage of key passenger rail and mass transit rail facilities in their regions, as well as 61 High Threat Urban Areas (HTUAs), as defined by DHS. The location and number of inspectors is also determined by transit ridership, proximity to Toxic Inhalation Hazard (TIH) shipment locations (freight rail), critical infrastructure ratings, and HTUA ranking. TSI-S personnel conduct regulatory inspections; security assessments; provide stakeholder liaison functions; situational awareness of security conditions; and during surface transportation incidents, convey valuable first-hand information to Federal Security Directors (FSDs); security, policy, and intelligence offices; and TSA leadership. To ensure inspectors operate safely and appropriately in the surface transportation environment, training for TSIs-Surface is provided at a specialized facility in Pueblo, CO, known as the Surface

Transportation Security Training Center. Training is key to ensuring that TSA has a technically proficient and agile workforce. All courses include both classroom instruction and on-site practical application exercises.

The legislation underlying 49 CFR parts 1520 and 1580, provides TSA's TSI-Ss with regulatory authority to ensure a secure chain of custody of security-sensitive material rail cars occurs between rail carriers and shippers/receivers at points of origin, delivery, and interchange. TSA's TSI-Ss observe the handling and placement of security-sensitive material rail cars and verify the paperwork at the covered facilities to ensure compliance, including reporting requirements for incidents, potential threats, and significant security concerns, and location tracking requirements. It also requires the designation of a Rail Security Coordinator, and an alternate, by freight and passenger railroad carriers, rail transit systems, and certain hazardous materials facilities.

Responsibilities of the TSI-Ss include:

- Conducting regulatory inspections to ensure compliance with surface rules and regulations;
- Conducting threat and vulnerability inspections, reviews, and assessments that are used to determine the capability of a potentially targeted transportation system/asset to reduce the risk from a specified threat;
- Conducting Risk Reduction Survey assessments for railcars carrying TIH materials and shippers;
- Serving as panel members on the Transportation Security Grant Program (TSGP) to review project proposals, assess grant applications, and assist in developing a process for awarding grants;
- Responding to surface transportation security incidents (i.e., train derailments, possible improvised explosive devices, major truck accidents, etc.) to gather real-time, on-scene information which are provided to FSDs and TSA senior leadership;
- Staffing transit agency and freight rail operations centers in times of increased threat, heightened alert, or during a catastrophic event; and,
- Dedicating personnel to TSA VIPR teams to assist with planning.

Surface Security Inspectors conduct various types of threat and vulnerability assessments, inspections, and reviews, which include:

Freight Rail Corridor Assessments (FRCAs): TSA conducts FRCAs, which focus on assessing the vulnerabilities of high-population areas where TIH materials are moved by rail in significant quantities. The FRCAs provide site-specific mitigation strategies and lessons learned, and support the development of Security Action Items (SAIs). On-site assessments consist of a detailed examination of the railroad(s) operations and procedures within the HTUA and take approximately four to six weeks to complete, depending on the HTUA and complexity of the railroad operations within the corridor.

Station Criticality Assessments (SCA) also known as Station Profiles: TSI-Ss conduct SCAs, which are in-depth assessments of critical infrastructure facilities and transit stations. SCAs gained importance after the terrorist attacks in the mass transit mode in Mumbai, Madrid, London, and Moscow. These assessments which mitigate that type of threat provide detailed information on a

variety of station-related intelligence, such as the locations of exits, telephones, Closed Circuit Television, electrical power, station managers, etc. This information has been extremely useful in VIPR planning, and is also relevant for first responders, intelligence planners, and security personnel. The assessments for a majority of stations across the Nation have been completed and are continually updated as security enhancements are added to stations.

Baseline Assessment for Security Enhancement (BASE) Reviews: BASE reviews are comprehensive mass transit and highway motor carrier assessments that require a significant amount of time and stakeholder coordination. Since these are voluntary on the part of the stakeholder, assessments must be coordinated with the stakeholder's availability and schedule. TSA continues to focus reviews on high-risk transit agencies that have a 60,000 average weekday ridership or identified for participation. Each assessed mass transit entity receives a BASE Resource Kit which contains information and web-links to assist in mitigating identified vulnerabilities or security concerns. TSI-S personnel conduct follow-up visits to address the performance weaknesses identified in the assessment and use the Performance Improvement Action Plan tool to monitor transit agency efforts to remove security vulnerabilities. TSI-S personnel evaluate and prioritize these improvement needed to make public transportation systems, facilities, and passengers more secure. TSI-S personnel work closely with transit agencies to offer additional tools and TSA programs to help bolster the low scoring sections found in the BASE.

Mass Transit System Criticality Tool: This is a tool designed to measure the criticality of transit assets in relation to a number of predetermined factors. TSI-S personnel work closely with transit agencies to identify key system assets and obtain asset consequence and vulnerabilities details.

Mass Transit System Risk Assessments (MTSRA): Assessments scheduled at the program office level and coordinated through local TSI-S field offices require close supervision and program office oversight by SMEs. These Risk Assessments, conducted by TSI-S and Surface Regional Security Inspector (RSI-S) personnel are voluntary and required transit agency cooperation. The MTSRA tool was developed in response to the 9/11 Act, Section 1405.A.3.A (Security Assessments and Plans), and evaluates 10 specific assets within a mass transit system: passenger stations, tunnels, bridges, power stations, signals, track, facilities, yards, communication facilities, and vehicles. The tool includes a risk score based on threat (T), vulnerability (V), and consequence (C), with the vulnerability score divided among 18 different asset categories and contains over 1,500 vulnerability questions per category. Agency participants receive an executive summary report which outlines their T/V/C scores and will be used to meet the requirements of the upcoming Notice of Proposed Rule-Makings. The report also provides a prioritized list of security vulnerabilities to assist in decision-making.

Surface Compliance Analysis Network (SCAN): Developed in mid-2013, SCAN monitors and analyses surface security incidents to detect trends or links that indicate a potential threat – filling the “security” information gap between law enforcement (criminal) and intelligence agencies. TSA created the SCAN in response to a need to enhance the possible detection of an impending threat towards surface transportation modes within the U.S. Transportation industry. SCAN is designed to analyze surface transportation security-related information, reported to the Freedom Center under 49CFR1580.105/203 to detect potential hostile trends and/or linkages within reported surface transportation security incidents and, based on that analysis, determine the potential for a surface transportation related security event. The SCAN program is fashioned as a counterintelligence type

operation; targeting the intelligence gathering phase of an attack cycle, zeroing in on those activities that provide an adversary the information it needs to conduct a successful attack. SCAN analyzes and synchronizes information from multiple sources and disseminates the analysis of potential trends to those industry partners who are mutually affected by the trend. SCAN also cycles information relating to security incidents to TSA's Office of Intelligence as well as field-deployed Transportation Security Inspectors, enabling those Inspectors to conduct additional information collection activities and record such incidents in the Performance and Results Information System database.

Risk Mitigation Activities in Surface Transportation (RMAST): Developed in 2012, the RMAST program consists of a national strategy for performing non-law enforcement, high visibility activities and performing risk mitigation on a random and unpredictable basis. The RMAST program is risk-based, intelligence driven and includes processes and procedures to mitigate current threats and vulnerabilities identified through the various assessment programs.

The RMAST program improves overall security on the Nation's highest risk transportation venues and infrastructures and reduces the need for stakeholders to stretch their limited resources for hardening security at some of their most critical and high risk locations. TSA's RMAST program offers additional "eyes and ears" to identify the most serious vulnerabilities and to ensure that TSI resources are deployed to the most critical and high risk venues. This program strengthens TSA's partnership and commitment to surface transportation stakeholders.

Compliance/Regulatory Inspections: In accordance with 49 CFR 1580-Rail Transportation Security, TSI-Ss conduct compliance inspections throughout the freight rail and mass transit domain.

Risk Reduction Surveys: Previously, TSA, in conjunction with the private sector, had developed a list of 24 Security Action Items (SAIs) and three Supplemental Security Action Items (SSAIs) which identified best practices that freight railroads and their employees should implement to reduce the risk associated with the transportation of TIH materials by rail. These assessments led to the development of a TIH Risk Reduction Project. Implemented in 2007, and extended through 2015, the project focuses on objectively measuring the risk reduction associated with the rail transportation of TIH materials by rail, through 46 HTUAs.

Visible Intermodal Prevention and Response (VIPR): \$60.6 million

Historically, the VIPR Program has received funding in three appropriations: the Federal Air Marshals (FAMS), Aviation Security, and Surface Transportation Security. This request realigns funding from the Aviation Security and FAMS appropriations into TSA's Surface Transportation Security appropriation. The consolidation of funding into one appropriation will facilitate analysis and reporting, and will result in more efficient management and assignment of our VIPR capability across all modes of transportation. The objective of VIPR deployments in all transportation modes is to ensure readiness to augment stakeholder capabilities in detecting and deterring potential terrorist activity, by engaging in local transportation security operations and special requirements. To achieve this, TSA utilizes random deployments that are unpredictably executed in timing, location, and activity type. VIPR operations teams may include TSIs, Transportation Security Officers, Federal Air Marshals, Behavior Detection Officers, Transportation Security Specialists-Explosives, Explosives Detection Canine teams, and Federal, State and local law enforcement officers. Uniformed VIPR team

members provide a visible law enforcement and transportation security presence that support efforts to prevent an adversary from breaching security activities. The total number of VIPR deployments across all modes increased to approximately 275 per week in FY 2013 from 180 in FY 2012. In FY 2014, TSA anticipates sustaining the current operational tempo. In response to the shooting at Los Angeles International Airport in November, 2013, the proportion of operations conducted in aviation locations was increased to approximately 50 percent of all operations. This shift reflects the flexibility of TSA to rapidly redirect and deploy VIPR capabilities in response to changes in the threat profile. All teams are now characterized as multi-modal and can be deployed in aviation or surface transportation venues. In FY 2015, TSA proposes to reduce the number of VIPR teams from 37 to 33. This program efficiency should have a minimal impact on program effectiveness.

	Aviation Appropriation Multi-Modal Teams	Surface Appropriation Teams	Aviation Operations	Surface Operations	Total Operations
FY 2013 Actuals	22	15	5,117	10,143	15,260
FY 2014 Planned	22	15	7,200	7,200	14,400
FY 2015 Planned	0	33 (multi-modal)	6,850	6,850	13,700

*Above table reflect the change in VIPR operations and reflects a 50/50 split in the aviation and surface mode. Actual operational tempo in FY 2014 and FY 2015 is subject to adjustments based on intelligence or special requirements.

For reference, the following chart shows the historical FAMS PPAs for FY 2013 – FY 2015:

	FY 2013 Revised Enacted	FY 2014 Base	FY 2015 Request¹
Management & Administration	\$769.8	\$708.0	\$709.4
Travel & Training	104.8	110.6	105.5
Total	\$874.6	\$818.6	\$814.9

¹FY 2015 breakout provided for display purposes only and includes \$800.2M requested in Aviation Security and \$14.7M requested in Surface Transportation Security

National Canine Program (NCP): \$0

To increase operational efficiency and effectiveness, in FY 2015 TSA is proposing to consolidate all canine assets under the Aviation Regulation and Other Enforcement PPA in the Aviation Security appropriation and deploy canine teams as multi-modal explosives detection canine teams. This will allow TSA maximum flexibility to utilize the teams in any transportation environment as needed in response to changes in intelligence or capability requirements.

IV. Program Justification Changes

**Department of Homeland Security
Transportation Security Administration
Surface Transportation Security:
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 1: Reduce Visible Intermodal Prevention and Response (VIPR)
PPA: Surface Inspectors and VIPR
Program Decrease: Positions (48), FTE (48), Dollars \$(10,893)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							519	493	71,482
Program Decrease							(48)	(48)	(10,893)
Total Request	768	734	89,726	582	556	77,204	471	445	60,589

Description of Item:

TSA requests a decrease of \$10.9 million to the VIPR program. This reduction is proposed to be taken in the Surface Inspectors and VIPR PPA as it coincides with the request to consolidate all VIPR funding into the Surface Transportation Security Appropriation in FY 2015. The FY 2015 funding level represents a reduction of four (4) teams, 48 FTP, 48 FTE, and program general expenses.

Justification:

TSA received funding for Transportation Security VIPR teams in FY 2008, FY 2010, and FY 2012 for a total of 37 VIPR teams. TSA has continually assessed staffing and funding for the VIPR program. With this reduction, TSA anticipates the level of risk-based, periodic random deployments that are unpredictably executed in timing, location, and types of activities will be directed to areas of highest risk. As a result, the program decrease should have a minimal impact on program effectiveness.

The mission of the VIPR program is to deter and prevent terrorism. This is achieved by conducting VIPR operations that promote confidence in and protection of all modes of the Nation's transportation systems. TSA personnel participating in VIPR operations include Federal Air Marshals, Transportation Security Officers, Behavior Detection Officers, Transportation Security Inspectors, Transportation Security Specialists – Explosives and Explosive Detection Canine Teams. These TSA personnel coordinate with other Federal, state, and local transportation security personnel and law enforcement officers to augment existing terrorism risk mitigation measures on a random and unpredictable basis.

VIPR teams can be deployed for normal transportation mode activities, during periods of heightened threat or at special events that require additional security. VIPR teams provide deterrent and detection capabilities while introducing an element of surprise to disrupt potential terrorist activities. While VIPR presence has acted as a potential deterrent for state and local authorities, none of these deployments (to date) have resulted in arrests related to security threats.

Impact on Performance (Relationship of Increase to Strategic Goals):

TSA will target VIPR operations to those areas of highest risk. In FY 2015, TSA anticipates the number of operations for the 33 teams will decline to 13,700.

	Aviation Appropriation Multi-Modal Teams	Surface Appropriation Teams	Aviation Operations	Surface Operations	Total Operations
FY 2013 Actual	22	15	5,117	10,143	15,260
FY 2014 Planned	22	15	7,200	7,200	14,400
FY 2015 Planned	0	33 (multi-modal)	6,850	6,850	13,700

*Above table reflect the change in VIPR operations and reflects a 50/50 split in the aviation and surface mode. Actual operational tempo in FY 2014 and FY 2015 is subject to adjustments based on intelligence or special requirements.

Staffing and operations Mission Statement

Surface Transportation Security Staffing and Operations is charged with managing TSA's efforts to mitigate the risk and provide security direction to all non-aviation transportation systems. This responsibility covers rail, mass transit, highways, buses, trucking, ferries, and pipelines. The Surface Transportation Security Staffing and Operations office also works with industry, State and local governments, and other Federal agencies in developing standards and regulations to ensure the security of these vital transportation systems.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	15,120	16,050	14,381	(1,669)
12.1 Civilian Personnel Benefits	5,596	6,003	5,322	(681)
Total, Salaries & Benefits	20,716	22,053	19,703	(2,350)

The FY 2015 Salaries and Benefits request includes an increase of \$200,000 for pay COLA, an increase of \$158,000 for Retirement Contribution, and a decrease of \$2,708,000 for adjustments-to-base associated with the realignment of the TSARK Center and TSA Academy positions and funding to other appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$1,592	\$1,403	\$1,031	(\$372)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2015 request reflects a decrease of \$372,000 for adjustments-to-base.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$122	\$108	\$79	(\$29)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services, and rentals, and utility services. PDA and cell phone air time are major items being charged to this object class. The FY 2015 request reflects a decrease of \$29,000 in adjustments-to-base.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
24.0 Printing and Reproduction	\$30	\$26	\$19	(\$7)

Printing includes all costs for printing and reproduction obtained from private sector or other federal entities. The FY 2015 request reflects a decrease of \$7,000 for adjustments-to-base.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$12,665	\$11,208	\$8,203	(\$3,005)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The funds will be used to support security efforts in non-aviation modes including Pipelines, Maritime, Mass Transit, Rail, Highway and Motor Carrier and Postal and Shipping. The FY 2015 request reflects a decrease of \$3,005,000 for adjustments-to-base.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$137	\$120	\$88	(\$32)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The funds will be used to support partnership activities with other government agencies. The FY 2015 request reflects a decrease of \$32,000 for adjustments-to-base.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$389	\$344	\$252	(\$92)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. This PPA will use these funds to acquire office supplies, education materials, training materials and any other supplies and materials. The FY 2015 request reflects a decrease of \$92,000 for adjustments-to-base.

Surface Inspectors and VIPR Mission Statement

TSA has been given the responsibility to ensure the compliance of security regulations and standards within the rail and mass transit modes. TSA will accomplish this with a cadre of 300 inspectors located at significant rail, mass transit, and transit centers across the United States.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	50,279	50,825	74,618	23,793
11.3 Other than Full-Time Permanent	61	61	90	29
11.5 Other Personnel Compensation	466	471	691	220
12.1 Civilian Personnel Benefits	12,702	12,841	18,852	6,011
Total, Salaries & Benefits	63,508	64,198	94,251	30,053

The FY 2015 Salaries and Benefits request includes a transfer of \$34,808,000 from the Aviation Security and Federal Air Marshals appropriations to consolidate VIPR funding, an increase of \$903,000 for pay COLA, an increase of \$532,000 for retirement contribution, and a decrease of \$6,190,000 for a VIPR program reduction.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$1,422	\$155	\$253	\$98

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. This funding will be used for local and extended travel to conduct a multitude of transit inspections program management. The FY 2015 request reflects an increase of \$98,000 for the transfer from the Aviation Security and Federal Air Marshals appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$189	\$201	\$328	\$127

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2015 request reflects an increase of \$127,000 for the transfer from the Aviation Security and Federal Air Marshals appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$546	\$579	\$944	\$365

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2015 request reflects an increase of \$365,000 for the transfer from the Aviation Security and Federal Air Marshals appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$427	\$47	\$77	\$30

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. This funding will be used for communication equipment and service costs. The FY 2015 request reflects an increase of \$30,000 for the transfer from the Aviation Security and Federal Air Marshals appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$12,272	\$1,334	\$2,176	\$842

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
--	----------------------------	--------------------	--------------------	------------------------------

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2015 request reflects an increase of \$842,000 for the transfer from the Aviation Security and Federal Air Marshals appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$151	\$16	\$26	\$10

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The funds will be used to support partnership activities with other government agencies. The FY 2015 request reflects an increase of \$10,000 for the transfer from the Aviation Security and Federal Air Marshals appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$929	\$102	\$166	\$64

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2015 request reflects an increase of \$64,000 for the transfer from the Aviation Security and Federal Air Marshals appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$220	\$24	\$39	\$15

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2015 request reflects an increase of \$15,000 for the transfer from the Aviation Security and Federal Air Marshals appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
41.0 Grants, Subsidies, and Contributions	\$6,698	\$6,698	\$0	(\$6,698)

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, duals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2015 request reflects a decrease of \$6,698,000 for the transfer to the Aviation Security appropriation to consolidate Canine funding.

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Intelligence and Vetting

I. Appropriation Overview

Mission Statement for Intelligence and Vetting:

The Intelligence and Vetting appropriation (formerly known as Transportation Threat Assessment and Credentialing), strives to reduce the probability of a successful terrorist or other criminal attack to the transportation system through application of intelligence and threat assessment methodologies that are intended to identify known or suspected terrorist threats working in or seeking access to the Nation's transportation system.

This appropriation supports compliance with:

- National Strategy for Homeland Security,
- USA PATRIOT ACT of 2001 (P.L. 107-56),
- Safe Explosives Act (P.L. 107-296),
- Aviation Transportation Security Act of 2001 (P.L. 107-71),
- Maritime Transportation Security Act of 2002 (P.L. 107-295),
- Security and Accountability For Every Port Act of 2006 (P.L. 109-347),
- Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (P.L. 109-59),
- Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176),
- Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-408), and
- 9/11 Commission Act of 2007 (P.L. 110-53).

The National Strategy for Homeland Security and these laws provide direction to the Federal Government to protect homeland security, placing special emphasis on deterrence, prevention, interdiction of threats, aggression, and unlawful acts directed toward the United States. Homeland Security Presidential Directive-11 (HSPD-11), *Comprehensive Terrorist-Related Screening Procedures*, issued August 27, 2004, directed the Department of Homeland Security (DHS), in coordination with other Federal agencies, to “enhance terrorist-related threat assessment through comprehensive, coordinated procedures”.

The objective of HSPD-11 is to more effectively detect and interdict individuals known to engage in terrorist activities or those who are reasonably suspected to be doing so, or who have been engaged in terrorist activities. To that end, the broad range of existing government and private sector security measures and initiatives will be augmented by a comprehensive, coordinated, and integrated threat assessment environment. Implementation of HSPD-11 must facilitate the efficient movement of people, cargo, and conveyances and minimize any negative impacts on related activities. The Presidential Directive requires that these goals be achieved without compromising personal or institutional privacy and with due respect for other rights and freedoms quintessential to the American way of life.

TSA supports this directive through the programs within the Intelligence and Vetting appropriation that integrate intelligence information and the vetting of passengers and transportation workers. These programs include: Intelligence, Secure Flight, Aviation Workers, Flight Crew Vetting, Ronald Reagan Washington National Airport (DCA) General Aviation, Indirect Air Carriers, Certified Cargo Shippers, Large Aircraft Operators, Transportation Worker Identification Credential (TWIC), Hazardous Materials Endorsement Threat Assessment Program (HTAP), TSA Pre✓™ Application Program, and Alien Flight Student Program (AFSP).

All programs that comprise this appropriation are designed to enhance security for many components of the transportation sector (air, land and sea), focusing on risk-based, intelligence driven screening procedures. Much of the risk analysis being performed can be scaled for use in other sectors of this dynamic network.

TSA Vetting Facts

Daily TSA:

** Perpetually vets over 14.8 million records.*

** Pre-screens an average of 6 million air passengers to include recurrent watch list matching.*

** Responds to over 150 redress requests.*

As transportation risks change, TSA's vetting programs evolve and transform to more efficiently and effectively screen individuals to mitigate risk and prevent terrorist actions against the transportation systems.

B. Budget Activities:

Intelligence - TSA's Office of Intelligence and Analysis (OIA) receives, assesses, and distributes intelligence information to support TSA's mission of securing the transportation system. OIA also conducts strategic operational and tactical risk-based security planning, which includes TSA Risk Knowledge (TSARK) Center. For FY 2015, TSA proposes to realign OIA from the Transportation Security Support appropriation to the renamed Intelligence and Vetting appropriation.

Secure Flight - Under the Secure Flight Final Rule (Federal Register, Vol. 73, No. 209), the Secure Flight program assumed responsibility of airline passenger watch list matching from the airline industry into one program managed and operated by the Federal Government. This consolidation meets the provisions outlined in the Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458) and the recommendations of the 9/11 Commission. For the purpose of preventing terrorists from boarding an aircraft or accessing the sterile area of a U.S. airport, the Secure Flight program uses an automated process to match Secure Flight Passenger Data against records contained in portions of the Terrorist Screening Database (TSDB).

Secure Flight began program implementation with the first domestic aircraft operator on January 27, 2009. On June 22, 2010, Secure Flight met its goal of conducting watch list matching for all domestic aircraft operator flights within, into and out of the United States, as well as international point-to-point flights between two foreign cities. On November 23, 2010, Secure Flight completed deployment to all covered foreign air carriers flying into and out of the United States. As of October 2012, Secure Flight has conducted watch list matching for all foreign air carriers operating covered flights overflying the United States. Beginning in FY 2012, Secure Flight, in support of TSA's risk-based, intelligence-driven approach to aviation security, began the TSA Risk-Based Security (RBS) initiative called TSA

Pre✓™. This initiative enhances aviation security by placing more focus on potentially high-risk passengers, while improving the traveling experience of individuals who pose a low-risk to aviation security. Secure Flight pre-screens an average of 6 million passengers daily to include continuous watch list matching.

Other Vetting - This activity incorporates the personnel, administrative, and operational costs of vetting and credentialing operations. It also includes TSA's efforts to modernize its vetting infrastructure. Other Vetting initiatives include:

- Crew Vetting Program for crewmembers flying into, over, and out of the United States on commercial passenger or cargo aircraft;
- Aviation Workers Program;
- Other Aviation Vetting Programs, including DCA Access Standard Security Program (DASSP), Private Charter Standard Security Program (PCSSP), 12/5 Standard Security Program (12/5), Maryland Three Program and Airspace Waivers;
- FAA/Airmen Certificate Vetting;
- Consolidated Screening Gateway and Transportation Vetting System platforms; and
- Technology Infrastructure Modernization (TIM), which will provide a single, uniform vetting system.

Transportation Worker Identification Credential - The TWIC allows identity verification through the use of biometric technology and is capable of working as an integral part of access control systems deployed by the maritime transportation sector. The TWIC Final Rule was issued on January 25, 2007. The enrollment of workers, including longshoremen, truckers, port employees, and U.S. merchant mariners began in October 2007. As of December 30, 2013, TSA had enrolled more than 2.8 million workers. The program is funded entirely from fee revenue.

Hazardous Materials Endorsement Threat Assessment Program - The USA PATRIOT Act prohibits states from issuing a license to transport hazardous materials (hazmat) in commerce unless a determination has been made that the individual does not pose a security risk (49 U.S.C. § 5103a). The Act further requires that this risk assessment include checks of criminal history records, legal status, and relevant intelligence databases. TSA implemented the HTAP to meet this mandate and conducts a security threat assessment (STA) on anyone applying to obtain, renew or transfer a Hazardous Materials Endorsement (HME) on their state-issued Commercial Driver's License (CDL). The STA includes a fingerprint-based Criminal History Records Check (CHRC), a legal status check, and checks for ties to terrorism. The program also fulfills statutory requirements under the Safe Explosives Act (P.L. 107-296) regarding transportation security issues of persons engaged in any aspect of the safe transportation of explosive materials. Operational since January 31, 2005, the program has enrolled more than 2.51 million drivers and is entirely funded by fee revenue.

Other Vetting Fees - The following fee programs provide revenue to fund an STA and a fingerprint-based FBI CHRC (program descriptions can be found in the PPA section):

- General Aviation at Ronald Reagan National Airport;
- Air Cargo (includes Indirect Air Cargo and Certified Cargo Screening Program).; and
- TSA Pre✓™ Application Program.

The following fee programs provide revenue for a fingerprint-based FBI CHRC only:

- Commercial Aviation and Airport Fee (previously Secure Identification Display Area and Sterile Area Workers); and,
- Other Security Threat Assessments to include PCSSP; 12/5; Maryland Three Program; and Sensitive Security Information (SSI). Large Aircraft Security Program (LASP) and SSI were previously separate PPAs.

Alien Flight Student Program - Established under the Vision 100 - Century of Aviation Reauthorization Act (P.L. 108-176), AFSP reviews and assesses biographic and biometric information of non-U.S. citizens applying for training at FAA certified flight schools. These persons are subject to an STA consisting of a CHRC through the FBI, a Treasury Enforcement Communication System (TECS) check through U.S. Customs and Border Protection (CBP) for immigration status, and a Terrorist Screening Database (TSDB) check. Since its transfer to TSA from the FBI in July 2004, this program was expanded to conduct background checks of non-U.S citizens seeking flight training in aircraft weighing under 12,500 pounds maximum gross take-off weight (MTOW). The program has processed more than 400,000 training applications. AFSP is a mandatory program funded entirely by fee revenue.

C. Budget Request Summary:

For FY 2015, the Transportation Security Administration requests a total budget authority for the Intelligence and Vetting mandatory and discretionary appropriations of 794 positions, 742 FTE and \$312,131,000. This request consists of 712 positions, 662 FTE, and \$232,526,000 in appropriated funding; and 76 positions, 74 FTE, and \$74,605,000 in discretionary fee collections. Also included in this appropriation are 6 positions, 6 FTE and \$5,000,000 in mandatory fee collections. The total adjustments-to-base include a net increase of 279 positions, 259 FTE and \$43,320,000 in appropriated funding, which includes a realignment of the Intelligence PPA from the Transportation Security Support appropriation; a net increase of 27 positions, 28 FTE and \$13,605,000 in discretionary fee estimates, which includes the TSA Pre✓™ Application Program; and a program increase of \$12,717,000 in appropriated funding for the Large Aircraft Security Program initiative.

Secure Flight
Program Performance Justification**

(Dollars in Thousands)

PPA: Secure Flight

	Perm. Pos	FTE	Amount
2013 Revised Enacted	308	255	102,210
2014 Enacted	308	286	93,202
2015 Adjustments-to-Base	-	-	6,624
2015 Current Services	308	286	99,826
2015 Program Change	-	-	12,717
2015 Total Request	308	286	112,543
Total Change 2014 to 2015	-	-	19,341

TSA requests 308 positions, 286 FTE, and \$112.543 million in FY 2015 for the Secure Flight PPA.

Adjustments-to-Base:

- Increase of \$6.3 million realigned from the Other Vetting PPA to continue the implementation of Risk-Based Security (RBS) initiatives
- Increase of \$91 thousand to annualize the 2014 pay raise
- Increase of \$274 thousand for the 2015 pay raise
- Increase of \$159 thousand for retirement contributions
- Decrease of \$200 thousand for anticipated savings from reductions to non-mission critical travel and training, contract efficiencies, and/or supplies

Program Changes:

- Increase of \$12.717 million for the Large Aircraft and Charter Screening Program

CURRENT SERVICES PROGRAM DESCRIPTION:

Secure Flight's mission is to strengthen the security of commercial air travel into, out of, within, and over the United States through the use of improved and expanded watch list matching using risk-based security measures. The program's goals are to:

- Prevent individuals on the No Fly List from boarding an aircraft;
- Identify individuals on the Selectee List or other high-risk lists for enhanced screening;
- Support TSA's RBS mission by identifying high-risk passengers for appropriate security measures/actions and identifying low-risk passengers for expedited screening;
- Minimize misidentification of individuals as potential threats to aviation security; and
- Protect passengers' personal information from unauthorized use and disclosure.

The Secure Flight program enhances the Nation's transportation system by operating a risk-based, intelligence-driven watch list matching capability for 800 million passengers each year across 236 aircraft operators. Secure Flight delivers a matching capability that uses government watch lists in order to effectively identify individuals who may pose a threat to aviation or national security. As a result, these individuals receive enhanced screening and/or are prohibited from boarding an aircraft. Secure Flight matches passenger information against watch lists within the Terrorist Screening Database (TSDB). These lists, which include the No Fly and Selectee lists, contain full name and date of birth. In addition, Secure Flight includes a matching function for the Centers for Disease Control and Prevention's Do Not Board List, which contains a list of individuals with communicable diseases who meet specific criteria and pose a significant health risk to other passengers. These individuals are restricted from boarding commercial aircraft departing from and/or arriving in the United States.

Covered aircraft operators must collect and transmit full Secure Flight Passenger Data (SFPD) for watch list matching, including the passengers' full name, date of birth, and gender as they appear on the government-issued identification the passenger plans to use when traveling, as well as passport number (if available), Redress Number (if available), and Known Traveler Number (if available). By receiving the SFPD as early as 72 hours prior to scheduled flight departure, the program provides earlier insight to:

- Watch list matches
- Recurring watch list matching
- Earlier notification to appropriate operational stakeholders and law enforcement (as necessary)
- Integration of the DHS Redress process

As a result, more than 99 percent of passengers who provide full SFPD are cleared by Secure Flight in advance of airport arrival and do not experience delays in obtaining boarding passes.

On November 23, 2010, Secure Flight completed deployment to all covered U.S. aircraft operators and foreign air carriers flying into, out of, and within the United States a full month ahead of schedule. In 2011, Secure Flight completed a pilot program for conducting watch list matching for overflights. Overflights are those flights that overfly, but do not land in, the continental United States (i.e., the lower 48 contiguous states, excluding Alaska and Hawaii). This includes flights that travel through the airspace overlying the territorial waters between the U.S. coast of the lower 48 states and 12 nautical miles from the continental U.S. coast (excluding Canada-to-Canada and Mexico-to-Mexico flights). As of October 24, 2012, Secure Flight conducts watch list matching for all foreign air carriers currently operating covered flights overflying the United States.

The following chart depicts by passenger count the Secure Flight scope on covered flights during December 2013.

Covered Operators and Carriers

**Secure Flight conducts watch list matching for all covered aircraft operators and air carriers flying into, out of, within and overflying the United States.*

Covered U.S. Operators:
81

Covered Foreign Air Carriers:
165

Secure Flight Covered Passengers

In support of TSA's risk-based, intelligence-driven approach to aviation security, Secure Flight enables the TSA RBS strategy through TSA Pre✓™. This initiative enhances aviation security by placing more focus on potentially high-risk passengers, while improving the traveling experience of individuals who pose a low risk to aviation security. Eligible passengers voluntarily provide additional information prior to traveling, which allows TSA to conduct more robust passenger pre-screening and better segment the passenger population according to risk. In FY 2012, Congress appropriated \$10 million to TSA to implement RBS. Secure Flight has enabled the continued expansion of RBS and TSA Pre✓™, by integrating into its pre-screening capability several new low-risk list populations and enhanced risk assessments using the SFPD already provided to TSA. Secure Flight has been critical to the success of RBS initiatives, particularly in helping TSA achieve its 2013 goal of having 25% of the traveling public experience Pre-Check or other forms of expedited screening. In FY 2015, Secure

Flight will use the \$6.3 million realigned from the Other Vetting PPA to continue supporting RBS expansion of pre-screening capabilities in order to identify an increasing level of low-risk passengers for expedited screening, while simultaneously placing more security focus on high-risk passengers.

Airlines currently participating in TSA Pre✓™ include: Alaska Airlines, American Airlines, Delta, United Airlines, US Airways, Virgin American, Hawaiian Airlines, JetBlue Airways, and Southwest Airlines, as well as many of their affiliates. As of the end of January, 2014, TSA Pre✓™ is available at more than 100 airports.

For FY 2015, TSA requests \$12.7 million for Secure Flight to perform watch list matching for passengers prior to boarding large general aviation aircraft. The Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA) requires TSA to establish a process to conduct watch list matching for operators of aircraft weighing more than 12,500 pounds to be used in charter air transportation or lessors of aircraft weighing more than 12,500 pounds flying into, out of, or within the United States. TSA is promulgating a rule for general aviation large aircraft (regulation identifier number 1652-AA53) that will include provisions for this watch list matching as well as general aviation operators over 30,000 pounds.

Under the draft rule, general aviation will submit passenger information to Secure Flight for watch list matching. These additional populations represent approximately 2,000 general aviation operators. As a result, an estimated 11 million additional SFPD records will be submitted by these operators per year. The general aviation large aircraft rule is currently under review by the Department of Homeland Security and is anticipated to be published within the next year. So that TSA can make the appropriate modifications to the Secure Flight system, processes and procedures to vet these populations, funding for this watch list matching is required at least six months prior to the effective date of the rule.

MAJOR ACQUISITIONS:

Secure Flight

The Secure Flight program strengthens security by operating a threat-based, watch list matching capability to identify potential matches, enhancing the security of domestic and international commercial air travel. Secure Flight's goals are to: 1) Identify known and suspected terrorists who appear on the No Fly or Selectee Lists and attempt to board a domestic or international flight or gain access to the sterile area within a domestic airport; 2) Prevent individuals on the No Fly List from boarding an aircraft, and subject individuals on the Selectee List to enhanced screening to determine if they are permitted to board an aircraft; and 3) Facilitate expedited screening for passengers under a variety of RBS programs.

The investment portion of the Secure Flight program is proposed to be funded at \$112.003 million out of the Secure Flight PPA in FY 2015.

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
\$101,670	\$92,662	\$112,003

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Maintenance - \$112,003	Secure Flight Program	Funds for operating and maintenance cost of the Secure Flight program to perform watch list matching to identify known or suspected threats to aviation security, and to identify low-risk passengers for expedited screening. This includes the modifications to the Secure Flight system, processes, and procedures to support vetting the Large Aircraft & Charter Screening Program population.

PPA: Other Vetting Programs

	Perm. Pos	FTE	Amount
2013 Revised Enacted	127	111	81,712
2014 Enacted	125	117	83,287
2015 Adjustments-to-Base	1	1	(15,105)
2015 Current Services	126	118	68,182
2015 Total Request	126	118	68,182
Total Change 2014 to 2015	1	1	(15,105)

TSA requests 126 positions, 118 FTE and \$68.182 million in FY 2015 for the Other Vetting PPA.

Adjustments-to-Base:

- Decrease of \$9.0 million to non-recur FY 2014 funding that was used for requirements to expand TSA Pre✓™ expedited screening
- Decrease of \$6.3 million realigned to Secure Flight to continue implementation of Risk-Based Security initiative
- Increase of \$43 thousand to annualize the 2014 pay raise
- Increase of \$130 thousand for the 2015 pay raise
- Increase of 1 FTP/1 FTE for a K-band position that was split into 2 positions
- Increase of \$122 thousand for retirement contributions
- Decrease of \$100 thousand for anticipated savings from reductions to non-mission critical travel and training, contract efficiencies, and/or supplies

CURRENT SERVICES PROGRAM DESCRIPTION:

Funding Distribution within the Other Vetting PPA		
Programs	FY 2014	FY 2015
Aviation Workers	\$ 4.6	\$ 5.1
Crew Vetting Program	3.0	3.4
Other Aviation Vetting Programs	0.3	0.3
Administration and Operations	21.1	21.1
Technology Infrastructure Modernization (TIM)*	54.3	38.3
Total	\$ 83.3	\$ 68.2

*Total TIM requirement is projected to be \$42.713 million for FY15. The difference between this estimate and the request is expected from TWIC fees and is likely to fluctuate based on the population level for TIM services provided.

The numerous small vetting programs included in the Other Vetting PPA are in an operational and maintenance mode and will continue to vet the various populations each fiscal year. Since inception of each of these programs, over 133 million names have been vetted.

Total Names Vetted Since Program Inception (as of September 30, 2013)	
Program	Population Vetted
12/5 Standard Security Program	115,294
Airspace waivers	960,304
Crew Vetting*	123,925,326
DCA Access Program	79,014
Maryland Three	6,146
Private Charter	4,446
Aviation Workers & SIDA Badges	8,869,259
Total	133,959,789

*Air crews are vetted prior to each flight.

Aviation Workers (AW) Program (including SIDA and other badge holders): \$5.1M

The AW Program includes those individuals who apply for, or are issued personnel identification media at U.S. federalized domestic airports. Prior to receiving any identification media, aviation workers must undergo a successful name-based Security Threat Assessment (STA), and if applicable, a fingerprint-based Federal Bureau of Investigations (FBI) Criminal History Records Check (CHRC). Since implementation of the Aviation Channeling Service Provider (ACSP) project in FY 2012, TSA has a total of three Designated Aviation Channelers (DACs) to submit aviation worker enrollments. The program reviews approximately 500,000 aviation workers annually.

Crew Vetting Program (CVP): \$3.4M

CVP screens flight crewmembers (passenger and cargo) on flights into, out of or over the continental United States prior to an airport's release of an aircraft for takeoff. This includes pilots and other crew in the cockpit, as well as cabin crew such as flight attendants, deadheading pilots, or cargo loadmasters. Flight crewmembers undergo a name-based STA to determine if they have a terrorist nexus, and if so, TSA would notify the air carrier that the individual cannot have access to United States airspace. The program reviews approximately 14.2 million flight crewmembers annually.

Other Aviation Vetting Programs: \$0.3M

Other Aviation Vetting Programs includes DCA Access Standard Security Program (DASSP); Private Charter Standard Security Program (PCSSP); 12/5; Maryland Three Airports Program, and Airspace Waivers Program. These programs all require a name-based STA. Some also require a fingerprint based CHRC. Since inception, TSA has vetted over 1.1 million records for the Other Aviation Vetting Programs.

Administration and Operations (A&O): \$21.1M

This activity includes the general administrative expenses of the vetting programs within the appropriation to include the common biometric identity initiative. It also includes all payroll costs for the Other Vetting PPA, excluding TIM (see TIM below).

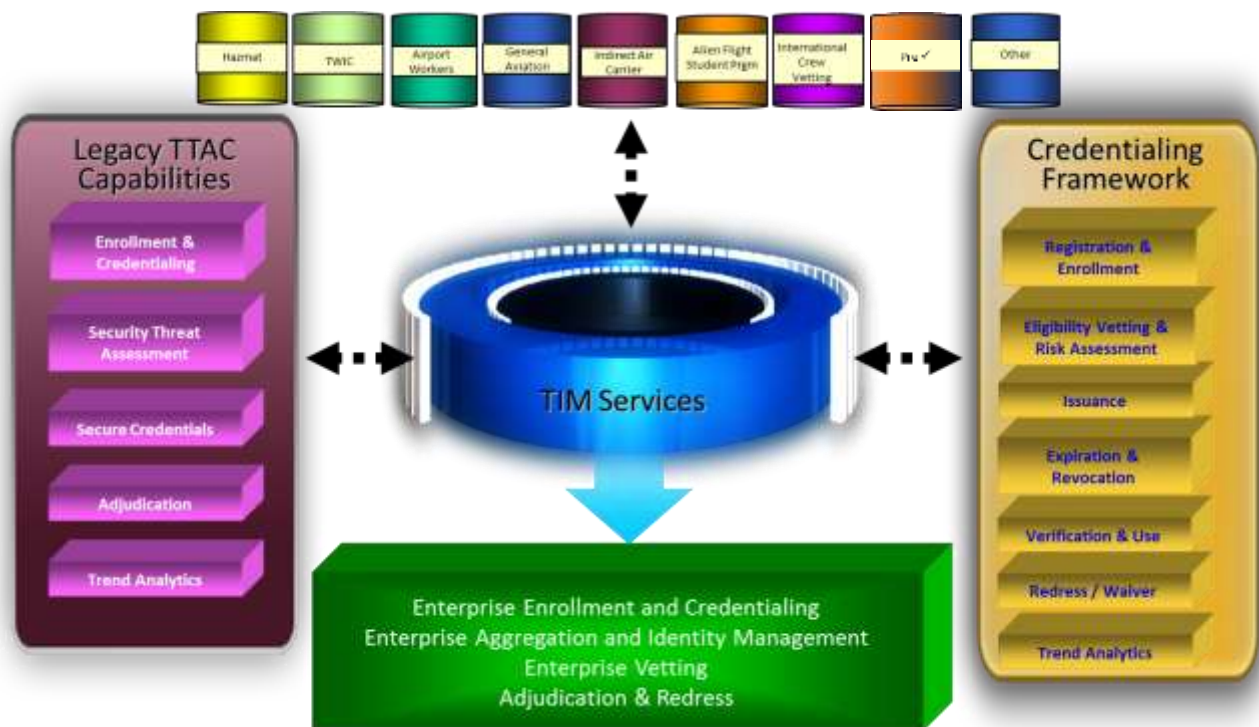

The Other Vetting PPA also provides funding for the Transportation Vetting System (TVS) to conduct STAs for crew members, general aviation flight crews, and FAA airman certificate holders. TVS provides name-based biographic data matching (vetting) on individuals with access to transportation related infrastructure to ensure they do not pose a threat to transportation or national security.

Technology Infrastructure Modernization (TIM): \$38.3M

The modernization initiative will provide a state-of-the-art vetting system, while eliminating multiple, costly, and aging vetting systems and practices. It will also add new capabilities as well as standardized, more efficient business processes. As a result, TSA expects to achieve significant economies of scale and other benefits associated with this robust and unifying business integration effort.

As the following diagram shows, once fully developed, TIM will:

- common security requirements, methods, and information; and
- Common Vetting initiative.

TIM will also provide the following new mission capabilities and benefits that will be available to support emerging vetting and credentialing population requirements:

Enroll Once/Use Many: The TIM program creates a person-centric system that eliminates redundant background checks and recognizes workers applying for multiple credentials, endorsements, or STAs to work in multiple transportation or commercial modes. By fully integrating enrollment information across all programs, transportation modes, and commercial entities, TSA is able to recognize when an STA has already been completed.

STA Response Time: The STA process uses the biometric and biographic information to conduct an immigration check with the U.S. Citizens and Immigration's Systematic Alien Verification for Entitlements (USCIS SAVE) system, a criminal history check and finger print check with the FBI Criminal Justice Information System, and a terrorist watch list check with the TVS vetting system. TIM will ensure timely processing of individuals through strengthened infrastructure, streamlined vetting processes, and improved availability of the system.

Performance Efficiency: TIM will achieve performance efficiencies by streamlining the business integration of separate IT systems, as well as reduce the cost, risk, and time associated with implementing new business capabilities and new populations. The TIM Program will interface with other Department of Homeland Security (DHS) information services and Federal agencies to establish all agreements necessary for interfacing and exchanging information.

Estimated TIM Vetting Population Sizes (FY 2014 - FY 2018)	
Alien Flight Students	92,000
Aviation & Airports	5,681,000
Cargo	673,000
FAA Certificate Holders	1,863,000
Freight Railroads	201,000
Hazardous Materials Endorsement	1,512,000
Maritime	1,926,000
TSA Pre✓™	1,950,000
Public Transportation Agencies & Passenger Railroads	345,000
Sensitive Security Information	1,000

The TIM design and development contract was awarded in August 2012 with the first Task Order to achieve the Initial Operational Capability (IOC) within an 18 month period of performance. TIM is on track to achieve IOC as scheduled in the second quarter of FY 2014. The Maritime population, served via the TWIC platform, will migrate to TIM first, followed by the Surface population, which will migrate to TIM by second quarter FY 2015. All currently vetted populations will migrate to TIM within 24 months after IOC and the program will achieve Full Operating Capability (FOC) in the second quarter FY 2016. As additional fee populations are fully migrated over to the TIM system, each fee program will contribute to the O&M costs of TIM based on the program's usage of the TIM system.

Concurrent with this modernization effort, TSA is working toward the implementation of a common universal fee structure that will capitalize on the capabilities of an improved vetting infrastructure. The new Standardized Vetting, Adjudication and Redress Rule (SVAR) framework (formerly called the Universal Rule) will establish comparable STA services for vetting activities with a common fee structure. The total fee will vary across populations and applicants depending on the specific STA requirements. The SVAR is currently under executive clearance.

TSA's vetting modernization is being coordinated with the Department's other ongoing information technology modernization efforts and will interact with numerous other systems such as: Treasury Enforcement Communication System, USCIS SAVE, U.S. VISIT's Automated Biometric Fingerprint Identification System, and the FBI's Criminal Justice Information System.

MAJOR ACQUISITIONS:

Technology Infrastructure Modernization

The Technology Infrastructure Modernization (TIM) Program will reduce the probability of a terrorist attack on the transportation sector by replacing legacy vetting systems with a unified person-centric system; this will eliminate exploitable gaps, improve enrollment and threat assessment methodologies, and enable TSA to vet and provide credentials to more transportation populations. The TIM System will provide an integrated, end-to-end solution to manage identities, credentials, and assessment results

for millions of transportation workers, providing more accurate and timely identification of terrorist threats. TIM will provide a service oriented architecture framework, mission services, and service capabilities. The Initial Operating Capability is anticipated in March 2014 with Full Operating Capability anticipated in March 2016.

The TIM program is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- Other Vetting PPA \$38.324 million
- Transportation Worker Identification Credential PPA \$4.389 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
57,700	54,251	42,713

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Acquisition - \$27,178	TIM Program	For the continued development and build out of the TIM system to support the Surface and Aviation populations
Maintenance - \$15,535	TIM Program	For the operations and maintenance of the TIM system to support the vetting of Maritime, Surface and Aviation populations.

2015 Adjustments-to-Base	278	258	51,801
2015 Current Services	278	258	51,801
2015 Total Request	278	258	51,801
Total Change 2014 to 2015	278	258	51,801

¹ Intelligence PPA funded under Transportation Security Support Appropriation in FY2013 and FY2014.

TSA requests 278 positions, 258 FTE, and \$51.801 million in FY 2015 for the Intelligence PPA.

Adjustments-to-Base:

- Increase from transfer of 266 FTP/246 FTE and \$44.561 million from the Transportation Security Support appropriation (Intelligence PPA) to the Intelligence and Vetting appropriation
- Increase from transfer of 12 FTP/12 FTE and \$4.937 million from the Surface Transportation Security appropriation (Staffing and Operations PPA) for the TSA Risk Knowledge (TSARK) Center staffing and operations
- Increase from transfer of \$2.0 million from the Aviation Security appropriation (Aviation Regulations and Other Enforcement PPA) for the TSARK Center operations
- Increase of \$82 thousand to annualize the 2014 pay raise
- Increase of \$256 thousand for the 2015 pay raise
- Increase of \$165 thousand for retirement contributions
- Decrease of \$200 thousand for anticipated savings from reductions to non-mission critical travel and training, contract efficiencies, and/or supplies

CURRENT SERVICES PROGRAM DESCRIPTION:

For FY 2015 TSA proposes to transfer the Intelligence PPA from the Transportation Security Support appropriation to the Intelligence and Vetting appropriation. This realignment enables TSA to combine the intelligence and vetting functions to inform daily operations, and enhance mission effectiveness by supporting an intelligence-driven, risk-based approach to our counterterrorism mission. For example, all vetting functions will more easily inform intelligence analysis and intelligence functions will assist in vetting analysis. In the FY 2015 budget request, the FY 2013 and FY 2014 amounts are reported in the Transportation Security Support appropriation for display purposes. However, the following chart provides a complete picture of the Intelligence PPA for FY 2013 through FY 2015, which includes both the Transportation Security Support, and the Intelligence and Vetting appropriations:

	Perm. Pos	FTE	Amount
2013 Revised Enacted	256	220	42,908
2014 Enacted	266	246	44,561
2015 Adjustments-to-Base	12	12	7,240
2015 Current Services	278	258	51,801
2015 Total Request	278	258	51,801
Total Change 2014 to 2015	12	12	7,240

TSA's Office of Intelligence and Analysis (OIA) provides TSA with the capability to review, synthesize, and analyze transportation specific intelligence in addition to providing comprehensive and cogent analytic products. It is the only Federal intelligence entity focused solely on the transportation sector. OIA coordinates closely and shares information with the Department of Homeland Security Office of Intelligence & Analysis, the Intelligence Community (IC), the intelligence sections of law enforcement agencies, and the transportation industry. To facilitate collaboration and provide rapid analysis and notification of threats, the office assigns Field Intelligence Officers (FIOs) at key transportation nodes and places liaison officers at key IC and law enforcement agencies.

Intelligence is critical to TSA's overall risk-based security strategy and the intelligence products generated provide the threat framework utilized to prioritize security resources. These products are regularly used by TSA senior leadership, the Federal Security Directors, the Federal Air Marshal Service, and the transportation industry to guide decisions. TSA operates and maintains 24/7 intelligence capabilities at TSA Headquarters, Annapolis Junction Operation Center (AJOC), Colorado Springs Operation Center (CSOC) and the TSA Freedom Center. Through these centers, TSA disseminates warnings and notifications of credible and immediate threats and assists in coordinating domestic and international civil aviation and other modal security intelligence activities.

To perform its mission, OIA provides and maintains Top Secret and Secret Collateral classified information technology infrastructures for interfacing via voice, video, and data with the IC, state and local law enforcement, field sites, and industry partners. TSA Intelligence Managed Network (TINMAN) supports the Headquarters, AJOC, CSOC and Freedom Center locations. The TSA Remote Access to Classified Enclaves (TRACE) solution provides secure access to classified and unclassified threat information in a timely manner to remote locations. The Crisis Management System is a classified voice, video, and data system that is maintained and certified by Defense Information Systems Agency and utilized for classified connectivity to the Intelligence community during national crisis' and special events.

