ATS is a web-based enforcement and decision support tool that incorporates intelligence information and technologies to target specific inbound and outbound shipments for examinations and passengers for additional inspection, and is the cornerstone for all targeting efforts. Risk assessment strategies are multi-tiered in approach and founded upon complex statistical studies, data analysis, and rules based on knowledge engineering. As data on people, cargo, and conveyances increases, officers require more efficient access to relevant real-time information upon which to base critical admission decisions.

ATS is used to analyze approximately 17 million passenger transactions per day. Air, ocean, truck, and rail cargo screeners analyze over 13 million shipments per month. Through ATS, CBPOs and border enforcement personnel are able to effectively and efficiently identify cargo, individuals, and conveyances that may present additional risk to the United States, conduct terrorism analysis and global assessments that convey changes in terrorism threats and identify emerging threats, develop and evaluate CBP-wide intelligence based targeting rules and intelligence driven special operations, and coordinate and enhance analysis and targeting efforts.

Enterprise Reporting System (ERS) and Data Warehouse (DW)

The ERS and DW refer to the hardware and software that enable access to data in response to many service requests. These systems require data scientists and query specialists to support CBP data needs. Most notably for CBP, data requests include access to large sets of data for intelligence analysis. Additional funds will permit improved service levels in response to a variety of requests, including impact assessment (rules evaluation), queries (SQL and custom data pulls), and dashboards (interactive reports for select subject areas). Two initiatives in particular will enhance service support to CBP. First is the hiring of additional query specialists who have the skills necessary to respond to urgent, complex requests that cannot be answered through normal reporting interfaces. Second is a shift of computing burden away from traditional transactional databases and onto emerging big data platforms. This will permit the ERS and DW to support a growing demand in the number of users, quantity of requests, and complexity of queries.

Impact on Performance (Relationship of Increase to Strategic Goals)

Additional funding will enable ATS to avoid a degradation of older critical infrastructure that currently supports ATS applications. Additional funding will prevent a reduction of bandwidth and storage capability which would result in sub-optimal performance for officers and analysts in the field who rely on critical, real-time processing of information. Specifically, the additional funding will prevent slower response times, a reduction of real-time targeting effectiveness, and a degradation of essential intelligence information that would likely occur to availability for real-time queries on air, ocean, truck, and rail cargo as well as passengers across all modes of travel.

If ERS and DW are provided additional funds, planned work can continue unhindered, including:

- Big data hardware and software research, configuration, testing, and optimization. These capabilities include efforts to:
 - Search massive data stores rapidly without degrading trade and travel transactions;
 - Analyze massive data stores and develop enhanced predictive models that identify threats; and
 - Query and extract information as requested by intelligence analysts
- Hiring of data scientists and query specialists who:
 - Write and run customized queries to provide detailed answers to complex queries on an urgent basis;
 - Run impact assessments on rules over massive historical data stores; and
 - Profile data and find non-obvious entity relationships useful for identifying and disrupting criminal networks.

(Dollars in Thousands)

Program Increase 3: High Risk Internal Cybersecurity Remediation
PPA: Critical Operations Protection and Processing Support
Program Increase: Positions 0, FTE 0, Dollars \$9,000

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$2,560
Program Increase							0	0	\$9,000
Total Request	0	0	\$2,560	0	0	\$2,560	0	0	\$11,560

Description of Item:

CBP requests an increase of \$9 million to implement High Risk Internal Cybersecurity remediation actions of CBPs information technology systems in accordance with the DHS initiative. The additional funding will enable CBP to actively pursue the closure of highest priority FY 2015 known cybersecurity system vulnerabilities and initiate actions to ensure that information technology systems are retained above acceptable standards. These vulnerabilities cross a variety of CBP programs and activities, and are not unique to just the COPPS PPA.

Justification:

High Risk Internal Cybersecurity Remediation

The Department of Homeland Security recognizes that in order to be a leader in cybersecurity, it must be a best-in-class implementer of cybersecurity. In order to act on this intent, the department is requesting resources to help fix known vulnerabilities in the most high-risk systems. In forming its FY 2016-2020 program and FY 2016 budget request, the Department examined the set of vulnerabilities across all components' IT systems and classified them based on their essentialness to mission, as well as the risk to the public and the department's employees should the system be breached and sensitive information revealed.

Component Responsible Internal Cyber Remediation

While the Department is requesting new resources as a "down payment" to assist with closing its most high-risk cybersecurity gaps, other known vulnerabilities exist and must be addressed to improve our

cyber health. To remediate these issues in this difficult fiscal environment, the Department is requesting resources to close all other known vulnerabilities that are distinct from those addressed in its High Risk Internal Cybersecurity Remediation.

Impact on Performance (Relationship of Increase to Strategic Goals)

While already starting to make progress, this request reflects the Department's goal to fix all known vulnerabilities by FY 2017. CBP relies on these systems to carry out its mission, and it is imperative that we invest in the preservation and integrity of these systems to safeguard against any threat that seeks to undermine our mission-critical capabilities.

Each of these vulnerabilities is related to an individual system owned by a component. The department endeavored to adopt enterprise solutions where feasible to remediate similar or identical vulnerabilities identified in multiple component systems. For example, the implementation of a robust Department-wide identity, credential, and access management program will remediate system access control-oriented vulnerabilities identified in multiple component systems, creating efficiencies. In many cases, however, the corrective action or fix must be directly applied to the individual system, hence the request in each component's budget as a part of the overall plan.

The Department will institute a process to track performance towards closing these vulnerabilities starting in FY2015, so that we can demonstrate progress and also assure that any issues are quickly addressed.

Mission 1: Preventing Terrorism and Enhancing Security;

Goal 1.1: Prevent Terrorist Attacks

Goal 2.1: Effectively Control U.S. Air, Land, and Sea Borders

Department of Homeland Security
Automation Modernization:
Justification of Program Changes
(Dollars in Thousands)

Program Increase 4: Establish Counter Network Operations Capability
PPA: Information Technology, Automated Targeting Systems
Program Increase: Positions 0, FTE 0, Dollars \$4,531

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$4,531
Total Request	0	0	\$0	0	0	\$0	0	0	\$4,531

Description of Item

CBP requests \$4.531 million in Automation Modernization to support information technology and targeting requirements associated with the overall request to establish a Counter Network Operations Capability. The information technology requirements include technical equipment, such as computers, desk phones, and radios, to accommodate the increase in personnel. With regard to targeting requirements, CBP will develop targeting and analysis tools that will expedite the work that CBP analysts are currently doing with CBP's unique data holdings. By fusing and correlating data across domains, and simultaneously protecting the privacy and civil liberties of Americans, we can better organize and exploit information to make more informed, timely and operationally relevant decisions regarding the risks presented by potentially nefarious travelers attempting to enter the United States. The requested funding will facilitate CBP's development of an advanced analytics capability to support not only CBP's counter network initiatives at the National Targeting Center, but also CBP's border enforcement efforts in the field. This will provide three capabilities: (1) a focused analytics office that supports data science and intelligence analysis to facilitate counter network targeting efforts; (2) an advanced analytic tools suite that capitalizes on emerging big data platforms that utilize CBP's data holdings to better understand and define terrorist and transnational criminal organizations; (3) hardware and visualization systems to enable collaborative multi-agency initiatives to target priority threats.

CBP has developed a counter network strategy that is an agency-wide focus on combating transnational criminal organizations and terrorist networks leveraging our unique collection, targeting, and interdiction capabilities and extending this approach through interagency investigative and intelligence community partnerships. In total, funding will support applying advanced analysis and visualization tools to identify the nation's most challenging targets utilizing a multi-intelligence based

approach. CBP will establish a focused counter network team in a collaborative analytic environment with access to data and tools to conduct advanced counter network analysis of the nation's key transnational organized crime and terrorist targets.

Overall, CBP requests a program increase of \$14.736 million to establish a Counter Network Operations Capability. CBP proposes that this increase be funded out of the following PPAs: Automation Modernization's Automated Targeting Systems PPA; Construction & Facilities Management's Facilities Construction and Sustainment PPA; and Salaries & Expenses' Rent, Administration, Internal Affairs, National Targeting Center, Training at the Ports of Entry, and Training & Development PPAs. Increased budget authority, particularly efforts involving additional positions, often requires association with the multiple PPAs that support these new positions. CBP's position cost model provides the capability to present and distribute the estimated necessary authority and FTE with any such increase in positions to the appropriate support offices. In most cases, position increases reflect authority and FTE in both the primary PPA associated with the increased capability and/or function, as well as the mission support PPAs responsible for hiring, vetting, training and outfitting the new positions. The total request for this program across all PPAs is \$14.736 million.

Justification

CBP's unparalleled competencies (data, analytics, and global presence) and investigative neutrality ideally posture us to lead a global counter network effort. We therefore require an organizational structure that contributes to a counter network strategy that leverages partnerships to: (1) define and prioritize terrorist and transnational criminal networks; (2) contribute to building a viable counter network force; (3) collaborate in attacking terrorist and transnational criminal networks; (4) accurately assess the effectiveness of our attacks; and (5) rapidly adjust our post-attack strategies and tactics as necessary.

Undetected criminal and terrorist travel, contraband movement, and commercial and financial activity necessitates continued improvement in our ability to uncover the patterns and faint signals that exist within disparate sources of information. To successfully identify these patterns and signals, CBP will develop targeting and analysis tools speeding the work that CBP analysts are currently doing with CBP's unique data holdings. By fusing and correlating data across domains, and simultaneously protecting the privacy and civil liberties of Americans, DHS can better organize and exploit information to make more informed decisions regarding the risk presented by travelers attempting to enter the United States.

The funding requested will assist CBP in establishing an advanced analytics capability to support CBP's counter network cells at the National Targeting Center and border security efforts in the field. This capability will be enabled by three elements: (1) a focused analytics office that support data science and intelligence analysis to facilitate counter network targeting efforts; (2) an advanced analytic tools suite that capitalizes on emerging big data platforms that utilize CBP's data holdings to better understand and define terrorist and transnational criminal organizations; (3) hardware and visualization systems to enable collaborative multi-agency initiatives to target priority threats.

CBP's National Targeting Center will promote the implementation and optimization of CBP's counter network efforts and strategy, strengthened by active collaboration across all CBP components to plan,

coordinate, and evaluate our deliberate disruptive effects taken against terrorist and transnational criminal networks. In the field and abroad, CBP's regional command campaigns, centers, and operating elements will benefit from CBP's ability to leverage advanced tools, training, access, and partnerships to strengthen resilience against terrorist and transnational criminal network activities and execute unified deliberate actions with our interagency partners to disrupt and marginalize them.

Impact on Performance (Relationship of Increase to Strategic Goals)

CBP's intent is to establish a dedicated counter network capability that partners with both domestic and international law enforcement and border centric agencies. This outcome requires FTEs and IT contractor support that is dedicated to the initiative on a full time basis. The requested \$14.736 million funding will allow the Counter Network Division within the National Targeting Center to bring on board the needed 60 FTEs projected for FY 2016 and beyond, and will facilitate the required IT enhancements needed for the initiative, as well as the necessary contractor support. The cumulative benefit will be:

- Dedicated full-time counter network support. Counter network functions will be expanded in scope, and no longer performed by other NTC FTEs on a part-time basis in addition to their normal duties and responsibilities. The expeditious stand-up of a full mission capable counter network capability. Dedicated contractor support and IT support will facilitate and expedite the collection, processing, analysis and timely dissemination of critical counter network information and intelligence that is essential to identifying terrorist and transnational criminal networks; interagency collaboration in attacking terrorist and transnational criminal networks; assessing the effectiveness of our attacks; and rapidly adjusting our post-attack strategies and tactics.

Enhanced and expanded interoperability with CBP's interagency border centric partners. A critical component of our counter network capability is the uninterrupted IT connectivity with CBP's field components, the agencies that partner with them and our other Federal, private sector and international partners. The FTE and IT contractor enhancements will provide a robust capability to share select databases and conduct virtual analytic exchange sessions with supporting border centric agencies.
DHS QHSR:

Mission 2: Securing and Managing Our Borders

Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations

Objective: Identify, disrupt, and dismantle transnational criminal and terrorist organizations;
Disrupt illicit pathways

Department of Homeland Security
Automation Modernization:
Justification of Program Changes
(Dollars in Thousands)

Program Increase 5: Watchlist Service Encounter Service
PPA: Critical Operations Protection and Processing Support
Program Increase: Positions 0, FTE 0, Dollars \$1,900

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$800
Program Increase							0	0	\$1,900
Total Request	0	0	\$800	0	0	\$800	0	0	\$2,700

Description of Item

The FY 2016 request proposes an increase of \$1.9 million to develop and implement DHS Watchlist Service (WLS) Encounter Data Broker, which will streamline the return of information obtained by DHS Components from terrorist watchlist encounters by electronically transmitting the information back to the Terrorist Screening Center (TSC). This funding will increase support for WLS current functions so there is a solid system to build the encounter function upon.

Project Schedule:

Development of this capability will span FY 2016 and FY 2017 – this schedule assumes \$1.9 million in both FY 2016 and FY 2017, and will have to be sustained beyond FY 2018

Milestone	Projected Completion Date
Enhance existing WLS technology to provide sound base to build encounter service on	September 2016
Conduct Encounter Service Release Planning Review (RPR) so development sprints can begin	August 2016
Deploy WLS Encounter Service for Pilot and feedback with CBP data	April 2017
Deploy WLS Encounter Service with all DHS data	September 2017

Primary Contractor(s): This project will use existing CBP OIT contracts.

Project Location(s): Washington, D.C.

Justification

DHS Watchlist Service (WLS) provides a single gateway of Terrorist Screening Database (TSDB) data from the Terrorist Screening Center (TSC) to DHS. The Department recognizes the critical importance of accurate and timely information sharing with the TSC about encounters with those known or reasonably suspected of being involved in terrorist activity. However, currently DHS components must report encounters back to the TSC manually via XML, email, or phone call, resulting in the potential for timeliness and accuracy issues. To address this gap, the Department is requesting resources to develop an automated, near-real time feedback mechanism to share encounter information with the TSC.

The encounter management capability will act as a central mechanism to receive encounter information from DHS components and programs, and send that information electronically to the TSC. This capability enables sharing encounter information to TSC in an automated, near-real time feedback mechanism that will contribute to a current and accurate watchlisting and screening process. Requested funding enables DHS to work with TSC to develop requirements and pilot this encounter service to exchange terrorist encounter data using the WLS. Funding is requested for CBP, TSA, and USCIS to implement and maintain this encounter service.

Impact on Performance (Relationship of Increase to Strategic Goals)

The next phase of development is the WLS Encounter Data Broker, which will streamline the return of information obtained by DHS Components from terrorist watchlist encounters by electronically transmitting the information back to the TSC. DHS intends to develop a pilot for an information technology conduit from DHS to TSC to streamline the exchange of information during encounters with potential matches to the TSDB, accelerating final adjudication of the potential match and facilitating the screening process.

DHS Components currently conduct encounter management via manual processes, such as electronic mail and phone calls. Streamlining the Department's encounter management capability to an electronic, transactional exchange supports increased quality assurance and cost savings. The WLS Encounter Data Broker will be developed in concert with existing or planned information exchange efforts between DHS and TSC, in order to avoid duplication and realize cost and resource efficiencies.

Development of the information technology conduit (encounter data broker) from DHS to the TSC will provide centralized exchange of known and suspected terrorist encounter data.

- The encounter data broker pilot will help streamline the process by which DHS notifies TSC if an individual identified during the screening process is determined to be a potential match to one or more TSDB records.
- To enable TSC to make a final adjudication, the encounter data broker should include the capability for DHS to provide terrorist identifiers about encountered individuals via a transactional mechanism.
- The encounter data broker will be consistent with existing DHS information exchange efforts with the TSC.

- The encounter data broker will provide automated interface with the TSC's Encounter Management Application (EMA).

DHS QHSR:

Mission 1: Preventing Terrorism and Enhancing Security;

Goal 1.1: Prevent Terrorist Attacks

Goal 2.1: Effectively Control U.S. Air, Land, and Sea Borders

Department of Homeland Security
Automation Modernization:
Justification of Program Changes

(Dollars in Thousands)

Program Increase 6: Canine Enforcement Program
 PPA: Information Technology
 Program Increase: Positions 0, FTE 0, Dollars \$837

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$837
Total Request	0	0	\$0	0	0	\$0	0	0	\$837

CBP requests \$837 thousand in funding to support information technology requirements associated with the overall requested increase to the Canine Enforcement Program (CEP). These requirements include technical equipment, such as computers, desk phones, and radios, to accommodate the increase in personnel.

CBP's CEP plays a crucial role in anti-terrorism and interdiction efforts. Through the CEP, CBP has established and deployed a world-class detector dog program to augment existing technology while employing cutting edge detection capabilities. This program provides the Agency with a higher level of security and detection capability while maintaining a seamless conduit between existing technology and the proven capabilities of detector dogs. The OFO canine teams are strategically assigned to POEs around the United States and to preclearance operations abroad. CBP officers use specially trained detector dogs in interdiction and to support specialized programs aimed at combating terrorism, as well as narcotics, firearms, and undeclared currency smuggling at our Nation's borders, international airports, and seaports.

Canines also play an important role in the Border Patrol's mission of securing the border. Canines are used to detect illegal aliens, illegal drugs, and illegal currency at checkpoints and are used in field operations to track and apprehend illegal aliens. USBP has approximately 890 canines available for use. New canines are purchased and trained by OTD and transferred to the Border Patrol upon completion of training; the Border Patrol becomes responsible for the care and upkeep costs of the canines once they are transferred to its authority.

Overall, CBP requests \$10 million for an additional 47 canine teams for CBPOs and 40 canine teams for BPAs. CBP proposes that this increase be funded out of the following PPAs: Automation Modernization's Information Technology PPA; Construction & Facilities Management's Facilities Construction and Sustainment PPA; and Salaries & Expenses' Inspections, Trade, and Travel

Facilitation, Rent, Administration, Internal Affairs, Training at the Ports of Entry, and Training Between the Ports of Entry PPAs. Increased budget authority, particularly efforts involving additional positions, often requires association with the multiple PPAs that support these new positions. CBP's position cost model provides the capability to present and distribute the estimated necessary authority and FTE with any such increase in positions to the appropriate support offices. In most cases, position increases reflect authority and FTE in both the primary PPA associated with the increased capability and/or function, as well as the mission support PPAs responsible for hiring, vetting, training and outfitting the new positions. The total requested increase to the Canine Enforcement Program across all PPAs is \$10 million.

Justification

The primary goal of the CBP CEP is detection and apprehension of persons attempting entry to organize and carry out acts of terrorism and detection and seizure of controlled substances and other contraband, often used to finance terrorist or criminal drug trafficking organizations. Another critical role for CBP CEP is protecting America's food supply from the importation of food products that may contain harmful pests or disease. CBP canine teams also assist local law enforcement agencies when requested.

An analysis of the following information has identified the POEs with the highest need for additional canine teams by enforcement discipline (Currency Firearms (C/F) and Human/Narcotic Detection (HNDD)).

- The number of CBPO positions currently allocated to POEs;
- Current number of canine teams, by discipline, at each POE;
- Borderstat and Operations Management Report (OMR) data to determine seizure incidents of narcotics, currency and firearms;
- Outbound data to ensure adequate outbound staffing and infrastructure were in place to support additional Currency/Firearms canine teams; and
- Planned facility expansion at each POEs.

Field Office	C/F	HNDD	Total
Atlanta	1	1	2
Baltimore	2	2	4
Boston	1	1	2
Chicago	0	2	2
Detroit	1	1	2
El Paso	0	2	2
Houston	0	1	1
Laredo	1	7	8
Los Angeles	0	1	1
Miami/Tampa	1	1	2
New York	1	1	2
San Diego	1	5	6

Tucson	4	9	13
TOTAL	13	31	47

USBP has a requirement for 1,115 canines and has developed a plan to reach this level over a five year period. The funding provided will allow OTD to procure and train the additional canines to achieve the USBP plan. This plan will incrementally increase the number of canines purchased each year over the original program and reach the desired end-state of 1,115 canines by Fiscal Year 2019 without overwhelming OTD’s capability to procure and train canines. No additional agents will be required under this plan, as agents assigned to canine duties will come from within the existing staffing floor.

Impact on Performance (Relationship of Increase to Strategic Goals)

The additional CBPO (Canine) positions will permit CBP to:

- Address the threat posed by transnational criminal organizations involved in human trafficking and narcotics smuggling into the United States.
- Counter the smuggling of illicit proceeds and firearms through the U.S. to other destinations.
- Further enhance the layered enforcement approach to disrupt transnational criminal organizations smuggling efforts by increasing vehicle, commercial shipment, and passenger/pedestrian searches.

Goal 1: Secure America’s Borders

The U.S. Border Patrol plays a critical role in securing our Nation’s borders between Ports of Entry (POEs) against all threats.

Measurable objectives, in which the USBP Canine Program is a key element, are to:

- Prevent terrorists and terrorist weapons from entering the United States between the POEs, as well as operational integration, planning, and execution with Federal, state, local, and tribal law enforcement partners.
- Manage risk through the expansion of sophisticated tactics, techniques, and procedures. These include methods such as “force multiplying” skills and abilities in which a USBP canine team has proven to be effective, efficient, and highly mobile.
- Disrupt and degrade Transnational Criminal Organizations by targeting enforcement efforts against the highest priority threats and expanding programs that reduce smuggling and crimes associated with smuggling.

Increase community engagement by participating in community/school programs and engaging the public to assist the U.S. Border Patrol in informing and promoting the capabilities of the USBP Canine Program.

Department of Homeland Security
Automation Modernization:
Justification of Program Changes

(Dollars in Thousands)

Program Increase 7: UAS Crew
PPA: Information Technology
Program Increase: Positions 0, FTE 0, Dollars \$183

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$183
Total Request	0	0	\$0	0	0	\$0	0	0	\$183

Description of Item

CBP requests an increase of \$183 thousand for information technology requirements associated with facilities requirements associated with the overall requested increase of an additional 15 Unmanned Aircraft System (UAS) crew in support of both operations along the southwest border and operations within the source and transit zone. These requirements include technical equipment, such as computers, desk phones, and radios, to accommodate the increase in personnel.

Overall, CBP requests \$8.4 million for 15 additional UAS crew. CBP proposes that this increase be funded out of the following PPAs: Air & Marine Salaries; Automation Modernization's Information Technology PPA; Construction & Facilities Management's Facilities Construction and Sustainment PPA; and Salaries & Expenses' Rent, Administration, Internal Affairs, and Training & Development PPAs. Increased budget authority, particularly efforts involving additional positions, often requires association with the multiple PPAs that support these new positions. CBP's position cost model provides the capability to present and distribute the estimated necessary authority and FTE with any such increase in positions to the appropriate support offices. In most cases, position increases reflect authority and FTE in both the primary PPA associated with the increased capability and/or function, as well as the mission support PPAs responsible for hiring, vetting, training and outfitting the new positions. The total requested increase for UAS Crew across all PPAs is \$8.4 million.

Justification

The UAS consists of a medium-altitude, long-endurance unmanned aircraft (MQ-9 Predator B), sensor communication packages, ground control, launch and recovery systems, operations, maintenance, technical and logistics support, pilots, and sensor operators to meet mission requirements in the three major areas of responsibility: southwest border, northern border and southeast coastal area. The UAS

supports border interdiction operations with long-range surveillance that provides real-time intelligence and situational awareness to border agents 24 hours a day - 7 days a week.

The 15 additional UAS crew will include eight Air Interdiction Agents; four Sensor Operators; three support staff positions; and the necessary salaries, benefits, overtime, premium pay, training, travel, law enforcement equipment, and supplies. The positions are needed to provide increased CBP aerial surveillance, enforcement, and security posture for surges similar to that of unaccompanied children illegally entering the U.S.

OAM took a staff level reduction in FY 2010 that prevented the hiring of additional UAS crew as more systems were being delivered and the operating tempo along the southwest border increased. As an interim measure, OAM cross-trained P-3 pilots and sensor operators whose aircraft were undergoing a service life extension to operate the Predator B and Guardian maritime UAS. Now that the P-3 SLEP is nearly completed and the P-3 wing is increasing its operating tempo, the pilots and sensor operators are no longer available to support the UAS Program. The additional UAS crews will make-up for the loss of the P-3 crew, and support increasing UAS operating tempo along the southwest border, in particular Arizona, South Texas, and support UAC operations should that problem increase in severity.

Impact on Performance (Relationship of Increase to Strategic Goals)

The UAS is a force multiplier with the following benefits:

- Ability to monitor extended border areas at any time of the day or night;
- Capability to vector ground support directly to vehicles or persons of interest;
- Provide ground personnel extended situational awareness of surroundings and operational area for potential threat identification purposes;
- Emergency or disaster support for other US government agencies; and
- Provide intelligence data to the Office of Intelligence and Investigative Liaison (OIIL) for analysis.

UAS contributed to the following operational results: (FY 2014 figures below)

- VaDER Detections Investigated – 7,616
- Illegal Apprehensions – 1,834
- Drugs Seized – 70,577 lbs marijuana and 992 lbs cocaine
- Arrests – 54
- Vehicles Seized – 37
- Weapons Seized – 149

DHS QHSR:

Mission 1: Preventing Terrorism and Enhancing Security

Department of Homeland Security
Automation Modernization:
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 1: Data Center O&M
PPA: Critical Operations Protection and Processing Support
Program Decrease: Positions 0, FTE 0, Dollars \$(9,205)

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$191,279
Program Decrease							0	0	(\$9,205)
Total Request	0	0	\$214,923	0	0	\$196,376	0	0	\$182,074

Description of Item:

This request includes a proposed reduction of \$9.205 million in the COPPS PPA, within the Automation Modernization appropriation.

Justification:

This and other program reductions are being proposed in order to ensure that CBP can focus its resources to further preserve and advance its mission in targeted areas. OIT will seek to achieve savings through the implementation of cloud computing services where feasible, and will continue to seek acquisition strategies and new contracts for support services that provide competitive, lower costs. This has been challenging in the current acquisition environment; however, we have seen potential opportunities. OIT is also looking at how it acquires and delivers services today, versus how they may be delivered more efficiently in the future. New technology solutions are rapidly being introduced, and OIT will take advantage of emerging technology capabilities that meet CBPs mission requirements, in a secure environment, for reduced cost.

Impact on Performance (Relationship of Decrease to Strategic Goals)

OIT has continued to achieve goals of streamlining IT operations and services through the implementation of enterprise strategies that have resulted in reduced cost and increased system effectiveness. OIT also continues to standardize its data center operating environment in order to reduce the varied contract technical expertise currently required. CBP has targeted FY 2016 to divest or significantly reduce its mainframe environment.

Impacts of reducing Data Center operations and maintenance costs may result in inadequate capacity to support new capabilities and systems, postponed delivery of IT capabilities to the field, and expensive one-off replacements for already overburdened and outdated infrastructure. The reduction in funding will force the agency to repair and maintain 'just in time', versus enabling a more strategic plan to stay ahead of anticipated requirements for data processing and storage, as well as end-of-life replacements, etc. OIT may not be able to improve its wide area network infrastructure to enable emerging technologies and applications with greater bandwidth capacity by reducing dedicated circuits, using fiber optics, broadband connections, and satellite connections as well as add resiliency and redundancy and support for mobile CBP applications and collaboration activities. As equipment becomes aged, and processing capacity is diminished, there may be increased outages and/or system slowdowns. This directly impacts CBP's mission at- and between-the-ports, specifically the flow of commerce and passengers into and out of the U.S., causing loss of revenue for both government and commercial industry.

CBP feels this is an acceptable risk, as the overall decrease will enable CBP to support its highest priority of maintaining maximum officer and agent staffing along the border. This does not include funding for IT related Working Capital Fund requirements.

This program change impacts the following CBP goals and objectives:

Mission 2: Securing and Managing Our Borders

Goal 2.1: Effectively Control U.S. Air, Land, and Sea Borders

Objective: 2.1.1 Prevent Illegal Entry

Goal 2.2: Safeguard Lawful Trade and Travel:

Objective 2.2.1: Secure key nodes.

Objective 2.1.2: Secure conveyances.

Objective 2.1.3: Manage the risk posed by people and goods in transit.

Department of Homeland Security
Automation Modernization:
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 2: Reduction to Manual Continuous Monitoring

PPA: Critical Operations Protection and Processing Support

Program Decrease: Positions 0, FTE 0, Dollars \$(1,095)

Program Decrease							0	0	(\$1,095)
Total Request	0	0	\$5,015	0	0	\$5,015	0	0	\$3,920

Description of Item:

CBP request a decrease of \$1.095 million for the reduction of Disparate Continuous Monitoring tools and capabilities within CBPs current catalog of information technology cybersecurity applications in accordance with the DHS initiative.

Justification:

In examining its internal cybersecurity, the department attempted to seek out efficiencies where possible to assist with redirecting potential cost savings toward mitigating vulnerabilities at a more frequent rate, as well as to promote standardization of security products and tools in DHS to develop a common security tool knowledge base and common skill sets within department Cybersecurity programs.

Impact on Performance (Relationship of Decrease to Strategic Goals)

Anticipating the adoption of the Continuous Diagnostics and Mitigation (CDM) program, during FY 2015, the Department is applying an offset starting in FY 2016 to reflect a more efficient information security continuous monitoring business model. In future years, as the scope of CDM expands, DHS can further harmonize standardization of security products and tools.

Mission 1: Preventing Terrorism and Enhancing Security;

Goal 1.1: Prevent Terrorist Attacks

Goal 2.1: Effectively Control U.S. Air, Land, and Sea Borders

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for U.S. Customs and Border Protection ¹ automated systems, including salaries and expenses, [\$340,105,000] \$867,311,000¹ of which [\$446,710,000] \$468,284,000 shall remain available until September 30, [2017] 2018³; and of which not less than [\$141,061,000] \$153,736,000⁴ shall be for the development of the Automated Commercial Environment.

¹ [\$340,105,000, to] <u>\$867,311,000</u>	Dollar change only. No substantial change proposed.
² [\$446,710,000] <u>\$468,284,000</u>	Dollar change only. No substantial change proposed.
³ [2017;] <u>2018</u> ³	Fiscal year change only. No substantial change proposed.
⁴ [\$138,794,000] <u>\$153,736,000</u> ⁴	Dollar change only. No substantial change proposed.

ACE/ITDS Mission Statement

ACE will provide tools and enhance the business processes that are essential to securing the U.S. borders from terrorists by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. ACE capabilities have been designed to identify potential risks, analyze information prior to arrival of people and cargo, and provide intelligence in easy-to-use formats. As a web-based system, ACE will provide users from government and the trade community with new, more efficient ways of accessing, processing, and sharing trade-related information.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$8,983	\$9,215	\$9,332	\$117
11.3 Other than Full-Time Permanent	\$124	\$123	\$124	\$1

Information Technology Mission Statement

The CBP Office of Information and Technology (OIT) is funded within this PPA. OIT supports CBP by providing integrated, comprehensive technical support that facilitates both CBP and DHS missions. OIT is responsible for developing, acquiring, testing, and maintaining new and legacy applications (both government and commercial), and for ensuring the reliability of CBP's data infrastructure, which transmits critical data to and from CBP and DHS data centers to CBP agents and officers on the front-line.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$97,269	\$159,174	\$165,141	\$5,967
11.3 Other than Full-Time Permanent	\$1,852	\$2,150	\$2,172	\$22

Automated Targeting Systems Mission Statement

At the core of CBP's ability to achieve its critical border security objectives and maintain the flow of lawful commerce is CBP's ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law abiding travelers and commerce to continue to their destination without unnecessary delay. Legislation and regulatory action, such as the Trade Act of 2002 and the Safe Port Act, respectively, have made it mandatory to provide advance information about passengers and goods arriving in the U.S. CBP uses computer technology and rule-based applications to analyze the data provided on passengers and shipments arriving in the U.S. CBP applies its targeting methods against the data to determine which passengers or shipments need to be segregated for a closer look and possibly inspection. The main platform CBP uses to analyze arriving passenger and shipment data is the Automated Targeting System (ATS). ATS is a web-based enforcement and decision support tool that is the cornerstone for all CBPs targeting efforts. ATS incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. In this way, ATS allows CBP officers to focus their efforts on cargo shipments and passengers that most warrant further attention. ATS standardizes names, addresses, ship names, and similar data so these data elements can be more easily associated with other business data to form a more complete picture of a passenger, import, or export in context with previous behavior of the parties involved. Every passenger and shipment processed through ATS is subjected to a real-time risk evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$2,494	\$2,141	\$2,170	\$29
11.3 Other than Full-Time Permanent	-	\$23	\$23	-

BUDGET REQUEST AND SUPPORTING INFORMATION

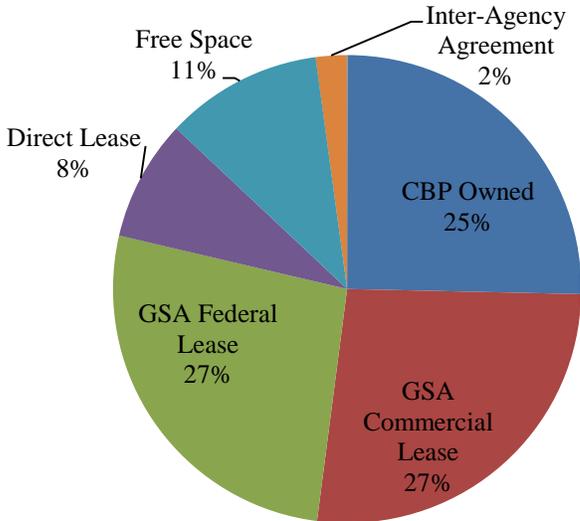

**U.S. Customs and Border Protection
Construction and Facilities Management**

I. Appropriation Overview

A. Mission Statement for Construction and Facilities Management:

The Construction and Facilities Management (C&FM) account provides the resources for critical facilities and associated infrastructure and personnel that enable CBP’s mission of securing America’s borders, while facilitating legitimate trade, travel, and immigration. Constructing and maintaining CBP’s physical infrastructure is essential to keeping facilities operationally viable for frontline and mission support functions. Real property specialists plan and implement the C&FM activities by determining the most effective facilities’ solutions to meet the operational needs of agents, officers, pilots, and other CBP personnel. The account supports a vast and diverse real property portfolio, consisting of more than 4,300 owned and leased buildings and structures, over 26 million square feet of facility space, over 1,500 towers, and approximately 4,600 acres of land throughout the United States. Specifically, funding from the C&FM account supports sustainment of owned facilities and the required actions at various types of leased facilities, such as tenant improvements and installation or upgrades of security and IT systems.

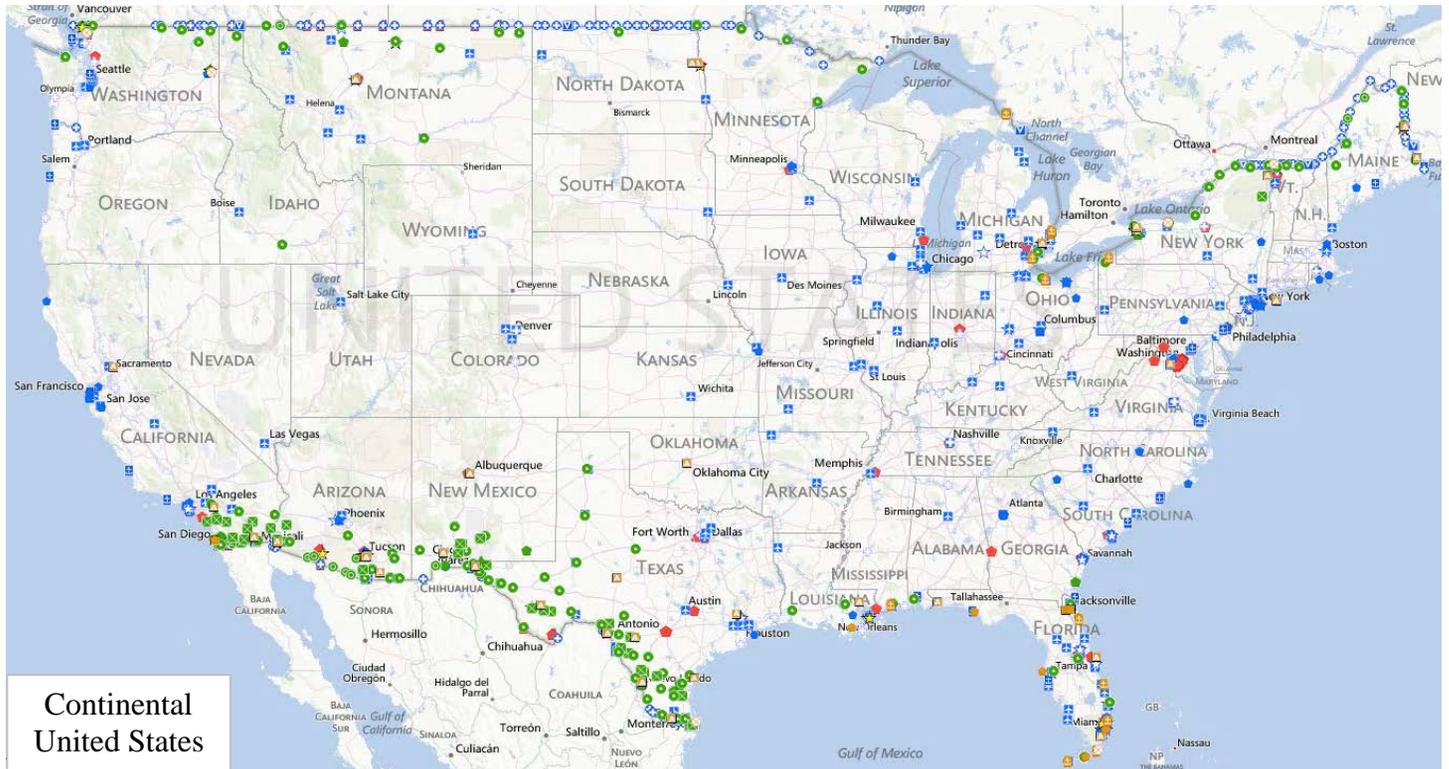

Exhibit 1: CBP Facilities by Ownership Type

Over 60,000 CBP employees work to secure the Nation’s borders at and between the official ports of entry (POE). CBP protects more than 5,000 miles of border with Canada, 1,900 miles of border with Mexico, and 95,000 miles of shoreline. The success of CBP’s mission depends heavily on the effectiveness of facilities and infrastructure that support the operational and administrative requirements of the Office of Border Patrol (OBP), Office of Air and Marine (OAM), Office of Field Operations (OFO), and Mission Support (MS) offices.

CBP requires a diverse facilities portfolio to meet its broad range of operating environments, spanning the northern and southwestern land borders and southeast coastline in both metropolitan and remote areas. These physical assets serve as economic gateways and critical enforcement tools to counter a wide range of threats to the Nation. Exhibit 1 (above) provides the facility breakout by ownership type; Exhibit 2 shows a map of the facilities and associated infrastructure supporting CBP's operational and mission support components to include all facility ownership types; and Exhibit 3 provides a summary of the facilities portfolio by office.

Exhibit 2: Map of CBP Facilities
(Current as of December 2014)

Border Patrol Facilities	<ul style="list-style-type: none"> • 136 Border Patrol Station • 15 Forward Operating Base • 158 Permanent and Tactical Checkpoint • 20 Sector Headquarters • 327 RVSS Tower Site 	24%
Field Operations Facilities	<ul style="list-style-type: none"> • 261 Air Port of Entry • 168 Land Port of Entry • 20 Field Offices • 203 Sea Port of Entry 	51%
Mission Support Facilities	<ul style="list-style-type: none"> • 5 Laboratory • 24 Housing Sites • 2 K-9 Training Facility • 88 Administrative Facility • 817 TACCOM Tower Site • 1 Training Facility 	17%

B. Budget Activities:

Resources for CBP's Construction and Facilities Management programs, projects, and activities are reflected in the C&FM appropriation as well as the Salaries and Expenses (S&E) appropriation, Rent Program, Project, and Activity (PPA). The C&FM appropriation consists of the Facilities Construction and Sustainment (FC&S) PPA and the Program Oversight and Management (PO&M) PPA, which are discussed in detail in the following paragraphs. Together, these three PPAs capture CBP's costs for facilities, related program support, and rent requirements.

¹ CBP's portfolio spans a diverse collection of facilities that comprise roughly 26 million square feet nationwide, of which 25 percent is owned by CBP. The remaining 75 percent of CBP facilities are provided through GSA-owned federal and commercial leased space, direct leases, free space, and interagency agreements.

Facilities Construction and Sustainment

The FC&S PPA provides resources for all necessary activities supporting the construction, acquisition, sustainment, and leased space management of CBP's facilities portfolio. This includes, but is not limited to:

- Sustainment activities including building operations, maintenance, and repairs (BOMR) of CBP-owned facilities;
- Environmental and energy compliance, including the remediation of firing ranges;
- Security system installations as required by lease renewals and forced moves;
- Property improvements, modernization, expansions, and alterations;
- Real estate acquisition and disposal;
- Construction and demolition of real property assets;
- Portfolio planning activities; and
- Project management and execution support.

The FC&S PPA also includes funding to support CBP tunnel remediation, the process whereby discovered cross-border tunnels are physically secured and rendered unusable. Exhibit 4 displays the number of tunnels that CBP remediated along the Southwest border from FY 2010 to FY 2014.

Exhibit 4: Illicit Cross-border Tunnels Remediated – FY 2010 to FY 2014²

FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
12	18	13	7	10

Program Oversight and Management

The PO&M PPA provides salaries and benefits for Government personnel, planning, and program services and support, as well as environmental and energy management programs and studies. This PPA enables government and support personnel to successfully implement enterprise-level program objectives and ensures strategic alignment across CBP's Construction and Facilities Management Program. Additionally, these resources fund the necessary programs to support enterprise-level tools, planning, and procedures for effective and efficient management of CBP's facilities portfolio, as well as CBP rent and tactical infrastructure.

C. Budget Request Summary:

CBP requests \$341,543,000 and 386 full-time equivalent (FTE) employees for the FY 2016 Construction & Facilities Management appropriation. This request includes a net adjustments-to-base decrease of \$219.882 million, resulting from a decrease due to the completion of the National Targeting Center (NTC) consolidation, the realignment of funding from the Program Oversight and Management PPA and the Facilities Construction and Sustainment PPA to the Salaries and Expenses Appropriation Rent PPA for GSA LPOE rent payments, the continued consolidation of facility related

² Current as of December 31, 2014, the table includes all types of illicit cross-border tunnels: point-to-point tunnels; tunnels connecting to existing municipal drain systems; and complex, as well as simplistic, tunnel variations.

activities into the C&FM appropriation and the additional facility requirements associated with the FY 2014 increase to CBP Officers. The request also includes a requested program increase of \$78.814 million for CBP Facilities Infrastructure Sustainment.

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP requests \$255.378 million in FY 2016 for the Facilities Construction and Sustainment (FC&S) PPA, which supports Construction and Facilities Management activities. This PPA provides real property and supporting infrastructure required to secure America's borders, while facilitating legitimate travel, trade, and immigration. FC&S delivers critical logistical and operational support to agents, officers, pilots, and other CBP personnel who operate out of CBP's facilities.

CBP Facilities Background

Due to the diverse missions of CBP's operational components (OBP, OFO, OAM, and MS offices), CBP plans, designs, executes, and maintains a multi-faceted and complex real property inventory funded by the Facilities Construction & Sustainment PPA. Facilities are built and maintained in remote and extreme environments that require a higher level of maintenance, including housing units in arid, desert-like areas along the southwest border, as well as in extreme cold-weather areas along the northern border. Mission requirements that mandate CBP personnel operate in environments specific to their duties or that facilities be open 24-7 must be factored into sustainment costs and schedules. When planning facility solutions, designs must incorporate domestic and bi-national transportation infrastructures along with technology programs such as non-intrusive inspections and the Western Hemisphere Travel Initiative. Furthermore, adding to the complexity of the inventory, CBP facilities must also take into account unique design standards, such as law enforcement, inspection, and detention space, along with supporting infrastructure including roads and lights.

Office of Border Patrol Facilities Portfolio

The OBP Facilities portfolio, which comprises 24 percent of CBP's total square footage, enables OBP to stage and deploy agents, and supports tactical and search-and-rescue teams; command, control, and communications activity; detention and processing; intelligence units; canine and horse operations; fleet maintenance and storage; and administrative, training, and law enforcement coordination. The OBP facilities that support these activities include:

- 20 Sector Headquarters, which include operational command and other centralized management functions within a defined Sector area;
- 136 Border Patrol Stations, which serve as the operational bases within a defined area of operations where functions include securing weapons storage and short-term processing and holding. Some BP Stations include canine and equestrian facilities, facilities maintenance and vehicle maintenance facilities with or without car wash and fuel systems;
- 158 Checkpoints, which are staging facilities for vehicle inspections and can be either mobile or permanent; and
- 15 Forward Operating Bases, which are self-sustaining facilities in remote areas along the border that provide tactical and administrative support.

Office of Field Operations Facilities Portfolio

The OFO Facilities portfolio, consists primarily of 632 land, sea, and air ports of entry (POE), which are the operational facilities that directly enable CBP's mission to protect the people and economy of the United States by preventing terrorists; instruments of terror; and illegal narcotics, weapons, and money from entering the United States while facilitating the legal flow of people, goods, and commerce. The entire OFO portfolio comprises 51 percent of CBP's total square footage.

Due to the significant growth in inbound travel and trade volumes since 2008, including over \$2.46 trillion worth of goods processed at POEs in FY 2014 alone, CBP has experienced a substantial increase in the operations, maintenance and repair of this significant real estate portfolio at the Nation's land, sea and air borders along with multiple international preclearance offices and supporting administrative offices. These facilities support 24-7 operations and include special use space for

various types of inspections and support modernized inspectional technologies. For example, 167 of the 632 POEs have inspection space dedicated to agriculture, where CBP Agriculture Specialists perform agriculture quarantine inspections to protect the Nation from potential carriers of foreign animal and plant pests along with diseases and invasive species that could cause serious damage to the U.S. crops, livestock, pets, and the environment.

Air and Marine Facilities Portfolio

The OAM Facilities portfolio, which comprises 8 percent of CBP's total square footage, supports the world's largest civilian aviation and maritime law enforcement organization. In support of OAM's mission to secure the borders against terrorists, acts of terrorism, drug smuggling, and other illegal activities along the border, the OAM Portfolio includes air hangars, administrative offices, marine facilities, and support facilities for 26 types of aircraft and 12 types of marine vessels. The facilities are located primarily at commercial airports, military bases with air fields, and commercial docks and also include towers utilized by the Air and Marine Operations Center, and space specifically for the Unmanned Aerial System Operations Centers.

Mission Support Facilities Portfolio

The MS Facilities portfolio, which comprises 17 percent of CBP's total square footage, provides office space for mission-critical support offices including but not limited to the Offices of Information and Technology, Training and Development, Internal Affairs, and Human Resources Management. Additionally, this portfolio includes special use space and structures, such as housing units, laboratory facilities, and training campuses, including the Advanced Training Center in Harpers Ferry, West Virginia. Also included is the National Targeting Center (NTC). CBP is currently consolidating two separate campuses, Passenger and Cargo, into one operationally viable facility slated to be completed by the end of FY 2016. The consolidated facility is critical to screening relevant traveler and cargo information prior to departure. The NTC supports CBP's layered security strategy to protect the Nation by extending U.S. borders outward to identify and mitigate threats, and interdict possible terrorists and suspect cargo before they can be transported to the United States.

CBP Facilities Inventory in support of the surge of Unaccompanied Children

In response to the unprecedented increase in Unaccompanied Children (UC) and family units crossing along the southwest border, specifically in the Rio Grande Valley Sector (RGV) of Arizona/Texas, in early 2014, CBP expanded its inventory through the lease and modification of a short-term holding space facility to house an additional 1,000 UC. The facility includes holding, hygiene, bathroom, and storage areas, as well as sufficient space to allow for the delivery of food services, childcare and monitoring, medical services, janitorial, and waste removal. The FY 2016 budget supports the continued maintenance and upkeep of these facilities and supporting infrastructure.

CBP's Facilities Inventory Growth and Modernization

From FY 2004 to FY 2010, Congress appropriated substantial funding resources to CBP to provide facility solutions in support of CBP's expanding mission. Supplemental appropriations supported the *Intelligence Reform and Terrorism Prevention Act of 2004* and the *Emergency Supplemental Border Security Appropriations Act of 2010*, both of which dramatically increased the number of Border Patrol Agents from 10,000 in 2004 to the current staffing level of 21,370. In 2009, CBP received \$420 million through the *American Recovery and Reinvestment Act of 2009* to modernize 31 of the 42 Land Ports of Entry in CBP's owned inventory. Further funding has been appropriated for the construction of the Advanced Training Center in Harpers Ferry, West Virginia and the consolidation of National Targeting Center-Passenger and National Targeting Center-Cargo operations into a single location in Dulles, Virginia.

CBP's Sustainment Backlog and FY 2016 Funding Approach

Due to the constrained budget environment and the growing portfolio size that resulted in increasing building operations and utilities obligations, CBP has accumulated a significant backlog of repair and replacement requirements. At the end of FY 2014, based on Facility Condition Assessments (FCA) at CBP-owned and Direct Lease Operated facilities, CBP documented a backlog of over \$150 million in unmet maintenance and repair requirements.

This backlog is comprised of significant life safety and security issues for CBP personnel and the general public, along with systems that are at high risk of failure, which will potentially cause interruptions to the successful execution of CBP's mission and operations. Examples include lack of safety barriers, leaving Agents and the public exposed to traffic accidents at checkpoints, fire vulnerabilities, black mold, lack of sufficient ventilation in Local Area Network (LAN) rooms, insufficient power generators that would render a facility not operational in the case of a loss of main power, and non-functioning septic systems.

CBP currently conducts FCAs at CBP-owned and operated facilities to identify the current condition of the facilities and the issues that must be addressed. CBP also tracks issues and deficiencies that have been identified by operators at facilities that are categorized under various ownership types.

Through the FCAs and operator reports, deficiencies are identified, documented with a description and photos (when possible), and prioritized upon criticality. This allows for CBP to be proactive in its funding allocations and to ensure that the most urgent priorities are addressed.

In FY 2016, CBP is allocating funding to remediate the most critical of documented issues. The focus will be on remediating the deficiencies in the following two areas:

- 1) An asset in critical condition where there is a life safety issue or code violation, has completely failed, or has deteriorated beyond the point of repair. These deficiencies represent the highest probability of negatively impacting CBP's ability to perform its mission.

- 2) An asset in poor condition where it is still functioning but there are significant issues that must be addressed through repair or replacement. These issues are expected to become critical within two years.

FC&S Funding Break-out

Due to the growing backlog of sustainment needs, including life safety issues, the funding profile reflects a significant effort to address part of the over \$150 million backlog of repair and replacement needs, based on FCA, to ensure there is minimal impact to CBP’s mission. The breakout of facility activities can be found below in Exhibit 5.

Exhibit 5: FC&S PPA – FY 2014 to FY 2016 Spend Plan Crosswalk
(\$ in Thousands)

Activity	FY 2014	FY 2015	FY 2016
Tunnel Remediation	1,500	1,500	1,500
Environmental and Energy Compliance and Remediation	10,469	9,900	9,900
Building Operations and Services	106,611	120,727	95,719
Maintenance	33,720	24,867	21,628
Major Repairs and Past Due System Renewals	6,796	12,615	48,634
Lease Renewals and Forced Moves	10,666	20,784	17,597
Furniture, Fixtures and Equipment costs for LPOEs funded through the Federal Buildings Fund			23,900
Alterations	8,560	-	-
Capital Investments and Consolidations	13,200	18,000	36,500
LPOE Activities ³	183,876	176,744	-
Total	375,398	385,137	255,378

The planned allocation of FY 2016 FC&S funds across CBP’s facilities portfolio is shown in Exhibit 6. Note that the allocation between offices and activities is subject to change to ensure CBP’s highest priority facilities requirements are funded.

³ The ‘zero-out’ of LPOE Activities in FY 2016 reflects the realignment of funds to the Rent PPA for the GSA LPOEs. Further explanation is provided in the adjustments to base section.

Exhibit 6: FC&S PPA – FY 2016 Spend Plan

(\$ in Thousands)

Activity	OBP	OFO	OAM	MS	Total
Tunnel Remediation	1,500	-	-	-	1,500
Environmental and Energy Compliance and Remediation	9,900	-	-	-	9,900
Building Operations and Services	42,904	26,374	7,419	19,022	95,719

Capital Investments and Consolidations	36,000	-	-	500	36,500
Total	112,937	69,813	37,008	35,620	255,378

Sustainment of the CBP Facilities Portfolio

In order to properly maintain the CBP real property inventory, there are specific core sustainment activities that must be funded and addressed each year. Many are recurring annual activities, while there are also one-time costs associated with the lifecycle of the facility and the supporting assets. Specific to CBP's complex portfolio composition, these core sustainment activities include the following:

- Building operations and services include trash, septic, waste and snow removal, and the payment of utility expenses for water, electricity, and natural gas, among others.
- Maintenance activities include executing cost effective, bundled, regional maintenance contracts at CBP facilities in an established geographic area. When operationally and financially viable, CBP executes standard maintenance contracts at CBP facilities that include recurring activities to preserve or sustain the facilities and support systems at the appropriate working level. This also includes the execution of the Facility Condition Assessment program, which is critical to identifying the condition of the CBP portfolio and identifying the top priority deficiencies.
- Repairs and Building System Replacements that address the need to restore a facility or the supporting infrastructure to working order or to replace damaged or deteriorated building and infrastructure assets, such as malfunctioning security systems, non-functioning perimeter fence lighting, leaking roofs, and broken heating, ventilating, and air conditioning (HVAC) units. Many of these issues are also tied to life safety issues that create an unsafe environment for CBP personnel, assets, and the public.
- Energy and Environmental Compliance and Remediation activities include actions required to conform to environmental and energy regulations and remediate life and safety issues tied to

environmental or energy components of the real property. This includes, but is not limited to, underground storage tanks and firing ranges.

Lease Renewals and Forced Moves

Within CBP's leased portfolio (roughly 20 million square feet), CBP is responsible for the one-time costs associated with the renewal of a leased facility or the forced move to another location; funding requirements are tied to the pending lease expirations and the security standards required at the facility. The costs include the installation and restoration of physical security requirements, voice and data cabling infrastructure, and limited space reconfiguration, which excludes aesthetic refreshes.

This also includes funding allocated for the tail-end infrastructure costs for the LPOEs whose design and construction requirements are funded through the Federal Buildings Fund. Due to GSA securing design and construction funding, in FY 2016 CBP is responsible for paying for the required Furniture, Fixtures and Equipment (FFE) for Phase III of the San Ysidro, CA LPOE; Laredo, TX Bridge I & II LPOE; and Derby Line, VT LPOE (I-91). FFE costs include the installation and fit-out of information technology infrastructure; security, voice, and data systems; and inspection-related equipment and other required items for the newly constructed or renovated space to be operational.

Capital Investments and Consolidations

In FY 2016, CBP has allocated funding to two major capital investment projects: construction of the Falfurrias Checkpoint and the consolidation of the Swanton Border Patrol Station and Sector Headquarters. CBP also plans to invest in a limited level of funding into further mobile work and consolidation efforts in the National Capital Region.

- Construction of the Falfurrias Checkpoint - Within CBP's portfolio, checkpoints present a serious concern for both CBP personnel and the general public as more and more people use the roadways and vehicle volume increases along the borders. There have been documented fatalities at checkpoints due to high speed accidents approaching and leaving the checkpoints due to inefficient lane space and outdated designs. The current Falfurrias Checkpoint presents one such checkpoint where the volume of traffic has led to accidents and extensive vehicle queue lines. Additionally, there are no adequate protective features for CBP personnel, including crash barriers, booths, bullet and blast resistant features, and the required space to conduct secondary inspections. To address these concerns, CBP has allocated funding in FY 2016 to design and construct a new checkpoint, which will include an 8-lane primary inspection for commercial trucks and passenger vehicles, non-invasive inspection lane, pre-enrolled access commercial traffic lanes (PACT) and a main building for operations and detention.
- Consolidation of the Swanton Border Patrol Station and Sector Headquarters - Within the real property portfolio, CBP is committed to identifying and pursuing operational efficiencies through consolidation of the infrastructure. In Swanton, Vermont, the current Sector Headquarters was built in 1965, is overcrowded, and does not have the required space to address additional needs and technology requirements that include surveillance and radio rooms that are operational 24/7. The closely located existing Swanton Border Patrol Station

has the space available to alter and expand to consolidate the requirements of the Sector Headquarters into the Border Patrol Station. To address the concerns of an outdated facility and to improve operations, CBP has allocated funding in FY 2016 for the design and construction to expand the current Border Patrol Station to consolidate the existing Sector Headquarters requirements and needs, including administrative space, dispatch space for the Command and Control components and relocating the existing vehicle maintenance operations to the Border Patrol Station.

CBP Facilities Cost-Saving Efficiencies

CBP is pursuing the following opportunities to meet mission goals in the current fiscal environment, while realizing cost-saving efficiencies.

- Cost efficient sustainment solutions – CBP has numerous efforts underway that reduce sustainment costs. This includes refining its FCA program, which assesses the health of approximately one-third of CBP’s owned portfolio each year. Over the span of three years, FY 2012 to FY 2014, CBP assessed all of its owned facilities, a process that included taking inventory of assets, identifying the current condition of the building and supporting systems, and projecting the schedule for needed replacements based on the expected end of useful life. By integrating the results of the FCAs into CBP’s real property system of record, known as TRIRIGA, CBP can become proactive, rather than reactive, in managing sustainment activity. As a result, CBP facilities staff continually works to identify the most pressing deficiencies in the inventory for near-term remediation, as well as develop an out-year budget strategy to ensure that the most critical building system replacements, such as HVAC, roofs, and plumbing, are addressed. Through existing regional maintenance contracts, executed at a large number of CBP’s owned facilities, rates have been negotiated as “bundled services,” which reduces the overall cost of the services by utilizing local contractors, and improves response times to address the emergency repairs due to the proximity of the maintenance personnel to the facilities. In FY 2015, CBP will reexamine the existing regional maintenance contracts and determine the best strategy to capitalize on the existing contracts, to ensure that the contract structure meets the sustainment needs of an aging and highly-utilized portfolio. The efficiencies and savings, both operational and financial, are anticipated to be realized beginning in FY 2016.
- Standard space designs – Specifically utilized in the planning, design, and construction of CBP-owned Border Patrol Stations, standard design has reduced delivery times while also decreasing design costs and improving cost estimates through increased accuracy during the construction phase and improved estimates for the full lifecycle of the facility due to standard use of assets. As part of the planning process, CBP is also targeting space utilization rates, specifically focused on providing mission support office space of 150 usable square feet per FTE. This space standard not only embraces a more consolidated and modern work environment, but also aligns with CBP’s commitment to reduce its office and warehouse space, in alignment with OMB’s Freeze the Footprint policy.
- Mobile Workforce – CBP is expanding its mobile work efforts throughout its mission support offices in the National Capital Region and other select offices portfolio-wide. In FY 2012 and

2013, the initial pilot realized total cost savings of over \$1.3 million in the CBP rent bill and operational budget, while improving communication between personnel. In FY 2014, CBP began to execute the second phase of its mobile work plan, specifically focused on Office of Administration (OA) offices in the National Capital Region. This effort is planned to expand to additional OA support offices in Euless, Texas; Indianapolis, Indiana; and Laguna Niguel, California in FY 2015.

- Consolidation and Co-locations – CBP is in the process of evaluating its space usage across the National Capital Region and evaluating opportunities to increase its space utilization rate through consolidation and mission integration. The results of these master planning efforts for regions, such as the National Capital Region, will improve CBP’s work environment through innovative workplace solutions, increased mission effectiveness, and improved space usage. Within the National Capital Region, CBP is also in the planning stages of a large consolidation effort of OIT offices. The proposed plan would consolidate eleven OIT offices into one. In addition to reviewing the National Capital Region, CBP is in the planning stage of further consolidation efforts for the upcoming years including consolidation of mission support space in Tucson, Arizona.

Facilities Construction and Sustainment – Select Adjustments to Base

This PPA includes an overall adjustment to base decrease of \$208.979 million, including an increase of \$569 thousand for facility activities associated with the increased CBP Officer staffing, funding realignments and decreases of \$11.400 million associated with the completion of the National Targeting Center (NTC) consolidation project, \$4.800 million for the realignment of funding to the Salaries and Expenses Rent PPA to support additional rent incurred by the consolidated NTC facility, and \$193.739 million for the realignment of funding for the rental payments of GSA LPOEs.

This adjustment to base includes an increase of \$569 thousand for the facility requirements associated with the CBP Officer increases as authorized in the *Consolidated Appropriations Act, 2014* (P.L. 111-83). The \$569 thousand will support the increased recurring utility and sustainment costs associated with the second phase of additional personnel assigned to existing facilities. An additional \$33 thousand is requested in the PO&M PPA to support the increase of CBP Officers in phase two.

This request also includes non-recurring costs of \$11.400 million as a result of the anticipated completion of the National Targeting Center consolidation effort. In FY 2014, CBP executed \$13.200 million for Phase I of the consolidation. In FY 2015, CBP has requested an additional \$18.000 million for the completion of Phase II, which includes the outfitting of the consolidated NTC facility. This consolidation will result in an improved space that better meets mission needs, including strategic co-location of appropriate groups. Recurring lifecycle costs for the NTC consolidation include \$1.800 million for annual sustainment of the new facility, which will remain in the FC&S PPA, as well as \$4.800 million which has been realigned from the FC&S PPA to the Salaries and Expenses appropriation, Rent PPA to fund the increase in annual rent obligations that will begin in FY 2016.

This request also includes an adjustment that realigns \$193.739 million from the Construction and Facilities Management (C&FM) Appropriation, Facilities Construction and Sustainment PPA to the Salaries and Expenses Appropriation, Rent PPA, to fund GSA-owned LPOE rent costs. Funding for

the GSA LPOEs was realigned from the Rent PPA to C&FM in FY 2014 to support facilities services and rent costs associated with an anticipated delegation of authority for LPOEs. This delegation is no longer anticipated at this time, therefore, the resources in the C&FM account supporting the GSA LPOE rent should be transferred back to the Rent PPA. (The appropriations language has also been updated to reflect this decision.) In lieu of the delegation, CBP is pursuing Service Level Agreements as a way to improve service delivery at GSA LPOEs.

Exhibit 7 identifies the realignments of facilities-related funding into the FC&S PPA from other accounts. For FY 2016, CBP is requesting to realign a total of \$424 thousand into the FC&S PPA for facilities-related activities.

Exhibit 7: FC&S PPA—FY 2016 Account Realignments

FY 2016 Permanent Business Partner Transfer	Appropriation/ PPA (From)	Appropriation/ PPA (To)	OCC (To)	Amount (\$s in thousands)
Building Operations and Services (Office of Information Technology)	Automation Modernization/OIT Salaries & Expenses	C&FM/ Facilities Construction & Sustainment	Operations and Maintenance of Facilities	\$20
Overtime Utilities (Office of Information Technology)	Automation Modernization/OIT Salaries & Expenses	C&FM/ Facilities Construction & Sustainment	Utilities	\$270
Building Operations and Services (Office of Border Patrol)	Border Security Control between the Ports of Entry/Border Security and Control	C&FM/ Facilities Construction & Sustainment	Operations and Maintenance of Facilities	\$134
Total				\$424

END ITEMS:

End Item: San Ysidro Land Port of Entry Phase III Fit-Out Costs

Estimated Cost per Item: \$18.1 million

Total Estimated Cost: \$18.1 million

Contract Information and Status: Not available at this time. Design and Construction of this facility was funded by GSA through the Federal Buildings Fund. CBP funds and executes the installation of furniture, fixtures and equipment upon completion of construction.

Budget and Funding (dollars in thousands)

Number of Items Procured (or Planned to be Procured)			1

Scope and Justification: CBP is responsible for the tail-end costs for the Derby Line Land Port of Entry in FY 2016. Tail-end costs, which include the installation of information technology infrastructure, furniture, security, voice/data, CBP inspection-related equipment, and other post-construction requirements, are required to outfit a new or modernized port of entry to make it operational before it can begin processing traffic.

End Item: Consolidation of the Swanton, VT Border Patrol Station and Sector Headquarters

Estimated Cost per Item: \$8 million

Total Estimated FY 2016 Cost: \$3 million

Contract Information and Status: Fixed price contract. The design for the consolidation of the Sector is underway. The consolidation will take place on CBP property and will allow discontinuing the lease on the current Sector HQ space.

Budget and Funding			
	FY 2014	FY 2015 President's Budget	FY 2016 President's Budget
Request (\$M)			\$3
Appropriations (\$M)			
Obligations (\$M)			
Unobligated Balance (\$M)			
Expenditures (\$M)			
Number of Items Procured (or Planned to be Procured)			1

*CBP will use prior year Construction & Facilities Management appropriation funding to fund the difference between total estimated cost and request in FY 2016.

Scope and Justification: The co-location will allow the Sector Headquarters space to be attached to the Swanton Border Patrol Station, which is owned by CBP, thus eliminating the rent costs and necessary tenant improvement costs that would have been required to update the Sector Headquarters facility if CBP was to continue to occupy. Further details of the project can be found in the Current Services section of the Construction & Facilities Management appropriation, Facilities Construction & Sustainment PPA submission.

End Item: Construction of the Falfurrias Checkpoint

Estimated Cost per Item: \$38 million

Total Estimated FY 2016 Cost: \$33 million

Contract Information and Status: Fixed price Construction contract to be awarded when funding is received in FY 2016. Real Estate and Environmental are cleared and the checkpoint is designed and request for proposal (RFP) is ready for release.

Budget and Funding			
	FY 2014	FY 2015 President's Budget	FY 2016 President's Budget
Request (\$M)			\$33
Appropriations (\$M)			
Obligations (\$M)			
Unobligated Balance (\$M)			
Expenditures (\$M)			
Number of Items Procured (or Planned to be Procured)			1

*CBP will use prior year Construction & Facilities Management appropriation funding to fund the difference between total estimated cost and request in FY 2016.

Scope and Justification: Rebuild the current Falfurrias checkpoint which does not meet current Border Patrol operational or trade requirements. The new checkpoint will increase the lanes from three to eight, which should eliminate the current traffic back-ups of over 4 miles. The new checkpoint will be designed and constructed to include Agent safety components. Further details of the project can be found in the Current Services section of the Construction & Facilities Management appropriation, Facilities Construction & Sustainment PPA submission.

FY 2016 Request		416	386	86,165

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP requests 386 FTE and \$86.165 million in FY 2016 for the PO&M PPA, which provides resources to support and guide Construction and Facilities Management activities. This PPA includes salaries and operational resources for Federal real property personnel, while allowing CBP the flexibility to allocate resources to the highest priority requirements in CBP's real property portfolio. The FTEs funded by the PO&M PPA also support the Border Patrol tactical infrastructure activities that are funded by the Border Security, Fencing, and Infrastructure Technology appropriation and rent activities that are funded by the Salaries and Expenses appropriation, Rent PPA. This alignment allows CBP to consistently plan and manage all aspects of CBP's facilities-related activities in order to

effectively meet CBP mission requirements. This PPA includes a reduction of 104 FTE and positions associated with the planned Delegation of Authority with GSA. CBP anticipated an increase in FTE associated with the GSA Delegation of Authority; however, in the absence of a formal Delegation of Authority, these positions will continue to be funded by GSA.

Exhibit 8 provides a crosswalk of the FY 2014 – 2016 PO&M PPA by activity. The table reflects the decrease for LPOE delegation activities associated with the realignment of funding from the PO&M PPA to the Salaries and Expenses Appropriation, Rent PPA, to cover LPOE rent costs. Note that the allocation between activities is subject to change to ensure CBP’s highest priorities for critical facilities solutions are funded.

Exhibit 8: PO&M PPA – FY 2014 to FY 2016 Spend Plan Crosswalk
(\$ in Thousands)

Total	\$ 71,305	\$ 97,068	\$ 86,165

Government Salaries & Benefits

The PO&M workforce is aligned to CBP’s real property portfolio and strategy. As such, CBP has professional real property personnel supporting the entire facility lifecycle. The workforce focuses on core functional areas including project management, facilities management, lease management, towers and tactical infrastructure oversight, as well as planning and management functions that enhance delivery of real property services to OAM, OFO, OBP, and MS components. Specifically:

- Project Management specialists are equipped to manage new construction, major repairs and alteration, and real estate acquisition activities. These employees have experience successfully managing complex projects from initiation to final close-out. Project management personnel coordinate all planning and project related decision-making efforts, associated with regular day-to-day actions, as well as for crisis situations, including environmental, real estate, target delivery dates, design, schedules, and change orders.
- Facilities Management personnel ensure that CBP facilities are maintained, operated, and repaired to support CBP operations on a daily basis. These personnel are responsible for maintaining and repairing both the interior and exterior of CBP facilities, as well as heating, ventilation, and air-conditioning (HVAC), mechanical, electrical, and plumbing systems, which require specialized training and licensing.
- Lease Management personnel are responsible for all types of CBP occupancy agreements including GSA-owned and GSA-leased facilities, direct lease and direct lease operated,

Interagency Agreements, and free space. Direct leased and direct leased operated are the most complex form of occupancy agreement, requiring specialized, warranted leasing contracting officers and other staff to manage and administer the leases. These complex lease activities include, but are not limited to: determining requirements; confirming local lease delegation authority; conducting market surveys and analyses; ensuring environmental regulatory compliance; approving design intent drawings; and overseeing construction, including furnishings and network installation. Additionally, lease management personnel perform leasing actions on leases managed by other providers (e.g., GSA), such as analysis of space requirements and oversight of the lease terms and conditions, among other essential activities.

- Tower and Tactical Infrastructure personnel support the unique real property assets that CBP utilizes to secure the border. CBP tower management focuses on sustaining each tower complex with the appropriate maintenance, repair, and operation activities. This includes periodic inspection of structural integrity, power generator operation, and upkeep of surrounding areas to eliminate unwanted interference to equipment operation. Due to the remote nature of many tower sites, it is also critical that the access roads are maintained. Tactical Infrastructure (TI) personnel operate and maintain the 651 miles of pedestrian and vehicle fencing, as well as the over 900 miles of access roads for these assets. Many of the access roads traverse private land, which requires a licensing agreement with landowners, to perform necessary maintenance and repairs to ensure accessibility of the roadways. TI personnel also ensure compliance with permit conditions established by the Department of the Interior and U.S. Forestry Service, including environmental mitigation measures.
- Planning and Management functions are performed by specialized CBP staff for the real property portfolio, including strategic planners, energy and environmental specialists, along with financial and frontline managers. Strategic planning and programming personnel provide the strategic direction necessary for CBP to develop and adjust real property service delivery to meet the dynamic mission needs of the organizational components and changing threat environments. Environmental managers ensure that CBP complies with all applicable federal, state, and local environmental regulations to protect CBP from civil and criminal prosecution. Energy and utility management personnel manage a centralized payment process for all CBP utility costs, and pursue and implement initiatives for energy and utility cost savings and improvements.

In addition to the salaries, benefits, and support for CBP's diverse real property workforce, the PO&M PPA also provides for other critical programs aligned to the management of CBP's real property portfolio. These programs include: CBP's Integrated Workplace Management System (TRIRIGA); energy and environmental initiatives; and program-level operational requirements and services. Operational requirements and services funded by PO&M equip real property personnel to manage CBP's facilities in the most economical and efficient manner possible through recertification training, access to industry-leading best practices, and professional communications and management services.

TRIRIGA Operations & Maintenance

TRIRIGA integrates real property and project management functions for CBP's portfolio lifecycle into a single web-based platform. Funds in the PO&M PPA provide for the operations and maintenance,

including critical updates and integration, for the TRIRIGA software and program. The real property workforce utilizes the system to actively track and manage CBP's diverse and vast portfolio of facilities and physical infrastructure, including:

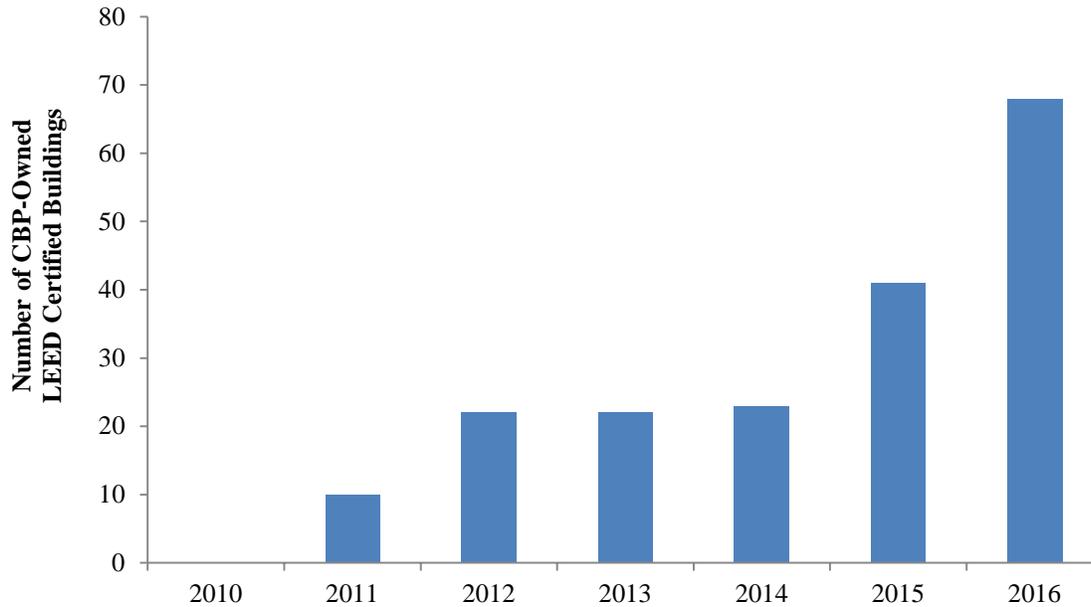

- 2,600 buildings occupied by the Offices of Air and Marine, Border Patrol, Field Operations, and Mission Support offices;
- 2,250 structures including Tactical Communications (TACCOM) and Remote Video Surveillance System (RVSS) towers;
- 4,650 acres of land; and
- 900 miles of tactical infrastructure fence, roads, and lighting.

TRIRIGA provides the source data to meet CBP reporting requirements for the Federal Real Property Profile and DHS's Real Property Data Warehouse, as well as critical facilities data for CBP's geospatial information systems. The system improves CBP's ability to enhance energy efficiencies, including tracking Leadership in Energy and Environmental Design (LEED) requirements, which permits CBP to comply with regulations for energy efficiency. CBP has also improved processes for managing building operations and maintenance utilizing facilities condition assessment (FCA) data recorded in TRIRIGA, as well as facility condition index (FCI) reports that TRIRIGA is able to generate on demand. Utilizing FCA data, TRIRIGA provides programming and planning data associated with replacement values, deferred maintenance, and long-term budgets for managing CBP's owned and direct lease operated real property portfolio. TRIRIGA currently has FCA data for nearly all CBP-owned facilities.

Energy & Environmental Initiatives

The PO&M PPA provides resources required to support day-to-day CBP operations, as well as to conduct and implement numerous environmental, energy, and planning initiatives, which span the full lifecycle of property use from procurement to disposal. Environmental and energy assessments, audits, and studies have allowed CBP to improve the energy efficiency and sustainability of its facilities. This encompasses the major areas of sustainable facilities, energy and water use management, recycling and reuse, green procurement, electronics stewardship, and pollution prevention. Sustainable buildings can have many benefits, including durability; reduced costs for energy, water, operations and maintenance; and improved occupant health and productivity. Since 2008, CBP has applied LEED standards to all projects within the design phase. As a result of these efforts, CBP has achieved LEED certification for 23 owned buildings, and anticipates a total of 68 LEED certified buildings by FY 2016. Exhibit 9 illustrates CBP's commitment and significant progress towards achieving sustainable green buildings.

Exhibit 9: LEED Certified CBP-owned Buildings

PO&M resources also help to ensure and improve CBP’s compliance with numerous laws, statutes, and regulations. To comply with the National Environmental Policy Act (NEPA), for example, CBP analyzes and discloses the potential for significant environmental impacts from its proposed activities and makes informed decisions about how to incorporate environmental and sustainability considerations into final project execution and ongoing operation and maintenance activities. Since FY 2010, CBP has discovered and resolved non-compliant findings which have resulted in a potential fine avoidance of nearly \$150 million.

Operational Requirements & Services

Additionally, the PO&M PPA provides funding for the personnel and resources required to pursue CBP’s space reduction and cost saving initiatives including the Office of Management and Budget’s (OMB) Freeze the Footprint policy and the June 2010 Presidential Directive *Disposal of Unneeded Federal Real Estate*. CBP personnel review space utilization rates and develop master plans for the consolidation space and also leverage information technology and workplace transformation solutions to realize operational efficiencies, which are anticipated to ultimately reduce CBP’s square footage. CBP personnel support efforts to decrease the footprint and increase space utilization by moving towards a Mobile Workforce. CBP successfully conducted a Mobile Workforce pilot in the CBP Office of Administration (OA) within the National Capital Region in FY 2012 – FY 2013. Phase II of the Mobile Workforce Initiative, currently underway, focuses on OA offices in the National Capital Region with a space reduction of 46 percent targeted for completion by June 2015; Phase III will focus on OA regional offices in Indianapolis, Indiana; Eules, Texas; and Laguna Niguel, California.

IV. Program Justification Changes

**Department of Homeland Security
Facilities Management
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Facilities Management Sustainment
PPA: Facility Construction and Sustainment
Program Increase: Positions 0, FTE 0, Dollars \$78,814

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$176,158
Program Increase							0	0	\$78,814
Total Request	0	0	\$401,473	0	0	\$385,137	0	0	\$254,972

Description of Item

CBP requests an increase of \$78.814 million to the Facilities Construction & Sustainment PPA to address the maintenance and repair backlog for CBP's real property owned portfolio. The funding increase will be used to remediate life safety and security requirements and repair facility deficiencies that are impacting operational capabilities and workplace quality. The funds will also be used to support required costs, including the installation or upgrade of security systems, at leased facilities. These costs are incurred as a result of mandatory relocations or are required to address security vulnerabilities and deficiencies upon renewal of existing occupancy agreements.

Justification

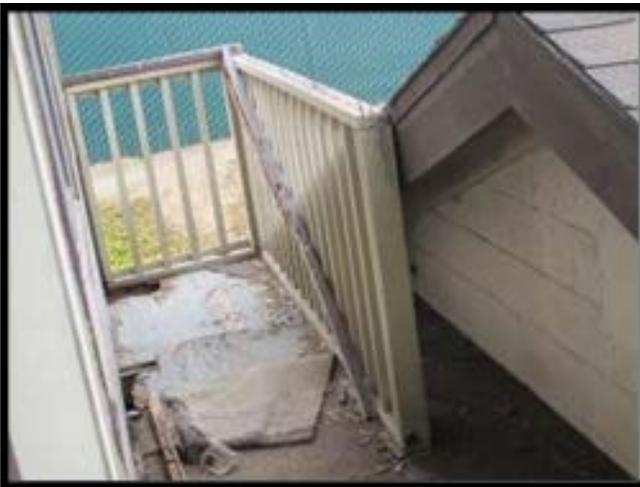

As the CBP facilities portfolio has grown, there has been little funding to address the sustainment of the new facilities coming online, as well as the necessary recapitalization of the existing, aging infrastructure. This backlog includes life safety and security issues for CBP personnel and the general public along with systems that are at high risk of failure, which will potentially cause interruptions to the successful execution of CBP's mission and operations. Examples include lack of safety barriers leaving Agents and the public exposed to traffic accidents at checkpoints, fire vulnerabilities, black mold, lack of ventilation, insufficient power generators, and non-functioning septic systems. The following images (on the next page) represent actual deficiencies at CBP facilities that are part of the current maintenance and repair backlog and would be addressed using funds from this program change:

Mold and Leaking HVAC in the Administrative Office Building at the Aguadilla, PR Airport

Broken Sump Pump and Drain System at the Ft. Covington, NY LPOE

Balcony with structural damage at the Chula Vista, CA Border Patrol Station

Rotting Structural Beams at the Kingsville, TX Maintenance Facility

As building operations and utility costs have increased, CBP has been unable to adequately maintain CBP's real property assets at the appropriate level. As a result, CBP's real property portfolio has a backlog of unmet maintenance and repair requirements, which is documented at over \$150 million in FY 2014⁴; a number that is expected to increase in FY 2015.

The FY 2016 funding request level will not address the entire backlog of maintenance and repair actions, but it will allow CBP to address the most critical of documented issues and therefore reduce its

⁴ It should also be noted that CBP is in the process of documenting all of the deficiencies captured during Facility Condition Assessments and therefore the backlog may increase. This backlog also excludes any deficiencies at direct, commercial, and federal leased facilities.

current backlog. However, future funding will be required to ensure that the backlog does not grow again, which will happen because the infrastructure will continue to age and building systems will reach the end of their intended useful life, will wear down, and will require replacement.

END ITEMS:

End Item: Installation of an Aqueous Film-Forming Foam (AFFF) Fire Suppression System at the Grand Forks, North Dakota Hangar

Estimated Cost per Item: \$2.3 million

Total Estimated Cost: \$2.3 million

Contract Information and Status: The design-build contract will be awarded to the US Army Corps Civil Engineers and US Air Force Civil Engineers.

Budget and Funding			
	FY 2014	FY 2015 President's Budget	FY 2016 President's Budget
Request (\$M)			\$2.3
Appropriations (\$M)			
Obligations (\$M)			
Unobligated Balance (\$M)			
Expenditures (\$M)			
Number of Items Procured (or Planned to be Procured)			

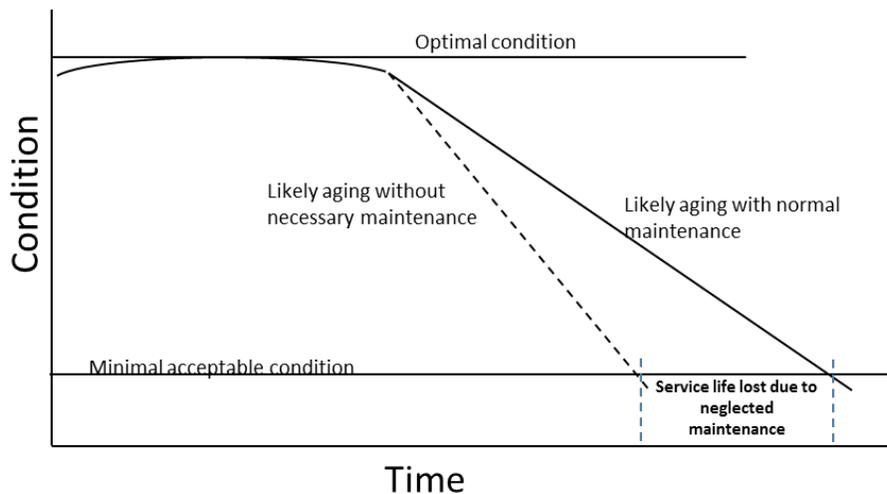

Scope and Justification: The current hangar which houses 4 air assets (2 MQ9, 1 AS350 and 1 C206) and CBP personnel work stations has no fire suppression system, which poses potential risk of damage or loss of assets and injury to personnel. The new system will include a High Expansion Foam System, Pre-Action System, Wet Pipe Sprinkler System, Heat Detection System and compatible Manual Fire Alarm System. Overhead foam discharge nozzles will cover the main hangar floor area (aircraft parking) and nose dock. The Wet Pipe Sprinkler System will protect the modular offices and other internal structures (tool room/shops).

Impact on Performance (Relationship of Increase to Strategic Goals)

CBP's real property portfolio supports every aspect of CBP's mission and goals. With over 4,500 operational and administrative facilities nationwide occupying over 26 million square feet, the real

property portfolio must perform 24/7 in support of CBP’s efforts to facilitate legitimate trade and travel through the official U.S. Ports of Entry (POEs); secure the Nation’s borders between the POEs via land, air, and marine patrols; and house and support frontline and administrative personnel in the fulfillment of CBP’s mission. Due to the constrained fiscal environment of recent years, CBP has been unable to invest adequately in its facilities, which has created the above mentioned backlog and have increased the risk of facilities having to temporarily close due to critical building systems that are not working and must be repaired or replaced.

The challenges that CBP currently faces have also been documented by the National Academy of Sciences in 2011 in their assessment of all federal facilities. The report, *Predicting Outcomes from Investments in Maintenance and Repair for Federal Facilities*, specifically focuses on the impacts of underinvestment in adequate maintenance and repairs for federal facilities: “continued underinvestment in maintenance and repair will lead to even greater deterioration and greater risk to the government.” The below chart, referenced as Figure 2-2 in the above mentioned report, illustrates the financial and operational impacts of inadequate maintenance and repair of a building system.

Furthermore, the National Academy of Sciences report goes on to identify the other impacts of inadequate maintenance and repair investment: “Probable adverse events include system failures that will disrupt agencies’ operations; higher operating and life cycle costs; hazards that lead to injuries and illnesses or loss of life and property; waste of water, energy and other resources; operational inefficiencies; continued greenhouse gas emissions; greater fiscal exposure related to facilities ownership; and even greater backlogs of deferred maintenance and repairs.” CBP has experienced many of these issues within its own portfolio including diverting increased levels of funding to emergency repairs at the detriment of day to day operations. In addition, unsafe working conditions with a high risk of destruction due to fire and a growing backlog of deferred requirements impairs the ability of CBP Agents and Officers to perform their mission.

Prioritization approach to minimize impacts to operations

CBP will apply the program increase as described below, with the ultimate goal of ensuring that CBP facilities are safe working environments that allow CBP to successfully execute each one of the strategic mission areas. Based on an increase of \$78.814 million, in FY 2016, CBP will address Priority #1, #2, #3, and begin to address the most critical of needs within #4, along with ensuring that any other emergency repairs and replacements are addressed that are not captured in the currently documented backlog.

CBP Priority #1: Critical Condition-the assessed asset presents a life safety issue, a code violation has been documented, has completely failed and is non-functional, or has deteriorated beyond the point of repair.

Representing the most severe of facility issues, many of these requirements create an unsafe environment for CBP personnel, assets, and the general public due to security or health safety issues. Examples of these deficiencies include non-functioning fire suppression systems, buckled roofs, corroded gas piping, backed up sewage systems and failed water heaters. Emergency repairs and replacements that occur throughout the year are also deemed critical and are top priority to be addressed. In CBP's reported FY 2014 backlog, this was almost \$20 million identified through CBP's Facility Condition Assessment (FCA) program.

CBP Priority #2: Poor Condition-the assessed asset is in poor condition, though still functioning, with significant issues that must be addressed through repair or replacement. Many of these systems are also functioning well beyond the end of their intended useful. Complete failure or the development of life safety issues, therefore resulting in an upgrade to 'Critical Condition,' is expected within the next two years.

As these systems are in poor condition, they are at high risk of becoming a critical issue and impeding CBP's operations and should be addressed as soon as all Priority #1 issues are remediated. Examples of these deficiencies include fire detection systems that are over 10 years beyond the intended useful life, roofs that are beginning to leak leading to bubbling in walls and ceiling tiles, inadequate cooling systems in IT and LAN rooms, misaligned doors and windows due to shifting building foundations, and damaged asphalt on airstrips and roadways used by government aircraft and vehicles. In CBP's reported FY 2014 backlog, this was \$20 million identified through CBP's FCA program.

CBP Priority #3: CBP Leased Facilities- CBP currently leases almost 20 million square feet of operational and administrative space. The FC&S PPA funds the security and outfitting costs, including installation of IT infrastructure, and the costs associated with the renewal of existing leases or the forced relocation of CBP personnel.

CBP has identified over \$20 million in required lease renewals and forced relocations that must be funded in FY 2016 based on lease expiration dates. The majority of these needs are at Field Operations facilities, specifically Port Offices, and Office of Information and Technology facilities. Due to the criticality of these facilities and the pending lease expirations, CBP must identify funding to address the security standards at these leased facilities. CBP continues to

follow its rent moratorium policy and OMB's 'Freeze the Footprint' mandate, so these requirements do not fund the expansion of administrative space.

CBP Priority #4: Fair Condition but Functioning Beyond Useful Life— *the assessed asset is in fair condition and is still functioning; however, an upgrade to 'Critical Condition,' is expected within the next three to four years.*

As systems continue to operate beyond their useful lives, they degrade quickly and the risk of system interruptions and therefore operational impacts increases. In addition, maintenance and repair costs increase as the National Academy of Sciences report described. Through the replacement of these aged systems CBP can address risk to current operations and also optimize the use of maintenance and repair funding instead of continuing to use a "band-aid" approach, where the Agency has performed minimal repairs to keep the system functioning. Examples of these deficiencies include lighting, plumbing, electrical and HVAC systems that are functioning beyond their useful life. In CBP's reported FY 2014 backlog, this amount was over \$110 million.

Department of Homeland Security
Facilities Management
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Canine Enforcement Program
PPA: Facility Construction and Sustainment
Program Increase: Positions 0, FTE 0, Dollars \$66

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$66
Total Request	0	0	\$0	0	0	\$0	0	0	\$66

Description of Item

CBP requests \$66 thousand in funding to support facilities support requirements associated with the overall requested increase to the Canine Enforcement Program (CEP). This includes utilities, workstations, chairs, and equipment to accommodate the increase in personnel and canines.

CBP's CEP plays a crucial role in anti-terrorism and interdiction efforts. Through the CEP, CBP has established and deployed a world-class detector dog program to augment existing technology while employing cutting edge detection capabilities. This program provides the Agency with a higher level of security and detection capability while maintaining a seamless conduit between existing technology and the proven capabilities of detector dogs. The OFO canine teams are strategically assigned to POEs around the United States and to preclearance operations abroad. CBP officers use specially trained detector dogs in interdiction and to support specialized programs aimed at combating terrorism, as well as narcotics, firearms, and undeclared currency smuggling at our Nation's borders, international airports, and seaports.

Canines also play an important role in the Border Patrol's mission of securing the border. Canines are used to detect illegal aliens, illegal drugs, and illegal currency at checkpoints and are used in field operations to track and apprehend illegal aliens. USBP has approximately 890 canines available for use. New canines are purchased and trained by OTD and transferred to the Border Patrol upon completion of training; the Border Patrol becomes responsible for the care and upkeep costs of the canines once they are transferred to its authority.

Overall, CBP requests a program increase of \$10 million to support an additional 47 canine teams for CBPOs, and 40 for BPAs. CBP proposes that this increase be funded out of the following PPAs: Automation Modernization’s Information Technology PPA; Construction & Facilities Management’s Facilities Construction and Sustainment PPA; and Salaries & Expenses’ Inspections, Trade, and Travel Facilitation, Rent, Administration, Internal Affairs, Training at the Ports of Entry, and Training Between the Ports of Entry PPAs. Increased budget authority, particularly efforts involving additional positions, often requires association with the multiple PPAs that support these new positions. CBP’s position cost model provides the capability to present and distribute the estimated necessary authority and FTE with any such increase in positions to the appropriate support offices. In most cases, position increases reflect authority and FTE in both the primary PPA associated with the increased capability and/or function, as well as the mission support PPAs responsible for hiring, vetting, training and outfitting the new positions. The total requested increase to the Canine Enforcement Program across all PPAs is \$10 million.

Justification

The primary goal of the CBP CEP is detection and apprehension of persons attempting entry to organize and carry out acts of terrorism and detection and seizure of controlled substances and other contraband, often used to finance terrorist or criminal drug trafficking organizations. Another critical role for CBP CEP is protecting America’s food supply from the importation of food products that may contain harmful pests or disease. CBP canine teams also assist local law enforcement agencies when requested.

An analysis of the following information has identified the POEs with the highest need for additional canine teams by enforcement discipline (Currency Firearms (C/F) and Human/Narcotic Detection (HNDD)).

- The number of CBPO positions currently allocated to POEs;
- Current number of canine teams, by discipline, at each POE;
- Borderstat and Operations Management Report (OMR) data to determine seizure incidents of narcotics, currency and firearms;
- Outbound data to ensure adequate outbound staffing and infrastructure were in place to support additional Currency/Firearms canine teams; and
- Planned facility expansion at each POEs.

Field Office	C/F	HNDD	Total
Atlanta	1	1	2
Baltimore	2	2	4
Boston	1	1	2
Chicago	0	2	2
Detroit	1	1	2
El Paso	0	2	2
Houston	0	1	1
Laredo	1	7	8
Los Angeles	0	1	1

Miami/Tampa	1	1	2
New York	1	1	2
San Diego	1	5	6
Tucson	4	9	13
TOTAL	13	31	47

USBP has a requirement for 1,115 canines and has developed a plan to reach this level over a five year period. The funding provided will allow OTD to procure and train the additional canines to achieve the USBP plan. This plan will incrementally increase the number of canines purchased each year over the original program and reach the desired end-state of 1,115 canines by Fiscal Year 2019 without overwhelming OTD’s capability to procure and train canines. No additional agents will be required under this plan, as agents assigned to canine duties will come from within the existing staffing floor.

Impact on Performance (Relationship of Increase to Strategic Goals)

The additional CBPO (Canine) positions will permit CBP to:

- Address the threat posed by transnational criminal organizations involved in human trafficking and narcotics smuggling into the United States.
- Counter the smuggling of illicit proceeds and firearms through the U.S. to other destinations.
- Further enhance the layered enforcement approach to disrupt transnational criminal organizations smuggling efforts by increasing vehicle, commercial shipment, and passenger/pedestrian searches.

Goal 1: Secure America’s Borders

The U.S. Border Patrol plays a critical role in securing our Nation’s borders between Ports of Entry (POEs) against all threats.

Measurable objectives, in which the USBP Canine Program is a key element, are to:

- Prevent terrorists and terrorist weapons from entering the United States between the POEs, as well as operational integration, planning, and execution with Federal, state, local, and tribal law enforcement partners.
- Manage risk through the expansion of sophisticated tactics, techniques, and procedures. These include methods such as “force multiplying” skills and abilities in which a USBP canine team has proven to be effective, efficient, and highly mobile.
- Disrupt and degrade Transnational Criminal Organizations by targeting enforcement efforts against the highest priority threats and expanding programs that reduce smuggling and crimes associated with smuggling.
- Increase community engagement by participating in community/school programs and engaging the public to assist the U.S. Border Patrol in informing and promoting the capabilities of the USBP Canine Program.

Department of Homeland Security
Facilities Management
Justification of Program Changes
(Dollars in Thousands)

Program Increase 3: Establish Counter Network Operations Capability
PPA: Facility Construction and Sustainment
Program Increase: Positions 0, FTE 0, Dollars \$281

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$281
Total Request	0	0	\$0	0	0	\$0	0	0	\$281

Description of Item

CBP requests \$281 thousand in Construction and Facilities Management to support facilities support requirements associated with the overall request to establish a Counter Network Operations Capability. This includes utilities, workstations, chairs, and other equipment to support the increase in personnel. CBP has developed a counter network strategy that is an agency-wide focus on combating transnational criminal organizations and terrorist networks leveraging our unique collection, targeting, and interdiction capabilities and extending this approach through interagency investigative and intelligence community partnerships. In total, funding will support applying advanced analysis and visualization tools to identify the nation's most challenging targets utilizing a multi-intelligence based approach. CBP will establish a focused counter network team in a collaborative analytic environment with access to data and tools to conduct advanced counter network analysis of the nation's key transnational organized crime and terrorist targets.

Overall, CBP requests a program increase of \$14.736 million to establish a Counter Network Operations Capability. CBP proposes that this increase be funded out of the following PPAs: Automation Modernization's Automated Targeting Systems PPA; Construction & Facilities Management's Facilities Construction and Sustainment PPA; and Salaries & Expenses' Rent, Administration, Internal Affairs, National Targeting Center, Training at the Ports of Entry, and Training & Development PPAs. Increased budget authority, particularly efforts involving additional positions, often requires association with the multiple PPAs that support these new positions. CBP's position cost model provides the capability to present and distribute the estimated necessary authority and FTE with any such increase in positions to the appropriate support offices. In most cases, position increases reflect authority and FTE in both the primary PPA associated with the increased capability

and/or function, as well as the mission support PPAs responsible for hiring, vetting, training and outfitting the new positions. The total request for this program across all PPAs is \$14.736 million.

Justification

CBP's unparalleled competencies (data, analytics, and global presence) and investigative neutrality ideally posture us to contribute to the global counter network effort. We therefore require an organizational structure that contributes to a counter network strategy that leverages partnerships to: (1) define and prioritize terrorist and transnational criminal networks; (2) contribute to building a viable counter network force; (3) collaborate in attacking terrorist and transnational criminal networks; (4) accurately assess the effectiveness of our attacks; and (5) rapidly adjust our post-attack strategies and tactics as necessary.

Undetected criminal and terrorist travel, contraband movement, and commercial and financial activity necessitates continued improvement in our ability to uncover the patterns and faint signals that exist within disparate sources of information. To successfully identify these patterns and signals, CBP will develop targeting and analysis tools speeding the work that CBP analysts are currently doing with CBP's unique data holdings. By fusing and correlating data across domains, and simultaneously protecting the privacy and civil liberties of Americans, DHS can better organize and exploit information to make more informed decisions regarding the risk presented by travelers attempting to enter the United States.

The funding requested will assist CBP in establishing an advanced analytics capability to support CBP's counter network cells at the National Targeting Center and border security efforts in the field. This capability will be enabled by three elements: (1) a focused analytics office that supports data science and intelligence analysis to facilitate counter network targeting efforts; (2) an advanced analytic tools suite that capitalizes on emerging big data platforms that utilize CBP's data holdings to better understand and define terrorist and transnational criminal organizations; (3) hardware and visualization systems to enable collaborative multi-agency initiatives to target priority threats.

CBP's National Targeting Center will promote the implementation and optimization of CBP's counter network efforts and strategy, strengthened by active collaboration across all CBP components to plan, coordinate, and evaluate our deliberate disruptive effects taken against terrorist and transnational criminal networks. In the field and abroad, CBP's regional command campaigns, centers, and operating elements will benefit from CBP's ability to leverage advanced tools, training, access, and partnerships to strengthen resilience against terrorist and transnational criminal network activities and execute unified deliberate actions with our interagency partners to disrupt and marginalize them.

Impact on Performance (Relationship of Increase/Decrease to Strategic Goals)

CBP's intent is to establish a dedicated counter network capability that partners with both domestic and international law enforcement and border centric agencies. This outcome requires FTEs and IT and contractor support that is dedicated to the initiative on a full time basis. With the requested \$14.736 million funding, the anticipated Counter Network Division within the National Targeting Center will be able to bring on board the needed 60 FTEs projected for FY 2016 and beyond, and will be able to establish the required IT enhancements needed for the initiative, as well as the necessary contractor support. The cumulative results would be:

- Counter network functions will be performed by dedicated NTC FTEs.
- Contractor support and IT support will result in ability to stand up a full mission capable counter network division within the NTC.
- The five phases of the counter network initiative will move forward and will accomplish the following satisfactory outcomes:
 - Define and prioritize terrorist and transnational criminal networks;
 - Contribute to building a viable counter network force;
 - Collaborate in attacking terrorist and transnational criminal networks;
 - Accurately assess the effectiveness of our attacks; and
 - Rapidly adjust our post-attack strategies and tactics as necessary.
 -

DHS QHSR:

Mission 2: Securing and Managing Our Borders

Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations

Objective: Identify, disrupt, and dismantle transnational criminal and terrorist organizations;
Disrupt illicit pathways

Department of Homeland Security
Facilities Management
Justification of Program Changes
(Dollars in Thousands)

Program Increase 4: UAS Crew
PPA: Facility Construction and Sustainment
Program Increase: Positions 0, FTE 0, Dollars \$59

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$59
Total Request	0	0	\$0	0	0	\$0	0	0	\$59

Description of Item

CBP requests an increase of \$59 thousand for facilities support requirements associated with the overall requested increase of an additional 15 Unmanned Aircraft System (UAS) crew in support of both operations along the southwest border and operations within the Source and Transit zone. This includes utilities, workstations, chairs, and other equipment to support the increase in personnel.

Overall, CBP requests \$8.4 million for 15 additional UAS crew. CBP proposes that this increase be funded out of the following PPAs: Air & Marine Salaries; Automation Modernization’s Information Technology PPA; Construction & Facilities Management’s Facilities Construction and Sustainment PPA; and Salaries & Expenses’ Rent, Administration, Internal Affairs, and Training & Development PPAs. Increased budget authority, particularly efforts involving additional positions, often requires association with the multiple PPAs that support these new positions. CBP’s position cost model provides the capability to present and distribute the estimated necessary authority and FTE with any such increase in positions to the appropriate support offices. In most cases, position increases reflect authority and FTE in both the primary PPA associated with the increased capability and/or function, as well as the mission support PPAs responsible for hiring, vetting, training and outfitting the new positions. The total requested increase for UAS Crew is \$8.4 million.

Justification

The UAS consists of a medium-altitude, long-endurance unmanned aircraft (MQ-9 Predator B), sensor communication packages, ground control, launch and recovery systems, operations, maintenance, technical and logistics support, pilots, and sensor operators to meet mission requirements in the three

major areas of responsibility: southwest border, northern border and southeast coastal area. The UAS supports border interdiction operations with long-range surveillance that provides real-time intelligence and situational awareness to border agents 24 hours a day - 7 days a week.

The 15 additional UAS crew will include eight Air Interdiction Agents; four Sensor Operators; three support staff positions; and the necessary salaries, benefits, overtime, premium pay, training, travel, law enforcement equipment, and supplies. The positions are needed to provide increased CBP aerial surveillance, enforcement, and security posture for surges similar to that of unaccompanied children illegally entering the U.S.

OAM took a staff level reduction in FY 2010 that prevented the hiring of additional UAS crew as more systems were being delivered and the operating tempo along the southwest border increased. As an interim measure, OAM cross-trained P-3 pilots and sensor operators whose aircraft were undergoing a service life extension to operate the Predator B and Guardian maritime UAS. Now that the P-3 SLEP is nearly completed and the P-3 wing is increasing its operating tempo, the pilots and sensor operators are no longer available to support the UAS Program. The additional UAS crews will make-up for the loss of the P-3 crew, and support increasing UAS operating tempo along the southwest border, in particular Arizona, South Texas, and support UAC operations should that problem increase in severity.

Impact on Performance (Relationship of Increase to Strategic Goals)

The UAS is a force multiplier with the following benefits:

- Ability to monitor extended border areas at any time of the day or night;
- Capability to vector ground support directly to vehicles or persons of interest;
- Provide ground personnel extended situational awareness of surroundings and operational area for potential threat identification purposes;
- Emergency or disaster support for other US government agencies; and
- Provide intelligence data to the Office of Intelligence and Investigative Liaison (OIIL) for analysis.

Some of the UAS results include: (FY 2014 figures below)

- VaDER Detections Investigated – 7,616
- Illegal Apprehensions – 1,834
- Drugs Seized – 70,577 lbs marijuana and 992 lbs cocaine
- Arrests – 54
- Vehicles Seized – 37
- Weapons Seized – 149

Total Investments	\$262,323	79,220	\$341,543		

CONSTRUCTION AND FACILITIES INITIATIVES

1. Project Description, Justification, and Scope

The CBP C&FM account provides the facilities solutions and associated infrastructure required to obtain and maintain operational control of the border. It addresses the requirements for new, modernized, expanded, and sustained facilities to fulfill immediate mission-driven operational needs; accommodates increasing capacity demands associated with new agent, officer, pilot, and asset deployments; provides resources to modify and/or correct deficiencies within existing facilities and structures; and allows CBP to proactively manage the real property inventory and facilities portfolio. The FY 2016 request focuses mainly on sustainment activities of CBP's Construction and Facilities Management Program.

2. Significant Changes

The FY 2016 request includes the centralization of facilities resources, except funding resources associated with rent and rent-related costs, from across CBP operational and mission support components into the C&FM account. Consolidating facilities resources in this account allows CBP to manage its facilities portfolio more efficiently by funding the highest priorities while enabling offices to focus solely on their core mission responsibilities and can also yield significant cost savings and achieve efficiencies for the Construction and Facilities Management Program. The request includes a realignment of \$206.098 million to the Salaries and Expenses Rent PPA to support continued rental payments of GSA LPOEs. Additionally, there is a program change increase of \$78.814 million for CBP Facilities Infrastructure Sustainment.

3. Project Schedule

6. Method of Performance

CBP's Facilities Management & Engineering (FM&E) Directorate provides the facilities, infrastructure and related services to CBP's operational components, known as Business Partners, in direct support of their law enforcement and other mission focused functions. As the agent of CBP's multi-billion dollar real property portfolio, it is FM&E's responsibility to be CBP's trusted and valued steward of real property and environmental solutions and services. To best meet this goal, FM&E has aligned its four Program Management Offices (PMOs) to the operational components within CBP. The PMOs include Air and Marine Facilities, Border Patrol Facilities and Tactical Infrastructure (BPFTI), Field Operations Facilities, and Mission Support Facilities.

Through the PMO structure, FM&E is a driver and active participant in the lifecycle of CBP facilities from the time an operational requirement is identified through acquisition, construction, sustainment, and finally in the disposal of the asset at the end of its useful life. In support of the portfolio lifecycle,

FM&E is responsible for assuring that facilities can support the operational components in addressing their evolving missions in a changing threat environment. FM&E's work includes the identification, planning and execution of building operations; maintenance, repairs; construction and alterations; leasing actions associated with renewals and forced moves; environmental and energy compliance and initiatives; portfolio and master planning; tunnel remediation and the historic preservation of qualifying facilities.

As part of the planning and execution process that supports the sustainment of CBP's portfolio, FM&E determines its baseline sustainment needs, for the near term and into the out-years, using industry standards. FM&E specifically uses the Federal Facilities Council (FFC) standard which is based on the Plant Replacement Value (PRV) of the portfolio. The FFC standards identify four areas of facilities sustainment activity and the required funding level. FM&E will then use these industry standards as a guide as the Directorate aligns its sustainment strategy and needs within available funding levels. The following outlines each area of facilities sustainment activity based on FFC standards:

- *Building Operations and Services (5% of PRV)*
Building Operations and Services are the required day-to-day activities needed to keep CBP-owned facilities open and functional. Activities include: utility costs, pest extermination, waste disposal, grounds upkeep, janitorial services and snow removal.
- *Maintenance and Repairs (4% of PRV)*
Maintenance and Repairs includes the required recurring sustainment activities including the routine maintenance of plumbing and heating systems along with the unplanned repairs that may deem a building system, such as fire suppressing sprinkler systems, non-operational. This also includes remediation efforts to address fire-life safety, OSHA and ADA violations.
- *Building Systems Recapitalization (2% of PRV)*
Building Systems Recapitalization assures that facility support systems, such as Information Technology, HVAC, security, plumbing and electrical, are compliant and modernized to meet mission needs. The funding will be required either at the end of the assets useful life so the system can be replaced or throughout the assets lifecycle as systems need to be modernized to assure that systems meet mission needs.
- *Lease Renewals and Forced Moves (4% of the Rent Bill)*
Lease Renewals and Forced Moves activities are the one-time costs associated with renewing CBP's leased facilities in place or relocating to a new facility. These costs include putting in place the necessary infrastructure to support daily mission operations including perimeter security infrastructure, physical security alarms, cabling, voice, data and IT infrastructure equipment and fixtures and furniture.

Using the FFC standards as a guide, FM&E identifies the minimum 'must have' sustainment requirements to assure the real property portfolio is operationally viable, especially for the day-to-day operational and maintenance contracts at CBP-owned facilities. As the portfolio has grown significantly over the past fiscal years, FM&E continues to pursue cost-efficient efforts to assure that all CBP-owned facilities are appropriately maintained and operational and extend the useful life of the

facility. These cost reducing efforts include regional maintenance contracts, which have proved to reduce overall costs and improve response times to emergency repairs. The day-to-day maintenance efforts may be part of a larger regional contract that supports facilities of multiple Business Partners or are included in a contract designed specifically for the type of facility of a particular portfolio depending upon the location and type of facility. FM&E is constantly reevaluating its approach to sustainment and will consistently review, realign and establish the appropriate levels of service and associated costs to assure facilities are operational and functional.

During the lifecycle of a facility, specific, unbudgeted, issues may arise that must be addressed including repairs or premature replacement of a non-functioning building system. As part of the FFC standards and fiscal planning, PMOs will account for these unexpected issues as part of their overall budget request based off historical figures and the current state of the facilities. These deficiencies are identified through Facility Condition Assessments (FCAs) which are performed on a three-year cycle at CBP-owned facilities. FCAs represent the source metrics for CBP's overall Facility Condition Index (FCI). The FCI allows FM&E to evaluate the health of its owned facilities portfolio. An FCA identifies the condition of the asset, deficiencies, and when renewals will need to be performed as a result of the asset reaching the end of its useful life.

While the FCAs represent one portfolio-wide source, many of the deficiencies are identified through regular site visits to the facilities and recurring, direct communication between the Business Partner and the PMO. Furthermore, through some of its operational and maintenance contracts, FM&E has set up call centers and work ticket systems for facility managers and users to identify and report repair and maintenance needs throughout the course of the fiscal year. When budgeting for repairs and replacements, FM&E records its deficiencies in its integrated workplace management system called TRIRIGA, which allows FM&E to integrate real property and project management functions necessary to manage the lifecycle of the real property portfolio in a single web-based technology platform. TRIRIGA helps to identify needs and assists in the development and execution of spend plans.

For capital facility projects that exceed a \$1 million threshold, FM&E requires a Requirements Documentation and Alternatives of Analysis (RDAA) justification for each project in order for the identified facility solution to be considered for potential funding. Capital projects involve construction, significant alterations to an existing facility, and lease acquisitions that include major tenant improvements. These requirements are most often communicated to the Business Partner through a Mission Need Statement that will require a facility solution to accommodate a change in mission requirements. This may include the relocation of personnel or assets or an increase or refocus of mission in a particular location. The PMO will then determine the facility solution that is the most cost-efficient while also meeting the needs of the operational component. Through the development of the RDAA package, the PMO will scope, schedule and analyze various ownership alternatives including lease versus owned, co-locations, consolidations, interagency agreements, and public private partnerships.

The RDAA package is used as justification at two points during FM&E's budget request process:

1. The RDAA is used to inform the Capital Facilities Investment Plan (CFIP) which identifies and prioritizes the major, out-year, unfunded real property needs as part of the five-year Resource Allocation Plan (RAP) process. Submitted annually to the Commissioner or Deputy

Commissioner, the CFIP aligns numerous strategic documents including CBP Integrated Planning Guidance, the CBP Office of Program Development's Programming Guidance, and takes into account the mission impacts and political sensitivities of the operational components. The CFIP is first prioritized using a real property orientated grading criteria and then is reviewed at numerous levels of governance including FM&E senior leadership, the Mission Directors of the Business Partners, and the CBP Assistant Commissioners and Chiefs. The Commissioner or Deputy Commissioner then gives final approval which represents leadership concurrence with CBP's real property priorities.

2. In development of the Budget Year spend plan, the RDAA is used to justify the funding of near-term, discrete project requirements that do not support the sustainment of the existing portfolio. As with the CFIP, these projects are over the \$1 million threshold and developed in response to a Business Partner need. At this point in the budget process, the scope, schedule and cost are finely defined and are ready for execution as soon as funding becomes available. The thoroughly defined RDAA is crucial for FM&E leadership in determining whether a capital project should be given funding over other sustainment requirements. Major CBP programmatic focuses, such as an expansion of mobile work or facility projects that result in a positive return on investment, are factored into the leadership decision.

As, both sustainment and mission facility requirements are identified through recurring maintenance and operations contracts, FCAs, direct communication with the Business Partner or Mission Need Statements, the requirement is classified within FM&E's Category Matrix. These categories include:

- building operations;
- maintenance;
- repairs;
- construction;
- alterations;
- leasing actions associated with lease renewals and forced moves;
- environmental and energy;
- planning;
- tunnel remediation; and
- historic preservation.

These categories are then broken down into sub-categories which provide more detail into the actual activity. Special Identifiers are then used as a third tier and are the most finite level of identification used to distinguish those projects with a particular focus; for example, addressing fire-life safety violations or major strategic initiatives or policies, such as space consolidation.

After identifying the requirements and the associated category of the facility activity, projects are submitted to FM&E leadership for funding consideration. Due to the extensive needs across the real property portfolio, requirements are prioritized using FM&E's Integrated Planning Guidance (IPG), which is aligned to CBP's IPG, FM&E's Strategic Plan and other strategic documents within DHS and CBP. For FY 2016, the primary drivers by which facility requirements were prioritized for funding were:

- meeting legal and regulatory obligations, and providing safe and secure facilities for CBP employees and the general public;
- carrying out stewardship responsibilities by ensuring appropriate maintenance and operations of the existing footprint;
- providing facilities support for mission critical strategic CBP initiatives;
- developing initiatives that produce lifecycle cost savings; and
- abiding by “Freeze the Footprint”.

After prioritization and approval from the Business Partners through the Facilities Management Council, FM&E leadership finalizes the upcoming Budget Year Spend Plan which includes the funded facility projects for that fiscal year. Leadership will consider any political factors and pressing needs that may have arisen during the requirement development process.

After project requirements are analyzed, prioritized, approved for funding, and appropriated funds, FM&E executes procurements through the CBP Office of Procurement, U.S. Army Corps of Engineers (USACE), and U.S. General Services Administration (GSA) for the execution of its capital and some sustainment work. Due to the recent transfer of wage-grade personnel from the Border Patrol to the BPFTI PMO, some sustainment activities at Border Patrol facilities are executed directly by FM&E personnel. Additionally, through a memorandum of agreement, USACE provides services to CBP on an as needed basis. These services include consolidated program management services for real estate planning and acquisition, planning and programming, environmental planning and compliance, design and cost engineering, construction and warranty enforcement, and integrated occupancy services.

During the year of execution, approved facilities projects are tracked through Program Management Reviews, conducted by FM&E leadership, on a bi-monthly basis for each PMO portfolio. Projects in-progress, which may be completed over several fiscal years, are consistently tracked and reported by project managers in the field. This tracking monitors the project delivery for alterations construction and leasing activities through industry standards, including each project’s schedule, scope, and budget. Obligation plans and project completion schedules are tracked within the CBP accounting system and FM&E’s integrated workplace management system, TRIRIGA. These systems include modules that store specific information on all aspects of each asset. The real property profile performance data can be used to produce financial, procurement, real property, and project indices for measuring the performance of the assets and the services that support it.

Facility Construction and Sustainment Mission Statement

Facilities Construction and Sustainment provides facilities management, acquisition, construction, leasing, and sustainment of CBP occupied facilities, and associated infrastructure and services, that the U.S. Customs and Border Protection needs to perform its enforcement and trade facilitation mission.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
Total, Salaries & Benefits	-	-	-	-

No change from FY 2015 to FY 2016.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$0	\$176,744	\$0	(\$176,744)

An increase of \$16,995,000 is an object class realignment. A decrease of -\$193,739,000 is a realignment for rent payments of GSA LPOEs.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$65,859	\$33,548	\$23,844	(\$9,704)

An increase of \$270,000 is for the consolidation of utilities. A decrease of -\$9,974,000 is an object class realignment.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$56,004	\$28,121	\$28,874	\$753

An increase of \$753,000 is an object class realignment.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.4 Operation and Maintenance of Facilities	\$158,965	\$112,235	\$122,863	\$10,628

An increase of \$154,000 is for the consolidation of utilities. A decrease of -\$48,655,000 is an object class realignment. An increase of \$536,000 is to annualize two-year funding for FY 2014 increase to CBPO staffing. An increase of \$59,000 is for an additional UAS crew. An increase of \$58,534,000 is for facilities management sustainment.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$20,564	\$16,489	\$41,997	\$25,508

An increase of \$4,881,000 is an object class realignment. An increase of \$281,000 is to establish counter network operations capability. An increase of \$66,000 is for additional canines for the Office of Field Operations and Office of Border Patrol. An increase of \$20,280,000 is for facilities management sustainment.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
32.0 Land and Structures	\$96,102	\$18,000	\$37,800	\$19,800

A decrease of -\$11,400,000 is to non-recur the consolidation of the National Targeting Center. An increase of \$36,000,000 is an object class realignment. A decrease of -\$4,800,000 is a realignment to support NTC facilities.

Program Oversight and Management Mission Statement

Program Oversight and Management provides for the programmatic studies, services, initiatives, as well as contract support and services required to support the administration and management of facilities and construction programs, program management oversight, and project management oversight.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$44,659	\$39,240	\$30,898	\$(8,342)
11.3 Other than Full-Time Permanent	\$25	-	\$2	\$2
11.5 Other Personnel Compensation	\$678	\$521	\$530	\$9
12.1 Civilian Personnel Benefits	\$12,530	\$16,582	\$14,277	\$(2,305)
Total, Salaries & Benefits	\$57,892	\$56,343	\$45,707	\$(10,636)

An increase of \$94,000 is for retirement contributions. An increase of \$662,000 is for the 2016 1.3 percent pay raise. An increase of \$220,000 is to annualize the FY 2015 pay raise. A decrease of -\$12,070,000 is a realignment for rent payments of GSA LPOEs. An increase of \$458,000 is to realign mission support funding from the FY 2014 CBPO initiative.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$923	\$1,326	\$1,175	\$(151)

An increase of \$33,000 is to annualize two-year funding for FY 2014 increase to CBPO staffing. A decrease of -\$184,000 is a realignment for rent payments of GSA LPOEs.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$374	\$403	\$366	(\$37)

A decrease of -\$37,000 is a realignment for rent payments of GSA LPOEs.

BUDGET REQUEST AND SUPPORTING INFORMATION

**U.S. Customs and Border Protection
Air and Marine Interdiction**

I. Appropriation Overview

A. Mission Statement for Air and Marine Interdiction:

CBP protects the Nation through the coordinated use of integrated air and marine forces to detect, interdict, and prevent acts of terrorism and the unlawful movement of people, illegal drugs, and other contraband toward or across the borders of the United States. The CBP Office of Air and Marine’s (OAM) core competencies include air and marine interdiction, air and marine law enforcement, and air and national border domain security.

OAM has a staff of over 1,700 personnel, including pilots and aircrew, air and marine law enforcement officers, operations specialists, logistics and maintenance support personnel, and administrative support personnel. Mission critical assets for FY 2015 are: 267 aircraft (including fixed wing, rotary helicopters, and unmanned aircraft systems), 305 marine vessels, the Air and Marine Operations Center (AMOC), fixed and mobile surveillance equipment, ground vehicles, training facilities, maintenance facilities, aircraft hangars, and marine facilities located along the land and maritime borders and at key interior support locations.

B. Budget Activities:

The Air and Marine Interdiction appropriation is comprised of three major Program, Project, and Activities (PPAs): Salaries and Expenses, Operations and Maintenance, and Procurement.

Funding for the Office of Air and Marine is divided amongst the following key functions and capabilities:

Key Mission Areas and/PPA	Key Functions and Capabilities	Funding (Dollars in Thousands)
Salaries & Expenses	Salaries and Expenses funds salaries and benefits for OAM’s personnel force, permanent change of station (PCS), overtime/premium pay, ammunition, tactical law enforcement gear and equipment , administrative training and travel, and school tuition for dependents of employees in foreign countries.	\$306,253
Operations and Maintenance	Operations and Maintenance funds aircraft and marine vessel maintenance and logistic support, training, fuel, material repairs, operating base support, and engineering.	\$ 395,169

Key Mission Areas and/PPA	Key Functions and Capabilities	Funding (Dollars in Thousands)
Procurement	Procurement funds are used to purchase new aircraft and marine vessels and to recapitalize existing assets to extend service lives, enhance mission effectiveness and/or lower life-cycle maintenance costs.	\$ 46,000

OAM Estimated FY 2015 Carryover Funding and PPA Breakout

Treasury Account Symbol	Amount (in millions)	Purpose of Funds by PPA	Projected Obligation Date
70 X 0544	\$36.6	Proc \$31.6M O&M \$5.0M	Proc FY15 Q2-4 O&M FY15 Q2-4
70 3/5 0544	\$5.5	Proc \$3.1M O&M \$2.4M	Proc FY15 Q2-4 O&M FY15 Q2-4
70 4/6 0544	\$72.7	Proc \$57.8M O&M \$14.9M	Proc FY15 Q2-4 O&M FY15 Q2-4

The above exhibit shows the estimated carryover as of September 30, 2014, for the various Air & Marine Interdiction Operations and Maintenance and Procurement Appropriations (No-Year and Multi-Year).

C. Budget Request Summary:

DHS requests 1,737 positions, 1,734 FTE, and \$747,422,000 in FY 2016 for Air and Marine Interdiction. This funding level is \$38,737,000 more than the FY 2015 President's Budget request level. This request includes a net adjustments to base decrease of \$47.501 million, and program increases of \$86.238 million. These increases would provide funding for increased flight hours, an additional 15 UAS Crews, two KA-350CER MEAs.

Program Changes	UAS Crew	15	15	7,738
FY 2016 Request		1,737	1,734	306,253

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Air and Marine supports the DHS Strategic Plan (FY 2012 – FY 2016), Mission 2, *Securing and Managing Our Borders*, Goal 2.1 to *Secure United States Air, Land, and Sea Borders*, and the Five Year Homeland Security Program (FYHSP) *Securing America's Borders*, by preventing contraband, illegal migrants, terrorists and terrorist weapons from entering the United States. The Strategic Plan also includes the personnel that perform the mission.

**Exhibit 1: Air & Marine Salaries & Expenses FY 2016 Funding Request by Position
(including Non-personnel)**

Air and Marine Operations - Salaries and expenses	FY 2016 Positions	FY 2016 Request (\$000)	% of Total
Air and Marine Interdiction Agents	1,111	\$190,476	62.20%
Other Salary	626	\$108,106	35.30%
Non-Salary	0	\$7,671	2.50%
Total	1,737	306,253	100.00%

OAM organizes, trains, and equips CBP’s nationwide air and marine assets, which are deployed to 114 branches and smaller units located at strategic points along the land and maritime borders. The branches and units house an integrated and coordinated air and marine personnel force, including Air and Marine Interdiction agents who patrol the skies, oceans, lakes, and rivers and conduct covert and overt operations to prevent the entry of weapons of terror, interdict illegal narcotics, prevent the illegal entry of undocumented aliens, and to support interior investigations. The agents deploy to natural disaster areas to assist in recovery operations and to fly low-level damage surveillance missions over varied terrain. They also provide airspace security over national events, including the Presidential Inauguration, political conventions, and major public events such as the Super Bowl.

OAM continues its assessment of the efficiency and effectiveness of its force laydown to determine where assets, people, and maintenance support should be concentrated in order to continue meeting CBP and DHS mission needs within the resources projected for the out-years. The assessment showed a mismatch of aircraft types, numbers, and crew along the northern region, and a growing gap in support along the southwest region, in particular the Rio Grande Valley. The evolving mission along the northern region now calls for a smaller number of light helicopters and light aircraft, best suited for surveillance missions and support for investigations conducted mainly by Immigration and Customs Enforcement (ICE), the Federal Bureau of Investigations (FBI), the Drug Enforcement Agency (DEA), and state and local law enforcement, and also ideal for Border Patrol support. The exception was the Great Lakes region and the operating areas around Bellingham, WA, where longer range maritime missions still required more capable, twin-engine aircraft. At the same time, OAM recognized a rapidly growing Border Patrol support mission around McAllen and Laredo, TX, reflected in a dramatic rise in the operating tempo through FY 2014. The border security mission needs were initially met by temporary assignments of aircraft and crew, as well as maintenance and logistics personnel, from branches and units in the general area of responsibility. The best available information pointed to the need for a more permanent solution, so in late FY 2013 OAM began a gradual re-alignment of assets and people from the northern region to the southwest border.