In FY 2015 the TSARK Center will be managed by OIA and the budgetary resources will be in the Intelligence PPA. The TSARK Center is a risk portal located on the TSA iShare intranet site that enables Office of Security Operations (OSO), OIA, Office of Law Enforcement/Federal Air Marshal Service (OLE/FAMS), and the Office of Security Policy and Industry Engagement (OSPIE) to share risk-related information across the agency, ensuring that all offices make decisions based on consistent data. TSARK Center is a tool which enables senior field and headquarters leaders to select countermeasures to prevent, deter, and respond to a security incident. This portal serves as an integrated repository for this risk-related information, and includes a risk analysis database that will allow for the manipulation and analysis of the critical information. In FY 2013, TSA commenced a national roll-out of the TSARK Center to enhance TSA field and headquarters leadership usage of this information.

Total Change 2014 to 2015	-	-	(1,868)

TSA requests 21 positions, 21 FTE, and estimates fee collections of \$34.832 million in FY 2015 for the TWIC PPA:

Adjustments-to-Base:

- Decrease of \$1.868 million in revenue collections based on current FY 2015 TWIC applicant projections.

CURRENT SERVICES PROGRAM DESCRIPTION:

The TWIC program enhances security by providing a tamper-resistant biometric credential to maritime workers requiring unescorted access to secure areas of port facilities and vessels that are regulated under the Maritime Transportation Security Act of 2002 (MTSA). The program provides a common, consistent biometric credential at over 2,700 facilities and on over 12,000 vessels. When fully implemented by the U.S. Coast Guard (USCG) after the promulgation of the TWIC reader rule, the program will require biometric verification of identity by facility and vessel operators as required by the rule. Prior to issuing a TWIC the program ensures the identity of each TWIC holder has been verified; a satisfactory security background check has been completed on that identity; and each credential issued is positively linked to the rightful holder through the use of biometric technology.

TWIC's personal identity verification standards and credential issuance closely align with those of Homeland Security Presidential Directive - 12 and its implementing standard, Federal Information Processing Standard 201-1. The program specifically follows biometric standards of the American National Standards Institute for its pattern-based fingerprint format operational biometric, and was the first to adopt common biometric standards in the Federal Government. TSA also works with the National Institute of Standards and Technology to ensure compliance with appropriate national standards and to develop technology specifications to support the overall program. In addition, TSA and USCG continue to work closely with the maritime, smart card, and reader industries and the TWIC Stakeholder Communications Committee.

The standard TWIC Fee is \$129.75 per applicant. A reduced TWIC fee of \$105.25 has also been established for those applicants that previously completed a comparable STA. The card replacement fee is \$60.00. The final TWIC rule includes the ability to provide a discount for Free and Secure Trade card holders, documented merchant mariners, and truckers with Hazardous Materials Endorsement (HME). In FY 2012, TWIC holders applying for a HME are able to pay a reduced fee in states that have elected to offer comparability between the HME and TWIC security threat assessments. This fulfills statutory requirements under the "Implementing Recommendations of the 9/11 Commission Act of 2007" (P. L. 110-53).

The credential is valid for five years. Starting August 31, 2012, the TWIC program began issuing Extended Expiration Date (EED) TWICs for eligible individuals. The EED TWICs will extend the STA and associated expiration date for three years at a cost of \$60.00 per TWIC. To be eligible to obtain an EED card, a TWIC holder must be a U.S. citizen and have a valid card (i.e., not revoked) that expires on or before December 31, 2014. To obtain an EED card, eligible individuals must contact the TWIC Help Desk to initiate the process. Obtaining an EED card will only require one trip to an enrollment center of eligible TWIC holder's choosing to pick-up and activate the card. TWIC holders not wishing to use the EED card option, or those who are not eligible for the EED card option, may renew their expiring TWICs by completing a standard enrollment and paying the standard enrollment fee of \$129.75 to obtain a five-year TWIC.

The TWIC program transitioned all 136 enrollment sites to the new universal enrollment services (UES) contract on June 28, 2013. The UES contract will expand to include both TWIC and HME enrollment services once all HME enrollment sites have transitioned to UES. As a result, the existing TWIC enrollment center footprint will expand its presence into every state. In addition, the transition to UES provides for a robust capability for mobile enrollments and provides a foundation for Enroll Your Own (EYO) focused on a specific stakeholder population. Through mobile enrollments, a Trusted Agent and mobile unit are sent to a vendor/company location for enrollments. Currently, 24 mobile enrollments have been implemented. EYO enables vendors the capability to enroll their own personnel by qualifying one or more personnel as a Trusted Agent.

In December 2012, the Coast Guard and Maritime Transportation Act 2012 was enacted, requiring that within 270 days the Secretary reform the TWIC enrollment and issuance process to require no more than one visit. TSA will implement OneVisit in 3 phases, with the first phase implemented in Alaska on July 29, 2013. Phase 2 was started in December, 2013 at five enrollment centers in the upper peninsula of Michigan. Nationwide implementation will occur by the third quarter of FY 2014, via the TSA TIM program.

The following chart shows enrollment activity since the start of the TWIC program. The increase in applicants every five years is attributed to the five-year TWIC renewal cycle; however, that pattern should flatten as a result of the normal turnover of workers in the maritime industry. In FY 2013, TSA processed 408,118 TWIC applicants; 215,832 EED requests and has enrolled over 2.7 million workers as of June 2013.

Prior to promulgating the TWIC reader rule, to fully leverage the security benefit of the TWIC, the USCG has authorized the use of TWIC readers in place of the current requirement to visually inspect the card prior to allowing access to secure areas. Additionally, the USCG is currently verifying compliance with the TWIC requirements through electronic validation during vessel and facility compliance exams and/or security spot checks. Through the use of approximately 250 handheld readers for TWIC verification, the USCG is maximizing the use of the security features of the credential.

In FY 2013, the TIM program began building the framework to transition TWIC to the TIM system in FY 2014. The fee structure will fall under the Standardized Vetting Adjudication and Redress Rule framework upon publication of the rule.

MAJOR ACQUISITIONS:

Transportation Worker Identification Credential

The Transportation Worker Identification Credential (TWIC) program is mandated by the Maritime Transportation Security Act (MTSA) of 2002, which requires the Secretary to issue a “biometric transportation security card” to those requiring unescorted access to MTSA-regulated facilities after determining the individual does not pose a security risk. The SAFE Port Act of 2006 further requires program timelines and conducting an extensive pilot to evaluate TWIC reader performance and impacts on maritime business operations. The program began issuing credentials in October 2007, with a national compliance date of April 15, 2009; it is entirely funded through applicant fees. The beneficiaries of TWIC are: facility employees; longshoremen; U.S. mariners; long-haul and drayage truck drivers; and those needing unescorted access to secure areas of MTSA-regulated facilities.

The investment portion of the TWIC program is proposed to be funded for \$28.628 million out of the TWIC PPA in FY 2015.

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
\$39,482	\$32,271	\$28,628

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Maintenance - \$28,628	TWIC Program	Funds for operating and maintenance cost of the TWIC program to issue biometric transportation security cards.

Technology Infrastructure Modernization

The Technology Infrastructure Modernization (TIM) Program will reduce the probability of a terrorist attack on the transportation sector by replacing legacy vetting systems with a person-centric system; this will eliminate exploitable gaps, improve enrollment and threat assessment methodologies, and enable TSA to vet and provide credentials to more transportation populations. The TIM System will provide an integrated, end-to-end solution to manage identities, credentials, and assessment results for millions of transportation workers, providing more accurate and timely identification of terrorist threats. TIM will provide a service oriented architecture framework, mission services, and service capabilities. The Initial Operating Capability is anticipated in March 2014 with Full Operating Capability anticipated in March 2016.

The TIM program is proposed to be funded out of multiple PPAs in FY 2015, as follows:

- Other Vetting PPA \$38.324 million
- Transportation Worker Identification Credential PPA \$4.389 million

Additional funding details can be found in the Other Vetting PPA.

**Department of Homeland Security
Transportation Security Administration
Intelligence and Vetting
Hazardous Materials Endorsement Threat Assessment Program
Program Performance Justification
(Dollars in Thousands)**

PPA: Hazardous Materials Endorsement Threat Assessment Program

	Perm. Pos	FTE	Amount
2013 Revised Enacted	17	19	11,080
2014 Enacted	17	17	12,000
2015 Current Services	17	17	12,000
2015 Total Request	17	17	12,000
Total Change 2014 to 2015	-	-	-

TSA requests 17 positions, 17 FTE, and estimates FY 2015 fee collections of \$12.0 million in the Hazardous Materials Endorsement Threat Assessment Program (HTAP).

CURRENT SERVICES PROGRAM DESCRIPTION:

The HTAP was established to fulfill the statutory requirements of both the USA PATRIOT (P.L. 107-56) and Safe Explosives Acts (P.L. 107-296) to further protect against the threats to transportation posed by terrorists, dangerous criminals, and illegal aliens that may attempt to transport hazardous materials in commerce.

The program is funded through fee revenue that consists of three elements:

- 1) The cost for contractor support to collect and process fingerprint and application information. This amount varies based on the state the applicant applies for an HME. For applicants applying in a state, which utilizes a TSA-contracted agent, this fee is \$38;
- 2) The \$14.50 fee the Federal Bureau of Investigation (FBI) charges to run fingerprint-based criminal history records checks; and
- 3) TSA program costs to administer the program, including conducting the Security Threat Assessments (STAs); this fee is \$34.

States must forward biographic and biometric (fingerprint) information to TSA in an approved and established format to facilitate the STA process. Currently, 10 states collect the required biographic information and biometric data through their individually established and maintained programs. While the remaining 40 states and the District of Columbia have elected to utilize the TSA-contracted agent.

Additionally, drivers registered in a state serviced by the TSA Agent may be fingerprinted in any other state serviced by the TSA Agent.

The HTAP has a robust redress process, including appeals, waivers, and Administrative Law Judge review. The program conducted threat assessments on 278,389 applicants in FY13 confirming the vital role of improving the safety and protection of passengers and freight traveling on our Nation's highways. HTAP has processed over 2.51 million applications since implementation in January, 2005. Beginning in FY 2012, TWIC holders applying for a HME STA are able to pay a reduced fee in states that have elected to offer comparability between the TWIC and HME STA. This fulfills statutory requirements under the "Implementing Recommendations of the 9/11 Commission Act of 2007" (P. L. 110-53).

The HTAP will transition to the TIM system in FY 2015 after initial operating capability and to the Standardized Vetting Adjudication and Redress Rule (SVAR) fee framework when the SVAR is published.

MAJOR ACQUISITIONS:

HAZMAT Threat Assessment Program

Hazardous Materials Endorsement Threat Assessment Program (HTAP) meets the USA PATRIOT Act, which prohibits states from issuing a license to an individual who transports hazardous materials (Hazmat) in commerce without determining if the person is a security risk. The Act requires checks be conducted against criminal history, immigration, & international databases. HTAP meets this mandate by conducting a security threat assessment (STA) on drivers applying to obtain, renew, or transfer a hazardous materials endorsement (HME) on state-issued Commercial Driver's License. HTAP leverages existing criminal history, legal status & intelligence data to perform an STA on commercial truck drivers who transport Hazmat to determine the threat status to transportation security. STAs utilize national data sources and consistent vetting standards which are universally applied to applicants seeking an HME. HTAP is a key component of the DHS/TSA layered management approach to transportation security.

The investment portion of the HTAP program is proposed to be funded for \$7,217 million out of the HTAP PPA in FY 2015.

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
\$7,642	\$7,612	\$7,217

FY 2015 Funding Breakout:

Total Change 2014 to 2015	-	-	-

TSA requests \$350 thousand in FY 2015 fee collection authority to support General Aviation security threat assessment (STA) vetting and program management activities.

CURRENT SERVICES PROGRAM DESCRIPTION:

This offsetting collection supports General Aviation flights into Ronald Reagan National Airport (DCA) as provided by the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176). The DCA Access Standard Security Program (DASSP) conducts name-based STAs for all flight crewmembers and passengers including security coordinators and armed security officers on non-commercial aircraft (non-cargo) flying into or out of DCA from one of the 28 domestic gateway airports. TSA levies a \$490 fee per flight for training of armed security officers, and a \$296 fee per roundtrip for the screening personnel and equipment used to support such flights at DCA and a \$15 fee per person onboard the flight. TSA vetted over 15,300 General Aviation - DCA passenger and crew in FY 2013 and has vetted over 79,000 General Aviation – DCA passengers and crew in the DASSP since inception in October 2005. This program will transition to the TIM system after initial operating capability and to the SVAR fee framework when the SVAR is published.

Air Cargo - Fee
Program Performance Justification
(Dollars in Thousands)

PPA: Air Cargo - Fee

	Perm. Pos	FTE	Amount
2013 Revised Enacted	11	9	3,912
2014 Enacted	11	8	5,400
2015 Adjustments-to-Base	-	2	1,773
2015 Current Services	11	10	7,173
2015 Total Request	11	10	7,173
Total Change 2014 to 2015	-	2	1,773

TSA requests 11 positions, 10 FTE, and estimates \$7.173 million in FY 2015 fee collection authority to support the Air Cargo (AC) program, which includes Indirect Air Cargo (IAC) and Certified Cargo Screening Program (CCSP) fees.

Adjustments-to-Base:

- Increase of \$1.773 million in revenue collections based on current FY 2015 AC/IAC/CCSP application projections
- Increase of 2 FTE to correct current FTP/FTE in PPA

CURRENT SERVICES PROGRAM DESCRIPTION:

The AC program provides for fee collections supporting security threat assessments (STA) of air cargo workers in the air cargo supply chain, including individuals authorized to screen cargo at designated cargo screening facilities. In FY 2015, TSA will charge a \$41 per assessment fee to offset costs for conducting the STA and program management costs. The fee structure is based on cost and population analyses conducted in support of the Air Cargo Screening Final Rule (published in August 2011); the final fee structure of \$41 was published in May 2012 and effective June 22, 2012. Prior to June 22, 2012, this program was funded through the Aviation Security Appropriation Air Cargo PPA and there were no STA fees for applicants. This program is now entirely funded through fees. In FY 2013, TSA vetted 119,908 air cargo workers.

2015 Current Services	-	-	6,500
2015 Total Request	-	-	6,500
Total Change 2014 to 2015	-	-	-

The Commercial Aviation and Airport Fee program was previously known as the Secure Identification Display Area (SIDA) Fee. TSA estimates \$6.5 million in FY 2015 fee collection authority to support the SIDA and Aviation Workers (AW) airport employee checks through the Commercial Aviation and Airport Fee program.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Commercial Aviation and Airport Fee program, previously named the SIDA PPA, includes those individuals who apply for, or are issued, personnel identification media at U.S. domestic airports (e.g., airport facilities workers, retail employees, airline employees, taxi drivers, parking attendants, etc.). Depending on the access level granted to the airport worker, the individual may be required to have a fingerprint based Federal Bureau of Investigation (FBI) Criminal History Record Check (CHRC). The FBI fees collected by this program support the costs for a fingerprint based CHRC.

In addition to the FBI CHRC, prior to receiving any identification media, aviation workers must undergo a successful name-based security threat assessment (STA), which is currently funded through the Other Vetting PPA. This population will eventually be covered under the Standardized Vetting Adjudication and Redress Rule (formerly known as the Universal Rule). The program also processes STAs for the General Aviation population. Airport and aircraft operators are provided a choice of service providers from among three TSA Designated Aviation Channelers (DACs).

The total current badged Aviation Worker population is 2.2 million, which includes approximately 624,000 new applicants in FY 2013. The FY 2015 estimate is based on approximately 448,000 new applicants with an FBI fee of \$14.50 per applicant.

PPA: Other Security Threat Assessments

	Perm. Pos	FTE	Amount
2013 Revised Enacted	-	-	1
2014 Enacted	-	-	50
2015 Current Services	-	-	50
2015 Total Request	-	-	50
Total Change 2014 to 2015	-	-	-

Other Security Threat Assessments (OSTA) fees include the Large Aircraft Security Program (LASP) and Sensitive Security Information (SSI) fees. The Transportation Security Administration estimates \$50 thousand in FY 2015 fee collection authority to support OSTA.

CURRENT SERVICES PROGRAM DESCRIPTION:

The OSTA fees fund the 12/5, Private Charter Standard Security Program (PCSSP), Maryland-Three (MD-3), Airspace Waivers (ASW), LASP and SSI. The fees collected by these programs support the costs for a fingerprint based Federal Bureau of Investigation (FBI) criminal history records check (CHRC). Populations under these programs also undergo a name-based security threat assessment (STA), which is currently funded through the Other Vetting PPA. These populations will eventually be covered under the Standardized Vetting, Adjudication and Redress Rule (formerly known as the Universal Rule).

The 12/5 program conducts an FBI CHRC for flight crewmembers operating (e.g., cockpit crew, airline personnel authorized in the cockpit, cargo carrier employees) aircraft with a maximum certificated takeoff weight of 12,500 pounds or more. Annual population for the 12/5 program is approximately 2,500 applicants. Each program conducts STAs for regulated parties.

The PCSSP program is for private charter flight crewmembers operating aircraft with a maximum certificated takeoff weight of 45,000kg (100,309 pounds) or more, or a passenger-seating configuration of 61 or more, or whose passengers are enplaned from or deplaned into a sterile area. PCSSP does not include government charters.

The MD-3 program applies to pilots who operate aircraft and apply for privileges to fly to or from the three General Aviation airports in the Washington, D.C. restricted flight zones (Potomac Airport, Washington Executive/Hyde Field, and College Park Airport).

The ASW program, in conjunction with the Federal Aviation Administration, conducts FBI CHRCs for domestic and international flight crew members and passengers for access to: certain operational areas of Ronald Reagan Washington National Airport, access to restricted Washington, D.C. flight restricted zones, major sporting events, Disney theme parks, flight training, and special events.

The LASP program will provide for the fee collections to fund FBI CHRCs for the large aircraft security program. Vetting costs are currently supported by appropriated funds. Fee collection will begin after the Notice of Proposed Rulemaking (NPRM) is approved and with the SVAR.

The original LASP NPRM included language to require all U.S. operators of aircraft over 12,500 maximum gross take-off weight (MTOW) to adopt and implement a TSA-approved security program. Subsequent to industry feedback and comments, TSA drafted a Supplemental Notice of Proposed Rulemaking (SNPRM) which is currently under executive review. The SNPRM modifies the MTOW threshold from 12,500 pounds to 30,000 pounds. Operators having an MTOW over 30,000 pounds will be required to adopt a TSA approved security program and the GA 30 Security Program, which will be similar to the current process for U.S. air carriers and commercial operators. The SNPRM also proposes that GA operators transporting persons or cargo for compensation/hire in an aircraft with an MTOW over 12,500 pounds adopt a 12/5 Security Program and a Private Charter/Compensation or Hire Security Program, as necessary, which will have specific requirements and checks for each population as determined by TSA. TSA will begin collecting a fee with the implementation of the Standardized Vetting and Adjudication Rule and the General Aviation Security Program SNPRM.

TSA is collecting the SSI fee to fund the FBI CHRC for those individuals who require access to SSI. The FY 2015 estimate is based on approximately 3,448 applicants with the FBI CHRC requirement at a fee of \$14.50.

Alien Flight School - mandatory fee
Program Performance Justification**
(Dollars in Thousands)

PPA: Alien Flight School - mandatory fee

	Perm. Pos	FTE	Amount
2013 Revised Enacted	6	4	5,117
2014 Enacted	6	6	5,000
2015 Current Services	6	6	5,000
2015 Total Request	6	6	5,000
Total Change 2014 to 2015	-	-	-

TSA requests 6 positions, 6 FTE, and estimates \$5.0 million in FY 2015 fee collection for the Alien Flight Student Program (AFSP).

CURRENT SERVICES PROGRAM DESCRIPTION:

AFSP conducts terrorist, immigration and criminal-background checks on all foreign students applying for flight training in the United States or abroad at Federal Aviation Administration (FAA) certified flight training locations. Applicants are subject to a security threat assessment (STA) in accordance with Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176). AFSP applicants identified as a threat to aviation or national security under this program will be denied training.

The program reviews and assesses both biographic and biometric information to identify individuals who may pose a security threat. Prior to the September 11, 2001 attacks, there were no systematic security checks performed on non-U.S. citizens applying for FAA certified flight training in the United States or abroad.

Section 612 of the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176) transferred the function for screening AFSP applicants from the Attorney General to the Secretary of the Department of Homeland Security (and subsequently delegated to the TSA). The Act also gives the Secretary of Homeland Security the authority to establish a fee to offset costs of vetting AFSP applicants.

AFSP currently collects a fee of \$127.25 per basic applicant. This fee includes \$112.75 for extensive TSA international and domestic threat assessments, and \$14.50 for a Federal Bureau of Investigation (FBI) Criminal History Record Check (CHRC). On May 13, 2009, AFSP also began collecting a fee of \$70 per recurrent applicant. Fees collected for AFSP support the enrollment, vetting and

adjudication of flight training applicants and program management support. AFSP applicants, who require training for a new skill set, will also be required to undergo a fingerprint based FBI CHRC. Operational since 2004, AFSP has processed more than 400,000 applications, including over 48,000 flight training fee applications in FY 2013. AFSP is entirely funded by fee revenue. This program will transition to the TIM system and the Standardized Vetting Adjudication and Redress Rule (SVAR) fee framework when the system is completed and the SVAR is published.

TSA Pre ✓™ Application Program – Fee
Program Performance Justification
(Dollars in Thousands)**

PPA: TSA Pre ✓™ Application Program – Fee

	Perm. Pos	FTE	Amount
2013 Revised Enacted	-	-	-
2014 Enacted	-	-	-
2015 Adjustments-to-Base	27	26	13,700
2015 Current Services	27	26	13,700
2015 Total Request	27	26	13,700
Total Change 2014 to 2015	27	26	13,700

TSA requests 27 positions, 26 FTE, and estimates fee collections of \$13.7 million in FY 2015 for the TSA Pre ✓™ Application Program PPA:

Adjustments-to-Base:

- Increase of 27 FTP/26 FTE
- Increase of \$13.7 million in revenue collections based on current FY 2015 TSA Pre ✓™ applicant projections

CURRENT SERVICES PROGRAM DESCRIPTION:

TSA Pre ✓™ is one of several risk-based security initiatives the U.S. Department of Homeland Security (DHS) and the Transportation Security Administration (TSA) is using to enhance screening operations and redefine the passenger experience for millions of travelers. TSA Pre ✓™ is a prescreening initiative that conducts risk assessments on passengers who voluntarily participate prior to their arrival at the airport checkpoint. If TSA determines an individual is a low risk traveler, that individual may be eligible for expedited screening.

To expand the population of travelers eligible for TSA Pre ✓™ at participating airport security checkpoints, TSA launched the TSA Pre ✓™ Application Program in December 2013, previously referred to as the TSA Pre ✓™ Trusted Traveler program, for domestic air travel. This program is designed as a fee-based program similar to TSA's Hazardous Materials Endorsement Threat Assessment Program (HTAP) and Transportation Worker Identification Credential (TWIC) threat assessment program as well as CBP's Global Entry program. TSA is implementing the TSA Pre ✓™ Application Program pursuant to its authority to "[e]stablish requirements to implement trusted

passenger programs and use available technologies to expedite security screening of passengers who participate in such programs, thereby allowing security screening personnel to focus on those passengers who should be subject to more extensive screening.” Under this program, travelers may be eligible for expedited security screening for air travel through TSA Pre✓™ lanes, if they: (1) voluntarily submit requested biometric and biographic information to TSA; (2) pay the \$85 non-refundable program fee covering TSA’s costs for conducting the security threat assessment and adjudicating the application; and (3) successfully undergo a security threat assessment to confirm they do not pose a threat to transportation or national security.

The program is funded through fee revenue that consists of three elements:

- 1) A \$34.50 fee that remains with the vendor for enrollment services;
- 2) The \$14.50 fee the Federal Bureau of Investigation (FBI) charges to run fingerprint-based criminal history records checks; and
- 3) A \$36 fee for the TSA program costs to administer the program, including conducting the Security Threat Assessments (STAs).

By the end of FY 2014 TSA estimates collections of \$13.320 million and plans to have over 300 enrollment centers available at Universal Enrollment Services (UES) sites, which serve multiple programs including TWIC and HTAP, and at Airports. The following chart depicts the current status of the TSA Pre✓™ Application Program as of February 21, 2014:

Cumulative Program Statistics (From Inception (December 4, 2013 thru February 21, 2014))	
Program Areas	Measurement
Total Enrollments	60,334
Total Approved	42,820
Number of Enrollment Centers Open**	213
**Includes 202 Universal Enrollment Services Sites and 11 On-Airport enrollment sites	

In FY 2015 the TSA Pre✓™ Application Program will transition to the TIM system after initial operating capability.

IV. Program Justification Changes

**Department of Homeland Security
Transportation Security Administration
Intelligence and Vetting
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Large Aircraft and Charter Screening Program
PPA: Secure Flight
Program Increase: Positions 0, FTE 0, Dollars \$12,717

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	12,717
Total Request	-	-	12,717	-	-	-	-	-	12,717

Description of Item:

The total cost of the Secure Flight PPA Large Aircraft and Charter Screening Program request is \$12.717 million.

The 2004 Intelligence Reform and Terrorism Prevention Act (IRTPA) mandates that DHS make advanced passenger prescreening available to charter and lessors of aircraft greater than 12,500 pounds that fly into, out of, or within the United States. TSA is also promulgating the General Aviation Security Rule supporting these provisions of IRTPA as well as additional regulations for aircraft over 30,000 pounds. The rule is anticipated to be published within the next year. So that TSA can make the appropriate modifications to the Secure Flight system, processes and procedures to vet these populations, funding for this initiative is required at least six months prior to the effective date of the rule.

Justification:

Vetting passengers on large general aviation aircraft against the No-fly and Selectee lists adds a significant layer of security to stop terrorists from exploiting the general aviation system.

The additional Secure Flight watch list matching requirements necessitate increased IT systems capability. The requested funding increase will allow TSA to purchase the hardware and software necessary to meet these critical Secure Flight system watch list matching requirements for an anticipated 11 million additional passengers per year who will be covered, adding a significant layer to TSA's aviation security operations.

Expanding watch list matching to these new populations will mitigate the risk to aviation passenger safety, by enabling TSA to better identify individuals who may present a threat to passenger air travel.

General Aviation aircraft over 12,500 pounds that transport people or cargo for compensation or hire will be required to submit passenger data to Secure Flight for watch list matching. For general aviation aircraft over 30,000 pounds that transport people or cargo not for compensation/hire, Secure Flight will perform prescreening of passengers that are unknown to a Validated General Aviation Pilot (VGAP). For example, personal or corporate owned aircraft over 30,000 pounds that transport passengers will be subject to these requirements. Under the proposed rule, VGAP will be a voluntary program for general aviation pilots. These pilots will be subject to enhanced security review by TSA, which will allow the pilot to board passengers known to the pilot without watch list matching for those passengers. If the pilot is not a VGAP, Secure Flight will be required to watch list match all passengers.

This initiative will also allow TSA to discontinue distributing the Watch List to the general aviation operators, greatly reducing the potential for unauthorized use and distribution.

Impact on Performance (Relationship of Increase to Strategic Goals):

This request will support TSA in meeting the IRTPA mandate, implement the General Aviation Security Rulemaking provisions, which require passenger watch list matching on large general aviation aircraft, and achieve 100 percent performance of vetting all air carrier passengers.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

[Transportation Threat Assessment and Credentialing] ***Intelligence and Vetting***¹

For necessary expenses for the development and implementation of ***intelligence***² and vetting [and credentialing] activities, [\$176,489,000] ***\$232,526,000***³, to remain available until September 30, [2015]***2016***⁴.

Language Provision	Explanation
¹ [Transportation Threat Assessment and Credentialing] <i>Intelligence and Vetting</i>	The FY 2015 Request proposes to rename the Transportation Threat Assessment and Credentialing (TTAC) appropriation as the Intelligence and Vetting appropriation. This proposal more closely aligns resources with missions and programs.
² <i>...intelligence</i>	The FY 2015 Request proposes to realign the Intelligence PPA from the Transportation Security Support appropriation to the TTAC appropriation. This proposal more closely aligns resources with missions and programs. The updated wording reflects this change.
³ <i>...[\$176,489,000]<i>\$232,526,000</i>...</i>	Dollar change only. No substantial change proposed.
⁴ <i>...[2015]<i>2016</i>...</i>	Fiscal year change only. No substantial change proposed.

Intelligence Mission Statement

Provide Intelligence Analysis, Coordination, and Dissemination -- TSA will continue to provide current and strategic warning regarding threats to U.S. transportation modes and identify trends and changes in targeting. The TSA intelligence unit analyzes intelligence and disseminates information through liaison with intelligence community agencies.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	-	-	26,060	26,060
11.3 Other than Full-Time Permanent	-	-	86	86
11.5 Other Personnel Compensation	-	-	1,265	1,265
12.1 Civilian Personnel Benefits	-	-	7,265	7,265
Total, Salaries & Benefits	-	-	34,676	34,676

The FY 2015 request reflects the Salary and Benefits for 258 FTE. It includes an increase of 266 FTP/246 FTE and \$32.673 million for the Intelligence PPA transfer from the Transportation Security Support PPA; an increase of 12 FTP/12 FTE and \$1.5 million for the TSARK Center transfer from the Surface appropriation; an increase of \$256 thousand for Pay COLA, an increase of \$82 thousand for annualization of FY 14 pay raise, and \$165K for an adjustment to base.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$0	\$0	\$640	\$640

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2015 request includes the transfer of the Intelligence PPA from the Transportation Security Support PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$0	\$0	\$6	\$6

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2015 request includes the transfer of the Intelligence PPA from the Transportation Security Support PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$0	\$0	\$5,514	\$5,514

The FY 2015 request includes the transfer of the Intelligence PPA from the Transportation Security Support PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$0	\$0	\$10,305	\$10,305

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included in this category is contractual services for intelligence support. The FY 2015 request includes the transfer of the Intelligence PPA from the Transportation Security Support PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$0	\$0	\$162	\$162

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2015 request includes the transfer of the Intelligence PPA from the Transportation Security Support PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.6 Medical Care	\$0	\$0	\$2	\$2

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2015 request includes the transfer of the Intelligence PPA from the Transportation Security Support PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$0	\$0	\$274	\$274

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2015 request includes the transfer of the Intelligence PPA from the Transportation Security Support PPA.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$0	\$0	\$222	\$222

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2015 request includes the transfer of the Intelligence PPA from the Transportation Security Support PPA.

Other Vetting Programs Mission Statement

The mission of Other Vetting is to help support the identification of individuals deemed as potential terrorists or who pose a security threat to either aviation or national security.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	14,192	12,656	12,960	304
11.3 Other than Full-Time Permanent	-	128	128	-
11.5 Other Personnel Compensation	-	639	627	(12)
12.1 Civilian Personnel Benefits	3,958	3,855	3,858	3
Total, Salaries & Benefits	18,150	17,278	17,573	295

The FY 2015 request reflects the Salary and Benefits for 118 FTE. It includes an increase of 1 FTP/1 FTE for a K-band position that was split into 2 positions; an increase of \$130 thousand for Pay COLA, \$43 thousand for annualization of FY 14 Pay Raise, and an increase of \$122 thousand for retirement contributions.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$10,850	\$41,852	\$37,364	(\$4,488)

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these services to provide program management, technical and logistical support as well as evaluations. The decrease is a result of the TIM program transitioning to the O&M phase, and the TWIC fee program contributing to the TWIC program's share of the TIM system O&M.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$0	\$3	\$0	(\$3)

The FY 2015 request more appropriately aligns estimates with actual program costs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$200	\$200	\$1,200	\$1,000

Supports the operation and maintenance of information technology systems used to perform name checks for SIDA, 12/5 Charter Pilots, MD-3 Airports, and the Temporary Flight Restriction program. The increase is to more appropriately align cost to the O&M of equipment.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$12,530	\$21,438	\$9,530	(\$11,908)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The decrease is a result of the TIM program transitioning to the O&M phase, and the decrease from the initial TSA Pre✓™ Application Program start-up cost.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
32.0 Land and Structures	\$0	\$1	\$0	(\$1)

The FY 2015 request more appropriately aligns estimates with actual program costs.

TSA Pre ✓™ Application Program – Fee Mission Statement

The mission of the TSA Pre ✓™ Application Program is to increase the number of individuals eligible for expedited screening. This prescreening initiative conducts risk assessments on passengers who voluntarily participate prior to their arrival at the airport checkpoint. If TSA determines an individual is a low risk traveler, that individual may be eligible for expedited screening.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	-	-	3,020	3,020

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Transportation Security Support

I. Appropriation Overview

A. Mission Statement for Transportation Security Support:

The Transportation Security Administration (TSA) is an agency of more than 53,600 FTE with approximately \$7.3 billion in budget authority, regulatory and law enforcement authorities, and a nationwide presence. The management and support of the organization is accomplished by a transportation security support staff in the Washington, D.C. metropolitan area and five Mission Support Centers (MSCs).

B. Budget Activities:

Intelligence - The Office of Intelligence and Analysis (OIA) receives, assesses, and distributes intelligence information to support TSA's mission of securing the transportation system. TSA-OIA also conducts strategic operational and tactical risk-based security planning. TSA's FY 2015 Request proposes to realign and incorporate the Intelligence PPA within TSA's Intelligence and Vetting (formerly known as Transportation Threat Assessment and Credentialing) appropriation. This realignment helps create efficiencies among TSA's intelligence analysis and vetting programs and enhance mission effectiveness to support an intelligence-driven, risk-based approach to our counterterrorism mission.

Headquarters Administration - Headquarters (HQ) Administration provides all aspects of the support infrastructure required to sustain TSA's nation-wide operations. These activities include serving as the central point on policy development, performance management, facilities management, financial management, acquisition, civil rights protection, legal advice, internal conduct and audits, and providing a safe and healthy work environment for employees.

Human Capital Services – Human Capital Services (HCS) includes all services that support the recruitment, assessment, servicing, payroll, and career development of TSA's employees at headquarters, field offices, airports, and other locations.

Information Technology – Information Technology (IT) provides the IT infrastructure and services to maintain connectivity, provide productivity tools, and support headquarters and field corporate applications.

C. Budget Request Summary:

The Transportation Security Administration requests 1,886 positions, 1,750 FTE, and \$932,026,000 in appropriated funding for Transportation Security Support in FY 2015. Total adjustments-to-base (ATB) include a reduction of 265 FTP, 245 FTE and \$24,788,000. Included in the total ATBs is the transfer of the Intelligence PPA, 266 FTP, 246 FTE and \$44,561,000, to the Intelligence and Vetting Appropriation, and an increase from the transfer of 1 FTP/FTE from Aviation Security (Airport Management Support PPA) to Information Technology for update/correction from FY 2014 Request.

The Program Changes include a decrease of 6 positions, 6 FTE and a net decrease of \$5,247,000 to:

- Reduce Playbook Operations (\$90,000)
- Leverage efficiencies from Risk Based Security (6 positions, 6 FTE, and \$5,157,000)

II. Summary of FY 2015 Budget Estimates by Program/Project Activity (PPA)

Total Change 2014 to 2015	(266)	(246)	(44,561)

CURRENT SERVICES PROGRAM DESCRIPTION:

TSA's FY 2015 Request proposes to realign and incorporate the Intelligence PPA within TSA's Intelligence and Vetting (formerly known as Transportation Threat Assessment and Credentialing) appropriation. This realignment enables TSA to combine the intelligence and vetting functions to inform daily operations and allow TSA to become a more effective, high-performance, counterterrorism organization.

**Department of Homeland Security
Transportation Security Administration
Transportation Security Support:
Headquarters Administration
Program Performance Justification**
(Dollars in Thousands)

PPA: Headquarters Administration

	Perm. Pos	FTE	Amount
2013 Revised Enacted	1,283	1,019	268,363
2014 Enacted	1,306	1,207	272,250
2015 Adjustments-to-Base	-	-	4,527
2015 Current Services	1,306	1,207	276,777
2015 Program Change	(5)	(5)	(886)
2015 Total Request	1,301	1,202	275,891
Total Change 2014 to 2015	(5)	(5)	3,641

TSA requests 1,301 positions and 1,202 FTE, and \$275.9 million for Headquarters Administration.

Adjustments-to-base include:

- Increase of \$424 thousand for annualization of the 2014 pay raise
- Increase of \$1.272 million for the 2015 pay raise
- Increase of \$1.713 million for retirement contributions
- Increase of \$2.237 million for Working Capital Fund to support Flexible Spending Plan and HSPD-12.
- Decrease of \$43 thousand as part of the total in-line system savings of \$10 million
- Decrease of \$1.076 million for anticipated savings from reductions to non-mission critical travel and training, contract efficiencies, and/or supplies.

Program changes include:

- Decrease of \$29 thousand for reduction of Playbook Operations
- Decrease of 5 FTP, 5 FTE, and \$857 thousand to leverage efficiencies from Risk Based Security

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components that make up this PPA.

(Dollars in millions)

	FY 2014	FY2015
Personnel	\$169.6	\$172.8
Leadership	\$2.1	\$2.1
Internal Management & Controls (IM&C)	\$54.2	\$54.4
Workforce Support	\$18.1	\$18.3
Facilities Management and Physical Security	\$28.2	\$28.3
Total	\$272.2	\$275.9

Headquarters (HQ) Administration provides all aspects of the support infrastructure required to sustain TSA's nation-wide operations. These activities include serving as the central point on policy development, performance management, facilities management, financial management, acquisition, civil rights protection, legal advice, internal conduct and audits, and providing a safe and healthy work environment for employees.

Personnel: \$172.8 million

Included in this PPA are personnel costs for the Offices of the Administrator and Deputy Administrator, Chief of Staff, Policy Coordination and Intergovernmental Affairs, Professional Responsibility, Inspection, Chief Counsel, Finance and Administration (Chief Financial Officer (CFO) and Chief Administrative Officer (CAO)), Legislative Affairs, Acquisition, Civil Rights and Liberties, Ombudsman, and Traveler Engagement (CRLOTE), Security, Training and Workforce Engagement (TWE), and Strategic Communications and Public Affairs.

Leadership: \$2.1 million

Operating expenses are provided to develop the policy and management architecture to guide overall activities, ensure compliance with laws and regulations, and manage external relationships with Congress, the Administration, other oversight entities, and private sector partners. Executive leadership offices include the Office of the Administrator, Deputy Administrator, Chief of Staff, Policy Coordination and Intergovernmental Affairs, Legislative Affairs, and Strategic Communications and Public Affairs.

Internal Management and Controls (IM&C): \$54.4 million

Operating expenses support the day-to-day management of a \$7.3 billion budget and over 53,600 FTE. Offices overseeing internal management and controls include: Professional Responsibility, Inspection, Acquisition, CFO, CAO, Chief Counsel, and Security. The Department of Homeland Security Working Capital Fund is in part, funded under the IM&C which funds DHS-wide and government-wide activities such as Financial Statement Audit, Internal Control Audit, Flexible Spending Plan, Strategic Sourcing, HSPD-12, and Consolidated Subscription Services.

Workforce Support: \$18.3 million

Ensure that the more than 53,600 FTE have an excellent working climate and a safe and healthful environment while performing TSA's mission through the following programs: injury prevention, accident investigation and reporting, investigation of safety and health complaints, radiation safety, and health facilities. In addition, these programs ensure fair and lawful treatment of employees and the public.

Facilities Management and Physical Security: \$28.3 million

Facility and management support for HQ, the Freedom Center, the Franconia Warehouse, and the Mission Support Centers (MSCs). The Franconia Warehouse is used to stage TSA equipment prior to deployment, to store special purpose consumables, and to temporarily store property and equipment during construction projects. The MSCs are the central field service support mechanism for TSA across all transportation modes.

PROGRAM OFFICES

Acquisition – Executes contracts and other agreements for the supplies and services needed by TSA to accomplish its mission. This office provides subject matter expertise in the areas of acquisition, field office acquisition guidance, grants management, requirements development, and program management.

Chief Administrative Officer – Develops and implements administrative service programs, policies, and functions to include the Occupational Safety Health and Environment (OSHE), Property Management, Field Real Estate Services, Real Estate Leasing, Building Management Services, and Information Management Programs. These programs provide the following services:

- OSHE ensures TSA is in compliance with Federal regulations, DHS policy, and TSA policy and guidance in the areas of safety, health, and environmental services;
- Property Management provides accountability of all personal property owned by TSA, manages the fleet and transportation program, transit benefits, and HQ parking;
- Field Real Estate Services provides facilities services for field workspace locations by managing office and airport space allocations, lease acquisitions, design, construction and renovation of leased space, and furniture acquisition;
- Real Estate Leasing is the acquisition authority for TSA contract management services and is responsible for the direct acquisition of real property and all related activities including the acquisition of real property rights or interests, assignment and utilization of space, facilities management and improvements, and disposal of real property;
- Building Management Services provides building management and facilities support to TSA facilities in the DC Metro region; and
- Information Management Programs manage official TSA Forms, the directives management coordination and internal communication process, and the records management scheduling and storage activities, including the vital records coordination with emergency preparedness officials.

Chief Counsel – Delivers legal services to all mission areas, components, and staff, covering all substantive legal areas applicable to TSA. The comprehensive and inclusive array of services includes regulations and security standards, enforcement and incident management, litigation, procurement, employment and civil rights, ethics, information law, fiscal law and liability management, drafting Congressional testimony and reviewing legislation.

Chief Financial Officer – Obtains the necessary resources to support TSA's critical mission and ensures these resources are used efficiently by providing effective financial systems and robust internal funds controls. Provides planning guidance to align the TSA budget with DHS goals and objectives and provides performance guidance and assistance to ensure goals and objectives are executed.

Inspection – Ensures the integrity, efficiency, and effectiveness of TSA's workforce, operations, and programs through objective audits, covert testing, inspections, and criminal investigations.

Security – Oversees and administers the agency-wide physical, personnel, and internal security policies and procedures, thereby ensuring a safe and secure workplace for its employees, and effectively determining the employment suitability of all TSA personnel, including contractors. Conducts assessments and reviews of TSA records to identify Sensitive Security Information (SSI) and, if necessary, redact SSI from those records relating to litigation, Freedom of Information Act, and other agency requests.

Civil Rights & Liberties, Ombudsman, and Traveler Engagement – Includes the following divisions:

- Civil Rights provides Equal Employment Opportunity (EEO) services including education, traditional counseling, mediation, and formal complaint investigation;
- Disability and Multicultural Program assures compliance and performs outreach and engagement with the disabled and multicultural communities to ensure that TSA's security screening policies, procedures, and practices do not discriminate against travelers on the basis of disability, race, ethnicity, national origin, religion, or gender. The Office manages TSA Cares which provides a dedicated toll-free helpline for passengers with disabilities and medical conditions and their loved ones who want to prepare for the screening process prior to flying;
- Ombudsman provides neutral, informal, confidential, and independent conflict resolution services for TSA employees and serves as the Passenger Ombudsman to resolve traveler-related screening issues and complaints;
- Privacy Office ensures that privacy awareness and compliance requirements are infused in all TSA programs; and

Strategic Communications and Public Affairs (SCPA) – Oversees the communications, media relations, public liaison, speechwriting, and all Web communication initiatives including the TSA Blog and social media activities. Audiences include the public, the media, Congress, TSA employees, internal stakeholders, and foreign partners. OSCPA aims to increase public understanding of security procedures and agency policies and to prepare the public to navigate security.

Legislative Affairs (LA) – Serves as TSA’s primary interface with Congress. LA develops and advances TSA’s legislative agenda and priorities on Capitol Hill and prepares agency officials for appearances before Congress. In addition, LA develops and implements a comprehensive, proactive legislative strategy to inform Congress of TSA’s activities through briefings, meetings, tours, and responses to Congressional inquiries.

Office of Professional Responsibility – Ensures fair and consistent disciplinary practice TSA-wide. This includes reviewing and adjudicating allegations of misconduct for senior level and law enforcement employees, tracking and oversight of misconduct cases, and adjudicating appeals of adverse actions issued against Transportation Security Officers.

Training and Workforce Engagement – Oversees the development and delivery of all workforce engagement, training, learning, employee formal development programs, and training programs for industry and international partners to support successful execution of TSA’s mission.

MAJOR ACQUISITIONS:

PPA: Human Capital Services

	Perm. Pos	FTE	Amount
2013 Revised Enacted	259	228	202,997
2014 Enacted	265	246	204,250
2015 Adjustments-to-Base	-	-	263
2015 Current Services	265	246	204,513
2015 Program Change	(1)	(1)	(298)
2015 Total Request	264	245	204,215
Total Change 2014 to 2015	(1)	(1)	(35)

TSA requests 264 positions and 245 FTE, and \$204.2 million for the Human Capital Services PPA.

Adjustments-to-base include:

- Increase of \$94 thousand for annualization of the 2014 pay raise, and
- Increase of \$281 thousand for the 2015 pay raise
- Increase of \$278 thousand for retirement contributions
- Decrease of \$390 thousand for anticipated savings from reductions to non-mission critical travel and training, contract efficiencies, and/or supplies.

Program Changes include:

- Decrease of 1 FTP, 1 FTE, and \$298 thousand for leveraging efficiencies from Risk Based Security

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components that make up this PPA.

(Dollars in Millions)		
	FY 2014	FY 2015
Personnel	\$33.2	\$38.0
Recruitment, Assessment, and Personnel Administration	\$128.2	\$133.2
Other Human Capital Services	\$34.2	\$24.4
Leadership and Career Programs	\$8.6	\$8.6
Total	\$204.2	\$204.2

Human Capital Services (HCS) maintains oversight of all Human Resources (HR) contractual activities, develops policies, guidance, and programs that are used to identify and promote the best and most efficient HR practices, thereby allowing TSA to establish and administer programs necessary to create and sustain a diverse and highly skilled workforce.

Training and Workforce Engagement (TWE) is the business leader for learning, employee development, and workforce engagement for TSA. It ensures alignment of agency training and workforce engagement initiatives with security capability and program changes required to execute the agency's counterterrorism mission across all transportation modes

Personnel: \$38.0 million

This PPA includes personnel costs to support all HR and training and development activities.

Recruitment, Assessment, and Personnel Administration: \$133.2 million

These activities provide HR Services to the workforce located in 448 airports in all 50 States, the District of Columbia, and U.S. Territories. Services are provided via HRAccess and include recruitment and hiring, personnel transactions, benefits processing, payroll processing, workforce planning, position management/position classification and help desk. HRAccess aligns with the Enterprise Architecture of DHS and leverages available e-systems that create efficient services and processes. As a result, TSA benefits from improved customer service both through feedback and stakeholder communications, innovative approaches utilizing automated solutions and Federal best practice applications, and improved efficiency through system/process integration resulting in reduced overhead.

Other Human Capital Services: \$24.4 million

Other Human Capital Services include employee relations, collective bargaining, program management support of Human Capital systems, strategic Human Capital planning, reasonable accommodation, management of the Worker's Compensation program, and other mandatory programs – including drug and alcohol testing, Unemployment Compensation, and the Working Capital Fund.

In February 2011, TSA issued a Determination to allow election for union representation if conducted in a manner consistent with TSA's security mission. In August 2012, TSA reached an agreement with the American Federation of Government Employees (AFGE) over the non-security employment issues allowed in the Determination; and was ratified in November 2012. The contract, which covers three years, became effective on December 9, 2012. The Partnership Office coordinates the implementation of over 75 items contained in contract, provides training on the new contract, and provides guidance on the application of the contract. In January 2013, TSA stood up a Unitary Dispute Resolution System which addresses grievances, workplace disputes, alleged violations of the Collective Bargaining Agreement, and disciplinary actions.

The Workers' Compensation Program Office oversees the TSA Workers' Compensation Federal Employees Compensation Act program and the TSA Nurse Case Management Program. The Program office established the Periodic Roll Initiative in 2007. The initiative is a joint effort with the Nurse Case Management team in which all of the long term disability (Periodic Roll) cases are examined for opportunities to return employees to work when medically feasible. To ensure injured workers receive expedited medical care, TSA uses a diagnostic testing network to schedule and provide Magnetic Resonance Imaging (MRI) and Computed Tomography (CT) scans for employees with work-related injuries. This service expedites the scheduling of MRI and CT Scans at a reduced cost. IT also schedules appointments with local radiology and diagnostic imaging centers at the earliest possible date, providing the employee's physician with an image and image study within 24 hours of testing. This enables the physician to provide accurate and timely diagnosis for quality medical care and treatment which often result in an expedited return to work for the injured employee and offers the best chance for a successful recovery from the work related injury.

The Department of Homeland Security Working Capital Fund funds DHS-wide and government-wide activities such as National Finance Center Payroll Services and Reporting, DHS Executive leadership Development, and National Defense University.

Leadership and Career Programs: \$8.6 million

These programs cover the training and development of Headquarters and field staff. TWE works closely with TSA leadership to develop and administer programs to prepare for future leadership needs and fulfill the succession planning mandated by the Office of Personnel Management (OPM) and DHS. The program will identify the most critical current and future senior leadership requirements, prepare a pipeline of talented and motivated leaders at all levels, and identify the best external sources of recruitment when internal sources are insufficient to meet critical needs.

Succession Planning provides the opportunity for current leaders to make an investment in the development of future leaders and in the long-term success of TSA. The program has launched four (4) leadership programs targeting different pools of applicants for critical positions. The DHS Senior Executive Service Candidate Development Program is a formal program operating under OPM and DHS rules to develop candidates who will seek certification from an OPM-sponsored Qualifications Review Board. Upon completion of the requirements, and once certified, the employee will be eligible for non-competitive selection to executive positions.

The Senior Leadership Development Program strengthens leadership and technical competencies of senior leaders in TSA. The Mid-Level Leadership Development Program builds TSA leadership strength at the mid-career level and helps retain experienced employees with strong leadership skills. The TSA Resident Program is a formal career development program designed to attract exceptional candidates with diverse backgrounds into targeted entry-level positions.

The professional development program provides mission-related training that is beneficial for an employee either in his/her current position or for professional development that will increase the employee's ability to contribute to TSA's mission in another capacity. Enhanced career development through rotations and developmental assignments, along with certificate programs, are intended to increase employees' proficiency in writing and other key competencies needed to support TSA's mission. The TSA Mentoring Programs will also contribute to the overall TSA mission as well as employees' professional and personal development through the transfer of knowledge and the sharing of networks that will build a strong community of leaders.

TSA leadership training programs provide competency-based training programs for team leaders, supervisors and managers. The programs fulfill leadership training requirements defined by OPM, the DHS Leader Development program, and TSA. Estimated projections for FY 2014/2015 are that approximately 2,000 seats will be offered in leadership training programs, both on-line and in a classroom setting.

MAJOR ACQUISITIONS:

HRAccess

TSA HRAccess Program is responsible for performing the full range of Human Capital operations, seamlessly in an end-to-end process supporting the entire life cycle of more than 53,600 TSA FTE, including those at 448 airports in all 50 states, and US Territories. These processes include recruiting, hiring, personnel transactions, payroll, benefits, and help desk. HRAccess aligns with the DHS Enterprise Architecture and leverages available e-systems to create efficient services and processes. As prescribed by ATSA, TSA must provide security for all modes of transportation; HRAccess supports this mission by providing competitive commercial sourcing of human capital services to furnish the full range of human capital support to all employees, in order to maintain a diverse and highly qualified workforce.

The HRAccess investment is to be funded out of the Human Capital Services PPA in FY 2015. \

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
125,940	119,510	119,114

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Maintenance – 119,114	Enterprise Human Capital	HRAccess address recruitment and hiring, personnel transactions, benefits processing, payroll processing, workforce planning, position management/position classification and help desk.

2015 Total Request	321	303	451,920
Total Change 2014 to 2015	1	1	10,920

TSA requests 321 positions, 303 FTE, and \$451.9 million in FY 2015 for the Information Technology PPA.

Adjustments-to-base:

- Increase from transfer of 1 FTP/FTE from Aviation Security (Airport Management Support PPA) for update/correction from FY 2014 Request
- Increase of \$117 thousand for annualization of the 2014 pay raise
- Increase of \$351 thousand for the 2015 pay raise
- Increase of \$352 thousand for retirement contributions
- Increase of \$9.9 million for HSPD-12 implementation
- Increase of \$4.5 million for Enterprise License Agreement costs
- Decrease of \$84 thousand as part of total In-line system savings of \$10 million
- Decrease of \$153 thousand for anticipated savings from reductions to non-mission critical travel and training, contract efficiencies, and/or supplies.

Program Changes:

- Decrease of \$4.002 million to leverage efficiencies from Risk Based Security
- Decrease of \$61 thousand for reduction of Playbook Operations

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of this PPA:

(Dollars in millions)		
	FY 2014	FY 2015
Core Information Technology Program	\$371.7	\$389.3
Financial Management Systems	\$17.7	\$17.7
Working Capital Fund	\$51.6	\$44.9
Total	\$441.0	\$451.9

Core Information Technology (IT) Program: \$389.3 million

A total of \$389.3 million and 321 FTP/303 FTE supports the core IT and telecommunications infrastructure for all TSA enterprise-wide IT services that assist in accomplishing TSA's mission. The core enterprise IT infrastructure supports the technology assets of Headquarters, field locations, and TSA Freedom Center personnel. The personnel equipment requires a large wide area network to support the information needs of the TSA user base. TSA provides support for the large distributed user base through robust IT engineering efforts, infrastructure operations, and enterprise application services. Resources are allocated for ongoing operations and maintenance for the TSA data centers, operation centers, failover resources, applications, operating platform management, database management, application systems, system performance monitoring, and configuration management. Support includes:

- National Help Desk support, which includes software, licensing and software distribution support;
- Headquarters and field IT support;
- Federal Air Marshal Service mission scheduling capabilities;
- Federal Air Marshal Service communications and information systems;
- Security Incident Response;
- Checked baggage and passenger screening data;
- Equipment maintenance and legacy systems support;
- Wireless infrastructure support and maintenance; and
- Technical architecture compliance and enterprise architecture-related support.

The growing needs of the TSA communication security (COMSEC) user base requires TSA to continually enhance secure communications to stakeholders and help desk capability. TSA's cyber security efforts involve the continued modernization of secure communication units as well as infrastructure protection, which includes but is not limited to:

- Firewalls;
- Intrusion detection and prevention;
- Antivirus;
- Content monitoring; and
- Managed Security Services.

TSA also coordinates with DHS IT security organizations including physical, facility, personnel, industrial, and information assurance to perform security programs.

The FY 2015 budget request will support TSA compliance efforts related to Homeland Security Presidential Directive 12 (HSPD-12): *Policy for a Common Identification Standard for Federal Employees and Contractors* and OMB Memorandum M-11-11 *Continued Implementation of HSPD-12 - Policy for a Common Identification Standard for Federal Employees and Contractors* and establish the funds necessary to implement the Personal Identity Verification (PIV) Logical Access Control System (LACS) and integrate TSA applications with PIV authentication across the enterprise. The PIV Application Integration effort will address multiple systems requiring significant modifications to use PIV authentication and to sustain the program in the out years. The following chart depicts the HSPD-12 project implementation schedule of costs funded by the IT PPA:

HSPD-12 Project Schedule
(Dollars in millions)

Project Phase	FY15	FY16	FY17	FY18	FY19
Phase 1 -PIV Full Operational Capability (FOC)	\$4.7	\$4.7	\$4.7	\$4.7	\$4.7
Phase 2 - Oracle Identity Manager Implementation	\$5.2	\$1.3	\$1.3	\$1.3	\$1.3
Phase 3 - Oracle Access Management Implementation		\$4.6	\$0.8	\$0.8	\$0.8
Total Cost	\$9.9	\$10.6	\$6.8	\$6.8	\$6.8

Financial Management Systems: \$17.7 million

Funds are for Interagency Agreements with the United States Coast Guard (USCG) for the use of their financial management system. To address the numerous outdated, legacy financial management systems at many of its Components, DHS has initiated a Department-wide Financial Systems Modernization (FSM) initiative. DHS must invest in modernizing Component financial management systems in order to improve financial accountability and financial reporting, and enable business process standardization.

DHS and TSA determined that TSA must modernize its financial management system in the same timeframe as USCG since the USCG is currently TSA's service provider. TSA identified and analyzed alternative solutions and determined that the path forward for FSM is to migrate, along with USCG, to a shared service provider.

In FY 2015, TSA requires funding to complete the planned migration to a shared service provider. DHS Office of the Chief Financial Officer has requested Financial Systems Modernization funding migration funds totaling \$13.5 million on TSA's behalf. Component-specific funding needs for migration will be funded in the year of execution within this account.

Working Capital Fund (WCF): \$44.9 million

Funds are for activities managed by the DHS WCF which include: e-Training, NFC Payroll Services, Human Capital Business Systems, Capital Planning and Investment Control, DHS Infrastructure Transformation Program, Software Enterprise Licenses and Financial Statement Audit. The \$6.7 million decrease from FY 2014 reflects a realignment of the cost assessment for Enterprise License Agreements from the WCF to an Interagency Agreement with DHS Chief Information Officer, which is funded by the Core IT program.

MAJOR ACQUISITIONS:**Information Technology Infrastructure Program**

The purpose of the IT Infrastructure Program (ITIP) is to provide comprehensive IT support for TSA. The IT Infrastructure is defined as all of the elements employed in the delivery of IT services to users, including the computing, network and telecommunications hardware, software, database management, operating systems software, middleware, help desk, Operations Centers, documentation and video, that is required to protect the Nation's transportation systems while ensuring the freedom of movement for people and commerce. This investment focuses on the Domain of IT Services in support of a government agency. This investment addresses equipment and service needs across various government locations to technically support and expand the IT capabilities of the agency's CONUS and OCONUS workforce. In FY 2014, the TSA Operating Platform (TOP) program was integrated into the ITIP, as the support service TOP provides transitioned from an acquisition activity to an operational capability. In FY 2015, the program management, supporting activities, and associated funding for the FAMSNet program is realigned to the ITIP, as both Infrastructure programs provide common support services in the areas of Active Directory, Information Assurance and Vulnerability Management, Network Monitoring, anti-virus protection, Accreditations and Security Controls, Virtual Private Network (VPN) capabilities, Help Desk Tier II support, and telecommunications systems.

The Information Technology Infrastructure Program investment is funded from the Information Technology PPA in FY 2015.

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
206,127	329,772	373,213

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Maintenance - \$373,213	Information Technology Infrastructure Program	Funds operation costs for ITIP, which provides comprehensive technical infrastructure support for TSA HQ, FAMs, and field locations. This investment addresses IT equipment and service needs across various government and industry contracts attempting to technically support and expand the IT capabilities of the agency's workforce

FAMS Mission and Scheduling Notification System

The FAMS Mission and Scheduling Notification System (MSNS) is an automated system that: Determines allocation of FAMs to flights, based on risk management strategy; Coordinates and communicates mission assignments with Field Offices and FAMs; Reserves airline seating and hotels with airlines and hotels; and Tracks execution and support operational modifications. By using MSNS fewer employees are needed to conduct mission scheduling more efficiently. This provides better security and causes less disruption to the airline industry. The primary beneficiary for MSNS is the FAMS. MSNS currently supports all aspects of the mission need. Specific features include: 24x7x365 support for all aspects of capability, Industry-leading planning and manpower allocation processes and software, Process more than 45,000 airline seat tickets per month, including reservations, changes, cancellations, More than 100 specific reports on all aspects of mission execution.

The FAMS Mission and Scheduling Notification System investment is funded from the Information Technology PPA in FY 2015. The program was previously funded from the FAMS Appropriation and realigned to the Support Appropriation in FY 2014.

IV. Program Justification Changes

**Department of Homeland Security
Transportation Security Administration
Transportation Security Support:
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 1: Reduce Playbook Operations
PPA: Headquarters Administration
Information Technology
Program Decrease: Positions 0, FTE 0, Dollars \$(90)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							1,627	1,510	732,760
Program Decrease							-	-	(90)
Total Request	1,572	1,253	662,512	1,626	1,509	713,250	1,627	1,510	732,670

Description of Item:

The FY 2015 request includes a total decrease of \$20 million across the Aviation Security and Transportation Security Support appropriations for a reduction to Playbook Operations. This reduction will also result in a decrease to those programs that support Playbook operations. The FY 2015 request proposes a program decrease in the Transportation Security Support appropriation of \$90 thousand – \$29 thousand in the Headquarters Administration PPA and \$61 thousand in the Information Technology (IT) PPA. The remaining \$19.910 million reduction is in the Aviation Security appropriation.

Justification:

As TSA places greater emphasis on risk based security initiatives, TSA can reduce the resources devoted to Playbook while maintaining the layer of security with a more targeted focus on risk. The reduction in the resources dedicated to Playbook has a corresponding decrease to support function due to a reduced need for IT, career development, and security services.

Impact on Performance (Relationship of Increase to Strategic Goals):

The proposed reduction will not have an impact on the services provided by the support programs.

**Department of Homeland Security
Transportation Security Administration
Transportation Security Support:
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 2: Leverage Efficiencies from Risk Based Security (RBS)
PPA: Headquarters Administration
Human Capital Services
Information Technology
Program Decrease: Positions (6), FTE (6), Dollars \$(5,157)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							1,892	1,756	937,273
Program Decrease							(6)	(6)	(5,157)
Total Request	1,831	1,481	865,509	1,891	1,755	917,500	1,886	1,750	932,116

Description of Item:

The FY 2015 request includes a total decrease of \$100 million for leveraging efficiencies from Risk Based Security (RBS). These efficiencies will also result in a decrease to those programs that support screening operations. The FY 2015 request proposes a total program decrease to the Transportation Security Support Appropriation of 6 FTP, 6 FTE and \$5.157 million:

- 5 FTP, 5 FTE, and \$857 thousand to Headquarters Administration,
- 1 FTP, 1 FTE, and \$298 thousand to Human Capital Services, and
- \$4.002 million to Information Technology.

Justification:

Due to the reduction in the Screener Workforce from RBS initiatives, TSA expects a corresponding reduction in positions, FTE, and contract support for support programs including recruitment, background investigation, professional development, drug testing, financial management, health and safety, and IT programs.

Impact on Performance (Relationship of Increase to Strategic Goals):

The proposed reduction will not have an impact on the services provided by the support programs.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Transportation Security Administration related to transportation security support [and intelligence] pursuant to the Aviation and Transportation Security Act (Public Law 107–71; 115 Stat. 597; 49 U.S.C. 40101 note), [\$962,061,000] *\$932,026,000*, to remain available until September 30, [2015: Provided, That of the funds appropriated under this heading, \$20,000,000 may not be obligated for "Headquarters Administration" until the Administrator of the Transportation Security Administration submits to the Committees on Appropriations of the Senate and the House of Representatives detailed expenditure plans for air cargo security, checkpoint support, and explosives detection systems refurbishment, procurement, and installations on an airport-by-airport basis for fiscal year 2014: Provided further, That these plans shall be submitted not later than 60 days after the date of enactment of this Act] 2016. year 2014: Provided further, That these plans shall be submitted not later than 60 days after the date of enactment of this Act] *2016*.

year 2014: Provided further, That these plans shall be submitted not later than 60 days after the date of enactment of this Act] *2016*.

Language Provision	Explanation
1 ...[and intelligence]	The FY 2015 request proposed to realign the Intelligence PPA from the Transportation Security Support appropriation to the Transportation Threat Assessment and Credentialing (TTAC) appropriation, and renaming the TTAC appropriation as the Intelligence and Vetting appropriation. This proposal more closely aligns resources with missions and programs. The updated wording reflects this change.
2 ...[\$962,061,000] <i>\$932,026,000</i> ...	Dollar change only. No substantial change proposed.
3 ...[2015: Provided, That of the funds appropriated under this heading, \$20,000,000 may not be obligated for Headquarters Administration" until the Administrator of the Transportation Security Administration submits to the Committees on Appropriations of the Senate and the House of Representatives detailed expenditure plans for air cargo security, checkpoint support, and explosives detection systems refurbishment, procurement, and installations on an airport-by-airport basis for fiscal year 2014: Provided further, That these plans shall be submitted not later than 60 days after the date of enactment of this Act] <i>2016</i> ...	Change Fiscal Year and delete provisions.

Headquarters Administration Mission Statement

TSA Headquarters Administration include such critical functions Assistant Secretary and Deputy Assistant Secretary, Chief of Staff, Policy Coordination and Intergovernmental Affairs, Professional Responsibility, Inspection, Chief Counsel, Chief Financial Officer, Chief Administrative Officer, Legislative Affairs, Acquisition, Civil Rights and Liberties, Ombudsman, and Traveler Engagement, Security, Training and Workforce Engagement, and Strategic Communications and Public Affairs.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	116,330	123,571	125,874	2,303
11.3 Other than Full-Time Permanent	2,042	2,169	2,210	41
11.5 Other Personnel Compensation	6,140	5,622	6,644	1,022
11.7 Military Personnel	-	900	-	(900)
12.1 Civilian Personnel Benefits	35,190	37,380	38,077	697
Total, Salaries & Benefits	159,702	169,642	172,805	3,163

Salaries and Benefits represent costs for 1,202 FTE. The FY 2015 request reflects a net increase for 2015 Pay COLA and retirement contribution of 1,713.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$5,150	\$4,863	\$4,885	\$22

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$266	\$251	\$252	\$1

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$1,633	\$1,542	\$1,549	\$7

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$22,875	\$21,601	\$21,702	\$101

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$356	\$336	\$338	\$2

Communications, utilities, and miscellaneous charges includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$10,709	\$10,113	\$10,160	\$47

Advisory and assistance services includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2015 request reflects a net increase in advisory and assistance services to account for the Financial Systems Modernization, and also to account for the reductions taken to leverage Risk Based Security (RBS) efficiencies.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$43,020	\$40,621	\$40,817	\$196

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included under this object class are contracts for security support, EEO support, and corporate training.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$13,751	\$12,985	\$13,046	\$61

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.4 Operation and Maintenance of Facilities	\$5,553	\$5,244	\$5,268	\$24

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$815	\$770	\$773	\$3

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$1,562	\$1,475	\$1,482	\$7

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$1,625	\$1,535	\$1,542	\$7

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

Human Capital Services Mission Statement

Human Capital Services include all the activities that support the recruitment, assessment, servicing, and payroll of TSA's Transportation Security Officers and other workforce at headquarters, field locations, and airports, and personnel policies, programs and systems and training and development activities.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	23,055	23,516	23,711	195
11.3 Other than Full-Time Permanent	459	464	472	8
11.5 Other Personnel Compensation	766	588	788	200
12.1 Civilian Personnel Benefits	5,969	6,040	6,139	99
13.0 Benefits for Former Personnel	6,726	6,806	6,918	112
Total, Salaries & Benefits	36,975	37,414	38,028	614

Salaries and Benefits represent costs for 245 FTE. The FY 2015 request reflects a net increase for 2015 Pay COLA and retirement contribution of 278.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$2,205	\$2,216	\$2,209	(\$7)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$261	\$262	\$261	(\$1)

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$96,927	\$97,402	\$97,076	(\$326)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal government. The FY 2015 request reflects a decrease in travel due to efficiencies.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$46,228	\$46,455	\$46,209	(\$246)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included under this object class are contracts for security support, EEO support, and corporate training. The FY 2015 request reflects a decrease in travel due to efficiencies.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$19,892	\$19,990	\$19,923	(\$67)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2015 request reflects a decrease in travel due to efficiencies.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$225	\$226	\$225	(\$1)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$159	\$160	\$159	(\$1)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Federal Air Marshals

I. Appropriation Overview

A. Mission Statement for Federal Air Marshal Service:

The Federal Air Marshal Service (FAMS) promotes public confidence in our Nation's civil transportation systems through the effective risk-based strategic deployment of Federal Air Marshals (FAMs) in both air and land based mission-related assignments. The organization's primary focus is to detect, deter, and defeat terrorist or other criminal hostile acts targeting U.S. air carriers, airports, passengers, and crew.

B. Budget Activities:

Management and Administration (M&A)

The FAMS's mission demands a host of critical planning, operational, and support programs to protect the public from the threat of a terrorist attack or other criminal activity. The FAMS' M&A programs encompass vital enforcement, information management, and infrastructure components necessary to support core operations. Examples include the FAMS's participation in Joint Terrorism Task Force activities, management and implementation of a sophisticated flight/mission scheduling and notification system, and performance of mission critical workforce management, command and control, information technology, logistics, and related services.

Travel and Training (T&T)

In order to maintain optimum readiness and to perform its primary operational functions, the FAMS requires extensive training and mission travel capabilities. FAMs must undergo continuous training to maintain and expand their expertise in the full-range of skills necessary to operate within the transportation domain, to include specialized tactics, enforcement, surveillance detection, marksmanship, and other skill sets. Furthermore, this PPA funds FAMS's mission travel, which is an integral component of the international and domestic flight coverage activities that are core to the FAMS mission.

C. Budget Request Summary:

TSA's FY 2015 Request proposes to realign from the FAMS appropriation \$803.909 million into a single PPA within TSA's Aviation Security appropriation. This consolidation of FAMS into Aviation Security better reflects TSA's organization and management structure and will enable the Agency to more rapidly apply its law enforcement and related resources to meet emerging threats.

TSA's FY 2015 Request also proposes to realign from the FAMS appropriation \$14.698 million into TSA's Surface Transportation Security appropriation for the Visible Intermodal Prevention and Response (VIPR) Program. Historically, the VIPR Program has received funding in three appropriations: the Federal Air Marshals (FAMS), Aviation Security, and Surface

Transportation. The consolidation of funding into one appropriation will increase transparency on analysis and reporting, and will result in more efficient management of business processes.

For reference, the following chart shows the historical FAMS PPAs for FY 2013 – FY 2015:

	FY 2013 Revised Enacted	FY 2014 Base	FY 2015 Request¹
Management & Administration	\$769.8	\$708.0	\$709.4
Travel & Training	104.8	110.6	105.5
Total	\$874.6	\$818.6	\$814.9

¹FY 2015 breakout provided for display purposes only and includes \$800.2M requested in Aviation Security and \$14.7M requested in Surface Transportation Security

Management and Administration Mission Statement

The Management and Administration (M&A) PPA funds the FAMS' staffing/payroll requirements, which include: salary/compensation, benefits, awards, overtime, etc. In addition, M&A funds critical administrative and operational requirements including the FAMS' mission scheduling system and information technology requirements, rent, wireless communications systems; recruitment/hiring and retention services (background investigations, security clearances, medical exams/physicals, drug tests); and a host of program support services and requirements (interagency agreements, vehicle leasing, shipment of goods,

utilities/communications, janitorial services, supplies, duty equipment, printing, physical security, etc.)

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	362,929	367,418	-	(367,418)
11.3 Other than Full-Time Permanent	12,598	12,754	-	(12,754)
11.5 Other Personnel Compensation	104,312	105,604	-	(105,604)
11.8 Special Personal Services Payments	626	635	-	(635)
12.1 Civilian Personnel Benefits	186,940	189,253	-	(189,253)
Total, Salaries & Benefits	667,405	675,664	-	(675,664)

The FY 2015 Salaries and Benefits request includes a transfer of \$675,664,000 to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$2,251	\$711	\$0	(\$711)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. This funding will be used for local and extended travel to conduct a multitude of transit inspections program management. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$259	\$82	\$0	(\$82)

Transportation of things includes all costs associated with the care of items in the process of being transported, as well as other services associated with the transportation of things. The FAMS uses this object class series for central billing and for the shipment of goods between Headquarters and Field Offices. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$3,372	\$1,066	\$0	(\$1,066)

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$14,410	\$4,553	\$0	(\$4,553)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The majority of the FAMS' commercial office leases for Headquarters and field offices are included in this category. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$14,113	\$4,460	\$0	(\$4,460)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FAMS uses this object class series for PDA and cell phone air time and general office utilities such as metered gas, electricity, water usage, etc. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
24.0 Printing and Reproduction	\$9	\$3	\$0	(\$3)

Printing includes all costs for printing and reproduction obtained from private sector or other federal entities. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$13,088	\$4,135	\$0	(\$4,135)

Advisory and assistance services primarily include services acquired by contract from non-Federal sources (i.e., the private sector, foreign governments, State and local governments, tribes, etc.). The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$22,403	\$7,078	\$0	(\$7,078)

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25.1. The FAMS uses this series for additional support for the Mission Scheduling and Notification System, support services for other elements (including contractors supporting contracting/procurement efforts) within the Service. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$10,748	\$3,397	\$0	(\$3,397)

Purchases from Government Accounts include costs for purchases from other Federal agencies or accounts that are not otherwise classified. For the FAMS, this includes IT Support for the entire FAMS, facility maintenance support from the FAA, office equipment maintenance and security clearances. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.4 Operation and Maintenance of Facilities	\$2,958	\$935	\$0	(\$935)

Operation and maintenance of facilities includes all payments for the operation and maintenance of facilities when done by contract with either the private sector or another Federal Government account. The FAMS uses this object class series for custodial services and facility build out/enhancements of current leases. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.6 Medical Care	\$1,761	\$556	\$0	(\$556)

The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$5,384	\$1,701	\$0	(\$1,701)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal account. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$2,703	\$854	\$0	(\$854)

Supplies and materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FAMS uses this series for IT supplies and materials, office supplies and fuel. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$8,890	\$2,809	\$0	(\$2,809)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. Included in this total are costs for IT equipment and software, furniture and other office equipment. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

Travel and Training Mission Statement

The Travel and Training (T&T) PPA is used to cover all travel and training requirements that support the FAMS program. The travel portion of the PPA supports the FAMS requirements for mission travel (per diem and lodging) and associated costs, such as airport parking and automated travel account services. Mission travel resources are essential to the Federal Air Marshals ability to perform scheduled flight coverage on both domestic and international operations and provide the FAMS the necessary mobility and flexibility to perform their enforcement and counterterrorism missions. T&T funds also support other FAMS travel required for non-mission and training purposes. T&T also supports the FAMS comprehensive training requirements to include TP I (Basic Law Enforcement Training) and TP II (FAMS specific training) for new Federal Air Marshals and all recurrent field training. This PPA provides funding for all associated training requirements, such as Federal Law Enforcement Training Center (FLETC) costs, training-related ammunition, TP II instructor contracts, hotel lodging contracts for Atlantic City classes, training supplies, firing range fees, professional and training gear, equipment and clothing. The T&T PPA also supports the required professional training for other professional development and career training as required.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
Total, Salaries & Benefits	-	-	-	-

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$97,947	\$103,800	\$0	(\$103,800)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The bulk of these costs directly support Federal Air Marshal domestic and international mission travel, which is the primary mission of the Service. Also included in this object class are travel costs related to training, conference attendance, and site visits. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$1,049	\$1,041	\$0	(\$1,041)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The majority of the FAMS' commercial office leases for Headquarters and field offices are included in this category. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$2,223	\$2,206	\$0	(\$2,206)

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25. The FAMS uses this object class series for FLETC training costs, hotel lodging contracts for TP II training and field recurring range fees for Federal Air Marshals' quarterly requalification. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$1,181	\$1,172	\$0	(\$1,172)

Purchases from Government Accounts include costs for purchases from other Federal agencies or accounts that are not otherwise classified. For the FAMS, this includes IT Support for the entire FAMS, facility maintenance support from the FAA, office equipment maintenance and security clearances. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$2,403	\$2,384	\$0	(\$2,384)

Supplies and materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FAMS uses this series for IT supplies and materials, office supplies and fuel. The FY 2015 request includes a transfer to the Aviation Security and Surface Transportation Security Appropriations.

Department of Homeland Security

United States Coast Guard

Fiscal Year 2015
Component Overview
Congressional Justification

Component Overview

The Coast Guard is the principal Federal agency responsible for maritime safety, security, and environmental stewardship in U.S. ports and inland waterways, along the coasts, and on the high seas. Since 1790, the Coast Guard has safeguarded our Nation's maritime interests and natural resources on our rivers, ports and harbors, offshore, and in theaters around the world. The Coast Guard's unique authorities, capabilities, competencies and partnerships as a military, law enforcement, regulatory and humanitarian military organization enable the Service to respond to all threats and hazards in a manner that provides exceptional value to our Nation. The Coast Guard's highly skilled active duty, reservist, and civilian workforce are always ready to:

Protect those on the sea: leading responses to disasters and threats, ensuring a safe and secure maritime transportation system, preventing incidents, and rescuing those in distress.

Protect the Nation from threats delivered by sea: enforcing laws and treaties, securing our ocean resources and ensuring the integrity of our maritime domain from illegal activity and potential acts of terrorism.

Protect the sea itself: regulating hazardous cargo transportation, holding responsible parties accountable for environmental damage and cleanup, and protecting living marine and natural resources.

The breadth of Coast Guard unique authorities, capabilities, competencies and partnerships is essential to the Department of Homeland Security's layered security concept. The Coast Guard's maritime role in this strategy focuses on three regions; high seas, littorals, and inland waters. This strategy seeks to mitigate risks to our national security by optimizing the use of our assets and authorities throughout the maritime continuum in order to most effectively execute our missions and Department of Homeland Security (DHS) programs.

FY 2015 Budget Request

The Coast Guard's FY 2015 Budget preserves today's critical front-line operations and invests in tomorrow's Coast Guard by continuing recapitalization efforts for new cutters, boats, aircraft, systems and infrastructure. In 2015, the Coast Guard will implement efficiencies and better business practices, overlaid with a near and long-term operational assessment, to strategically allocate resources to optimize mission performance. This approach sustains the balance between today's operational requirements and continued investment in recapitalization.

The Coast Guard's FY 2015 strategic and budget priorities are to:

1. Invest in long-term Operational Capacity;
2. Strengthen Resource and Operational Stewardship; and
3. Preserve Critical Front-Line Operations

Invest in long-term Operational Capacity

Dedicated investment to build boats, cutters, aircraft, and corresponding infrastructure capable of meeting today's threats and those of the future is essential to the Coast Guard's continued role as America's maritime first responder. The current condition and serviceability of the Coast Guard's legacy surface fleet and aircraft, and the projected timelines to complete replacement of these assets require continued investment in surface and air recapitalization programs to maintain the capability to operate.

To strengthen DHS' layered security approach offshore, the FY 2015 Budget provides for the acquisition of the eighth National Security Cutter, which completes the recapitalization of the Coast Guard's High Endurance Cutter fleet, two Fast Response Cutters, and continues to invest in pre-acquisition activities for the Offshore Patrol Cutter and Polar Icebreaker. The budget also continues sustainment and conversion work on fixed wing and rotary wing aircraft, procurement of cutter boats, and investment in Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) systems.

Strengthen Resource and Operational Stewardship

The FY 2015 Budget reflects sound, risk-based allocation of resources. In 2015, Coast Guard will decommission two High Endurance Cutters (WHECs) that are being replaced by more capable National Security Cutters. The Coast Guard will also decommission eight 110-ft patrol boats, three HC-130 aircraft, and corresponding shore side support personnel while accepting the delivery of new, more capable Fast Response Cutters, HC-144 aircraft, and C-27J aircraft to the fleet. The FY 2015 Budget ensures that our resources are aligned to our Nation's highest priorities in a manner that balances key investments for the future with sustaining essential investment in today's missions and capabilities that provide the highest return on investment.

Preserve Critical Front-Line Operations

The FY 2015 Budget sustains critical frontline operations, including maintaining search and rescue coverage, protecting critical infrastructure and key resources, and preserving operational hours dedicated to proficiency. Field commanders will continue to optimize operational capacity to support safe navigation, safeguard natural resources, protect the environment, detect and interdict

drugs and individuals attempting to enter the United States illegally, and support the Nation's foreign policy objectives and defense operations.

FYHSP Programs

The United States Coast Guard is comprised of the following programs that support achievement of the DHS strategic missions, goals, and objectives.

Maritime Security Operations: The Maritime Security Operations program encompasses activities conducted to detect, deter, prevent, and disrupt terrorist attacks, and other criminal acts in the U.S. maritime domain. The Maritime Security Operations program encompasses activities required by legislative, executive, and policy mandates to detect, deter, prevent, disrupt, and recover from terrorist attacks and other criminal acts in the maritime domain. It includes the execution of antiterrorism, response, and select recovery operations. This program conducts the operational element of the Coast Guard's Ports, Waterways, and Coastal Security mission and complements the other two elements: the establishment and oversight of maritime security regimes, and maritime domain awareness.

Maritime Law Enforcement: The Maritime Law Enforcement program preserves America's jurisdictional rights within our maritime borders and suppresses violations of U.S. Federal law on, under, and over the seas. The Coast Guard is the lead Federal maritime law enforcement agency for enforcing national and international law on the high seas, outer continental shelf, and inward from the U.S. Exclusive Economic Zone (EEZ) to inland navigable waters, including the Great Lakes. The following statutory missions contribute to the Coast Guard's Maritime Law Enforcement program: Drug Interdiction; Migrant Interdiction; Living Marine Resources; and Other Law Enforcement.

Maritime Prevention: The Maritime Prevention program mitigates the risk of human casualties and property losses, minimizes security risks, and protects the marine environment. The following statutory missions contribute to the Coast Guard's Maritime Prevention program: Ports, Waterways, and Coastal Security (PWCS); Marine Safety; and Marine Environmental Protection.

Maritime Response: The Maritime Response program mitigates the consequences of marine casualties and disastrous events. The Coast Guard minimizes loss of life, injury, and property loss by searching for and rescuing persons in distress in the maritime environment. Coast Guard preparedness efforts ensure incident response and recovery resources are fully ready and capable to minimize impact of disasters to people, the environment, and the economy. The following statutory missions contribute to the Coast Guard's Maritime Response program: Search and Rescue and Marine Environmental Protection.

Defense Operations: The Defense Operations program provides unique authorities and capabilities to support the National Military Strategy. The program portfolio comprises eight activities including: Maritime Interdiction Operations; Combating Maritime Terrorism; Port Operations Security and Defense (to include maintaining a Title 10 Reserve force and providing Aids to Navigation support for battle-space preparation); Military Environmental Response Operations; Coastal Sea Control Operations (including providing the Department of Defense assured surface access in ice-covered and ice-diminished waters); Maritime Operational Threat Response (MOTR); Rotary Wing Air Intercept Operations; and Support for Theater Security Cooperation Initiatives.

The statutory mission Defense Readiness contributes to the Coast Guard's Defense Operations program.

Marine Transportation System Management: The Marine Transportation System Management program ensures a safe, secure, efficient and environmentally sound waterways system. The US Coast Guard minimizes disruptions to maritime commerce by assessing and mitigating risks to safe navigation and by providing waterways restoration capabilities after extreme weather events, marine accidents, or terrorist incidents. The Coast Guard works in concert with other Federal agencies, state and local governments, marine industries, maritime associations, and the international community to optimize balanced use and champion development of the Nation's marine transportation system. The following statutory missions contribute to the Coast Guard's Marine Transportation System Management program: Aids to Navigation and Ice Operations.

Cross-Cutting Capital Investments and Maintenance: The Cross-Cutting Capital Investments and Maintenance program is derived from the Acquisition Construction and Improvements (AC&I) and Operating Expenses (OE) sections of the CJ. AC&I funds the acquisition of new capital assets, construction of required facilities, and physical improvements to existing facilities and assets. This program is intended to align with the resource levels contained in the DHS Future Years Homeland Security Program (FYHSP) which capture total AC&I budget authority and the portion of O&M for investments not captured as Mission Support.

Mission Support: The Mission Support program is a portfolio of output-oriented mission support programs. These programs support the needs of the operational forces of the Coast Guard and the maritime community and address crosscutting areas such as research and development, policy and regulatory guidance, asset management, and capabilities. This program includes several information technology (IT) transformational initiatives (excluding acquisition projects) that are designed to improve information sharing within the Coast Guard, strengthen information availability, improve vessel tracking, provide a fully secure IT environment, and enhance financial management and audit practices.

Management and Administration: The Management & Administration program captures activities that provide enterprise leadership, executive support, management and business administration services, human resources management, finance and accounting, and training and recruiting.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**United States Coast Guard
Operating Expenses**

I. Appropriation Overview

A. Mission Statement for Operating Expenses:

The Operating Expenses (OE) appropriation funds the Coast Guard's role as the principal Federal agency providing maritime safety, security, and stewardship to the Nation.

B. Budget Activities:

The OE appropriation funds the annualization of prior-year funding, economic adjustments, and operating and maintenance funding for new and existing Coast Guard Programs, Projects and Activities (PPA). The OE request supports all 11 statutory Coast Guard missions in support of the Coast Guard's six DHS Programs.

C. Budget Request Summary:

The President's Budget requests 47,644 positions, 48,116 FTE, and \$6.751 billion for FY 2015.

The OE request includes \$217.235 million in new funding for the transfer of funds for the Working Capital Fund, annualization of prior year funding and the FY 2014 military pay raise; and provides for the FY 2015 pay increase for military (1.0-percent) and civilian (1.0-percent) personnel; military allowances; and the operation, maintenance, and crewing of systems, vessels, aircraft and shore facilities delivered via the Coast Guard's acquisition programs (e.g., National Security Cutter (NSC), shore facilities, Response Boat-Medium (RB-M), Rescue 21 (R21), Fast Response Cutter (FRC), and HC-144A Maritime Patrol Aircraft (MPA)).

The FY 2015 Budget meets today's needs and challenges, while simultaneously preparing for new and exigent demands. Through a comprehensive internal review of doctrine, policy, operations and mission support structure, the Coast Guard has focused OE resources where they are most needed. The OE adjustments-to-base include decreases of \$251.309 million to execute decommissioning and retirement of legacy assets and to continue the focus on critical frontline operations. Decreases include vessel decommissionings; fixed wing aircraft retirements; shoreside support personnel reductions commensurate with asset divestitures; targeted reductions through military and civilian personnel account management; management and support efficiencies; operational adjustments; the termination of one-time costs; and annualization of prior year management efficiencies. Decreases also include a \$1.433 million savings in mandatory personnel entitlements that are associated with TRICARE reform. In the FY 2015 Budget, DoD proposes a multi-year plan to replace the current three TRICARE plans with a consolidated TRICARE Health Plan. In 2015, the proposal would increase co-pays for pharmaceuticals and implement an enrollment fee for new TRICARE-for-Life beneficiaries (as proposed in the FY 2014 Budget).

Financial Systems Modernization migration funds totaling \$13.6 million for the Coast Guard are requested within the DHS Office of Chief Financial Officer's budget. Coast Guard-specific funding needs for this activity will be funded in the year of execution within this account.

Base adjustment increases include:

- Working Capital Fund – \$0.759 million
- Annualization of FY 2014 Funding – \$51.118 million
- Mandatory Personnel Entitlements – \$83.085 million
- Operational Adjustments – \$10.179 million
- Operating and Maintenance funds for new assets, including follow-on costs related to Shore Facilities, RB-M, R21, and Surface and Air Asset Follow-on – \$72.094 million

Base adjustment decreases include:

- Termination of One-Time FY 2014 Costs – (\$58.397 million)
- Prior Year Management Annualizations – (\$50.843 million)
- Military and Civilian Personnel Account Management, including TRICARE reform – (\$15.433 million)
- Efficiencies – (\$62.896 million)
- Operational Adjustments– (\$29.521 million)
- Asset Decommissionings and Retirements – (\$34.219 million)

Base Re-allocations (non-adds) include:

- Military FTP and FTE Transfer to Civilian – [\$2.442 million]
- PPA Funding Adjustment – [\$35.544 million]

Program Performance Justification
(Dollars in Thousands)**

PPA: I. Military Pay and Allowances

	Perm. Pos	FTE	Amount
2013 Revised Enacted	40,797	40,617	3,368,663
2014 Enacted	40,471	41,051	3,416,580
2015 Adjustments-to-Base	(695)	(443)	18,014
2015 Current Services	39,776	40,608	3,434,594
2015 Total Request	39,776	40,608	3,434,594
Total Change 2014 to 2015	(695)	(443)	18,014

The FY 2015 President's Budget requests \$3.435 billion for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requests funding for expenses related to compensation and benefits for active duty military personnel. This category includes pay, allowances, employer's share of the Federal Insurance Contribution Act (FICA), Social Security credits, and other expenses associated with compensating military personnel. Costs related to compensation are calculated by using the Coast Guard's Standard Personnel Cost (SPC) tables. These tables are updated annually and provide a detailed calculation for each billet, broken down by rank/rate, location—in the United States (INCONUS) or out of the country (OCONUS), which includes Alaska and Hawaii—medical costs and permanent change of station (PCS) expenses. Calculations for medical cost estimates are the same for each billet. Calculations for PCS moves and base pay are based upon rank and location of billet. The FY 2015 submission includes a 1.0-percent pay increase for military personnel and a \$1.433 million decrease from savings associated with TRICARE reform proposals.

The Coast Guard was founded as a military, multi-mission, maritime service. Active duty military personnel ensure the Service remains agile, adaptable, and ready to serve the Nation's maritime interests across a range of dynamic operational environments. As members of one of the Nation's five Armed Forces and the only military service within the Department of Homeland Security, Coast Guard military personnel conduct missions that protect the public, the environment, and U.S. economic interests in the Nation's inland waters, ports, waterways, and coastal regions, territorial sea, and on the high seas.

2015 Total Request	7,868	7,508	787,372
Total Change 2014 to 2015	(57)	(87)	4,498

The FY 2015 President's Budget requests \$787.372 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requests funding for expenses related to compensation and entitlements for Federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial operations, and "Non-Ceiling" (NC) employees (e.g., cooperative education students, student aides, and Federal junior fellows). These annually updated tables provide a detailed calculation for each billet, broken down by pay grade and location—INCONUS or OCONUS (which includes Alaska and Hawaii). The FY 2015 submission includes a 1.0-percent pay increase for civilian personnel, as well as funding for an increase in retirement contributions for the Federal Employees Retirement System (FERS).

Civilian personnel are an integral part of the Coast Guard and vital to execution of its statutory missions. The Coast Guard continues to complement its military workforce by recruiting diverse, well-educated, and dedicated civilians needed to meet current and future demands.

Total Change 2014 to 2015	-	-	(7,489)

The FY 2015 President's Budget requests \$197.800 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The training and recruiting PPA provides funding for the Coast Guard's professional training and education programs, as well as operation and maintenance of the seven major Coast Guard training centers and the Coast Guard Academy and Leadership Development Center.

Additionally, this request includes funding for tuition, travel, and per diem for formal training and education performed as temporary additional duty (TAD) by military service members and civilian personnel. It also ensures the training infrastructure is resourced to provide Coast Guard personnel with the tools and competencies necessary for assigned missions. Training is provided by the Coast Guard, other DHS components, commercial providers, DoD, and other agencies. Training and education are usually conducted by dedicated resident staffs in classrooms, but may also include exportable training, correspondence courses, and/or computer-based training.

2015 Total Request	-	-	991,919
Total Change 2014 to 2015	-	-	(41,691)

The FY 2015 President's Budget requests \$991.919 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requests funding for units, facilities, and activities that are under the direct operational and administrative control of the Coast Guard's Headquarters and Atlantic Area or Pacific Area Commanders. These include Base Support Units (BSUs); National Security Cutters (WMSL), High and Medium Endurance Cutters (WHECs/WMECs); Sectors; Patrol Boats; Multi-mission Boat Stations; Air Stations; Communication Stations; Deployable Specialized Forces (DSF); support commands; and Area Offices as applicable for supplies, materials, and services that allow the Coast Guard to sustain an operations tempo with an immediate response capability for Coast Guard missions. This request funds unit level maintenance of cutters, boats, aircraft, electronics systems, mechanical systems, and electrical equipment; service-life replacement and emergent purchase of boats; procurement of supplies and materials utilized for unit "housekeeping" and administration, spare parts, liquid fuel, and energy; and other materials consumed that contribute directly to mission effectiveness.

2015 Total Request	-	-	335,262
Total Change 2014 to 2015	-	-	3,327

The President's Budget requests \$335.262 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

Requested amounts fund centrally managed accounts that provide service to the entire Coast Guard. Significant centrally managed accounts include: the Federal Telephone System (FTS), Standard Workstation recapitalization, Coast Guard Data Network (CGOne), satellite and data communications, General Services Administration (GSA) rent, postal expenses, ammunition replenishment, and the DHS Working Capital Fund.

2015 Total Request	-	-	1,003,786
Total Change 2014 to 2015	-	-	(6,854)

The FY 2015 President's Budget requests \$1.003 billion for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

This request provides service-wide funding for the Coast Guard's depot level operating expense funded maintenance for the Service's shore facilities, electronics, vessels, and aircraft. The Coast Guard maintains its aircraft, vessels, and shore infrastructure using a blend of organic maintenance and repair infrastructure and contracted depot level maintenance activities. A mature project planning and execution program exists within the Coast Guard to provide routine organizational-level and depot level maintenance. Where expertise or infrastructure does not exist organically within the Service, the Coast Guard uses contracted resources to provide the requisite maintenance support.

This funding is vital to ongoing sustainment and support of in-service Coast Guard aircraft; Command, Control, Communications, Computers and Information Technology (C4IT) systems; shore facilities; and vessels.

PROCUREMENT ACTIVITIES: (\$ thousands)

Infrastructure-CGOne

The Coast Guard completed its transition to DHS OneNet in March 2010. CGOne represents a special security enclave on DHS OneNet that allows the Service to meet its unique requirements as a military service while serving every individual and contractor, including reservists and auxiliaries.

This is proposed to be funded out of a single PPA in FY 2015, as follows:

- PPA5 \$25 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
25,000	25,000	25,000

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Transition (25,000)	Operations and Maintenance	Provides network tuning to ensure bandwidth use is optimized and security is maintained. Provides needed connectivity for CG employees to include links to cutters at sea.

Infrastructure-SWIRS

SWIRS supports and maintains the Standard Workstation, which is a combination of desktop/laptop hardware and special collection of software (named the “standard image”). It also maintains file, print, and application servers along with providing configuration management, help desk support, and software requirements of the systems.

This is proposed to be funded out of a single PPA in FY 2015, as follows:

- PPA5 \$64.6 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
64,609	64,617	64,626

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Maintenance (64,626)	Operations and Maintenance	Supports and maintains the standard workstation. Adopt IT best practices and leverage life cycle upgrades. Supports remote hosting of users for disaster recovery, contingency planning, and continuity of operations.

USCG-Core Accounting System (CAS)

The Core Accounting System (CAS) suite is the primary accounting system for USCG, Transportation Security Agency (TSA), and Domestic Nuclear Detection Office (DNDO). The Core Accounting System (CAS) suite is an enterprise accounting, procurement, assets and management decision support system.

This is proposed to be funded out of a single PPA in FY 2015, as follows:

- PPA5 \$30.4 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
30,394	30,394	30,394

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Operation/Maintenance (30,394)	Operation/Maintenance	Provides financial operations, data integrity, financial transparency, compliance with federal laws, regulations, guidelines and requirements

Vessel Logistics System (VLS)

VLS consists of Fleet Logistics System (FLS), Configuration Management Plus (CMPlus), Naval and Electronics Supply Support System (NESSS), and Automated Requisition Management Systems (ARMS). These systems/applications are used to provide vessel logistics information management for the Coast Guard.

This is proposed to be funded out of a single PPA in FY 2015, as follows:

- PPA5 \$5.2 million

FY 2013 Activity Funding (\$\$\$ thousands)	FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Request (\$\$\$ thousands)
5,207	5,220	5,350

FY 2015 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Operation/Maintenance (5,350)	Operations and Maintenance	Provides configuration management, maintenance management, inventory management, supply chain management and technical data/information management to Coast Guard assets.

Transfers to and from Other Accounts

Working Capital Fund\$759

PPA Breakdown - Working Capital Fund		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	759
		759

This request reflects an adjustment to the Department of Homeland Security Working Capital Fund assessments to fund the following activities: Treasury Information Executive Repository (TIER), Transit Subsidy, HSPD-12, Financial Statement Audit, Internal Control Audit, and Enterprise Licenses Agreements.

Increases

Annualization of Part Year Funding.....\$51,118

Mandatory Personnel Entitlements

Annualization of FY 2014 Military and Civilian Pay Raise.....\$7,146

PPA Breakdown - 2014 Annualization of Military and Civilian Pay Raise		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	5,188
	Permanent Change of Station	12
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	1,946
		7,146

Provides one quarter of funding to annualize the FY 2014 military and civilian (1.0 percent) pay raise.

FY 2015 Military Pay Raise\$15,684

PPA Breakdown - 2015 Military Pay Raise		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	15,553
	Permanent Change of Station	131
		15,684

Provides three quarters of funding for the FY 2015 military (1.0 percent) pay raise.

FY 2015 Civilian Pay Raise.....\$5,855

PPA Breakdown - 2015 Civilian Pay Raise		Total (\$000)
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	5,855
		5,855

Provides three quarters of funding for the FY 2015 civilian (1.0 percent) pay raise.

FY 2015 Military Allowances.....\$46,846

PPA Breakdown - 2015 Military Allowances		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances (Basic Allowance for Housing)	50,464
	Military Health Care	(13,479)
	Permanent Change of Station	9,861
		46,846

Provides funding to maintain current services and ensure parity of military pay, allowances, and health care with DoD. This request includes additional funding for Basic Allowance for Housing (BAH) changes scheduled to take effect on January 1, 2015. Health care costs are forecasted using actuarial projections and include funding for Coast Guard clinics, TRICARE, pharmaceuticals, use of DoD military treatment facilities and Public Health Service physicians serving at Coast Guard medical facilities. Health care costs for military members, dependents, and eligible beneficiaries are projected to decrease due to changes in pharmacy administration costs in FY 2014. Permanent Change of Station costs are forecasted to increase based on actuarial projections and an increase in average travel order cost.

Civilian Retirement Contribution\$7,554

PPA Breakdown - Civilian Retirement Contribution		Total (\$000)
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	7,554
		7,554

Provides funding for an increase in retirement cost contributions, based on updated actuarial data, for regular employees that are part of the Federal Employees Retirement System (FERS).

Operational Adjustments

GSA Rent\$6,700

PPA Breakdown - GSA Rent		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	6,700
		6,700

Funds cost increases at General Services Administration (GSA) buildings occupied by the Coast Guard. GSA rent is a demand account. The account reflects cost obligations resulting from occupancy agreements established between the Coast Guard and GSA to meet specific operational and shore facility requirements.

Urgent Hull Corrosion Repairs and Other Crew Safety Related Maintenance\$3,479

PPA Breakdown - Hull Corrosion Repairs and Other Crew Safety Related Maintenance		Total (\$000)
PPA VI: Depot Level Maintenance		
	Vessel Maintenance	3,479
		3,479

Funds an increase in depot level maintenance for vessels to address critical requirements to ensure hull integrity and safety for the crews of legacy cutters. This request addresses the most severe hull corrosion and lead and asbestos remediation where those substances pose immediate health and safety risks to crews. In addition, funding to remediate these issues is critical to maintaining serviceable cutters for Coast Guard missions. This increase above base funding will support the highest priority safety issues on Medium Endurance Cutters (WMEC), 225-ft Seagoing Buoy Tenders (WLB), and the Inland River Buoy Tender fleet.

Operating and Maintenance Funds for New Assets

Shore Facility Follow-On\$1,603

PPA Breakdown - Shore Facility Follow-On		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	617
PPA VI: Depot Level Maintenance		
	Civil/Ocean Engineering and Shore Facility Maintenance	986
		1,603

Provides for the operation and maintenance of recapitalized shore facilities scheduled for completion prior to FY 2015. This funding request is required for energy, utility services, routine repairs, and housekeeping. This request also supports non-recurring maintenance and repairs (e.g., system renewals, preventive and emergency maintenance, scheduled inspections, etc.) anticipated throughout the life of the facility.

This request provides the resources required to maintain and operate new, and make improvements to existing facilities acquired through the execution of the following Acquisition, Construction, and Improvements projects:

- Sector San Juan Fast Response Cutter (FRC) Homeport - Phase II Upgrades;
- Station Marathon Family Housing Construction - Phase II;
- Sector Columbia River Family Housing Construction;
- MSST Houston-Galveston relocation to Ellington Field;
- TRACEN Petaluma C4ISR FRC Trainer.

This funding is required to adequately maintain new or improved facilities.

Response Boat - Medium (RB-M) Follow-On\$5,466

PPA Breakdown - Response Boat - Medium (RB-M) Follow-On		Total (\$000)
PPA I: Military Personnel (5 FTP, 3 FTE)		
	Military Pay and Allowances	161
	Military Health Care	25
	Permanent Change of Station	43
PPA III: Training and Recruiting		
	Training and Education	12
	Recruiting and Training Centers	6
PPA IV: Operating Funds and Unit Level Maintenance		
	5th District	10
	8th District	10
	9th District	15
	Headquarters Directorates	4,867
	Headquarters Units	4
	Other Activities	1

	Central Accounts	35
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	177
	Civil/Ocean Engineering and Shore Facility Maintenance	60
	Vessel Maintenance	40
		5,466

Provides follow-on funding for the operation, maintenance, and support personnel for 15 RB-Ms. The RB-M provides a significant increase in capability over the 41-ft Utility Boat (UTB) and requires increased operation and maintenance funding to meet current mission demands. This request adjusts the Standard Support Level (SSL) for the 155 RB-Ms currently in service, based on actual support requirements.

Rescue 21 (R21) Follow-On.....\$5,825

PPA Breakdown - Rescue 21 (R21) Follow-On		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Units	1,673
PPA V: Centrally Managed Accounts		
	Central Accounts	4,152
		5,825

Provides follow-on funding to support R21, the Coast Guard's primary system that facilitates command, control, and communications in the inland and coastal zones. R21 is a key enabler for effective emergency response in the maritime domain. This funding supports equipment

Operations and Maintenance (O&M), circuit connectivity, property leases, utilities, training, and technology refreshment.

The FY 2015 request provides funding to support the R21 system in Alaska, the maintenance of Coast Guard owned towers, and property leases.

Fast Response Cutter (FRC) Follow-On.....\$27,073

PPA Breakdown - Fast Response Cutter (FRC) Follow-On		Total (\$000)
PPA I: Military Personnel (198 FTP, 120 FTE)		
	Military Pay and Allowances	8,497
	Military Health Care	1,188
	Permanent Change of Station	2,774

	Headquarters Units	1,288
	Other Activities	24
PPA V: Centrally Managed Accounts		
	Central Accounts	1,817
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	1,063
	Civil/Ocean Engineering and Shore Facility Maintenance	29
	Vessel Maintenance	3,938
		27,073

FRC Follow-On Support

Provides personnel funding for shore-side support of the FRCs home-ported in San Juan, PR. These billets will fully staff the Maintenance Augmentation Team (MAT) for the six FRCs that will be homeported in San Juan. In addition, FRC support personnel are provided for the Surface Forces Logistics Center, which provides centralized support for the entire FRC fleet.