The implementation of the re-alignment will take between three and five years, and will be budget neutral. Each year, trade-offs will be conducted among staffing, permanent change of station (PCS) actions, and premium / weekend overtime pay needed to support prime time operations in order to re-balance OAM to the mission and its operating tempo. It should be

emphasized that no northern region branches or units will be closed, but the aircraft, marine vessel, and staffing mix will change.

Through the end of FY 2014 seven aircraft, two marine vessels and 74 Agents (40 AIA and 34 MIA) have been realigned from the northern Border. Before the end of FY 2015, two additional marine assets and 13 additional personnel will also be realigned. OAM anticipates the realignment of 14 personnel, 2 vessels, and 1-2 aircraft per year over the next three years to complete the northern border realignment.

Completed	7
In Progress	0

Note: Agent and Asset decreases reflect net changes and subject to adjustment

Unrelated to the re-alignment, the unmanned aircraft system (UAS) launch site at Canaveral AFS, FL, closed in June of 2014, in favor of operating the two unmanned aircraft assigned there from Corpus Christi, TX, and Sierra Vista, AZ. Over time, the inefficiency of the Canaveral operation became apparent and the need to have additional UASs closer to the southwest border became compelling. Moving these UASs to the southwest border allows OAM to more effectively employ the new Vehicle Dismount and Exploitation Radar (VADER) broad area sensor over the land border, and coordinate maritime UAS operations in the Gulf, along the coast of California, and to the drug Source and Transit Zones in the eastern Pacific and Gulf, from South America to the coasts of Mexico and the United States.

Exhibit 2 summarizes OAM projected mandatory retirements for FY 2016.

CURRENT SERVICES PROGRAM DESCRIPTION:

Aviation and Marine Missions, Operating Levels, and Readiness

OAM supports a variety of missions and receives assignments from a variety of mission owners, consistent with DHS and CBP priorities, effectively utilizing the available intelligence on threats and how they are evolving, as well as the experience of the air and marine field leaders. OAM conducts periodic reviews and assessments of its missions, their operational requirements, and resource distributions that inform its long term strategy and dictate annual changes to asset deployments, staffing assignments, and flight hour allocations. Each year, based on available funds, OAM allocates flight hours and associated fuel funding to the branch levels, and for each aircraft type. In general, OBP is allocated 72 percent of all flight hours for border security missions, while ICE is given a fairly consistent 11 percent. All other federal agencies (FBI, DEA, USSS, DOD, DOE, and DOI) are generally allocated about 12 percent, while state, local, and tribal law enforcement activities are given up to 5 percent.

Within these percentages, the P-3 long range patrol aircraft allocation to the Joint Interagency Task Force – South (JIATF-S) for drug source and transit zone missions varies from 8 percent to 10 percent

each year, depending on available resources, while Unmanned Aircraft Systems (UAS) operations are growing and the program comprises 7 – 8 percent of the total hours for the last two years. Support for the Federal Emergency Management Administration (FEMA) varies greatly from year-to-year and is generally provided above appropriated levels because response and recovery efforts related to man-made and natural events are reimbursable under the *Stafford Act* (PL 100-107).

OAM operations and maintenance budgets are driven by the number of operating sites supported, the types and numbers of aircraft (along with their ages), and the operating tempo. They are also influenced by industry inflation, which can exceed inflation in other sectors of the economy by a few percentage points. Within the total O&M budget for a given year, fixed costs consume most of the available funding and include maintenance and logistics contracts with their associated work forces, directed programs, such as Long Range Radar, inter-agency or foreign partner agreements, base operating expenses, and training. Variable costs, such as fuel, spare parts, travel, the repair of repairable components, and other consumable supplies average near 20 percent of the total. In the short term, variable cost funding levels determine the available flight hours and levels of aircraft and marine vessel readiness. Over the long term, funding levels can drive changes to fixed cost components, requiring a more or less permanent change to operating locations, support contracts, asset levels, and staffing as well as to OAMs operating tempo and mission sets. OAM conducted an operational assessment in the second half of FY 2013 that concluded a re-alignment of assets and personnel was needed in order to more efficiently support CBP and DHS priority missions. The FY 2016 request for O&M funding shows little change at the macro level, but at the branch and unit level will reflect the ongoing migration of resources to the southwest border.

Air and Marine Mission Sets

OAM's implementation strategies are based on positioning CBP's aviation and maritime assets to provide expertise and responsiveness in several strategic mission sets, each critical to the overall success of priority CBP and national missions. The Budget supports up to 91,373 projected flight hours in FY 2016. OAM will continue to provide support to CBP's primary missions along the southwest border, the drug Source and Transit Zones, and the Secretary's priority mission in and around Puerto Rico. The following mission sets reflect OAM's core competencies:

- Air to Land Enforcement – Involves the capability to search, detect, identify, track, and respond to suspect ground tracks of interest moving by vehicle or on foot. Interdiction can occur on approach to the land border, at crossing points, or after the border has been breached. Air to land interdiction is conducted in all geographic conditions and at all borders.
- Air to Air Enforcement – Involves the capability to search, detect, track, and sort airborne suspect tracks of primarily general aviation aircraft. In a national security role, this serves the function of determining hostile intent of the suspect aircraft. Air interdiction is conducted over both land and sea in all weather conditions and operating environments. This mission includes, but is not limited to, an apprehension capability far before a suspect air track approaches the border, as the border is crossed, and well into interior airspace.
- Water to Water Enforcement – Involves the capability to search, detect, identify, and track waterborne suspect tracks of interest. Marine interdiction can involve an integration of aviation

and maritime asset capabilities. Waterborne apprehensions include, but are not limited to, preventing persons or items from illegally entering the United States from foreign ports of call.

- Air and Marine Domain Awareness - Involves the employment of OAM's reconnaissance, surveillance, and target acquisition (RSTA) capabilities to provide situational awareness in all operating environments. This includes determining suspect tracks requiring enforcement actions. OAM has ground based, airborne, and coastal/riverine RSTA capabilities with hemispheric reach to manage this capability.

The Air and Marine Operations Center (AMOC) is the Nation's only federal law enforcement center tasked to coordinate interdiction operations in the Western Hemisphere. Located at March Air Reserve Base in Riverside, Calif., the AMOC was established in 1988 as a law enforcement Domain Awareness center to counter the airborne drug smuggling threat. OAM has expanded the AMOC's role in air and marine interdiction, and today the AMOC provides detection, monitoring, sorting, tracking, and coordination of law enforcement response to suspect airborne and maritime activity at, beyond, and internal to our Nation's borders.

The center has been used to conduct unmanned aircraft systems (UAS) and airspace security operations, response to natural disasters, covert and overt electronic tracking and general aviation aircraft threat determination. The AMOC has acted as the clearinghouse for information and mission tasking during special events, national disasters and crisis situations,

The AMOC's staff employs sophisticated systems and technology to identify existing and emerging homeland security threats. Staff use live radar presentations overlaid on detailed topographical maps and aviation charts, extensive law enforcement databases and tracking and communications networks to detect, identify, track and coordinate interdiction of suspect tracks. The Domain Awareness system combines Federal Aviation Administration (FAA) and U.S. Department of Defense radars, OAM airborne systems and other sensors into a single facility, capable of the real-time tracking of more than 24,000 individual tracks.

AMOC integrates radar data from more than 350 FAA, DoD, foreign, Tethered Aerostat Radar System (TARS), and mobile radars to form the most comprehensive air picture in the Western Hemisphere. CBP reached an agreement with the Canadian government to integrate 23 border radars in 2011. In 2013, CBP integrated 11 Mexican radars and is in the process of finalizing a plan with the Mexican government to integrate 13 additional radars to reach a total of 24. Out of approximately 20,000 air tracks active at any given moment, AMOC investigates more than 35,000 domestic and foreign flights per month to separate legal air traffic from potential violators and terrorists. Staff is then able to precisely direct law enforcement personnel to suspect tracks and support prosecutorial efforts.

In October 2013, DHS assumed control of the TARS Program from the DoD. The Office of Technology Innovation and Acquisition (OTIA) manages the overall program with operational control delegated to OAM/AMOC. TARS possess a unique lockdown capability which is unmatched in traditional terrestrial sensors due to its ability to be elevated. This elevated capability is critical in detecting/tracking and deterring threats attempting to penetrate the border using terrain masking techniques to evade detection. TARS provides wide areas of persistent air/surface coverage at much lower cost when compared to similar airborne capabilities. Additionally, TARS significantly increases

flight safety for OAM air assets by extending Ultra High Frequency (UHF) communications capability during interdiction operations. The ability to communicate with AMOC while being vectored to within close proximity of suspect aircraft is imperative.

Exhibit 1: TARS Current State

Additionally, in partnership with DHS Science and Technology (S&T) (Borders and Maritime Security Division) and the U.S. Coast Guard, the Coastal Surveillance System (CSS) remains in its pilot phase at the AMOC in order to combat the southern California *panga* threat. (The *panga* is a type of modest-sized, open, outboard-powered, fishing boat common throughout much of the developing world, including Central America, the Caribbean, parts of Africa, the Middle East, and much of Asia). The information is displayed regionally through a User Defined Operating Picture (UDOP), which displays data via a tactical user interface, providing access to interagency partners specific to individual mission requirements. The program is on track to produce a functional Operational Picture of the southern California Operating Area by FY 2015. USCG Sector San Diego is equipped with various maritime sensors and was identified as the next data center to be linked into the CSS-Enterprise Network.

- Major National Natural and Man-Made Events – Involves OAM’s response to natural disaster areas to assist in recovery operations and to fly low-level damage surveillance missions over varied terrain, airspace security over national events including the Presidential Inauguration, political conventions, and major public events such as the Super Bowl.

Flight Hours

Annual flight and float hours are projected for each Budget request, then allocated to the branch and aircraft type levels as funds are appropriated each year. OAM must also adjust the flight hours allocated based on when funds become available. Exhibit 2 provides the flight hour history for OAM from FY 2006 with preliminary projection for FY 2016.

As with flight hours, float hours vary based on budget and vessel availability. Exhibit 3 shows actual float hours for FY 2012, FY 2013 and FY 2014. It is expected that FY 2016 float hours will be comparable to those in FY 2015.

Exhibit 3: Marine Vessel Float Hours

	FY 2012 Actuals	FY 2013 Actuals	FY 2014 Actuals	FY 2015 Projected	FY 2016 Projected
Coastal	46,586	43,442	42,884	45,000	45,000
Riverine	77,514	67,949	61,927	70,000	70,000
Total	124,100	111,391	104,811	115,000	115,000

Readiness

Since the award of the national maintenance contract in FY 2010, readiness has generally improved over time. Initial backlogs of repairs and material orders, workforce shortages, and better subcontract management have enabled OAM to ensure quality maintenance, better logistic support, and more responsive turn-around times for maintenance actions. Early issues with the material condition of the aircraft assigned to the southwest border that were not maintained under the legacy central maintenance contract have been overcome, though OAM still uncovers unauthorized repairs during major phase inspections that pre-date OAM and, in the worse cases, the aircraft are retired earlier than planned; however, the industry-wide just-in-time management approach that limits shelf stock, shift and overtime work, and the size of contractor workforces, have resulted in long lead times for new spare parts, longer repair times at industrial depots, and higher costs. OAM has some advantages in logistic support since its aircraft are either military or commercial variants and can be supported for their expected lifetimes; however, competition for spares and repair services can be an obstacle to improving readiness. The overall readiness objective for OAM is 80 percent, as expressed in its commercial support contracts; however, achieving that objective depends directly on available resources and the ability to shift assets and people where they are needed.

Exhibit 4 (next page) displays detailed O&M budget allocations for FY 2011 through the projections for FY 2015 and FY 2016 that support both readiness and the flight hour levels presented.

CURRENT SERVICES PROGRAM DESCRIPTION:

Procurement investment funds are used to purchase new aircraft and marine vessels and to recapitalize existing assets to extend their service lives, enhance mission effectiveness, and lower maintenance costs.

In August 2006, when the original Strategic Air and Marine Plan (StAMP) was submitted to Congress, four specific objectives were delineated:

- unify and integrate CBP Air (and later, Marine) and all of its forces;
- enhance border security and surveillance;
- recapitalize aging aviation and marine assets, creating a more flexible and responsive air and marine force; and
- continue support for traditional missions, specifically, support for ICE investigations and drug source, transit, and arrival zone missions under the integrated command of the Joint Interagency Task Force South (JIATF-S).

Over the past eight years, CBP has initiated 14 distinct programs and projects directly tied to, or in association with, the StAMP. As a result, significant progress has been made toward replacing or recapitalizing aged aircraft and marine vessels, and providing CBP with a highly effective and flexible range of assets, supporting sensors, and equipment. The following is a summary of the assets and supporting capabilities delivered to date:

A. Helicopters

- a. 20 EC-120 Light Observation Helicopters
- b. 46 AS-350 Light Enforcement Helicopters
- c. 6 UH-60L/M Black Hawk Medium Lift Helicopters (recapitalized and new)
- d. 3 S-76B Medium Lift Helicopters (received from the Drug Enforcement Administration)
- e. 3 UH-II Huey Air Mobility Helicopters

B. Fixed-Wing Aircraft

- a. 5 DHC-8 medium range patrol aircraft
- b. 9 P-3 long range patrol aircraft (service life extensions completed)
- c. 6 KA-350CER Multi-role Enforcement Aircraft (MEAs)
- d. 10 Predator B / Guardian Unmanned Aircraft Systems (UAS)
- e. 3 Upgraded C-550 twin-jet interceptors

C. Marine Vessels

- a. 26 SAFEBoats (33-foot and 38-foot)
- b. 6 Interim Coastal Interceptor Vessels (CIVs)
- c. 1 Prototype New Generation Coastal Interceptor Vessel (CIV)
- d. 4 Prototype Riverine Shallow Draft Vessels (RSDV)
- e. 12 Midnight Express Interceptors (service life extensions completed)
- f. 12 Coastal Enforcement Vessels
- g. 12 airboats

D. Capabilities and Support

- a. Various sensors, downlink capabilities, and enhanced operating picture software
- b. A new national aviation maintenance contract
- c. Processing, Exploitation, and Dissemination Cells at the Air and Marine Operations Center and National Air Security Operations Center – Grand Forks
- d. BigPipe downlink video distribution network
- e. 2 new broad area electronic sensors on contract for delivery in early FY 2015

Over the final years of the StAMP, CBP will replace the recapitalization of its aged UH-60A helicopters through the U.S. Army with a reconfiguration of HH-60L helicopters, and continue to purchase additional KA-350CER MEAs, and complete the last two remaining marine vessel procurements. Though the StAMP will officially end in FY 2016, it is expected that the UH-60 and KA-350 programs will continue with low level production rates that will take those programs well into the late 2020s. The RSDV reached full production in July of FY 2014. The CIV RFP closed in October of 2014, with the contract award presently planned for the 3rd quarter of FY 2015.

Description of Item

The budget requests \$44.4 million for two King Air (KA)-350CER Multi-Role Enforcement Aircraft (MEA).

- | | |
|---|---|
| 1. MEA Production Aircraft | \$ 8.5M |
| 2. Sensors | \$ 4.85M |
| 3. Communications Equipment | \$ 1.0M |
| 4. Systems Integration
missionization) | \$ 7.85M (Includes aircraft modifications and |
| Total Per MEA | \$ 22.2M |

Project Schedule:

Milestone	Projected Completion Date
Acquire 2 MEA	FY 2017

Primary Contractor(s): Sierra Nevada Corporation (SNC)

Project Location(s): Hagerstown, MD

Justification

The MEA was introduced to fill the gaps created by the end of the DHC-8 medium range patrol aircraft production line, the termination of the PC-12 single-engine aircraft contract, and the planned retirement of at least 26 aging twin-engine patrol aircraft that CBP inherited from a variety of sources. The MEA is a multi-role aircraft with a multi-mode radar for use over water and land and for air-to-air situational awareness. It also has an Electro-Optic/Infrared sensor, basic and advanced Law Enforcement

Technical Collection packages, and Ku-Band and Iridium downlink system capabilities which allow for communication by voice and sensor data anywhere in its operating area in near real time. It is the most capable new, twin-engine aircraft to be purchased by CBP. A total of ten aircraft have been ordered, with seven in operation, 4 in San Diego, California, and 3 in Jacksonville, Florida. Aircraft #8 was delivered in the 1st quarter FY 2015, #9 is scheduled to be delivered in the 2nd quarter of FY 2015, and #10 is scheduled for the 3rd quarter of FY 2015. The 11th & 12th aircraft are scheduled for the 1st quarter of FY 2016. Funds for the minimum production quantity of two per year are included in the President's FY 2014, FY 2015, and FY 2016 requests, with deliveries expected a little over a year after the orders are placed. By the end of FY 2016 a total of 14 aircraft would be either delivered or in production.

In September 2009, CBP awarded a contract for up to 30 MEAs to Sierra Nevada Corporation (SNC) to specifically address the systems integration along with modifying the stock aircraft to meet CBP's mission requirements. SNC has required that CBP modify at a minimum of 2 MEAs per year. This is required to keep the assembly line active, and to ensure the adequate flow of aircraft through SNC's plant. Any reduction to this program will have the adverse action of closing the assembly line at SNC. It is unknown if the SNC MEA modification line could be reopened once closed, or the cost associated with that ramification. If the line were closed, it is expected that any reopening would be no earlier than three years. The FY 2016-2020 budget proposes the continuation of MEA procurement in an effort to upgrade and standardize CBP's aviation fleet. CBP has deemed this a high priority, and particularly important given the increasing aircraft retirements CBP expects during FY 2014 and FY 2015.

END ITEMS:

End Item: CBP, Office of Air and Marine, Multirole Enforcement Aircraft (MEA)

Estimated Cost per Item: \$22,200 (Fully Missionized)

Total Estimated Cost: \$1,167.9 Million

Contract Information and Status: Indefinite Delivery Indefinite Quantity (IDIQ), Fixed Price Contract awarded for up to 30 MEA's to Sierra Nevada Corporation (SNC), of Hagerstown, MD in September 2009. The contract has 1 base-year and 4 option-years with an expiration of 2015.

Budget and Funding (in thousands)			
	FY 2014	FY 2015 President's Budget	FY 2016 President's Budget
Request (\$M)	43,000	43,700	44,400
Appropriations (\$M)	43,000		
Obligations (\$M)	42,981		
Unobligated Balance (\$M)	19		
Expenditures (\$M)	17,475		
Number of Items Procured (or Planned to be Procured)	2	2	2

Scope and Justification: The MEA was introduced to fill the gaps created by the end of the DHC-8 medium range patrol aircraft production line, the termination of the PC-12 single-engine aircraft contract, and the planned retirement of at least 26 aging twin-engine patrol aircraft that CBP inherited from a variety of sources. The MEA is a multi-role aircraft with a multi-mode radar for use over water and land and for air-to-air situational awareness. It also has an Electro-Optic/Infrared sensor, basic and advanced Law Enforcement Technical Collection packages, and Ku-Band and Iridium downlink system capabilities which allow for communication by voice and sensor data anywhere in its operating area in near real time. It is the most capable new, twin-engine aircraft to be purchased by CBP.

This aircraft and associated sensor capabilities provide direct support to CBP efforts to secure the Nation's borders. Unlike the older, less capable aircraft they are replacing, the MEA addresses threats along the border from the land and sea. Apprehensions and seizures will increase through the use of this aircraft because the aircraft is more capable than the aircraft it has replaced. It has more flight endurance, marine search radar, electro-optical infrared camera system, and a satellite communications system. The aircraft has begun operations off the southern California coast to respond to growing threats from the go-fast vessels that are attempting to reach the coast of California and deposit bulk cocaine where it can be quickly distributed inland.

Impact on Performance (Relationship of Increase to Strategic Goals)

This aircraft and associated sensor capabilities provide direct support to CBP efforts to secure the Nation's borders. Unlike the older, less capable aircraft they are replacing, the MEA addresses threats along the border from the land and sea. Apprehensions and seizures will increase through the use of this aircraft because the aircraft is more capable than the aircraft it has replaced. It has more flight endurance, marine search radar, electro-optical infrared camera system, and a satellite communications system. The aircraft has begun operations off the southern California coast to respond to growing threats from the go-fast vessels that are attempting to reach the coast of California and deposit bulk cocaine where it can be quickly distributed inland. During FY 2013, the two aircraft deployed to the southwest border have flown 654.6 hours of Reconnaissance, Surveillance, and Target Acquisition

(RSTA) missions (Source: Customs Aircraft Reporting and Material Control system (CARMAC database)).

Funding for the minimum production quantity of two aircraft per year will ensure the MEA production line will not close. This funding will ensure that OAM will not have to reconfigure the mission operating system through a new contractor at considerable cost, and contend with supporting a mixed fleet of “old” and “new” aircraft configurations.

Description of Item

NextGen Automatic Dependent Surveillance-Broadcast (ADS-B) is a multi-year project, fully recurring increase to the OAM budget for the development and deployment of congressionally mandated Federal Aviation Administration (FAA) aviation capability upgrades. The 2016 Budget requests \$1.6 million to commence the phased-in purchase and installation of ADS-B transponders and cockpit displays in all OAM aircraft in order to be FAA compliant.

Justification

Commencing in FY 2020, it is FAA's intention to mandate increased ADS-B pilot and controller situational awareness in the satellite based NextGen airspace system.

This rule would amend FAA regulations by adding ADS-B avionics on aircraft operating in specified classes of airspace within the U.S. National Airspace System. This action facilitates the use of ADS-B for aircraft surveillance by FAA and Department of Defense (DOD) air traffic controllers to safely and efficiently accommodate aircraft operations and the expected increase in demand for air transportation. The compliance date for this final rule is January 1, 2020.

The estimate to purchase and install ADS-B transponders and cockpit displays in all Office of Air and Marine (OAM) non-compliant aircraft is \$14.6 million. The approach is to spread the amount over several years, so that by FY 2018 all needed hardware would be purchased and installed in all OAM aircraft before the FY 2020 FAA deadline. Based on an expected increase in equipment demand throughout the aviation community, as the FY 2020 FAA deadline comes ever closer, OAM plans to be ahead of the equipment purchasing curve and prepared to ensure complete compliance by FY 2018.

Impact on Performance

The \$1.6 million for NextGen Automatic Dependent Surveillance-Broadcast (ADS-B) will allow for the commencement of the FY 2020 FAA mandate of ADS-B avionics on all aircraft operating in specified classes of airspace within the U.S. National Airspace System. If this does not occur, then the impact will be reduced safety and efficiency of aircraft operations that would not be in compliance with the FAA U.S. National Airspace System.

Description of Item

CBP requests an increase of \$7.7 million for an additional 15 Unmanned Aircraft System (UAS) crew in support of both operations along the southwest border and operations within the Source and Transit zone.

Overall, CBP requests an increase of \$8.4 million to support an additional 15 UAS crew. CBP proposes that this increase be funded out of the following PPAs: Air & Marine Salaries; Automation Modernization's Information Technology PPA; Construction & Facilities Management's Facilities Construction and Sustainment PPA; and Salaries & Expenses' Rent, Administration, Internal Affairs, and Training & Development PPAs. Increased budget authority, particularly efforts involving additional positions, often requires association with the multiple PPAs that support these new positions. CBP's position cost model provides the capability to present and distribute the estimated necessary authority and FTE with any such increase in positions to the appropriate support offices. In most cases, position increases reflect authority and FTE in both the primary PPA associated with the increased capability and/or function, as well as the mission support PPAs responsible for hiring, vetting, training and outfitting the new positions.

Justification

The UAS consists of a medium-altitude, long-endurance unmanned aircraft (MQ-9 Predator B), sensor communication packages, ground control, launch and recovery systems, operations, maintenance, technical and logistics support, pilots, and sensor operators to meet mission requirements in the three major areas of responsibility: southwest border, northern border and southeast coastal area. The UAS

supports border interdiction operations with long-range surveillance that provides real-time intelligence and situational awareness to border agents 24 hours a day - 7 days a week.

The 15 additional UAS crew will include eight Air Interdiction Agents; four Sensor Operators; three support staff positions; and the necessary salaries, benefits, overtime, premium pay, training, travel, law enforcement equipment, and supplies. The positions are needed to provide increased CBP aerial surveillance, enforcement, and security posture for surges similar to that of unaccompanied children illegally entering the U.S.

OAM took a staff level reduction in FY 2010 that prevented the hiring of additional UAS crew as more systems were being delivered and the operating tempo along the southwest border increased. As an interim measure, OAM cross-trained P-3 pilots and sensor operators whose aircraft were undergoing a service life extension to operate the Predator B and Guardian maritime UAS. Now that the P-3 SLEP is nearly completed and the P-3 wing is increasing its operating tempo, the pilots and sensor operators are no longer available to support the UAS Program. The additional UAS crews will make-up for the loss of the P-3 crew, and support increasing UAS operating tempo along the SWB, in particular Arizona, south Texas, and support Unaccompanied Children (UC) operations should that problem increase in severity.

Impact on Performance (Relationship of Increase to Strategic Goals)

The UAS is a force multiplier with the following benefits:

- Ability to monitor extended border areas at any time of the day or night;
- Capability to vector ground support directly to vehicles or persons of interest;
- Provide ground personnel extended situational awareness of surroundings and operational area for potential threat identification purposes;
- Emergency or disaster support for other US government agencies; and
- Provide intelligence data to the Office of Intelligence and Investigative Liaison (OIIL) for analysis.

UAS contributed to the following operational successes: (FY 2014 figures below)

- VaDER Detections Investigated – 7,616
- Illegal Apprehensions – 1,834
- Drugs Seized – 70,577 lbs marijuana and 992 lbs cocaine
- Arrests – 54
- Vehicles Seized – 37
- Weapons Seized – 149

Total Request	0	0	\$383,500	0	0	\$362,699	0	0	\$395,169

Description of Item

The budget requests \$32.5 million to increase CBP flight hours to support both operations along the southwest border and operations within the source, transit, and arrival zones.

Justification

The \$32.5 million requested will allow for an increase of over 16,500 CBP flight hours to achieve a total of more than 91,373 total flight hours in support of the highest priority operations along the southwest border and within the drug source and transit zones. The funds would be used primarily for fuel for a variety of aircraft to support southwest border operations and operations within the source, transit, and arrival zones, including the P-3 and DSH-8 aircraft.

The Office of Air and Marine (OAM) supports multiple missions along the nation's borders; along the maritime approaches to the borders including the Great Lakes; at points in the interior; and along the full length of the drug source, transit, and arrival zones in the eastern Pacific, Gulf of Mexico, and Caribbean. The types of aircraft, marine vessels, and sensors employed vary by mission and location, and also with the costs to operate and maintain. The largest share of OAM resources, assets, and flight hours go to border security and the Office of Border Patrol, followed by Immigration and Customs Enforcement (ICE), Joint Interagency Task Force-South (JIATF-S), and Federal Emergency Management Agency (FEMA) during times of major regional or national events. OAM also supports a variety of other federal, state, local, and tribal authorities active in homeland security support and law enforcement within OAM's normal operating areas.

Over the southwest border, OAM provides direct support to Border Patrol agents on the ground, and is responsible for interdicting general aviation and maritime threats over the border and approaching the coast.

Impact on Performance (Relationship of Increase to Strategic Goals)

The additional \$32.5 million will allow for an increase of over 16,500 CBP flight hours, which would help with increasing enforcement efforts, seizures and arrests.

Over the last 7 years, CBP has disrupted over 1.2 million pounds of bulk cocaine passing through the drug source, transit, and arrival zones of the eastern Pacific, Caribbean, and Gulf of Mexico. JIATF-S has maintained a minimum 7,200 annual flight hour objective for CBP. The maritime mission in the source and transit zones is now being augmented with the Guardian UAS, and early results show a similar drug shipment disruption rate to the P-3 of 22 pounds per flight hour.

Operational statistical results in FY 2014 and overall 5 year averages of same

1. Project Description, Justification and Scope

Project Description

In the summer of 2006, CBP OAM developed and submitted to Congress a Strategic Air Plan that defined the end state for the nation-wide air service based on ongoing threat assessments and mission requirements determined by the agency and higher authority. In 2007, this plan was updated to incorporate the CBP marine service and the Unmanned Aircraft System (UAS) Program, and was re-named the Strategic Air and Marine Program (StAMP). The separate UAS PPA was formally merged into the CBP OAM Procurement PPA in FY 2007.

In April 2010, CBP accelerated the transition of StAMP from an acquisition program to a sustainment program. While no new types of acquisition are planned, aged assets will be maintained in operating condition as long as they are safe to fly. CBP will continue to standardize the types of aircraft and marine vessels, emphasizing the use of multi-mission assets that can be deployed to multiple locations as the threat changes over time. The OAM Procurement PPA is used to acquire new aircraft and marine vessels, upgrade older aircraft and vessels to extend their service lives, purchase new aircraft and marine sensors, acquire UASs, enhance surveillance and data/video distribution and sharing capabilities, and support the expansion of aviation and marine mission capabilities along the borders, in response to ongoing threat assessments and mission assignments directed by higher authority. FY 2016 marks the end of the StAMP program, with only two remaining aircraft and two remaining vessel

procurements.

CBP has established new Planning, Programming, Budgeting and Accountability (PPBA) processes, along with a new line of business budget structure, that will supersede the StAMP and provide the framework and analyses needed to determine future funding needs for aviation and marine elements supporting homeland security missions.

Program Justification

CBP protects the American people and the Nation’s critical infrastructure through the coordinated use of integrated air and marine forces to detect, interdict and prevent acts of terrorism and the unlawful movement of people, illegal drugs and other contraband toward or across the borders of the United States. Terrain, weather, and distance are significant obstacles along much of the southern, northern, and coastal borders. CBP OAM support acts as a force multiplier, allowing personnel and equipment to be transported efficiently and effectively, ground and maritime interdiction missions to be supported, air interdiction missions to be executed, and interior investigations to be supported. OAM also provides rapid-response relocation of personnel and equipment to safeguard people and critical infrastructure from acts of terrorism, natural disasters and other emergencies. The Air Safety and Life Extension Contract supports the aircraft that makes it possible for CBP OAM to perform this mission.

2. Significant Changes

The funds requested will enable continued support for program operations through FY 2016.

3. Project Schedule

	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016

6. Method of Performance

1	Is there a project (investment) manager assigned to the investment?	If so, what is his/her name?
	Yes	John A. Wells
2	Is there a contracting officer assigned to the investment?	If so, what is his/her name?
	Yes	Susan Baptist
3	Is there and Integrated Project Team (IPT)?	If so, list the skill set represented.
	Yes	The IPT is comprised of individuals from the CBP Office of Air and Marine, Office of Administration, Office of Information and Technology, Technology Systems Program Office, Office of Chief Counsel, Office of Technology Innovation and Acquisition, and Office of Border Patrol representing systems acquisition, project management, systems engineering, legal review and test and acceptance.
4	Is there a sponsor/owner for this investment?	If so, identify the sponsor/process owner by name and title and provide contact information.
	Yes	Randolph D. Alles, Assistant Commissioner, Office of Air and Marine.

Fiscal Year	Strategic Goal(s) Supported	Performance Measure / Type	Explanation or Description	Target or Goal	Actual Performance Results	Performance Metric Improvement
2014	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Percent of detected conventional aircraft incursions resolved along all borders of the United States Long Term/ Output	The measure represents the percent of conventional aircraft, once detected visually or by radar, that are suspected of illegal cross border activity and are brought to a successful law enforcement resolution. In some cases, Office of Air and Marine assets are launched to interdict the aircraft. In most cases, resolution of the aircraft identity is made by the Air and Marine Operations Center (AMOC) working with interagency partners such as the Federal Aviation Administration (FAA). If the incursion is deemed legal, OAM considers the incursion resolved. If not resolved, AMOC working with our partners including	100 percent	98 percent	<p>OAM will not likely ever achieve a 100% resolution on aircraft incursions without a substantial investment in 1) additional sensors providing detection and continuous tracking throughout the border environment 2) personnel to monitor and evaluate the tracks and 3) a sufficient force of quick response assets to “resolve” the incursions.</p> <p>With these limiting factors in consideration, AMOC continuously improves processes and partnerships and ingests new technologies that can mitigate our vulnerabilities and gaps thus reducing the number of “unresolved” aircraft incursions.</p>

			OAM assets - could not identify the track and is thus considered illegal.			
2014	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Percent of air support launches accomplished to support Homeland Security missions Long Term/ Output	A primary and important measure for Air and Marine is its capability to launch an aircraft when a request is made for aerial support. This measure captures the percent of all requests made for air support to which the program was able to respond.	>95 percent	93 percent	
2014	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Percent of Joint Interagency Task Force – South (JIATF-S) annual mission hour objective achieved	CBP Air and Marine’s core competencies are air and marine interdiction, air and marine law enforcement, and air domain security. In this capacity, the Office of Air and Marine (OAM) targets the conveyances that illegally transport narcotics, arms, and aliens across our borders and in the source, transit and arrival zones. In support of Source and Transit Zone interdiction operations, the Air	100 percent	100 percent	

			and Marine Strategic Air Asset Program (P-3, Dash 8, Chet, and C12M fixed wing aircraft, Blackhawk rotor wing and Guardian UAS) have a dedicated minimum of 4,600 hours a year in support of Joint Interagency Task Force – South.

Operations and maintenance Mission Statement

The Office of Air & Marine (OAM) is responsible for the protection of the borders of the United States. OAM identifies, deters, interdicts, and investigates acts of terrorism and smuggling arising from unlawful movement of people and goods into and out of the United States with an integrated and coordinated air and marine force. OAM has historically conducted missions along the southern borders of the United States, Mexico, South America and the Caribbean. Since September 11, 2001, OAM has established a presence along the northern border. OAM has a staff of over 1,895 pilots, law enforcement officers, operational support, and administrative positions. Mission critical assets consist of aircraft (including fixed wing and rotary helicopters), marine vessels, P-3 surveillance aircraft, surveillance equipment, maintenance facilities and hangers. With the transfer of the Unmanned Aircraft Systems (UAS) and Border Patrol assets, U. S. Customs and Border Protection (CBP) has been able to achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets.

Salaries and Expenses Mission Statement

The purpose of Air and Marine Salaries is to apply the skills and expertise of CBP air and marine personnel to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States. Having aircraft and vessels along the borders reduces the quantity of drugs entering the U.S. and minimizes threat levels. The goal of this program is to deny the use of air, land and coastal waters for conducting acts of terrorism and other illegal activities against the United States.

FY 2014 Obligations by Budget Object Class	22

Background and Fee Execution

CBP User Fee collections in FY 2016 are projected to be approximately \$2.2 billion for all accounts (reimbursable and direct fee accounts). User financing in the form of user fees, user charges, or excise taxes constitute one approach to financing federal programs or activities. User fees assign part or all of the costs of these programs and activities—the cost of providing a benefit that is beyond what is normally available to or consumed by the general public—to the identifiable users/beneficiaries of those programs and activities. Since user fees represent a charge for a service provided by the government or for a benefit from a government program, payers expect and deserve a tight correlation between their payments and the cost of providing the services or benefits, and they have expectations about the quality of the related services or benefits.

Statute dictates whether the user fee collections may be dedicated to a related program or, alternatively, must be deposited into the general fund of the U.S. Department of the Treasury (Treasury) where the collections remain unavailable for the agency's use. For example, fees collected under the Consolidated Omnibus Reconciliation Act (COBRA) can only be used to fund certain expense categories while Merchandise Processing Fee (MPF) is remitted back to Treasury.

User fees may support multiple federal agencies. An agreement between the involved agencies dictates how fees may be allocated to each agency depending on the costs each incurs in providing the service or benefit. User fee collections represent a significant portion of the CBP budget and are critical in meeting the agency's mission. More than one-third of the Office of Field Operations' (OFO) annual financial plan comes from user fee collections, and this percentage has risen over the past few years. OFO is the law enforcement component of CBP responsible for enforcing immigration, customs, and agricultural laws at the ports of entry and received roughly 87 percent of the user fees allocated in FY 2014.

CBP User Fees are both collected directly by CBP or by an outside party, and then remitted to CBP. CBP's air passenger user fees (the primary source of fee revenue) are collected by ticket-issuing agents (e.g., carrier, travel agent, tour wholesalers, or other parties issuing tickets or travel documents) who collect the fees and remit them to CBP. The carrier or tour wholesaler remits payments within 31 days after the close of each quarter. Other Fees are remitted directly to CBP without the assistance of an additional party.

CBP uses activity-based costing (ABC) to map user fees to specific CBP programs. The major processes for an ABC accounting are: (1) identifying the activities performed to produce outputs, (2) assigning or mapping resources to activities, (3) identifying the outputs for the activities performed, and (4) assigning activity costs to the outputs.

ABC assigns both direct and indirect costs to the mission activities. Each CBP user fee program funds multiple mission activities. CBP employs ABC to capture the cost of the relevant activities and map them to user fee programs. The ABC delineates the funding profile of each user fee program. The funding profile details the funding sources used to carry out the user fee

activities and identifies the user fee programs that are not full cost recovery. CBP collects user fees for services provided by CBP and other agencies from the trade and travel community. Statutory authority determines how an agency can use collections from user fees.

CBP's annual financial plan includes estimated collections and allocates these amounts to various components of CBP based on eligible expenses for the following mission-related activities. These activities are summarized below:

- **Front-line CBP activities:** Guarding the nation's physical and economic security. Fee funding assists in funding the costs of inspections for legal access to the United States, while facilitating international trade and travel while preventing the entry of persons and weapons of terror into the United States.
- **User Fee business processes:** The design, development, programming, testing, implementation, training, and maintenance of CBP automated systems and facilities related to user-fee funded programs.
- **Financial management and accountability:** Accounting, budgeting, revenue collection, and performance management.
- **Investigative and security functions and programs:** Applicant and employee background investigations and clearances pertaining to certain user fees programs.
- **CBP training programs:** Centralized leadership and direction of all CBP training programs. Ensure that all training efforts support the CBP mission and strategic goals (including fee revenue collection), meet the needs of a diverse and dispersed workforce, and contribute to measurable outcomes and results.

Additionally, U.S. Immigration and Customs Enforcement (ICE) receives a portion of Immigration Inspection User Fee (IUF) collections as its primary mission implicates specific eligible expenses under the governing statute, 8 U.S.C. § 1356(h) (2) (A), concerning certain detention and removal services, and removal and asylum proceedings. ICE and CBP provide law enforcement support to detect and remove those individuals who are inadmissible under 8 U.S.C. § 1182(a), including those who are inadmissible by attempting to unlawfully enter the United States by avoiding inspection at air and sea ports of entry. The portion of IUF fees transferred to ICE finance a portion of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports. These ICE operations encompass "providing detention and removal services for inadmissible aliens arriving on commercial aircraft and vessels and for any alien who is inadmissible under section 1182 (a) of this title who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry," per 8 U.S.C. 1356(h)(2)(A)(v).

In FY 2014, 204,408 aliens were deemed inadmissible by CBP, transferred to ICE, and processed through the Immigration Enforcement Lifecycle. ICE is also permitted to request reimbursement for aliens who are inadmissible under 8 U.S.C. § 1182(a) due to avoiding

inspection at air or sea ports of entry. Currently the IUF collections are split between ICE and CBP with ICE receiving 17.37 percent and CBP receiving 82.63 percent.

Current Services – Agency mission(s) supported by fees

Customs and Border Protection officers (CBPOs) and CBP Agriculture Specialists ensure that all carriers, passengers, and their personal effects entering the United States are compliant with:

- **Consolidated Omnibus Reconciliation Act (COBRA) and Express Consignment Carrier Fees** - U.S. customs laws;
- **Animal, Plant, Health Inspection Services (APHIS)** - Agricultural health of the U.S.;
- **Immigration User Fees (IUF) and Immigration Enforcement Fines (IEF)** - U.S. immigration laws; and
- **Land Border Account** - Inspection services provided at land border ports of entry.

CBP User Fees also support funding requirements for specific programs, certain Trusted Traveler Programs, and areas with a CBP presence:

- **Global Entry** - Expedited clearance of pre-approved low-risk air travelers into the U.S.;
- **Electronic System for Travel Authorization (ESTA)** - Determines the eligibility of visitors to travel to the U.S. under the Visa Waiver Program (VWP);
- **Puerto Rico Trust Fund** - Screen all people, vehicles, and goods entering Puerto Rico, while facilitating the flow of legitimate trade and travel into Puerto Rico;
- **Virgin Islands Deposit Fund** - Screen all people, vehicles, and goods entering the U.S. Virgin Islands, while facilitating the flow of legitimate trade and travel into the U.S. Virgin Islands; and
- **CBP Services at User Fee Facilities** - Inspection services provided to participating small airports on a fully reimbursable basis.

Proposed Fee Rate Changes

The Budget reflects two legislative proposals to increase CBP user fees. These proposals will be transmitted to Congressional Authorizing Committees separately:

1. **COBRA** - A \$2.00 increase to the commercial aircraft passenger and commercial vessel passenger components of the COBRA user fees (and proportional increases to all other COBRA rates and caps).
2. **IUF** - A \$2.00 increase to the IUF fee, bringing the new fee amount to \$9.00, and to eliminate a partial fee exemption for sea passengers traveling from certain, exempt regions.

Exhibit 1: Overview of User Fee Budget Request - FY 2016 Congressional Justification

(\$ in thousands)

User Fee	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request
CBP Services at User Fee Facilities	\$8,553	\$8,789	\$9,097
COBRA – Free Trade Agreement	\$175,000	\$180,000	\$180,000
Global Entry	\$34,835	\$72,345	\$74,349
Global Entry – FBI Fingerprinting	-	\$18,847	\$17,440
Subtotal, Discretionary Fees	\$218,388	\$279,981	\$280,886
COBRA	\$473,127	\$452,968	\$476,922
Express Consignment Carrier (ECCF)	\$ 27,007	\$ 29,533	\$29,955
Land Border Inspection Fee	\$42,941	\$43,931	\$34,724
Immigration Enforcement Fines	\$773	\$752	\$633
Puerto Rico Trust Fund ¹	\$98,602	\$98,076	\$99,058
Immigration User Fee	\$598,552	\$630,218	\$652,699
Animal & Plant Health Inspection Services (APHIS)	\$355,216	\$371,814	\$387,130
Animal & Plant Health Inspection Services (APHIS) – Fee increase	-	\$92,700	\$128,680
ESTA	\$55,168	\$54,929	\$57,332
Virgin Islands Deposit Fund	\$11,302	\$11,789	\$11,867
Total Mandatory Fees	\$1,662,688	\$1,786,710	\$1,879,000
Total, Fees	\$1,881,076	\$2,066,691	\$2,159,886

¹ FY 2014 Puerto Rico Trust Fund collections include Janssen related activity (\$120 million). The Janssen activity is the result of a contingent liability resulting from litigation of duties deposited into the Puerto Rico Trust Fund at the Court of International Trade. CBP is monitoring these collections in FY 2015 and will adjust projections as necessary

Prior Rate changes

The table below displays CBP's user fee portfolio by account, statutory authority, and subtype. Additionally, the current rates charged to passengers and conveyances are listed along with prior rates. Lastly, the date of the last rate change is listed.

Exhibit 3: CBP User Fee Portfolio

Account	Fee	Prior Rates (Before the last rate increase)	Current Rates (Unit Fee/Annual Cap)	Proposed Rates	Statutory Authority	Date of Last Rate Change
COBRA					19 USC 58c	Legislative change occurred on October 2004. However, all COBRA individual fees were increased by 10 percent beginning April 1st, 2007. Maximum increase could not exceed 10%. 72 Fed. Reg. 3730 (Jan. 26, 2007). The listed fees reflect the higher rate per 19 CFR 24.22. The fee
	Commercial Vessels	\$397/\$5,955	\$437/\$5,955	\$594/\$8,316		
	Commercial Trucks	\$5.00/\$100	\$5.50/\$100	\$7.50/\$135

FY 2014 Obligations by Budget Object Class

- In FY 2014, the majority of the gross obligations were incurred to support salaries and benefits. In FY 2016, CBP expects to use the user fees in a similar fashion. The majority of the user fees will be used to support the personnel costs of law enforcement officers performing agricultural, customs, and immigration inspectional activities.

Object Class	Amount	%
Personnel Compensation	1,168,658	65%
Personnel Benefits	412,734	23%
Travel	12,168	1%
Transportation of things	6,841	0%
Rent	11,205	1%
Communications, Utilities, and Misc. Charges	13,480	1%
Printing	18,667	1%
Contractual Services	123,568	7%
Supplies	5,629	0%
Equipment	18,757	1%
Land and Structures	5,667	0%
Total	1,797,374	100%

User Fee Projection Methodology

CBP relies primarily upon two economic indicators to make fee revenue estimates: Gross Domestic Product (GDP) and international travel forecasts. These two indicators strongly correlate to fee revenue. International travel forecasts² are particularly important when estimating fee revenues because the largest portion of fees derives from travelers arriving in the United States from abroad. Two such fees include CBP's COBRA fees and IUF fees. These two fees are remitted to CBP by the ticket-issuing agents on a quarterly basis. On average, more than 80 percent of the total COBRA fee collections and more than 90 percent of IUF collections are attributable to air passengers arriving in U.S. ports of entry. An increase or decrease in international travel to the United States will yield a comparable increase or decrease in fee revenue.

In forecasting the future year international travel outlook, CBP leverages multiple sources. A major source of data is projections published by the Office of Travel and Tourism Industries, which is a Federal tourism office in the U.S. Department of Commerce. The international travel forecasts published by the Office of Travel and Tourism Industries take into account multiple economic indicators, which are indexed into the projection forecast. These figures include inputs from traditional indicators, such as GDP, planned airline capacity, and employment rates. The forecasts take into account other measurable items as well, including currency exchange rates, stock market trends, and the effects of the *Travel Promotion Act of 2009* (P.L. 111-145, §9). This Act enables the Federal government to work with the private sector to promote international travel to the United States. For all fees driven by international travel, CBP assumes collections will mimic the patterns projected in the travel forecast. For fees not correlated to international travel, CBP believes GDP and historical trends provide the best support for projecting future year revenue.

CBP also focuses on the economies of specific regions of the United States to project revenue in certain accounts. Puerto Rico and the U.S. Virgin Islands each have unique fiscal structures. More specifically, the revenues in the Puerto Rico Trust Fund and Virgin Island Deposit Fund are duties collected for the entry of goods into Puerto Rico and the U.S. Virgin Islands, respectively. Thus, CBP relies on indicators provided by the Government Development Bank for Puerto Rico and the Government of the Virgin Islands to construct future-year revenue outlays. Government and Economic Reports for Puerto Rico utilize Gross National Product as opposed to GDP estimates for that account.

Carryover Maintenance

One of the long-standing challenges in managing CBP's user fee portfolio is maintaining sufficient user fee carryover (unused balances from prior years) throughout the course of the year. CBP accumulates carryover balances during a current fiscal year to fund operations particularly during the first quarter of a succeeding fiscal year.

² *Travel projections are derived from the U.S. Department of Commerce's (DOC) National Travel and Tourism Office (NTTO)*

To mitigate the risk associated with the cash flows in the first quarter of the fiscal year, CBP typically aims to set aside 10 percent of collections³ from the prior year in reserve as carryover. It should be noted that the 10 percent figure is only a best practice guideline. The 10 percent amount provides enough revenue to sustain CBP operations during the first quarter of the fiscal year, which is typically a low collections period.

Exhibit 5: FY 2014 Fee Collections

FY 2014 Fee Collections (in thousands)		
Month	COBRA	IUF
October	\$23,978	\$5,834
November	132,399	0

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection CBP Services at User Fee Facilities

I. Appropriation Overview

A. Mission Statement for CBP Services at User Fee Facilities

The CBP Services at User Fee Facilities is authorized under 19 U.S.C. 58b and administered under U.S.C. 58c(b)(9)(A)(i). The CBP Services at User Fee Facilities program supports CBP inspectional services at participating small airports on a fully reimbursable basis. The fee charged under this program is set forth in a Memorandum of Agreement (MOA) between the user fee airports and U.S. Customs and Border Protection (CBP). It may be adjusted annually as costs and requirements change.

B. Budget Activities

A User Fee Airport (UFA) is a small airport that has been approved by the Commissioner of CBP to receive, for a fee, the services of a CBP officer (CBPO) for the processing of aircraft entering the United States including their passengers, and cargo. The applicant must meet the following criteria for UFA consideration:

- The volume or value of business at the airport is insufficient to justify the availability of inspectional services at such airport on a non-reimbursable basis;
- The current Governor of the State in which the airport is located declares support for the designation, in writing to the Commissioner of CBP;
- The requestor (e.g. airport authority) agrees to reimburse CBP for all costs associated with customs services, including all expenses of staffing a minimum of one full-time officer; and
- The requestor completes an Agriculture Compliance Agreement (ACA) with fixed base operators and garbage haulers for handling the international garbage.

The basic steps required in considering an application for designation as an UFA include:

- Receipt of a letter from the current Governor of the state supporting the user fee airport designation, addressed to the Commissioner;
- An initial site visit in which CBP officials discuss workload and services;
- A final site visit in which CBP officials verify that facilities are 85 percent complete and adequate for inspectional services to be provided;
- Completion of an MOA with CBP, which states the responsibilities, fees, and hours of service; and
- Completion of an ACA with CBP for handling international garbage.

An approved UFA receiving CBP services is responsible for payment of the following fees:

- Per CBPO: \$140,874 for the first year and \$123,438 for succeeding years;
- Automatic Data Processing costs per CBPO: \$17,042 to \$21,062 (1st year) and \$13,620 to \$17,640 for succeeding years, depending on the location, and
- Other associated costs, such as overtime.

The CBP Services at User Fee Facilities provides funding for the full costs of inspectional services by CBPOs. As of December 30, 2014, CBP supported 49 small airports. There are ten pending applications for UFA status:

Pending (10):

- Cobb County Airport-McCollum Field (Kennesaw, GA)
- Ellington Field (Houston, TX)
- Griffiss International (Rome, NY)
- Charlotte-Monroe Executive Airport (Monroe, NC) South
- Texas International Airport (Edinburg, TX) Marathon
- Airport (Marathon, FL)
- Ocean Reef Airport (Key Largo, FL)
- Witham Airport (Stuart, FL)
- Lone Star Executive Airport (Conroe, TX)
- South Bend Airport (South Bend, IN)

C. Budget Request Summary

In FY 2016, CBP requests 69 full-time equivalent employees and \$9,097,000 in anticipated collections for the CBP Services at User Fee Facilities program. The projections are based on the number of CBPOs required to fulfill agreements with the small airports. Some agreements require more than one CBPO. If collections do not materialize as projected, then spending must be decreased by a related amount. CBP estimates collections as follows:

Exhibit 1: Collections by Fiscal Year (In thousands)

User Fee Facilities Collections	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2017 Estimate
	\$8,553	\$8,789	\$9,097	\$9,055

Exhibit 2: Historical Collections

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
User Fee Facilities	\$8,389	\$7,807	\$5,900	\$7,381	\$8,700	\$8,270

CURRENT SERVICES PROGRAM DESCRIPTION:

The CBP Services at User Fee Facilities program supports inspection services provided to participating small airports on a fully reimbursable basis. Approximately half of the User Fee Facilities are located more than 50 miles from the nearest Port of Entry. The amount charged is determined by how many CBP Officers are stationed at the facility and whether it is a new or existing facility. Revenue from the CBP Services at User Fee Facilities program funds the processing of aircraft, passengers, and cargo entering the United States. In FY 2014, User Fee Facilities processed 18,143 aircraft and 304,353 passengers.

CBP Services at User Fee Facilities Mission Statement

Small Airport Facilities is authorized under 19 U.S.C. 58b and administered under 19 U.S.C. 58C (b)(9)(A)(i). The User Fee Airports Program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The fee charged under this program is set forth in a Memorandum of Agreement between the small airport facility and the agency, and may be adjusted annually as costs and requirements change.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$4,582	\$5,389	\$5,601	\$212
11.3 Other than Full-Time Permanent	-	\$16	\$16	-
11.5 Other Personnel Compensation	\$326	\$609	\$615	\$6

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection COBRA Passenger Inspection Fee

I. Appropriation Overview

A. Mission Statement for COBRA Passenger Inspection Fee

Consolidated Omnibus Budget Reconciliation Act (COBRA) User Fee

The Consolidated Omnibus Budget Reconciliation Act of 1985 (P.L. 99-272; COBRA) created a series of customs user fees to recover costs incurred when processing air and sea passengers, commercial trucks, railroad cars, private aircraft and vessels, commercial vessels, dutiable mail packages, broker permits, barges and bulk carriers from Canada and Mexico, cruise vessel passengers, and ferry vessel passengers at U.S. ports of entry

Effective November 5, 2011, certain exemptions under the *Consolidated Omnibus Budget Reconciliation Act of 1985* (P.L. 99-272; COBRA) were eliminated. Section 601 of the *United States-Colombia Trade Promotion Agreement Implementation Act of 2011* (P.L. 112-42) lifted the exemption that excluded air and sea passengers from Canada, Mexico, and Caribbean and adjacent islands¹ from having to pay the COBRA air, sea, and cruise vessel (ferry passengers are still exempted) passenger fees. Due to the elimination of the exemptions, CBP expects to collect \$220.9 million in FY 2016.

Collections from COBRA user fees are made available through permanent/indefinite appropriation created by the aforementioned user fee statute with the exception of COBRA fees collected from the *United States-Colombia Trade Promotion Agreement Implementation Act of 2011*. COBRA Free Trade Agreement (FTA) fees are deposited in the Customs User Fee Account (No Year) and are available only to the extent provided in Appropriations acts. The FY 2014 Consolidated Appropriations Act made the 2014 FTA fees available through a General Provision. The FY 2015 President's Budget proposed similar appropriations language to make the 2015 COBRA FTA fees available for obligation. The FY 2016 Budget requests a 2016 appropriation in the same manner.

Express Consignment Carrier Facility User Fee

The *Trade Act of 2002* (P.L. 107-210) section 337, codified as 19 USC 58c (b) (9) (A) (ii) and (b) (9) (B), authorized the establishment of the Express Consignment Carrier Facilities (ECCF) fee to reimburse CBP for the processing costs incurred at those facilities. Since the ECCF fees are deposited in the Customs User Fee Account for budgetary purposes, they are reported with the COBRA user fees. Congress mandated that 50 percent of the ECCF fee collection be transferred to the Treasury's General Fund. The balance is used to reimburse CBP for the cost of providing inspection services to express consignment operators or carriers. ECCF fees are intended to be full cost recovery.

¹ Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Bermuda-United Kingdom, British VI-United Kingdom, Cayman Islands, Cuba, Dominica, Dominican Republic, Grenada and South Grenadines, Guadeloupe-France, Haiti, Jamaica, Martinique-France, Netherlands Antilles, St. Kitts and Nevis, St. Lucia, St. Vincent and North Grenadines, Trinidad and Tobago, Turks and Caicos Islands-United Kingdom

An express consignment operator or carrier is an entity operating in any mode or intermodally that moves cargo by special express commercial service under closely integrated administrative control. Services are offered to the public under advertised, reliable, and timely door-to-door delivery. An express consignment operator assumes liability for the articles in the same manner as if it is the sole carrier.

CBP inspections are carried out at Express Carrier Operation (ECO) facilities, which are akin to bonded warehouses and have the ability to handle high volume parcel flows into and through the United States. International couriers and high volume parcel shippers to the U.S. (including high volume e-commerce parcel flows to the U.S.) can access these facilities for cost efficient clearance and domestic injection. CBP collects ECCF fees to recover the costs of providing customs cargo inspection services to express consignment carriers or centralized hub facilities.

The COBRA and ECCF user fees financially support the inspection functions performed by CBP at ports of entry and the Customs Broker Program. These user fees support CBP's mission of facilitating legitimate trade and travel while keeping the United States secure.

B. Budget Activities

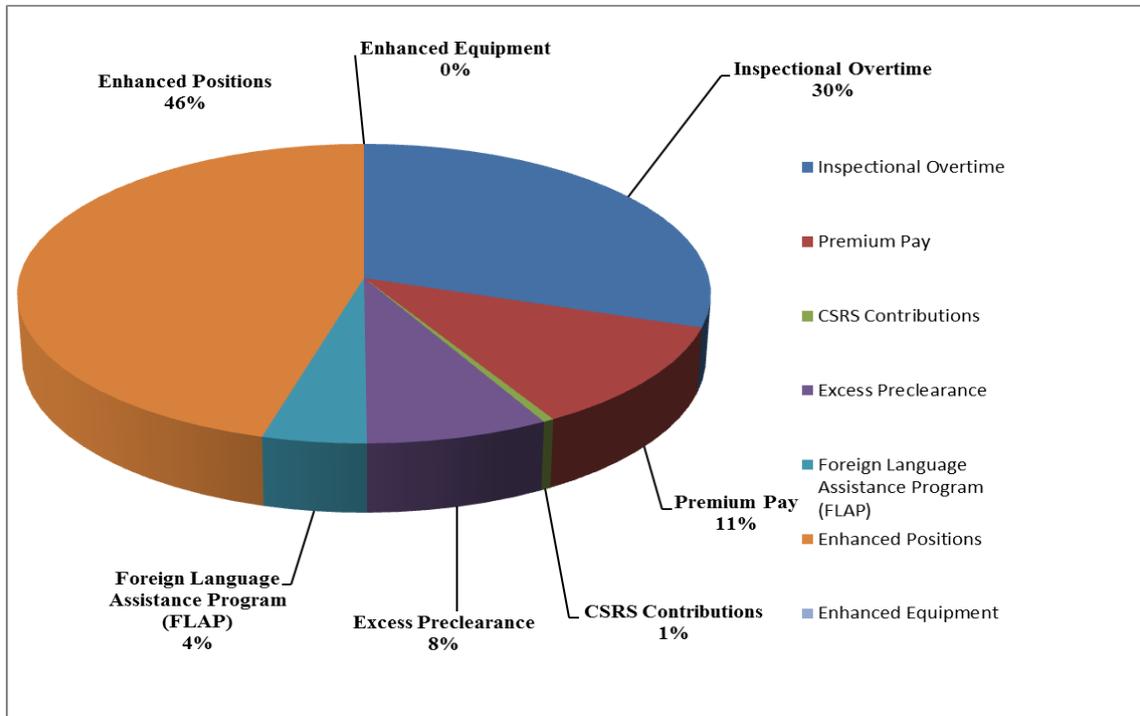

COBRA

COBRA collections fund activities that are mandated by law. Supported by fee revenues, Customs and Border Protection officers (CBPOs) help ensure that all carriers, passengers, and their personal effects entering the United States are compliant with U.S. customs laws. To the extent that revenues are available, the estimated FY 2016 collections will fund the activities in the COBRA statute; however, the fees are not legislatively set to fully recover these costs. Therefore, the estimated collections will only partially fund the authorized activities listed:

- **All inspectional overtime:** 200 percent overtime pay for work performed in excess of 40 hours in the administrative work-week or in excess of 8 hours in a day;
- **Premium pay:** Additional pay on irregular work schedules, including nightshifts, Sundays, holidays, etc;
- **Civil Service Retirement and Disability Fund (CSRS agency contribution):** Agency contributions to the Civil Service Retirement and Disability Fund to match deductions from the overtime compensation;
- **Excess Preclearance:** CBP Preclearance provides for the U.S. border inspection and clearance of commercial air passengers and their goods. A preclearance inspection is essentially the same inspection an individual would undergo at a U.S. port of entry and preclearance travelers do not have to undergo a second CBP inspection upon arrival in the United States;
- **Foreign language proficiency awards (FLAP):** Awards funded from COBRA for officer proficiency in a foreign language;
- **Enhanced Positions:** Enhanced positions are salaries for full-time and part-time inspectional personnel and equipment that enhance customs services for those persons or entities that are required to pay COBRA fees; and

- **Enhanced equipment and support:** Equipment that enhance customs services for those persons or entities that are required to pay COBRA fees.

FY 2014 COBRA Hierarchy Spending

The CBP Office of Field Operations (OFO) uses overtime for inspectional activities and for seizure/arrest processing that goes beyond an employee’s regular duty hours. The majority of OFO’s inspectional overtime needs are related to seasonal, daily, and after-hours operations. OFO implements a comprehensive inspectional overtime strategy to augment standard port of entry needs by adding flexibility to support changing operations as a result of surge and peak-time operations. Overtime flexibility ensures that sufficient staffing is available to administer the full range of inspection, intelligence analysis, examination, and law enforcement activities that relate to the arrival and departure of persons, conveyances, and merchandise at our nation’s ports of entry.

Additionally, the travel industry requests the approval of CBP services at new port locations, new flights at existing port locations, and to move flight times to peak arrival hours or outside normal operating hours (outliers). Peak arrivals can exceed current facility and CBP capacity, while outlier flights reduce available staff during peaks and/or further impact decreasing overtime budgets.

Based on the current Workload Staffing Model (WSM), OFO estimates that a CBPO performs 1,182 hours of frontline work a year. Every hour of overtime buys an additional frontline hour without additional administrative overhead.

Premium Pay and Civil Service Retirement and Disability Fund expenses include pay and compensation benefits that enable CBP to fully staff according to mission requirements on

holidays and weekends and to compensate eligible employees for benefits governed by 19 U.S.C. 267 (overtime and premium pay for Customs Officers).

The fee rates under the current law are as follows:

Barge/Bulk Carrier Fee (\$110; \$1,500 cap): This fee applies to barge or bulk carrier arrivals in the United States from Mexico or Canada. A barge or bulk carrier is considered to be arriving from Mexico or Canada when all of its cargo was loaded in either country, even if the vessel went to another country to discharge cargo prior to arriving in the United States. If all or part of the cargo was laden in another country, the vessel is considered to have arrived from that country (for user fee purposes only), even if the barge or bulk carrier called in Canada or Mexico to unlade and/or lade some cargo just prior to arriving in the United States.

Broker Permit (\$138 annually): Customs brokers are private individuals, partnerships, associations or corporations licensed, regulated, and empowered by CBP to assist importers and exporters in meeting federal import and export requirements.

Commercial Truck (\$5.50; \$100 cap): A driver, owner, agent, or other person in charge of the vehicle can pay a single arrival fee or prepay the fee by purchasing an annual transponder.

Commercial Vessel (\$437; \$5,955 cap): Masters, licensed deck officers, or pursers of commercial vessels of 100 net tons or more arriving within the limits of a U.S. port from a foreign location are required to pay regardless of the number of arrivals at U.S. Ports in the course of a single voyage.

Dutiable Mail (\$5.50): The addressee of each item of international mail that contains dutiable merchandise is required to pay the fee.

Passenger Commercial Air (\$5.50): Passengers arriving in the U.S. by commercial airline whose journeys originate in a place outside the U.S. are required to pay the fee.

Passenger Commercial Vessel (\$5.50; Cruise and Ferry \$1.93): Passengers arriving in the U.S. by commercial vessel are required to pay the fee. This fee is commonly known as a cruise or ferry vessel fee.

Private Vessel and Aircraft (\$27.50 annually): Master or other individual in charge of a private aircraft and private vessel is required to pay the fee.

Railroad Car (\$8.25; \$100 cap): Railroad companies moving or receiving loaded or partially loaded passenger or commercial freight rail cars into the U.S. are required to pay the fee for each loaded car. In lieu of this fee, an annual prepayment per calendar year may be made for each rail car.

ECCF

ECCF Collections are authorized by the *Trade Act of 2002* (P.L. 107-210) section 337, codified as 19 USC 58c (b) (9) (A) (ii) and (b) (9) (B), authorized the establishment of the Express Consignment

Carrier Facilities (ECCF) fee to reimburse CBP for the processing costs incurred at those facilities. The original fee was set at 66 cents per individual airway bill or bill of lading and was later increased to \$1 effective July 2008. Congress also mandated that 50 percent of the ECCF fee collection be transferred to the Treasury's General Fund. ECCF User Fees are intended to be full cost recovery. Because the ECCF fees are deposited in the Customs User Fee Account, for budgetary purposes, they are reported with the COBRA user fees.

Express Consignment Carrier Fee (\$1.00; \$0.50 CBP; \$0.50 remitted to Treasury):

Carriers operating ECO facilities are required to pay the fee.

All COBRA fee rates were last adjusted in April 2007. ECCF fees were last adjusted in July 2008.

C. Budget Request Summary

CBP requests 2,859 full-time equivalent employees and \$686,877,000 in FY 2016 for COBRA user fees and the ECCF fees to recoup the costs incurred for performing COBRA-related inspections. Of the \$686,877,000 in total collections, mandatory COBRA fees represent \$476,922,000 and ECCF collections total \$29,955,000. Spending associated with the *United States-Colombia Trade Promotion Agreement Implementation Act of 2011* represents \$180,000,000 in FY 2016.

For the FY 2016 anticipated collections in COBRA fees from Canada, Mexico, Caribbean, and the adjacent islands, also known as COBRA FTA, CBP has offset its directly appropriated accounts by \$180 million. Availability of these fees requires an appropriation by Congress, which is requested as a general provision. This increase in collections will permit CBP to become more cost recoverable with its COBRA eligible costs, thereby reducing the need for directly appropriated funding.

The Budget also reflects a legislative proposal to increase COBRA fees by \$2 for air and sea passengers and increase other COBRA rates, including ECCF fees, by proportional amounts. If enacted, the additional revenue raised from these fee increases will allow CBP to recover more costs associated with customs related inspections and support the hiring of 900 new CBP officers. This mandatory proposal would not affect the discretionary appropriation for CBP.

Future year collections are based primarily upon international travel projections for passengers and all conveyances under COBRA. Additional factors such as anticipated economic growth and inflation were also considered.

Exhibit 3: Collections by Fiscal Year (In thousands)

	FY 2014 Revised Enacted	FY 2015 President's Budget²	FY 2016 Request	FY 2017 Projection

ECCF	22,457	22,764	24,202	25,383	27,463	27,963
FTA Revenue	-	-	-	-	-	212,347
Total	\$370,447	\$382,662	\$405,519	\$426,673	\$448,684	\$685,524

Estimating and allocating COBRA collections

CBP uses trend analysis in conjunction with economic indicators to forecast collections. Trend analysis is primarily used to determine the periods within the fiscal year where travel volumes are affected by seasonal changes. To develop forecasts, CBP uses numerous sources and focuses mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. GDP and anticipated economic vitality of a region are two factors that are considered in detail.

The bulk of COBRA collections, mainly those attributable to international air travel, are remitted quarterly. CBP relies on carryover balances to address requirements during the first two fiscal months. CBP mitigates the risks associated with COBRA cash flows by minimizing the reimbursement of costs incurred in the annual appropriations during the first two months of the fiscal year until the initial collections become available in December.

² FY 2015 Projected FTA collections are \$216.6 million.

³ FY 2013 FTA Revenue unavailable to CBP (*scored as deficit reduction funding*).

CURRENT SERVICES PROGRAM DESCRIPTION:

COBRA

COBRA collections fund activities that are mandated by law. Supported by fee revenues, Customs and Border Protection officers (CBPOs) help ensure that all carriers, passengers, and their personal effects entering the United States are compliant with U.S. customs laws. To the extent that revenues are available, the estimated FY 2016 collections will fund the activities in the COBRA statute; however, the fees are not legislatively set to fully recover these costs.

COBRA FTA

Effective November 5, 2011, certain exemptions under the *Consolidated Omnibus Budget Reconciliation Act of 1985* (P.L. 99-272; COBRA) were eliminated. Section 601 of the *United States-Colombia Trade Promotion Agreement Implementation Act of 2011* (P.L. 112-42) lifted the exemption that excluded air and sea passengers from Canada, Mexico, and Caribbean and adjacent islands⁴ from having to pay the COBRA air, sea, and cruise vessel (ferry passengers are still exempted) passenger fees. Due to the elimination of the exemptions, CBP collected additional COBRA revenue (the exemption went into place partially through the fiscal year (FY) in FY 2012 and in FY 2013. CBP expects to spend \$180,000,000 in FY 2016.

Express Consignment Carrier Facilities

CBPOs, CBP Agriculture Specialists, CBP Canine Officers, and CBP Technicians who are assigned to ECO facilities execute a significant number of seizures and other enforcement actions each year. Major programs have been developed in response to anti-terrorism and trade enforcement efforts at ECO facilities.

In October 2010, the global counterterrorism community disrupted a potential terrorist attack when concealed explosive devices were discovered in cargo on board aircraft destined for a U.S. ECO facility. CBP determined it could better prevent such attacks and strengthen air cargo supply chain security if the required time frame for the presentation of advance electronic cargo information was, in all cases, before the air cargo was loaded and early enough so that CBP had sufficient time to identify, target, and mitigate high-risk cargo. Therefore, CBP and the Transportation Security Administration (TSA) collaborated with the private sector to identify strategies to strengthen air cargo supply chain security, including developing a mechanism to collect cargo information at the earliest point practicable in the supply chain.

As a result of this collaboration, in December 2010, four express consignment air courier companies (express couriers) volunteered to provide CBP with a subset of the data elements required by 19 CFR 122.48a as early as possible before cargo is loaded onto an aircraft so that the requisite targeting could occur in the pre-loading air cargo environment, thus establishing the ACAS pilot.

⁴ Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Bermuda-United Kingdom, British VI-United Kingdom, Cayman Islands, Cuba, Dominica, Dominican Republic, Grenada and South Grenadines, Guadeloupe-France, Haiti, Jamaica, Martinique-France, Netherlands Antilles, St. Kitts and Nevis, St. Lucia, St. Vincent and North Grenadines, Trinidad and Tobago, Turks and Caicos Islands-United Kingdom

CBP has extended the initial pilot through July 2015. From the pilot's earliest stages through October 2014, CBP has received more than 183 million airway bills with zero Do-Not-Load messages. The prevalence of Intellectual Property Right violations through ECO facilities cannot be understated.

“The scale of international theft of American intellectual property (IP) is unprecedented—hundreds of billions of dollars per year, on the order of the size of U.S. exports to Asia. The effects of this theft are twofold. The first is the tremendous loss of revenue and reward for those who made the inventions or who have purchased licenses to provide goods and services based on them, as well as of the jobs associated with those losses. American companies of all sizes are victimized. The second and even more pernicious effect is that illegal theft of intellectual property is undermining both the means and the incentive for entrepreneurs to innovate, which will slow the development of new inventions and industries that can further expand the world economy and continue to raise the prosperity and quality of life for everyone. Unless current trends are reversed, there is a risk of stifling innovation, with adverse consequences for both developed and still developing countries.”⁵

Three of the ECO facility hubs in the United States and its territories made the top 10 list of locations for IPR seizures in FY 2014. In fact, the number one location, executing 2,000 IPR seizures in FY 2014 through August 2014, was an ECO facility. This figure was up from 977 for the same period in Fiscal Year 2013.

The CBPOs at ECO facilities are also responsible for targeting, inspecting, and seizing large amounts of illegal narcotics entering and transiting through the U.S. In FY 2014, of the top 20 POEs with the largest drug seizures by weight, three were ECO facilities.

Proposals for Promoting Travel and Trade

Strengthening the U.S. economy through the promotion of travel and trade is a Presidential priority. CBP supports this priority by enforcing immigration, agriculture and trade laws and regulations, while facilitating the movement of legitimate people and goods through our borders. The Budget reflects a proposal to increase COBRA User Fees by \$2 for air and sea passengers increase all other components and ECCF by proportional amounts. CBP will transmit this legislative proposal to the appropriate Congressional Authorizing Committees separately. The fee increases will allow us to provide greater security, lower wait times, and increased services for those traveling to the United States

This proposal, along with another legislative proposal to increase the immigration inspection user fee, will address the gap in staffing identified in the FY 2014 Report to Congress on Resource Optimization at Ports of Entry by OFO's Workload Staffing Model (WSM). These new resources will reduce wait-times

⁵ The Report of the Commission on the Theft of American Intellectual Property May 2013.

and increase seizures of illegal items and counterfeit goods. CBP estimates the additional revenue generated by this fee proposal will support over 900 new CBPOs.

Projected Performance Impact and Cost Recovery of COBRA Increases

CBP currently faces several challenges in providing adequate staffing to meet mission requirements for CBPOs. These challenges are described in detail in CBP’s Resource Optimization at Ports of Entry, Fiscal Year 2014 Report to Congress⁶, and include fluctuating user fee collections, expansion of workload including new or expanded facilities, and historic levels of travel volumes, up 12 percent since FY 2009, and projected to increase 3-4 percent each year for the next three years.

Fiscal Outlook with No Fee increase

All COBRA fee rates were last increased by 10 percent beginning April 1st, 2007. The maximum increase could not exceed 10 percent, per 72 Fed. Reg. 3730 (Jan. 26, 2007). The listed fees reflect the higher rate per 19 CFR 24.22. Further, the fee caps were not changed for the last fee increase. Even with the fee increase, cost recovery declined as a result of an increase in global travel and an escalation in CBP’s costs of customs inspections.

Though the availability of COBRA free trade agreement revenue has helped to achieve greater cost recovery, collections will remain stagnant in comparison to customs costs. Without a full-cost recovery status in the customs environment, CBP must support the difference between costs and collections with appropriated funds and not dedicated fees.

COBRA			
	Collections	Costs	% Recovery
FY 2006	\$320,077	\$599,137	53%
FY 2007	\$337,343	\$690,651	49%
FY 2008	\$383,148	\$744,729	51%
FY 2009	\$347,990	\$814,481	43%
FY 2010	\$359,883	\$828,112	43%
FY 2011	\$381,307	\$815,145	47%
FY 2012	\$426,673	\$864,366	49%
FY 2013	\$448,684	\$901,674	50%
FY 2014	\$675,134	\$928,724	73%
FY 2015	\$662,501	\$956,585	69%
FY 2016	\$866,042	\$991,978	87%

⁶ Ibid.

Background on Legislative Proposal for Fee Increases

CBP proposes a \$2.00 increase to the commercial aircraft passenger and commercial vessel passenger components of the COBRA user fees and proportional increases to all other COBRA rates and caps. CBP will send a legislative proposal to the appropriate Congressional Authorizing Committees separately.

	Fee	Prior Rates (Before the last rate increase)	Current Rates (Unit Fee/Annual Cap)	Proposed Rates
COBRA	Commercial Vessels	\$397/\$5,955	\$437/\$5,955	\$594/\$8,316
	Commercial Trucks	\$5.00/\$100	\$5.50/\$100	\$7.50/\$135
	Railroad Cars	\$7.50/\$100	\$8.25/\$100	\$11.25/\$135
	Private Aircraft (Decal)	\$25.00	\$27.50	\$37.50
	Private Vessel (Decal)	\$25.00	\$27.50	\$37.50
	Commercial Aircraft Passenger (User Fee)	\$5.00	\$5.50	\$7.50
	Commercial Vessel Passenger (User Fee – Non Exempt)	\$5.00	\$5.50	\$7.50
	Commercial Vessel Passenger - Exempt	\$1.75	\$1.93	\$2.60
	Dutiable Mail	\$5.00	\$5.50	\$7.50
	Broker Permit	\$125	\$138	\$188
	Barges and Other Bulk Carriers	\$100/\$1,500	\$110/\$1,500	\$150/\$2,100

	Fee	Prior Rates (Before the last rate increase)	Current Rates (Unit Fee/Annual Cap)	Proposed Rates
ECCF	Carriers operating Express Consignment Facilities are required to pay the fee.	\$0.66	\$1.00 (.50 CBP + .50 Treasury)	\$1.36 (.68 CBP + .68 Treasury)

In FY 2014, CBP expects to recover 73 percent of all COBRA eligible costs. With the fee increase, CBP would potentially be able to recover 100 percent of current COBRA eligible costs for customs

inspectional activity in the air environment, 24 percent in the land environment, and 99 percent in the sea environment in FY 2016.

Even with increasing volume and requirements in future fiscal years, the proposed increase in collections, a potential 27 percent increase in the air passenger environment alone assuming current service levels, will mean greater security, lower wait times, and increased services for those traveling to the United States.

Express Consignment Carrier Facilities

The proposed increase in ECCF fees would provide sufficient funding for full cost recovery as well as additional CBPOs and CBP technicians to augment staffing at ECOs and expand their ability to facilitate cargo and conduct additional enforcement actions.

COBRA passenger inspection fee Mission Statement

Customs and Border Protection user fees are authorized under Title 19 U.S.C. 58c, fees for certain customs services. The fees were created by the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA). COBRA fees are made available through permanent /indefinite appropriation created by the user fee statute. CBP collects customs fees to cover the cost of providing customs inspections of commercial operations, including, but not limited to, all costs associated with commercial passenger, vessel, vehicle, aircraft, and cargo processing.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Immigration Inspection User Fee

I. Appropriation Overview

A. Mission Statement for Immigration Inspection User Fee (IUF)

The *Department of Justice Appropriation Act of 1987* (P.L. 99-591) authorized the collection of user fees from international passengers traveling into the United States. This fee is primarily used to fund inspection and detention services at air and sea ports of entry. This law, codified as 8 U.S.C. 1356(h), established the air and sea passenger fees to generate revenues that would reimburse the “expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels.”

After the creation of the Department of Homeland Security (DHS), most of the immigration inspection functions were transferred to U.S. Customs and Border Protection (CBP); however, the functions funded by the IUF for detention and removal of inadmissible aliens and other investigative activities were transferred to U.S. Immigration and Customs Enforcement (ICE). As a result, a Memorandum of Agreement (MOA) was established between CBP and ICE in 2004 to determine the allocation of fee collections between the two DHS Components. Although CBP retains 100 percent of Administrative Carrier Fines, CBP receives 82.63 percent of the Airline and Vessel User Fees. The remaining 17.37 percent of the existing Airline and Vessel User Fees go to ICE.

B. Budget Activities

In FY 2016, the IUF will be used to fund a portion of the salaries, benefits, and overtime for the CBPOs performing immigration inspection, detention, and removal of inadmissible aliens. By statute, CBP discretionary appropriations can be reimbursed for the following activities:

- Providing immigration inspection and pre-inspection services;
- Providing overtime inspection services;
- Administration of debt recovery;
- Detection of fraudulent documents;
- Detention and Removal of inadmissible aliens; and,
- Asylum proceedings at airports and seaports.

The fee rates are as follows:

Passengers Aboard Commercial Aircrafts Originating in Foreign Countries: \$7

Passengers Aboard Commercial Vessels Originating in Foreign Countries: \$7; \$3 for passengers arriving from Canada, Mexico, a U.S. territory, or adjacent islands.

C. Budget Request Summary

CBP requests 4,190 positions and 4,190 full-time equivalent employees and \$652,699,000 in FY 2016 for the IUF.

The Budget also reflects a legislative proposal to increase immigration inspection user fees by \$2 and lift the exemption for commercial vessel passengers traveling from Canada, Mexico, a U.S. territory, or adjacent islands. This would result in a \$9 fee for all air and sea passengers. If enacted, the additional revenue raised from these fee increases will allow CBP to recover more costs associated with determining the admissibility of passengers entering the U.S. and support the hiring of up to 1,400 new CBP officers. This mandatory proposal would not affect the discretionary appropriation for CBP.

The Administrative Carrier Fines portion of IUF differs from the fines collected under the *Illegal Immigration Reform and Immigrant Responsibility Act of 1996* (P.L. 104-208). CBP receives 100 percent of the Administrative Carrier Fines and 82.63 percent of the Airline and Vessel User Fees.

CBP projected the FY 2016 collections (as well as other fiscal years) by taking into account future projections for international travel, both for air and sea passengers.

Exhibit 1: Collections by Fiscal Year

IUF	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2017 Projection
Regular Collections	\$598,552	\$630,218	\$652,699	\$678,490

Exhibit 2: Historical Collections

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
IUF	\$497,869	\$526,425	\$545,007	\$566,919	\$586,049	\$610,182

Estimating and allocating IUF collections

CBP uses trend analysis in conjunction with economic indicators to forecast collections. Trend analysis is primarily used to determine the periods within the fiscal year where travel volumes are affected by seasonal changes. To develop forecasts, CBP uses numerous sources and focuses mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. GDP and anticipated economic vitality of a region are two factors that are considered in detail.

IUF collections are remitted quarterly. The first major remittance occurs annually in February. The February collections will not be deposited until March 1. CBP relies on carryover balances to support inspectional activities during the first five fiscal months. CBP mitigates the risks associated with IUF funds availability flows by using IUF carryover from prior years during the beginning of the fiscal year then using current year funding for reimbursements as collections become available.

CURRENT SERVICES PROGRAM DESCRIPTION:

Individuals seeking entry into the United States are inspected at ports of entry by Customs and Border Protection officers (CBPOs) who determine their admissibility. Often, these CBPOs are the first persons to welcome both visitors and citizens to the United States, while performing the full range of their inspectional duties. The inspection process includes all work performed in connection with the entry of aliens and U.S. citizens into the United States, including pre-inspection performed by CBPOs outside of the United States. A CBPO is responsible for determining the nationality and identity of each applicant for admission and for preventing the entry of ineligible aliens, including criminals, terrorists, and drug traffickers, among others. U.S. citizens are automatically admitted upon verification of citizenship. Non-U.S. citizens are questioned and their documents are examined to determine admissibility based on the requirements of U.S. immigration law.

Under the authority granted by the *Immigration and Nationality Act (INA)* (P.L. 89-236), as amended, a CBPO may question, under oath, any person coming into the United States to determine his or her admissibility. In addition, a CBPO has the authority to search, without warrant, the person and effects of any person seeking admission, when there is reason to believe that grounds of exclusion exist that would be disclosed by such a search.

The INA is based on the law of presumption: an applicant for admission is presumed to be an alien until he or she shows evidence of citizenship; an alien is presumed to be an immigrant until he or she proves that he or she fits into one of the non-immigrant classifications.

CBP collects immigration inspection user fees from air and sea passengers traveling to the United States. At air and sea ports of entry specifically, the fees cover some of the costs of immigration personnel, the maintenance and updating of systems to track criminal and illegal aliens in areas with high apprehensions, and the repair and maintenance of equipment. However, because these fees are statutorily set, their “buying power” diminishes each year if the fees are not adjusted for inflation.

As established in an MOA between CBP and ICE, a portion of the funds from the IUF account are used by ICE to recover some of the costs of immigration investigative services, detention, and removal of inadmissible aliens related to the inspection and pre-inspection services for commercial aircraft or vessels.

Description of Fee increases

The Budget reflects a proposal to increase the immigration inspection user fee by \$2 and lift the exemption for commercial vessel passengers traveling from Canada, Mexico, the U.S. territories, or adjacent Islands. CBP will transmit this legislative proposal to the appropriate Congressional Authorizing Committees separately. The current fees are \$7 for air and commercial vessel passengers and \$3 for partially exempted commercial vessel passengers whose trips originate in Canada, Mexico, the U.S. Territories and adjacent Islands. This fee is paid by passengers and is used to recover some of the costs related to determining the admissibility of passengers entering the US. Specifically, the fees support immigration inspections, personnel, the maintenance and updating of systems to track criminal and illegal aliens in areas with high apprehensions, asylum hearings, and the repair and maintenance of equipment. The \$3 rate for the partial IUF exemption for the sea passengers arriving from Canada, Mexico, and the U.S. Territories and adjacent islands would be increased to \$9 per passenger, effectively eliminating the exemption.

This proposal, along with another legislative proposal to increase COBRA fees, will address the gap in staffing identified in the FY 2014 Report to Congress on Resource Optimization at Ports of Entry by OFO’s Workload Staffing Model (WSM). These new resources will reduce wait-times at air and sea ports of entry. CBP estimates the additional revenue generated by this fee proposal will support over 1,400 new CBPOs.

Projected Performance Impact and Cost Recovery of IUF Increases

CBP currently faces several challenges in providing adequate staffing to meet mission requirements for CBPOs. These challenges are described in detail in CBP’s Resource Optimization at Ports of Entry, Fiscal Year 2014 Report to Congress, and include fluctuating user fee collections, expansion of workload including new or expanded facilities, and historic levels of travel volumes, up 12 percent since FY 2009 and projected to increase 3-4 percent each year for the next three years.

Fiscal Outlook with no fee increase

Immigration User Fee (IUF) rates were last increased in November 2001, per Section 109 of the *Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 2002*, (P. L. 107-77 dated November 28, 2001) the user fee was increased from \$6 to \$7. The \$3 exempt component was established in 2002.

Cost recovery has since declined as a result of an increase in global travel and an escalation in CBP's costs of immigration inspections. IUF collections will remain stagnant in comparison to immigration costs. Without a full-cost recovery status in the immigration environment, CBP must support the difference between costs and collections with appropriated funds and not dedicated user fees.

IUF (In thousands)			
	Collections	Costs	% Recovery
FY 2006	\$494,148	\$506,640	98%
FY 2007	\$484,731	\$518,802	93%
FY 2008	\$580,403	\$588,504	99%
FY 2009	\$498,747	\$589,930	85%
FY 2010	\$526,425	\$687,697	77%
FY 2011	\$545,007	\$724,902	75%
FY 2012	\$566,919	\$758,883	75%
FY 2013	\$586,049	\$774,043	76%
FY 2014	\$610,182	\$802,683	76%
FY 2015	\$630,218	\$832,383	76%
FY 2016	\$866,535	\$875,054	99%

In order to help address these challenges in FY 2016, CBP proposes raising the IUF fee in order to generate funds to decrease the gap between CBP's reimbursable immigration inspectional activity and the actual reimbursements from IUF. This will allow CBP to dedicate resources to increased CBPO hiring, which will result in improved immigration inspection services provided to those who pay this fee when traveling to the United States.

Should this fee increase be realized, CBP has identified several automation and technology development initiatives to improve its business processes related to cruise ship processing, including mobile devices for passenger processing, automated passport control and Global Entry Kiosks, and Entry/Exit Biometric technology development.

Immigration Inspection User Fee Mission Statement

The Department of Justice Appropriation Act of 1987 (P.L. 99-591) authorized the collection of user fees for processing commercial air and sea passengers. This law codified as 8 U.S.C. 1356(h) established the two fees to generate revenues that would reimburse the appropriation for expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$349,833	\$361,734	\$371,804	\$10,070
11.3 Other than Full-Time Permanent	\$7	\$1,690	\$1,714	\$24

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Land Border Inspection Fee

I. Appropriation Overview

A. Mission Statement for Land Border Inspection Fee

The *Department of Justice Appropriation Act of 1990* (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the Land Border Inspection Fees (LBIF) to recover the full costs incurred for the inspection services provided at land border ports of entry.

B. Budget Activities

The funds in the LBIF account are used to support the following CBP activities:

- Overtime inspection services;
- Expansion, operation, and maintenance of information technology systems for nonimmigrant control;
- The hiring of temporary and permanent CBP officers;
- Minor construction costs associated with the addition of new traffic lanes;
- Detection of fraudulent travel documents; and
- Administrative expenses of account.

Collections from LBIF fund the salaries and benefits of CBP officers, as well as operational and maintenance costs. The following fees are deposited into the LBIF account:

- Arrival/Departure Land Border (I-94): \$6
- Non-Immigrant Visa Waiver (I-94W): \$6
- Canadian Boat Landing Permit Individual (I-68): \$16 (individual); \$32 (family)
- NEXUS: \$50 (every 5 years)
 - NEXUS replacement card: \$25
- Free and Secure Trade Program (FAST) Driver Application Fee: \$50 (every 5 years)
- Secure Electronic Network for Travelers Rapid Inspection (SENTRI): \$122.25 (individuals); \$160 maximum (families). Fee is for 5-year membership. In addition to application fee, SENTRI includes the following:
 - Dedicated Commuter Lane Fees: \$80
 - Dedicated Commuter Lane additional vehicle (DCL): \$42
- Replacement of Papers for Nonresident Mexican Crossing (I-190): \$26

The purpose of each fee is as follows:

I-94: This fee is assessed upon the completion of Form I-94 by foreign citizens that are being admitted to the United States under the nonimmigrant visa status. The fee is issued to visitors who hold a valid U.S. Visa or Border Crossing Card.

I-94W: This fee is charged to individuals who enter the U.S. under the Visa Waiver Program. The Visa Waiver Program allows visitors from designated countries to travel to the U.S. for business or pleasure for 90 days or less without obtaining a visa.

I-68 Canadian Boat Landing Permit (individual or family): This fee permits a boater to report their arrival into the United States telephonically without having to appear at a port-of-entry for an in-person inspection. The initial inspection involves an interview, checking the individual in the Interagency Border Inspection System, completion of the form I-68, and payment of the fee.

NEXUS: A joint U.S./Canada Trusted Traveler Program. Enrollment is available at certain northern border land Ports of Entry (POEs) and at all Canadian preclearance ports. NEXUS members are provided expedited entry into the United States and Canada. Applicants must voluntarily undergo a thorough biographical background check against criminal, law enforcement, customs, immigration, and terrorist indices of both Canada and the United States; a 10-fingerprint law enforcement check; and a personal interview with a CBP and Canada Border Services Agency (CBSA) officer. Once applicants are approved, they are issued an RFID-enabled card that will identify their record and their status in the CBP and CBSA database upon arrival. The RFID-enabled card allows the traveler to use specified primary lanes at land border POEs that are reserved for NEXUS enrollee use. NEXUS members are automatically eligible to use Global Entry (GE) kiosks. At the Canadian preclearance airports, passengers use either a GE or NEXUS kiosks instead of dedicated lanes. NEXUS travelers qualify for trusted traveler status in all modes of travel (air, sea, and land). The introduction of WHTI lane technology has provided local managers with the flexibility to add and subtract dedicated lanes to fit traffic demand.

FAST Driver Application Fee: CBP Trusted Traveler Program. FAST is the cargo equivalent of the SENTRI and NEXUS facilitative programs in the passenger environment. Through FAST, importers, commercial carriers, truck drivers, and manufacturers who enroll in the program and meet agreed upon security criteria, including participation in the C-TPAT program, are granted expedited clearance at a POE. The FAST program supports a more secure supply chain and enables CBP to focus security efforts and inspections on high-risk commerce, where the attention is most needed.

Replacement of Papers for Nonresident Mexican Crossing (I-190): Citizens of Mexico must apply for a nonresident border crossing card on Form I-190

SENTRI: CBP Trusted Traveler Program. On the southwest border, SENTRI provides expedited CBP processing for pre-approved, low-risk travelers. Applicants must voluntarily undergo: a thorough biographical background check against criminal, law enforcement, customs, immigration, and terrorist indices; a 10-fingerprint law enforcement check; and a personal interview with a CBP officer. Once applicants are approved, they are issued an RFID enabled card that will identify their record and their status in the CBP database upon arrival at the U.S. POEs. SENTRI users have access to specific,

dedicated primary lanes into the United States. Since 1995, the SENTRI program has grown to include a total of 19 lanes at the ten largest southern border POEs along the U.S./Mexico border. SENTRI members currently account for 19 percent of all cross southwest border traffic.

Dedicated Commuter Lane additional vehicle (DCL): If an approved participant wishes to register more than one vehicle for use in the SENTRI DCL lane (maximum of 4 vehicles), or an approved participant wishes to be registered in more than one vehicle (maximum of 8 persons per vehicle), an additional fee of \$42 per vehicle will be charged.

C. Budget Request Summary

CBP requests 200 full time equivalent employees and \$34,724,000 in FY 2016 for LBIF. This request will fund the salaries and benefits of CBPOs and related operational and maintenance costs. Based upon arrivals from Mexico and Canada into the U.S. under all Land Border Programs, CBP anticipates collecting the following amounts.

Exhibit 1: Collections by Fiscal Year (In thousands)¹

LBIF	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request ²	FY 2017 Projection
Collections	\$42,941	\$43,931	\$34,724	\$35,766

Exhibit 2: Historical Collections

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
LBIF	\$26,723	\$30,799	\$34,678	\$37,136	\$35,407	\$33,376

Effective in FY 2013, the FBI fingerprinting fees are now managed under the Global Entry account. Of the \$42.9 million in enacted dollars for FY 2014, \$32.6 million are attributable to regular Land Border collections. In the FY 2014 enacted amount, the \$42.9 million figure assumed \$10.3 million in FBI fingerprinting fee revenue. Figures for FY 2014 Revised Enacted, FY 2015 Request, and FY 2016 do not include revenue for FBI fingerprinting for the Land Border account. See Table 1 for a visual display of the transfer of FBI fingerprinting fees to the Global Entry account.

² The collections for FY 2014 Revised Enacted and estimated collections for the FY 2015 President's Budget were overstated. The FY 2016 projection was revised accordingly.

CBP requests 200 full-time equivalent employees and \$34.724 million. The budget request includes the following:

Land border inspection fee		Positions	FTE	Budget (\$ in Thousands)
Base	FY 2015 President's Budget	264	264	\$43,931
Current Services	Decrease in User Fee Collections	-64	-64	-9,207
FY 2016 Request		200	200	34,724

CURRENT SERVICES PROGRAM DESCRIPTION:

As authorized by law, LBIF are primarily used to recover part of CBP's costs for its Trusted Traveler Programs (TTP) at land border ports of entry.

The TTP are comprised of the following programs: NEXUS Highway and Air, SENTRI, FAST, and Global Entry. Applicants apply online and enroll using the Global Online Enrollment System. The TTP programs are funded with a combination of discretionary appropriations in the CBP Salary and Expenses account and user fees (for additional information please refer to the Inspections, Trade and Travel Facilitation PPA as well as the TTP PPA). These programs help to improve the targeting, screening, and apprehension of high-risk international travelers, thereby preventing terrorist attacks and criminal activity while expediting the processing of legitimate travelers.

CBP's TTP provide expedited travel for pre-approved, low risk travelers through dedicated lanes and kiosks. Members are travelers who have voluntarily applied, paid a nonrefundable application fee, and provided personal data (including biometric information, photos, and fingerprints) to

CBP. Participants go through a rigorous background check and screening before becoming approved members.

These programs help to identify low-risk, vetted travelers by the voluntary submission of an application and subsequent vetting using automated name and fingerprint-based checks of law enforcement databases, fingerprint/name checks, and an interview with a uniformed officer. Trusted Traveler Programs are projected to expand in FY 2015. Currently, TTP is comprised of four programs NEXUS, SENTRI, FAST, and GE, which are discussed below.

Exhibit 3: Trusted Traveler Program Enrollments FY 2013 - FY 2016

	FY 2013	FY 2014	FY 2015 Projected Membership	FY 2016 Projected Membership
NEXUS	900,499	1,079,361	1,200,000	1,300,000
SENTRI	357,731	397,756	420,000	435,000
FAST	77,484	80,183	81,000	82,000
GE	981,213	1,692,901	2,200,000	2,500,000
Totals	2,316,927	3,250,201	3,901,000	4,317,000

Over the past few years, CBP has significantly increased its membership in the NEXUS and SENTRI Trusted Traveler programs. The NEXUS membership increase is due to the Beyond the Border initiatives involving increase outreach and its blitz operations (Enrollment Center blitzes and mobile enrollment blitzes resulting in a projected 20.5 percent membership expansion through FY 2014). The SENTRI program saw an 11.2 percent membership expansion in FY 2014.

NEXUS Highway and Air

NEXUS, a joint U.S./Canada enrollment program at the northern border land POE and at all Canadian preclearance ports, identifies low-risk travelers through: a complete biographic check, an interview with a CBPO and a Canada Border Security Agency (CBSA) officer, and a fingerprint check. Once applicants are identified as low-risk they are enrolled in the NEXUS program and given a Radio Frequency Identification (RFID)-enabled card that is unique to the traveler. The RFID-enabled card allows the traveler to use specified primary lanes at land border POEs that are reserved for NEXUS enrollee use. At the Canadian preclearance airports, passengers use kiosks instead of dedicated lanes and iris scans are utilized to identify low-risk travelers rather than RFID-enabled cards. At the time of enrollment, travelers qualify for trusted traveler status in all modes of travel (air, sea, and land). The introduction of WHTI lane technology has provided local managers with the flexibility to add and subtract dedicated lanes to fit traffic demand.

Secure Electronic Network for Traveler's Rapid Inspection (SENTRI)

On the southwest border, SENTRI provides expedited CBP processing for pre-approved, low-risk travelers. Applicants must voluntarily undergo: a thorough biographical background check against criminal, law enforcement, customs, immigration, and terrorist indices; a 10-fingerprint law enforcement check; and a personal interview with a CBPO. Once applicants are approved, they are issued an RFID enabled card that will identify their record and their status in the CBP database upon arrival at the U.S. POEs. A sticker decal is also issued for the applicant's vehicle or motorcycle. SENTRI users have access to specific, dedicated primary lanes into the United States.

Since 1995, the SENTRI program has grown to include a total of 19 lanes at the ten largest southern border POEs along the U.S./Mexico border. SENTRI members currently account for 19 percent of all cross southwest border traffic.

Free and Secure Trade (FAST)

FAST is the cargo equivalent of the SENTRI and NEXUS facilitative programs in the passenger environment. Through FAST, importers, commercial carriers, truck drivers, and manufacturers who enroll in the program and meet agreed upon security criteria, including participation in the C-TPAT program, are granted expedited clearance at a POE. Using electronic data transmission and transponder technology, CBP expedites clearance of approved trade participants. The FAST program supports a more secure supply chain and enables CBP to focus security efforts and inspections on high-risk commerce, where the attention is most needed.

Land border inspection fee Mission Statement

The Department of Justice Appropriation Act of 1990 (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the fees to recover costs incurred in the following categories involving the operation of various pilot programs: Overtime inspection services; Expansion, operation, and maintenance of information technology systems for non-immigrant control; Hiring of temporary and permanent inspectors; Minor construction costs associated with the addition of new traffic lanes; Detection of fraudulent travel documents; and Administrative expenses of account.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$22,944	\$23,364	\$17,813	\$(5,551)
11.3 Other than Full-Time Permanent	-	\$73	\$58	\$(15)

BUDGET REQUEST AND SUPPORTING INFORMATION

**U.S. Customs and Border Protection
Immigration Enforcement Fines**

I. Appropriation Overview

A. Mission Statement for Immigration Enforcement Fines

The Immigration Enforcement Account was established under Section 382 of the *Illegal Immigration Reform and Immigrant Responsibility Act of 1996* (P.L. 104-208: IIRIRA). In addition to creating this account, IIRIRA also added new types of fines in order to include fines levied against aliens for failure to depart the United States if so ordered. Fines are also levied on carriers transporting passengers to the United States that violate elements of immigration law.

B. Budget Activities

Subject to the availability of funds, the fines collected are used to support the following CBP activities: identification, investigation, apprehension, detention, and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border, in areas with high apprehensions, to deter illegal entry; and the repair, maintenance, and construction of border facilities.

C. Budget Request Summary

CBP requests \$633,000 in FY 2016 to support five full-time equivalents and the operating costs of collecting enforcement fines. Because immigration violations are not easily quantifiable, enforcement-related collections are relatively fluid and difficult to forecast. Thus, CBP primarily utilizes real Gross Domestic Product (GDP) estimates to project future year revenue collections.

Exhibit 1: Estimated Collections
(In thousands)

Immigration Enforcement Fines Collections (IEF)	FY 2014 Revised Enacted	FY 2015 President’s Budget	FY 2016 Request	FY 2017 Projection
	\$773	\$752	\$633	\$650

Exhibit 2: Historical Collections

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
IEF	\$983	\$208	\$632	\$721	\$699	\$593

Estimating and Allocating Collections for Enforcement Fines:

CBP uses trend analysis in conjunction with economic indicators to forecast collections. CBP bases the forecast using prior actual year collections and then applies trend analysis. It is principally used to determine the periods within the fiscal year where travel volumes are affected by seasonal changes. In developing forecasts, CBP uses numerous sources, and focuses mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. For IEF, international travel forecasts are the factors that are considered in greatest detail.

FY 2016 Program Change	-	-	-
FY 2016 Total Request	5	5	\$633
Total Change 2015 to 2016	-	-	(\$119)

The budget request includes the following:

Immigration enforcement fines		Positions	FTE	Budget (\$ in Thousands)
Base	FY 2015 President's Budget	5	5	\$752
Current Services	Decrease in User Fee Collections	0	0	-119
FY 2016 Request		5	5	633

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP uses prior year actual collections to project collections. Since there was a decline in collections during FY 2014, the CBP forecast for FY 2015 and 2016 collections decreased from when the FY 2015 President's Budget was prepared. These funds are used to support a variety of activities, including the identification, investigation, apprehension, detention, and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens at air and sea ports of entry, in areas with high apprehensions, to deter illegal entry; and the repair, maintenance, and construction of border facilities.

Immigration enforcement fines Mission Statement

The Immigration Enforcement account was established under Section 382 of the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996. Previously, similar fines were collected and deposited into the Immigration User Fee account. In addition to creating this account, IIRIRA also added new types of fines, such as those levied against aliens for failure to depart the United States after being so ordered. The authorized uses of this funds consist of: the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Global Entry User Fees

I. Appropriation Overview

A. Mission Statement for Global Entry User Fees

The Global Entry Program is authorized by the *Intelligence Reform and Terrorism Prevention Act of 2004* (8 U.S.C. 1365b(k)3), as amended by the *Consolidated Appropriations Act of 2008* (P.L. 110-161) Section 565(3)(A). The program establishes an international registered traveler program that incorporates technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international travelers, including U.S. citizens and residents. All applicants must be pre-approved and they must undergo a rigorous background check and interview before enrollment. Global Entry allows expedited clearance for pre-approved and low-risk travelers upon arrival in the United States. Though intended for frequent international travelers, there is no minimum number of trips necessary to qualify. Participants may enter the United States by using automated kiosks located at selected airports.

Subsection (k)(3) of the *Intelligence Reform and Terrorism Prevention Act of 2004*, as amended, authorizes the imposition of a fee to recover the full cost of the program. The implementing regulation to establish an application fee was issued in November 2009 (74 FR 59936 (2009-11-19)). On the basis of cost estimates and enrollment projections, a charge of \$100 per application was deemed appropriate to generate necessary revenue to cover the full cost of processing Global Entry applications. Global Entry collections also include Federal Bureau of Investigation (FBI) Fingerprint Fee (applicable to SENTRI, NEXUS, FAST, and Global Entry): \$14.50 per applicant (\$17.25 for SENTRI applicants). This fee is charged to cover costs of FBI Fingerprint check for applications to SENTRI, NEXUS, FAST, and Global Entry programs.

Currently, Global Entry kiosks can be found in 42 international U.S. airports¹, eight Canadian preclearance locations as well as preclearance locations in Ireland, Aruba, and Abu Dhabi. As of December 31, 2014, Global Entry has 1,862,906 million active enrolled members.

The *Asian-Pacific Economic Cooperation Business Travel Cards Act of 2011* (P.L. 112-54) is an extension to the Global Entry Program, and was enacted in response to the need for business people to gain streamlined entrance to the economies of the Asia-Pacific region. This program began in 2012, and it enables business people to explore new business opportunities, attend meetings, and conduct trade and investment activities.

¹ Saipan International Airport and Guam are part of the U.S. island territories

B. Budget Activities

Global Entry fees reimburse the costs of:

- Salaries and benefits, including overtime, for CBPO’s performing global entry enrollment functions;
- Fingerprint costs for FBI; and
- Equipment costs for purchase of kiosks.

CBP requests \$91,789,000 and 96 full-time equivalent (FTE) employees in FY 2016 for Global Entry. All projections take into account expansion of the Global Entry program and the opening of additional enrollment centers.

The Global Entry program expanded from a successful pilot to a permanent trusted traveler program in February 2012 and CBP continues to increase individual enrollment as well as the number of nations eligible to participate in the program. This has allowed greater numbers of low-risk travelers to efficiently move through security screening and give CBP personnel the ability to put greater focus on higher risk travelers. Due to the successful expansion of Global Entry, in FY 2013 Congress provided an additional \$4,000,000 above the request to facilitate continued growth of the program and to purchase, deploy, and manage approximately 100 additional kiosks and to commence a targeted marketing campaign to further enrollment.

Exhibit 1: Collections by Fiscal Year (In thousands)

Global Entry (GE)	FY 2014 Revised Enacted²	FY 2015 President’s Budget	FY 2016 Request	FY 2017 Estimate
GE Collections		\$72,345	\$74,349	\$77,323
FBI Fingerprinting Fee Collections ³	\$34,835	18,847	17,440	18,138
Total Collections	\$34,835	\$91,192	\$91,789	\$95,461

² The FY 2014 Enacted amount was a projection made in FY 2012 for the FY 2014 President’s Budget. The Global has expanded significantly since that time and now includes collections for F.B.I. Fingerprinting fees.

³ FBI collections managed under Global Entry beginning in FY 2013.

Projected Collections:

Due to the timing of the President's Budget and a significant expansion in the Global Entry program since figures for the FY 2015 President's Budget were formulated, the most recent projections have been listed below. For the sake of consistency, all other exhibits in this document will reflect the FY 2014 Revised Enacted and the FY 2015 President's Budget.

Exhibit 2: Projected Collections

Global Entry (GE)	FY 2015 Projection	FY 2016 Projection	FY 2017 Estimate
GE Collections	\$80,289	\$74,349	\$77,323
FBI Fingerprinting Fee Collections	17,624	17,440	18,138
Total Collections	\$97,913	\$91,789	\$95,461

Exhibit 3: Historical Collections

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014

Base	FY 2015 President's Budget	96	96	\$91,192
Current Services	Increase in User Fee Collections	0	0	597
FY 2016 Request		96	96	91,789

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP designed Global Entry to allow for expedited clearance of pre-approved, low-risk air travelers into the U.S. Through the use of automated kiosks placed in the Federal Inspection Services area of each identified airport, enrolled travelers are able to bypass queues and process through Passport Control without having to see a CBP officer (CBPO). This program facilitates entry into the United States and is especially beneficial to frequent international flyers. Global Entry membership is valid for five years.

The Global Entry user fee is used to support the full cost of the program, including the direct and indirect costs of CBPOs at enrollment centers, the technology required to administer the program, the cost of help desk, the cost of producing the Radio-Frequency Identification (RFID) cards, and the fingerprinting fees charged by the FBI.

The program authorizes the use of technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. The application fee is set at \$100 per applicant to cover the costs of the program. These items include the costs of CBPOs at the

enrollment centers, equipment such as kiosks, software, and help desk support, the cost of producing the RFID cards, and background investigations via an interagency agreement with the FBI.

As of December 2014, Global Entry kiosks can be found in 42 international U.S. airports⁵, eight Canadian preclearance locations as well as preclearance locations in Ireland, Aruba, and Abu Dhabi.

Exhibit 4: Global Entry Locations as of December 2014

United States and Territories			Preclearance
Atlanta	Guam*	Pittsburgh	Calgary, Canada
Anchorage	Honolulu	Portland	Edmonton, Canada
Austin	Houston*	Raleigh-Durham*	Halifax, Canada
Baltimore	Las Vegas	Saipan*	Montreal, Canada
Boston	Los Angeles	Salt Lake City	Ottawa, Canada
Charlotte	Miami	San Antonio	Toronto, Canada
Chicago	Milwaukee	San Diego*	Vancouver, Canada
Chicago Midway	Minneapolis	San Francisco	Winnipeg, Canada
Cincinnati	Newark	San Jose	Dublin*, Ireland
Cleveland	New York (JFK)	San Juan	Shannon*, Ireland
Dallas/Ft. Worth	Orange County (John Wayne Airport)*	Seattle	Aruba, Netherlands Antilles
Denver	Orlando	Tampa	Abu Dhabi, UAE
Detroit	Philadelphia	Washington Dulles	
Ft. Lauderdale	Phoenix	Seattle	

**No Enrollment Centers at these locations*

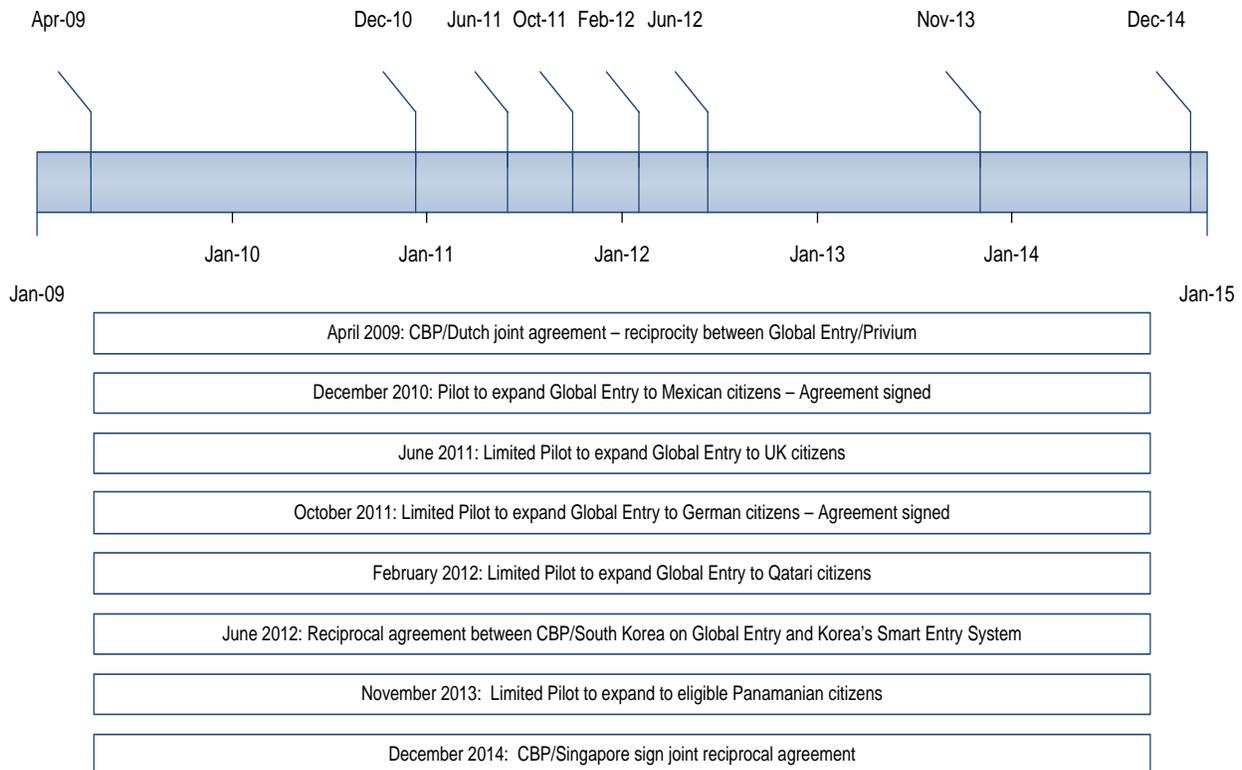

Global Entry applications and enrollments are growing quickly. Since the program’s inception in FY 2008, CBP has accomplished the following:

- Starting in April 2009, CBP has operated a joint program with the government of the Netherlands that allows qualified U.S. citizens to join Privium, the Dutch trusted traveler program, and allows Dutch citizens to join Global Entry. Participants in this program must pass vetting by both CBP and the Netherlands government.
- On December 29, 2010, a Federal Register Notice was published announcing the expansion of Global Entry eligibility to Mexican Nationals. Mexican nationals must pass vetting by

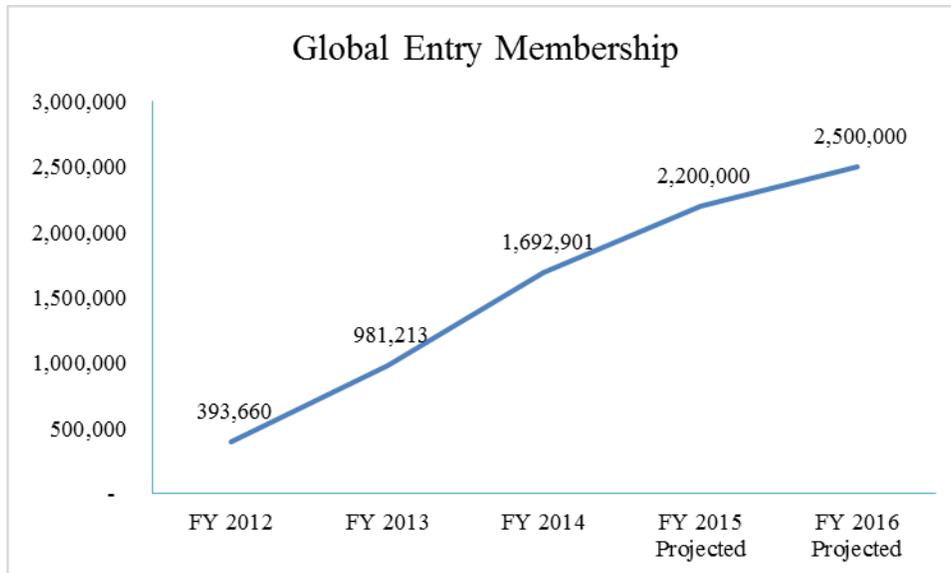

⁵ Saipan International Airport and Guam are part of the U.S. island territories

both CBP and Mexican government officials.

- In June 2011, CBP began implementing a limited pilot with the United Kingdom (UK), allowing UK citizens to participate in Global Entry. UK applicants are subjected to vetting by both CBP and UK government officials.
- In October 2011, CBP began implementing a limited pilot with Germany, allowing German citizens to participate in Global Entry. German applicants are subjected to vetting by both CBP and German government officials.
- In February 2012, CBP began implementing a limited pilot with Qatar, allowing Qatari citizens to participate in Global Entry. Qatari applicants are subjected to vetting by both CBP and the Qatari government.
- On June 12, 2012, CBP implemented a trusted traveler arrangement with the Republic of Korea. The arrangement allows qualified U.S. citizens to join the Smart Entry Service (SES), the Republic of Korea’s trusted traveler program, and allows Korean citizens to join Global Entry. Participants in this arrangement must pass vetting by both CBP and the Republic of Korea.
- In November 2013, CBP began accepting Global Entry application from citizens of Panama. The arrangement expanded Global Entry to certain, eligible Panamanian citizens entering the United States. In June, 2014, Panama launched its Panama Global Pass (PGP) program, which is open to U.S. citizens. Participants in this arrangement must pass vetting by both CBP and the Panamanian Government.
- On December 1, 2014, CBP signed a Joint Statement with Singapore to develop a trusted traveler arrangement. The arrangement will allow citizens of Singapore to apply for and participate in Global Entry. The technical infrastructure for the arrangement is being developed.

As of December 31, 2014, Global Entry has 1,862,906 million active enrolled members. CBP is projecting membership will increase to 2.2 million by the end of FY 2015 and 2.5 million by the end of FY 2016 as shown in the graphic below.

Cost Avoidance/Workforce Multiplier Effect

In FY 2014, there were over 4.7 million uses of Global Entry and NEXUS Air kiosks, representing a 42 percent increase in usage over FY 2013 (*3.3 million uses*). The increased use of these kiosks by travelers arriving the United States resulted in savings equivalent to 71 CBPOs, which is a marginal increase of 11 CBPOs from FY 2013.

CBP has developed Global Enrollment System (GES) for all CBP Trusted Traveler Programs (TTP) to be operational on the CBP national network. GES has integrated the independent CBP enrollment and validation processes into a single solution, and it provides a more efficient platform to share data and perform real-time watch list and lookout checks.

GES also reduces the redundancy of maintaining several application processes, and it allows for a quicker and more accurate application process. CBP has developed a single on-line, paperless application process to support GES and allows a traveler to apply to multiple programs on-line. The on-line application, Global On-Line Enrollment System, supports all TTP applications.

The program has been used as a basis for cooperation with other nations and other agencies in order to further expedite passenger processing. For example, Global Entry participants can join the Fast Low Risk Universal Crossing program, offered by the Netherlands to provide preferred treatment at the Amsterdam Airport.

Global Entry User Fees Mission Statement

The Global Entry Program is authorized under the Consolidated Appropriations Act of 2008 (P.L. 110-161) Section 565(3)(A). The Program established an international registered traveler program that incorporated available technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. In addition, Section 565 (3)(B) of the Consolidated Appropriations Act of 2008 authorized the imposition of a fee to recover the full cost of the Program. The current fee rate has been set at \$100 per applicant.

Summary Justification and Explanation of Changes

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Electronic System for Travel Authorization Fee

I. Appropriation Overview

A. Mission Statement for Electronic System for Travel Authorization Fee

The *Implementing Recommendations of the 9/11 Commission Act of 2007* (P. L. 110-53) established an electronic authorization system to pre-screen aliens prior to arrival in the United States. This mandate was made operational by the creation of the Electronic System for Travel Authorization (ESTA). ESTA operates under enforced compliance, requiring all Visa Waiver Program travelers to obtain authorization prior to travel. The Visa Waiver Program allows visitors from designated countries to travel to the U.S. for business or pleasure for 90 days or less without obtaining a visa.

Section 711 (h)(3)(B) of P. L. 110-53 authorizes the Secretary of the Department of Homeland Security (DHS) to establish a fee via regulation to recover the cost of operating and administering ESTA. U.S. Customs & Border Protection (CBP) conducted a fee study and, in August 2010, published the results in an interim final rule. The fee of \$14 is broken into two parts:

The authorization to travel to the United States is valid for a 2-year period, and travelers pay only once during the 2-year period.

1. **Processing Fee:** All applicants requesting an electronic travel authorization are charged \$4.00 for the processing of the application. Revenue from the processing fee is retained by CBP to fund the costs of operating ESTA, largely system and personnel costs.
2. **Surcharge:** If the application is approved and the individual receives authorization to travel to the United States under the Visa Waiver Program, an additional \$10.00 will be charged. If the electronic travel authorization is denied, the individual is only charged for the processing portion of the application, \$4.00. In FY 2016, revenue from the \$10 surcharge is not available for CBP use. This revenue is reserved for the Corporation for Travel Promotion also known as Brand USA, to enhance the international competitiveness of the U.S. travel and tourism industry and increase U.S. Export balance.

In FY 2016, the CBP budget request for ESTA includes only the processing fee.

B. Budget Activities

ESTA collections fund operational costs to administer the ESTA program and maintain information technology (IT) equipment including the costs of the revenue program, and funds the salaries and benefits of personnel, overtime, and the costs to maintain kiosks and other IT equipment.

C. Budget Request Summary

CBP requests 60 full-time equivalent employees and \$57,332,000 in FY 2016 for ESTA to fund the direct and indirect costs of performing ESTA activities. These costs include, but are not limited to, salaries, benefits, overtime, travel, supplies, and equipment. This estimate is supported by the U.S. Department of Commerce’s projection of an increase of 3 percent inbound travel volume in FY 2016. When taking international travel projections into account (in addition to the factors mentioned above), CBP projects the following amounts in user fee collections.

Exhibit 1: Estimated Collections (In thousands)

ESTA Collections	FY 2014 Revised Enacted	FY 2015 President’s Budget	FY 2016 Request	FY 2017 Projection
ESTA Processing	\$55,168	\$54,929	\$57,332	\$59,625

Exhibit 2: Historical Collections

Historical ESTA Collections (Processing Fee only)	FY 2010¹	FY 2011	FY 2012	FY 2013	FY 2014
	\$1,830	\$44,627	\$48,069	\$51,079	\$53,520

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP requests 60 full-time equivalent employees and \$57.332 million in FY 2016 for ESTA. The request includes the following:

Electronic System for Travel Authorization Fee		Positions	FTE	Budget (\$ in Thousands)
Base	FY 2015 President's Budget	60	60	\$54,929
Current Services	Increase in User Fee Collections	0	0	2,403
FY 2016 Request		60	60	57,332

The Implementing Recommendations of the 9/11 Commission Act of 2007 (P.L. 110-53) required DHS to implement an electronic travel authorization system and other measures to enhance the security of the Visa Waiver Program. ESTA adds a layer of security that allows DHS to determine, in advance of travel, whether an individual is eligible to travel to the United States under the Visa Waiver Program and whether such travel poses a law enforcement or security risk. All passengers from countries that are part of the Visa Waiver Program are required to submit an application via ESTA to determine eligibility to travel to the United States. A passenger whose ESTA application has been rejected must apply for a visa before traveling to the United States. ESTA counterbalances vulnerabilities inherent in visa-free travel by adding a layer of advance scrutiny that enables CBP frontline personnel to focus even more on the small population of potentially dangerous travelers. The following countries participate in the ESTA program:

Exhibit 1: ESTA Locations as of September 2014

Andorra	France	Lithuania	San Marino
Australia	Germany	Luxembourg	Singapore
Austria	Greece	Malta	Slovakia
Belgium	Hungary	Monaco	Slovenia
Brunei	Iceland	The Netherlands	Spain
Chile	Ireland	New Zealand	Sweden
Czech Republic	Italy	Norway	Switzerland
Denmark	Japan	Portugal	Taiwan

ESTA Statistics	
Number of Member Nations	38
Total Number of Visa Waiver Program Applicants since program inception	78.553 million
FY 2014 Compliance Rate	99.92%
FY 2014 Denial Rate	0.26%

Cost Avoidance/Workforce Multiplier Impact

CBP will continue to enhance ESTA, a program that requires all nationals or citizens of Visa Waiver Program countries who plan to travel to the United States for temporary business or pleasure to have an approved ESTA application prior to boarding. The program realized continued savings in CBPO resources in FY 2014. A total of 50,926 ESTA applications were denied in FY 2014, which is an increase of 22 percent (9,233) from FY 2013 (41,693). As a result, CBP did not have to conduct lengthy secondary inspections or process refusals of admission for these individuals at a port of entry. The increased denials resulted in the marginal increase of 18,500 inspectional hours, which is equivalent to 15 CBPOs.

In FY 2015, as part of DHS' ongoing efforts and commitment to protecting the U.S. from threats to the safety and security of the U.S., ESTA made enhancements to the program. New data elements and updated eligibility questions will bolster CBP's ability to identify potential security threats and clarify elements of the application process.

Electronic System for Travel Authorization Fee Mission Statement

P.L. 110-53, or the Implementing Recommendations of the 9/11 Commission Act of 2007 (or the Act) established an electronic authorization system to pre-screen aliens prior to arrival in the United States. This mandate was made operational by the creation of the Electronic System for Travel Authorization (ESTA). ESTA operates under informed compliance, requiring all Visa Waiver Program Travelers to obtain authorization prior to travel. The Visa Waiver Program allows visitors to travel to the U.S. for business or pleasure for 90 days or less without obtaining a visa.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$4,923	\$5,232	\$6,482	\$1,250
11.3 Other than Full-Time Permanent	\$42	\$16	\$16	-

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection

APHIS User Fees

I. Appropriation Overview

A. Mission Statement for APHIS User Fees

Section 2509 of the *Food, Agriculture, Conservation and Trade Act of 1990* (P.L. 101-624) authorized the United States Department of Agriculture (USDA) to collect user fees for various services. The law codified, as 21 U.S.C. 136a, established seven types of Plant Protection and Quarantine (PPQ) user fees, six of which are the Agricultural Quarantine and Inspection (AQI) fees, known as the Animal and Plant Health Inspection Service (APHIS) user fees. These fees are collected to recover the costs of providing inspectional activities for international arrival of passengers, conveyances, animals, plants, and agricultural goods at ports of entry. This authority established fees on five modes of international passenger and conveyance transportation:

1. International air passengers;
2. Commercial aircraft;
3. Commercial vessels;
4. Commercial trucks; and
5. Commercially loaded rail cars.

The *Homeland Security Act of 2002* (P.L. 107-296) transferred certain inspection functions from the USDA to the Department of Homeland Security (DHS). The intent of the revenues from these fees is to achieve full cost recovery for the agriculture quarantine inspection (AQI) function. Section 421(f) of the *Homeland Security Act of 2002* mandates that CBP and USDA agree on a periodic transfer of funds from the latter to the former. Under a Memorandum of Agreement between CBP and USDA, CBP receives approximately 60.64 percent of the collections from the APHIS user fee.

In FY 2013, the revenues from the current fee level covered 77 percent of CBP's costs incurred in providing the inspectional activities associated with the passengers and conveyances that are subject to fees. USDA conducted a comprehensive fee review to determine the appropriate fee rates associated with this program and submitted a notice for proposed rulemaking (NPRM) for review. In May 2014 APHIS announced proposed changes to the fees it charges to recoup the costs of conducting agricultural quarantine inspections (AQI) at U.S. ports of entry. The adjustments APHIS proposes, the first changes to AQI user fees in nearly a decade, will ensure that the AQI program will have the financial stability it needs to continue the critical work of keeping U.S. agriculture safe and productive. The proposed rule is currently in the review and approval period. The proposed AQI fee structure ensures that no party pays more than the costs of the services they incur. The fee is anticipated to be implemented in FY 2015. The proposal

aligns fees with actual program costs, resulting in lowering some fees while others are increased. APHIS is proposing to lower fees for international air passengers from \$5 to \$4 per passenger and fees for railroad cars from \$7.75 to \$2 per railroad car.