FRC Operation and Maintenance (O&M) for Hulls 13-17

Provides operation and maintenance funding for the San Juan, PR-based FRC hulls 13-17, scheduled for delivery in 2015. The FRC is the replacement cutter for the aging 110-ft Island Class patrol boat. The FRC is more capable than the 110-ft patrol boat with advanced electronics and enhanced capabilities.

FRC Crews for Hulls 15-19

Provides personnel to operate and maintain hulls 15-18 home-ported in San Juan, PR and the first Pascagoula, MS-based FRC hull (hull 19). Advance arrival of the crews is required to ensure appropriate training and readiness prior to vessel delivery.

National Security Cutter (NSC) Follow-On\$24,899

PPA Breakdown - National Security Cutter (NSC) Follow-On		Total (\$000)
PPA I: Military Personnel (190 FTP, 125 FTE)		
	Military Pay and Allowances	8,501
	Military Health Care	1,234
	Permanent Change of Station	1,714
PPA II: Civilian Personnel (6 FTP, 3 FTE)		
	Civilian Pay and Allowances	401
PPA III: Training and Recruiting		
	Training and Education	558
	Recruiting and Training Centers	375
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	1,707
	7th District	2
	Headquarters Directorates	3,467
	Headquarters Units	713
	Other Activities	22
PPA V: Centrally Managed Accounts		
	Central Accounts	1,532
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	2,612
	Vessel Maintenance	2,061
		24,899

NSC Follow-on Support

Provides personnel for shore-side support for NSC (WMSL Class) hulls four and five, which will be home-ported in Charleston, SC. These billets will fully staff the Maintenance Augmentation Team (MAT), Weapons Augmentation Team (WAT), and Electronic Support Detachment (ESD) for the Charleston NSC homeport.

NSC Operation and Maintenance (O&M) for NSC 5

Provides operations and maintenance funding for NSC 5, scheduled for delivery in Q4 FY 2015. The NSC is replacing the legacy High Endurance Cutters.

NSC Crew Foxtrot (Phase II) for NSC 5

Provides personnel to operate and maintain NSC 5, scheduled for delivery in Q4 FY 2015. In order to complete critical pipeline and pre-acceptance training, it is necessary to establish the second phase of the NSC 5 crew at least 4-6 months in advance of delivery. Since delivery of

BERTHOLF (NSC-1), the Coast Guard has continuously reduced pipeline training timelines to optimize pre-delivery efforts of second phase NSC crews.

Fleet Area Special Security Office (FASSO)

Provides funding for the operations and maintenance of the NSC FASSO in Charleston, SC. This office will provide security management functions for the tactical intelligence program onboard the NSCs and ensure compliance with Department of Defense, Department of Homeland Security, and Coast Guard guidelines. This capability is necessary to maintain certification and accreditation of shipboard systems and to ensure operational readiness.

Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance Follow-On Laboratory Support

Provides follow-on funding for operation of the NSC baseline mock-up laboratory at the Maritime Domain Awareness Center in Moorestown, NJ. This laboratory provides product sustainability validation and network integration for the NSC Command and Control baseline. This capability is essential for addressing critical system failures and preventing obsolescence issues.

Maritime Patrol Aircraft (MPA) Follow-On.....\$7,228

PPA Breakdown - Maritime Patrol Aircraft (MPA) Follow-On		Total (\$000)
PPA I: Military Personnel (35 FTP, 18 FTE)		
	Military Pay and Allowances	1,294
	Military Health Care	173
	Permanent Change of Station	341
PPA II: Civilian Personnel (3 FTP, 2 FTE)		
	Civilian Pay and Allowances	117
PPA III: Training and Recruiting		
	Training and Education	1,400
	Recruiting and Training Centers	107
PPA IV: Operating Funds and Unit Level Maintenance		
	7th District	363
	8th District	6
	Headquarters Directorates	507
	Headquarters Units	479
	Other Activities	4
PPA V: Centrally Managed Accounts		
	Central Accounts	77
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	2,360
		7,228

Provides funding for the personnel, operations and maintenance of Maritime Patrol Aircraft (HC-144A) #18. This aircraft and personnel will be assigned to Air Station Miami, FL.

Base Re-Allocations (Non-Add)**Military FTP and FTE Transfer to Civilian.....[\$2,442]**

PPA Breakdown - Military FTP and FTE Transfer to Civilian		Total (\$000)
PPA I: Military Personnel (-19 FTP, -19 FTE)		
	Military Pay and Allowances	(2,089)
	Military Health Care	(208)
	Permanent Change of Station	(112)
PPA II: Civilian Personnel (19 FTP, 19 FTE)		
	Civilian Pay and Allowances	2,442
PPA III: Training and Recruiting		
	Training and Education	(36)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	3
		0

Transfers 19 military FTP/FTE to civilian FTP/FTE. These conversions are consistent with GAO recommendations to change military positions funded in Project, Program, and Activity (PPA) I (Military Pay and Allowances) with inherently civilian job functions to civilian positions funded in PPA II (Civilian Pay and Benefits).

PPA Funding Adjustment[\$35,544]

PPA Breakdown - PPA Funding Adjustment		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	1,578
	Military Health Care	3,660
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	4,175
PPA III: Training and Recruiting		
	Training and Education	(242)
	Recruiting and Training Centers	(3,550)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(488)
	7th District	300
	Headquarters Directorates	(8,366)
	Headquarters Units	(22,509)
PPA V: Centrally Managed Accounts		
	Central Accounts	9,961
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(389)
	Electronics Maintenance	15,870
		0

Implements recurring technical base adjustments to reallocate funding to the appropriate Project, Program, and Activity (PPA) for compliance with Coast Guard financial policy and proper alignment to the modernized operations and support organizations of the Coast Guard. All requested adjustments retain the original intent and purpose of the funding appropriated; however, the PPA required to properly execute these items has been determined to differ from that to which the funding was originally appropriated. Additional detail on select base adjustments is provided below:

Information Technology (IT) Systems: Funding to support Coast Guard IT activities has traditionally been appropriated to PPA IV (Operating Funds and Unit Level Maintenance), but Coast Guard execution policy now executes this funding from PPA VI (Depot Level Maintenance). Projects associated with this adjustment are; Differential Global Positioning System (DGPS) maintenance, the Interagency Operations Center (IOC) Watchkeeper system maintenance, and National Distress System (NDS) maintenance and sustainment. This request places funding for the operations and maintenance of these and other IT systems in PPA VI.

Training Funds Consolidation: PPA III (Training and Recruiting PPA) is allocated the majority of appropriated budget authority associated with gaining and maintaining proficiency for all Coast Guard mission activities. Coast Guard policy now specifies that the proper account for funds execution for travel, support, and convening of Training and Recruiting sessions is PPA

III. This request moves funding associated with the travel and support costs for identified training sessions from PPA IV to PPA III for execution.

Overhead Services Support: In continuing implementation of the Department-wide efficiency review conducted in 2009, the Coast Guard has identified component-wide services that can be consolidated to achieve operational efficiencies. The consolidation is correctly executed in PPA V (Centrally Managed Accounts). This request moves overhead services support funding from PPA IV to PPA V.

Mass Transportation Benefits: The Federal Mass Transportation Benefits Program provides monetary subsidies to federal civilian and military employees who use mass transit. Funds for this purpose were originally appropriated to PPA IV. A change in Coast Guard policy now executes these funds out of the respective pay accounts. This request moves funding from PPA IV to PPA I and PPA II for execution.

Decreases**Termination of One Time Costs(\$58,397)**

PPA Breakdown - Termination of One-Time Costs		Total (\$000)
PPA I: Military Personnel		
	Permanent Change of Station	(5,642)
PPA III: Training and Recruiting		
	Training and Education	(3,917)
	Recruiting and Training Centers	(79)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(216)
	Pacific Area	(51)
	5th District	(3)
	7th District	(659)
	8th District	(1,243)
	9th District	(116)
	11th District	(6)
	13th District	(231)
	14th District	(6)
	Headquarters Directorates	(1,028)
	Headquarters Units	(695)
PPA V: Centrally Managed Accounts		
	Central Accounts	(14,656)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(11,684)
	Electronics Maintenance	(1,754)
	Civil/Ocean Engineering and Shore Facility Maintenance	(260)
	Vessel Maintenance	(16,151)
		(58,397)

This line item reflects FY 2015 savings associated with the termination of one-time costs for program start-up and exit transactions anticipated in FY 2014.

FY 2014 Activities	Non-Recurring Amount (\$000)
Transfer Follow-On	(158)
Response Boat - Medium (RB-M) Follow-On	(490)
Fast Response Cutter (FRC) Follow-On	(2,718)
National Security Cutter (NSC) Follow-On	(2,773)
Maritime Patrol Aircraft (MPA) Follow-On	(1,744)
Manned Covert Surveillance Aircraft (MCSA) Follow-On	(1,536)
Coast Guard Air Station Corpus Christi Transition	(3,616)
Decommission One High Endurance Cutter (WHEC)	(2,450)
Decommission Four 110-ft Patrol Boats	(1,594)
Cutter Shoreside Support Personnel Reduction	(60)
Retire Eight HU-25 Aircraft	(639)
Air Facilities Charleston, SC and Newport, OR Closure	(745)
Efficiencies	(1,342)
Coast Guard Headquarters Staffing	(272)
Intelligence Program	(66)
Drug and Alcohol Program Inspectors	(36)
International Port Security Program	(75)
Port State Control Examinations	(214)
Auxiliary Program Management	(69)
St. Elizabeths Support	(12,800)
Critical Depot Level Maintenance	(25,000)
Total	(58,397)

Part Year Management Annualizations(\$50,843)

PPA Breakdown - Part Year Management Annualizations		Total (\$000)
PPA I: Military Personnel (-307 FTE)		
	Military Pay and Allowances	(18,815)
	Military Health Care	(2,680)
	Permanent Change of Station	(2,207)
PPA II: Civilian Personnel (-71 FTE)		
	Civilian Pay and Allowances	(7,709)
PPA III: Training and Recruiting		
	Training and Education	(1,035)
	Recruiting and Training Centers	(431)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(794)
	Pacific Area	(40)
	1st District	(87)
	5th District	(104)
	7th District	(260)
	8th District	(296)
	9th District	(27)
	11th District	(72)
	13th District	(162)
	14th District	(24)
	17th District	(5)
	Headquarters Directorates	(3,993)
	Headquarters Units	(167)
	Other Activities	(54)
PPA V: Centrally Managed Accounts		
	Central Accounts	(3,465)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(7,067)
	Electronics Maintenance	(135)
	Vessel Maintenance	(1,214)
		(50,843)

This line item annualizes part-year reductions from various asset decommissionings and programmatic reductions anticipated in FY 2014.

FY 2014 Activities	FTE (Mil)	FTE (Civ)	Recurring Amount (\$000)
Decommission One High Endurance Cutter (WHEC)	(92)	0	(10,306)
Decommission Four 110-ft Patrol Boats	(35)	0	(4,183)
Cutter Shoreside Support Personnel Reduction	(5)	0	(532)
Retire Eight HU-25 Aircraft	(35)	0	(10,268)
Air Facilities Charleston, SC and Newport, OR Closure	(27)	0	(6,022)
Efficiencies	(61)	(27)	(7,321)
Coast Guard Headquarters Staffing	(18)	(36)	(7,177)
Intelligence Program	(5)	(7)	(1,568)
Drug and Alcohol Program Inspectors	(3)	0	(370)
International Port Security Program	(3)	0	(577)
Port State Control Examinations	(20)	0	(2,021)
Auxiliary Program Management	(3)	(1)	(498)
Total	(307)	(71)	(50,843)

Mandatory Personnel Entitlements

TRICARE Reform (\$1,433)

PPA Breakdown - TRICARE Reform		Total (\$000)
PPA I: Military Personnel		
	Military Health Care	(1,433)
		(1,433)

This decrease is associated with TRICARE reform. In the FY 2015 Budget, DoD proposes a multi-year plan to replace the current three TRICARE plans with a consolidated TRICARE Health Plan. In 2015, the proposal would increase co-pays for pharmaceuticals and implement an enrollment fee for new TRICARE-for-Life beneficiaries (as proposed in the FY 2014 Budget).

Operational Adjustments

Military Special Pay (\$7,500)

PPA Breakdown - Military Special Pay		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	(7,500)
		(7,500)

Reduces military special pays used to compensate members who are in positions involving arduous at-sea duty and other specialized functions involving hazardous duty, significant levels of responsibility, or least desirable locations. The Coast Guard anticipates being able to fill these positions with less special pay compensation as current retention rates of military personnel are at historic highs. Special pays will continue to be paid, but at reduced levels.

Civilian Personnel Account Management(\$6,500)

PPA Breakdown - Civilian Personnel Account Management		Total (\$000)
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	(6,500)
		(6,500)

Reduces discretionary incentives and activities executed from the civilian pay account, including: temporary appointments (e.g., summer and student hires), repayment of student loans, Permanent Change of Station (PCS) benefits, and premium pay for discretionary overtime. With the current high application rates for open civilian positions, reductions to certain recruitment and retention tools will not impact the ability to replenish and maintain the civilian workforce in the near term.

Efficiencies.....(\$62,896)

PPA Breakdown - Efficiencies		Total (\$000)
PPA I: Military Personnel (-345 FTP, -171 FTE)		
	Military Pay and Allowances	(19,036)
	Military Health Care	(2,064)
	Permanent Change of Station	(5,097)
PPA II: Civilian Personnel (-106 FTP, -53 FTE)		
	Civilian Pay and Allowances	(5,006)
PPA III: Training and Recruiting		
	Training and Education	(400)
	Recruiting and Training Centers	(1,997)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(1,985)
	Pacific Area	(1,786)
	1st District	(156)
	5th District	(64)
	7th District	(236)
	8th District	(45)
	9th District	(20)
	11th District	(42)
	13th District	(30)
	14th District	(13)
	17th District	(30)
	Headquarters Directorates	(17,769)
	Headquarters Units	2,834
	Other Activities	(32)
PPA V: Centrally Managed Accounts		
	Central Accounts	(2,637)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(182)
	Electronics Maintenance	(6,484)
	Civil/Ocean Engineering and Shore Facility Maintenance	(114)
	Vessel Maintenance	(505)
		(62,896)

Efficiencies	FTP	FTE	Amount (\$000)
Information Technology (IT) Consolidation	0	0	(20,000)

Flag and Senior Executive Service Personnel	(20)	(10)	(1,364)
District and Area Personnel	(114)	(57)	(6,319)
Mission Support Structure Scaling	(103)	(52)	(5,132)
Sector Field Office Reduction	(12)	(6)	(456)
Consolidate Atlantic and Pacific Command Areas Master Stations	(208)	(104)	(3,362)
Postal Management Program In-sourcing	3	2	(236)
Galley Services	0	0	(5,600)
Service Contracts	0	0	(5,000)
Discretionary Travel Reduction	0	0	(5,000)
Secure Internet Protocol Router Network (SIPERNET)	0	0	(180)
Deployable Specialized Forces (DSF) Efficiencies	0	0	(1,500)
Nationwide Automatic Identification System (NAIS) Efficiencies	0	0	(1,000)
Comprehensive Environmental Response, Compensation, and Liability Act Billets	3	3	(247)
Total	(451)	(224)	(62,896)

Information Technology (IT) Consolidation: Consolidates enterprise-wide Command, Control, Communications, Computers, and Information Technology (C4IT) resources and reduces redundant equipment and services in field activities. Capitalizing on best practices in IT governance, savings will be garnered from consolidation of data center activities, centralized IT procurement, and improved configuration management. The IT consolidation aligns with the Federal IT Shared Services Strategy and DHS IT management directives by improving management and the use of IT to support mission execution.

Permanent Change of Station Account Management: Reduces excess funding for military retirement PCS moves through an internal policy change. Under the change, funds will not be automatically obligated when PCS orders are issued, but instead will only be obligated when orders are executed by the service-member.

Flag and Senior Executive Service (SES) Personnel: Reduces executive management positions and executive support staffs.

District and Area Personnel: Reduces Area and District staff positions, targeting functions that can be optimized through internal restructuring and centralization of related activities. The reduction is realized through efficiencies gained from technology and the maturation of Sectors, facilitating a reduction in staffing levels in the Coast Guard's organizational structure.

Mission Support Structure Scaling: The proposed changes will reduce mission support billets and contracted workers throughout the Coast Guard where the loss of positions and contracted support is expected to incur the least impact on front-line operations. This scaling of the mission support structure is commensurate with workforce and programmatic reductions in this and prior year budgets.

Sector Field Office Reduction: Reduces ten engineering support billets at SFOs where the Coast Guard's organization-wide staffing evaluation identified savings. This action realigns current SFO billet duties to the parent Sector organization.

Consolidate Atlantic and Pacific Command Areas Master Stations: The Coast Guard will consolidate the Atlantic and Pacific Communication Area Master Stations (CAMS) to create a single Communications Command (COMMCOM). COMMCOM will operate the Coast Guard's long range communications system and contingency communications assets, assist with operational planning, expand existing training in tactical communications operations, and interface with other government agencies. COMMCOM will be responsible for Coast Guard communications interoperability and National Incident Command communication requirements.

Postal Management Program In-sourcing: Replaces four contractor positions with three civilian positions to conduct required mail and shipping functions at Coast Guard Headquarters. Process efficiencies permit three civilian positions to complete all the requirements currently provided by the contract support level.

Galley Services: Reduces galley food service and mess attendant contracts at select Coast Guard facilities located in the continental United States and revises Coast Guard policy on galley use.

Service Contracts: Reduces professional services such as grounds-keeping, security, and cleaning contracts throughout the Coast Guard mission support enterprise. Required security and other services will be supplemented with active duty Coast Guard personnel.

Discretionary Travel Reduction: Reduces funding for travel related to non-operational professional development, unit-level training, off-site meetings, conferences, external engagements, site/unit visits, international engagements, and attendance at industry sponsored events. This initiative builds upon prior-year initiatives.

Secure Internet Protocol Router Network (SIPRNET): Removes SIPRNET capability from ten Coast Guard units, focusing on Marine Safety Units without Captain of the Port authority, where removal of SIPRNET does not degrade operational effectiveness. The loss of SIPRNET capability at these units is mitigated by proximity to larger Sector units or other communication modes.

Deployable Specialized Forces (DSF) Efficiencies: This initiative capitalizes on efficiencies the Coast Guard has identified within DSF base funding as a result of DSF organizational changes in FY 2014 and from managed adjustments in travel and equipment replacement.

Nationwide Automatic Identification System (NAIS) Efficiencies: This initiative provides savings based on efficiencies identified in the deployment of Nationwide Automatic Identification System (NAIS). Due to greater than anticipated capability provided by the NAIS system architecture, less hardware is required to deploy the NAIS system.

Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Billets: Consolidates Coast Guard pre-positioned oil spill response equipment and reinvests part of these

savings to the Coast Guard's base funding to convert three reimbursable positions to full time positions at the National Strike Force Coordination Center (NSFCC). There are two parts to this initiative:

- Consolidate Vessel of Opportunity Skimming Systems (VOSS) and all Coast Guard-owned pollution response trailers, with the exception of equipment located in remote areas within the Fourteenth (Hawaii) and Seventeenth (Alaska) Coast Guard Districts. Original purchase and placement of the VOSS was almost 20 years ago; many of the original system components have deteriorated and exceeded the manufacturer's recommended service life. Consolidation of remaining VOSS assets at a central location will significantly reduce the resource requirements for the national maintenance contract for VOSS equipment. The various laws and regulations enacted since the passage of the Oil Pollution Act of 1990, along with the maturation of Oil Spill Removal Organizations (OSROs), have reduced oil spill frequency, severity, and demand for prepositioned Coast Guard oil spill response resources. OSROs are contracted by owners or operators of facilities and vessels required by law to have a response plan, and have sufficient access and ability to rapidly deploy equipment in areas where VOSS equipment was consolidated. In Alaska and Hawaii, the Coast Guard will retain VOSS and pollution response trailers due to the lack of sufficient OSROs with robust pollution response resources.
- Convert CERCLA billets. CERCLA billets have been reimbursable positions funded by the Environmental Protection Agency (EPA) since 1994 to provide the Coast Guard a robust capability to respond to hazardous substance incidents in both the coastal and inland zones. The positions have subsequently become integral components of the Coast Guard's Marine Environmental Response program. The three full time positions at the NSFCC are dedicated to coordinating pollution response and training and ensure that Coast Guard Strike Teams can effectively provide specialized support to hazardous substance incidents in both the coastal and inland zones. Due to reduced annual CERCLA funding provided by the EPA to reimburse these three billets, the Coast Guard would use a portion of the savings from consolidating VOSS equipment to create permanent billets to retain this vital function at the NSFCC.

Vessel, Board, and Search Teams.....(\$1,355)

PPA Breakdown - Vessel, Board, and Search Teams		Total (\$000)
PPA I: Military Personnel (-35 FTP, -18 FTE)		
	Military Pay and Allowances	(1,178)
	Military Health Care	(173)
	Permanent Change of Station	195
PPA III: Training and Recruiting		
	Training and Education	(32)
	Recruiting and Training Centers	(29)
PPA IV: Operating Funds and Unit Level Maintenance		
	1st District	(36)
	11th District	(33)
	Headquarters Directorates	(28)
	Other Activities	(4)
PPA V: Centrally Managed Accounts		
	Central Accounts	(37)
		(1,355)

Eliminates four VBSTs, one team each from Sector Boston, Sector Southeast New England, Sector San Diego and Sector San Francisco. VBSTs consists of law enforcement personnel dedicated to Ports, Waterways and Coastal Security (PWCS) enforcement activities and typically conduct armed offshore boardings of High Interest Vessels (HIVs) prior to arrival at U.S. ports. These four Sector VBSTs represent the lowest average HIV boarding workload totals among Sectors with dedicated VBSTs. The types of boardings accomplished by these teams will be conducted by Sector Response and Station personnel or from cutter-based crews.

Ports, Waterways, and Coastal Security.....(\$921)

PPA Breakdown - Ports, Waterways, and Coastal Security		Total (\$000)
PPA I: Military Personnel (-8 FTP, -4 FTE)		
	Military Pay and Allowances	(264)
	Military Health Care	(40)
	Permanent Change of Station	41
PPA III: Training and Recruiting		
	Training and Education	(113)
	Recruiting and Training Centers	(19)
PPA IV: Operating Funds and Unit Level Maintenance		
	1st District	(42)
	11th District	(56)
	Headquarters Directorates	(72)
	Other Activities	(1)
PPA V: Centrally Managed Accounts		
	Central Accounts	(7)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(348)
		(921)

Eliminates the Coast Guard's Airborne Use of Force (AUF) capability from the Ports, Waterways, and Coastal Security (PWCS) mission. Armed surface assets will remain trained and ready to counter threats requiring use of force in PWCS missions. This initiative will not impact the Coast Guard's ability to employ AUF during counterdrug operations. The Coast Guard will retain a counterdrug AUF capability at the Helicopter Interdiction Tactical Squadron (HITRON) in Jacksonville, FL.

Coastal Patrol Boat Operational Efficiency(\$886)

PPA Breakdown - Patrol Boat Operational Efficiency		Total (\$000)
PPA I: Military Personnel (-25 FTP, -13 FTE)		
	Military Pay and Allowances	(786)
	Military Health Care	(124)
	Permanent Change of Station	120
PPA III: Training and Recruiting		
	Training and Education	(24)
	Recruiting and Training Centers	(18)
PPA IV: Operating Funds and Unit Level Maintenance		
	8th District	(47)
	Other Activities	(2)
PPA V: Centrally Managed Accounts		
	Central Accounts	(28)
PPA VI: Depot Level Maintenance		
	Vessel Maintenance	23
		(886)

Eliminates billets associated with two 87-ft Coastal Patrol Boats (CPBs), but keeps the cutters in service to facilitate a Programmed Depot Maintenance line at the Coast Guard Yard in Baltimore, MD. Specifically, in FY 2015, the Yard will implement a continuous 60-day Program Depot Maintenance (PDM) cycle in which two 87-ft CPBs will be dry-docked at the Yard on a rotating basis at all times. These hulls will be used to begin this rotation cycle. Crews on east coast 87-ft CPBs will sail their respective 87-ft CPB to the Yard for depot level maintenance (which occurs every four years), transfer the arriving 87-ft CPB to the Yard, and immediately depart with an overhauled 87-ft CPB, returning to their respective homeport. This initiative is expected to avoid travel costs for temporary messing, berthing, and minimize maintenance costs through improved production efficiency and scheduling. The initiative will also reduce overhead costs associated with managing depot level maintenance for the 87-ft CPB fleet.

Preparedness for Response Exercise Program (PREP) and Area Maritime Security Training and Exercise Program (AMSTEP)(\$320)

PPA Breakdown - Preparedness for Response Exercise Program (PREP) and Area Maritime Security Training and Exercise Program (AMSTEP)		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	(320)
		(320)

Revises the Coast Guard's management and oversight of the National Preparedness for Response Exercise Program (PREP) and the Area Maritime Security Training and Exercise Program (AMSTEP). This initiative provides savings through a combination of measures such as

examining and reducing exercise frequency where appropriate, reducing travel expenditures, reducing exercise scope based on risk, combining exercises where efficiencies exist, and crediting real world events to avoid duplication. The Coast Guard will expand local outreach and continue close partnerships with State, Local, Tribal, and Territorial governments, and the maritime industry to mitigate any potential impacts.

HC-144A Aircraft Programmed Flight Hours.....(\$4,920)

PPA Breakdown - HC-144A Aircraft Programmed Flight Hours		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	1st District	(37)
	7th District	(74)
	8th District	(86)
	Headquarters Directorates	(769)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(3,954)
		(4,920)

Adjusts the Coast Guard's HC-144A annual Programmed Flight Hours from 1,200 to 1,000 hours per aircraft to balance mission demands. This reduction in Programmed Flight Hours will allow the Coast Guard to avoid approximately \$14 million in costs for additional spare parts and also avoid the operations and maintenance costs needed to achieve the full 1,200 hours per aircraft per year.

Fixed Wing Aircraft "Bravo-0" Response(\$2,195)

PPA Breakdown - Fixed Wing Aircraft "Bravo-0" Response		Total (\$000)
PPA I: Military Personnel (-47 FTP, -24 FTE)		
	Military Pay and Allowances	(1,937)
	Military Health Care	(233)
	Permanent Change of Station	304
PPA III: Training and Recruiting		
	Training and Education	(131)
	Recruiting and Training Centers	(35)
PPA IV: Operating Funds and Unit Level Maintenance		
	1st District	(8)
	5th District	(24)
	7th District	(40)
	8th District	(9)
	11th District	(15)
	Headquarters Directorates	(11)
	Other Activities	(4)
PPA V: Centrally Managed Accounts		
	Central Accounts	(52)
		(2,195)

Removes the fixed-wing Bravo-Zero readiness requirement from Coast Guard Air Stations, with the exception of Air Station Kodiak, AK and Air Station Barbers Point, HI. This initiative includes a commensurate staffing reduction to fixed-wing aircrews. Fixed-wing aircraft at affected units will continue to be available on a scheduled basis. Coast Guard rotary-wing aircraft will fulfill aviation Search and Rescue (SAR) requirements. Fixed-wing units included in this initiative are:

- Aviation Training Center Mobile, AL;
- Air Station Cape Cod, MA;
- Air Station Clearwater, FL;
- Air Station Corpus Christi, TX;
- Air Station Elizabeth City, NC;
- Air Station Miami, FL;
- Air Station Sacramento, CA.

Domestic Specific Emitter ID (DSEI) Program(\$400)

PPA Breakdown - Domestic Specific Emitter Identification (DSEI) Program		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	(227)
	Headquarters Units	(173)
		(400)

Removes the Domestic Specific Emitter Identification (DSEI) system on High and Medium Endurance Cutters in the Coast Guard. DSEI provides Hull-To-Emitter Correlation (HULTEC) signature data that identifies targets of interest in the maritime environment. With advances in commercial electronics, Automatic Identification Systems (AIS) carriage requirements, and other methods of detection, DSEI is no longer required.

Aids to Navigation (ATON).....(\$3,477)

PPA Breakdown - Aids to Navigation (ATON)		Total (\$000)
PPA I: Military Personnel (-29 FTP, -15 FTE)		
	Military Pay and Allowances	(917)
	Military Health Care	(144)
	Permanent Change of Station	146
PPA III: Training and Recruiting		
	Training and Education	(27)
	Recruiting and Training Centers	(22)
PPA IV: Operating Funds and Unit Level Maintenance		
	1st District	(277)
	5th District	(327)
	7th District	(298)
	8th District	(297)
	9th District	(122)
	11th District	(57)
	13th District	(88)
	14th District	(19)

	Other Activities	(3)
PPA V: Centrally Managed Accounts		
	Central Accounts	(717)
PPA VI: Depot Level Maintenance		
	Civil/Ocean Engineering and Shore Facility Maintenance	60
		(3,477)

Modernization and efficiencies in servicing aids to navigation, policy modifications, and logistics permit a funding reduction for coastal and western river aids to navigation. The Coast Guard will continue to identify aids for potential removal in accordance with existing Coast Guard policy and waterway standards, in a manner that does not compromise safety of navigation and minimizes impact to mariners. Billets at associated Aids to Navigation Teams (ANTs) will be commensurately reduced, and one ANT will be closed. Remaining maintenance responsibilities will be redistributed among the remaining ANTs.

Operational Efficiencies(\$15,047)

PPA Breakdown - Operational Efficiencies		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	(8,406)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(4,981)
	Vessel Maintenance	(1,660)
		(15,047)

Operational commanders, using risk-based prioritization of patrols and operational activities, are able to adjust operations and balance emerging mission demands with daily operations. Additionally, new Coast Guard assets are equipped with enhanced intelligence and communication tools that enable field staff to target threats and prosecute them more efficiently. As a result, operational efficiencies that scale cutter, boat, and aircraft hours will reduce resources required for fuel and variable maintenance with no anticipated impact to operations. Safety of life (SAR), urgent security activities, and operational hours dedicated to meet minimum proficiency standards will be preserved.

Asset Decommissionings and Retirements

Eight 110-ft Patrol Boats (\$6,053)

PPA Breakdown - Eight 110-ft Patrol Boats		Total (\$000)
PPA I: Military Personnel (-145 FTP, -73 FTE)		
	Military Pay and Allowances	(4,712)
	Military Health Care	(717)
	Permanent Change of Station	793
PPA III: Training and Recruiting		
	Training and Education	(144)
	Recruiting and Training Centers	(97)
PPA IV: Operating Funds and Unit Level Maintenance		
	1st District	(68)
	5th District	(34)
	7th District	(246)
	17th District	(70)
	Headquarters Directorates	(1,001)
	Headquarters Units	(175)
	Other Activities	(8)
PPA V: Centrally Managed Accounts		
	Central Accounts	(478)
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	(64)
	Vessel Maintenance	968
		(6,053)

Decommissions eight 110-ft Island Class (WPB) patrol boats. These assets will be replaced with Fast Response Cutters (FRCs) in the Seventh and Eighth Coast Guard Districts. The Coast Guard will re-invest the savings from decommissioning legacy patrol boats, crews and support personnel to facilitate the operation and maintenance of the more capable FRCs. With fifteen FRCs scheduled for delivery through FY 2015, these decommissioning actions will continue the transition of the Island Class patrol boat fleet to the FRC fleet.

Two High Endurance Cutters (WHEC)(\$14,914)

PPA Breakdown - Two High Endurance Cutters (WHEC)		Total (\$000)
PPA I: Military Personnel (-368 FTP, -184 FTE)		
	Military Pay and Allowances	(11,479)
	Military Health Care	(1,822)
	Permanent Change of Station	1,658
PPA III: Training and Recruiting		
	Training and Education	(366)
	Recruiting and Training Centers	(260)
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	(343)
	Pacific Area	(901)
	Headquarters Directorates	(1,539)
	Headquarters Units	931
	Other Activities	(34)
PPA V: Centrally Managed Accounts		
	Central Accounts	(485)
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	1,376
	Vessel Maintenance	(1,650)
		(14,914)

Decommissions two (#6 and 7) legacy High Endurance Cutters (WHEC). The WHEC fleet is being replaced by more capable National Security Cutters (WMSL class). The fifth National Security Cutter (NSC) is under production and is scheduled for delivery in FY 2015. The sixth NSC is also under contract and is scheduled for delivery in FY 2017. The 2015 Budget funds the eighth NSC, which completes the recapitalization of the Coast Guard's High Endurance Cutter fleet.

Three HC-130 Aircraft(\$11,610)

PPA Breakdown - Three HC-130 Aircraft		Total (\$000)
PPA I: Military Personnel (-86 FTP, -43 FTE)		
	Military Pay and Allowances	(3,049)
	Military Health Care	(426)
	Permanent Change of Station	495
PPA III: Training and Recruiting		
	Training and Education	(132)
	Recruiting and Training Centers	(59)
PPA IV: Operating Funds and Unit Level Maintenance		
	7th District	(211)
	11th District	(112)
	Headquarters Directorates	(3,075)
	Other Activities	(8)
PPA V: Centrally Managed Accounts		
	Central Accounts	(88)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(4,945)
		(11,610)

Eliminates funding and billets associated with the retirement of three HC-130H aircraft, currently assigned to Sacramento, CA and Clearwater, FL. In accordance with the National Defense Authorization Act of 2014, these aircraft are part of seven HC-130H aircraft that Coast Guard is transferring to DoD for reconditioning and subsequent transfer to the U.S. Forest Service. Under the same provisions, Coast Guard will receive 14 new C-27Js with transfers from DoD initiated in 2014.

Shoreside Support Personnel Reduction(\$1,642)

PPA Breakdown - Shoreside Support Personnel Reduction		Total (\$000)
PPA I: Military Personnel (-40 FTP, -21 FTE)		
	Military Pay and Allowances	(1,379)
	Military Health Care	(198)
	Permanent Change of Station	227
PPA III: Training and Recruiting		
	Training and Education	(38)
	Recruiting and Training Centers	(27)
PPA IV: Operating Funds and Unit Level Maintenance		
	7th District	(10)
	14th District	(2)
	Headquarters Units	(178)
	Other Activities	(2)
PPA V: Centrally Managed Accounts		
	Central Accounts	(35)
		(1,642)

Eliminates the Island Class Patrol Boat (WPB) Maintenance Augmentation Team (MAT) in Miami, FL, and the MAT in San Juan, PR, in conjunction with the decommissioning of eight WPBs. This reduction also reduces High Endurance Cutter (WHEC) maintenance billets in conjunction with the decommissioning of two WHECs. The MATs for the Fast Response Cutters replacing the WPBs in Miami, FL and San Juan, PR and the billets associated with maintenance personnel for the National Security Cutters, replacing the WHECs, are established and funded separately as those assets are brought into service.

IV. Program Justification Changes

N/A

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

Department of Homeland Security
U.S. Coast Guard
Justification of Proposed Changes in Operating Expenses
Appropriation Language

For necessary expenses for the operation and maintenance of the Coast Guard, not otherwise provided for; purchase or lease of not to exceed 25 passenger motor vehicles, which shall be for replacement only; purchase or lease of small boats for contingent and emergent requirements (at a unit cost of no more than \$700,000) and repairs and service-life replacements, not to exceed a total of \$31,000,000; purchase or lease of boats necessary for overseas deployments and activities; minor shore construction projects not exceeding \$1,000,000 in total cost on any asset; payments pursuant to section 156 of Public Law 9709377 (42 U.S.C. 402 note; 96 Stat. 1920); and recreation and welfare; [\$7,011,807,000;]**\$6,750,733,000**,¹ of which [\$567,000,000]**\$340,000,000**² shall be for defense-related activities[, of which \$227,000,000 is designated by the Congress for Overseas Contingency Operations/Global War on Terrorism pursuant to section 251(b)(2)(A)(ii) of the Balanced Budget and Emergency Deficit Control Act of 1985]; of which \$24,500,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); and of which not to exceed \$15,300 shall be for official reception and representation expenses: Provided, That none of the funds made available by this Act shall be for expenses incurred for recreational vessels under section 12114 of title 46, United States Code, except to the extent fees are collected from owners of yachts and credited to this appropriation : Provided further, That [of the funds provided under this heading, \$75,000,000 shall be withheld from obligation for Coast Guard Headquarters Directorates until a future-years capital investment plan for fiscal years 2015 through 2019, as specified under the heading "Coast Guard Acquisition, Construction, and Improvements" of this Act is submitted to the Committees on Appropriations of the Senate and the House of Representatives: Provided further, That funds made available under this heading for Overseas Contingency Operations/ Global War on Terrorism may be allocated by program, project, and activity, notwithstanding section 503 of this Act], **to the extent fees are insufficient to pay expenses of recreational vessel documentation under such section 12114, and there is a backlog of recreational vessel applications, then personnel performing non-recreational vessel documentation functions under subchapter II of chapter 121 of title 46, United States Code, may perform documentation under section 12114:**³ Provided further, That, without regard to the limitation as to time and condition of section 503(d) [of this Act], after June 30, [an additional] **up to** \$10,000,000 may be reprogrammed [to or from Military Pay and Allowances] **within this appropriation**⁴ in accordance with subsections (a), (b), and (c), of section 503. (Department of Homeland Security Appropriations Act, 2014.)

Explanation for Proposed Change:

Language Provision	Explanation
¹ ... [\$7,011,807,000;] <u>\$6,750,733,000</u> ...	Dollar change only. No substantial change proposed.
² ... [\$567,000,000] <u>\$340,000,000</u> ...	Dollar change only. No substantial change proposed.
³ ... <u>to the extent fees are insufficient to pay expenses of recreational vessel documentation under such section 12114, and there is a backlog of recreational vessel applications, then personnel performing non-recreational vessel documentation functions under subchapter II of chapter 121 of title 46, United States Code, may perform documentation under section 12114</u> ...	In FY 2013, recreational vessel receipts were insufficient to cover all salaries and administration for the National Vessel Documentation Center for activities related to the issuance of recreational vessel Certificates of Documentation. The proposed language permits OE funded personnel to assist in processing the backlog until the proposed rulemaking to update fees for recreational vessels is completed (anticipated in late FY 2015).
⁴ ... <u>up to</u> \$10,000,000 may be reprogrammed [to or from Military Pay and Allowances] <u>within this appropriation</u> ...	The current reprogramming threshold of \$5,000,000 for PPAs other than PPA 1 is 0.08% of Operating Expenses and was established when the total appropriation amount was approximately half of the current request. Minor variances in cost projections, such as the estimates for the price of fuel, between budget formulation and execution may exceed the current threshold. The proposed change to the reprogramming authority makes the threshold less than 0.15% of the request and applies only to reprogramming within the Operating Expenses appropriation.

B. FY 2014 to FY 2015 Budget Change

I. Military Pay and Allowances Mission Statement

This PPA requests funding for expenses related to compensation for active duty military personnel. This category also includes pay, allowances, employer's share of FICA, Social Security credits and other expenses associated with compensating military personnel. Requested funding will compensate military personnel as they serve the Nation across all of the Coast Guard's eleven statutory missions in support of the Coast Guard's six FYHSP Programs.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.6 Military Personnel-Basic Allowance for Housing	723,785	737,343	769,602	32,259
11.7 Military Personnel	1,933,737	1,919,438	1,850,087	(69,351)
11.8 Special Personal Services Payments	6,962	6,911	6,662	(249)
12.2 Military Personnel Benefits	244,387	237,407	228,392	(9,015)
13.0 Benefits for Former Personnel	6,801	6,750	6,508	(242)
Total, Salaries & Benefits	2,915,672	2,907,849	2,861,251	(46,598)

Salaries and benefits provide funds for compensation directly related to duties performed for the Coast Guard by active duty military personnel. The FY 2015 request reflects funding for the proposed pay raise (1.0-percent), medical benefits, and other mandatory personnel entitlements. Increases result from the addition of personnel to operate new systems and assets. Decreases result from the reduction of personnel associated with asset divestments; and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$51,276	\$47,482	\$47,949	\$467

Requested funds cover the travel costs of Coast Guard military service members, while in an authorized travel status, either directly or by reimbursing the traveler. Funding also supports the shipment of military members' household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2015 request reflects the net effect of increases for PCS travel costs and decreases from enterprise-wide efficiencies, and operational adjustments. Excess funding related to obligation of funds for military retirement orders is reduced, consistent with the Administration's Campaign to Cut Waste.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$64,656	\$69,146	\$70,097	\$951

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of military members' household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2015 request includes increases for PCS travel costs and decreases from enterprise-wide efficiencies, and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$5,452	\$5,411	\$5,218	(\$193)

Other rent includes all payments to a non-Federal source for rental space, land and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The FY 2015 request includes funding for the net of personnel increases and decreases, including costs associated with decommissionings or funding associated with delivery of new assets, reductions that are part of enterprise-wide efficiencies, and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$48,301	\$39,363	\$37,886	(\$1,477)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2015 request includes funding for the net of personnel increases and decreases, including costs associated with decommissionings or funding associated with delivery of new assets, reductions that are part of enterprise-wide efficiencies, and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$29,844	\$34,212	\$32,781	(\$1,431)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2015 request reflects decreases in funding associated with decommissionings or delivery of new assets, reductions that are part of enterprise-wide efficiencies, and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.6 Medical Care	\$289,911	\$359,642	\$343,546	(\$16,096)

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, funding supports medical care costs for military service members. The request includes actuary-forecasted cost decreases associated with the existing workforce, and changes in FTE through FY 2015 adjustments to base.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$30,390	\$34,998	\$33,528	(\$1,470)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational, training and shore support units. The FY 2015 request reflects decreases in funding associated with decommissionings or delivery of new assets, reductions that are part of enterprise-wide efficiencies and operational adjustments.

II. Civilian Pay and Benefits Mission Statement

This PPA requests funding for expenses related to compensation and entitlements for Federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial positions, and Non-Ceiling (NC) employees (e.g., cooperative education students, student aids, summer interns and Federal junior fellows) and civilian employees not otherwise covered by other PPAs.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	558,582	576,331	574,081	(2,250)
11.3 Other than Full-Time Permanent	4,506	4,941	4,922	(19)
11.5 Other Personnel Compensation	12,517	13,477	13,424	(53)
12.1 Civilian Personnel Benefits	181,507	187,585	194,406	6,821
13.0 Benefits for Former Personnel	503	540	539	(1)
Total, Salaries & Benefits	757,615	782,874	787,372	4,498

Salaries and benefits funds provide for compensation directly related to duties performed for the Coast Guard by Federal civilian employees. The FY 2015 request includes funding for a pay raise (1.0-percent) and civilian personnel increases associated with the addition of personnel to support new systems and assets, an in-sourcing initiative to convert postal management from a technical services contract to federal civilian employees, and an increase in civilian pay due to a rise in government normal cost contribution for Federal Employee Retirement System personnel based on actuarial projections. Personnel reductions include program modifications to mission support and C2 realignment initiatives; a non-salary civilian pay reduction is also included, targeting reductions to cash awards and incentives, non-permanent hires, and other discretionary compensation items. This request also includes medical benefits, and other mandatory personnel entitlements.

Recoveries of Prior Year Obligations	-	-	-	-
Total Requirements	208,229	215,439	197,800	(17,639)
Full Time Equivalents	-	-	-	-

III. Training and Recruiting Mission Statement

Requests funding for the Coast Guard's professional training and education programs, and operation and maintenance of the six Coast Guard Training Centers and the Coast Guard Academy. Provides funding for tuition, travel and per diem for formal training and education performed as Temporary Assigned Duty (TAD) for military and civilian personnel. Formal training and education is defined as structured, curriculum-based instruction and applied exercises for the attainment and retention of skills and knowledge required to accomplish specific job tasks.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$40,843	\$39,990	\$38,600	(\$1,390)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2015 request reflects decreases in funding associated with decommissionings or delivery of new assets, reductions that are part of enterprise-wide efficiencies and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$8,496	\$8,766	\$8,535	(\$231)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2015 request reflects decreases in funding associated with decommissionings or delivery of new assets, reductions that are part of enterprise-wide efficiencies and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
24.0 Printing and Reproduction	\$208	\$230	\$241	\$11

Includes printing and reproduction costs. The FY 2015 request reflects increase in funding associated with delivery of new assets and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$8,754	\$7,670	\$7,140	(\$530)

Advisory and assistance services include services acquired by contract from non-Federal sources (e.g., private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2015 request reflects decreases in funding associated with decommissionings or delivery of new assets, reductions that are part of enterprise-wide efficiencies and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$88,440	\$93,501	\$84,163	(\$9,338)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2015 request reflects decreases in funding associated with decommissionings or delivery of new assets, reductions that are part of enterprise-wide efficiencies and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$2,499	\$2,437	\$1,012	(\$1,425)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2015 request reflects decreases in funding associated with decommissionings or delivery of new assets, reductions that are part of enterprise-wide efficiencies and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.4 Operation and Maintenance of Facilities	\$14,426	\$13,732	\$12,833	(\$899)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2015 request reflects decreases in funding associated with decommissionings or delivery of new assets, reductions that are part of enterprise-wide efficiencies and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$1,974	\$2,123	\$2,078	(\$45)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft, C4ISR) and supporting systems. The FY 2015 request reflects decreases in funding associated with decommissionings or delivery of new assets, reductions that are part of enterprise-wide efficiencies and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$31,981	\$35,855	\$32,337	(\$3,518)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational, training and shore support units. The FY 2015 request reflects decreases in funding associated with decommissionings or delivery of new assets, reductions that are part of enterprise-wide efficiencies and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$5,233	\$5,623	\$5,349	(\$274)

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for Training Center classrooms. The FY 2015 request reflects decreases in funding associated with decommissionings or delivery of new assets, reductions that are part of enterprise-wide efficiencies and operational adjustments.

IV. Operating Funds and Unit Level Maintenance Mission Statement

Requests funding to units, facilities and activities that are under the direct operational and administrative control of the Coast Guard's Atlantic Area and Pacific Area Commanders, operational units as well as headquarters units. These include National Security Cutters (NSCs), High Endurance Cutters (WHECs), Medium Endurance Cutters (WMECs), Communications Stations, Sector Commands, Stations, Marine Safety and Security Teams (MSSTs), various support units, and Area offices as applicable. Request includes funding to sustain normal operating costs that include energy, equipment, parts, and supplies for routine maintenance of operational assets and shore facilities and administrative supplies.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$65,377	\$44,198	\$34,423	(\$9,775)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2015 request reflects organizational efficiencies, consistent with the Administration's Campaign to Cut Waste. The Coast Guard issued revised internal travel policy that implemented constrained travel guidelines, revised the internal approval process for travel requests and required increased video conferencing (VTC) use.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$2,976	\$2,165	\$2,384	\$219

Transportation of things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. The FY 2015 request reflects the net result of organizational efficiencies and consolidation of equipment for Communications Master Stations.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$20,172	\$18,816	\$16,384	(\$2,432)

Other rent includes all payments to a non-Federal source for rental space, land and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The FY 2015 request reflects organizational efficiencies.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$65,948	\$68,766	\$67,483	(\$1,283)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft; utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements; and postal costs. The FY 2015 request reflects decreases in funding associated with divestment or delivery of new assets and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$12,837	\$7,959	\$6,921	(\$1,038)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2015 request reflects the net result of Communication Stations consolidation and reduction of contract services.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$369,459	\$366,880	\$327,240	(\$39,640)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2015 request reflects technical adjustments and an artifact of the display which includes OCO obligations for FY 2014, but not FY 2015.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$24,351	\$17,170	\$17,465	\$295

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2015 request reflects the net result of follow-on funding for Rescue 21 (R21), annualization of part-year funding and an artifact of the display which includes OCO obligations for FY 2014, but not FY 2015.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.4 Operation and Maintenance of Facilities	\$68,869	\$69,993	\$69,541	(\$452)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2015 request reflects the net result of Communications Station consolidation, follow-on funding for Rescue 21 and an artifact of the display which includes OCO obligations for FY 2014, but not FY 2015.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$36,956	\$35,025	\$20,854	(\$14,171)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2015 request reflects the net result of funding associated with divestment or delivery of new assets and an artifact in the display of OCO obligations for FY 2014, but not FY 2015.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.8 Subsistence & Support of Persons	\$667	\$603	\$763	\$160

Subsistence and support of persons include contractual services with the public or another Federal Government account for the board, lodging, and care of persons. The FY 2015 request reflects follow-on funding for new assets and an artifact of the display which includes OCO obligations for FY 2014, but not FY 2015.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$427,800	\$438,836	\$393,545	(\$45,291)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2015 request reflects the net effect of funding associated with divestment or delivery of new assets, operational adjustments and an artifact of the display which includes OCO obligations for FY 2014, but not FY 2015.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$49,688	\$50,910	\$31,238	(\$19,672)

This object class covers the purchase of capitalized and non-capitalized assets. The FY 2015 request largely reflects consolidation of Information Technology (IT) services and an artifact of the display which includes OCO obligations for FY 2014, but not FY 2015.

V. Centrally Managed Accounts Mission Statement

This request provides funding for accounts centrally managed at Coast Guard Headquarters such as: Federal Telephone System (FTS) accounts, Standard Workstation recapitalization, ammunition replenishment, recapitalization of buoys, GSA Rent, postal expenses and Mass Transit benefits. Request includes critical support elements for Coast Guard operations. Lease of adequate office space, effective communications (computers, phones, etc.) and operational gear (ammunition) are all part of those critical support requirements.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.1 Rental Payments to GSA	\$102,876	\$118,577	\$126,145	\$7,568

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2015 request reflects increased costs associated with GSA buildings occupied by the Coast Guard.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$50,081	\$68,146	\$50,464	(\$17,682)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters and aircraft, utility costs, postal costs and cutter, boat and aircraft fuel requirements. The reduction reflects annualization of prior year reductions, asset decommissionings, operational adjustments, and management efficiencies.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$106,417	\$69,156	\$71,855	\$2,699

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals development, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2015 request reflects the net of follow-on funding for new assets and management efficiencies.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$8,081	\$8,564	\$8,023	(\$541)

Purchases from Government Accounts include costs for purchases from other Federal government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g., MIPR). The FY 2015 request reflects the net of follow-on funding for new assets and management efficiencies.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$35,053	\$36,086	\$41,312	\$5,226

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2015 request reflects the net of funding associated with divestment or delivery of new assets, management efficiencies, and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$5,897	\$6,238	\$5,650	(\$588)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare parts inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2015 request reflects the net result of the ATON programmatic reduction and new surface asset follow-on costs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$25,611	\$29,605	\$30,989	\$1,384

Equipment provides for the purchase of capitalized and non-capitalized assets. The FY 2015 request reflects an increase for new surface and air asset follow-on costs.