APHIS also proposes to raise user fees for inspections of commercial aircraft from \$70.75 to \$225, commercial maritime cargo vessels from \$496 to \$825, commercial trucks with a transponder (a sticker that contains an electronic chip that transmits information about the vehicle's user fee payment status) from \$105 to \$320 a year, and commercial trucks without a transponder from \$5.25 to \$8 per crossing. In each of these cases, current fees do not generate sufficient revenue to cover the costs of the services. APHIS is also proposing to add a \$2 fee per sea passenger to recover costs associated with inspecting cruise vessels and passenger baggage, and to add a \$375 fee to recover the costs of APHIS services for monitoring the application of, or providing treatments to, imported cargo to minimize pest risks.

Exhibit 1: Current and proposed AQI user fee rates (dollars)

User Fee Class	Current	Proposed
Air passenger	\$5	\$4
Commercial aircraft	\$70.75	\$225
Commercial cargo vessel	\$496	\$825
Commercial truck	\$5.25	\$8
Commercial truck with transponder (one annual payment)	\$105	\$320
Commercial cargo railcar	\$7.75	\$2
Sea passenger	no fee	\$2
Treatment	no fee	\$375

Protecting our Homeland, specifically the agricultural health of our nation, is the dual responsibility of APHIS and CBP. This joint responsibility is performed seamlessly, with APHIS responsible for promulgation of rules and regulations and CBP responsible for policy implementation and conducting examinations for AQI operations. CBP Agriculture Specialists, strategically deployed at POEs, are the experts and technical consultants in the areas of inspection, intelligence, analysis, examination, and law enforcement activities related to the importation of agricultural/commercial commodities and conveyances at the various POEs.

Our critical mission requires application of a wide range of federal, state, and local laws and agency regulations when determining the admissibility of agriculture commodities, while preventing the introduction of harmful plant pests, foreign animal diseases, and potential agro-terrorism into the United States. In addition to CBP's partnership with APHIS, CBP Agriculture Specialists work in tandem with a number of other governmental agencies, including the U.S. Fish and Wildlife Service and the Centers for Disease Control and Prevention, to help prevent the introduction of zoonotic diseases associated with the importation of animals, animal products, and animal by-products. CBP Agriculture Specialists also enforce endangered species regulations on plant imports.

The APHIS fees are used for international air passenger, commercial aircraft clearance, commercial vessel, commercial truck, and loaded rail car agricultural inspection and AQI regulatory enforcement activities. After implementation of the new fee rule, the revenues from these fees will enable full cost recovery for all CBP agriculture quarantine inspection activities.

CBP Agriculture Specialists require the use of APHIS and CBP databases to record inspectional examination findings and provide agricultural data for risk analysis and operational oversight. Although CBP Agriculture Specialists must input data into both agencies' systems at this time, the Agriculture Programs and Trade Liaison (APTL) office is working on a business transformation initiative to develop an Agriculture Integrated Database Management System to prevent dual input of data and eliminate duplicative efforts, to improve data quality for operational decision making, and to optimize resources.

B. Budget Activities

APHIS fees reimburse the costs of:

- Salaries and benefits, including overtime, for CBP Agriculture Specialists;
- Salaries and benefits, including overtime, for CBPO's performing agriculture inspection services; and,
- Support costs for these staffs including, rent, supplies, equipment, and other contractual services.

Salaries and benefits comprise approximately 96 percent of the obligations in this account. Fee Rates for APHIS are currently set to:

Aircraft Clearance (current: \$70.75; proposed: \$225): An APHIS user fee will be charged for each commercial aircraft which is arriving, or which has arrived and is proceeding from one United States airport to another under a Bureau of Customs and Border Protection "Permit to Proceed." Each carrier is responsible for paying the APHIS user fee.

Commercial Truck (current: \$5.25; \$105 annual decal; proposed: \$8; \$320 annual decal): The driver or other person in charge of a commercial truck that is entering the customs territory of the United States and that is subject to inspection must, upon arrival, proceed to Customs and pay an APHIS user fee for each arrival.

Commercial Vessel (current: \$496; \$7,440 maximum; proposed: \$825, removes user fee caps for maximum): The master, licensed deck officer, or purser of any commercial vessel, which is subject to inspection, shall, upon arrival, proceed to Customs and pay an APHIS user fee.

Passenger Commercial Air (current: \$5.00; proposed: \$4.00): Each passenger aboard a commercial aircraft, who is subject to inspection upon arrival from a place outside of the customs territory of the United States, must pay an APHIS user fee.

Railroad Car (current: \$7.75; \$155 prepaid; proposed: \$2; removes user fee caps for maximum): An APHIS user fee will be charged for each loaded commercial railroad car which is subject to inspection upon each arrival. The railroad company receiving a commercial railroad car in interchange at a port of entry or, barring interchange, the railroad company moving a commercial railroad car in line haul service into the customs territory of the United States, is responsible for paying the APHIS user fee. If the APHIS user fee is prepaid for all arrivals of a commercial railroad car during a calendar year, the APHIS user fee is an amount 20 times the APHIS user fee for each arrival.

Passenger Commercial Sea (Cruise) (current: \$0; proposed \$2 per passenger): Inspecting a cruise vessel and its passengers includes prearrival analysis of incoming passengers; screening arriving sea passengers for agricultural products by CBP Agriculture Specialists and CBP Officers; inspection of passenger baggage using CBP agriculture canines and specialized non-intrusive inspection equipment; inspection of the vessel itself to ensure that contaminants, prohibited articles, or invasive pests are not present; inspecting the ship's stores to ensure that prohibited items are not present or are properly safeguarded; and monitoring the storage and removal of regulated international garbage from the vessel to ensure consistency with all existing regulatory requirements.

Treatment (current \$0; proposed: \$375): Treatments are performed on some agricultural goods as a condition of entry, and others are performed when an actionable pest (i.e., a plant pest that should not be allowed to be introduced into or disseminated within the United States) is detected during a port-of-entry inspection. The objective of these AQI treatments is to ensure that agricultural goods and commodities entering the United States are free from viable plant pests and noxious weeds that would pose a risk to the health of the U.S. domestic agriculture and natural resources. Treatment methods include fumigation, cold treatment, irradiation, and heat treatment.

C. Budget Request Summary

In FY 2016, CBP requests 3,006 full-time equivalent employees and \$515,810,000 for APHIS to partially fund the direct and support costs of performing the APHIS activities. The 2016 request assumes a full year of fees at the proposed levels. These costs include, but are not limited to salaries, benefits, overtime, travel, supplies, and equipment costs for CBP Agriculture Specialists, CBPOs, and CBP technicians who perform APHIS-related functions. CBP's intent is for the full costs of APHIS activities to be recovered through fees and we will continue to work with USDA to ensure that routine reviews are conducted to assess costs against the fee levels.

Future year collections are projected as follows, based upon revised fees and the anticipated transfers from the USDA. All collection estimates for APHIS also take into account future forecasts for international travel and conveyances.

Exhibit 2: Collections by Fiscal Year (In thousands)

APHIS Collections	FY 2014 Revised Enacted¹	FY 2015 President's Budget	FY 2016 Request	FY 2017 Estimates
Regular Collections	\$355,216	\$371,814	\$387,130	\$402,615
Fee increase	-	\$92,700	\$128,680	\$133,827
Total Collections	\$355,216	\$464,514	\$515,810	\$536,442

Exhibit 3: Historical Collections

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
APHIS	\$346,983	\$312,227	\$319,116	\$348,805	\$366,370	\$362,526

APHIS fee rates are set by USDA and CBP's share of these fees is determined by a codicil agreement with USDA each year. USDA is required by law to fully recover its costs associated with the APHIS program. CBP typically receives 60 to 63 percent of the total collections. The amount received by CBP does not cover CBP's costs of providing agriculture inspection services. The rate change should allow CBP to achieve full cost recovery in FY 2016, a 26% increase from a cost recovery level of 74% in FY 2014.

¹ \$362.5 million is the FY 2014 Codicil amount, the \$355.2 million is the enacted figure.

FY 2016 Total Request	3,006	3,006	\$515,810
Total Change 2015 to 2016	50	50	\$51,296

The budget request includes the following:

APHIS User Fees		Positions	FTE	Budget (\$ in Thousands)
Base	FY 2015 President's Budget	2,956	2,956	\$464,514
Current Services	Full Cost Recovery AQI Fee Increase	50	50	29,190
	Increase in User Fee Collections	0	0	22,106
FY 2016 Request		3,006	3,006	515,810

An adjustment is included to depict the additional collections that will occur as a result of the impact of the rate change for a full year.

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP's Agriculture Program is managed by the Agriculture Programs and Trade Liaison (APTL) Directorate, which provides leadership, expertise, and innovation to defend the U.S. from the threats of agricultural and biological terrorism (or Ag/bio-terrorism). APTL is also responsible for the CBP agriculture mission of safeguarding and protecting American agriculture from the risks associated with the entry, establishment, or spread of plant pests and pathogens, noxious weeds, and foreign animal diseases.

The agriculture program receives funding from user fees and from the Salary and Expenses appropriation (Inspections Trade and Travel Facilitation). Currently there are six types of Agriculture Quarantine Inspection User Fees that are related to Customs and Border Protection Agriculture

Quarantine Inspection activities. These fees are also sometimes referred to as “Animal and Plant Health Inspection Service fees.” A Notice of Proposed Rulemaking is currently in the review and approval period for proposed increases to these rates.

Exhibit 4: Agricultural Quarantine and Inspection User Fees

	Current Rate	Proposed Rate
International Air Passenger	\$5.00	\$4.00
Commercial Aircraft	\$70.75	\$225
Commercial Maritime Vessels	\$496.00 (\$7,440 cap)	\$825 (removes cap)
Trucks (single entry)	\$5.25	\$8.00
Trucks (annual and multiple entry decal)	\$105.00	\$320.00
Loaded Rail Car	\$7.75 (\$155 prepaid)	\$2.00 (removes cap)

To carry out CBP’s agricultural border inspection duties, CBP Agriculture Specialists are trained to serve as experts in agriculture, border intelligence, analysis, and examination and enforcement activities. Each year, millions of pounds of fresh fruits, vegetables, cut flowers, herbs, and other agricultural items enter the United States via commercial shipments from around the world. CBP Agriculture Specialists are trained to detect potential threats in passenger baggage, air, land, and maritime conveyances of agricultural imports that could potentially threaten U.S. agriculture, our natural resources, and our economy. CBP Agriculture Specialists at U.S. POEs, express consignment operations, and international mail facilities target, detect, intercept, and prevent the entry of these potential threats before they have a chance to do any harm. Annually, CBP Agriculture Specialists intercept tens of thousands of actionable pests that have been identified through scientific risk assessment and study as being harmful to the health and safety of U.S. agricultural resources.

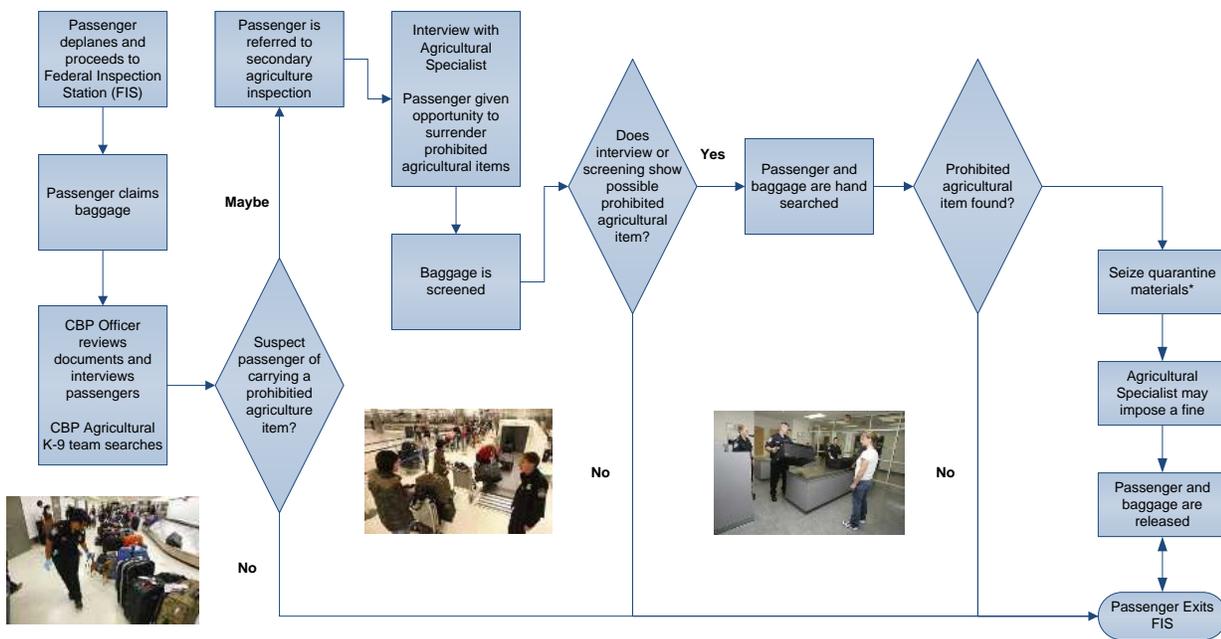

Exhibit 3. New agriculture laboratory being installed with fume hood (to mix chemicals) to the left of the sink.

Exhibit 5: Agriculture Statistics²

	FY 2013	FY 2014
Passenger Inspections	23,253,867	22,780,557
Total Cargo Inspections	743,869	705,510
Total Quarantine Material Interceptions	1,606,299	1,621,748
Animal By-Products	12,996	12,625
Meat Products	375,702	389,323
Plant Material/Soil	1,217,601	1,219,800
Pest interception Submitted	161,236	154,834
Reportable Pests	73,199	66,857
Total Civil Violations	60,310	75,481

Exhibit 7: Primary and Secondary Stages of the Agriculture Inspection Process

Agriculture is the largest industry and employment sector in the United States, with annual economic activity related to production and export of food, raw materials, etc. With growth in international travel and trade, comes an increased risk in new pest pathways. CBP is dedicated to preventing the introduction and spread of invasive pests and harmful animal diseases. For agriculture detection, ports utilize personnel and resources that include CBP Agriculture Specialists, non-intrusive inspections (NII), and agriculture canine (AK9) teams. Deployment of AK9 teams help to increase efficiency in detection and introduce more flexibility when allocating inspectional resources.

² Data Source: Agriculture Quarantine Activity system.

AK9 teams can:

- Raise compliance levels by detecting and discouraging possible smugglers.
- Maximize efficiency and reduce inspection time by addressing gaps in coverage aside from CBP Agriculture Specialists and NII.
- A trained AK9 can quickly and effectively scan luggage and hand carry bags in seconds.
- Enhance confidence level for detection of undeclared agriculture products.

The operational impact of AK9s include:

- A trained AK9 typically has an above 90 percent accuracy rate for detection.
- AK9 have the ability to discriminate and target specific odors, such as an orange or even a live snail.
- Optimize efforts to monitor compliance and minimize agriculture risk with participants of the trusted travelers programs ensuring program integrity;
- Engage in community outreach for audiences of all ages;
 - AK9 team can be utilized to increase public awareness of the importance of protecting the United States agriculture industry.
- Supplement agriculture operations with a clear return on investments. Some examples are:

Impacts to Agriculture Industry

According to APHIS, if the Mediterranean fruit fly and Asian long horned beetle, two major agricultural pests, were left unchecked, they would result in several billions of dollars in agriculture production loss annually. Similarly, if foot-and-mouth disease or Exotic Newcastle disease were to become established in the United States, foreign trading partners could invoke trade restrictions and producers would suffer devastating losses. In addition to the APHIS contributions to protect the health of U.S. agriculture in the international trade arena, CBP has developed and implemented advanced science-based training programs and interfaced with our importing and trade community to ensure agricultural imports meet stipulated entry requirements.

In FY 2014, CBP Agriculture Specialists seized over 1.6 million prohibited plant and animal products, and intercepted over 154,800 pests that were submitted to USDA for identification.

To highlight the importance of the CBP agriculture mission, one harmful pest intercepted by CBP Agriculture Specialists is the Asian gypsy moth (AGM) (*Lymantria dispar*), named for its home continent. The AGM is a voracious pest of trees that poses a major threat to forest habitats in North America. If established in the United States, each AGM female could lay egg masses that in turn could yield hundreds of voracious caterpillars with appetites for more than 500 species of trees and shrubs. AGM defoliation would severely weaken trees and shrubs, killing them or making them susceptible to diseases and other pests. Caterpillar silk strands, droppings, destroyed leaves, and dead moths would be a nuisance in homes, yards, and parks. In the East, European gypsy moths defoliate an average of about 4 million acres each year, causing millions of dollars' worth of damage. If AGM were to become established in the United States, the damage could be even more extensive and costly due to the ability of AGM females to fly long distances (up to 25 miles), making it probable that the AGM could quickly infest and spread throughout the United States.

From 2008 to 2014, CBP Agriculture Specialists intercepted live AGM egg masses on 185 vessels, 76 containers, and seven steel break bulk shipments, preventing the spread of this invasive, and economical and environmentally catastrophic pest.

Development of the Agricultural Specialist Resources Allocation Model

APTL is continuing efforts to finalize the CBP Agriculture Specialist Resource Allocation Model in order to identify optimal staffing levels of CBP Agriculture Specialists to ensure the protection of American agriculture. In February 2014, CBP completed the CBP Agriculture Specialist Resource Allocation Model. The CBP Agriculture Specialist Resource Allocation Model has been turned over to the Office of Field Operation's (OFO) Planning, Program Analysis and Evaluation for inclusion of Agriculture Supervisors and Program Managers. This model incorporates risk assessments and workload activities, including the agriculture canine program. The results from this model are currently being integrated with the OFO Workload Staffing Model (WSM), and CBP will be providing comprehensive staffing requirements for both the CBP Officers and CBP Agriculture Specialists in the FY 2015 Resource Optimization Strategy Report to Congress.

APTL Integrated Database Management System (AIDMS)

The CBP agriculture mission lags behind in the CBP modernization program towards electronic data filing and paperless entry processing. APTL and CBP Agriculture Specialists have USDA reporting requirements that are different from other CBP requirements and agriculture cargo entry reviews, which rely on hard copies of permits, certificates, notices of entry and manifests filed by trade. APTL is collaborating with USDA to ensure the electronic transmission of critical data elements by trade, improving reliability and accuracy of data in CBP systems and increasing the efficiency of fulfilling certain reporting requirements. Currently, 30 percent of CBP Agriculture Specialist's workload is spent on manual, flawed, and duplicative entry of trade data into the APHIS Agriculture Quarantine Activity System databases. APTL continues to work with the CBP Office of Information and Technology on the development and implementation of an APTL Integrated Database Management System (AIDMS) that:

- Seamlessly and cost-effectively integrates CBP and APHIS systems and processes;
- Eliminates manual data entries by CBP Agriculture Specialist at U.S. POEs;
- Provides the infrastructure for cataloging, screening, and analyzing critical data for agriculture risk targeting and generating key performance metrics; and
- Satisfies the Government Accountability Office recommendations to improve data collection for agriculture quarantine inspection operations.

Phase I of the AIDMS initiative implemented enhancements to CBP systems to better capture CBP agriculture activities and improve data quality for examination results. Subsequent development and deployment in October 2013 for Phase II resulted in the elimination of duplicate data entry for reporting requirements capturing the volume and disposition of imported fruits and vegetables. OIT, in conjunction with APTL and USDA, APHIS, constructed an interface within CBP systems for CBP Agriculture users to streamline the data entry process by supplying data elements available electronically within CBP systems, supplemented with user-supplied information, and electronically

transmitted to USDA. Additional reporting requirements and data interchanges with USDA, APHIS are anticipated to be deployed in July 2015.

APEC - Agriculture Pest Exclusion Coordinator –

The APEC is a CBP Agriculture Specialist who facilitates trade by ensuring that cargo is not delayed pending identification of Cargo Release Authorities (CRA) eligible pests. CRA is an established process currently in use in collaboration with USDA. The APECs is a collateral duty that does not reduce staffing at POEs. The APECS takes on the responsibility of identifying and processing pest interceptions, which frees up inspection time for other CBP Agriculture Specialists. Assigning a collateral duty that encourages the utilization of Cargo Release Authorities by CBPAS, which in turn creates higher efficiencies in cargo inspections decreases cargo hold times and fosters more thorough, productive inspections. In the first pilot delivery at the Port of Pharr, Texas, average cargo hold times were reduced from 4 hours to 30 minutes.

APHIS User Fees Mission Statement

Section 2509 of the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorized USAD to collect user fees for various services. The law codified as 21 U.S.C. 136 established seven types of Plant Protection and Quarantine (PPQ) user fees, six of which are the Agricultural Quarantine and Inspection (AQI) fees, known to CBP as the APHIS user fees. The six established processing fees are for international air passengers, commercial aircraft clearance, commercial vessels, commercial trucks, commercial truck decals, and loaded rail cars. The revenues from these fees are used to reimburse 77% of the costs incurred in providing the inspectional activities associated with the passengers and conveyances that are subject to fees.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$198,683	\$236,561	\$267,355	\$30,794
11.3 Other than Full-Time Permanent	-	\$967	\$988	\$21
11.5 Other Personnel Compensation	\$41,934	\$25,936	\$27,245	\$1,309
12.1 Civilian Personnel Benefits	\$99,761	\$113,998	\$121,473	\$7,475
Total, Salaries & Benefits	\$340,378	\$377,462	\$417,061	\$39,599

An increase of \$3,311,000 is for an estimated increase in user fee collections. An increase of \$36,288,000 is for greater reliance on increased AQI fees.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$3,725	\$60	\$114	\$54

An increase of \$54,000 is for an estimated increase in user fee collections.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$0	\$5,055	\$4,976	(\$79)

An increase of \$29,000 is for an estimated increase in user fee collections. A decrease of -\$108,000 is for greater reliance on increased AQI fees.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$2,358	\$54,681	\$74,138	\$19,457

An increase of \$18,461,000 is for an estimated increase in user fee collections. An increase of \$996,000 is for greater reliance on increased AQI fees.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.4 Operation and Maintenance of Facilities	\$0	\$13,132	\$5,146	(\$7,986)

A decrease of \$7,986,000 is for greater reliance on increased AQI fees.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$1,692	\$1,196	\$1,447	\$251

An increase of \$251,000 is for an estimated increase in user fee collections.

BUDGET REQUEST AND SUPPORTING INFORMATION

**U.S. Customs and Border Protection
Puerto Rico Trust Fund**

I. Appropriation Overview

A. Mission Statement for the Puerto Rico Trust Fund

The Puerto Rico Trust Fund (PRTF) is established by 48 U.S.C. § 740, which states, in pertinent part: “The duties and taxes collected in Puerto Rico...less the cost of collecting the same shall be paid into the Treasury of Puerto Rico to be expended as required by law for the government and benefit thereof.” As per this primary statute, U.S. Customs and Border Protection (CBP) acts as Puerto Rico’s sole customs service. CBP and the Homeland Security Investigation (HSI) Directorate of U.S. Immigration and Customs Enforcement (ICE) also perform investigative law enforcement activities under statute, 48 U.S.C. § 1469c. This secondary statute provides any U.S. government agency or instrumentality the authority to provide additional services to Puerto Rico, at the Government of Puerto Rico’s behest, on a reimbursable basis.

Collections in Puerto Rico, less the costs of collecting duties and taxes, are transferred to Puerto Rico’s Treasury (Hacienda) to be expended as required by law for the Government of Puerto Rico. CBP continues to focus on its customs, agricultural, immigration, and counterterrorism missions in Puerto Rico. These additional expenses, as well as overtime, are reimbursed with their respective PRTF collections, Consolidated Omnibus Budget Reconciliation Act user fees, Immigration Inspection User Fees, and Agriculture Quarantine and Inspection user fees.

B. Budget Activities

CBP administers the PRTF and retains a portion of the funds to pay for expenses associated with the CBP mission in Puerto Rico. CBP annually transfers funding from PRTF to ICE for investigative and enforcement duties it performs in Puerto Rico. The reimbursement from the PRTF to ICE is based on a biennial agreement negotiated with the Government of Puerto Rico. This transfer, however, is subject to the availability of funds in the PRTF. The remaining balances in excess of eligible expenses are remitted to the Government of Puerto Rico.

For CBP, most of the PRTF collections support the costs of performing collection and inspection duties in Puerto Rico. This includes the salaries and benefits of personnel, contractual services, information technology, equipment, and technical support.

C. Budget Request Summary

CBP requests 292 full-time equivalent employees and \$99,058,000 in actual collections in Fiscal Year 2016 for the PRTF. These projections are based upon multiple factors underlying the economy of Puerto Rico.

In FY 2013, an importer in Puerto Rico disputed duties collected by CBP at the Court of International Trade. The disputed duties are being recognized as contingencies in the event they must be paid out to the importer following the dispute. This is in compliance with the Statement of Federal Financial Accounting Standards, which requires federal agencies to recognize any future cash outflow that is likely to occur and is measurable as a contingent liability. In May of 2014 this activity ceased and is not expected to continue in FY 2015 and beyond.

Exhibit 1: Collections by Fiscal Year (In thousands)

PRTF	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2017 Estimate
Collections	98,602	98,076	99,058	100,048
Contingencies	120,000	-	-	-

Exhibit 2: Historical Collections

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Collections	\$84,081	\$85,098	\$100,210	\$106,746	\$135,320	\$114,815
Contingencies	-	-	-	-	\$118,466	\$65,467

Estimating and allocating collections from the PRTF:

CBP uses trend analysis in conjunction with economic indicators to forecast collections. Trend analysis is principally used to determine the periods within the fiscal year where travel volumes are affected by seasonal changes. In developing forecasts, CBP uses numerous sources, and focuses mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. Gross Domestic Product and anticipated economic vitality of a region are two factors that are considered in great detail.

PRTF collections are monitored monthly and adjusted as economic indicators are reviewed. Travel initiatives such as the *Travel Promotion Act of 2009*, the American Express endorsement of the Global Entry Program, and free trade agreements such as those with Colombia, Panama, and Korea will be studied independently throughout the year to address the impact to global trade and travel. In addition, the unemployment rate and inflation are taken into consideration to determine to what extent these factors might have on the forecast process. Spending from the PRTF is directly related to the collection amounts in Puerto Rico. If collections do not materialize as projected, then spending must be decreased by a related amount.

CBP requests 292 full-time equivalent employees and \$98.058 million in actual collections for Puerto Rico Trust Fund. This request includes:

Puerto Rico Trust Fund		Positions	FTE	Budget (\$ in Thousands)
Base	FY 2015 President's Budget	292	292	\$98,076
Current Services	Increase in User Fee Collections	0	0	982
FY 2016 Request		292	292	99,058

CURRENT SERVICES PROGRAM DESCRIPTION:

Puerto Rico was acquired by the United States in 1898 via the Spanish-American war and is within the customs territory of the United States (U.S.). Congress required the former U.S. Customs Service (USCS) to collect any such duties on behalf of Puerto Rico; therefore, CBP serves as the sole customs service of Puerto Rico. The Government of Puerto Rico may establish other taxes and fees applicable to goods imported into the territory that CBP may collect on behalf of the Government of Puerto Rico.

CBP's Statutory Authority lies within statute 48 U.S.C. § 740, which provides CBP the authority and broad discretion to administer the customs laws of Puerto Rico. CBP is the sole customs service of Puerto Rico. 19 U.S.C § 1469c provides CBP (or any U.S. governmental agency or instrumentality) the authority to provide additional services to Puerto Rico, at the Government of Puerto Rico's request, on a reimbursable basis.

In 1997, the Government of Puerto Rico signed a Memorandum of Understanding with the Commissioner of USCS allowing the PRTF to be used to support additional USCS Special Agents (now ICE/HSI) to conduct drug smuggling investigations.

The San Juan Field Office oversees CBP programs and operations at seven ports of Entry in Puerto Rico and the U.S. Virgin Islands. The San Juan Field Office operates under the Puerto Rico Trust Fund (for POEs in Puerto Rico) and the Virgin Islands Deposit Fund (for POEs in the U.S. Virgin Islands). To obtain additional information on the VIDF, please review the section entitled “U.S. Virgin Islands Deposit Fund.”

Puerto Rico Trust Fund Mission Statement

The duties and taxes related to the Puerto Rico Trust Fund are authorized under Title 48 U.S.C. 740. The duties and taxes collected in Puerto Rico, less the costs of providing inspection and law enforcement services, are paid into the treasury of Puerto Rico, to be expended as required by law for the Government of Puerto Rico and the benefit thereof. These funds are intended to combat criminal elements who have focused on Puerto Rico as a gateway to illegally introduce narcotics into the mainland of the U.S.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Virgin Islands Fees

I. Appropriation Overview

A. Mission Statement for the Virgin Islands Deposit Fund

The United States Virgin Islands (USVI) is an unincorporated territory of the United States. This unincorporated status establishes the USVI as outside of the more specific customs territory of U.S. based on Section 36 of the *1936 Organic Act*, codified as 48 U.S.C. § 1406i. This Act gives U.S. Customs and Border Protection (CBP) the authority to collect duties and taxes levied by the USVI Legislature that are deposited into the Virgin Islands Deposit Fund (VIDF) for use as revenue for the USVI. Under 19 U.S.C. § 1469c, CBP may also provide reimbursable services to the USVI at the USVI's behest. This reimbursable arrangement is denoted in a 1994 Memorandum of Agreement (MOA), which outlines the services provided by CBP and the funding sources to be used in their execution. Per these two statutes, CBP deducts the costs of collection and other agreed upon services in the 1994 MOA from the VIDF, and then remits the remaining funds to the USVI.

The primary mission of Customs and Border Protection officers (CBPOs) is to screen all people, vehicles, and goods entering the United States, while facilitating the flow of legitimate trade and travel into and out of the United States. Their mission also includes carrying out traditional border-related responsibilities, including narcotics interdiction, enforcing immigration laws, protecting the nation's food supply and agriculture industry from pests and diseases, and enforcing trade laws.

The VIDF, in addition to the cost of collection of USVI customs duties and taxes, funds the costs of CBPO pre-departure inspection services for air passengers departing the USVI for the continental United States (CONUS) and Puerto Rico. Absent of this pre-departure process and the collection of the USVI's duties and taxes, CBP's presence in the USVI is not unlike that of any other U.S. port of entry. CBP continues to focus on its agricultural, immigration, and counterterrorism missions in the USVI. These additional expenses are reimbursed with their respective Immigration Inspection User Fee and Agriculture Quarantine and Inspection user fee sources.

B. Budget Activities

CBP collects duties and taxes in the USVI on behalf of the Government of the USVI; the revenue is used to reimburse the Office of Field Operations for the cost of collection and the pre-departure inspection of air passengers departing the USVI for the continental United States and Puerto Rico. VIDF funding is considered part of CBP's reimbursable program, thus it is not included as part of the Budget's appendix.

For CBP, the costs of performing duty collection and passenger inspection in the USVI include the salaries and benefits of personnel, contractual services, information technology, equipment, and technical support. After the cost of CBP operations are taken into consideration, any remaining or unused funds in the VIDF must be remitted to the Government of the USVI.

C. Budget Request Summary

CBP requests 61 full-time equivalent employees and \$11,867,000 in FY 2016 for the VIDF. This estimate is for USVI customs duties charged on goods imported to the U.S. Virgin Islands.

Exhibit 1: Collections by Fiscal Year (In thousands)

VIDF Collections	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2017 Estimate
	11,302	11,789	11,867	11,986

Exhibit 2: FY 2015 President's Budget versus FY 2015 Projected Collections

	FY 2015 President's Budget	FY 2015 Projected Amount
VIDF Collections	11,789	11,750

The amounts for the FY 2015 President's Budget were projected in January of 2014. The FY 2015 projected figure has since been updated and does not result in a decrease of FTE.

Exhibit 3: Historical Collections

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
VIDF	\$14,816	\$15,928	\$14,336	\$12,017	\$11,672	\$11,633

Estimating and allocating collections in the Virgin Islands Deposit Fund

CBP uses trend analysis in conjunction with economic indicators to forecast collections. Trend analysis is principally used to determine the periods within the fiscal year where travel volumes are affected by seasonal fluctuations. In developing forecasts, CBP uses numerous sources and focuses mainly on demand side factors, such as anticipated economic growth and inflation. These factors are weighted and applied against trade and travel. Gross Domestic Product and anticipated economic vitality of a region are two factors that are considered in great detail.

The unexpected closure of the Hovensa refinery in 2012 proved to have a permanent impact on the economy of the USVI. This has had a negative impact to the USVI both in tourism and trade by decreasing levels for both as well as decreasing collections in the Virgin Island Deposit Fund. See USVI workload in Exhibit 1 below. Over 2,000 direct and indirect jobs were affected and decreased anticipated growth in the region.

Exhibit 4: A Sampling of U.S. Virgin Islands Workload

	FY 2011	FY 2012	FY 2013	FY 2014
Total Containers (Full & Empty)	6,708	6,946	0	1

FY 2016 Total Request	61	61	\$11,867
Total Change 2015 to 2016	-	-	\$78

This budget request includes the following:

Virgin Islands Fees		Positions	FTE	Budget (\$ in Thousands)
Base	FY 2015 President's Budget	61	61	\$11,789
Current Services	Increase in User Fee Collections	0	0	78
FY 2016 Request		61	61	11,867

* The Virgin Islands Fees FTE was incorrectly reported in the FY 2015 President's Budget as zero; however, the correct estimate is 61 FTE, which is included in the Mandatory Fees row.

CURRENT SERVICES PROGRAM DESCRIPTION:

The USVI is an unincorporated territory of the United States which was acquired from Denmark in 1917. Although a U.S. territory, the USVI is expressly excluded from the definition of customs territory of the United States. The USVI Legislature has the power to establish its own customs duties applicable to merchandise imported into the USVI. Congress required the former U.S. Customs Service to collect any such duties on behalf of the USVI. The primary statutes governing this arrangement are *the Organic Acts of 1917, 1936, and (revised) 1954*.

CBP's Statutory Authority lies within Section 36 of the *1936 Organic Act*, codified as 48 U.S.C. § 1406i, which provides CBP the authority and broad discretion to administer the customs laws of the USVI. 19 U.S.C § 1469c provides CBP (or any U.S. governmental agency or instrumentality) the authority to provide additional services to the USVI, at the Government of the USVI's (GVI's) behest, on a reimbursable basis. CBP also provides immigration and agriculture services which are authorized by their various statutory authorities and funded by each activity's respective user fee funding source. As the USVI is outside of the customs territory of the United States, the authority

granted via 48 U.S.C. § 1406i and 19 U.S.C § 1469c, expands CBP's authority to enforce USVI customs laws and to perform other activities to be funded by the Virgin Islands Deposit Fund (VIDF).

Virgin Islands Fees Mission Statement

The United States Virgin Islands (USVI) are a territory of the United States, but are considered an independent customs territory. Section 36 of the 1936 Organic Act, codified as 48 U.S.C. ? 1406i, gives Customs and Border Protection (CBP) the ability to administer USVI fees at its own discretion. CBP may also provide reimbursable services to the USVI under 19 U.S.C. ? 1469c. The reimbursable arrangement is denoted in the 1994 Memorandum of Agreement, which outlines the duties provided by CBP and the funding sources to be used in the execution of those duties. The USVI fee collections fund the costs of customs services and the inspection of passengers departing to the continental United States. CBP's presence in the USVI is to intercept illegal immigrants and to combat criminal elements that have focused on the USVI as a gateway to illegally introduce narcotics into the U.S. mainland. CBP continues to focus on agricultural inspections and counter-terrorism in the USVI as well.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$5,231	\$5,504	\$5,551	\$47
11.3 Other than Full-Time Permanent	-	\$16	\$16	-
11.5 Other Personnel Compensation	\$822	\$652	\$652	-
12.1 Civilian Personnel Benefits	\$2,896	\$2,743	\$2,774	\$31
Total, Salaries & Benefits	\$8,949	\$8,915	\$8,993	\$78

In FY 2016, an increase of \$78,000 is due to a change in collection estimates that will be used for salaries and benefits.

A. Component Overview

The U.S. Customs and Border Protection (CBP) is comprised of the following mission-oriented programs that support achievement of the DHS strategic missions, goals, and objectives.

Securing America's Borders: Securing America's Borders is charged with securing America's Southwest, Northern, and certain Coastal borders. Through the coordinated use of operational capabilities and assets of the U. S. Border Patrol and the Office of Air and Marine, CBP prevents terrorists and terrorist weapons, illegal aliens, smugglers, narcotics, and other contraband from moving across the border of the United States.

Securing and Expediting Trade: The Securing and Expediting Trade program encompasses a multi-layered system of people, technology, intelligence, risk information, targeting, international cooperation and expanded shipper vetting that provides CBP greater flexibility and capacity in shifting functions away from the physical border, allowing CBP to better intercept potential threats before they can cause harm while expediting legal trade/commerce.

Securing and Expediting Travel: The Securing and Expediting Travel program encompasses a multi-layered system of people, technology, intelligence, risk information, targeting, international cooperation and expanded traveler vetting that provides CBP greater flexibility in shifting functions away from the physical border, allowing CBP to intercept potential threats before they can cause harm while expediting legal travel.

Intelligence and Targeting: The Intelligence and Targeting program supports a flexible enforcement capability that anticipates and detects border violations threatening our security, economy, and public safety. Serving as a powerful partnership that connects the law enforcement & intelligence communities, the enterprise develops, provides and coordinates capabilities to support the Agency's primary mission to secure our borders, and works toward its vision to become a responsive enterprise enabling CBP to serve as a premier intelligence-driven law enforcement agency. The enterprise promotes four essential outcomes: (1) detect threats away from our borders; (2) identify travelers & shipments according to the threat they pose; (3) integrate and coordinate our intelligence & targeting capabilities; (4) establish stronger partnerships with domestic and foreign partners.

Integrated Operations: Integrated Operations has established the foundation for an integrated, all-hazards planning framework that considers routine emergencies or interruptions of border security operations including trade and travel and catastrophic events. Integrated into responses are CBP perspectives, which include Internal as well as external Communications, and interagency coordination with communications. CBP will adopt both the National Incident Management System (NIMS) and the National Response Framework (NRF) as the common doctrine for communications planning, execution and response.

Management and Administration: This program captures activities that provide enterprise leadership, management and/or business administration services and describes the capabilities and activities that support the day-to-day management and back office functions enabling the Department to operate efficiently and effectively. Key capabilities include conducting agency planning and performance management, managing finances, managing agency workforce, providing

physical and personnel security, acquiring goods and services, managing information technology, managing agency property and assets, managing agency communications, managing legal affairs, and providing general management and administration.

FY 2016 Budget Request

The table below shows CBP’s FY 2016 Budget request by its mission-oriented programs.

Program	FY 2016 Request	
	FTE	Dollars (in thousands)
Securing America's Borders	23,236	4,646,383
Securing and Expediting Trade	11,584	1,919,376

Performance Measures

For Prevent Terrorism and Enhance Security, Management Measures are displayed to provide a more thorough context of expected performance results.

Management Measures

Measure: Percent of time TECS is available to end users						
Description: This measure quantifies the availability of the TECS service to all end-users based on a service level of 24X7 service. TECS is a U.S. Customs and Border Protection (CBP) mission-critical law enforcement application system designed to identify individuals and businesses suspected of or involved in violation of federal law. TECS is also a communications system permitting message transmittal between the Department of Homeland Security law enforcement offices and other National, state, and local law enforcement agencies, access to the Federal Bureau of Investigation's National Crime Information Center and the National Law Enforcement Telecommunication Systems (NLETS). NLETS provides direct access to state motor vehicle departments.

Performance Measures

For *Secure and Manage Our Borders*, two types of performance measures are presented. Strategic Measures represent CBP's measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act Modernization Act (GPRAMA) performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Measures

Measure: Amount of smuggled outbound currency seized at the ports of entry (in millions)						
Description: This measure provides the total dollar amount of all currency in millions seized during outbound inspection of exiting passengers and vehicles, both privately-owned and commercial. The scope of this measure covers both the southwest and northern borders and includes all modes of transportation, (land, air, and sea).						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	\$40	\$35	\$30	\$30	\$30	\$30
Result:	\$47	\$31.9	\$36.9	\$37.7	N/A	N/A

Measure: Number of smuggled outbound weapons seized at the ports of entry						
Description: This measure provides the total number of illegal weapons seized during outbound inspection of exiting passengers and vehicles, both privately-owned and commercial. Weapons are defined as pistols, rifle-shotgun combinations, rifles, revolvers, shotguns, disguised weapons, machine guns, submachine guns or machine pistols. Seizing weapons being smuggled for criminal purposes strengthens our border security by preventing the movement of assault weapons and ammunition.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	400	400	400	400
Result:	N/A	N/A	731	411	N/A	N/A

Measure: Percent of cargo by value imported to the U.S. by participants in CBP trade partnership programs						
Description: This measure describes the percent of all cargo that is imported from CBP trade partnership programs based on the value compared to total value of all imports. Partnership programs include both Customs-Trade Partnership Against Terrorism (C-TPAT) and Importer Self Assessment (ISA). CBP works with the trade community through these voluntary public-private partnership programs, wherein some members of the trade community adopt tighter security measures throughout their international supply chain and in return are afforded benefits. A variety of trade actors are included in these partnership programs, such as importers, carriers, brokers, consolidators/third party logistic providers, Marine Port Authority and Terminal Operators, and foreign manufacturers.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	45%	45%	57%	59%	54%	53%
Result:	55.07%	54.7%	55.2%	53.9%	N/A	N/A

Measure: Percent of detected conventional aircraft incursions resolved along all borders of the United States						
Description: The measure represents the percent of conventional aircraft, once detected visually or by radar, that are suspected of illegal cross border activity and are brought to a successful law enforcement resolution. In some cases, Office of Air and Marine (OAM) assets are launched to interdict the aircraft. In most cases, resolution of the aircraft identity is made by the Air and Marine Operations Center (AMOC) working with interagency partners such as the Federal Aviation Administration (FAA). If the incursion is deemed legal, OAM considers the incursion resolved. If not resolved, AMOC working with our partners including OAM assets - could not identify the target and is thus considered illegal.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	100%	100%	100%	100%	100%	100%
Result:	95.3%	96%	99.3%	98.8%	N/A	N/A

U.S. Customs and Border Protection - Strategic Context

Measure: Percent of import revenue successfully collected						
Description: This measure estimates the collected duties, taxes, and fees (called net undercollection of revenue) expressed as a percent of all collectable revenue due from commercial imports to the United States directed by trade laws, regulations, and agreements. The total collectable revenue is total collected revenue plus the estimated net undercollected revenue based on trade violations. The revenue gap is a calculation of uncollected duties (the difference between estimated undercollection and overpayment) based on statistical sampling.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	100%	100%	100%	100%	100%	100%
Result:	99.12%	98.88%	98.73%	99.56%	N/A	N/A

Measure: Percent of imports compliant with U.S. trade laws						
Description: This measure reports the percent of imports that are compliant with U.S. trade laws including customs revenue laws. Ensuring that all imports are compliant and free of major discrepancies allows for lawful trade into the U.S.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	98%	98%	97.5%	97.5%	97.5%	97.5%
Result:	97.67%	96.46%	97.66%	97.99%	N/A	N/A

Measure: Percent of inbound cargo identified by CBP as potentially high-risk that is assessed or scanned prior to departure or at arrival at a U.S. port of entry						
Description: This measure gauges the percent of international cargo coming to the United States via air, land, and sea identified as potentially high-risk using the Automated Targeting System (ATS) that is assessed or scanned prior to lading or at arrival at a U.S. port of entry. Assessing, resolving, and when necessary scanning potentially high-risk cargo prior to lading or at arrival at the ports of entry ensures the safety of the U.S. public and minimizes the impact to the trade through the effective use of risk-focused targeting.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	100%	100%	100%	100%	100%
Result:	N/A	98%	98%	99.22%	N/A	N/A

Measure: Percent of people apprehended multiple times along the Southwest border						
Description: This measure examines the percent of deportable individuals who have been apprehended multiple times by the U.S. Border Patrol. This measure calculates the number of people apprehended multiple times divided by the total number of apprehensions of people during a fiscal year. Effective and efficient application of consequences for illegal border crossers will, over time, reduce overall recidivism.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	<=18%	<=17%	<=17%	<=17%
Result:	N/A	N/A	16%	14%	N/A	N/A

U.S. Customs and Border Protection - Strategic Context

Measure: Rate of interdiction effectiveness along the Southwest Border between ports of entry						
Description: This measure reports the percent of detected illegal entrants who were apprehended or turned back after illegally entering the United States between the ports of entry on the Southwest border. The Border Patrol achieves this desired strategic outcome by maximizing the apprehension of detected illegal entrants or, confirming that illegal entrants return to the country from which they entered; and by minimizing the number of persons who evade apprehension and can no longer be pursued.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	77%	80%	81%
Result:	N/A	N/A	N/A	79.28%	N/A	N/A

Management Measures

Measure: Average number of apprehensions for persons with multiple apprehensions along the Southwest border						
Description: This measure examines the average number of apprehensions for deportable individuals who have been apprehended multiple times by the U.S. Border Patrol. Effective and efficient application of consequences for illegal border crossers will, over time, reduce the average number of apprehensions per recidivist and reduce overall recidivism.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	<=2.48	<=2.45	<=2.42	<=2.42
Result:	N/A	N/A	2.41	2.40	N/A	N/A

Measure: Compliance rate for Customs-Trade Partnership Against Terrorism (C-TPAT) members with the established C-TPAT security guidelines						
Description: This measure provides the overall compliance rate achieved for all validations performed during the Fiscal Year. After acceptance into the Customs-Trade Partnership Against Terrorism (C-TPAT) program, all C-TPAT members must undergo a periodic validation in which U.S. Customs and Border Protection (CBP) examiners visit company locations and verify compliance with an industry-specific set of CBP security standards and required security practices. These validations are prepared using a weighted scoring system that is used to develop an overall compliance rate for each company. Compliance with security guidelines enhances the security of cargo shipped to the U.S.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	100%	100%	94%	94%	94%	94%
Result:	95.1%	94.5%	96.8%	96.2%	N/A	N/A

Measure: Number of joint operations conducted along the Northern Border by Border Patrol Agents and Canadian law enforcement partners						
Description: This measure tracks the number of initiated joint operations that are formalized by operations orders to engage in joint operations along the Northern Border. These bi-lateral law enforcement efforts between Customs and Border Protection and Canadian law enforcement partners at federal, provincial, territorial, and municipal (local) levels enhance the ability to ensure legal trade and travel, while mitigating border security threats, including illicit activity by criminal organizations and others who would do harm to our Nation.						

U.S. Customs and Border Protection - Strategic Context

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	12	18	24	24	24
Result:	N/A	50	27	34	N/A	N/A

Measure: Number of joint operations conducted along the Southwest Border by Border Patrol Agents and Mexican law enforcement partners

Description: This measure tracks the number of initiated joint operations that are formalized by operations orders which define levels of participation and dedication of resources. Bi-lateral law enforcement efforts between CBP/Border Patrol and Mexican law enforcement partners at local, state, and federal levels enhance the ability to ensure legal trade and travel, while mitigating border security threats, including illicit activity by criminal organizations and others who would do harm to our Nation. (For FY12 on, this measure will be part of the management set.)

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	9	10	11	12	20	20
Result:	12	22	31	23	N/A	N/A

Measure: Number of shipments seized as a result of intellectual property rights violations

Description: This trade discrepancy measure provides the number of seizures made by U.S. Customs and Border Protection (CBP) and U.S. Immigration and Customs Enforcement (ICE) for Intellectual Property Rights (IPR) violations. IPR infringement undermines the economic vitality of the United States by reducing the competitiveness of U.S. industry, threatens national security due to infiltration of counterfeit parts in the supply chain for defense systems and other critical infrastructure, and poses risks to the health and safety of consumers. CBP and ICE are actively engaged in protecting America by seizing these infringing goods.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	23,000	24,000	25,000	25,000	25,400
Result:	N/A	22,880	24,394	23,161	N/A	N/A

Measure: Percent of air passengers compliant with laws, rules, and regulations

Description: This measure is the compliance rate of international air passengers with all of the laws, rules, and regulations that U.S. Customs and Border Protection (CBP) enforces at the Ports of Entry, with the exception of agriculture laws and regulations. It is also referred to as the Air Compex rate, and includes all customs and immigration violations, both category I (major) and category II (relatively minor). Category II violations far out-number category I violations and include all noncompliance with established customs and immigration laws, rules, regulations, as well as violation of all rules and regulations of other agencies. This includes inadmissible alien travelers, prohibited items for other agencies, such as the Food and Drug Administration, confiscation of alcoholic beverages on behalf of state authorities, Consumer Product Safety Commission safety alerts, and trade violations such as amended declarations resulting in additional revenue or CBP action.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	98%	98%	98%	98%	98%	98%
Result:	98.62%	98.6%	98.6%	98.5%	N/A	N/A

Measure: Percent of air support launches accomplished to support Homeland Security missions						
Description: A primary and important measure for Air and Marine is its capability to launch an aircraft when a request is made for aerial support. This measure captures the percent of all requests made for air support to which the program was able to respond.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	95%	95%	95%	95%	95%	95%
Result:	84%	85%	96%	94%	N/A	N/A

Measure: Percent of apprehensions at Border Patrol checkpoints						
Description: Checkpoints are facilities used by the Border Patrol to monitor traffic on routes of egress from areas on the Southwestern and Northern borders. Checkpoints are an integral part of the Border Patrol's defense-in-depth, layered strategy. As such, measurements of activities occurring at checkpoints serve not only to gauge checkpoint operational effectiveness, but also serve as barometers of the effectiveness of the Border Patrol's overall national border enforcement strategy to deny illegal entries into the United States. This measure examines one component of checkpoint activity, the number of persons apprehended by Border Patrol agents, and compares these apprehensions to Border Patrol apprehensions made nationwide.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	<5%	<5%	<5%	<5%	<5%	<5%
Result:	2.51%	2.00%	2.26%	1.96%	N/A	N/A

Measure: Percent of border vehicle passengers in compliance with agricultural quarantine regulations						
Description: The measure shows the U.S Customs and Border Protection's (CBP) success at maintaining a high level of security in the land border environment by measuring the degree of compliance with U.S. Department of Agriculture (USDA) agricultural quarantine regulations and other mandatory agricultural product restrictions. CBP randomly samples border vehicle passengers for compliance with all USDA laws, rules, and regulations using USDA guidance on sampling procedures.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	95.5%	95.5%	95.5%	95.5%	96.5%	96.5%
Result:	97.56%	97.6%	97.4%	97.3%	N/A	N/A

Measure: Percent of international air passengers in compliance with agricultural quarantine regulations						
Description: The measure shows the U.S. Customs and Border Protection's (CBP) success at maintaining a high level of security in the international air environment by measuring the degree of compliance with U.S. Department of Agriculture (USDA) agricultural quarantine regulations and other mandatory agricultural product restrictions by international air passengers. CBP randomly samples international air passengers for compliance with all USDA laws, rules, and regulations using USDA guidance on sampling procedures.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016

Subtotal, Enacted Appropriations and Budget Estimates	20,960	19,332	5,948,161	20,972	19,374	5,359,065	21,286	19,791	6,281,637	314	417	922,572	311	360	731,790	3	57	190,782
Net, Enacted Appropriations and Budget Estimates:	20,960	19,332	5,948,161	20,972	19,374	5,359,065	21,286	19,791	6,281,637	314	417	922,572	311	360	731,790	3	57	190,782

¹ The FY 2014 Revised Enacted amount for the Salaries and Expenses appropriation includes a transfer of \$333,800,000 for Custody Operations (\$261.1M) and Transportation and Removal Program(\$72.7M) for costs associated with unaccompanied alien children and adults with children. The transfers are from the following DHS accounts: Transportation Security Administration \$34,700,000, United States Coast Guard \$31,500,000, Federal Emergency Management Agency \$267,600,000, as approved by the House and Senate Committees on Appropriations on August 6, 2014 and August 4, 2014, respectively.

²The FTE level displayed in the FY 2016 President's Budget column differs from the amount reported in the FY 2016 President's Budget Appendix due to adjustments.

ii. Status of Congressionally Requested Studies, Reports and Evaluations

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2014	10/30/2014	House Report 113-91 accompanying the FY 2014 DHS Appropriations Act (P.L. 113-76).	Intellectual Property Rights Investigations and Enforcement Report- The Committee directs ICE to report to the Committee on the number of agents in the United States and abroad dedicated to commercial fraud and IPR investigations, the number of hours spent by agents in fiscal year 2014 on these investigations, and the number of investigations that have resulted in charges in fiscal year 2014, not later than October 30, 2014.	With ICE for clearance.
2014	11/15/2014	House Report 113-91, and Senate Report 113-77, accompanying the FY 2014 Department of Homeland Security (DHS) Appropriations Act (P.L. 113-76).	FY 2014 Quarter 4 Enforcement and Removal Operations Report- ICE is directed to continue reporting quarterly on detention and removal, including the number of deportation, exclusion, and removal orders sought and obtained by ICE.	Cleared by ICE Office of Director. Currently with ICE addressing DHS comments.
2014	11/15/2014	House Report 113-91, which accompanies the FY 2014 DHS Appropriations Act (P.L. 113-76).	FY 2014 Worksite Enforcement Report - The Committee directs ICE to provide an annual report on the number of opened and closed enforcement investigations, employee and employer arrests, both criminal and administrative, and the fines assessed and collected each fiscal year. This report shall be submitted to the Committee within 45 days after the end of each fiscal year.	Sent to DHS on 1/8/2015.
2015	2/2/2015	FY 2014 DHS Appropriations Act (P.L. 113-76), which refers to the FY 2013 DHS Appropriations Act (P.L. 113-6) and the FY 2012 DHS Appropriations Act (P.L. 112-74).	FY 2015 Multi-Year Investment Management Plan Report- U.S. Immigration and Customs Enforcement each shall submit to the Committees on Appropriations of the Senate and the House of Representatives with the congressional budget justification, a multi-year investment and management plan, to include each year starting with the current fiscal year and the 3 subsequent fiscal years, for their respective Offices of Information Technology	With ICE for OD clearance.
2015	2/2/2015	House Report 113-91 referenced in the Joint Explanatory Statement that accompanies the FY 2014 DHS Appropriations Act (P.L. 113-76).	FY 2015 Textile Transshipment Report- The Committee directs ICE to ensure that their activities are maintained at least at the level in prior years. The Committee directs ICE to provide an update annually on these activities.	Sent to DHS on 1/13/2015.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement Salaries and Expenses

I. Appropriation Overview

A. Mission Statement for Salaries and Expenses:

Programs funded through the Salaries and Expenses account contribute to the U.S. Immigration and Customs Enforcement (ICE) mission of bringing a unified and coordinated focus to the enforcement of federal immigration and customs laws. ICE uses the resources in Salaries and Expenses to combat terrorism, deter illegal immigration, and protect our Nation's physical and cyber borders. ICE accomplishes these missions through investigations, dismantling transnational criminal organizations, and prosecuting criminals and aliens who pose a risk to national security and public safety.

B. Budget Activities:

Management and Administration

Management and Administration (M&A) provides a range of mission and operational support for ICE. M&A manages ICE's financial and human resources, information technology, sensitive property, and other assets and is responsible for all human resources services, workforce recruitment, equal employment opportunity, and training for all employees and special agents. M&A also processes over 33,000 Freedom of Information Act (FOIA) requests each year, provides firearms and tactical training to over 12,000 special agents and officers, trains new and existing ICE employees, and procures goods and services for the agency. The Office of Professional Responsibility (OPR) is responsible for providing oversight of the detention system, reviewing compliance with 287(g) memoranda of agreement, and inspecting ICE programs and offices for policy compliance. OPR is also charged with overseeing the physical and operational security for ICE employees, facilities, and information. In FY 2014, OPR completed 32 detention facility inspections, 18 reviews of 287(g) programs, 17 management inspections, and 25 audits of certified undercover operations.

Legal Proceedings

The Office of the Principal Legal Advisor (OPLA) provides the legal advice, training, and services required to support the ICE mission. As the legal representative for the United States Government at immigration court hearings, OPLA's 900 attorneys handle a variety of immigration-related issues that range from contested removals and custody determinations and applications for administrative relief, to supporting the Department of Justice (DOJ) Executive Office for Immigration Review (EOIR) in defending removal orders before the U.S. Courts of Appeals. OPLA also provides critical legal advice to ICE's law enforcement components that focus on criminal and civil customs and immigration offenses. OPLA provides general legal advice regarding fiscal and procurement law, ethics, information disclosure, employment and

labor law, federal litigation, and other administrative matters. In addition, OPLA attorneys, as Special Assistant U.S. Attorneys (SAUSA), prosecute criminal immigration and customs cases in federal court. In FY 2014, OPLA assigned 29 attorneys to SAUSA positions, which were responsible for over 1,600 criminal convictions in federal court. SAUSAs increase the number of criminals prosecuted for violating immigration and customs laws; aid ICE agents and officers with investigating such crimes by securing wiretaps and securing warrants; and expedite the removal of criminal aliens.

Homeland Security Investigations

HSI's 6,200 criminal investigators conduct transnational criminal investigations in order to disrupt and dismantle organizations engaged in smuggling and other cross-border criminal activities seeking to exploit America's legitimate travel, trade, financial and immigration systems for illicit purposes. HSI is comprised of three Program, Project, & Activities (PPA):

Domestic Investigations – Domestic Investigations executes a broad investigative portfolio that involves carrying the movement of people and goods across our borders. The program investigates illegal trafficking in weapons (including weapons of mass destruction), the smuggling of narcotics and other contraband, human smuggling and trafficking, money laundering and other financial crimes, fraudulent trade practices, identity and benefit fraud, child exploitation, and health and public safety dangers.

International Affairs (OIA) – OIA represents the Department of Homeland Security's (DHS) largest investigative law enforcement presence abroad and helps protect the Nation beyond its borders with 75 offices in 48 countries. Through International Investigations, OIA works with foreign counterparts to identify and combat criminal organizations before they can adversely impact the United States by conducting joint investigation within foreign countries of transnational criminal organizations and dismantling and disrupting networks and pathways used by transnational criminal organizations. Additionally, through its Visa Security Program, OIA prevents potential terrorist and criminal threats reaching the United States by deploying ICE special agents overseas to United State embassies where they investigate, identify and close visa security vulnerabilities.

Intelligence – The Office of Intelligence develops, analyzes, and disseminates relevant information and intelligence to support ICE leadership, operations, and investigations, and allows ICE to prioritize its resources in combating public and national security risks. Information is gathered to identify threats, patterns, trends, methods, and organizations related to transnational crimes. This information supports law enforcement efforts and investigations across ICE, DHS and many levels of government.

Enforcement and Removal Operations

ERO's 5,800 deportation officers and immigration enforcement agents enforce our Nation's immigration laws by identifying and apprehending aliens that pose a threat to our national government and public safety. To enforce border security, protect public safety, and protect

national security, ICE prioritizes the removal of individuals apprehended at the border or ports of entry while attempting to unlawfully enter the United States, as well as those who pose a danger to national security or a risk to public safety, including aliens convicted of crimes, with particular emphasis on violent criminals, felons, and repeat offenders. ERO is comprised of five PPAs:

- **Custody Operations Program** – With 209 detention facilities nationwide, Custody Operations provides safe, secure, and humane detention of removable aliens who are held in government custody because they present a risk of flight, a risk to public safety, or are subject to mandatory detention. ICE carefully monitors which aliens are detained to ensure its detention space is used to best support border security and public safety.
- **Fugitive Operations Program** – With 129 Fugitive Operations Teams nationwide, Fugitive Operations locates and apprehends fugitive aliens in the United States. ICE strives to identify and apprehend all fugitives, with an emphasis on those aliens posing the greatest risk to public safety and national security. This promotes the integrity of the immigration process.
- **Criminal Alien Program (CAP)** – CAP identifies criminal aliens incarcerated within federal, state, and local correctional facilities. To ensure that these criminal aliens are removed rather than released into the community, ICE strives to secure a final order of removal prior to the termination of their sentences. Upon completion of their criminal sentences, aliens are transferred into ICE custody to be removed from the United States. CAP is also responsible for the day-to-day management of IDENT/IAFIS interoperability.
- **Alternatives to Detention Program (ATD)** – ATD places lower-risk aliens under various forms of intensive supervision or electronic monitoring rather than in detention. These systems can be a cost-effective way to ensure individuals' appearances for immigration hearings and for removal. This program also significantly lowers the risk that aliens ordered removed will become fugitives. In FY 2014, the average daily participant level was 23,193, and the total population served was 48,170.
- **Transportation and Removal Program (TRP)** – TRP provides for the safe and secure transportation of aliens in ICE custody (including the transfers of unaccompanied children from DHS to Department of Health and Human Services custody), and the removal of aliens from the United States. TRP's activities directly affect other ICE operations, including enforcement, field operations, custody management, and repatriation. In FY 2014, ICE removed 315,943 aliens, of which 177,960 were convicted criminal aliens.

Unaccompanied Children (UC) Contingency Funding- This funding will be available for costs generally associated with the transportation of more than 58,000 UC (which is included in the base), and up to a maximum of 104,000 UC. The Budget scores a total of \$2.588 million of \$27.6 million potentially available to the Transportation and Removal Programs PPA based on calculated probabilities of incremental thresholds of UC apprehensions above levels as of the comparable date in FY 2015 being met in FY 2016.

ERO Pay Reform- The FY 2016 President's Budget includes \$50 million in adjustments-to-base within the ERO PPAs to offset the 2016 estimated costs of creating pay parity between the

two existing ERO law enforcement positions: Deportation Officers and Immigration Enforcement Agents. This transition is pending the completion of the reviews and actions announced in the Secretary’s November 20, 2014 memo, *Personnel Reform for Immigration and Customs Enforcement Officers*. The Budget transitions all ERO officers into one unified job series to reflect ICE ERO’s current mission to national security and public safety. With a unified career path, ERO will be able to recruit and retain a skilled workforce to meet its critical mission needs. ICE estimates approximately \$62 million in costs in 2016, and approximately \$455 million over five years. Any 2016 costs above the requested \$50 million will be funded using DHS’s reprogramming and transfer authorities.

C. Budget Request Summary:

ICE requests \$5,881,137,000; 20,899 positions; and 19,436 full-time equivalents (FTE) in Fiscal Year (FY) 2016 for the Salaries and Expenses appropriation.¹

Program Change Requests changes

ICE requests program changes for the Salaries and Expenses appropriation in the following key areas:

- **Increase in new attorney positions.....\$36.5M (197 FTE)**
 The request will provide funds for 82 attorney positions requested in the October 2014 Technical Assistance and 282 new attorney positions. OPLA requires additional attorney resources to meet its increasing workload driven by recent increases in the number of Department of Justice (DOJ) immigration judges (IJs) and ongoing southwest border surge operations as well as additional requirements anticipated as a result of an increase in Freedom of Information Act (FOIA) requests and appeals. These additional positions are expected to decrease the average length of stay of detainees by 14 percent.
- **Increase in Detention Beds to 34,040.....\$435.392M (0 FTE)**
 To meet operational needs to detain and remove both criminal aliens and recent border entrants, ICE requests an increase in the overall funding for beds to meet operational needs. The proposed increase will fund 31,280 adult beds at an average rate of \$123.54 and 2,760 family beds at an average rate of \$342.73 from ICE’s discretionary appropriation and fees.
- **Alternatives to Detention (ATD).....\$30.8 M (0 FTE)**
 The funding increase will provide for additional ATD full-service capacity to accommodate individuals in family units who are released from custody, and placed on the non-detained court docket. It is estimated that this funding level will fund a total 53,000 average daily participants at full operating capacity in FY 2016, at an estimated average contract only cost of \$5.16 per day.

¹ Positions are reflective of the number of individuals ICE plans to have onboard and FTE represent the number of Full-Time Equivalent hours that will be worked due to timing of on boards.

- **Enhance Human Smuggling and Trafficking Investigations.....\$25.6 M (28 FTE)**
 In FY 2016, HSI will expand current efforts to curb the high levels of human smuggling in the Southwest Border. HSI will hire 56 agents, intelligence specialist and investigative support staff, as well as put funds toward the purchase of information and evidence expenses, electronic surveillance equipment, analytical support, court-ordered communications intercepts (Title III wiretaps), expansion of Transnational Criminal Investigative Units (TCIU) and classified connectivity at the National Targeting Center Human Smuggling Cell.
- **Other HSI Domestic Investigations.....\$78.9 M (135 FTE)**
 This funding will be used to enhance Domestic Investigative capacity. HSI will hire 201 Special Agents and 69 associated investigative and operational support personnel, as well as increase general expense levels needed to support domestic investigative operations such as costs for informants, undercover, and Title III operations.
- **Unaccompanied Children (UC) Contingency Funding.....\$27.6M (0 FTE)**
 This contingency funding will be available for costs generally associated with the transportation of more than 58,000 UC, and up to a maximum of 104,000 UC. The Budget scores a total of \$2.588 million of the \$27.6 million that is potentially available to the Transportation and Removal Programs PPA based on calculated probabilities of incremental thresholds of UC apprehensions above the 58,000 level.
- **Internal Cyber Remediation..... \$13.253 (0 FTE)**
 This request provides new security capabilities and enhances aging foundational security infrastructure capabilities. The remediation will focus on security enhancements needed to securely operate mission essential systems or those that have high” Federal Information Processing Standard (FIPS) ratings. The funds will address vulnerabilities related to audit log management, security configuration management, disaster recovery, web application testing, and strong authentication capabilities.

Total Change 2015 to 2016	3	9	(\$2,652)

CURRENT SERVICES PROGRAM DESCRIPTION:

The four offices within Personnel Compensation and Benefits, Service, and Other Costs (PC&B) - Office of the Assistant Secretary (OAS), the Office of Professional Responsibility (OPR), the Office of the Chief Financial Officer (OCFO) and the Office of Acquisition Management (OAQ) - lead ICE-wide initiatives to ensure the effective stewardship of public funds; the integrity of the workforce; and enterprise-wide strategic management.

FY 2016 Request

In FY 2016, ICE requests \$195.950 million, 1,665 positions, and 1,493 FTE for PC&B¹. The FY 2016 request reflects an increase of \$4.041 million from the FY 2014 Revised Enacted amount and a decrease of \$2.652 million from the FY 2015 President's Budget. The FY 2016 request, as compared to FY 2015, includes:

- Increase of \$1.412 million for Federal employee retirement costs;
- Increase of \$930 thousand for pay inflation;
- Increase of \$500 thousand for three additional positions previously funded by the 287(g) Criminal Alien Program (CAP) office (to support the 287(g) OPR office);
- Increase of \$483 thousand for a GSA rent increase;
- Increase of \$482 thousand for annualization of the FY 2015 FOIA enhancement;
- Increase of \$90 thousand for increased Working Capital Fund costs (which include Enterprise License Agreements, NFC Payroll Services and Reporting, and other enterprise-wide activities); and
- Decrease of \$6.549 million in non-operational general expense efficiencies.

¹ Positions are reflective of the number of individuals ICE plans to have onboard and FTE represent the number of Full-Time Equivalent hours that will be worked due to timing of on boards.

In FY 2016, the PC&B offices will spend \$153.970 million on salaries and benefits, and \$41.980 million on general expenses to support the ICE operational programs. This includes purchasing law enforcement equipment, providing basic and advanced training to HSI special agents and ERO officers, processing FOIA requests, investigating allegations of misconduct involving employees of ICE and CBP, and overseeing physical and operational security for ICE employees and facilities.

Description

The Office of the Assistant Secretary

The OAS directs the planning and execution of the agency’s objectives outlined in the ICE strategic plan. This includes both operational and management support to

In FY 2014, the Freedom of Information Act (FOIA) office processed 33,644 FOIA requests.

meet the day-to-day organizational needs, as well as long-term agency goals. The operational areas provide leadership and the coordination of all of ICE’s operational components, address operational challenges, and support ICE’s continued growth and development as a premier law enforcement agency. The management support areas provide coordination for the administrative and managerial components of ICE. Offices that comprise the OAS are responsible for human capital,

congressional relations, public affairs, policy, diversity and civil rights, training and development, FOIA activities, privacy, and firearms and tactical training run by Office of Firearms & Tactical Programs (OFTP).

The Office of Professional Responsibility

OPR improved the detention facility inspections process by including a review of sexual abuse and assault procedures and policies at all facilities inspected.

OPR investigates allegations of both criminal and administrative misconduct involving employees and contractors of ICE, CBP and USCIS. OPR conducts independent inspections of ICE offices, operations, and processes to review the agency’s organizational health, effectiveness, and efficiency. OPR manages the Personnel Security Unit, which ensures that all ICE applicants are properly screened prior to entering on duty, and

the Security Management Unit, which oversees physical, communication and operational security for ICE employees and facilities. In addition, the OPR Office of Detention and Oversight investigates all allegations of detainee abuse and/or detainee deaths referred by DHS, the Office of Civil Rights and Civil Liberties (CRCL), and the Joint Intake Center.

OHSR Alignment

1.1 Prevent Terrorist Attacks

2.3 Disrupt and Dismantle Transnational Criminal Organizations

3.2 Prevent Unlawful Immigration

4.4 Use Resources Wisely

The Office of the Chief Financial Officer

OCFO manages ICE's financial and physical assets, promotes integrity and accountability, delivers financial management services, provides real property and lease holds services, and manages the development, execution and monitoring of sound performance-based budgets. OCFO maintains a funds control policy and budget execution handbook for all ICE programs and continues to advance the accuracy and sophistication of its managerial cost accounting model, which is compliant with Federal Accounting Standards Advisory Board (FASAB) standards. Additionally, OCFO manages all audits for ICE and is leading the transition from the legacy ICE financial management system to a Shared Service Provider (SSP). Recommendations from the OCFO-led bed study were implemented at the Krome Service Processing Center and further implementation is occurring at other ICE-owned facilities. Subsequent to the success at the Krome Processing Center, CFO is now assessing the El Paso Processing Center and working with OAQ on the new contract requirements. ERO has also ceased operations at the El Centro facility in San Diego since October 2014, moving detainees to the Holtville facility. That move is expected to save about \$4.5 million a year.

In FY 2014, ICE began developing a new repeatable, evidence-based resource management approach, which employs a three-pronged strategy to tie workload to resource requirements: 1) the Workload Staffing Model (WSM); 2) Performance Management; and 3) Transformational Efforts. The WSM uses workload capacity to determine appropriate staffing levels and funding requirements. This approach will provide ICE with the ability to better defend its resource requirements and the resource distribution across ICE programs. WSM allows ICE to justify its staffing requirements and models the impact those resources have on Public Safety, National Security, and the U.S. economy. Performance management, in conjunction with the WSM and the transformational efforts help the agency to set goals and priorities and to communicate the steps it is taking to get the most from its staff.

Transformation Efforts

Currently, ICE has multiple business transformation initiatives (BTIs) planned, in progress, or completed within HSI, ERO, and OPLA. BTIs can include a wide range of efforts, such as updating data tracking systems, automation, process improvements, etc. These initiatives are being used to realign staff responsibilities, apply best practices, study and improve resource and organizational structure, and implement technology within everyday processes. As the WSM initiative progresses, the WSM team will review ongoing BTIs, evaluate new BTIs, and incorporate BTI results into the WSM. It is important to consider all possible BTIs while determining appropriate resourcing levels as these initiatives play a role in establishing the optimal resourcing levels and alignment.

Office of Acquisition Management

OAQ is a customer-focused organization with an enterprise-wide, strategic approach to procurement. OAQ operates as a full business partner with internal and external organizations and serves as a strategic asset dedicated to improving the agency's overall business performance, awarding over \$2.4 billion in contracts annually with more than \$500 million of this total being awarded to small businesses. In FY 2014, OAQ implemented recommendations from the OCFO-led bed study at the Krome Processing Center. ICE will save \$9.2 million annually for the next 10 years due to the implementation of the contract restructuring at Krome.

FY 2016 Planned Activities

In FY 2016, ICE will:

- Enhance OPR Inspector training related to juvenile and family residential centers to ensure OPR capacity to oversee detention facilities designated to handle the influx of Unaccompanied Children;
- Train approximately 1,000 ICE, FPS, and CBP law enforcement personnel in firearms, use of force and firearms maintenance programs;
- Conduct approximately (3,000) hours of advanced use of force training, to include the training and certification or recertification of 432 ICE Firearms Instructors, 240 ICE Defensive Tactics Instructors, 96 ICE Special Response Team members, 17 ICE Tactical Observers, 16 ICE Tactical Instructors, 16 ICE Disturbance Control Team Instructors, and 112 Firearms Field Maintenance Armorers;
- Initiate Phase One of the commodity management biometric verification process for 87,000 pieces of sensitive property with ICE;
- Oversee \$500 million worth of service and commodity contracts for the purchase and acquisition of law enforcement equipment and services;
- Investigate allegations of criminal conduct involving ICE, CBP and United States Citizen and Immigrations Services (USCIS) employees and enhance collaboration with DHS Office of Inspector General (OIG) and CBP International Affairs (IA) counterparts for a more efficient use of investigative resources;
- Conduct semi-annual agency-wide reviews of travel cards, purchase cards, or pay administration, to identify possible waste, fraud and abuse;
- Continue plans to improve financial operations and customer transparency by identifying and developing an integrated financial management system and automating customer billing activities;
- Continue efforts to produce a more efficient real estate portfolio by implementing stricter space standards. ICE is projecting a 2.5 percent reduction in square footage by the close of FY 2016;
- Develop a capital acquisition strategy to optimize fleet replacements allowing ICE to improve the lifecycle of the current motor vehicle fleet by purchasing on a phased schedule;
- Continue to focus on improving internal controls over financial reporting and operations by expanding upon the agency risk assessment to identify risks early and implement corrective action before they become audit findings;
- Continue to conduct compliance inspections for 287(g) Agreement activities.
- Update and provide agency-wide FOIA/Privacy Act training (Roles and Responsibilities);
- Respond to all media, NGO, educational, commercial and individual FOIA requests within the statutory time limits;
- Provide FOIA/Privacy Act refresher training to the entire FOIA program office; and
- Provide training to the TCIUs.

Total Change 2015 to 2016	-	-	(\$4,881)

CURRENT SERVICES PROGRAM DESCRIPTION:

The ICE Office of the Chief Information Officer (OCIO) within the Headquarters Managed Information Technology (HQIT) program provides IT services and products that enable ICE and other DHS components to meet their respective missions.

ICE OCIO provides all aspects of IT service for ICE personnel in both foreign and domestic locations. In FY 2014, OCIO supported over 130 planned application releases and deployed 2,090 upgraded smart phone/devices to support a mobile workforce.

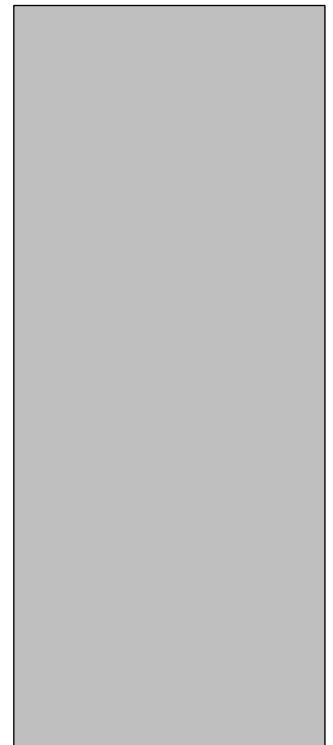

FY 2016 Request

In FY 2016, ICE requests \$146.046 million, 391 positions and 331 FTEs for the OCIO HQIT program to provide IT infrastructure and support and basic maintenance and oversight to the existing IT infrastructure². This also includes operations and maintenance (O&M) support for 818 sites and 26,000 end users.

The FY 2016 request reflects an increase of \$2.238 million from the FY 2014 Revised Enacted amount and a decrease of \$4.881 million from the FY 2015 President's Budget. The FY 2016 request, as compared to FY 2015, includes:

- Increase of \$13.253 million for internal cyber remediation;
- Increase of \$1.673 million cyber security pay reform;

² Positions are reflective of the number of individuals ICE plans to have onboard and FTE represent the number of Full-Time Equivalent hours that will be worked due to timing of on boards.

- Increase of \$854 thousand for pay inflation;
- Increase of \$367 thousand from a GSA rent increase;
- Increase of \$313 thousand for Federal employee retirement costs;
- Increase of \$68 thousand for increased Working Capital Fund costs (including Enterprise License Agreements, NFC Payroll Services and Reporting, and other enterprise-wide activities);
- Decrease of \$20.413 million for non-operational general expense efficiencies; and
- Decrease of \$996 thousand for non-recurrence of Data Center support, now directly funded by DHS OCIO.

In FY 2016, OCIO HQIT will spend \$63.334 million on salaries and benefits, and \$82.712 million to develop and purchase equipment and provide maintenance and oversight to the IT infrastructure.

Description

OCIO delivers information technology solutions that enable ICE to protect and secure the nation. Duties OCIO performs to provide IT support for ICE are as follows:

Maximizes effective IT management and efficiency through:

- Implementing and maintaining an integrated enterprise architecture, IT strategic planning and Capital Planning and Investment Control framework that ensures ICE IT investments align to the mission and provide optimal value to taxpayers.
- Gathering end users requirements or new authorizations to recommend cost-effective, leading-edge IT solutions to enhance and enable all ICE missions.

Deploys and maintains all enterprise-wide IT services by:

- Delivering technical infrastructure support, tactical communications, and centrally-supported application services to improve operations and provide agents with the necessary tools and resources to carry out assignments.
- Providing useable enterprise-wide IT services with applications to support all the missions of ICE, DHS and other agencies requiring data sharing and IT/communications compatibility.
- Implementing projects in accordance with sound systems lifecycle management processes. Conducting cost/benefit analyses of proposed solutions, as part of the IT investment management process.
- Ensuring performance standards are maintained for each investment to allow greater accuracy in budget requests, budget execution and timely completion of projects.
- Conducting regular reviews of projects to ensure that quality, cost, and schedule are being appropriately balanced to meet or exceed customer expectations.
- Providing Operations personnel who maintain an efficient and cost effective platform for the deployment of and continuous use of enterprise wide applications and services.

Connects users to systems, law-enforcement partners, and each other by:

- Providing continual support for the ICE agency-wide area, local area, and wireless networks that ICE users rely on to access computer systems and share information with our federal, state, local and tribal law-enforcement partners.
- Delivering full operational support for voice communications systems and video conferencing systems.

Provides for the security of all ICE sensitive information on IT systems through:

- Managing the ICE Information Assurance Program.
- Developing and enforcing ICE-wide policy for the protection and control of sensitive information including information under the Personally Identifiable Information (PII) and privacy act requirements.
- Supporting information infrastructure and disaster recovery to ensure continuous operations of critical and mission essential functions.
- Providing security testing, validation, risk assessment, and ongoing authorization of IT investments.
- Moving to automated continuous monitoring of applications and infrastructure to ensure the secure operation of the IT environment.

FY 2016 Planned Activities

Maintain Existing IT Infrastructure:

The OCIO will ensure the continuous operations and maintenance of the existing IT infrastructure to support mission critical functions. The IT infrastructure planned activities include: Cyber Security upgrades and updates throughout ICE. IT Field Operations will continue to support and respond to customer service requests. OCIO will continue to reassess and negotiate recurring site lease cost for IT facilities and wireless services contracts, as well as OCIO costs for ICE Service-wides (e.g. IT O&M, Telecomm and Data Center) and TACCOMM O&M contracts. OCIO will also continue to maintain ICE SharePoint.

Conduct Technical Refresh:

In FY 2016, the OCIO plans to support a technical refresh of the Infrastructure Program, including servers, desktops and LAN Connectivity Upgrades. To support these efforts, the OCIO will conduct site surveys and complete technical refresh designs, as well as finalize logistical support plans and complete acquisition packages.

Implement IT Study Recommendations

The OCIO recently had an independent assessment conducted on its IT infrastructure, cost, investment, workforce, and organization focus areas. The assessment identified overall recommendations and will be implemented in FY 2016:

- Migrating Exchange to as-a-service to avoid core disruption for mission critical Microsoft services and impending storage saturation;
- Virtualizing business applications - consolidate underutilized physical servers, reduce total costs of ownership, and improve business agility; and
- Establish a new IT governance structure to centralize and streamline decision-making, prioritize resources and to ensure good financial stewardship.

CURRENT SERVICES PROGRAM DESCRIPTION:

OPLA provides specialized legal advice, support and training in the area of customs, immigration and criminal law to all ICE components. It is the exclusive legal representative for the U.S. government in exclusion, deportation, and removal proceedings before the Department of Justice’s Executive Office for Immigration Review (EOIR). ICE has assigned attorneys full-time to work at the U.S. Attorneys Offices (USAO) as Special Assistant U.S. Attorneys (SAUSA). These attorneys prosecute criminal immigration and customs cases in federal court.

FY 2016 Request

In FY 2016, requests \$248.096 million, 1,583 positions, and 1,415 FTEs for OPLA³, to keep up with the demand of criminal and civil priorities.

The FY 2016 request reflects an increase of \$42.512 million from the FY 2014 Revised Enacted amount and an increase of \$ 33.365 million from the FY 2015 President’s Budget. The FY 2016 request as compared with FY 2015 includes:

- Increase of \$36.511 million for OPLA attorney increase (described in more detail in the programmatic change section);

QHSR Alignment

1.1 Prevent Terrorist Attacks

2.3 Disrupt and Dismantle Transnational Criminal Organizations

3.2. Prevent Unlawful Immigration

3.4 Protect the Integrity of the Immigration System

4.1 Create a Safe, Secure, and Resilient Cyber Environment

³ Positions are reflective of the number of individuals ICE plans to have onboard and FTE represent the number of Full-Time Equivalent hours that will be worked due to timing of on boards.

- Increase of \$2.257 million for pay inflation;
- Increase of \$1.355 million for Federal employee retirement costs;
- Increase of \$522 thousand from a GSA rent increase;
- Increase of \$97 thousand for increased Working Capital Fund costs (which include Enterprise License Agreements, NFC Payroll Services and Reporting, and other enterprise-wide activities); and
- Decrease of \$7.377 million for non-operational GE efficiency.

The FY 2016 request includes \$200.351 million for salaries and benefits to support over 900 attorneys and \$47.745 million to fund general expenses that protect Americans from unlawful immigration and cross-border crime.

Description

OPLA provides legal advice, training, and services in support of ICE’s mission to protect America and uphold public safety by identifying criminal activities and eliminating vulnerabilities that pose a threat to our nation's borders.

In FY 2014, OPLA SAUSAs obtained over 1,600 criminal convictions in federal court.

OPLA attorneys appear in hearings involving criminal and other aliens, terrorists, and human rights abusers, as well as provide critical legal support to ICE components focusing on customs, criminal law, ethics, procurement, appropriations, employment and labor law, tort claims, federal litigation, information disclosure, and other administrative issues.

ICE field attorneys represent the U.S. government in exclusion, detention, and removal proceedings before the EOIR and the Board of Immigration Appeals (BIA). ICE headquarters attorneys support field work and provide legal advice on national security, human rights and criminal issues. They provide legal counsel and training to ERO and HSI on a wide variety of matters, including conditions of detention, removal, customs, and criminal laws. OPLA also coordinates with the DOJ on federal litigation involving tort claims, *Bivens* claims, and statutory and constitutional claims by plaintiffs against the U.S. government seeking compensation or injunctive relief.

ICE has assigned 29 attorneys to the USAOs as full-time SAUSAs, which includes no reimbursement to ICE, to prosecute immigration and customs related crimes in federal court. Placing SAUSAs in strategic locations within the USAO allows ICE to increase the prosecution of criminal cases. Most convictions secured by the ICE SAUSAs relate to unlawful acts, improper entry, re-entry of removed aliens, bringing in and harboring aliens, and immigration fraud.

Major Directorates

Field Legal Operations (FLO) – FLO is a headquarters directorate that oversees 26 ICE Offices of the Chief Counsel (OCC). The OCCs have over 750 attorneys who represent the government in immigration proceedings and handle over 300,000 immigration-related cases annually before EOIR. OCC cases include contested removals, custody determinations, and applications for protection or relief from removal. The 26 OCCs provide legal advice to ICE operations through embedded attorneys within HSI and ERO. The OCCs also conduct prosecutorial discretion reviews consistent with ICE's civil enforcement priorities.

Homeland Security Investigations Law Division (HSILD) - HSILD is composed of three sections that specialize in providing legal advice and training to HSI special agents and ERO officers, as well as litigation support and legal guidance on HSI matters to OPLA field offices:

- National Security Law Section (NSLS) - NSLS provides legal advice, training, and litigation oversight for cases involving international terrorism, counter-terrorism, espionage, classified evidence, and other national security matters. NSLS attorneys work closely with other law enforcement and intelligence agencies, including the Federal Bureau of Investigation (FBI) and the Central Intelligence Agency (CIA), and act as liaisons with the DOJ, Department of State (DOS), and the U.S. Intelligence Community on national security issues.
- Human Rights Law Section (HRLS) - HRLS coordinates ICE's enforcement efforts with other intelligence agencies, foreign governments, international criminal tribunals, and non-governmental organizations. HRLS provides legal advice to identify, investigate, prosecute and remove individuals involved in human rights abuses to include: genocide, severe violations of religious freedom, extrajudicial killings, persecution, the recruitment or use of child soldiers, and torture. Currently, HRLS has over 1,800 cases involving individuals from approximately 100 different countries.
- Criminal Law Section (CLS) - CLS provides specialized customs law, criminal immigration, and general criminal law advice to ICE HSI, the Office of Professional Responsibility, and the Office of the Assistant Secretary. The issues include financial crimes, asset forfeiture, the repatriation of cultural property, customs fraud, confidential informants and undercover operations, intellectual property rights, cybercrime, child exploitation, export enforcement and counter proliferation investigations, identity and benefit fraud, international law enforcement cooperation, search and seizure, and worksite enforcement. CLS directly supports the Cyber Crimes Center (C3), National Intellectual Property Rights Coordination Center (IPRC), Bulk Cash Smuggling Center (BCSC), Export Enforcement Coordination Center (E2C2), Employer Compliance Inspection Center (ECIC), and 75 attaché offices for the HSI Office of International Affairs.

Enforcement and Removal Operations Law Division (EROLD) – EROLD provides legal advice and training to ERO officers and agents, as well as litigation support and legal guidance to OPLA field offices on ERO matters.

- Enforcement Law Section (ELS) - ELS provides legal advice and training to operational divisions, including the Criminal Alien Program, the Juvenile and Family Residential Management Unit, the Fugitive Operations Unit, and the HSI Student and Exchange Visitor Program. Attorneys provide advice and legal counsel on significant immigration enforcement related issues including, but not limited to: requirements of the 4th Amendment, rapid repatriation of criminal aliens, 287(g) delegation of immigration authority, and the authorities and limitations related to family detention and enforcement activity related to unaccompanied alien children.
- Detention and Removal Law Section (DRLS) - DRLS provides legal advice, counsel and training on issues including, but not limited to, the agency's general detention and release authorities, alternatives to detention, continued detention under specialized authorities,

detainee medical and mental health care, conditions of detention, detention officer authorities, expedited removal, administrative removal, reinstatement of removal, deferred action, and repatriation. DRLS also provides legal and procedural guidance to the Office of Detention Policy and Planning regarding liability and/or litigation risks impacting detention reform initiatives and new policies, and provides litigation support to the DOJ's Office of Immigration Litigation regarding petitions for Habeas corpus and other litigation.

Immigration Law & Practice Division (ILPD) – ILPD has five areas of responsibility: (1) providing immigration law advice and counsel to the OCCs, ICE leadership and programs, the DHS Office of the General Counsel, and other agencies; (2) providing specialized advice on sensitive issues related to refugee status, asylum, Temporary Protected Status, withholding of removal, and the Convention Against Torture, and helping to make asylum fraud prevention tools available to the OCCs; (3) overseeing OPLA's advocacy before EOIR and its appellate caseload before the BIA; (4) monitoring immigration-related federal circuit court and Supreme Court developments, and working with DOJ to address immigration cases on petitions for review before the circuit courts of appeals; and (5) overseeing OPLA's review of claims to United States citizenship and issues related to the acquisition or derivation of United States citizenship.

District Court Litigation Division (DCLD) - DCLD's attorneys serve as agency counsel and manage federal civil litigation cases filed against ICE. DCLD attorneys work closely with DOJ entities, including USAO, the Office of Immigration Litigation, and the Torts Branch to advocate for and ensure ICE's interests are represented in litigation. DCLD assists ICE personnel and DOJ in all aspects of federal litigation, including strategy, motion practice, discovery, and settlement negotiations. Additional cases include: common-law tort suits, *Bivens* suits (suits seeking monetary damages against ICE employees in their individual capacities), and claims seeking injunctive or declaratory relief, including class action habeas corpus relief.

Other OPLA divisions include the Commercial and Administrative Law Division, the Government Information Law Division, the Labor and Employment Law Division, and the Ethics Office.

Commercial and Administrative Law Division (CALD)

CALD provides legal advice to ICE and represents ICE in the areas of fiscal law, procurement law, memoranda of understanding and other agreements, breached bonds, environmental law, and a range of other administrative law matters in support of ICE operations: provides guidance and legal advice concerning procurement actions, and develops and coordinates ICE legal policy in the areas of procurement and appropriations law; represents ICE before the Government Accountability Office and the Civilian Board of Contract Appeals in procurement matters; and assists Department of Justice litigation attorneys in representing ICE before the various federal courts on procurement matters and other administrative law matters.

Labor and Employment Law Division

LELD provides advice, guidance, and representation for the Agency regarding employment and labor related issues by assisting supervisors with fitness for duty issues, reasonable accommodation

questions, and performance concerns to include performance improvement plans and performance based adverse actions. LELD serves as the point of contact in any investigation of an ICE employee or supervisor by Office of Special Counsel and reviews all disciplinary actions that are proposed and issued by the Agency. LELD also represents the Agency before the Equal Employment Opportunity Commission (EEOC) and the Merit Systems Protection Board (MSPB), and works with two bargaining units that represent ICE employees, by negotiating collective bargaining agreements and litigating national level Unfair Labor Practice complaints.

Government Information Law (GILD)

GILD is responsible for providing legal advice on all matters relating to the disclosure of government information within DHS and to external entities. This includes disclosures to members of the public, Congress, Government Accountability Office, DHS Office of the Inspector General, other law enforcement agencies, foreign governments, and international organizations. These disclosures require GILD to review documents, DVDs, and other media for the purpose of identifying issues relating to privacy and law enforcement sensitivity, draft and review of information sharing agreements, disclosures made under the Freedom of Information Act and the Privacy Act, and third-party requests for information or subpoenas for agency testimony and documents. GILD also handles all ICE FOIA appeals and administrative matters relating to agency requirements under the E-Government Act and the Privacy Act.

*GILD handled 427
FOIA appeals and
39 FOIA litigation
cases in FY 2014.*

FY 2016 Planned Activities

In FY 2016, ICE will:

- Continue to transition its OCCs to full-service operations to ERO and HSI clients. Implementation of this full-service model will enhance the Chief Counsels' relationships with their Special Agent in Charge (SAC), Field Office Directors (FOD) and their managerial staffs, and ensure that the OCCs are fully engaged and current with all the legal issues, policies and procedures faced by HSI and ERO personnel in the execution of their duties.
- Improve workload data and performance measure reporting by utilizing OPLA's new case management system, PLANet. This will ensure more efficient tracking of cases, projects, tasks, document management and provide timely, accurate, and in-depth statistics on a wide range of cases and projects handled by OPLA at any given time.
- Continue to coordinate with EOIR and U.S. Citizenship and Immigration Services (USCIS) to improve docket scheduling and recognize other efficiencies in immigration court with the goal of increasing the number of priority cases handled while improving the percentage of completed cases versus initiated cases commensurate with docket size and makeup.
- Continue to conduct prosecutorial discretion reviews during all stages of the removal process while maximizing efficiencies by focusing the government's limited resources on higher priority cases. Additionally, OPLA will pursue improvements to the expeditious handling of cases involving alternate removal methods such as stipulated and reinstated orders of removal to lessen the court docket.
- Expand reviews of discretionary Notices to Appear (NTA) prior to administrative prosecution before EOIR to ensure that each NTA is legally sufficient, meets ICE's

enforcement priorities, is consistent with NTA policies of the charging component, and is not more appropriately pursued through administrative or expedited removal. This effort will address the backlog of cases pending before EOIR and positively reflect DHS enforcement priorities.

- Improve the U.S. Office of Government Ethics (OGE) 450 Confidential Financial Disclosure reporting process through the implementation of a new online reporting system that will enhance the agency’s accountability, compliance, and efficiency by improving the process for tracking and monitoring reporting compliance. In addition, execute an outreach plan to increase employee knowledge and understanding of government ethics rules and principles to include live ethics training at major ICE offices.
- Further expand e-Discovery (Clearwell) capacity to address increased litigation requirements in federal court.

FY 2016 Total Request	8,333	7,949	\$1,766,654
Total Change 2015 to 2016	-	174	\$122,102

CURRENT SERVICES PROGRAM DESCRIPTION:

ICE enforces over 400 federal statutes and uses its authority to investigate all types of immigration and customs violations, and to deter, disrupt and dismantle transnational criminal organizations (TCO), terrorist organizations, and other malicious actors.

As a principal investigative arm of DHS, ICE works closely with local, tribal, state, federal, and international law enforcement partners to ensure national, public, and border security. ICE special agents use their legal authorities to investigate customs and immigration violations such as human rights violations; narcotics smuggling and distribution; weapons smuggling and the smuggling of other types of contraband; money laundering and financial crimes; cyber-crimes; human trafficking and smuggling; transnational gangs; child exploitation; worksite enforcement; intellectual property violations; commercial fraud; export violations; and identity and immigration benefit fraud that occur both at the border and within the interior of the United States.

FY 2016 Request

In FY 2016, ICE requests \$1.767 billion, 8,333 positions, and 7,949 FTE for the Domestic Investigations program⁴. The FY 2016 request reflects an increase of \$95 million from the FY2014 Revised Enacted amount and \$122.102 million from the FY 2015 President’s Budget. The FY 2016 request, as compared to FY 2015, includes:

- Increase of \$78.873 million to maintain investigative capacity (described in more detail in the programmatic change section);

⁴ Positions are reflective of the number of individuals ICE plans to have onboard and FTE represent the number of Full-Time Equivalent hours that will be worked due to timing of on-boards.

- Increase of \$16.290 million for pay inflation;
- Increase of \$10.6 million to enhance human smuggling and trafficking investigations (described in more detail in the programmatic change section);
- Increase of \$7.476 million for Federal employee retirement costs;
- Increase of \$4.123 million for annualization of prior year enhancements;
- Increase of \$3.996 million for a GSA rent increase; and
- Increase of \$744 thousand for increased Working Capital Fund costs.

In FY 2016, Domestic Investigations will spend \$1.398 billion on salaries and benefits and \$369.070 million in general expenses to support ICE’s investigative mission. This includes contractual support for wiretap and surveillance services, the purchase of equipment and supplies to maintain field operations at 26 SAC offices nationwide, equipment for undercover operations, and travel related to open investigations. Domestic Investigations will also continue to provide leads to develop investigations of individuals who overstay their visas or potentially pose a threat to national security. ICE field operations use these leads to identify, locate, and remove aliens who have overstayed their visas and mitigate threats to national security.

Description

Domestic Investigations uses its broad statutory authority to investigate a wide range of illegal activity with a focus on identifying and addressing the most significant threats to the safety and security of the American public. Since FY 2012, ICE special agents initiated more than 120,000 total cases. Of these, over 1,500 investigations received a designation of *nationally significant* because of the nature of the criminal activity and the threat to public safety. As of December 2014, special agents have significantly disrupted or completely dismantled the criminal activity in 560 of these investigations (over 36 percent) through the criminal arrest, indictment, and conviction of the perpetrators and the seizure of property and monetary assets used in the crimes.

QHSR Alignment

1.1 Prevent Terrorist Attacks

2.0 Protect the Borders Against Illicit Trade, Travel and Finance

2.3 Disrupt and Dismantle Transnational Criminal Organizations

3.2 Prevent Unlawful Immigration

4.1 Create a Safe, Secure, and Resilient Cyber Environment

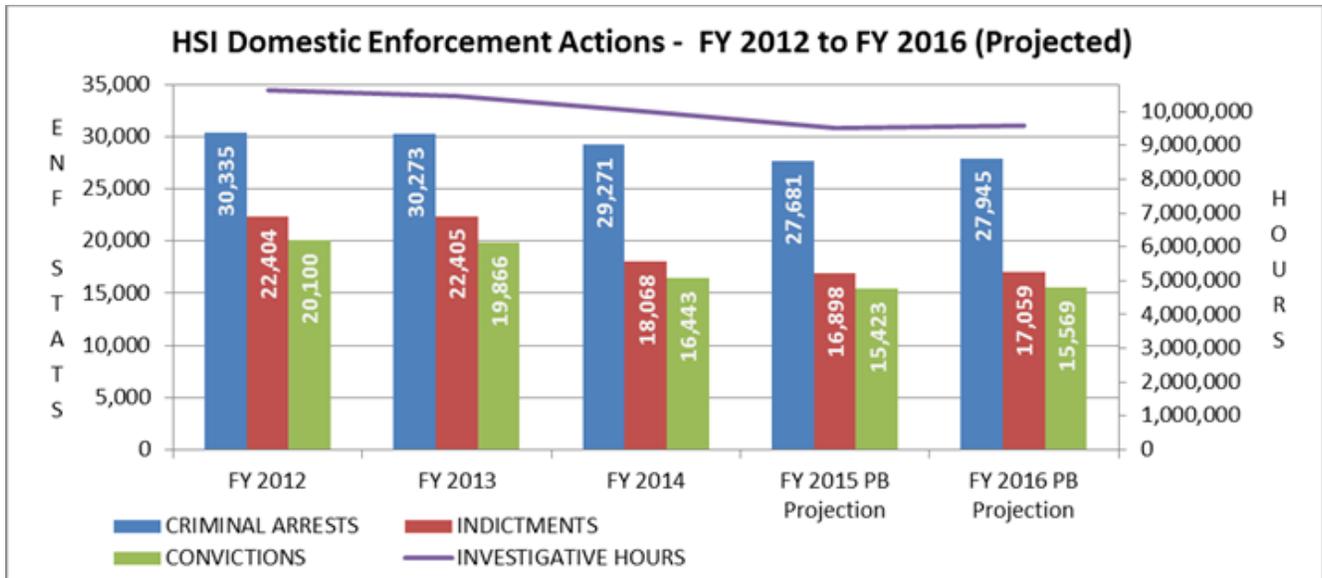

Associated HPPG/GPRA/Management Measures

*Percent of significant **transnational child exploitation** or sex trafficking investigations resulting in a disruption or dismantlement*

*Percent of significant **transnational gang** investigations resulting in a disruption or dismantlement*

*Percent of significant **transnational drug** investigations resulting in a disruption or dismantlement*

Number of employers audited, sanctioned, or arrested for violating immigration-related employment laws or otherwise brought into compliance with those laws

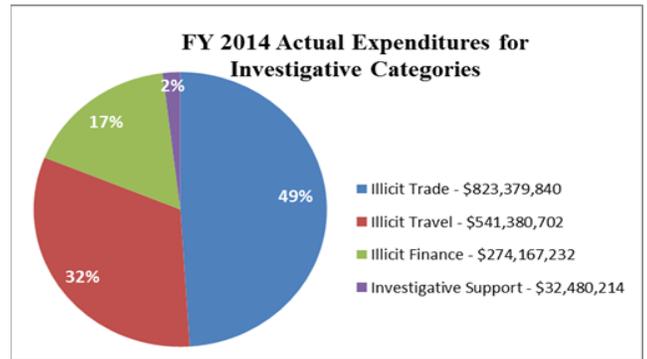

The chart above shows a modicum of performance increase in FY 2016 compared to FY 2015, due to the fact that any requested enforcement personnel hired in FY 2016 will not be fully on boarded and trained until the end of FY 2016 and into FY 2017. As such, full performance of hired personnel would be shown in FY 2017. Further, the enforcement projections for FY 2015 and beyond are for illustrative purposes and are estimates and are based upon past law enforcement outputs. Past law enforcement indicators are not a guarantee of future law enforcement results.

Domestic Investigations is divided into four programs:

- National Security Investigations
- Financial, Narcotics & Special Operations Investigations
- Transnational Crime and Public Safety Investigations
- Investigative Services

Program expenditures fall into the investigative areas of illicit trade, illicit travel, illicit finance, and investigative support.

National Security Investigations

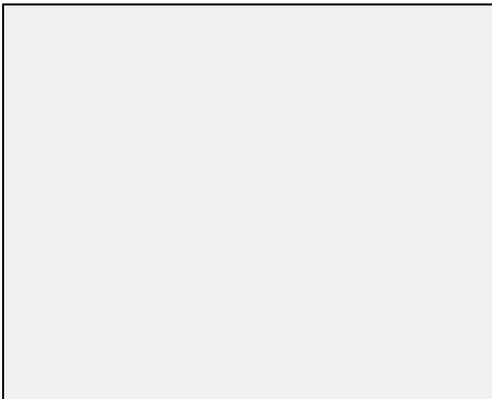

The National Security Unit (NSU) works directly with the National Security Council and DHS senior leadership to develop, facilitate, and implement unified interagency policy in support of the counterterrorism mission. The NSU leads ICE’s counterterrorism investigative efforts, has programmatic oversight for all counterterrorism investigations. It also provides collaboration and support to more than 100 Joint Terrorism Task Forces (JTTFs) to effectively leverage ICE’s unique immigration and trade-based authorities to develop comprehensive investigative strategies to combat global terrorism. The NSU has senior liaisons at the FBI National JTTF, the FBI Terrorist Financing Operation Section, and at ICE National Security Threat Section within the National Targeting Center to coordinate all Terrorist Screening Database and national security encounters for domestic and international response.

- The Counter-Proliferation Investigations (CPI) Program** oversees a broad range of investigative activities related to the illegal procurement of U.S. military/defense products and sensitive technology, including weapons of mass destruction. CPI also manages Project Shield America, a broad outreach program to private industry and the academic community to prevent the illegal export of sensitive munitions and strategic technology. CPI is a contributor to Program Global Shield, an international initiative in conjunction with the World Customs Organization, which seeks to track and disrupt the illicit shipment of precursor chemicals used in manufacturing improvised explosive devices. CPI domestic and foreign-based efforts enforce U.S. laws involving the export of sensitive technologies, weapons, and controlled dual-use goods as well as exports to sanctioned or embargoed countries.

Mitigating National Security Risks:
In March 2014, a judge sentenced an Iranian citizen to 23 months in prison for violating the Arms Export Control Act. The subject was involved in the illegal procurement of F-5 military fighter jet avionics and engines for use by the Iranian Air Force. In FY2014, ICE initiated over 1,300 arms and strategic technology investigations.

Unique Legal Authorities: *HSI is the only federal agency program with the full range of investigative and border-related authorities to investigate and enforce all U.S. export laws related to military items, sensitive dual-use commodities, and sanctioned or embargoed countries. In FY 2014, ICE recorded over 1,250 seizures of sensitive controlled commodities including illegal military and dual use technology.*

- The National Security Integration Center** is the primary national security and counterterrorism planning component for HSI and has two distinct sections: Department of Defense (DoD) Interagency Strategic Coordination Section (DISCS) and Visa Security Section (VSS). DISCS's mission is to provide strategic and programmatic direction of ICE engagement with the DoD and other U.S. agencies, provide training to interagency partners, and facilitate ICE submissions for DoD funding and support. The VSS screens and vets visa applicants against DHS holdings. The section then coordinates the findings with CBP and other interagency partners to provide a single DHS position on applicants' visa eligibility and admissibility while supporting ICE and other agencies activities. VSS screens and vets applicants early in the visa process through the Pre-Adjudicated Threat Recognition Intelligence Operations Team (PATRIOT) program. Though VSS focuses primarily on national security and public safety threats (including terrorism, counter-proliferation, and human rights/war crimes issues) they use the full scope of immigration and customs authorities when making recommendations to the DoS on individual visa applications.

Identifying Overstays Posing National Security Risks:
In FY 2014, the CTCEU reviewed over 890,000 overstays and student violators, of which, 10,981 were identified and sent to HSI field offices for investigation as possibly posing a national security concern -- an average of 44 leads per day. One such overstay involved a Honduran national who was using a fraudulent name, Social Security Card and a Resident Alien Card for employment purposes. Upon her arrest, she admitted to being a Treasurer for the Muslim Brotherhood of Honduras, a terrorist organization, and having ties to persons with national security concerns. In September 2014, the subject was convicted in the U.S. District Court of Misrepresentation of a Social Security Number

- **The Counterterrorism and Criminal Exploitation Unit (CTCEU)** is the only national program dedicated to the enforcement of nonimmigrant visa violations. The CTCEU’s Terrorist Tracking Pursuit Group ensures hundreds of thousands of overstays and foreign student violators are reviewed annually in order to identify those who may pose a threat to national security. This review detects and identifies those individuals exhibiting specific risk factors based on intelligence reporting and in-depth criminal research and analysis of dynamic social networks. The CTCEU also identifies and develops criminal investigations within the international student and exchange visitor visa programs perpetrated by those wanting to commit terrorism-related activity, foreign intelligence operations, transnational organized crime, or immigration fraud. The Student and Exchange Visitor Information System (SEVIS) Exploitation Section uses a specific risk-based targeting approach to mitigate emerging national security threats and SEVIS-related vulnerabilities.

- **The Overstay Analysis Unit (OAU)** seeks to prevent nonimmigrant visitors from exploiting the U.S. immigration system by identifying visitors who violate their immigration status by overstaying the terms of admission. This unit uses research and analyses of system identified leads of possible overstay violators to accomplish its mission. DoS and CBP officers use OAU-created lookouts on validated leads of out-of-country violators to make visa issuance and port of entry admissions decisions. Additionally, this unit provides validated in-country overstay leads to CTCEU for possible law enforcement action.

- **The Human Rights Violator and War Crimes Unit** oversees investigations involving torture, genocide, extrajudicial killings, recruitment of child soldiers, war crimes, extreme forms of religious persecution, and immigration and visa fraud where the underlying offense is based on human rights abuses and war crimes. It also undertakes efforts to ensure these human rights violators do not receive permission to enter the United States. The unit is also home to the Human Rights Violators and War Crimes Center, a multi-agency effort to identify, target, prosecute, and remove human rights violators from the United States.

Bringing International Criminals to Justice: *In May 2014, a naturalized U.S. citizen from Ethiopia received a 22 year prison sentence and citizenship revocation after his conviction for visa fraud, obtaining U.S. citizenship through fraud, and aggravated identity theft. The individual was identified as a human rights violator for torturing prisoners as a prison guard in his home country.*

- **The Federal Export Enforcement Coordination Center (E2C2)** is an interagency center consisting of nine departments and 30 federal agencies spanning federal law enforcement, border interdiction, licensing, DoD and the intelligence community. HSI serves as the E2C2 Director. The President designated E2C2 as the primary forum within the federal government for executive departments and partner agencies to coordinate, de-conflict, and enhance their export enforcement efforts to detect, prevent, disrupt, investigate, and prosecute violations of U.S. export control laws.

Financial, Narcotics & Special Operations Investigations

- **ICE’s Border Enforcement Security Task Forces (BEST)** play a key role in the government’s efforts to enhance border security. HSI leads 35 BEST units throughout the United States. These units are comprised of members from ICE, CBP, as well as other federal, state, local, tribal, and international law enforcement officials. The BESTs leverage these law enforcement and intelligence resources in an effort to identify, disrupt, and dismantle organizations that seek to exploit vulnerabilities along the U.S. borders and threaten the overall safety and security of the American public. The design of the BEST program is to increase information sharing and collaboration among the participating agencies, focusing on identification, prioritization, and investigation of emerging or existing threats.

Mitigating Public Safety Risks from Illicit Drugs:

In March 2014, twenty members of a drug trafficking organization received prison sentences for distribution of controlled substances, conspiracy, and money laundering charges. Sentences ranged from two to 27 years in federal prison and a fine of \$10.6 million for the head of the organization. In FY 2014, ICE arrested more than 10,600 individuals for drug trafficking-related activities and seized almost 1.2 million pounds of illegal narcotics.

The Illicit Finance and Proceeds of Crime Unit works with the private sector, regulatory agencies, domestic and foreign law enforcement partners, and international organizations to build the capacity among all pertinent parties to identify and investigate complex financial

Financial Aspects of Criminal Activity: *ICE diligently pursues the criminal proceeds that fund the operations of transnational criminal organizations. Every criminal case ICE investigates, regardless of category, has a financial nexus. ICE is uniquely positioned to investigate financial crimes, as it is the only investigative agency that has border search authority and exclusive access to trade data. In FY 2014, ICE seized over \$677million in currency and monetary instruments.*

crimes and money laundering.

The Trade Transparency Unit (TTU) focuses on the exploitation of international trade systems, including their financial mechanisms, to launder illicit proceeds. The TTU analyzes trade and financial data to identify trade transactions and other information that do not follow normal patterns. It then works with international partners to identify such crimes as money laundering, customs fraud, contraband smuggling, as well as duty and tax evasion.

- **The National Bulk Cash Smuggling Center (BCSC)** provides intelligence and investigative support to federal, state, and local officers involved in the interdiction of bulk cash smuggling and the transportation of illicit criminal proceeds. The BCSC targets transnational criminal organizations who seek to avoid traditional financial institutions by repatriating illicit proceeds through an array of methods (e.g. commercial and private aircraft, passenger and commercial vehicles, maritime vessels, and pedestrian border crossings).

Transnational Crime and Public Safety Investigations

- **The Document and Benefit Fraud Task Forces (DBFTFs)** target criminal enterprises and individuals who attempt to use document and benefit fraud to compromise the integrity of the immigration system. In partnership with federal, state, and local law enforcement agencies, 21 DBFTFs maximize resources, eliminate duplication of efforts, and conduct more effective investigations. Fraudulent immigration documents can appear legitimate. Those illegally present in the United States for employment purposes are the primary users of these fraudulent documents. Benefit fraud is a lucrative form of fraud that can enable terrorists and criminals to exploit the legitimate immigration process and obtain legal status in the United States.
- **The National Gang Unit** combats the growth and proliferation of transnational criminal street gangs in the United States using ICE’s expansive criminal and civil authorities. Given the rise in transnational gang membership and the resulting increase in gang violence in communities nationwide, ICE developed and implemented anti-gang initiatives focused on violent criminal activities and on crimes with a nexus to the border.

Preserving Public Safety: ICE disrupted the activities of a Tucson-based street gang associated with the Sinaloa drug trafficking cartel. The operation involved multiple undercover firearms purchases. Juries convicted five gang members, including the gang’s two principal leaders. They face mandatory prison terms between five and 15 years. From FY 2010 to FY 2014, ICE investigations have led to criminal convictions for more than 7,500 transnational gang members.
- **The Worksite Enforcement Unit** oversees a comprehensive worksite enforcement strategy to reduce the pull of illegal employment, ease pressure at the border, and protect employment opportunities for the nation’s lawful workforce. This occurs through the complimentary efforts of using enforcement actions (criminal arrests of employers), compliance (Form I-9, “Employment Eligibility Verification,” inspections, civil fines, and debarment) and outreach (ICE Mutual Agreement between Government and Employers program) to create a culture of business compliance.
- **The Extraterritorial Criminal Travel Strike Force and the ICE-HSI Trafficking in Persons Programs** coordinate field office investigations to target human smuggling and trafficking organizations both domestically and internationally with our domestic and international partners.

Cyber Crimes Center (C3)

Legal Authorities: ICE is the lead federal agency with the full range of investigative and border-related authorities to investigate human smuggling and human trafficking. ICE is also the leader in the global fight against human trafficking. In FY 2014, ICE Domestic made over 3,750 arrests for Human Smuggling and Human Trafficking related criminal activity and identified/assisted 446 victims of Human Trafficking. Between FY 2010 and FY 2014, convictions from ICE led Human Trafficking investigations increased over 450 percent.

The C3 Center leads ICE's efforts to identify, disrupt, and dismantle criminal organizations engaged in criminal activity using computers, electronic media, or cyberspace. C3 leads ICE in combatting cyber-enabled crimes that traverse ICE's programmatic areas and provides operational support and subject matter expertise for cyber-related investigations in the field.

National Intellectual Property Rights (IPR) Coordination Center

The IPR Center works directly with the National Security Council and DHS senior leadership to protect the public's health and safety, the U.S. economy, and the war fighter by combating predatory and unfair trade practices that threaten the global economy. The IPR Center brings together 21 partners in a task force setting including federal investigative agencies and international partners from INTERPOL, Europol, and the Canadian and Mexican governments to leverage the resources, skills, and authorities of each participating agency to provide a comprehensive response to IP theft. These partners focus cooperatively on enforcing intellectual property and trade fraud including cases where commercial importations of cargo involved false statements and deceptive business practices.

Child Exploitation – A Growing Threat to Public Safety: In June 2014, a U.S. citizen received a 60 year federal prison sentence for producing child pornography. ICE's C3 provided investigative leads to ICE Philadelphia that allowed investigators to execute a search warrant and locate the subject's deleted videos depicting him sexually molesting a young child. The investigation resulted in the identification of two minor victims (ages two and three years old) whom the subject sexually abused. In FY 2014, ICE investigations led to the conviction of more than 1,240 individuals for child exploitation, a 50 percent increase since FY 2010. In FY 2014, investigators identified or rescued 1,036 child victims during ICE led or joint child exploitation investigations.

The Intellectual Property Unit (IPU): The IPU coordinates with field personnel to successfully investigate and interdict criminal organizations that commit IP theft and illegal trade practices and oversees enforcement operations in response to emerging threats, such as health and safety risks posed by counterfeit products.

Trade Fraud Enforcement: ICE is the only federal entity that investigates predatory and unfair trade practices under Title 19 of the U.S. Code. In FY 2014, ICE seized over \$1 billion in illicit trade products. Many seized products include items of high risk to public safety/health, including counterfeit pharmaceuticals, tainted food and personal care products, and counterfeit goods sold to U.S. military.

FY 2016 Planned Activities

In FY 2016, ICE will:

- Continue to expand the online awareness educational outreach program “Project iGuardian” in conjunction with the National Center for Missing & Exploited Children and the Internet Crimes Against Children task forces
- Continue to expand the confidential informant program in order to disrupt and dismantle the most egregious transnational criminal organizations and individuals. HSI self-initiated investigations through the use of confidential informants and other HSI sources account for over 67 percent of HSI’s investigative hours.
- Focus efforts on conducting investigations and operations in the southwest border region to disrupt and dismantle the most dangerous and prolific human smuggling organizations, and stem the growing crime and violence associated with their activities.
- Expand counter-proliferation public outreach with the academic and private sector to increase awareness of illicit procurement efforts and establish new avenues for referral for suspicious activity especially with regards to weapons of mass destruction, including countering biological weapon proliferation as outlined in OMB Directive M-14-14.
- Enhance trade transparency operations using unique law enforcement authorities to access financial and international trade data to identify financial irregularities and international trade anomalies that indicate trade-based money laundering, customs fraud, contraband smuggling, and other financial crimes.
- Work with the Department of the Treasury to make further sanction designations of specific MS-13 trans-national gang senior leaders as well as those providing material support to the designated individuals. Continue to enhance the Trade Fraud Program by continuing joint ICE-CBP post-investigative analysis reporting to identify repeatable systematic schemes and techniques, enhancing CBP’s and ICE’s capabilities to conduct commercial trade fraud investigations through the development of additional training, and continuing Trade Enforcement Coordination Centers in areas of major U.S. international trade ports.

FY 2016 Total Request	302	247	\$107,931
Total Change 2015 to 2016	-	4	\$6,703

CURRENT SERVICES PROGRAM DESCRIPTION:

ICE International Investigations has 75 offices in 48 countries² and works to disrupt and dismantle transnational criminal organizations (TCOs) that seek to exploit America’s legitimate trade, travel, and financial systems by engaging in human smuggling and trafficking, in the smuggling of narcotics, money, weapons, and sensitive technologies, and in the sexual exploitation of children, including child sex tourism. International Operations partners with foreign and domestic counterparts to conduct international law enforcement operations and removals.

FY 2016 Request

In FY 2016, ICE requests \$107.931 million, 302 positions, and 247 FTE for the ICE International Investigations program to support operations and investigations at the Attaché offices around the world. The FY 2016 request reflects an increase of \$8.190 million from the FY 2014 Revised Enacted amount and an increase of \$6.703 million from the FY 2015 President’s Budget. The FY 2016 request, as compared to FY 2015, includes:¹

¹ Positions are reflective of the number of individuals ICE plans to have onboard and FTE represent the number of Full-Time Equivalent hours that will be worked due to timing of on boards.

²In addition, International Operations has eight personnel assigned to the Department of Defense which are co-located at the Unified Combatant Commands and the Joint Inter-agency Task Forces.

- Increase of \$10.0 million to enhance human smuggling and trafficking investigations;
- Increase of \$721 thousand for pay inflation;
- Increase of \$246 thousand for GSA rent increase;
- Increase of \$230 thousand for Federal employee retirement costs;
- Increase of 45 thousand for increased Working Capital Fund costs; and
- Decrease of 4.539 million for non-operational general expense efficiencies.

In FY 2016, ICE International Investigations program will spend \$61.686 million on salaries and benefits, and \$46.245 million on general expenses. These resources will allow ICE to protect U.S. borders by conducting international law enforcement operations and partnering with foreign and domestic counterparts to combat criminal organizations and prevent terrorist activities.

Description

ICE International Operations maintains offices around the world that conduct law enforcement operations and provide investigative support to domestic offices in combating transnational crime. They support other U.S. government components such as, Department of Defense, Department of State, Department of Justice and initiatives; refer requests between foreign law enforcement agencies and ICE domestic offices; and serve as advisors to U.S. missions. ICE Attachés provide training and conduct outreach with foreign officials and coordinate with foreign counterparts to share information under negotiated bilateral agreements and mutual legal assistance treaties. ICE special agents, deportation liaison officers (DLOs), support staff, and foreign service nationals staff ICE Attaché offices. These personnel enhance the investigative and administrative ability of ICE overseas.

QHSR Alignment

1.1 Prevent Terrorist Attacks

2.3 Disrupt and Dismantle Transnational Criminal Organizations

3.2 Prevent Unlawful Immigration

4.1 Create a Safe, Secure, and Resilient Cyber Environment

Assistance with Removal and Repatriation

Through the use of dedicated DLOs deployed at critical locations abroad, International Operations coordinates the return of removable aliens with host governments and facilitates transits and country clearances. In collaboration with ICE Enforcement and Removal Operations, DLOs coordinate with host-country governments to return aliens who have final orders of removal. This coordination accelerates the removal process and reduces detention costs. ICE and the Department of State (DoS) engage with foreign governments to reinforce their commitment under international law to accept the return of their citizens, even as the number of repatriated criminals increases. The Electronic Travel Document (eTD) system reduces the time it takes to issue travel documents, thus decreasing the average length of stay for detainees awaiting deportation. International Operations pursues collaborative international strategies by participating in multilateral forums with partner countries to discuss alien removal issues.

Transnational Criminal Investigative Units

ICE International Operations program operates Transnational Criminal Investigative Units (TCIUs) in several host countries to conduct joint investigations of transnational criminal organizations. TCIUs are comprised of special agents and host country law enforcement personnel who undergo a vigorous vetting and training process at the Federal Law Enforcement Training Center. ICE currently oversees eight TCIUs around the globe. The majority of these units are located in Central and South America, however, in 2013, ICE trained five units in the latest TCIU located in Afghanistan.

***Expanding Border Security with International Partnerships:** Acting on HSI Intelligence, in January 2014, the HSI Panama TCIU seized \$7 million in U.S. currency from the luggage of four Honduran nationals upon their arrival at Tocumen International Airport in Panama City, Panama.*

Illicit Pathways Attack Strategy

ICE Homeland Security Investigations created the Illicit Pathways Attack Strategy (IPAS) to dismantle and disrupt the networks and pathways used by transnational criminal organizations that commit transnational crimes and transfer illicit proceeds. These organizations use networks and pathways for money laundering, weapons and bulk-cash smuggling to export protected technologies, smuggle humans, and commit other crimes. By dismantling these networks, ICE targets the infrastructure and profits generated by transnational criminal organizations. The IPAS expands ICE's operations outside the United States to stop the movement of illicit goods and people before they reach the United States. The strategy also aims to strengthen ICE's interagency cooperation with key law enforcement agencies and international partners such as Customs and Border Protection, DoS, the Department of Justice, the Department of Defense, and INTERPOL.

HSI Coordination of International Criminal Investigative Activity:

- In FY 2014, HSI domestic offices referred 1,056 criminal investigations to HSI International attaché offices for further investigation of the criminal activity abroad.*
- In FY 2014, HSI international attaches referred 624 criminal investigations to HSI domestic offices for further case action leading to 55 criminal arrests, 44 indictments and 30 convictions domestically for investigations initiated internationally.*

FY 2016 Planned Activities

In FY 2016, ICE International Operations will:

- Focus efforts on investigating human smuggling/trafficking organizations to stem the flow of unlawful migration to the United States from Central America and Mexico.
- Focus on U.S./Mexico cross-border threats and global illicit pathways, including contraband smuggling, arms trafficking, money laundering, cyber child exploitation, bulk cash smuggling, and transnational gangs.
- Continue to evaluate ICE's worldwide investigative resources through analysis of global threats, current ICE coverage, and agency priorities. ICE will also re-allocate resources in locations that pose the greatest threat, investigative opportunity, and host nation connectivity to the United States.

- Aim to increase efficiency and cut costs in regions where ICE has a relatively large footprint by consolidating and re-allocating resources (may seek to streamline operations in Western Europe through streamlining personnel and rededicating resources to Europol and Southeastern Europe Law Enforcement Center (SELEC) in Bucharest, Romania, where European law enforcement agencies are collocated).

Total Change 2015 to 2016	-	-	(\$1,105)

CURRENT SERVICES PROGRAM DESCRIPTION:

ICE's Visa Security Program (VSP) deploys uniquely trained and experienced ICE special agents overseas to high-risk visa issuance posts to identify potential terrorist and criminal threats before they reach the United States. Visa Security Units (VSU) are currently operating at 20 ICE attaché offices in 16 countries.

FY 2016 Request

In FY 2016, ICE requests \$30.749 million, 76 positions, and 61 FTE for the VSP. The FY 2016 request reflects a decrease of \$792 thousand from the FY 2014 Enacted amount and a decrease of \$1.105 million from the FY 2015 President's Budget. The FY 2016 request, as compared to FY 2015, includes:¹

- Increase of \$188 thousand for pay inflation;
- Increase of \$77 thousand for a GSA rent increase;
- Increase of \$58 thousand for Federal employee retirement costs;
- Increase of \$14 thousand for increased Working Capital Fund costs (which include Enterprise License Agreements, NFC Payroll Services and Reporting, and other enterprise-wide activities); and
- Decrease of \$1.442 million for non-operational general expense efficiencies.

OHSR Alignment

1.1 Prevent Terrorist Attacks

2.3 Disrupt and Dismantle Transnational Criminal Organizations

3.2 Prevent Unlawful Immigration

4.1 Create a Safe, Secure, and Resilient Cyber Environment

In FY 2016, the VSP will spend \$15.806 million on salaries and benefits, and \$14.943 million on general expenses to support the VSP at headquarters and 20 overseas posts. In FY 2016, ICE will work with DHS

to establish the PATRIOT System as a program of record in order to receive appropriate funding in the future.

Description

The VSP protects the United States against terrorists and criminal organizations by preventing foreign nationals who pose a threat to national security from entering into or residing within the United States. The VSP identifies and closes vulnerabilities in our immigration and customs processes as well as modernizes the information technology (IT) capability for screening visa applications. ICE's presence overseas via the VSP is vital to protecting the U.S. and its resources from harm and exploitation because it maintains the relationships with foreign law enforcement that are required to combat and disrupt the efforts of terrorist and criminal organizations.

In addition to determining whether a given applicant is eligible for a visa, vetting by ICE special agents generates additional law enforcement value, including:

- *Creation of watch-list records;*
- *Identification of new terrorist tactics or fraud schemes;*
- *Generation of intelligence products;*
- *Revocation of fraudulent petitions; and*
- *Initiation of investigations leading to arrest, seizure, and prosecution.*

Special agents assigned to the VSP work closely with the Department of State (DoS) and take a hands-on approach in conducting visa security activities at 20 overseas posts. These activities include examining visa applications for fraud, initiating investigations, coordinating with law enforcement partners, and providing law enforcement training and advice to U.S. consular officials.

Many visa security screening activities involve face-to-face interaction and on-the-ground follow-up which can only occur overseas. Agents assigned to the VSP follow up on investigative leads in four critical ways:

- Coordinate with foreign government law enforcement agencies to verify a visa applicant's true country of origin;
- Identify any criminal arrests, convictions, or potential affiliations with terrorist or criminal organizations;
- Confirm any derogatory information found during data screening; and
- Substantiate recommendations to deny visas to high risk individuals or "clear" eligible applicants incorrectly associated with such derogatory information

The VSP also seeks to identify terrorist or criminal threats by conducting targeted, in-depth vetting of individuals who apply for U.S. visas overseas. The VSP's Visa Security Section (VSS), a part of ICE-HSI's National Security Integration Center, participates in interagency checks of visa applicants for derogatory information and coordinates with other participating agencies to make a unified visa determination. In addition, the VSS provides classified research assistance across DHS and DoS and uses law enforcement expertise and analysis to maximize the efficiency of the visa review process.

The Patriot Program

VSP provides automation for visa screening, contract support to conduct screening functions and contract screener funding for the domestically based Pre-Adjudicated Threat Recognition Intelligence Operations Team (PATRIOT) program.

The PATRIOT program, is the analytical foundation for VSP operations and screens 100 percent of non-immigrant visa (NIV) applications prior to DOS adjudication. Any potential derogatory information discovered during screening is vetted by HSI personnel. Following analysis of all known derogatory information, VSP personnel make an official recommendation to DOS regarding that subject's application. This recommendation serves as a unified DHS position on the subject's application and admissibility. In addition, VSP coordinates with the Intelligence Community (IC) as well as other U.S. Government (USG) personnel and/or host country partners at post to maximize additional investigative efforts. Domestically, VSP also manages the security advisory opinion (SAO) process⁵. VSP operations are focused in three principal areas:

To guide future expansion and the deployment of VSP personnel, ICE has collaborated with DoS to develop a list of high-risk visa-issuing locations. Using this process, ICE has identified 36 existing overseas International Operations posts that are the highest priority for future VSP expansion. VSP operations are focused in three principal areas:

1. VSP utilizes automated screening, manual vetting, and local investigative efforts at post to identify visa applicants and recipients who may be potential threats to national security, then recommends refusal or revocation of their visas if warranted.
2. VSP works with the intelligence community and other USG partners to identify and further exploit individuals and groups determined to be a threat to the homeland; these are investigative efforts beyond initial screening and vetting.
3. VSP screens 100 percent of DOS SAOs related to counter-proliferation or export control concerns and works with the IC and law enforcement partners to determine whether or not the persons would present a threat to the United States if they were allowed to enter the country.

FY 2016 Planned Activities

- In FY 2016, ICE will continue existing detailed screening operations while remaining prepared to expand VSP operations to new locations if additional resources allow.

⁵ The SAO process is a mechanism by which DOS looks more closely, often with the assistance of other agencies, including HSI, at certain visa applicants who meet specific criteria or are deemed by consular officers abroad to warrant higher level scrutiny.

CURRENT SERVICES PROGRAM DESCRIPTION:

The ICE Office of Intelligence (Intel) collects, analyzes, and shares timely and accurate intelligence on illicit trade, travel, and financial activity with a U.S. nexus, in coordination with other DHS Intelligence Enterprise members and the intelligence community. Intel produces intelligence reports to support ICE investigations, and ongoing operations. In addition, Intel maintains one of the Department’s largest agency-wide secure data communication infrastructures. Intel also prepares ICE for agency-wide continuity of operations, emergency response, and crisis management and manages a 24/7 joint intelligence and operations operation.

FY 2016 Request

In FY 2016, ICE requests \$80.041 million, 468 positions, and 377 FTE for Intel. The FY 2016 request reflects an increase of \$5.743 million from the FY 2014 Revised Enacted amount and an increase of \$2.996 million from the FY 2015 President’s Budget. The FY 2016 request, as compared to FY 2015, includes:⁶¹

- Increase of \$5.0 million to enhance human smuggling and trafficking investigations
- Increase of \$765 thousand for pay inflation;

OHSR Alignment

1.1 Prevent Terrorist Attacks

2.3 Disrupt and Dismantle Transnational Criminal Organizations

4.1 Create a Safe, Secure, and Resilient Cyber Environment

⁶¹ Positions are reflective of the number of individuals ICE plans to have onboard and FTE represent the number of Full-Time Equivalent hours that will be worked due to timing of on boards.

- Increase of \$348 thousand for Federal employee retirement costs;
- Increase of \$188 thousand for a GSA rent increase;
- Increase of \$35 thousand for increased Working Capital Fund costs (which include Enterprise License Agreements, NFC Payroll Services and Reporting, and other enterprise-wide activities); and
- Decrease of \$3.340 million for non-operational general expense efficiencies.

In FY 2016, Intel will spend \$61.846 million on salaries and benefits, and \$18.195 million on general expenses. These resources will allow ICE to support intelligence activities and lead ICE emergency preparedness and response efforts to prevent illicit trade, travel, and financial activity from occurring within U.S borders.

Description

The ICE Intelligence Program enables operations through the collection, processing, analysis, and dissemination of relevant and timely information that the intelligence and law enforcement communities must know in order to protect the nation. ICE Intelligence (Intel) provides these enabling services to leadership, executive management, investigative missions, and enforcement and removal operations. Intel gathers information to identify tactics, techniques and procedures to counter criminal and national security threats posed by transnational criminal organizations, and to ensure force protection and officer safety.

Intel uses this information and intelligence to fulfill its critical responsibilities:

- Provide policy guidance and compliance oversight to all ICE programs engaged in intelligence activities;
- Establish and disseminate guidance, analytic tools, and intelligence training standards;
- Coordinate with DHS, the U.S. intelligence community, and other U.S. and foreign law enforcement intelligence partners;
- Produce strategic intelligence assessments in support of agency and department decision makers;
- Provide tactical intelligence collection and reporting services;
- Manage the Joint Intelligence Operations Center (JIOC) to provide 24x7 situational awareness for ICE;
- Manage the ICE National Emergency Management Division;
- Lead all ICE emergency planning and response efforts; and

Deploying & Safeguarding Classified Communications:

In FY 2014, Intel continued to deploy classified connectivity to the field, including six new sensitive compartmentalized information facilities and deploying the Homeland Secure Data Network to seven new locations further expanding ICE's capabilities, which are already the largest in DHS. Intel also assumed the responsibility for ICE's counterintelligence program in order to safeguard ICE and its employees from intelligence threats.

Intel responds to intelligence needs based on formal and ad hoc requests by ICE investigative units, Enforcement and Removal Operations officers, ICE senior leadership, other intelligence customers within ICE and DHS, and the intelligence and law enforcement communities in the following programmatic areas:

- Southwest border
- Human smuggling
- Contraband Smuggling
- Illicit Finance
- Counter-proliferation
- National Security/Terrorism
- Illicit trade and trade fraud

Increased Collaboration with the Border Intelligence Community: HSI-Intelligence collaborates with entities such as U.S. Customs and Border Protection, the Departments of Treasury and Commerce, and the intelligence community to identify vulnerabilities exploited by transnational criminal organizations through its Illicit Pathways Attack Strategy, targeting illicit finance, human smuggling, counter-proliferation and cultural property.

Intel performs its mission through the following functional areas:

- **The Intelligence Collection and Operations Division (COD)** identify ICE’s information needs, and determine gaps in information holdings critical to ICE operations worldwide. The Intelligence COD addresses intelligence collection challenges, and influences intelligence collection priorities and resources. COD supports Intel community requests through the management of the ICE Request for Information (RFI) program. The COD also facilitates the rapid and responsible sharing of time-sensitive information supportive of all ICE and DHS missions in near-real time through the JIOC. The JIOC ensures continuity of operations by monitoring global and domestic events, natural and manmade catastrophic activities, and provides agency-wide crisis communications. The JIOC coordinates with national command authorities and the DHS National Operations Center and responds to real time inquiries from the Secretary of Homeland Security, cabinets officials, agency heads, and members of congress regarding time sensitive ICE operations. The COD and JIOC also support the ICE Personnel Recovery Program by monitoring the ICE Blue Force Tracker, a safety system designed to protect ICE agents deployed overseas who may encounter life threatening situations.
- **The Analysis Division** uses all source information to analyze information that affects ICE operations and DHS components, as well as our federal, state, local, tribal, and international law enforcement partners. The division develops strategic level intelligence assessments to support ICE-wide decision making. ICE shares these assessments with its partners as they contain vital information for the broader law enforcement and intelligence communities.
- **The Intelligence Mission Management Division** supports field intelligence support needs, including training and professional development, and oversees the deployment of classified connectivity systems and facilities.
- **The National Emergency Management Division (NEMD)** serves as the agency lead for domestic incident management. NEMD provides agency-wide guidance and oversight for Continuity-of-Operations planning and actions, Emergency Relocation Group, continuity communications, Emergency Notification System, alternate facilities, and devolution sites. The NEMD also manages the ICE Crisis Action Process, which encompasses the Crisis Action Team and Emergency Operations Center. NEMD trains, equips, and coordinates mission assignments for the ICE Rapid Response Teams, the agency’s deployable disaster response groups.

Intel also is the Executive Agent for the **Human Smuggling and Trafficking Center (HSTC)**

- **The HSTC** is an ICE led interagency center consisting of three departments and nine agencies spanning law enforcement, intelligence and supporting greater integration and overall effectiveness in the U.S. government's efforts to combat human smuggling and trafficking in people and clandestine terrorist travel. ICE –HSI serves as the HSTC Director. By legislation, the Center is chartered as the U.S. Government lead to bring together federal agency subject matter experts from policy, law enforcement, intelligence, and diplomatic arenas to work together and leverage expertise and authorities to combat these global threats.

FY 2016 Planned Activities

In FY 2016, ICE will:

- Implement, in collaboration with DHS Science & Technology and ICE OCIO, an operational Data Environment for ICE gathered information which contributes to an overall Department architecture incorporating cross domain services and advanced tools to identify linkages and emerging illicit activity trends while creating analytic collating and processing efficiencies.
- Develop strategic, operational, and tactical collection strategies aimed at: gathering intelligence that satisfies national requirements; maintaining global situational awareness to receive, coordinate, and disseminate classified and unclassified information; and facilitating the exchange of law enforcement and national intelligence.
- Focus on developing an enhanced counterintelligence capability that meets and exceeds DHS standards and provides tailored information to counter hostile actors actively targeting ICE employees and capabilities.
- Implement the Emergency Notifications System (ENS)/Personnel Accountability System (PAS) enterprise wide and administer field training to Rapid Response Teams.

FY 2016 Total Request	5,391	5,095	\$2,406,744
Total Change 2015 to 2016	-	-	\$614,831

CURRENT SERVICES PROGRAM DESCRIPTION:

Custody Operations manages and oversees the nation’s civil immigration detention system. This includes approximately 209 detention facilities and detainees placed in custody represent virtually every country in the world. In FY 2016, ICE is requesting to fund 34,040 beds (including 2,760 family beds), which allow ICE to ensure the most cost-effective use of federal dollars by focusing the more-costly detention capabilities on priority and mandatory detainees, including individuals who pose a danger to national security or a risk to public safety, with particular emphasis on violent criminals, felons, and repeat offenders. Additionally, this provides additional capacity to handle the large influx of recent border crossers. This strategy allows ICE to place low-risk, non-mandatory detainees in lower cost alternatives to detention programs, such as electronic monitoring and intensive supervision.

FY 2016 Request

In FY 2016, ICE requests \$2.407 billion, 5,391 positions, and 5,095 FTE for the Custody Operations program. The FY 2016 request reflects an increase of \$151.874 million from the FY 2014 Revised Enacted amount and an increase of \$614.831 million from the FY 2015 President’s Budget. The FY 2016 request as compared to FY 2015 includes:

- Increase of \$340.923 million for family beds (described in more detail in programmatic change section);
- Increase of \$158.960 million for payroll rights size and non-bed

QHSR Alignment

3.2 Prevent Unlawful Immigration

3.2.4 Arrest, detain, prosecute, and remove

Associated APG/GPRA/Management Measures

Average daily population of illegal aliens maintained in detention facilities

Average length of stay in detention of all convicted criminal aliens prior to removal from the United States

Estimated average bed cost per day

Percent of detention facilities found in compliance with the national detention standards by receiving an inspection rating of acceptable or greater on the last inspection.

general expenses;

- Increase of \$94.469 million for an average of 28,910 Custody Operations-funded adult detention beds a day at \$123.54 (described in more detail in programmatic change section);
- Increase of \$10.676 million for pay inflation;
- Increase of \$5.492 million for Federal employee retirement costs;
- Increase of \$4.354 million for a GSA rent increase; and
- Increase of \$811 thousand for increased Working Capital Fund costs (which include Enterprise License Agreements, NFC Payroll Services and Reporting, and other enterprise-wide activities).

In FY 2016, Custody Operations will spend \$712.936 million for salaries and benefits and \$1,694 billion for general expenses (including non-bed general expenses at \$45 million), including detention beds. Custody Operations will fund 28,910 adult beds at an average rate of \$123.54 and 2,760 family beds at an average rate of \$342.73 per day. The remaining 2,370 adult beds will be paid from fee sources (Breached Bond Detention Fund and Immigration Inspection User Fees).

Description

Custody Operations provides policy guidance for, and oversight of, the administrative custody of a highly diverse alien population who are apprehended and determined to need custodial supervision. Custody Operations operates these detention facilities as efficiently and effectively as possible to ensure the safety, security, and appropriate care of aliens in ICE’s custody.

Detention Bed Costs

The cost of detaining an alien each day varies by region and facility type. Bed costs have several components, including all expenses incurred for direct detention bed acquisition, detention guard services, meals provided to detainees, welfare items, detainee health care and indirect costs such as overhead costs and facility maintenance. For the past three years, the cost of guard contracts has increased due to contract rate increases, including PBNDS upgrades, and wage re-determinations by the Department of Labor (DOL) among other factors. Furthermore, ICE detention reform efforts can add requirements to detention facility operators in order to meet new performance-based compliance standards. ICE will have to pay these additional costs as a result.

	Historic and Projected Bed Costs				
	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Bed and Guard	\$ 85.42	\$ 87.79	\$ 89.26	\$ 90.63	\$ 92.11
Healthcare	\$ 12.35	\$ 11.94	\$ 13.42	\$ 12.13	\$ 12.03
Other Costs	\$ 20.36	\$ 19.15	\$ 18.48	\$ 18.93	\$ 19.40
Total	\$ 118.13	\$ 118.88	\$ 121.16	\$ 121.69	\$ 123.54
<i>Budgeted Rate</i>	\$ 122.00	\$ 122.00	\$ 119.00	\$ 119.00	\$ 123.54

To achieve efficiency in bed costs, ICE plans to conduct a Multi-Year Funding Pilot.

Multi-Year Bed Funding Pilot

In FY 2016, ICE requests that \$45 million of Custody Operations funding be five-year funds. Multi-year funding allows ICE to agree to base periods greater than one year; allows for bed utilization to span more than one fiscal year; and allows ICE to de-obligate any unused fund in its entirety to repurpose. ICE would use these incentives to receive better rates from vendors in contract negotiations. Market research indicates that shifting to a contract with a five- year base period rather than a one-year base and would result in a price break that would continue over the life of the contract. Multi-year funding would enable ICE to negotiate longer contract terms and have greater flexibility regarding procurement timelines on its detention contracts. ICE will review the detention portfolio and institute multi-year bed pilots at up to five facilities.

Average Daily Population (ADP) and Average Length of Stay (ALOS)

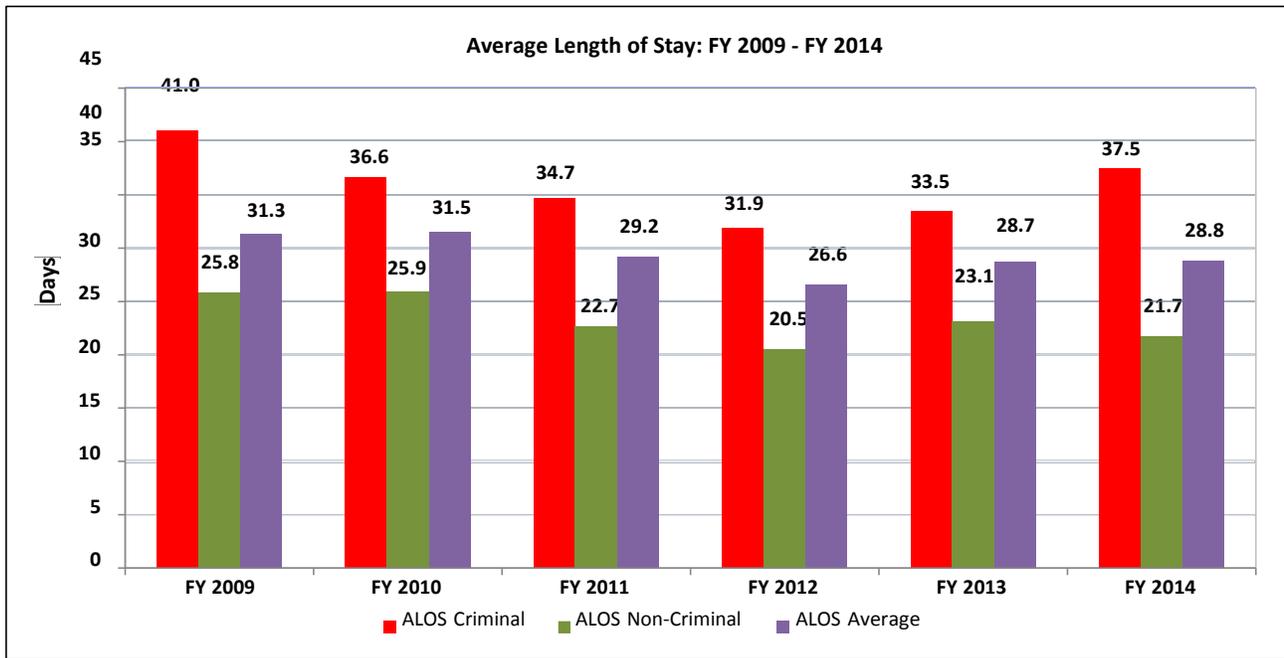

For FY 2016, ICE requests funding maintain an average daily bed level of 34,040, which will include all Mandatory and priority individuals, including the Non-Mandatory Level 1, 2, and 3 populations, and those apprehended while attempting to unlawfully enter the United States.

The chart below shows the breakdown of ICE’s FY 2014 ADP:

FY 2014 Average Daily Population			
	Mandatory	Non-Mandatory	Total:
ICE Threat Level 1	8,077	1,271	9,348
ICE Threat Level 2	3,013	1,481	4,494
ICE Threat Level 3	3,576	1,509	5,085
Non-Criminal Immigration Violator	11,776	2,524	14,030
Grand Total	26,442	6,784	33,227

The most significant detention cost driver is the ALOS for an alien before his or her removal. ALOS is the length of detention for aliens in ICE custody, to include the adjudication process and any appearances before EOIR, leading to a final order of removal, and the subsequent time needed to remove the individual from the United States. The graph below shows how ICE has decreased and stabilized the total average ALOS since FY 2009.

ICE continuously works with EOIR to expedite the legal review with full regard for due process while targeting a reduction in the ALOS. ICE continues a DHS and DOJ cross-agency performance partnership to test specific initiatives that will promote efficiencies in the immigration court process and significantly reduce ALOS and alien processing expenses.

In FY 2014, criminal alien average length of stay (ALOS) was 4.0 days (37.5 days) higher compared to criminal alien ALOS in FY 2013 (33.5 days). The increased ALOS is likely associated with changes to the ATEP program. In FY 2013 (until June 3, 2013 when ATEP changes took place), ATEP was responsible for 14,632 criminal removals with an ALOS of 1.6 days. By eliminating ICE involvement in ATEP cases, now handled by CBP Border Patrol without the need for ICE resources, ALOS rose. The FY 2013 ALOS for convicted criminals who were not part of the ATEP program was 35.9 days. CBP Border Patrol supported ICE's reduction in ATEP transportation resources by removing or voluntarily returning those individuals who would have met the criteria for ATEP.

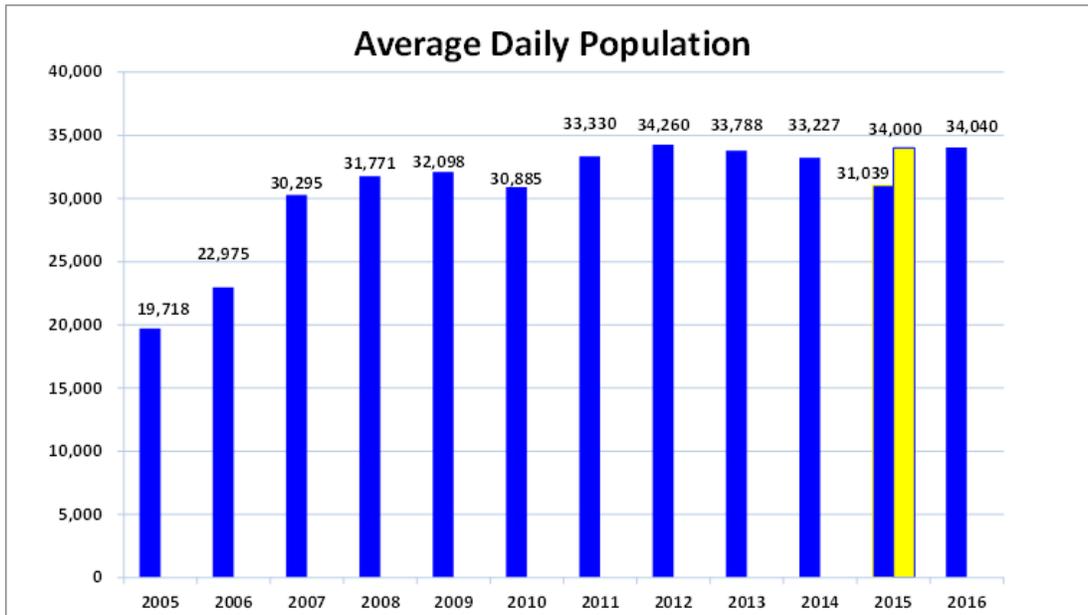

Bed Space Management

Custody Operations acquires and manages detention capacity in three facility types:

- **Inter-Governmental Service Agreements (IGSAs) and Intra-Government Agreements (IGAs)** ICE obtains detention bed space through inter-governmental service agreements with state and local governments and through intra-government agreements with the U.S. Marshall Service (USMS). As of the end of FY 2014, approximately 70 percent of ICE's detained population was housed at 190 IGSA or IGA facilities, covering 44 states, with an average daily population of 23,245 in FY 2014.
- **Service Processing Centers (SPCs)** ICE owns five secure detention facilities, called Service Processing Centers, located in Batavia, New York; El Paso, Texas; Florence, Arizona; Los Fresnos, Texas; and Miami, Florida. The SPCs are dedicated facilities housing 11 percent of the detained population with an average daily population of 3,546 as of the end of FY 2014. SPCs provide ICE with valuable flexibility by providing administrative space as well as courtroom and processing space. The availability of this additional space reduces the time and resources required to process aliens.
- **Contract Detention Facilities (CDFs)** ICE utilizes seven dedicated contract detention facilities to house approximately 18 percent of ICE's detained population with an average daily population of 6,017 as of the end of FY 2014. While not owned by ICE, CDFs are operated by private industry vendors solely for ICE purposes. ICE is prepared to increase usage of facilities with a tiered rate structure per diem that offer cost reductions as the number of detained aliens increases.

Family Units In the past fiscal year, an unprecedented number of family groups, mostly from Central America, arrived in numbers that far outpaced ICE’s family detention capacity. In FY 2014, the Office of Border Patrol apprehended over 68,000 family unit members. Due to this increase, ICE converted its premier civil detention facility in Karnes, TX to a family residential center in order to accommodate the large influx. ICE is also working on expanding the Berks, PA facility. Consequently, ICE opened up another family residential center in Dilley, TX which was built to specifications and meet the Family Residential Standards (FRS). This effort allows for 500 family beds available at the Karnes, TX facility; 188 available at the Berks, PA facility; and 2,072 at the Dilley, TX facility. In total, by the end of FY 2015, ICE plans to have 2,760 family residential beds available.

As of September 30, 2014, ICE has also detailed more than 950¹ personnel in support of Southwest Border Operations since February of 2014. The Houston Juvenile Family and Residential Management Unit, has identified operational space at its headquarters building where a response group with pre-identified members from ICE, Customs and Border Protection (CBP), and FEMA will stand up an ad hoc coordination center to support any future family surge events.

FY 2005 – FY 2014 represent the actual average daily population maintained by ICE during the fiscal year
 FY 2015 figure illustrates the SAC proposed ADP level of 31,039 and the HAC ADP level of 34,000
 FY 2016 illustrates the current President’s Budget requested ADP of 34,040, which includes both adult and family detention beds.

Healthcare

The ICE Health Services Corps (IHSC) has a multi-sector, multidisciplinary workforce of more than 900 personnel providing direct patient care, including 296 commissioned corps officers of the U.S. Public Health Service (PHS), federal civil servants, and contract staff who provide on-site direct patient care to ICE detainees at 21 detention facilities throughout the country. The IHSC also provides case management and consultation services to detainees at IGSA and IGA facilities through its managed care/utilization management system, as well as medical support during ICE enforcement operations in the air, on the ground and at sea.

In FY 2014, IHSC completed several multi-year initiatives: all 21 IHSC staffed clinics transitioned from the legacy IT network to full operating capability in the ICE IT network. In addition, a new facility, Artesia Family Residential Center, was activated within the ICE IT infrastructure; and, the Krome Transitional Unit was opened and is fully operational. The electronic health record was deployed to all IHSC staffed facilities and has transitioned to operations and maintenance. Also, the Field Medical Coordinator program was fully integrated in the IHSC and Field Office operations.

The IHSC mission to provide medical, dental and mental health care to ICE detainees remains unchanged. However, in FY 2016, the scope of the mission will expand given the growing number of families at new Family Residential Centers and at those facilities where the capacity has already increased. To meet these increased demands, the IHSC will exercise a variety of staffing options to include: 1) increasing contract staff; 2) increasing the ceiling on PHS Commission Corps Officers; and 3) recruiting the 0600 general schedule series personnel – Medical Hospital, Dental and Public Health group. In addition, the IHSC will purchase medical supplies and equipment to sustain medical operations at ICE owned and operated facilities. Furthermore, the IHSC can more effectively communicate operating under a single ICE network, and with the electronic health record (eHR) in place, can begin collecting accurate data that will enable effective critical and operational decisions. Likewise, the eHR will help in the identification, acquisition, recruitment and placement of resources to appropriately meet mission needs.

Detention Standards Compliance Oversight

ICE ensures detention facilities used to detain aliens do so in accordance with ICE national detention standards. National standards are tailored to meet the unique needs of ICE's detainee population, with a focus on quality medical care, access to counsel, visitation, religious practices, language translation and interpretation, and other detainee services.

ICE's Detention Compliance Oversight Program complements the annual inspections program and provides on-site monitoring. The Detention Compliance Oversight Program is performed by 39 (pending two vacancy announcements) Detention Service Managers/Detention Standards and Compliance Officers (DSMs/DSCOs) posted at key ICE detention facilities to provide daily review of facility compliance to ICE's standards and resolve facility issues and concerns. In many cases, problems and issues are remedied on the spot by DSMs/DSCOs. In other instances, the DSMs/DSCOs collaborate with the local field office staff to generate and implement remedial plans. In addition, the DSMs/DSCOs also ensure corrective actions are taken to address deficiencies identified by the Office of Detention Oversight (ODO) and other oversight entities, such as CRCL. These on-site managers are vital in contributing to a reduction in detainee grievances, ensuring proper disciplinary processes, improved standards compliance, and an increase in the overall final ratings of annual inspections. At the end of FY 2014, there were 53 total facilities under the purview of the program, comprising approximately 85 percent of ICE's average daily detention population.

One-hundred percent of ICE detention facilities received an inspection rating of acceptable or greater during the annual review through FY 2014. Facilities found not to be in compliance with the standards are afforded an opportunity to correct the identified deficiencies. When deficiencies are not corrected, ICE removes all detainees under its custody from the facility and refrains from utilizing the facility until such time as it is brought into compliance with ICE detention standards.

Detention Reforms

Detention reform is an ongoing initiative to tailor the conditions of immigration detention to its unique purpose. The present immigration detention system grew at an unprecedented rate over the past 15 years. Many of these facility beds are in jails designed for penal - not civil - detention. ICE has a series of comprehensive detention reforms underway designed to ensure that detention conditions are safe, secure, and humane including:

- **Revised Detention Standards.** In February 2012, ICE released its newest national detention standards, known as the 2011 Performance-Based National Detention Standards (PBNDS 2011). The revised standards improve medical and mental health services, increase access to legal services and religious opportunities, improve communication with detainees with limited English proficiency, and improve the process for reporting and responding to complaints, and increase visitation. Implementation of PBNDS 2011 continues as a multi-year process involving contract modifications with priority being given to those facilities housing the largest population of ICE detainees. Currently the proportion of ICE detainees housed in facilities that operate under PBNDS 2011 is approximately 58 percent and continues to increase.
- **Optimization of Detention Facilities.** ICE is continuously looking at opportunities to optimize its detention bed space network, both for cost savings and for the improvement of conditions for its detainees. On January 1, 2014, ICE opened the Rio Grande Detention Center in Laredo, Texas. This agreement provided a significant amount of dedicated bed space in a heavily needed region of the country, for an extremely low cost. ICE has also focused on creating new family- and child-specific bed space to meet needs of increasing populations of this nature. On June 27, 2014, ICE opened the Artesia Family Residential Center in Artesia, New Mexico. This new facility allows ICE to maintain more family units in a single location than had been available in a single location before. ICE has also continued to complete contracts to increase bed space in needed regions with improved conditions of confinement for low-risk detainees. A prime example of this is the Adelanto Correctional Facility in Los Angeles, which has expanded from 650 to 1,300 and is under consideration for further expansion in the coming years.

Prison Rape Elimination Act (PREA)

ICE continued Prison Rape Elimination Act (PREA) Implementation in ERO detention facilities. The implementations included: 1) ensuring compliance with the DHS PREA standards and ICE Sexual Abuse and Assault Prevention and Intervention (SAAPI) Directive, as well as other agency policies and detention standards related to SAAPI; 2) Ensuring review and monitoring of all allegations of sexual abuse and assault from detainees, field offices, CRCL and OIG and provided technical assistance; 3) Promoting the Victim Service Referral and Crisis Intervention program to ensure that each alleged victim is offered victim services; 4) Launching tools and resources such as the SAAPI Resource Center to ensure that ICE staff receives continued guidance and technical assistance; 5) Conducting trainings and site visits to ensure staff is aware of their responsibilities under SAAPI; 6) Coordinating with relevant federal agencies to stay up to date on PREA best practices; and 7) Creating

a SAAPI case management system to track the life cycle of all sexual abuse and assault allegations for the agency.

FY 2016 Planned Activities:

- Provide funding for a yearly average daily population of 34,040 individuals, which includes both adult and family detention populations;
- Achieve an estimated average bed cost of not more than \$123.54 per day for adult beds and not more than \$342.73 per day for family detention;
- Promote the parental interests directive with advocacy groups, legal providers, victims’ rights organizations, family courts, and child welfare systems;
- Achieve a 100 percent compliance rating with the national detention standards by receiving an inspection rating of acceptable or greater on last inspection;
- DMU will accomplish at least 10 Quality Assurance Reviews and or Site Assist Visits evaluating conditions of confinement and the facility’s operational compliance with the ICE detention standards;
- Ensure that all family residential facilities meet the Family Residential Standards;
- Expand the On-sight Monitoring Program to over 95 percent of ICE detention population;
- Continue standards training for new personnel and stakeholders as needed; and
- Expand the scope of the IHSC mission to provide medical, dental and mental health care to the growing number of families at new Family Residential Centers and at those facilities where the capacity has already increased.

CURRENT SERVICES PROGRAM DESCRIPTION:

The National Fugitive Operations Program (NFOP) was established in 2003 to locate, arrest, or otherwise reduce the fugitive alien population. Fugitive Operations primary goal is to locate and arrest removable criminal aliens who are at-large within the United States. The 129 Fugitive Operations Teams (FOTs) across the nation prioritize their investigations on national security cases and transnational gang members, convicted criminals and sex offenders, and aliens with removal orders issued after January 1, 2014 who have failed to depart the U.S. FOT members work cooperatively with state, local, and federal law enforcement agencies and are active participants on numerous interagency task forces, providing immigration enforcement expertise in pursuit of mutual public safety benefits.

In addition, ERO's Fugitive Operation Support Center (FOSC) main purpose is to enhance the efficiency and effectiveness of the Fugitive Operations Program. The FOSC reviews and updates ICE fugitive alien cases in the Enforce Alien Removal Module (EARM), provides comprehensive leads to the FOTs, closes cases as appropriate, and facilitates the overall efforts to arrest fugitives.

FY 2016 Request

In FY 2016, ICE requests \$129.438 million, 748 positions and 700 FTE for Fugitive Operations. The FY 2016 request reflects an increase of \$636 thousand from the FY 2014 Revised Enacted and a decrease of \$2.153 million from the FY 2015 President's Budget. The FY 2016 request, as compared to FY 2015, includes:⁷

⁷Positions are reflective of the number of individuals ICE plans to have onboard and FTE represent the number of Full-Time Equivalent hours that will be worked due to timing of on boards.

- Increase of \$1.366 million for pay inflation;
- Increase of \$653 thousand for Federal employee retirement costs;
- Increase of \$320 thousand for a GSA rent increase;
- Increase of \$60 thousand for increased Working Capital Fund costs (which include Enterprise License Agreements, NFC Payroll Services and Reporting, and other enterprise-wide activities); and
- Decrease of \$4.552 million for non-operational general expense efficiencies.

In FY 2016, Fugitive Operations will spend \$109.078 million on salaries and benefits and \$20.360 million on general expenses to fund the 129 Fugitive Operation Team’s and the Fugitive Operation Support Center (FOSC).

Description

Fugitive Operations Teams (FOTs)

The NFOP was launched in 2003 with eight FOTs nationwide. Today, each of the twenty-four ICE field offices has at least one FOT, and there are 129 FOTs deployed nationwide. FOTs plan and conduct in-depth investigations of fugitive and at-large cases, giving priority to criminal aliens and those individuals that pose a threat to public safety. The FOTs utilize well-developed methods and techniques to identify, locate and arrest these priority targets, to include immigration fugitives falling within DHS priorities. FOT members attend specialized training specific to NFOP, including high-risk entries, service of criminal warrants, the location of high-profile escapees, and the location and arrest of prioritized foreign fugitives.

On February 14, 2014, San Francisco Fugitive Operations and the U.S. Marshals Service arrested a Mexican national with an INTERPOL Red Notice from Mexico for aggravated kidnapping and murder generating significant media attention in Mexico.

Operations Cross Check and Return to Sender are the primary enforcement operations utilized by the FOTs. These operations, along with other specialized initiatives such as Sex Offender Alien Removal (SOAR), Joint Effort, and INTERPOL’s “FAR Away” (noted below) have allowed the NFOP to continually increase its criminal arrests. Since FY 2008, FOTs have attained a higher criminal arrest percentage than the previous year, culminating in FY 2014 with a 78.76 percent criminal arrest rate.

Initiatives employed by the FOTs include:

- *Operation Return to Sender:* An interior enforcement initiative that applies an organized and methodical approach to the identification, location and arrest of ICE fugitive aliens.
- *Operation Cross Check:* The operational umbrella for all other focused enforcement efforts that target other specific alien populations, such as at-large criminal aliens convicted of violent offenses.

- *Probation and Parole Enforcement:* A program to identify, locate, and arrest criminal aliens on probation and parole. In FY 2014, ICE finished transferring Probation and Parole investigations from HSI to NFOP. The NFOP manages this program and utilizes the FOTs to address the estimated population of over 431,000 criminal aliens on probation and parole from the criminal justice system. The transfer of this program has resulted in a significant increase of criminal arrests for ICE, with 2,052 arrests by the FOTs in FY 2014.

On April 1, 2014, Houston Fugitive Operations and the U.S. Marshal Service arrested a Mexican national with an INTERPOL Wanted Person Diffusion from Mexico for aggravated double homicide.

- *Joint Effort:* An initiative that combines the resources and expertise of ICE with local law enforcement agencies to arrest criminal aliens, fugitive aliens, and previously removed aliens in order to address public safety threats and reduce crime in the nation’s communities.

- *Operation SOAR:* A coordinated foreign-born enforcement operation that builds on ICE’s ongoing efforts to target egregious criminal aliens convicted of sex offenses and removes them from local communities.

- *FAR Away:* NFOP has permanently assigned two liaison officers to INTERPOL to develop investigative leads and provide support to the FOTs in the location and arrest of foreign fugitive, or Fugitive Alien Removal (FAR) cases—foreign nationals wanted for crimes committed abroad who are now at-large in the United States. Since FY 2011, the NFOP has increased the number of annual FAR arrests from 74 in to 288 in FY 2014.

On July 17, 2014, Miami Fugitive Operations, with the assistance of the Hallandale Beach Police Department arrested one of ICE/EROs top 10 Most Wanted. The subject was an ICE Fugitive who was convicted of Murder in the Second Degree and ordered removed in absentia.

- *Most Wanted Program (MWP):* A program that aids in the location and arrest of dangerous fugitives and at-large criminal aliens, develops community support by providing visibility and fostering awareness of ERO’s public safety mission, and builds cooperative relationships with law enforcement partners through the exchange of mutually beneficial information aimed at removing these threats from local communities. In the past two years, the NFOP has arrested seven of their 10 most wanted targets.

- *No Safe Haven:* A collaborative effort by the NFOP and ICE’s Human Rights Violators and War Crimes Unit, to identify, arrest, and remove aliens who have been determined to be associated with human rights violations and war crimes in their home countries.

Fugitive Operations Support Center (FOSC), transitioning to the National Criminal Analysis and Targeting Center (NCATC) in FY 2016

The FOSC serves as a national enforcement operations center, providing ICE law enforcement staff with critical analysis and information unavailable to them in the field. The FOSC administers a complex, proprietary data system that serves as the foundation to correlate and

analyze a wide-range of investigative person-specific information. Various FOSC processes synthesize extensive amounts of data into actionable information and leads used by FOTs to target and arrest aliens who pose a threat to our communities. The FOSC also assists local probation and parole law enforcement by identifying aliens that pose a threat to our communities and should be removed from the United States.

In FY 2014, the FOSC disseminated 6,280 “Lead Referrals on criminal aliens and 709,848 “Information Referrals” on Probation and Parole cases. Lead Referrals are divided into three categories: (1) fugitive criminal aliens who have not complied with a removal order, (2) re-entry cases relating to criminal aliens who have been removed and illegally re-entered the U.S., and (3) at-large criminal aliens who have not yet been located. The term "Information Referral" is defined as information on a potentially removable alien which is likely to contribute a substantive benefit to ICE's law enforcement efforts, either for officer safety, de- confliction, or arrest location purposes.

Field Training Unit (FTU)

In FY 2014, ICE aligned ERO’s FTU within the Fugitive Operations Division to meet ERO’s evolving needs as a law enforcement organization, and to provide comprehensive public safety-based law enforcement training and career development for ERO employees. The FTU coordinates with ERO Senior Field Training Officers (SFTOs) nationwide to develop and deliver law enforcement, leadership and database training courses as well as Web-based workshops and seminars for ERO personnel in the field. FTU helps ensure full and timely policy compliance with DHS and ICE training policies. The FTU provides ERO Subject Matter Experts to the ICE Office of Training and Development (OTD) for curriculum development, especially with curriculum pertaining to ERO professional development and field law enforcement. The FTU works closely with the ICE Academy on the development and management of advanced law enforcement training courses for ERO officers, including the Deportation Field Operations Training Program.

FY 2016 Planned Activities

- Transition the FOSC into the National Criminal Analysis and Targeting Center (NCATC) to serve as the central investigative analytical and targeting entity for ERO enforcement nationwide. The NCATC will consist of a cadre of National Targeting Officers (Detention and Deportation Officers) and Law Enforcement Specialists that will provide operational support services which cannot be effectively performed at the field level, or that require national-level operating/coordinating or joint-coordination with the NFOP functions, including: real-time enhanced investigative analysis; proactive targeting of aliens shown to be prima facie amenable for *criminal prosecution* of certain single-scope crimes (targeting for prosecution to protect American communities); batch targeting research and support; biographic and biometric systems search and analysis; financial tracing/investigative operations; and technology infrastructure requirements, including Installation of a Criminal Print Index (CPI) message switch to provide a direct communications path to the National Law Enforcement Telecommunications System (NLETS).
- Continue to focus efforts on proactive ICE priority alien analysis and in-depth enforcement

In FY 2014, the FTU trained 101 ERO Employees in ICE Supervisory Leadership Training and the ERO Operational Leadership Course, reducing the supervisory training backlog by 53 percent.

targeting services to field units through the use of enhanced technology and data analysis by:

- Pursuing the expansion of liaison efforts at counterpart targeting centers and law enforcement hubs, to include the CBP National Targeting Center in Reston, Virginia, and at EUROPOL in The Hague, Netherlands. Placement of dedicated ERO representatives at these and other key collaborative environments would provide information sharing connectivity and allow agents the ability to query person-centric data unique to these respective entities, and increase real-time situational awareness of potential threats and targets of interest; and
- Establishing a formalized information sharing agreement with the U.S. Marshals Criminal Intelligence Branch (CIB) to exchange law enforcement data on criminal and public safety threats with targeting parameters common to both agencies, including aliens with criminal wants and warrants, foreign fugitives and sex offenders.

Total Change 2015 to 2016	-	-	(\$2,140)

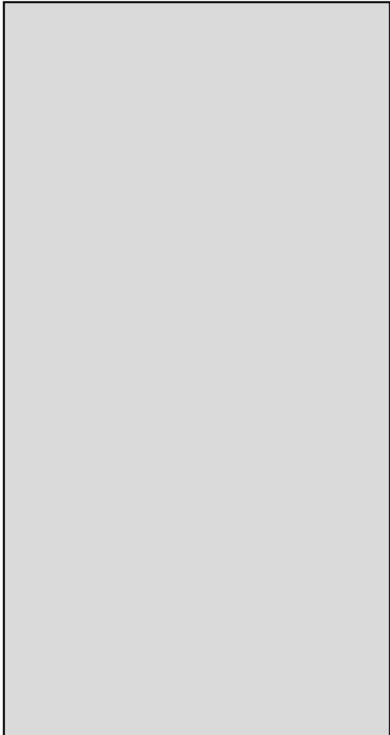

CURRENT SERVICES PROGRAM DESCRIPTION:

The Criminal Alien Program (CAP) through biometric and biographic identification directs and supports ICE in apprehending and removing criminal aliens who are incarcerated within local, state, and federal prisons and jails, and who are at-large within the United States. The identification and processing of incarcerated criminal aliens, prior to release from jails and prisons, decreases or eliminates the time spent in ICE custody and reduces the overall cost to the U.S. Government.

FY 2016 Request

In FY 2016, ICE requests \$320.267 million, 1,711 positions, and 1,534 FTE for CAP. The FY 2016 request reflects an increase of \$26.112 million from the FY 2014 Revised Enacted amount and a decrease of \$2.140 million from the FY 2015 President’s Budget. The FY 2016 request, as compared to FY 2015, includes:⁸

- Increase of \$3.090 million for pay inflation;
- Increase of \$1.370 million for Federal employee retirement costs;
- Increase of \$783 thousand for GSA rent increase;
- Increase of \$146 thousand for increased Working Capital Fund costs (which include Enterprise License Agreements, NFC Payroll Services and Reporting, and other enterprise-wide activities);

⁸ Positions are reflective of the number of individuals ICE plans to have onboard and FTE represent the number of Full-Time Equivalent hours that will be worked due to timing of on boards.

- Decrease of \$7.029 million for non-operational general expense efficiencies; and
- Decrease of \$500 thousand for three positions previously funded by CAP that beginning in FY 2016 will be funded by OPR.

In FY 2016, CAP will spend \$191.258 million on salaries and benefits, and \$129.009 million on general expenses to support priority goals. CAP includes a majority of ICE's 287(g) program funding (\$13.4 million out of \$24.3 million).

Description

ICE ensures all efforts are made to investigate, arrest, and remove individuals from the United States that are deemed priorities. CAP identifies incarcerated criminal and other priority aliens prior to their release from jails and prisons, which decreases time spent in ICE custody and reduces the overall cost to the federal government. Together with the offices of the United States Attorneys, CAP actively pursues criminal prosecutions upon the discovery of offenses of the nation's criminal code and immigration laws. This further enhances public safety and provides a significant deterrence to recidivism.

In FY 2014, CAP arrested 122,836 aliens and issued 102,120 charging documents, resulting in 68,244 removals. The encounters chart below graphically illustrates the total number of foreign born encounters attributed to CAP for fiscal years 2010-2014. The encounter is the first step in the immigration enforcement lifecycle, the volume of which represents the workload of CAP officers and the corresponding resource requirements.

Although, encounters have been trending down over several fiscal years, CAP workload has actually increased due to some jurisdictions no longer transferring (or curtailing transfers of) priority individuals in their custody to ICE, prioritization of targets, and the influx of minors along the Southwest border. With its limited resources, direct transfers are an important part of ERO's public safety mission.

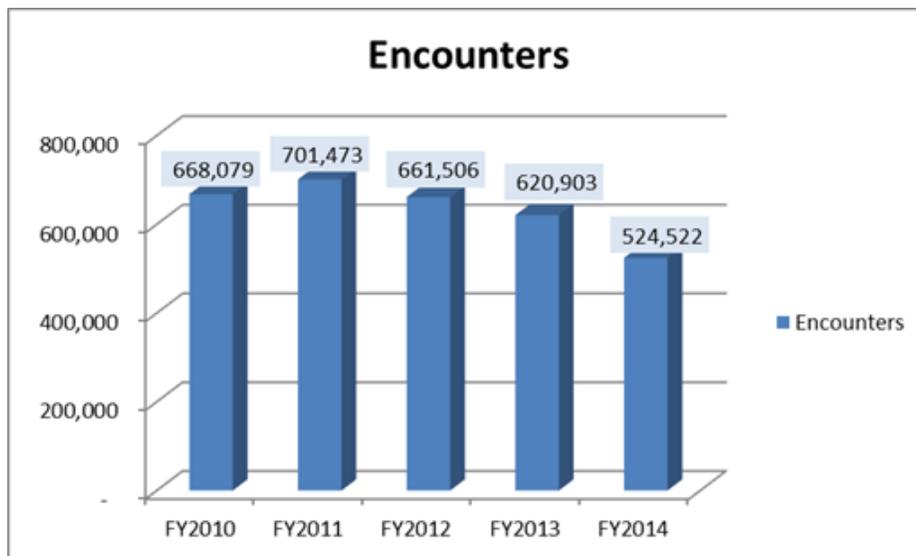

Certain criminals who would previously be transferred in a controlled, safe, and secure manner directly into ICE custody are now often released directly to the street. Subsequently, they must be sought for arrest by ERO officers in riskier and potentially hazardous environments. In increasing numbers of cases, ERO officers must now target (by multi-person, outfitted teams) criminal aliens that could have been transferred to ERO custody with far less time, effort, and manpower. This, in turn, limits the number of criminal aliens ERO is able to apprehend.

To mitigate these impacts, DHS has established the Priority Enforcement Program (PEP). PEP will utilize requests for notification from state or local law enforcement of the pending release of a person for whom ICE is seeking custody. It is anticipated that requests for notification (rather than the past practice of ICE-issued detainers⁹) will address federal court decisions that hold that detainer-based detention by state and local law enforcement violates the Fourth Amendment.

⁹ ICE may seek to issue a request for detention rather than a request for notification in special circumstances. In such cases, ICE must specify that the person is subject to a final order of removal or there is other sufficient probable cause to find that the person is a removable alien, thereby addressing the Fourth Amendment concerns raised in recent federal court decisions.

ICE continues to refine its allocation of enforcement resources and targeting capabilities to maximize operational efficiency and effectiveness, and to maximize CAP's ability to aggressively and more vigorously initiate enforcement actions against priority aliens while they are in custody.

CAP Encounters: FY 2010 – FY 2014

Under joint Memoranda of Agreement with state and local law enforcement agencies (collectively known as the 287(g) program), ICE cross-designates non-Federal law enforcement officers as designated immigration officers to perform specific functions under the Immigration and Nationality Act. The 287(g) program is one of ICE's top partnership initiatives and serves as a force-multiplier for ICE at the state and local level, allowing ERO to utilize its limited number of CAP officers to expand its enforcement footprint.

The 287(g) program utilizes the Jail Enforcement Model to accomplish its mission, which is designed to facilitate the processing of criminal and other priority aliens arrested and booked into a detention facility, including those identified through interoperability. The ICE ERO Headquarters 287(g) Unit oversees the Jail Enforcement Model in cooperation with local ICE ERO Field Offices.

Operational Capabilities

CAP operational capabilities serve as program enhancing efforts to further identify, arrest, and initiate removal proceedings against incarcerated criminal aliens, as well as actively investigate and arrest at-large criminal and other priority aliens that pose a significant risk to public safety and national security, or otherwise meet ICE priorities.

- **Threats to the Community (TC)** are targeted at-large enforcement operations led by CAP to investigate, arrest, and remove criminal aliens that pose the greatest threats to the community. TC targets criminal aliens utilizing ICE priorities, focusing on at-large criminal aliens identified through interoperability, as well as those jurisdictions which limit or refuse ICE access to their facilities.

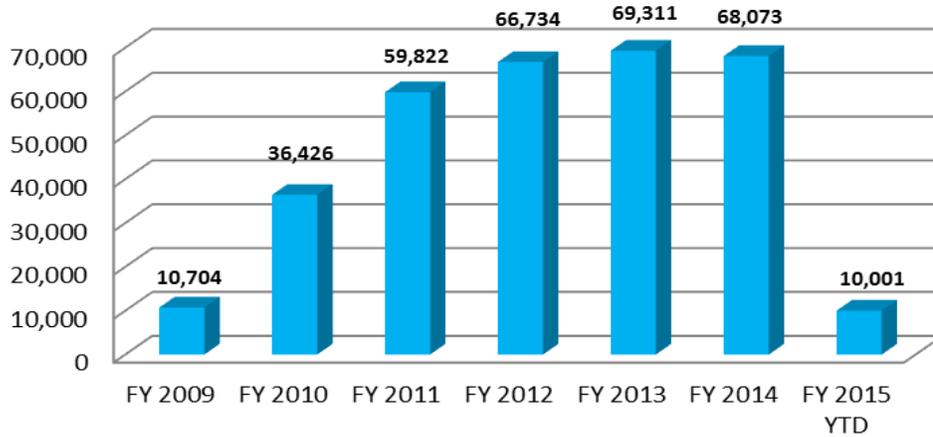

- **Criminal Alien Program Removal Surge Operations (CAPRSO)** is a focused deployment of local CAP resources used to ensure 100 percent of all priority criminal aliens booked into targeted facilities that are amenable to immediate removal obtain a removal order, or are voluntarily returned to their country of citizenship once released from local law enforcement custody, or otherwise are placed into removal proceedings.
- **Criminal Alien Program Surge Enforcement Team (CAPSET)** was established and implemented by CAP in FY 2014 to enable ERO Field Offices to “surge” facilities whose priority target population outweighs local enforcement capabilities by drawing on personnel resources throughout the country. The goals of the CAPSET are as follows:
 - Increase the number of priority criminal aliens identified and fully processed prior to their release from custody;
 - Assist field offices in depleting target backlog and with the goal of allowing field offices to reduce personnel assigned to the surged facility, thereby allowing their reassignment to other facilities, with an emphasis on those with rapid turnover of targets and/or enforcement practices that limit the effectiveness of current CAP efforts.
 - Identify best practices that may be replicated in other locations;
 - Limit degradation to existing field office operations by drawing only one officer from each field office on periodic basis.

CAP Personnel

CAP officers screen biometric and biographic leads received from IDENT/IAFIS interoperability and other law enforcement agencies of prison and jail populations to identify priority aliens and place them into removal proceedings. The nationwide deployment of interoperability was completed in FY 2013, which serves as a highly-effective information sharing process between the Federal Bureau of Investigation and DHS. When utilized in a CAP environment, interoperability allows CAP officers to screen 100 percent of all intakes at more than 4,300 Federal, state and local prisons and jails. While interoperability makes the CAP program more efficient, effective, and accurate, it only provides awareness of the alien’s arrest. CAP officers are still required to work these facilities on a daily basis—both to physically interview those criminal aliens identified through interoperability, as well as those for which there is a “no-match” (indicates foreign-birth, but no records to confirm this).

CAP officers also investigate at-large criminal and other priority aliens who circumvent the interview and screening process.

**Criminal Removals After Identification Through
IDENT/IAFIS (SC) Interoperability FY2009 - FY2015
YTD**

FY 2015 YTD information includes data through December 31, 2014

Program Risk Based Approach

CAP uses a risk-based approach, prioritizing resources on jails and prisons with the highest population of foreign born nationals. CAP works to ensure ICE enforcement priorities are followed and detainees or requests for notification are issued for cases involving felony convictions; three or more prior misdemeanor convictions; misdemeanors involving violence, sexual abuse or other serious conduct; or cases that pose a significant risk to national security, border security, or public safety.

Initiatives

The Law Enforcement Support Center (LESC) operates 24 hours a day/seven days a week to provide timely and accurate information to law enforcement agencies on the identity and immigration status of individuals who have been arrested or who are under investigation for criminal activity. LESL specialists and officers have access to a wide range of databases and intelligence resources. Queries to the LESL have risen more than 80 percent from FY 2008 through FY 2014, from 807,106 queries to 1,450,732 queries per year. Much of this increase is the result of ICE’s use of IDENT/ IAFIS interoperability.

Law Enforcement Systems and Analysis (LESA) division delivers tools, studies, and recommendations to assist in the planning and decision-making (strategic, business, and operational) of ICE activities, particularly those relating to the apprehension and removal of criminal aliens. These tools will assist ICE leadership in the development of a performance-based program and budget that

will result in a more efficient use of CAP resources through the modernization of immigration enforcement

Criminal History Information Sharing (CHIS) is a Department of Homeland Security-led information sharing initiative between the United States Government and its international partners. Through CHIS, ICE provides its partners with valuable criminal conviction information on foreign nationals before their removal from the United States.

Rapid Removal of Eligible Parolees Accepted for Transfer (REPAT) Program is a joint partnership with state correctional/parole agencies designed to expedite the process of identifying and removing criminal aliens from the U.S. by allowing selected non-violent criminal aliens incarcerated in U.S. prisons and jails to accept early release in exchange for voluntarily returning to their country of origin. Eligible aliens must agree to waive appeal rights associated with their state convictions. If aliens re-enter the country following removal under the Rapid REPAT Program, state statutes may provide for revocation of parole and incarceration for the remainder of the alien’s original sentence. Additionally, aliens illegally re-entering may face additional federal charges and penalties. Rapid REPAT also helps participating states reduce the costs associated with detention.

Violent Criminal Alien Section (VCAS) enforces violations of the United States Criminal Code discovered through ICE’s enforcement activities. The aggressive criminal prosecution of criminal alien offenders identified by ICE enforcement officers, in conjunction with the Offices of the United States Attorneys, further enhances public safety and provides a significant deterrent to recidivism.

FY 2016 Planned Activities:

- ERO will continue to focus CAP resources on the enhancement of public safety through outreach, partnership, information sharing and coordinated enforcement operations; and
- Increase CAPSET deployments as necessary while continuing the analysis of field office resource requirements.

FY 2016 Total Request	191	194	\$122,481
Total Change 2015 to 2016	-	24	\$28,375

CURRENT SERVICES PROGRAM DESCRIPTION:

Through federal officers and contract technology and case management staff, the Alternatives to Detention (ATD) program has monitored approximately, 23,193 participants per day for FY 2014. For the final quarter of FY 2014, the ATD program monitored an average of 25,880 participants per day with a final population of 27,219 participants on September 30. This was largely due to the influx of aliens crossing the border in the Rio Grande Valley (RGV). To ensure the most cost-effective use of Federal dollars, ICE has aligned its capabilities with immigration enforcement priorities and policies so that mandatory and priority individuals (such as violent criminals and those who pose a threat to national security) are kept in detention, while low-risk, non- mandatory detainees may be enrolled in ATD programs, including electronic monitoring and supervision. The ATD program has a proven track record for participants' compliance with removal orders and court appearance requirements.

FY 2016 Request

In FY 2016, ICE requests \$122.481 million, 191 positions, and 194 FTE for the ATD program. The FY 2016 request reflects an increase of \$31.037 million from the FY 2014 Revised Enacted amount and reflects a increase of \$28.375 million from the FY 2015 President's Budget. The FY 2016 request, as compared to FY 2015, includes:

- Increase of \$30.839 million to enhance ATD capacity to 53,000;
- Increase of \$4.622 million for annualization of prior year enhancements;
- Increase of \$428 thousand for a pay inflation;
- Increase of \$242 thousand for Federal employee retirement costs;

- Increase of \$229 thousand for GSA rent increase;
- Increase of \$43 thousand for increased Working Capital Fund costs (which include Enterprise License Agreements, NFC Payroll Services and Reporting, and other enterprise-wide activities); and
- Decrease of \$8.028 million for non-operational general expense efficiencies.

In FY 2016, ATD will spend \$27.938 million on salaries and benefits, and \$94.543 million on contractual support and equipment.

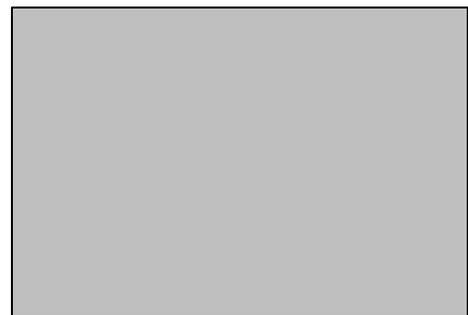

Description

The ATD program provides an enhanced supervision option for aliens whom ICE or an Immigration judge has determined detention is neither mandated nor appropriate. ATD is employed where an individualized case review determines that the alien may need a higher level of supervision than provided by the less restrictive release conditions associated with a bond, Order of Release on Recognizance, or an Order of Supervision alone. The ATD officer or agent will consider a number of factors when determining eligibility for ATD enrollment, and what options are most appropriate. These factors include, but are not limited to:

- Stage in the removal process;
- Assets/property;
- Community and family ties;
- Legal representation;
- Criminal history;
- Compliance history; and
- Humanitarian concerns.

ATD Average Daily Participant Levels							
Fiscal Year	FY2010	FY2011	FY2012	FY2013	FY2014	PB FY2015	FY2016
Average Daily Participant Level	16,532	17,957	23,034	22,090	23,193	37,650	53,000

In FY 2016, the ATD program will allow for an expanded array of services that include: electronic monitoring alert identification and resolution and court tracking through the Executive Office of Immigration Review (EOIR) with all updates being provided to ICE. The ATD program will also allow ICE to receive more data with regards to EOIR decisions and appearance rates while focusing more of its time on the operational aspects of ATD. Contractor support will also resolve¹⁰ a significant number of alerts and violations no longer requiring ICE officer intervention or action. With locations that have a physical contractor presence, ICE will have the option to select

¹⁰ Contractors’ activities and determinations on alert resolutions are strictly governed by the ISAP III contract and objectively dictated by ICE. All discretionary decisions are made by ICE officers or with ICE officer oversight.

contractor-led orientation/enrollment home visits, office visits, and case management services.

Currently, all services for ATD participants in 45 cities across the United States are provided with the physical presence of the contractor.

Future ATD Operations

ICE intends to expand the ATD program nationwide and continue to refine the monitoring program through data evaluation. This includes the continued identification of individuals in need of supplemental reporting and monitoring.

FY 2016 Planned Activities:

- Explore the feasibility of a Cross-Country ATD Monitoring Program as participants travel from their release points to their final destinations in the United States. ICE will track GPS alert generation rate, appearance rate, and average length in time to travel. If successful, ICE may expand the program to provide more oversight for individuals who are released from the border but intend to travel to other parts of the United States.
- Capture and evaluate EOIR appearance rates and program success rates for participants on lesser forms of case management and technology assignment to further refine the case review process in order to identify and implement the most appropriate levels of monitoring and technology assignment to generate success.
- Continue to prioritize aliens for ATD who present the highest risk of flight with an emphasis on aliens who fall into a stated priority category but are not appropriate to maintain in detention.
- Continue to ensure the participation of aliens not subject to mandatory detention in order to focus costly detention space on criminal and priority aliens.
- Increase the ATD population to 53,000.

FY 2016 Total Request	40	40	\$326,740
Total Change 2015 to 2016	-	-	\$97,631

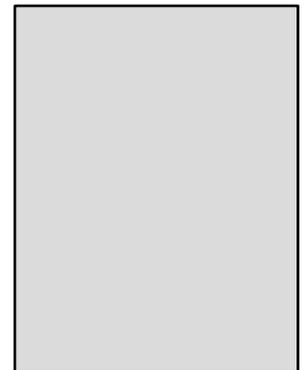

CURRENT SERVICES PROGRAM DESCRIPTION:

The Transportation and Removal Program (TRP) supports ICE’s mission by funding and coordinating safe and secure removal of aliens from the United States who are subject to final orders of removal. TRP manages an extensive network of domestic and international flight routes, and supports extensive domestic ground transportation. TRP also coordinates the transfer of Unaccompanied Children from CBP to HHS shelters as required.

FY 2016 Request

In FY 2016, ICE requests \$326.740 million, 40 positions, and 40 FTE for TRP. The FY 2016 request reflects a decrease of \$25.473 million from the FY 2014 Revised Enacted amount and an increase of \$97,631 million from the FY 2015 President’s Budget. The FY 2016 request as compared to FY 2015 includes:

- Increase of \$56.175 million for increased transportation costs related to adults, family units, and unaccompanied children;
- Increase of \$37.611 million for an average of 34,040 detention beds a day, which correlates to the increased number of detention beds and anticipated increase in local transportation and removals (described in more detail in programmatic change section);
- Increase of \$2.588 million (scored portion of amounts available) for UC contingency funding increase to support the transportation requirements for unaccompanied children generally in excess of 58,000;
- Increase of \$557 thousand for GSA rent increase;
- Increase of \$545 thousand for pay inflation;

- Increase of \$104 thousand for increased Working Capital Fund costs (which include Enterprise License Agreements, NFC Payroll Services and Reporting, and other enterprise-wide activities); and
- Increase of \$51 thousand for Federal employee retirement costs.

In FY 2016, TRP will spend \$8.082 million on salaries and benefits and \$316.070 million on general expenses associated with the removal of an estimated 176,700 convicted criminal aliens primarily through contractual arrangements with commercial and charter air carriers managed by the ICE Air Operations Division.

Description

TRP coordinates the safe and secure transportation of aliens in ICE custody and their removal from the United States. In collaboration with ICE Office of International Affairs and the Department of State, ICE plans, defines and projects requirements; establishes memoranda of understanding (MOU) and repatriation agreements; and executes removal operations. TRP performs its responsibilities through the Removal Management Division (RMD) and the ICE Air Operations (IAO) Division.

Removals and Returns by Type			
	Criminal*	Non-Criminal	Total
FY 2008	114,415	254,806	369,221
FY 2009	136,126	253,708	389,834
FY 2010	195,772	197,090	392,862
FY 2011	216,698	180,208	396,906
FY 2012	225,390	184,459	409,849
FY 2013	216,810	151,834	368,644
FY 2014	177,960	137,983	315,943

* Level 1 criminal: FY 2010 64,466; FY 2011 75,086; FY 2012 77,954; FY 2013 74,159 ; FY 2014 63,159.

**The Alien Transfer and Exit Program (ATEP) discontinued operations in June 2013 resulting in a decrease in the number of removals accomplished by ICE.

In FY 2012, TRP began developing methodologies to identify and prioritize nations who delay or who fail to cooperate in the timely return of their nationals. Delays in returning aliens to their countries of origin generate significant expenses to ICE due to increased detention stays. Additionally, these delays also present potential threats to public safety when ICE is unable to effect the alien’s removal and is forced to release them into the United States. During the last round of migration talks on January 9, 2014, the Government of Cuba stated that it would now accept the return of Cuban nationals who entered into the United States with a B2 Visa on or after January 2013 and have overstayed. This is a definitive step forward, as the U.S. Government has long sought to gain the government of Cuba’s agreement to take back non-Mariel listed Cuban removable aliens. Through various approaches, progress continues to occur in the repatriation of removable aliens back to their country of origin. The government of Cambodia has committed to conducting bi-yearly interviews and has issued travel documents on over 90 percent of those interviewed. On June 10, 2014, RMD

conducted a Long-Range International Charter (LRIC) mission to Amman, Jordan. RMD was successful in removing six (6) Palestinians to the West Bank via the Allenby Bridge and one (1) Jordanian national, failure to comply (FTC) case, back to the Amman, Jordan.

Between FY 2012 and FY 2013, ICE experienced a decrease in its criminal removals from 225,390 to 216,810. This decrease was due in part to operational changes to the Alien Transfer Exit Program (ATEP), with CBP now effecting many removals and returns that had in the past been conducted by ICE. In FY 2014, the first full year of ATEP's operational changes, ICE criminal removals again decreased to 177,960.

Removal Management Division (RMD)

RMD supports field offices, ICE Attachés, and foreign embassies and consulates for travel document- and removal-related issues to ensure the safe and orderly removal of aliens from the United States through its Travel Document Unit (TDU). TDU also has oversight of the electronic Travel Document System (eTD) and conducts liaison with governmental and non-governmental organizations, approximately 200 embassies and consulates within the United States, foreign governments and law enforcement organizations worldwide.

RMD's Post Order Custody Review Unit (POCRU) provides Nation-wide guidance and is responsible for providing case management support for aliens subject to a final order of removal. POCRU's primary focus is the oversight of the POCR process, which includes custody determinations pursuant to 8 C.F.R. 241 relating to aliens pending removal from the United States and those designated as national security threats or specifically dangerous. POCRU also adjudicates official requests for deferred action relating to aliens identified as cooperating witnesses and confidential informants.

ICE Air Operations (IAO)

IAO manages all aspects of flight operations for removals including scheduling flights, forecasting operational needs, and assisting with the coordination between foreign governments and embassies. IAO oversees aviation safety, standardization, and training. IAO provides services to all ICE field offices conducting regular flight operations from hubs in Arizona, Florida, Louisiana, and Texas.

IAO transports and removes aliens through the use of both air charters and commercial airlines. Air charter flights are used to remove aliens to countries with a high volume of removals. Special air charters are employed to accommodate the removal of aliens, more specifically failure to comply cases, who cannot be removed via commercial air and high-profile removals. Commercial flights are used to facilitate the transfer, staging and removal of aliens via land ports of entry and for flights abroad.

ICE procures air charter services from vendors through the General Services Administration Schedule.

This innovative arrangement provides ICE cost effective and highly flexible flight services. As a result, ICE can rapidly adjust to changing flight requirements such as dates, times, and operating locations.

IAO also removes alien nationals via commercial aircraft. IAO’s Commercial Operations Section coordinates airline reservations and obtains country clearances through both the Secure Message and Routing Terminal cabling system and the Department of State’s electronic Country Clearance system.

The chart below represents flight hour rates for air charter services. Commercial flights are paid at the prevailing market rates.

Staging Location	FY 2013 Cost Per Flight Hour	FY 2014 Cost Per Flight Hour
San Antonio	\$8,027	\$8,477
Alexandria	\$8,967	\$8,947
Mesa	\$8,407	\$8,557
Miami	\$7,825	\$8,267
Brownsville	NA	\$8,787
AVERAGE	\$8,307	\$8,607

¹ For FY 2015 and FY 2016, IAO will reimburse the vendor the flight hour rate plus fuel costs that exceed \$3 per gallon; therefore, exact flight hour costs are unpredictable.

ICE’s ground transportation activities support alien pick-ups, transfers, and removals. Transportation network performance directly affects other ICE operational areas, including Custody Management, Field Operations, Enforcement, and Repatriation. ICE’s ground transportation network operates in a decentralized fashion, which allows field offices to control local transportation networks and assets. ICE only has four locally dedicated ground transportation contracts. All other transportation services are included as a component of the local detention services contract. Five field offices account for 54 percent of total ground transportation expenditures. They are: Los Angeles, San Francisco, San Antonio, San Diego, and Seattle field offices.

Unaccompanied Children

FY 2014 was a significant year in which ICE witnessed an influx of UCs and families from the countries of El Salvador, Guatemala, and Honduras through the Rio Grande Valley areas of Arizona and Texas – where more than three quarters of UC were apprehended. In response to the UC crisis, ICE successfully added two additional aircraft at the Brownsville, Texas operational hub.

During the year, TRP transferred 56,029 UCs from ICE custody to the custody of ORR, an increase of 145 percent over FY 2013 levels. Furthermore, ICE removed from the United States 1,901 UCs to their country of origin through the ICE Air Operations Division, and removed 406 families from ICE family residential facilities back to their countries of origin. Concurrently, as part of normal operations ICE removed a total of 315,943 aliens from the United States, 177,960 of which were convicted criminals. ICE performs many of these removals via its ICE Air Charter Operations support hubs in Miami, Florida; Alexandria, Louisiana; San Antonio and Brownsville, Texas; and Mesa, Arizona.

FY 2016 Planned Activities:

- Add three Assistant Attachés for Removals in Kenya, Morocco, and Brazil. These additions will enhance ICE’s ability remove high priority and other aliens, thus enhancing public safety and national security.
- Continue to refine methodologies to identify and prioritize nations who delay or who fail to cooperate in the timely return of their nationals and augment public safety, as delays in returning aliens to their countries of origin generate significant expenses to ICE due to increased detention stays. Further, ICE may be forced to release the alien from custody into the United States if unable to effect the removal.
- Implement results of ICE’s FY 2015 transportation study. The study will leverage private industry ground logistics transportation and delivery expertise to improve ICE’s transportation network.
- Initiate rolling site visits to field offices and sub-offices for Post-Order Custody Review (POCR) training and verification of POCR adherence. Verify ERO compliance with POCR, reasonable fear cases, the Witness Security Program and begin monitoring all deferred actions.

IV. Program Justification Changes

**Department of Homeland Security
U.S. Immigration and Customs Enforcement
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: OPLA Attorney Increase
PPA: Legal Proceedings
Program Increase: Positions 311, FTE 197, Dollars \$36,511

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							311	197	\$36,511
Total Request	1,272	1,182	\$205,584	1,272	1,218	\$214,731	311	197	\$36,511

Description of Item:

The \$36.511 million requested increase provides for 311¹¹ attorney positions that will prioritize the immigration court docket and reduce the backlog of both the detained and non-detained dockets.

Justification

OPLA requires additional attorney resources to meet its increasing workload driven by recent increases in the number of Department of Justice (DOJ) immigration judges (IJs) and in an effort to reduce the backlog of detained and non-detained cases pending in immigration court.

Currently, OPLA has 534 attorneys devoted to supporting immigration court. The additional requested resources will allow OPLA to complete an additional 132,486 matters, enabling the program to make a significant impact upon the current backlog of cases in immigration court and case processing times.

Impact on Performance (Relationship of Increase to Strategic Goals)

This funding request directly supports *Mission Goal 3.2: Prevent Unlawful Immigration*. Funding this request will enable ICE to meet its increasing workload driven by projected increases in the number of IJs and to address the current immigration court backlog. Further, this request will support the agency's goals of increasing criminal alien removals and reducing the average length of stay in detention. Specifically, and among other operational impacts, the additional funding will:

¹¹ Eighty-two of the 311 attorneys are estimated at full year cost.

- Allow OPLA to adequately respond to EOIR resource increases. Resources would enable OPLA to complete over 132,000 additional matters;
- Enhance the program's ability to support the federal prosecution of cases to include those initiated by ERO and HSI. Currently, OPLA attorneys assigned as Special Assistant U.S. Attorneys (SAUSAs) prosecute criminal immigration and customs cases in federal court. During FY 2014, ICE SAUSAs aided in securing almost over 1,600 criminal convictions. Additional resources would significantly increase OPLA's ability to expand its SAUSA cadre.

Absent the additional positions, OPLA would not be able to meet its current mission requirements to adequately staff immigration court, and to efficiently and effectively manage the existing docket and court backlog in cooperation with EOIR.

Department of Homeland Security
U.S. Immigration and Customs Enforcement
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Increased Adult Bed Capacity and Associated Transportation
PPA: DRO - Custody Operations, DRO - Transportation and Removal Program
Program Increase: Positions 0, FTE 0, Dollars \$132,080

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	\$132,080
Total Request	40	40	\$349,625	40	40	\$229,109	-	-	\$132,080

Description of Item:

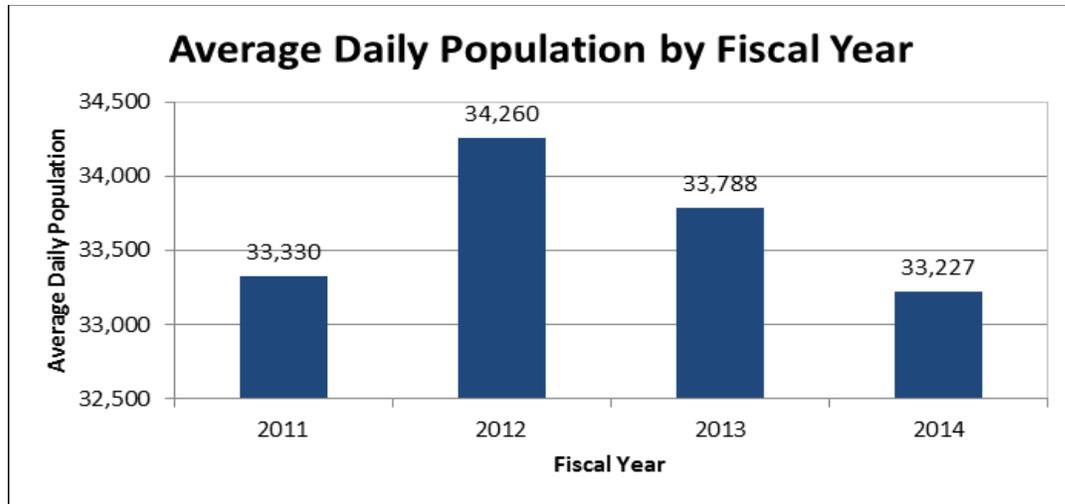

The FY 2016 request includes an increase of \$132.080 million between the Custody Operations and Transportation and Removal PPAs. The increase of 741 adult detention beds from the FY 2015 President’s Budget level of 30,539 to 31,280 involves an average increase of \$94.469 million for Custody Ops and \$37.611 million increase to TRP. The TRP program change includes increased transportation requirements related to family beds.

The FY 2016 request supports funding for 31,280 adult detention beds at a rate of \$123.54 per day. Of this amount, 28,910 beds will be funded by Custody Operations base appropriations, 819 funded by Breach Bond Detention Fund, and 1,551 funded by Immigration Inspection User Fees.

Justification:

Bed Increase

In FY 2014, ICE’s daily detention population consisted primarily of both convicted criminal aliens and recent border entrants subject to mandatory detention pursuant to the Immigration and Nationality Act (INA). The requested ADP increase is due in-part to the major swell of activity experienced at the Southwest Border of the U.S. towards the end of fiscal year 2014. This funding will be adequate to house adult detainee criminals and other mandatory and priority adult detainees. This ADP level will guarantee ICE’s capability to ensure public safety and national security while providing appropriate levels of detention based on case by case risk assessments. Individuals who are not suitable for detention may be released and supervised under the Alternatives to Detention (ATD) program.

Transportation Increase

ICE requests \$37.6 million to align the Transportation and Removal Program (TRP) with the Custody Operations Program and the FY 2016 provision of 34,040 adult and family unit detention beds required for optimal operations. In FY 2014, TRP spent 50 percent of its transportation funding on air charter operations and 33 percent on ground transportation costs. The additional funding will assist ICE in not only addressing transportation costs to transfer custody of unaccompanied alien children from ICE to the Office of Refugee Resettlement, but also to meet Agency Priority Goals dealing with the removal of criminal aliens.

In FY 2014, ICE removed 315,943 aliens from the United States, 177,960 of which were convicted criminals.

Impact on Performance (Relationship of Increase to Strategic Goals):

ICE's enforcement and removal policies will continue to prioritize enforcement on threats to national security, public safety, and border security. The intent of this increase is to allow an even greater focus in pursuit of those priorities while ensuring the most humane treatment of aliens in our custody and also ensuring we are good stewards of tax payer dollars. ICE will detain all aliens that fall within our priorities or are subject to mandatory detention by statute. This strategy will help ICE support efforts to meet its Agency Priority Goal of increasing the number of criminal aliens as a percentage of those who are removed from the United States.

The increase of \$37.611 million for assistance with general operational expenditures occurring within the TRP program will allow ICE to align its removal capability with Custody Operations detention capacity.

U.S. Immigration and Customs Enforcement
Salaries and Expenses
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 3: Family Bed Capacity Increase
PPA: DRO - Custody Operations
Program Increase: Positions 0, FTE 0, Dollars \$340,923

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	\$340,923
Total Request	-	-	-	-	-	-	-	-	\$340,923

Description of Item:

The FY 2016 request includes an increase of \$340.923 million for Custody Operations. This increase will fund an additional 2,660 family detention beds at an average rate of \$342.73 per day bringing the total to 2,760. Transportation increases related to this bed increase are included in Program Increase #2.

Justification:

Prior to FY 2014, ICE has one family residential center, located in Berks, Pennsylvania (100 beds). In FY 2014, an unprecedented number of adults with children crossed the Southwest Border, creating the need for additional capacity. ICE converted its facility in Karnes, Texas to house adults with children (500 bed capacity) and expanded capacity at Berks (188 bed capacity). In FY 2015 a family residential center was opened in Dilly, Texas (2,072 bed capacity). The requested funding will support 2,760 family detention beds at ICE's three family residential centers. While recent border crossers remain an ICE top priority, these family beds will ensure families are maintained under civil conditions. ICE policy will detain adults travelling with children who may be subject to expedited removal. If they are found to have credible fear, detained individuals will generally be released (under supervision) for the duration of their asylum hearing before an EOIR immigration judge.

Impact on Performance

ICE's enforcement and removal policies will continue to prioritize enforcement on threats to national security, public safety, and border security. ICE will detain all aliens that fall within our priorities or are subject to mandatory detention by statute. In FY 2016, ICE will be able to book 6,138 family members as compared to 2,152 in FY 2014.

This family ADP level will guarantee ICE's capability to ensure public safety and national security in a civil setting while providing appropriate levels of detention based on case by case risk assessments and allowing for unexpected contingencies.

Department of Homeland Security
U.S. Immigration and Customs Enforcement
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Increase 4: Unaccompanied Children Contingency Fund
PPA: DRO - Transportation and Removal Program
Program Increase: Positions 0, FTE 0, Dollars \$2,588

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	\$2,588
Total Request	-	-	-	-	-	-	-	-	\$2,588

Description of Item:

ICE requests \$27.6 million in FY 2016 as contingency funding for transportation costs related to unaccompanied children (UC) in excess of 2014 levels (58,000 for the entire fiscal year). The request will fund transportation costs for up to an additional 46,000 UC. Because of the low probability of such a high number of UC attempting to enter the United States in FY 2016, this budget scores the requested increase at \$2.588 million.

ICE is responsible for transporting UC to the Department of Health and Human Services' (HHS) Office Refugee Resettlement (ORR) facilities within 72 hours of their identification as a UC, as well as removal costs for UC ordered removed.

Justification:

In FY 2014, ICE experienced an influx of UCs from El Salvador, Guatemala, and Honduras through the Rio Grande Valley areas of Arizona and Texas – where more than three quarters of UC were apprehended. In response to this influx, ICE successfully added two additional aircraft at the Brownsville, Texas operational hub. During that year, TRP transferred 56,029 UCs from ICE custody to the custody of ORR, an increase of 145 percent over FY 2013 levels. Furthermore, ICE repatriated 1,901 UCs to their country of origin through the ICE Air Operations Division.

In FY 2014, ICE required a reprogramming of \$72.7 million to fund transportation costs of UC. The FY 2016 base request funds transportation for 58,000 UC. FY 2016 contingency funding would be made available to ICE TRP in increments of \$6.9 million if, at any time after January 1, 2016 and before October 31, 2016, the cumulative number of UC transferred to ORR exceeds the number of UC transferred through the comparable date in the previous fiscal year.

Impact on Performance (Relationship of Increase to Strategic Goals):

The increase to the TRP program of \$27.600 million will allow ICE to transfer UCs to ORR within the statutory required time frame of 72 hours. It will enable TRP to transfer up to 46,000 additional UC above the 58,000 included in the base funding. |

(Dollars in Thousands)

Program Increase 5: Alternatives to Detention Capacity Increase
PPA: DRO - Alternatives to Detention
Program Increase: Positions 0, FTE 0, Dollars \$30,839

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	\$30,839
Total Request	-	-	-	-	-	-	-	-	\$30,839

Description of Item

The FY 2016 request includes an increase of \$30.839 million to ATD to increase full-service capacity to accommodate aliens that would have otherwise been detained.

Justification

The requested increase is due in part to the major swell of activity experienced at the Southwest Border of the U.S. towards the end of fiscal year 2014. Specifically tens of thousands of individuals in family units surged across the southern border; in some cases, surrendering to the Border Patrol in hopes of escaping hardship and to rejoin family already in the U.S. This funding will provide the flexibility to allow additional ATD capacity to accommodate individuals in family units who are released from custody pursuant to ICE policy.

Impact on Performance

ICE's enforcement and removal policies will continue to prioritize enforcement on threats to national security, public safety, and border security. ICE will continue to detain all aliens that fall within our priorities or are subject to mandatory detention by statute, and put lower risk aliens in the ATD program. The proposed \$30.839 million will enable ATD to increase capacity by approximately 15,350 average daily participants leading to a total capacity of approximately 53,000 average daily participants.

ICE will achieve improved efficiency by increasing use of the ATD program by applying the most appropriate levels of case management and monitoring based on risk and compliance history.

ATD Average Daily Participant Levels							
Fiscal Year	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015 PB	FY 2016 PB

Program Increase 6: Enhance Human Smuggling and Trafficking Investigation Capacity
PPA: Domestic Investigations, International Investigations, Intelligence
Program Increase: Positions 0, FTE 28, Dollars \$25,600

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	28	\$25,600
Total Request	9,103	8,386	\$1,846,259	9,103	8,386	\$1,820,078	-	28	\$25,600

Description of Item

ICE requests \$25.6 million for human trafficking and smuggling investigations. Resources will be used to disrupt and dismantle transnational criminal organizations that engage in those activities, especially those that traffic or smuggle unaccompanied children and adults traveling with children as follows

Domestic Investigations

HSI would hire the following new personnel at a cost of approximately \$6.0 million:

- 20 Special Agents
- 04 Senior Special Agents
- 04 Investigative Support
- 03 Mission Support

HSI would direct \$4.6M towards the purchase of information and evidence expenses, travel in support of cases, court-ordered communications intercepts (Title III wiretaps), additional fuel costs, communication devices' tracking and other electronic surveillance equipment, analytical support and/or tools, and the purchase of other investigative related equipment.

International Investigations

HSI would use \$3.75M to conduct international criminal investigations at overseas assignments in Mexico, Panama, Guatemala, and El Salvador through the hiring of 7 Criminal Investigators (GS-1811 Special Agents).

HSI would direct \$1.8M towards expanding Transnational Criminal Investigative Units (TCIU) in Panama, Guatemala, and El Salvador. HSI relies on TCIUs composed of vetted and trained host-country law enforcement officers who have the authority to investigate and enforce violations of law in their respective countries. These units are essential in enabling HSI to dismantle, disrupt, and prosecute transnational criminal organizations abroad. The remaining \$4.45 million would be used for critical travel, training, and operational expenses for investigative agents working with counterparts to disrupt and dismantle the most prolific international criminal smuggling organizations.

Intelligence

HSI Intelligence would hire the following new personnel at a cost of approximately \$1.8M: 18 Intelligence Research Specialists

The remaining \$3.2 million in resources would be used for expanding the classified connectivity and other essential intelligence expenses, specifically at the National Targeting Center Human Smuggling Cell to gather and analyze intelligence as part of the International Community to target the most prolific human smuggling organizations.

Impact on Performance

Human Smuggling and Trafficking Investigations are in direct support of, and aligned with, DHS Strategic Goal 2.3: Disrupt Criminal Organizations as outlined in the Quadrennial Homeland Security Review (QHSR). ICE is directly responsible for identifying, disrupting and dismantling criminal and terrorist organizations as part of its core mission. The increases for fiscal year 2016 will allow ICE to address human smuggling and trafficking vulnerabilities through a holistic investigative approach leveraging criminal enforcement authorities as well as analytical capabilities unique to ICE. These increases will impact ICE-HSI's support to QHSR Goals 2.2 and 2.3 and are estimated to lead to up to approximately 3,240 additional criminal enforcement actions that result in a disruption or dismantlement – the strategic performance metric by which HSI is measured.

Department of Homeland Security
U.S. Immigration and Customs Enforcement
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Increase 7: Maintain Domestic Investigative Capacity
PPA: Domestic Investigations
Program Increase: Positions 0, FTE 135, Dollars \$78,873

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	135	\$78,873
Total Request	8,333	7,775	\$1,672,220	8,333	7,775	\$1,644,552	-	135	\$78,873

Description of Item

The FY 2016 request includes an increase of \$78.873 million allowing HSI Domestic to begin to enhance investigative capacity above the base. This increase will allow HSI to fill attrited and previously vacant positions that have remained unfilled and fund required operational general expenses.

Of the request, \$51 million will be used to hire 201 GS-1811 Special Agents and 69 investigative and mission support personnel. The remaining \$27.873 million will fund domestic investigative operations general expenses such as informants, under cover, and Title III operations.

Justification

Since FY 2010, ICE HSI Domestic has suffered a loss of over 500 Special Agents and 200 associated investigative and operational support personnel. These workforce losses occurred through the implementation of hiring freezes and limited hiring strategies needed to maintain adequate operational funding. Annually, ICE Domestic pursues more than 70,000 cases to disrupt and dismantle transnational criminal organizations threatening the national security and public safety of the United States. Since FY 2012, these resource reductions have resulted in an annual decrease of 1.5 percent in overall investigative hours. These additional resources, once fully onboard and trained will generate approximately 340,700 additional investigative hours of which: approximately 67 percent of those will be self-initiated hours that will target the most pernicious transnational criminal organizations and individuals.

Impact on Performance

With this funding, ICE will restore investigative capacity resulting in approximately 1,100 more investigations annually that will provide a commensurate increase in enforcement outcomes (arrests, seizures, convictions and indictments). These increases will support QHSR Goals 2.2 and 2.3 and may lead to increases in the percentage of significant transnational criminal investigations that result in a disruption or dismantlement.

Department of Homeland Security

(Dollars in Thousands)

Program Increase 8: Internal Cyber Remediation
PPA: Headquarters Managed IT Investment
Program Increase: Positions 0, FTE 0, Dollars \$13,253

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	\$13,253
Total Request	-	-	-	-	-	-	-	-	\$13,253

Description of Item:

The ICE Information Assurance Division (IAD) is a business unit within the Office of the Chief Information Officer (OCIO), which falls under the ICE M&A directorate. IAD ensures overall security of the technology and operational environment, including systems, user access, internal and external compliance, and security authorization of Information Technology (IT) systems. The IAD team protects the confidentiality, integrity, and availability of information by reducing the vulnerability of hardware and software systems to unauthorized access, malicious attack, and employee error. The Director of Information Assurance (IA) oversees the entire IT Security program in the following ways:

- Directing ICE’s Cyber Security Program to promote a security and resilience cyberspace;
- Establishing ICE security compliance policies, technical security solution guidance and a risk management strategy;
- Ensuring effective delivery of IAD projects and services;
- Ensuring security mandates are built into ICE IT systems and IT environment; and
- Monitoring and responding to current and emerging security threats.

Justification:

OCIO base funding in FY 2016 has been reallocated to resolve cybersecurity Plan of Action and Milestones (POA&Ms), upgrade network switches and workstations, replace an aging cybersecurity Security Information and Event Management (SIEM) system, and to deploy a series of cybersecurity Intrusion Prevention System (IPS) sensors. Upgrading these will greatly improve ICE IT Infrastructure’s cybersecurity posture, as well as, its efficiency and effectiveness. The SIEM enhancement and deploying IPS sensors to the DHS Enterprise Data Centers will significantly increase ICE’s ability to secure, detect, and respond to security incidents.

The addition of these two systems will help ICE meet FISMA and Continuous Diagnostic and Mitigation (CDM) requirements. Specifically, the SIEM and IPS will fulfill security control requirements to monitor and automatically respond to suspicious events and allow for analysis of network traffic anomalies. These upgrades and enhancements come with a slightly increased O&M cost. ICE has nearly 150 cybersecurity POA&Ms that require closure. The funding of these POA&Ms is critical to maintain a credible and certified environment.

The \$13.3 million POA&M remediation increase will be used to provide new security capabilities and enhance aging foundational security infrastructure capabilities. The remediation will focus on security enhancements needed to securely operate mission essential systems or those that have “high” Federal Information Processing Standard (FIPS) ratings. The funds will address vulnerabilities with audit log management, security configuration management, disaster recovery, web application testing, and strong authentication capabilities. This will cover solution development, implementation and personnel training. POA&M remediation funding will allow ICE to meet CDM automated tool requirements and address outstanding DHS Inspector General and financial audit findings.

These POA&Ms present a real threat to the data and systems that serve the ICE mission. ICE agents and officers rely on the confidentiality, integrity and availability of the data used on a daily basis. The systems and data that protect ICE employee and contractor SPII must be as secure as possible so ICE does not jeopardize their lives and livelihoods. ICE needs to close out findings related to DHS Inspector General Reports, General Accounting Office reviews, and annual financial audit assessments. There are open findings from each of these entities that have funding requirements in order to resolve the POAMs. ICE will use the requested funding to close its highest-risk cybersecurity gaps and other known vulnerabilities by adopting enterprise solutions such as implementation of a robust department-wide identity, credential, and access management program will remediate system access control-oriented vulnerabilities identified in multiple component systems, creating efficiencies.

Impact on Performance (Relationship of Increase to Strategic Goals):

Funding this program will allow program managers to direct an appropriate level of human and financial capital to “Create a Safe, Secure, and Resilient Cyber Environment.” By providing the full funding, ICE will be closer to meeting the DHS Strategic Goal 4.1. ICE is striving to help DHS meet this goal by protecting the data, missions and personnel that serve the ICE mission.

The security of its systems and data provide confidence for law enforcement and legal actions, such that this confidence could not be questioned in a court of law. By funding the POA&M remediation, the networks and systems of ICE will remain eliminate real threats from internal and external malicious persons, entities, and nation-states.

ICE is required to have sound and reliable financial information, as part of its annual financial assessment. The funding requested would be used to resolve several of the financial findings from previous years’ assessments.

ICE is charged with the responsibility of protecting ICE employees and contractor information. ICE roughly has 25,000 employees and contractor and each individual has their sensitive personally identifiable information (SPII) stored on ICE systems. The SPII data is the identity and “lifblood” for

each individual. The loss or compromise of this data puts each individual at risk; identity theft, financial exploitation, background check, credit unworthiness, etc. Additional funding will allow ICE to meet Goal 4.1 of protecting its own employees and contractors. The POAM funding will directly address the systems and networks that protect and safeguard this information. In summary, to maintain the appropriate level of security within the ICE infrastructure, as mandated by Federal regulations, POA&M remediation funding must be provided.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of immigration and customs laws, detention and removals, and investigations, including intellectual property rights and overseas vetted units operations; and purchase and lease of up to 3,790 (2,350 for replacement only) police-type vehicles; [\$4,988,065,000] **\$5,878,549,000**; of which not to exceed \$10,000,000 shall be available until expended for conducting special operations under section 3131 of the Customs Enforcement Act of 1986 (19 U.S.C. 2081); of which not to exceed \$11,475 shall be for official reception and representation expenses; of which not to exceed \$2,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security; of which not less than \$305,000 shall be for promotion of public awareness activities related to countering child exploitation; of which not less than \$5,400,000 shall be used to facilitate agreements consistent with section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)); of which not to exceed \$40,000,000 shall remain available until September 30, [2017] **2018** for maintenance, construction and lease hold improvements at owned and leased facilities; and of which not to exceed \$11,216,000 shall be available to fund or reimburse other Federal agencies for the costs associated with the care, maintenance, and repatriation of smuggled aliens unlawfully present in the United States: *Provided*, That none of the funds made available under this heading shall be available to compensate any employee for overtime in an annual amount in excess of \$35,000, except that the Secretary of Homeland Security, or the designee of the Secretary, may waive that amount as necessary for national security purposes and in cases of immigration emergencies: *Provided further*, That of the total amount provided, \$15,770,000 shall be for activities to enforce laws against forced child labor, of which not to exceed \$6,000,000 shall remain available until expended: *Provided further*, That of the total amount available, not less than \$1,600,000,000 shall be available to identify aliens convicted of a crime who may be deportable, and to remove them from the United States once they are judged deportable: *Provided further*, That the Secretary of Homeland Security shall prioritize the identification and removal of aliens convicted of a crime by the severity of that crime: *Provided further*, That of the total amount provided, not less than [\$2,569,126,000] **\$3,303,082,000** is for enforcement and removal operations, including transportation of unaccompanied minor aliens, of which \$45,000,000 shall remain available for ICE custody operations until September 30, [2019] **2020**: *Provided further, That, at any point after January 1, 2016, and before October 1, 2016, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of unaccompanied children transferred to the custody of the Secretary of Health and Human Services for the current fiscal year exceeds the number transferred through the comparable date in the previous fiscal year an additional \$6,900,000 shall be available under this heading: Provided further, That, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of such children transferred exceeds 120 percent of the number transferred through the comparable date, \$6,900,000 shall be available in addition to the amount made available in the previous proviso: Provided further, That, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of such children transferred exceeds 140 percent of the number transferred through the comparable date, \$6,900,000 shall be available in*

addition to the amounts made available in the previous two provisos: Provided further, That, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of such children transferred exceeds 160 percent of the number transferred through the comparable date, \$6,900,000 shall be available in addition to the amounts made available in the previous three provisos: Provided further, That amounts made available under any of the previous four provisos may be transferred to any other appropriation: Provided further, That the transfer authority in the previous proviso is in addition to any other transfer authority provided by law: Provided further, That of the total amount provided, \$10,300,000 shall remain available until September 30, [2016] 2017, for the Visa Security Program: Provided further, That not less than \$10,000,000 shall be available for investigation of intellectual property rights violations, including the National Intellectual Property Rights Coordination Center: Provided further, That none of the funds provided under this heading may be used to continue a delegation of law enforcement authority authorized under section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)) if the Department of Homeland Security Inspector General determines that the terms of the agreement governing the delegation of authority have been violated: Provided further, That none of the funds provided under this heading may be used to continue any contract for the provision of detention services if the two most recent overall performance evaluations received by the contracted facility are less than “adequate” or the equivalent median score in any subsequent performance evaluation system: Provided further, That nothing under this heading shall prevent U.S. Immigration and Customs Enforcement from exercising those authorities provided under immigration laws (as defined in section 101(a)(17) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(17))) during priority operations pertaining to aliens convicted of a crime: Provided further; That without regard to the limitation as to time and condition of section 503(d) of this Act, the Secretary may propose to reprogram and transfer funds within and into this appropriation necessary to ensure the detention of aliens prioritized for removal.

Language Provision	Explanation
1 [\$4,988,065,000] \$5,878,549,000	Dollar change only. No substantial change proposed.
2 [2017] 2018	Year change only. No substantial change proposed.
3 [\$2,569,126,000] \$3,303,082,000	Dollar change only. No substantial change proposed.
4 [2019] 2020	Year change only. No substantial change proposed.
<p>5 <i>Provided further, That, at any point after January 1, 2016, and before October 1, 2016, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of unaccompanied children transferred to the custody of the Secretary of Health and Human Services for the current fiscal year exceeds the number transferred through the comparable date in the previous fiscal year an additional \$6,900,000 shall be available under this heading: Provided further, That, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of such children transferred exceeds 120 percent of the number transferred through the comparable date, \$6,900,000 shall be available in addition to the amount made available in the previous proviso: Provided further, That, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of such children transferred exceeds 140 percent of the number transferred through the comparable date, \$6,900,000 shall be available in addition to the amounts made available in the previous two provisos: Provided further, That, if</i></p>	<p>Provides authority for contingency funding for transportation costs associated with unaccompanied children (UC). The funding only becomes available after the number of UC exceeds the designated trigger amounts during the fiscal year.</p>

<p><i>the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of such children transferred exceeds 160 percent of the number transferred through the comparable date, \$6,900,000 shall be available in addition to the amounts made available in the previous three provisos: Provided further, That amounts made available under any of the previous four provisos may be transferred to any other appropriation: Provided further, That the transfer authority in the previous proviso is in addition to any other transfer authority provided by law:</i></p>

Personnel Compensation and Benefits, Service, and Other Costs Mission Statement

ICE Management and Administration (M&A) resources provide for top-level agency-wide management in the following areas: the Offices of the Assistant Secretary, Professional Responsibility, Chief Financial Officer, and Acquisition Management. The M&A activities include executive and overall leadership direction, strategic planning, policy development, and administrative support for the human, financial, information, and physical resources required to facilitate the operational capabilities of a productive ICE workforce.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$102,634	\$104,209	\$101,938	\$(2,271)
11.3 Other than Full-Time Permanent	\$1,433	\$946	\$1,470	\$524
11.5 Other Personnel Compensation	\$8,947	\$7,157	\$7,262	\$105
12.1 Civilian Personnel Benefits	\$36,805	\$40,440	\$43,300	\$2,860
Total, Salaries & Benefits	\$149,819	\$152,752	\$153,970	\$1,218

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary, or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits include life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, retirement, retention and other incentives.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$1,178	\$1,627	\$2,397	\$770

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
22.0 Transportation of Things	\$49	\$151	\$249	\$98

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$11,472	\$7,533	\$6,743	(\$790)

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.2 Rental Payments to Others	\$224	\$97	\$285	\$188

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$2,522	\$2,066	\$3,205	\$1,139

Communication, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
24.0 Printing and Reproduction	\$0	\$15	\$0	(\$15)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$14,122	\$10,919	\$8,403	(\$2,516)

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$1,260	\$6,424	\$4,081	(\$2,343)

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$2,166	\$9,886	\$6,885	(\$3,001)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.4 Operation and Maintenance of Facilities	\$3,227	\$1,353	\$3,803	\$2,450

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal government account.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.6 Medical Care	\$0	\$2	\$4	\$2

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$2,335	\$1,648	\$2,221	\$573

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal government account.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$958	\$1,315	\$598	(\$717)

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$800	\$1,211	\$1,887	\$676

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
32.0 Land and Structures	\$1,048	\$1,571	\$904	(\$667)

Land and Structures includes the costs for land and interests in land; buildings and other structures; roads; additions to buildings; nonstructural (or resource) improvements, such as fences and landscaping; and fixed equipment additions and replacements.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
42.0 Insurance Claims and Indemnities	\$708	\$2	\$255	\$253

Indemnity includes insurance claims and benefit payments from the social insurance and Federal retirement trust funds, and payments for losses and claims including those under the Equal Access to Justice Act.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
91.0 Unvouchered	\$0	\$0	\$60	\$60

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement to informants, which are not subject to detailed vouchering or reporting.

Headquarters Managed IT Investment Mission Statement

The ICE Office of the Chief Information Officer (OCIO) provides information technology services and products that enable ICE and DHS to meet their mission. The OCIO is committed to providing excellent and efficient service to customers in order to fulfill their IT needs. In order to meet these goals, the OCIO has developed a number of critical IT initiatives that will help ICE to modernize its IT systems, adapt and conform to modern IT management disciplines, as well as provide IT solutions throughout ICE.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change

International Investigations Mission Statement

The Office of International Affairs (OIA) includes offices in 49 countries. International Investigations represents the international assets of all ICE programs and collaborates with U.S. Citizenship and Immigration Services, U.S. Customs and Border Protection, and other DHS components. OIA liaises with foreign governments and international partners to facilitate the enforcement of U.S. customs and immigration laws beyond our borders in an effort to interdict criminals and prevent or disrupt criminal activity.

Visa Security Program Mission Statement

The Visa Security Program (VSP) represents ICE's front line in protecting the United States against terrorist and criminal organizations. VSP enhances the security of visa issuance at high-risk overseas posts by deploying trained special agents to identify and investigate potential terrorist and criminal threats before they reach the United States and interdicting those who would exploit the legal visa process.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$8,292	\$8,350	\$7,980	\$(370)
11.3 Other than Full-Time Permanent	\$28	\$28	\$361	\$333
11.5 Other Personnel Compensation	\$1,786	\$1,799	\$1,380	\$(419)

Intelligence Mission Statement

The Office of Intelligence focuses on data and information related to the movement of people, money, and materials into, within, and out of the United States to provide accurate and timely reporting to ICE leadership and field agents in support of enforcement operations. ICE's intelligence functions are managed by a highly trained team of professionals with expertise in data and threat analysis, languages, financial investigations, counterterrorism and a number of other areas. ICE intelligence professionals process information from a variety of sources to provide assessments of patterns, trends, and new developments in a wide range of law enforcement areas. These include the following areas: terrorism, human smuggling and trafficking, money laundering and financial crimes, drug smuggling, cyber crimes, identity and document fraud, and arms trafficking.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change

DRO - Custody Operations Mission Statement

Immigration enforcement authorities apprehend potentially removable aliens. In many cases, these aliens must be detained while they go through immigration proceedings and until they are removed. Often the number of apprehensions exceeds the detention space available and ICE Enforcement and Removal Operations must prioritize which cases will be detained. Custody Operations provides safe, secure, and human confinement for these aliens. It also ensures that aliens in ICE custody appear for their immigration hearings, and then for their subsequent removal.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$381,954	\$388,707	\$409,669	\$20,962
11.3 Other than Full-Time Permanent	\$980	\$690	\$1,545	\$855
11.5 Other Personnel Compensation	\$103,756	\$103,387	\$92,178	\$(11,209)
11.8 Special Personal Services Payments	\$825	\$500	\$891	\$391
12.1 Civilian Personnel Benefits	\$200,743	\$214,559	\$208,653	\$(5,906)
Total, Salaries & Benefits	\$688,258	\$707,843	\$712,936	\$5,093

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary, or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits include life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, retirement, retention and other incentives.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$27,742	\$13,216	\$21,387	\$8,171

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
22.0 Transportation of Things	\$1,794	\$1,241	\$1,806	\$565

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$90,827	\$54,087	\$78,258	\$24,171

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.2 Rental Payments to Others	\$1,406	\$218	\$758	\$540

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$21,956	\$17,163	\$21,852	\$4,689

Communication, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
24.0 Printing and Reproduction	\$1	\$3	\$41	\$38

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$30,979	\$21,396	\$27,923	\$6,527

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$42,270	\$50,591	\$50,657	\$66

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$10,226	\$6,981	\$13,201	\$6,220

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.4 Operation and Maintenance of Facilities	\$1,131,369	\$751,938	\$1,263,017	\$511,079

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal government account.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.6 Medical Care	\$150,348	\$123,992	\$153,000	\$29,008

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$15,996	\$9,709	\$15,101	\$5,392

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal government account.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.8 Subsistence & Support of Persons	\$135	\$1,200	\$3,114	\$1,914

Subsistence and Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$26,548	\$24,901	\$32,462	\$7,561

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$6,280	\$4,340	\$4,727	\$387

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
32.0 Land and Structures	\$1,168	\$1,440	\$2,857	\$1,417

Land and Structures includes the costs for land and interests in land; buildings and other structures; roads; additions to buildings; nonstructural (or resource) improvements, such as fences and landscaping; and fixed equipment additions and replacements.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
42.0 Insurance Claims and Indemnities	\$7,567	\$1,654	\$3,647	\$1,993

Indemnity includes insurance claims and benefit payments from the social insurance and Federal retirement trust funds, and payments for losses and claims including those under the Equal Access to Justice Act.

DRO - Criminal Alien Program Mission Statement

The Criminal Alien Program (CAP) ensures that aliens are not released back into the community before they are removed from the United States. Through the CAP, ICE officers interview incarcerated aliens to determine whether they are amenable to immigration proceedings. If a case receives a final order of removal, ICE officers will immediately take that alien into custody upon completion of his or her criminal sentence and then prepare that case for removal.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$107,517	\$107,162	\$112,491	\$5,329
11.3 Other than Full-Time Permanent	\$114	\$53	\$209	\$156

DRO - Alternatives to Detention Mission Statement

The Alternatives to Detention program places low-risk aliens under various forms of intensive supervision rather than traditional detention as a cost-effective way to ensure their appearance for an immigration hearing or for removal. This program lowers the risk that aliens will be fugitives.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$14,212	\$13,203	\$16,190	\$2,987
11.3 Other than Full-Time Permanent	\$72	\$59	\$109	\$50

Comprehensive Identification and Removal of Criminal Aliens Mission Statement

Secure Communities, also known as the Comprehensive Identification and Removal of Criminal Aliens, is a comprehensive plan to improve community safety by transforming the way the Federal Government cooperates with state and local law enforcement agencies to identify, detain, and remove all criminal aliens held in custody.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$4,192	-	-	-
11.5 Other Personnel Compensation	\$231	-	-	-
12.1 Civilian Personnel Benefits	\$1,399	-	-	-
Total, Salaries & Benefits	\$5,822	-	-	-

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary, or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits include life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, retirement, retention and other incentives.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to section 736 of Division D of the Omnibus Appropriations Act, 2009, P.L. 111-8, the Department is required to issue guidelines to DHS component agencies to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce – both contracted and federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking. The results of Tier 1 contract review are listed below. The results of the lower-priority contracts will post-date this budget submission and will be included in the FY 2015 budget.

ICE requests \$0.0 and 0 FTE for the FY 2016 DHS Balanced Workforce Strategy.

Position Type	FY 2014 Revised Enacted		FY 2015 Base		FY 2016 Annualization		FY 2016 Follow On		FY 2016 Increase		TOTAL FY 2015 – FY 2016 DHS Balanced Workforce Strategy	
	Pos.	FTE	Pos.	FTE	Pos.	FTE	Pos	FTE	Pos.	FTE	Pos	FTE
Total	-	-	-	-	-	-	-	-	-	-	-	-

Note: The above-referenced figures reflect that at this time, ICE has no confirmed requirement to establish new FTE above current staffing levels as a result of Balanced Workforce Strategy analyses that have been completed. As ongoing and future Balanced Workforce Strategy analyses are completed, the requirements for new FTE/positions performing work in FY 2013 will be adjusted accordingly.

FY 2016 DHS Balanced Workforce Strategy

In FY 2016, ICE is not requesting any additional funding to hire Federal employees associated with the Balanced Workforce Strategy (BWS) Program. BWS hiring decisions were coordinated to be achieved within ICE’s reduced spend plans. Specific timelines for Federal employees to enter on duty and contracts to end are made on a case-by-case basis balancing operational needs, fiscal resources, and contracting constraints. ICE has executed its roll-off/roll-on strategy to avoid contractor/federal staff overlap.

Termination and reduction-based cost avoidance has been achieved on many of the contracts that ICE BWS has reviewed and directly contributes to the spending reduction goals necessary for ICE to meet affordability and cost reduction targets. ICE has implemented a comprehensive, strategic approach to focus on areas of over-investment and redundant functions and used the BWS process to downsize and balance our workforce to achieve affordability and efficiency goals.

L. Schedule of Service Wide Costs by Program/Project Activity

Program/Project Activity	SWC			Change from FY 2015
	FY 2014 Actuals	FY 2015	FY 2016

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement Automation Modernization

I. Appropriation Overview

A. Mission Statement for Automation Modernization:

The U.S. Immigration and Customs Enforcement (ICE) Automation Modernization account allows ICE to improve information sharing with the Department of Homeland Security (DHS) and other partner organizations. These initiatives strengthen information availability, improve case management capability, and enhance financial management and audit practices across ICE.

B. Budget Activities:

TECS Modernization

ICE and U.S. Customs & Border Protection (CBP) components are undertaking an effort to modernize the legacy TECS mainframe system. More than 6,200 ICE Special Agents work on investigating a wide range of domestic and international activities arising from the illegal movement of people and goods into, within and out of the United States. The modernized system will provide ICE agents improved functionality to conduct case management activities and increased flexibility to meet evolving mission needs. The modernized system will incorporate new technologies and provide agents with key features such as: enhanced user interface and search capabilities, improved data quality and integration, agent case dashboards, linking of subject records, conducting structured and unstructured searches, improved oversight tools for supervisors, and enhanced interfaces for information sharing.

CIFS

The CIFS initiative will allow ICE to replace its legacy core financial system by acquiring financial management services from a Shared Service Provider (SSP). This initiative will assist ICE in achieving and sustaining unqualified financial audit opinions and performing effective financial management.

IODS

IODS is a new initiative that will provide integration of search, analysis and reporting tools.

ICE Technical Refresh

The technical refresh funding will allow ICE to replace 140 network switches, 5,400 workstations, 140 file and print servers, refresh the Security Information and Event Management (SIEM) system, as well as procure two Intrusion Prevention System (IPS) sensors

ICE Tactical Communication Program

ICE's TACCOM technology foundation maximizes workforce productivity by providing expanded coverage and improved mobile command and control, and improves information sharing between ICE and U.S. Customs and Border Protection (CBP).

C. Budget Request Summary:

In FY 2016, ICE requests \$73.5 million for Automation Modernization to improve information sharing with the Department of Homeland Security (DHS) and other partner organizations:

- **TECS Modernization Project.....\$21.5M (0 FTE)**
The TECS Modernization solution will be the only system to provide case management functionality specific to the ICE mission once CBP discontinues its use of the legacy TECS system. The improved and updated case management system will enable users to: acquire and manage law enforcement and criminal justice information on subjects of interest (i.e., people, organizations, etc.) in association with investigations, legal proceedings, and intelligence efforts; share law enforcement information with federal, state, local, tribal, and international law enforcement agencies; support the management of investigative and intelligence activities and assess the strategic and tactical immigration and customs law enforcement environment. The ICE TECS Modernization Initial Operating Capability (IOC) Objective date is September 2015 and Threshold date is March 2016. The Full Operating Capability date (FOC) Objective date is March 2017 and Threshold date is September 2017. The program is currently on schedule to deliver within its IOC Acquisition Program Baseline (APB) dates.
- **Consolidated ICE Financial Solutions (CIFS).....\$5M (0 FTE)**
This initiative will allow ICE to make progress toward replacing the legacy core financial system that it owns and operates by acquiring financial management services from a Shared Service Provider (SSP). The SSP ICE selects will host and operate the core financial system for ICE and its customers. The requested funding will enable ICE's PMO to oversee efforts associated with the transition to the SSP(s). ICE will also support a solution for storing all financial management transaction data for ICE and DHS customer components in a non-proprietary repository to support reporting and migration. During FY 2016, ICE will support customer component migrations to an SSP, while preparing for its own migration anticipated in FY 2017 and FY 2018.
- **ICE Operational Data Store Initiative (IODS).....\$6.5M (0 FTE)**
IODS is a new initiative that will provide integration of search, analysis and reporting tools. Currently data is spread out in disparate IT systems and data stores, which hinders ICE's ability to obtain and analyze the high-quality data it needs from across the agency to: support strategic and other management-level decisions in areas such as budgeting, resource allocation, and enforcement prioritization; satisfy internal and external reporting requirements; and identify leads, associations, and trends in support of law enforcement investigations and intelligence activities.

- **ICE Technical Refresh.....\$22M (0 FTE)**
 The technical refresh funding will allow ICE to replace 140 network switches, 5,400 workstations, 140 file and print servers, refresh the Security Information and Event Management (SIEM) system, as well as procure two Intrusion Prevention System (IPS) sensors. ICE last received Atlas Program technical refresh funds in FY 2011. Systems that have not been refreshed in the last three to five years require complete replacement. The current SIEM is nearing end of life and replacing it with a new robust system will address 80% of the Security Operation Center’s (SOC) priority technical requirements.
- **ICE Tactical Communication Program (TACCOM).....\$18.5M (0 FTE)**
 ICE's TACCOM technology foundation maximizes workforce productivity by providing expanded coverage and improved mobile command and control, and improves information sharing between ICE and U.S. Customs and Border Protection (CBP). The Program is charged with delivering TACCOM products and services that provide 24x7x365 systems availability that enable ICE and the Department of Homeland Security (DHS) to achieve their missions. The funding requested will be used to modernize and upgrade infrastructure nationwide including GPS technology, upgrade the Core/Hub, and fund Thin Client – a system of network computers that share computation needs by using the resources of one server.

FY 2016 Total Request	-	-	\$73,500
Total Change 2015 to 2016	-	-	\$47,500

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2016, ICE requests \$73.5 million for Automation Modernization to improve information sharing with the Department of Homeland Security (DHS) and other partner organizations.

The Automation Modernization initiatives strengthen law enforcement information availability, enhance financial management and audit practices across ICE, and improve case management capability.

The FY 2016 request reflects an increase of \$38.6 million from the FY 2014 Revised Enacted amount and an increase of \$47.5 million from the FY 2015 President's Budget. The FY 2016 request includes a \$26 million reduction for the termination of prior-year Automation funding and a \$73.5 million increase for TECS Modernization, Consolidated ICE Financial Solution (CIFS), ICE Operational Data Store (IODS), Technical Refresh, and Tactical Communication (TACCOM).

Program Description

In FY 2016, ICE will fund five Automation Modernization initiatives.

ICE TECS Modernization

The ICE TECS Modernization program is a multiyear program to modernize legacy TECS case management functionality. It will deliver the primary investigative case management tool for ICE special agents. The current legacy TECS system is supported by technology that is aging, costly, and difficult to sustain, especially due to the limited availability of subject matter experts for ongoing

support. This program supports ICE's mission of serving as the primary investigative arm of DHS, as well as creating a law enforcement and criminal justice information sharing environment among federal, state, local, tribal, and international Law Enforcement Agencies (LEAs). More than 6,200 ICE special agents work on investigating a wide range of domestic and international activities arising from the illegal movement of people and goods into, within, and out of the United States, grouped into multiple case management areas.

ICE requires a modernized system that delivers the following capabilities:

- Acquire and manage law enforcement and criminal justice information on subjects of interest (i.e., people, organizations, etc.) in association with investigations, legal proceedings, and intelligence efforts;
- Share law enforcement information with federal, state, local, tribal, and international law enforcement agencies;
Support the management of investigative and intelligence activities and assess the strategic and tactical immigration and customs law enforcement environment.

Consolidated ICE Financial Solution (CIFS)

The CIFS initiative will position ICE to replace its legacy core financial system by developing a non-proprietary data repository containing financial management data for storing current and historical data to be used for data migration and reporting. This will assist ICE and five DHS component customers in migrating to a Shared Service Provider (SSP) by providing enhanced access to financial management data. The data repository will be multi-purpose and can be utilized for analysis and decision making, historical recordkeeping, as well as the source for migration to an SSP. It is critical that the financial data currently stored in the legacy proprietary solution be extracted into this non-proprietary repository in order to provide ICE and DHS components with unfettered access to their financial information. The requested funding will allow ICE to complete the initial development and implementation of the data repository so ICE and 5 DHS component customers can openly compete contracts to support these data analytics and migration activities rather than relying on a sole source vendor.

The 5 DHS customer components are planning migrations in FY16-FY18. Through this modernization effort, ICE will have greater control over current and legacy data and will be better equipped to meet reporting and data analytic requirements for internal and external customers. As a result, ICE is able to support the phased migrations of data to SSPs.

The ultimate goal of ICE and customers moving to an SSP will allow DHS components to share costs with a larger pool of users and also meet OMB guidance for federal agencies regarding acquisition of core financial systems. For this request, ICE will be supporting development and data analysis activities for ICE and the 5 DHS components ICE services.

ICE Operational Data Store (IODS)

The ICE Operational Data Store (IODS) will establish the technical standards, performance characteristics, governance structure, and system components that will promote access to ICE enterprise data. The program will facilitate the reduction of duplicative data sets and will standardize

the way data is accessed by end-user applications for reporting, search and analysis. This will allow ICE users – both law enforcement and administrative – to have accurate, up-to-date data available for their critical missions areas. The IODS will allow ICE to create an environment that allows for better data management and a more centralized method to capture data changes across ICE’s transactional data sets.

Tactical Communications (TACCOM)

The Tactical Communications (TACCOM) Program supports ICE agents and officers through the use of tactical communications equipment and systems on a daily basis to perform their primary duties to prevent, protect against, respond to, and recover from incidents, investigations, and operations. TACCOM supports ICE’s mission by resolving existing mission deficiencies in tactical communications with the timely delivery of mission-critical tactical communications capabilities in direct support of the ICE mission, goals, objectives, and programs.

Technical Refresh

The ICE IT Infrastructure Technical Refresh initiative builds upon AM projects previously identified and funded under the ICE Atlas Program’s Atlas IT Infrastructure (AITI), Cyber Security Modernization (CSM), and Data Center Migration (DCM) projects. The ICE Atlas Program last received AM funding in FY2011. All systems delivered by Atlas have been transitioned to the ICE IT Infrastructure Program for sustainment. Technical Refresh of systems reaching their end of life is required. Additionally, there are IT infrastructure needs, such as virtualization, that have not been previously addressed and require attention.

FY 2016 Planned Activities

TECS Modernization

The ICE TECS Modernization program requests \$21.5 million in FY 2016 to make the following improvements to its program:

- Enhance user interface and search capabilities;
- Improve data quality and integration;
- Intuitive user interface to ease transition and allow more efficient training of new agents;
- Improve collaboration between agents and supervisors;
- Improve accuracy and management of statistics
- Improve interoperability with other systems; and
- Align to DHS/ICE architecture standards for long-term sustainability, reduced support costs, and flexibility to quickly meet evolving mission needs
- Work on scalable platform allowing for the system to change as business needs change
- Develop enhanced interfaces through which agents can access critical data from internal and external partners in support of investigations

CIFS

The CIFS Program Management Office (PMO) requests \$5 million in FY 2016 to:

- Manage the project scope, schedule, cost, performance, and quality of the program.
- Have oversight for stakeholder management for DHS components serviced by ICE during the migration to the SSP.
- Establish key performance indicators (milestone); lifecycle cost management; risk management; schedule management, and management of the ICE customer migrations.
- Migrate current transactional data to the new solution
- Execute the storage of historical transactions in order to fully retire its legacy system.
- Support the data analysis and cleanup activities to support this effort. The data repository will be critical to ICE to support internal and external reporting and audit requirements for historical data and provide efficiencies for operations during the interim period prior to migration.
- Migrate current transactional data to the data repository for reporting and migration to an SSP.
- Support the storage of historical transactions in order to fully retire its legacy system.

IODS

The ICE Operational Data Store (IODS) program requests \$6.5 million in FY 2016 to:

- Create and maintain data architecture, data interface and data management documentation for all major ICE systems.
- Support program management team to deploy IODS.
- Purchase software licenses that will assist with system functionality, development, deployment, and data synthesis for test and evaluation.
- Purchase hardware necessary for system development and production environments.
- Purchase servers that will include database and client servers for data backup.
- Manage hosting of the IODS for both cloud and physical hosting.

TACCOM

The Tactical Communications (TACCOM) program requests \$18.5 million in FY 2016 to:

- Modernize TACCOM systems in the San Francisco Region for approximately 15-35 sites to include engineering, design, site acquisition, installation, optimization, integration, and testing.
- Implement GPS mapping to include installation and optimization of application software, and LTE data pilot.
- Upgrade Core/Hubs tactical communication equipment to provide increased interoperability and sharing between ICE and CBP.
- Deploy Thin Client technology, which will act as a significant force multiplier to enhance the operational effectiveness and efficiency of Law Enforcement Officers (LEOs) in the field. Since the Thin Client equipment is mobile and wireless, they will enable ICE to have mobile command and control, and increased time in the field on operations.

Technical Refresh

The ICE IT Infrastructure Technical Refresh initiative requests \$22 million in FY 2016 to:

- Deploy and set up of 170 network switches
- Deploy and set up of 6,000 workstations
- Deploy and set up of 180 file and print servers
- Refresh of Security Information and Event Management (SIEM) system
- Procure two Intrusion Prevention System (IPS) sensors.

Deployment of these switches, workstations and servers will help ICE to modernize application hosting in the DHS Enterprise Data Centers to facilitate virtualization.

	FY 2016	FY 2017	FY 2018	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024
Investment (AM Funds)	\$21,500	\$21,000	\$23,000	\$0	\$0	\$0	\$0	\$0	\$0
O&M	\$0	\$5,431	\$3,462	\$21,781	\$22,405	\$23,112	\$23,735	\$24,379	\$25,042
GFTE	\$5,096	\$5,193	\$5,291	\$2,833	\$2,887	\$2,917	\$2,989	\$3,062	\$3,139

ICE requires a modernized system that delivers the following capabilities to more effectively support its mission:

- Acquire and manage law enforcement and criminal justice information on subjects of interest (i.e., people, organizations, etc.) in association with investigations, legal proceedings, and intelligence efforts;
- Share law enforcement information with federal, state, local, tribal, and international law enforcement agencies;
- Support the management of investigative and intelligence activities and assess the strategic and tactical immigration and customs law enforcement environment.

Impact on Performance (Relationship of Increase to Strategic Goals):

The ICE TECS Modernization program will provide improved case management functionality to more than 6,700 ICE Special Agents, assigned to more than 200 cities throughout the United States and in 48 countries around the world. ICE investigations cover a broad range of areas including national security threats, financial and smuggling violations (including illegal arms exports), financial crimes, commercial fraud, human trafficking, narcotics smuggling, child pornography/exploitation and immigration fraud. The TECS Modernization solution will be the only system to provide case management functionality specific to the ICE mission once CBP discontinues its use of the legacy TECS system.

ICE's case management data is currently maintained in a 20+ year old stand-alone CBP/ICE shared legacy system. The limitations of the system hinder ICE's ability to efficiently collect, record, and maintain investigative cases. The modernized TECS system will enable Special Agents to obtain information through modern technology, which will improve the creation, management and oversight of investigative cases at ICE. The modernized system will help DHS better manage its growing investigative workloads in an environment encumbered by constrained resources. It will reduce the amount of time spent by law enforcement personnel on repetitive, manual data management tasks to focus on more thorough and intensive field investigations of criminal activity and terrorist threats. It will give investigators the capability to quickly identify relationships among subjects identified in criminal and administrative cases, trade records, visitor and immigration records, and internal and external intelligence information. It will also strengthen and unify DHS operations and management capabilities by increasing interoperability among agencies, and improve the tools available and data relied upon to support operations, resource utilization and management decision making.