VI. Intermediate and Depot Level Maintenance Mission Statement

Request provides service-wide funding to support the major maintenance and repair of Coast Guard aircraft, electronics systems, shore facilities and vessels not appropriated in the Coast Guard Acquisition, Construction & Improvements (AC&I) appropriation. This includes materials, services and supplies necessary for depot-level repair of buildings, structures, ground, towers, runways, aids to navigation, aircraft, and aircraft equipment.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$6,198	\$3,522	\$2,522	(\$1,000)

Travel funds cover the costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2015 request reflects travel funding requirements including continuation of travel policies in support of the Administration's Campaign to Cut Waste.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$3,423	\$3,736	\$4,275	\$539

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters and aircraft, utility costs, postal costs and cutter, boat and aircraft fuel requirements. The FY 2015 request reflects an increase for new surface asset follow-on costs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$12,149	\$29,512	\$29,238	(\$274)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, state and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2015 request reflects an increase for mission support management efficiencies.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$205,394	\$220,837	\$223,856	\$3,019

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals development, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2015 request reflects an increase for new surface asset follow-on costs and aircraft decommissioning costs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.3 Other Goods and Services from Federal Sources	\$9,518	\$9,104	\$9,418	\$314

Purchases from Government Accounts include costs for purchases from other Federal government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g., MIPR). The FY 2015 request reflects an increase for new surface asset follow-on costs and ATON program reduction costs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.4 Operation and Maintenance of Facilities	\$104,624	\$105,424	\$103,415	(\$2,009)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2015 request reflects "Freeze the Footprint" policies that enable Coast Guard to decrease its geographic footprint.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.7 Operation and Maintenance of Equipment	\$385,162	\$406,568	\$371,692	(\$34,876)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats and aircraft) and supporting systems. The FY 2015 request reflects the net result of new surface and air asset follow-on costs, operational adjustments, management efficiencies, IT services consolidation, reduced maintenance needs corresponding to operational efficiencies, and surface and air asset decommissionings.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$211,276	\$209,331	\$200,735	(\$8,596)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare parts inventories for cutters, boats and aircraft, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2015 request reflects the net result of funding associated with divestment or delivery of new assets, management efficiencies, and operational adjustments.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$46,648	\$44,341	\$44,243	(\$98)

This object class covers the purchase of capitalized and non-capitalized assets. The FY 2015 request reflects the net result of new surface asset follow-on costs and management and operational efficiencies.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
32.0 Land and Structures	\$15,077	\$15,945	\$14,157	(\$1,788)

The FY 2015 request reflects a decrease due to the obligation of funding in FY 2014 for property sales not obligated in FY 2015.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have been prioritized based on risk into a Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2015 budget.

Coast Guard requests (\$0.236 million) and 2 FTE for the FY 2015 DHS Balanced Workforce Strategy.

Position Type	FY 2013 Revised Enacted		FY 2014 Base		FY 2015 Annualization		FY 2015 Follow On		FY 2015 Increase		TOTAL FY 2013- 2015 DHS Balanced Workforce Strategy

Total	33	33	81	41	-	40	-	-	3	2	117	116

FY 2015 DHS Balanced Workforce Strategy

In FY 2015, the Coast Guard proposes converting a technical services contract costing approximately \$0.6 million to governmental service using 3 full-time civilian positions costing approximately \$0.39 million. This conversion will achieve a total saving of approximately \$0.24 million in Operating Expenses in FY 2015 (based on three quarters funding). Implementation of this contract conversion will have a minimal overlap period (1-2 weeks), and all contractor functions will be transferred to the new federal employees.

Annualization of FY 2014 Base DHS Balanced Workforce Strategy

Annualized funding required in FY 2015 for an FY 2014 initiative is \$0.45 million and 40 FTE.

Physicians' Comparability Allowance (PCA) Worksheet

Department of Homeland Security: U.S. Coast Guard

Table 1

		PY 2013 (Actual)	CY 2014 (Estimates)	BY 2015 (Estimates)
1) Number of Physicians Receiving PCAs		3	4	4
2) Number of Physicians with One-Year PCA Agreements		0	0	0
3) Number of Physicians with Multi-Year PCA Agreements		3	4	4
4) Average Annual PCA Physician Pay (without PCA payment)		\$141,759	\$141,759	\$143,177
5) Average Annual PCA Payment		\$30,000	\$30,000	\$30,000
6) Number of Physicians Receiving PCAs by Category (non-add)	Category I Clinical Position	0	0	0
	Category II Research Position	0	0	0
	Category III Occupational Health	3	4	4
	Category IV-A Disability Evaluation	0	0	0
	Category IV-B Health and Medical Admin.	0	0	0

- 7) If applicable, list and explain the necessity of any additional physician categories designated by your agency (for categories other than I through IV-B). Provide the number of PCA agreements per additional category for the PY, CY and BY.

N/A

- 8) Provide the maximum annual PCA amount paid to each category of physician in your agency and explain the reasoning for these amounts by category.

During FY13, \$90,000 in PCA was paid to three Coast Guard physicians in Category III at the National Maritime Center (NMC). These physicians ensure medical compliance of licensed merchant mariners.

- 9) Explain the recruitment and retention problem(s) for each category of physician in your agency (this should demonstrate that a current need continues to persist).

The NMC is situated in the National Capital Region commuting area with four private hospitals, a major VA Regional Medical Center, as well as two additional local VA facilities and is therefore subject to a significant level of competition in the hiring of physicians. In addition, the VA and numerous other agencies are authorized by P.L. 108-445 to pay market level physician salaries that the Coast Guard cannot compete with as evidenced by the declination of several candidates for physician positions. For example, an entry level physician at VA is now paid approximately \$195,000 for the level of experience expected to manage a National Safety Program while the best the Coast Guard can offer at the GS-14 level is \$166,771 annually without recurring retention bonuses throughout the entirety of the physician's Coast Guard career. Therefore recruiting an experienced physician with a unique specialty such as occupational medicine is made that much more difficult by the higher salary paid by the VA under current law. The local VA Center regularly has approximately 10 vacancies announced at salary ranges from \$97,000 to \$295,000 per year. Until implementing PCA, NMC experienced three long term vacancies of category III physicians with few qualified candidates; one applicant presented a revoked medical license and numerous qualified applicants declined based on salary or retirement benefit considerations.

- 10) Explain the degree to which recruitment and retention problems were alleviated in your agency through the use of PCAs in the prior fiscal year.

NMC utilizes a combination of Recruitment incentives (Superior Qualifications Appointments combined with recruitment and retention bonuses), in addition to PCA, to approach the salaries offered by VA and private sector physicians in the national Capitol region (NCR). In addition, the recent federal civilian employee pay freeze has exacerbated the need to rely on retention bonuses to retain the physicians currently employed at the NMC.

- 11) Provide any additional information that may be useful in planning PCA staffing levels and amounts in your agency.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**United States Coast Guard
Environmental Compliance and Restoration**

I. Appropriation Overview

A. Mission Statement for Environmental Compliance and Restoration:

The Environmental Compliance and Restoration (EC&R) appropriation provides funding for environmental cleanup, sustainment, and restoration of current and former contaminated Coast Guard facilities, and engineering remedies on Coast Guard assets for the purpose of obtaining or restoring compliance with environmental laws and preventing contamination and environmental damage. The program directly supports the Coast Guard's Maritime Environmental Protection Operational Response mission.

EC&R funding ensures the Coast Guard maintains its responsibilities associated with environmental stewardship. The Coast Guard complies with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Superfund Amendments and Reauthorization Act, Resource Conservation and Recovery Act (RCRA), and other applicable Federal or State laws to clean up contamination at current and former Coast Guard properties.

B. Budget Activities:

EC&R activities include site investigation and remediation activities at shore facilities, including Coast Guard property slated for divestiture or transfer.

C. Budget Request Summary:

The FY 2015 President's Budget request provides 25 positions, 24 FTE, and \$13.214 million, for EC&R activities. This request provides for environmental remediation and restoration of Coast Guard facilities, including site assessment, remediation, and long term monitoring and management activities at Coast Guard facilities.

Program Performance Justification**
(Dollars in Thousands)

PPA: Environmental Compliance and Restoration

	Perm. Pos	FTE	Amount
2013 Revised Enacted	25	24	12,461
2014 Enacted	25	24	13,164
2015 Adjustments-to-Base	-	-	50
2015 Current Services	25	24	13,214
2015 Total Request	25	24	13,214
Total Change 2014 to 2015	-	-	50

The FY 2015 President's Budget requests 25 positions, 24 FTE, and \$13.214 million for EC&R.

CURRENT SERVICES PROGRAM DESCRIPTION:

The purpose of the EC&R Appropriation is to carry out a program of environmental compliance and restoration at current and former Coast Guard facilities. It involves the identification, investigation, cleanup and long-term management of contamination from hazardous substances and pollutants, as well as engineering changes (i.e., physical changes) to Coast Guard systems, buildings, structures and assets in order to bring Coast Guard facilities into compliance with environmental laws.

Funding requested is planned to be allocated by EC&R activity as follows:

- | | |
|---|-----------------|
| 1. Long Term Management of Restoration Project Sites (36 locations) | \$1.960 million |
| 2. Site Investigation/Remediation Activities | \$8.165 million |
| 3. Salaries and Expenses | \$3.089 million |

Depending on project complexity and conditions identified during routine monitoring, detailed site surveys, or field work, project sites may undergo investigation and assessment, remediation, restoration, and/or long term management in a phased approach, requiring a funding distribution across multiple years. The following table provides a detailed listing of each planned FY 2015 EC&R project based on current information regarding prioritization of work. The list may be adjusted as new information is discovered based upon the completion of assessments and project risk priority.

Project Title	Estimated Cost (\$K)
Site Investigation/Remediation Activities	
Manitou Island Light – Site Remediation (Lead Soil Contamination)	760
Omega Station – Site Remediation (Polychlorinated Biphenyl (PCB) Soil Contamination)	730
Mali Transmitter Site – Site Remediation (PCB Soil Contamination)	1,415
LORAN Station Ilio Point – Site Remediation (Supplemental Cleanup)	175
Mount Diablo Radio Station – Site Remediation (Lead and Total Petroleum Hydrocarbons (TPH) Soil Contamination)	125
Dry Tortugas Lighthouse – Site Remediation (Lead Soil Contamination)	240
Station Noyo River – Site Remediation (Underground Storage Tank (UST) Release)	85
Marine Safety Unit Valdez – Site Remediation (UST & petroleum, oil and lubricant (POL) Contamination Cleanup)	370
Radar Station Point Higgins – Soil Contamination (Petroleum Hydrocarbons)	870
LORAN Station Saipan (former) – Site Investigation (Potential Improper Waste/Debris Disposal)	125
Farallon Island Light Station – Site Remediation (Excavation/Removal of Multiple Soil Contaminants)	2,365
Hanapepe Point Lighthouse – Site Restoration (Lead Soil Contamination)	30
Nawiliwili Harbor Lighthouse – Site Remediation (Lead Soil Contamination)	30
Kauhola Point Lighthouse – Site Remediation (Lead Soil Contamination)	50
Beavertail Lighthouse – Site Remediation (Lead Soil Contamination)	150
LORAN Station Ulithi (former) – Site Restoration (Asbestos Containing Materials (ACM) & Lead Base Paint (LBP))	645
Subtotal Site Investigation/Remediation Activities	\$8,165

Project Title	Estimated Cost (\$K)
Long Term Management of Restoration Projects	
Industrial Support Detachment Bouy Depot South Weymouth – Annual Long Term Monitoring and 5-yr Reviews of Land Use Controls (LUCs)	67
Base Kodiak / Site 3 (Former Dry Cleaning/Laundry Facility) – Long Term Monitoring Site Restoration	348
CG Yard (Site 9) – Long Term Monitoring (Soils Impacted with Metals and Polyaromatic Hydrocarbons)	23
Base Kodiak / Site 1 (CG Landfill) – Long Term Monitoring (Post Closure Maintenance & Monitoring)	57
Base Kodiak / Site 7A (Former Barrel Storage Area) – Long Term Monitoring	132
Base Kodiak / Site 6A Mogas – Post-Closure Maintenance and Annual Groundwater Monitoring of UST Leaks	57
Base Elizabeth City – Bldg 77 Stripping Shop Release (Long Term Monitoring Groundwater Contamination)	40
Air Station Traverse City – Site Cleanup of ACM (Annual Site Inspection & Cleanup of Transite Siding)	23
Air Station Brooklyn (former) – Site Remediation (JP-4 UST Release / Long Term Monitoring & Well Decommissioning)	24
Base Elizabeth City Solid Waste Management Unit (SWMU) 15 (Former Burn Area & Landfill – Long Term Monitoring) (Phytoremediation System O&M - Long Term Monitoring)	34
Air Station Clearwater – Long Term Monitoring (Monitoring of Natural Attention of Fuel Release at Fuel Handling Hydrant #3)	11
Egmont Key Lighthouse – Long Term Monitoring (Natural Attention of Groundwater Contamination)	8
CG Yard (Site 7) – Long Term Monitoring & LUCs	42
Station Sturgeon Bay – Site Remediation (UST Release)	95
Grays Reef Light – Long Term Monitoring (UST Release)	22
Station Pascagoula – Long Term Monitoring (Soil & Groundwater Contamination)	35
Base Elizabeth City SWMU 62 – Long Term Monitoring (Seaplane Pipeline Release site)	25

Environmental Compliance and Restoration Mission Statement

Environmental Compliance and Restoration (EC&R) will provide for (1) environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, and (2) engineering fixes on Coast Guard assets to comply with environmental laws and keep environmental damage from developing. Failure to meet restoration or compliance responsibilities could subject the Coast Guard to fines, penalties, or shutdown of operational assets by environmental regulators. In addition, Coast Guard EC&R funding supports site investigation and remediation activities at shore facilities slated for property divestiture or transfer actions.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	2,432	2,450	2,469	19
11.5 Other Personnel Compensation	17	17	17	-
11.6 Military Personnel-Basic Allowance for Housing	25	25	25	-
11.7 Military Personnel	58	59	60	1
12.1 Civilian Personnel Benefits	728	733	766	33
12.2 Military Personnel Benefits	5	5	5	-
Total, Salaries & Benefits	3,265	3,289	3,342	53

The FY 2015 request includes the proposed pay raise (1.0 percent for military and 1.0 for civilians), medical benefits and other mandatory personnel entitlements. The increase in civilian pay is due to a rise in government normal cost contribution for Federal Employee Retirement System personnel based on actuarial projections, as required by OMB A-11, Section 32.3.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$4,671	\$8,751	\$8,749	(\$2)

Other services include contracts with non-Federal sources that are not otherwise classified under Object Class 25. This request reflects consideration of prior-year unobligated balances.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**United States Coast Guard
Reserve Training**

I. Appropriation Overview

A. Mission Statement for Reserve Training:

As the principal Federal agency charged with maritime safety, security and environmental stewardship, the Coast Guard protects vital economic and security interests of the United States from internal and external maritime risks and threats. The Coast Guard Reserve may be called upon to provide units and personnel to augment active duty Coast Guard forces during times of crisis, domestically or worldwide.

B. Budget Activities:

The Reserve Training appropriation facilitates training, operation, and administration of the Coast Guard Reserve Program. Coast Guard Reserve Forces provide qualified and trained personnel for active duty in the event of conflict, national emergency, or natural and man-made disasters. Reservists maintain their readiness through mobilization exercises and duty alongside regular Coast Guard members during routine and emergency operations. Reservists will continue to serve as a cost-effective surge force to enhance the Nation's resilience to disasters.

C. Budget Request Summary:

The FY 2015 President's Budget requests 416 positions, 416 FTE, and \$109.605 million for Reserve Training. This request provides necessary resources for the training, operation, and administration of the Coast Guard Reserve Program, including training, equipping, and ensuring the readiness of a 7,000 member Coast Guard Reserve workforce.

**Department of Homeland Security
U.S. Coast Guard
Reserve Training
Program Performance Justification**
(Dollars in Thousands)

PPA: Reserve Training

	Perm. Pos	FTE	Amount
2013 Revised Enacted	534	528	131,441
2014 Enacted	474	474	120,000
2015 Adjustments-to-Base	(58)	(58)	(10,395)
2015 Current Services	416	416	109,605
2015 Total Request	416	416	109,605
Total Change 2014 to 2015	(58)	(58)	(10,395)

The FY 2015 President's Budget requests 416 positions, 416 FTE, and \$109.605 million for Reserve Training.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Coast Guard Reserve is the Coast Guard's surge capacity military workforce and provides a cost-effective and versatile surge capacity to respond to major contingencies, such as natural and man-made disasters, maritime homeland security, national security, and other events.

The Coast Guard Reserve is a cornerstone of service readiness for contingency response. Most recently, the Coast Guard Reserve was an invaluable contributor during the Coast Guard's response to 2012 Hurricane Sandy. Coast Guard reservists also augment active duty forces through Inactive Duty Training and Active Duty Training periods. This request for funding ensures these Reservists are fully trained and ready to perform vital missions when called upon to do so.

This request sustains 416 Full Time Support (FTS) military and civilian positions. This staff develops training policy and doctrine and manages all recruiting, formal training, personnel, and resource program oversight.

Adjustments to base include increases of \$0.5 million for the proposed civilian and military pay raises and benefit cost increases, and decreases \$10.5 million, associated with adjustments in Reserve workforce levels (-58 FTP, -58 FTE, and the transfer of 500 Selected Reserve (SELRES) members to the Inactive Ready Reserve). The Reserve workforce will remain a

critically important component of the Service's force structure and will continue to have the requisite force strength to surge in response to national disasters and contingencies (i.e., flooding, earthquakes, terrorist and pollution incidents, and hurricanes).

Reserve Training Mission Statement

This PPA request funds for compensation of active duty military service member and civilian personnel who support the Reserve Training program, and the 7,000 Coast Guard Reservists who are currently part of the Selective Reserve. This category also includes pay, allowances, employer's share of FICA, Social Security credits, operations, maintenances and other administrative expenses.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	6,277	5,670	5,220	(450)
11.5 Other Personnel Compensation	31	28	25	(3)
11.6 Military Personnel-Basic Allowance for Housing	11,201	10,809	10,517	(292)
11.7 Military Personnel	80,120	74,091	68,029	(6,062)
11.8 Special Personal Services Payments	240	240	240	-
12.1 Civilian Personnel Benefits	1,612	1,456	1,403	(53)
12.2 Military Personnel Benefits	8,658	7,972	6,922	(1,050)
13.0 Benefits for Former Personnel	234	227	216	(11)
Total, Salaries & Benefits	108,373	100,493	92,572	(7,921)

Salaries and Benefits provide funds for compensation directly related to duties performed by active duty military and civilian personnel. The FY 2015 request reflects the net effects of adjustments in Reserve workforce levels (-58 FTP); funding for the proposed pay raise (1.0 percent military and 1.0 percent civilian); and an increase in civilian pay due to a rise in government normal cost contribution for Federal Employee Retirement System personnel based on actuarial projections, as required by OMB A-11, Section 32.3.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$8,533	\$7,862	\$7,013	(\$849)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2015 request reflects travel funding requirements and the continued implementation of internal travel policies consistent with the Administration's Campaign to Cut Waste.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$1,081	\$997	\$889	(\$108)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2015 request reflects anticipated needs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$428	\$395	\$352	(\$43)

Communication, utilities, and misc charges are payment for information technology, utilities and miscellaneous changes. The FY 2015 request reflects anticipated needs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$2,302	\$2,062	\$1,699	(\$363)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2015 request reflects anticipated needs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.6 Medical Care	\$2,255	\$1,529	\$1,037	(\$492)

Payments to private sector contractors as well as Federal agency contractors for medical care. The FY 2015 request reflects anticipated needs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.8 Subsistence & Support of Persons	\$1,477	\$1,361	\$1,211	(\$150)

Contractual services with the public or another Federal Government account for the board, lodging, and care of persons. The FY 2015 request reflects anticipated needs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$5,711	\$5,131	\$4,680	(\$451)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. The FY 2015 request reflects anticipated needs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$178	\$165	\$147	(\$18)

This object class covers the purchase of capitalized (depreciated) assets and non-capitalized assets. The FY 2015 request reflects anticipated needs.

BUDGET REQUEST AND SUPPORTING INFORMATION

United States Coast Guard Acquisition, Construction and Improvements

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

Acquisition, Construction and Improvements (AC&I) provides for the acquisition, construction, rebuilding, and improvement of vessels, aircraft, shore facilities and military housing, aids to navigation (ATON) systems and facilities, and command, control, communications and computer systems and related equipment. Funds appropriated for AC&I are managed by Coast Guard acquisition project managers who oversee these projects and apply best practices, in accordance with the Coast Guard's Major Systems Acquisition Manual (MSAM) and applicable Department of Homeland Security (DHS) management directives, to optimize the return on recapitalization investments.

B. Budget Activities:

The AC&I appropriation funds the acquisition of new capital assets, construction of required facilities, and physical improvements to existing facilities and assets. The appropriation covers Coast Guard-owned and operated vessels, aircraft, shore facilities and other items such as command, control, communications and computer equipment. Through processes documented in the MSAM, acquisition managers are required to follow a continuum of activities ranging from pre-acquisition concept development to deployment and sustainment. Activities and documentation produced throughout the acquisition lifecycle inform budget requests and budget-related project activities.

C. Budget Request Summary:

The FY 2015 President's Budget requests 898 positions, 881FTE, and \$1.084 billion for AC&I. The following is the funding for each sub-appropriations:

- Vessels - \$803,000,000
- Aircraft - \$68,000,000
- Other - \$57,300,000
- Shore and ATON - \$40,580,000
- Personnel and Management - \$115,313,000

2015 Total Request	-	-	803,000
Total Change 2014 to 2015	-	-	(196,000)

The President's Budget requests \$803.000 million in FY 2015.

SUBAPPROPRIATION DESCRIPTION:

The vessel subappropriation provides funding to recapitalize and/or improve the Coast Guard's fleet of boats and cutters. With many of the Coast Guard's cutters operating beyond their planned service life, these recapitalization and sustainment projects are critical to ensuring the continued mission effectiveness and readiness of the Coast Guard's surface fleet. FY 2015 funding continues initial work towards acquisition of a new Polar Icebreaker; supports the Survey and Design of Vessels and Boats; and continues the National Security Cutter (NSC), Offshore Patrol Cutter (OPC), Fast Response Cutter (FRC), Cutter Boats, and In-Service Vessel Sustainment (ISVS) projects. The Coast Guard's fleet of boats and cutters supported within this program collectively perform all eleven statutory Coast Guard missions in the offshore, coastal and inland operating areas.

The Coast Guard's fleet of NSCs, OPCs and FRCs is replacing the current fleet of High and Medium Endurance Cutters (WHECs/WMECs) and Island-Class Patrol Boats. These cutters will provide improved endurance, speed, sea-keeping, surveillance, and persistent presence in the offshore area of responsibility (AOR).

Total Change 2014 to 2015	-	-	(107,310)

The President's Budget requests \$68.000 million in FY 2015.

SUBAPPROPRIATION DESCRIPTION:

The aircraft subappropriation provides funding for recapitalization and sustainment of the Coast Guard's fleet of aging aircraft. It is comprised of fixed and rotary-wing aircraft sustainment projects.

The Coast Guard's fleet of fixed and rotary wing aircraft supported within this program collectively performs all Coast Guard missions in the Offshore, Coastal and Inland AORs. The land-based fixed-wing aircraft include the HC-130 and C-144A aircraft. The HC-144A is the Coast Guard's primary medium-range fixed-wing aircraft. The Coast Guard's fleet of existing HC-130Hs and HC-130Js provide long range surveillance fixed-wing capability. Each of these fixed-wing aircraft enables the Coast Guard to conduct airborne surveillance, detection, classification and identification of vessels and other aircraft. The newly acquired HC-27J aircraft will provide additional maritime patrol capability as they become operational in the Coast Guard fleet.

The Coast Guard's fleet of rotary wing aircraft includes the HH-60 and HH-65 helicopters. The HH-60 is a medium-range recovery helicopter, and the HH-65 is a short-range recovery helicopter. Both aircraft are deployed from land-based air stations; the HH-65 is also deployed routinely aboard the Coast Guard's fleet of NSCs, WHECs, and WMECs.

2015 Total Request	-	-	57,300
Total Change 2014 to 2015	-	-	(7,630)

The President's Budget requests \$57.300 million in FY 2015.

SUBAPPROPRIATION DESCRIPTION:

The "Other" subappropriation procures hardware and software, including initial acquisition, development or construction or improvement of any system, software or equipment costing over \$1.0 million per usable segment or item, or \$10.0 million total project cost. In FY 2015, funding will support continued progress on build-out of Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) systems, and CG-Logistics Information Management System (CG-LIMS). This subappropriation also provides funding for Program Oversight and Management (PO&M).

The Coast Guard leverages its C4ISR capability to effectively execute a broad mission set in an immensely challenging operating environment. Assets are able to receive, evaluate and act upon information obtained through the capability provided by the systems supported in this program. The C4ISR project provides standardized capability to major cutters and aircraft, facilitating interoperability and information sharing. The CG-LIMS project is replacing redundant and obsolete logistics systems with one single integrated IT system capable of providing enhanced configuration management, supply support, and improved financial accountability. PO&M is critical for efficient oversight and execution of the Coast Guard's acquisition programs.

Total Change 2014 to 2015	-	-	17,580

The President's Budget requests \$40.580 million in FY 2015.

SUBAPPROPRIATION DESCRIPTION:

The AC&I shore facilities, military housing and ATON subappropriation provides funding for the acquisition, construction, rebuilding, and improvement of the Coast Guard's shore facilities, military housing, ATON and related equipment. Shore facilities are critical to supporting all Coast Guard operations and addressing the shore-side needs of the service's operational communities. This funding also provides infrastructure upgrades at new cutter homeports and air stations to ensure these facilities are fully functional and ready prior to arrival of new assets.

Total Change 2014 to 2015	-	15	1,918

The President's Budget requests \$115.313 million in FY 2015.

SUBAPPROPRIATION DESCRIPTION:

AC&I has a specific annual subappropriation to fund "personnel compensation and benefits and related costs." The primary activities include project management, financial management, support services, training, and workforce certification. Coast Guard acquisition programs rely on government acquisition professionals with the competencies and capacity to manage acquisitions in accordance with CG and DHS policies, while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act, DHS certification level requirements, and OMB Circular A-76.

Survey and Design - Vessels and Boats

\$500

Project Description, Justification and Scope

Funds survey and design work in direct support of the In-Service Vessel Sustainment (ISVS) project. Preliminary survey and design work is essential to properly plan and scope sustainment availabilities, such as Mission Effectiveness Projects (MEP) and Service Life Extension Projects (SLEP). This request provides funding to support multi-year engineering survey and design efforts in support of projects including the 47-foot Motor Life Boat (MLB) and the CGC EAGLE (WIX 327).

The 117 47-foot MLBs serve as the Coast Guard's primary shore-based heavy weather Search and Rescue response asset and must operate safely and effectively in heavy weather and surf. As a ready response resource, an extremely high state of equipment readiness and operational availability must be maintained. Engineering evaluations indicate vital systems including the hull structure, engines, steering system, tow reel assembly and crew shock-mitigating seating are in need of replacement to prevent loss of operational readiness and to stabilize maintenance costs.

CGC EAGLE's SLEP will be broken into four segments to allow the cutter to meet training commitments. The first phase of CGC EAGLE's SLEP will be completed in FY 2014 via the ISVS project. The funding in this request will support design efforts for subsequent SLEP phases. Systems targeted for recapitalization include the gyrocompass, anchor windlass, main engine, waste water treatment systems, reverse osmosis system, berthing area habitability, and masts.

As in-service vessels continue to age, this program is required to conduct detailed hull condition surveys, along with engineering design work that will be used to plan the projects. Examples of the work to be performed under this project include: detailed assessment of the material condition of the current fleet's hull, mechanical and electrical systems and subsystems, and study and analysis of engineering systems to evaluate suitability for use in sustainment projects.

Early planning, requirements development, and cost estimating in support of acquisition and sustainment projects are critical to proper planning and acquisition oversight to make the best use of limited resources while minimizing impact to the operational fleet.

In-Service Vessel Sustainment (ISVS)

\$24,500

Project Description, Justification and Scope

The In-Service Vessel Sustainment (ISVS) program is designed to perform life-cycle event vessel repair availabilities, such as Mission Effectiveness Projects (MEP), Mid-Life Availabilities and Service Life Extension Projects (SLEP), on the Coast Guard's existing fleet of vessels.

FY 2015 funding continues SLEP efforts on the 140-foot ice breaking tugs (WTGB) and the Mid-Life Availability on the 225-foot ocean going buoy tender (WLB) fleet. FY 2015 funding initiates sustainment of the 47-foot Motor Life Boats (MLB) and completes the second of four phases of the CGC EAGLE SLEP.

This program ensures in-service vessels meet or exceed their design service life through the recapitalization of hull, mechanical, electrical (HM&E) and electronic systems that have been identified as the highest contributors to maintenance costs and decreasing operational availability.

140-foot Ice Breaking Tugs (WTGBs): The lead ship in this class was placed in service in 1978 and has been in continuous service for 32 years. This sustainment program is the first that has been performed on this fleet. Specific system upgrades and improvements to be addressed include: propulsion plant, heating, ventilation, and air conditioning (HVAC) systems, installation of an engine room fire suppression system, boat launching davit replacement, Oily Water Separator (OWS) replacement, exhaust configuration modifications, and crew habitability improvements to meet current standards.

CGC EAGLE (WIX-327): CGC EAGLE, which was built in 1936, completed her last significant overhaul period in 1983. Recent engineering surveys indicate EAGLE requires a SLEP to ensure safe and reliable operation. EAGLE's SLEP will be divided into four segments to allow the cutter to meet annual operational commitments. Systems targeted for recapitalization include: gyrocompass, anchor windlass, main engine, waste water treatment systems, reverse osmosis system, berthing area habitability, and masts.

225-foot Ocean Going Buoy Tenders (WLBs): This class was placed in service in 1996 and was designed to meet a 30-year service life. Achieving that 30-year service life is predicated upon performing a mid-life availability to address obsolescence of select engineering systems. The WLB mid-life availability program is intended to include a stability assessment, electrical load analysis, updates to the machinery control system, propeller, HVAC systems, an overhaul of the buoy tending crane and other auxiliary systems, topside preservation, deck equipment, and weight handling gear, as well as crew habitability updates.

47-foot Motor Life Boat (MLB): The fleet of 47-foot MLBs was constructed from 1997 to 2003 and was designed for a 25-year service life. The boats continue to serve well, but many of the critical systems have become obsolete or difficult to support. Engineering evaluations have identified the propulsion system including engines, reduction gears, and the integrated control

system, a variety of mission-specific equipment including the towing reel and components of the survivor's compartment; various structural repairs and renewal of watertight closures are in need of recapitalization to prevent the loss of operational readiness and stabilize maintenance costs.

FY 2013 Key Events

- Continued engineering development and materials orders for the SLEP of the 140-foot WTGBs.

FY 2014 Planned Key Events

- Begin production work on the first 140-foot WTGB and first phase of SLEP on EAGLE;
- Perform condition assessments on the second and third WTGBs in preparation for SLEP induction;
- Begin engineering work and order materials for the first 225-foot WLB and second 140-foot WTGB.

FY 2015 Planned Key Events

- Begin production work on the second 140-foot WTGB and the second phase of SLEP on EAGLE;
- Order materials for third 140-foot WTGB;
- Continue engineering work on 225-foot WLB;
- Begin engineering work for the 47-foot MLB SLEP.

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

National Security Cutter (NSC)

\$638,000

Project Description, Justification and Scope

Provides \$638 million for Segment 2 of Long Lead Time Materials (LLTM) and Production for the eighth NSC, the Structural Enhancement Drydock Availability (SEDA) for the first NSC, and Post-Delivery Availability (PDA) for the fourth through eighth NSCs.

These Legend Class Cutters are replacing the legacy High Endurance Cutters (HEC), built between 1967 and 1972. Acquisition of the eighth NSC completes the recapitalization of the Coast Guard's High Endurance Cutter fleet. Compared to HECs, the NSCs provide increased endurance, intelligence, and maritime domain awareness capability in the offshore environment. The NSC, along with the Offshore Patrol Cutter (OPC), will comprise the Coast Guard's offshore response capability for the next 40 years, and is an essential element of DHS's layered security strategy. NSC missions are primarily focused on drug interdiction, fisheries enforcement and defense readiness, but also perform search and rescue; ports, waterways and coastal security; migrant interdiction; and serve as mobile command and control platforms for surge operations. Acquisition of NSC-8 will improve long-term capacity and capability in the execution of long range Coast Guard missions offshore and is designed to operate in every ocean and all environments. The NSC also meets modern environmental requirements that were not in place when the HECs were designed.

FY 2013 Key Events

- Awarded Segment 2 LLTM for NSC-6;
- Christened – Launched NSC-4;
- Keel laid on NSC-5;
- Awarded Production contract for NSC-6;
- Awarded Segment 1 LLTM contract for NSC-7.

FY 2014 Planned Key Events

- Christening – Launch of NSC-5;
- Start Fabrication (formal recognition of first 100 tons constructed) of NSC-6;
- Award Segment 2 LLTM and Production contract for NSC-7;
- Deliver NSC-4;
- Award Segment 1 LLTM for NSC-8.

FY 2015 Planned Key Events

- Deliver NSC-5;
- Christening - Launch of NSC-6;
- "Start Fabrication" (Formal recognition of first 100 tons constructed) of NSC-7;
- Award Segment 2 LLTM and Production contract for NSC-8;
- Structural Enhancement Drydock Availability (SEDA) for NSC-1.

U.S. Coast Guard - FY 2015 Congressional Justification

Offshore Patrol Cutter (OPC)

\$20,000

Project Description, Justification and Scope

Funding will support technical reviews of Preliminary & Contract Designs (P&CD) for the Offshore Patrol Cutter (OPC) class. There is a two-phase acquisition strategy for this program. Phase I: Three P&CDs were awarded to competing contractors in FY 2014. Phase II: After a DHS' decision to move forward with the program, one P&CD contractor's design can be chosen for Detailed Design and Construction (DD&C). This funding will support the OPC Project Management Office, OPC Ship Design Team, and the Technical Authorities to continue review of contract deliverables, perform technical evaluations, update life-cycle cost estimates, and develop logistics and training studies.

The OPC is critical to bridging the capability gap between the National Security Cutter (NSC) and Fast Response Cutter (FRC), and is planned to replace the Coast Guard's fleet of Medium Endurance Cutters (MEC) as they reach the end of their service lives.

FY 2013 Key Events

- Evaluated industry proposals

FY 2014 Planned Key Events

- Award three P&CD contracts

FY 2015 Planned Key Events

- Evaluate P&CD contract deliverables

Fast Response Cutter (FRC)

\$110,000

Project Description, Justification and Scope

Provides funds for production of two FRCs, associated contract line items, and project management costs. The planned fleet of FRCs is replacing the 110-foot patrol boats and will similarly operate in the coastal zone. Examples of FRC missions include: Search and Rescue, Migrant Interdiction, Living Marine Resource Enforcement, Drug Interdiction and Ports, Waterways and Coastal Security.

FRCs provide enhanced capabilities over the 110-foot patrol boats including improved C4ISR capability and interoperability; stern launch and recovery (up through sea state 4) of a 40 knot, Over-the-Horizon, 7m cutter boat; a remote operated, gyro stabilized MK38 Mod 2, 25mm main gun; improved sea keeping; and enhanced crew habitability.

Other capabilities include:

- The ability to conduct shipboard migrant interdiction evolutions, including detection, tracking, interdiction, embarkation and disembarkation, administrative processing, and retention onboard;
- The ability to patrol areas where suspected illegal migrant, drug, or fisheries activities may occur, and dispatch boarding teams to suspect vessels and subsequently escort them to their final disposition;
- The ability to search for, locate, and recover distressed mariners; provide medical assistance or evacuation, and provide safe transport. The FRC will also provide the ability to control damage to distressed vessels and other property, provide dewatering equipment and mechanical assistance, and tow stricken vessels.

FY 2013 Key Events

- Delivered FRCs #4-7.
- Ordered FRCs #19-24

FY 2014 Planned Key Events

- Delivery of FRCs #8-11.
- Ordered FRCs #25-30

FY 2015 Planned Key Event

- Delivery of FRCs #12-15;
- Order FRCs #31-32
- Commence Final Operational Test and Evaluation (FOT&E);
- Release RFP for re-competition of the FRC production contract using RDLF deliverables.

Funding History

<i>FY</i>	<i>\$K</i>	<i>Major Activity Associated with Appropriated Funding</i>
2010 & Prior	\$505,245	Base contract option, option period 2, plus associated CLINs

Cutter Boats

\$4,000

Project Description, Justification and Scope

This request continues funding for production of multi-mission cutter boats – LRI (Long Range Interceptor) and OTH (Over The Horizon) – that will be fielded on the National Security Cutter. This request funds production of one Cutter Boat Long Range Interceptor II (CB-LRI-II), and two CB-OTH-IVs, along with project and technical support.

The CB-LRI-II is a 35-foot cutter boat. The CB-LRI-II will provide enhanced capabilities compared to legacy cutter boats such as higher speeds, extended range, better sea-keeping, and greatly improved communications and connectivity to the parent cutter.

The CB-OTH-IV is a 26-foot cutter boat. The CB-OTH-IV also provides enhanced capabilities compared to legacy cutter boats. The CB-OTH-IV operates beyond sight of the parent cutter (over the horizon) to deploy boarding parties to pursue and interdict targets of interest, and perform SAR operations.

FY 2013 Key Events

CB-OTH-IV

- Achieved Acquisition Decision Event (ADE) approval to enter Produce/Deploy/Support Phase;
- Ordered CB-OTH-IV #2-9;
- Delivered CB-OTH-IV #2.

CB-LRI-II

- Conducted Operational Test & Evaluation;
- Achieved ADE approval to enter Produce/Deploy/Support Phase;

FY 2014 Key Events

CB-OTH-IV

- Order CB-OTH-IV #10-11;
- Deliver CB-OTH-IV #3-9.

CB-LRI-II

- Award production contract;
- Order CB-LRI-II #2-6;
- Deliver CB-LRI-II #2-3.

FY 2015 Planned Key Events

CB-OTH-IV

- Deliver CB-OTH-IV #10-11;
- Order CB-OTH IV #12-13.

CB-LRI-II

- Order CB-LRI-II #7;
- Deliver CB-LRI-II #4-6.

Polar Icebreaker

\$6,000

Project Description, Justification and Scope

Continues initial activities for a new polar icebreaker, intended to provide continued U.S. Polar icebreaking capability following the projected end of service life of CGC POLAR STAR. This effort will consider requirements analyses undertaken by the Coast Guard within the past several years, including the High-Latitude Mission Analysis Report, and the Polar Icebreaker Business Case Analysis. Additionally, this effort will be informed by the priorities of the U.S. Arctic Region Policy.

This funding will be used to continue development of programmatic planning documents required under the USCG Major Systems Acquisition Manual, including a Life Cycle Cost Estimate and modeling simulation and testing (as required). This funding will also support the development of an initial specification. These efforts will lead to development of a Request for Proposal.

FY 2013 Key Events

- Mission Needs Statement Approved;
- Concept of Operations Approved;
- Initial Acquisition Strategy Approved.

FY 2014 Planned Key Events

- Capability Development Plan Approval;
- Preliminary Operational Requirements Document Development/Approval;
- Alternatives Analysis Study Plan Approval.

FY 2015 Planned Key Events

- Operational Requirements Document Development/Approval;
- Finalize Alternatives Analysis;
- Complete Initial Lifecycle Cost Estimate;
- Conduct Feasibility Studies.

U.S. Coast Guard - FY 2015 Congressional Justification

HC-144A Conversion, Sustainment

\$15,000

Project Description, Justification and Scope

This request funds spare parts and training devices for the 18 Maritime Patrol Aircraft (MPA) and 17 mission systems pallets (MSP) on contract. These HC-144A aircraft will be stationed at Mobile, AL; Miami, FL; Cape Cod, MA; and Corpus Christi, TX.

The HC-144A Ocean Sentry is a medium-range surveillance (MRS) and transport fixed air capability; complementing the long-range, heavy-lift four-engine HC-130 aircraft. The two-engine high-efficiency turboprop design allows extended surveillance and quick response capability at a relatively low cost per flight hour.

FY 2013 Key Events

- Exercised option on production contract for MPA #18;
- Delivered MPA #15.

FY 2014 Planned Key Events

- MPA #16 – 17 Delivery;
- Delivery of five Mission System Pallets (#13 – 17);
- Develop follow-on mission system;
- Award Multi-year AC&I/ OE Spares contract to EADS N.A.;
- Flight Simulator Delivery.

FY 2015 Planned Key Events

- MPA #18 delivery;
- Procurement of Initial Spare Parts and Training Devices;
- Continue development and test of follow-on mission system;
- Stand up of Air Station Corpus Christi.

Funding History

<i>FY</i>	<i>\$K</i>	<i>Major Activity Associated with Appropriated Funding</i>
2010 & Prior	\$662,635 ³	
2010	\$138,500	Procure MPA #13 – #14; Simulator; Initial Spares
2011	\$44,920 ¹	Procure MPA #15
2012	\$143,500 ²	Procure MPA #16 - #17; Up to five MSPs; Initial Spares
2013	\$43,115	Procure MPA #18; Missionize MPA #18; Initial Spares
2014	\$9,200 ³	Follow-on mission system development and Missionize MPA #18
<i>Total</i>	<i>\$1,041,870</i>	<i>Funding received for FY 2002 through FY 2014</i>

¹ \$39,920K was appropriated in P.L. 112-10, Department of Defense and Full-Year Continuing Appropriations Act, 2011 and was increased to \$44,920K via subsequent Congressionally approved transfer.

² Includes \$20M via Congressionally approved transfer allocated in 2008 and 2012.

³ \$9,200K rescinded from FY13 and re-apportioned in FY14.

Available Funding Spend Plan (Projected Obligations by Year Appropriated)

<i>FY</i>	Cost Category (\$000s)	FY 2013	FY 2015	Totals
2015	Production	\$500		\$500
	Program Management	\$464		\$464
	Initial Spares		\$15,000	\$15,000
Total		\$964	\$15,000	\$15,964

Contractors:

USN (NAVAIR) is the system developer for the follow-on mission system.

Subcontractors:

Airframe: Airbus Military CN235-300M CG-01 Configuration (Madrid, Spain)

Avionics: Rockwell Collins (Cedar Rapids, IA)

Power Plant: General Electric CT7-9C3 engine (Lynn, MA)

Propulsion: Hamilton Sundstrand 14RF-37 (Windsor Locks, CT)

Sensors: Telephonics APS-143V3 Multi-Mode RADAR (Farmingdale, NY)

FLIR Systems Star Sapphire III (Portland, OR)

Saab R4A Automatic Identification System (Stockholm, Sweden)

Mission System: Lockheed Martin (Moorestown, NJ)

Communications: Wulfsberg RT-5000 (Prescott, AZ)

Significant Changes

The acquisition of HC-144A aircraft has been paused while the Coast Guard accepts the transfer of 14 C-27J aircraft from the U.S. Air Force and the fixed-wing aircraft fleet mix is reviewed.

U.S. Coast Guard - FY 2015 Congressional Justification

HC-27J Conversion, Sustainment

\$15,000

Project Description, Justification and Scope

This request continues funding for the stand-up of the Asset Project Office for the newly acquired HC-27J aircraft. Activities include un-preserving the aircraft, painting the aircraft, contractor logistics support, training for pilots and aircrew and coordinating airworthiness evaluation with United States Navy Naval Air Systems Command (NAVAIR).

The HC-27J is a medium-range surveillance (MRS) aircraft, with a maximum range of 3,200 miles. In comparison, the Long Range Surveillance aircraft, HC-130J, has a maximum range of 5,020 miles. The engines and propellers share commonality with the Coast Guard's HC-130J platform. The two-engine high-efficiency turboprop design allows extended surveillance and quick response capability at a lower cost per flight hour than the HC-130H/J. Similar to the HC-130J/H and the HC-144A, the HC-27J will be a multi-mission platform that performs Search and Rescue; Law Enforcement; Homeland Security; Marine Environmental Protection; and International Ice Patrol missions, as well as assist with cargo and personnel transport.

FY 2014 Key Events:

- Initial stand-up of Asset Project Office (APO) to include facilities
- Initial pilot and aircrew training
- Establishment of contractor logistics support contracts
- Airworthiness efforts coordinated through NAVAIR
- Un-preserving and painting aircraft

FY 2015 Planned Key Events:

- Continue stand-up of APO
- Initial pilot and aircrew training
- Contractor Logistics Support
- Airworthiness efforts coordinated with NAVAIR
- Un-preserving and painting aircraft

FUNDING HISTORY

<i>FY</i>	<i>\$K</i>	<i>Major Activity Associated with Appropriated Funding</i>

H-65 Conversion and Sustainment Project

\$30,000

Project Description, Justification and Scope

Continues modernization and sustainment of the Coast Guard's fleet of 99 H-65 helicopters, converting them to MH-65 Short Range Recovery (SRR) helicopters. (The operational fleet of H-65s is currently 99 aircraft, due to the loss of 6505, 6523, and 6535.) The modernization effort includes reliability & sustainability improvements, where obsolete components are replaced with modernized sub-systems, including an integrated cockpit and sensor suite. The H-65 Conversion and Sustainment Project is comprised of six Discrete Segments (DS). Each of the six discrete segments consists of upgrades and modernization of aging components and sub-systems necessary to sustain readiness, stabilize maintenance costs, and comply with Federal Aviation Administration safety requirements. DS1 Re-Engine, DS2 National Capital Region Air Defense (NCRAD), and DS3 Airborne Use of Force (AUF) were fully funded through prior year funding. DS4 Obsolete Component Modernization and DS6 (Automatic Flight Control System (AFCS) / Avionics) were started with prior year funding and will be continued with funds requested in FY 2015.

FY 2013 Key Events:

- Continued DS4 Full Rate Production;
- Continued DS6 (AFCS/Avionics) cockpit modernization design and integration;
- DS3 AUF transitioned to Sustainment;
- Built Technology Demonstrator.

FY 2014 Key Events:

- Continue DS4 Full Rate Production;
- Continue DS6 (AFCS/Avionics) cockpit modernization design and integration;
- Begin Developmental Test and Evaluation of MH-65E.

FY 2015 Planned Key Events:

- Complete DS4 Full Rate Production;
- Continue DS6 (AFCS/Avionics) cockpit modernization design and integration;
- Continue Developmental Test and Evaluation of MH-65E;
- Begin Validation and Verification (V&V) MH-65E build.

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

HC-130J Acquisition, Conversion, Sustainment

\$8,000

Project Description, Justification and Scope

Provides funds for spare parts required to maintain the operational availability of the HC-130J aircraft.

This project, formerly titled the Long Range Surveillance (LRS) project, previously combined HC-130H sustainment and HC-130J acquisition. The project now solely focuses on the HC-130J acquisition, conversion and sustainment. The HC-130J acquisition includes acquiring HC-130J aircraft, development and installation of a follow-on mission system, and the logistics to support the system. Logistics includes acquiring spares, trainers, training for operations and maintenance, technical publications, facilities, and support equipment.

The HC-130J fleet is a major contributor to overall performance of the Coast Guard's statutory missions with specific contributions to the Coast Guard and Department of Homeland Security Programs of Maritime Law Enforcement, Maritime Response, Defense Operations, and Marine Transportation System Management.

FY2013 Key Events

- Completed one HC-130H Center Wing Box installation;
- Completed Avionics One Upgrade (A1U) Validation & Verification (V&V aircraft).

FY 2014 Planned Key Events

- Completed two A1U installations on HC-130H aircraft;
- Completed one HC-130H Center Wing Box (CWB) installation;
- Completed A1U Developmental Test;
- Completed Observer Station delivery and Flight Test;
- Develop follow-on mission system.

FY 2015 Planned Events

- Award missionization of C-130J #9 (planned delivery in FY17);
- Award production of C-130J #10 & #11.

HC-130H Funding History

<i>FY</i>	<i>\$K</i>	<i>Major Activity Associated with Appropriated Funding</i>
FY10 & Prior	\$152,707	A1U, CWB, Surface Search Radar and avionics upgrades.
2011	\$18,450	Avionics upgrades and Missionization start-up.
<i>Total</i>	<i>\$171,157</i>	<i>Funding received for FY 2003 through FY 2011</i>

HC-130J Funding History

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>
FY10 & Prior	\$154,643	Missionization of aircraft; spares and Fleet Introduction.

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>
2011	\$3,992	Remaining logistics to support 4000 program hours.
<i>Total</i>	<i>\$158,635</i>	<i>Funding received for FY 2004 through FY 2011</i>

LRS (HC-130H/J) Funding History

<i>FY</i>	<i>\$K</i>	<i>Major Activity Associated with Appropriated Funding</i>
2012	\$16,000	HC-130H A1U and CWB, HC-130J #9 missionization
2012	\$63,500	USAF appropriation; transferred to USCG for HC-130J baseline #9.
2013	\$85,606	Procurement and missionization of HC-130J #10.
2014	\$129,210	HC-130J #11 & Mission System (MS) Installation, Follow-on mission system development, Spares, Observer Station
<i>Total</i>	<i>\$294,316</i>	<i>Funding received FY 2012 through FY 2014</i>

Available Funding Spend Plan (Projected obligations by year appropriated)

<i>FY</i>	<i>Cost Category (\$000s)</i>	<i>FY 2012</i>	<i>FY 2013</i>	<i>FY 2014</i>	<i>FY 2015</i>	<i>Totals</i>

Contractor:

USN (NAVAIR) is the system developer for the follow-on mission system.

LM Aero is the prime contractor for HC-130J production and installation of the legacy mission system.

Subcontractors:

Aircraft:	Lockheed Martin Aero, Marietta, GA.
Engines:	Rolls Royce (Allison), Indianapolis, IN.
Missionization:	Lockheed Martin MS2, Moorestown, NJ.
FLIR/EO:	FLIR systems, Wilsonville, OR
Surface Search Radar:	Exelis, Amityville, NY
Observer Station:	Airidyne, Brooksville, FL

Significant Changes

The HC-130H project has been paused while the Coast Guard accepts the transfer of 14 excess C-27J aircraft from the U.S. Air Force. Seven HC-130H aircraft are scheduled for transfer to the U.S. Forest Service.

Project Schedule

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

Program Oversight and Management

\$18,000

Project Description, Justification and Scope

Provides funding for Program Oversight and Management (PO&M). PO&M funding supports activities associated with the transition of the Coast Guard's assets from acquisition to operations, including delivery, provision of logistics, training and other services necessary to ensure seamless integration into the operational fleet.

The Coast Guard is responsible for ensuring the products delivered by contractors and suppliers meet performance specifications. PO&M provides the Coast Guard with the capability to protect the government's interests during the acquisition and ensure contractors and suppliers deliver required products and services and meet prescribed contract terms and conditions. The Coast Guard accomplishes this management through staff located at the Program Management Office and at other contractor/government sites. Personnel working on acquisition projects include a mix of military, civilian, and support contractors experienced in all phases of large, complex acquisition programs. The Coast Guard uses these personnel to help ensure prime contractors and other government agencies (OGAs) satisfactorily perform functions consistent with existing policies, processes, and approved project plans. These activities include managing:

- Major milestone events and reviews (e.g., Preliminary Design Review, Production Readiness Review, etc.) associated with each project as it progresses through concept & technology development, system development and demonstration, production and deployment, and the operations and support phases;
- Cross-program documentation and analysis;
- Use of unique talents and professional expertise for Technical Evaluation Teams (TETs); development of mandatory Acquisition documentation;
- Performance monitoring through the use of a variety of tools such as:
 - Earned Value Management System (EVMS), which permits detailed monitoring of cost and schedule performance;
 - Periodic reports, which provide a quarterly review of program cost, schedule, and performance criteria;
 - Acquisition Performance Management System (APMS) which provides web-based reporting on all aspects of program performance on a near real-time basis, depending upon the particular metric. This includes performance reports to Internal and External oversight and various other reports for Program Management such as obligation plans, expenditure report, funds status, etc.
 - Transition of new assets to operations and sustainment after completion of operational testing, with staff serving as a liaison between the prime contractor's production of an asset and its turnover to the operational user and the Coast Guard support community.