TECS Modernization functional improvements will include:

- Enhanced user interface to provide personalized homepages, case dashboards, streamlined processes and simplified user interactions
- Enhanced search capabilities through structured and unstructured queries
- Improved data quality and integration through auto population of data between systems and removing duplicate data entry
- More intuitive user interface allowing ease of transition and more efficient training of new agents

- Improved collaboration between agents and supervisors through enhanced workflow capabilities such as track changes
- Improved accuracy and management of statistics

Additional technical improvements will include:

- Improved interoperability with other systems
- Alignment to DHS/ICE architecture standards for long-term sustainability, reduced support costs, and flexibility to quickly meet evolving mission needs
- Enhanced accessibility to people with disabilities
- Scalable platform allowing for system to change as business needs change
- Enhanced interfaces through which agents can access critical data from internal and external partners in support of investigations

The priority of ICE TECS Modernization program is to reach Full Operating Capability (FOC) by the end FY 2017. If program funding in FY 2016 is reduced, the program may not be able to meet its intended FOC date. This will delay full implementation of the essential mission critical case management capabilities utilized by the HSI Agents.

Department of Homeland Security
Automation Modernization
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Consolidated ICE Financial Solution
PPA: Automation Modernization
Program Increase: Positions 0, FTE 0, Dollars \$5,000

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$5,000
Total Request	0	0	\$0	0	0	\$0	0	0	\$5,000

Description of Item:

This initiative will allow U.S. Immigrations and Customs Enforcement (ICE) to make progress toward replacing the legacy core financial system it owns and operates by acquiring financial management services from a Shared Service Provider (SSP). The SSP ICE selects will host and operate the core financial system for ICE and its customers.

ICE requests \$5 million to allow ICE’s PMO to oversee efforts associated with the transition to the SSP(s). The program office is responsible for overseeing the contracts and necessary services required to support the migration effort (e.g., program management, data clean-up and conversion, storage of historical financial data) for ICE and five DHS customer components.

Justification:

The ICE Consolidated ICE Financial Solution request \$5 million for FY 2016.

	Dollars in Millions					
	FY 2016	FY 2017	FY 2018	FY 2019	FY 2020	FY 2021
Investment (AM Funds)	\$5,000	\$28,000	\$24,000	\$7,400	\$5,200	\$5,200
O&M	\$0	\$379	\$386	\$5,792	\$5,600	\$5,608

ICE is currently responsible for operating and maintaining a core financial system (CFS) and servicing the financial management requirements of five DHS customer components (i.e., United States Citizenship and Immigration Services, Science and Technology, National Protection and Programs Directorate, Office of Health Affairs, and DHS Management). ICE currently operates and maintains a financial system that is a single proprietary application that captures and records

financial data in the General Ledger to provide support for tracking and recording transactions through the financial process for ICE and the 5 DHS component customers. The system is the official financial system of record for ICE and customers and supports the creation of the DHS consolidated financial statements.

Due to the proprietary nature of the software, there is currently one vendor able to support the financial system. The current financial system has additional operational constraints, including:

- Inability to support the requirements of the Financial Management System End State described by the DHS OCFO Office of Financial Management Financial Management System Standards published in March 2012;
- Lack of ready access to financial data for reporting and decision making; and
- Lack of integration with other business systems, such as procurement and asset management.

To address these challenges, as well as leverage existing financial management systems infrastructure, ICE is planning a migration to a SSP. The funds allocated for FY 2016 will support the initial migrations to the SSP of ICE's component customers and continue to conduct data cleanup activities initiated in FY15. ICE will also support a solution for storing all financial management transaction data for ICE and DHS customer components in a non-proprietary repository to support reporting and migration. During FY 2016, ICE will support customer component migrations to an SSP, while preparing for its own migration anticipated in FY 2017 and FY 2018.

The long term benefits of the overall CIFS program include:

- Improving users' experience by (1) providing an ability to enter and update data once, and avoid multiple logon of systems; (2) providing near real-time access across financial, acquisition, and asset management domains, and (3) enhance ease of use with modernized systems and training;
- Improving audit outcomes and data visibility by: (1) enabling financial reporting consistency; (2) reducing material weaknesses and deficiencies; and (3) ensuring appropriate financial controls are embedded into processes and monitored by governance bodies;
- Leveraging financial management solutions via SSPs whenever appropriate to obtain access to integrated systems; gain the flexibility to redeploy government and contractor resources from system operations and maintenance to data analysis and enhancement as needed; and optimize productivity improvements from improved user experiences.

Impact on Performance (Relationship of Increase to Strategic Goals):

The modernization of the ICE financial system directly supports Goal 4 of the ICE Strategic Plan: Constructing an Efficient, Effective Agency. Supporting the migration to a SSP will integrate core functionalities which currently run on disparate systems reducing manual data entry requirements and creating new efficiencies for ICE and DHS component customers. Additionally, the long term solution will allow ICE to have greater control over its current and legacy data, a greater ability to meet its

reporting requirements for internal and external customers, and will meet OMB guidance for federal agencies on how they acquire core financial systems.

Department of Homeland Security
Automation Modernization
Justification of Program Changes
(Dollars in Thousands)

Program Increase 3: ICE Operational Data Store Increase
PPA: Automation Modernization
Program Increase: Positions 0, FTE 0, Dollars \$6,500

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$6,500
Total Request	0	0	\$0	0	0	\$0	0	0	\$6,500

Description of Item:

The ICE Operational Data Store (IODS) will establish the technical standards, performance characteristics, governance structure, and system components that will promote access to ICE enterprise data. The program will facilitate the reduction of duplicative data sets and standardize the way data is accessed by end-user applications for reporting, search and analysis. This will allow ICE users – both law enforcement and administrative – to have accurate, up-to-date data available for their critical missions areas. The IODS will allow ICE to create an environment for better data management and a more centralized method to capture data changes across ICE’s transactional data sets.

Justification:

The ICE Operational Data Store (IODS) program requests \$6.5 million in FY 2016 with an estimated O&M cost of \$2.5 million per year starting in FY 2017 and ending in FY 2020. ICE currently does not have a centralized data environment allowing access to ICE’s major data sets critical to the mission. Multiple, stove piped systems exist, often generating and storing duplicative data that impedes effective operational and management decisions. Establishing a program will persist accurate, readily-available data and allow the following activities to be better supported at ICE:

- Strategic and other management-level decisions in areas such as budgeting, resource allocation, and enforcement prioritization
- Satisfy internal and external reporting requirements
- Identify leads, associations, and trends in support of law enforcement investigations and intelligence activities.
- Promote improved data sharing both internally at ICE, as well as with external DHS and other USG partners.

The funds for the IODS will be broken down in the following way (please see table at the end of this section for further details):

Software: \$5,200,000

Justification: The software footprint was matched to the hardware footprint, the projected amount of data to be consumed, as well as the load on the system. System functionality was also taken into account.

- **Database software:** 40 Licenses – this will include, Relational Database Management System (RDBMS), NoSchema and NoSQL Database software to store data from ICE’s major systems, and persist the data to consuming applications.
- **Master Data Management (MDM) Software:** 2 Licenses – One for deployment on the development system, the other for deployment on the production system. This will allow ICE to manage data and keep it accurate through Change Data Capture (CDC) tools.
- **Data Synthesis Software:** 4 licenses – will be used to mask and synthesize data for test and evaluation purposes.
- **VMWare software:** for the creation and set up of virtual machines. This will allow more efficient use of hardware and create a virtual architecture that is in line with the goals of the IODS.

Hardware: \$574,000

Justification: The IODS is envisioned to be a mixture of both virtual and physical installations. For the physical installation – which will include both development and production environments, the following will be required:

- **Servers: 42** – this will include database and client servers, and well as any other hardware required, such as KVMs and data backup.
- **Miscellaneous hardware:** including network switches and routers, cabling and other hardware.

Hosting: \$724,000

Justification: Hosting of the IODS will include both cloud and physical hosting. Costs are averaged out from current ICE cost estimates received for physical and cloud hosting services.

Line Item	Quantity	Unit cost	Total
Labor			
Program Manager	1	\$ 215,000.00	\$ 215,000.00
Program Management Support	1	\$ 80,000.00	\$ 80,000.00
Data Architect	4	\$ 250,000.00	\$ 1,000,000.00
System Engineer	4	\$ 250,000.00	\$ 1,000,000.00
Developer	2	\$ 200,000.00	\$ 400,000.00
DBA	2	\$ 150,000.00	\$ 300,000.00
Sub Total			\$ 2,995,000.00
Software			
Database	40	\$ 20,000.00	\$ 800,000.00
MDM	2	\$ 300,000.00	\$ 600,000.00
Data Synthesis	4	\$ 100,000.00	\$ 400,000.00
VMWare	20	\$ 20,000.00	\$ 400,000.00
Sub total			\$ 2,200,000.00
Hardware			
Server	42	\$ 12,000.00	\$ 504,000.00
Misc (Switches, Cables etc)	2	\$ 35,000.00	\$ 70,000.00
Sub Total			\$ 574,000.00
Hosting Services			
Cloud	42	\$ 12,000.00	\$ 504,000.00
Physical	22	\$ 10,000.00	\$ 220,000.00
Sub Total			\$ 724,000.00
TOTAL			\$ 6,493,000.00

Impact on Performance (Relationship of Increase to Strategic Goals):

The IODS Program will focus on working with mission critical systems at ICE to create non-proprietary, generic data stores to house the transactional data that they create. The design and architecture of each system’s data store will be standardized across the enterprise, and will be designed by the IODS program. The IODS will provide a comprehensive data model that promotes enterprise access and at same time allows business units to maintain local control over mission-centric data.

The IODS will apply regulations and policies to data access that were inherited from both legacy and current ICE statutes. By creating a virtual architecture and allowing the business owners to manage their data sets, the creators of the ICE data will maintain control over how the data is accessed and where it is disseminated.

The IODS will deliver an updated set of data architecture and data management artifacts. Current documentation for ICE system conceptual, logical and physical data models is out of date. The current ICE data management plan is not conclusive on how data should be managed at ICE from an enterprise perspective. The IODS will create and maintain data architecture, data interface and data management documentation for all major ICE systems.

IODS functional improvements will include:

- Persistence of accurate data to end-user applications
- Reduction of duplicative, ambiguous data sets
- Easier management of data generated by large transactional systems
- Execution of an Enterprise Data Management plan
- Better methodologies for newer systems that come online and need to integrate with the ICE IT enterprise

Additional technical improvements will include:

- Standardized data repository design and architecture for major ICE systems
- Standardized data access layer for access to data repositories by consuming applications
- Standardized methodology for access to data by ICE's external partners
- Master Data Management (MDM) and Change Data Capture (CDC) tools integrated into the IODS architecture
- Accurate data architecture and data management artifacts created and maintained

Department of Homeland Security
Automation Modernization
Justification of Program Changes
(Dollars in Thousands)

Program Increase 4: Tactical Communication Increase
PPA: Automation Modernization
Program Increase: Positions 0, FTE 0, Dollars \$18,500

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$18,500
Total Request	0	0	\$0	0	0	\$0	0	0	\$18,500

Description of Item:

The Tactical Communications (TACCOM) Program supports ICE agents and officers through the use of tactical communications equipment and systems on a daily basis to perform their primary duties to prevent, protect against, respond to, and recover from incidents, investigations, and operations. TACCOM supports ICE’s mission by resolving existing mission deficiencies in tactical communications with the timely delivery of mission-critical tactical communications capabilities in direct support of the ICE mission, goals, objectives, and programs. This investment will improve public and officer safety, operational security, and enforcement effectiveness during routine, special, and emergency response operations. The TACCOM initiative was developed as a joint initiative between Homeland Security Investigations (HSI), Enforcement and Removal Operations (ERO), the Office of Professional Responsibility (OPR), and the Office of the Chief Information Officer (OCIO) to consolidate and present ICE’s operational requirements for TACCOM in a single submission. These initiatives will provide a modernized communications system, improve ICE law enforcement and homeland security personnel’s tactical communications coverage and capabilities in a high-priority region, and improve command and control and interoperability. A centrally managed and coordinated approach to this initiative ensures implementation of common, standards-compliant technologies, fostering interoperability within ICE and with DHS, other federal agencies, and state and local partners for event management and crisis response.

Justification:

The TACCOM program requests \$18.5 million in FY 2016, with an estimated O&M cost of \$10 million per year through FY 2020], to modernize TACCOM systems in the San Francisco Region and upgraded capabilities for GPS, the TACCOM Hubs, Thin Client deployment, and subscriber refresh, which will deliver the following capabilities:

- Systems that are secure, encrypted, reliable, and interoperable for both fixed and deployable equipment, and support information sharing.
- Systems and equipment that support routine, non-routine, and rapid deployment requirements.
- Systems that provide increased security, interoperability, and coverage, providing improvements to officer safety, operational security, and enforcement effectiveness.
- Flexible, dynamic systems that support changing operational requirements and priorities because they are scalable and adaptable, with equipment that is programmable and upgradable.
- Enhanced systems that increase collaboration, leverage economies of scale, reduce infrastructure redundancy, and optimize the use of resources.
- Deployment of vendor-supportable and ICE-maintainable standards-based equipment that reduces down time, maintenance, and replacement costs.
- Systems and equipment that increase ICE's overall preparedness and responsiveness.
- Systems that increase interoperability and the ability to collaborate during emergencies in areas of the country with limited or no infrastructure.

Tactical communications are used on a daily basis by Law Enforcement Officers (LEOs). The highly tactical operational nature of the ICE mission requires a consolidated approach to ensure that ICE agents and officers in the field have access to assured, reliable, available communications wherever they are working. ICE agents/officers need to obtain, provide, and verify data from the field and exchange voice, data, and multimedia communications in a privacy-protected environment, not only among personnel in their specific components, but with personnel in other ICE Components, within DHS and with other federal partners, as well as with state, local, tribal and other partners. ICE LEOs need to obtain the support required to ensure users' personal safety.

Impact on Performance (Relationship of Increase to Strategic Goals):

Tactical communications significantly improves officer safety and enhances mission effectiveness by providing a vital communications lifeline for the law enforcement officers (LEOs).

TACCOM functional improvements will include:

- The deployment of modernized system and the Subscriber Refresh will make ICE LEOs more effective and efficient in their law enforcement, investigative, and security responsibilities. The modernized system will provide more seamless coverage, improved interoperability, and increased capabilities. All of these capabilities will serve to provide improved support to these regions and can act as a force multiplier to improve effectiveness and efficiency.
- The implementation of GPS will provide significantly improved officer safety through the deployment of GPS in the agents' and officers' radios and the development of a Common Operating Picture (COP). The Blue Force tracking available through GPS will enable ICE to monitor the locations of its LEOs and provide assistance and backup to the specific position of the LEO.

- The Core/Hub upgrade will make ICE more effective and efficient by enabling ICE and CBP to interconnect their Cores. This will provide increased interoperability, redundancy, and sharing between ICE and CBP. It will provide force multiplication for inter-agency operations, information sharing, communications interoperability, and expanded communications through both CBP's and ICE's networks, which will improve officer safety.
- The deployment of Thin Client technology will act as a significant force multiplier to enhance the operational effectiveness and efficiency of LEOs in the field. Since the Thin Client equipment is mobile and wireless, they will enable ICE to have mobile command and control, and increased time in the field on operations.

Additional technical improvements will include:

- Modernized system in the San Francisco Region with expanded coverage, reliability, maintainability, and 24/7 operation.
- Improved interoperability with other Federal, state, local, and tribal agencies.
- Improved Blue Force tracking and development of a COP.
- Continue to align and evolve TACCOM architecture standards to address long-term operational requirements, sustainability, and flexibility to meet dynamic mission requirements.
- Scalable infrastructure and command and control platforms to support exigent operational requirements.

The \$18.5 million funding requirement in FY 2016 for TACCOM is shown in the table below:

Requirement	FY 2016
Partial Modernization – San Francisco Region	14,225,000
GPS	275,000
Core/Hub	2,000,000
Subscriber Refresh	1,000,000
Thin Client	1,000,000
Totals	18,500,000

Funding of \$18.5 million would support the following:

- Partial Modernization (\$14,225,000) is comprised of supporting SAC San Francisco AOR:
 - Infrastructure for approximately 15 sites (final number of sites will depend on final design)
 - Repeaters – receives and transmits the signal to the agents' radios
 - Comparators – Central hub where all repeaters are connected

- Networking equipment – routers and switches used to connect the repeaters to the comparator and to the TACCOM Core (located at the National Law Enforcement Communications Center (NLECC) & Enterprise Operations Center West (EOCW))
 - Engineering and Design
 - Site Acquisition / Installation / Optimization / Integration / Testing
- GPS (\$275,000) is comprised of (Overall TACCOM):
 - Mapping application software
 - LTE data pilot
 - Installation / Optimization
- Core/Hub (\$2,000,000) for NLECC and EOCW Cores (Overall TACCOM):
 - Information Assurance (IA) security updates
 - Software patches
 - System enhancements
 - One upgrade release every 2 years
- Subscriber Refresh (\$1,000,000):
 - 158 APX dual band radios (vice 222 with full funding)
- Thin Client (\$1,000,000) (Overall TACCOM):
 - Software client for command and control
 - Provides access to the TACCOM network via a mobile workstation

Department of Homeland Security
Automation Modernization
Justification of Program Changes
(Dollars in Thousands)

Program Increase 5: ICE Technical Refresh Increase
PPA: Automation Modernization
Program Increase: Positions 0, FTE 0, Dollars \$22,000

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$22,000
Total Request	0	0	\$0	0	0	\$0	0	0	\$22,000

Description of Item:

The ICE Technical Refresh enhances ICE's IT infrastructure foundation, maximizes workforce productivity, secures the IT environment, and improves information sharing across ICE and DHS. This is in direct support of the IT Infrastructure investment that is charged with delivering IT products and services that provide the 24x7x365 systems availability that enable ICE and DHS to achieve their mission.

Justification:

In FY 2016, ICE requests \$22 million to provide technical refresh of the IT systems and hardware that are reaching their end of life. There are IT infrastructure needs, such as virtualization not previously addressed, that also require attention. The estimated life-cycle cost for this initiative is provided below.

	FY 16	FY 17	FY 18	FY 19	FY 20
Investment (AM Funds)	\$22,000	\$23,000	\$23,000	\$23,000	\$27,000
O&M	\$0	\$22,904	\$21,293	\$23,596	\$23,596

While the estimated O&M costs for the Technical Refresh initiative are summarized above, the actual O&M funding to support the technology after it has been refreshed has been included in the ICE IT Infrastructure Program request. The ICE IT Infrastructure Program provides funding for the on-going operations and maintenance of ICE's infrastructure investments.

The ICE IT Infrastructure Technical Refresh initiative builds upon AM projects previously identified and funded under the ICE Atlas Program's Atlas IT Infrastructure (AITI), Cyber Security Modernization (CSM), and Data Center Migration (DCM) projects. The ICE Atlas Program last received AM funding in FY2011. All systems delivered by Atlas have been transitioned to the ICE IT

Infrastructure Program for sustainment. Technical Refresh of these systems reaching their end of life is required. Additionally, there are IT infrastructure needs, such as virtualization not previously addressed, that require attention.

Impact on Performance (Relationship of Increase to Strategic Goals):

The Technical Refresh program is necessary to maintain current functionality. ICE's ability to carry out the following objectives aligned to its strategic mission is dependent upon a fully functional, robust, and secure IT infrastructure. This investment directly supports the following DHS strategic goals:

- Protect national special security events
- Identify and investigate transnational criminal organizations
- Effectively administer the immigration services system
- Arrest, detain, and remove criminals, fugitives, and other dangerous foreign nationals
- Detect, investigate, and disrupt threats
- Equip civilian government networks with innovative cyber security tools, information, and protections
- Respond to and assist in the recovery from cyber incidents
- Deter, disrupt, and investigate cyber crime
- Drive innovative security operations, systems and services throughout the cyber ecosystem

Technical Refresh functional requirements are on-going as a result of previously deployed systems reaching their end of life.

In FY 2016, ICE Technical Refresh will include:

- The deployment and set up of 170 network switches
- The deployment and set up of 6,000 workstations
- The deployment and set up of 180 file and print servers
- Refresh of Security Information and Event Management (SIEM) system
- Procure two Intrusion Prevention System (IPS) sensors

Deployment of these switches, workstations and servers will help ICE to modernize application hosting in the DHS Enterprise Data Centers to facilitate virtualization.

V. Exhibits and Other Supporting Material

Automation Modernization Mission Statement

The Automation Modernization account allows ICE to improve information sharing with DHS and other partner organizations. The initiatives under Automation Modernization strengthen information availability, improve case management capability, and enhance financial management and audit practices across ICE. In FY 2016, ICE will fund two Automation Modernization initiatives - TECS Modernization; Consolidated ICE Financial Solution (CIFS); ICE Operational Data Store (IODS); Tactical Communications (TACCOM); Technical Refresh.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$530	\$425	\$1,201	\$776

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$21	\$21	\$60	\$39

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phones.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$12,606	\$9,388	\$26,539	\$17,151

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$21,700	\$16,166	\$45,700	\$29,534

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement Construction

I. Appropriation Overview

A. Mission Statement for Construction:

U.S. Immigration and Customs Enforcement (ICE) maintains 17 ICE-owned and directly leased facilities and provides housing, processing, medical, administrative, and support facilities needed to assist and meet the needs of ICE Enforcement and Removal Operations (ERO), other ICE programs, and Department of Homeland Security tenants. The Construction account funds are available until expended.

B. Budget Activities:

With the Construction account, ICE has the authority to plan, design, and construct housing and processing, medical, administrative, and support facilities to support the detention of aliens, as well as perform repair and alteration of existing structures.

C. Budget Request Summary:

In FY 2016, ICE will use existing resources and \$5 million in new funds to accomplish important repairs and maintenance. Significant projects include: items that pose a health or safety issue, items such as additional space in processing, medical, administrative, and support facilities, and capital and non-capital improvement projects to replace essential systems that are approaching or exceeding their maximum life expectancy. Essential systems that have exceeded their life expectancy are more likely to fail, which would put ICE detainees and employees at risk and could create unplanned transportation and lodging costs if detainees need to be transported to other facilities due to substantial system failure.

Total Change 2015 to 2016	-	-	\$5,000

CURRENT SERVICES PROGRAM DESCRIPTION:

Construction resources are authorized for necessary expenses to plan, construct, renovate, equip, maintain, and repair ICE-owned facilities necessary for the administration and enforcement of the laws relating to customs and immigration. These ICE-owned facilities support the detention of aliens including general housing, medical screening, processing, administrative support and legal proceedings. These facilities accommodate approximately 11 percent of the detained population with an average daily population of 3,546 at the end of FY 2014. In addition, ICE-owned facilities are utilized to support ICE field operations such as investigations, legal and administrative support functions. This includes Homeland Security Investigations, the Office of the Principal Legal Advisor, the Office of Professional Responsibility, the Office of Firearms & Tactical Programs (OFTP), and others. The ICE-owned portfolio consists of approximately 1.5 million square feet of space at 17 sites.

ICE owns and operates six secure detention facilities, called Service Processing Centers (SPCs), and related mission operations. The active SPC locations are: Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Miami, Florida; and Los Fresnos, Texas. Other ICE-owned facilities include space for Border Enforcement Security Task Forces, Criminal Alien Program teams, the OFTP, and tactical communications and other office space at these locations for ICE programs: Aguadilla, Puerto Rico; San Pedro, California; Altoona, Pennsylvania; Broadview, Illinois; Calipatria, California; Guam; Honolulu, Hawaii; Huntsville, Texas; Oakdale, Louisiana; St. Thomas, U.S. Virgin Islands; and St. Croix, U.S. Virgin Islands.

ICE Construction Program funds are multi-year, non-expiring funds. ICE annually reviews prior year spending to recover and redirect funds to accomplish vital repair and maintenance projects. Significant projects include the repair, replacement, or alteration of facilities to address health and safety as well as mission major operational issues. Additionally, capital improvement projects are needed to replace

vital systems that are approaching or have exceeded their maximum life expectancy (deferred maintenance). This includes updating mechanical systems and other important infrastructure necessary to maintain ICE operations.

In FY 2016, ICE will use available balances and \$5 million in new funding to perform the most essential repairs and alterations to maintain ICE-owned facilities to prevent building structures and systems from becoming severely defective and eventually costing substantially more to repair.

Plan/Milestones/Schedule

Facility	Work Description	Project Type	Amount
All Sites	Operations and Maintenance (O&M) Service Contract to provide the necessary repairs to building mechanical systems such as HVAC, electrical systems (i.e generators), and preventative maintenance to other systems (i.e plumbing and lighting for the facilities).	O&M	\$1,200,000
Batavia SPC	Repair & replace life safety and other necessary equipment in the facilities, such as defective fire sprinkler heads, egress ladders, wall structure repair and replace 12 aging HVAC roof units identified during the August 2013 facility condition assessment.	Deferred Maintenance	\$1,100,000
EL Centro SPC	Replace egress dorm stairs, replace 4 aging HVAC units in Dorms identified in the FY 2013 facility condition assessment report	Deferred Maintenance	\$600,000
El Paso SPC	Perform repair on facility structure wall, replace roof top exhaust & supply fans, replace 4 A/C units in mission-essential computer room	Deferred Maintenance	\$900,000
Port Isabel SPC	Replace 15 aging A/C units throughout campus identified in the facility condition assessment report; repairs of vital infrastructure, including roads & parking; repair security doors in dorms.	Deferred Maintenance	\$1,200,000
		Total	\$5,000,000

IV. Program Justification Changes

**Department of Homeland Security
Construction
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Emergency Construction Funding
PPA: Construction
Program Increase: Positions 0, FTE 0, Dollars \$5,000

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$5,000
Total Request	0	0	\$0	0	0	\$0	0	0	\$5,000

Description of Item:

The ICE Construction Program supports ERO, Homeland Security Investigations, Office of Principle and Legal Affairs, Office of Professional Responsibility, and the National Firearms and Tactical Training Unit. The program provides funds to build, maintain, and repair ICE-owned operational facilities, such as medical screening, processing, administrative, housing, and support facilities, needed to support the detention and processing of aliens.

The ICE-owned portfolio consists of approximately 1.5 million square feet of space at 18 sites. ERO, as the primary tenant, operates SPCs and related mission operations at six ICE-owned sites. These facilities accommodate approximately 3,550, or 11 percent, of ICE detainees. The other 12 owned locations are used to house and support ICE field operations such as the BESTs, CAP, and other investigations, legal, and administrative staff.

ICE requests \$5 million to provide for essential maintenance and repairs at these facilities.

Plan/Milestones/Schedule

Facility	Work Description	Project Type	Amount
All Sites	Operations and Maintenance (O&M) Service Contract to provide the necessary repairs to building mechanical systems such as HVAC, electrical systems (i.e generators), and preventative maintenance to other systems (i.e plumbing and lighting for the facilities).	O&M	\$1,200,000

Batavia SPC	Repair & replace life safety and other necessary equipment in the facilities, such as defective fire sprinkler heads, egress ladders, wall structure repair and replace 12 aging HVAC roof units identified during the August 2013 facility condition assessment.	Deferred Maintenance	\$1,100,000
EL Centro SPC	Replace egress dorm stairs, replace 4 aging HVAC units in Dorms identified in the FY 2013 facility condition assessment report	Deferred Maintenance	\$600,000
El Paso SPC	Perform repair on facility structure wall, replace roof top exhaust & supply fans, replace 4 A/C units in mission-essential computer room	Deferred Maintenance	\$900,000
Port Isabel SPC	Replace 15 aging A/C units throughout campus identified in the facility condition assessment report; repairs of vital infrastructure, including roads & parking; repair security doors in dorms.	Deferred Maintenance	\$1,200,000
		Total	5,000,000

Impact on Performance (Relationship of Increase to Strategic Goals):

At the requested funding level of \$5 million, ICE will remediate the most egregious issues listed above. ICE will work to identify recoveries of prior year funds to put toward remaining essential repair and maintenance projects.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses to plan, construct, renovate, equip, and maintain buildings and facilities necessary for the administration and enforcement of the laws relating to customs and immigration, \$5,000,000, to remain available until expended.

Explanation of Changes:

Language Provision	Explanation
¹ ...[\$0] <u>\$5,000,000</u> ...	Dollar change only (no new funding was requested in 2015). No substantial change proposed.

G. Capital Investment and Construction Initiative Listing

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 and other immigration statutes authorize ICE to detain aliens who are charged with immigration violations, have entered the United States illegally, or have been ordered to leave the country. These aliens can be detained while their immigration proceedings are administered, which in turn facilitates their proper and expedient removal from the country.

The ICE Construction Program provides construction, maintenance, sustainment, and expansion of housing, processing, medical, administrative, and support facilities needed to support the detention of aliens. These projects are part of an ongoing capital investment program that is intended to meet the growing national demand for detention capacity. ICE continues to address the need for bed space and support facilities required to handle the processing and removal of aliens during immigration proceedings, relative to the total number of potentially removable aliens in the country.

Facility Repair & Alterations

1. Project Description, Justification, and Scope

Repair and alteration projects are continually identified at existing ICE-owned facilities. These projects are not capital construction projects, but maintenance, repair, and alteration projects necessary to maintain government-owned facilities and ensure they comply with safety and health code requirements in support to ICE tenant activities.

2. Significant Changes

In FY 2016, ICE will use available balances and \$5 million in new funding to perform the most critical repairs and alterations to maintain ICE-owned facilities to prevent building structures and systems from becoming defective, which could result in higher repair costs.

3. Project Schedule

	Work Initiated	Work Completed	Physical Start	Physical Complete	Total Estimated Cost (000)	Total Project Cost (000)
FY 2016 Budget Request	N/A	N/A	10/01/2015	9/30/2016	\$5,000	\$5,000

**4. Schedule of Project Funding
(Dollars in Thousands)**

	FY 2014	FY 2015	FY 2016	Total
Obligation (actual and planned)	\$4,607	\$5,927	\$4,500	\$15,034
Expenditure (actual and planned)	\$22	\$2,501	\$4,986	\$7,509

5. Method of Performance

All detention projects are currently planned, managed, and monitored by the ICE Chief Financial Officer, Office of Facilities Administration (OFA). ICE entered into a MOU with the United States Army Corps of Engineers (USACE) to provide environmental documentation, planning, design, construction, procurement, and project management services.

6. Compliance with Applicable Public Laws, Regulations, Standards, and Executive Orders

The USACE is responsible for ensuring ICE projects comply with all applicable laws, code compliance, regulations and standards. The services being provided by USACE are managed and monitored by ICE/OFA.

ICE projects must comply with the following life-safety codes and standards:

- Local building codes or the latest edition of one of the model building codes, and the most current International Building Code
- National Fire Protection Association Standard 101 Life Safety Code
- National Electric Code

ICE OFA must also comply with the ICE Detention Design Guidelines (2011 edition), and the ICE Detention Construction Guidelines (2011 edition).

Handicapped accessibility codes and standards apply to ICE facilities as follows:

- Facilities must comply with the Uniform Federal Accessibility Standards, Federal Standard 795
- Facilities must also comply with the Americans with Disabilities Act Accessibility Guidelines

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement Student and Exchange Visitor Program

I. Appropriation Overview

A. Mission Statement for Student and Exchange Visitor Program:

U.S. Immigration and Customs Enforcement (ICE) Student and Exchange Visitor Program (SEVP) enhances national security by collecting, maintaining, and providing reliable information on foreign students, exchange visitors, and the schools and exchange programs that host them. SEVP is an enforcement tool that keeps our nation safe while facilitating the participation of students and exchange visitors in academic programs in the United States.

B. Budget Activities:

Through SEVP, ICE administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, and J visa classifications) in the United States. SEVP trains and reaches out to SEVIS users. The Counter Terrorism and Criminal Enforcement Unit (CTCEU) uses SEVIS to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools or otherwise violate the terms of their visa status. The CTCEU identifies and investigates schools and exchange visitor programs that are not in compliance with regulatory requirements, as well as crimes and fraud perpetuated by criminals and potential terrorists attempting to gain access to the United States through exploitation of SEVP non-immigrant visa status.

C. Budget Request Summary:

ICE requests \$145,000,000, 387 positions, and 355 full-time equivalents (FTEs) for SEVP in FY 2016. The requested funds will provide the resources necessary to fund base requirements for salaries, benefits, and operational expenses.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Student and Exchange Visitor Program (SEVP) is a part of U.S. Immigration and Customs Enforcement’s Homeland Security Investigations (HSI) directorate, which is the largest investigative arm of the U.S. Department of Homeland Security (DHS). SEVP provides integrity to the U.S. immigration system by ensuring that nonimmigrants with F, M, and J visa classification (F and M nonimmigrant students, J exchange visitors, and the accompanying dependents of individuals in one of these three visa categories) comply with visa rules and immigration laws.

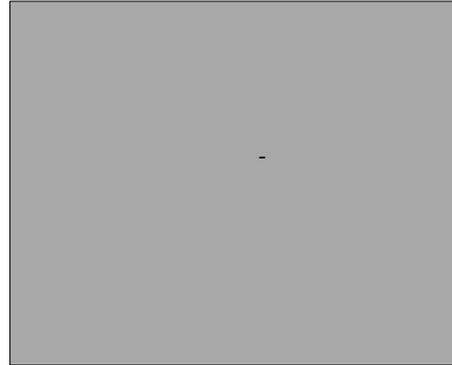

FY 2016 Request

In FY 2016, ICE requests \$145 million, 387 positions, and 355 full-time employees for SEVP. This is the same authority level requested in FY 2015. ICE will predominantly expend prior year balances and some FY 2016 fee collections to fund SEVP payroll and operations in FY 2016. Prior year carryover balances are funds collected but not spent due to sequestration (SEVP must carry over the amount sequestered each year), delays in planned acquisitions, recruitment of field representatives and school recertification adjudicators.

SEVP will spend \$55.3 million on salaries and benefits and \$89.7 million in general expenses. These resources will allow ICE to protect national security by monitoring and verifying that over one million international students and their dependents holding temporary visas in the United States comply with U.S laws and the schools and programs that enroll these students are certified.

Description

SEVP manages the certification of schools providing education/training to F and M nonimmigrant students and dependents in the United States; collects administrative and other fees from F and M nonimmigrant students and J exchange visitors; coordinates with Department of State regarding J exchange visitors; oversees policies and reporting requirements related to F and M nonimmigrant students and J exchange visitors; enforces administrative school and F and M nonimmigrant student requirements; and manages the content and functionality of *Study in the States*, a DHS website that provides resources, tools, and the latest news for F and M nonimmigrant students and school officials. National security is enhanced by strengthening the student visa system to protect against exploitation by terrorists, criminals and non-immigrants.

SEVP uses SEVIS, a web-based technology, to track and monitor schools and programs, as well as nonimmigrant students, exchange visitors and their dependents throughout the duration of their approved participation within the U.S. education system.

SEVP works closely with external stakeholders and federal partners, such as:

- Designated school officials (DSOs) of schools that enroll F and M nonimmigrant students
- Customs and Border Protection (CBP), which oversees nonimmigrant students' admission at the port of entry
- U.S. Citizenship and Immigration Services (USCIS), which processes and adjudicates all F and M nonimmigrant student benefit applications
- Department of State consular officers, who issue nonimmigrant F, M, and J student visas
- Counterterrorism and Criminal Exploitation Unit (CTCEU) investigators within ICE, who identify and investigate suspected terrorists and other criminals suspected of using fraud to exploit the nation's immigration system

Additionally, SEVP provides a significant portion of funding for the CTCEU within HSI's National Security Investigations Program. CTCEU identifies and develops criminal investigations relating to the exploitation of SEVP and/or SEVIS. CTCEU uses SEVIS to identify F and M nonimmigrant students and J exchange visitors who fail to enroll or maintain status at their schools or with their exchange programs and refers those leads to the respective HSI field offices.

Reducing National Security Threats by Pursuing Student Overstays and School Fraud:
During FY 2014, CTCEU analyzed over 1.1 million SEVIS leads, reviewed 1,092 academic institutions for possible identification of fraud anomalies and referred 161 academic schools, 2 flight schools, and 3,555 leads on SEVIS violators to HSI field offices for criminal investigation.

CTCEU also manages Project Campus Sentinel (PCS), which is an outreach directed toward SEVP-certified schools. Through this outreach program, CTCEU builds mutual partnerships between HSI field offices and academic institutions, thus enabling ICE to address potential school fraud and visa exploitation and to identify F and M nonimmigrant student threats.

FY 2016 Planned Activities

In FY 2016, ICE will do all of the following:

- Continue modernizing SEVIS by closing vulnerabilities through the deployment of system functionality enhancements and identifying and prioritizing long-term systems operations and development needs and options;
- Continue review of schools affected by the Accreditation of English Language Training Programs Act, which requires all such schools to have accreditation and withdraw all non-compliant schools;
- Continue development of eligibility reviews for all DSOs, which will perform basic background reviews of all such officials before they receive SEVIS access; and
- Implement review of schools identified to be in violation of optional practical training regulation and policy in order to comply with Government Accountability Office audit results.

Student Exchange and Visitor Program Mission Statement

The Student Exchange and Visitor Program (SEVP) administers the School Certification Program and manages the Student Exchange and Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, and J visa classifications) in the United States. SEVIS is designed to keep our nation safe while

facilitating the participation of foreign students and exchange visitors seeking to study in the United States.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$28,191	\$26,318	\$33,900	\$7,582
11.3 Other than Full-Time Permanent	\$61	\$77	\$78	\$1
11.5 Other Personnel Compensation	\$5,051	\$4,732	\$4,764	\$32
12.1 Civilian Personnel Benefits	\$13,595	\$13,678	\$16,600	\$2,922
Total, Salaries & Benefits	\$46,898	\$44,805	\$55,342	\$10,537

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary, or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits include life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, retirement, retention and other incentives.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$503	\$507	\$510	\$3

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$6,742	\$9,154	\$9,428	\$274

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
24.0 Printing and Reproduction	\$0	\$3	\$0	(\$3)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$13,705	\$24,237	\$46,500	\$22,263

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, state and local governments, tribes, etc.), as well as from other units within the Federal government.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$14,098	\$21,028	\$1,645	(\$19,383)

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$9,118	\$3,953	\$12,070	\$8,117

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.4 Operation and Maintenance of Facilities	\$4,359	\$124	\$0	(\$124)

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal government account.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.6 Medical Care	\$6	\$6	\$0	(\$6)

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$45,437	\$35,387	\$14,815	(\$20,572)

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal government account.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

**U.S. Immigration and Customs Enforcement
Breached Bond Detention Fund**

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). This Act amended Section 286 of the Immigration and Nationality Act of 1952, as amended, by establishing in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund. The first \$8 million in breached cash and surety bonds collected are allocated to the General Fund. All collections in excess of \$8 million are deposited as offsetting collections into this fund.

B. Budget Activities:

Amounts deposited into the Breached Bond Detention Fund can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in their obligations, and for expenses associated with the detention of criminal and illegal aliens. Funds remain available until expended.

C. Budget Request Summary:

In FY 2016, ICE requests \$42,000,000 for new collections and corresponding spending authority. ICE uses this money as part of its overall detention budget, and in FY 2016, \$36.9 million of this funding will allow ICE to fund an estimated 819 detention beds at a rate of \$123.54 and related costs such as healthcare and compliance oversight.

FY 2016 Total Request	-	-	\$42,000
Total Change 2015 to 2016	-	-	(\$23,000)

CURRENT SERVICES PROGRAM DESCRIPTION:

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). This Act amended Section 286 of the Immigration and Nationality Act of 1952, as amended, by establishing in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund.

All collections in excess of the first \$8,000,000 are deposited as offsetting collections into the Breached bond Detention Fund. Amounts deposited into the fund, which remain available until expended, are used for expenses incurred in the collection of breached bonds, bond management, and litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

In FY 2016, ICE will use \$36.9 million of these resources to fund 819 detention beds at \$123.54. Breach Bond collections have encountered a slower than normal growth rate; thus, to mitigate this concern, ICE will utilize fewer resources to fund beds. The remaining resources will be used to support the Bond Management Unit (BMU), administration of the Breached Bond program, and other allowable costs. The BMU supports field operations by providing guidance related to immigration bond management, and ensures field compliance with bond laws, regulations, policies, and procedures through training, site visits, and technical oversight. The BMU also coordinates with other ICE programs to facilitate the timely resolution of bond litigation issues, as well as financial reporting to ICE leadership.

Breached Bond Detention Fund Mission Statement

The Breached Bond Detention fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of \$8,000,000 posted under the INA, which are recovered by the Department of Justice, are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$2,500	\$2,500	\$1,000	(\$1,500)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
--	----------------------------	-------------------------------	--------------------	------------------------------

Federal travel regulations. The FY 2016 request has no change.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$2,500	\$2,500	\$1,000	(\$1,500)

Other services include reported contractual services with non-Federal sources that are not otherwise classified under object class 25. The FY 2016 request has no change.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.4 Operation and Maintenance of Facilities	\$60,000	\$60,000	\$40,000	(\$20,000)

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal government account. The FY 2016 request reflects change in anticipated fee collections that will be used for detention beds.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Immigration and Customs Enforcement Immigration Inspection User Fees

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

The Immigration and Customs Enforcement (ICE) Immigration Inspection User Fee account is a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry as codified in 8 U.S.C. 1103, 1356, Section 286, the Immigration and Nationality Act. These fees finance a portion of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air and sea ports. Funds in the Immigration Inspection User Fee account remain available until expended.

B. Budget Activities:

In Fiscal Year (FY) 2016, the Immigration Inspection User Fee will be used to fund immigration detention beds and related expenses, as well as other programs that perform Immigration User Fee Account (IUFA)-related activities under Title 8, United States Code.

C. Budget Request Summary:

ICE requests \$135,000,000 in spending authority for FY 2016. The requested funds will finance a portion of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports. Approximately \$70,000,000 of the Immigration Inspection User Fee will fund 1,551 detention beds and related expenses. The remaining balance will fund five ICE directorates and programs that perform IUFA-related activities throughout the investigate phase and the immigration enforcement lifecycle: Homeland Security Investigations (HSI) Office of Investigations (OI), HSI Office of Intelligence (Intel), HSI Office of International Affairs (OIA), Enforcement and Removal Operations (ERO), and the Office of the Principal Legal Advisor (OPLA).

FY 2016 Program Change	-	-	-
FY 2016 Total Request	-	-	\$135,000
Total Change 2015 to 2016	-	-	-

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2016, ICE requests \$135 million budget authority and no positions or FTE for Immigration Inspection User activities. This is the same authority level requested in FY 2015.

The Immigration User Fee account was established as a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S. operated air and sea ports of entry. These fees finance a portion of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports. These ICE operations encompass:

- expanding, operating, and maintaining information systems for non-immigrant control;
- detecting fraudulent documents used by passengers traveling to the United States;
- investigating crimes relating to admissibility and establishing the government’s legal position regarding all detentions;
- representing the government in all legal proceedings involving immigration and admissibility;
- transporting detained aliens who arrive at air and sea ports-of-entry to immigration legal proceedings;
- providing detention and removal services for inadmissible aliens arriving on commercial aircraft or vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry;
- providing training and technical assistance to commercial airline and vessel personnel regarding detection of fraudulent documents; and

- program oversight and management.

In FY 2016, ICE will use \$70,000,000 of the requested resources to fund 1,551 detention beds and related expenses such as healthcare. The remainder of the funds will be split between other expenses such as investigations, legal proceedings, intelligence gathering, alien transportation, and systems for non-immigrant control.

Immigration Inspection User Fees Mission Statement

The Immigration User Fee account was established as a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry. These fees are used to recover some of the costs of ICE operations to deter, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air or sea ports.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
Total, Salaries & Benefits	-	-	-	-

Salaries and Benefits includes regular salaries and wages paid to civilian employees for full-time, part-time, temporary or intermittent employment; compensation above the basic rates paid directly to civilian employees such as overtime, holiday pay, night work differential, hazardous duty pay, supervisory differential, incentive awards, and royalties; and benefits including life insurance, health insurance, employee retirement, work injury disabilities, professional liability insurance, recruitment, retention and other incentives.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$34,710	\$34,710	\$22,126	(\$12,584)

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The amount of User Fee funds available is dependent upon fee collections.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.4 Operation and Maintenance of Facilities	\$57,416	\$57,416	\$70,000	\$12,584

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal government account. Increased funding will be used to support additional detention beds from Immigration Inspection User Fees. The amount of User Fee funds available is dependent upon fee collections.

A. Component Overview

The Immigration and Customs Enforcement (ICE) is comprised of the following mission-oriented programs that support achievement of the DHS strategic missions, goals, and objectives.

Enforcement and Removal Operations (ERO): The Enforcement and Removal Operations program enforces the Nation's immigration laws by identifying and apprehending removable aliens, detaining these individuals when necessary, and removing them from the United States. To enforce border security, protect public safety, and protect national security, ICE prioritizes the removal of individuals apprehended at the border or ports of entry while attempting to unlawfully enter the United States, as well as those who pose a danger to national security or a risk to public safety, including aliens convicted of crimes, with particular emphasis on violent criminals, felons, and repeat offenders.

Homeland Security Investigations (HSI): The Homeland Security Investigations program conducts criminal investigations to protect the United States against terrorist and other criminal organizations that threaten public safety and national security; combats transnational criminal enterprises that seek to exploit America's legitimate trade, travel, and financial systems; and upholds and enforces America's customs and immigration laws at and beyond our Nation's borders.

Automation Modernization: Automation Modernization includes several information technology (IT) transformational initiatives. The Automation Modernization program will improve information sharing within the Department of Homeland Security and across ICE organizations, strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

Construction: The Construction program provides housing, processing, medical, administrative, and support facilities needed to assist and meet the needs of Enforcement and Removal Operations activities. The Construction account funds are available until expended.

Management & Administration: This program captures activities that provide enterprise leadership, management and/or business administration services and describes the capabilities and activities that support the day-to-day management and back office functions enabling the Department to operate efficiently and effectively. Key capabilities include conducting agency planning and performance management, managing finances, managing agency workforce, providing physical and personnel security, acquiring goods and services, managing information technology, managing agency property and assets, managing agency communications, managing legal affairs, and providing general management and administration.

FY 2016 Budget Request (includes any mandatory funding)

The table below shows ICE’s FY 2016 Budget request by its mission-oriented programs.

Program	FY 2016 Request	
	FTE	Dollars (in thousands)
Enforcement and Removal Operations (ERO)	7,563	3,440,670
Homeland Security Investigations (HSI)	8,989	2,172,375
Automation Modernization	0	73,500
Construction	0	5,000
Management and Administration	3,239	590,091
Total Budget Request	19,791	6,281,636

B. Component Contributions to Achieving Departmental Missions

The table below shows the alignment of the ICE programs to the DHS Missions and Mature and Strengthen Homeland Security.

Programs	DHS Missions					Mature and Strengthen Homeland Security
	Prevent Terrorism and Enhance Security	Secure and Manage Our Borders	Enforce and Administer Our Immigration Laws	Safeguard and Secure Cyberspace	Strengthen National Preparedness and Resilience	
Enforcement and Removal Operations (ERO)			100%			
Homeland Security Investigations (HSI)	10%	62%	21%	6%		1%
Automation Modernization	7%	15%	14%			64%
Construction			100%			
Management and Administration*		4%	4%		1%	91%

* Total accounts for rounding.

Mission 1: Prevent Terrorism and Enhance Security

Resources Requested

ICE resources supporting *Prevent Terrorism and Enhance Security* are provided in the table below.

\$ in thousands

Program	FY 2014		FY 2015		FY 2016	
	\$	FTE	\$	FTE	\$	FTE
Homeland Security Investigations (HSI)	202,730	889	201,267	889	215,151	921
Automation Modernization	5,750	0	5,250	0	5,375	0
Total	208,480	889	206,517	889	220,526	921

Performance Measures

ICE contributes to this area, but does not have performance measures in this area.

Mission 2: Secure and Manage Our Borders

Resources Requested

ICE resources supporting *Secure and Manage Our Borders* are provided in the table below.

in thousands

Program	FY 2014		FY 2015		FY 2016	
	\$	FTE	\$	FTE	\$	FTE
Homeland Security Investigations (HSI)	1,295,594	5,381	1,279,605	5,381	1,338,484	5,503
Automation Modernization	11,500	0	10,500	0	10,750	0
Management and Administration	21,749	64	21,684	63	22,178	64
Total	1,328,843	5,445	1,311,789	5,444	1,371,412	5,567

Performance Measures

For *Secure and Manage Our Borders*, strategic performance measures are presented. Strategic Measures represent measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act Modernization Act (GPRAMA) performance measures.

Strategic Measures

Measure: Percent of transnational child exploitation or sex trafficking investigations resulting in the disruption or dismantlement of high-threat child exploitation or sex trafficking organizations or individuals						
Description: This measure reports the percent of transnational child exploitation or child sex trafficking investigations resulting in the disruption or dismantlement of high-threat criminal organizations/individuals. "Child exploitation" is defined as manufacturing and distributing sexual or perverted acts or images of children under the age of 18. "Disruption" is defined as impeding the normal and effective operation of the targeted organization. "Dismantlement" is defined as destroying the organization's leadership, financial base and network to the degree that the organization is incapable of operating and/or reconstituting itself. ICE has established a Child Exploitation Investigations Center (CEIC) to serve as a central coordination point for state, local, and tribal offices, the National Center for Missing and Exploited Children, and other federal law enforcement agencies, as well as international law enforcement agencies dedicated to combating the sexual exploitation of children.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	20%	25%	41%	42%
Result:	N/A	N/A	23.5%	59.0%	N/A	N/A

Measure: Percent of transnational drug investigations resulting in the disruption or dismantlement of high-threat transnational drug trafficking organizations or individuals						
Description: This measure will report on the percent of transnational drug investigations resulting in the disruption or dismantlement of high-threat transnational drug trafficking organizations/individuals. "Transnational drug trafficking organization" is defined by the U.S. Department of Justice (DOJ) as those organizations on approved Consolidated Priority Organizational Target (CPOT) or Regional Priority Organizational Target (RPOT) lists or those who are earning, laundering, or moving more than \$10 million a year in drug proceeds. "Disruption" is defined as impeding the normal and effective operation of the targeted organization. "Dismantlement" is defined as destroying the organization's leadership, financial base and network to the degree that the organization is incapable of operating and/or reconstituting itself. To impact the result of this measure, ICE established international partnerships to link global customs and law enforcement agencies.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	11%	44%	29%	30%
Result:	N/A	N/A	42.6%	45.0%	N/A	N/A

Measure: Percent of transnational gang investigations resulting in the disruption or dismantlement of high-threat transnational criminal gangs						
Description: This measure reports on the percent of transnational gang investigations resulting in the disruption or dismantlement of high-threat transnational criminal gangs. "Transnational gang" is defined as members within a transnational criminal organization linked to gang activity as defined by the Racketeering Influenced Corrupt Organization (RICO) and/or the Violent Crime in Aid of Racketeering (VICAR) statutes. "Disruption" is defined as impeding the normal and effective operation of the targeted organization. "Dismantlement" is defined as destroying						

the organization's leadership, financial base and network to the degree that the organization is incapable of operating and/or reconstituting itself. To impact the result of this measure ICE has developed and implemented anti-gang initiatives focused on violent criminal activities and on crimes with a nexus to the border.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	15%	62%	41%	42%
Result:	N/A	N/A	60.8%	44.0%	N/A	N/A

Mission 3: Enforce and Administer Our Immigration Laws

Resources Requested

ICE resources supporting *Enforce and Administer Our Immigration Laws* are provided in the table below.

\$ in thousands

Program	FY 2014		FY 2015		FY 2016	
	\$	FTE	\$	FTE	\$	FTE
Enforcement and Removal Operations (ERO)	3,279,160	7,539	2,704,126	7,539	3,440,670	7,563
Homeland Security Investigations (HSI)	433,780	1,934	433,200	1,934	460,605	1,951
Automation Modernization	17,650	0	10,250	0	10,375	0
Construction	5,000	0	0	0	5,000	0
Management and Administration	25,579	68	25,378	69	25,929	70
Total	3,761,169	9,540	3,172,954	9,541	3,942,579	9,583

Performance Measures

For *Enforce and Administer Our Immigration Laws*, two types of performance measures are presented. Strategic Measures represent ICE's measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act Management Act (GPRAMA) performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Measures

Measure: Average length of stay in detention of all convicted criminal aliens prior to removal from the United States (in days)						
Description: This measure provides an indicator of efficiencies achieved in working to drive down the average length of stay for convicted criminals in ICE's detention facilities. Decreases in the average length of stay can significantly reduce the overall costs associated with maintaining an alien population prior to removal.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	<=38	<=35	<=35	<=34.5	<=34.5	<=37.5
Result:	34.7	31.9	33.5	37.5	N/A	N/A

Measure: Number of convicted criminal aliens removed per fiscal year						
Description: This measure includes removals from the U.S. under any types of removal order as well as voluntary returns of immigration violators to their country of origin. This measure reflects the full impact of program activities to ensure that criminal aliens identified in the country, that are amenable to removal do not remain in the U.S. (statistical tracking note: Measure equals the case status with a departure date within the fiscal year, filtered by criminality and exiting ERO Criminal Alien Program codes.)						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	180,000	220,350	225,390	198,000	198,000	177,314
Result:	216,698	225,390	216,810	177,960	N/A	N/A

Measure: Number of employers audited, sanctioned, or arrested for violating immigration-related employment laws or otherwise brought into compliance with those laws						
Description: This measure is a cumulative result of enforcement-related actions against employers that hire illegal labor. Enforcement-related actions include criminal arrests, audits, and final orders of fines of employers related to worksite enforcement. This measure demonstrates the impact of worksite enforcement operations to ensure that employers do not violate immigration-related employment laws.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	1,800	1,854	1,854	1,854
Result:	N/A	N/A	4,743	2,191	N/A	N/A

Measure: Percent of detention facilities found in compliance with the national detention standards by receiving an acceptable inspection rating						
Description: This measure gauges the percent of detention facilities that have received an overall rating of acceptable or above within the Enforcement and Removal Operations (ERO) National Detention Standards Program. The National Detention Standards were originally issued in September 2000 to facilitate consistent conditions of confinement, access to legal representation, and safe and secure operations across the immigration detention system. The standards have been updated into a performance based format known as the Performance Based National Detention Standards. Through a robust inspections program, the program ensures facilities utilized to detain aliens in immigration proceedings or awaiting removal to their countries do so in accordance with the Performance Based National Detention Standards.						

Immigration and Customs Enforcement (ICE) - Strategic Context

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	90%	94%	100%	100%	100%	100%
Result:	95%	97%	100%	100%	N/A	N/A

Measure: Percent of Removal Orders Secured by ICE attorneys that Support ICE's Civil Enforcement Priorities (CEP)

Description: This measure indicates the percent of total removal orders secured by OPLA attorneys that support the agency's civil enforcement priorities (CEP). OPLA attorneys play an integral role in enforcing the nation's immigration laws by prosecuting accused violators and ultimately securing orders of removal against those found to be in the United States illegally. The CEP prioritizes the use of enforcement personnel, detention space, and removal resources to ensure that the removals orders secured promote the established enforcement priorities. The CEP includes aliens who pose a danger to national security or a risk to public safety, recent illegal entrants, and aliens who are fugitives or otherwise obstruct immigration controls.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	60%	60%	60%
Result:	N/A	N/A	N/A	58%	N/A	N/A

Management Measures

Measure: Average daily population of illegal aliens maintained in detention facilities

Description: Average Daily Population (ADP) - Midnight count man-days is based on Midnight Count. A MANDAY is based on whether a subject is in an ERO detention facility for the midnight count. For every subject in a facility for the midnight count corresponds to one MANDAY. The ADP is the number of mandays for a given time period, divided by the number of days in that time period. MIRP The and ORR facilities are not included. Average daily population is congressionally mandated at 33,400.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	33,588	34,000	34,000	31,800	30,539	30,539
Result:	33,330	34,260	33,788	33,227	N/A	N/A

Measure: Estimated average adult bed cost per day

Description: All costs associated with directly or indirectly supporting the maintenance of detention beds. These include bed and detention guard contracts; contracts for detainee provisions, healthcare, building maintenance, etc. These costs also include headquarters support and oversight for detention operations.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	<=\$119.50	<=\$122.00	<=\$122.00	<=\$119.00	<=\$119.00	<=\$123.54
Result:	\$112.83	\$118.14	\$118.88	\$121.16	N/A	N/A

Measure: Number of aliens removed convicted of the most serious crimes (level 1 offenders)						
Description: This measure indicates the number of aliens who have been convicted of the most serious crimes, known as level 1 offenders, that have been removed from the United States.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	63,000	80,050	85,000	86,000	87,012	62,060
Result:	75,086	77,954	74,159	63,159	N/A	N/A

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Aviation Security

I. Appropriation Overview

Terrorism in the aviation domain is an enduring and highly adaptive threat. Terrorists study our vulnerabilities to learn how to exploit procedural and technological security gaps to increase the lethality and political impact of their attacks. Aviation continues to be a target of coordinated terrorist activity and despite all efforts and advances in intelligence, technology, and screening processes, the threat to the U.S. transportation sector remains high. Examples include the 2010 attempted bombing of a cargo jet using a bomb disguised as toner cartridge, the 2009 attempted attack of Northwest Airlines Flight 253 from Amsterdam to Detroit on Christmas Day, an alleged terrorist plot to detonate liquid explosives onboard multiple aircraft departing from the United Kingdom for the United States in August 2006, and terrorists' intended attacks on U.S.-bound flights originating from multiple foreign airports in December 2003.

A. Mission Statement for Aviation Security:

The Aviation and Transportation Security Act (ATSA, P.L. 107-71), enacted on November 19, 2001, established the Transportation Security Administration (TSA) to protect the Nation's transportation systems to ensure the freedom of movement for people and commerce. The Aviation Security appropriation consists of programs whose primary focus is to secure aviation transportation. The path to achieving this mission has evolved in the years since the September 11th attacks. Enhancements in aviation security have included emphasis in explosives detection training and technology, modifications to the prohibited items list, segmenting the passenger population based on risk, and changes to TSA security screening protocols.

B. Budget Activities:

Screening Operations - Screening Operations includes the Programs, Projects and Activities (PPAs) that support the pay, training, outfitting, and operating costs for the Transportation Security Officer (TSO) workforce. Funding is also included for the purchase and installation of passenger and screening technology, and maintenance of screening equipment, to include Advanced Imaging Technology (AIT), Explosives Detection Systems (EDS) and Explosives Trace Detection (ETD) machines.

Assessments and Enforcements - Aviation Direction and Enforcement includes the PPAs that ensure TSA continues to build a strong security regulation and enforcement presence on-site at the Nation's commercial airports. Funding requested supports air cargo, airport, and airline regulation compliance through scheduled and risk-based special inspections, explosives detection canines, international programs, quality assurance programs, and airport management administrative support staff.

In-Flight Security - In-Flight Security includes the PPAs that fund the Federal Air Marshal Service (FAMS), which detects, deters and defeats terrorist or other criminal or hostile acts targeting U.S. carriers, airports, passengers and crew; as well as the Federal Flight Deck Officer (FFDO) and Flight Crew Training programs.

Risk-Based Security Initiatives - TSA employs a multi-layered, risk-based, intelligence-driven approach to its security and counter-terrorism mission. TSA continues to undertake efforts to test and deploy security protocols to increase security while improving the passenger experience at aviation security checkpoints by applying risk-based, intelligence-driven screening procedures and enhancing its use of technology.

The vision of Risk-Based Security (RBS) is to increase overall aviation system security by allocating resources based on risk, with greater focus on high-risk and unknown travelers and commerce while facilitating the movement of legitimate travelers and commerce. In an effort to continuously improve aviation transportation security, TSA undertakes initiatives to focus its resources and improve the passenger experience at aviation security checkpoints.

TSA’s RBS approach reflects a variety of diverse initiatives and efforts that enhance the effectiveness and efficiency of screening operations while improving the customer experience. One of the most visible initiatives, TSA Pre✓[®], places more focus on pre-screening individuals in order to expedite the checkpoint screening experience. First implemented as a proof of concept in October 2011, TSA Pre✓[®] has since expanded from 35 airports with dedicated TSA Pre✓[®] screening lanes at the beginning of FY 2013 to 119 airports nationwide in FY 2014.

	2011	2012	2013	2014
Participating air carriers¹	2	5	17	21
Airports with dedicated TSA Pre✓[®] lane(s)	5	35	113	119
Passengers receiving expedited screening	1%	8%	36%	47%
Percent of travelers on participating airlines	23%	50%	68%	84%

Eligible participants include U.S. citizens, U.S. Lawful Permanent Residents (LPRs), and foreign citizens who are members of the U.S. Customs and Border Protection (CBP) Global Entry program; U.S. citizens, U.S. LPRs, and Canadian citizens in the CBP NEXUS program; and U.S. citizens and U.S. LPRs in the CBP SENTRI program. Certain airline frequent fliers, military personnel (active duty, National Guard, and Reserve), Members of Congress, individuals who enroll directly in TSA Pre✓[®], and certain other trusted populations are also eligible for expedited screening under the TSA Pre✓[®] initiative. On a per-flight basis, Secure Flight also conducts risk assessments on passengers to identify additional travelers who can be identified as lower risk and eligible to receive the TSA Pre✓[®] expedited screening. Expedited physical screening is also afforded to TSA Pre✓[®] eligible travelers in standard screening lanes at airports unable to sustain a dedicated TSA Pre✓[®] lane. In addition, individuals 12 years old and under and 75 years old and older are also afforded expedited screening at all TSA screening lanes by allowing them to leave on shoes and light jackets (family members ages 12

¹ The number of carriers includes both the main carriers as well as their regional affiliates when they are doing business as the main carriers (e.g., Chautauqua Airlines doing business as Delta Airlines).

and under, traveling with an eligible parent or guardian that has a TSA Pre✓[®] indicator on their boarding pass, can receive TSA Pre✓[®] expedited screening when traveling through a TSA Pre✓[®] lane). Also, passengers that are part of Managed Inclusion activities and are identified as low risk are eligible for expedited screening.

Once TSA determines a passenger is eligible for TSA Pre✓[®] expedited screening, the low-risk status is contained in the passenger’s boarding pass. Airlines participating in the program print “TSA Pre✓[®]” (or other similar indicator) on the boarding pass of eligible passengers, and embed the eligibility status in the barcode. TSA reads the barcode at designated checkpoints and refers passengers to a TSA Pre✓[®] lane where they will undergo expedited screening. TSA Pre✓[®] expedited screening procedures allow passengers to no longer remove shoes, leave laptops in their carry-on bag, leave on light jackets/outerwear and belts, and leave 3-1-1 compliant liquids/aerosols/gels in their carry-on bag. No passenger is guaranteed to receive expedited screening, and all passengers are subject to random and unpredictable screening measures throughout the airport.

As of December, 2014, dedicated TSA Pre✓[®] lanes are provided at 119 U.S. airports in 47 states, Guam, and Puerto Rico. On November 18th, 2014, TSA reached an agency milestone of screening over 50% of travelers through some form of expedited screening. On average TSA is regularly screening over 45% of the nearly 1.8 million daily passengers through some form of expedited screening. TSA has implemented the following initiatives during FY 2014:

- Initiated the TSA Pre✓[®] Application Process. This program, which began on December 4, 2013, provides travelers the ability to apply directly for participation in the TSA Pre✓[®] program. As of its one-year anniversary on December 4, 2014, TSA had opened 328 enrollment centers across the nation (including 33 airport sites, and 295 off-airport sites), and had approved 734,761 applications.

- Expanded the Known Crewmember (KCM) Initiative. This initiative allows TSA officers to verify identity and employment status of airline flight crews and provide expedited screening at designated access points currently at 55 U.S. airports providing access to over 278,000 flight crew members each week.
- Expanded the number U.S. air carriers participating in TSA Pre✓[®] to 21, and added Air Canada as the first foreign air carrier in the program.
- Extended eligibility for TSA Pre✓[®] to nearly 3.0 million U.S. Armed Forces personnel including 2.2 million active duty, National Guard, Reserve, and U.S. Coast Guard personnel; approximately 10,000 U.S. Military, Naval, Coast Guard, and Air Force Academy students; and nearly 800,000 civilian employees.

TSA has identified the following objectives for FY 2015 and beyond:

- The majority of passengers will receive expedited screening via TSA Pre✓[®]
 - Expand participation to additional U.S. and foreign air carriers to increase the percentage of travelers flying on a participating airline from the current 86% level to near 100%.
 - Continue to expand eligibility to additional trusted populations (e.g., federal employees).
 - Drive significant increase in TSA Pre✓[®] enrollment with a focus on travelers who take three or more trips per year (six screenings).
- Adopt risk-based approach to other aspects of aviation security such as checked baggage, air cargo, regulatory compliance, and Federal Air Marshal Service.
- Improve the overall travel experience
 - Recognition of viable foreign trusted traveler programs
 - Reciprocity with TSA Pre✓[®] like lanes at certain foreign airports
 - Improved coordination with CBP, airports and international airlines for international travelers
 - Consolidated security technology to streamline the security process for all travelers
- Explore options to expand the TSA Pre✓[®] application through third party providers in order to draw on private sector expertise to increase program convenience and ease of enrollment.
- Expand TSA Pre✓[®] Risk Assessment rules through Secure Flight to strengthen the overall algorithm.
- Further segmentation of lower-risk passengers to better differentiate physical security measures.
- Expand the RBS philosophy across all TSA business and mission operations through implementing Enterprise Risk Management.
- Develop and implement long-range Dynamic Aviation Risk Management System (DARMS) strategic vision.

As mentioned above, one of TSA's primary goals for RBS is to dramatically expand TSA Pre✓[®] enrollment by focusing on travelers who take three or more airline trips per year. Expanding expedited screening and aligning our technology and risk-based security programs improves aviation security by providing expedited physical screening to travelers evaluated as lower risk and allows TSA to pay more attention to passengers who present an unknown or higher risk to the aviation system. At the same time, modifying the physical security requirements at the checkpoint for lower risk travelers improves the passenger's travel experience and is fundamental to TSA's evolution to a high-performing and efficient counterterrorism organization.

Airport security checkpoints are only one part of a multi-layered system for aviation security. Other parts both seen and unseen by the public include intelligence and analysis, Behavior Detection Officers (BDOs), explosives detection canine teams, FAMS, and closed-circuit television monitoring. In order to prevent terrorists from gaming the system, TSA always incorporates random and unpredictable security measures throughout the airport and no individual will be guaranteed expedited screening.

C. Budget Request Summary:

The FY 2016 Budget includes 51,754 positions; 47,367 Full Time Equivalents (FTE); and \$5,614,766,000 in gross discretionary appropriated funding for the Aviation Security appropriation. This appropriation also includes an additional \$250 million in mandatory fee collections for a total budget authority of \$5,864,766,000. The total adjustment-to-base includes a decrease of 131 positions and 131 FTE, an increase of \$41,013,000 in appropriated funding, and a decrease of 1,708 positions; 1,705 FTE; and \$109,551,000 in program changes including:

- Efficiencies gained from RBS (1,666 positions; 1,666 FTE; and \$110,005,000);
- Reduction in Transportation Security Inspectors (54 positions; 52 FTE; and \$5,217,000);
- Reduction in Transportation Security Specialists – Explosives (TSS-E) (19 positions; 18 FTE; and \$2,021,000);
- Increase in Academy Instructors (31 positions; 31 FTE; and \$2,492,000) and,
- Increase to the FAMS for Staffing (\$5,200,000).

The FY 2016 Net Discretionary Request of \$3,482,816,000 includes offsetting discretionary fees totaling \$2,131,950,000.

Screening Partnership Program
Program Performance Justification**
(Dollars in Thousands)

PPA: Screening Partnership Program

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	-	-	\$158,190
FY 2015 President's Budget	-	-	\$154,572
2016 Adjustments-to-Base	-	-	\$12,355
FY 2016 Current Services	-	-	\$166,927
FY 2016 Program Change	-	-	-
FY 2016 Total Request	-	-	\$166,927
Total Change 2015 to 2016	-	-	\$12,355

TSA requests \$166.927 million in FY 2016 for the Screening Partnership Program (SPP) PPA

Adjustments to Base:

- Increase of \$1.399 million for pay inflation
- Increase of \$10.956 million for a realignment to support new SPP airports

CURRENT SERVICES PROGRAM DESCRIPTION:

The SPP was established under Section 108 of ATSA to permit an airport operator to request screening services through a private screening company. Private screening contractors are to perform equal to or better than Federal screening operations under Federal oversight following the same operating procedures, which are continuously updated to ensure both Federal and private screening airports are able to mitigate any new threats which have been identified.

The SPP followed a two-year pilot program mandated by ATSA. This pilot included five airports and concluded in 2004. In accordance with 49 USC § 44920, all U.S. airports with a Federal screening presence are eligible to apply to SPP. There are currently 21 airports participating in the program.

The original five pilot airports which still participate in SPP are:

- San Francisco International Airport;
- Kansas City International Airport;
- Greater Rochester International Airport;
- Jackson Hole Airport; and,
- Tupelo Regional Airport.

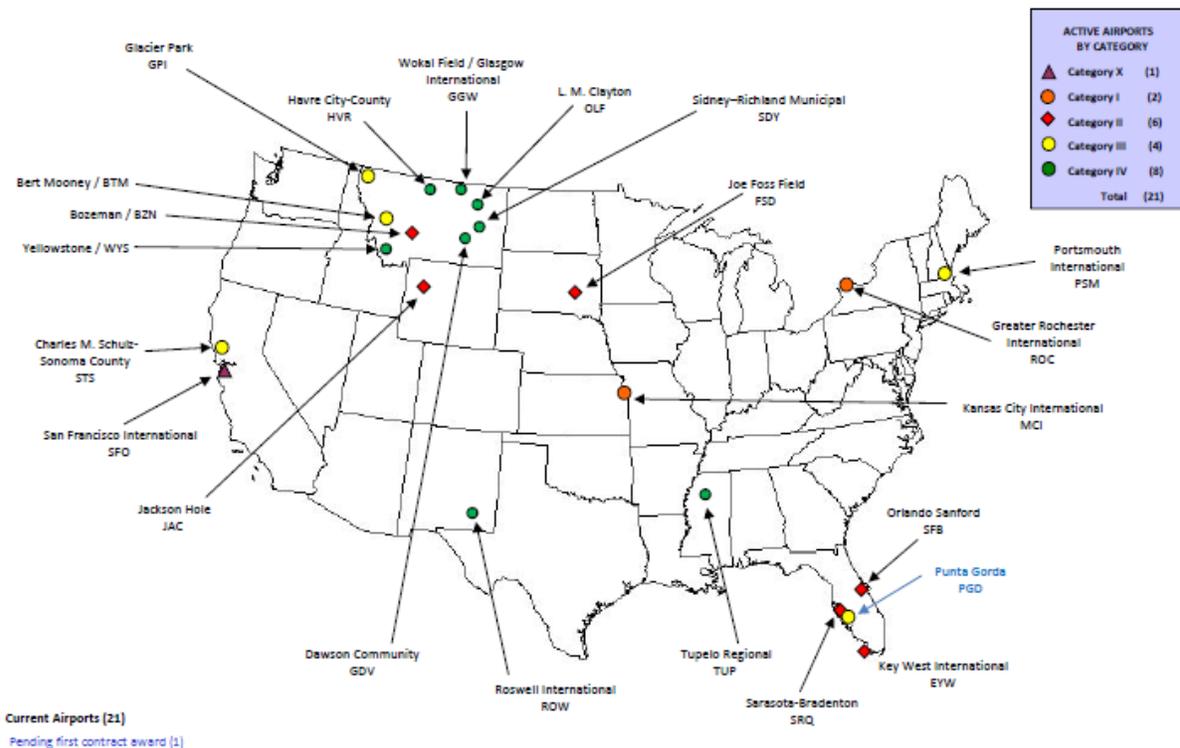

As of January 2015, 16 additional airports are participating in SPP, for a total of 21. Those include:

- Sioux Falls Regional Airport, South Dakota;
- Key West International Airport, Florida;
- Charles M. Schulz-Sonoma County Airport, California;
- Roswell International Air Center, New Mexico;
- Nine airports in Montana: Sidney Richland Regional; Dawson Community Airport; L.M. Clayton Airport; Wokal Field; Havre City County Airport; Glacier Park International Airport; Bert Mooney Airport; Bozeman Yellowstone International Airport; and Yellowstone Airport.
- Orlando Sanford International Airport, Florida
- Sarasota Bradenton International Airport, Florida
- Portsmouth International Airport, New Hampshire

TSA is currently in the process of procuring an SPP contract for Punta Gorda Airport, who applied to the program on December 2, 2014 and was approved in January 2015.

The FAA Modernization and Reform Act of 2012 (P.L. 112-95) requires TSA to approve an airport's application to participate in SPP if approval will not compromise security, detrimentally affect cost efficiency, or detrimentally affect screening effectiveness of passengers or property. Since enactment of the Act, TSA has met the statutory requirements, and has adjudicated and approved seven applications. One airport, Sacramento International in California withdrew its application after it was approved. In addition, TSA has established a 12 month goal for awarding a new SPP contract; however, items outside of TSA's control may impact procurement timelines, such as legislative mandates released during a solicitation.

The following map lists the current and potential SPP Airports:

MAJOR ACQUISITIONS:

Screening Partnership Program

The SPP procures screening services from qualified private companies at TSA airports. As required by statute, the program provides airports with a process to "opt-out" and request TSA use private screening companies instead of Federal screeners. The program also provides the business infrastructure capable of acquiring, deploying, and supporting the management of private screening resources at airports. Private screeners must pass TSA training, maintain TSA certification, and follow TSA's screening procedures. Private screening performance must "be equal to or greater than the level provided by Federal personnel", and private screeners must receive compensation "not less than the compensation received by Federal screeners". SPP addresses the requirement to provide airports with a process to request TSA to use private screening companies instead of Federal ones and then procure, deploy, and manage those companies. SPP maintains services at 21 airports (units) and is in the process of procuring a contract for an additional airport.

In FY 2015, TSA will begin moving towards an Indefinite Delivery, Indefinite Quantity (IDIQ) contract vehicle for future SPP contracts. This change has several anticipated benefits including an expedited procurement process, increased competition and consistency amongst contracts. The re-compete for screening services at San Francisco International will be the first airport to use the new IDIQ contract vehicle.

The Screening Partnership Program investment is to be funded out of multiple PPAs in FY 2016, as follows:

- Screening Partnership Program PPA \$166.927 million
- Airport Management and Support PPA \$1.787 million

Activity Funding
(\$ in Thousands)

FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Budget

(Dollars in Thousands)

PPA: Screener PC&B

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	51,311	43,910	\$3,033,526
FY 2015 President's Budget	47,897	43,734	\$2,952,868
2016 Adjustments-to-Base	(145)	(145)	\$26,289
FY 2016 Current Services	47,752	43,589	\$2,979,157
FY 2016 Program Change	(1,666)	(1,666)	(\$107,087)
FY 2016 Total Request	46,086	41,923	\$2,872,070
Total Change 2015 to 2016	(1,811)	(1,811)	(\$80,798)

TSA requests 46,086 FTP, 41,923 FTE, and \$2.872 billion in FY 2016 for the Screener PC&B PPA

Adjustments to Base:

- Increase of \$36.344 million for pay inflation
- Decrease of 5 FTP/FTE and \$798 thousand for a realignment to the Screener Training and Other PPA to support the Office of Professional Responsibility
- Decrease of 140 FTP/FTE, and \$8.674 million from savings associated with in-line EDS installations
- Decrease of \$9.234 million for a realignment to the Screening Partnership Program PPA to support new SPP airports
- Increase of \$8.651 million for retirement contributions

Program Changes:

- Decrease of 1,666 positions/FTE and \$107.087 million for RBS efficiencies to the screener workforce

CURRENT SERVICES PROGRAM DESCRIPTION:

Passenger and baggage screening protects commercial air travelers by detecting and removing dangerous or deadly objects that individuals attempt to smuggle onto aircraft on their person and in carry-on or checked baggage. TSA's screening process must strike the appropriate balance between preventing security breaches and maintaining the efficient movement of law-abiding passengers through the security checkpoints while ensuring compliance with civil liberties and civil rights laws, regulations, Executive Orders and policies and privacy laws and regulations. After passenger check-in, TSOs use various types of electronic detection and imaging machines, including Advanced Imaging Technology (AIT) systems, Explosive Trace Detection (ETD equipment), Advanced Technology (AT-

2) X-ray machines, Walk-Through Metal Detectors, and hand-held metal detectors. At the checkpoints, TSOs may perform physical searches of carry-on baggage and pat-down searches of airline passengers, crew, and airport employees. This is in conjunction with the use of behavior recognition techniques and the validation of travel documents. Passengers with disabilities, medical conditions or other circumstances can call the TSA Cares hotline approximately 72 hours ahead of travel and TSA Cares will coordinate checkpoint support with a TSA Customer Service Manager located at the airport.

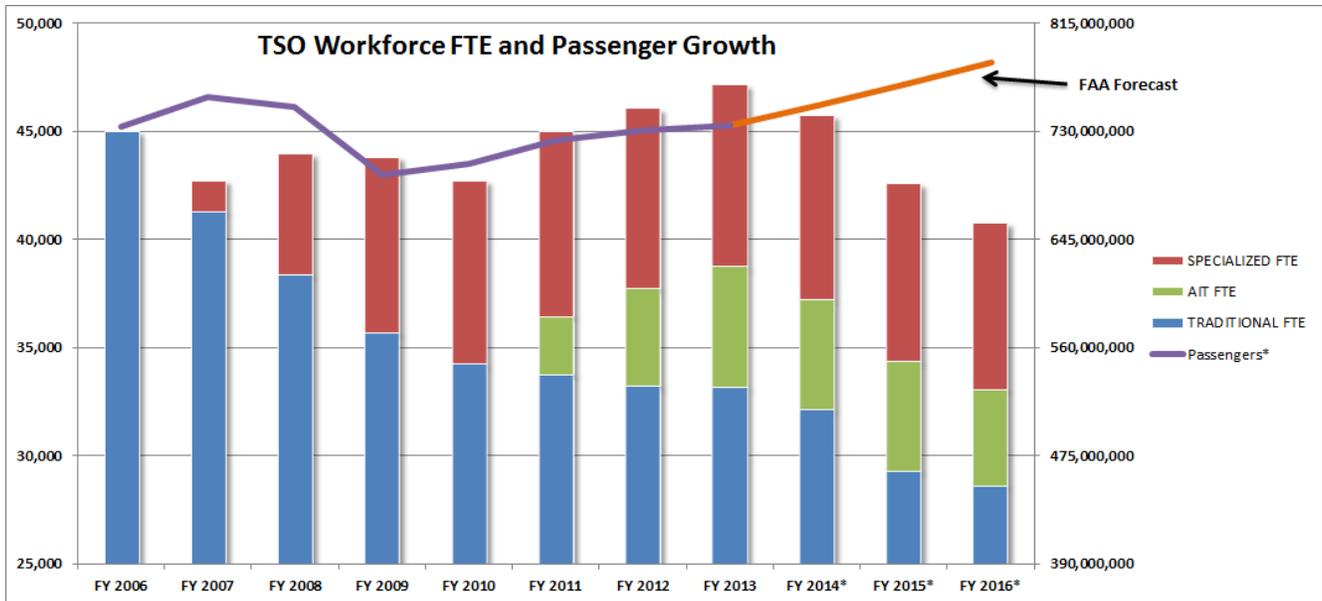

TSA continues to focus its resources and improve the passenger experience at security checkpoints by applying intelligence-driven, risk-based screening procedures and enhancing its use of technology. This approach is based on the following premise that the majority of airline passengers are low risk. By having passengers voluntarily provide more information about themselves and placing more focus on prescreening, TSA is able to expedite physical screening for known passengers, focusing resources on travelers TSA knows less about, while increasing system-wide effectiveness. A number of initiatives have enabled TSA to reach its goal of expanding expedited screening for known populations in order to focus on those that are unknown. Some of the RBS initiatives TSA has implemented are as follows:

- Modified Screening for Active Duty U.S. Service Members
- Modified Screening for Passengers 12 and Under
- Modified Screening for Passengers 75 and Older
- Eliminating physical screening for Veterans on chartered Honor Flights
- Providing modified screening to Wounded Warriors
- Using Managed Inclusion to identify passengers for TSA Pre ✓[®] through use of Passenger Screening Canines and Behavior Detection Officers
- TSA Pre ✓[®] Expedited Screening

TSA Workforce

ATSA established the employment standards for security screening personnel. Security screening personnel – both private and Federal – are required to be U.S. citizens; pass a background investigation; and have a high school diploma, a general equivalency diploma, or sufficient experience. Newly hired TSOs must undergo extensive training and be certified to screen passengers and baggage through the use of detection equipment. The screening workforce is subject to ongoing training and testing requirements. Failure to pass any phase of training or a certification examination is grounds for employment termination.

With the evolution of TSA's risk-based security programs, the TSO responsibility, especially at the checkpoint, has significantly evolved. Officer responsibility goes beyond verbatim adherence to Standard Operating Procedures and includes critical thinking about today's threats and risks, and the mitigation techniques necessary to respond to those threats. In recognition of this growth in job requirements, a structural pay reform was implemented in July 2014 to modestly increase the pay of TSA's front-line workforce. TSA was able to fund this adjustment within the base due to faster than expected savings as a result of RBS initiatives. The changes reflect a transition to a smaller more capable work force, which is taking place even as passenger travel has increased.

* Passenger Data is taken from the Bureau of Transportation Statistics T-100 Market Data. Data only includes figures with a World Area Code of less than 100 which signals originations within the U.S. Details here: http://www.transtats.bts.gov/TableInfo.asp?Table_ID=292&DB_Short_Name=Air%20Carriers&Info_Only=0 FY14 Thru FY16 are based on the FAA Aerospace Forecast for Fiscal Years 2014-2034 (2.2% increase FY14 Thru FY16). Also note that passenger count ties to enplanements, not necessarily screening throughput.

The TSO-budgeted FTE levels are broken down as follows:

TSO Budgeted FTE by Job Title/ Function ^{1/}

Job title	Band	FY 2014 FTE	FY 2015 FTE	FY 2016 FTE
TSOs ^{2/}	D, E	29,848	27,406	26,803
Lead/Master	F	6,402	6,158	5,601
Supervisory/Expert TSOs	G	4,694	4,515	4,335
Playbook/Refs	D, E	1,654	1,366	1,366
BDOs	F, G, H, I	3,131	3,131	2,660
Managers	H, I	1,191	1,158	1,158
TOTAL		46,920	43,734	41,923

^{1/} TSO Workforce is composed of approximately 10,000 part time TSOs and 36,000 full time TSOs

^{2/} These TSO perform passenger and baggage screening, as well as perform travel document checker duties

TSO FTE Allocated to Security Duties

Job Duty	FY 2014 FTE	FY 2015 FTE	FY 2016 FTE
TDC	2,001	2,001	2,001
Playbook/REFS	1,654	1,366	1,366
BDOs	3,131	3,131	2,660
Checkpoint / Other	40,134	37,236	35,896
TOTAL	46,920	43,734	41,923

Job Descriptions:

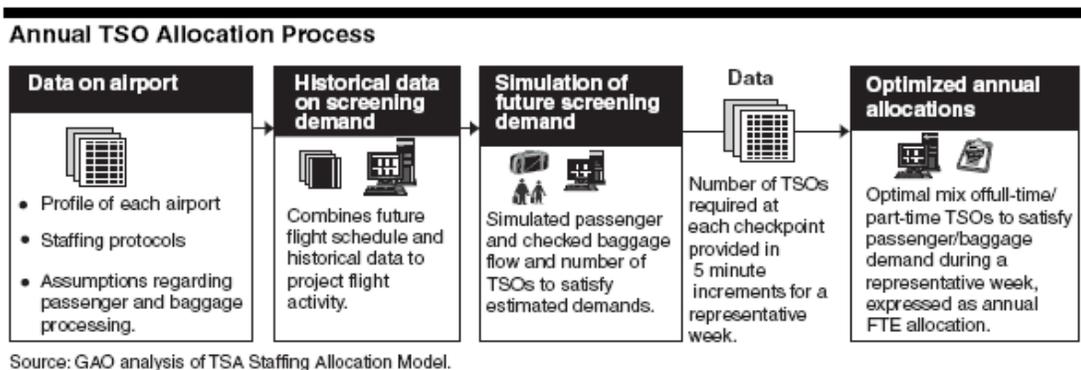

A brief description of the different types of TSO jobs follows:

- TSO – Front-line workforce performing checkpoint security, document checking, airport employee screening and unpredictable security measures.
- Lead TSO (LTSO)/Master TSO – Provides intermediary leadership at the checkpoint. Master TSOs can also perform training duties and operate in airport coordination centers.
- Supervisory TSO (STSO)/Expert TSO – Supervises checkpoint operations. Expert TSOs can also perform training duties and operate in airport coordination centers.
- Playbook/Risk Emphasized Flight Screening – Provides a more risk based focus at the local airport level.
- BDO – Performs passenger screening through Behavior Detection and Analysis (BDA)
- Transportation Security Manager (TSM) – Performs overall oversight duties of security operations.

Workforce Initiatives

TSA determines and allocates FTE to the airports through the Staffing Allocation Model. This is a robust process run by each airport scheduling operations officer which utilize:

- Official Airline Guide flight data representing airport specific flight activity;
- Airport specific facility layout and equipment configuration details, to include presence of TSA Pre✓[®] lanes;
- Input of program offices and risk analysis;
- A discrete event simulation model to project staffing requirements; and
- Sophisticated workload based optimization software to apply collective bargaining compliant rules to determine efficient work schedules.

The model is constantly refined to determine the most efficient and effective allocation of the TSO workforce. Through the staff modeling process, TSA has been able to identify operational and efficiency gains made possible through better scheduling, increased use of part-time and split shift employees, technology improvements, and improved management practices. As RBS initiatives continue to expand, TSA is able to align passenger screening resources based on risk assessments. The model is adjusted to account for efficiencies relating to RBS initiatives such as dedicated TSA Pre✓[®] lanes and the resulting increased processing speed at standard lanes. As well, TSA has moved airline flight crew traffic to dedicated KCM lanes that further expedite passenger screening and thereby reduce FTE requirements.

In addition, TSA has installed labor-saving technology in many airports around the country. Most notably, in-line checked baggage systems have reduced the staffing required for baggage checks and have reduced costly workplace injuries. At the end of FY 2014, an estimated 119 airports will have operational in-line EDS with a cumulative savings of 3,105 FTE and \$189 million when compared to the staffing required for the stand alone screening equipment configuration. TSA continues to see nominal savings as a result of in-line EDS installations, although not as large as earlier years since most of the large airports have these systems in place. In FY 2016, TSA is estimating in-line FTE savings of 140 FTE and \$9 million.

Some of the programs under the TSO workforce include:

Travel Document Checker Program

The Travel Document Checker (TDC) Program is an added layer of security at all 443 Federalized airports, including SPP airports, to verify an individual's identity and their travel documents before allowing entry into the security screening checkpoint to access the sterile area or board an aircraft. TDC-qualified TSOs are positioned in front of the checkpoint and use black lights and magnifying loupes to validate boarding passes and authenticate various forms of acceptable photo identification (ID) presented by passengers, airport and airline personnel, and law enforcement officers. Any suspect or questionable ID issues are relayed to the STSO for resolution and the Identity Verification Coordination Center to verify the individual's identity to continue.

Behavior Detection and Analysis Program

The Behavior Detection and Analysis (BDA) Program is an additional layer of security, using behavior observation and analysis techniques to identify potentially high-risk individuals who may pose a threat to transportation security. Formally known as Screening of Passenger by Observation Technique (SPOT), BDA provides a real-time threat analysis by employing non-invasive techniques for identification. When integrated with other elements of risk-based security, the capability yields valuable return on investment allowing for greater efficiency and effectiveness at the screening checkpoint. The program is based on behavior pattern recognition techniques used by security personnel across the world and supported by scientific research. Certified BDOs work in pairs, typically in and around security checkpoints throughout the airport.

The BDA program has been reviewed, internally and externally, several times to ensure validity and effectiveness. In 2013, TSA worked closely with the American Institute of Research to conduct an independent study of the indicators where TSA plans to test and refine the procedures starting in October of 2014. Concurrently and integral to the Optimization project is a comprehensive Operational Test designed to collect the data to validate behavior detection over and above what was seen during the original 2011 SPOT Validation Study. Scenario-driven testing will be used in addition to the outcome-based protocols used in the prior Study. Each of the limitations discussed by the Government Accountability Office in their report on the SPOT program will be mitigated to the maximum extent possible given the constraints of testing within an operational environment. Initial testing began in fall 2014, and full data collection is planned for January 2016.

Beginning in FY 2015, the BDA will develop and deploy TSOs/LTSOs with multi-function certification in a Behavior Detection capability. These positions will conduct screening of passengers or baggage at least 80% of the time and will conduct Behavior Detection functions up to 20% of the time. The core structure for these positions will remain dedicated to passenger screening; however, they will now incorporate an additional capability (Behavior Detection).

Finally, in an effort to ensure quality and compliance to BDA programs nationwide, TSA established the Program Compliance Assessment (PCA) Team. The team is comprised of BDOs and BDA TSMs from various airports across the Nation. While deployed, PCA team members are inserted into local airports daily operations and make objective observations of identified areas to include; implementation of BDA, implementation of Managed Inclusion (MI), and canine operations.

Playbook

Playbook is designed as a comprehensive, flexible deployment system of countermeasures that are coordinated at the local airport level in order to respond quickly to emergency conditions or hostile acts. It is supported through local decision-making between the Airport Operator and the Federal Security Director (FSD). Playbook involves working collaboratively with stakeholders and coordinating the assets of TSA, local law enforcement, and other DHS agencies to improve an airport's overall security posture.

Aviation Screening Assessment Program

This program measures TSO screening performance using realistic and standardized assessment scenarios. The primary purpose of the Aviation Screening Assessment Program (ASAP) is to provide statistical data to determine reasons for failure within the checkpoint and checked baggage screening process. ASAP test results provide critical data to TSA leadership that helps with the improvement of aviation security and the identification of vulnerabilities across screening operations. There are two, six-month test cycles per year.

Coordination Center Officers

These TSOs assist with facilitating smooth communications at the airport as well as analyzing information on threats and responding to crisis situations. Coordination Center Officers also ensure directives from management are met in a timely and accurate fashion.

Career Progression Program

TSA continues its focus on career progression for TSOs. As the TSA mission has evolved, TSA created higher-level positions for TSOs such as BDOs. TSA's adoption of RBS will further evolve the skill sets of TSOs, which is anticipated to lead to a smaller more capable workforce with appropriate grade restructuring.

TSA provides career-advancement tools and resources in its online system called Security Officer Advancement Resources. These resources include a career toolbox, training opportunities, and detailed overviews of what makes a TSO competitive for positions within TSA and across DHS. TSA supplements this service with career coaching and the Career Resident Program. This effort is an entry level, full-time, career development program designed to capitalize on the technical expertise and agency knowledge resident in the field and to create a mechanism for TSOs and field personnel selection for career opportunities other than the current TSO/LTSO/STSO career path. In addition, TSA has partnered with community colleges to provide TSOs and uniformed officers the opportunity to work toward a TSA Homeland Security Certificate and/or an associates' degree in Homeland Security or related field.

The career progression structure allows TSA to distinguish and retain the more experienced and top performing TSOs. Test results show a positive correlation between longevity and performance, including detection ability, screening efficiency, and customer service. As threats evolve and increase in complexity, the advanced skills of the TSA workforce are necessary to stay ahead of terrorist capabilities.

Historical Attrition Rates

Attrition Type	Work Schedule	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Voluntary	Full-Time ONLY	5.3%	4.2%	4.9%	6.5%	8.0%	8.9%
Voluntary	Part-Time ONLY	15.5%	12.9%	13.5%	16.1%	19.0%	20.2%
Voluntary	TOTAL	7.7%	6.2%	8.5%	10.8%	12.9%	13.6%

Workers' Compensation

The President's Safety, Health, and Return to Employment Initiative requires Federal agencies to reduce the Total Case Rate (TCR) and Lost Time Case Rate (LTCR) by three percent each fiscal year. As noted in the chart below, TSA has exceeded its goal of reducing the number of TSO injuries and illnesses, and in FY 2016, TSA will seek to continue the trend of reducing numbers of TSO injuries and illnesses. TSA's Workers' Compensation has decreased by approximately \$12 million from FY 2006 to FY 2014.

TSO Injury Rate

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014	Percent Change FY 2009 – FY 2014
TCR	7.55	7.16	5.50	5.45	4.90	3.59	-52.45%
LTCR	3.53	3.37	2.76	2.60	2.33	1.91	-45.89%

(Dollars in Thousands)

PPA: Screener Training and Other

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	88	141	\$226,857
FY 2015 President's Budget	144	139	\$226,290
2016 Adjustments-to-Base	5	5	\$107
FY 2016 Current Services	149	144	\$226,397
FY 2016 Program Change	31	31	\$154
FY 2016 Total Request	180	175	\$226,551
Total Change 2015 to 2016	36	36	\$261

TSA requests 180 positions, 175 FTE, and \$226.551 million in FY 2016 for the Screener Training and Other PPA

Adjustments to Base:

- Increase of 5 FTP/FTE and \$798 thousand for a realignment from the Screener Personnel Compensation and Benefits PPA to support the Office of Professional Responsibility
- Increase of \$1.9 million for a realignment from the FAMS PPA to support the TSA Academy
- Increase of \$203 thousand for pay inflation
- Decrease of \$214 thousand as part of total In-line system savings of \$8.988 million
- Decrease of \$2. million for a realignment to the Airport Management and Support PPA to support the field parking program
- Decrease of \$634 thousand for a realignment to the Screening Partnership Program PPA to support new SPP airports
- Increase of \$54 thousand for retirement contributions

Program Changes:

- Decrease of \$2.314 million for RBS efficiencies to the screener workforce
- Decrease of \$13 thousand for RBS efficiencies to the Transportation Security Specialist – Explosives
- Increase of 31 FTP/FTE and \$2.481 million for TSA Academy instructors

CURRENT SERVICES PROGRAM DESCRIPTION:

This activity provides the resources to support new and recurring training requirements for the TSO workforce, as well as other direct costs associated with screening operations.

The following table provides the components of this PPA.

Screener Training and Other PPA

(\$ in Millions)

	FY 2015 President's Budget	FY 2016 Request
TSO Training	\$99.6	\$107.1
Screener Consumables, Uniforms, and Other	\$92.7	\$85.4
National Deployment Office	\$22.0	\$22.0
Environmental Management Program	\$12.0	\$12.0
TOTAL	\$226.3	\$226.5

Transportation Security Officer Training: \$107.1 million

Given the ever changing threats that face the aviation domain, screener training is constantly evolving. TSO training is comprised of a compendium of courses that includes basic training for initial hires, on-the-job training, lead and supervisor technical training, recurrent training, advanced technical skills training, remedial training, and return-to-duty training. All new hires receive a combination of instructor-led, hands-on, and web-based training. Recurrent and specialized training courses are provided by either classroom instruction or the TSA Online Learning Center. TSA uses a measurement and evaluation process to ensure training programs meet established objectives and standards. Training effectiveness is assessed using a four-level model measuring trainee reaction, learning, behavior, and results.

In April 2012, TSA established the TSA Academy located at the Federal Law Enforcement Training Center (FLETC) in Glynco, Georgia and joined more than 92 partner organizations who train at FLETC. The Academy's initial course offering was the Essentials of Supervising Screening Operations (ESSO) led by a dedicated group of instructors and facilitators including Academy staff, FAMs, FSDs, and members of the FLETC Leadership Institute. The course was designed and developed for delivery to our more than 4,500 STSOs. By the end of FY 2014, 167 ESSO classes were delivered and 4,568 participants trained.

Other training offered at the Academy includes training for Transportation Security Inspectors, Security Training Instructors (STIs), Transportation Security Specialists – Explosives and for TSA field Security Training Instructors for the TSO and the BDO workforce. Expansion plans include the potential for New Hire TSO Training; basic and specialty training for BDOs; Leadership Training, and various other courses yet to be determined.

All TSOs, LTSOs, STIs, BDOs and STSOs must participate in an Annual Proficiency Review (APR) to ensure that they meet all of the qualifications and performance standards required to perform their screening duties as required by ATSA. The APR includes Technical Proficiency assessments that focus on image recognition, proper screening techniques, job knowledge, and the ability to identify, detect, and locate prohibited items. Technical proficiency is measured in the following ways:

- Measuring Image Proficiency – One Image Mastery Assessment per year administered using the X-ray simulation;
- Measuring Practical Skills – A series of Practical Skills Evaluations, including the detection of prohibited items, of all TSOs every year;

- Measuring On-Screen Alarm Resolution Protocol (OSARP) Proficiency – One OSARP assessment per year administered using the Employee Assessment Management System (EAMS) software; and
- Measuring Job Knowledge – One Standard Operating Procedures Assessment per year administered using EAMS.

To ensure technical proficiency, TSA has a number of training courses and programs, including but not limited to the following:

- **New Hire Training Program (NHTP):** The bulk of the security training funding provides for design, development, and delivery of classroom instruction on screening procedures, customer service, effective communications, principles, policies, and fundamentals of risk based security, as well as on-the-job training and certification required by ATSA. NHTP is a multi-media training course which includes web-based training (to include image interpretation), within and supported through a minimum of 40 hours of instructor-led training, which also includes supported hands-on equipment-specific labs and role-play scenarios to maximize the adult learning experience. The NHTP course for those who will be screening checked baggage includes modules focused on on-screen alarm resolution protocol training for new hires at those airports equipped with EDS and the use of ETD equipment in place at their duty location. TSA designs, develops and delivers training in support of all screening technologies, to include AIT for screening persons, AT-2 X-ray for screening checkpoint carry-on items; ETD equipment for screening persons, checked baggage and checkpoint carry-on items; and other screening technologies deployed to support the passenger screening process.

TSO New Hire Training

Metric	Min. Hrs	Evaluation Components
Checkpoint TSO-one ETD		
Phase I Instructor-led Training	55.50	Job Knowledge Checks/Tests and Practical Demonstrations/Image Interpretation Tests
Phase II On-the-Job Training	75.00	Image Mastery Test
Total Hours	130.50	Certified Checkpoint TSO
Checked Baggage EDS/OSARP		
Phase I Instructor-led Training	59.50	Job Knowledge Checks/Tests and Practical Demonstrations
Phase II On-the-Job Training	83.00	Practical Demonstration Test Image Test-Operator Qualification Test
Total Hours	142.50	Certified Checked Baggage EDS/OSARP TSO
Dual Function Officer (DFO) ETD only		
Phase I Instructor-led Training	71.50	Job Knowledge Checks/Tests and Practical Demonstrations/Image Interpretation Tests
Phase II On-the-Job Training	110.00	Image Mastery Test Practical Demonstration Test
Total Hours	181.50	Certified DFO TSO
Dual Function Officer (DFO) with EDS/OSARP Certification		
Phase I Instructor-led Training	94.00	Job Knowledge Checks/Tests/ and Practical Demonstrations/Image Interpretation Tests
Phase III On-the-Job Training	128.00	Operator Qualification Test/Checked Baggage Practical Demonstration TEST/Image Mastery Test
Total Hours	222.00	

- **Annual Recurrent In-Service Training:** All TSOs are required to undergo recurrent security training to ensure they maintain proficiency of skills learned during basic training. In addition, recurrent training keeps the TSOs up-to-date with procedural changes, the use of new/updated technologies building new capabilities; enhancing skills; and identifying new threat items. This training is planned and communicated through an annual National Training Plan and the average hours of recurrent training ranges from 90-105 hours.
- **Behavior Detection Officer Training:** This curriculum provides training in behavior observation and analysis for the purpose of identifying passengers exhibiting behaviors indicative of hostile intent. The curriculum for this program will continue to be upgraded and updated annually to include additional techniques and/or information related to the field of behavior detection.
 - **BDO Recurrent In-Service Training:** All BDOs are required to undergo recurrent security training to ensure they maintain proficiency of skills learned during basic training. Additionally, in-service training courses are designed to keep the workforce up-to-date with procedural changes introduced into the screening operations; building new capabilities; and enhancing skills.
 - **BDO National Training Team Training and Certification:** All National Training Team (NTT) instructors receive training on the technical content of courses that the NTT teaches including, but not limited to: BDO Basic Training and BDO Refresher Training.
- **Security Training Instructor:** This training supports the permanent TSA in-house instructor certification program. TSA provides skills enhancement training to the STI workforce to ensure they are able to effectively deliver technical training. With the movement towards more interactive facilitated training in support of adult learning, TSA continues to develop training that supports the development of the STIs so they are better prepared to deliver and interact with class participants. STI training is now held at the TSA's Training Academy at FLETCs.
- **Essentials of Leading Screening Operations Course:** This is a course developed for LTSOs and is being delivered at FLETC by TSA Academy staff members. The technical and leadership competence of LTSOs is a critical component of workforce effectiveness and retention. This course is designed to provide tools needed to allow LTSOs to successfully support the TSO workforce and STSOs in the execution and management of the daily operations and challenges faced at checkpoint and/or checked baggage screening locations. TSA began delivering this two-week course in April of 2014 and it is the first instructor-led course that TSA has specifically developed for TSA's over 6,200 LTSOs nationwide. TSA also conducts other task specific courses to provide ongoing skills enhancement and technical expertise training to their LTSOs at their home airports. Delivery is scheduled to continue throughout FY 2015 and into FY 2016.
- **Essentials of Supervising Screening Operations Course:** This course is delivered to STSOs at FLETC by members of the TSA Academy and FLETC. This course achieves two important goals: 1) to professionalize the Agency's approach to training delivery; and 2) to provide front line supervisors with core knowledge and critical job skills that enable them to contribute to the success in critical areas such as employee integrity, responsibility and performance. The training is delivered over two weeks and focuses on the legal authorities governing TSA's

search processes; risk- based approach to security and security measures based on analysis of intelligence, threat, and capabilities; and the mission, vision and core values of TSA. The training emphasizes effective communications, coaching and mentoring, but also technical requirements of the STSO position including interactive team projects.

- **Essentials of Managing Screening Operations Course:** This course has been developed for the TSMs, the third member of the leadership team for the TSO workforce. The technical and leadership competence of TSMs is a critical component of workforce effectiveness and retention, as well as the effective execution of the screening process. TSA began delivery of this one-week course in July 2014. This course is designed to provide tools needed to allow TSMs to successfully support the TSO workforce, to include the LTSOs and STSOs in the execution and management of the daily operations and challenges faced at checkpoint and/or checked baggage screening locations. TSA also conducts other task-specific courses to provide ongoing skills enhancement and technical expertise training to their TSMs. Once all of the managers receive training (scheduled completion third quarter of FY 2015), TSA will continue to offer the training once a quarter.
- **Leadership Training:** This training supports the requirements of 5 Code of Federal Regulations (CFR) 412.202 Systematic Training and Development of Supervisors, Manager, and Executives. Leadership training programs have been developed and are deployed for different levels of TSOs. All leadership training programs cover topic areas such as communications skills, managing employee performance, coaching and mentoring, basic employee relations, supervisory responsibilities in managing safety, and diversity training, and team building. Examples of such programs are:
 - The Real Time Leadership Skills Program - a course of study designed for approximately 175 team leads annually that include LTSOs, Expert BDOs, STIs;
 - Fundamentals of Leadership Program - basic leadership training for the STSOs and first-line supervisors;
 - Leading Through Change - an introductory course for first line supervisors on implementation of the adopted Union Contract;
 - Leading from the Middle – leadership training for mid-level airport managers;
 - Leading People and Managing Operations – a program for managers to strengthen their technical, managerial and leadership skills.
- **Expanding Skills and Critical Thinking Training:** This strategy focuses on the interaction and communication between TSAs workforce and the public. Every TSO working at the checkpoint receives training that consolidates the latest methods for explosives detection, as well as the human factors that can affect security. These training events help TSOs become more analytical and less “check-list oriented” by emphasizing critical thinking and effective communications. Skills enhancement training will continue to build the capabilities of its officer workforce in the implementation of TSA’s risk-based security portfolio.
- **Image Awareness:** This training is a facilitated review and discussion led by airport leadership. This effort allows officers to review an account of actual events that have occurred within TSA, and clearly understand their role in establishing and maintaining the image of TSA

and how that affects the public's level of confidence in our effectiveness. The following topics have been included in the Image Awareness Series:

- Image Awareness Briefing: Image and Integrity – a session launched in the first quarter of FY 2014 focused on communicating TSA's core values of integrity, innovation, and team spirit. The briefing is designed to heighten awareness of TSA's public image and review how individual actions positively and/or negatively impact those perceptions.
 - Image Awareness Briefing: Code of Conduct – a session launched in the third quarter of FY 2014 for all officers and leaders at all levels reviewing how unacceptable conduct has a corrosive effect on the image and operation of TSA. The briefing is designed to help the workforce understand how to recognize, react to, and help eliminate misconduct.
 - Image Awareness Briefing: Passenger Support and Customer Service – a session to be launched in the second quarter of FY 2015 for all levels of the screening workforce. The briefing will be designed to highlight how the adoption of passenger support and customer service practices contribute to the implementation of screening processes and procedures as a component of effective risk-based security.
- **Associates Program:** Good security requires an engaged and empowered workforce with the training and experience necessary to effectively combat increasingly complex security threats. The TSA Associates Program provides a unique opportunity to strengthen our Nation's security by providing educational opportunities to bolster the skills of officers in one of the Federal Government's most visible agencies. Current and future security demands must be met by heightened abilities. This program serves as an investment in officers charged with such duties and promotes their ability to accurately uncover and address risk-based threats by supporting their acquisition of advanced technical knowledge and sharply honed organizational and critical thinking skills.
 - Coursework: The Associates Program is comprised of three primary homeland security courses; Introduction to Homeland Security, Intelligence Analysis and Security Management, and Transportation and Border Security. These three courses were selected due to their strong applicability to the requisite technical knowledge. The courses are offered in both face-to-face classroom and Distance Learning modalities.
 - Completion: The program allows Transportation Security Officers to earn a TSA Certificate of Achievement in Homeland Security. Upon completion of the Certificate of Achievement, students are encouraged to continue coursework concluding with TSOs earning an associate degree.
 - Deployment: This program was first piloted in FY 2008, and is currently represented at 217 airports, partnering with 94 colleges. As of spring 2014, 1,958 employees have earned a Certificate of Achievement across the Agency with 4,700 TSOs (10 percent of the workforce) participating. In FY 2014 and FY 2015, TSA will expand the use of Distance Learning to reach out to the smaller airports as well as expand classroom opportunities to medium to large airports.

Screener Consumables, Uniforms, and Other: \$85.4 million

Consumable supplies are critical materials used by TSOs to ensure effective screening of passengers, carry-on, and checked baggage. These consumable supplies include disposable gloves, sample swabs/wands, reactant materials, and baggage inserts, which both notify passengers that their bag has been inspected and provide contact information in the event of a problem. In addition, TSA provides

uniforms to new hires, as well as replacement uniforms to all TSOs through the annual allowance program. With the ratification of the collective bargaining agreement in FY 2012, TSA provides an annual replacement allotment valued at \$154 and a uniform allowance of up to \$317 and also provides TSOs with more uniform options.

This section also covers the Office of Professional Responsibility (OPR) which ensures fair and consistent disciplinary practice TSA-wide. OPR reviews and adjudicates allegations of misconduct for senior level, law enforcement employees, J band employees, and TSMs, tracking and oversight of misconduct cases, and adjudicating appeals of adverse actions issued against TSOs.

National Deployment Office: \$22.0 million

The National Deployment Office (NDO) mitigates and reduces risk where other means are unavailable by providing FSDs additional security personnel. The NDO provides TSOs, BDOs, and other operations personnel to FSDs for security screening support during crisis response and recovery operations, peak seasonal demands, special security events, risk mitigation or other activities that require higher-than-normal security related staffing levels, while protecting the Nation's transportation system. Each request for NDO support is analyzed from a cost/benefit/risk perspective to ensure the optimal use of these limited security personnel resources. For various types of disaster response operations, the NDO is responsible for deploying 14 Transportation Security Advance Teams, which include 210 personnel, and 43 Transportation Security Support Teams, which include 925 personnel.

Environmental Management Program: \$12.0 million

This program provides for the disposition of hazardous materials and abandoned personal property collected by TSA at checkpoints, as well as the maintenance of the environmental management system. TSA has an extensive and complex program to safely and securely identify, sort, store, and protect assets; as well as to remove and dispose of hazardous and voluntarily abandoned property.

**Department of Homeland Security
Transportation Security Administration
Checkpoint Support
Program Performance Justification**
(Dollars in Thousands)

PPA: Checkpoint Support

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	60	52	\$103,309
FY 2015 President's Budget	60	57	\$103,469
2016 Adjustments-to-Base	-	-	(\$6,204)
FY 2016 Current Services	60	57	\$97,265
FY 2016 Program Change	-	-	-
FY 2016 Total Request	60	57	\$97,265
Total Change 2015 to 2016	-	-	(\$6,204)

The FY 2016 Budget includes 60 positions, 57 FTE, and \$97.3 million for the Checkpoint Support PPA:

Adjustments to Base:

- Increase of \$110 thousand for pay inflation
- Increase of \$26 thousand for retirement contributions
- Decrease of \$690 thousand for the realignment of TSA's warehouse management support contract to the Airport Management and Support PPA
- Decrease of \$650 thousand to transfer funds to the Intel and Vetting Appropriation for Secure Flight and Credential Authentication integration support
- Decrease of \$5.0 million for efficiencies.

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of the PPA's Current Services:

Checkpoint Support PPA

(\$ in Millions)

	FY 2015 President's Budget	FY 2016 Budget
I. Technology Purchase, Testing, and Installation	\$24.0	\$33.2
II. Emerging Technology and Engineering Initiatives	\$56.2	\$37.7
III. Program Operations and Management	\$23.3	\$26.4
TOTAL	\$103.5	\$97.3

The FY 2016 Budget includes funding to test, procure, and deploy checkpoint capabilities to enhance threat detection and security effectiveness at approximately 2,200 passenger checkpoint lanes in our Nation's airports. Funds will be used for 1) checkpoint reconfiguration and optimization, 2) innovation and re-engineering initiatives for emerging technologies and threats, 3) enhanced integration and analytics of checkpoint technologies, and 4) strengthening the IT security posture for checkpoint equipment. The Checkpoint Support PPA also funds the Security Technology Integrated Program (STIP) and the Advanced Surveillance Program (ASP).

Technology Purchase, Testing and Installation: \$33.2 million

Through FY 2015, TSA will procure, test, and deploy checkpoint screening equipment to reach Full Operational Capability (FOC) levels to support newer Risk Based Security (RBS) requirements. Current technologies that have been deployed include:

- **Advanced Imaging Technology (AIT):** Screens passengers for metallic and non-metallic threats, including weapons, explosives, and other objects concealed under layers of clothing;
- **Next-Generation Advanced Technology X-Ray (AT-2):** Next-generation X-ray systems with advanced visual detection capabilities that use multi-view capabilities or automated explosives detection capabilities;
- **Boarding Pass Scanners (BPS):** Confirm passenger vetting status by automating the scanning of passenger boarding passes;
- **Bottled Liquids Scanners (BLS):** Screen bottles to determine if they contain prohibited liquids;
- **Enhanced Metal Detectors (EMD):** Screen persons for metallic weapons such as guns or knives; and,
- **Explosive Trace Detectors (ETD):** Test for explosive residue on selected passengers and carry-on items.
- **Credential Authentication Technology (CAT):** Digitally validate the passengers' credential with near-real time vetting status updates from Secure Flight

In FY 2015, TSA will complete testing and procurement of the Credential Authentication Technology (CAT), which will digitally validate the passengers' credential with near-real time vetting status updates from Secure Flight. This capability is being enabled through the automated transfer of information from Secure Flight through the STIP to the CAT units. In FY 2015 and FY 2016, TSA will procure and deploy CAT units to reach FOC. The deployment of CAT is essential in supporting RBS efforts and closing a known security vulnerability.

TSA continues to seek opportunities to drive cost savings throughout the procurement and deployment process for checkpoint capabilities, including leveraging quantity discounts and using available qualified product lists to conduct competitive procurements. TSA will closely coordinate with airports to ensure product delivery orders can be managed to reduce warehouse inventories and associated shipping and/or storage costs. The table below reflects the average cost per unit for each type of checkpoint technology:

Checkpoint Technology Unit Costs

(\$ in Thousands)

Technology	Average Costs*
AIT-2	\$109.0 (est.)
AT-2	\$128.3
BLS	\$32.8
BPS	\$1.7
CAT	\$17.3 (est.)
EMD	\$11.9
ETD	\$31.3

*Costs are subject to change based on final contract negotiations. For next generation AIT-2 systems and for CAT, estimates are used since TSA has not procured Full Rate Production units to date.

By the end of FY 2015, TSA will have reached FOC for the majority of the technologies based on 50% of passengers screened through TSA Pre✓[®] screening lanes. Once FOC is achieved for a particular technology, TSA will transition from the obtain phase to a sustain/enhance phase of the acquisition lifecycle for that purchased and deployed technology. During the sustain/enhance phase, current technology will be enhanced through capability upgrades. Additionally, TSA will continue to plan for the replacement of existing deployed equipment that has reached the end of its useful life, which is estimated at 10 years for all checkpoint technologies. Equipment is prioritized for replacement based on its ability to continue to meet detection requirements, maintenance history, operational performance, and useful life. The following chart depicts TSA's planned procurements as related to its latest planned FOC and recapitalization efforts:

Technology	FOC for 50% of Passengers Screened through TSA Pre✓ [®] Screening Lanes	Actual Number of Units Procured Through End of FY2014	Planned Checkpoint Technology Procurements By Funding Source								
			Carryover Funding ¹		FY 2015 President's Budget Request Funding		FY 2016 Requested Funding		Total Planned Purchases		
			Planned Purchases Towards FOC	Planned Recapitalization Purchases	Planned Purchases Towards FOC	Planned Recapitalization Purchases	Planned Purchases Towards FOC	Planned Recapitalization Purchases	Planned Purchases Towards FOC	Total Planned Recapitalization Purchases	
AIT	870	749	50	0	0	0	0	0	0	50	0
AT ²	2,030	2,197	0	0	0	0	0	0	0	0	0
BLS ³	1,530	1,690	0	0	0	0	0	0	0	0	0
BPS	2,100	1,475	625	0	0	0	0	0	0	625	0
CAD	255	255	0	0	0	0	0	0	0	0	0
CAT	1,520	12	1,255	0	253	0	0	0	0	1,508	0
EMD ⁴	1,438	1,445	0	193	0	0	0	0	897	0	1,090
ETD	2,480	1,395	1,085	0	0	0	0	0	0	1,085	0

1. Carryover funding includes the 2007 Supplemental, 2008 Airport Checkpoint Screening Fund, General Provision 515 Recoveries, and 2014 Expiring Checkpoint Support accounts.

2. The previous FOC for AT was set at 2,215 units. Due to RBS initiatives, the FOC has been reassessed and updated/lowered to 2,030 units.

3. In FY 2013, BLS procurements achieved FOC, which was 1,690 units. Due to RBS initiatives, the FOC has been reassessed and updated/lowered to 1,530 units.

4. The previous FOC was achieved in 2006. Due to RBS initiatives, the FOC has been reassessed and updated/lowered to 1,438 units.

TSA will formally assess FOC and recapitalization requirements annually to ensure alignment with TSA strategic goals, plans and polices. These reviews may result in changes to the FOC targets to better reflect the amount of transportation security equipment (TSE) required to meet the screening needs. When evaluating equipment FOCs, TSA is planning its TSE amounts based on the Agency's goal of having approximately 50% of passengers screened through TSA Pre✓[®] screening lanes. When approximately 50% TSA Pre✓[®] volume is achieved, fewer standard screening lanes will be necessary. This is expected to result in new FOC for each airport, which will necessitate the realignment of TSE system-wide, including the relocation of AIT and AT systems. In FY 2015, TSA will assess the efficiencies gained by RBS initiatives and funding will begin to be used for equipment realignments and checkpoint optimization efforts.

Emerging Technology and Engineering Initiatives: \$37.7 million

TSA will utilize the FY 2016 funding to focus more on a broad range of assessment and engineering activities to increase the capabilities and prolong the life of existing equipment. This will be done through system software patching and upgrades, operating system upgrades, technical risk assessments, system certification and accreditation assessments and security compliance assessments. The FY 2016 Budget will further reinforce this transition by allowing TSA to expand its work with industry in enhancing existing checkpoint capabilities and increasing detection and efficiencies; to invest in new technologies to better protect against emerging threats; and to examine additional capabilities or alternative concept of operations that can improve TSA's ability to assess threats. TSA will also partner with other stakeholders in developing a security screening equipment architecture to provide a conceptual model of the current and future system structure, its components, and the relationships between them.

Starting in FY 2016, funding will also support the establishment of a quality assurance and surveillance process to ensure installed equipment continues to meet mission requirements. By implementing this process, TSA can ensure checkpoints are continuing to operate per the Agency's requirements. TSA will also begin planning activities and market analysis for future planned recapitalization procurements as the Checkpoint Support program shifts to the sustain/enhance phase of the acquisition lifecycle.

The 2016 Budget will support the development of emerging technologies and engineering initiatives in order to increase TSA's ability to respond to the evolving and ever-changing threat landscape. Specifically, TSA will invest in the following initiatives in FY 2016:

- I. Checkpoint Optimization
- II. Emerging Technology Development and Testing
- III. Mission Engineering and System Analysis
- IV. Enhanced Integration and Analytics
- V. TSE network security
- VI. Advanced Surveillance Program

I. Checkpoint Optimization

In order to continue to reduce costs, TSA has been focused on designing, developing, and procuring capabilities based on their ability to be upgraded. In FY 2016, the Checkpoint Support funding will focus more on a broad range of assessment and engineering activities that will advance the Checkpoint's RBS concept of operations through analysis of the checkpoint configuration and through lane reductions. The funding will also support studies for implementing Risk-Based Security (RBS). For example, by conducting equipment lifecycle analysis and testing studies, TSA can better prepare for recapitalization efforts. Additionally, Threat Assessment Capability (TAC) optimization initiatives will align checkpoint capabilities to optimally support emerging RBS requirements. Finally, the FY 2016 Budget will help to optimize TSA's logistics and warehouse processes to help reduce the total cost of TSE ownership.

II. Emerging Technology Development and Testing

In FY 2016, TSA will utilize funding to respond to emerging threats through the continued development and testing of emerging technologies. TSA will continue to explore emerging capabilities through market analysis, Industry Days, and Proofs of Concepts. This will ensure that TSA understands the technology trade space and can adequately plan for future and emerging capabilities. Furthermore, by leveraging incremental development practices, TSA can validate and/or enhance future capabilities prior to making larger financial commitments. TSA will also work with industry and DHS Science and Technology Directorate to develop and test new capabilities to drive operational efficiencies. New capabilities can include remote screening and Common Graphical User Interface for equipment in the field.

III. Mission Engineering and Systems Analysis

In FY 2016, TSA will continue ongoing mission engineering efforts to include the development of the TSE System Architecture, which will provide a conceptual model of the current and future security system structure, its components, and the relationships between them. This TSE System Architecture will help to better guide future technology developments and investments to fully meet TSA's evolving requirements. It will also be designed to be adaptable, modularized and potentially automated to best implement the agency's vision for RBS. The intent is to develop a virtual and physical architecture test-bed in order to drive further system interoperability.

The 2016 Budget will also be used to enable continued innovation in security technologies. TSA will provide support to companies with novel technological transportation security solutions through Transportation Security Innovative Concepts (TSIC) Broad Agency Announcement (BAA). Additionally, TSA will continue to expand capabilities and implementation of risk analysis tools and methodologies to increase risk-informed decision making. Through a continued focus on systems analysis, TSA will develop a framework for assessing the intrinsic risk associated with various population subsets to support RBS initiatives.

IV. Enhanced Integration and Analytics

TSA strives to automate technologies and detection processes to reduce scanning and image processing times, human error, and the number of personnel needed at the checkpoint.

In FY 2016, TSA will fund enhanced business intelligence tools to better develop data and analytical capabilities to support better decision-making for screening technology procurements and upgrade requirements. This includes investing in the maturation of internal processes that assess fielded technology's ability to meet mission requirements. TSA will also fund a quality assurance program to ensure requirements are being met for fielded systems.

Through FY 2015, TSA has undertaken a significant effort to develop the Security Technology Integrated Program (STIP). STIP is a TSA data information technology program that connects all TSE to a single network, enabling two-way exchange of information. STIP also supports mission critical security by connecting TSE, such as CAT systems, with Secure Flight to provide near-real time vetting status updates. To support integrated and dynamic future capabilities at aviation checkpoints, TSA will continue to invest in enhancements to STIP in FY 2016. Specifically, funds will support the connection of approximately 9,000 TSEs to the TSA network. In FY 2016, TSA will continue to enhance this capability and increase automation and equipment integration to more efficiently and effectively screen passengers, improve the overall passenger experience, and promote cost savings.

V. TSE network security

An additional focus area for TSA in FY 2016 is to proactively address emerging security threats to equipment that is connected to the TSA network at airports nationwide. In coordination with the TSA Office of Information Technology, FY 2016 funds will be used to strengthen the IT security posture of screening equipment and other checkpoint capabilities to ensure they are secure and properly protected from intrusion. The FY 2016 Budget will be used to enhance TSE network security testing, conduct technical risk assessments, and continue to analyze and to identify emerging IT requirements.

VI. Advanced Surveillance Program (ASP)

To further enhance checkpoint security, the FY 2016 Budget will also fund additional layered security capabilities at federalized airports through the ASP. This program is responsible for managing closed-circuit television (CCTV) surveillance equipment to observe and detect people and property moving through the security screening process and facilities. Advanced surveillance systems have proven to be a key component in the security industry worldwide. In FY 2016, ASP funding is planned for projects at LaGuardia Airport and San Diego International Airport. The EDS Procurement and Installation PPA also includes funding to support these ASP projects in baggage handling areas.

	Projects Completed Through FY 2015	Projects Planned With FY 2016 Funds
ASP Projects	98	2

Program Operations and Management: \$26.4 million

Funding in FY 2016 will enable adequate staffing for management of checkpoint support activities and training for optimal performance. Additionally, the FY 2016 Budget will cover TSA Systems

Integration Facility costs, provide Government employees the tools and technology required to perform their function, and private sector advisory services to support delivery of mission needs. The 2016 Budget request will support:

- Personnel, Compensation & Benefits;
- Program, Resource & Data Management;
- Business Operations; and,
- Personnel Travel, Training and Certification.

MAJOR ACQUISITIONS:

Passenger Screening Program

The Passenger Screening Program (PSP) identifies, tests, procures, deploys, and sustains equipment to detect threats concealed on people and in their carry-on items as they enter the airport terminal sterile area through the passenger screening checkpoints. PSP is composed of three capability areas: People Screening, Carry-on Baggage Screening, and Layered Security. While increasing screening effectiveness, PSP also balances other operational considerations such as maximizing checkpoint efficiency; mitigating privacy and dignity concerns; maintaining operational affordability; reducing security risk; and addressing deployment, maintenance, and other equipment life cycle issues. PSP is evaluating the next generation of detection systems to enhance current screening capabilities. PSP addresses a capability gap by creating a security system that is an optimized, integrated, and layered mix of networked systems that address known and emerging threats and vulnerabilities, and supports risk-based security initiatives.

The PSP investment is to be funded out of multiple PPAs in FY 2016, as follows:

- Checkpoint Support PPA \$86.0 million
- Screening Technology Maintenance PPA \$86.8 million

Activity Funding

(\$ in Thousands)

FY 2014 Revised Enacted	FY 2015 President’s Budget	FY 2016 Budget
\$167,704	\$170,065	\$172,752

FY 2016 Funding Breakout

(\$ in Thousands)

Program Area	Sub-Program	Mission Need
Planning \$13,422	Technology and Engineering Initiatives	Funds planning and oversight of testing, engineering initiatives, and test and evaluation in support of passenger and carry-on baggage screening equipment
Acquisition - \$72,118	Purchase of TSE	Funds support the procurement of security equipment to screen passengers and carry-on baggage at passenger checkpoint lanes
	Integration and Installation of TSE	Funds support the deployment and installation of security equipment, engineering changes to include technology upgrades and detection algorithm development as well as risk advisory initiatives in support of the checkpoint environment throughout the Nation’s airports. Funding will also sustain business operation activities and program management support.
Maintenance - \$87,212	TSE Maintenance	Funds the preventive and corrective maintenance activities required to maintain the operation of deployed checkpoint passenger screening equipment upon expiration of the warranty period
	Transportation Security Equipment Disposal	Funds the disposal of checkpoint passenger screening equipment

Security Technology Integrated Program

STIP is a TSA data information technology program that connects all TSE to a single network, enabling two-way exchange of information. STIP provides a dynamic, adaptable communications infrastructure that facilitates the transfer of information to and from TSE. STIP enables centralized management and monitoring of the TSE fleet and provides the ability to respond to the rapidly changing threat environment in a more agile manner, resulting in improvements in efficiency and effectiveness of screening operations and threat detection. Without a networked system, TSA lacks the ability to dynamically adapt technology to evolving threats. STIP will meet information collection, retrieval, and dissemination requirements of the PSP and the Electronic Baggage Screening Program (EBSP), and address potential areas of improvement within operations and maintenance for TSE.

The STIP investment is to be funded out of multiple PPAs in FY 2016, as follows:

- Checkpoint Support PPA \$6.1 million
- EDS Procurement and Installation PPA \$8.5 million

Activity Funding

(\$ in Thousands)

FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Budget
12,892	14,254	14,577

FY 2016 Funding Breakout

(\$ in Thousands)

Program Area	Sub-Program	Mission Need
Planning – \$704	Checkpoint security technology	Funds planning for all current and future STIP activities (such as deployment, connectivity, data management, storage, and analysis) related to checkpoint screening technologies
	Checked baggage screening technology	Funds planning for all current and future STIP activities (such as deployment, connectivity, data management, storage, and analysis) related to checked baggage screening technologies
Acquisition - \$6,689	Checkpoint security technology	Funds will be used for development, integration, and deployment of STIP enablement and centralized and automated software upgrades for checkpoint screening technologies
	Checked baggage screening technology	Funds will be used for development, integration, and deployment of STIP enablement and centralized and automated software upgrades for checked baggage screening technologies
Maintenance - \$7,184	Checkpoint security technology	Funds used for the management and oversight of the STIP EM system which consists of back-end server and associated network infrastructure to optimize screening effectiveness and availability
	Checked baggage screening technology	Funds used for the management and oversight of the STIP EM system which consists of back-end server and associated network infrastructure to optimize screening effectiveness and availability

PPA: EDS Procurement and Installation

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	124	112	\$73,845
FY 2015 President's Budget	126	118	\$84,075
2016 Adjustments-to-Base	(3)	(3)	(\$695)
FY 2016 Current Services	123	115	\$83,380
FY 2016 Program Change	-	-	-
FY 2016 Total Request	123	115	\$83,380
Total Change 2015 to 2016	(3)	(3)	(\$695)

The FY 2016 Budget includes 123 positions/115 FTE, and \$83.380 million in FY 2016 for the EDS Procurement and Installation PPA:

Adjustments-to-Base:

- Increase of \$231 thousand for pay inflation
- Increase of \$58 thousand for retirement contributions
- Decrease of 3 FTP/3FTE and \$984 thousand associated with the realignment of TSA's warehouse management personnel and support contract to the Airport Management and Support PPA.

CURRENT SERVICES DESCRIPTION:

The following table provides a breakout of checked baggage funding for FY 2015 and FY 2016, including \$83.4 million in appropriated funds and \$250million from the Aviation Security Capital Fund (ASCF):

EDS Procurement and Installation PPA

(\$ in Millions)

	Funding Source	FY 2015	FY 2016
		President's Budget	Budget
Other Transaction Agreements	ASCF	61.2	79.5
Technology Purchase and Installation	ASCF	151	113.6
Technology Capability Enhancement Initiatives	<i>Discretionary</i>	38.7	38.2
	ASCF	37.8	56.9
Program Operations & Management	<i>Discretionary</i>	45.4	45.2
TOTAL*		\$334.10	\$333.40

*Includes mandatory funding of \$250.0 million from the ASCF in both FY 2015 and FY 2016.

The *Aviation and Transportation Security Act of 2001 (ATSA)* (P.L. 107-71) mandated that 100 percent of aviation checked baggage be screened by electronic or other approved means. To ensure this, the TSA's Electronic Baggage Screening Program (EBSP) is responsible for the procurement and deployment of a variety of screening solutions. TSA met the ATSA mandate to screen all checked baggage by electronic or other approved means by December 2003.

Since meeting the mandate, TSA's checked baggage focus expanded to ensure that all airports' screening zones use the most efficient technologies and resources to screen checked baggage. This is being done by funding new in-line system facility modification projects. As of December 2014, 100% of Category IV (CAT IV) airports and 94% of all CAT X-III airports are screening with the most efficient technologies for their screening configurations. TSA does not anticipate receiving applications from the airports that could bring CAT X-III airports to 100% since these projects are required to be funded through a cost share agreement between TSA and the airport. If an airport is unable to participate in an in-line project, TSA cannot impose an in-line baggage screening project on the airport.

As of December 2014, TSA has approximately 1,800 EDS and 2,600 Explosives Trace Detection (ETD) units deployed for checked baggage screening at airports nationwide. While the screening mandate has been met and significant improvements have been made to airport baggage screening operations nationwide, a large majority of TSA's checked baggage technology fleet was deployed simultaneously to meet the ATSA mandate, which has resulted in this equipment reaching the end of its useful life at the same time. Therefore, TSA has shifted priorities to the recapitalization of equipment and enhancement of threat detection capabilities in alignment with Risk Based Security (RBS) initiatives.

As a result of this shift in priorities, TSA requested legislative changes to restrictions on the use of funding received from the Aviation Security Capital Fund (ASCF), which previously restricted the use of funds to facility modifications at airports. Upon legislative approval in FY 2012 through FY 2014, TSA has used ASCF funds for the procurement and installation of EDS equipment required for its recapitalization efforts in addition to facility modifications. TSA requested the legislative change in the FY 2015 President's budget request and will do so again in FY 2016.

The FY 2016 Budget request will support TSA's shift in priorities and focus on recapitalization efforts and enhancing capabilities. The FY 2016 Budget will be used to test, evaluate, procure, and deploy electronic baggage screening technology systems with the latest threat detection capabilities, and continue to integrate RBS principles into the checked baggage systems. The FY 2016 funding will also be used for enhancing capabilities of currently deployed EDS, replacing units reaching the end of their useful life and expanding standardization across the fleet of systems at airports nationwide.

Other Transaction Agreements: \$79.5 million

In FY 2012, TSA began to shift its focus to recapitalization and optimization. Recapitalization is the replacement or upgrade of fielded equipment that has reached the end of useful life with in-kind technology of similar size and throughput. TSA utilizes multi-year Other Transaction Agreements (OTAs) with airports to support the design and facility modification efforts associated with recapitalization to enable the deployment of new and enhanced screening capabilities.

Initially, recapitalization prioritization was driven primarily by machine age. In FY 2012 and FY 2013, TSA recapitalized equipment based on a 10-year useful life assumption based on expected mechanical failure. While TSA engaged an airport for recapitalization, it also considered the airport for optimization. Optimization is the review of an airport’s checked baggage screening solution to identify opportunities for efficiencies from both a system and a resource perspective. TSA funded approximately 70 OTAs with airports in FY 2012 – 2013 to support recapitalization and optimization projects.

OTAs in Support of Recapitalization

*(Dollars in Millions)**

FY 2015 President’s Budget		FY 2016 Budget	
Airport	Amount	Airport	Amount
Cleveland Hopkins International	29.8	Chicago O’Hare International	37.8
Fairbanks International	1.9	Philadelphia International	22.4
Houston Intercontinental	29.0	Houston Intercontinental	12.9
Ft. Lauderdale-Hollywood International - RBS Pilot	0.3	Burbank	6.4
Portland International - RBS Pilot	0.3		
Total	\$61.2	Total	\$79.5

*Amounts may be off slightly due to rounding

Technology Purchase and Installations: \$113.6 million

TSA accomplishes its checked baggage security mission by managing the acquisition lifecycle of Explosives Detection Systems (EDS) and Explosives Trace Detection (ETD) machines.

EDS equipment uses computed tomography (CT) technology to automatically measure the physical characteristics of objects in baggage, and triggers an alarm if the physical characteristics of an explosive are detected. This equipment can exist in two configurations:

- Standalone systems are typically found in lobby screening for small airports, or in larger airports with terminals that have low baggage volumes.
- In-line configurations integrate the EDS equipment into the baggage handling system that is customized for each airport. This type of automation improves working conditions for Transportation Security Officers (TSOs), as alarms can be resolved in quieter, dedicated spaces that are properly designed for the alarm resolution function. Inline systems also contribute to reduced TSO injury rates.

EDS technologies are classified as follows:

- High-speed (HSEDS): Throughput > 900 bags per hour (bph)
- Medium-speed (MSEDS): 400 < Throughput ≤ 900 bph
- Reduced-size (RSEDS): 100 < Throughput ≤ 400 bph

ETD equipment is used to chemically analyze checked baggage for any traces of explosive material. ETDs are used both as primary and secondary screening methods (i.e., resolving EDS alarms) and are designed to detect explosives residue left on an item. ETDs are the second largest component of equipment cost within the checked baggage screening program.

In FY 2015, TSA received approval to purchase 85 ETD units. With this procurement, TSA will have reached the Full Operational Capability (FOC) for next generation ETD needed for checked baggage screening operations. The FY 2016 Budget includes funding to support the purchase of 53 MSEDs for deployment in our Nation’s airports. Equipment purchased in FY 2016 will be installed in facilities where modification projects are either completed or near completion. In addition, units will be procured to recapitalize equipment in the field. It is important to note that the quantity of purchases and installation occurring in a given fiscal year will not always match. Airport projects are often multi-year efforts resulting in the purchase of equipment one fiscal year, but deployment of it in the next to align with the airport’s project schedule and screening needs. The table below provides a breakout of planned checked baggage technology purchases in FY 2015 and 2016.

Planned Technology Purchases
(Dollars in Millions)*

Equipment Type	FY 2015 Presidents Budget			FY 2016 Budget		
	Planned Purchases	Cost/Unit	Projected Costs	Planned Purchases	Cost/Unit	Projected Costs
ETD	85	0.04	3.8	0	0	0
RSEDs	5	0.6	3.0	0	0	0
MSEDs	62	1.1	70.5	53	1.1	56.4
HSEDs	3	1.2	3.7	0	0	0
TOTAL	155		\$81.0	53		\$56.4

*Amounts may be off slightly due to rounding

Since 2010, TSA has been engaged in an EDS Competitive Procurement (EDS-CP) to test and procure next generation EDS. This strategy has allowed TSA to successfully deploy enhanced capabilities to the field in support of its recapitalization efforts. To sustain recapitalization priorities and fulfill purchase requirements for FY 2015-2017, TSA will continue to procure EDS models listed on the current EDS-CP Qualified Product List (QPL). However, TSA will close the current EDS-CP QPL to new entrants, starting February 13, 2015, and release new requirements for next generation EDS in late FY 2015 at the earliest, supporting a shift of focus to the enhanced capabilities mission.

Technology Capability Enhancement Initiatives: \$95.1 million

TSA will utilize the FY 2016 funding to support the shift of programmatic priorities from the purchase and install of EDS equipment to the enhancement of technology capabilities and the development of the next generation checked baggage screening solutions. The FY 2016 budget will allow TSA to make the following improvements, all of which will contribute to TSA’s ability to substantially improve the effectiveness and efficiency of the deployed screening equipment:

- increase threat detection capabilities,
- increase equipment reliability and reduce downtime,
- expand equipment standardization to reduce variation for TSOs,
- extend service life,
- and eliminate TSO safety hazards.

The FY 2016 Budget will also support the development of new algorithms to detect evolving threats. TSA expects new algorithms in the near term with the ability to more reliably detect homemade explosive formulations in checked baggage while also reducing false alarm rates. In coordination with

DHS Science and Technology Directorate and industry, TSA is working to certify, qualify and implement improved algorithms on both in-service EDS as well as new systems currently under development. TSA will continue implementation of its Incremental Development Strategy to allow vendors to refine their automatic detection algorithms so that increasingly effective equipment types can become certified and qualified for purchase by TSA.

TSA will also utilize the FY 2016 funding to analyze the integration of new and modified systems and concepts of operation to ensure operational effectiveness and suitability prior to full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment under the proposed concept of operations in the field under a variety of environmental conditions.

In addition to enhancing threat detection and equipment standardization, the FY 2016 Budget request will also support:

- Test and evaluation of new security technologies, procedures, and policies through independent verification and validation testing;
- Site survey and design;
- Facility modification and site preparation;
- Warehousing and shipping;
- Operational Test and Evaluation (OT&E) for checked baggage systems, air cargo, and surface transportation; and,

To further enhance checked baggage security, the FY 2016 Budget will also fund additional layered security capabilities at federalized airports through the Advanced Surveillance Program (ASP). This program is responsible for managing closed-circuit television (CCTV) surveillance equipment to observe and detect people and property moving through the security screening process and facilities. Advanced surveillance systems have proven to be a key component in the security industry worldwide. In FY 2016, ASP funding is planned for projects at LaGuardia Airport and San Diego International Airport. The Checkpoint Support PPA also includes funding to support these ASP projects in baggage handling areas.

	Projects Completed Through FY 2015	Projects Planned With FY 2016 Funds
ASP Projects	98	2

Program Operations & Management: \$45.2 million

PO&M encompasses activities needed for the procurement and deployment of security systems to the Nation’s airports. Funding in FY 2016 will enable adequate staffing for management of checked baggage activities and training for optimal performance. Additionally, the FY 2016 budget will cover TSA Systems Integration Facility operations costs, engineering support (including design reviews), and provide Government employees the tools and technology required to perform their function and private sector advisory services to support delivery of mission needs. The 2016 Budget request will also support:

- Personnel, Compensation & Benefits;
- Program, Resource & Data Management;

- Business Operations; and,
- Personnel Travel, Training and Certification.

MAJOR ACQUISITIONS:

Electronic Baggage Screening Program

The EBSP identifies, tests, procures, deploys, installs, sustains, and recapitalizes Transportation Security Equipment (TSE) across all Federalized airports to ensure 100% screening of checked baggage. The EBSP supports screening to minimize the risk of personal injury or death, or damage or loss of property due to terrorist or criminal activity. It reduces costs and improves security screening efficiency through automation of processes to detect and prevent the introduction of explosives materials, weapons, and other dangerous articles into commercial aircraft. Key objectives are: increasing threat detection capability; improving checked baggage screening efficiency; replacing aging EDS and ETD units; and using competitive procurement contracts for new and viable technologies. The EBSP addresses a capability gap by screening 100% of checked baggage.

The EBSP investment is to be funded out of multiple PPAs in FY 2016, as follows:

- EDS Procurement and Installation PPA \$51.2 million
- Screening Technology Maintenance PPA \$193.7 million
- Aviation Security Capital Fund PPA \$250.0 million

Activity Funding

(\$ in Thousands)

FY 2014 Actual	FY 2015 President’s Budget	FY 2016 Budget
\$503,498	\$518,848	494,911

FY 2016 Funding Breakout

(\$ in Thousands)

Program Area	Sub-Program	Mission Need
Planning - \$34,520	Technology and Engineering Initiatives	Funds planning and oversight of testing, engineering initiatives, and test and evaluation in support of checked baggage screening equipment operations
Acquisition – \$265,794	Purchase of TSE	Funds support the procurement of checked baggage screening equipment (EDS and ETDs) to fulfill facility modification agreements and/or to support the equipment recapitalization effort
	Installation of TSE	Funds support the installation of checked baggage screening equipment (EDS and ETDs) throughout the nation’s airports
Maintenance – \$194,597	TSE Maintenance	Funds the preventive and corrective maintenance activities required to maintain the operation of deployed checked baggage screening equipment upon expiration of the warranty period.
	TSE Disposal	Funds the disposal of checked baggage screening equipment

Security Technology Integrated Program

STIP is a TSA data information technology program that connects all Transportation Security Equipment (TSE) to a single network, enabling two-way exchange of information. STIP provides a dynamic, adaptable communications infrastructure that facilitates the transfer of information to and

from TSE. STIP enables centralized management and monitoring of the TSE fleet and provides the ability to respond to the rapidly changing threat environment in a more agile manner, resulting in improvements in efficiency and effectiveness of screening operations and threat detection. Without a networked system, TSA lacks the ability to dynamically adapt technology to evolving threats. STIP will meet information collection, retrieval, and dissemination requirements of the PSP and the EBSP, and address potential areas of improvement within operations and maintenance for TSE.

The STIP investment is to be funded out of multiple PPAs in FY 2016, as follows:

- Checkpoint Support PPA \$6.1 million
- EDS Procurement and Installation PPA \$8.5 million

Funding tables for this investment are included in the Checkpoint Support PPA

**Department of Homeland Security
Transportation Security Administration
Screening Technology Maintenance
Program Performance Justification**
(Dollars in Thousands)

PPA: Screening Technology Maintenance

	Perm. Pos.	FTE	Amount
FY 2014 Revised Enacted	-	-	\$286,179
FY 2015 President's Budget	-	-	\$294,509
2016 Adjustments-to-Base	-	-	(\$14,000)
FY 2016 Current Services	-	-	\$280,509
FY 2016 Program Change	-	-	-
FY 2016 Total Request	-	-	\$280,509
Total Change 2015 to 2016	-	-	(\$14,000)

The FY 2016 Budget includes \$280.509 million for the Screening Technology Maintenance PPA:

Adjustments-to-Base:

- Decrease of \$14.0 million from equipment maintenance savings

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of the PPA's Current Services:

Screening Technology Maintenance PPA
(\$ in Millions)

	FY 2015 President's Budget	FY 2016 Budget
Checked Baggage Equipment Maintenance	\$215.8	\$192.7
Checkpoint Equipment Maintenance	76.7	85.8
Disposal*	2.0	2.0
TOTAL	\$294.5	\$280.5

* Disposal amount is allocated evenly between Checked Baggage and Checkpoint Equipment.

Funding in this PPA supports the maintenance and disposal of TSE in the Nation's airports. Maintenance is essential to preserve the operational capability of security technology equipment. During the warranty period, the Original Equipment Manufacturer (OEM) is responsible for all preventive and corrective maintenance actions as specified in each technology acquisition contract. The OEM warranty period for major TSE begins when the equipment passes a Site Acceptance Test (SAT). After warranties expire, all TSA checkpoint and checked baggage screening equipment is under a maintenance contract throughout its life cycle. Most maintenance is performed by contractor Field Service Technicians working for the OEMs or a third party Maintenance Service Provider.

Preventive maintenance is defined as periodic scheduled maintenance actions performed to preserve equipment reliability and is performed according to the manufacturer’s recommended schedule (e.g., monthly, annually, etc.). Corrective maintenance consists of all actions performed or directed by a field service technician, as a result of equipment failure, to restore the equipment to operational condition. Corrective maintenance support is provided 24 hours a day, 7 days a week. Maintenance contracts include labor costs for all preventive and corrective maintenance, as well as material costs for repair parts or consumables (e.g., ETD unit swabs).

In FY 2016, funding in this PPA will support maintenance services, through firm fixed unit price contracts, for over 13,000 pieces of security equipment that have come out of OEM warranty. The \$14.0 million decrease in the FY 2016 Budget is due to contract efficiencies and savings initiatives, including removal of excess equipment from the field, retiring obsolete technologies, and the favorable pricing achieved by the competitive award of follow-on and new maintenance service contracts.

Checked Baggage Equipment Maintenance: \$192.7 million

This Budget includes funding for preventive and corrective maintenance activities required to maintain the operation of deployed checked baggage screening systems. These costs include labor; repair parts; packaging and transportation of repair parts; initial consumables for ETDs; tools, test equipment and calibration; maintenance training; and related logistics, data management, safety, occupational health, and environmental management functions.

The table that follows includes detailed projected maintenance costs for checked baggage screening equipment. The FY 2016 fielded quantities are subject to change based on the timing of procurements and deployments. Because the warranty period begins after successful SAT and because units are fielded throughout the year, the number of units in and out of warranty varies throughout the fiscal year. The FY 2016 requirement represents the projected maintenance cost for those units no longer under warranty, not the unit cost for the total number of fielded units.

Disposal				\$ 1,000,000

* The make/model of the equipment is subject to change based on actual acquisitions.

Disposal: \$2.0 million

The FY 2016 Budget includes funding for the disposal of equipment. Security equipment is decommissioned when evolving operational requirements (e.g., higher screening throughput), technological advancements (e.g., improved detection capability), or supportability problems (e.g., frequent failures) dictate the need for replacement. Sometimes equipment is redeployed to satisfy screening requirements at other airports or loaned to partner nations based on requirements from the TSA Office of Global Strategies (OGS). Upon request, security equipment that is not redeployed is offered to other DHS and Federal agencies, or returned to manufacturers for credit on future

procurements. Otherwise, surplus equipment is provided to the Defense Logistics Agency (DLA) Disposition Services for salvage and destruction. This budget includes funding to remove Sensitive Security Information and hazardous material from disposal equipment and for DLA disposal services.

MAJOR ACQUISITIONS:

Passenger Screening Program

The PSP identifies, tests, procures, deploys, and sustains equipment to detect threats concealed on people and in their carry-on items as they enter the airport terminal sterile area through the passenger screening checkpoints. PSP is composed of three capability areas: People Screening, Carry-on Baggage Screening, and Layered Security. While increasing screening effectiveness, PSP also balances other operational considerations such as maximizing checkpoint efficiency; mitigating privacy and dignity concerns; maintaining operational affordability; reducing security risk; and addressing deployment, maintenance, and other equipment life cycle issues. PSP is evaluating the next generation of detection systems to enhance current screening capabilities. PSP addresses a capability gap by creating a security system that is an optimized, integrated, and layered mix of networked systems that address known and emerging threats and vulnerabilities, and supports risk-based security initiatives..

The Passenger Screening Program investment is to be funded out of multiple PPAs in FY 2016, as follows:

- Checkpoint Support PPA \$86.0 million
- Screening Technology Maintenance PPA \$86.8 million

Funding tables for this investment are included in the Checkpoint Support PPA.

Electronic Baggage Screening Program

The EBSP identifies, tests, procures, deploys, installs, sustains, and recapitalizes Transportation Security Equipment (TSE) across all Federalized airports to ensure 100% screening of checked baggage. The EBSP supports screening to minimize the risk of personal injury or death, or damage or loss of property due to terrorist or criminal activity. It reduces costs and improves security screening efficiency through automation of processes to detect and prevent the introduction of explosives materials, weapons, and other dangerous articles into commercial aircraft. Key objectives are: increasing threat detection capability; improving checked baggage screening efficiency; replacing aging Explosives Detection System (EDS) and Explosive Trace Detection (ETD) units; and using competitive procurement contracts for new and viable technologies. The EBSP addresses a capability gap by screening 100% of checked baggage..

The EBSP investment is to be funded out of multiple PPAs in FY 2016, as follows:

- EDS Procurement and Installation PPA \$51.2 million
- Screening Technology Maintenance PPA \$193.7 million
- Aviation Security Capital Fund PPA \$250.0 million

Funding tables for this investment are included in the EDS Procurement and Installation PPA.

FY 2016 Total Request	1,590	1,526	\$349,013
Total Change 2015 to 2016	(24)	(23)	\$360

TSA requests 1,590 positions, 1,526 FTE and \$349.013 million in FY 2016 for the Aviation Regulation and Other Enforcement PPA

Adjustments to Base:

- Increase of \$2.606 million for pay inflation
- Increase of 5 FTP/ FTE and \$783 thousand for a transfer from Surface Transportation Security appropriation to align international operations under one PPA
- Increase of 3 FTP/FTE and \$437 thousand for a transfer from Transportation Security Support appropriation to support the Office of Security Policy and Industry Engagement
- Decrease of 1 FTP/FTE and \$210 thousand for a transfer to Intelligence and Vetting appropriation to support the Office of Intelligence and Analysis
- Decrease of \$1.0 million for anticipated savings from reductions to non-mission travel
- Increase of \$754 thousand for retirement contributions

Program Changes:

- Decrease of 31 FTP/ 30 FTE and \$3.010 million from Transportation Security Inspectors RBS efficiencies.

CURRENT SERVICES PROGRAM DESCRIPTION:

Aviation Regulation is responsible for providing law enforcement and regulatory presence at airports to ensure compliance with required security measures and response to security incidents. It also provides an international component to foster consistency in worldwide security requirements and ensure compliance with TSA requirements and International Civil Aviation Organization (ICAO) baseline standards.

The following table provides the components of this PPA:

Aviation Regulation and Other Enforcement PPA

(\$ in Millions)

	FY 2015 President's Budget	FY 2016 Request
Domestic Regulatory Inspection and Enforcement	\$79.8	\$78.0
International Programs		
International Inspection and Enforcement	\$12.6	\$12.5
International Operations	\$49.1	\$49.3
Airport Law Enforcement & Assessments	\$70.3	\$70.7
National Explosives Detection Canine Team Program (NEDCTP)	\$127.4	\$128.5
General and Commercial Aviation	\$9.5	\$10.0
TOTAL	\$348.7	\$349.0

Domestic Regulatory Inspection and Enforcement: \$78.0 million

The mission of the regulatory inspection program is broad and involves the evaluation of the security integrity of the 443 U.S. airports and a combined total of over 1,500 domestic and international carriers that operate in the United States. These inspectors also conduct periodic inspections of over 7,500 Indirect Air Carriers (IACs) operating in the United States.

Over the past few years, TSA's inspector community has made significant efforts to ensure that various airport inspections are scheduled in a way that balances and maximizes oversight while identifying possible efficiencies in scheduling. Analysis of inspection data as well as risk scores are used to drive and prioritize inspection activity and take into account various factors, including the latest intelligence information.

The chart that follows provides historical and current information on the total number of Transportation Security Inspector (TSI) positions. This PPA includes 1,014 TSI-Aviation Domestic Inspectors, of which 310 are Canine Handlers; 48 TSI-Aviation International Inspectors; and 15 TSI International Repair Station Inspectors.

Transportation Security Inspector Positions

	FY 2014	FY 2015	FY 2016
Aviation Regulation	966	1,045	1,014
Domestic Inspectors	654	672 ¹	641 ⁵
Domestic Canine Inspectors ²	190	310 ²	310
VIPR Inspectors	45 ¹	0 ¹	0
International Inspectors	62	48 ³	48
International Repair Station Inspectors	15	15	15
Air Cargo	681	577	554
Domestic Inspectors	500	496 ³	473 ⁵
Domestic Canine Inspectors	120	0 ²	0
International Inspectors	61	81 ³	81

Transportation Security Inspector Positions, Cont'd

Surface	300	319	302
Domestic Inspectors	225	272 ⁴	259 ⁵
VIPR Inspectors	75 ⁴	0 ⁴	0
Multi-Modal VIPR Inspectors	0	47 ^{1,4}	43 ⁵
Total Inspectors	1,947	1,941	1,870

¹ The VIPR program was proposed for consolidated in FY 15 to perform multimodal operations. Of the 45 previous Aviation VIPR inspector positions, 18 were realigned to Domestic Inspectors and the balance of 27 were moved to multi-modal VIPR inspectors in the Surface Appropriation.

² Includes 120 previous cargo canines as a result of consolidating the Canines program into Aviation Regulation.

³ 14 international inspector positions shifted from Aviation Regulation to Air Cargo, due to the consolidation of the inspector workforce. In addition, 4 Air Cargo domestic inspector positions and 2 non-inspector positions were realigned to Air Cargo international inspector positions to manage the international operations of the Air Cargo Advance Screening Pilot.

⁴ The VIPR program was proposed for consolidated in FY 15 to perform multimodal operations. Of the 75 previous Surface VIPR inspector positions, 47 were realigned to domestic surface inspection activities to more properly reflect the work they perform, 20 moved to multi-modal VIPR inspectors, and 8 positions were eliminated.

⁵ Reflects the reduction to Aviation Regulation (31 inspectors), Cargo (23 inspectors) and Surface (13 inspectors and 4 VIPR inspectors) as a result of RBS efficiencies.

Aviation TSIs (TSI-As) have an essential role in executing local annual inspection plans based on a national inspection plan. As part of their inspection responsibilities, TSI-As review records and files pertaining to criminal history records checks performed pursuant to Federal law. The inspectors also review records and files to ensure compliance of indirect air carriers; private passenger and/or cargo charters; and airmen and aircrew with security requirements. In addition to inspections, TSI-As also perform testing to determine compliance with transportation security regulations. The TSI-As investigate incidents related to violations of TSA regulations, security directives, and approved security programs. Inspectors deliver technical briefings and provide assistance to the aviation industry in interpreting agency policies to ensure compliance with rules. Inspections are both scheduled and random and may include one or all of the critical security elements required by TSA.

To ensure the adequacy and integrity of security at airports, TSIs evaluate the types of fences, lighting, and locks being used, among other important security measures through visual and hands-on inspection. Based on these assessments inspectors will recommend enhancements, where appropriate, for non-regulated airports/facilities, including general aviation landing facilities and airports, and for aircraft operators. Areas of emphasis for inspection and/or assessment include: access control systems, security identification systems, surveillance systems, law enforcement response capabilities, physical security of aviation facilities and aircraft.

Inspectors are given the authority to initiate enforcement actions against airports, air carriers, and indirect air carriers where compliance violations have occurred or corrections have not been made. This includes misconduct of employees that threaten the security of an airport and/or aircraft.

The regulatory inspection and enforcement program conducts two types of comprehensive inspections: “targeted comprehensives” are conducted annually and “comprehensives” are conducted bi-annually of

all airports, aircraft operators, flight schools, repair stations, and foreign air carriers at domestic airports. “Targeted” comprehensive inspections are focused inspections relying largely on operational performance for determining compliance (i.e. testing). “Comprehensive” inspections consist of the previously described “targeted” inspection and in addition bring into play the support element of security requirements (i.e. records, signage, etc.). These inspections further extend TSA’s risk-based security model.

International Programs (including International Inspection and Operations): \$61.8 million

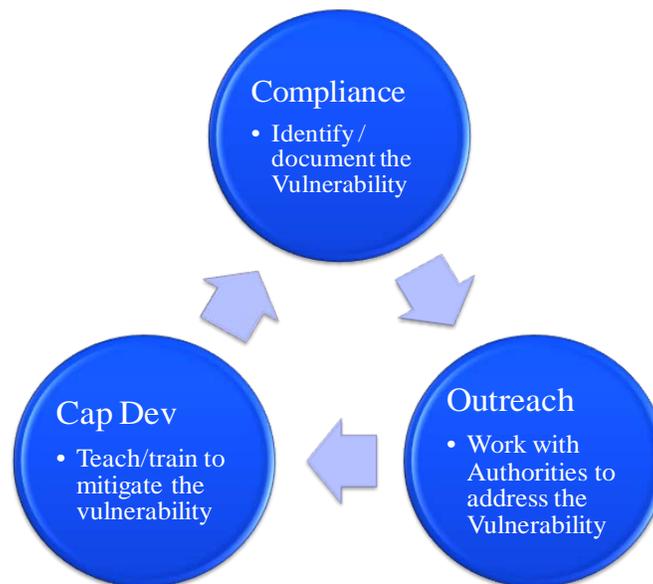

TSA’s Office of Global Strategies (OGS) promotes alignment and consistency between the security requirements of the U.S. and foreign governments and is responsible for all facets of the agency’s activities at foreign locations. The program’s primary statutory and regulatory responsibilities focus on identifying and mitigating security risks to transportation modes used extensively by U.S. citizens and foreign governments. When a new threat or vulnerability emerges, TSA must coordinate with both foreign governments and industry on the implementation of appropriate responses to mitigate the likelihood of a successful attack. TSA takes a leadership role as a permanent U.S. member in the regional and international organizations concerned with transportation security [i.e., ICAO, the Group of Seven (G7) Transportation Security Subgroup, and the European Civil Aviation Conference].

TSA strives to lead worldwide improvements in transportation security using a multi-layered approach, which includes:

- Liaison activity and representation with over 100 foreign governments, on-site liaison activity and representation in 26 foreign countries currently. In FY 2015, TSA will establish one Transportation Security Administration Representative (TSAR) position in Rabat, Morocco pending National Security Decision Directive 38 (NSDD-38).
- Evaluation and documentation of vulnerabilities at nearly 300 last point of departure airports and over 1,600 air carrier stations, and approximately 700 aircraft repair stations located in foreign countries;
- Coordination of risk mitigation efforts and daily operations between foreign government and air-carrier liaisons by co-locating TSARs and International Industry Representatives (IIRs) in embassies abroad. In FY2015 TSA will transition IIRs from Honolulu to Tokyo, Frankfurt to London, and Dallas to Mexico City to co-located with the TSARs in those embassies;
- Liaison activity and representation with approximately 220 foreign air carriers and 95 domestic carriers with international operations;
- Industry guidance and outreach to guide U.S. aircraft operators’ international service;
- Active leadership within the regional and international community that comprises the world’s transportation security expertise engaged in policy development;
- Capacity building program for nations needing assistance meeting international standards;
- National Cargo Security Program (NCSP) recognition efforts with 40 countries; and
- National Explosives Detection Canine Security Program (K9SP) recognition with strategic partners in Asia Pacific, Africa, the Middle East, and Europe.
- Targeting international air cargo shipments via the Air Cargo Advanced Screening pilot at the National Targeting Center – Cargo; and
- Assisting in the development of global advanced cargo information standards as part of a joint ICAO-World Customs Organization (WCO) workgroup.

In FY 2016, TSA will continue to work proactively by forging strong relationships and alliances with foreign and industry partnerships. TSA focuses on enhancing operations with a nexus to the United States by identifying risk through compliance, mitigating risk through outreach, engagement and capacity development, and responding to incidents as they occur.

VULNERABILITY RESOLUTION CYCLE

* Capacity Development (Cap Dev)

As the understanding of the threat picture evolves, mitigation efforts are continuously evaluated and re-assessed to determine their efficacy in reducing the threat. As identified in the Transportation Sector Security Risk Assessment, international aviation represents the highest risk category. Consequently, outreach and engagement with foreign partners, industry, and within the interagency is necessary to ensure policies are understood, implemented, and sustained. TSA must be proactive in evaluating, assessing and shifting staff and resources to ensure that mission coverage is located to reduce and mitigate evolving threats. Each region presents its own challenges, but shared best practices, lessons learned with our partners, and a combined analysis of risks enhance TSA's ability to affect change globally.

Transportation Security Administration Representatives - TSARs serve as on-site administrators/coordinators for the TSA response to terrorist incidents and threats to U.S. citizens and assets at foreign transportation modes. The TSARs also serve as principal policy advisors on transportation security affairs to U.S. Ambassadors and other U.S. and foreign government officials. TSARs handle all modes of transportation and are responsible for ensuring the National Civil Aviation Security Programs meet international standards for aviation security. TSARs also facilitate the TSA compliance effort by planning and coordinating airport risk analysis and assessments.

Transportation Security Administration Representatives

Location ^{1,2}	Number	Location	Number
Abu Dhabi, UAE	1	Manila, Philippines	1
Dakar, Senegal	1	Mexico City, Mexico	1

Madrid, Spain	1	Panama City, Panama	1
Total 29			

1. All locations are subject to space availability at Embassies and country approval.

2. TSA also assigns a point of contact to the ICAO to work collaboratively towards the development of global aviation security standards.

Pre-Clearances - At 15 airports (eight in Canada, two in The Bahamas, one in Bermuda, one in Aruba, two in Ireland, and one in Abu Dhabi), CBP Officers pre-clear passengers and baggage for entry into the United States. Inspection procedures, which are identical to U.S. port of entry screening, involve immigrations, customs, and agriculture screening. Precleared international flights arrive at a U.S. domestic airport gate and passengers deplane directly into the sterile area at more than 65 U.S. airports without having another U.S. government inspection. Upon arrival at the U.S. domestic terminal facility, the traveler may either connect to a U.S. domestic flight or they may leave the airport. In order to permit these passengers to bypass TSA screening, TSA must ensure that the screening measures applied to passengers, carry-on baggage, and hold baggage (where applicable) at the preclearance foreign airport is comparable to those measures performed at domestic U.S. airports. Determination of comparability entails extensive negotiation with the host government and frequent observations and analysis of operations.

In 2014, U.S. Congress directed the Secretary of the Department of Homeland Security, in consultation with the Secretary of State, to “establish pre-inspection stations in at least 25 additional airports that would most effectively facilitate the travel of admissible aliens and reduce the number of inadmissible aliens, especially aliens who are potential terrorists.” Furthermore, a mandate from the DHS Secretary was ordered to increase the footprint of preclearance operations from the current 17% of all US inbound passengers by 16% to a total of 33% in the next 7-10 years at a rate of 2 to 3 new airports per calendar year.

Capacity Development - TSA’s Capacity Development mission is the risk-based, measurable, and sustainable reduction of global aviation security risk by enhancing international aviation security performance and building capability through assistance delivery. An important part of this effort is aviation security training conducted in response to risks and threats identified by a number of entities

(DHS, Anti-Terrorism Assistance Program, Department of State, Department of Transportation, and the Organization of American States/Inter-American Committee Against Terrorism). In addition to assisting these entities, TSA provides sponsored civil aviation training that mitigates vulnerabilities identified during foreign airport assessments and/or support TSAR country risk mitigation plans.

TSA training is available in the requesting country to men and women working for both foreign government and non-governmental entities responsible for performing or overseeing security measures. Listed below are development opportunities available that enhance and develop individuals in our partner countries to become instructors and experts overseas:

- Auditor/Inspector Techniques;
- Cargo Security Management;
- Excellence in Aviation Screening Techniques;
- Incident Management and Response;
- Preventive Security Measures and
- Risk Management Workshop

Transportation Security Specialists - TSA identifies vulnerabilities at foreign locations through two primary means: assessments of foreign airports and inspections of air carriers that fly from those airports.

Under 49 United States Code (U.S.C.) 44907, TSA is charged with assessing all foreign airports with flights to the United States and those from which U.S. air carriers operate (regardless of the destination). TSA has a cadre of Transportation Security Specialists (TSSs) who visit the nearly 300 airports at one- to three-year intervals. Frequency of the visits is based on risk computations of current threat, documented vulnerabilities, and flight data. During the assessments, TSA evaluates the security posture of the airport in accordance with security standards established by the ICAO. The observations focus on screening (e.g. passengers, accessible property, and checked bags), access control (e.g., fence integrity, badge display and control, vehicle access), aircraft security (e.g., ensuring the aircraft was guarded against any unauthorized access), cargo security (e.g. screening, chain of custody, facility security, personnel security), catering, and quality control (e.g., ensuring that screeners were properly trained).

Annual visits are conducted to ensure that all U.S. air carriers operate in compliance with TSA regulations identified in the Aircraft Operator Standard Security Program and supporting Security Directives (SDs). TSA also inspects foreign air carriers that fly to the United States from each airport that they operate to ensure compliance with the Model Security Program and supporting Emergency Amendments (EAs). At airports where the vulnerability shortfalls have been documented as particularly egregious, these inspections occur semi-annually.

TSA has a spectrum of responses available to mitigate issues identified during these visits. Options range from providing on-the-spot correction recommendations, to conducting formal training, to recommending enacting a Public Notice that the airport does not implement adequate security measures, to suspending service. These last two responses are usually only considered when all other attempts have failed in assisting the airport or host government to improve security. Interim measures may also include issuance of site-specific SDs and EAs (that require additional measures by the regulated air carriers) or repeated visits by TSSs to evaluate progress.

In FY2016 TSSs will also conduct aircraft repair station inspections. The Aircraft Repair Station Security Final Rule serves to ensure the security of maintenance, overhaul, repair and assembly work conducted on air carrier aircraft and components at repair stations located within and outside the U.S. Pursuant to 49 U.S. Code 44924 and the Vision 100-Century of Aviation Reauthorization Act, TSA was required to complete a security review and audit of all aircraft repair stations located outside of the United States that are certificated by the Federal Aviation Administration (FAA) under Title 14 CFR Part 145 of the Federal Aviation Regulations within six months following publication of the Aircraft Repair Station Security Final Rule. This was accomplished in FY2014. TSA will continue to conduct routine inspections of these repair stations.

Finally, TSSs will conduct assessments of known consignors, regulated agents, cargo terminal operators, and other regulated entities in countries with NCSP recognition. This is to ensure that regulated entities, other than air carriers, which provide air cargo security are compliant with national cargo security program requirements. Ongoing access for TSA TSSs is a condition of NCSP recognition.

The TSSs enable TSA to continue airport assessments, air carrier inspections, flight training provider inspections, and aircraft repair station inspections.

TSS Deployments

Location	Number
Miami	29
Frankfurt	28
Dallas	23
Singapore	10
Dulles (AME Region) ¹	8
Honolulu	16
Cargo HQ	25
HQ	5
TOTAL	144

¹Asia Middle East (AME) Regional Operations Center location currently at Dulles until a location in region is determined

Due to space restraints at U.S. Embassies, TSA distributed the TSS as depicted in the chart above. The five headquarters staff are made up of TSS Desk Officers, Global Compliance Director and Deputy Director.

International Industry Representatives - IIRs serve as TSA's principal representative to the international aviation industry. The role of the IIR has become increasingly involved with ever-increasing threats against civil aviation emerging from outside the United States. As more stringent rules, requirements, and procedures have been imposed on foreign air carriers and U.S. aircraft operators with scheduled or public charter operations to and from the United States from foreign locations, the role of the IIR has correspondingly expanded. The IIRs provide regulatory oversight and guidance to each foreign air carrier/U.S. aircraft operator and are responsible for ensuring that air carriers understand and comply with U.S. regulations and TSA-accepted security programs and initiatives.

In FY 2014 and planned for FY 2015-2016, seven headquarters support personnel support the sixteen IIRs and one Foreign Repair Stations Program Specialist. The support personnel serve as the TSA oversight, communication, and coordination link for the industry and IIRs when resolving highly sensitive security issues associated with international incidents; and develop and analyze the risk assessments and metrics; communicate intelligence information; assist in the preparation and distribution of DHS/TSA policies and plans for threats to worldwide transportation security systems; and assist IIRs with technical direction for both foreign air and cargo carriers. As the table below indicates, IIRs are placed globally to assist TSA outreach efforts in locations with foreign partners. The IIR locations are determined by regional need, country approval and embassy space.

IIR Deployments

Location	Number
Abu Dhabi, UAE	1
Beijing, China	1
Caribbean/Central America (Miami)	2
Frankfurt, Germany	2
London, England	1
Mexico	1

Tokyo, Japan	1
Warsaw, Poland	1
IIRs (HQ) [^]	4
Aircraft Repair Station Specialist (HQ)	1
HQ (support)	7
TOTAL	24

[^]HQ IIRs work with industry corporate offices located in the U.S.

The number of active foreign air carriers fluctuates per year as new carriers either begin or cease operations to the United States. In of August FY 2014, there were approximately 220 non-U.S. air carriers and approximately 121 U.S. aircraft operators with international operations, which creates a 21-to-1 ratio of air carriers per IIR.

Airport Law Enforcement & Assessments: \$70.7 million

Law Enforcement Officer Reimbursement Program - In accordance with ATSA, TSA established Other Transaction Agreements (OTAs) with state and local law enforcement agencies to provide uniformed officers at passenger security checkpoints under the flexible response authorities granted to TSA. These agreements provide financial assistance to partially reimburse airports throughout the United States for post 9/11 law enforcement hours. They ensure that a consistent law enforcement presence is always available to deter suspicious activity and respond quickly in the event of a breach of security at designated checkpoints.

In FY 2014, TSA funded 310 OTAs that included the following Law Enforcement Officer (LEO) patrol and response hours:

Airport Category	Hours
I	621,431
II	447,796
III	280,649
IV	177,747
X	845,906
TOTAL	2,373,529

In FY 2015 and FY 2016, TSA will continue to improve program efficiencies and maximize the use of available program funds by reviewing participants' actual annual expenditures and adjusting award levels accordingly. The review process will include site visits to a select number of airports during the course of the fiscal year to ensure operational and fiscal compliance.

The chart below shows LEO Agreements data for FY 2014 to FY 2016:

Fiscal Year	Number of Agreements	Total Allocated Funding	LEO Service Hours	Average Hourly Rate ¹
2014	310	\$45,856,799	2,373,529	\$20.00
2015 ²	315	\$45,856,799	2,458,649	\$20.00
2016 ^{2,3}	324	\$45,856,799	2,458,649	\$20.00

¹Average of the maximum reimbursable rate for each airport category

²Number of Participants has not been finalized

³Establish new three year agreements; current agreements expire in FY15

Assistant Federal Security Directors for Law Enforcement (AFSD-LEs) - In addition to these agreements, AFSD-LEs further coordinate and support TSA's security efforts with local law enforcement. AFSD-LEs partner with law enforcement officials from other Federal, State, and local agencies to address significant issues, share intelligence and ensure the safety of airports. AFSD-LEs are assigned to a hub airport, but most are also responsible for spoke airports in their district.

There are currently 103 AFSD-LEs covering 275 airports. These strategically placed positions provide an additional layer of support to airports. They also help to mitigate response times for investigations and to ease congestion at the checkpoint.

Security Assessments - Joint Vulnerability Assessments (JVAs) are a joint effort undertaken by TSA and Federal Bureau of Investigations (FBI) with the purpose of assessing current and potential threats to commercial air transportation facilities within the United States. The process is a direct result of the increasing threats to aviation, which prompted Congress to pass Section 310 of the Federal Aviation Reauthorization Act of 1966. Section 310 requires the FAA and the FBI to conduct joint threat and vulnerability assessments of security at U.S. airports. This responsibility was transferred to TSA under ATSA. The program conducted 16 in 2014 and plans to conduct 20 JVAs in both FY 2015 and FY 2016.

Man-Portable Air Defense System (MANPADS) Vulnerability Assessments (MVAs) are designed to enhance security of air transportation by minimizing the potential for missile or stand-off weapons attack against aircraft. In accordance with NSPD-47/HSPD-16 and the *National Strategy for Aviation*

Security, the program is designed to deter, detect, and mitigate the MANPADS threat, and provide oversight and guidance on the development and implementation of MANPADS mitigation plans at commercial airports. The program conducted 13 MAVs in 2014 and plans to conduct 20 MAVs in both FY 2015 and FY 2016.

TSA also conducts international MANPADS Assist Visits (MAV) in accordance with NSPD-47/HSPD-16, and in collaboration with the Department of State, to partner with international allies on joint international assessments that are appropriate and mutually beneficial to the U.S. Government and the host nation. These visits are similar to the domestic MANPADS Vulnerability Assessments and are conducted at foreign airports at the host country's request to identify and define potential launch locations in areas surrounding the airport by using known terrorist methodology and weapon employment tactics and capabilities. The program conducted 6 MAVs and 12 MANPADS Outreach/Training Initiatives in 2014. The program plans to conduct 6 MAVs in both FY 2015 and FY 2016 and 29 Outreach/Training Initiatives in FY 2015 and 15 in FY 2016.

National Explosives Detection Canine Team Program (NEDCTP): \$128.5 million

TSA's NEDCTP trains and deploys certified explosives detection canine teams to deter and detect the introduction of explosive devices into the transportation system. Each team is composed of a specially trained canine and either a TSA or State and local law enforcement handler. Bomb threats cause disruption of air, land, and sea commerce and pose an unacceptable danger to the traveling public. Explosives detection canine teams are proven and reliable resources in the detection of explosives and are a key component in a balanced counter-terrorism program. Fostering partnerships throughout the Federal Government, State and local law enforcement, and the international community is a key element of TSA's mission.

State and local law enforcement participants are funded through OTAs. Each OTA is a collection of documents, one of which is known as The Statement of Joint Objectives (SOJO) which in turn outlines the roles and responsibilities associated with the participant and NEDCTP. The OTA also addresses certification standards, guidelines, procedures, logistical support and coordination for all canine matters relating to the TSA Program. Through OTAs and reimbursable (formerly cooperative) agreements, TSA provides funding for training, certification and maintenance of the explosives detection capable canines, training for the handlers, and partial reimbursement of handlers' salaries and other costs.

The operation of TSA led Passenger Screening Canine (PSC) teams in the airport passenger environment is an effective and efficient way to screen the general public in mass numbers or peak periods when applying RBS expedited screening initiatives. The PSC detection methodology relies on the canine's ability to process air currents and detect carried or body worn explosives whether someone is moving or still. The canine handler is trained to read the canine's behavioral changes to identify the source of an explosives odor and follow the vapor wake to the explosive source.

TSA uses PSC teams to conduct screening of individuals entering screening checkpoints with an active TSA Pre✓[®] lane. The MI provides an additional layer of explosives screening of all individuals entering the checkpoint and enables TSA to provide an expedited screening process for randomly selected passengers determined to be low risk.

To increase operational efficiency and effectiveness, in FY 2015 TSA proposed to consolidate all canine assets under the Aviation Regulation PPA and deploy canine teams as multi-modal explosives detection canine teams. This allows TSA maximum flexibility to utilize the teams in any transportation environment as needed in response to changes in intelligence or capability requirements. From an operational perspective, the multimodal teams represent the effective and efficient operational deployment scenario. Multimodal teams can be moved easily between transportation modes in response to threats or as part of TSA’s risk-based security requirements. This consolidation allows TSA to better align the canine program with the TSA risk-based security concept.

In FY 2014, TSA completed a re-write of the SOJO for 76 Aviation Legacy participants to more effectively align those teams with the multi-modal concept. The re-write deleted the Cargo Screening requirement, and the associated funding, and allows the LEO teams to effectively concentrate on inherently law enforcement functions, within the airport environment.

In FY 2016, all teams received in FY2013 and FY2014 are projected to be trained and deployed resulting in TSA operating at current funded capacity of 985 teams. In addition, TSA will continue to refine and expand the multi-modal concept, further enhance the Managed Inclusion process, as defined by TSA’s risk based security concept, and continue to expand the effectiveness of the (K9SP) effort with key international aviation security partners.

Explosives Detection Canine Team Assignments

Type	Function	FY 2015		FY 2016	
		Teams	Locations	Teams	Locations
State and Local Law Enforcement Teams (Legacy)	Multi-Modal	675	106	675	106
Total State and Local Law Enforcement Teams		675	106	675	106
Federal Teams (Proprietary)	Multi-Modal	166	28	166	28
	Passenger Screening	144	36	144	36
Total Federal Teams		310	64	64	64
Total All Explosives Detection Canine Teams		985	170	985	170

General and Commercial Aviation: \$10.0 million

TSA coordinates aviation security efforts with airlines, airports, and within the general aviation community.

Commercial Airlines - The Commercial Airlines program is responsible for 69 U.S. certificated aircraft operators. This activity includes the TSA/Aircraft Operator Corporate liaison function, development of new aviation security policy, and management of existing policy for necessary modification or elimination based on the evolving threat against full program commercial airlines. Assigned to multiple commercial airlines, Principal Security Specialists (PSSs) act as the TSA representative to provide the industry with supporting interpretations, clarifications, and assessments of the regulations. TSA monitors the specific operator's compliance level and takes action when a trend is identified. PSSs are subject matter experts on their assigned carriers, including approvers of carrier’s security training programs provided to the flight deck and cabin crew, and ground security coordinators. Additionally, TSA provides vital subject matter expertise for critical incident management during times of national emergencies and conduct outreach to airlines when developing aviation security measures to mitigate threats.

Commercial Airports - TSA builds relationships with the commercial airport industry and oversees the development of policies and programs to enhance security at the Nation's commercial airports. TSA actively engages members of the commercial airport industry on security issues with the intent to lessen the burden on the operator while maintaining security results.

General Aviation (GA) - TSA coordinates aviation security efforts with airlines, airports, and within the general aviation community. GA includes corporate operators, recreational and private aircraft, and charter operations; private and public use of general aviation airports, airmen, and airspace. TSA works collaboratively with industry and government stakeholders to develop innovative methods to enhance security and to develop, disseminate, and consistently apply a framework of appropriate and feasible security standards. TSA uses a threat based and risk management approach to develop strategies, policies, plans, and programs to reduce the security risks and vulnerabilities associated with GA operations.

Additionally, the Intermodal Security Training & Exercise Program (I-STEP) convened a GA strategic engagement planning team in FY 2013 to enhance TSA's engagement with GA stakeholders and evaluated five GA homeland security core capabilities. I-STEP GA security exercises involved 98 participants from 28 organizations and produced 24 GA security lessons learned and 32 Improvement Recommendations. Over 20,000 GA assets were organized in I-STEP GA Analytic Tools to improve situational awareness and understanding of GA assets and risks. In support of this effort, TSA developed and shared with industry a comprehensive summary report for the initiative, including summarized results of the exercises, descriptions and results of the analytical tools, and key takeaways from each engagement element. In FY 2016, TSA will build upon additional I-STEP exercises in industry engagement efforts.

TSA is issuing a new rule 49 CFR Parts 1564 and 1566, to harmonize the security requirements for domestic and foreign GA aircraft with a maximum certificated take-off weight of 30,000 pounds or more, engaged in civil operations of an aircraft not for compensation or hire. The GA Security Supplemental NPRM new rule will affect TSA by:

- Updating 49 CFR Part 1546, to harmonize the Twelve-Five and Private Charter requirements for foreign air carriers with the existing Twelve-Five and Private Charter requirements in 49 CFR Part 1544 for U.S. aircraft operators; and
- Updating 49 CFR Part 1560 (Secure Flight), that requires 49 CFR Parts 1544, 1546, and 1564 to conduct passenger vetting in a manner prescribed by TSA.

**Department of Homeland Security

(Dollars in Thousands)

PPA: Airport Management and Support

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	3,127	2,924	\$587,000
FY 2015 President's Budget	3,046	2,928	\$591,734
2016 Adjustments-to-Base	5	5	\$7,100
FY 2016 Current Services	3,051	2,933	\$598,834
FY 2016 Program Change	(19)	(18)	(\$2,601)
FY 2016 Total Request	3,032	2,915	\$596,233
Total Change 2015 to 2016	(14)	(13)	\$4,499

TSA requests 3,032 positions, 2,915 FTE and \$596.233 million in FY 2016 for the Airport Management and Support PPA

Adjustments to Base:

- Increase of 2 FTP/FTE and \$754 thousand for a transfer from the Transportation Security Support appropriation for TSOC positions
- Increase of 3 FTP/FTE and \$984 thousand for a realignment from the EDS Procurement and Installation PPA to consolidate CAO's warehouse personnel
- Increase of \$690 thousand for a realignment from the Checkpoint Support PPA to consolidate funding for the warehouse contract
- Increase of \$2.0 million for a realignment from the Screener Training and Other PPA to provide additional funding for the TSO parking contract
- Increase of \$4.208 million for pay inflation
- Decrease of \$56 thousand as part of a total In-line savings of \$8.988 million
- Decrease of \$567 thousand for a realignment to the Screening Partnership Program PPA to support new SPP airports
- Increase of \$1.087 million for retirement contributions
- Decrease of \$2.0 million for efficiencies

Program Changes:

- Decrease of \$604 thousand for RBS Efficiencies to the screener workforce
- Decrease of 19 FTP/ 18 FTE and \$2.008 million for RBS Efficiencies to the Transportation Security Specialist – Explosives
- Increase of \$11 thousand for TSA Academy instructors

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of this PPA.

Airport Management and Support PPA
(\$ in Millions)

	FY 2015 President's Budget	FY 2016 Request
FSD Staff and Headquarters	\$353.3	\$354.7
Transportation Security Operations Center	\$25.1	\$25.9
Airport Parking, Fleet Services, and Transit Benefits	\$25.7	\$27.7
Airport Rent and Furniture	\$187.6	\$187.9
TOTAL	\$591.7	\$596.2

Federal Security Directors Staff and Headquarters: \$354.7 million

This funding supports the salaries and benefits of FSDs and their staff; as well as travel, training, and contract requirements support. In FY 2014, TSA reviewed and realigned the structure of federalized airports to create a more effective and efficient network. This realignment was to prepare the agency to meet tomorrow's security challenges across the country and in response to TSA's RBS approach and corresponding budget reductions as identified in the FY 2015 President's Budget. From a starting point of 120 hubs nearly a year ago, there are now 81 hubs led by FSDs. The consolidation has resulted in 38 States with a single FSD. Additionally, the territories of Puerto Rico and the Virgin Islands are each managed by a single FSD. Eleven states continue to have more than one hub, and Delaware is managed from New Jersey. States with the largest number of hubs are California (8), Texas (7) and Florida (7). Of the remaining States; Georgia, Michigan, North Carolina, Ohio, Pennsylvania, Illinois, Pennsylvania, New York, and Virginia have 3 or fewer hubs.

The current list of airports by category is as follows:

Airports by Category	Total Number
CAT X	28
CAT I	57
CAT II	81
CAT III	128
CAT IV	149
TOTAL	443

In addition, this funding provides for headquarters positions that direct the policy, analysis and administration of aviation screening.

FSDs and staff are critical to supporting the front line operations of the TSOs. To streamline the administrative operations and gain efficiency at the airports, larger airports have been designated as hubs. These hubs provide security direction, administrative support, and staffing/personnel as needed to smaller, lower staffed airports (spokes). For example, Boston-Logan International Airport is the hub

for seven spoke airports (Bedford-Hanscom, Barnstable, Martha's Vineyard, Nantucket, Provincetown, Westover and Worcester airports).

FSDs and staff travel frequently between the hubs and spoke airports. Funding for Airport Management and Staff provides the proper direction, support, and staff at the spokes to ensure efficient and effective operations.

FSDs and staff develop operational strategies to make the screening process more efficient for the traveling public especially during peak travel seasons. They continue to be the central reference point on policy development, information technology, training, performance management, finance, and human resources to support the mission of TSA.

TSA adapts to a dynamic and changing environment with industry accepted scheduling and modeling programs. These applications allow TSA to efficiently determine and schedule the TSO workforce at the Nation's diverse airports. By accurately predicting, executing, and measuring the number of TSOs required, TSA ensures that the public has a positive experience while maintaining the proper number of TSOs at each airport.

This activity also includes funding for Transportation Security Specialist – Explosives (TSS-Es). The TSS-E program strengthens the security of the Nation's transportation systems by providing frequent interaction with and formal training of TSOs to increase their ability to recognize potential Improvised Explosive Devices (IEDs) and IED components. TSS-Es are highly skilled individuals (all of whom are former military or law enforcement bomb disposal technicians) and provide capabilities for rapid response to assist with advanced alarm resolution at checkpoints and in checked baggage screening areas. This program provides preventative measures against IEDs while reducing costly airport delays and closures. The TSS-E Program currently operates at the Nation's largest 124 airports.

TSS-Es provide subject matter expertise to TSA and its stakeholders on explosive threats to the Nation's infrastructure. Although TSS-Es are assigned to selected FSD staffs they have regional responsibilities making them available to all FSDs within their region to assist in multi-modal explosives security issues. TSS-Es conduct explosives vulnerability assessments in all transportation modes, participate in aviation-related JVAs and M-VAs. They assist in the development of mitigation plans, conduct tailored explosives recognition and response training, and develop exercises for all transportation modes. TSS-Es also provide transportation specific expertise to the FBI Explosives Unit and the National Transportation Safety Board during investigations where explosives are suspected or confirmed.

Transportation Security Operations Center: \$25.9 million

Located at TSA's Freedom Center in Northern Virginia, the Transportation Security Operations Center (TSOC) provides 24/7/365 coordination, communications, collaboration of intelligence and domain awareness for all DHS transportation-related security activities worldwide. The TSOC correlates and fuses real-time intelligence and operational information, ensuring unity of action in the prevention of, and response to, terrorist-related incidents across transportation modes. It features a Watch Floor with five separate Pods:

- Command Duty Officer (CDO) Pod – Receives continuous reporting from and coordinates with TSA field personnel and TSA Coordination Centers; has Security Watch Standers from FAMS,

Aviation, Rail and Mass Transit, Highways, Maritime, Air Cargo and Postal and Shipping Sectors; and serves as a liaison with the DHS National Operations Center (NOC);

- Joint Coordination Center Pod (VIPR Operations) - Coordinates and monitors all VIPR operations conducted throughout the U.S. and coordinates the deployment of all TSA assets in support of non-routine operations;
- Crisis Action Team Pod - Allows command of a multi-modal attack and serves in a surge capacity for the CDO Pod during incidents or national security events;
- National Capital Region Coordination Center Pod - A nine-member agency collaborative effort to oversee the security of the National Capital Region by coordinating operations among the agencies concerned with preventing and/or responding to violations of the restricted airspace; and,
- TSA Office of Information Technology Cyber Security Pod – Responds to all threats to the TSA Network.

The TSOC provides direct lines of communications for the immediate notification from the public. These reporting requirements are in line with the Implementing Recommendations of the 9/11 Commission Act (P.L. 110-53). The TSOC is TSA's primary interface to the DHS NOC for all transportation security issues and events.

Additionally, the TSOC ensures TSA is prepared for major incidents and disasters by developing deliberative response plans, policies and procedures that govern TSA's Critical Incident Management system, providing training, and continually exercising those persons involved in incident management to ensure readiness. Lastly, the TSOC ensures TSA capability exists to operate from alternative facilities under the Continuity of Operations program.

The TSOC supports the Automatic Detection and Processing Terminal (ADAPT) Program. TSA uses the ADAPT system to access FAA radar feeds and various government and commercial databases to verify flight operations to, from, within and over the National Airspace System. The Program continues oversight for the Airspace Authorization Unit which provides remote operations to support the Airspace Security Operations Center during designated DHS National Special Security Events such as the Democratic and Republican National Conventions, and other events as needed.

Airport Parking, Fleet Services, and Transit Benefits: \$27.7 million

This program currently provides parking at participating airports for field staff. In addition, TSA provides transit benefits for more than 11,000 field office employees and provides fleet services for 3,500 vehicles.

Airport Rent and Furniture: \$187.9 million

In support of its field operations, TSA leases over 3.5 million square feet of space with more than 700 leases at TSA's 443 airports in addition to off-airport locations. On-airport space is used for mission-critical direct TSO support, such as break rooms, lockers, emergency coordination rooms and training facilities. These airport leases are typically short-term, requiring frequent re-negotiation. The annual rent is set by the local airport authority based on formulas to recapture operating costs, capital improvements, and major repairs. TSA also manages a Checkpoint License program under which

airports are reimbursed for the cost of providing electrical service to the TSA equipment and operations at the checkpoint, as well as providing janitorial and trash removal service to the TSA checkpoints.

MAJOR ACQUISITIONS:

Performance Management Information System

TSA’s Performance Management Information System (PMIS) provides the following capabilities:

- Tools for the federalization of airports to collect and report measures as required by ATSA
- Analytical expertise to TSA organizations in the measurement of unit performance and improvement
- A repository for reporting congressionally mandated wait time data by airport and by checkpoint on a daily basis.

PMIS is funded out of the Airport Management and Support PPA in FY 2016, as follows:

- Airport Management and Support PPA \$8.475 million

Activity Funding
(\$ in Thousands)

FY 2014 Actual	FY 2015 President’s Budget	FY 2016 Budget
\$16,112	\$7,902	\$8,475

FY 2016 Funding Breakout

(\$ in Thousands)

Program Area	Sub-Program	Mission Need
Maintenance - \$8,475	Tools for the federalization of airports to collect and report measures as required through the PMIS	Funds operating costs for the Enterprise Performance Management Platform (EPMP), including PMIS; the Airport Information Management (AIM) System to assist airports in managing their day-to-day business; Performance Information Management System (PIMS), a state-of-the-art tool which supports analysis, dashboarding, graphing, and reporting of the PIMS data warehouse; and the Visible Intermodal Prevention and Response (VIPR) Information Manager (VIMS), a suite of integrated data entry screens hosted in EPMP to assist the Office of Law Enforcement Federal Air Marshal Service (OLE/FAMS) and the Office of Security Operations in managing VIPR activities. AIM and VIMS are built inside of PIMS, allowing real-time business intelligence and operational performance.
	Analytical expertise to TSA organizations in the measurement of unit performance and improvement	Funds operating costs for PMIS Base Support Contract to provide metrics creation, metrics reporting, and training and help desk support to the TSA enterprise. AIM application support hosted in EPMP to assist airports in managing their day-to-day business. Provides airports a consistent national interface with headquarters' support. TSA has the need for a performance measurement data collection and reporting capability. This capability provides timely performance information on security activities in the field and supports our airport FSDs as they manage their operations. Screener supervisors and FSDs are able to provide daily performance data. FSDs, Headquarters staff and TSA Executives will monitor operational data as reported through this capability. This capability captures and generates reports of critical performance data to inform TSA operations and enable public performance reporting.
	A repository for reporting congressionally-mandated wait time data by airport and by checkpoint on a daily basis.	Funds recurring Contract Off The Shelf annual maintenance support for PIMS which today reports on data from 18 TSA data sources, including wait time data. Funds operating costs for Information System Security Officer (ISSO) Contract to provide cybersecurity support.

**Department of Homeland Security

FFDO and Flight Crew Training
Program Performance Justification**
(Dollars in Thousands)

PPA: FFDO and Flight Crew Training

	Perm. Pos.	FTE	Amount
FY 2014 Revised Enacted	41	34	\$24,730
FY 2015 President's Budget	38	36	\$20,000
2016 Adjustments-to-Base	-	-	\$95
FY 2016 Current Services	38	36	\$20,095
FY 2016 Program Change	-	-	-
FY 2016 Total Request	38	36	\$20,095
Total Change 2015 to 2016	-	-	\$95

TSA requests 38 positions, 36 FTE, and \$20.095 million in FY 2016 for the FFDO Program and Flight Crew Training PPA

Adjustments to Base:

- Increase of \$69 thousand for pay inflation
- Increase of \$26 thousand for retirement contributions

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of this PPA.

FFDO and Flight Crew Training PPA
(\$ in Millions)

	FY 2015 President's Budget	FY 2016 Request
Federal Flight Deck Officer	\$19.8	\$19.9
Crew Member Self Defense	\$0.2	\$0.2
TOTAL	\$20.0	\$20.1

The FFDO program was created by the Arming Pilots Against Terrorism Act of 2003 (P.L. 107-296), which authorizes the deputation of qualified airline pilots to act as Federal LEOs in order to defend the flight decks of aircraft against acts of criminal violence or air piracy. This voluntary program provides a combination of law enforcement training in firearms proficiency, self-defense tactics, authority, use-of-force, and decision-making in defense of both commercial and cargo aircraft. In FY 2016, TSA will continue an Inactive Reserve Force of pilots that predominately fly international flights. Information

on the number of FFDOs and the size of the Inactive Reserve Force is Sensitive Security Information and will be provided under separate cover upon request.

The Crew Member Self Defense Program was established via the Vision 100 – Century of Aviation Reauthorization Act in 2004. The Act requires TSA to develop and make available to flight and cabin crewmembers a voluntary, advanced self-defense training program as another means of safeguarding the civil aviation system.

The TSA will continue to train and provide oversight to the maximum number of FFDOs resources will support. TSA's goal is to provide the greatest number of mission flight coverage and protection to aircraft cockpits.

Total Change 2015 to 2016	(23)	(22)	(\$942)

The FY 2016 Budget includes 645 positions, 620 FTE, and \$105.978 million for the Air Cargo PPA:

Adjustments to Base:

- Increase of \$990 thousand for pay inflation
- Increase of \$275 thousand for retirement contributions

Program Change:

- Decrease of 23 FTP, 22 FTE, and \$2.207 million for RBS efficiencies to the Transportation Security Inspectors

CURRENT SERVICES PROGRAM DESCRIPTION:

ATSA charges TSA with the implementation of statutory requirements for ensuring the security of transportation systems and passengers when cargo is transported by air.

The following table provides the components of this PPA.

**Air Cargo PPA
(Dollars in Millions)**

	FY 2015 President's Budget	FY 2016 Budget
Air Cargo Policy Programs	\$25.4	\$25.6
Air Cargo Screening Technologies	\$11.0	\$11.0
Air Cargo Inspectors	\$70.5	\$69.4
TOTAL	\$106.9	\$106.0

Air Cargo Policy Programs: \$25.6 million

The program is responsible for securing the air cargo supply chain including cargo, conveyances, and people. The air cargo transportation system consists of 443 domestic airports, about 140 international airports, approximately 300 air carriers (with both domestic and international operations), approximately 4,000 indirect air carriers and 1,100 Certified Cargo Screening Facilities (CCSFs). TSA focuses on two primary security threats related to the air cargo transportation system: (1) introduction of an explosive device on a commercial aircraft, and (2) the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

The Implementing Recommendations of the 9/11 Commission Act of 2007 required TSA to implement a system to ensure that 100 percent of all cargo on passenger aircraft is screened at a level commensurate with checked baggage. To meet this requirement, TSA employed two phases for screening air cargo: one phase for cargo departing U.S. airports, and the other phase for international inbound cargo.

As of August 1, 2010, 100 percent of all cargo transported on a passenger aircraft departing U.S. airports are required to be screened. Beginning December 3, 2012, TSA required 100 percent screening of international inbound air cargo on passenger aircraft using a risk based approach to screening. Requirements incorporate the Trusted Shipper concept, originally set forth in the May 2011 SDs and Emergency Amendments issued in response to the attempt to conceal explosives in an all-cargo aircraft bound for the United States from Yemen. Achieving 100 percent screening of all inbound air cargo carried on passenger aircraft fulfills a requirement of the 9/11 Act and further strengthens global supply chain security. In addition, TSA has implemented the Trusted Shipper concept for all-cargo carriers, and requires them to screen 100 percent of all elevated risk cargo to the same standards as those required for passenger carriers.

TSA continues to regulate approximately 1,000 CCSFs in the Certified Cargo Screening Program (CCSP). TSA developed the CCSP to support the requirement for industry to screen 100 percent of air cargo transported on passenger aircraft from U.S. airports. CCSP allows screening of cargo at points throughout the supply chain by an approved CCSF prior to the arrival of the cargo at airport. In FY 2016 through the CCSP, TSA will continue to certify cargo screening facilities located throughout the United States to screen cargo prior to providing cargo to airlines for shipment on passenger flights. Participation in the program is voluntary and enables vetted, validated, and certified supply chain facilities to comply with the 100 percent screening requirement. TSA conducts comprehensive re-certifications for each CCSF every three years.

Air Cargo Advance Screening Pilot - TSA personnel work at the National Targeting Center-Cargo (NTC-C) side by side with CBP Officers to target high-risk air cargo shipments as part of the Air Cargo Advance Screening (ACAS) pilot initiative. This partnership with CBP involves obtaining manifest information on cargo destined for the United States well before being loaded on the inbound flight. TSA and CBP have developed response protocols that have been implemented when high-risk cargo is identified. Through this pilot and use of the risk identifiers developed within CBP's Automated Targeting System (ATS), TSA is able to ascertain the countries that are the sources of the highest percentage and greatest number of potentially high-risk shipments. In FY 2015, TSA will work with CBP for the adjudication of the NPRM.

- The ACAS pilot currently includes voluntary participants from multiple nodes in the supply chain to include the express integrated carriers, passenger air carriers, freight forwarders, and all-cargo aircraft operators.
- TSA and CBP are receiving advance cargo security filing data from pilot participants in over 190 countries.
- Close partnerships with industry have been integral in the development of the ACAS operational model. The ACAS pilot is currently focused on collecting data, refining targeting procedures, and establishing appropriate communication systems.
- TSA and CBP are working together on integrating key risk components to include the TSA “trusted shipper concepts into the overall risk model for ACAS. Work continues on system messaging, communication protocols, and screening requirements for ACAS. TSA and CBP continue to work bilaterally and multilaterally to engage the global community on risk methodologies, advance information, and supply chain security screening.
- Industry participants are voluntarily providing a subset of data elements through the current CBP Trade Act of 2002 requirements. Over 198 million shipments have been processed from pilot participants who are at varying stages of the pilot.
- There are currently three Advance Cargo Information (ACI) pilots around the world: ACAS in the U.S., PACT in Canada, and PRECISE in the EU. Close partnership with industry and international partners is crucial for the ongoing development of the ACAS processes to include system messaging, communication protocols, and operational procedures.
- TSA is actively engaged with counterparts in Canada, including Transport Canada and Canada Border Services Agency, and the European Commission (DG TAXUD and DG MOVE) regarding the status of the three pilots. This engagement includes information sharing, addressing ongoing regulatory efforts, harmonizing whenever possible, and developing consistent messaging – specifically the “Joint Principles” messaging effort.
- TSA is active in the ICAO Working Group on Air Cargo Security and has participated with CBP in the World Customs Organization (WCO) Technical Experts Group on Air Cargo Security. Industry is represented in both groups, to include TIACA, IATA, and the Global Express Association. TSA has volunteered to participate in the soon-to-be formed ICAO-WCO Joint Working Group on ACI and continues to participate in the work group.

Air Cargo Screening Technologies: \$ 11.0 million

The FY 2016 Budget supports the qualification and evaluation of existing and emerging air cargo screening technologies and procedures to determine suitability, effectiveness, and feasibility for use in air cargo screening environments. Cargo screening faces unique challenges due to a wide variance in commodities, volume, throughput, and facility characteristics for each screening entity. No single technology is appropriate for every screening scenario. TSA has authorized a suite of technologies and associated screening protocols from which screening entities may choose on the basis of their unique requirements and commodities.

The following technologies are currently approved for use by industry to screen air cargo on passenger and all cargo aircrafts unless otherwise noted:

- ETD units
- Non- Computed Tomography (CT) X-Ray (small, medium, and large aperture) systems
- AT X-Ray (small, medium, and large aperture) systems

- EDS
- EMD units
- Carbon Dioxide (CO₂) monitors

TSA publishes authorized screening equipment on the TSA Air Cargo Screening Technology List (ACSTL), which is published on a secure website accessible by the regulated parties, which industry references when making their procurement decisions. TSA does not procure or deploy equipment for the air cargo industry. Instead, industry is required to purchase, use, and maintain systems authorized by TSA and listed on the ACSTL.

The current TSA ACSTL contains 110 qualified and/or approved pieces of cargo screening equipment. The following chart depicts the equipment on the TSA Air Cargo Screening Technology List:

Technology Type	TSA Air Cargo Screening Technology List for Passenger and All Cargo Aircraft - Version 9.1 ¹								
	Qualified ²			Approved ³			In Qualification Testing and Evaluation ⁴		
X-Ray	<i>Small</i>	<i>Med</i>	<i>Large</i>	<i>Small</i>	<i>Med</i>	<i>Large</i>	<i>Small</i>	<i>Med</i>	<i>Large</i>
		28	29	23	2	1	0	9	9
ETD	3			0			5		
EMD	2	2	1	1	1	0	3	1	1
EDS	0	15	0	0	0	0	0	0	0
CO₂ Monitor	0	2	0	0	0	0	0	0	0

¹ Technology list as of 06/25/14

² Qualified technology specifies equipment, by technology, which has undergone a formal TSA sponsored test process and is deemed qualified for screening operations. All parties should purchase equipment from the qualified section of the ACSTL.

³ Approved technology specifies equipment, by technology, which has been conditionally approved for screening operations and is currently undergoing or scheduled for qualification test activities. This equipment has up to 36 months from the date when it was added to the approved technology section to successfully pass TSA's qualification test. If it is unable to pass qualification activities within the prescribed 36 months, it will be removed from the approved technology section at the prescribed expiration date. Due to this fact, regulated parties who procure equipment from the approved technology section do so at their own risk.

⁴ This section includes all devices that are currently in any step of the Air Cargo Screening Qualification Testing process. Devices that have successfully undergone laboratory testing are moved to the Approved section of the ACSTL while they undergo field testing. As such, the devices listed in the Approved section of the chart are also included in the Qualification Testing and Evaluation section.

TSA continues to evaluate the operational efficacy of these technologies to accommodate the cargo screening volumes currently required to support the 100-percent screening mandate. Outcomes of DHS and TSA field testing and evaluation and the IAC CCSP requirements may result in modifications or additions to this list. TSA has also issued screening protocols for use of these technologies. The protocols detail screening methodologies for each technology type and provide guidance on which technologies can be used for specific commodity classes.

Air Cargo Inspectors: \$69.4 million

Domestic Cargo Inspections - TSA Transportation Security Inspectors-Cargo (TSI-Cs) perform compliance inspections; including special emphasis inspections, focused inspections, and air cargo

surges (weeklong compliance enforcement surges focused on Indirect Air Carriers, air carriers, and CCSFs within a single metropolitan area); along with investigations and tests of air carriers and IACs. TSA TSI-Cs also perform educational outreach to assist air carriers and IACs in complying with air cargo security mandates. TSI-Cs are located at 121 airports with high cargo volumes in the United States.

Air Cargo Inspectors enforce statutory and regulatory requirements and provide guidance to industry on securing air cargo. Inspectors ensure that air carriers (passenger and all-cargo) and indirect air carriers meet their operational responsibility by implementing the security requirements issued by TSA. This includes maintaining a TSA-approved security program that describes the security policies, procedures, and systems that must be implemented in order to comply with TSA security requirements. These requirements include measures related to the acceptance, handling, and inspection of cargo; training of employees in security and cargo inspection procedures; testing employee proficiency in cargo inspection; and access to cargo areas and aircraft.

TSA provides compliance oversight of 300 domestic aircraft operators and foreign air carriers as well as 4,000 IACs and over 1,000 CCSFs. Each year, TSA inspectors carry out planned and random inspections targeting these foreign and domestic air carriers and IACs. In addition, inspectors conduct monthly cargo surges at airports and IAC facilities with a risk-based approach to scheduling that address specific identified vulnerabilities. TSA also promotes the full compliance with security requirements through outreach programs and collaboration with industry.

The Compliance Work Plan outlines goals for inspecting regulated entities based upon risk at the station level, in addition to the minimum entity inspection requirements. TSA calculates risk scores for airlines (which include both passenger and all-cargo), IACs, and CCSFs. Security Index scores are utilized to focus Inspector time during all field activities, including cargo surges, Special Emphasis Inspections and testing. At a high-level, TSI-Cs conduct inspections based on following risk schema:

- Previous inspection and test results;
- Previous investigation/non-compliance history;
- Operation volumes; and
- Intelligence and other special considerations.

Cargo Targeting Unit - Since FY 2010, TSA has maintained a presence with CBP at the NTC-C to increase information sharing between TSA and other agencies involved in the identification and mitigation of high-risk cargo. The NTC-C is able to utilize known terrorist information received from National Targeting Center-Passenger (NTC-P) and conduct in-depth research in various systems to identify cargo shipments and businesses linked to these individuals.

In FY 2014, in support of Domestic Targeting, TSA increased staff at the NTC-C through internal realignments to focus on domestic cargo. This realignment allows TSI-Cs to perform numerous tasks in support of the domestic cargo security mission. In FY 2016, these initiatives will include:

- Conducting domestic security reviews of high-risk air cargo shipments referred from field inspectors during Cargo Risk Based Inspection Technique (CRBIT) activities;
- Assisting in cargo alarm resolution through research;
- Conducting in-depth research on new IAC and CCSF applicants;

- Conducting Security Threat Assessment verifications for field inspectors and the Office of Law Enforcement Federal Air Marshal Service (OLE FAMS) Investigative Risk and Analysis Division;
- Developing inspection and testing protocols for Cargo Surges, using the various systems available to them to focus the surge activity on higher risk entities.

Additionally, in FY 2016, TSA CTU will continue to leverage resources at the NTC-C to develop a Risk-Based Inspection Tool to be used to direct CRBIT and canine risk-based activities.

International Air Cargo Security (including Air Cargo Inspectors) - Air cargo security, especially those measures applied to goods carried on passenger aircraft, remains a high priority. TSA continues several efforts to ensure that cargo destined for the United States is subjected to the required level of security. These efforts include:

- Participating on the ICAO International Cargo Workgroup and focusing on the full spectrum of cargo security issues such as determining recognition of other countries' cargo programs, identifying best practices for dissemination to other cargo experts, and incorporating all-cargo operations into the Compliance Work Plan;
- Ensuring that the Work Plan reflects a comprehensive review of all airports and carriers involved in transporting cargo directly to the United States;
- Implementing the airport assessment methodology for those airports providing only cargo operations/service to the United States;
- Conducting visits to all airports and air carrier stations involved in transporting cargo on commercial aircraft to the United States;
- Deploying inspectors to high threat locations in response to credible intelligence information; and
- Evaluating the NCSPs and K9SPs of other countries to determine if recognition can be granted due to the fact that their national program provides a commensurate level of security.

International Cargo Inspections - During FY 2014, passenger flights from 140 foreign airports in 86 countries transported cargo to the United States. About 8.0 billion pounds of cargo is transported on commercial aircraft annually from foreign airports. A significant amount of these cargo loads did not originate at Last Point of Departure airports, but were initiated at locations sometimes two, three, or more airports before their final movement to the United States - necessitating a thorough understanding and verification of security measures of the cargo supply chain. Of particular concern is the preponderance of countries that currently screen cargo, but do not use the type of equipment or the specific techniques required by TSA.

In FY 2016, TSA will continue to verify the security measures applied to international inbound air cargo and will do so through deployment of TSS. The verification procedures include a series of on-site audits of foreign airports, air carrier cargo facilities, and off-airport sites which accept, handle, and screen air cargo. Verification procedures are conducted at every foreign LPD airport at least annually, with interim activities scheduled for the higher-priority sites. These activities include comprehensive reviews of each air carrier's quarterly security programs, observation of the implementation of its security program evaluation of Authorized Representative Agreements, and proper use of approved screening methods.

In FY 2014, TSA has 61 international inspector positions funded through the Air Cargo PPA. These field positions are distributed among the six Regional Operations Centers, which are located in Miami, Dallas, Singapore, Frankfurt, Honolulu, and Northern Virginia.

All TSSs are cross-trained to perform cargo inspections and general inspections for time and expense efficiencies depending where they are located globally.

National Cargo Security Program (NCSP) Recognition - Through NCSP recognition, TSA determines if a foreign government's air cargo security program is commensurate with current U.S. air cargo security standards introducing efficiencies for both government and private industry by reducing duplicative requirements, allowing screening to be completed earlier in the supply chain, and permitting the optimal use of distributed screening locations so that screening can occur at various nodes along the supply chain. These assessed measures include the type of technology used to conduct the screening, the amount of cargo screened, and the processes used to resolve any identified issues.

NCSP recognition enables TSA to leverage the host government's oversight capabilities to verify air carrier screening operations and data.

As of July 2014, TSA has established NCSP recognition with 38 countries. This includes all of 28 European Union Member States, Switzerland, Japan, New Zealand, Canada, Australia, Israel, the Republic of Korea, Iceland, Norway, and South Africa. Another seven countries are in the process of being evaluated or are implementing the recommendations resulting from on-site reviews. NCSP countries account for approximately 69 percent of the air cargo volume (by weight) transported on passenger aircraft bound for the United States. In addition to those NCSPs formally recognized by TSA, additional countries are being evaluated or are currently implementing TSA recommendations resulting from the visits and assessments. FY 2016 priorities for NCSP outreach has expanded to include those countries from which a high volume of air cargo originates.

Another priority area for TSA is to ensure that 100 percent of the NCSP non-air carrier inspections are scheduled and conducted, except those locations where the host government or State Department denies access. This includes regulated agents and known consignors.

National Cargo Security Program (NCSP) Recognition - Through NCSP recognition, TSA determines if a foreign government's air cargo security program is commensurate with current U.S. air cargo security standards introducing efficiencies for both government and private industry by reducing duplicative requirements, allowing screening to be completed earlier in the supply chain, and permitting the optimal use of distributed screening locations so that screening can occur at various nodes along the supply chain. These assessed measures include the type of technology used to conduct the screening, the amount of cargo screened, and the processes used to resolve any identified issues. NCSP recognition enables TSA to leverage the host government's oversight capabilities to verify air carrier screening operations and data.

As of January 2015, TSA has established NCSP recognition with 40 countries. This includes all of 28 European Union Member States, Switzerland, Iceland, Norway, Israel, Canada, Japan, New Zealand, Australia, the Republic of Korea, Singapore, the People's Republic of China, and South Africa. In addition to those NCSPs formally recognized by TSA, additional countries are being evaluated or are currently implementing TSA recommendations resulting from the visits and

assessments. FY 2016 priorities for NCSP outreach has expanded to include those countries with strategic importance.

Another priority area for TSA is to ensure that 100 percent of the NCSP non-air carrier inspections are scheduled and conducted, except those locations where the host government or State Department denies access. This includes regulated agents and known consignors.

National Explosives Detection Canine Security Program Recognition - The K9SP recognition process evaluates and recognizes K9SPs in foreign countries for use in aviation security, to include screening of air cargo, passengers and other individuals, checked baggage, and accessible property. K9SP is a separate effort from TSA's domestic K9 program. As of January 2015, TSA has established K9SP recognition with 4 countries. This includes New Zealand, South Africa, France, and the Netherlands. In FY2016, TSA plans to expand K9SP recognition engagement and outreach to the governments of foreign countries to evaluate explosives detection canine to determine if such programs provide a level of security commensurate with current U.S. requirements and, thus, whether they may be recognized by TSA for implementation by affected air carriers.

Strengthening International Air Cargo Security Requirements - TSA has expanded its outreach and engagement with ICAO WCO, the Universal Postal Union, and influential Member States involved in each entity to strengthen supply chain security. Through the implementation of more robust international standards, TSA ensures progress toward a more secure environment that does not slow or stall the movement of legitimate commerce. In FY 2016, TSA will continue efforts to address national government restrictions/prohibitions that hamper implementation of TSA air cargo security requirements by air carriers.

Institutionalize Customs-Trade Partnership Against Terrorism (C-TPAT) Validations - In FY 2014 TSA developed a process in conjunction with CBP by which TSA will conduct C-TPAT validations for air carriers on behalf of CBP during normally scheduled TSA visits. This initiative must be memorialized within an agreed Memorandum of Understanding between TSA and CBP. In FY 2015, TSA will continue working with CBP to develop a detailed process to facilitate such visits by TSSs. By FY16, it is anticipated that the full transition will be complete authorizing TSA to conduct C-TPAT validations for air carriers. In FY 2016, TSA intends to conduct inspections for the C-TPAT certified air carriers.

MAJOR ACQUISITIONS:

Air Cargo Security

The Air Cargo Security investment funds the operation of three major IT systems that implement multiple security layers of TSA's layered approach to air cargo security. The investment contains the Indirect Air Carrier Management System (IACMS), Known Shipper Management System (KSMS), and Freight Assessment System (FAS). This investment also supports two minor systems, the Data Application Tool and Security Threat Assessment Tool. These systems work to confirm the identity and business legitimacy to assess the risk of companies shipping goods on passenger aircraft; verify 100% screening of domestic and international air cargo to TSA standards, as required by law; vet individuals in security sensitive positions to reduce the risk from insider threats; and facilitate TSA's efforts to ensure entities transporting and screening air cargo employ appropriate security procedures.

The Air Cargo Security investment is to be funded out of the Air Cargo PPA in FY 2016.

Activity Funding

(\$ in Thousands)

FY 2014 Actuals	FY 2015 President's Budget	FY 2016 Budget
\$21,520	\$21,523	\$16,078

FY 2016 Funding Breakout

(\$ in Thousands)

Program Area	Sub-Program	Mission Need
Planning - \$74	Freight Assessment System (FAS)	Funds planning and oversight for all FAS activities.
	Indirect Air Carrier Management System (IACMS)	Funds planning and oversight for all IACMS activities.
	Known Shipper Management System (KSMS)	Funds planning and oversight for all KSMS activities.
Acquisition - \$74	IACMS	Expands access to authorized representatives, a key stakeholder requirement, which significantly reduces workload for regulated parties.
	KSMS	Provides capability for real-time known shipper vetting using web services, enabling regulated parties to better integrate vetting into their business processes. Provides the capability to vet shippers from Mexico and Canada, reducing the need to perform manual verification visits, significantly reducing regulatory costs for regulated parties.
Maintenance - \$15,930	FAS	Funds operating costs for FAS, which provides an oversight mechanism to verify that all cargo is being screened as required by the Implementing Recommendations of the 9/11 Commission Act.
	IACMS	Funds operating costs for IACMS, which manages the IAC certification and renewal process, ensuring that IACs implement standard security programs that reduce terrorism risk. IACMS also enables IACs and Air Carriers to obtain Security Threat Assessments for their employees and authorized representatives, vetting individuals to reduce the threat of insiders introducing explosive or incendiary devices into the air cargo supply chain.
	KSMS	Funds operating costs for KSMS, which verifies the identity and assesses the risk of companies shipping goods on passenger aircraft, reducing the likelihood of a shipper introducing an explosive or incendiary device into commerce.

**Department of Homeland Security
Transportation Security Administration
Federal Air Marshals
Program Performance Justification**
(Dollars in Thousands)

PPA: Federal Air Marshals

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	-	-	-
FY 2015 President's Budget	-	-	\$800,214
2016 Adjustments-to-Base	-	-	\$11,331
FY 2016 Current Services	-	-	\$811,545
FY 2016 Program Change	-	-	\$5,200
FY 2016 Total Request	-	-	\$816,745
Total Change 2015 to 2016	-	-	\$16,531

The FY 2016 Budget includes \$816.745 million for the FAMS PPA.

Adjustments to Base:

- Increase of \$176 thousand for a transfer from the Information Technology PPA within the Transportation Security Support Appropriation to realign one Communications Security position
- Increase of \$8.182 million for pay inflation
- Increase of \$4.873 million for retirement contributions
- Decrease of \$1.9 million to transfer training funds to the Screener Training and Other PPA to centralize TSA Academy training funds

Program Changes:

- Increase of \$5.2 million for a FAMS Enhancement

CURRENT SERVICES PROGRAM DESCRIPTION:

The FAMS PPA funds payroll costs, supports all operational and infrastructure requirements, and training and travel expenses of the FAMS. The vast majority of this PPA funds the salaries for FAMS and the civilian workforce to provide the vital protective and law enforcement services necessary for both domestic and international air travel as well as other transportation related security activities.

The PPA also supports the continuing development and maintenance of the Service's infrastructure, internal business processes, and systems that enable FAMS to seamlessly perform the integrated set of functions that make up their mission. In addition to the activities detailed on the following page, this PPA provides funding for workforce management activities: maintenance of facilities in the Washington, D.C. area, Atlantic City, New Jersey, and 22 field offices across the country; program

infrastructure and logistics support such as vehicles, communications, duty equipment, and physical security. In FY 2016, the FAMS will continue to explore consolidation and support efficiencies commensurate with workforce adjustments.

In FY 2014, the FAMS initiated a strategic plan to close six field offices and realign the associated personnel to field offices with the highest strategic potential value. In FY 2015, the San Diego, Tampa, Pittsburgh, and Phoenix locations will be closed, followed by the Cleveland and Cincinnati offices in FY 2016. This plan places FAMS in the best position to cover critical missions while remaining a high performing counterterrorism organization.

The following table provides the components and associated funding levels in this PPA:

FAMS PPA
(\$ in Millions)

	FY 2015 President's Budget	FY 2016 Budget
Payroll, Compensation and Benefits	\$663.3	\$681.7
General Expenses	31.4	31.4
Travel	100.1	100.1
Training	5.4	3.5
TOTAL	\$800.2	\$816.7

Key programs of the PPA include:

Joint Terrorism Task Force (JTTF) - The FAMS is a full participant in the JTTF, a nation-wide counter-terrorism enforcement program managed by the FBI. The JTTF targets terrorism-related criminal threats against the United States and its interests. FAMS personnel are assigned to partner with other task force member agencies to provide support during investigations of aviation and other transportation-related threats. The working relationships between the FAMS and other task force participants enable real-time information sharing. Further, it enhances both short-term decision making during immediate critical threats and long-term strategic decision making during the evolution of ongoing threats, such as the 2010 printer cartridge bomb plot.

Travel: \$100.1 million

This portion funds all travel necessary to perform domestic and international mission coverage, mission essential training, and other business-related travel in support of FAMS operational and programmatic goals. The FAMS schedules the coverage of high-risk flights according to a concept of operations that incorporates threat, vulnerability, and consequence. Each year, the FAMS continues to provide priority flight coverage operations in accordance with its Concept of Operations.

Training: \$3.5 million

Through its training programs, the TSA Office of Training and Workforce Engagement /Law Enforcement and Industry Training Division (OTWE/LEITD) provides effective learning environments and opportunities to the TSA OLE/FAMS by utilizing current and relevant curricula and

training methodologies to enable and challenge FAMs, and other transportation security professionals, to perform their duties and responsibilities in a highly effective and efficient manner.

Upon entry into the FAM Training Program, FAM trainees undergo an intensive 16.5-week training program conducted at FLETC in Artesia, New Mexico and at the FAMS Training Center (FAMSTC) in Atlantic City, New Jersey. The training component provides for all associated training requirements to include FLETC-related expenses, role player contracts, hotel lodging contracts for Atlantic City-based classes, training supplies, firing range fees, training gear, equipment, and clothing. Once assigned to a field office, each FAM undergoes recurrent, in-service training to maintain the necessary skill base and firearms certification levels on a quarterly basis. Currently, the FAMS has the highest firearms qualification score of any Federal agency (85 percent or 255/300).

Additional training offered by OTWE/LEITD includes a robust FAMS Field Office Recurrent Training Program, which requires all mission status FAMs to complete 160 hours of recurrent training a year. The training is designed to maintain and enhance perishable tactical skills critical to the success of the FAMS mission. The OTWE/LEITD is also responsible for providing instructor development courses for instructors placed at field offices as well as those assigned to various training centers. This is accomplished through a series of train-the-trainer courses offered at the FAMSTC that focus on supporting the FAMS mission.

**Department of Homeland Security

Aviation Passenger Security Fee
Program Performance Justification**
(Dollars in Thousands)

PPA: Aviation Passenger Security Fee

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	-		- (\$1,446,972)
FY 2015 President's Budget	-		- (\$2,398,293)
2016 Adjustments-to-Base	-		- \$266,343
FY 2016 Current Services	-		- (\$2,131,950)
FY 2016 Program Change	-		-
FY 2016 Total Request	-		- (\$2,131,950)
Total Change 2015 to 2016	-		- \$266,343

¹ FY 2014 Revised Enacted reflects actual collections during fiscal year 2014. This amount does not include \$390 million in collections for deficit reduction identified in the BBA nor the \$250 million in collections assigned to fund the ASCF.

² FY 2015 President's Budget reflects estimated collections for a proposal that would have increased the fee of \$5.60 per one-way trip that was enacted by the BBA, to \$6.00 per one-way trip in the final three quarters of fiscal year 2015. The amount does not include \$1.190 billion for deficit reduction identified in the BBA nor the \$250 million in collections assigned to fund the ASCF.

³ FY 2016 Current Services reflects estimated collections in accordance with the BBA and Public Law 113-294 that established a fee limitation of \$11.60 per round trip effective in December 2014. The amount does not include \$1.25 billion for deficit reduction identified in the BBA nor the \$250 million in collections assigned to fund the ASCF.

⁴ FY 2016 Program Change includes a proposal that would increase the fee of \$5.60 per one-way trip to \$6.00 per one-way trip in the final three quarters of fiscal year 2016. The proposal would generate an additional \$195 million dedicated to deficit reduction.

CURRENT SERVICES PROGRAM DESCRIPTION:

In accordance with the Bipartisan Budget Act of 2013 (BBA), the September 11th Security Fee (Passenger Fee) was restructured in July 2014 from \$2.50 per enplanement with limitations of \$5.00 per one-way trip and \$10.00 per round trip to \$5.60 per one-way trip with no limitations. In December 2014, the fee was further restructured to implement a round trip limitation of \$11.20 in accordance with PL 113-294.

Additionally, current services includes a proposal that would increase the fee of \$5.60 per one-way trip to \$6.00 per one-way trip in the final three quarters of FY 2016. The proposal would generate an additional \$195 million in collections. The entire \$195 million increase is dedicated to deficit reduction. Thus, the 2016 Total Request does not include \$1.25 billion for deficit reduction identified in the BBA, \$195 million for deficit reduction created by the proposal, or the \$250 million in collections assigned to fund the ASCF.

FY 2016 Total Request	-	-	\$250,000
Total Change 2015 to 2016	-	-	-

CURRENT SERVICES PROGRAM DESCRIPTION:

The Aviation Security Capital Fund (ASCF), first established in FY 2005, is authorized through FY 2028 by P.L. 110-53. The ASCF supports the installation of optimal screening systems at airports and the purchase and installation of EDS equipment. In FY 2016, TSA continues to request to use the ASCF for the purchase and installation of EDS equipment.

MAJOR ACQUISITIONS:

Electronic Baggage Screening Program (EBSP)

The EBSP identifies, tests, procures, deploys, installs, sustains, and recapitalizes TSE across all Federalized airports to ensure 100% screening of checked baggage. The EBSP supports screening to minimize the risk of personal injury or death, or damage or loss of property due to terrorist or criminal activity. It reduces costs and improves security screening efficiency through automation of processes to detect and prevent the introduction of explosives materials, weapons, and other dangerous articles into commercial aircraft. Key objectives are: increasing threat detection capability; improving checked baggage screening efficiency; replacing aging EDS and ETD units; and using competitive procurement contracts for new and viable technologies. The EBSP addresses a capability gap by screening 100% of checked baggage.

The EBSP investment is to be funded out of multiple PPAs in FY 2016, as follows:

- EDS Procurement and Installation PPA \$51.2 million
- Screening Technology Maintenance PPA \$193.7 million
- Aviation Security Capital Fund PPA \$250.0 million

Funding tables for this investment are included in the EDS Procurement and Installation PPA.

Current Services Level							0	0	\$811,545
Program Increase							0	0	\$5,200
Total Request	0	0	\$0	0	0	\$800,214	0	0	\$816,745

Description of Item:

The primary focus of the FAMS is to detect, deter, and defeat terrorist or other criminal or hostile acts targeting U.S. carriers, airports, passengers, and crew. TSA requests an increase of \$5.2 million to the FAMS. This increase will allow FAMS to renew hiring in FY 2016.

Justification:

The last FAM training class was brought on board September 11, 2011 and began flying in January of 2012. The program increase enables TSA to hire FAMS and allows TSA to rebalance the FAM workforce. Hiring new FAMs will alleviate the impacts of a hiring freeze including an aging workforce, stagnation, and diminished career progression. This increase will revitalize FAM personnel and have a significant, positive impact on FAMS operational capabilities.

In addition, TSA intends to finalize a phased field office consolidation in FY 2016 to more effectively and efficiently conduct highest priority security operations.

Impact on Performance (Relationship of Decrease to Strategic Goals):

The FAMS will continue to focus on coverage of high-risk flights.

**Department of Homeland Security
Transportation Security Administration
Aviation Security
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 2: Restoration of Assumed RBS Efficiencies - TSA Academy Instructors
 PPA: Screener Training and Other, Airport Management and Support
 Program Increase: Positions 31, FTE 31, Dollars \$2,492

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							3,200	3,077	\$825,231
Program Increase							31	31	\$2,492
Total Request	3,215	3,065	\$813,857	3,190	3,067	\$818,024	3,231	3,108	\$827,723

Description of Item:

The FY 2016 Budget includes an increase of 31 FTP/FTE and \$2.500 million to support staffing needs at the Academy. This includes an increase of 31 FTP/FTE and \$2.492 million in the Aviation Security appropriation and \$8 thousand in the Transportation Security Support Appropriation. Of the \$2.492 million in Aviation Security:

- 31 FTP/FTE and \$2.481 million is from Screener Training and Other
- \$11 thousand is from Airport Management.

Justification:

In support of TSA's efforts towards professionalization of the officer workforce, TSA is requesting an additional \$2.5 Million and 31 FTP for TSA Academy operations to expand its Academy deliveries of mission essential training. Since the Academy operations were established at FLTEC in Glynco, Georgia in April of 2012, TSA has graduated approximately 7,000 of its 45,000+ employees. Through the training provided thus far, TSA has been able to see a marked improvement in the attitude of the portion of the workforce who have completed training at the Academy and their support of the overall mission of TSA. Initial efforts have allowed TSA to touch its supervisor and lead officers, and this proposed increase will allow TSA to expand the courses conducted at the Academy, to not only include more categories of employees, but to also support follow-on training that will continue to build upon the foundation established through these first Academy training deliveries. Much of the prior efforts have been done with contractors or TSA employees temporarily assigned to the Academy to provide the class. An established presence at FLETC provides a consistent and structured training environment for the officer workforce that supports TSA's focus on professionalization and helps

officers understand their connectivity within the DHS network. Workforce transformation will take time and with this funding allocation, TSA will be able to make an additional investment into a structured formalized training campus for the continued delivery of mission essential training, and the professional development of its officers.

Impact on Performance:

Without the increase, TSA will be limited in its ability to provide the essential training necessary to maintain a more professional officer workforce.

Description of Item:

The FY 2016 Budget includes a reduction of 1,666 FTP/FTE and \$110.462 million as a result of screener workforce efficiencies from expedited screening through RBS initiatives. This includes a reduction of 1,666 FTP/FTE and \$110.005 million in the Aviation Security appropriation and \$457 thousand in the Transportation Security Support appropriation. Of the \$110.005 million in Aviation Security:

- 1,666 FTP/FTE and \$107.087 million is from Screener PC&B;
- \$2.314 million is from Screener Training and Other; and,
- \$604 thousand is from Airport Management.

Since its inception, TSA has significantly reduced terrorist threats through a multi-layered approach to security. TSA continues to undertake efforts to test newer security protocols to improve the passenger experience at aviation security checkpoints by applying risk-based, intelligence-driven screening procedures and enhancing its use of technology. The vision of RBS is to increase overall aviation security by focusing on high-risk and unknown passengers while expediting known or trusted travelers.

TSA has assumed a full year of savings for these reductions in FY 2016 and will begin working during FY 2015 to achieve the necessary staffing levels through attrition. TSA has made a shift to more full time positions in the past year and therefore TSA assumes the FY 16 budget reduction will be all full time positions.

Justification:

TSA began implementing a series of risk-based initiatives in 2011. TSA continues to expand RBS efforts by adding new programs and populations selected for expedited screening by using intelligence and risk-based information. TSA also collaborates with stakeholders to identify, implement, and expand participation in risk-based security initiatives.

As part of its risk-based approach to passenger screening, TSA is pursuing several initiatives to build upon the early successes of TSA Pre✓®. Through the use of TSA Pre✓® lanes, which can process a larger volume of passengers more quickly, TSA is able to screen the same number of passengers within the current wait times or better, enabling the closure of some standard lanes, and reducing personnel requirements. One of TSA's goals for RBS in 2015 and beyond is to increase the known traveler population in order to improve aviation security and create staffing efficiencies at the security checkpoint that drive down passenger wait times and corresponding resource requirements. TSA intends to meet this goal by: (1) extending participation in TSA Pre✓® to additional air carriers; (2) identifying additional lower-risk populations for expedited screening; and, (3) promoting enrollment in TSA Pre✓® and other DHS trusted traveler programs. As a result of TSA's risk based approach to operations, TSA is proposing the following efficiencies for FY 2016:

- **Reduction to the Screener Workforce (Aviation \$35.009 million, Support \$123 thousand, Total \$35.132 million and 545 FTP/545 FTE):** TSA's Risk Based implementation of TSA Pre✓® at 119 airports in FY 2014 has enabled TSA to reduce passenger wait times and improve operational efficiency. As more and more passengers receive expedited screening through TSA's TSA Pre✓® lanes, the increase in passenger flow via more efficient TSA Pre✓® lanes results in reduced staffing requirements. RBS methods are more efficient in moving people through the checkpoint than regular screening lanes and require fewer resources than a traditional screening lane. As a result, TSA Pre✓® lanes process a larger volume of passengers more quickly, therefore, TSA is able to screen the same number of passengers within the current wait times or better. The primary driver for TSA's RBS endeavors is to improve security. As RBS initiatives expand throughout the aviation security system, TSA is gaining efficiencies at the checkpoint which allow for the closure of some standard screening lanes and reduced personnel requirements. The responsibility of the TSO has also evolved over time, into a more highly skilled, critical thinking, professional position. This proposed reduction is part of TSA's overall efforts to continue transitioning to a smaller, more skilled, professional workforce capable of meeting the evolving requirements of RBS operations.
- **Reduction to Advanced Imaging Technology (AIT) Full Operational Capability (Aviation \$41.535 million, Support \$195 thousand, Total \$41.730 million and 650 FTP/650 FTE)** Following the December 25, 2009, attempted attack on Northwest Flight 253, TSA aggressively pursued immediate countermeasures to address the threat of non-metallic explosives and other dangerous materials concealed on a person. AIT units were purchased and deployed as an immediate countermeasure for detecting non-metallic explosive devices on a passenger during the checkpoint screening process. AITs met performance expectations for security value when initially deployed across the nation. From the original acquisition planning and determination of the number of units required for screening, several things have changed. Most notably, TSA adopted a risk-based philosophy for passenger screening and implemented

TSA Pre✓® checkpoint screening lanes that rely on pre-screening as an alternative to AIT for a large portion of passengers receiving expedited screening. As a result, TSA has been able to eliminate the requirement for AIT units at many of the checkpoint lanes. . These initiatives include intelligence and information-based pre-screening that limit the need for physical screening using technology such as AIT. The successful implementation and expansion of several RBS programs over the past year, and initiatives projected for the coming year, supports adjusting the acquisition and deployment plan to reflect a smaller number of AIT units compared with the original plan from 2010. As a result of reducing the number of AITs from 1,000 to projected 930 in FY 2015 President's Budget, TSO staffing and associated costs can be reduced as well. In FY 2016, the Full Operational Capability for AIT is projected to be 870 units based on increased expedited screening participation levels resulting from TSA's RBS initiatives. This request proposes to reduce staffing resources associated with 1,000 AITs down to the revised requirement of 870.

- **Reduction to Behavior Detection Workforce (Aviation \$33.461 million, Support \$139 thousand, Total \$33.600 million and 471 FTP/471 FTE):** As TSA continues to adopt risk-based practices at airport security checkpoints, TSA is evaluating all layers of security in order to ensure the agency is providing the most effective security in the most efficient way. The BDA Program is an integral part of TSA's many layers of security; providing real-time threat assessments based on behavior pattern recognition techniques that detect behavior indicators and suspicious activities that deviate from an established environmental baseline. Over the past year, TSA re-concentrated BDOs at larger and higher risk airports and reduced its full-time BDO footprint from 122 airports to 87 airports using a risk-based staffing model. This model incorporated factors in the traditional TSO Staffing Allocation Model but also added risk based factors. As a result, allocated behavior detection assets were placed at locations that provide the greatest opportunity for engaging the traveling public and airport employees to support TSA's risk based security initiatives. In doing so, TSA had only a 4.5% reduction in behavior detection passenger throughput coverage nationwide. Meanwhile at the 35 airports where TSA removed the allocated behavior detection assets, TSA created a spectrum of capabilities where a certain number of existing TSOs would receive behavior detection training and certification. Those officers would conduct traditional screening 80% of the time per pay period and 20% of their time would be conducting behavior detection related functions to support TSA's risk based security initiatives. The multi-function capability provides smaller and lower risk airports with behavior detection mitigation tools where otherwise the risk model would not have dedicated a full-time behavior detection capability. Lastly, TSA developed an updated Behavior Awareness Training (BAT) for the TSO workforce that further promotes reporting and identifying suspicious behaviors and activities. Therefore, TSA has determined that the existing allocation of 3,131 BDOs can be reduced without significant negative impacts to security while simultaneously enhancing the efficiency of the BDA program.

Impact on Performance:

The requested funded level is sufficient to meet security screening requirements within current or better wait times.

Description of Item:

The FY 2016 Budget includes a reduction of \$2.044 million for Transportation Security Specialists – Explosives efficiencies through RBS initiatives. This includes a reduction of 19 FTP/18 FTE and \$2.021 million in the Aviation Security appropriation and \$23 thousand in the Transportation Security Support appropriation. Of the \$2.021 million in Aviation Security;

- 19 FTP/18 FTE and \$2.008 million is from Airport Management and
- \$13 thousand from Screener Training and Other.

Since its inception, TSA has significantly reduced terrorist threats through a multi-layered approach to security. TSA continues to undertake efforts to test newer security protocols to improve the passenger experience at aviation security checkpoints by applying risk-based, intelligence-driven screening procedures and enhancing its use of technology.

The vision of RBS is to increase overall aviation system security by focusing on high-risk and unknown passengers while expediting known or trusted travelers. In an effort to continuously improve aviation transportation security, TSA undertakes new initiatives to best align passenger screening resources based on risk assessments.

Justification:

As a result of TSA’s risk-based approach to operations, TSA proposes to reduce the number of TSS-E positions. One of the roles of the TSS-Es is to provide subject matter expertise and training to the TSOs. The TSS-E program provides frequent interaction with and formal training to TSOs to increase their ability to recognize potential IEDs and IED components. As TSA transitions to a smaller, more

skilled professional workforce capable of meeting the evolving requirements of RBS, TSA is able to reduce the number of TSS-Es without significant negative impacts to security responsiveness and training. The TSS-E Program will continue operating at over 100 of the Nation's largest airports and is available to respond to unresolved alarms at the checkpoint.

Impact on Performance:

The requested funded level is sufficient to meet security screening requirements within current or better wait times.

Department of Homeland Security
Transportation Security Administration
Aviation Security:
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 3: RBS Efficiencies - Transportation Security Inspectors
PPA: Aviation Regulation and Other Enforcement, Air Cargo
Program Decrease: Positions (54), FTE (52), Dollars \$(5,217)

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							2,289	2,198	\$460,208
Program Decrease							(54)	(52)	(\$5,217)
Total Request	2,461	2,286	\$444,069	2,282	2,191	\$455,573	2,235	2,146	\$454,991

Description of Item:

The FY 2016 Budget includes a reduction of 54 FTP/52 FTE and \$5.217 million from the Aviation Security Appropriation for Transportation Security Inspector (TSI) position savings related to RBS. Of the \$5.217 million in Aviation Security:

- 31 FTP/30 FTE and \$3.010 million is from Aviation Regulation and Other Enforcement and
- 23 FTP/22 FTE and \$2.207 million is from Air Cargo.

Justification:

TSA continues to expand RBS efforts by adding new programs and populations selected for expedited screening by using intelligence and risk-based information. TSA also collaborates with stakeholders to identify, implement, and expand participation in RBS initiatives. As TSA continues to adopt risk-based practices, TSA is evaluating all layers of security in order to ensure the agency is providing the most effective security in the most efficient way.

TSA's TSI and compliance programs are responsible for the evaluation of the security integrity of the Nation's airports, domestic air carriers, IACs, and CCSFs within the aviation environment. In addition, TSA maintains an inspector workforce which provides Federal inspection and security assessments within the surface transportation system, such as freight railroads, mass transit, passenger rail, highway motor carriers and pipelines.

Over the past few years, TSA's inspector community has made significant efforts to ensure that the inspections are scheduled in a way that balances and maximizes oversight while identifying possible

efficiencies in staffing. Analysis of inspection data as well as risk scores are used to drive and prioritize inspection activity and take into account several factors, including the latest intelligence information. TSA's Office of Security Operation's Compliance Programs Division evaluated current TSI staffing nationwide based on performance of the regulated parties and commensurate workload. By looking at past performance, and focusing efforts on regulated parties who would benefit from increased oversight, TSA is able to provide a more surgical review and focused enforcement to achieve additional compliance.

TSA anticipates it can attain this reduction in FTE through attrition and the collapsing of vacant positions where the loss of FTE would not degrade TSA's performance of its regulatory compliance oversight responsibilities.

Impact on Performance:

The requested funded level is sufficient to meet security screening requirements within current or better wait times.

Plan/Milestones/Schedule:

The FY 2016 Budget level will adequately fund the TSI program. This proposed reduction will not impact the current levels of security, as TSA will continue to prioritize and implement risk-based layers of security.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Transportation Security Administration related to providing civil aviation security services pursuant to the Aviation and Transportation Security Act (Public Law 107–71; 115 Stat. 597; 49 U.S.C. 40101 note), \$[5,683,304,000]5,614,766,000^d, to remain available until September 30, [2016]2017²; of which not to exceed \$7,650 shall be for official reception and representation expenses: *Provided*, That any award to deploy explosives detection systems shall be based on risk, the airport's current reliance on other screening solutions, lobby congestion resulting in increased security concerns, high injury rates, airport readiness, and increased cost effectiveness: *Provided further*, That security service fees authorized under section 44940 of title 49, United States Code, shall be credited to this appropriation as offsetting collections and shall be available only for aviation security: *Provided further*, That the sum appropriated under this heading from the general fund shall be reduced on a dollar-for-dollar basis as such offsetting collections are received during fiscal year [2016]2017³ so as to result in a final fiscal year appropriation from the general fund estimated at not more than \$[2,865,011]3,482,816,000^d: ***Provided further, That the fees deposited under this heading in fiscal year 2013 and sequestered pursuant to section 251A of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901a) that are currently unavailable for obligation, are hereby permanently cancelled²***: ***Provided further, That the funds deposited pursuant to section 515 of P.L. 108-334 (FY 2005 Homeland Security Appropriations Act) that are currently unavailable for obligation, are hereby permanently cancelled^d***: *Provided further*, That notwithstanding section 44923 of title 49, United States Code, for fiscal year [2016]2017⁷, any funds in the Aviation Security Capital Fund established by section 44923(h) of title 49, United States Code, may be used for the procurement and installation of explosives detection systems or for the issuance of other transaction agreements for the purpose of funding projects described in section 44923(a) of such title: ***Provided further, That notwithstanding any other provision of law, mobile explosives-detection systems purchased and deployed using funds made available under this heading may be moved and redeployed to meet evolving passenger- and baggage-screening security priorities at airports⁸***: *Provided further*, That not later than 90 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a detailed report on— (1) the Department of Homeland Security efforts and resources being devoted to develop more advanced integrated passenger screening technologies for the most effective security of passengers and baggage at the lowest possible operating and acquisition costs, including projected funding levels for each fiscal year for the next 5 years or until project completion, whichever is earlier; (2) how the Transportation Security Administration is deploying its existing passenger and baggage screener workforce in the most cost effective manner; and (3) labor savings from the deployment of improved technologies for passenger and baggage screening and how those savings are being used to offset security costs or reinvested to address security vulnerabilities: *Provided further*, That the Administrator of the Transportation Security Administration shall submit to the Committees on Appropriations of the Senate and the House of Representatives, a semiannual report updating information on a strategy to increase the number of air passengers eligible for expedited screening, including: (1) specific benchmarks and performance measures to increase participation in Pre-Check by air carriers, airports, and passengers; (2) options to facilitate direct application for enrollment in Pre-Check through the Transportation Security Administration's Web site, airports, and other enrollment locations; (3) use of third parties to pre-screen passengers for expedited screening; (4)

inclusion of populations already vetted by the Transportation Security Administration and other trusted populations as eligible for expedited screening; and (5) resource implications of expedited passenger screening resulting from the use of risk-based security methods: *Provided further*, That Members of the United States House of Representatives and United States Senate, including the leadership; the heads of Federal agencies and commissions, including the Secretary, Deputy Secretary, Under Secretaries, and Assistant Secretaries of the Department of Homeland Security; the United States Attorney General, Deputy Attorney General, Assistant Attorneys General, and the United States Attorneys; and senior members of the Executive Office of the President, including the Director of the Office of Management and Budget, shall not be exempt from Federal passenger and baggage screening. (*Department of Homeland Security Appropriations Act, 2015.*)

INITIATIVE #1 TSA – ELECTRONIC BAGGAGE SCREENING PROGRAM

1. Project Description, Justification and Scope

EBSP was established to meet the congressional mandate for 100 percent screening of aviation-checked baggage in the National Airspace System for explosives by electronic or other approved means. This mandate was established in the ATSA. TSA's mission is to protect the Nation's transportation systems to ensure freedom of movement for people and commerce. The EBSP ensures that the TSA mission is achieved through a risk-based prioritized requirements methodology and through development, testing, procurement, deployment, and lifecycle management of checked baggage TSE screening technologies. By utilizing screening activities that minimize the risk of personal injury or death, or damage or loss of property due to acts of terrorism or criminal activity directed at aviation transportation, the program directly supports TSA's goals of protecting the transportation system from dangerous people and items that threaten its security, managing risks to critical transportation infrastructure, and strengthening the TSA's operations and management.

EBSP is responsible for full life cycle management of screening equipment utilized for screening checked baggage for concealed explosives. The primary detection technologies, or TSE, used by EBSP are EDS and ETD. EBSP is part of the TSA vision of layered security.

Key objectives of the program include: increasing threat detection capabilities, improving checked baggage screening efficiency, replacing EDS and ETD units at the end of their useful life, and utilizing

competitive procurement contracts to deliver new technologies to the field. The EBSP works closely with the DHS Science and Technology Directorate (S&T), who is responsible for the certification testing of the screening equipment, as well as research and development of emerging screening technologies. The primary beneficiaries of the EBSP are the traveling public; commercial airlines; and airport authorities and the TSA Office of Security Operations, whose staff manages the daily operations of deployed TSE. The EBSP also engages the TSA Security Technology Infrastructure Program (STIP) to enable remote maintenance and monitoring of the deployed screening equipment. This may contribute to the integration of risk-based security principles into the checked baggage systems, through remote upgrades and toggling of threat detection algorithms.

The EBSP also involves efforts studying the integration of new technologies into existing systems to ensure operational effectiveness and suitability prior to full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment in the field in a variety of environmental conditions. EBSP conducts:

- Operational test and evaluation as part of the acquisition process for items procured by TSA, and
- Pilots, demonstrations, and field experimentation in support of mission area analyses, concept of operations development and workforce characterization.

2. Significant Changes

The FY 2016 request includes \$494.9 million for EBSP.

TSA's successful focus on meeting the 100 percent screening mandate has led to an unbalanced age distribution in the current TSE fleet. The EBSP plans to continue replacing EDS and ETD units based on prioritization criteria to efficiently maintain 100 percent screening while working toward achieving steady-state equipment replacement. It is also pursuing efficiencies aimed at maximizing equipment utilization and extending equipment life.

In addition, EBSP is developing new algorithms to detect evolving threats. TSA expects new algorithms in the near term with the ability to more reliably detect homemade explosive formulations in checked baggage while also reducing false alarm rates. In coordination with DHS S&T and industry, TSA is working to certify, qualify and implement improved algorithms on both in-service EDS as well as new systems currently under development. EBSP will continue implementation of its Incremental Development Strategy to allow vendors to refine their automatic detection algorithms so that increasingly effective equipment types can become certified and qualified for purchase by TSA.

3. Project Schedule

Projects	Fiscal Quarter and Year		\$ in Thousands	
	Project Start	Project Complete	Total Estimated Completion Cost	Total Project Cost
(FY02-FY07) Program initiation (MNS, ConOps draft); Deployed systems for facility mods, Strategic Program Plan, & NEXGEN. Updated Strategic Plan, LCCE, CBA, Deployment Schedule; Performed program/tech mgmt, system deployment, & O&M, per deployment plan	Q1 2002	Q1 2008	2,665,061	2,610,186

(FY16) Maintenance	Q1 2016	Q4 2016	193,719	-
TOTAL			11,700,151	10,344,073

*FY 2002-FY 2016 excludes STIP and Advanced Surveillance Program (ASP) from the EDS PPA.

*FY 2011-FY 2016 excludes Surface and Cargo from the EDS PPA.

*Maintenance amounts include costs for equipment disposal from the Screening Technology Maintenance PPA.

4. Schedule of Project Funding

(Dollars in Thousands)

Projects (Aviation Security)	Prior **	FY 2014	FY 2015	FY 2016	Total
Program Operations and Management & Engineering Initiatives	1,179,471	149,168	89,871	108,092	1,526,602
LOI/OTA	2,863,132	-	61,200	79,500	3,003,832
EDS Purchase and Install	4,005,810	143,972	151,000	113,600	4,414,382
Maintenance	2,134,481	210,358	216,777	193,719	2,755,335
TOTAL	10,182,894	503,498	518,848	494,911	11,700,151

*FY 2002-FY 2016 excludes STIP and ASP from the EDS PPA.

*FY 2011–FY 2016 excludes Surface and Cargo from the EDS PPA.

*Maintenance amounts include costs for equipment disposal from the Screening Technology Maintenance PPA.

** EDS Purchase and Installation includes all program funding except maintenance for FY02-FY08 due to past history reporting

5. Cost Estimate Detail and Changes

(\$ in Thousands)

Description of Milestone	Initial Total Cost	Planned Total Cost	Actual Total Cost	Explanation of Difference Between Current and Previous Estimate
(FY02-FY07) Program initiation (MNS, ConOps draft); Deployed systems for facility mods, Strategic Program Plan, & NEXGEN. Updated Strategic Plan, LCCE, CBA, Deployment Schedule; Performed program/tech mgmt., system deployment, & O&M, per deployment plan. Maintained equipment	4,723,501	4,723,501	4,624,101	Airport scheduling delays slowed deployment of equipment.
(FY08) Perform program management, system deployment, O&M, tech management, and maintenance utilizing strategic plan	758,487	758,487	747,906	Airport scheduling delays slowed deployment of equipment.
(FY09) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan; and perform operations and maintenance utilizing strategic plan.	1,482,823	1,482,823	1,401,779	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award.
(FY10) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan; and perform operations and maintenance utilizing strategic plan.	1,260,174	1,260,174	1,315,637	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award.
(FY11) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan and for recapitalization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.	742,770	742,770	525,688	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award.

(FY12) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for recapitalization and optimization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.	699,903	699,903	380,666	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award
(FY13) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for recapitalization and optimization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.	685,957	685,957	420,290	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award
(FY14) Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for recapitalization and optimization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing strategic plan.	515,828	515,828	234,700	Airport scheduling delays slowed deployment of equipment, and acquisition of EDS equipment delayed due to competitive award

*FY 2002 – FY 2016 excludes STIP and ASP from the EDS PPA.

*FY 2011 – FY 2016 excludes Surface and Cargo from the EDS PPA.

*Maintenance amounts include costs for equipment disposal from the Screening Technology Maintenance PPA.

6. Method of Performance

EBSP is currently in a mixed acquisition life cycle phase, focusing predominately on the produce/deploy/support phase of the acquisition process. The program submits multiple reports and briefings on the status of the program, including an overall EBSP expenditure plan, which is submitted to Congress annually. The plans include specific airport projects designated for the purchase and installation of EDS equipment; schedules and major milestones; a schedule for obligation of the funds; recapitalization priorities; the status of operational testing for each checked baggage screening technology under development; and data detailing actual versus anticipated unobligated balances. Additionally, progress against major project milestones in the Acquisition Program Baseline is reported to DHS on a regular basis.

Operational performance will be measured based on the following criteria:

- 100 percent electronic screening of checked baggage for explosives at all commercial airports nationwide
- Percent of checked baggage screened with EDS that maximize security, effectiveness, and efficiency
- Cost per bag screened
- Operational availability of baggage screening equipment
- Customer satisfaction

7. Related Annual Funding Requirements

(Dollars in Thousands)

	FY 2016	
	Current Estimate	Previous Estimate
N/A (All operations and maintenance are included in program cost estimates.)	N/A	N/A
TOTAL	N/A	N/A

8. Budget Allocation to Programs

(Dollars in Thousands)

Program	Allocated Budget	
	FY 2015	FY 2016
EDS/ETD Purchase & Install	302,071	301,192
Screening Technology Maintenance	216,777	193,719
Total	518,848	494,911

*FY 2002 – FY 2016 excludes STIP and ASP from the EDS PPA.

*FY 2011 – FY 2016 excludes Surface and Cargo from the EDS PPA.

*Maintenance amounts include costs for equipment disposal from the Screening Technology Maintenance PPA.

9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

This program is mandated under the Aviation and Transportation Security Act (P.L. 107-71) which requires 100% screening of checked baggage by EDS or an equivalent standard.