PO&M funding also supports operational testing and evaluation (OT&E) done with the U.S. Navy's Commander Operational Test and Evaluation Forces (COMOPTEVFOR). While Developmental Test and Evaluation (DT&E) is the responsibility of the prime contractor, OT&E is performed by the Coast Guard, where acquired assets are tested to ensure they meet the user's requirements.

FY 2014 Activities Supported by Program Oversight and Management (PO&M)

Procurement	Justification
Senior Oversight	Computer support, project management site visits, management support priorities and supplies.
Contract Operations	Contracting Officer (KO) contract specialist support for Major System Acquisition projects, Defense Contract Management Agency (DCMA)/ Defense Contract Audit Agency (DCAA) support services.
Acquisition Workforce Management	Program training, strategic & tactical human capital support, Sustainment/Acquisition-Composite Model (SACOM) support for staff levels, program management & acquisition support.
Acquisition Support	Program management, systems engineering, and acquisition management support.
Strategic Planning & Communication	Strategic planning support, as required by the CG and Department of Homeland Security (DHS), communication management support, external coordination support, required reports and responses.
Testing and Evaluation	Execution of Surface, Aviation, Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR), and Logistics development and testing programs.
Resource Management	Acquisition Performance Management System (APMS) support and software upgrade support, (SAS) renewal, capitalization & audit remediation support, internal controls support, and Life Cycle Cost Estimating (LCCE) support.
Acquisition Programs Oversight	Naval Sea Systems Command (NAVSEA) programmatic support, Naval Surface Warfare Center (NSWC) / NAVSEA direct-site support, program management support, and site visits.
Acquisition Programs – Aviation	Program management support to include administrative, business finance, accounting, risk management, schedule analysis, costs analysis; and site visits.
Acquisition Programs – Surface	Program management support to include administrative, business finance, accounting, risk management, schedule analysis, costs analysis; logistics support, and site visits.
Acquisition Programs – C4ISR	Program management support for program status control reporting, emerging issue resolution, cross domain issues, technical expertise; Integrated Product Team (IPT) support; and Major System Acquisition project coordinator at Space and Naval Warfare Systems Command (SPAWAR); and site visits.
Acquisition Programs Logistics	Program management support for surface & air assets, technical documentation, and performance management, and site visits.

FUNDING HISTORY:

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

C4ISR

\$36,300

Project Description, Justification and Scope

Funds the design, development, and information assurance posture of Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) Integrated hardware and software systems on National Security Cutters (NSC), Offshore Patrol Cutters (OPC), Fast Response Cutters (FRC), Long Range Surveillance (LRS) aircraft, and Medium Range Surveillance (MRS) aircraft. These assets are using interoperable C4ISR system designs to optimize lifecycle costs and operational effectiveness.

The requested funds in FY 2015 will be used for the following activities:

- Tailoring SEAWATCH for OPC. Provide technical assistance for the OPC project by leading the tailoring of C4ISR systems onboard the OPC;
- Supporting the development, integration, and back-fit of a Segment 2 suite for the next in-service NSC (delivered with Segment 1);
- Providing Information Assurance (IA) / TEMPEST / Certification and Accreditation (C&A) expertise to newly acquired surface and aviation assets. New USCG assets must be delivered with Authority to Operate (ATO) through the Designated Approval Agency (DAA);
- The continued operation of C4ISR development labs and test & integration labs that provide product suitability validation and proper network integration and readiness for platform acceptance and installation on surface and aviation assets;
- Necessary Diminishing Manufacturing Source (DMS) solutions for the test and integration labs and for assets in production;
- Logistics support, including analysis, development, and products, to ensure operational capability and readiness of the C4ISR systems and interfaces, and their integration with USCG assets. This includes technical and training documentation, as well as the initial sparing analysis required to transition the C4ISR system baseline release to asset managers for platform installation, testing, and deployment;
- Engineering Change Proposals (ECPs) development, including software and systems engineering oversight, to accommodate capability upgrades and design modifications related to C4ISR while the asset is in production;
- Project execution support services for planning, development, engineering, configuration management, safety, and other required disciplines.

FY 2013 Key Events:

Aviation assets

- Coordinated and planned for obtaining ATO and TEMPEST certifications;
- Mitigated aviation electronic diminishing manufacturing sources (DMS) issues by performing design analyses, trade studies, and engineering on hardware and software replacements;

Surface assets

- Installed Segment 2 Technology Demonstrator on NSC-2;
- Continued KU Band SATCOM installation on in-service cutters;

- Planned and commenced SEAWATCH tailoring for the OPC;
- Assisted FRC and NSC projects with achievement of ATO and conducted TEMPEST inspections;
- Assisted the NSC project with implementing engineering change proposals, testing events, and SCIF installations.

Labs

- Continued work at verification labs to facilitate fielding of Segment 2 on NSCs. Operated baseline labs for NSCs and aviation assets in production.

FY 2014 Planned Key Events:

Aviation assets

- Coordinate and plan for obtaining ATO and TEMPEST certifications;
- Mitigate aviation electronic diminishing manufacturing sources (DMS) issues by performing design analyses, trade studies, and engineering on hardware and software replacements.

Surface assets

- Complete testing of C4ISR Segment 2 on NSC 2;
- Procure Segment 2 suite for next back-fit;
- Complete KU Band SATCOM installation on in-service cutters;
- Continue work tailoring SEAWATCH for the OPC;
- Assist FRC and NSC projects with achievement of ATO and conducted TEMPEST inspections;
- Assist the NSC project with C4ISR testing and implementing engineering changes.

Labs

- Operate verification labs to facilitate fielding of Segment 2. Operate baseline labs for NSCs and aviation assets in production.

FY 2015 Planned Key Events:

Aviation assets

- Coordinate and plan for obtaining ATO and TEMPEST certification.

Surface assets

- Back-fit Segment 2 suite;
- Procure Segment 2 suite for future back-fit;
- Continue tailoring SEAWATCH for the OPC;
- Install Segment 2 ship set that was procured in FY14;
- Assist the NSC project with C4ISR testing and implementing engineering changes;
- Assist FRC and NSC projects with achievement of ATO and conducting TEMPEST inspections.

Labs

- Operate verification labs to facilitate fielding of Segment 2;

- Operate baseline labs for NSCs and aviation assets in production;
- Posture labs for transition to sustainment.

Funding History

<i>FY</i>	<i>\$000</i>	<i>Major Activity Associated with Appropriated Funding</i>
2010 & Prior	\$ 617,697	NSC, MPA/MSP Segment 1 and 2; FRC support; Cutter Segment 5
2011	\$ 33,333	NSC, MPA/MSP Segment 2; FRC IA support
2012	\$ 40,214	NSC, MPA/MSP Segment 2; Cutter Segment 5; FRC, OPC IA support
2013	\$ 38,523	NSC, MPA/MSP Segment 2; Cutter Segment 5; FRC, OPC IA support
2014	\$ 40,226	NSC Segment 2 equipment purchase; FRC/OPC IA support; OPC SEAWATCH tailoring
<i>Total</i>	<i>\$769,993</i>	<i>Funding received for FY 2002 through FY 2014</i>

Segment 1 developed a closed and complex C4ISR baseline for NSCs, HC-144As, and HC-130Js. Developed through the Integrated Coast Guard Systems (ICGS) contractor, this system is proprietary and does not allow the Coast Guard the ability to manage additional development outside of the prime contractor, nor does it provide an affordable means for software sustainment. Segment 1 is fully fielded.

Segment 2 began the transition of the proprietary system developed in Segment 1 towards an open architecture owned and controlled by the Coast Guard. It separated the Segment 1 design into modular, scalable, functional components with clear interfaces allowing the Coast Guard to manage changes and sustain the system separate from the prime contractor. Segment 2 establishes a common baseline across the NSC, HC-144A, and HC-130J assets.

Segment 5 (Upgrades to existing assets) - *In-Service Cutters*: 210ft and 270ft Medium Endurance Cutter (MEC); 378ft High Endurance Cutter (HEC); *Shore Facilities*: Communications Area Master Stations (CAMS); Training Center Petaluma; Communication Stations (COMMSTAs).

Available Funding Spend Plan (Projected obligations by year appropriated):

CG-LIMS

\$3,000

Project Description, Justification and Scope

Supports the development and delivery of the Coast Guard Logistics Information Management System (CG-LIMS). This funding will continue CG-LIMS configuration and phased deployment to Coast Guard operational assets and support facilities. Specifically, the funding continues to support configuration and testing of the Maintenance Management, Supply Chain Management and Technical Information Management functionality, as well as the implementation of CG-LIMS to the HC-144A Maritime Patrol Aircraft.

CG-LIMS:

- Directly supports the Coast Guard modernization goal of a unified logistics system that improves mission-readiness, operational effectiveness, and decision-making by enabling decision support at the enterprise and tactical level;
- Enables product line management by providing total asset visibility throughout the enterprise;
- Will be the tool through which all maintenance is managed and how the enterprise supply chain is driven;
- Will organize and manage all technical information relating to Coast Guard assets, including technical publications and manuals, drawings, maintenance procedures, and maintenance data in the system;
- Will tightly integrate and configure the components of configuration management, maintenance management, supply chain management, and technical information management to allow efficient execution of a standardized business process.

CG-LIMS is planned for phased implementation by segments, as follows:

Segment	Functionality That Will Be Provided
1	Configuration and maintenance management
2	Supply chain management
3	Technical information management

FY 2013 Key Events

- Continued Segment 1 CM/MM (configuration and maintenance management) development;
- Began Segment 2 SCM (supply chain management) development;
- Demonstrated unit level maintenance functionality;
- Continued pilot deployment of LIMS with HC-144A MPA.

FY 2014 Planned Key Events

- Continue development of Segments 1 CM/MM and 2 SCM;
- Continue pilot deployment with HC-144A MPA;
- Begin Segment 3 TIM (technical information management) development;
- Establish Initial Operating Capability (IOC) of CG-LIMS with HC-144A MPA.

FY 2015 Planned Key Events:

- Continue developments of Segment 1 CM/MM, 2 SCM, and 3 TIM;
- Test interfaces and integration with Coast Guard Financial Systems;
- Continue CG-LIMS pilot deployment with HC-144A MPA and begin induction of a second Coast Guard asset.

Funding History

<i>FY</i>	<i>\$K</i>	<i>Major Activity Associated with Appropriated Funding</i>
2010 & Prior	\$8,400	
2011	\$5,988	CG-LIMS development and phased deployment to Coast Guard operational assets and support facilities.
2012	\$6,500	CG-LIMS Configuration and testing of Segment 1 functionality
2013	\$2,378	CG-LIMS Configuration and testing of Segments 1-3 functionality
2014	\$1,500	CG-LIMS Configuration and testing of Segments 1-3 functionality; implementation of Segments 1-3 functionality to USCG operational units
<i>Total</i>	\$24,766	<i>Funding received for FY 2008 through FY 2014</i>

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

Major Shore - Construct Small Arms Firing Range, Yorktown VA

\$9,380

Project Description, Justification and Scope

Funds the construction of a new Small Arms Firing Range (SAFR) at Coast Guard Training Center (TRACEN) at Yorktown, VA. The existing SAFR consists of a 20-lane outdoor firing range located on the TRACEN campus. Additionally, the current range provides insufficient capacity for current needs. Specifically, the existing SAFR does not provide the minimum capacity necessary to complete training of students at the Coast Guard Weapons school, which is based at TRACEN Yorktown, or the surrounding operational commands that rely on this facility to meet initial qualification and proficiency training required in accordance with Coast Guard policy. This project will fund the recapitalization of the range including:

- The demolition of the existing range and bullet trap;
- Perform required environmental remediation associated with the construction of a new range;
- Install a new bullet trap and HVAC system to accommodate lead ventilation requirements;
- Construct a new fully contained indoor range;
- Construct a classroom, locker room, bathroom and shower facility.

The new range will accommodate the course of instruction for the Fire Arms Instruction (FAI) School and the Gunners Mate (GM) A-school.

Significant Changes

This is a new project.

This project will comply with the National Environmental Policy Act (NEPA).

U.S. Coast Guard - FY 2015 Congressional Justification

Major Shore - Recapitalize Woods Hole, MA Phase II

\$7,750

Project Description, Justification and Scope

Completes Phase II work to recapitalize the Station, Aids to Navigation, and Patrol Boat (WPB) facilities at Woods Hole, MA. Phase I, which was funded in FY 2013, includes the initial renovations to existing facilities and construction of a new 13,500 square foot multi-purpose operations building. Phase II will continue with renovations to existing facilities and construction of a 3,500 square foot maintenance/storage facility.

The ANT/WPB Building was constructed in 1917. The building requires replacement due to structural/systems failures and functional deficiencies. The existing station's Operations Building is undersized, poorly configured, and functionally inadequate, with many building systems in deteriorated condition. The station facilities are inadequately sized to support operations. With continued systems deterioration, the buildings will suffer more frequent power, heating, ventilation, air conditioning, and plumbing outages, resulting in disruptions to station operations during unexpected repair periods.

Funding will ensure viability of the facility, allowing assigned personnel to complete Coast Guard missions.

Construction will occur through a Design-Build process whereby both design and construction is awarded under a single contract.

Coast Guard Facilities at Woods Hole, MA

Significant Changes

No significant changes.

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project will comply with the National Environmental Policy Act (NEPA)

Major Shore - Station Morro Bay

\$1,450

Project Description, Justification and Scope

Funds the renovation of the existing Station building and construction of a new 2,500 square foot Boat Maintenance Facility/Engineering Building for Station Morro Bay, CA.

The main building is a former patrol boat support building, which at 3,400 square feet, provides less than 25% of the Basic Facilities Requirement (BFR) of 14,000 square feet. The building is built out to the property line and is in the middle of a commercial fishing and tourist district leaving no room to expand on site or on adjacent lots. This space constraint has limited berthing at the station to two, four-person bunk rooms and a single bunk on the watch deck. Due to this berthing configuration, the station can only support one duty crew. This limitation leads to increased fatigue, decreased operational flexibility and limited ability to maintain surge operations in the event of a major contingency.

The existing building will be renovated to include all maintenance and engineering spaces, including a wet room and locker area. New property will be acquired and a new building will be constructed to include vital workshop space for a 25-ft RHIB, offices, berthing rooms, vestibules, corridors, and restroom facilities.

Significant Changes

This is a new project.

U.S. Coast Guard - FY 2015 Congressional Justification

Shore Infrastructure Survey and Design

\$500

Project Description, Justification and Scope

Includes survey and design funding required for future year Acquisition, Construction, and Improvement (AC&I) shore projects.

Funding supports the shore infrastructure planning process by funding engineering studies and analyses, master plans, NEPA/Environmental Studies, Soil Classification, real property and land acquisition; project development concepts including waterfront studies, design initiatives, and rough order of magnitude estimates for project completion are included. The projects supported by this request contribute to the long-range plans and support of operational units.

Significant Changes

No significant changes.

U.S. Coast Guard - FY 2015 Congressional Justification

Shore AC&I Waterways ATON Infrastructure

\$500

Project Description, Justification and Scope

Provides funding to establish, maintain, and improve transportation safety on Federal waterways through construction and improvements to buoys and structures which assist in navigation. Waterways infrastructure projects address requirements related to U.S. Army Corps of Engineers (USACE) activity and to repair/replace aging or damaged aids to navigation.

This request initiates construction of Phase 1 the relocation of the Delaware River ranges resulting from the USACE Delaware River Main Stem and Channel Deepening projects. The USACE project will provide for more efficient transportation of containerized, dry bulk and liquid bulk cargo, to and from the Delaware River ports, and will include dredging and alterations to existing channels to ensure safer navigation. Collectively, the Ports of Philadelphia, South Jersey and Wilmington combine to be the largest general cargo port complex in the nation. The project complexity requires it to be broken into four phases.

Significant Changes

No significant changes.

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

U.S. Coast Guard - FY 2015 Congressional Justification

Major Acquisition Systems Infrastructure (MASI)

\$16,000

Project Description, Justification and Scope

Supports shore facility infrastructure modifications, upgrades, and new construction associated with homeporting new or modified cutters, boats, and aircraft. The project also supports infrastructure modifications, upgrades, and new construction to provide logistics, maintenance, and training support for new or modified cutters, boats, and aircraft.

Facility and Infrastructure Upgrades – Funding in FY 2015 completes the following facility upgrades and infrastructure improvements:

- Pier, support facility, shore power modifications, and associated base infrastructure improvements to support FRC Homeport at USCG Base Los Angeles / Long Beach (LA/LB), which will accommodate a total of four FRCs. The funding will support the design and construction of homeport facility additions, improvements, and renovations at San Pedro, CA. The funding also provides improvements such as electrical and other shore-tie upgrades, dredging to accommodate deeper drafts where necessary, structural improvements to the piers to accommodate larger loads, installation of floating docks, and shore facilities for storage, maintenance, and other in-port activities associated with the arrival of the new FRCs. This location is essential to the overall operational force laydown and needs to be modified in order to accommodate the new FRCs. This funding request provides for facilities to meet asset delivery schedules and minimum facilities requirements based on the FRCs dimensions, shore-tie requirements, operational needs, crewing status, and maintenance schedules.
- Provide engineering, environmental, and feasibility studies and analyses for future-year facilities projects covered under this acquisition program. This funding is necessary to establish a 5-year window of planning documents in order to properly budget for homeport decisions in association with future asset deliveries. This will also help to more effectively integrate homeporting decisions for different classes of cutters and aircraft over the long-term planning horizon. This funding also covers any support contracts necessary to maintain the day-to-day functions, oversight, support, and management of this appropriation.

U.S. Coast Guard - FY 2015 Congressional Justification

Minor AC&I Shore Construction Projects

\$5,000

Project Description, Justification and Scope

Provides funds to complete minor AC&I shore facility construction projects. These projects are typically less complex and require less advance planning than major shore projects. Funds will be used to complete minor projects that have cost estimates which exceed the construction authority provided in the Operating Expense appropriation. For example, this may include:

- Emergency repair projects which have cost estimates that are greater than 50% of the plant replacement value;
- Minor facility improvements, which cost more than one million dollars, that are needed to adapt to changing/increased missions.

Significant Changes

No significant changes.

U.S. Coast Guard - FY 2015 Congressional Justification

Direct Personnel Costs

\$115,313

Project Description, Justification and Scope

Funds the salaries, compensation and support costs (including annual pay raise and COLA) for personnel who manage, execute and administer multi-year funded projects within the Acquisition, Construction and Improvements (AC&I) Program. The requested funding level will support a total of 881 FTE. These personnel will support projects requested in this budget submission, as well as prior year funded AC&I projects, by performing planning, design, engineering, contracting, project management, quality assurance and logistics support activities. This ensures the products and services acquired through the AC&I program are completed on time, on budget and in compliance with performance requirements

Significant Changes

15 FTE are annualized in FY 2015 to support the HC-27J APO. This project absorbed aspects of the former AC&I Core PPA.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$3,200	\$3,633	\$2,777	(\$856)

Travel includes all costs of transportation of persons, subsistence of travelers and incidental travel expenses in accordance with Federal travel regulations. Specifically, this funds transport of personnel in support of training, project management and oversight of the Survey and Design, National Security Cutter, Offshore Patrol Cutter, Cutter Boats, In-Service Vessel Sustainment, Fast Response Cutter and Polar Icebreaker. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$900	\$1,022	\$781	(\$241)

Transportation of things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. Specifically, funding provides for shipment of goods, equipment, supplies and materials to support completion of AC&I projects. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$200	\$227	\$174	(\$53)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$2,600	\$2,952	\$2,257	(\$695)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities and cutters, utility costs, including shore facility utilities, cutter and boat fuel requirements, and postal costs. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$79,612	\$90,382	\$69,085	(\$21,297)

Advisory and assistance services include services acquired by contract from non-Federal sources (private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$69,110	\$78,460	\$59,972	(\$18,488)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.8 Subsistence & Support of Persons	\$1,300	\$2,612	\$1,996	(\$616)

Contractual services with the public or another Federal Government account for the board, lodging, and care of persons. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$101,815	\$115,590	\$88,353	(\$27,237)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters and boats, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$665,498	\$754,398	\$576,637	(\$177,761)

This object class covers the purchase of capitalized and non-capitalized assets. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
32.0 Land and Structures	\$75,911	\$86,182	\$65,875	(\$20,307)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Funding in FY 2015 reflects the anticipated need.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$533	\$859	\$242	(\$617)

Travel includes all costs of transportation of persons, subsistence of travelers and incidental travel expenses in accordance with Federal travel regulations. Specifically, funds transport of personnel in support of training, project management and oversight of the Long Range Surveillance Aircraft (C-130H/J), Maritime Patrol Aircraft and HH-65 Conversion/sustainment project. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$150	\$242	\$68	(\$174)

Transportation of things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. Specifically, funding provides for shipment of goods, equipment, supplies and materials to support completion of aviation projects. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$33	\$54	\$15	(\$39)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g., office space, hangar facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$433	\$698	\$197	(\$501)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for facility utilities, fuel requirements, and postal costs. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$13,269	\$21,379	\$6,026	(\$15,353)

Advisory and assistance services include services acquired by contract from non-Federal sources (private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$11,118	\$18,559	\$5,231	(\$13,328)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.8 Subsistence & Support of Persons	\$383	\$618	\$174	(\$444)

Contractual services with the public or another Federal Government account for the board, lodging, and care of persons. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$16,969	\$27,342	\$7,706	(\$19,636)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2015 reflects the anticipated need.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$375	\$87	\$136	\$49

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$105	\$24	\$38	\$14

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Specifically, funding supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. Funding in FY 2015 reflects travel funding requirements and the continued implementation of internal travel policies consistent with the Administration's Campaign to Cut Waste.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$23	\$5	\$9	\$4

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$304	\$71	\$111	\$40

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$9,320	\$2,166	\$3,387	\$1,221

Advisory and assistance services include services acquired by contract from non-Federal sources (private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$8,091	\$1,880	\$2,940	\$1,060

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.8 Subsistence & Support of Persons	\$269	\$63	\$98	\$35

Contractual services with the public or another Federal Government account for the board, lodging, and care of persons. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$11,920	\$2,770	\$4,332	\$1,562

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2015 reflects the anticipated need.

Summary Justification and Explanation of Changes

Currently, all salaries, benefits, and support for the military and civilian personnel who administer AC&I contracts are funded by the AC&I appropriation, whereas 97 percent of the Coast Guard's personnel costs are funded from the OE appropriation. AC&I has a specific annual appropriation to fund personnel compensation and benefits and government program management related costs. Annual AC&I personnel compensation appropriation, rather than the multi-year project funds, must be used to fund all AC&I related personnel costs. Funding includes the proposed pay raise (1.0 percent for military and 1.0 percent for civilians), medical benefits, other mandatory personnel entitlements.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$34	\$25	\$19	(\$6)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$9	\$7	\$5	(\$2)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Specifically, funding supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$2	\$2	\$1	(\$1)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$27	\$20	\$16	(\$4)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$835	\$622	\$481	(\$141)

Advisory and assistance services include services acquired by contract from non-Federal sources (private sector, foreign governments, State and local governments, tribes, etc.) and other agencies within the Federal Government. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$725	\$540	\$418	(\$122)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of GPRA and other performance measurement initiatives. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.8 Subsistence & Support of Persons	\$24	\$18	\$14	(\$4)

Contractual services with the public or another Federal Government account for the board, lodging, and care of persons. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$1,068	\$795	\$616	(\$179)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$6,968	\$5,190	\$4,018	(\$1,172)

This object class covers the purchase of capitalized and non-capitalized assets. Funding in FY 2015 reflects the anticipated need.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
32.0 Land and Structures	\$795	\$600	\$459	(\$141)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Funding in FY 2015 reflects the anticipated need.

Appendix

(Fully Funded Projects with Unobligated Balances)

U.S. Coast Guard - FY 2015 Congressional Justification

Response Boat - Medium (RB-M)

\$0

Project Description, Justification and Scope

The Response Boat - Medium (RB-M) project was established in October 2001 to replace the aging 41-foot Utility Boats (UTB) (and other large non-standard boats) with standardized assets more capable of meeting the Coast Guard's multi-mission operational requirements. Funding received to date completes the project.

FY2013 Key Events

- Placed order for 4 RB-Ms, for a cumulative total of 170 RB-Ms ordered;
- Received 32 RB-Ms.

FY 2014 Key Events

- Place order for 4 RB-Ms, for a cumulative total of 174 RB-Ms ordered;
- Receive 32 RB-Ms.

FY 2015 Planned Key Events

- Receive RB-Ms.

Funding History

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>

No significant changes.

Medium Endurance Cutter Sustainment (MEP)

\$0

Project Description, Justification and Scope

The Coast Guard will complete the Mission Effectiveness Project (MEP) on the 270' WMECs in FY 2014 using funds appropriated in FY 2013. This work includes replacement of major equipment that is the primary source of degraded operational readiness, such as the main propulsion control and monitoring system, small boat davits, oily water separators, air conditioning, refrigeration, and evaporators. The majority of this work will be performed at the Coast Guard YARD in Curtis Bay, MD. Some work items will be completed via homeport dockside availabilities.

The MEP project is a bridging strategy for the WMEC fleet until it is replaced by the OPC fleet. Post-MEP, WMECs have an average equipment reliability rate (in terms of decreased number of major casualties) that is nearly double that of pre-MEP WMECs.

FY 2013 Key Events

- Completed 270-foot WMEC MEP Vessel – TAHOMA;
- Completed 270-foot WMEC MEP Vessel – HARRIET LANE;
- Completed 270-foot WMEC MEP Vessel – SPENCER.

FY 2014 Planned Key Events

- Complete 270-foot WMEC MEP Vessel – CAMPBELL;
- Complete 270-foot WMEC MEP Vessel – SENECA;
- Complete 270-foot WMEC MEP Vessel – FORWARD ;
- Complete 270-foot WMEC MEP Vessel – MOHAWK.

FY 2015 Planned Key Events

- Install Single Point Davits onboard 270-foot WMEC MEP Vessels;
- Complete MPCMS retrofits onboard 270-foot WMEC MEP Vessels.

Work is done primarily at the Coast Guard YARD.

Significant Changes

No significant changes.

H-60 Conversion Projects

\$0

Project Description, Justification and Scope

Prior year funding continues to modernize the Coast Guard's fleet of 42 H-60 Jayhawk, Medium Range Recovery (MRR) helicopters as these helicopters rotate through Programmed Depot Maintenance at the CG Aviation Logistics Center (ALC). The H-60 Conversion Project is broken into discrete segments consisting of upgrades that modernize and standardize aging components and sub-systems to stabilize maintenance costs and operational reliability. Prior year appropriations will allow continued installation of Block 2 software for the Avionics Upgrade (DS1) and the two Service Life Extension Project (SLEP) efforts.

FY 2013 Key Events

- Completed H-60T Avionics Upgrades (DS1) and EO/IR Sensor System Upgrades (DS2) on eight airframes.

FY 2014 Planned Key Events

- Deliver Avionics Upgrades (DS1), H-60T EO/IR Sensor System Upgrades (DS2), and Service Life Extension Project work items for aircraft 38-42;
- Continued installation of Service Life Extension Project (SLEP) during regularly scheduled Programmed Depot Maintenance;
- Hold Block 2 Upgrade Phase 1 CDR and Phase 2 PDR;
- Conduct ESS Sweep Width Testing (Round 2, Phase 4) conducted at Air Station Clearwater
- Maintenance Workload Analysis / Follow-on Pilot Workload Analysis;
- Conduct B2U / RNP-RNAV Phase 1 DT&E / OT&E.

FY 2015 Planned Key Events

- Continue installation of Service Life Extension Project (SLEP) during regularly scheduled Programmed Depot Maintenance;
- Conduct B2U / RNP-RNAV Phase 2 DT&E / OT&E;
- Continue Installation of the Block 2 Software Upgrade;
- Achieve Full Operational Capability on 3QFY15.

Work done primarily at the Coast Guard Aviation Logistics Center.

Significant Changes

No significant changes.

Rescue 21

\$0

Project Description, Justification and Scope

The prior year funds bring Sectors to Final Acceptance, in addition to deployment in the two Alaska Sectors and the three Western Rivers Sectors.

The Rescue 21 project recapitalizes the U.S. Coast Guard's legacy National Distress and Response System (NDRS) equipment, which improves communications, command and control capabilities throughout the coastal continental United States (including the Great Lakes), as well as Hawaii, Guam, Puerto Rico, the Western Rivers and Alaska.

The basic NDRS components include radios, transceivers, towers for antennas, and an interconnecting network. It is the foundation for coastal SAR (search and rescue), and is a critical enabler of efficient and effective command and control for all missions in coastal zones.

FY 2013 Key Events:

- Continued the Full Rate Production contract with General Dynamics C4 Systems (GDC4S) towards Final Acceptance of 14 sectors;
- Commenced deployment in the two Alaska sectors and the three Western Rivers sectors.
- Delivered consoles to Alaska sectors and begin deploying the three new remote sites to cover critical coverage gaps at Middle Cape, Deception Hills and Duffield Peninsula;
- Awarded the Alaska Digital Selective Calling (DSC) contract and commence engineering design and deployment planning;
- Awarded the Western Rivers implementation contract and commence engineering design and deployment planning.

FY 2014 Planned Key Events:

- Deliver General Dynamics C4 Systems (GDC4S) Deployment – Full Rate Production (FRP) gap filler remote sites to resolve remaining coverage gaps and achieve final acceptance in all coastal zone sectors;
- Achieve Conditional Acceptance in three Western River Sectors (Ohio Valley, Lower Mississippi River and Upper Mississippi River) and both Alaska Sectors (Anchorage and Juneau);
- Deploy new remote sites in Alaska.

FY 2015 Planned Key Events:

- Transition R21 deployments to full operations and sustainment.

Funding History:

<i>Fiscal Year</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>
2010 & Prior	\$743,899	Phases I and II; award prime contract; deploy IOC, LRIP, FRP
2011	\$35,928	Continue FRP (full rate production) deployment deliveries
2012	\$63,200	Continue deploy FRP; achieve CONUS Conditional Acceptances

<i>Fiscal Year</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>
2013	-	Continue FRP deployment
2014	-	Continue FRP deployment
<i>Total</i>	<i>\$843,027</i>	<i>Funding received for FY 1996 through FY 2014</i>

Available Funding Spend Plan (Projected obligations by year appropriated):

Fiscal Year	Cost Category	FY 2011	FY 2012	Totals (\$000s)

Significant Changes

No significant changes.

Nationwide Automatic Identification System (NAIS)

\$0

Project Description, Justification and Scope

NAIS is a data collection, processing, and distribution system being implemented in accordance with the Maritime Transportation Security Act. The project provides the necessary capability to ensure the effective exchange of information between AIS-equipped vessels, aircraft, aids to navigation, and shore stations within all major U.S. ports, waterways, and coastal zones. The data collected by NAIS will be shared with other pertinent stakeholders and decision makers in support of maritime security at critical ports. NAIS correlates Advanced Notice of Arrival data with AIS data to identify higher interest vessels.

NAIS is recapitalizing the existing interim capability in 58 ports with the permanent solution design and technology via the core system upgrade. To the extent feasible, NAIS equipment is being co-located with Rescue 21 (R21) infrastructure.

FY2013 Key Events

- Obtained ATO (Authority to Operate); conducted OT&E (operational testing and evaluation) on the first three Sectors (Hampton Roads, Mobile, Delaware Bay) completing the first 8 of 58 ports.
- Equipment acquisition, including procurement of NAIS base station equipment, antennas, networking equipment, annual software licensing, and other shelter and site equipment for 23 Sectors.
- Installed equipment at 22 Sectors (New Orleans, Houston/Galveston, New York, Long Island, Corpus Christi, Baltimore, Miami, Key West, Northern New England, Southeast New England, Boston, Charleston, North Carolina, St Petersburg, Jacksonville, San Francisco, LA/LB, San Diego, Detroit, Buffalo, Puget Sound, Columbia River) that upgraded another 39 of the 58 ports with the permanent system.

FY 2014 Planned Key Events

- Equipment acquisition, including procurement of NAIS base station equipment, antennas, networking equipment, annual software licensing, and other shelter and site equipment for final 7 Sectors.
- Install equipment at 5 Sectors (Sault Ste Marie, Lake Michigan, Upper Mississippi River, Lower Mississippi River, Ohio Valley) that will upgrade another 7 of the 58 ports with the permanent system.

FY 2015 Planned Key Events

- Install equipment at final 2 Sectors (Anchorage and Juneau) that will upgrade the final 2 of the 58 ports with the permanent system.
- Enter sustainment – All equipment is installed.

Funding History:

<i>FY</i>	<i>\$000</i>	<i>Major Activity Funded by Net Appropriation</i>

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**United States Coast Guard
Research, Development, Test and Evaluation**

I. Appropriation Overview

A. Mission Statement for Research, Development, Test and Evaluation (RDT&E):

Research, Development, Test and Evaluation (RDT&E) funding allows the Coast Guard to sustain critical mission capabilities through applied research and partnerships with the Department of Homeland Security (DHS), the Department of Defense (DoD), as well as other Federal and private research organizations. The purpose of the RDT&E Program is to help identify and examine existing or impending problems in the Coast Guard's operational, regulatory, and support programs and make improvements through solutions based on scientific and technological advances. RDT&E funding also supports risk-reduction expertise and services in the pre-acquisition process of major and non-major acquisition projects.

B. Budget Activities:

The RDT&E activities sustain program infrastructure and core capabilities, knowledge, skills, experience, and facilities to give the Coast Guard a strong evidence-based foundation for operational and capital investment decision-making. Activities include formulation and oversight of cooperative agreements with relevant professionals in the public and private sectors, such as University Affiliated Research Centers (UARC) and Federally Funded Research & Development Centers (FFRDC). These agreements promote collaboration and leverage expertise and the development of techniques, methods, hardware, and systems that directly contribute to increasing productivity and effectiveness of Coast Guard missions.

C. Budget Request Summary:

The FY 2015 President's Budget requests 96 positions, 96 FTE and \$17.947 million for RDT&E. This request provides necessary resources to develop technologies and systems that improve operational presence and response, as well as perform technology assessments to inform the early stages of the acquisition process.

The FY 2015 President's Budget requests \$17.947 million for RDT&E.

CURRENT SERVICES PROGRAM DESCRIPTION:

Project Description, Justification and Scope

This request provides \$17.947 million for the Coast Guard to innovate mission capabilities through applied research and partnerships with DHS, DoD, as well as other Federal and private research organizations that include technology transfer CRADAs. The purpose of the RDT&E Program is to identify and examine existing or impending challenges in the Coast Guard's operational, regulatory, and support programs and develop solutions based on scientific and technological advances. RDT&E funding also supports risk mitigation efforts and services in the pre-acquisition process of major and non-major acquisition projects. In addition, the RDT&E program has achieved Full Operational Capability (FOC) with the Modeling and Simulation Center of Expertise. This capability is being readily utilized by Program Offices and is focused on providing solutions to the Coast Guard's most challenging tactical and strategic problems.

Funding for the RDT&E Program is grouped into two categories: Coast Guard Mission Research and Operations & Maintenance (O&M). Mission Research focuses on Acquisition Program support and operational improvements. Mission Research is further subdivided into specific project tasking on an annual basis. O&M funds salaries for in-house scientists, engineers, and operations analysts, facility rent, utilities and contractor costs. The FY 2015 funding request will continue projects such as unmanned systems testing and Arctic capability research. The FY 2015 request funds projects that leverage external resources and partnerships including, co-funding from DHS S&T and other government agencies (OGA), collaboration with University grants targeted to Coast Guard

requirements and Technology Transfer CRADAs with industry. By doing so, the Coast Guard optimizes its application of resources.

FY 2013 Key Events:

Completed 31 projects (listed below) and delivered 41 supporting products:

Project Title	Operational Benefit/Outcome
Develop Search Sweep Width Data for Targets on Ice	Increased efficiency and effectiveness of Search and Rescue (SAR) missions for targets on ice. This will contribute to more lives saved as well as better use of assets tasked with on-ice SAR missions.
Panga Search Planning Tools/Probability of Sighting (POS) Calculation Analysis	Improved effectiveness locating moving marine security threats that are illegally smuggling narcotics, people and weapons.
Navigation 2025 Prototype Implementation	Developed a structured and systematic methodology to prioritize deployment of advanced navigation prototypes without increased risks to marine safety or commerce.
Nationwide Automated Information System (NAIS) Acquisition	Developed Vessel Traffic System (VTS) AIS sites to provide 24/7 surveillance coverage for Coast Guard VTS Areas of Responsibility (AORs). This augmented coverage contributes to maritime domain awareness for port security, law enforcement, search and rescue, and vessel traffic management.
Risk Assessment Methodology to Support Aids to Navigation (ATON) Design Changes	Developed methodology to create Electronic Navigation Performance Standards to evaluate potential changes to current design standards that incorporate recent advances of Electronic Navigation components.
Ballast Water Treatment	Developed protocol for testing ballast water treatment technologies. Key to Coast Guard approval of a ballast water treatment system based on the efficacy of the system in removing, killing, or neutralizing organisms.
Develop Guidance to Verify Ballast Water Discharge Standards Compliance	Developed a plan to guide effective oversight and verification of federal ballast water discharge standards.
Analysis Support for the Mandated Periodic & Practicability Reviews of Ballast Water Standards	Provided analysis on the status and capabilities of commercial facilities engaged in testing ballast water treatment technologies.
Great Lakes Restoration Initiative (GLRI) Ballast Water (BW) Other - Corrosion Scoping	Determined impact of commercially available ballast water treatments for ballast tank corrosion. Vital to informing vessel owners on impacts of various ballast water treatment systems.
Asian Carp Towboat/Barge Sampling Study	Completed analysis to inform regulation/monitoring of barge traffic in the vicinity of the electric dispersal barriers to ensure public safety.
Reduced WMEC 270 Propulsion Fuel Consumption	Developed operating parameters to reduce energy consumption and emissions on 270-ft medium endurance cutters; directly reduced fuel costs 3-5%.

Project Title	Operational Benefit/Outcome
Boat Crew Communication Capabilities Study	Identified potential improvements to boat crew communication systems.
Mobile 10-print Biometric Field Test	Evaluated a mobile biometrics system that communicates with the US-VISIT IDENT database to identify a mobile system for operational use.
Maritime Trace Narcotic Identification/Verification	Evaluated methods to identify trace levels of narcotics for use in Counter Drug operations.
Point Defense Analysis	Evaluated present and future Coast Guard point defense mission requirements supporting Port, Waterway, Coastal Security (PWCS) capabilities.
Arctic Craft Investigation	Provided analysis of assets for Coast Guard operators that could effectively operate in the Arctic and other cold weather areas.
Arctic Shield 2012 Capabilities Documentation	Evaluated alternatives for enhancing Arctic communications, oil recovery system use, and future Technology Demonstrations.
Operational Risk Assessment Model (ORAM) Domestic Icebreaking (DOMICE) Model Improvement	Improved accuracy of a DOMICE simulation model used to assess the effects from seasonal reallocation of Coast Guard domestic icebreaking assets, e.g. 140-ft WTGBs. The model is being used by operational commanders to optimize allocation of DOMICE assets.
Operational Testing of Electro-optical System Suite (ESS)	Evaluated ESS on the MH-60T and MH-65C/D aircraft and integration of optimal infrared (IR) sensor settings improved effectiveness and maximized operation of ESS for night search missions.
Support for MH-65 Radar Replacement	Evaluated cost-effective weather radar replacements for MH-65 aircraft.
USCG Airborne Radar Lateral Range Curves for Search and Rescue Optimal Planning System (SAROPS)	Provided Coast Guard SAR mission planners with up-to-date radar search performance data available within the SAROPS tool to reduce flight hour costs while improving mission effectiveness in terms of lives and property saved.
Laser Deposited Nonskid (LDN) Analysis	Validated utility of new technology for Coast Guard application, providing the potential funding savings in recurring maintenance.
Underwater Imaging System Transition Evaluation	Evaluated costs and benefits of adding organic underwater imaging systems as a Coast Guard capability.
ESS GEO-Point Accuracy Testing	Evaluated the impact of post-maintenance calibration on target geo-positioning accuracy for Coast Guard aircraft.
MH-65 Automatic Flight Control System (AFCS) Sustainability Study	Developed cost estimates of future repairs/overhauls of obsolete AFCS components.

Project Title	Operational Benefit/Outcome
Tactical Flotation & Buoyancy	Significantly increased safety of tactical operators by implementing a flotation system for unconscious or incapacitated members to survive for longer periods of time compared to current capabilities.
Maritime Security Operations Mission Analysis Report	Provided mission analysis to support potential Acquisition Decision Events (ADE).
Analysis of Solid State Marine Radar	Analysis of opportunities and challenges associated with new technology in marine radar systems.
Support for Joint Technology Demonstrations with Joint Task Force North (JTFN) to develop Command, Control, Communications, Computer, Intelligence, Surveillance and Reconnaissance (C4ISR) capabilities	Demonstrated, under a CRADA, the use of other Blue Force Surveillance Assets to provide early warning (trip line) information to Coast Guard operations.

Other FY 2013 Completed Key Events:

Unmanned Systems

- Completed Phase 2A small unmanned aerial system (sUAS) demo onboard USCGC BERTHOLF;

Arctic Operations

- Completed anti-icing technology roadmap;
- Conducted Arctic mobility and oil-in-ice response testing using unmanned technologies during operation Arctic Shield 2013.

Pre-Acquisition Exploration for the Surface Fleet

- Conducted operational testing of shoulder-launched entanglement system;
- Quantified potential operational performance improvements through implementation of advanced solid-state marine radar.

Oil in Ice/Oil Spill Detection and Response

- Completed sensor design for detection and collection of oil in the water column (down to a depth of 10,000 feet);
- Attained Initial Operating Capability (IOC) of Joint Maritime Test Detachment (JMTD) in-situ burn pan for conducting the nation's only open-air oil fire boom research;
- Continued development of prototypes for a flexible interoperable communications/information system, process, and procedures to enhance information transfer vital to response personnel during an incident of national significance (i.e., oil spill).

Modeling & Simulation

- Completed accreditation of Coast Guard Search and Rescue Visual Analytics (cgSARVA) analysis tool;
- Attained Full Operational Capability (FOC) of Coast Guard's modeling and simulation Center-Of-Expertise (COE);
- Accredited Port Resiliency for Operational & Tactical Enforcement to Combat Terrorism (PROTECT) for port, waterways and coastal security patrols and transitioned schedule development to modeling and simulation COE;
- Implemented PROTECT at Sector Los Angeles/Long Beach;
- Developed Port/Waterway closure economic risk assessment methodology;

- Developed baseline prototype of Assistant Randomization Monitoring Over Routes (ARMOR) Fish Living Marine Resources (LMR) scheduling model;
- Completed phase one Verification & Validation of Coastal Operations Analytical Suite of Tools (COAST) model.

Sensor Optimization, Automation, and Visualization

- Completed Non-Compliant Vessel (NCV) video recorder evaluation to support Over the Horizon (OTH) boat operations;
- Completed NCV Contraband Marker technology selection and initial evaluation;
- Completed additional alternative precise timing tests using Coast Guard LORAN towers (backup to GPS time) under a CRADA with UrsaNav;
- Completed phase one demonstration of tactical data link range enhancement technologies under a CRADA with Engility;
- Performed a baseline comparison of iceberg surveillance and detection using alternative assets.

Intelligence/Cyber

- Conducted demonstrations of advanced communications intelligence technology;
- Conducted cyber-research test collection of wireless access point vulnerabilities in a typical port.

Alternative Energy/Environmental Analysis

- Conducted testing of alternative fuel with gasoline and diesel engine manufacturers under CRADAs with Honda, Mercury Marine, and Cummins.

FY 2014 Planned Key Events:

Unmanned Systems

- Complete Phase 2B sUAS sensor/modeling demonstration;
- Continue preparations for Vertical Take-Off and Landing (VTOL) UAS flight demonstration;
- Conduct market research, initial collision risk assessment, and technology demonstrations of unmanned maritime systems;
- Conduct initial technology demonstrations for Robotic Aircraft for Maritime Public Safety (RAMPS) collaboration project with DHS S&T Borders and Maritime Security Division.

Arctic Operations

- Continue arctic mobility, command and control, and oil-in-ice response testing using unmanned technologies during operation Arctic Shield 2014;
- Initiate new CRADAs with private sector to examine technologies in the Arctic of mutual interest, e.g., new navigational safety information and ice radar.

Pre-Acquisition Exploration for the Surface Fleet

- Continue polar icebreaker pre-acquisition analysis (requirements/cost/performance).

Oil in Ice/Oil Spill Detection and Response

- Conduct oil spill detection and response research;
- Evaluate Oil-in-Ice response and recovery technologies as part of Arctic Shield 2014.

Modeling & Simulation

- Recapitalize legacy Coast Guard Maritime Operational Effectiveness System (CGMOES) hardware.

Sensor Optimization, Automation, and Visualization

- Conduct mobile asset tracking and reporting technology demonstration in support of incident of national significance response.

Intelligence/Cyber

- Continue demonstrations of advanced intelligence technology.

Alternative Energy/Environmental Analysis

- Continue alternative energy analysis.

FY 2015 Planned Key Events:

Unmanned Systems

- Complete VTOL UAS flight demonstration;
- Complete RAMPS technology demonstration.

Arctic Operations

- Complete Arctic communications technology assessments;
- Complete Alternative Asset Iceberg Reconnaissance demonstration;
- Demonstrate next generation Arctic Maritime Domain Awareness (MDA) systems;
- Continue arctic mobility, command and control, and oil-in-ice response testing using unmanned technologies as part of operation Arctic Shield 2015.

Pre-Acquisition Exploration for the Surface Fleet

- Complete testing and deployment of NCV contraband marker;
- Begin testing of Exclusion Zone technology.

Oil in Ice/Oil Spill Detection and Response

- Complete oil sands products response technology demonstration;
- Continue detection and collection of oil within-the-water column technology development/demonstrations;
- Continue oil-in-ice response and recovery technologies as part of Arctic Shield 2015.

Modeling & Simulation

- Complete development of ARMOR Fish/CD Patrol Schedule Model;
- Complete COAST model development support plan;
- Complete the Ergonomics Analysis of Communications Centers (COMMCENs);
- Complete the transition to the next generation of CGMOES.

Sensor Optimization, Automation, and Visualization

- Complete mobile asset tracking and reporting technology demonstration in support of incident of national significance response;
- Develop TTPs for optimizing the use of existing Coast Guard airborne sensors to support oil spill response operations;
- Upgrade Rescue 21 system to rapidly transfer multi-mode communications (E-911).

Intelligence/Cyber

- Develop cost-effective strategies for protecting critical infrastructure facilities within U.S. maritime ports from cyber attack.

Alternative Energy/Environmental Analysis

- Complete diesel outboard engine development and testing;
- Complete testing of gasoline and diesel fuel alternatives.

FUNDING HISTORY

Research and Development Program Funding by Appropriation

<i>FY</i>	<i>\$</i>
2010	24,745
2011	27,697
2012	27,779
2013	19,639
2014	19,200

Total 119,085

Available Funding Spend Plan (FY 2015 Request)

Notes: (1) Program Area Spend Plans include government staff subject matter expertise salaries and direct project costs.

(2) Facilities, Support, and Operations include support and contracting staff salaries, facilities leases and operation costs.

Program Area	Title	Project Objective
Unmanned Systems FY15 Request \$1,300,000	Autonomous Submerged Persistent Presence	Demonstrate capability of autonomously monitoring vessel traffic for an extended period of time.
	Robotic Aircraft for Maritime Public Safety (RAMPS)	Identify/characterize the risk, benefits and limitations of operating tactical (hand-held) UAS for Coast Guard assets and other DHS first responders.
Arctic Operations FY15 Request \$2,174,000	Arctic Communications Technology Assessments	Increased communications capability in the Arctic to improve mission performance.
	Alternative Asset Iceberg Reconnaissance Demonstration	Evaluate potential efficiencies in the International Ice Patrol's mission.
	Arctic Next Generation MDA System	Evaluate next generation systems to improve MDA.
	Arctic Operations Support 2014/2015	Characterize the effects of the Arctic environment on Coast Guard mission execution.
Pre-Acquisition Exploration for the Surface Fleet FY15 Request \$1,396,000	Non-Compliant Vessel (NCV) Contraband Marker	A method to effectively tag and track jettisoned contraband for later recovery.
	Define and Communicate Exclusion Zones	Capability to physically mark and clearly communicate the boundaries of an exclusion area during High-Interest-Vessel escorts, including both fixed and moving security zones.
	Compel Compliance Technologies	Capability to compel compliance from small vessels via non-lethal means. New capability/technology to mitigate adversary counter-tactics.
	Small Boat Operational Testing Agent	A more cost effective and flexible Developmental Testing and Evaluation (DT&E) capability to address small boat fleet technology refreshes.

Program Area	Title	Project Objective
Oil in Ice/Oil Spill Detection and Response FY15 Request \$1,090,000	Oil Sands Products Response	Develop better decision tools and recovery/mitigation tools for responding to spilled oil sands products.
	Detection and Collection of Oil within the Water Column	Accurate detection and mitigation of sub-surface oil within the water column up to a depth of 10,000 feet.
Modeling & Simulation (M&S) FY15 Request \$1,131,000	Develop ARMOR Fish/Counter Drug (CD) Patrol Schedule Model	Living Marine Resources/CD Patrol scheduling efficiency and effectiveness improvements.
	Support Development of Coastal Operations Analytical Suite of Tools (COAST)	Accredited M&S tools that support operational and programmatic decision making within the Coastal Zone, Great Lakes or Inland Waters.
	Ergonomics Analysis of Communications Centers (COMMCENS)	Improve COMMCEN performance through ergonomic design.
	CGMOES Next Generation	A robust capability for campaign-level Coast Guard-wide asset allocation and force structure decision support.
Sensor Optimization, Automation and Visualization FY15 Request \$475,000	Mobile Asset Tracking and Reporting Device	A flexible interoperable communication/information system to enhance the Coast Guard's ability to respond to Incidents of National Significance.
	Airborne Oil Spill Remote Sensing and Reporting	Develop TTPs for optimizing the use of existing Coast Guard airborne sensors to support oil spill response operations.
	Rescue 21 (R21) for E911- Next Generation, SAR and Public Safety Access Portal	Force-multiply existing R21 system to rapidly transfer multi-mode communications.
Intelligence/Cyber FY15 Request \$1,250,000	Water-side Wireless Access Point (WAP) Monitoring Capabilities	Improved operational doctrine/CONOPS/TTPs.

Program Area	Title	Project Objective
Alternative Energy/ Environmental Analysis FY15 Request \$272,000	Diesel Outboard Development	Maximize efficiency by shifting the Coast Guard away from the use of two fuels (gasoline and diesel) instead of one in its fleet of surface assets.
	Operational Testing of Alternative Fuels	The means to meet mandated future greenhouse gas emissions and energy reduction targets.
Strategic Analysis FY15 Request \$353,000	University Programs, Office of Naval Research, Joint Non-lethal Weapons Directorate, Bureau of Safety and Environmental Enforcement	Exploration and leveraging opportunities to gather and apply information from other research organizations to meet Coast Guard needs.
Other Projects FY15 Request \$206,000		
R&D Center Facility Support, and Operations FY15 Request \$8,300,000		
TOTAL FY2015 \$17,947,000		

Available Funding Spend Plan (Projected obligations by year appropriated)

Fiscal Year	Program Area	FY 2014	FY 2015	Totals (\$000)
2015	Unmanned Systems	\$100	\$1,300	\$1,400
	Arctic Operations	\$150	\$2,174	\$2,324
	Pre-Acquisition Exploration for the Surface Fleet		\$1,396	\$1,396
	Oil in Ice/Oil Spill Detection and Response	\$100	\$1,090	\$1,190
	Modeling and Simulation	\$200	\$1,131	\$1,331
	Sensor Optimization, Automation and Visualization	\$50	\$475	\$525
	Intelligence/Cyber	\$30	\$1,250	\$1,280

Research, Development, Test and Evaluation Mission Statement

Research, Development, Test and Evaluation (RDT&E) funding allows the Coast Guard to sustain critical mission capabilities through applied research and partnerships with the Department of Homeland Security (DHS), the Department of Defense (DoD), as well as other Federal and private research organizations. The purpose of the Research and Development (R&D) Program is to help identify and examine existing or impending problems in the Coast Guard's operational, regulatory, and support programs and make improvements through solutions based on scientific and technological advances. RDT&E funding also supports risk-analysis and services in the pre-acquisition process of major and non-major acquisition projects.

CG-RDT&E-25

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	7,853	7,853	7,645	(208)
11.3 Other than Full-Time Permanent	55	55	53	(2)
11.5 Other Personnel Compensation	22	22	21	(1)
11.6 Military Personnel-Basic Allowance for Housing	501	501	501	-
11.7 Military Personnel	1,415	1,452	1,385	(67)
11.8 Special Personal Services Payments	5	5	5	-
12.1 Civilian Personnel Benefits	2,155	2,155	2,189	34
12.2 Military Personnel Benefits	124	127	121	(6)
13.0 Benefits for Former Personnel	5	5	5	-
Total, Salaries & Benefits	12,135	12,175	11,925	(250)

Salaries and Benefits provides compensation directly related to Coast Guard active duty military and civilian personnel duties. The FY 2015 request includes reduction costs of 5 FTE and an increase for a 1.0 percent proposed pay raise for military and civilian personnel. The increase in civilian benefits is due to a rise in government normal cost contribution for Federal Employee Retirement System personnel based on actuarial projections, as required by OMB A-11, Section 32.3.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
21.0 Travel and Transportation of Persons	\$498	\$531	\$109	(\$422)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2015 request reflects travel funding requirements including implementation of new travel policies in support of the Administration's Campaign to Cut Waste.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
22.0 Transportation of Things	\$30	\$35	\$6	(\$29)

Transportation of things includes all costs of the care of such things while in the process of being transported, and other services incident to the transportation of things. The FY 2015 request reflects anticipated needs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.2 Rental Payments to Others	\$14	\$16	\$3	(\$13)

Payments to a non-Federal source for rental space, land, and structures. The FY 2015 request reflects the decrease for payments to non-Federal sources.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
23.3 Communications, Utilities, and Misc. Charges	\$80	\$92	\$16	(\$76)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2015 request reflects the anticipated reduction for R&D related projects.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.1 Advisory and Assistance Services	\$5,472	\$7,400	\$494	(\$6,906)

Advisory and assistance services include services acquired by contract from non-Federal sources (private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2015 request reflects anticipated needs and reflects the Department's strategic sourcing initiatives to leverage the purchasing power of the entire Department.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$729	\$740	\$995	\$255

Other services include contractual services with non-federal sources that are not otherwise classified under Object Class 25. The FY 2015 request reflects anticipated needs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.5 Research and Development Contracts	\$2,488	\$2,671	\$1,362	(\$1,309)

The FY 2015 request reflects anticipated needs for the planned projects described in Section III.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.8 Subsistence & Support of Persons	\$58	\$67	\$12	(\$55)

Contractual services with the public or another Federal Government account for the board, lodging and care of persons. The FY 2015 request reflects anticipated needs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$53	\$61	\$11	(\$50)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. The FY 2015 request reflects anticipated needs.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
31.0 Equipment	\$71	\$82	\$14	(\$68)

This object class covers the purchase of R&D materials for technology demonstrations, testing and evaluations and their progress. The FY 2015 request reflects anticipated needs.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**United States Coast Guard
Medicare-Eligible Retiree Health Care Fund Contribution**

I. Appropriation Overview

A. Mission Statement for Medicare-Eligible Retiree Health Care Fund Contribution:

The Medicare-Eligible Retiree Health Care Fund Contribution (MERHCF) funds accrual of the Coast Guard's military Medicare-eligible health benefit contribution to the Department of Defense (DoD) Medicare-Eligible Retiree Health Care Fund. Contributions are for future Medicare-eligible retirees currently serving on active duty in the Coast Guard, as well as retiree dependents and their potential survivors. The authority for the Coast Guard to make this payment on an annual basis was provided in P.L. 108-375, the 2005 Defense Appropriations Act. While this expenditure requires no annual action by Congress, it is scored as discretionary spending.

B. Budget Activities:

There are no budget activities directly related to providing this benefit to active duty personnel and their dependents.

C. Budget Request Summary:

The Coast Guard estimates that its contribution will be \$158.930 million for FY 2015. The total adjustment-to-base is a decrease of \$27.028 million which includes \$8.988 million adjustments for FY 2015 Initiatives, and \$18.040 million in savings associated with TRICARE reform. In the FY 2015 Budget, DoD proposes a multi-year plan to replace the current three TRICARE plans with a consolidated TRICARE Health Plan. In 2015, the proposal would increase co-pays for pharmaceuticals and implement an enrollment fee for new TRICARE-for-Life beneficiaries (as proposed in the FY 2014 Budget). This request will be paid to the DoD Medicare-Eligible Retiree Health Care Fund to support the benefits outlined above. The Coast Guard's annual budget estimate for MERHCF is calculated by multiplying the projected average for strength (FTE) by DoD actuary projected cost rates.

Medicare-Eligible Retiree Health Care Fund Contribution Mission Statement

The Medicare-Eligible Retiree Health Care Fund Contribution will fund accrual of the Coast Guard's military Medicare-eligible health benefit contribution to the Department of Defense Medicare-Eligible Retiree Health Care Fund. Contributions are for future Medicare-eligible retirees, retiree dependents, and survivors in the Coast Guard.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
12.2 Military Personnel Benefits	201,610	185,958	158,930	(27,028)
Total, Salaries & Benefits	201,610	185,958	158,930	(27,028)

This decrease reflects adjustments for FY 2015 Initiatives and savings from TRICARE reform initiatives.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**United States Coast Guard
Retired Pay**

I. Appropriation Overview

A. Mission Statement for Retired Pay:

The Retired Pay (RP) appropriation provides payments as identified under the Retired Serviceman's Family Protection and Survivor Benefits Plans, and other retired personnel entitlements identified under prior-year National Defense Authorization Acts. This appropriation includes payment for medical care of retired personnel and their dependents.

B. Budget Activities:

There are no budget activities directly related to providing this benefit to retired military personnel and their dependents.

C. Budget Request Summary:

The FY 2015 President's Budget includes \$1.449 billion for Retired Pay. The total adjustment-to-base is a decrease of \$10.549 million, which includes \$9.374 million for FY 2015 Actuarial Adjustments and \$1.175 million in savings associated with TRICARE reform. In the FY 2015 Budget, DoD proposes a multi-year plan to replace the current three TRICARE plans with a consolidated TRICARE Health Plan. In 2015, the proposal would increase co-pays for pharmaceuticals and implement an enrollment fee for new TRICARE-for-Life beneficiaries (as proposed in the FY 2014 Budget). This request supports the benefits outlined above and remains available until expended. The Retired Pay appropriation is scored as a mandatory appropriation.

Retired Pay Mission Statement

Retired Pay will provide payments as identified under the Retired Serviceman's Family Protection and Survivor Benefits Plans, payments for career status bonuses, concurrent receipts and combat related special compensation identified under prior-year National Defense Authorization Acts.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
13.0 Benefits for Former Personnel	1,224,297	1,479,724	1,233,836	(42,264)
Total, Salaries & Benefits	1,224,297	1,479,724	1,233,836	(42,264)

Accounts for cost-of-living adjustments for all retirement and most survivor annuities, including benefits authorized by prior-year National Defense Authorization Acts. The FY 2015 Request decrease reflects actuarial cost projections.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.6 Medical Care	\$209,136	\$183,900	\$215,615	\$31,715

Increase is based on the projections for retiree medical benefits including TRICARE reform initiatives. Once a member becomes eligible for Medicare, the Medicare-Eligible Retiree Health Care Fund (MERHCF) is responsible for these benefits.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**United States Coast Guard
Boat Safety**

I. Appropriation Overview

A. Mission Statement for Boat Safety:

The Boat Safety (BS) program applies preventive means and strategies to minimize loss of life, personal injury, property damage and environmental impact associated with the use of recreational boats. The program directly supports the Coast Guard's Maritime Prevention Program by promoting safe and enjoyable use of public U.S. waterways.

B. Budget Activities:

Boat Safety activities include: overseeing manufacturer compliance with Coast Guard regulations; grant making to states and national non-profit boating safety organizations; conducting surveys to measure recreational boating activity; continuing the Boat Responsibly national outreach and awareness initiative; promulgating safety regulations; and measuring life jacket wear rates, including the effectiveness of voluntary and mandatory efforts to increase life jacket usage.

C. Budget Request Summary:

The FY 2015 Budget includes 14 positions, 14 FTE and \$111.842 million to carry out the program in FY 2015. The total adjustments-to-base include a 1% pay raise for civilians.

In its role as the designated National Recreational Boating Safety (RBS) Program Coordinator, the Coast Guard is charged with managing dedicated user fee funding to support the National Recreational Boating Safety Program provided from the Sport Fish Restoration and Boating Trust Fund. Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e., FY 2015 funding will be a percentage of FY 2014 trust fund receipts). These amounts are available until expended, but are limited in purpose and amount in accordance with existing statute.

2015 Total Request	14	14	111,842
Total Change 2014 to 2015	4	4	5,969

CURRENT SERVICES PROGRAM DESCRIPTION:

This account provides grants for the development and implementation of a coordinated national recreational boating safety program. Boating safety statistics reflect the success in meeting the program's objectives. Pursuant to the Safe, Accountable, Flexible, Efficient Transportation Equity Act-A Legacy for Users (SAFETEA-LU, P.L. 109-59), the Boat Safety program receives 18.5 percent of the funds collected in the Sport Fish Restoration and Boating Trust Fund.

The FY 2015 budget reflects the anticipated level of funding that would be available from the trust fund for boating safety. This funding level is based on current estimates of trust fund receipts from the Office of Tax Analysis at the Department of the Treasury (adjusted to reflect amendments of current law enacted in P.L. 109-59). The estimated total distribution from the trust fund for boating safety in FY 2015 is \$111.842 million. Of that amount, \$5.500 million is available for use by the Coast Guard to coordinate and execute new and enhanced National RBS Program activities. The balance is authorized for the State RBS Federal Financial Assistance Program established by 46 U.S.C. 13101, et seq., minus not more than five percent for national boating safety activities of national non-profit public service organizations, and not more than two percent for Coast Guard expenses to administer State RBS programs.

Boat Safety Mission Statement

The Boat Safety (BS) program is designed, through preventive means, to minimize loss of life, personal injury, property damage and environmental impact associated with the use of recreational boats. The program directly supports the Coast Guard's Marine Safety mission by promoting safe and enjoyable use of public U.S. waterways. In its role as the designated National Recreational Boating Safety (RBS) Program Coordinator, the Coast Guard is charged with managing dedicated user fee funding to support the National RBS Program provided from the Sport Fish Restoration and Boating Trust Fund (formerly Aquatic Resources Trust Fund). Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e., FY 2015 funding will be a percentage of FY 2014 trust fund receipts).

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
11.1 Full-time Permanent	1,142	1,142	1,500	358
11.5 Other Personnel Compensation	1	1	1	-
12.1 Civilian Personnel Benefits	278	278	404	126
Total, Salaries & Benefits	1,421	1,421	1,905	484

Salaries and Benefits provide compensation directly related to Coast Guard civilian personnel duties. The FY 2015 request includes costs for 14 FTE and a 1.0 percent proposed pay raise for civilians. The increase in civilian pay is due to a rise in government normal cost contribution for Federal Employee Retirement System personnel based on actuarial projections, as required by OMB A-11, Section 32.3.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$3,461	\$8,935	\$8,507	(\$428)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2015 request reflects anticipated changes to the revenues from trust fund receipts. Non-Federal services for boating safety activities will be decreased across all States.

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
41.0 Grants, Subsidies, and Contributions	\$114,747	\$101,080	\$101,830	\$750

Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts. The FY 2015 request reflects anticipated needs to non-federal sources.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**United States Coast Guard
Maritime Oil Spill Program**

I. Appropriation Overview

A. Mission Statement for Maritime Oil Spill Program:

The Maritime Oil Spill Program operates under the authority of Title I of the Oil Pollution Act of 1990 (OPA), as amended, which provides for the use of the Oil Spill Liability Trust Fund (OSLTF) to pay for Federal response to oil spills and claims for uncompensated removal costs and damages resulting from such spills. The Maritime Oil Spill Program directly supports the Coast Guard's Marine Environment Protection mission and Maritime Response Program.

B. Budget Activities:

In Section Seven of Executive Order 12777, the President delegated management responsibility of the OSLTF to the Secretary of the Department in which the Coast Guard is operating. Upon re-delegation by the Secretary, the Commandant of the Coast Guard delegated responsibility to the National Pollution Funds Center (NPFC), which oversees the OSLTF.

The NPFC:

- Provides funding for Federal removal actions in response to a discharge or a substantial threat of discharge of oil to navigable waters of the United States;
- Compensates claimants for OPA removal costs or damages;
- Provides funding to natural resource trustees for Natural Resource Damage Assessments (NRDA);
- Administers the OSLTF.

C. Budget Request Summary:

The Coast Guard estimates that expenditures from this account will total \$101.000 million in FY 2015. These estimated expenditures consist of a \$50.000 million transfer for immediate Federal oil spill response, an estimated \$1.000 million payment to the Prince William Sound Oil Spill Recovery Institute, and an estimated \$50.000 million to compensate claimants for uncompensated OPA removal costs and damages, including natural resource damages.

2015 Total Request	-	-	101,000
Total Change 2014 to 2015	-	-	(198,741)

The FY 2015 President's Budget includes \$101.000 million to carry out the program in FY 2015.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Maritime Oil Spill Program uses the OSLTF to pay response costs incurred by the Coast Guard and other Federal agencies, adjudicate claims, and provide funding to support the Oil Spill Recovery Institute located in Prince William Sound, Alaska. NPFC's administrative costs are funded within the Coast Guard's Operating Expenses appropriation.

OPA section 5006(b) directs the NPFC to make annual payments to the Prince William Sound Oil Spill Recovery Institute for the interest on a portion of the OSLTF balance.

Maritime Oil Spill Program Mission Statement

The Maritime Oil Spill Program fund will provide a source of funds for removal costs and damages resulting from oil spills, or the substantial threat of a spill, into navigable waters of the U.S. In accordance with the provisions of the Oil Pollution Act of 1990, the President may make available up to \$50 million annually from the Fund for oil spill removal activities. The Fund also pays all eligible claims for removal costs and damages resulting from oil spills.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
25.2 Other Services from Non-Federal Sources	\$150,882	\$299,741	\$101,000	(\$198,741)

The FY 2015 Maritime Oil Spill Program includes a \$50 million transfer for immediate Federal oil spill response activities, an estimated \$1 million payment to the Prince William Sound Oil Spill Recovery Institute, and an estimated \$50 million to compensate claimants for uncompensated OPA removal costs and damages including natural resources damages.

**United States Coast Guard
General Gift Funds**

I. Appropriation Overview

A. Mission Statement for General Gift Funds:

The Coast Guard General Gift Fund is authorized under 10 U.S.C. § 2601, which provisions for such funds within the Department of Defense and the Coast Guard. The General Gift Fund is a vehicle that authorizes the Commandant of the Coast Guard to accept gifts and donations for the benefit of museums, chapels, and other organizations under the jurisdiction of the Coast Guard. The Coast Guard is also authorized to accept gifts to be used for the benefit of service members who are wounded, injured or taken ill while in the line of duty, as well as for those members' dependents and survivors.

B. Budget Activities:

The General Gift Fund indirectly supports Coast Guard activities.

C. Budget Request Summary:

The Coast Guard estimates \$80,000 in bequests from various sources to the General Gift Fund in FY 2015.

**United States Coast Guard
Supply Fund**

I. Appropriation Overview

A. Mission Statement for Supply Funds:

The Supply Fund, in accordance with 14 U.S.C. § 650, finances the procurement of uniform clothing, commissary provisions, general stores, technical material, and fuel for vessels over 180 feet in length. The fund is normally financed by reimbursements from the sale of goods.

B. Budget Activities:

Supply Fund activities include funding the procurement of uniforms, commissioning provisions, stores, materials, and fuel. These activities indirectly support Coast Guard missions.

C. Budget Request Summary:

Not Applicable.

Supply Fund Mission Statement

The Coast Guard supply fund, in accordance with 14 U.S.C. § 650, finances the procurement of uniform clothing, commissary provisions, general stores, technical material, and fuel for vessels over 180 feet in length. The funds is normally financed by reimbursements from sale of goods.

Summary Justification and Explanation of Changes

	FY 2013 Revised Enacted	FY 2014 Enacted	FY 2015 Request	FY 2014 to FY 2015 Change
26.0 Supplies and Materials	\$131,527	\$180,383	\$175,692	(\$4,691)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. The FY 2015 estimate of reimbursables reflects the anticipated need for supplies and material cost.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**United States Coast Guard
Yard Fund**

I. Appropriation Overview

A. Mission Statement for Yard Funds:

The Coast Guard Yard, which is located in Curtis Bay, MD, provides mission-essential logistics and engineering support, e.g., cutter drydocking, maintenance and repair. The Yard Fund is a revolving account supported by the Coast Guard's Operating Expenses and Acquisition, Construction & Improvements appropriations to pay for personnel and materials required for Coast Guard projects and work orders completed by the Coast Guard Yard.

B. Budget Activities:

Yard Fund activities include logistics and engineering support for Coast Guard vessels. These activities indirectly support Coast Guard missions.

C. Budget Request Summary:

Not Applicable.

BUDGET REQUEST AND SUPPORTING INFORMATION

United States Secret Service Operating Expenses

I. Appropriation Overview

A. Mission Statement for Operating Expenses:

The United States Secret Service has statutory authority to carry out two primary missions: protection of the President, Vice-President, visiting heads of state / foreign governments, former Presidents and their spouse (for life) and investigation of financial, cyber crimes. The Secret Service protects and investigates threats against the President and Vice President, their families, former Presidents and their spouses, visiting foreign heads of state or government, presidential and vice presidential candidates/nominees; and other individuals as directed by the President; protects the White House Complex, Vice President's Residence, foreign missions, and other buildings within Washington, D.C.; and leads the security planning and coordination for designated National Special Security Events.

The Secret Service also investigates violations of laws relating to counterfeiting of obligations and securities of the United States; financial crimes that include, but are not limited to, access device fraud, financial institution fraud, identity theft, mortgage fraud, bank fraud, and computer/cyber fraud; and computer-based attacks on financial, banking, telecommunications, and other critical infrastructure.

B. Budget Activities:

The Secret Service's Operating Expenses appropriation provides for the annualization of prior-year funding, fiscal adjustments, and budget activity related to Secret Service programs, projects and activities (PPA).

C. Budget Request Summary:

The Secret Service requests 6,667 positions, 6,572 FTE, and \$1,585,970,000 for FY 2015. The request includes a total of \$31,600,000 in program increases as well as program decreases of (\$11,866,000). This level of funding includes the following program changes:

- 2016 Presidential Campaign - \$21,500,000
- Former Obama Protective Detail - \$4,000,000 (20 FTE)
- Purchase of Presidential Parade Limousine - \$6,100,000
- Support for Missing and Exploited Children - (\$8,366,000)
- National Computer Forensics Institute (NCFI) - (\$3,500,000)

Adjustment to base increases, totaling \$61,236,000, include the following:

- FY 2015 pay raise - \$12,508,000
- Presidential Candidate Nominee Protection-Campaign Labor Shift - \$4,000,000 (30 FTE)
- Retirement Contributions Costs - \$3,900,000
- Overseas Building Operations Capital Security Cost Sharing (CSCS) - \$1,900,000
- Annualization of FY 2014 Pay Raise - \$2,749,000
- WCF adjustment for GSA Rent and Government-Wide Mandated Services - \$185,000
- Mission Support Restoration - \$35,994,000 - The FY 2015 budget requests \$36.0M in added base funding to restore critical mission support functions such as vehicle replacement and maintenance, fuel purchasing, mission-critical travel, and permanent change-of-station (PCS) moves to a level that supports the Service's current operational pace. Funding for these costs is consistent with historically-required levels and prevents degradation of Secret Service assets while promoting effective stewardship of Secret Service resources.

In addition to a minor pay inflation technical adjustment to sustain the Secret Service's current 6,572 FTE footprint, the Mission Support Restoration is comprised of the following increases:

Travel <i>(dollars in thousands)</i>		
FY2014 Enacted	FY2015 Request	Mission Support Increase
\$59,914	\$82,461	+\$22,547
Justification: FY 2015 Mission Support Restoration request funds the Secret Service's travel budget at a total of \$82.5 million. This amount represents the Service's inflation-adjusted 8-year average expenditure for non-campaign travel activities, net of a 5 percent estimated efficiency. USSS travel costs are largely exogenously determined by protective mission needs. FY 2015 funding is designed to hedge against the risk of unexpectedly rigorous travel responsibilities by using historical data to inform the budgeted level.		

Permanent Change of Station (PCS) Moves <i>(dollars in thousands)</i>		
FY2014 Enacted	FY2015 Request	Mission Support Increase
\$15,330	\$23,125	+\$7,795
Justification: FY 2015 Mission Support Restoration adjustment funds the Secret Service's PCS move budget at a total of \$23.1 million. This amount represents Service projections of what is necessary to fund PCS moves at a level that supports core protective mission responsibilities as well as the professional development of the Service's special agent workforce. The requested total is net of a 20 percent PCS		

efficiency that reflects DHS and the Service's commitment to reduce the cost of mission critical non-pay activities to the extent allowed by operational requirements.

Vehicle Fleet Restoration (dollars in thousands)		
FY2014 Enacted	FY2015 Request	Mission Support Increase
\$10,000	\$14,000	+\$4,000
Justification: FY 2015 Mission Support Restoration funding restores the Secret Service's vehicle replacement budget to a total of \$14.0 million. This level supports the maintenance and replacement of 540 Service vehicles each year, maintaining an 8-year replacement cycle. The FY 2015 total supports a USSS fleet size comparable to the Service's 8-year average for vehicles per FTE.		

Fuel and Oil Costs (dollars in thousands)		
FY2014 Enacted	FY2015 Request	Mission Support Increase
\$9,000	\$10,176	+\$1,176
Justification: FY 2015 Mission Support Restoration adjustment funds the Secret Service's fuel and oil budget at a total of \$10.2 million. This level fully supports projected cost inflation and usage consistent with prior year actual data.		

These increases are distributed across the Service's PPAs according to identified mission need.

Adjustment to base decreases, totaling \$28,498,000 in efficiencies and reallocations, include the following:

- Domestic Field Operations-Campaign Labor Shift - (\$4,000,000)
- Telecomm contract efficiencies - (\$2,200,000)
- Cyber Security Presidential Protection Measures Reduction to O&M - (\$3,700,000)
- Operational Mission Support (OMS) - (\$16,594,000)
- Domestic Field Offices Efficiencies - (\$2,004,000)

2015 Total Request	3,628	3,533	874,885
Total Change 2014 to 2015	81	20	26,622

The United States Secret Service requests 3,628 positions, 3,533 FTE, and \$874.9 million in FY 2015 for the Protection of persons and facilities PPA.

Adjustments to base:

- Increase of \$7.2 million for 2015 pay raise
- Increase of \$2.3 million for retirement contributions
- Increase \$1.6 million to annualize the 2014 pay raise
- Increase of \$25.7 million for Mission Support Restoration
- Decrease of \$3.7 million for the Cyber Security Presidential Protection Measures program
- Decrease of \$16.6 million for the Operational Mission Support (OMS) program

Program changes:

- Increase of \$4.0 million for the Former Obama Protective Detail (20 FTE)
- Increase of \$6.1 million for purchase of Presidential Parade Limousine

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secret Service provides for the physical safety and security of the President; Vice President; their families; former Presidents and their spouses (for life); visiting foreign dignitaries; major Presidential and Vice-Presidential candidates and their spouses and children; and other individuals as designated by 18 U.S.C. § 3056. The Secret Service also secures designated facilities (18 U.S.C. § 3056A), and certain major events. This program is comprised of three distinct activity areas: (1) Protection of persons, (2) Protection of facilities, and (3) Protection of events.

Protection of Persons

The Secret Service is world-renowned for the physical protection it provides to the nation's highest elected leaders, other government officials, and visiting foreign dignitaries. Pursuant to Title 18 U.S.C. § 3056, the Secret Service is authorized by law to protect the following individuals:

- the President, the Vice President (or other individuals next in order of succession to the Office of the President), the President-elect, and Vice President-elect;
- the immediate families of the above individuals;
- Former President and their spouses (for life);
- Former Vice Presidents, their spouses and their children who are under 16 years of age, for a period of not more than six months after the date the former Vice President leaves office;
- visiting foreign heads of foreign states or governments and their accompanying spouses; and
- other distinguished foreign visitors to the United States and official representatives of the United States performing special missions abroad.

On January 10, 2013, the President signed the Former Presidents Protection Act of 2012 (P.L. 112-257), which amended the federal criminal code to eliminate certain limitations on the length of Secret Service protection for former Presidents and their spouses and children. The Act authorizes the Secret Service to protect: (1) former Presidents and their spouses for their lifetimes, except that protection of a spouse shall terminate in the event of remarriage; and (2) children of a former President who are under age 16. Permanent protectees, such as the President and Vice President, have details of special agents permanently assigned to them. Other protectees, such as visiting heads of state or governments and their accompanying spouses, are staffed with special agents on temporary assignment from Secret Service investigative field offices or headquarters.

For protective visits of the President and Vice President, teams of Secret Service personnel travel in advance to conduct site security surveys to assess the venue to be visited, personnel and equipment requirements, as well as determining the location of hospitals and primary motorcade and evacuation routes in the event of an emergency. Before a protectee arrives in any city, state, or country, the lead advance special agent and their team, in conjunction with the local Secret Service field office, develops and coordinates the overall security plan with local, state, and federal law enforcement and public safety representatives participating with the visit. Intelligence information is shared, and emergency contingency plans are established. Prior to the arrival of the protectee, all aspects of the security plan are implemented, to ensure a safe and secure environment.

The assistance of partners in the military, as well as federal, state, and local law enforcement, and public safety organizations is a vital part of the entire security operation. During protective visits, Secret Service and local law enforcement personnel primarily focus their security efforts on the middle and outer perimeter of the secure site. Special agents permanently assigned to a permanent protective detail focus on the inner security perimeter. A Secret Service command post is the primary communication center for protective activities from which emergencies are monitored and critical information is shared with law enforcement agencies participating with the protective visit. Additionally, communication security rooms are established at each protective venue.

In FY 2013, Secret Service protective details, investigative field office personnel, and headquarters personnel achieved 100 percent incident-free protection during domestic and international travel stops¹.

** Formers includes Presidents, Vice Presidents, First and Second Lady

In today's threat environment, the Secret Service is committed to using its resources to provide the most effective protection possible and integrates cutting-edge technology and personnel within its protective mission.

Using advanced protective countermeasures, the Secret Service executes security operations that prevent, deter, minimize, and respond to threats. The protective environment is enhanced by specialized resources within the Secret Service including the Airspace Security Branch, Counter Sniper Team, Counter Assault Team, Emergency Response Team, Counter Surveillance Division, Hazardous Agent Mitigation and Medical Emergency Response Team, Explosive Detection Unit, Magnetometer Operations Unit, and the Critical Systems Protection (CSP) program. CSP monitors the interaction between physical and cyber environments, providing a real-time picture of potential threats that could have a negative impact on the physical security of a site, as the result of a cyber intrusion. Additionally, CSP includes the systematic audit and technical assessment of various critical infrastructures that support 100 percent of all venues visited by President and Vice President.

Operational Mission Support

The Secret Service's Operational Mission Support program supports advanced protective countermeasure projects for high-priority hazardous materials detection systems, audio countermeasures, physical perimeter security enhancements at the White House Complex, and other permanent protective sites, temporary Presidential sites, and cyber-protection activities to address known and evolving threats directed toward the agency's protective interests.

The Secret Service plans, designs, develops, installs, and maintains intrusion detection equipment, camera and lighting, and fire and life-safety systems at all protected sites. In addition, the Secret Service developed and maintains a comprehensive program to mitigate threats associated with Chemical, Biological, Radiological, Nuclear, or Explosives hazards (CBRNE).

¹ Includes U.S. and U.S. Territories

The Secret Service completed the installation of the Officer Post Messaging and Alert System (OPM&A) at the White House Complex which consists of the Physical Security Information Management System (PSIMS), an enhanced crash notification system, an enhanced White House Incident Notification System (WHINS), and the Mass Notification System (MNS).

The Secret Service also continued to upgrade the infrastructure (underground conduits, manholes, power supplies, fiber optic cabling, connections to existing equipment rooms, etc) that supports a number of Secret Service countermeasures programs (camera system, alarm system, emergency lighting system, officer post messaging system) on the White House Complex.

The Secret Service continued to replace existing x-ray machines at protected facilities based on a five-year replacement cycle. This is done in coordination with upgrading officer booths at these facilities and addresses new requirements identified by Uniformed Division (UD) management.

White House Mail Screening Facility

The Secret Service provides management and oversight of the mail screening security program responsible for screening all incoming mail, parcels, and gifts destined for the White House Complex (WHC). The goal of the program is to detect any chemical, biological, radiological, nuclear and explosive (CBRNE) hazards at a remote location in order to contain, mitigate, and investigate any vulnerability posed by these threats. The screening of all items going to the WHC is deemed a security function, and items are screened at a high threat level. This program previously functioned at a repurposed military warehouse located in Edgewood, Maryland.

In 2010, the Secret Service assumed permanent and sole responsibility of its own newly-constructed mail screening facility in Washington, D.C. The Secret Service's White House Mail Screening Facility (WHMSF) receives all delivered mail and other items destined for the WHC for screening. Upon receipt, security personnel and technical specialists utilize strict protocols to sample the mail for contamination by targeted threat agents and monitor the environment for potentially hazardous substances. Any items determined to contain possible contaminants are quarantined and subjected to further analysis, and appropriate mitigation procedures are implemented. Once screened items are identified as negative for hazards, they are released back to the WHC for administrative mail processing and distribution.

Establishment of the new WHMSF allowed the Secret Service to consolidate operational elements under one roof and within an existing Secret Service secured perimeter. The WHMSF houses a processing area containing fume hoods, a chemical and biological laboratory, a forensics laboratory, laundry room, warehouse, and management offices, each of which were located in separate buildings prior to construction. The WHMSF also allows the Secret Service to assume effective and full control of the critical aspects of the mail screening process.

CBRNE protection features of the WHMSF include biological sample collectors, chemical agent air monitors, reinforced walls and relief panels for explosive blast mitigation, and radiation detectors. Epoxy painted walls and sealed openings are countermeasures to prevent contamination migration and assist with decontamination while an in-house laboratory provides the Secret Service with an enhanced level of daily oversight for analytical functions. Redundant instrumentation and equipment is maintained to ensure continuity of operation and valuable experiments; standards and samples are stored under secure temperature-

monitored conditions. The in-house laboratory allows the Secret Service to be fully responsible for quality assurance.

Protection of Facilities

Pursuant to Title 18 U.S.C. § 3056A, the Secret Service is authorized to protect, in part, the following facilities:

- the White House;
- any building in which Presidential offices are located (Treasury Building, New Executive Office Building, Old Executive Office Building);
- the Treasury Building and grounds;
- the Vice President's residence and grounds; and
- 548 foreign diplomatic missions located in the Washington, D.C. metropolitan area.

Protection of these facilities is carried out by the Secret Service's Uniformed Division Officers. Utilizing magnetometer screening operations, these officers process thousands of staff members, other workers, tourists, members of the press and appointments into the White House Complex on a daily basis. Officers assigned to the White House Complex and Vice President's residence provide protection through the effective use of fixed posts, foot beats, bicycle patrols, roving vehicular patrols, and cameras.

Number of Processings by Secret Service Uniformed Officers in FY 2013

Public Members Screened	Protective Venues
2,468,889	960

Technicians assigned to the Counter Sniper Units, Explosive Detection Units and the Emergency Response Teams also provides specialized security in and around the White House Complex. The White House Vehicle Inspection Teams and the Counter Surveillance Division augment the Uniformed Division's work in securing the White House Complex and other protected sites.

Uniformed Division officers assigned to protect foreign diplomatic missions in the Washington, D.C. metropolitan area perform their duties by patrolling the embassy district in marked police vehicles, motorcycles, bicycles, and on foot. These officers also handle demonstrations at diplomatic locations, assist in motorcade movements, operate fixed protective posts, investigate and process crime scenes, and consult with diplomatic officials regarding security matters related to their embassies, chanceries, and personnel.

Protection of Events

When developing the overall security plan, the Secret Service consistently implements three layers of security. An outer perimeter, a middle perimeter and an inner perimeter. A critical element of the outer and middle perimeters is the use of magnetometer and portable x-rays. Whether it is a permanent protective site, such as the White House Complex, the Vice President's residence, or a temporary protective site, such as a Presidential commencement address at a university or college, the Uniformed Division is responsible for the prevention, deterrence, and detection of all items that may be deemed a threat and utilizes walk-through metal detectors, handheld metal detectors, portable x-ray machines, physical searches of hand-carried items, and explosive detection units. From FY 2008 to FY 2013,

Uniformed Division officers screened approximately 14 million people in support of the Secret Service protection mission.

Uniformed Division Magnetometer Unit Screenings

	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	Total
Number of guests screened in support of protected sites	3,321,375	3,963,327	931,939	854,382	2,115,262	2,468,889	13,655,174

In addition to the protection of persons and facilities, this PPA provides funding for major protective events that do not receive a National Special Security Event designation. In years past, these events included meetings of the International Monetary Fund and World Bank in Washington, D.C., and meetings of the United Nations General Assembly (UNGA) in New York, NY. The UNGA is one of the most significant annual protective events, requiring the agency to provide simultaneous protection of heads of state or government, as well as the President, Vice President, and other Secret Service protectees that may be in attendance.

Fiscal Year	Event	Head-of-Government/ Head of State	Spouses
2013	UNGA 68	124	80
2012	UNGA 67	160	50
2011	UNGA 66	132	55
2010	UNGA 65	125	52
2009	UNGA 64	191	62
2008	UNGA 63	116	61

Summary

The above requested amount provides funding for operational security which directly supports the 2010 DHS Quadrennial Homeland Security Review (QHSR) Objective 1.3.4, Protecting Government Leaders, Facilities, and Special Events. The funding specifically permits the Secret Service to provide or acquire the security assets needed to successfully execute the protection mission.

Funding this activity supports the accomplishment of the following Secret Service strategic and management performance measures:

- 100 percent of total Secret Service protection activities that are incident-free for protection of our national leaders, foreign dignitaries, designated protectees, during travel or at protected facilities.
- 100 percent of instances protectees arrive and depart safely (campaign protectees).
- 100 percent of protective travel instances that fall within estimated costs.

(Dollars in Thousands)

PPA: National Special Security Event Fund

	Perm. Pos	FTE	Amount
2013 Revised Enacted	-	-	4,259
2014 Enacted	-	-	4,500
2015 Current Services	-	-	4,500
2015 Total Request	-	-	4,500
Total Change 2014 to 2015	-	-	-

The United States Secret Service requests 0 positions, 0 FTE, and \$4.5 million in FY 2015 for the National Special Security Event (NSSE) Fund PPA.

Justification for no-year funding

The Secretary of Homeland Security is responsible for designating all NSSEs. The designation of NSSEs is somewhat unpredictable; some NSSEs are known years in advance while others are designated with only weeks or even days' notice. To support Secret Service responsibilities associated with these events, the 2015 Budget specifically requests no-year funding for NSSEs to establish a base level of funding for unanticipated events. These events are unpredictable, and limiting availability of funding will require the Service to either lapse or reprogram funds intended for other programs in order to address an event designated as an NSSE outside of the normal budgetary cycle.

CURRENT SERVICES PROGRAM DESCRIPTION:

Under the authorities granted by Presidential Decision Directive 62 (1998); the Homeland Security Act (2002); Homeland Security Presidential Directives 5, 7 (2003) and 15 (2007); 18 U.S.C. § 3056 (amended 2005); National Security Presidential Directive 46/Homeland Security Presidential Directive 15 (2007); and Presidential Policy Directive 22 (2013), the Secret Service is the lead agency for planning, coordinating, and implementing security operations at designated NSSEs. These events represent some of the most complex and logistically complicated protective operations undertaken by the Secret Service, often requiring anywhere from 3 to 18 months of planning. The support of multiple federal departments and coordination with numerous state and local law enforcement and public safety jurisdictions is essential to the success of these events. The Secret Service deploys personnel and resources from across the United States to support NSSE security operations.

Once an event is designated an NSSE, the Secret Service begins the collaborative process of developing a security plan that will create a safe and secure environment for Secret Service protectees, other dignitaries, event participants, and the general public, while safeguarding people's lawful freedoms of speech, assembly, and petition of the government. A central component of this collaboration is the establishment of an Executive Steering Committee (ESC) and as many as 24 subcommittees comprised of command level representatives from the Secret Service, the Federal Bureau of Investigation, the Federal Emergency Management Agency, other federal law enforcement agencies, state and local law enforcement, and public safety counterparts representing the areas impacted by the events.

The ESC oversees the development, coordination, and implementation of the security plan and resolves any concerns raised by the various subcommittees. Subcommittees are staffed by interagency subject matter experts and are charged with developing specific aspects of the security plan including tactical training and field exercises, credentialing, airspace security, and venue security. To further enhance interagency collaboration, the Secret Service establishes a Multi-Agency Communications Center (MACC) staffed by senior level command officials at all NSSEs to give participating law enforcement and public safety agencies the ability to monitor, coordinate, and immediately share critical and security information from a central location.

Excluding quadrennial campaign-related NSSEs, such as the party nominating conventions, Presidential inaugurations and annual State of the Union Addresses, the Secret Service has planned, coordinated, and implemented operational security plans for 17 NSSEs over the past 14 years; an average of 1.2 NSSEs per year since 1998. Based on the average cost of an NSSE, the \$4.5 million included in the budget request for NSSEs is intended to support the operational security costs associated with one unanticipated event, or the start-up costs required to support multiple events.

Summary

The above requested amount provides funding for operational security which directly supports the 2010 DHS Quadrennial Homeland Security Review (QHSR) Objective 1.3.4, Protecting Government Leaders, Facilities, and Special Events.

Funding this activity supports the accomplishment of the following Secret Service strategic and management performance measures:

- 100 percent of total Secret Service protection activities that are incident-free for protection of our national leaders, foreign dignitaries, designated protectees, during travel or at protected facilities.
- 100 percent of instances protectees arrive and depart safely (campaign protectees).
- 100 percent of protective travel instances that fall within estimated costs.

PPA: Protective intelligence activities

	Perm. Pos	FTE	Amount
2013 Revised Enacted	514	514	66,630
2014 Enacted	514	514	67,165
2015 Adjustments-to-Base	-	-	1,069
2015 Current Services	514	514	68,234
2015 Total Request	514	514	68,234
Total Change 2014 to 2015	-	-	1,069

The United States Secret Service requests 514 positions, 514 FTE and \$68.2 million in FY 2015 for the Protective intelligence activities PPA.

Adjustments to base:

- Increase of \$698 thousand for the 2015 pay raise
- Increase of \$153 thousand to annualize the 2014 pay raise
- Increase of \$217 thousand for retirement contributions

CURRENT SERVICES PROGRAM DESCRIPTION:

Pursuant to 18 U.S.C. § 3056, the Secret Service maintains a protective intelligence program to ensure the safety of Secret Service protectees, protected facilities, and protected events.

The Secret Service's protective intelligence program is conducted in collaboration with the intelligence community; federal, state, and local law enforcement; the Department of Defense; and concerned citizens. The ultimate goal of the protective intelligence program is the identification, prevention, and mitigation of threats toward Secret Service protectees, protected facilities, or protected events.

The Office of Strategic Intelligence and Information oversees the protective intelligence mission. These personnel are charged with conducting, guiding, and providing oversight for all protective intelligence activities.

Protective Intelligence and Assessment Division

The Protective Intelligence and Assessment Division (PID) within the Office of Strategic Intelligence and Information designates special agents and intelligence research specialists who analyze, evaluate, disseminate, and manage information about individuals, groups, and activities that pose potential risks to Secret Service interests. PID personnel provide threat assessments, briefings, and other information pertinent to protective intelligence activities. Responsibilities also include training, and behavioral research to internal and external components on the prevention of targeted violence and identification of pre attack-related behaviors.

To support protective intelligence operations of the Secret Service, PID conducts the following activities:

- Maintains a 24-hour operations center to process, evaluate, and refer for investigation/resolution (to Secret Service field offices) threat information relating to our Secret Service protectees, protected facilities, or protected events received from all sources. All relevant classified and unclassified information is then disseminated to appropriate Secret Service internal operational components through human and electronic communication.
- Operates a cyber awareness program to identify potential behaviors of interest occurring online. In particular, PID personnel identify and assess potentially serious or concerning social media or online behaviors associated with the locations and schedules of the President, Vice President, former Presidents, and major events.
- Conducts threat assessments regarding the potential exposure to danger for protected individuals, venues, and infrastructures protected by the Secret Service. These assessments offer a description of the current threat environment. Threat assessments review elements intrinsic and extrinsic to the protected individual, recent intelligence, and situational developments. The PID has established assessment methodology on both the pre attack behaviors and target side of the protective equation.
- Reviews hundreds of thousands of cables received daily from the intelligence community each year for information that may potentially affect Secret Service protectees, protected facilities, or protected events, while maintaining an elaborate detailee program of Secret Service agents with law enforcement and the intelligence community, to gain direct background information and when necessary, operational assistance in resolving threats. During protective advances, a PID special agent is assigned to the advance team and works directly with the local law enforcement community to identify and share intelligence information. Additionally, PID supports all protectee trips with a headquarters element.
- Provides consultation, training, and behavioral research to internal and external components on the prevention of targeted violence and identification of attack-related behaviors through the National Threat Assessment Center. Assists Secret Service special agents in evaluating the risk an individual may pose to Secret Service protectees, protected facilities, or protected events.
- Provides training on the evaluation of terrorist groups, techniques, and practices to internal and external public and private entities through the Critical Protective Analysis Group.

From 2008 to 2013, the Secret Service provided protective intelligence functions for 39,587 domestic and international travel stops an average of over 7,917 per year. During this same time frame, PID prepared 4,526 threat assessments and opened 23,796 protective intelligence investigations--an average of 5,664 per year.

Summary

The above requested amount provides funding for operational security which directly supports the 2010 DHS Quadrennial Homeland Security Review (QHSR) Objective 1.3.4, Protecting Government Leaders, Facilities, and Special Events.

Funding this activity supports the accomplishment of the following Secret Service strategic and management performance measures:

- 100 percent of total Secret Service protection activities that are incident-free for protection of our national leaders, foreign dignitaries, designated protectees, during travel or at protected facilities.
- 100 percent of instances protectees arrive and depart safely (campaign protectees).
- 100 percent of protective travel instances that fall within estimated costs.
- Information sharing measures include both internal and external briefings and intelligence products. Information sharing events include: National Threat Assessment Center briefings, Targeted Violence Information Sharing System (TAVISS) briefings, agency alerts, specialty desk briefings and other training, spot reports, suspicious activity reporting, advisories, permanent protectee threat assessments, major events assessments, and certain other assessment products. Sharing information about threats, hazards, and protective actions will allow for the internal and external coordination needed to prevent successful attacks.

Department of Homeland Security

Operating Expenses
Presidential candidate nominee protection
Program Performance Justification
(Dollars in Thousands)

PPA: Presidential candidate nominee protection

	Perm. Pos	FTE	Amount
2013 Revised Enacted	63	63	31,236
2014 Enacted	-	-	-
2015 Adjustments-to-Base	30	30	4,000
2015 Current Services	30	30	4,000
2015 Program Change	-	-	21,500
2015 Total Request	30	30	25,500
Total Change 2014 to 2015	30	30	25,500

The United States Secret Service requests 30 positions, 30 FTE, and \$25.5 million in FY 2015 for the Presidential candidate nominee protection PPA.

Adjustments to base:

- Increase of \$4 million (30 FTEs) to shift existing base labor resources from the Domestic field operations PPA to support staffing requirements for the 2016 Presidential Campaign

Program change:

- Increase of \$21.5 million for the 2016 Presidential Campaign

CURRENT SERVICES PROGRAM DESCRIPTION:

As authorized in 18 U.S.C § 3056 the Secret Service protects major Presidential candidates and Vice Presidential candidates, and spouses of eligible candidates within 120 days of the general presidential election.

Funding is requested for the start-up costs of the 2016 Presidential Campaign. During FY 2015, the Secret Service will provide specialized training for its workforce and will procure screening and detection equipment, armored vehicles, and supplies to support the increase in protective mission requirements. Sufficient lead time is critical to properly conduct service-wide training, acquire specialized protective equipment and pre-position these assets at Secret Service field offices.

Summary

Funding associated with this PPA directly supports the 2014 DHS Quadrennial Homeland Security Review (QHSR) Objective 1.3.4, Protecting Government Leaders, Facilities, and Special Events. The funding specifically permits the Secret Service to provide or acquire the security measures needed to protect designated campaign sites, candidates and their families.

Funding this activity supports the accomplishment of the following Secret Service strategic and management performance measures:

- 100 percent of total Secret Service protection activities that are incident-free for protection of our national leaders, foreign dignitaries, designated protectees, during travel or at protected facilities.
- 100 percent of instances protectees arrive and depart safely (campaign protectees).
- 100 percent of protective travel instances that fall within estimated costs.

The United States Secret Service requests 1,758 positions, 1,758 FTE and \$332.4 million in FY 2015 for the Domestic field operations PPA.

Adjustments to base:

- Increase of \$3.1 million for 2015 pay raise
- Increase of \$679 thousand to annualize the 2014 pay raise
- Increase of \$963 thousand for retirement contributions
- Increase of \$7.9 million for Mission Support Restoration
- Decrease of \$4.0 million (30 FTEs) to shift existing base resources to the Presidential Candidate Nominee Protection PPA to support staffing requirements for the 2016 Presidential Campaign
- Decrease of \$2.0 million for domestic field operations efficiencies

Program changes:

- Decrease of \$3.5 million for the National Computer Forensic Institute

CURRENT SERVICES PROGRAM DESCRIPTION:

In 1865, the Secret Service was created to investigate and prevent counterfeiting. Today the agency's investigative mission has evolved from enforcing counterfeiting laws to safeguarding the payment and financial systems of the United States from a wide range of financial and computer-based crimes.

To combat these crimes, the Secret Service has adopted a proactive approach, using advanced technologies and capitalizing on the power of task force partnerships. Today, computer experts,

forensic specialists, investigative experts and intelligence analysts provide rapid response and critical information in support of financial analysis, infrastructure protection and criminal investigations. Specifically, the Secret Service is charged with investigating access device fraud (18 U.S.C. 1029); identify theft (18 U.S.C. 1028), computer fraud (18 U.S.C. 1030), and bank fraud / mortgage fraud (18 U.S.C. 1344).

The Secret Service currently operates 43 domestic field offices, 60 resident offices, 13 resident agencies, and 26 domiciles, strategically positioned to support the protective and execute the investigative missions. While the budget request for the Secret Service Domestic field offices reflects the resources needed to support the investigative mission, field offices play an integral role in protecting the President, Vice President, other protectees, critical infrastructure, and events of national significance. At the same time, field offices conduct investigations to identify, locate, and apprehend criminal organizations and individuals targeting the nation's critical financial infrastructure and payment systems involved in counterfeiting of U.S. currency; access device fraud (including credit and debit fraud); cyber intrusion; identity crimes; bank fraud; and illicit financing operations.

The Secret Service is recognized worldwide for its investigative expertise and for its aggressive and innovative approach to the detection, investigation and prevention of financial crimes. As payment methods have changed over the years – from coin and paper currency, to checks, credit cards, and now, online transactions – the scope of the Secret Service's investigations have expanded. Today, criminal trends show an increased use of cyber attacks through phishing emails, account takeovers, malicious software, hacking attacks and network intrusions resulting in significant data breaches and the theft of credit and debit card account numbers and Personal Identifying Information.

To protect the nation's financial infrastructure from cyber and financial criminals, the Secret Service has adopted a multi-pronged approach that includes: Collaborating through an established network of 45 Financial Crimes Task Forces and 33 Electronic Crimes Task Forces; providing computer-based training to enhance the investigative skills of special agents through the Electronic Crimes Special Agent Program; providing computer-based training to state and local law enforcement partners with the necessary computer-based training, tools, and equipment to enhance their investigative skills through the National Computer Forensics Institute; establishing a Computer Emergency Response Team in coordination with Carnegie Mellon University; and maximizing partnerships with international law enforcement counterparts through overseas field offices.

A key component of the Secret Service investigative mission is to raise awareness of issues related to counterfeit, financial fraud, and electronic crimes, both in the law enforcement community and among the public. The Secret Service works to educate consumers, providing training to law enforcement personnel through a variety of programs and initiatives. Local field offices routinely provide community outreach seminars and public awareness training on the subjects of counterfeit currency, financial fraud, identity crimes, and cyber crime when speaking to school groups, civic organizations, and private industry. In addition, the Secret Service provides training to state and local law enforcement. This training includes formal and informal classes, which occur at field office sponsored seminars, police academies, the Secret Service-led National Computer Forensic Institute in Hoover, Alabama, and other various settings.

The Secret Service, in concert with its established partners – public and private, domestic and international, law enforcement and civilian – continues to play a critical role in preventing, detecting, investigating, and mitigating the effects of increasingly complex financial and electronic crimes, perpetrated by domestic and international criminals. The Secret Service investigates these crimes,

develops cases for prosecution, and brings offenders to justice to safeguard our nation's financial infrastructure and payment systems.