INITIATIVE #2

TSA – PASSENGER SCREENING PROGRAM (PSP)

1. Project Description, Justification and Scope

TSA's PSP is responsible for aviation checkpoint security equipment for the Nation's airports. PSP's mission is to provide technologies that assist TSOs in denying entry to potential threats directed against the air transportation network. This aligns to TSA's mission of protecting the Nation's transportation systems to ensure the freedom of movement for people and commerce and also aligns to the DHS mission of Prevent Terrorism and Enhance Security, by embodying two associated goals into program operations: Preventing Terrorist Attacks and Managing Risks to Critical Infrastructure. PSP protects the travelling public and adapts to evolving security conditions by identifying and evaluating risks to passenger screening checkpoints and mitigating threats to infrastructure including terminals, aircraft, and checkpoints.

PSP consists of three security technology portfolios: people screening technologies, carry-on screening technologies, and layered security technologies. Each portfolio consists of subordinate security technology projects that focus on specific threat mitigation systems. PSP-managed technologies screen approximately 660 million passengers and their carry-on items for weapons, explosives, and prohibited items at approximately 450 Federalized airports nationwide each year. Program objectives include:

- increasing detection,
- limiting false alarms,
- enhancing efficiency,
- consolidating equipment footprint, and
- implementing the capability to allow centralized results monitoring in support of checkpoint staffing reductions.

To realize these goals, PSP is moving from independently-functioning technologies to optimized, integrated technologies that are easier to upgrade via software upgrades.

Additionally, TSA's RBS initiatives are driving changes to processes and capability needs at the checkpoint, affecting the types of lanes present at a checkpoint and number of TSE and TSOs needed to operate the checkpoint. The envisioned checkpoint security system is an optimized, integrated, and layered mix of networked systems that address known and emerging threats and vulnerabilities. PSP balances its duties with considerations such as passenger privacy, dignity, safety, and health, while maintaining affordability, deployment, maintenance, and other life cycle issues.

Current technologies that have been deployed include:

- AIT with ATR capability;
- AT-2 X-ray;
- BPS;
- BLS;
- CAD
- EMD; and
- ETD units

In FY 2015, TSA will complete testing and procurement of the Credential Authentication Technology (CAT), which will digitally validate the passengers' credential and provide near-real time vetting status updates from Secure Flight. This capability is being enabled through the automated transfer of information from Secure Flight through the STIP to the CAT units. In FY 2015 and FY 2016, TSA will procure and deploy CAT units to reach FOC. The deployment of CAT is essential in supporting RBS efforts and closing a known security vulnerability.

2. Significant Changes

TSA's FY 2016 request includes \$172.8 million for PSP. This request includes funding to purchase EMD units for recapitalization efforts and to develop next generation checkpoint screening solutions. Starting in FY 2016, checkpoint support technology will transition from the obtain phase to the sustainment phase of the life cycle for much of the security technology that has been procured. During this time, TSA will utilize base funding to focus more on a broad range of assessment and engineering activities that will increase the capabilities and prolong the life of existing equipment. This will be done through system software patching and upgrades, operating system upgrades, technical risk assessments, system certification and accreditation assessments and security compliance assessments.

The FY 2016 Budget will further reinforce this transition by allowing TSA to expand its cooperative efforts with industry in: 1) enhancing existing checkpoint capabilities and increasing detection and efficiencies, 2) investing in new technologies to better protect against emerging threats, and 3) examine additional capabilities or alternative concept of operations that can improve TSA's ability to assess threats.

TSA will also partner with other stakeholders in developing a security screening equipment architecture to provide a conceptual model of the current and future system structure. The architecture will be designed to be adaptable, modularized and potentially automated to best implement the agency's vision for risk based screening. The intent is to develop a virtual and physical architecture test-bed in order to drive further system interoperability.

Starting in FY 2016, funding will support the establishment of a quality assurance and surveillance process to ensure installed equipment continues to meet mission requirements. By implementing this process, TSA can ensure checkpoints are continuing to operate per the Agency's requirements.

TSA will also begin planning activities and market analysis for future planned recapitalization procurements as the checkpoint support program shifts to the sustain/enhance phase of the acquisition lifecycle. The FY 2016 Budget will support the development of emerging technologies and engineering initiatives in order to increase the TSA's ability to respond to the evolving and ever-changing threat landscape.

TOTAL			\$2,789,040	\$2,165,835

*Excludes the Security Technology Integrated Program (STIP) and Advanced Surveillance Program (ASP) costs from the Checkpoint Support PPA.

*Maintenance amounts include costs for equipment disposal from the Screening Technology Maintenance PPA.

4. Schedule of Project Funding

(Dollars in Thousands)

Projects (<i>Aviation Security</i>)	Prior	FY 2014	FY 2015	FY 2016	Total
Planning and Testing	\$76,791	\$13,000	\$13,000	\$13,000	\$115,791
Procurement and Deployment	\$1,665,846	\$70,273	\$70,865	\$64,523	\$1,871,507
Operations and Support (Maintenance)	\$498,326	\$75,821	\$77,732	\$86,790	\$738,669
Personnel Cost and Benefits	\$37,556	\$8,610	\$8,468	\$8,439	\$63,073
Total Project Expenditures*	\$2,278,519	\$167,704	\$170,065	\$172,752	\$2,789,040

*Excludes STIP and ASP from the Checkpoint Support PPA.

*Maintenance amounts include costs for equipment disposal from the Screening Technology Maintenance PPA.

5. Cost Estimate Detail and Changes

(Dollars in Thousands)

Description of Milestone	Planned Total Cost	Actual Total Cost	Explanation of Difference
Procurement and Deployment (FY06)	\$93,220	\$82,732	Program received quantity discount and awards lower than estimate; funds reallocated between activities
Procurement and Deployment (FY11)	\$288,888	\$252,461	Funds were reallocated between programs and activities
Operations and Support (Maintenance) (FY11)	\$76,000	\$72,528	Less deployments; funds reallocated to other maintenance requirements
Procurement and Deployment (FY12)	\$166,971	\$117,438	Funds were reallocated between programs and activities

* Only significant differences are listed

6. Method of Performance

TSA provides regular PSP status reports and briefings to DHS, OMB, and Congress, to include an annual expenditure plan to Congress and quarterly updates. The plans include specific technologies for purchase; program schedules and major milestones; a schedule for obligation of the funds; recapitalization priorities; the status of operational testing for each passenger screening technology under development; and data detailing actual versus anticipated unobligated balances. The plan also includes details on passenger screening pilot programs that are in progress or being considered for implementation in fiscal year.

Program performance will be measured based on the following criteria:

- Cost Per Passenger Screened
- Percent of Operational Availability
- Percent of Total Passengers Screened by AIT
- Percent of Checkpoint Lanes with AIT Coverage
- Percent of Checkpoint Lanes with AT Coverage
- Customer Survey

7. Related Annual Funding Requirements

(Dollars in Thousands)

	FY 2016	
	Current Estimate	Previous Estimate
N/A (All operations and maintenance are included in program cost estimates.)	N/A	N/A
TOTAL	N/A	N/A

8. Budget Allocation to Programs

(Dollars in Thousands)

Program	Allocated Budget	
	FY 2015	FY 2016
Checkpoint Support*	\$92,333	\$85,962
Screening Technology Maintenance**	\$77,732	\$86,790
TOTAL	\$170,065	\$172,752

*Excludes STIP and ASP from the Checkpoint Support PPA.

**Maintenance amounts include costs for equipment disposal from the Screening Technology Maintenance PPA.

9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

This program is mandated under ATSA, which requires screening of all passengers and property including carry-on baggage and other articles that will be carried aboard a passenger aircraft.

10. Budget Allocation to Programs

(Dollars in Thousands)

Program	Allocated Budget	
	FY 2015	FY 2016
Checkpoint Support*	\$92,633	\$91,375
Screening Technology Maintenance**	\$77,732	\$86,790
TOTAL	\$170,365	\$178,165

*Excludes STIP and ASP from the Checkpoint Support PPA.

**Maintenance amounts include costs for equipment disposal from the Screening Technology Maintenance PPA.

11. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

This program is mandated under ATSA, which requires screening of all passengers and property including carry-on baggage and other articles that will be carried aboard a passenger aircraft.

Federal Air Marshals Mission Statement

The FAMS PPA funds the FAMS's payroll costs, supports all operational and infrastructure requirements, and training and travel expenses. The vast majority of this PPA funds the salaries for FAMS and the civilian workforce to provide vital protective and law enforcement services necessary for both domestic and international air travel as well as other transportation related security activities. The PPA also supports the continuing development and maintenance of the Service's infrastructure, internal business processes, and systems that enable FAMS to seamlessly perform the integrated set of functions that make up their mission.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	-	\$360,705	\$370,709	\$10,004
11.3 Other than Full-Time Permanent	-	\$12,521	\$12,868	\$347
11.5 Other Personnel Compensation	-	\$103,675	\$106,551	\$2,876
11.8 Special Personal Services Payments	-	\$623	\$639	\$16
12.1 Civilian Personnel Benefits	-	\$185,795	\$190,949	\$5,154
Total, Salaries & Benefits	-	\$663,319	\$681,716	\$18,397

The FY 2016 Salaries and Benefits request includes an increase of \$142,000 for a transfer from the Transportation Security Support Appropriation, an increase of \$8,182,000 for pay COLA, an increase of \$4,873,000 for retirement contributions, and an increase of \$5,200,000 for a FAMS Enhancement.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$0	\$8,892	\$7,026	(\$1,866)

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25.1. The FAMS uses this series for additional support for the Mission Scheduling and Notification System, support services for other elements (including contractors supporting contracting/procurement efforts) within the Service. The FY 2016 request reflects a decrease of \$1,866,000 for a transfer from the Transportation Security Support Appropriation and a transfer to the Screener Training & Other PPA within the Aviation Security Appropriation.

Screening Partnership Program Mission Statement

The Screening Partnership Program (SPP) allows an airport operator to submit an application to have screening carried out by a qualified private screening company. The contractor must perform under federal oversight and the contracted screeners must perform at the same or at a higher performance levels as federal TSOs.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$158,050	\$154,432	\$166,786	\$12,354

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$101	\$101	\$102	\$1

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

Checkpoint Support Mission Statement

The Checkpoint Support PPA provides the resources required to test, procure, and deploy checkpoint capabilities and electronic surveillance equipment to enhance threat detection and security effectiveness at passenger checkpoint lanes in our Nation's airports. This equipment and these capabilities are a vital component of TSA's efforts to secure our nation's air transportation.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$6,956	\$7,039	\$7,148	\$109
11.5 Other Personnel Compensation	\$85	\$91	\$92	\$1
12.1 Civilian Personnel Benefits	\$1,867	\$1,938	\$1,964	\$26
Total, Salaries & Benefits	\$8,908	\$9,068	\$9,204	\$136

Salaries and Benefits include personnel and compensation costs for 57 FTEs.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$61,735	\$84,421	\$73,299	(\$11,122)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2016 request reflects a net decrease of \$11,122,000.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$293	\$1,641	\$1,141	(\$500)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2016 request reflects a net decrease of \$500,000.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$26,580	\$5,392	\$10,674	\$5,282

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2016 request includes an increase of \$5,282,000 for the procurement of Checkpoint Transportation Security Equipment.

Screening Technology Maintenance Mission Statement

The Screening Technology Maintenance PPA funds the corrective and preventative maintenance of passenger and baggage screening equipment in the Nation's airports. This funding is essential to ensure that all security screening equipment is operationally ready and supportable over its anticipated lifetime.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$284,319	\$292,649	\$278,649	(\$14,000)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2016 request reflects a decrease of \$14,000,000 due to maintenance contract efficiencies and savings initiatives, including removal of excess equipment from the field, retiring obsolete technologies, and favorable pricing achieved through competitive contract awards for maintenance services.

Aviation Regulation and Other Enforcement Mission Statement

The purpose of Aviation Regulation and Other Enforcement is to provide activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the nation's commercial airports. Funding requested under this decision unit supports airport regulation compliance through domestic and international inspections, K-9 units, international outreach programs to ensure alignment and consistency in security requirements of the United States and those of the other nations to ensure transportation system integrity; and reimbursements provided to State and local law enforcement for support provided at commercial airport checkpoints.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$144,370	\$155,948	\$157,277	\$1,329
11.3 Other than Full-Time Permanent	\$143	\$156	\$156	-

Total, Salaries & Benefits	\$201,920	\$217,983	\$219,345	\$1,362

Salaries and Benefits include costs for 1,526 FTEs. The FY 2016 request includes a decrease of 30 FTE as a result of the program change reductions related to screener workforce RBS efficiencies.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$10,241	\$10,819	\$10,736	(\$83)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
22.0 Transportation of Things	\$143	\$151	\$150	(\$1)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$359	\$392	\$389	(\$3)

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.2 Rental Payments to Others	\$120	\$131	\$130	(\$1)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$921	\$1,011	\$1,003	(\$8)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
--	----------------------------	-------------------------------	--------------------	------------------------------

equipment and services, postal services and rentals, and utility services. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$5,121	\$5,618	\$5,575	(\$43)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$13,654	\$14,983	\$14,868	(\$115)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$15,420	\$16,957	\$16,827	(\$130)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.6 Medical Care	\$31	\$34	\$33	(\$1)

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$205	\$225	\$223	(\$2)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$5,212	\$5,500	\$5,458	(\$42)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$6,826	\$7,303	\$7,247	(\$56)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
41.0 Grants, Subsidies, and Contributions	\$61,448	\$67,418	\$66,902	(\$516)

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
42.0 Insurance Claims and Indemnities	\$72	\$79	\$78	(\$1)

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act.

Airport Management and Support Mission Statement

Airport Management and Support provides funding for each Federal Security Director and staff at each hub airport along with the headquarters personnel who direct the policy, analysis, and the administration of aviation screening and airport security. In addition, this PPA supports aviation functions at TSA's Transportation Security Operations Center. These offices and positions are critical to supporting the front-line operations of our TSOs.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$242,581	\$242,847	\$245,605	\$2,758
11.3 Other than Full-Time Permanent	\$514	\$516	\$522	\$6
11.5 Other Personnel Compensation	\$1,541	\$1,556	\$1,573	\$17
11.7 Military Personnel	\$2,900	\$2,900	\$2,933	\$33
12.1 Civilian Personnel Benefits	\$94,925	\$95,351	\$96,433	\$1,082
Total, Salaries & Benefits	\$342,461	\$343,170	\$347,066	\$3,896

Salaries and Benefits include costs for 2,915 FTEs.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$11,106	\$11,219	\$11,248	\$29

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
22.0 Transportation of Things	\$555	\$571	\$572	\$1

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$124,781	\$125,294	\$125,597	\$303

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.2 Rental Payments to Others	\$10,574	\$10,772	\$10,798	\$26

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$3,966	\$4,077	\$4,087	\$10

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$8,988	\$9,242	\$9,264	\$22

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2016 request includes adjustments to base, transfers, realignments and program changes.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$33,473	\$34,870	\$34,954	\$84

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2016 request includes adjustments to base, transfers, realignments and program changes.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$8,988	\$9,242	\$9,264	\$22

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.4 Operation and Maintenance of Facilities	\$4,229	\$4,348	\$4,358	\$10

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$529	\$544	\$546	\$2

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$12,689	\$13,031	\$13,063	\$32

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2016 request includes adjustments to base, transfers, realignments and program changes.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$13,853	\$14,243	\$14,278	\$35

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
32.0 Land and Structures	\$10,576	\$10,872	\$10,898	\$26

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2016 request reflects the costs associated with program changes and correlating FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
42.0 Insurance Claims and Indemnities	\$47	\$49	\$50	\$1

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act.

Air Cargo Mission Statement

The Air Cargo program operates through compliance activities, regulatory efforts, and outreach initiatives. TSA uses a threat-based risk management approach based on two threats: 1) introduction of an explosive device on a passenger aircraft, and 2) the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change

Aviation Security Capital Funds Fees Mission Statement

The Aviation Security Capital Fund was extended by the 9/11 Bill and is authorized through 2028. The Aviation Security Capital Fund supports the installation of optimal screening systems at airports and, with the enactment of the FY 2012 through FY 2014 Appropriations Bill, funds equipment purchases and installation.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$133,000	\$110,400	\$193,600	\$83,200

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. As provided in the FY 2012 through FY 2014 Appropriations Bills, the Aviation Security Capital Fund can be used for equipment purchases and installations as well as facility modifications. Funding in Advisory and Assistance Services is used to fund equipment installation.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$117,000	\$139,600	\$56,400	(\$83,200)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. As provided in the FY 2012 through FY 2014 Appropriations Bills, the Aviation Security Capital Fund can be used for equipment purchases and installations as well as facility modifications. Funds are requested in FY 2016 for equipment purchase.

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Surface Transportation Security

I. Appropriation Overview

A. Mission Statement for Surface Transportation Security

Mission Statement

The Transportation Security Administration (TSA) is mandated to protect the surface transportation system (including mass transit, freight rail, highways, pipeline, and maritime modes) and to ensure the freedom of movement and the security of people and commerce. This mission is accomplished largely by a consortium of Federal, State, local, and private entities coordinated by TSA to optimize resources in a risk-based approach to security. In addition to sector and modal planning and coordination, TSA provides operational deterrence support through surface security inspectors and Visible Intermodal Prevention and Response (VIPR) teams. TSA also provides other protective resources such as: training; screening and detection programs; voluntary guidelines and best practices; regulations; security and process standards; vulnerability and risk assessment teams; and subject matter expertise to the Federal Emergency Management Agency (FEMA) for surface transportation security grant programs. TSA's surface transportation responsibilities also include coordination of government and industry activities to identify and address unacceptable risk associated with all security hazards affecting the Postal and Shipping Sector.

Various statutes and executive directives require that transportation risk reduction activities be determined and implemented collaboratively in accordance with strategic plans developed with security partners. These combined efforts play an essential role in the Department of Homeland Security's (DHS) mission to prevent terrorist acts within the United States, to reduce vulnerability to terrorism, to minimize the damage from potential attacks and disasters, and to improve system resilience after an incident. The surface domain includes:

- Approximately 751 million passengers traveling on commercial buses each year; over 10 billion passenger trips on publicly operated mass transit per year; and 24 million students daily on school buses traveling more than 4 million miles annually.
- Over 140,000 miles of railroad track; 3.9 million miles of roads (46,717 miles of interstate highway and 114,700 miles of National Highway System roads); 604,000 highway bridges each over 20 feet of span; 366 highway tunnels each over 100 meters in length, and over 2.6 million miles of pipeline.
- Nearly 800,000 shipments of hazardous materials transported every day (95 percent by truck).
- The Marine Transportation System consisting of waterways, ports, and their connections, as well as commercial and recreational vessels, vehicles, and system users, such as importers and exporters. This system is geographically vast, with 95,000 miles of shoreline, 25,000 miles of rivers and canals, and is the primary transportation mode providing connectivity between the U.S. and global economies; 99 percent of overseas trade by volume enters or leaves the United States by ship.

The threat to surface transportation security has continued to grow over the past decade. Surface transportation remains an attractive target both globally (i.e. Madrid 2004 bombings, London 2005, Mumbai 2006, Moscow 2004 and 2010) and within the United States. As further examples:

- In 2004, two individuals planned to attack sites in New York City (Herald Square Plot).
- In 2006, seven individuals planned to attack and detonate backpack bombs on Port Authority Trans-Hudson trains while under the Hudson River between New Jersey and New York.
- In 2007 four individuals planned to attack pipelines at the John F. Kennedy Airport.
- In 2008 there was a threat to New York City commuter rail.
- In 2009, a potential terrorist planned to bomb the New York City subway.
- In 2010, an individual left a car with gas, propane, fertilizer, and firecrackers at Times Square in New York City.
- Also in 2010, another potential terrorist was arrested in a sting operation that October for plotting against the Washington Metropolitan Area Transit Authority.

To counter the dynamic, yet enduring nature of the threat to surface transportation, TSA, its government partners, and industry owners and operators have committed to improve the security and resilience of the transportation system.

TSA plays a pivotal role in strengthening Surface Transportation Security. The Implementing Recommendations of the 9/11 Commission Act of 2007 (9/11 Act, P.L. 110-53) requires TSA to take measures to strengthen specific modes of transportation by conducting modal security assessments, requiring modal security plan development, providing guidelines for modal security training, and conducting exercise activities to reinforce those security plans. Additionally, the Administration's 2010 Surface Transportation Priority Security Assessment designates TSA as the lead agency for implementing 17 of that report's 20 recommendations. The FY 2016 Budget for Surface Transportation Security reflects TSA's continuing efforts to improve surface transportation security pursuant to these requirements.

B. Budget Activities:

This appropriation includes two major programs, Surface Transportation Security Staffing and Operations, and Surface Transportation Security Inspectors and VIPR. Both are described as follows:

Surface Transportation Security Staffing and Operations - Provides funding for the coordination among all surface security stakeholders of processes and programs to identify and remediate unacceptable risks to critical infrastructure from all types of hazards, and for the development of a regulatory framework and administrative policy for national security strategies, plans, and programs that identify innovative solutions and best practices.

Surface Transportation Security Inspectors and VIPR - Employs a cadre of inspectors to assess compliance, administer voluntary security programs, national program delivery, and provide outreach on security assets in the surface transportation system. Deploys multi-modal VIPR teams in all modes of transportation (Surface and Aviation) to detect and deter potential terrorist activities. These resources interact daily within the transportation network to enhance security measures and are available for surge operations during times of heightened security.

C. Budget Request Summary:

The FY 2016 Budget includes 861 positions, 818 FTE, and \$123,828,000. The total adjustment to base includes a decrease of 7 positions, 7 FTE; an increase of \$467,000; and a decrease of 37 positions, 35 FTE, and \$4,276,000 in program changes including:

- Decrease of 24 positions, 23 FTE, and \$3,070,000 for a reduction in two VIPR teams; and
- Decrease of 13 positions, 12 FTE, and \$1,206,000 for efficiencies from Risk-Based Security (RBS) initiatives in the Surface Inspector program.

II. Summary of FY 2016 Budget Estimates by Program/Project Activity (PPA)

Department of Homeland Security Transportation Security Administration Surface Transportation Security

III. Current Services Program Description by PPA

**Department of Homeland Security
Transportation Security Administration
Staffing and Operations
Program Performance Justification**
(Dollars in Thousands)

PPA: Staffing and operations

	Perm. Pos.	FTE	Amount
FY 2014 Revised Enacted	157	133	\$35,262
FY 2015 President's Budget	137	127	\$29,375
2016 Adjustments-to-Base	(7)	(7)	(\$865)
FY 2016 Current Services	130	120	\$28,510
FY 2016 Program Change	-	-	-
FY 2016 Total Request	130	120	\$28,510
Total Change 2015 to 2016	(7)	(7)	(\$865)

The FY 2016 Budget includes 130 positions, 120 FTE, and \$28.5 million for the Staffing and Operations PPA.

Adjustments to Base:

- Decrease from transfers of 5 FTP, 5 FTE, and \$783,000 to the Aviation Security Appropriation (Aviation Regulation and Other Enforcement PPA) to align international operations under one PPA
- Decrease from transfer of 2 FTP, 2 FTE, and \$383,000 to the Intelligence and Vetting Appropriation (1 FTP, 1 FTE, and \$200,000 to the Other Vetting Programs PPA, and 1 FTP, 1 FTE, and \$183,000 to the Intelligence PPA) for intelligence operations
- Increase of \$55,000 for annualization of the 2015 pay raise
- Increase of \$181,000 for the 2016 pay raise
- Increase of \$65,000 for retirement contributions

CURRENT SERVICES PROGRAM DESCRIPTION:

TSA, in accordance with the Aviation and Transportation Security Act (P.L. 107-71), is responsible for assessing security threats, vulnerabilities, and consequences in all surface transportation modes. Further, TSA is charged with identifying needed security enhancements for surface transportation and related infrastructure, as well as developing security plans, and issuing and enforcing regulations to improve modal security. Homeland Security Presidential Directive (HSPD)-7 and Presidential Policy Directive (PPD)-8 expand TSA's security responsibilities to include coordination of preparedness, and activities for all hazards threatening the critical infrastructure and systems that comprise the Transportation Systems Sector.

The key strategic plans and requirements documents driving TSA’s security efforts are the Executive Order to Strengthen Surface Transportation, the Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA), the National Infrastructure Protection Plan, the 9/11 Act, and the 2014 Quadrennial Homeland Security Review.

The following activities are supported by Staffing and Operations:

Staffing and Operations – FY 2016 Budget
(\$ in Millions)

	FY 2015 President’s Budget	FY 2016 Request
Cross-modal Activities (Including Maritime, Postal & Shipping)	\$9.5	\$9.5
Mass Transit Activities (Including Passenger, Rail & Bus)	\$4.7	\$4.7
Freight Rail Activities	\$4.0	\$3.7
Pipeline Activities	\$3.7	\$3.5
Highway and Motor Carrier Activities	\$7.5	\$7.1
TOTAL	\$29.4	\$28.5

Cross-modal Activities (Including Maritime, Postal & Shipping): \$9.5 million

National Transportation Strategies, Plans and Reports: TSA will revise the Transportation Systems Sector Specific Plan, based on direction and guidance from the revised National Infrastructure Protection Plan, developed in response to Presidential Policy Directive 21. The agency is also required to develop an annual report on the sector. These documents reflect multiple strategies, plans and reports for the protection of transportation assets to meet planning and reporting requirements required by IRTPA and the 9/11 Act. The latter statute mandates strategies, plans and associated reports to be developed in collaboration with Federal, State, local, tribal, and territorial governments, owners and operators of transportation infrastructure, private sector stakeholders, and non-profit employee representative organizations. TSA strives to minimize the overlap in planning and reporting requirements and to provide a unified process for its stakeholders.

Intermodal Security Training Exercise Program (I-STEP): I-STEP assists TSA and the Transportation Systems Sector in complying with the 9/11 Act, specifically by conducting a security exercise program for security partners in the Mass Transit, Freight Rail, Highway and Motor Carriers, and Pipeline sectors. I-STEP enables security partners to enhance security capabilities, build partnerships, and gain insights in transportation security to prevent and deter acts of terrorism. I-STEP focuses on building and sustaining security preparedness to protect the traveling public, enhance national resilience, and identify capability gaps and needed resources.

I-STEP’s Security Measures and Resources Toolbox (SMARToolbox) organizes best practices gathered from TSA and security partners across all surface modes in a convenient filtering tool, available to Federal, State and local, private sector, and international partners via the Homeland Security Information Network (HSIN). I-STEP operationalizes the Surface Risk-Based Security Strategy to identify desired security outcomes and uses operations-based exercises to validate outcomes. TSA has expanded its exercise planning capacity by introducing a public-facing, on-line

exercise planning and information management system (Exercise Information System) capable of supporting all modes in the transportation system. This system assists stakeholders in planning training exercises and enhancing preparedness. TSA maintains the SMARToolbox database and assists industry in incorporating updated best practices and new functionality.

In FY 2016 I-STEP will continue to engage industry to secure nationally-significant transportation infrastructure and assist security partners to develop outcome-based policies and plans for risk-based priorities. Engagement approaches will seek to improve linkages between public and private sector partners within and across modal industries to enhance regional transportation security efforts. I-STEP will solicit information from stakeholders to identify security best practices that assist partners in continuously improving the risk posture of transportation systems serving the Nation.

Mass Transit Activities (Including Passenger, Rail & Bus): \$4.7 million

Assessments: The Baseline Assessment for Security Enhancement (BASE) program is designed to establish security standards for individual system security programs and assess progress through voluntary comprehensive reviews. Review categories include security plans, training, drills, public outreach efforts and background checks. The BASE program analyzes security programs for each transit system and identifies opportunities to further security enhancement. Reviews are conducted with emphasis on the 100 largest transit systems based on passenger volume, which account for over 80 percent of all public transportation users.

Infrastructure Protection: TSA, in conjunction with DHS, has identified critical infrastructure assets of national concern through the Top Transit Asset List (TTAL). The TTAL consists of national critical infrastructure assets vital to the functionality and continuity of a major transit system. TSA manages the TTAL including asset additions, coordinating structural blast assessments, and informing the FEMA-administered Transit Security Grant Program (TSGP) on the remediation status of the TTAL and review of project applications.

Mass Transit and Passenger Rail Modal Security Strategy: In collaboration with surface modal working groups and federal partners, TSA is working to develop and implement this strategy in order to enhance the public's perception of surface transportation security; assist industry in reporting significant security incidents with uniformity; facilitate the free movement of people and goods; assure that privacy and civil liberties are protected; and limit casualties in the event of a terrorist attack.

Stakeholder Collaboration: TSA collaborates with transit agencies to collect and disseminate best practices and threat information; identify common vulnerabilities; and share proven and emerging countermeasures to mitigate vulnerabilities. TSA also works closely with mass transit and passenger rail operators to engage in planning to meet security contingencies; set grant funding; assist agencies in documentation; and address opportunities for security enhancements.

Standards Development: TSA engages with the American Public Transportation Association (APTA) to develop a set of recommended public transportation standards/recommended practices. This effort, led by APTA's Security Standards Policy and Planning Committee, has also included security professionals from the industry, business partner representatives, and other Federal Government

entities. The objective of this program is to develop, implement and maintain standards, to achieve performance efficiency in transit system design and operation.

Counter-terrorism Guides: TSA provides transportation stakeholders across all surface modes with an awareness of specific issues that should be considered when developing and implementing organizational security plans. As necessary, updates to these guides provide security awareness, best practices and other security related information relevant to the mode.

Cybersecurity: All surface modes are increasingly reliant on complex cyber systems to maintain normal operations, and as such, the cybersecurity risk to surface modes is increasing. TSA is addressing this increasing risk by developing the Surface Cybersecurity Strategy and working with industry stakeholders on implementation. TSA has directly facilitated or participated in modal security assessments, risk-management initiatives, and cybersecurity I-STEP exercises. Through timely information sharing and outreach, TSA ensures surface transportation stakeholders have access to actionable threat information.

Government Coordinating Councils (GCC): Surface Modal GCCs are comprised of representatives of government agencies who routinely interact and partner with TSA. GCCs act as counterparts to the private, industry-led Sector Coordinating Councils (SCCs) for all surface modes of transportation to review and develop modal-wide security programs to protect the nation's transportation sector. TSA and the U.S. Department of Transportation (DOT) serve as co-Sector Specific Agencies. In this role, TSA collaborates with DOT to host meetings, develop agendas, and support logistics.

Information Sharing: TSA communicates with stakeholders in all surface modes through working groups, web-based portals, public awareness campaigns, incident-specific messaging, daily security-oriented publications, and other outreach methods. Examples include the Public Transit-Information Sharing Analysis Center, which TSA provides funding to through the American Public Transportation Association; HSIN; Transit and Rail Intelligence Awareness Daily messages; and Security Awareness Messages.

Freight Rail Activities: \$3.7 million

Scientific Advisory Group (SAG) Support for Surface Policy Development: The SAG is a group of subject matter experts who provide TSA with objective, independent information for policy development and industry-engagement activities through research and analysis of Toxic Inhalation Hazards (TIH) found in the transportation sector. TSA uses the analysis during policy development for the transportation of TIH materials in pipelines, highway vehicles, and rail tank cars. The information is sourced from the DHS Science and Technology Chemical Security Analysis Center (DHS S&T CSAC) Jack Rabbit I and II large-scale TIH release projects. DHS S&T CSAC is a governmental partner with TSA and the SAG, and this collaboration has resulted in a shared understanding of risks; identification of possible cost-effective security measures to mitigate risks; and strengthening of industry partnerships.

As in Mass Transit Activities, Freight Rail Activities provide modal-specific contributions to counter-terrorism guides, cybersecurity, GCCs, and information sharing with stakeholders.

Pipeline Activities: \$3.5 million

Critical Facility Security Review (CFSR): TSA intends to continue its assessment program for critical pipeline facilities. Utilizing the criteria contained in the TSA Pipeline Security Guidelines, pipeline operators have updated their listings of facilities essential to system operations. Under the CFSR Program, TSA evaluates the physical security of 50-60 of these pipeline facilities annually.

Corporate Security Review (CSR): On an annual basis, TSA conducts 12 CSRs of natural gas and hazardous liquid transmission and natural gas distribution pipeline systems within the United States. This allows the program to revisit a company every four years to assess the current status of the company's security efforts and gauge progress from previous reviews.

Industry Workshop: In FY 2016, TSA plans to host the annual International Pipeline Security Forum to enhance government and industry pipeline security domain awareness, improve information sharing, and provide opportunities for discussion of major domestic and international pipeline security issues.

As in Mass Transit Activities, Pipeline Activities provide modal-specific contributions to counter-terrorism guides, cybersecurity, GCCs, and information sharing with stakeholders.

Highway and Motor Carrier Activities: \$7.1 million

Assistance for Randomized Monitoring Over Routes (ARMOR): TSA is developing a tool for the randomized deployment of patrols to deter and prevent terrorist attacks to public transit systems while balancing available resources, ridership demands, and system characteristics. Due to large volumes of passengers, public transit systems in major U.S. cities provide prime terrorism targets. As a result, ARMOR will provide unique analytic capabilities to improve decision-making, as well as tools for optimally deploying limited resources.

First Observer™ Program: The First Observer™ Program is an anti-terrorism domain awareness training program for highway and motor carrier surface transportation security professionals to identify, observe, assess, and report potential terrorist or suspicious activities. Training is free and accessible 24/7 through a web-based training portal. TSA is working with internal experts and industry to expand the program to all modes of surface transportation. Additionally, TSA works with industry to identify emerging security training needs; develop new training modules; refresh existing training; and ensure compliance with the 9/11 Act Security Training Rule.

Highway BASE Program: The Highway BASE Program is comprised of security and response assessment areas for highway and motor carrier operators, focused on operators identified by risk-based data from private and public sources. Assessment results will be used for annual action item updates; resource allocation in the highway and motor carrier mode; and updates to tools for use by industry.

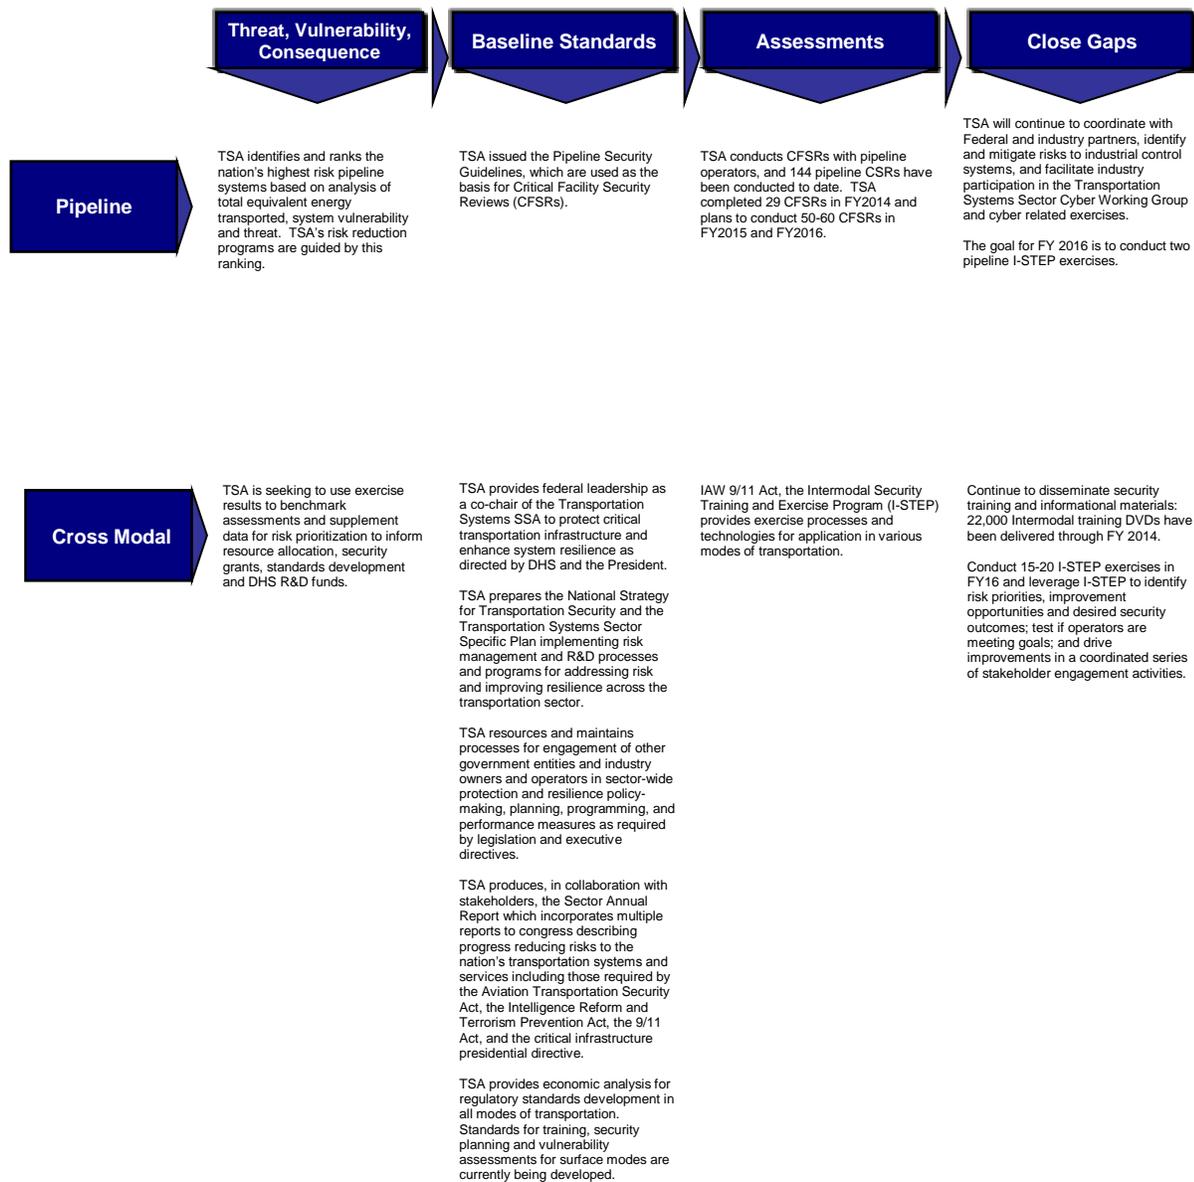

As in Mass Transit Activities, Highway and Motor Carriers Activities provide modal-specific contributions to counter-terrorism guides, cybersecurity, GCCs, and information sharing with stakeholders.

Grant Oversight and Management Support:

Grants Programs: TSA provides subject matter expertise and assists FEMA in the framework development and review of grants related to surface transportation security, primarily through support to FEMA's National Preparedness Grant Program (NPGP). NPGP is designed to develop, sustain, and leverage core capabilities across the country in support of national preparedness. NPGP will prioritize the development and sustainment of core capabilities as outlined in the National Preparedness Goal. Particular emphasis will be placed on building and sustaining capabilities that address high consequence events that pose the greatest risk to the security and resilience of the U.S. and can be utilized to address multiple threats and hazards. TSA will provide subject matter expertise for passenger rail and mass transit security programs in support of NPGP. TSA activities in support of NPGP include: determining grant funding priorities and allocation methodologies; issuing guidance; and evaluating and recommending individual projects within NPGP in the areas of intercity bus, freight rail, mass transit, ferry, and passenger rail systems.

SURFACE TRANSPORTATION INITIATIVE MATRIX

	Threat, Vulnerability, Consequence	Baseline Standards	Assessments	Close Gaps
Freight Rail	<p>The strategic security goal is to reduce the risk associated with the transportation of potentially dangerous cargoes by rail, and to increase the resiliency of the railroad network. The primary strategic objectives to achieve this goal are: reduce the vulnerability of cargo; reduce the vulnerability of the network; and reduce the consequences of attack.</p> <p>TSA will work with industry operators to identify physical and cyber threats to the freight rail network and its operational components. TSA will continue to lead the effort to identify and implement policies, practices, and programs that can reduce vulnerabilities by enhancing detection/deterrence capabilities and mitigate consequences by improving response.</p>	<p>TSA will continue to monitor compliance with the Security Action Items for the transportation of TIH materials and the provisions of 49 CFR Part 1580.</p> <p>TSA plans to implement measures as part of the Freight Rail Sub-sector plan of the National Strategy for Transportation Security that will establish standards for conducting employee training and security related exercises.</p>	<p>TSA in cooperation with key industry operators will continue to assess the risks to and from freight railroad transportation. Using a variety of mechanisms to assess both strategic and tactical risk, TSA will engage the industry in an effort to identify and quantify physical, cyber, and economic risks.</p>	<p>TSA will evaluate all currently-in-place measures, both procedural and physical, to ensure that baseline standards and risk-reduction metrics continue to be valid. For those standards or metrics in need of revision, TSA will work with the industry to implement risk based, cost effective measures.</p>
Mass Transit	<p>TSA's Mass Transit & Passenger Rail strategy consists of the following three objectives: increase visible deterrence through the deployment of canine teams, passenger screening teams and anti-terrorism teams; increase infrastructure resilience by protecting the most critical tunnels, stations and bridges; fully engage the public and transit operators in the counterterrorism mission.</p> <p>These objectives are achieved through the BASE program; identification of critical assets; and development of communication architecture to allow for efficient and effective communication to our security partners.</p>	<p>The BASE program is a security assessment of mass transit and passenger rail systems nationally. The assessments are conducted on a voluntary basis and with emphasis on the 100 largest systems based on passenger volume. The 17 Security and Emergency Management Action Items were developed by TSA, FTA and transit officials engaged through the Mass Transit SCC. Assessment results help establish a baseline which identifies security priorities for transit and passenger rail security programs.</p> <p>Cyber security was incorporated into the existing BASE program as an action item for FY13.</p>	<p>TSA continues to conduct BASE assessments across the mass transit and passenger rail mode. In FY 2015, 20 security assessments are projected to be completed, and in FY 2016, 20 assessments are planned.</p> <p>In coordination with DHS and industry, TSA identified the top 67 mass transit and passenger rail assets. These assets were selected using criteria such as asset type, passenger flow, and iconic value. Understanding what physical security measures are in place at these assets and developing plans to close security gaps is a major priority going forward.</p>	<p>TSA assures preparedness through multi-faceted information sharing networks to disseminate timely, accurate intelligence and security advisories and alerts while also conducting multiple regional I-STEP exercises.</p> <p>TSA is also focused on supporting operational deterrence activities such as mass transit and passenger rail Visible Intermodal Prevention and Response activities at high-risk locations, Operation Railsafe and Operation Bus safe bring together Federal, state, local and transit law enforcement to deploy at train stations, platforms, buses, and terminals to conduct counter terrorism operations and exercise incident response.</p>
Highway	<p>TSA is completing assessments on the trucking (non-HAZMAT), motor coach, and school bus modes through the use of the BASE Assessment Program and the analysis of the aggregate results of these assessments.</p> <p>TSA has completed structural security assessments of up to 53 significant highway infrastructures with full analysis and aggregate reporting for specific bridge and tunnel types.</p>	<p>TSA is focused on continued development and maintenance of Baseline Standards in all four Highway Motor Carrier (HMC) sub-areas through the HMC BASE Program.</p> <p>TSA has developed Security Action Items (SAI) that are intended to provide affected highway industries with baseline security foundations that can act as guidance and practical security risk reduction activities.</p>	<p>Since 2010, TSA has completed vulnerability assessments on 53 critical infrastructures (highway bridges and tunnels) including risk-based component level analysis of security mitigation strategies. The infrastructure assessments also capture cost data to replace the existing structure and costs to implement the recommended security mitigation strategies.</p>	<p>TSA encourages stakeholders to implement Security Action Items (SAIs). TSA is also encouraging stakeholders to have front-line employees complete voluntary security training either internally or using the TSA supplied First Observer® training program.</p> <p>TSA continues to coordinate highway motorcarrier risk-based VIPR operations and I-STEP security exercises with industry stakeholders and, as well as distribute modal counterterrorism guides and other HMC security materials.</p>

**Department of Homeland Security
Transportation Security Administration
Surface Inspectors and VIPR
Program Performance Justification**
(Dollars in Thousands)

PPA: Surface Inspectors and VIPR

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	544	491	\$73,356
FY 2015 President's Budget	768	733	\$98,262
2016 Adjustments-to-Base	-	-	\$1,332
FY 2016 Current Services	768	733	\$99,594
FY 2016 Program Change	(37)	(35)	(\$4,276)
FY 2016 Total Request	731	698	\$95,318
Total Change 2015 to 2016	(37)	(35)	(\$2,944)

The FY 2016 Budget includes 731 positions, 698 FTE, and \$95.318 million in FY 2016 for the Surface Inspectors and VIPR PPA:

Adjustments to Base:

- Increase of \$160,000 for annualization of the 2015 pay raise
- Increase of \$919,000 for the 2016 pay raise
- Increase of \$253,000 for retirement contributions

Program Changes:

- Decrease of 24 FTP, 23 FTE, and \$3.070 million to reduce the VIPR program by two teams in conjunction with planned Federal Air Marshals Service (FAMS) field office strategic realignments
- Decrease of 13 FTP, 12 FTE, and \$1.206 million for RBS Efficiencies identified from the Transportation Security Inspector program

CURRENT SERVICES PROGRAM DESCRIPTION:

The Surface Transportation Security Inspector and VIPR PPA provides resources for the Surface Compliance program and Surface VIPR program.

The following table provides the components and associated funding levels of this PPA.

Surface Inspectors and VIPR PPA
(\$ in Millions)

	FY 2015 President's Budget	FY 2016 Request
Surface Security Inspectors	\$37.7	\$37.0
Visible Intermodal Prevention and Response ¹	\$60.6	\$58.3
TOTAL	\$98.3	\$95.3

Surface Security Inspectors: \$37.0 million

Surface inspectors provide a unique and critically important Federal inspection and security assessment program with responsibilities in nationwide domestic surface transportation security. With emphasis on freight railroads, mass transit, passenger rail; highway motor carriers, and to a limited extent, pipelines, TSA has set out to enhance security preparedness in an industry that is the largest transporter of passengers in the country.

The following chart provides historical and current information on the total number of Surface, Aviation, and Cargo Transportation Security Inspector (TSIs) positions across TSA.

	FY 2014	FY 2015	FY 2016
Aviation Regulation	966	1,045	1,014
Domestic Inspectors	654	672 ¹	641 ⁵
Domestic Canine Inspectors ²	190	310 ²	310
VIPR Inspectors	45 ¹	0 ¹	0
International Inspectors	62	48 ³	48
International Repair Station Inspectors	15	15	15
Air Cargo	681	577	554
Domestic Inspectors	500	496 ³	473 ⁵
Domestic Canine Inspectors	120	0 ²	0
International Inspectors	61	81 ³	81
Surface	300	319	302
Domestic Inspectors	225	272 ⁴	259 ⁵
VIPR Inspectors	75 ⁴	0 ⁴	0
Multi-Modal VIPR Inspectors	0	47 ^{1,4}	43 ⁵
Total Inspectors	1,947	1,941	1,870

¹ The VIPR program was proposed for consolidation in FY 2015 to perform multimodal operations. Of the 45 previous Aviation VIPR inspector positions, 18 were realigned to Domestic Inspectors and the balance of 27 were moved to multi-modal VIPR inspectors in the Surface Appropriation.

² Includes 120 previous cargo canines as a result of consolidating the Canines program into Aviation Regulation.

³ 14 international inspector positions shifted from Aviation Regulation to Air Cargo, due to the consolidation of the inspector workforce. In addition, 4 Air Cargo domestic inspector positions and 2 non-inspector positions were realigned to Air Cargo international inspector positions to manage the international operations of the Air Cargo Advance Screening Pilot.

⁴ The VIPR program was proposed for consolidation in FY 2015 to perform multimodal operations. Of the 75 previous Surface VIPR inspector positions, 47 were realigned to domestic surface inspection activities to more properly reflect the work they perform, 20 moved to multi-modal VIPR inspectors, and 8 positions were eliminated.

⁵ Reflects the reduction to Aviation Regulation (31 inspectors), Cargo (23 inspectors) and Surface (13 inspectors and 4 VIPR inspectors) as a result of RBS efficiencies.

Transportation Security Inspectors - Surface (TSI-Ss) are deployed through a risk-based approach and provide coverage of key passenger rail and mass transit rail facilities in their regions, as well as 49 High Threat Urban Areas (HTUAs), as defined by DHS. The location and number of inspectors is also determined by transit ridership, proximity to Toxic Inhalation Hazard (TIH) shipment locations (freight rail), critical infrastructure ratings, and HTUA ranking. TSI-S personnel conduct regulatory inspections; security assessments; and voluntary security programs. They also provide stakeholder liaison functions and situational awareness of security conditions. During surface transportation incidents, they convey valuable first-hand information to TSA Federal Security Directors (FSDs), security, policy, intelligence offices, and TSA leadership. To ensure inspectors operate safely and appropriately in the surface transportation environment, TSA schedules its TSI-Ss for a one-week railroad safety course at the Transportation Technology Center, Inc. (TTCI), a specialized facility in Pueblo, Colorado. Most other TSI training is conducted at the TSA Academy at the Federal Law Enforcement Training Center (FLETC) in Glynco, Georgia. Training is a key component to ensure TSA has a technically proficient and agile workforce.

The statute underlying 49 CFR parts 1520 and 1580, provides TSA's TSI-Ss with regulatory authority to ensure a secure chain of custody of security-sensitive material rail cars occurs between rail carriers and shippers/receivers at points of origin, delivery, and interchange. TSA's TSI-Ss observe the handling and placement of security-sensitive material rail cars and verify the paperwork at the covered facilities to ensure compliance, including security inspections, reporting requirements for incidents and significant security concerns, potential threats, and location tracking requirements. That law also requires the designation of a Rail Security Coordinator, and an alternate, by freight and passenger railroad carriers, rail transit systems, and certain hazardous materials facilities.

Responsibilities of the TSI-Ss include:

- Conducting regulatory inspections to ensure compliance with surface rules and regulations;
- Conducting threat and vulnerability inspections, reviews, and assessments (i.e. BASE) that are used to determine the capability of a potentially targeted transportation system/asset to reduce the risk from a specified threat;
- Conducting Risk Reduction Survey assessments for railcars carrying TIH materials and shippers;
- Serving as panel members on the Transportation Security Grant Program (TSGP) to review project proposals, assess grant applications, and assist in developing a process for awarding grants;
- Responding to surface transportation security incidents (i.e., train derailments, possible improvised explosive devices, major truck accidents, etc.) to gather real-time, on-scene information which are provided to FSDs and TSA senior leadership;
- Staffing transit agency and freight rail operations centers in times of increased threat, heightened alert, or during a catastrophic event; and,
- Participating in multi-modal operations.

Surface Security Inspectors conduct various types of threat and vulnerability assessments, inspections, reviews, and other activities, described as follows:

- Freight Rail Corridor Assessments (FRCAs): TSA conducts FRCAs, which focus on assessing the vulnerabilities of high-population areas where TIH materials are moved by rail in

significant quantities. The FRCAs provide site-specific mitigation strategies, lessons learned and support the development of Security Action Items (SAIs). On-site assessments consist of a detailed examination of the railroad(s) operations and procedures within the HTUA and take approximately four to six weeks to complete, depending on the HTUA and complexity of the railroad operations within the corridor.

- Station Criticality Assessments (SCA) also known as Station Profiles: TSI-Ss conduct SCAs which are in-depth assessments of critical infrastructure facilities and transit stations. SCAs gained importance after the terrorist attacks on the mass transit in Mumbai, Madrid, London, and Moscow. These assessments which mitigate that type of threat provide detailed information on a variety of station-related intelligence, such as the locations of exits, telephones, Closed Circuit Television, electrical power, station managers, etc. This information has been extremely useful in VIPR planning, and is also relevant for first responders, intelligence planners, and security personnel. The assessments for a majority of stations across the Nation have been completed and are continually updated as security enhancements are added to stations.
- Surface Inspectors have completed over 315 Mass Transit and 331 Highway/Motor Carrier BASE reviews since FY 2010. 92 Highway/Motor Carrier and 34 Mass Transit BASE reviews are scheduled for FY2015.
- Mass Transit System Criticality Tool: This is a tool designed to measure the criticality of transit assets in relation to a number of predetermined factors. TSI-S personnel work closely with transit agencies to identify key system assets and obtain asset consequence and vulnerability details.
- Surface Compliance Analysis Network (SCAN): SCAN monitors and analyzes surface security incidents to detect trends or links that indicate a potential threat – filling the “security” information gap between law enforcement (criminal) and intelligence agencies. TSA created the SCAN in response to a need to enhance the possible detection of an impending threat towards surface transportation modes within the U.S. transportation industry. SCAN is designed to analyze surface transportation security-related information, reported to the Freedom Center under 49 CFR 1580.105/203 to detect potential hostile trends and/or linkages within reported surface transportation security incidents and, based on that analysis, determines the potential for a surface transportation related security event. The SCAN strives to target the intelligence gathering phase of a planning cycle and zeroing in on those activities that provide an adversary the information it needs to conduct a successful attack. SCAN analyzes and synchronizes information from multiple sources and disseminates the analysis of potential trends to those industry partners who are mutually affected by the trend. SCAN also circulates information relating to security incidents to TSA’s Office of Intelligence as well as field-deployed Transportation Security Inspectors, enabling those Inspectors to conduct additional information collection activities and record such incidents in the Performance and Results Information System database.
- Surface Security Inspectors have completed 6 EXIS TTXs in FY 2014. Planning and stakeholder coordination remain on-going for FY2015.

- The RMAST program improves overall security on the Nation’s highest risk transportation venues and infrastructures and reduces the need for stakeholders to stretch their limited resources for hardening security at some of their most critical and high risk locations. TSA’s RMAST program offers additional “eyes and ears” to identify the most serious vulnerabilities and to ensure that TSI resources are deployed to the most critical and high risk venues. This program strengthens TSA’s partnership and commitment to surface transportation stakeholders.
- Compliance/Regulatory Inspections: In accordance with 49 CFR 1580-Rail Transportation Security, TSI-Ss conduct compliance inspections throughout the freight rail and mass transit domain on a 24/7 basis, 365 days a year.
- Surface Inspectors have conducted over 15,000 RRS since program inception, reducing the “unattended” rate from over 50% to only 2.86%.
- Formerly known as TWIC Enrollment Centers, the Uniform Enrollment Services (UES) Centers now provide services for TWIC as well as TSA’s Pre✓™ and Hazardous Material Endorsement (HME) programs. Surface Security Inspectors, in coordination with the TWIC Program Office, conduct Quality Assurance (QA) assessments of the Centers and provide the data to the UES QA Manager and the TWIC Program Office. Surface Security Inspectors conduct approximately 240 assessments per year.

Visible Intermodal Prevention and Response: \$58.3 million

The mission of the VIPR program is to deter and prevent terrorism. The objective of VIPR deployments in all transportation modes is to ensure readiness to augment stakeholder capabilities in detecting and deterring potential terrorist activity, by engaging in local transportation security operations and special requirements. To achieve this, TSA utilizes random deployments that are unpredictably executed in timing, location, and activity type. VIPR operations teams may include TSIs, Transportation Security Officers, Federal Air Marshals, Behavior Detection Officers, Transportation Security Specialists-Explosives, Explosives Detection Canine teams, and Federal, State and local law enforcement officers. Uniformed VIPR team members provide a visible law enforcement and transportation deterrent presence that support efforts to prevent an adversary from breaching security activities. In response to the shooting at Los Angeles International Airport in November, 2013, the proportion of operations conducted in aviation locations was increased to approximately 50 percent of all operations. This shift reflects the flexibility of TSA to rapidly redirect and deploy VIPR capabilities in response to changes in the threat profile. All teams are now characterized as multi-modal and can be deployed in aviation or surface transportation venues. In FY 2016, TSA proposes to reduce the number of VIPR teams from 33 to 31 to coincide with the strategic realignment of FAMS field offices.

	Aviation Appropriation Multi-Modal Teams	Surface Appropriation Multi-Modal Teams	Aviation Operations	Surface Operations	Total Operations
FY 2014 Actuals	22	15	8,718	8,131	16,849
FY 2015 Planned	0	33	7,400	7,400	14,800
FY 2016 Planned	0	31	7,000	7,000	14,000

* Above table reflect the change in VIPR operations and reflects a 50/50 split in the aviation and surface mode. Actual operational tempo is subject to adjustments based on intelligence or special requirements.

IV. Program Justification Changes

**Department of Homeland Security
Transportation Security Administration
Surface Transportation Security
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 1: Reduce Visible Intermodal Prevention and Response (VIPR)
PPA: Surface Inspectors and VIPR
Program Decrease: Positions (24), FTE (23), Dollars \$(3,070)

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							768	733	\$99,594
Program Decrease							(24)	(23)	(\$3,070)
Total Request	544	491	\$73,356	768	733	\$98,262	744	710	\$96,524

Description of Item:

The FY 2016 Budget includes a decrease of \$3.1 million to the VIPR program. The FY 2016 funding level represents a reduction of two teams, 24 FTP, and 23 FTE. The proposed reduction would result in a decrease of VIPR teams from 33 to 31. The reduction of teams would coincide with the strategic realignment of the co-located FAMS field offices.

Justification:

The mission of the VIPR program is to deter and prevent terrorism. This is achieved by conducting VIPR operations that promote confidence in and protection of all modes of the Nation's transportation systems. TSA personnel participating in VIPR operations include Federal Air Marshals, Transportation Security Officers, Behavioral Detection Officers, Transportation Security Inspectors, Transportation Security Specialists – Explosives and Explosive Detection Canine Teams. These TSA personnel coordinate with other Federal, State, and local transportation security personnel and law enforcement officers to augment existing terrorism risk mitigation measures through random deployment.

VIPR teams can be deployed for normal transportation mode activities, during periods of heightened threat or at special events that require additional security. VIPR teams provide deterrent and detection capabilities while introducing an element of surprise to disrupt potential terrorist activities.

Impact on Performance (Relationship of Increase to Strategic Goals):

TSA will continue to maintain VIPR operations in the areas of highest risk. The table below reflects the change in VIPR operations and reflects a 50/50 split in the aviation and surface mode. Actual operational tempo is subject to adjustments based on intelligence or special requirements.

	Aviation Appropriation Multi-Modal Teams	Surface Appropriation Multi-Modal Teams	Aviation Operations	Surface Operations	Total Operations
FY 2014 Actuals	22	15	8,718	8,131	16,849
FY 2015 Planned	0	33	7,400	7,400	14,800
FY 2016 Planned	0	31	7,000	7,000	14,000

**Department of Homeland Security
Transportation Security Administration
Surface Transportation Security
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 2: RBS Efficiencies - Transportation Security Inspectors
 PPA: Surface Inspectors and VIPR
 Program Decrease: Positions (13), FTE (12), Dollars \$(1,206)

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							768	733	\$99,594
Program Decrease							(13)	(12)	(\$1,206)
Total Request	544	491	\$73,356	768	733	\$98,262	755	721	\$98,388

Description of Item:

The FY 2016 Budget includes a decrease of \$1.206 million to the Surface Security Inspectors. The FY 2016 funding level represents a reduction of 13 FTP, and 12 FTE. The proposed reduction would bring the total number of Surface Security Inspectors down to 259.

Justification:

TSA's inspector community has made significant efforts to ensure that the inspections are scheduled in a way that balances and maximizes oversight while identifying possible efficiencies in staffing. Analysis of inspection data is used to drive and prioritize inspection activity and take into account several factors, including the latest intelligence information. TSA did an in-depth analysis of the nationwide current TSI staffing, focusing on (1) How much work must be done; (2) How much time inspections take; and, (3) Risk Factors. Based on this efficiency and risk analysis, TSA determined that it could reduce its TSI-S staffing allocation through attrition and the collapsing of vacant positions without degrading TSA's performance of its regulatory compliance oversight responsibilities. In addition, TSA conducts a review of the quantity of work required annually and based on present operational requirements; there are no known or identified adverse issues.

Impact on Performance (Relationship of Increase to Strategic Goals):

The requested funded level is sufficient to meet security screening requirements.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Transportation Security Administration related to surface transportation security activities, [127,637,000] \$123,828,000¹, to remain available until September 30, [2016] 2017².
(*Department of Homeland Security Appropriations Act, 2015.*)

Language Provision	Explanation
¹ ...[\$127,637,000] <u>\$123,828,000</u> ...	Dollar change only. No substantial change proposed.
² ... [2016] <u>2017</u> ...	Fiscal year change only. No substantial change proposed.

Staffing and Operations Mission Statement

Surface Transportation Security Staffing and Operations is charged with managing TSA's efforts to mitigate the risk and provide security direction to all non-aviation transportation systems. This responsibility covers rail, mass transit, highways, buses, trucking, ferries, and pipelines. The Surface Transportation Security Staffing and Operations office also works with industry, State and local governments, and other Federal agencies in developing standards and regulations to ensure the security of these vital transportation systems.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$16,050	\$14,381	\$13,751	\$(630)
12.1 Civilian Personnel Benefits	\$6,003	\$5,322	\$5,089	\$(233)
Total, Salaries & Benefits	\$22,053	\$19,703	\$18,840	\$(863)

The FY 2016 Salaries and Benefits request includes an increase of \$236,000 for pay COLA, an increase of \$65,000 for retirement contributions, and a decrease of \$1,166,000 due to transfers to the Aviation Security and Intelligence and Vetting appropriations.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$1,403	\$1,031	\$1,029	(\$2)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2016 request reflects a decrease of \$2,000 due to the transfer to the Intelligence and Vetting appropriation.

Surface Inspectors and VIPR Mission Statement

TSA has been given the responsibility to ensure the compliance of security regulations and standards within the rail and mass transit modes. TSA will accomplish this with a cadre of 300 inspectors located at significant rail, mass transit, and transit centers across the United States.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$50,825	\$74,618	\$72,287	\$(2,331)
11.3 Other than Full-Time Permanent	\$61	\$90	\$86	\$(4)

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Intelligence and Vetting

I. Appropriation Overview

A. Mission Statement for Intelligence and Vetting:

The Intelligence and Vetting appropriation (formerly known as Transportation Threat Assessment and Credentialing), strives to reduce the probability of a successful terrorist or other criminal attack to the transportation system through application of intelligence and threat assessment methodologies that are intended to identify known or suspected terrorist threats working in or seeking access to the Nation's transportation system.

This appropriation supports compliance with:

- National Strategy for Homeland Security,
- USA PATRIOT ACT of 2001 (P.L. 107-56),
- Safe Explosives Act (P.L. 107-296),
- Aviation Transportation Security Act of 2001 (P.L. 107-71),
- Maritime Transportation Security Act of 2002 (MTSA, P.L. 107-295),
- Security and Accountability For Every Port Act of 2006 (P.L. 109-347),
- Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (P.L. 109-59),
- Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176),
- Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA, P.L. 108-408), and
- Implementing Recommendations of the 9/11 Commission Act of 2007 (9/11 Act, P.L. 110-53).

The National Strategy for Homeland Security and these laws provide direction to the Federal Government to protect homeland security, placing special emphasis on deterrence, prevention, interdiction of threats, aggression, and unlawful acts directed toward the United States. Homeland Security Presidential Directive-11 (HSPD-11), *Comprehensive Terrorist-Related Screening Procedures*, issued August 27, 2004, directed the Department of Homeland Security (DHS), in coordination with other Federal agencies, to “enhance terrorist-related threat assessment through comprehensive, coordinated procedures.”

The objective of HSPD-11 is to more effectively detect and interdict individuals known to engage in terrorist activities or those who are reasonably suspected to be doing so, or who have been engaged in terrorist activities. To that end, the broad range of existing government and private sector security measures and initiatives will be augmented by a comprehensive, coordinated, and integrated threat assessment environment. Implementation of HSPD-11 must facilitate the efficient movement of people, cargo, and conveyances and minimize any negative impacts on related activities. The Presidential Directive requires that these goals be achieved without compromising personal or institutional privacy and with due respect for other rights and freedoms quintessential to the American way of life.

The Transportation Security Administration (TSA) supports this directive through the programs within the Intelligence and Vetting appropriation that integrate intelligence information and the vetting of passengers and transportation workers. These programs include: Intelligence, Secure Flight, Aviation Workers, Flight Crew Vetting, Ronald Reagan Washington National Airport (DCA) General Aviation, Indirect Air Carriers, Certified Cargo Shippers, Large Aircraft Operators, Transportation Worker Identification Credential (TWIC), Hazardous Materials Endorsement Threat Assessment Program (HTAP), TSA Pre✓[®] Application Program, and Alien Flight Student Program (AFSP).

All programs that comprise this appropriation are designed to enhance security for the transportation sector (air, land and sea), focusing on risk-based, intelligence driven screening procedures. Much of the risk analysis being performed can be adapted for use in other sectors of this dynamic network.

B. Budget Activities:

Intelligence - TSA's Office of Intelligence and Analysis (OIA) receives, assesses, and distributes intelligence information to support TSA's mission of securing the transportation system. OIA also conducts strategic operational and tactical risk-based security planning, which includes TSA Risk Knowledge (TSA-RK) Center. The FY 2015 President's Budget proposed to realign OIA from the Transportation Security Support appropriation to the renamed Intelligence and Vetting appropriation.

Secure Flight - Under the Secure Flight Final Rule (Federal Register, Vol. 73, No. 209), the Secure Flight program assumed responsibility of airline passenger watch list matching from the airline industry into one program managed and operated by the Federal Government. This consolidation meets the provisions outlined in the Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458) and the recommendations of the 9/11 Commission. For the purpose of preventing terrorists from boarding an aircraft or accessing the sterile area of a U.S. airport, the Secure Flight program uses an automated process to match Secure Flight Passenger Data (SFPD) against watch lists maintained by the federal government; manual review is conducted to resolve any potential matches.

Secure Flight began program implementation with the first domestic aircraft operator on January 27, 2009. On June 22, 2010, Secure Flight met its goal of conducting watch list matching for all domestic aircraft operator flights within, into and out of the United States, as well as international point-to-point flights between two foreign cities. On November 23, 2010, Secure Flight completed deployment to all covered foreign air carriers flying into and out of the United States. As of October 2012, Secure Flight has conducted watch list matching for all foreign air carriers operating covered flights overflying the United States. Beginning in FY 2012, Secure Flight, in support of TSA's risk-based, intelligence-driven approach to aviation security, began the TSA Risk-Based Security (RBS) initiative called TSA Pre✓[®]. This initiative enhances aviation security by placing more focus on potentially high-risk passengers, while improving the traveling experience of individuals who pose a low-risk to aviation security. Secure Flight pre-screens an average of 6 million passengers daily to include continuous watch list matching.

Other Vetting - This activity incorporates the personnel, administrative, and operational costs of vetting and credentialing operations. It also includes TSA's efforts to modernize its vetting infrastructure. Other Vetting initiatives include:

- Crew Vetting Program for crewmembers flying into, over, and out of the United States on commercial passenger or cargo aircraft;
- Aviation Workers Program;

TSA Vetting Facts

Daily TSA:

** Perpetually vets over 14.8 million records.*

** Pre-screens an average of 6 million air passengers to include recurrent watch list matching.*

** Responds to over 150 redress requests.*

- Other Aviation Vetting Programs, including DCA Access Standard Security Program (DASSP), Private Charter Standard Security Program (PCSSP), 12/5 Standard Security Program (12/5), Maryland Three (MD-3) Program and Airspace Waivers (ASW);
- Federal Aviation Administration (FAA)/Airmen Certificate Vetting;
- Consolidated Screening Gateway and Transportation Vetting System platforms; and
- Technology Infrastructure Modernization (TIM), which will provide a single, uniform vetting management system.

Transportation Worker Identification Credential - The TWIC allows identity verification through the use of biometric technology and is capable of working as an integral part of access control systems deployed by the maritime transportation sector. The TWIC Final Rule was issued on January 25, 2007. The enrollment of workers, including longshoremen, truckers, port employees, and U.S. merchant mariners began in October 2007. As of December 31, 2014, TSA had processed more than 3.255 million enrollments. The program is funded entirely from fee revenue.

Hazardous Materials Endorsement Threat Assessment Program - The USA PATRIOT Act prohibits states from issuing a license to transport hazardous materials (hazmat) in commerce unless a determination has been made that the individual does not pose a security risk (49 U.S.C. § 5103a). The Act further requires that this risk assessment include checks of criminal history records, legal status, and relevant intelligence databases. TSA implemented the HTAP to meet this mandate and conducts a security threat assessment (STA) on anyone applying to obtain, renew or transfer a Hazardous Materials Endorsement (HME) on their state-issued Commercial Driver's License (CDL). The STA includes a fingerprint-based Criminal History Records Check (CHRC), a legal status check, and checks for ties to terrorism. The program also fulfills statutory requirements under the Safe Explosives Act (P.L. 107-296) regarding transportation security issues of persons engaged in any aspect of the safe transportation of explosive materials. Operational since January 31, 2005, the program has enrolled more than 2.78 million drivers as of December 31, 2014 and is entirely funded by fee revenue.

TSA Pre✓® Application Program - Pre✓® is one of several risk-based security initiatives the U.S. Department of Homeland Security (DHS) and TSA are using to enhance screening operations and redefine the passenger experience for millions of travelers. Pre✓® is a prescreening initiative that conducts risk assessments on passengers who voluntarily participate in the program. If TSA determines an individual is a low risk traveler, that individual may be eligible for expedited screening at the airport checkpoint. As of December 31, 2014 TSA Pre✓® had approved more than 796,000 travelers.

Other Vetting Fees - The following fee programs provide revenue to fund an STA that may also include a fingerprint-based FBI CHRC (program descriptions can be found in the PPA section):

- General Aviation at Ronald Reagan National Airport;
- Air Cargo; and
- TSA Pre✓® Application Program.

The following fee programs provide revenue for a fingerprint-based FBI CHRC only:

- Commercial Aviation and Airport Fee (previously Secure Identification Display Area and Sterile Area Workers); and,
- Other STAs to include PCSSP; 12/5; Maryland Three Program; and Sensitive Security Information (SSI). Large Aircraft Security Program (LASP) and SSI were previously separate PPAs.

Alien Flight Student Program (AFSP) - Established under the Vision 100 - Century of Aviation Reauthorization Act (P.L. 108-176), AFSP reviews and assesses biographic and biometric information of non-U.S. citizens applying for training at FAA certified flight schools. These persons are subject to an STA consisting of a CHRC through the FBI, a Treasury Enforcement Communication System (TECS) check through U.S. Customs and Border Protection (CBP) for immigration status, and a Terrorist Screening Database (TSDB)

check. Since its transfer to TSA from the FBI in July 2004, this program was expanded to conduct background checks of non-U.S citizens seeking flight training in aircraft weighing under 12,500 pounds maximum gross take-off weight (MTOW). AFSP processes approximately 50,000 training applications annually. AFSP is a mandatory program funded entirely by fee revenue.

C. Budget Request Summary:

The FY 2016 Budget includes a total budget authority for the Intelligence and Vetting mandatory and discretionary appropriations of 837 positions, 784 FTE and \$421,651,000. The Budget consists of 721 positions, 671 FTE, and \$227,698,000 in appropriated funding; and 116 positions, 113 FTE, and \$193,953,000 in discretionary fee collections. Also included in this appropriation are 15 positions, 15 FTE and \$5,200,000 in mandatory fee collections.

The total adjustments to base total 58 positions, 57 FTE, and \$118,270,000. The adjustments include an increase of 9 positions and 9 FTE and a decrease of \$1,278,000 in appropriated funding, an increase of 40 positions, 39 FTE and \$119,348,000 in discretionary fee funding, and an increase of 9 positions, 9 FTE and \$200,000 in mandatory fee funding. The program changes include 0 positions, 0 FTE, and \$2,800,000 to provide operations and maintenance funding for the DHS Watchlist Service (WLS), and 0 positions, 0 FTE, and a reduction of \$6,350,000 to the Large Aircraft and Charter Screening Program (LACSP).

III. Current Services Program Description by PPA

**Department of Homeland Security
Transportation Security Administration
Secure Flight
Program Performance Justification**
(Dollars in Thousands)

PPA: Secure Flight

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	308	274	\$99,487
FY 2015 President's Budget	308	286	\$112,543
2016 Adjustments-to-Base	-	-	(\$1,936)
FY 2016 Current Services	308	286	\$110,607
FY 2016 Program Change	-	-	(\$4,970)
FY 2016 Total Request	308	286	\$105,637
Total Change 2015 to 2016	-	-	(\$6,906)

The FY 2016 Budget includes 308 positions, 286 FTE, and \$105.637 million for the Secure Flight PPA.

Adjustments to Base:

- Increase from transfer of \$650,000 realigned from the Aviation Security appropriation (Checkpoint Support PPA) for Credential Authentication Technology (CAT) to continue software license support for the CAT effort;
- Increase of \$91,000 to annualize the 2015 pay raise,
- Increase of \$361,000 for the 2016 pay raise,
- Increase of \$112,000 for retirement contributions; and
- Decrease of \$3.150 million due to efficiencies from RBS expansion

Program Changes:

- Increase of \$1.380 million for the DHS WLS initiative; and
- Decrease of \$6.350 million to the Large Aircraft and Charter Screening Program (LACSP).

CURRENT SERVICES PROGRAM DESCRIPTION:

Secure Flight mitigates known and unknown threats to aviation security by identifying high- and low-risk passengers and designating them for enhanced screening, standard screening, expedited screening, or prohibition from boarding a covered flight, as appropriate. The program's goals are to:

- Prevent individuals on the No Fly List from boarding an aircraft;
- Identify individuals on the Selectee List for enhanced screening;
- Support TSA's RBS mission by identifying high-risk passengers for appropriate security;
- measures/actions and identifying low-risk passengers for expedited screening;
- Minimize misidentification of individuals as potential threats to aviation security; and
- Protect passengers personal information from unauthorized use and disclosure.

The Secure Flight program enhances the Nation's transportation system by operating a risk-based, intelligence-driven watch list matching capability for 800 million passengers each year across 267 aircraft operators. Secure Flight delivers a matching capability that uses government watch lists in order to effectively identify individuals

who may pose a threat to aviation or national security. As a result, these individuals receive enhanced screening and/or are prohibited from boarding an aircraft. Secure Flight matches passenger information against watch lists maintained by the Federal Government. These lists, which include the No Fly and Selectee lists, contain full name and date of birth. In addition, Secure Flight includes a matching function for the Centers for Disease Control and Prevention's Do Not Board List, which contains a list of individuals with communicable diseases who meet specific criteria and pose a significant health risk to other passengers. These individuals are restricted from boarding commercial aircraft departing from and/or arriving in the United States.

Secure Flight conducts watch list matching for all covered U.S. aircraft operators and foreign air carriers flying into, out of, and within the United States, as well as all foreign air carriers operating covered flights flying over the United States. Covered aircraft operators must collect and transmit full SFPD for watch list matching, including the passengers' full name, date of birth, and gender as they appear on the government-issued identification the passenger plans to use when traveling, as well as passport number (if available), Redress Number (if available), and Known Traveler Number (if available). By receiving the SFPD as early as 72 hours prior to scheduled flight departure, the program provides earlier insight to:

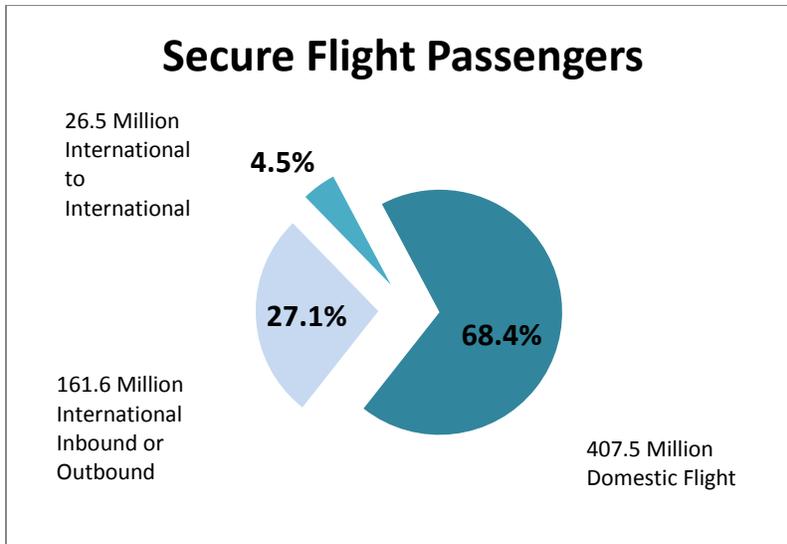

- Watch list matches; and
- Integration of the DHS Redress process.

More than 99 percent of passengers are cleared by Secure Flight in advance of airport arrival and do not experience delays in obtaining boarding passes.

The FY 2016 request includes \$2.8 million for the DHS WLS, of which \$1.38 million is for Secure Flight, which will enhance TSA's ability to identify a passenger on the watch list that is attempting to board an airplane, through an automated reconciliation process.

<p><i>Covered Operators and Carriers</i></p> <p><i>Secure Flight conducts watch list matching for all covered aircraft operators and air carriers flying into, out of, within and overflying the United States.</i></p> <p><i>Covered U.S. Operators:</i> ■</p> <p><i>Department of Defense:</i> ■</p> <p><i>Covered Foreign Air Carriers:</i> 181</p>

The following chart details Secure Flight coverage between January 1, 2014 and September 30, 2014.

In support of TSA’s risk-based, intelligence-driven approach to aviation security, Secure Flight enables the TSA RBS strategy through TSA Pre✓®. This initiative enhances aviation security by placing more focus on potentially high-risk passengers, while improving the traveling experience of individuals who pose a low risk to aviation security. Eligible passengers voluntarily provide additional information prior to traveling, which allows TSA to conduct more robust passenger pre-screening and better segment the passenger population according to risk. Secure Flight has enabled the continued expansion of RBS and TSA Pre✓®, by integrating into its pre-screening capability several new low-risk populations and enhanced risk assessments using the SFPD already provided to TSA. Secure Flight has been critical to the success of RBS initiatives.

Airlines currently participating in TSA Pre✓® include: Air Canada, Alaska Airlines, American Airlines, Delta Airlines, United Airlines, US Airways, Virgin America Airlines, Hawaiian Airlines, JetBlue Airways, Southwest Airlines, and Sun Country Airlines, as well as many of their affiliates. As of December, 2014, TSA Pre✓® is available at more than 120 airports.

TSA is promulgating a rule for general aviation large aircraft (regulation identifier number 1652-AA53) that will include provisions for this watch list matching as well as certain general aviation operators weighing 30,000 pounds or more. IRTPA requires TSA to establish a process to conduct watch list matching for operators of aircraft weighing more than 12,500 pounds to be used in charter air transportation or lessors of aircraft weighing more than 12,500 pounds flying into, out of, or within the United States.

Under the draft rule, general aviation will submit passenger information to Secure Flight for watch list matching. In FY 2016 Secure Flight will work towards implementing system and operational changes for vetting these passengers. These additional populations represent approximately 2,000 general aviation operators. As a result, an estimated 11 million additional SFPD records will be submitted by these operators per year.

MAJOR ACQUISITIONS:

Secure Flight

The Secure Flight program strengthens security by operating a threat-based watch list matching capability to identify potential matches, enhancing the security of domestic and international commercial air travel. Secure Flight's goals are to:

- Prevent individuals on the No Fly List from boarding an aircraft;
- Identify individuals on the Selectee List for enhanced screening;
- Support TSA's RBS mission by identifying high-risk passengers for appropriate security measures/actions and identifying low-risk passengers for expedited screening;
- Minimize misidentification of individuals as potential threats to aviation security; and
- Protect passengers' personal information from unauthorized use and disclosure.

The investment portion of the Secure Flight program is proposed to be funded at \$105.097 million out of the Secure Flight PPA in FY 2016.

Activity Funding

PPA: Other Vetting Programs

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	125	112	\$83,287
FY 2015 President's Budget	126	118	\$68,182
2016 Adjustments-to-Base	7	7	\$482
FY 2016 Current Services	133	125	\$68,664
FY 2016 Program Change	-	-	\$1,420
FY 2016 Total Request	133	125	\$70,084
Total Change 2015 to 2016	7	7	\$1,902

The FY 2016 Budget includes 133 positions, 125 FTE and \$70.084 million for the Other Vetting PPA.

Adjustments to Base:

- Increase from transfer of 1 FTP/1 FTE and \$200,000 from the Surface Transportation Security appropriation, to appropriately align the vetting position function within the Intelligence and Vetting appropriation;
- Increase 6 FTP/6 FTE as part of the Balanced Workforce Initiative which federalized vetting adjudication positions previously held by contractors, as recommended by the U.S. Government Accountability Office (GAO) December 2011 report (GAO-12-60) and the U.S. DHS, Office of Inspector General report in October 2012 (OIG-13-05);
- Increase of \$43,000 to annualize the 2015 pay raise;
- Increase of \$180,000 for the 2016 pay raise; and
- Increase of \$59,000 for retirement contributions.

Program Change:

- Increase of \$1.420 million for the DHS WLS initiative.

CURRENT SERVICES PROGRAM DESCRIPTION:

Other Vetting Programs PPA
(\$ in Millions)

Programs	FY 2015	FY 2016
Aviation Workers Program	\$5.1	\$5.9
Crew Vetting Program	\$3.4	\$5.4
Other Aviation Vetting Programs	\$0.3	\$0.3
Administration and Operations	\$21.1	\$29.0
Technology Infrastructure Modernization*	\$38.3	\$29.5
TOTAL	\$68.2	\$70.1

*Total TIM requirement is projected to be \$42.6 million for FY 2016. The difference between this estimate and the request is expected from TWIC, HTAP, CFATS and Pre✓® Application Program fees and is likely to fluctuate based on the population level for TIM services provided.

The numerous small vetting programs included in the Other Vetting PPA are in an operational and maintenance mode and will continue to vet the various populations each fiscal year. Since inception of each of these programs, over 157 million names have been vetted.

Total Names Vetted Since Program Inception

(as of November 30, 2014)

Program	Population Vetted
Aviation Workers and Secure Identification Display Area (SIDA) Badges	9,556,908
Crew Vetting*	151,916,939
DCA Access Standard Security Program	109,355
Private Charter Standard Security Program	5,401
12/5 Standard Security Program	124,384
Maryland Three	6,382
Airspace waivers	1,273,704
TOTAL	162,993,073

*Air crews are vetted prior to each flight.

Aviation Workers Program (including SIDA and other badge holders): \$5.9 Million

The Aviation Workers Program includes those individuals who apply for, or are issued personnel identification credentials at U.S. federalized domestic airports. Prior to receiving credentials, aviation workers must undergo a successful name-based STA, and if applicable, a fingerprint-based Federal Bureau of Investigations (FBI) CHRC. Since implementation of the Aviation Channeling Service Provider (ACSP) project in FY 2012, TSA has a total of three Designated Aviation Channelers (DACs) to submit aviation worker enrollments. The program reviews approximately 450,000 aviation workers annually.

Crew Vetting Program: \$5.4 Million

The Crew Vetting Program (CVP) screens flight crewmembers (passenger and cargo) on flights into, out of or over the continental United States prior to an airport's release of an aircraft for takeoff. This includes pilots and other crew in the cockpit, as well as cabin crew such as flight attendants or cargo loadmasters. Flight crewmembers undergo a name-based STA to determine if they have a terrorist nexus, and if so, TSA would notify the air carrier that the individual cannot have access to United States airspace. The program reviews approximately 14.2 million flight crewmembers annually.

Other Aviation Vetting Programs: \$0.3 Million

Other Aviation Vetting Programs includes the DASSP, PCSSP, 12/5, MD-3 Program, and ASW Program. These programs all require a name-based STA. Some also require a fingerprint-based CHRC. Since inception, TSA has vetted over 1.4 million records for the Other Aviation Vetting Programs, vetting approximately 100,000 new records, annually.

Administration and Operations: \$29.0 Million

This activity includes the general administrative expenses of the vetting programs within the appropriation to include the common biometric identity initiative. It also includes all payroll costs for the Other Vetting PPA, excluding TIM (see TIM below).

The Other Vetting PPA also provides funding for the Transportation Vetting System (TVS) to conduct STAs for crew members, general aviation flight crews, and FAA airman certificate holders. TVS provides name-based biographic data matching (vetting) on individuals with access to transportation related infrastructure to ensure they do not pose a threat to transportation or national security. Administration and Operations had an increase of 6 positions and 6 FTEs for the Adjudication Balanced Workforce contract conversion.

Technology Infrastructure Modernization: \$29.5 Million

The TIM Program mission is to protect the Nation's transportation infrastructure from criminal and terrorist attacks by replacing current legacy vetting systems with an integrated end-to-end solution that manages enrollments, credentials, and vetting assessment results for millions of transportation sector workers and travelers. The TIM program creates a person-centric system that:

- Eliminates redundant background checks;
- Enables information sharing across DHS;
- Improves the management and timely processing of STAs;
- Improves and streamlines credentialing services to simplify the process into a universal credentialing service; and
- Produces tamper-resistant credentials to support multiple licenses, privileges, or statuses within a single physical credential.

The TIM Program is interfacing with other DHS information services, including those of the Screening Coordination Office (SCO), CBP, the Office of Biometric Identity Management (OBIM), U.S. Citizenship and Immigration Services (USCIS), and others as appropriate. The TIM Program will also interface with other Federal agencies as necessary, including the FBI, the Terrorist Screening Center (TSC), and other critical Federal infrastructure.

TIM will be providing services to traveler and transportation worker populations covering Maritime, Surface, and Aviation transportation modes. In the second quarter of FY 2014, the TIM program achieved Initial Operating Capability (IOC) as scheduled, and in the third quarter of FY 2014 the TWIC population was fully migrated into TIM to finalize Increment One for the Maritime population. TSA is currently assessing the results of the Maritime build and working on the steps for implementing the next phase of the TIM build. As additional fee populations are fully migrated over to the TIM system, each fee program will contribute to the operations and maintenance costs of TIM based on the program's usage of the TIM system.

Estimated TIM Vetting Population Sizes
(FYs 2014-2018)

TIM Vetting	Population Size
Alien Flight Students	92,000
Aviation & Airports	5,681,000
Cargo	673,000
FAA Certificate Holders	1,863,000
Freight Railroads	201,000
Hazardous Materials Endorsement	1,512,000
Maritime - Transportation Worker Identification Credential (TWIC)	1,926,000
TSA Pre✓®	1,950,000
Public Transportation Agencies & Passenger Railroads	345,000
Sensitive Security Information	1,000
Total Estimated Population	14,244,000

Concurrent with this modernization effort, TSA is working toward the implementation of a common universal fee structure that will capitalize on the capabilities of an improved credentialing infrastructure. The new Standardized Vetting, Adjudication and Redress Rule (SVAR) framework (formerly called the Universal Rule) will establish comparable STA services for vetting activities with a common fee structure. The total fee will vary across populations and applicants depending on the specific STA requirements. The SVAR is currently under executive clearance, and TSA anticipates implementation to be in FY 2018. TSA's vetting modernization is being coordinated with the Department's other ongoing information technology modernization efforts and will interact with numerous other systems such as: TECS, USCIS SAVE, OBIM's Automated Biometric Fingerprint Identification System, and the FBI's Criminal Justice Information System.

MAJOR ACQUISITIONS:

Technology Infrastructure Modernization

The TIM Program reduces the probability of a terrorist attack on the transportation sector by replacing legacy vetting systems with a unified person-centric system; this eliminates exploitable gaps, improves enrollment and threat assessment methodologies, and enables TSA to provide credentials to more transportation populations. The TIM System provides an integrated, end-to-end solution to manage identities, credentials, and assessment results for millions of transportation workers, providing more accurate and timely identification of terrorist threats. TIM provides a service oriented architecture framework, mission services, and service capabilities.

The TIM program is currently proposed to be funded out of multiple areas in FY 2016:

- Other Vetting PPA \$29.544 million
- TWIC Fees \$ 5.142 million
- HTAP Fees \$ 3.246 million
- TSA Pre✓® Application Program Fees \$ 3.561 million
- National Protection and Program Directorate (NPPD) –
Reimbursable Agreement \$ 1.100 million

Activity Funding
(\$ in Thousands)

FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Budget
\$54,251	\$42,713	\$42,597

**Department of Homeland Security
Transportation Security Administration
Intelligence
Program Performance Justification**
(Dollars in Thousands)

PPA: Intelligence

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	-	-	-
FY 2015 President's Budget	278	258	\$51,801
2016 Adjustments-to-Base	2	2	\$176
FY 2016 Current Services	280	260	\$51,977
FY 2016 Program Change	-	-	-
FY 2016 Total Request	280	260	\$51,977
Total Change 2015 to 2016	2	2	\$176

The FY 2016 Budget includes 280 positions, 260 FTE, and \$51.977 million for the Intelligence PPA.

Adjustments to Base:

- Increase from transfer of 1 FTP/1 FTE and \$183,000 from the Surface Transportation Security appropriation (Staffing and Operations PPA) to the Intelligence and Vetting appropriation;
- Increase from transfer of 1 FTP/1 FTE and \$210,000 from the Aviation Security appropriation (Aviation Regulation PPA) to the Intelligence and Vetting appropriation;
- Increase of \$82,000 to annualize the 2015 pay raise;
- Increase of \$342,000 for the 2016 pay raise;
- Increase of \$109,000 for retirement contributions; and
- Decrease of \$750,000 for efficiencies.

CURRENT SERVICES PROGRAM DESCRIPTION:

The FY 2015 President's Budget transferred the Intelligence PPA from the Transportation Security Support appropriation to the Intelligence and Vetting appropriation. This realignment enables TSA to combine the intelligence and vetting functions to inform daily operations and enhance mission effectiveness by supporting an intelligence-driven, risk-based approach to our counterterrorism mission. For example, all vetting functions will more easily inform intelligence analysis and intelligence functions will assist in vetting analysis.

TSA's OIA provides TSA with the capability to review, synthesize, and analyze transportation specific intelligence in addition to providing comprehensive and cogent analytic products. It is the only Federal intelligence entity focused solely on the transportation sector. OIA coordinates closely and shares information with the DHS Office of Intelligence and Analysis, the Intelligence Community (IC), the intelligence sections of law enforcement agencies, and the transportation industry. To facilitate collaboration and provide rapid analysis and notification of threats, the office assigns Field Intelligence Officers (FIOs) at key transportation nodes and places liaison officers at key IC and law enforcement agencies.

Intelligence is critical to TSA's overall risk-based security strategy and the intelligence products generated provide the threat framework utilized to prioritize security resources. These products are regularly used by TSA senior leadership, the Federal Security Directors, the Federal Air Marshal Service (FAMS), and the

transportation industry to guide decisions. TSA operates and maintains 24/7 intelligence capabilities at TSA Headquarters, Annapolis Junction Operation Center (AJOC), Colorado Springs Operation Center (CSOC) and the TSA Freedom Center. Through these centers, TSA disseminates warnings and notifications of credible and immediate threats and assists in coordinating domestic and international civil aviation and other modal security intelligence activities.

To perform its mission, OIA provides and maintains Top Secret and Secret Collateral classified information technology infrastructures for interfacing via voice, video, and data with the IC, state and local law enforcement, field sites, and industry partners. TSA Intelligence Managed Network (TINMAN) supports the Headquarters, AJOC, CSOC and Freedom Center locations. The TSA Remote Access to Classified Enclaves (TRACE) solution provides secure access to classified and unclassified threat information in a timely manner to remote locations. In FY 2016 TSA will complete a transition from TRACE to Homeland Security Data Network to better enable information sharing at the classified levels with TSA field components and local transportation stakeholders. The Crisis Management System is a classified voice, video, and data system that is maintained and certified by Defense Information Systems Agency and utilized for classified connectivity to the Intelligence community during national crisis and special events.

The FY 2015 President's Budget realigned funding for the TSA-RK Center to the Intelligence PPA. The TSA-RK Center is a risk portal located on the TSA iShare intranet site that enables Office of Security Operations, OIA, Office of Law Enforcement/FAMS, the Office of Global Strategies, and the Office of Security Policy and Industry Engagement to share risk-related information across the agency, ensuring that all offices make decisions based on consistent data. TSA-RK Center is a tool which enables senior field and headquarters leaders to select countermeasures to prevent, deter, and respond to a security incident. This portal serves as an integrated repository for this risk-related information, and includes a risk analysis database that will allow for the manipulation and analysis of the critical information.

**Department of Homeland Security
Transportation Security Administration
Transportation Worker Identification Credential (TWIC) - offsetting fee
Program Performance Justification
(Dollars in Thousands)**

PPA: Transportation Worker Identification Credential (TWIC) - offsetting fee

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	21	21	\$70,027
FY 2015 President's Budget	21	21	\$34,832
2016 Adjustments-to-Base	22	21	\$47,435
FY 2016 Current Services	43	42	\$82,267
FY 2016 Program Change	-	-	-
FY 2016 Total Request	43	42	\$82,267
Total Change 2015 to 2016	22	21	\$47,435

The FY 2016 budget includes 43 positions, 42 FTE, and estimated fee collections of \$82.267 million for the TWIC program.

Adjustments to Base:

- Increase 22 FTP/ 21 FTE as part of the Balanced Workforce Initiative which federalized vetting adjudication positions previously held by contractors; as recommended by the GAO December 2011 report (GAO-12-60) and the DHS OIG report in October 2012 (OIG-13-05); and
- Increase of \$47.435 million in revenue collections based on FY 2016 TWIC applicant projections and to account for vendor fees previously retained by the vendor.

CURRENT SERVICES PROGRAM DESCRIPTION:

The TWIC program enhances security by providing a tamper-resistant biometric credential to maritime workers requiring unescorted access to secure areas of port facilities and vessels that are regulated under MTSA. The program provides a common, consistent biometric credential at over 2,700 facilities and on over 12,000 vessels. When fully implemented by the U.S. Coast Guard (USCG) after the promulgation of the TWIC reader rule, the program will require biometric verification of identity by facility and vessel operators as required by the rule. Prior to issuing a TWIC, the program ensures the identity of each TWIC holder has been verified; a satisfactory security background check has been completed on that identity; and each credential issued is positively linked to the rightful holder through the use of biometric technology.

TWIC’s personal identity verification standards and credential issuance closely align with those of Homeland Security Presidential Directive - 12 and its implementing standard, Federal Information Processing Standard 201-1. The program specifically follows biometric standards of the American National Standards Institute for its pattern-based fingerprint format operational biometric, and was the first to adopt common biometric standards in the Federal Government. TSA also works with the National Institute of Standards and Technology to ensure compliance with appropriate national standards and to develop technology specifications to support the overall program. In addition, TSA and USCG continue to work closely with the maritime, smart card, and reader industries and the TWIC Stakeholder Communications Committee.

The standard TWIC Fee is \$129.75¹ per applicant. A reduced TWIC fee of \$105.25 has also been established for those applicants that previously completed a comparable STA. The card replacement fee is \$60.00. The final TWIC rule includes the ability to provide a discount for Free and Secure Trade card holders, documented merchant mariners, and truckers with Hazardous Materials Endorsement (HME). As of FY 2012, TWIC holders applying for a HME are able to pay a reduced fee in states that have elected to offer comparability between the HME and TWIC security threat assessments. This fulfills statutory requirements under the 9/11 Act.

The credential is valid for five years. Starting August 31, 2012, the TWIC program began issuing Extended Expiration Date (EED) TWICs for eligible individuals. The EED TWICs extended the STA and associated expiration date for three years at a cost of \$60.00 per TWIC. To be eligible to obtain an EED card, a TWIC holder must be a U.S. citizen and have a valid card (i.e., not revoked) that expired on or before December 31, 2014. Obtaining an EED card only required one trip to an enrollment center of eligible TWIC holder's choosing to pick-up and activate the card. TWIC holders not wishing to use the EED card option, or those who are not eligible for the EED card option, renewed their expiring TWICs by completing a standard enrollment and paying the enrollment fee of \$129.75 to obtain a five-year TWIC. The EED option ended December 31, 2014.

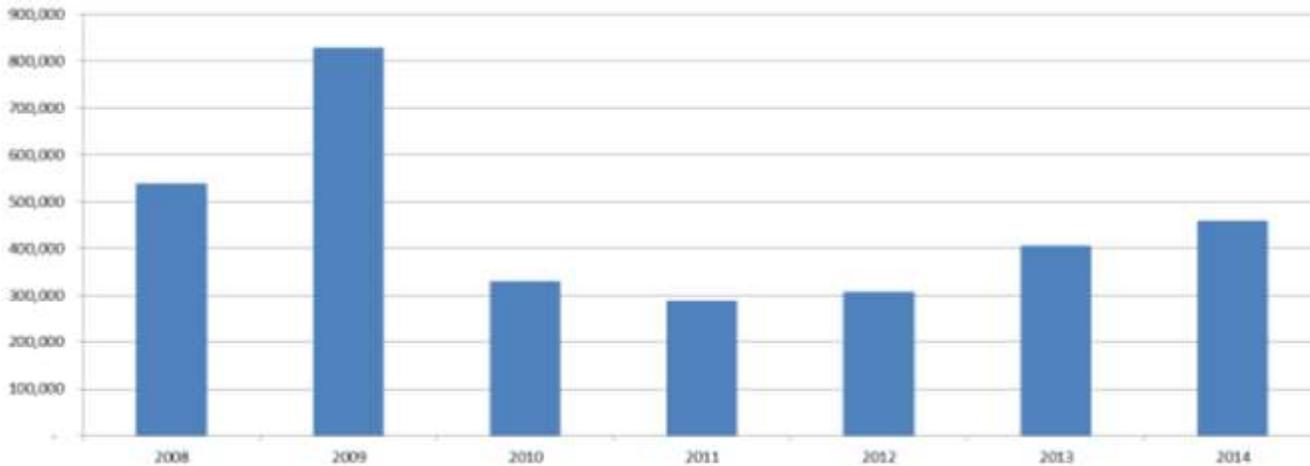

The TWIC program transitioned all 136 enrollment sites to the new universal enrollment services (UES) contract on June 28, 2013. The UES contract expanded enrollment services to include both TWIC and HME. As of October 2014 all HME enrollment sites have transitioned to UES. As a result, the existing TWIC enrollment center footprint has expanded its presence into every state. In addition, the transition to UES provides for a robust capability for mobile enrollments and provides a foundation for Enroll Your Own (EYO) focused on a specific stakeholder population. Through mobile enrollments, a Trusted Agent and mobile unit are sent to a vendor/company location for enrollments. Currently, 24 mobile enrollments have been implemented. EYO enables vendors the capability to enroll their own personnel by qualifying one or more personnel as a Trusted Agent.

In December 2012, the Coast Guard and Maritime Transportation Act 2012 was enacted and requires that within 270 days the DHS Secretary reform the TWIC enrollment and issuance process to require no more than one visit. TSA implemented OneVisit in 3 phases, with the first phase implemented in Alaska on July 29, 2013. Phase 2 was started in December 2013 at five enrollment centers in the upper peninsula of Michigan. Nationwide implementation began in the third quarter of FY 2014, via the TSA TIM program and was completed in July 2014.

The following chart shows enrollment activity since the start of the TWIC program. The increase in applicants every five years is attributed to the five-year TWIC renewal cycle; however, that pattern has flattened as a result of the normal turnover of workers in the maritime industry. In FY 2014, TSA processed 447,318 TWIC applicants and 157,371 EED requests. At the end of FY 2014, TSA has processed over 3,255,851 TWIC enrollments.

¹ The total program fee may adjust based on changes to FBI fees to complete a criminal history records request. Currently the TWIC fee reflects the FBI fee of \$14.50.

TWIC Enrollments

Prior to promulgating the TWIC reader rule, and to fully leverage the security benefit of the TWIC, the USCG has authorized the use of TWIC readers in place of the current requirement to visually inspect the card prior to allowing access to secure areas. Additionally, the USCG is currently verifying compliance with the TWIC requirements through electronic validation during vessel and facility compliance exams and/or security spot checks. Through the use of approximately 250 handheld readers for TWIC verification, the USCG is maximizing the use of the security features of the credential.

In FY 2014 the TWIC population was fully migrated into the TIM system. The fee structure will fall under the SVAR framework upon publication of the rule currently projected for FY 2018.

MAJOR ACQUISITIONS:

Transportation Worker Identification Credential (TWIC)

The TWIC program is mandated by TSA, which requires the Secretary to issue a “biometric transportation security card” to those requiring unescorted access to MTSA-regulated facilities after determining the individual does not pose a security risk. The SAFE Port Act of 2006 further requires program timelines and conducting an extensive pilot to evaluate TWIC reader performance and impacts on maritime business operations. The program began issuing credentials in October 2007, with a national compliance date of April 15, 2009; it is entirely funded through applicant fees. The beneficiaries of TWIC are: facility employees; longshoremen; U.S. mariners; long-haul and drayage truck drivers; and those needing unescorted access to secure areas of MTSA-regulated facilities.

The investment portion of the TWIC program is proposed to be funded for \$43.748 million out of the TWIC PPA in FY 2016.

Activity Funding (\$ in Thousands)

FY 2014 Revised Enacted	FY 2015 President’s Budget	FY 2016 Budget
\$32,271	\$28,628	\$43,748

FY 2016 Funding Breakout (\$ in Thousands)

Program Area	Sub-Program	Mission Need
Maintenance - \$43,748	TWIC Program	Funds for operating and maintenance cost of the TWIC program to issue biometric transportation security cards.

Technology Infrastructure Modernization (TIM)

The TIM Program will reduce the probability of a terrorist attack on the transportation sector by replacing legacy vetting systems with a person-centric system; this will eliminate exploitable gaps, improve enrollment and threat assessment methodologies, and enable TSA to vet and provide credentials to more transportation populations. The TIM System will provide an integrated, end-to-end solution to manage identities, credentials, and assessment results for millions of transportation workers, providing more accurate and timely identification of terrorist threats. TIM will provide a service oriented architecture framework, mission services, and service capabilities. The IOC occurred in April 2014.

The TIM program is proposed to be funded out of multiple areas in FY 2016:

- Other Vetting PPA \$29.544 million
- TWIC Fees \$ 5.142 million
- HTAP Fees \$ 3.246 million
- TSA Pre✓[®] Application Program Fees \$ 3.561 million
- NPPD – Reimbursable Agreement \$ 1.100 million

Additional funding details can be found in the Other Vetting PPA.

**Department of Homeland Security
Transportation Security Administration
Hazardous Materials Endorsement Threat Assessment Program
Program Performance Justification
(Dollars in Thousands)**

PPA: Hazardous Materials Endorsement Threat Assessment Program

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	17	19	\$18,710
FY 2015 President's Budget	17	17	\$12,000
2016 Adjustments-to-Base	18	17	\$9,083
FY 2016 Current Services	35	34	\$21,083
FY 2016 Program Change	-	-	-
FY 2016 Total Request	35	34	\$21,083
Total Change 2015 to 2016	18	17	\$9,083

The FY 2016 Budget includes 35 positions, 34 FTE, and estimated fee collections of \$21.083 million in the Hazardous Materials Endorsement Threat Assessment Program (HTAP).

Adjustments to Base:

- Increase of 18 FTP / 17 FTE as part of the Balanced Workforce Initiative which federalized vetting adjudication positions previously held by contractors; as recommended by the GAO December 2011 report (GAO-12-60) and the DHS OIG report in October 2012 (OIG-13-05); and
- Increase of \$9.083 million in revenue collections based on FY 2016 HTAP applicant projections and to account for vendor fees previously retained by the vendor.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HTAP was established to fulfill the statutory requirements of both the USA PATRIOT Act and the Safe Explosives Act to further protect against the threats to transportation posed by terrorists, dangerous criminals, and illegal aliens that may attempt to transport hazardous materials in commerce.

The program is funded through fee revenue that consists of three elements:

- 1) The cost for contractor support to collect and process fingerprint and application information. This amount varies based on the state the applicant applies for an HME. For applicants applying in a state which utilizes a TSA-contracted agent, this fee is \$38;
- 2) The \$14.50² fee charged by the FBI to run fingerprint-based criminal history records checks; and
- 3) TSA program costs to administer the program, including conducting the STAs; this fee is \$34.

² The total program fee may adjust based on changes to FBI fees to complete a criminal history records request. Currently the HTAP fee reflects the FBI fee of \$14.50.

States must forward biographic and biometric (fingerprint) information to TSA in an approved and established format to facilitate the STA process. Currently, nine States collect the required biographic information and biometric data through their individually established and maintained programs. The remaining 41 states and the District of Columbia have elected to utilize the TSA-contracted agent. Additionally, drivers registered in a state serviced by the TSA Agent may be fingerprinted in any other state serviced by the TSA Agent.

The HTAP has a robust redress process, including appeals, waivers, and Administrative Law Judge review. The program conducted threat assessments on 264,231 applicants in FY 2014 confirming the vital role of improving the safety and protection of passengers and freight traveling on our Nation’s highways. As of December 31, 2014, HTAP has processed over 2.78 million applications since implementation in January 2005. Beginning in FY 2012, TWIC holders applying for a HME STA are able to pay a reduced fee in states that have elected to offer comparability between the TWIC and HME STA. This fulfills statutory requirements under the 9/11 Act.

The HTAP will transition to the SVAR fee framework when the SVAR is published, currently projected for FY 2018.

MAJOR ACQUISITIONS:

HAZMAT Threat Assessment Program (HTAP)

The HTAP meets USA PATRIOT Act requirements, which prohibits States from issuing a license to an individual who transports hazardous materials (Hazmat) in commerce without determining if the person is a security risk. The Act requires checks be conducted against criminal history, immigration, and international databases. HTAP meets this mandate by conducting an STA on drivers applying to obtain, renew, or transfer an HME on State-issued CDLs. HTAP leverages existing criminal history, legal status and intelligence data to perform an STA on commercial truck drivers who transport Hazmat to determine the threat status to transportation security. STAs utilize national data sources and consistent vetting standards which are universally applied to applicants seeking an HME. HTAP is a key component of the DHS/TSA layered management approach to transportation security.

The investment portion of the HTAP program is proposed to be funded for \$8.455 million out of the HTAP PPA in FY 2016.

Activity Funding
(\$ in Thousands)

FY 2014 Revised Enacted	FY 2015 President’s Budget	FY 2016 Budget
\$7,612	\$7,217	\$8,455

FY 2016 Funding Breakout
(\$ in Thousands)

Program Area	Sub-Program	Mission Need
Maintenance - \$8,455	HAZMAT Program	Funds for operating and maintenance cost of the HAZMAT Threat Assessment Program to provide security checks on individuals transporting hazardous materials.

Technology Infrastructure Modernization

The TIM Program will reduce the probability of a terrorist attack on the transportation sector by replacing legacy vetting systems with a person-centric system; this will eliminate exploitable gaps, improve enrollment and threat assessment methodologies, and enable TSA to vet and provide credentials to more transportation populations. The TIM System will provide an integrated, end-to-end solution to manage identities, credentials, and assessment results for millions of transportation workers, providing more accurate and timely identification of terrorist threats. TIM will provide a service oriented architecture framework, mission services, and service capabilities.

The TIM program is proposed to be funded out of multiple areas in FY 2016:

- Other Vetting PPA \$29.544 million
- TWIC Fees \$ 5.142 million
- HTAP Fees \$ 3.246 million
- TSA Pre✓[®] Application Program Fees \$ 3.561 million
- NPPD – Reimbursable Agreement \$ 1.100 million

Additional funding details can be found in the Other Vetting PPA.

**Department of Homeland Security
Transportation Security Administration
General Aviation-Offsetting Fee
Program Performance Justification**
(Dollars in Thousands)

PPA: General Aviation-Offsetting Fee

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	-	-	\$377
FY 2015 President's Budget	-	-	\$350
2016 Adjustments-to-Base	-	-	\$50
FY 2016 Current Services	-	-	\$400
FY 2016 Program Change	-	-	-
FY 2016 Total Request	-	-	\$400
Total Change 2015 to 2016	-	-	\$50

The FY 2016 Budget includes \$400,000 in estimated fee collections to support General Aviation STA vetting and program management activities.

Adjustment to Base:

- Increase of \$50,000 in revenue collections based on FY 2016 General Aviation fee projections.

CURRENT SERVICES PROGRAM DESCRIPTION:

This offsetting collection supports General Aviation flights into DCA as provided by the Vision 100 – Century of Aviation Reauthorization Act. The DASSP conducts name-based STAs for all flight crewmembers and passengers including security coordinators and armed security officers on non-commercial aircraft (non-cargo) flying into/out of DCA from/to one of the 28 domestic gateway airports. TSA levies a \$490 fee per flight for training of armed security officers, and a \$296 fee per roundtrip for the screening personnel and equipment used to support such flights at DCA and a \$15 fee per person onboard the flight. TSA vetted over 15,000 General Aviation - DCA passenger and crew in FY 2014 and has vetted over 100,000 General Aviation – DCA passengers and crew in the DASSP since inception in October 2005. This program will transition to the TIM system after IOC and to the SVAR fee framework when the SVAR is published.

FY 2016 Total Request	11	11	\$3,500
Total Change 2015 to 2016	-	1	(\$3,673)

The FY 2016 Budget includes 11 positions, 11 FTE, and estimates \$3.500 million in fee collections to support the Air Cargo program.

Adjustments to Base:

- Increase of 1 FTE to correct current FTE levels in PPA; and
- Decrease of \$3.673 million in revenue collections based on current FY 2016 AC/IAC/CCSP application projections.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Air Cargo program fee collections support STA of air cargo workers in the air cargo supply chain, including individuals authorized to screen cargo at designated cargo screening facilities. In FY 2016, TSA will charge a \$41 per assessment fee to offset costs for conducting the STA and program management costs. The fee structure is based on cost and population analyses conducted in support of the Air Cargo Screening Final Rule (published in August 2011); the final fee structure of \$41 was published in May 2012 and effective June 22, 2012. Prior to June 22, 2012, this program was funded through the Aviation Security Appropriation Air Cargo PPA and there were no STA fees for applicants. This program is now entirely funded through fees. In FY 2014, TSA vetted approximately 118,000 air cargo workers as of September 30, 2014.

**Department of Homeland Security
Transportation Security Administration
Commercial Aviation and Airport Fee
Program Performance Justification**
(Dollars in Thousands)

PPA: Commercial Aviation and Airport Fee

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	-	-	\$6,627
FY 2015 President's Budget	-	-	\$6,500
2016 Adjustments-to-Base	-	-	-

FY 2016 Program Change	-	-	-
FY 2016 Total Request	-	-	\$6,500
Total Change 2015 to 2016	-	-	-

The Commercial Aviation and Airport Fee program was previously known as the SIDA Fee. TSA estimates \$6.5 million in FY 2016 fee collections to support the SIDA and Aviation Workers airport employee checks through the Commercial Aviation and Airport Fee program.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Commercial Aviation and Airport Fee program includes those individuals who apply for, or are issued, personnel identification credentials at U.S. domestic airports (e.g., airport facilities workers, retail employees, airline employees, taxi drivers, parking attendants, etc.). Depending on the access level granted to the airport worker, the individual may be required to have a fingerprint-based FBI CHRC. The FBI fees collected by this program support the costs for a fingerprint-based CHRC.

In addition to the FBI CHRC, prior to receiving any identification credentials, aviation workers must undergo a successful name-based STA, which is currently funded through the Other Vetting PPA. This population will eventually be covered under the SVAR. The program also processes FBI CHRCs for the General Aviation population. Airport and aircraft operators are provided a choice of service providers from among three TSA DACs.

As of September 30, 2014, the total current badged Aviation Worker population is approximately 2.2 million, which includes approximately 620,000 new or modified applications in FY 2014. The FY 2016 estimate is based on approximately 450,000 new applicants with the projected FBI fee of \$14.50 per applicant. The total program fee may adjust based on changes to FBI fees to complete a criminal history records request.

**Department of Homeland Security
Transportation Security Administration
Other Security Threat Assessments
Program Performance Justification**
(Dollars in Thousands)

Other Security Threat Assessments (OSTA) fees include the LASP and SSI fees. The FY 2016 Budget includes an estimate of \$50,000 in FY 2016 fee collections to support OSTA.

CURRENT SERVICES PROGRAM DESCRIPTION:

The OSTA fees fund the 12/5, PCSSP, Maryland-Three (MD-3), Airspace Waivers (ASW), LASP and SSI. The fees collected by these programs support the costs for a fingerprint-based FBI CHRC. Populations under these programs also undergo a name-based STA, which is currently funded through the Other Vetting PPA. These populations will eventually be covered under the SVAR.

The 12/5 program conducts an FBI CHRC for flight crewmembers (e.g., cockpit crew, airline personnel authorized in the cockpit, cargo carrier employees) operating aircraft with a maximum certificated takeoff weight of 12,500 pounds or more. The annual population for the 12/5 program is approximately 2,500 applicants. Each program conducts STAs for regulated parties.

The PCSSP program is for private charter flight crewmembers operating aircraft with a maximum certified takeoff weight of 45,000 kilograms (100,309 pounds) or more, or a passenger-seating configuration of 61 or more, or whose passengers are enplaned from or deplaned into a sterile area. PCSSP does not include government charters.

The MD-3 program applies to pilots who operate aircraft and apply for privileges to fly to or from the three General Aviation airports in the Washington, D.C. restricted flight zones (Potomac Airport, Washington Executive/Hyde Field, and College Park Airport).

The ASW program, in conjunction with the FAA, conducts FBI CHRCs for domestic and international flight crew members and passengers for access to: certain operational areas of DCA, access to Washington, D.C. flight restricted zones, major sporting events, Disney theme parks, flight training, and special events.

The LASP program will provide for the fee collections to fund FBI CHRCs for the large aircraft security program. Vetting costs are currently supported by appropriated funds. Fee collection will begin after the Notice of Proposed Rulemaking (NPRM) is approved and with the SVAR.

The original LASP NPRM included language to require all U.S. operators of aircraft over 12,500 MTOW to adopt and implement a TSA-approved security program. Subsequent to industry feedback and comments, TSA drafted a Supplemental Notice of Proposed Rulemaking (SNPRM) which is currently under executive review at TSA. The SNPRM modifies the MTOW threshold from 12,500 pounds to 30,000 pounds. Operators having an MTOW over 30,000 pounds will be required to adopt a TSA-approved security program and the GA 30 Security Program, which will be similar to the current process for U.S. air carriers and commercial operators. The SNPRM also proposes that GA operators transporting persons or cargo for compensation/hire in an aircraft with an MTOW over 12,500 pounds adopt a 12/5 Security Program and a Private Charter/Compensation or Hire Security Program, as necessary, which will have specific requirements and checks for each population as determined by TSA. TSA will begin collecting a fee with the implementation of the SVAR and the General Aviation Security Program SNPRM.

TSA is collecting the SSI fee to fund the FBI CHRC for those individuals who require access to SSI. The FY 2016 estimate is based on approximately 3,448 applicants with the FBI CHRC requirement at a fee of \$14.50. The total program fee may adjust based on changes to FBI fees to complete a criminal history records request.

**Department of Homeland Security
Transportation Security Administration
Alien Flight Student Program - mandatory fee
Program Performance Justification**
(Dollars in Thousands)

PPA: Alien Flight Student Program - mandatory fee

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	6	6	\$5,178
FY 2015 President's Budget	6	6	\$5,000
2016 Adjustments-to-Base	9	9	\$200
FY 2016 Current Services	15	15	\$5,200
FY 2016 Program Change	-	-	-
FY 2016 Total Request	15	15	\$5,200
Total Change 2015 to 2016	9	9	\$200

The FY 2016 Budget includes 15 positions, 15 FTE, and estimates \$5.2 million in fee collections for the Alien Flight Student Program (AFSP).

Adjustments to Base:

- Increase of 9 FTP/ 9 FTE in 2016, as part of the Balanced Workforce Initiative which federalized vetting adjudication positions that were previously held by contractors; and
- Increase of \$200,000 in revenue collections based on FY 2016 AFSP fee projections.

CURRENT SERVICES PROGRAM DESCRIPTION:

AFSP conducts terrorist, immigration and criminal-background checks on all foreign students applying for flight training in the United States or abroad at FAA-certified flight training locations. Applicants are subject to an STA in accordance with Vision 100 – Century of Aviation Reauthorization Act. AFSP applicants identified as a threat to aviation or national security under this program will be denied training.

The program reviews and assesses both biographic and biometric information to identify individuals who may pose a security threat. Prior to the September 11, 2001 attacks, there were no systematic security checks performed on non-U.S. citizens applying for FAA-certified flight training in the United States or abroad.

Section 612 of the Vision 100 – Century of Aviation Reauthorization Act transferred the function for screening AFSP applicants from the Attorney General to the DHS Secretary (and subsequently delegated to the TSA). The Act also gives the DHS Secretary the authority to establish a fee to offset costs of vetting AFSP applicants.

AFSP currently collects a fee of \$127.25 per basic applicant. This fee includes \$112.75 for extensive TSA international and domestic threat assessments, and \$14.50 for an FBI CHRC, which may adjust based on changes to FBI fees for criminal history records request. On May 13, 2009, AFSP also began collecting a fee of \$70 per recurrent applicant. Fees collected for AFSP support the enrollment, vetting and adjudication of flight training applicants and program management support. AFSP applicants, who require training for a new skill set, will also be required to undergo a fingerprint-based FBI CHRC. Operational since 2004, AFSP has processed approximately 450,000 applications since inception. As of August 2014, AFSP has processed approximately 50,000 flight training fee applications in FY 2014. AFSP is entirely funded by fee revenue. The program has

added 9 FTEs as part of the Balanced Workforce Initiative which federalized positions that were previously held by contractors, as recommended by the GAO December 2011 report (GAO-12-60) and the DHS OIG report in October 2012 (OIG-13-05). This program will transition to the TIM system and the SVAR fee framework when the system is completed and the SVAR is published, currently projected for FY 2018.

**Department of Homeland Security
Transportation Security Administration
TSA Pre✓® Application Program – Fee
Program Performance Justification**
(Dollars in Thousands)

PPA: TSA Pre✓® Application Program – Fee

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	-	1	\$50,115
FY 2015 President's Budget	27	26	\$13,700
2016 Adjustments-to-Base	-	-	\$66,453
FY 2016 Current Services	27	26	\$80,153
FY 2016 Program Change	-	-	-
FY 2016 Total Request	27	26	\$80,153
Total Change 2015 to 2016	-	-	\$66,453

The FY 2016 Budget includes 27 positions, 26 FTE, and estimated fee collections of \$80.153 million for the TSA Pre✓® Application Program.

Adjustments to Base:

- Increase of \$66.453 million in revenue collections based on current FY 2016 TSA Pre✓® applicant projections and to account for vendor fees previously retained by the vendor.

CURRENT SERVICES PROGRAM DESCRIPTION:

TSA Pre✓® is one of several risk-based security initiatives that DHS and TSA are using to enhance screening operations and redefine the passenger experience for millions of travelers. TSA Pre✓® is a prescreening initiative that conducts risk assessments on passengers who voluntarily participate prior to their arrival at the airport checkpoint. If TSA determines an individual is a low risk traveler, that individual may be able to receive expedited screening.

To expand the population of travelers eligible for TSA Pre✓® at participating airport security checkpoints, TSA launched the TSA Pre✓® Application Program in December 2013, previously referred to as the TSA Pre✓® Trusted Traveler program, for domestic air travel. This program is designed as a fee-based program similar to TSA’s HTAP and TWIC threat assessment program as well as CBP’s Global Entry program. TSA is implementing the TSA Pre✓® Application Program pursuant to its authority to “[e]stablish requirements to implement trusted passenger programs and use available technologies to expedite security screening of passengers who participate in such programs, thereby allowing security screening personnel to focus on those passengers who should be subject to more extensive screening.” Under this program, travelers may be eligible for expedited security screening for air travel through TSA Pre✓® lanes, if they: (1) voluntarily submit requested biometric and biographic information to TSA; (2) pay the \$85 non-refundable program fee covering TSA’s costs for conducting the security threat assessment and adjudicating the application; and (3) successfully undergo a security threat assessment to confirm they do not pose a threat to transportation or national security.

The program is funded through fee revenue that consists of three elements:

- 1) A \$34.50 fee that remains with the vendor for enrollment services;
- 2) The \$14.50 fee charged by the FBI to run fingerprint-based criminal history records checks (which may adjust based on changes to FBI fees for criminal history records request); and
- 3) A \$36 fee for the TSA program costs to administer the program, including STAs.

Over 300 enrollment centers are now available at UES sites, which serve multiple programs including TWIC and HTAP, and at airports. TSA continues to look for opportunities to expand the TSA Pre✓[®] population. The following chart depicts the current status of the TSA Pre✓[®] Application Program as of September 30, 2014:

Cumulative Program Statistics

(From Inception, December 4, 2013 thru September 30, 2014)

Program Areas	Measurement
Total Enrollments	591,095
Total Approved	580,514
Number of Enrollment Centers Open**	313

**Includes 274 Universal Enrollment Services Sites and 28 On-Airport enrollment sites

MAJOR ACQUISITIONS:

Technology Infrastructure Modernization

The TIM Program will reduce the probability of a terrorist attack on the transportation sector by replacing legacy vetting systems with a person-centric system; this will eliminate exploitable gaps, improve enrollment and threat assessment methodologies, and enable TSA to vet and provide credentials to more transportation populations. The TIM System will provide an integrated, end-to-end solution to manage identities, credentials, and assessment results for millions of transportation workers, providing more accurate and timely identification of terrorist threats. TIM will provide a service-oriented architecture framework, mission services, and service capabilities.

The TIM program is proposed to be funded out of multiple areas in FY 2016:

- Other Vetting PPA \$29.544 million
- TWIC Fees \$ 5.142 million
- HTAP Fees \$ 3.246 million
- TSA Pre✓[®] Application Program Fees \$ 3.561 million
- NPPD – Reimbursable Agreement \$ 1.100 million

Additional funding details can be found in the Other Vetting PPA.

IV. Program Justification Changes

**Department of Homeland Security
Transportation Security Administration
Intelligence and Vetting
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: DHS Watchlist Service
PPA: Secure Flight, Other Vetting Programs
Program Increase: Positions 0, FTE 0, Dollars \$2,800

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							441	411	\$175,721
Program Increase							0	0	\$2,800
Total Request	433	386	\$182,774	434	404	\$180,725	441	411	\$178,521

Description of Item:

The FY 2016 Budget includes \$2.8 million to support the DHS WLS, which includes \$1.38 million for the Secure Flight PPA and \$1.42 million for the Other Vetting PPA.

TSA uses the DHS WLS, which provides a single gateway of Terrorist Screening Database (TSDB) data from the TSC to DHS. DHS (via CBP as the technical steward) acts as service provider and manages the feed of terrorist watch list data to Secure Flight and the Transportation Vetting System (TVS).

This initiative covers the implementation of technological and operational sustainment and maintenance for Secure Flight and TVS's use of the DHS WLS.

Justification:

The DHS WLS provides a single gateway of TSDB data from the TSC to DHS. The Department recognizes the critical importance of accurate and timely information sharing with the TSC about encounters with those known or reasonably suspected of being involved in terrorist activity. However, currently DHS components must report encounters back to the TSC manually via XML, email, or phone call, resulting in the potential for timeliness and accuracy issues. To address this gap, the Department is requesting resources to develop an automated, near-real-time feedback mechanism to share encounter information with the TSC.

Tier II level reconciliation of watch list records provides verification of critical attributes with the source of the watch list record, TSC. By enabling this level of reconciliation TSA is able to reduce the risk of failing to identify a transportation worker or identify a passenger on the watch list that is attempting to receive a credential through the STA process or board an airplane. This level of reconciliation is a manual process today taking two

resources over four weeks to complete. As a result it is only done on an annual basis increasing the risk of failing to match a transportation worker or passenger.

The encounter management capability will act as a central mechanism to receive encounter information from DHS Components and programs, and send that information electronically to the TSC. This capability enables sharing encounter information to TSC in an automated, near-real-time feedback mechanism that will contribute to a current and accurate watchlisting and screening process. Requested funding enables DHS to work with TSC to develop requirements and pilot this encounter service to exchange terrorist encounter data using the WLS. Funding is requested for CBP, TSA, and USCIS to implement and maintain this encounter service.