The following charts provide detailed statistics regarding arrests and cases closed by Secret Service domestic field offices:

Arrests made by Domestic Field Offices

Category	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	Total

Cyber Crime Investigations

Today, our modern financial system depends heavily on information technology for convenience and efficiency. Accordingly, criminals have adapted their methods and are increasingly using cyberspace to exploit our Nation's financial payment system by engaging in fraud and other illicit activities. This is not a new trend; criminals have been committing cyber financial crimes since at least 1970². Criminal trends show an increased use of phishing emails, account takeovers, malicious software, hacking attacks and network intrusions resulting in significant data breaches.

Secret Service investigations have resulted in the arrest and successful prosecution of cyber criminals involved in the largest known data breaches, including those of TJ Maxx, Dave & Buster's, Heartland Payment Systems, and others. Over the past four years, Secret Service cyber crime investigations have resulted in over 4,900 arrests and prevented over \$11.24 billion in potential fraud losses. Through work with Secret Service partners at the Department of Justice (DOJ), in particular the local U.S. Attorney Offices, the Computer Crimes and Intellectual Property section (CCIPS), the International Organized Crime Intelligence and Operations Center (IOC-2), and others, the Secret Service will continue to bring the cyber criminals that perpetrate major data breaches to justice. In FY 2013, Secret Service cyber crime investigations resulted in 840 arrests and prevented \$1.3 billion in potential losses.

The Secret Service is committed to safeguarding the nation's financial payments systems. Responding to the increase in cyber crime and growing levels of sophistication criminals employ, requires significant resources and greater collaboration among law enforcement and its public and private sector partners. Accordingly, the Secret Service continues to dedicate significant resources to improving investigative techniques, remaining innovative in its approach, and providing training for its law enforcement partners.

Additionally, the Executive Branch has identified cyber security as one of the most serious economic and national security challenges we face as a nation. The Secret Service is committed to identifying and dismantling cyber criminals as mentioned in the White House Transnational Organized Crime Strategy in 2011. The Secret Service objective is to secure the National Protection Framework as stated in the Blueprint for a Secure Cyber Future Strategy of 2011. Secret Service personnel in the field are multi-faceted- the cyber investigator is the advance agent for a protective assignment; the identity crimes investigator is conducting protective intelligence investigations; the counterfeit investigator is facilitating the security of a National Special Security Event.

Electronic Crimes Special Agent Program

A central component of the Secret Service's cyber crime investigative efforts is the Electronic Crimes Special Agent Program (ECSAP). This program is comprised of 180 Active Computer Forensic Examiners (ECSAP-CF) and 80 Active Network Intrusion Investigators (ECSAP-NITRO). ECSAP agents are computer investigative specialists and among the most highly-trained experts in law enforcement, qualified to conduct examinations on all types of electronic evidence. They not only serve in an investigative capacity, they also help protect components of our critical

² Beginning in 1970, and over the course of three years, the chief teller at the Park Avenue branch of New York's Union Dime Savings Bank manipulated the account information on the bank's computer system to embezzle over \$1.5 million from hundreds of customer accounts. This early example of cyber crime not only illustrates the long history of cyber crime, but the difficulty companies have in identifying and stopping cyber criminals in a timely manner—a trend that continues today.

infrastructure by providing substantive insight regarding vulnerabilities that may be exploited by criminal elements.

ECSAP training is divided into three levels. The basic level provides special agents with hands-on experience with computer hardware, operating systems, cell phones, tablets, Global Positioning Systems, networking fundamentals, email investigations, legal issues, and search and seizure. Since 2008, this level of training has been part of the Secret Service's core curriculum for all newly hired special agents. The next level provides special agents with the necessary skills and equipment that will allow them to respond to and investigate network intrusions. At this level, special agents receive hands-on experience with computer hardware, device imaging solutions, forensic analysis tools, legal issues and report generation for law enforcement officers performing as cyber incident responders and digital evidence examiners. At the third level of training, special agents are able to investigate and forensically obtain legally-admissible digital evidence utilized in the prosecution of electronic crimes cases, as well as criminally-focused protective intelligence cases.

In FY 2013, ECSAP-trained special agents processed 694 terabytes of digital evidence. As the Secret Service has established itself as a leader in cyber crime investigations, the nationwide demand among local law enforcement and private sector partners for investigative or prevention-based assistance from Secret Service's ECSAP-trained special agents has grown significantly.

Electronic Crimes Task Forces

The Secret Service currently operates 33 Electronic Crimes Task Forces (ECTFs), including two international task forces in Rome, Italy and London, England. The ECTF model is unique in that it brings together federal, state, and local law enforcement, and also prosecutors, private industry, and academia. Information about vulnerabilities, emerging technologies, and preventative measures is openly shared within a trusted environment. The common purpose is the prevention, detection, mitigation, and aggressive investigation of cyber attacks on our nation's financial and critical infrastructures.

Today, membership in our ECTFs includes 3000 private sector partners; 2200 international, federal, state and local law enforcement partners; and 200 academic partners. All ECTF partners benefit from the resources, information, expertise and advanced research provided by our international network of members while focusing on issues with significant regional impact.

Cell Phone Forensic Facility

The Secret Service has an established partnership with the Tulsa Digital Forensic Laboratory Center of Information Security, to create and co-locate within the Cell Phone Forensic Facility at the University of Tulsa. The facility enables training, forensic examinations, and research on mobile devices. The ongoing research into these new devices, operating systems, and mobile device technologies provides valuable tools in the Secret Service's fights against cyber crime. Furthermore, the facility expands the capabilities of law enforcement to pursue a broader range of digital forensics. Since 2008, approximately 6,500 mobile device forensic examinations have been conducted. In FY 2013, over 1,490 mobile device forensic examinations were conducted.

Counterfeit Investigations

In FY 2013, the Secret Service recovered approximately \$156 million in counterfeit U.S. currency, arrested more than 2,660 criminals as a result of counterfeit investigations and suppressed 250 counterfeit manufacturing plants domestically.

The Secret Service continues to adapt to the trends in counterfeiting, currently influenced by computer-based technologies. The widespread availability of high quality scanning and printing devices for home use has provided more individuals the opportunity to manufacture a passable counterfeit note with relative ease. In FY 2013, digitally processed counterfeit notes accounted for 57 percent of the total domestic passing activity of counterfeit currency.

Financial Crimes Task Forces

The Secret Service has established unique and vital partnerships with state, local, and other federal law enforcement agencies through years of collaboration on Secret Service investigative and protective endeavors. These partnerships enabled the Secret Service to establish a national network of Financial Crimes Task Forces (FCTFs) to combine the resources of the private sector and other law enforcement agencies in an organized effort to combat threats to our financial payment systems and critical infrastructures. In FY 2013, the Secret Service established three additional FCTFs: Richmond, Virginia; Salt Lake City, Utah and Tucson, Arizona, bringing the total number to 45 FCTF's located across the country. FCTFs often operate in conjunction with Secret Service Electronic Crimes Task Forces and are frequently co-located and managed to leverage the overall expertise and experience of the membership of both task forces.

Criminal groups involved in financial crimes routinely operate outside traditional jurisdictional boundaries. By working closely with other federal, state, and local law enforcement representatives, as well as foreign law enforcement facilitated through the Secret Service's foreign field offices, the Secret Service is able to provide a comprehensive network of information sharing, resource sharing, and technical expertise that bridges jurisdictional boundaries.

Mortgage Fraud Investigations

The Fraud Enforcement and Recovery Act (FERA) of 2009 (P.L. 111-21) enhanced and strengthened the federal government's ability to investigate and prosecute mortgage and corporate fraud, including the Secret Service's role in the investigation of these crimes within federal assistance programs and financial institutions. FERA also authorized additional funding for the Secret Service for investigations involving federal assistance programs and financial institutions. The Secret Service currently participates in 33 mortgage fraud task forces around the country.

The following chart provides data regarding Secret Service investigations and the subsequent potential and actual loss to the American public:

Mortgage Fraud Cases and Arrests

FY	Cases Closed	Actual Loss	Potential Loss	Federal Arrests	State Arrests	Foreign Arrests	Total Arrests
FY2013	206	\$749,203,650	\$1,177,195,102	174	34	10	218

* Data reflect entries in Master Central Index as of 3 December 2013.

** Data do not include In-Custody Responses, headquarters (except Criminal Investigations Division) or administratively closed cases.

Identity Crimes through Tax Refund Fraud

The Secret Service identified a significant increase in federal income tax refund fraud schemes involving identity theft occurring across the country, particularly in the southeastern part of the United States. These schemes involve organized operations using another person's identifying information stolen from various locations, to include recent death notices found on internet sites, to submit large numbers of fraudulent federal tax refund applications.

In many instances, these crimes not only defraud the federal government, they also victimize innocent taxpayers by impeding their ability to get a legitimate refund from the government. Fraudulent filings may also cause the government to initiate an adverse enforcement action against the innocent taxpayer.

These organized schemes generally involve criminals purchasing a debit card to facilitate the Internal Revenue Service issuance of the refund to that card. However, the traditional acceptance of an actual Treasury check still occurs. The Secret Service knows tax refund fraud has been around for decades, but due to the use of online tax preparation, the subsequent anonymity of the process, and the option of having a refund issued on a debit card, it is exponentially easier for criminals to accomplish this type of fraud. During the course of one case in central Florida, a joint investigation involving federal, state, and local law enforcement partners revealed a tax refund scheme involving over \$928 million in fraud loss to the U.S. Department of Treasury.

Support of the Protective Mission

In today's threat environment, Secret Service employees are challenged more than ever before. The Secret Service is committed to using its resources to provide the most effective protection possible and, in doing so, seeks to integrate technology and highly trained personnel within its protective mission.

By design, special agents are assigned to field offices to conduct criminal investigations and provide manpower, on a temporary basis, to fulfill the Secret Service's mission of protecting the President, Vice-President, visiting heads of state and government and former President's. Special agents

assigned to field offices provide a “surge capacity” of protective staffing, without which the Secret Service could not accomplish its protective mandate in a cost-effective manner. Secret Service Field Offices have long standing and established relationships with the local, state and Federal law enforcement agencies in their district and play a critical role in protective advances. Field offices facilitate the advance work done prior to the visit of any Secret Service protectee and provide the staffing to secure each protected site. In FY 2013, Secret Service field offices facilitated over 6,000 domestic protective visits, over 90 visits to U.S. territories and over 350 foreign visits by Secret Service protectees.

Summary

The budget is strategically aligned with the goals and objectives set forth in the Department of Homeland Security’s (DHS) 2014 Quadrennial Homeland Security Review (QHSR), with funding specifically targeted to preventing terrorism and enhancing security; protecting critical infrastructure; protecting government leaders, facilities, and special events; safeguarding and securing cyber space; and preventing cyber crime and other malicious uses of cyber space.

The above requested amount provides funding for Secret Service domestic field operations in a strategic context specifically aligned with the missions and goals set forth by the 2014 DHS QHSR Mission 1: Preventing Terrorism and Enhancing Security, Mission 4: Safeguarding and Securing Cyber Space, Objective 1.3.2 Protect Critical Infrastructure, Objective 4.1.3, Prevent Cyber Crime and Other Malicious Uses of Cyber Space; and Mission 6: Maturing and Strengthening the Homeland Security Enterprise.

Funding this activity supports the accomplishment of the following Secret Service strategic and management performance measures:

- Percent of currency identified as counterfeit
- Financial crimes loss prevented through a criminal investigation (in billions) (non-Cyber)
- Amount of dollar loss prevented by Secret Service cyber investigations (in millions)
- Number of financial accounts recovered (in millions)
- Terabytes of data forensically analyzed and protected from future malicious use
- Number of law enforcement individuals trained in cyber crime and cyber forensics both domestically and overseas
- Number of hours of training provided to law enforcement individuals in cyber crime and cyber forensics both domestically and overseas

The United States Secret Service requests 65 positions, 65 FTE and \$34.4 million in FY 2015 for the International field office administration and operations PPA.

Adjustments to base:

- Increase of \$166 thousand for the 2015 pay raise
- Increase of \$37 thousand to annualize the 2014 pay raise
- Increase of \$52 thousand for retirement contributions
- Increase of \$1.9 million for overseas building operations
- Increase of \$1.4 million for Mission Support Restoration

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secret Service operates 24 international offices in support of both the protective and investigative missions. The effective relationship that the Secret Service has developed with our international partners is attributed to our long-standing commitment to work with the host nation in a cooperative environment both during a protective visit in their country and over the course of an investigative case. This environment fosters relationships built on trust and mutual respect, and results in the sharing of information and best practices.

In support of the Secret Service's protection mission, the agency's international offices conducted nearly 300 protective security advances to numerous countries visited by Secret Service protectees in FY 2013. Special agents assigned to these offices orchestrate the visits of the President, Vice President, Former Presidents and other protectees on overseas travel. This involves collaboration between respective U.S. embassies, Regional Security Officers, and various foreign national entities. The entire security plan is facilitated through the partnerships that are developed between Secret Service international offices and the host government. The

success of the Secret Service's protective mission is enhanced by the strategic placement of international offices throughout the world.

Summary of Protective Foreign Travel Stops by Protectee (FY 2009-2013)

Protectee	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	Total
President	31	14	18	9	22	94

Total¹	226	310	237	186	227	1,186

*Formers include Presidents, Vice Presidents, First and Second Lady

In FY 2013, Secret Service international offices assisted their law enforcement counterparts in securing the arrest of more than 1,065 criminal suspects implicated in counterfeiting, financial crimes, and cyber crime cases, including the seizure of over \$64.1 million in counterfeit U.S. currency, preventing its introduction into worldwide circulation; and providing assistance in financial crime investigations that identified approximately \$167 million in actual loss.

Number and Type of International Arrests

Fiscal Year	Counterfeit	Cyber	Financial Crime	Other	Total
FY 2011	383	306	366	1	1063
FY 2012	377	452	273	9	1151
FY 2013	325	353	385	2	1065

* Data reflects entries in Master Central Index (MCI) as of 11/04/2013; dates reflect the established date of the record.

** "Other" reflects subjects tried for violations outside of the Secret Service core mandate.

Cyber Crime Investigations

Advances in computer technology and greater access to personally identifiable information (PII) via the Internet have created a virtual marketplace for transnational cyber criminals to share stolen information and criminal methodologies. As a result, the Secret Service has observed a marked increase in the quality, quantity, and complexity of cyber crimes targeting private industry and critical infrastructure. These crimes include network intrusions, hacking attacks, malicious software, and account takeovers leading to significant data breaches affecting every sector of the world economy.

Through its international offices, the Secret Service continues to enhance national security through multi-lateral investigations that mitigate and prevent the damages inflicted by cyber criminals on our nation's financial institutions. Currently, Secret Service personnel assigned in Europe participate in three Cyber Crime Working Groups (the Baltics, The Netherlands, and Ukraine), two Electronic Crimes Task Forces (ECTFs) (London, England and Rome, Italy), and the European Commission on Cyber Crime (EC3), located in The Hague. These groups serve as partners in the

international law enforcement community to exchange criminal intelligence regarding organized criminal groups targeting the American public, private entities, or financial infrastructure.

As part of the Secret Service's international ECTF program, the Secret Service partnered with law enforcement representatives from other countries to identify areas of mutual investigative interests to combat cyber crime targeting the interconnected financial systems. For example, Dmitriy Smilianets and Vladimir Drinkman were arrested in June 2012 as part of a multi-year investigation Secret Service investigation while they were traveling in the Netherlands thanks to the assistance of Dutch law enforcement. The alleged total fraud loss from their cyber crimes exceeds \$105 million. These international Secret Service activities have ensured that criminal organizations engaged in sophisticated and complex cyber crime are investigated and disrupted, and their leaders arrested, indicted, and prosecuted.

Counterfeit Investigations

The Secret Service remains committed to suppressing the counterfeiting of U.S. currency around the world. The threat of counterfeit currency to the financial system of the United States from criminal groups abroad has grown over recent years. Advances in technology, as well as "Official Dollarization," or the adoption of the U.S. dollar by a country as its legal tender, have intensified the threat. There are currently 15 dollarized countries and six countries which operate semi-official dollarized economies. In these countries, the U.S. dollar is legal tender and is preferred to the domestic currency for paying wages, taxes, and everyday expenses. In response to the threat, the Secret Service has focused on strategic international investigations targeting counterfeiters and their distribution networks.

A three-pronged approach must be taken to combat currency counterfeiting:

- 1) continual currency design enhancements;
- 2) strong law enforcement efforts; and
- 3) public education.

The new security features of the redesigned currency have not reached their full effectiveness. Working with the imaging industry, the U.S. government has incorporated features that should make the production of counterfeit currency more difficult. As the new imaging technology saturates the market, a greater level of protection will be achieved with a reduction in the overall level of digital counterfeit production.

Counterfeiting is a global issue. In FY 2013, over \$156.9 million in counterfeit U.S. currency was passed and seized both foreign and domestically; however, *less than 1/100th of 1 percent* of the value of all U.S. currency in circulation is reported as counterfeit. The \$100 note is the most widely-circulated and most often counterfeited denomination outside the United States. Since 1996, every denomination of U.S. currency, except the \$1 and \$2 Federal Reserve Notes (FRN), has been redesigned and enhanced with security features to help combat counterfeiting.

The worldwide release of the redesigned \$100 (FRN) on October 8, 2013 was the last note to be changed and incorporates some unique security features including a 3-D security ribbon, the color shifting bell in the inkwell, and enhanced intaglio printing.

The Federal Reserve Bank estimates that approximately \$1.19 trillion in genuine U.S. currency is in circulation worldwide. Counterfeiting undermines the integrity of a nation's currency and can have long-lasting economic ramifications. The counterfeiting of the U.S. dollar is a global problem due to the widespread use of U.S. currency.

The extent of unofficially dollarized countries is difficult to measure. Unofficially dollarized refers to countries in which citizens hold a great deal of their monetary assets in U.S. dollars, even though it is not of legal tender. It is estimated that there are approximately 17 countries (Angola, Argentina, Azerbaijan, Bolivia, Costa Rica, Honduras, Jamaica, Kazakhstan, Mexico, Nigeria, the Philippines, Peru, Russia, Turkey, Ukraine, Vietnam, and Zimbabwe) that fall into this category. In response to the threat, the Secret Service has focused on strategic international investigations targeting counterfeiters and their distribution networks.

Project South America is the combined oversight of Secret Service-vetted, anti-counterfeit efforts in both Colombia and Peru. The specific goal of Project South America is to continue to provide the necessary training, strategic development, and infrastructure improvement to our foreign law enforcement partners to reduce the production, sale, and distribution of counterfeit U.S. currency within Colombia and Peru and to other countries. Since 1986, the Secret Service has recovered over \$720 million in South American-produced counterfeit.

As technology advances it usually becomes better, cheaper and more accessible to the general population. While the advancement of technology is usually deemed a good thing, a small group will exploit the technology. The advancement of computers, computer software, and printers has made it easy for anyone to produce counterfeit currency.

Since its inception as Project Colombia in May 2001, law enforcement has made 847 arrests in Colombia, conducted 130 plant suppressions, and seized approximately \$345 million of counterfeit notes in Colombia, resulting in a 95 percent reduction in Colombian counterfeit currency passed in the United States. In FY 2013, Project Colombia partners seized approximately \$27.9 million in counterfeit U.S. currency, arrested 32 suspects, and suppressed one counterfeit printing plant.

With the success of the Secret Service anti-counterfeiting enforcement in Colombia, counterfeiters and international organized crime began moving their operations to Peru. The Peruvian note family has expanded dramatically with a total recorded activity reaching nearly over \$23 million in FY 2012 and more than \$33 million in FY 2013 (worldwide). Since 2003, the Secret Service has tracked more than \$164.8 million in Peruvian-produced counterfeit. In response, the Secret Service formed the Peruvian Counterfeit Task Force (PCTF), a collaborative effort between the Secret Service and Peruvian law enforcement. Since its inception in Lima, Peru on March 15, 2009, the Peruvian Counterfeit Task Force (PCTF) has yielded 123 arrests, 15 counterfeit plant suppressions, and the seizure of more than \$58.7 million in counterfeit United States currency. In July 2012, the Secret Service opened the Lima, Peru Resident Office (RO). In FY 2013, the Lima RO, in conjunction with PCTF, successfully seized approximately \$16.4 million in counterfeit U.S. currency, assisted with the arrests of 19 Peruvian nationals, and suppressed three significant counterfeit plant operations.

Personnel Recovery and Other Training

The Secret Service maintains a relationship with the International Law Enforcement Academies (ILEAs), with locations in Budapest, Hungary; Bangkok, Thailand; San Salvador, El Salvador; Gaborone, Botswana; and a Regional Training Center in Lima, Peru. The Secret Service works

with ILEAs to provide a critical opportunity to forge new relationships with international law enforcement partners and to share expertise in areas of protection, and criminal investigations in counterfeit currency, credit card fraud, and cyber crimes.

Prior to placing special agents in a Secret Service international offices, the Secret Service trains agents on the risks associated with the environment they are entering. This specialized training is primarily conducted through the Drug Enforcement Administration's (DEA) Personnel Recovery Program, where 22 employees have received training since 2010. The course is for special agents and supervisors who are either assigned to international or domestic offices with foreign countries under their jurisdiction. The training prepares them for any security incident, including kidnappings, terrorist attacks, natural disasters, or aircraft or motor vehicle accident, either with or without a protectee.

Summary

The requested funding supports Secret Service international field operations in a strategic context specifically aligned with the missions and goals set forth by the 2014 DHS QHSR Mission 1: Preventing Terrorism and Enhancing Security, Objective 1.3.2 Protect Critical Infrastructure; Mission 4: Safeguarding and Securing Cyber Space, Objective 4.1.3, Prevent Cyber Crime and other Malicious Uses of Cyber space; and Mission 6: Maturing and Strengthening the Homeland Security Enterprise.

Funding this activity supports the accomplishment of the following Secret Service strategic performance measures:

- Percent of currency identified as counterfeit
- Financial crimes loss prevented through a criminal investigation (in billions, non-cyber)
- Amount of dollar loss prevented by Secret Service cyber investigations (in millions)
- Number of financial accounts recovered (in millions)
- Terabytes of data forensically analyzed and protected from future malicious use
- Number of law enforcement individuals trained in cyber crime and cyber forensics, both domestically and overseas
- Number of hours of training provided to law enforcement individuals in cyber crime and cyber forensics both domestically and overseas

The United States Secret Service requests no funding in FY 2015 for the Support for Missing and Exploited Children PPA.

CURRENT SERVICES PROGRAM DESCRIPTION:

The funding request for forensic support and grant to missing and exploited children is being consolidated within the Department of Justice's Office of Justice Programs to better focus critical resources on Secret Service core mission programs. Grant funding support for National Center for Missing and Exploited Children (NCMEC) will continue within the Department of Justice's Office of Justice Programs.

In FY 2013, the Secret Service made 192 arrests and conducted 414 polygraph exams related to missing and exploited child cases. Additionally in support of the missing and exploited children program, the Secret Service conducted 209 computer exams related to missing and exploited child cases, held 38 "Operation Safe Kids" events, and fingerprinted over 1,500 children.

The Secret Service will reallocate funding to continue forensic and investigative support for missing and exploited children cases within the Service's Domestic Field Operations PPA.

The United States Secret Service requests 391 positions, 391 FTEs and \$189.2 million in FY 2015 for the Headquarters, management and administration PPA.

Adjustments to base:

- Increase of \$811 thousand for the 2015 pay raise
- Increase of \$178 thousand to annualize 2014 pay raise
- Increase of \$185 thousand for the Working Capital Fund (WCF)
- Increase of \$253 thousand for retirement contributions
- Increase of \$1.0 million for Mission Support Restoration
- Decrease of \$2.2 million for telecommunications contract efficiencies

CURRENT SERVICES PROGRAM DESCRIPTION:

This program develops and administers Secret Service-wide policies, plans, and procedures in budget, finance, accounting, financial systems, statements, relocation and travel services, acquisition and contracting, human capital, and workforce planning. This program also provides management and program analysis support to all operational and administrative programs, manages the strategic planning process, ensures that Secret Service offices and programs comply with policies and regulations while operational mission areas continue to function efficiently and effectively; provides information technology governance, investment planning and strategy, legal advice and counsel, and manages government and public affairs. These functions assist the Service's leadership in formulating the strategic vision and direction.

The **Office of the Director** leads roughly 6,500 employees in the mission of the Secret Service, safeguarding the nation's financial infrastructure and payment systems to preserve the integrity of the economy, and to protect national leaders, visiting heads of state and government, designated sites, and National Special Security Events.

Attorneys within the **Office of Chief Counsel** answer questions regarding Secret Service criminal investigations, handle Federal Tort Claims Act and other administrative claims, and provide advice on ethics, Freedom of Information Act / Privacy Act matters, adverse actions, security clearance determinations, asset forfeiture, garnishments, appropriations, procurement, legislation, and policy matters.

The **Office of Government and Public Affairs** is comprised of four divisions that interface with the Liaison Division, the Congressional Affairs Program, the Public Affairs Program, and the Homeland Security Program.

The **Office of Professional Responsibility** ensures that Secret Service offices and programs comply with Secret Service policies and federal regulations, and helps operational mission areas continue to function efficiently and effectively.

Through sound management practices, the **Human Capital Division** recruits, develops, and retains a diverse and well-qualified workforce necessary for meeting the challenges of the 21st century.

The **Office of the Chief Information Officer** plays a critical leadership role in driving reforms to control Information Technology (IT) system development risks and ensure positive mission outcomes, best manage technology strategy, investment planning and spending, and succeed in achieving measurable outcomes in agency performance.

The **Office of the Chief Financial Officer** creates an environment in which the Secret Service leadership has financial information to make and implement sound programmatic decisions in support of the agency's protective and investigative responsibilities. Additionally, OCFO provides budgeting, financial statement preparation, and automated financial information to all internal and external stakeholders.

The Secret Service **Acquisition and Contracting** staff oversee non-major and major acquisition and investment governance, establishment of acquisition policies, and an acquisition professional training and certification processes.

The **Administrative Operations Division** plans, develops, and administers policies and procedures related to facility and property management, and performs associated activities for a variety of real and personal property management areas to support Secret Service Headquarters, domestic, and international field offices.

The **Program Management** activity supports the accomplishment of Secret Service core missions through analysis, consultation, and decision support. Using performance data and statistical systems, this activity analyzes and reports on data from twelve databases to inform organizational change and inform decision making.

PROCUREMENT ACTIVITIES:

Information Technology Infrastructure Program

Information Technology (IT) infrastructure is the information and communication backbone of the Secret Service. IT provides the foundation for all mission-critical IT-related systems, supports secure sharing of information within the Secret Service, and provides direct access to law enforcement, Department of Defense, and other government agencies. This investment covers the Operations & Maintenance support of the IT Infrastructure, ensuring that it is constantly available to support Secret Service protective and investigative missions and operations. The Secret Service IT Infrastructure provides critical operations and maintenance support to maintain the status quo while Secret Service modernizes the IT Infrastructure under Information Integration and Technology Transformation (IITT). See the Comprehensive Acquisition Status Report (CASR) for a full description.

Enterprise Financial Management System

The Enterprise Financial Management System (TOPS) is in steady state operation and supports the DHS goal of improving financial management and enables the mission of preventing terrorism and enhancing security. TOPS meets the requirements of OMB Circular A-123, Management's Responsibility for Internal Control; Appendix A Internal Control over Financial Reporting and OMB Circular A-127 Financial Management Systems. TOPS is a comprehensive, integrated financial system

that is required to meet critical operational and reporting requirements of the Secret Service and DHS. TOPS has been designated a center of excellence within DHS and supports closure of a DHS gap for improving financial performance. Stakeholders benefit from the integrated financial systems ability to automate and streamline business processes enabling managers to plan and execute core mission activities. Based upon the DHS designation and an operational analysis, the system is meeting or exceeding expectations.

- Increase of \$152 thousand for retirement contributions

CURRENT SERVICES PROGRAM DESCRIPTION:

The James J. Rowley Training Center (RTC) serves as the primary training academy for the Secret Service. RTC is a federally-accredited academic institution, meeting the standards established by the Federal Law Enforcement Training Accreditation (FLETA) Board. The Instructional Development Program, Special Agent Basic Training Course, Uniformed Division Officer Basic Training Course, and Firearms Instructor Training Course are also fully accredited by FLETA. The academy meets reaccreditation standards.

The curriculum provided by RTC instructors is for newly hired special agents, Uniformed Division officers, special officers and physical security specialists. Training includes investigative and protective methodologies, firearms marksmanship, control tactics, emergency vehicle operation, emergency medicine, physical fitness techniques, financial and cyber crime detection and investigation, physical/site/event protection, and water survival training.

As Secret Service employees progress through their career, RTC provides specialized/advanced training for continuing education to meet the emerging needs of the agency as it relates to the protective and investigative missions (e.g., financial crimes, protective intelligence, etc.). This “in-service” curriculum consists of comprehensive training in specialized operational and protective tactics, financial crime, cyber-based investigations, and employee and managerial development.

From FY 2008 to FY 2013, RTC personnel conducted 2,436 specialized skills courses, totaling 76,749 students. Also during this period, RTC conducted 30 Special Agent Training basic classes totaling 679 Special Agents trainees and 37 Uniformed Division basic classes totaling 638 Officer trainees.

Below is a breakout of the number of Special Agent and Uniformed Division classes and trainees per year.

Basic Class Totals from 2008 to 2013				
Fiscal Year	Special Agent Basic Classes	Total Special Agent Trainees	Uniformed Division Basic Classes	Total Uniformed Division Trainees
2008	8	177	7	113
2009	8	185	11	168
2010	8	176	11	181
2011	5	117	6	130
2012	0	0	1	23
2013	1	24	1	23
TOTALS	30	679	37	638

In FY 2013, the RTC conducted 409 specialized/in-service training courses totaling 12,662 personnel and trained in excess of 1,698 inter and intra-agency and international law enforcement counterparts as a means of enhancing and improving Secret Service partnerships. In addition, RTC completed the below canine explosive detection courses:

- Explosive Detection Training (EDT): Conducted 3 EDT classes each 24 weeks long
- Personnel Screening by Canine / Homicide Bomber Detection (PSC / HBD): Conducted 2 PSC/HBD classes each 2 weeks long
- Explosive Detection Training Revalidation Training: Conducted weekly

- Personnel Screening by Canine / Homicide Bomber Detection Revalidation Training: Conducted 30 classes
- Emergency Response Training: Conducted 15 classes

Also in FY 2013, RTC achieved 12,108 employee weapon re-qualifications. To support the diverse training needs of the Secret Service, RTC delivered online training courses to employees across the globe with 104,244 completed in FY 2013.

Summary

This program is aligned with the Secret Service missions and goals set forth by the 2010 DHS QHSR. Funding for this activity supports the accomplishment associated with the full range of Secret Service strategic and management performance measures.

Department of Homeland Security

(Dollars in Thousands)

PPA: Information Integration & Technology Transformation

	Perm. Pos	FTE	Amount
2013 Revised Enacted	10	10	1,072
2014 Enacted	10	10	1,019
2015 Adjustments-to-Base	-	-	17
2015 Current Services	10	10	1,036
2015 Total Request	10	10	1,036
Total Change 2014 to 2015	-	-	17

The United States Secret Service requests 10 positions, 10 FTE and \$1.0 million in FY 2015 for the Information Integration and Technology Transformation (IITT) PPA.

Adjustments to base:

- Increase of \$11 thousand for the 2015 pay raise
- Increase of \$2 thousand to annualize the 2014 pay raise
- Increase of \$4 thousand for retirement contributions

CURRENT SERVICES PROGRAM DESCRIPTION:

The Secret Service's IITT program was initiated to modernize its enterprise-wide IT environment focusing on four capability areas:

- Enabling (e.g., infrastructure, architecture)
- Communications (e.g., WHCA Interoperability, worldwide tactical communications, classified messaging)
- Control (e.g., Security)
- Mission Support (applications supporting mission operations).

Requested funding supports the positions hired for IITT that cover the core staff responsible for the management of the Information Integration and Technology Transformation (IITT) program, with a special emphasis on managing the Information Technology (IT) Infrastructure Modernization, Database Architecture, Cyber Security, and Information Assurance projects (Enabling Capabilities). IITT program management activities require permanent personnel resources to:

- Deliver improved IT and communications capabilities to Secret Service field offices, special agents, and Uniformed Division officers in direct support of the dual mission;
- Oversee the design and implementation of the Secret Service's modernized network architecture;
- Conduct technical reviews on requirements, design, test, and production readiness for emerging IITT projects;
- Prepare acquisition documentation required by the Office of Management and Budget and the Department of Homeland Security (DHS) management directives;
- Conduct Risk Working Group meetings to analyze, control and manage program risk information and mitigate impacts to cost, schedule and performance;
- Achieve planned Acquisition Decision Events critical to program success;
- Conduct Executive Steering Group meetings between DHS leadership and the Secret Service's Component Acquisition Executive and Chief Information Officer;
- Complete Program or Project Management Reviews with DHS and Secret Service leadership;
- Prepare procurement documents for required software, hardware, IT licenses, and IT services.

Due to the sensitivity of the information exchanged on Secret Service IT systems, the management of the IITT program, as well as day-to-day IT infrastructure support of the protection and investigative missions must be performed by Secret Service personnel. Ensuring success requires a core program staff with experience in implementing acquisition policies and procedures directed by DHS in Management Directive 102-01, which establishes consolidated acquisition management policy and standards and practices across all DHS components and offices. These resources are essential to comply with DHS Acquisition Policy, Federal Acquisition Regulations, and Congressional mandates, such as the Clinger-Cohen Act, concerning the development and acquisition of IT systems. This funding specifically enables the Secret Service to provide essential information technology.

Summary

This program is aligned with the Secret Service missions and goals set forth by the 2014 DHS QHSR. Funding for this activity supports the accomplishment associated with the full range of Secret Service strategic and management performance measures..

IV. Program Justification Changes

**Department of Homeland Security
U.S. Secret Service
Operating Expenses
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: 2016 Presidential Campaign
PPA: Presidential candidate nominee protection
Program Increase: Positions 0, FTE 0, Dollars \$21,500

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							30	30	4,000
Program Increase							-	-	21,500
Total Request	-	-	-	-	-	-	30	30	25,500

Description of Item

Funding is requested for the start-up costs of the 2016 Presidential Campaign. During FY 2015, the Secret Service will provide specialized training for its workforce and will procure screening and detection equipment, armored vehicles, and supplies to support the increase in protective mission requirements. Sufficient lead time is critical to properly conduct service-wide training, acquire specialized protective equipment, and pre-position these assets at Secret Service field offices.

Justification

The Secret Service is mandated by law (Title 18 U.S.C. § 3056) to provide protection and security for “major presidential and vice presidential candidates, and their spouses. During presidential campaigns, the Secret Service experiences a significant increase in its protective workload as it provides protection for the designated candidates/nominees, in addition to its other protective responsibilities.

During FY 2015, Secret Service personnel will need to travel to Washington, D.C. and other regional locations to receive specialized protective training. The Secret Service plans to train other Department of Homeland Security agents/officers to assist with campaign protection requirements.

In order to ensure the integrity of protective sites during the presidential campaign, unique protective identification/credentials are required. Specialized credentialing equipment and supplies will be purchased to produce secure photograph identification/credentials for distribution as needed.

Vehicles will be purchased for use as protective limousine and follow-up security vehicles for protective details. Each vehicle requires communications equipment, emergency lights, and other protective equipment. The vehicles will be strategically positioned at Secret Service field offices throughout the country in preparation for use by candidate/nominee details.

State-of-the-art screening and detection systems, magnetometers and x-ray systems, medical and rescue equipment, and other protective supplies are required to support the increase in mission requirements. This specialized equipment is critical to the overall success of campaign protective operations.

The Secret Service does not have base funding to cover the costs associated with the increase in protective mission responsibilities associated with a Presidential campaign. As a result, funding is requested to address the identified requirements.

Impact on Performance (Relationship of Increase to Strategic Goals)

The quadrennial Presidential Campaign is one of the largest cost-drivers in the Secret Service mission due to the significant amount of equipment and labor required to provide necessary protection to all designated protectees. This work is in addition to the regular work of the agency and is performed by the same personnel in addition to their existing duties. Statute 18 USC §3056 specifies 180 days' worth of work for the Secret Service related to the campaign; however, the reality is significantly longer. Changes in the threat environment and candidates' campaigns have resulted in candidates receiving protection as early as 18 months before the General Election. As the length of the campaign grows over time, the Secret Service must begin preparations even earlier than before to ensure the success of the mission.

The Campaign appears to be a single-year event in the minds of the public, but it requires work across three fiscal years to execute.

During FY 2015, significant preparation must be completed. Specialized protective equipment cannot be purchased off the shelf and must be ordered far enough in advance that it can be manufactured, delivered, tested and prepositioned in time for campaign travel. In addition, thousands of agents and officers need to be trained and prepared to support campaign protection.

The bulk of the campaign takes place during FY 2016. Equipment is delivered, tested, modified, and prepositioned across the country. Training continues for hundreds of personnel. An unknown number of candidates and their families will be traveling extensively across all fifty states, often visiting more than one location each day. As a result, equipment and personnel is continually moved, "leapfrogging" from the previous stop to tomorrow's stop in order to secure each site before the protectees' arrival. The Democratic and Republican National Conventions (typically designated as NSSes) occur at the end of the fiscal year, resulting in an overlap with the preparations for the annual U.N. General Assembly.

FY 2017 begins with an unknown number of Presidential and Vice-Presidential debates) and six weeks of intensive campaign travel as the nominees prepare for Election Day. During the next 11 weeks, the President-Elect, Vice President-Elect, and their families receive enhanced protection during the transition period. Finally, on January 20, 2017, hundreds of additional personnel are required to secure the Inauguration of the newly elected President. This is the largest NSSE of the campaign, attracting a million or more spectators and numerous VIPs from across the country.

The number of candidates expected to run is anticipated to be higher than the 2012 campaign, since there will be no incumbent presidential candidate. The Presidential Protection Division (PPD) assets are dedicated to protecting the President. While an increase in presidential travel in support of the campaign is expected, PPD assets are not available to the other candidates. Therefore, additional equipment and FTE are required to support the travel anticipated by the candidates.

Additionally, the 22nd Amendment of the Constitution guarantees there will be a change of administrations in January 2017. This will unquestionably increase protection costs for the Secret Service compared to the 2012 campaign, as a new permanent protective detail is established, staffed, and equipped to continue protecting Former President Obama and his family when he leaves office.

Department of Homeland Security
U.S. Secret Service
Operating Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Former President Obama Protective Detail
PPA: Protection of persons and facilities
Program Increase: Positions 81, FTE 20, Dollars \$4,000

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							81	20	4,000
Total Request	-	-	-	-	-	-	81	20	4,000

Description of Item

By law, 18 USC 3056, the Secret Service is mandated to provide protection to all Former Presidents and their spouses for life. Consequently, the Secret Service is required to establish a permanent, post-presidency protective division for President Obama at the end of his term in office. The Obama Protective Division (OPD), must be fully staffed, trained, and positioned by January 20, 2017. The OPD will also be responsible for the protection of the former First Lady and at least one minor children.

To fully staff OPD, new agents must be recruited, undergo a lengthy application / background process, complete the required training at the Federal Law Enforcement Training Center (FLETC) and subsequent training at the James J. Rowley Training Center (JJRTC), and report to specific field offices where they will replace senior agents that will ultimately make up the OPD. To meet this timeline, the Secret Service must begin training these new agents in the fourth quarter of FY 2015.

Justification

The Obama Protective Division will require approximately Special Agent (SA) personnel to staff the permanent detail, conduct advances, coordinate security plans with counterparts, and provide other protective support. In addition, administrative, professional, and technical (APT) personnel will be required to provide residence security, as well as administrative and threat analysis support to the protective division. Funding under this request allows the Secret Service to initiate staffing of OPD in the fourth quarter of FY 2015 with approximately 81 Special Agents (SA). These individuals will be trained and deployed by the fourth quarter of FY 2016, which is the beginning of the high operational tempo associated with the nominating conventions and the final months of the 2016 Presidential

Campaign. The funding will only support the pay and benefits of these personnel but not their required equipment. The Service defers all equipment and remaining personnel costs to FY 2016.

Impact on Performance (Relationship to Strategic Goals)

This funding will directly support QHSR Mission Objective 1.3.4 “protect government leaders, facilities, and special events” and directly impact the performance measure *Percent total protection activities that are incident-free for protection of our national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities*. This funding will provide initial support for hiring special agents to backfill the establishment of the new protective detail for the Obama family after the President leaves office. Without this funding, these special agents will have to be reassigned from the domestic field offices.

U.S. Secret Service
Operating Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Increase 3: Presidential Primary Parade Limousine Program
PPA: Protection of persons and facilities
Program Increase: Positions 0, FTE 0, Dollars \$6,100

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	6,100
Total Request	-	-	-	-	-	-	-	-	6,100

Description of Item

The vehicle transporting the President of the United States essentially becomes the Oval Office when he is traveling beyond the perimeter of the White House Complex. The President's primary limousine is designed to mitigate terrorist's offensive capabilities. These limousines play an important role in the overall protection of the Service's protectees. Components and sub-systems of the primary limousines contain integrated techniques and specific modifications to the standard armored automotive technologies.

The Service has defined the required number of POTUS limousines as twelve (12), this allows for six (6) sets of limousines to be available for all POTUS trips. The limousines are deployed in tandem as a primary and spare limousine to ensure operational readiness and flexibility in positioning the President within the Service's motorcade. The first Presidential limousine of the current fleet (2006 styling/design) will soon be permanently out of service and will undergo testing and analysis. The limousines are transported via U.S Air Force cargo planes to all of their destinations, whether domestic or international. This process ensures the limousines are readily available for the President upon his arrival; however, these limousines are subjected to excessive stress due to their weight, the tie down process necessary to transport via cargo plane and the extreme pressures associated with lift off and landing in the cargo plane.

While the limousines are unique in design, their classified ballistic armor/glass, body armor components, communications systems and the mechanical features that comprise each of these vehicles are state-of-the-art when originally constructed, these systems quickly become outdated due to advances in technology and the rapidly evolving nature and types of threats that may be directed at the President.

Justification

The Service has identified the need to procure one (1) limousine in FY 2015 for a number of reasons. The most important being our ability to meet our protective requirement and replace Parade limousines which have reached and or exceeded their life cycle. These current Parade limousines are vital to our Protective mission as a bridge to the Next Generation Presidential Parade limousines program while it is still in the development stages. This program also provides the spare parts needed to keep all of the limousines running, to include parts for the earlier version limousines. These parts are manufactured on a need basis as they are one-of-a-kind parts. These specialized parts are not available from local automotive dealers and must be specially tooled and manufactured at GM/Triad. The purchase, delivery, and deployment of these specialized vehicles require a 12 month lead-time from a classified contracted facility.

Impact on Performance (Relationship of Increase to Strategic Goals)

Funding this purchase of the Parade Limousine will directly support QHSR Mission Objective 1.3.4 “protect government leaders, facilities, and special events” and directly impact the performance measure *Percent total protection activities that are incident-free for protection of our national leaders, foreign dignitaries, designated protectees and others during travel or at protected facilities*. This funding is critical for meeting current operational requirements. The latest iteration of the Parade Limousine provides the President with the safest and most secure mode of ground transportation currently available anywhere in the world, and plays a critical role in the overall protective methodology utilized by the Secret Service when the President travels.

This funding will allow the Secret Service to remove older Parade Limousines from service. A number of the previous iteration of Parade Limousines currently in use are past their recommended life cycle. Although these vehicles are meticulously maintained, they have exceeded the life cycle recommended by the manufacturer.

Department of Homeland Security
U.S. Secret Service
Operating Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 1: National Computer Forensics Institute (NCFI)
PPA: Domestic field operations
Program Decrease: Positions 0, FTE 0, Dollars \$(3,500)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	7,500
Program Decrease							-	-	(3,500)
Total Request	-	-	4,000	-	-	7,500	-	-	4,000

Description of Item

The National Computer Forensic Institute (NCFI) is the nation's only federally funded training center dedicated to instructing state and local officials in network intrusion response, digital evidence and cyber crime investigations. The NCFI was opened in 2008 with a mandate to provide state and local law enforcement, legal and judicial professionals, a comprehensive education on current cyber crime trends, investigative methods, and prosecutorial challenges.

Run by the United States Secret Service's Criminal Investigative Division, the training model is based upon the Secret Service's successful cyber investigative strategy, which relies on partnering with and sharing information between academia, private industry and law enforcement/legal communities to combat the ever evolving threat of cyber crime. By operating under an operational division rather than as a traditional training center, curriculum reflects current trends in the field and addresses potential technological obstacles as they are encountered in active investigations.

Justification

Impact on Performance (Relationship of Increase to Strategic Goals)

The Secret Service prevents, detects, and investigates cyber crime through a nationwide network of Electronic Crimes Task Forces (ECTFs). These task forces include not only partners from the private sector and academia, but also federal, state, and local law enforcement. Many of these partners were

trained at National Cyber Forensic Institute (NCFI) and their investigative efforts provide a force multiplier in accomplishing federal law enforcement's mission to suppress cyber crime.

Funding for this facility supports cyber forensics training to Secret Service law enforcement partners, as well as the successful accomplishment of QHSR Mission 4 (safeguarding and securing cyberspace) and the performance measures *Number of law enforcement individuals trained in cyber crime and cyber forensics both domestically and overseas* and *Terabytes of data forensically analyzed for criminal investigations*.

**Department of Homeland Security
U.S. Secret Service
Operating Expenses
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 2:

PPA:

Program Decrease:

Support for Missing and Exploited Children

Forensic support and grants to missing and exploited children

Positions (20), FTE (20), Dollars \$(8,366)

Funding Profile

	FY 2013 Revised Enacted			FY 2014 Enacted			FY 2015 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							20	20	8,366
Program Decrease							(20)	(20)	(8,366)
Total Request	20	20	7,917	20	20	8,366	-	-	-

Description of Item

A direct funding request, to include grant funds, specific to the Secret Services' activities in relation to the forensic support for missing and exploited children PPA is being reduced in order to direct resources to programs in immediate support of the Secret Service missions while maintaining forensic services support to investigations involving missing and exploited children.

Justification

In an effort to direct resources to the core mission responsibilities of the Secret Service, funding for this PPA has been eliminated.

The Secret Service will continue to provide forensic services support including polygraph examinations, latent finger print examinations, handwriting analysis comparisons, and video enhancements, based upon resource availability to federal, state, and local law enforcement agencies conducting investigations involving missing and exploited children.

Impact on Performance (Relationship of Decrease to Strategic Goals)

The Secret Service maintains its relationship with the National Center for Missing and Exploited Children despite the loss of funding. The Service provides a permanent liaison at the center, conducts public liaison through the Safe Kids Program (fingerprinting / photographing children for parental retention and rapid identification should a child become a victim) across the country, and provides forensic services in the form of polygraph examinations and electronic media forensic examinations in support of local, state, and federal investigations.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

**Department of Homeland Security
United States Secret Service
Justification of Proposed Changes in Operating Expenses
Appropriation Language**

Operating Expenses

For necessary expenses of the United States Secret Service, including purchase of not to exceed 652 vehicles for police-type use for replacement only; hire of passenger motor vehicles; purchase of motorcycles made in the United States; hire of aircraft; services of expert witnesses at such rates as may be determined by the Director of the United States Secret Service; rental of buildings in the District of Columbia, and fencing, lighting, guard booths, and other facilities on private or other property not in Government ownership or control, as may be necessary to perform protective functions; payment of per diem or subsistence allowances to employees in cases in which a protective assignment on the actual day or days of the visit of a protectee requires an employee to work 16 hours per day or to remain overnight at a post of duty; conduct of and participation in firearms matches; presentation of awards; travel of United States Secret Service employees on protective missions without regard to the limitations on such expenditures in this or any other Act if approval is obtained in advance from the Committees on Appropriations of the Senate and the House of Representatives; research and development; grants to conduct behavioral research in support of protective research and operations; and payment in advance for commercial accommodations as may be necessary to perform protective functions; [\$1,533,497,000] *\$1,585,970,000*; of which not to exceed \$19,125 shall be for official reception and representation expenses; *and* of which not to exceed \$100,000 shall be to provide technical assistance and equipment to foreign law enforcement organizations in counterfeit investigations; [of which \$2,366,000 shall be for forensic and related support of investigations of missing and exploited children; of which \$6,000,000 shall be for a grant for activities related to investigations of missing and exploited children and shall remain available until September 30, 2015; and of which not less than \$7,500,000 shall be for activities related to training in electronic crimes investigations and forensics]: *Provided*, That \$18,000,000 for protective travel shall remain available until September 30, [2015] *2016: Provided further*, That \$4,500,000 for National Special Security Events shall remain available until [September 30, 2015] *expended: Provided further*, That the United States Secret Service is authorized to obligate funds in anticipation of reimbursements from Federal agencies and entities as defined in section 105 of title 5, United States Code, for personnel receiving training sponsored by the James J. Rowley Training Center, except that total obligations at the end of the fiscal year shall not exceed total budgetary resources available under this heading at the end of the fiscal year: *Provided further*, That none of the funds made available under this heading shall be available to compensate any employee for overtime in an annual amount in excess of \$35,000, except that the Secretary of Homeland Security, or the designee of the Secretary, may waive that amount as necessary for national security purposes: *Provided further*, That none of the funds made available to the United States Secret Service by this Act or by previous appropriations Acts may be made available for the protection of the head of a Federal agency other than the Secretary of Homeland Security:

Provided further , That the Director of the United States Secret Service may enter into an agreement to provide such protection on a fully reimbursable basis: *Provided further* , That none of the funds made available to the United States Secret Service by this Act or by previous appropriations Acts may be obligated for the purpose of opening a new permanent domestic or overseas office or location unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such obligation: *Provided further*, That for purposes of section 503(b) of this Act, \$15,000,000 or 10 percent, whichever is less, may be transferred between "Protection of Persons and Facilities" and "Domestic Field Operations". (Department of Homeland Security Appropriations Act, 2014.)

Explanation of Changes

Language Provision	Explanation
...\$1,585,970,000 [\$1,533,497,000]...	Dollar change only. No substantial change proposed.
[of which \$2,366,000 shall be for forensic and related support of investigations of missing and exploited children; of which \$6,000,000 shall be for a grant for activities related to investigations of missing and exploited children and shall remain available until September 30, 2015; and of which not less than \$7,500,000 shall be for activities related to training in electronic crimes investigations and forensics]	In an effort to direct resources to the principle priorities of the Secret Service, funding for this PPA has been eliminated. Funding for training in electronic crimes investigations and forensics is now included in the Secret Service base program and no longer needs to be included in appropriation language.
...2016 [2015]	Date change only. No substantial change proposed.
...expended [September 30, 2015]	To support Secret Service responsibilities associated with these events, the 2015 Budget specifically requests no-year funding for NSSEs to establish a base level of funding for unanticipated events. These events are unpredictable, and limiting availability of funding will require the Service to either lapse or reprogram funds intended for other programs, in order to address an event designated as an NSSE outside of the normal budgetary cycle.

Authorization Cites

The Secret Service has two authorizing statutes: 18 U.S.C. § 3056 (Powers, authorities, and duties of United States Secret Service) and 18 U.S.C. § 3056A (Powers, authorities, and duties of United States Secret Service Uniformed Division). Additional investigative authorities are found in 18 U.S.C. § 1029 (Fraud and related activity in connection with access devices) and 18 U.S.C. § 1030 (Fraud and related activity in connection with computers).