Impact on Performance (Relationship of Increase to Strategic Goals):

The WLS plays a major role in supporting DHS Strategic Goal 1.1 – Prevent Terrorist Attacks by helping identify known terrorists before they fly on commercial aircraft. Automating the reconciliation of the watch list represents both an improvement in efficiencies and risk-based security. This effort would eliminate the manual processes enabling critical resources to only focus on correcting exceptions.

**Department of Homeland Security
Transportation Security Administration
Intelligence and Vetting
Justification of Program Changes
(Dollars in Thousands)**

Program Decrease 1: Reduction to Large Aircraft and Charter Screening Program
 PPA: Secure Flight
 Program Decrease: Positions 0, FTE 0, Dollars \$(6,350)

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							308	286	\$105,637
Program Decrease							0	0	(\$6,350)
Total Request	308	274	\$99,487	308	286	\$112,543	308	286	\$99,287

Description of Item:

The FY 2016 request includes a reduction of \$6.35 million in the Secure Flight PPA Large Aircraft and Charter Screening Program (LACSP). The total cost of the LACSP request is \$6.367 million in FY 2016.

Justification:

The reduction of \$6.35 million is due to a delay in the General Aviation Security Rulemaking, which will postpone modifications to the Secure Flight system, processes and procedures until the General Aviation Security Rule is further in the approval process. These modifications will ultimately allow Secure Flight to vet the passengers on large general aviation aircraft against the No-Fly and Selectee lists.

The 2004 Intelligence Reform and Terrorism Prevention Act (IRTPA) mandates that DHS make advanced passenger prescreening available to charter and lessors of aircraft greater than 12,500 pounds that fly into, out of, or within the United States. TSA is promulgating the General Aviation Security Rule supporting these provisions of IRTPA as well as additional regulations for aircraft over 30,000 pounds. In order for TSA to make the appropriate modifications to the Secure Flight system, processes and procedures to vet these populations, funding for this initiative will be required prior to the effective date of the rule. Upon publishing of the rule, full funding for this program will be requested.

Impact on Performance (Relationship of Increase to Strategic Goals):

This reduction will not adversely impact the Large Aircraft and Charter Screening Program. Funding at the FY16 requested level of \$6.367 million will permit TSA to proceed with critical steps of the developmental stage including the purchase of the necessary hardware and software.

Intelligence Mission Statement

Provide Intelligence Analysis, Coordination, and Dissemination -- TSA will continue to provide current and strategic warning regarding threats to U.S. transportation modes and identify trends and changes in targeting. The TSA intelligence unit analyzes intelligence and disseminates information through liaison with intelligence community agencies.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	-	\$26,060	\$26,571	\$511
11.3 Other than Full-Time Permanent	-	\$86	\$86	-
11.5 Other Personnel Compensation	-	\$1,265	\$1,265	-
12.1 Civilian Personnel Benefits	-	\$7,265	\$7,650	\$385
Total, Salaries & Benefits	-	\$34,676	\$35,572	\$896

The FY 2016 request reflects the Salary and Benefits for 260 FTE. It includes an increase of 2 FTP/2 FTE (1 FTE transfer each from Surface Staffing and Operations and from Aviation Regulation); an increase of \$342 thousand for Pay COLA, an increase of \$82 thousand for annualization of FY 15 pay raise, and an increase of \$109 thousand for retirement contributions.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$0	\$10,305	\$9,585	(\$720)

The FY 2016 request more appropriately aligns estimates with actual program costs.

Secure Flight Mission Statement

The mission of the Secure Flight Program is to significantly improve the Federal Government's ability to prevent terrorists from boarding aircraft, help move passengers through airport screening more quickly, and reduce the number of individuals selected for secondary screening, while fully protecting passengers' privacy and civil liberties.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$27,932	\$28,817	\$29,096	\$279
11.3 Other than Full-Time Permanent	-	\$5	\$5	-
11.5 Other Personnel Compensation	\$1,240	\$1,165	\$1,165	-

Other Vetting Programs Mission Statement

The mission of Other Vetting is to help support the identification of individuals deemed as potential terrorists or who pose a security threat to either aviation or national security.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$12,656	\$12,960	\$13,710	\$750
11.3 Other than Full-Time Permanent	\$128	\$128	\$128	-
11.5 Other Personnel Compensation	\$639	\$627	\$627	-
12.1 Civilian Personnel Benefits	\$3,855	\$3,858	\$4,252	\$394
Total, Salaries & Benefits	\$17,278	\$17,573	\$18,717	\$1,144

The FY 2016 request reflects the Salary and Benefits for 125 FTE. It includes an increase of 1 FTP/1 FTE (transfer from Surface Staffing and Operations); an increase of 6 FTP/6 FTE for a balanced workforce contract conversion; an increase of \$180 thousand for Pay COLA, an increase of \$43 thousand for annualization of FY 15 pay raise, and a \$59 thousand increase for retirement contributions.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$21,438	\$9,530	\$10,288	\$758

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The increase is a result of the Watchlist Service program change.

TSA Pre✓® Application Program – Fee Mission Statement

The mission of the TSA PreCheck Application Program is to increase the number of individuals eligible for expedited screening. This prescreening initiative conducts risk assessments on passengers who voluntarily participate prior to their arrival at the airport checkpoint. If TSA determines an individual is a low risk traveler, that individual may be eligible for expedited screening.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$83	\$3,020	\$3,020	-

Alien Flight Student Program - mandatory fee Mission Statement

The mission of the Alien Flight Student Program is to help identify individuals deemed as potential terrorists or who pose a security threat to either aviation or national security. This program reviews and assesses biographic and biometric information of non-U.S. citizens and other individuals who seek flight training at FAA certified flight schools located both inside and outside the United States.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$576	\$524	\$1,224	\$700
11.5 Other Personnel Compensation	\$12	\$30	\$70	\$40
12.1 Civilian Personnel Benefits	\$157	\$200	\$409	\$209
Total, Salaries & Benefits	\$745	\$754	\$1,703	\$949

The FY 2016 request reflects the Salary and Benefits for 15 FTE. It includes an increase of 9 FTP/9 FTE for a balanced workforce contract conversion.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$4,163	\$3,736	\$2,987	(\$749)

The decrease is a result of the balanced workforce contract conversion and to more appropriately align estimates with actual costs.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of Federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to Section 736 of Division D of the Omnibus Appropriations Act, 2009 (P.L. 111-8), the Department is required to issue guidelines to DHS Components to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or Federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with Federal employees to better realize the full potential of our total workforce – both contracted and Federal. A strong internal core of Federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS Components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for Federal employees. As the Department has a large magnitude of contracts, all contracts have prioritized based on risk into Tiered ranking.

The FY 2016 Budget includes 55 FTP and 53 FTE for the FY 2016 DHS Balanced Workforce Strategy.

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Transportation Security Support

I. Appropriation Overview

A. Mission Statement for Transportation Security Support:

The Transportation Security Administration (TSA) is an agency of more than 50,000 FTE and \$7.3 billion in budget authority, regulatory and law enforcement authorities, and a nationwide presence. The management and support of the organization is accomplished by a transportation security support staff in the Washington, D.C. metropolitan area and five Mission Support Centers (MSCs).

B. Budget Activities:

Intelligence - The Intelligence Program, Project, or Activity (PPA) was realigned in the Fiscal Year (FY) 2015 President's Budget to the Intelligence and Vetting appropriation.

Headquarters Administration - Headquarters (HQ) Administration provides all aspects of the support infrastructure required to sustain TSA's nation-wide operations. These activities include serving as the central point on policy development, performance management, facilities management, financial management, acquisition, civil rights protection, legal advice, internal conduct and audits, and providing a safe and healthy work environment for employees.

Human Capital Services - Human Capital Services (HCS) includes all services that support the recruitment, assessment, servicing, payroll, and career development of TSA's employees at headquarters, field offices, airports, and other locations.

Information Technology - Information Technology (IT) provides the IT infrastructure and services to maintain connectivity, provide productivity tools, and support headquarters and field corporate applications.

C. Budget Request Summary:

The FY 2016 Budget includes 1,965 positions; 1,826 FTE; and \$931,479,000 in appropriated funding for Transportation Security Support. Total adjustments-to-base include an increase of 79 FTP, 76 FTE and a decrease of \$2,886,000.

The Program Changes include a net increase of \$2,339,000 to:

- Increase for High Risk Internal Cybersecurity Remediation (0 positions, 0 FTE, and \$2,888,000)
- Increase for Restoration of Assumed Risk-Based Security (RBS) – TSA Academy Instructors (0 positions, 0 FTE, and \$8,000)
- Decrease to Leverage efficiencies from RBS – Screener Workforce (0 positions, 0 FTE, and \$457,000)

- Decrease to Leverage efficiencies from RBS – Transportation Security Specialist - Explosives (0 positions, 0 FTE, and \$23,000)
- Decrease to Leverage efficiencies from RBS – Transportation Security Inspectors (0 positions, 0 FTE, and \$77,000) |

The FY 2016 Budget includes 1,297 positions; 1,198 FTE; and \$276.9 million for Headquarters Administration.

Adjustments-to-Base:

- Increase of \$424,000 for annualization of the 2015 pay raise
- Increase of \$1.679 million for the 2016 pay raise
- Increase of 1 FTP, 1 FTE for Balance Workforce Strategy Follow On from contract conversion
- Increase of \$1.994 million for reprogramming from the HCS PPA for HRAccess contract conversion
- Increase of \$581,000 for retirement contributions
- Decrease of 5 FTP, 5 FTE and \$1.191 million transfer to Aviation Security from realignment of positions and funds
- Decrease of \$15,000 from in-line savings
- Decrease of \$2.2 million from program efficiencies
- Decrease of \$1,000 for transfer to Aviation Security for new Screening Partnership Program Airports

Program Changes:

- Increase of \$3,000 for the TSA Academy Instructors
- Decrease of \$152,000 to leverage efficiencies from RBS – Screener Workforce
- Decrease of \$19,000 to leverage efficiencies from RBS – Transportation Security Specialists Explosives
- Decrease of \$64,000 to leverage efficiencies from RBS--Transportation Security Inspectors

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components that make up this PPA.

Headquarters Administration PPA

(\$ in Millions)

	FY 2015	FY 2016
Personnel	\$172.8	\$174.9
Leadership	\$2.1	\$2.1
Internal Management & Controls (IM&C)	\$54.4	\$55.0
Workforce Support	\$18.3	\$17.3
Facilities Management and Physical Security	\$28.3	\$27.6
TOTAL	\$275.9	\$276.9

HQ Administration provides all aspects of the support infrastructure required to sustain TSA's nationwide operations. These activities include serving as the central point on policy development, performance management, facilities management, financial management, acquisition, civil rights protection, legal advice, internal conduct and audits, and providing a safe and healthy work environment for employees.

Personnel: \$174.9 million

Included in this PPA are personnel costs for the Offices of the Administrator and Deputy Administrator, Chief of Staff, Policy Coordination and Intergovernmental Affairs, Professional Responsibility, Inspection, Chief Counsel, Finance and Administration (Chief Financial Officer (CFO) and Chief Administrative Officer (CAO)), Legislative Affairs (LA), Acquisition, Civil Rights and Liberties, Ombudsman, and Traveler Engagement (CRLOTE), Security, Training and Workforce Engagement (TWE), Professional Responsibility, and Strategic Communications and Public Affairs.

Leadership: \$2.1 million

Operating expenses are provided to develop the policy and management architecture to guide overall activities, ensure compliance with laws and regulations, and manage external relationships with Congress, the Administration, other oversight entities, and private sector partners. Executive leadership offices include the Office of the Administrator, Deputy Administrator, Chief of Staff, Policy Coordination and Intergovernmental Affairs, LA, and Strategic Communications and Public Affairs.

Internal Management and Controls: \$55.0 million

Operating expenses support the day-to-day management of an approximately \$7.3 billion budget and 50,800 FTE. Offices overseeing internal management and controls include: Professional Responsibility, Inspection, Acquisition, CFO, CAO, Chief Counsel, and Security. The Department of Homeland Security (DHS) Working Capital Fund is in part, funded under the Internal Management and Controls which funds DHS-wide and Government-wide activities such as Financial Statement Audit, Internal Control Audit, Flexible Spending Plan, Strategic Sourcing, Homeland Security Presidential Directive (HSPD) 12, and Consolidated Subscription Services.

Workforce Support: \$17.3 million

Ensures that the approximately 50,800 FTEs have an excellent working climate and a safe and healthy environment while performing TSA's mission through the following programs: Injury prevention, accident investigation and reporting, investigation of safety and health complaints, radiation safety, and health facilities. In addition, these programs ensure fair and lawful treatment of employees and the public.

Facilities Management and Physical Security: \$27.6 million

Facility and management support for HQ, the Freedom Center, the Franconia Warehouse, and the MSCs. The Franconia Warehouse is used to stage TSA equipment prior to deployment, to store special purpose consumables, and to temporarily store property and equipment during construction projects. The MSCs are the central field service support mechanism for TSA across all transportation modes.

PROGRAM OFFICES

Acquisition – Executes contracts and other agreements for the equipment, supplies and services needed by TSA to accomplish its mission. This office provides subject matter expertise in the areas of acquisition, field office acquisition guidance, grants management, requirements development, and program management.

Chief Administrative Officer – Develops and implements administrative service programs, policies, and functions to include compliance with safety, health, and environmental services regulations and policies; manages all TSA personal property, fleet, transportation program, transit benefits, and HQ parking; manages real estate leases, facilities and facility improvements for HQ, field offices and airports; and administers information management programs.

Chief Counsel – Delivers legal services to all of TSA's mission areas and staff, covering all substantive legal areas applicable to TSA. The comprehensive and inclusive array of services includes regulations and security standards, enforcement and incident management, international operations, litigation, procurement, field operations, employment and civil rights, labor relations, ethics, information law, fiscal law and liability management, drafting Congressional testimony and reviewing legislation.

Chief Financial Officer – Responsible for the fiscal management, integrity, and accountability of TSA. Ensures that funds necessary to carry out TSA's critical missions are obtained and the resources are used efficiently and that robust internal funds controls are applied. Provides planning guidance to align the TSA budget with DHS goals and objectives and provides performance guidance and assistance to ensure goals and objectives are executed.

Inspection – Ensures the integrity, efficiency, and effectiveness of TSA's workforce, operations, and programs through objective audits, covert testing, inspections, and criminal investigations.

Security – Oversees and administers the agency-wide physical, personnel, and internal security policies and procedures, thereby ensuring a safe and secure workplace for its employees, resources and facilities, and effectively determining the employment suitability of all TSA personnel, including contractors. Conducts assessments and reviews of TSA records to identify Sensitive Security Information (SSI) and, if necessary, redact SSI from those records relating to litigation, Freedom of Information Act, and other agency requests.

Civil Rights and Liberties, Ombudsman, and Traveler Engagement – Provides guidance and advice on civil rights and equal employment opportunity services; identifies strategies and practices to promote a diverse and inclusive workforce and environment; assures compliance and performs outreach and engagement with the disability and multicultural communities; manages TSA Cares which provides a dedicated toll-free helpline for passengers with disabilities; provides conflict resolution services; ensures compliance with privacy requirements; and operates the TSA Contact Center and the DHS Traveler Redress Inquiry Program.

Strategic Communications and Public Affairs – Oversees the communications, media relations, public liaison, speechwriting, and all Web communication initiatives including the TSA Blog and social media activities. Audiences include the public, the media, Congress, TSA employees, internal stakeholders, and foreign partners. Strategic Communications and Public Affairs (SCPA) aims to increase public understanding of security procedures and agency policies and to prepare the public to navigate security.

Legislative Affairs – Serves as TSA’s primary interface with Congress. LA develops and advances TSA’s legislative priorities on Capitol Hill and prepares agency officials for appearances before Congress. In addition, LA develops and implements a comprehensive, proactive legislative strategy to inform Congress of TSA’s activities through briefings, meetings, tours, and responses to Congressional inquiries.

Office of Professional Responsibility – Ensures fair and consistent disciplinary practice TSA-wide. This includes reviewing and adjudicating allegations of misconduct for senior level, law enforcement employees, J band employees, and Transportation Security Managers, tracking and oversight of misconduct cases, and adjudicating appeals of adverse actions issued against Transportation Security Officers.

Training and Workforce Engagement (TWE) – Oversees the development and delivery of all workforce engagement, training, learning, employee formal development programs, and training programs for industry and international partners to support successful execution of TSA’s mission.

MAJOR ACQUISITIONS:

FY 2016 Total Request	348	326	\$202,164
Total Change 2015 to 2016	84	81	(\$2,051)

The FY 2016 Budget includes 348 positions, 326 FTE, and \$202.2 million for Human Capital Services.

Adjustments-to-Base:

- Increase of \$94,000 for annualization of the 2015 pay raise
- Increase of \$469,000 for the 2016 pay raise
- Increase of \$92,000 for retirement contributions
- Increase of 84 FTP and 81 FTE for Balance Workforce Strategy Follow on for HRAccess contract conversion
- Decrease of \$2.316 million for reprogramming to HQ Administration and IT for the HRAccess contract conversion.
- Decrease of \$390,000 for transfer to Aviation Security for the Screening Partnership Program new airports

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components that make up this PPA.

Human Capital Services PPA
(\$ in Millions)

	FY 2015	FY 2016
Personnel	\$38.0	\$48.8
Recruitment, Assessment, and Personnel Administration	\$133.2	\$120.3
Other Human Capital Services	\$24.4	\$24.5
Leadership and Career Programs	\$8.6	\$8.6
TOTAL	\$204.2	\$202.2

HCS maintains oversight of all Human Resources (HR) contractual activities, develops policies, guidance, and programs that are used to identify and promote the best and most efficient HR practices, thereby allowing TSA to establish and administer programs necessary to create and sustain a diverse and highly skilled workforce.

TWE is the business leader for learning, employee development, and workforce engagement for TSA. It ensures alignment of agency training and workforce engagement initiatives with security capability and program changes required to execute the agency's counterterrorism mission across all transportation modes

Personnel: \$48.8 million

This PPA includes personnel costs to support all HR and training and development activities. HCS converted 84 positions and 81 FTE based on a staffing and cost analysis which determined that converting some functions of the HRAccess contract was more efficient in future years.

Recruitment, Assessment, and Personnel Administration: \$120.3 million

These activities provide HR Services to the workforce located in 448 airports in all 50 States, the District of Columbia, and U.S. Territories. Services are provided via HRAccess and include recruitment and hiring, personnel transactions, benefits processing, payroll processing, workforce planning, position management/position classification and help desk. HRAccess aligns with the enterprise Architecture of DHS and leverages available e-systems that create efficient services and processes. As a result, TSA benefits from improved customer service both through feedback and stakeholder communications, innovative approaches utilizing automated solutions and Federal best practice applications, and improved efficiency through system/process integration resulting in reduced overhead. The HRAccess contract is set to expire on January 1, 2017 and efforts are underway to acquire ongoing support for HR processes and services under the Personnel Futures Program (PFP). PFP is responsible for assessing the Human Capital organizational current state and providing leadership with, and ultimately executing, a sound path forward regarding the appropriate mix of contractor provided services and federally performed functions.

Other Human Capital Services: \$24.5 million

Other HCS include employee relations, collective bargaining, program management support of Human Capital systems, strategic Human Capital planning, reasonable accommodation, management of the Worker's Compensation program, and other mandatory programs – including drug and alcohol testing, Unemployment Compensation, and the Working Capital Fund.

The Partnership Office manages the implementation of the Collective Bargaining Agreement with the American Federation of Government Employees (AFGE) which includes coordinating the implementation of over 75 items contained in the contract with AFGE, provides training on the contract, and provides guidance on the application of the contract. The Office also operates the Unitary Dispute Resolution System which addresses grievances, workplace disputes, alleged violations of the Collective Bargaining Agreement, and disciplinary actions.

The Workers' Compensation Program Office oversees the TSA Workers' Compensation Federal Employees Compensation Act program and the TSA Nurse Case Management Program. The Periodic Roll initiative is a joint effort with the Nurse Case Management team in which all of the long-term disability (Periodic Roll) cases are examined for opportunities to return employees to work when medically feasible. To ensure injured workers receive expedited medical care, TSA uses a diagnostic testing network to schedule radiology and diagnostic imaging centers and at a reduced cost for employees with work-related injuries. This enables the physician to provide accurate and timely diagnosis for quality medical care and treatment which often result in an expedited return to work for the injured employee and offers the best chance for a successful recovery from the work related injury.

The DHS Working Capital Fund funds Department-wide and government-wide activities such as National Finance Center Payroll Services and Reporting, DHS Executive Leadership Development, and National Defense University Training.

Leadership and Career Programs: \$8.6 million

These programs cover the training and development of HQ and field staff. TWE works closely with TSA leadership to develop and administer programs to prepare for future leadership needs and fulfill the succession planning mandated by the Office of Personnel Management (OPM) and DHS. The program will identify the most critical current and future senior leadership requirements, prepare a pipeline of talented and motivated leaders at all levels, and identify the best external sources of recruitment when internal sources are insufficient to meet critical needs.

Succession Planning provides the opportunity for current leaders to make an investment in the development of future leaders and in the long-term success of TSA. The program has launched four leadership programs targeting different pools of applicants for critical positions. The DHS Senior Executive Service Candidate Development Program is a formal program operating under OPM and DHS rules to develop candidates to executive positions. The Senior Leadership Development Program strengthens leadership and technical competencies of senior leaders in TSA. The Mid-Level Leadership Development Program builds TSA leadership strength at the mid-career level and helps retain experienced employees with strong leadership skills. The TSA Resident Program is a formal career development program designed to attract exceptional candidates with diverse backgrounds into targeted entry-level positions.

The professional development program provides mission-related training that is beneficial for an employee either in his/her current position or for professional development that will increase the employee's ability to contribute to TSA's mission in another capacity. Enhanced career development through rotations and developmental assignments, along with certificate programs, are intended to increase employees' proficiency in writing and other key competencies needed to support TSA's mission. The TSA Mentoring Programs will also contribute to the overall TSA mission as well as employees' professional and personal development through the transfer of knowledge and the sharing of networks that will build a strong community of leaders.

TSA leadership training programs provide competency-based training programs for team leaders, supervisors and managers. The programs fulfill leadership training requirements defined by OPM, the DHS Leader Development program, and TSA. Estimated projections for FY 2015/2016 are that approximately 2,000 seats will be offered in leadership training programs, both on-line and in a classroom setting.

MAJOR ACQUISITIONS:

N/A

**Department of Homeland Security
Transportation Security Administration
Information Technology
Program Performance Justification**
(Dollars in Thousands)

PPA: Information Technology

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	320	282	\$441,000
FY 2015 President's Budget	321	303	\$451,920
2016 Adjustments-to-Base	(1)	(1)	(\$2,106)
FY 2016 Current Services	320	302	\$449,814
FY 2016 Program Change	-	-	\$2,571
FY 2016 Total Request	320	302	\$452,385
Total Change 2015 to 2016	(1)	(1)	\$465

The FY 2016 Budget includes 320 positions, 302 FTE, and \$452.4 million for the Information Technology PPA.

Adjustments-to-Base:

- Increase of \$117,000 for annualization of the 2015 pay raise
- Increase of \$464,000 for the 2016 pay raise
- Increase of \$322,000 for reprogramming from the Human Capital PPA for HRAccess contact conversion
- Increase of \$156,000 for retirement contributions
- Decrease of \$29,000 as part of total In-line system savings of \$9 million
- Decrease of 1 FTP/1 FTE and \$176,000 for a transfer to the Aviation Security Appropriation for realignment
- Decrease of \$2.421 million for efficiencies from Manual Continuous Monitoring
- Decrease of \$130,000 for transfer to Aviation Security for the Screening Partnership Program new airports
- Decrease of \$409,000 for transfer of Data Center overhead costs to DHS

Program Changes:

- Increase of \$2.888 million for Internal Cybersecurity Remediation
- Increase of \$5,000 for the TSA Academy Instructors
- Decrease of \$305,000 to leverage efficiencies from Risk Based Security – Screener Workforce
- Decrease of \$4,000 to leverage efficiencies from Risk Based Security – Transportation Security Specialists Explosives
- Decrease of \$13,000 to leverage efficiencies from Risk Based Security – Transportation Security Inspectors

CURRENT SERVICES PROGRAM DESCRIPTION:

The following table provides the components of this PPA:

Information Technology PPA
(\$ in millions)

	FY 2015	FY 2016
Core Information Technology Program	\$389.3	\$385.9
Financial Management Systems	\$17.7	\$17.7
Working Capital Fund (WCF)	\$44.9	\$48.8
TOTAL	\$451.9	\$452.4

Core IT Program: \$385.9 million

A total of \$385.9 million and 320 positions/302 FTE supports the core IT and telecommunications infrastructure for all TSA enterprise-wide IT services that assist in accomplishing TSA’s mission. The core enterprise IT infrastructure supports the technology assets of HQ, field locations, and TSA Freedom Center personnel. The personnel equipment requires a large wide area network to support the information needs of the TSA user base. Resources are allocated for ongoing operations and maintenance for the TSA data centers, operation centers and failover resources. Support includes:

- National Help Desk support, which includes software, licensing and software distribution support;
- Headquarters and field IT support;
- Applications systems purchase and support;
- Operating platform management;
- Database management;
- System performance monitoring;
- Configuration management;
- Federal Air Marshal Service (FAMS) mission scheduling capabilities;
- FAMS communications and information systems;
- Security Incident Response;
- IT equipment maintenance and legacy systems support;
- Wireless infrastructure support and maintenance; and
- Technical architecture compliance and enterprise architecture-related support.

The growing needs of the TSA user base require TSA to continually enhance secure communications to stakeholders and help desk capability. TSA’s cyber security efforts involve the continued modernization of secure communication units as well as infrastructure protection, which includes but is not limited to:

- Firewalls;
- Intrusion detection and prevention;
- Antivirus;
- Content monitoring; and
- Managed Security Services.

The FY 2016 Budget supports TSA compliance efforts related to HSPD-12: *Policy for a Common Identification Standard for Federal Employees and Contractors* and Office of Management and Budget Memorandum M-11-11 *Continued Implementation of HSPD-12 - Policy for a Common Identification Standard for Federal Employees and Contractors*. FY 2016 funding will enable implementation of the Personal Identity Verification (PIV) Logical Access Control System and the integration of TSA applications with PIV authentication across the enterprise. The PIV Application Integration effort will address multiple systems requiring significant modifications to use PIV authentication and to sustain the program in the out-years. The following chart depicts the HSPD-12 project implementation schedule of costs funded by the IT PPA:

HSPD-12 Project Schedule

(\$ in millions)

Project Phase	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019
Phase 1 -PIV Full Operational Capability	\$4.7	\$4.7	\$4.7	\$4.7	\$4.7
Phase 2 - Oracle Identity Manager Implementation	\$5.2	\$1.3	\$1.3	\$1.3	\$1.3
Phase 3 - Oracle Access Management Implementation		\$4.6	\$0.8	\$0.8	\$0.8
TOTAL COST	\$9.9	\$10.6	\$6.8	\$6.8	\$6.8

The FY 2016 Budget also supports TSA’s contribution to the DHS enterprise-wide effort to continue closing cybersecurity gaps as highlighted in the *Blueprint for a Secure Cyber Future*, including the protection of DHS networks and information. In FYs 2016-2017, TSA will focus on remediating all critical internal network security vulnerabilities associated with Mission Essential Systems, DHS Chief Financial Officer Designated Systems, and systems rated high-risk by Federal Information Processing Standards. FY 2016 funding also supports the remediation of all remaining internal network system vulnerabilities, leading to full system remediation across the agency.

In addition, TSA will focus on innovative investments to support policy initiatives such as commodity IT consolidation, cloud computing, and digital government. These initiatives will help to increase collaboration and connectivity across the organization. Licensing arrangements across TSA and DHS will be leveraged to maximize buying power, deliver next generation technology capabilities for greater enterprise adoption and provide for enhanced wireless connectivity. Funds will also be used for the initial planning, design, prototype capability and initial operational capability for TSA cloud storage. Establishing a storage cloud environment will support a common repository of data that can be used by TSA and will lead to comprehensive business continuity and protection against data loss across the agency. Backup solutions that span multiple types of devices (from servers to personal computers to mobile devices) will provide mission continuity and reduce, if not eliminate, redundancies in data storage requirements.

Financial Management Systems: \$17.7 million

Funds are for Interagency Agreements with the United States Coast Guard for the use of their financial management system. To address the numerous outdated, legacy financial management systems at many of its Components, DHS has initiated a Department-wide Financial Systems Modernization initiative. DHS must invest in modernizing Component financial management systems in order to improve financial accountability and financial reporting, and enable business process standardization.

In FY 2016, TSA requires funding to migrate to a shared service provider for financial, acquisition, and asset management solution services, with migration to be completed in FY 2017. Additional funds are included in the DHS Office of the Chief Financial Officer FY 2016 Budget to facilitate the migration.

Working Capital Fund (WCF): \$48.8 million

Funds are for activities managed by the DHS WCF which include: e-Training, National Finance Center Payroll Services, Human Capital Business Systems, Capital Planning and Investment Control, DHS Infrastructure Transformation Program, Software Enterprise Licenses and Financial Statement Audit, and Government-wide IT-related activities.

MAJOR ACQUISITIONS:

Information Technology Infrastructure Program

The purpose of the IT Infrastructure Program (ITIP) is to provide comprehensive IT support for TSA. The IT Infrastructure is defined as all of the elements employed in the delivery of IT services to users, including the computing, network and telecommunications hardware, software, database management, operating systems software, middleware, help desk, Operations Centers, documentation and video, that is required to protect the Nation’s transportation systems while ensuring the freedom of movement for people and commerce. This investment focuses on the Domain of IT Services in support of a government agency. This investment addresses equipment and service needs across various government locations to technically support and expand the IT capabilities of the agency's workforce both within and outside the continental United States.

The ITIP investment is funded from the Information Technology PPA in FY 2016.

Activity Funding

(\$ in Thousands)

FY 2014 Revised Enacted	FY 2015 President’s Budget	FY 2016 Budget
\$320,515	\$372,071	\$368,664

FY 2016 Funding Breakout

(\$ in Thousands)

Program Area	Sub-Program	Mission Need
Maintenance - \$368,664	ITIP	Funds operation costs for ITIP, which provides comprehensive technical infrastructure support for TSA HQ, FAMs, and field locations. This investment addresses IT equipment and service needs across various government and industry contracts attempting to technically support and expand the IT capabilities of the agency's workforce

FAMS Mission and Scheduling Notification System

The FAMS Mission and Scheduling Notification System (MSNS) is an automated system that: determines allocation of Federal Air Marshals (FAMS) to flights, based on risk management strategy; coordinates and communicates mission assignments with Field Offices and FAMS; reserves airline seating and hotels with airlines and hotels; and tracks execution and support operational modifications. By using MSNS fewer employees are needed to conduct mission scheduling more efficiently. This provides better security and causes less disruption to the airline industry. The primary beneficiary for MSNS is the FAMS. MSNS currently supports all aspects of the mission need. Specific features include: 24x7x365 support for all aspects of capability, industry-leading planning and manpower allocation processes and software, process more than 45,000 airline seat tickets per month, including reservations, changes, cancellations, and more than 100 specific reports on all aspects of mission execution.

The FAMS MSNS investment is funded from the Information Technology PPA in FY 2016. The program was previously funded from the FAMS Appropriation and realigned to the Support Appropriation in FY 2014.

Activity Funding

(\$ in Thousands)

FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Budget
\$13,559	\$13,578	\$13,597

FY 2016 Funding Breakout

(\$ in Thousands)

Program Area	Sub-Program	Mission Need
Maintenance - \$13,597	FAMS MSNS	Funds operation costs for MSNS to schedule and deploy FAMS to meet the FAMS mission mandates and provide continued operation of the core capability and incorporation of normal technology refresh and enhancements.

IV. Program Justification Changes

**Department of Homeland Security
Transportation Security Support:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: High Risk Internal Cybersecurity Remediation
PPA: Information Technology
Program Increase: Positions 0, FTE 0, Dollars \$2,888

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							320	302	\$449,814
Program Increase							0	0	\$2,888
Total Request	320	282	\$441,000	321	303	\$451,920	320	302	\$452,702

Description of Item:

DHS recognizes that in order to be a leader in cybersecurity, it must be a best-in-class implementer of cybersecurity. In order to act on this intent, the Department is requesting resources to help remediate known vulnerabilities in the most high-risk systems. In forming its FY 2016-2020 program and its FY 2016 Budget, the Department examined the set of vulnerabilities across all Components' IT systems and classified them based on their essentialness to mission, as well as the risk to the public and the Department's employees should the system be breached and sensitive information revealed. While progress has already been made, TSA's FY 2016 Budget of \$2.888 million reflects the Department's goal to fix all known vulnerabilities by FY 2017.

Justification:

Each of these high-risk vulnerabilities is related to an individual system owned by a Component. The Department endeavored to adopt enterprise solutions where feasible to remediate similar or identical vulnerabilities identified in multiple Component systems. For example, the implementation of a robust Department-wide identity, credential, and access management program will remediate system access control-oriented vulnerabilities identified in multiple Component systems, thus creating efficiencies. In many cases, however, the corrective action or fix must be directly applied to the individual system, hence the request in each component's budget as a part of the overall plan. The Department will institute a process to track performance towards closing these vulnerabilities starting in FY 2015, in order to demonstrate progress and assure that any issues are quickly addressed.

Impact on Performance (Relationship of Increase to Strategic Goals):

The proposed increase will provide TSA the capability to enhance critical network infrastructure protection in support of DHS Mission 4: Safeguarding and Securing Cyberspace.

**Department of Homeland Security
Transportation Security Support:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 2: Restoration of assumed RBS Efficiencies - TSA Academy
PPA: Headquarters Administration, Information Technology
Program Increase: Positions 0, FTE 0, Dollars \$8

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							1,617	1,500	\$726,976
Program Increase							0	0	\$8
Total Request	1,626	1,344	\$713,250	1,622	1,505	\$727,811	1,617	1,500	\$726,984

Description of Item:

The FY 2016 Budget includes an increase of 31 FTP/31 FTE and \$2.5 million for the restoration of assumed RBS efficiencies for the TSA Academy. This includes an increase of 31 FTP/31 FTE and \$2.5 million in the Aviation Security appropriation and \$8,000 in the Transportation Security Support Appropriation, \$3,000 is from the HQ Administration and \$5,000 is from IT.

Justification:

In support of TSA's efforts towards professionalization of the officer workforce, TSA is requesting an additional \$2.5 Million and 31 FTP for TSA Academy operations to expand its Academy deliveries of mission essential training. Since the Academy operations were established at FLTEC in Glynco, GA in April of 2012, TSA has graduated approximately 7,000 of its 45,000+ employees. Through the training provided thus far, TSA has been able to see a marked improvement in the attitude of the portion of the workforce who have completed training at the Academy and their support of the overall mission of TSA. The funds requested in the Transportation Security Support Appropriation are for background investigations, payroll services and IT equipment.

Impact on Performance:

The proposed increase will provide TSA the capability to enhance the delivery of mission essential training and professional development of the officer workforce.

**Department of Homeland Security
Transportation Security Support:
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 1: RBS Efficiencies - Screener Workforce
PPA: Headquarters Administration, Information Technology
Program Decrease: Positions 0, FTE 0, Dollars \$(457)

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							1,617	1,500	\$726,976
Program Decrease							0	0	(\$457)
Total Request	1,626	1,344	\$713,250	1,622	1,505	\$727,811	1,617	1,500	\$726,519

Description of Item:

The FY 2016 Budget includes a reduction of \$110.5 million for leveraging screener workforce efficiencies from expedited screening through Risk-Based Security (RBS). This includes a reduction of 1,666 positions, 1,666 FTE and \$110.0 million in the Aviation Security appropriation and \$457,000 in the Transportation Security Support appropriation. Of the \$457,000 decrease to the Transportation Security Support appropriation, \$152,000 is from the HQ Administration and \$305,000 is from IT.

Since its inception, TSA has significantly reduced terrorist threats through a multi-layered approach to security. TSA continues to undertake efforts to test newer security protocols to improve the passenger experience at aviation security checkpoints by applying risk-based, intelligence-driven screening procedures and enhancing its use of technology.

The vision of expedited screening is to increase overall aviation system security by focusing on high-risk and unknown passengers while expediting known or trusted travelers. In an effort to continuously improve aviation transportation security, TSA undertakes new initiatives to best align passenger screening resources based on risk assessments.

These efficiencies will also result in a decrease to those programs that support screening operations.

Justification:

Due to the reduction in the Screener Workforce from RBS initiatives, TSA expects a corresponding reduction in support programs including background investigation, professional development, drug testing, financial management, health and safety, and IT programs.

Impact on Performance (Relationship of Increase to Strategic Goals):

The proposed reduction will not have an impact on the services provided by the support programs.

**Department of Homeland Security
Transportation Security Support:
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 2: RBS Efficiencies - Transportation Security Specialist - Explosives
PPA: Headquarters Administration, Information Technology
Program Decrease: Positions 0, FTE 0, Dollars \$(23)

Funding Profile

Description of Item:

The FY 2016 Budget includes a reduction of \$2.04 million for leveraging Transportation Security Specialists – Explosives efficiencies through RBS initiatives. This includes a reduction of 19 positions, 18 FTE and \$2.02 million in the Aviation Security appropriation and \$23,000 in the Transportation Security Support appropriation. Of the \$23,000 decrease to the Transportation Security \$19,000 is from the HQ Administration and \$4,000 is from IT.

Since its inception, TSA has significantly reduced terrorist threats through a multi-layered approach to security. TSA continues to undertake efforts to test newer security protocols to improve the passenger experience at aviation security checkpoints by applying risk-based, intelligence-driven screening procedures and enhancing its use of technology.

The vision of expedited screening is to increase overall aviation system security by focusing on high-risk and unknown passengers while expediting known or trusted travelers. In an effort to continuously improve aviation transportation security, TSA undertakes new initiatives to best align passenger screening resources based on risk assessments.

These efficiencies will also result in a decrease to those programs that support screening operations.

Justification:

Due to the reduction in the Screener Workforce from RBS initiatives, TSA expects a corresponding reduction in support programs including background investigation, professional development, drug testing, financial management, health and safety, and IT programs.

Impact on Performance (Relationship of Increase to Strategic Goals):

The proposed reduction will not have an impact on the services provided by the support programs |

Description of Item:

The FY 2016 Budget includes a reduction of \$6.5 million for leveraging Transportation Security Inspectors efficiencies from RBS initiatives. This includes a decrease of \$5.2 million in the Aviation Security Appropriation, \$1.2 million reduction in the Surface Transportation Security Appropriation, and \$77,000 reduction in Transportation Security Support Appropriations. Of the \$77,000 decrease to the Transportation Security appropriation \$64,000 is from HQ Administration, and \$13,000 is from IT.

This reduction is across the three different modes of Aviation Regulation, Cargo Inspections and Surface and Rail Inspections. Since its inception, TSA has significantly reduced terrorist threats through a multi-layered approach to security. TSA continues to undertake efforts to test newer security protocols to improve the passenger experience at aviation security checkpoints by applying risk-based, intelligence-driven screening procedures and enhancing its use of technology.

The vision of RBS is to increase overall aviation system security by focusing on high-risk and unknown passengers while expediting known or trusted travelers. In an effort to continuously improve aviation transportation security, TSA undertakes new initiatives to best align passenger screening resources based on risk assessments.

These efficiencies will also result in a decrease to those programs that support screening operations.

Justification:

Due to the reduction in the Screener Workforce from RBS initiatives, TSA expects a corresponding reduction in support programs including background investigation, professional development, drug testing, financial management, health and safety, and IT programs.

Impact on Performance (Relationship of Increase to Strategic Goals):

The proposed reduction will not have an impact on the services provided by the support programs.]

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Transportation Security Administration related to transportation security support pursuant to the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat. 597; 49 U.S.C. 40101 note), [\$932,026,000] \$931,479,000¹, to remain available until September 30, [2016] 2017²

Language Provision	Explanation
¹ ...[\$932,026,000] <u>\$931,479,000</u> ...	Dollar change only. No substantial change proposed.
² ...[2016] <u>2017</u> ...	Fiscal year change only. No substantial change proposed.

Headquarters Administration Mission Statement

TSA Headquarters Administration include such critical functions as Assistant Secretary and Deputy Assistant Secretary, Chief of Staff, Policy Coordination and Intergovernmental Affairs, Professional Responsibility, Inspection, Chief Counsel, Chief Financial Officer, Chief Administrative Officer, Legislative Affairs, Acquisition, Civil Rights and Liberties, Ombudsman, and Traveler Engagement, Training and Workforce Engagement, and Strategic Communications and Public Affairs.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$123,571	\$125,874	\$127,343	\$1,469
11.3 Other than Full-Time Permanent	\$2,169	\$2,210	\$2,224	\$14
11.5 Other Personnel Compensation	\$6,522	\$6,644	\$6,686	\$42
12.1 Civilian Personnel Benefits	\$37,380	\$38,077	\$38,606	\$529
Total, Salaries & Benefits	\$169,642	\$172,805	\$174,859	\$2,054

Salaries and Benefits represent costs for 1,198 FTE. The FY 2016 request reflects a net increase for 2016 Pay COLA and retirement contributions

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$4,863	\$4,885	\$4,835	(\$50)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
22.0 Transportation of Things	\$251	\$252	\$249	(\$3)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$1,542	\$1,549	\$1,533	(\$16)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.2 Rental Payments to Others	\$21,601	\$21,702	\$21,482	(\$220)

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$336	\$338	\$335	(\$3)

Communications, utilities, and miscellaneous charges includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
24.0 Printing and Reproduction	\$128	\$128	\$127	(\$1)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$10,113	\$10,160	\$10,057	(\$103)

Advisory and assistance services includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$40,621	\$40,817	\$40,433	(\$384)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included under this object class are contracts for security support, EEO support, and corporate training.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$12,985	\$13,046	\$12,914	(\$132)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.4 Operation and Maintenance of Facilities	\$5,244	\$5,268	\$5,215	(\$53)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$770	\$773	\$765	(\$8)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$1,475	\$1,482	\$1,467	(\$15)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$1,535	\$1,542	\$1,526	(\$16)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
32.0 Land and Structures	\$1,101	\$1,101	\$1,090	(\$11)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease.

Human Capital Services Mission Statement

Human Capital Services include all the activities that support the recruitment, assessment, servicing, and payroll of TSA's Transportation Security Officers and other workforce at headquarters, field locations, and airports, and personnel policies, programs and systems and training and development activities.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$23,516	\$23,711	\$30,398	\$6,687
11.3 Other than Full-Time Permanent	\$464	\$472	\$605	\$133
11.5 Other Personnel Compensation	\$588	\$788	\$1,010	\$222
12.1 Civilian Personnel Benefits	\$6,040	\$6,139	\$7,870	\$1,731
13.0 Benefits for Former Personnel	\$6,806	\$6,918	\$8,868	\$1,950
Total, Salaries & Benefits	\$37,414	\$38,028	\$48,751	\$10,723

Salaries and Benefits represent costs for 326 FTE. The FY 2016 request reflects a net increase due to a contractor conversion and for 2016 Pay COLA and retirement contributions.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$2,216	\$2,209	\$2,040	(\$169)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
22.0 Transportation of Things	\$51	\$51	\$46	(\$5)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.2 Rental Payments to Others	\$262	\$261	\$241	(\$20)

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$12	\$12	\$11	(\$1)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
24.0 Printing and Reproduction	\$51	\$51	\$47	(\$4)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$97,402	\$97,076	\$89,615	(\$7,461)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal government. The FY 2016 request reflects a decrease in travel due to efficiencies.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$46,455	\$46,209	\$42,658	(\$3,551)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included under this object class are contracts for security support, EEO support, and corporate training.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$19,990	\$19,923	\$18,391	(\$1,532)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.6 Medical Care	\$11	\$11	\$10	(\$1)

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$226	\$225	\$207	(\$18)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, or (c) used to form a minor part of equipment or property.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$160	\$159	\$147	(\$12)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

Information Technology Mission Statement

Information Technology provides and maintains the IT network and infrastructure services and support for all of TSA. TSA will continue to enhance the effectiveness of its entire workforce through its IT core support.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$35,731	\$36,392	\$36,802	\$410
11.5 Other Personnel Compensation	\$1,585	\$1,689	\$1,718	\$29
12.1 Civilian Personnel Benefits	\$9,497	\$9,552	\$9,708	\$156
Total, Salaries & Benefits	\$46,813	\$47,633	\$48,228	\$595

Salaries and Benefits represent costs for 302 FTE. The FY 2016 request reflects a net increase for 2016 Pay COLA and the annualization of the 2015 pay increase.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$1,025	\$1,030	\$1,031	\$1

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$45,880	\$45,879	\$45,880	\$1

Communications, utilities, and miscellaneous charges includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$200,064	\$210,401	\$210,249	(\$152)

Advisory and assistance services includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2016 request reflects a net decrease in advisory and assistance services to account for increases in internal cybersecurity remediation efforts and realigned support costs due to a contract conversion for HR Access/Personnel Futures, and reductions taken for Continuous network monitoring costs, leveraging Risk Based Security (RBS) efficiencies, and costs transferred to DHS for Data Center overhead.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$20,650	\$20,659	\$20,662	\$3

Other services includes contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$67,394	\$67,425	\$67,427	\$2

Purchases from Government Accounts includes costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.4 Operation and Maintenance of Facilities	\$348	\$363	\$364	\$1

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$26,035	\$25,984	\$25,989	\$5

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal Government account.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$574	\$359	\$360	\$1

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. Some software purchases and computer supplies are included in this object class.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$31,841	\$31,806	\$31,814	\$8

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

K. DHS Balanced Workforce Strategy

In order to establish a high performing workforce comprised of a strong internal core of Federal employees supported by the expertise of private contractors, the Department created the DHS Balanced Workforce Strategy. DHS is committed to establishing the appropriate mix of in-house and contract skills, experience and other resources necessary to balance the total DHS workforce. Pursuant to Section 736 of Division D of the Omnibus Appropriations Act, 2009 (P.L. 111-8) the Department is required to issue guidelines to DHS Components to facilitate consistent and sound application of this statutory requirement.

Through the DHS Balanced Workforce Strategy, the Department will ensure that only Federal employees perform work that is inherently governmental or otherwise needs to be reserved to the public sector to maintain control of and sustain agency operations, and obtains contract services when it is appropriate and cost-effective. After a workforce planning assessment the Department will realign contractor and/or Federal positions as necessary to achieve a balanced workforce. Assessing the workforce also allows managers to understand how contract employees are deployed throughout their organization and integrated with federal employees to better realize the full potential of our total workforce -- both contracted and Federal. A strong internal core of federal employees will build in-house capacity and institutional knowledge that is essential for effective government performance.

Along with the statutory requirement to issue guidance to DHS components, Section 736 requires the Department to review all existing contracts in order to identify any functions currently being performed that should be reserved for Federal employees. As the Department has a large magnitude of contracts, all contracts have been prioritized based on risk into Tiered ranking.

The FY 2016 Budget includes 85 FTP and 82 FTE for TSA's portion of the FY 2016 DHS Balanced Workforce Strategy.

Position Type	FY 2014 Enacted		FY 2015 President's Budget		FY 2016 Annualization		FY 2016 Follow On		FY 2016 Increase		Total FY 2015 – FY 2016 DHS Balance Workforce Strategy

FY 2016 DHS Balanced Workforce Strategy

Not Applicable

Annualization of FY 2015 Base DHS Balanced Workforce Strategy

Not Applicable

DHS Balanced Workforce Strategy Follow-On

The FY 2016 DHS Balanced Workforce includes 85 FTP, 82 FTE and \$0 for various Aviation programs:

- TSA does not have plans for the conversion of contracts in FY 2017.
- TSA does not need funds for Annualization of FY 2015 DHS Balanced Workforce.
- The FY 2016 Budget does reflect additional 85 FTP/82 FTE that resulted from contract conversions completed in FY 2014. These positions were annualized in the FY 2015 base, and full costs were included in the FY 2015 current services.

BUDGET REQUEST AND SUPPORTING INFORMATION

Transportation Security Administration Federal Air Marshals

I. Appropriation Overview

A. Mission Statement for Federal Air Marshal Service:

The Federal Air Marshal Service (FAMS) promotes public confidence in our Nation's civil transportation systems through the effective risk-based strategic deployment of Federal Air Marshals (FAMs) in both air and land based mission-related assignments. The organization's primary focus is to detect, deter, and defeat terrorist or other criminal hostile acts targeting U.S. air carriers, airports, passengers, and crew.

B. Budget Activities:

Management and Administration

The FAMS mission demands a host of critical planning, operational, and support programs to protect the public from the threat of a terrorist attack or other criminal activity. The FAMS Management and Administration programs encompass vital enforcement, information management, and infrastructure components necessary to support core operations. Examples include FAMS participation in Joint Terrorism Task Force activities, management and implementation of a sophisticated flight/mission scheduling and notification system, and performance of mission critical workforce management, command and control, information technology, logistics, and related services.

Travel and Training

In order to maintain optimum readiness and to perform its primary operational functions, the FAMS requires extensive training and mission travel capabilities. FAMs must undergo continuous training to maintain and expand their expertise in the full-range of skills necessary to operate within the transportation domain, to include specialized tactics, enforcement, surveillance detection, marksmanship, and other skill sets. Furthermore, this Program, Project, or Activity (PPA) funds FAMS mission travel, which is an integral component of the international and domestic flight coverage activities that are core to the FAMS mission.

C. Budget Request Summary:

The President's FY 2015 Budget realigns the FAMS appropriation into a single PPA within the Transportation Security Administration (TSA) Aviation Security appropriation and also realigns funding from the FAMS appropriation into TSA's Surface Transportation Security appropriation for the Visible Intermodal Prevention and Response (VIPR) Program. Historically, the VIPR Program has received funding in three appropriations: the FAMS, Aviation Security, and Surface Transportation. The consolidation of funding will increase transparency on analysis and reporting, and will result in more efficient management of business processes. The FY 2016 Budget sustains these realignments.

D: Efficiencies:

N/A

Management and Administration Mission Statement

The Management and Administration (M&A) PPA funds the FAMS' staffing/payroll requirements, which include: salary/compensation, benefits, awards, overtime, etc. In addition, M&A funds critical administrative and operational requirements including the FAMS' mission scheduling system and information technology requirements, rent, wireless communications systems; recruitment/hiring and retention services (background investigations, security clearances, medical exams/physicals, drug tests); and a host of program support services and requirements (interagency agreements, vehicle leasing, shipment of goods,

utilities/communications, janitorial services, supplies, duty equipment, printing, physical security, etc.)

Travel and Training Mission Statement

The Travel and Training (T&T) PPA is used to cover all travel and training requirements that support the FAMS program. The travel portion of the PPA supports the FAMS requirements for mission travel (per diem and lodging) and associated costs, such as airport parking and automated travel account services. Mission travel resources are essential to the FAMS ability to perform scheduled flight coverage on both domestic and international operations and provide the FAMS the necessary mobility and flexibility to perform their enforcement and counterterrorism missions. T&T funds also support other FAMS travel required for

non-mission and training purposes. T&T also supports the FAMS comprehensive training requirements to include TP I (Basic Law Enforcement Training) and TP II (FAMS specific training) for new Federal Air Marshals and all recurrent field training. This PPA provides funding for all associated training requirements, such as Federal Law Enforcement Training Center (FLETC) costs, training-related ammunition, TP II instructor contracts, hotel lodging contracts for Atlantic City classes, training supplies, firing range fees, professional and training gear, equipment and clothing. The T&T PPA also supports the required professional training for other professional development and career training as required.

A. Component Overview

The Transportation Security Administration (TSA) is comprised of the following mission-oriented programs that support achievement of the DHS strategic missions, goals, and objectives.

Intermodal Screening Operations: Intermodal Screening Operations focuses its resources to improve passenger experience at security checkpoints by applying new intelligence-driven, risk-based screening procedures and enhancing use of technology. By placing more emphasis on pre-screening individuals and optimizing screening processes and the use of technology, TSA can focus its efforts on passengers who are more likely to pose a risk to transportation, enhancing the travel experience for known and trusted travelers going through expedited screening. TSA also supports the installation of electronic baggage screening equipment in our Nation's airports to ensure 100% screening of checked baggage, including Explosives Trace Detection devices and Explosive Detection System equipment. Other activities captured in this program area are air cargo screening, federal and proprietary canine deployments, and vetting airline passengers and transportation employees.

Intermodal Assessments and Enforcement: Intermodal Assessments and Enforcement encompasses TSA's security reviews, assessment, and enforcement activities in the various modes of transportation. Activities captured in this program area include: Intelligence and Analysis, Visible Intermodal Prevention and Response teams, domestic and international inspectors, and reviews and assessments.

In Flight Security: In-Flight Security encompasses TSA's in-flight security activities in the aviation domain. Activities captured in this program area includes: Federal Air Marshals' international and domestic flight coverage, deputizing airline pilots, and training crew members in self-defense.

Management and Administration: This program captures activities that provide enterprise leadership, management and/or business administration services and describes the capabilities and activities that support the day-to-day management and back office functions enabling the Department to operate efficiently and effectively. Key capabilities include conducting agency planning and performance management, managing finances, managing agency workforce, providing physical and personnel security, acquiring goods and services, managing information technology, managing agency property and assets, managing agency communications, managing legal affairs, and providing general management and administration.

FY 2016 Budget Request

The table below shows TSA’s FY 2016 Budget request by its mission-oriented programs.

Program	FY 2016 Request	
	FTE	Dollars (in thousands)
Intermodal Screening Operations	46,161	5,083,944
Intermodal Assessments and Enforcement	2,781	490,361
In Flight Security	45	850,437
Management and Administration	1,823	922,182
Total Budget Request (mandatory and discretionary)	50,810	7,346,924

B. Component Contributions to Achieving Departmental Missions

The table below shows the alignment of the TSA programs to the DHS Missions and Mature and Strengthen Homeland Security.

Programs	DHS Missions					Mature and Strengthen Homeland Security
	Prevent Terrorism and Enhance Security	Secure and Manage Our Borders	Enforce and Administer Our Immigration Laws	Safeguard and Secure Cyberspace	Strengthen National Preparedness and Resilience	
Intermodal Screening Operations	100%					
Intermodal Assessments and Enforcement	84%	16%				
In Flight Security	100%					
Management and Administration	64%					36%

Mission 1: Prevent Terrorism and Enhance Security

Resources Requested

TSA resources supporting *Prevent Terrorism and Enhance Security* are provided in the table below.

\$ in thousands

Program	FY 2014		FY 2015		FY 2016	
	\$	FTE	\$	FTE	\$	FTE
Intermodal Screening Operations	\$ 5,183,705	47,993	\$ 5,052,909	47,899	\$ 5,083,944	46,161
Intermodal Assessments and Enforcement	\$ 410,421	2,413	\$ 417,984	2,583	\$413,097	2,495
In Flight Security	\$ 873,994	58	\$ 833,792	45	\$ 850,437	45
Management and Administration	\$ 539,365	340	\$ 588,996	408	\$ 587,273	442
Total	\$ 7,007,485	50,804	\$ 6,893,681	50,935	\$ 6,934,751	49,143

Performance Measures

For *Prevent Terrorism and Enhance Security*, two types of performance measures are presented. Strategic Measures represent TSA’s measures that gauge achievement for this mission area, and are considered to be our Government Performance and Results Act Modernization Act (GPRAMA) performance measures. Additional Management Measures are displayed, as appropriate, to provide a more thorough context of expected performance results.

Strategic Measures

Measure: Average number of days for DHS Traveler Redress Inquiry Program (TRIP) redress requests to be closed						
Description: This measure describes the average number of days for the processing of traveler redress requests, excluding the time DHS waits for the traveler to submit all required documents. DHS TRIP is a single point of contact for individuals who have inquiries or seek resolution regarding difficulties they experienced during their travel screening at transportation hubs or crossing U.S. borders. DHS TRIP is part of an effort by the Departments of State and Homeland Security to welcome legitimate travelers while securing our country from those who want to do us harm.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	<100	<97	<93	<78	<70	<60
Result:	99	93	52	62	N/A	N/A

Measure: Number of daily travelers eligible to receive expedited physical screening based on assessed low risk						
Description: This measure describes the average number of daily travelers eligible to receive expedited physical screening based on assessed low risk. This low risk is established by focusing on risk-based, intelligence-driven security procedures and enhancing use of technology. Increases in this measure will strengthen aviation security while enhancing the passenger experience.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	450,000	900,000	900,000
Result:	N/A	N/A	N/A	698,025	N/A	N/A

Measure: Percent of air cargo screened on commercial passenger flights originating from the United States and territories						
Description: This measure captures the percent of air cargo screened on commercial passenger flights originating from the United States and territories. Screening methods approved in the Certified Cargo Screening Program include: physical search (includes opening boxes, removing and opening all inner cartons), X-ray, explosives trace detection, explosives detection system, canine teams, and the use of other approved detection equipment. The air cargo screening strategy uses a multi-layered, risk-based approach to securing air cargo by permitting indirect air carriers, shippers, and other entities further up the supply chain to screen cargo closer to its point of origin through the Certified Cargo Screening Program and allow air carriers to accept pre-screened certified cargo.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	100%	100%	100%	100%	100%	100%
Result:	100%	100%	100%	100%	N/A	N/A

Measure: Percent of air carriers operating from domestic airports in compliance with leading security indicators						
Description: This measure identifies air carrier compliance for U.S. flagged aircraft operating domestically with leading security indicators. These critical indicators are derived from security laws, rules, regulations, and standards. A leading security indicator is a key indicator that may be predictive of the overall security posture of an air carrier. Identifying compliance with the key indicators assesses air carrier's vulnerabilities and is part of an overall risk reduction process. Measuring compliance with standards is a strong indicator of system security.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	100%	100%	100%	100%	100%	100%
Result:	99.2%	98.1%	98.0%	98.0%	N/A	N/A

Measure: Percent of domestic air enplanements vetted against the terrorist watch list through Secure Flight						
Description: The Secure Flight program compares domestic passenger information to the No Fly and Selectee List components of the Terrorist Screening Database (TSDB), which contains the Government's consolidated terrorist watch list, maintained by the Terrorist Screening Center. The No Fly and Selectee Lists are based on all the records in the TSDB, and represent the subset						

of names who meet the criteria of the No Fly and Selectee designations. Secure Flight will also match data against additional subsets of the TSDB as determined by Department and Agency leadership. This is a unified approach to watch list matching for covered passenger flights, to avoid unnecessary duplication of watch list matching efforts and resources and reduce the burden on aircraft operators.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	100%	100%	100%	100%	100%	100%
Result:	100%	100%	100%	100%	N/A	N/A

Measure: Percent of foreign airports that serve as last points of departure and air carriers involved in international operations to the United States advised of necessary actions to mitigate identified vulnerabilities in order to ensure compliance with critical security measures

Description: This index combines: (1) percent of foreign airports serving as Last Point of Departure to the U.S. notified of critical vulnerabilities and accompanying recommendations, and (2) percent of foreign air carriers operating flights from these foreign airports and U.S. air carriers operating from any foreign airport regardless of destination notified of violations of critical regulations and accompanying recommendations/follow-up action. TSA evaluates/documents security at foreign airports with service to U.S., airports from which U.S. air carriers operate, and other sites on a 5-point scale against critical International Civil Aviation Organization aviation and airport security standards. TSA assess compliance with these standards and provides feedback to the host governments for awareness and recommended follow-up action. Identifying and notifying air carriers of non-compliance with critical regulations mitigates air carrier vulnerabilities and reduces risk.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	100%	100%	100%	100%
Result:	N/A	N/A	100%	100%	N/A	N/A

Measure: Percent of inbound air cargo screened on international passenger flights originating from outside the United States and Territories

Description: This measure captures the amount of inbound air cargo screened from last point of departure countries on commercial passenger flights originating from outside the United States and Territories. Screening is defined as a physical examination or non-intrusive methods of assessing whether cargo poses a threat to transportation security. Methods of screening include x-ray systems, explosives detection systems, explosives trace detection, explosives detection canine teams certified by TSA, or a physical search together with manifest verification, or additional methods approved by the TSA Administrator, pursuant to Section 1602 of Public Law 110-53, Implementing Recommendations of the 9/11 Commission Act of 2007.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	85%	100%	100%	100%	100%
Result:	N/A	93.0%	99.5%	100%	N/A	N/A

Measure: Percent of international air enplanements vetted against the terrorist watch list through Secure Flight						
Description: The Secure Flight program compares international passenger information to the No Fly and Selectee List components of the Terrorist Screening Database (TSDB), which contains the Government's consolidated terrorist watch list, maintained by the Terrorist Screening Center. The No Fly and Selectee Lists are based on all the records in the TSDB, and represent the subset of names who meet the criteria of the No Fly and Selectee designations. Secure Flight will also match data against additional subsets of the TSDB as determined by Department and Agency leadership. This is a unified approach to watch list matching for covered passenger flights, to avoid unnecessary duplication of watch list matching efforts and resources and reduce the burden on aircraft operators.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	100%	100%	100%	100%	100%	100%
Result:	100%	100%	100%	100%	N/A	N/A

Measure: Percent of overall compliance of domestic airports with established aviation security indicators						
Description: This measure provides the percent of domestic airports assessed that comply with established security standards and practices related to aviation security. Security indicators are key indicators that may be predictive of the overall security posture of an airport. Identifying compliance with the key indicators assesses airport vulnerabilities and is part of an overall risk reduction process. Measuring compliance with standards is a strong indicator of system security.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	100%	100%	100%	100%	100%	100%
Result:	95.9%	95.0%	94.4%	94.0%	N/A	N/A

Measure: Percent of overall level of implementation of industry agreed upon Security and Emergency Management action items by mass transit and passenger rail agencies						
Description: This measure provides the rate of implementation by mass transit, light and passenger rail, bus, and other commuter transportation agencies with established security standards and practices related to six critical Security Action Items (SAIs). These six SAIs are key indicators of the overall security posture of a mass transit and passenger rail transportation system. Measuring implementation of these six SAIs assesses transit vulnerabilities and is part of an overall risk reduction process.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	40%	75%	75%	77%	82%	86%
Result:	28%	39%	69%	78%	N/A	N/A

Management Measures

Measure: Average number of international inspections conducted annually per inspector						
Description: International compliance with security requirements is measured through number of airport assessments and air carrier inspections for all regions and offices performed by field and headquarters inspectors.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	14	15	16	17	19	19
Result:	34.4	26.8	20.3	19.0	N/A	N/A

Measure: Level of baggage security screening assessment results						
Description: This measure appraises the percent of the time Transportation Security Officers (TSOs) correctly detect threat items concealed in baggage using realistic and standardized assessment scenarios. This information is used to improve screening practices and procedures to reduce the probability of a successful terrorist or other criminal attack to the aviation transportation system. The actual results are Classified and are not releasable to the public at this time for security reasons.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016

Result:	Classified	Classified	Classified	Classified	N/A	N/A

Measure: Level of passenger security screening assessment results						
Description: This measure appraises the percent of the time TSOs correctly detect threat items concealed in baggage using realistic and standardized assessment scenarios. This information is used to improve screening practices and procedures to reduce the probability of a successful terrorist or other criminal attack to the aviation transportation system. The actual results are classified and are not releasable to the public at this time for security reasons.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	Classified	Classified	Classified	Classified	Classified	Classified
Result:	Classified	Classified	Classified	Classified	N/A	N/A

Measure: Number of annual Visible Intermodal Prevention and Response (VIPR) operations to deter potential terrorist actions and enhance security at surface and aviation transportation facilities						
Description: This measure captures the number of Visible Intermodal Prevention and Response (VIPR) team operations conducted within the United States and its territories in all transportation modes. VIPR operations are defined as the deployment of any combination of TSA assets (personnel and/or equipment) for the purpose of enhancing the security of any mode of transportation (aviation, mass transit, highway, maritime, freight rail, and pipeline) with any of TSA's security and law enforcement stakeholders which may include federal, state, or local authorities.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	4,200	7,850	12,600	14,400	14,800	14,000
Result:	6,492	8,868	15,260	16,849	N/A	N/A

Measure: Number of high risk pipeline systems on which security reviews were conducted						
Description: Pipeline Security Reviews assess and elevate the security posture of the pipeline energy transportation mode. Information and recommendations from pipeline corporate headquarters and field site reviews inform critical energy facility operators of issues to enhance security from terrorism and criminal activity. The onsite security reviews develop firsthand knowledge of security planning and execution of the critical pipeline systems, establish communication with key pipeline security personnel, and identify and share smart practices. As industry wide security gaps are identified through the process, the TSA Surface Division develops programs to address gaps throughout the pipeline industry. Each pipeline corporation is assessed/reassessed every 4-5 years.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	16	15	15	15	23	40
Result:	16	16	7	0	N/A	N/A

Measure: Percent of checked baggage screened with Explosive Detection Systems (EDS)						
Description: The measure tracks the percentage of checked baggage screened by Explosives Detection System (EDS) equipment, and provides an indicator of the deployment and utilization of stand-alone and in-line Next Generation (NextGen) EDS, which are installed at airports to detect threats concealed within checked baggage. Checked baggage that is not screened with EDS is alternatively screened with Explosives Trace Detection units in order to meet the 100% checked baggage screening requirement of the Aviation and Transportation Security Act of 2001 (P.L. 107-71).						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	94%	91%	90%	90%	90%	90%
Result:	90%	90%	90%	90%	N/A	N/A

Measure: Percent of countries with direct flights to the U.S. who are provided aviation security assistance						
Description: The measure reports the amount of interaction the United States has with countries providing Last-Point-of-Departure (LPD) service to the U.S. An LPD country is a country with at least one port providing direct traffic to a specific destination - usually a foreign airport with direct passenger and/or cargo flights to a U.S. destination airport. The U.S. interacts with countries providing LPD service with the goal to share aviation security policy and practices at either the national or airport level.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	100%	100%	100%	100%	100%	100%
Result:	100%	100%	100%	100%	N/A	N/A

Measure: Percent of Indirect Air Carriers found to be compliant with TSA standard security programs						
Description: This measure gauges the percent of Indirect Air Carriers that have at least one finding during inspection calculated against the total number of inspections conducted. An Indirect Air Carrier (IAC) is defined as any person, organization, or business within the United States national air system that does not possess a Federal Aviation Administration issued air						

carrier operation certificate, yet employs the services of licensed air carriers to move cargo from one destination to another. Air carriers leasing and selling space on their aircrafts provide these services to companies for the purpose of shipping items. Examples of an IAC could be a charter vendor, the postal service, or freight forwarder. Standard Security Programs provide detailed guidance to these regulated parties on how to implement regulatory requirements. Continuing education, outreach efforts, and targeting additional resources on IACs identified as noncompliant, will increase the rate of IACs in compliance.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	84%	86%	88%	90%	92%	94%
Result:	97.3%	88.7%	90.0%	89.0%	N/A	N/A

Measure: Percent of international flight crews, aviation workers, hazardous material drivers, transportation workers requiring unescorted access to secure areas of MTSA-regulated facilities and vessels, all mariners holding Coast Guard-issued credentials, and non-U.S. citizens receiving flight instruction at Federal Aviation Administration certified flight schools in the U.S. and abroad undergoing a Threat Assessment and Credentialing (TTAC) security threat assessment

Description: This measure indicates the percent of international flight crews, aviation workers, hazardous material drivers, transportation workers requiring unescorted access to secure areas of MTSA-regulated facilities and vessels, and all mariners holding Coast Guard-issued credentials, and non-U.S. citizens receiving flight instruction at Federal Aviation Administration certified flight schools in the U.S. and abroad receiving a Security Threat Assessment. Vetting is a process in which individuals are cleared as able to access the transportation system and are therefore not considered a threat. Thorough vetting will decrease vulnerabilities of sensitive transportation systems by limiting access of potentially dangerous individuals who are identified by TTAC vetting and credentialing programs.

BUDGET REQUEST AND SUPPORTING INFORMATION

United States Coast Guard Operating Expenses

I. Appropriation Overview

A. Mission Statement for Operating Expenses:

The Operating Expenses (OE) appropriation funds the Coast Guard's role as the principal Federal agency in the maritime domain providing for the safety, security, and stewardship of U.S. resources for the Nation.

B. Budget Activities:

The OE appropriation funds the annualization of prior-year funding, economic adjustments, and operating and maintenance funding for new and existing Coast Guard Programs, Projects and Activities (PPA). The OE request supports all 11 statutory Coast Guard missions and other Service activities in support of the Coast Guard's six DHS Programs and other National priorities.

C. Budget Request Summary:

The FY 2016 request for Coast Guard provides 47,990 positions, 47,812 FTE, and \$6,821,503,100.

The OE request includes a \$238.627 million increase to base funding for: the transfer of funds for the Working Capital Fund; annualization of prior year funding; the FY 2016 pay increase for military (1.3-percent) and civilian (1.3-percent) personnel; military allowances; and the operation, maintenance, and crewing of systems, vessels, aircraft and shore facilities delivered via the Coast Guard's acquisition programs (e.g., National Security Cutter (NSC), shore facilities, Response Boat-Medium (RB-M), Logistics Information Management System (LIMS), Fast Response Cutter (FRC), and C-27J Aircraft).

The FY 2016 Budget preserves the Coast Guard's operational readiness to continue to meet today's needs and challenges, while investing in long-term mission capability. The OE adjustments-to-base include decreases of \$173.841 million from: vessel decommissionings; fixed wing aircraft retirements; shore-side support personnel reductions commensurate with asset divestitures; efficiencies in our support structure; management and support efficiencies; the termination of one-time costs; and annualization of prior year management efficiencies.

The Department of Homeland Security strives to be a leader in cyber-security. To meet this goal, the Department is prioritizing base resources to address known vulnerabilities in all of its systems. Funds to remediate known cyber-security gaps are being funded from within Coast Guard's operating expenses base as part of the Department wide effort to increase awareness of cyber-security risks. In FY 2016, \$14.281 million in base funding is planned to address USCG's

cyber-security remediation effort with remediation of known vulnerabilities to be completed by 2018. Coast Guard requests no new funding for this initiative in FY 2016.

Base adjustment increases include:

- Annualization of FY 2015 Funding – \$54.959 million
- Mandatory Personnel Entitlements – \$80.840 million
- Operational Adjustments – \$6.821 million
- Operating and Maintenance funds for new assets, including follow-on costs related to Shore Facilities, RB-M, LIMS, and Surface and Air Asset Follow-on – \$96.007 million

Base adjustment decreases include:

- Termination of One-Time FY 2015 Costs – (\$21.422 million)
- Prior Year Management Annualizations – (\$78.811 million)
- Operational Adjustments – (\$60.863 million)
- Asset Decommissionings and Retirements – (\$12.745 million)

Total Change 2015 to 2016	331	(275)	\$31,494

The President's Budget requests \$3.466 billion for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Military Pay and Allowances PPA funds expenses related to compensation and benefits for active duty military personnel. This category includes pay, allowances, employer's share of the Federal Insurance Contribution Act (FICA), Social Security credits, and other expenses associated with compensating military personnel. Costs related to compensation are calculated by using the Coast Guard's Standard Personnel Cost (SPC) tables. These tables are updated annually and provide a detailed calculation for each billet, broken down by rank/rate, location—in the United States (INCONUS) or out of the country (OCONUS), which includes Alaska and Hawaii—medical costs and permanent change of station (PCS) expenses. Calculations for medical cost estimates are the same for each billet. Calculations for PCS moves and base pay are based upon rank and location of billet. The FY 2016 submission includes a 1.3-percent pay increase for military personnel.

The Coast Guard was founded as a military, multi-mission, maritime service. Active duty military personnel ensure the Service remains agile, adaptable, and ready to serve the Nation's maritime interests across a range of dynamic operational environments. As members of one of the Nation's five Armed Forces and the only military service within the Department of Homeland Security, Coast Guard military personnel conduct missions that protect the public, the environment, and U.S. economic interests in the Nation's inland waters, ports, waterways, and coastal regions, territorial sea, and on the high seas.

Total Change 2015 to 2016	15	(29)	\$12,444

The President’s Budget requests \$799.816 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Civilian Pay and Benefits PPA funds expenses related to compensation and entitlements for Federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial operations, and “Non-Ceiling” (NC) employees (e.g., cooperative education students, student aides, and Federal junior fellows). These annually updated tables provide a detailed calculation for each billet, broken down by pay grade and location—INCONUS or OCONUS (which includes Alaska and Hawaii). The FY 2016 submission includes a 1.3-percent pay increase for civilian personnel, as well as funding for an increase in retirement contributions for the Federal Employees Retirement System (FERS).

Civilian personnel are an integral part of the Coast Guard and vital to execution of its statutory missions. The Coast Guard continues to complement its military workforce by recruiting diverse, well-educated, and dedicated civilians needed to meet current and future demands.

The President's Budget requests \$205.825 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Training and Recruiting PPA funds the Coast Guard's basic and professional training and education programs, as well as operation and maintenance of the eight major Coast Guard training centers, the Coast Guard Academy, nine regional training centers and Coast Guard recruiting centers. The Coast Guard's Force Readiness Command serves as the principal training component charged with optimizing human performance to enhance premier mission execution by providing clear tactics, techniques, and procedures, relevant training, and quality assessments throughout the fleet. Enhanced safety and efficiencies are realized through service wide assessments and standardization, the oversight of unit readiness, and the management of armories, ammunition and small arms firing ranges. Annually the Coast Guard training education systems conduct Basic Training for 3,000 recruits and commissions 300 officers. Further, initial enlisted specialty training occurs at 19 "A" schools, and advanced and currency training is conducted in over 900 "C" schools.

This request includes essential funding to recruit and process CG applicants into the enlisted and officer corps, including expenses for members that are processed through the Military Entrance Processing Stations (MEPS) prior to accession. In addition, funding provides for tuition, travel, and per diem for formal training and education performed by military service members and civilian personnel. Through internal and external efficiency reviews and prioritization efforts, it ensures prudent allocation of limited training and workforce preparation resources that arm Coast Guard personnel with the knowledge, skills, and abilities necessary to execute missions. The Coast Guard maintains a rigorous set of standard operating procedures to ensure the validity and reliability of training and stewardship of training resources. In addition to the training provided by the Coast Guard, the funding also ensures adequate resources are available for training

opportunities provided through other DHS training facilities, commercial providers, DoD, and other government agencies. Training and education are conducted by dedicated resident staffs in classrooms, but may also include exportable training, correspondence courses, and/or computer-based training.

Department of Homeland Security
U.S. Coast Guard
IV. Operating Funds and Unit Level Maintenance
Program Performance Justification
(Dollars in Thousands)

PPA: IV. Operating Funds and Unit Level Maintenance

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted (Gross)	-	-	\$1,034,650
FY 2015 President's Budget	-	-	\$991,919
2016 Adjustments-to-Base	-	-	\$18,398
FY 2016 Current Services	-	-	\$1,010,317
FY 2016 Program Change	-	-	-
FY 2016 Total Request	-	-	\$1,010,317
Total Change 2015 to 2016	-	-	\$18,398

The President's Budget requests \$1.010 billion for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Operating Funds and Unit Level Maintenance PPA funds units, facilities, and activities that are under the direct operational and administrative control of the Coast Guard's Headquarters and Atlantic Area or Pacific Area Commanders. These include Base Support Units (BSUs); National Security Cutters (WMSL), High and Medium Endurance Cutters (WHECs/WMECs); Sectors; Patrol Boats; Multi-mission Boat Stations; Air Stations; Communication Stations; Deployable Specialized Forces (DSF); support commands; and Area Offices as applicable for supplies, materials, and services that allow the Coast Guard to sustain an operations tempo with an immediate response capability for Coast Guard missions. This request funds unit level maintenance of cutters, boats, aircraft, electronics systems, mechanical systems, and electrical equipment; service-life replacement and emergent purchase of boats; procurement of supplies and materials utilized for unit "housekeeping" and administration, spare parts, liquid fuel, and energy; and other materials consumed that contribute directly to mission effectiveness.

To address legacy financial management system inadequacies, DHS launched the Financial Systems Modernization (FSM) initiative in 2011 to modernize financial management systems at Components. DHS must invest in modernizing financial management systems in order to improve financial accountability and financial reporting, and enable business process standardization. The FSM initiative follows DHS Directives, OMB guidance, and processes developed by Treasury's Office of Financial Innovation and Transformation.

Funds to migrate USCG to a shared service provider for financial, acquisition and asset management solution services are being funded from within Coast Guard's Operating Expenses base or by DHS headquarters as part of the FSM initiative. In FY 2016, \$26.921 million in

funding is planned for the USCG FSM initiative; with migration scheduled to be completed in FY 2018, of which \$2.931 million is from DHS headquarters and \$23.990 million is from USCG. The DHS Office of the Chief Financial Officer provides guidance and oversight to Component FSM initiatives. Coast Guard requests no new funding for these initiatives in FY 2016.

V. Centrally Managed Accounts
Program Performance Justification
(Dollars in Thousands)**

PPA: V. Centrally Managed Accounts

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted (Gross)	-	-	\$331,935
FY 2015 President's Budget	-	-	\$335,262
2016 Adjustments-to-Base	-	-	(\$5,578)
FY 2016 Current Services	-	-	\$329,684
FY 2016 Program Change	-	-	-
FY 2016 Total Request	-	-	\$329,684
Total Change 2015 to 2016	-	-	(\$5,578)

The President's Budget requests \$329.684 million for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Centrally Managed Accounts PPA funds centrally managed accounts that provide service to the entire Coast Guard. The major accounts include: the Federal Telephone System (FTS), Standard Workstation recapitalization, Coast Guard Data Network (CGOne), satellite and data communications, General Services Administration (GSA) rent, postal expenses, ammunition replenishment, and the DHS Working Capital Fund.

U.S. Coast Guard
VI. Intermediate and Depot Level Maintenance
Program Performance Justification
(Dollars in Thousands)**

PPA: VI. Intermediate and Depot Level Maintenance

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted (Gross)	-	-	\$1,039,640
FY 2015 President's Budget	-	-	\$1,003,786
2016 Adjustments-to-Base	-	-	\$5,987
FY 2016 Current Services	-	-	\$1,009,773
FY 2016 Program Change	-	-	-
FY 2016 Total Request	-	-	\$1,009,773
Total Change 2015 to 2016	-	-	\$5,987

The President's Budget requests \$1.010 billion for this activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Intermediate and Depot Level Maintenance PPA funds the Coast Guard's depot level maintenance for the Service's shore facilities, electronics, vessels, and aircraft. The Coast Guard maintains its aircraft, vessels, and shore infrastructure using a blend of organic maintenance and repair infrastructure and contracted depot level maintenance activities. A mature project planning and execution program exists within the Coast Guard to provide routine organizational-level and depot level maintenance. Where expertise or infrastructure does not exist organically within the Service, the Coast Guard uses contracted resources to provide the requisite maintenance support.

This funding is vital to ongoing sustainment and support of in-service Coast Guard aircraft; Command, Control, Communications, Computers and Information Technology (C4IT) systems; shore facilities; and vessels.

PROCUREMENT ACTIVITIES: (\$ thousands)

Infrastructure-CGOne

The Coast Guard completed its transition to DHS OneNet in March 2010. CGOne represents a special security enclave on DHS OneNet that allows the Service to meet its unique requirements as a military service while serving every individual and contractor, including reservists and auxiliaries.

This is proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA5 \$24.191 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
24,191	24,191	24,191

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Mission Support 24,191	Level 2 IT Investments	Provides network tuning to ensure bandwidth use is optimized and security is maintained. Provides needed connectivity for CG employees to include links to cutters at sea.

Infrastructure-SWIRS

SWIRS supports and maintains the Standard Workstation, which is a combination of desktop/laptop hardware and special collection of software (named the “standard image”). It also maintains file, print, and application servers along with providing configuration management, help desk support, and software requirements of the systems.

This is proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA5 \$56.615 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
56,615	56,615	56,615

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Mission Support 56,615	Level 2 IT Investments	Supports and maintains the standard workstation. Adopt IT best practices and leverage life cycle upgrades. Supports remote hosting of users for disaster recovery, contingency planning, and continuity of operations.

USCG-Core Accounting System (CAS)

The Core Accounting System (CAS) suite is the primary accounting system for USCG, Transportation Security Agency (TSA), and Domestic Nuclear Detection Office (DNDO). The Core Accounting System (CAS) suite is an enterprise accounting, procurement, assets and management decision support system.

This is proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA5 \$29.847 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
29,595	31,492	29,847

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Mission Support 29,847	Level 2 IT Investments	Provides financial operations, data integrity, financial transparency, compliance with federal laws, regulations, guidelines and requirements

Vessel Logistics System (VLS)

VLS consists of Fleet Logistics System (FLS), Configuration Management Plus (CMPlus), Naval and Electronics Supply Support System (NESSS), and Automated Requisition Management Systems (ARMS). These systems/applications are used to provide vessel logistics information management for the Coast Guard.

This is proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA5 \$5.207 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
5,207	5,207	5,207

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Mission Support 5,207	Level 3 IT Investments	Provides configuration management, maintenance management, inventory management, supply chain management and technical data/information management to Coast Guard assets.

Financial Management Service Improvement Initiative (FMSII)

The Financial Management Service Improvement Initiative (FMSII) will enable DHS to obtain financial, procurement, and asset management services from a Federal Shared Service Provider (FSSP). The services will resolve system issues with data integrity, operations efficiency, sustainability, reliability capability, and gaps in responsiveness to software change requests. Key stakeholders are the USCG, TSA, DNDO, & DHS.

This is proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA5 \$23.990 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
13,250	20,820	23,990

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Mission Support 23,990	Level 2 IT Investments	Provides financial operations, data integrity, financial transparency, compliance with federal laws, regulations, guidelines and requirements across USCG, TSA, DNDO and DHS.

Rescue-21

Rescue 21 is an advanced command, control, and communications system that leverages direction-finding (DF) technology to more accurately locate the source of distress calls, while also upgrading playback recording features, enhancing distress call clarity, and reducing coverage gaps to protect mariners at sea. The system also enables VHF communications interoperability with other federal, state, and local first responder agencies, and supports Digital Selective Calling (DSC) capabilities necessary for compliance with Global Maritime Distress Safety System (GMDSS). Rescue 21 replaces the antiquated legacy National Distress Response System (NDRS).

This is proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA6 \$75.204 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
75,204	75,204	75,204

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Cross Cutting Capital Investments and Maintenance 75,204	Level 1 IT Investments	The Rescue 21 Project eliminates many existing communication coverage gaps ("dead zones") while ensuring nearly continuous, enhanced VHF-FM marine radio coverage out to 20 nautical miles from shore within the coastal zone. The system provides digital voice recording capability with immediate playback to resolve unclear transmissions, which is a critical function to support search and rescue planning and response asset management. The system also provides improved direction finding capability for more timely response to mariners in distress and an improved ability to distinguish hoax calls from actual distress calls, which helps avoid unnecessary costs and risks to response crews and assets.

Asset Logistics Management Information System (ALMIS)

The Asset Logistics Management information System (ALMIS) provides complete aviation and naval logistics support for Coast Guard operations, mission scheduling, asset configuration, maintenance, supply, procurement, and financial business processes. ALMIS is a centralized system that captures programmatic information that is used at all levels of the organization.

This is proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA6 \$8.230 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
8,230	8,230	8,230

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Mission Support 8,230	Level 3 IT Investments	ALMIS provides operational oversight capability for mission scheduling and execution. The system directly supports 325 aircraft, 1,618 Small Boats, 166 Cutters and 109 DGPS Towers. ALMIS benefits also include the metrics and statistics to support HQ operational performance analysis.

CG Logistics Information Management System (CG-LIMS)

CG-LIMS is a replacement for legacy logistics IT systems. It uses a COTS tool configured to match the Coast Guard business model. CG-LIMS supports the USCG Modernization goal of a single, unified logistics system that improves mission-readiness, operational effectiveness, and decision-making by enabling decision support at the enterprise and tactical level. Beneficiaries of the CG-LIMS project are the U.S. Coast Guard, DHS, and DoD.

This is proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA4 \$3.884 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
1,468	3,066	3,884

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Cross Cutting Capital Investments and Maintenance 3,884	Level 3 IT Investments	CG-LIMS will achieve significant savings in the Coast Guard's annual operating expenses for surface and air assets, and will improve availability rates of those assets by integrating the support processes and capabilities needed to improve operational effectiveness.

Coast Guard Business Intelligence (CGBI)

CGBI is a Business Intelligence system designed to reduce organizational uncertainty and risk in decision making. It is a performance management system that supports all CG mission programs and support functions. The objective of CGBI is to provide the right information at the right time, to the right people to support operational, tactical and strategic reporting and analysis needs across the Coast Guard. CGBI is accessed by over 77,000 employees, contractors and Auxiliary members.

This is proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA2 \$1.126 million
- PPA4 \$4.990 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
6,302	6,096	6,116

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Mission Support 6,116	Level 3 IT Investments	CGBI provides reporting, analysis, data discovery and data visualization services to enterprise decision makers, managers, unit leaders and individuals. CGBI is used in all mission and support areas.

Direct Access

Direct Access is a military Human Resources (HR) system that uses Oracle and PeopleSoft Commercial Off-the-Shelf (COTS) products to meet military payroll and personnel management requirements for the Coast Guard. The Direct Access system consolidated five Coast Guard HR and payroll applications, as well as six Public Health Service HR applications to form the workforce management tool that exists today.

This is proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA2 \$0.833 million
- PPA4 \$13.068 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
13,068	13,068	13,901

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Mission Support 13,068	Level 3 IT Investments	Direct Access is a critical payroll and workforce management tool, and is the authoritative source for all Coast Guard HR activities. It also provides HR and payroll services to two non-DOD uniformed services: NOAA and USPHS.

Interagency Operations Centers (IOC)

The Interagency Operations Center (IOC) Project is an overarching initiative to improve operational capabilities, situational awareness, tactical decision making and joint, coordinated emergency response in the maritime environment. The IOC project will provide an Information Management (IM) technology demonstrator solution focused on targeting operations, planning & monitoring across 35 locations.

This is proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA4 \$7.164 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
7,164	7,164	7,164

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Cross Cutting Capital Investments and Maintenance 7,164	Level 3 IT Investments	Meets requirements of 2006 SAFE Port Act; IOCs enable the Coast Guard to better plan, coordinate, and execute maritime security operations among interagency partners to include Federal, State, Local, Tribal, International, Public, and Private Sector stakeholders.

Marine Information for Safety and Law Enforcement (MISLE)

The Marine Information for Safety and Law Enforcement (MISLE) supports Coast Guard operations by documenting USCG mission activities, supporting mission activity targeting and enabling emergency response management. MISLE is a highly integrated system and exchanges data with 22 other government information systems, generating efficiency in operations as well as reducing overall IT costs across the enterprise.

This is proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA4 \$9.655 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
9,655	9,655	9,655

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Mission Support 9,655	Level 3 IT Investments	MISLE is a highly integrated system and exchanges data with other government information systems; it facilitates boarding, inspection, facilities, vessel, investigation, waterway, bridges, pollution, and parties case management and activities. MISLE documents and supports most USCG mission activities in a way not currently available from other USCG, DHS, or COTS systems.

Ports and Waterways Safety System (PAWSS)

The Ports and Waterways Safety System (PAWSS) is a part of the Vessel Traffic Services (VTS) program, and is one of several systems used for this program. The PAWSS was Congressionally Mandated to modernize VTS in five ports (New York, Houston/Galveston, San Francisco, Prince William Sound, and Puget Sound) and introduce automated VTS systems in four other ports (Lower Mississippi River, Sault Ste. Marie, Berwick Bay, and Port Arthur) through the use of commercially available technology including Automatic Identification System (AIS), radars, Closed Circuit Television (CCTV), and voice communications.

This is proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA6 \$17.949 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
17,949	17,949	17,949

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Mission Support 17,949	Level 3 IT Investments	This modernization of the existing VTS system facilitates the safe and efficient flow of maritime commercial traffic into and out of U.S. ports. It does so by providing mariners and government responders with critical situational awareness information related to vessel movements in areas with heavy vessel traffic.

Transfers to and from Other Accounts

Transfer\$5,984

PPA Breakdown - Transfer		Total (\$000)
PPA I: Military Personnel (2 FTP, 2 FTE)

Mandatory Personnel Entitlements

Annualization of 2015 Military and Civilian Pay Raise\$7,180

PPA Breakdown - Annualization of 2015 Military and Civilian Pay Raise		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	5,184
	Permanent Change of Station	44
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	1,952
		7,180

Provides one quarter of funding to annualize the FY 2015 military and civilian (one percent) pay raise.

2016 Military Pay Raise.....\$20,177

PPA Breakdown - 2016 Military Pay Raise		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances	20,016
	Permanent Change of Station	161
		20,177

Provides three quarters of funding for the FY 2016 military (1.3 percent) pay raise.

2016 Civilian Pay Raise\$7,587

PPA Breakdown - 2016 Civilian Pay Raise		Total (\$000)
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	7,587
		7,587

Provides three quarters of funding for the FY 2016 civilian (1.3 percent) pay raise.

2016 Military Allowances.....\$42,942

PPA Breakdown - 2016 Military Allowances		Total (\$000)
PPA I: Military Personnel		
	Military Pay and Allowances (Basic Allowance for Housing)	9,576
	Military Health Care	20,166
	Permanent Change of Station	13,200
		42,942

Provides funding to maintain current services and ensure parity of military pay, allowances, and health care with DoD. This request includes additional funding for Basic Allowance for Housing (BAH) changes scheduled to take effect on January 1, 2016. Health care costs are forecasted using actuarial projections and include funding for Coast Guard clinics, TRICARE, pharmaceuticals, use of DoD military treatment facilities and Public Health Service physicians serving at Coast Guard medical facilities. Permanent Change of Station costs are forecasted to increase based on actuarial projections and an increase in average travel order cost.

2016 Civilian Allowances.....\$2,954

PPA Breakdown - 2016 Civilian Allowances		Total (\$000)
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	2,954
		2,954

Provides non-recurring funding for the compensable work day of February, 29th 2016.

Operational Adjustments

GSA and Other Governmental Rent.....\$1,650

PPA Breakdown - GSA and Other Governmental Rent		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	17th District	850
PPA V: Centrally Managed Accounts		
	Central Accounts	800
		1,650

Provides funding for cost increases of General Services Administration (GSA) leased buildings occupied by the Coast Guard. The account reflects cost obligations resulting from occupancy agreements established between the Coast Guard and GSA to meet specific operational and shore facility requirements.

High Risk Internal Cyber-security Remediation.....\$5,171

PPA Breakdown - High Risk Internal Cyber-security Remediation		Total (\$000)
PPA II: Civilian Personnel		
	Civilian Pay and Allowances	2,127
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	3,044
		5,171

During the formulation of the FY 2016 budget request, DHS examined components’ IT system vulnerabilities and prioritized them based on the following criteria: impact to operational mission, risk to the public, and risk to the Department’s employees. While progress has already been made, the FY 2016 request reflects the Department’s direction to remediate known high risk vulnerabilities by 2018 and includes funding specifically identified to assist in hiring qualified cyber-security personnel.

Each of the identified vulnerabilities related to a component controlled system and the corrective action will be directly applied to the individual system. This increase funds execution of a portion of the DHS-wide corrective action plan. The Department will track remediation of vulnerabilities commencing in FY 2015.

Operating and Maintenance Funds for New Assets

Shore Facility Follow-On\$3,310

PPA Breakdown - Shore Facility Follow-On		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	1,228
PPA VI: Depot Level Maintenance		
	Civil/Ocean Engineering and Shore Facility Maintenance	2,082
		3,310

Provides for the operation and maintenance of recapitalized shore facilities scheduled for completion prior to 2016. This funding request is required for energy, utility services, routine repairs, and housekeeping. This request also supports non-recurring maintenance and repairs (e.g., system renewals, preventive and emergency maintenance, scheduled inspections, etc.) anticipated throughout the life of the facility.

The request provides the resources required to operate and maintain new, and make improvements to existing facilities, acquired through the execution of the following Acquisition, Construction, and Improvement projects:

- Air Facility Cold Bay Hangar Construction;

- Station Houston Construction;
- Sector Cleveland Harbor Boat Maintenance Annex - Phase II;
- Sector Field Office Galveston Industrial Support Facility Construction;
- Rescue 21 Juneau/Kodiak High Site Construction;
- Base Honolulu Fast Response Cutter Homeport Upgrades;
- Atlantic Area Regional Dive Locker Construction.

Response Boat - Medium (RB-M) Follow-On\$453

PPA Breakdown - Response Boat - Medium (RB-M) Follow-On		Total (\$000)
PPA I: Military Personnel (1 FTP, 1 FTE)		
	Military Pay and Allowances	63
	Military Health Care	9
	Permanent Change of Station	15
PPA III: Training and Recruiting		
	Training and Education	4
	Recruiting and Training Centers	1
PPA IV: Operating Funds and Unit Level Maintenance		
	17th District	12
	Headquarters Directorates	241
	Headquarters Units	1
PPA V: Centrally Managed Accounts		
	Central Accounts	10
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	63
	Civil/Ocean Engineering and Shore Facility Maintenance	20
	Vessel Maintenance	14
		453

Provides follow-on funding for the operation, maintenance, and support personnel for four RB-Ms. The RB-M provides a significant increase in capability over the 41-foot Utility Boat (UTB) but requires additional operation and maintenance funding to meet current mission demands.

Logistics Information Management System (LIMS) Follow-On.....\$2,452

PPA Breakdown - Logistics Information Management System (LIMS) Follow-On		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	2,452
		2,452

Provides funding for the operation and maintenance of the first segment of CG-LIMS. CG-LIMS is the Coast Guard’s enterprise logistics management system, which is designed to interface with existing and future logistics and financial systems to increase Coast Guard capability for hosting

application services, performing data migration, maintaining user licenses, facilitating software changes, conducting system certification and accreditation, and facilitating data management processes.

Fast Response Cutter (FRC) Follow-On.....\$17,191

PPA Breakdown - Fast Response Cutter (FRC) Follow-On		Total (\$000)
PPA I: Military Personnel (156 FTP, 67 FTE)		
	Military Pay and Allowances	4,512
	Military Health Care	591
	Permanent Change of Station	1,734
PPA II: Civilian Personnel (5 FTP, 2 FTE)		
	Civilian Pay and Allowances	230

		17,191

Fast Response Cutter (FRC) Follow-On Support Hulls 19-22

Provides personnel for shore-side support of FRC hulls 19-22 to be home-ported in Cape May, New Jersey, and Ketchikan, Alaska. These billets will staff the shore-side Maintenance Augmentation Teams, as well as FRC support personnel at the Surface Forces Logistics Center and C4IT Service Center.

Fast Response Cutter Operation & Maintenance (O&M) for hulls 18-21

Provides O&M funding for Fast Response Cutter (FRC) hulls 18-21, scheduled for delivery in 2016. These FRCs will be home-ported as follows: FRC hull 18 in San Juan, Puerto Rico; FRC hulls 19-20 in Cape May, New Jersey; and FRC hull 21 in Ketchikan, Alaska. The FRC is the replacement for the 110-foot Island Class patrol boat that is past its designed service life. The

FRC is more capable than the 110-foot patrol boat with advanced electronics and enhanced operational capabilities.

Fast Response Cutter (FRC) Crews for Hulls 20-23

Provides personnel to operate and maintain FRC hull 20 home-ported in Cape May, New Jersey; FRC hulls 21 and 22 home-ported in Ketchikan, Alaska; and FRC hull 23 home-ported in Pascagoula, Mississippi. Advance arrival of the crews is critical to ensure appropriate pre-arrival training is received to ensure crew readiness prior to cutter delivery.

National Security Cutter (NSC) Follow-On\$6,061

PPA Breakdown - National Security Cutter (NSC) Follow-On		Total (\$000)
PPA I: Military Personnel (140 FTP, 41 FTE)		
	Military Pay and Allowances	2,928
	Military Health Care	368
	Permanent Change of Station	1,064
PPA II: Civilian Personnel (6 FTP, 3 FTE)		
	Civilian Pay and Allowances	379
PPA III: Training and Recruiting		
	Training and Education	329
	Recruiting and Training Centers	55
PPA IV: Operating Funds and Unit Level Maintenance		
	Atlantic Area	1
	Pacific Area	195
	Headquarters Units	225
	Other Activities	7
PPA V: Centrally Managed Accounts		
	Central Accounts	506
PPA VI: Depot Level Maintenance		
	Vessel Maintenance	4
		6,061

NSC Follow-On Support

Provides personnel funding for shore-side support of NSC (WMSL Class) hulls four and five, to be home-ported in Charleston, SC. The personnel will provide centralized fleet support of these hulls for the Surface Forces Logistics Center and Command, Control, Communications, Computers and Information Technology Service Center.

National Security Cutter (NSC) Crew Golf (Phase I & II) for NSC 6

Provides personnel to operate and maintain NSC-6. In order to complete critical pipeline and pre-acceptance training, it is necessary to establish NSC-6 crew Phase I and Phase II at least 6 months in advance of delivery. Since the delivery of BERTHOLF (NSC-1), the Coast Guard has continuously reduced pipeline training timelines to optimize pre-delivery activities of NSC crews.

C-27J Aircraft Support Follow-On\$47,420

PPA Breakdown - C-27J Aircraft Support Follow-On		Total (\$000)
PPA I: Military Personnel (143 FTP, 72 FTE)		
	Military Pay and Allowances	5,491
	Military Health Care	645
	Permanent Change of Station	1,197
PPA II: Civilian Personnel (9 FTP, 5 FTE)		
	Civilian Pay and Allowances	478
PPA III: Training and Recruiting		
	Training and Education	13,507
	Recruiting and Training Centers	169

	Central Accounts	1,227
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	20,330
	Electronics Maintenance	275
	Civil/Ocean Engineering and Shore Facility Maintenance	580
		47,420

C-27J Follow-on Support

Provides personnel for support of the first four C-27J aircraft at the Aviation Logistics Center, Aviation Technical Training Center, and Aviation Training Center. The personnel will support the induction of the C-27J fleet of aircraft into long-term sustainment plans.

C-27J Fleet Induction Phase 1 Follow-on

Provides funding for 2,000 flight hours including personnel, operations and maintenance, and support of C-27J airframes one through four. These operational hours provide additional Maritime Patrol Aircraft capacity. The flight hour capacity of these C-27Js will improve the Coast Guard’s ability to primarily conduct missions such as Alien Migrant Interdiction Operations (AMIO), Counter-Drug (CD), Ports, Waterways and Coastal Security, Search and Rescue, and Living Marine Resources (LMR).

HC-130J Aircraft Follow-On.....\$7,615

PPA Breakdown - HC-130J Aircraft Follow-On		Total (\$000)
PPA I: Military Personnel (33 FTP, 17 FTE)		
	Military Pay and Allowances	1,152
	Military Health Care	149
	Permanent Change of Station	255
PPA III: Training and Recruiting		
	Training and Education	1,366
	Recruiting and Training Centers	47
PPA IV: Operating Funds and Unit Level Maintenance		
	5th District	1,709
	14th District	428
	Headquarters Directorates	8
	Headquarters Units	35
	Other Activities	3
PPA V: Centrally Managed Accounts		
	Central Accounts	391
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	2,072
		7,615

Provides funding for personnel, operation and maintenance, and support for HC-130J aircraft #7. This HC-130J enhances the Coast Guard’s ability to primarily conduct the Search and Rescue (SAR), Alien Migrant Interdiction Operations (AMIO), Counter-Drug (CD), Ports, Waterways and Coastal Security (PWCS) and Living Marine Resources (LMR) enforcement missions.

MH-60T Helicopter Follow-On\$5,359

PPA Breakdown - MH-60T Helicopter Follow-On		Total (\$000)
PPA I: Military Personnel (27 FTP, 14 FTE)		
	Military Pay and Allowances	1,027
	Military Health Care	122
	Permanent Change of Station	424
PPA III: Training and Recruiting		
	Training and Education	1,558
	Recruiting and Training Centers	18
PPA IV: Operating Funds and Unit Level Maintenance		
	17th District	465
	Headquarters Directorates	7
	Headquarters Units	98
	Other Activities	3
PPA V: Centrally Managed Accounts		
	Central Accounts	50
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	1,127
	Civil/Ocean Engineering and Shore Facility Maintenance	460
		5,359

Provides funding for personnel, operation and maintenance, and support of MH-60T aircraft #43. This MH-60T aircraft will enhance the Coast Guard’s ability to conduct the Search and Rescue (SAR), Alien Migrant Interdiction Operations (AMIO), Counter-Drug (CD), Ports, Waterways and Coastal Security (PWCS), and Living Marine Resources (LMR) enforcement missions.

Air Station Los Angeles Relocation: Phase 1\$3,415

PPA Breakdown - Air Station Los Angeles Relocation: Phase 1		Total (\$000)
PPA I: Military Personnel (1 FTP, 1 FTE)		
	Military Pay and Allowances	89
	Military Health Care	5
	Permanent Change of Station	507
PPA III: Training and Recruiting		
	Training and Education	300
PPA IV: Operating Funds and Unit Level Maintenance		
	11th District	1,023
	Headquarters Units	136
PPA V: Centrally Managed Accounts		
	Central Accounts	355
PPA VI: Depot Level Maintenance		
	Civil/Ocean Engineering and Shore Facility Maintenance	1,000
		3,415

Provides funding for the relocation of personnel and aircraft from Air Station Los Angeles to Air Station San Francisco and Air Station Humboldt Bay. The current lease at Los Angeles International Airport, where Air Station Los Angeles is located, expires in 2016. Requests to extend the lease were denied by the airport authority. The Coast Guard will establish a forward operating base at Naval Base Ventura County to maintain operations. Coast Guard Search and Rescue response times within the current area of operation will continue to meet national standards.

ATTC Underwater Egress Facility Support Follow-on\$171

PPA Breakdown - ATTC Underwater Egress Facility Support Follow-on		Total (\$000)
PPA I: Military Personnel (1 FTP, 1 FTE)		
	Military Pay and Allowances	44
	Military Health Care	5
	Permanent Change of Station	13
PPA II: Civilian Personnel (1 FTP, 1 FTE)		
	Civilian Pay and Allowances	39
PPA III: Training and Recruiting		
	Training and Education	7
	Recruiting and Training Centers	9
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Units	5
PPA V: Centrally Managed Accounts		
	Central Accounts	9
PPA VI: Depot Level Maintenance		
	Civil/Ocean Engineering and Shore Facility Maintenance	40
		171

Provides funding for personnel, supplies, and equipment necessary for the operation and support of the emergency underwater egress training device and course at Aviation Technician Training Center (ATTC), Elizabeth City, NC. The trainer develops critical survival skills for air boat crews in the event of an emergency evacuation if a capsizing occurs on the response boat during mission execution.

sUAS Service Contract\$2,560

PPA Breakdown - sUAS Service Contract		Total (\$000)
PPA I: Military Personnel (2 FTP, 1 FTE)		
	Military Pay and Allowances	121
	Military Health Care	9
	Permanent Change of Station	28
PPA III: Training and Recruiting		
	Training and Education	600
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	1,789
	Headquarters Units	2
PPA V: Centrally Managed Accounts		
	Central Accounts	11
		2,560

Provides funding for personnel support and contracted sUAS operations for National Security Cutters (NSCs). This request funds supervisory personnel and a service contract for shipboard sUAS operations. Contracted personnel and equipment will deploy aboard NSCs to perform flight and maintenance duties in support of Coast Guard operations.

Base Re-Allocations (Non-Add)

Military FTP and FTE Transfer to Civilian.....[\$789]

PPA Breakdown - Military FTP and FTE Transfer to Civilian		Total (\$000)
PPA I: Military Personnel (-7 FTP, -7 FTE)		
	Military Pay and Allowances	(686)
	Military Health Care	(61)
	Permanent Change of Station	(26)
PPA II: Civilian Personnel (7 FTP, 7 FTE)		
	Civilian Pay and Allowances	789
PPA III: Training and Recruiting		
	Training and Education	(16)
		0

Transfers seven military FTP/FTE to civilian FTP/FTE. These conversions are consistent with GAO recommendations to change military positions funded in PPA I (Military Pay and Allowances) with inherently civilian job functions to civilian positions funded in PPA II (Civilian Pay and Benefits).

Decreases

Termination of One Time Costs(\$21,422)

PPA Breakdown - Termination of One-Time Costs		Total (\$000)
PPA I: Military Personnel		
	Permanent Change of Station	(9,273)

Total	(562)	(54)	(78,811)

Operational Adjustments

Shore-side Support Structure Review & Rebalancing.....(\$607)

PPA Breakdown - Shore-side Support Structure Review & Rebalancing		Total (\$000)
PPA I: Military Personnel (-16 FTP, -8 FTE)		
	Military Pay and Allowances	(528)
	Military Health Care	(72)
	Permanent Change of Station	80
PPA III: Training and Recruiting		
	Training and Education	(15)
	Recruiting and Training Centers	(16)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Units	(27)
	Other Activities	(1)
PPA V: Centrally Managed Accounts		
	Central Accounts	(28)
		(607)

A thorough review of the Coast Guard's shore-side support structure identified personnel reductions that could be taken with no direct operational impact and minimal loss to current service delivery levels. This line item implements those reductions.

Logistics & Service Center Shared Service Efficiencies.....(\$1,900)

PPA Breakdown - Logistics & Service Center Shared Service Efficiencies		Total (\$000)
PPA I: Military Personnel (-5 FTP, -3 FTE)		
	Military Pay and Allowances	(233)
	Military Health Care	(23)
	Permanent Change of Station	38
PPA II: Civilian Personnel (-13 FTP, -7 FTE)		
	Civilian Pay and Allowances	(591)
PPA III: Training and Recruiting		
	Training and Education	(7)
	Recruiting and Training Centers	(5)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Units	(32)
PPA V: Centrally Managed Accounts		
	Central Accounts	(47)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(1,000)
		(1,900)

Reflects a targeted reduction of positions within the shared services divisions at Coast Guard Logistics and Service Centers and a workload re-leveling among remaining personnel to increase the efficiency of logistics and service centers.

National Capitol Region Footprint Consolidation.....(\$3,000)

PPA Breakdown - National Capitol Region Footprint Consolidation		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	(3,000)
		(3,000)

Reduces the cost of the Coast Guard’s real property footprint in the NCR by consolidating GSA leased property occupants into the Douglas A. Munro Coast Guard Headquarters Building at the St. Elizabeths site. This reduction is in alignment with Administration directives and government-wide strategies to promote efficient spending to support agency operations.

Fuel Logistics Management Program Review.....(\$300)

PPA Breakdown - Fuel Logistics Management Program Review		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	(300)
		(300)

Provides annual savings from the liquid fuel energy account through the initiation of a Public-Private Partnership to provide petroleum logistics services at operational field-level fuel distribution locations.

Health Services Delivery Review & Rebalancing(\$3,799)

PPA Breakdown - Health Services Delivery Review & Rebalancing		Total (\$000)
PPA I: Military Personnel (-14 FTP, -7 FTE)		
	Military Pay and Allowances	(413)
	Military Health Care	(3,368)
	Permanent Change of Station	50
PPA III: Training and Recruiting		
	Training and Education	(13)
	Recruiting and Training Centers	(20)
PPA IV: Operating Funds and Unit Level Maintenance		
	1st District	(2)
	9th District	(2)
	13th District	(2)
	Headquarters Directorates	(2)
	Headquarters Units	(14)
	Other Activities	(1)
PPA V: Centrally Managed Accounts		
	Central Accounts	(12)
		(3,799)

Reflects savings in personnel and contracted support funding for Coast Guard health services delivery. Savings will be realized through reduction of health services personnel, but position realignment and workload adjustments at the Coast Guard Health, Safety, and Work-Life Service Center and certain field locations will ensure there is no level of service reduction to members or dependents.

Headquarters Directorate Reduction.....(\$5,000)

PPA Breakdown - Headquarters Directorate Reduction		Total (\$000)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	(5,000)
		(5,000)

Reflects savings in Coast Guard Headquarters directorates. A focused effort to reduce duplicative purchasing of consumable supplies and materials will be the largest driver of savings for this initiative. Operational policy development and direct support functionality will not be affected by the proposed reduction.

Cellular Wireless Savings.....(\$4)

PPA Breakdown - Cellular Wireless Savings		Total (\$000)
PPA V: Centrally Managed Accounts		
	Central Accounts	(4)
		(4)

Reflects savings associated with a reduction of cellular telephone contracts.

Professional Services Contract Reduction.....(\$44,999)

PPA Breakdown - Professional Services Contract Reduction		Total (\$000)
PPA I: Military Personnel		
	Military Health Care	(3,298)
	Permanent Change of Station	(886)
PPA III: Training and Recruiting		
	Training and Education	(7,182)
	Recruiting and Training Centers	(199)
PPA IV: Operating Funds and Unit Level Maintenance		
	Headquarters Directorates	(9,425)
	Headquarters Units	(3,509)
PPA V: Centrally Managed Accounts		
	Central Accounts	(2,409)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(4,791)
	Electronics Maintenance	(6,631)
	Civil/Ocean Engineering and Shore Facility Maintenance	(4,702)
	Vessel Maintenance	(1,967)
		(44,999)

Reflects savings in professional services contracts based on an assessment of the contract’s direct contribution to Coast Guard front-line operations. The changes include the termination of contracts due to expire in 2015 that are not mission critical.

Continuous Monitoring Reduction.....(\$1,254)

PPA Breakdown - Continuous Monitoring Reduction		Total (\$000)
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	(1,254)
		(1,254)

Reduces funding for manual continuous monitoring requirements for IT system security due to the increased capability of the Continuous Diagnostics and Mitigation (CDM) program, scheduled for implementation in FY 2015. The CDM for internal cyber-security will create a more efficient information security business model. As the scope of CDM expands, this program will further standardize security products and tools across the Department.

Asset Decommissionings and Retirements

Two 110-foot Patrol Boats.....(\$1,061)

PPA Breakdown - Two 110-foot Patrol Boats		Total (\$000)
PPA I: Military Personnel (-27 FTP, -14 FTE)		
	Military Pay and Allowances	(801)
	Military Health Care	(122)
	Permanent Change of Station	163
PPA III: Training and Recruiting		
	Training and Education	(25)
	Recruiting and Training Centers	(20)
PPA IV: Operating Funds and Unit Level Maintenance		
	7th District	(80)
	Headquarters Directorates	(244)
	Headquarters Units	(50)
	Other Activities	(2)
PPA V: Centrally Managed Accounts		
	Central Accounts	(106)
PPA VI: Depot Level Maintenance		
	Electronics Maintenance	(16)
	Vessel Maintenance	242
		(1,061)

Decommissions two 110-foot Island Class (WPB) patrol boats. The 110-foot WPB fleet is beyond its projected 20-year service life and is increasingly costly to maintain and operate. These assets are being replaced by the more capable Fast Response Cutters (FRCs). The Coast Guard will re-invest the savings from decommissioning the 110-foot WPBs to fund the operations and maintenance costs of the FRCs scheduled for delivery in 2016.

Three HC-130 Aircraft(\$11,684)

PPA Breakdown - Three HC-130 Aircraft		Total (\$000)
PPA I: Military Personnel (-106 FTP, -53 FTE)		
	Military Pay and Allowances	(3,726)
	Military Health Care	(478)
	Permanent Change of Station	500
PPA III: Training and Recruiting		
	Training and Education	(221)
	Recruiting and Training Centers	(71)
PPA IV: Operating Funds and Unit Level Maintenance		
	11th District	(3,092)
	Other Activities	(9)
PPA V: Centrally Managed Accounts		
	Central Accounts	(116)
PPA VI: Depot Level Maintenance		
	Aircraft Maintenance	(4,471)
		(11,684)

Retires three HC-130H airframes and the associated 2,400 flight hours and the positions for these three aircraft currently assigned to Air Station Sacramento, California. The National Defense Authorization Act (NDAA) of 2014 authorized the transfer of these aircraft to the Department of Defense for reconditioning before final transfer to the U.S. Forest Service.

IV. Program Justification Changes

N/A

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

Department of Homeland Security
U.S. Coast Guard
Justification of Proposed Changes in Operating Expenses
Appropriation Language

For necessary expenses for the operation and maintenance of the Coast Guard, not otherwise provided for; purchase or lease of not to exceed 25 passenger motor vehicles, which shall be for replacement only; purchase or lease of small boats for contingent and emergent requirements (at a unit cost of no more than \$700,000) and repairs and service-life replacements, not to exceed a total of \$31,000,000; purchase or lease of boats necessary for overseas deployments and activities; **purchase or lease of other equipment (at a unit cost of no more than \$250,000)**;¹ minor shore construction projects not exceeding \$1,000,000 in total cost on any asset; payments pursuant to section 156 of Public Law 9709377 (42 U.S.C. 402 note; 96 Stat. 1920); and recreation and welfare; [\$6,750,733,000;] **\$6,821,503,100**,² of which \$340,000,000 shall be for defense-related activities; of which \$24,500,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); and of which not to exceed \$15,300 shall be for official reception and representation expenses: Provided, That none of the funds made available by this Act shall be for expenses incurred for recreational vessels under section 12114 of title 46, United States Code, except to the extent fees are collected from owners of yachts and credited to this appropriation: Provided further, That to the extent fees are insufficient to pay expenses of recreational vessel documentation under such section 12114, and there is a backlog of recreational vessel applications, then personnel performing non-recreational vessel documentation functions under subchapter II of chapter 121 of title 46, United States Code, may perform documentation under section 12114: *Provided further*, That, without regard to the limitation as to time and condition of section 503(d), after June 30, up to \$10,000,000 may be reprogrammed within this appropriation in accordance with subsections (a), (b), and (c), of section 503.

Explanation for Proposed Change:

Language Provision	Explanation
¹ ... <u>purchase or lease of other equipment (at a unit cost of no more than \$250,000)</u> ; ...	The proposed language provides a clearly defined threshold for the use of the OE appropriation to procure end-use items to include software systems and equipment for an amount equal to or less than the proposed funding amount. Similar procurements above the defined level would become a necessary expense of the AC&I appropriation.

² ... [\$6,750,733,000;] <u>\$6,821,503,100</u> ...	Dollar change only. No substantial change proposed.

I. Military Pay and Allowances Mission Statement

This PPA requests funding for expenses related to compensation for active duty military personnel. This category also includes pay, allowances, employer's share of FICA, Social Security credits and other expenses associated with compensating military personnel. Requested funding will compensate military personnel as they serve the Nation across all of the Coast Guard's eleven statutory missions in support of the Coast Guard's six FYHSP Programs.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.6 Military Personnel-Basic Allowance for Housing	\$728,711	\$779,175	\$788,751	\$9,576
11.7 Military Personnel	\$1,890,525	\$1,835,762	\$1,841,550	\$5,788
11.8 Special Personal Services Payments	\$6,936	\$6,743	\$6,765	\$22
12.2 Military Personnel Benefits	\$238,097	\$230,239	\$245,589	\$15,350
13.0 Benefits for Former Personnel	\$6,968	\$6,767	\$6,788	\$21
Total, Salaries & Benefits	\$2,871,237	\$2,858,686	\$2,889,443	\$30,757

Salaries and benefits provide funds for compensation directly related to duties performed for the Coast Guard by active duty military personnel. The FY 2016 request reflects the net effect of proposals for pay (1.3 percent pay raise), medical benefits, and other mandatory personnel entitlements. Increases result from the addition of personnel to operate new systems and assets. Decreases result from the reduction of personnel associated with asset divestments; and operational adjustments.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$58,841	\$59,192	\$60,693	\$1,501

Requested funds cover the travel costs of Coast Guard military service members, while in an authorized travel status, either directly or by reimbursing the traveler. Funding also supports the shipment of military members' household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2016 request reflects the net effect of increases for PCS travel costs and decreases from enterprise-wide efficiencies, and operational adjustments.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
22.0 Transportation of Things	\$75,353	\$76,298	\$78,793	\$2,495

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of military members' household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2016 request includes increases for PCS travel costs and decreases from enterprise-wide efficiencies, and operational adjustments.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.2 Rental Payments to Others	\$4,754	\$4,617	\$4,631	\$14

Other rent includes all payments to a non-Federal source for rental space, land and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The FY 2016 request includes funding for the net of personnel increases and decreases, including costs associated with decommissionings or funding associated with delivery of new assets, reductions that are part of enterprise-wide efficiencies, and operational adjustments.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$6,278	\$6,130	\$6,078	(\$52)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2016 request includes funding for the net of personnel increases and decreases, including costs associated with decommissionings or funding associated with delivery of new assets, reductions that are part of enterprise-wide efficiencies, and operational adjustments.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$36,817	\$35,796	\$35,808	\$12

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2016 request includes funding for the net of personnel increases and decreases, including costs associated with decommissionings or funding associated with delivery of new assets, reductions that are part of enterprise-wide efficiencies, and operational adjustments.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$45,087	\$44,011	\$43,757	(\$254)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2016 request reflects decreases in funding associated with decommissionings or delivery of new assets, reductions that are part of enterprise-wide efficiencies, and operational adjustments.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.6 Medical Care	\$305,643	\$298,322	\$295,539	(\$2,783)

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, funding supports medical care costs for military service members. The request includes actuary-forecasted cost decreases associated with the existing workforce, and changes in FTE through FY 2016 adjustments to base.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$2,521	\$2,554	\$2,639	\$85

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2016 request includes funding for the net of personnel increases and decreases, including costs associated with decommissionings or funding associated with delivery of new assets, reductions that are part of enterprise-wide efficiencies, and operational adjustments.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$48,161	\$46,945	\$46,664	(\$281)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational, training and shore support units. The FY 2016 request reflects decreases in funding associated with decommissionings or delivery of new assets, reductions that are part of enterprise-wide efficiencies and operational adjustments.

II. Civilian Pay and Benefits Mission Statement

This PPA requests funding for expenses related to compensation and entitlements for Federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial positions, and Non-Ceiling (NC) employees (e.g., cooperative education students, student aids, summer interns and Federal junior fellows) and civilian employees not otherwise covered by other PPAs.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$556,718	\$567,621	\$576,603	\$8,982
11.3 Other than Full-Time Permanent	\$5,354	\$5,459	\$5,545	\$86
11.5 Other Personnel Compensation	\$16,577	\$16,902	\$17,169	\$267
12.1 Civilian Personnel Benefits	\$184,923	\$196,099	\$199,202	\$3,103
13.0 Benefits for Former Personnel	\$401	\$409	\$415	\$6
Total, Salaries & Benefits	\$763,973	\$786,490	\$798,934	\$12,444

Salaries and benefits funds provide for compensation directly related to duties performed for the Coast Guard by Federal civilian employees. The FY 2016 request reflects the net effect of proposals for pay (1.3 percent pay raise), benefits, and other mandatory personnel entitlements. Increases are associated with the addition of personnel to support new systems and assets and non-recurring funding for the compensable work day of February 29, 2016. Decreases are associated with centralization of program-level shore maintenance and shore infrastructure work capability.

III. Training and Recruiting Mission Statement

Request provides funding for the Coast Guard's professional training and education programs, as well as operation and maintenance of the eight major Coast Guard training centers and support commands, the Coast Guard Academy, and recruiting centers. Additionally, this request includes funding for tuition, travel, and per diem for formal training and education performed as temporary additional duty (TAD) by military service members and civilian personnel. It also ensures the training infrastructure is resourced to provide Coast Guard personnel with the knowledge, skills and abilities necessary for assigned missions. Training is provided by the Coast Guard, other DHS components, commercial providers, DoD, and other agencies. Training and education are usually conducted by dedicated resident staffs in classrooms, but may also include exportable training, correspondence courses, and/or computer-based training. Funding also supports TAD expenses for CG applicants processed thru the Military Entrance Processing Stations (MEPS).

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$45,168	\$41,596	\$46,563	\$4,967

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2016 request reflects increases in funding associated with the delivery of the C-27J aircraft, personnel and associated training necessary to induce the asset into the fleet.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
24.0 Printing and Reproduction	\$487	\$489	\$514	\$25

Includes printing and reproduction costs. The FY 2016 request reflects increase in funding associated with the delivery of a new asset, and training and operational manuals required to operate the C-27J aircraft.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$38,218	\$36,693	\$41,346	\$4,653

Advisory and assistance services include services acquired by contract from non-Federal sources (e.g., private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2016 request reflects increases in funding associated with delivery of the C-27J aircraft and follow-on operational expenses.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$55,032	\$51,638	\$44,977	(\$6,661)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2016 request reflects decreases in funding associated with reductions that are part of enterprise-wide contract services efficiencies and adjustments.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$2,157	\$628	\$6,042	\$5,414

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2016 request reflects increases in funding associated with the delivery of the C-27J aircraft, intra-agency training, and follow-on expenses required to meet operational readiness requirements.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$532	\$498	\$196	(\$302)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft, C4ISR) and supporting systems. The FY 2016 request reflects the net effect of funding associated with divestment or delivery of new assets.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$32,560	\$30,582	\$30,506	(\$76)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational, training and shore support units. The FY 2016 request reflects a decrease of funding associated with management and technology efficiency initiatives and the rebalancing of medical support services.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$4,931	\$4,518	\$4,523	\$5

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for Training Center classrooms. The FY 2016 request reflects an increase associated with support necessary to sustain operations and maintenance of the boat forces, aircrew, and rescue swimmer training facility.

IV. Operating Funds and Unit Level Maintenance Mission Statement

Requests funding to units, facilities, and activities that are under the direct operational and administrative control of the Coast Guard's Atlantic Area and Pacific Area Commanders, operational units as well as headquarters units. These include National Security Cutters (NSCs), High Endurance Cutters (WHECs), Medium Endurance Cutters (WMECs), Communications Stations, Sector Commands, Stations, Marine Safety and Security Teams (MSSTs), various support units, and Area offices as applicable. Request includes funding to sustain normal operating costs that include energy, equipment, parts, and supplies for routine maintenance of operational assets and shore facilities, and administrative supplies.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$80,608	\$70,841	\$71,356	\$515

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2016 request reflects costs associated with the acceptance of new assets to include: training, delivery acceptance, and site visits. Also included are costs associated with the necessary travel for planned asset decommissionings and the operation of a temporary forward operating air base at Naval Base Ventura County due to the cancellation of the Coast Guard's lease at Los Angeles International Airport.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
22.0 Transportation of Things	\$32,342	\$30,380	\$30,453	\$73

Transportation of things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. The FY 2016 request reflects the net result of funding associated with the delivery of new assets.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.2 Rental Payments to Others	\$22,721	\$18,757	\$19,699	\$942

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The FY 2016 request reflects lease of facilities associated with WMSL Crew Golf facilities and the lease of space for Sector Anchorage, AK.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$94,805	\$92,587	\$94,773	\$2,186

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft; utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements; and postal costs. The FY 2016 request reflects the net impact of divestment or delivery of new assets and operational adjustments.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$35,599	\$33,218	\$28,332	(\$4,886)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2016 request reflects the net result of funding associated with the delivery of new assets and a reduction to spending by Coast Guard headquarters directorates.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$230,002	\$205,707	\$202,448	(\$3,259)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2016 request reflects the net result of funding associated with the delivery of new assets, a reduction to professional contract services, and the operation and maintenance of sUAS onboard the WMSL by contracted personnel.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$60,393	\$56,616	\$56,655	\$39

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2016 request reflects the net result of funding for the planned move from Coast Guard Air Station Los Angeles to Coast Guard Air Stations San Francisco and Humboldt Bay due to the lease cancellation at Los Angeles International Airport.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.4 Operation and Maintenance of Facilities	\$37,552	\$40,276	\$38,673	(\$1,603)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2016 request reflects the net result of changes to professional services contracts.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$35,356	\$21,862	\$38,026	\$16,164

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2016 request reflects the net effect of funding associated with divestment or delivery of new assets.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.8 Subsistence & Support of Persons	\$747	\$913	\$681	(\$232)

Subsistence and support of persons include contractual services with the public or another Federal Government account for the board, lodging, and care of persons. The FY 2016 request reflects the net impact of follow-on funding for FY 2015 budget initiatives.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$423,400	\$385,178	\$392,551	\$7,373

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2016 request reflects the net effect of funding associated with divestment or delivery of new assets, a change to the Coast Guard's fuel management program, and fuel purchases associated with planned operations.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$46,905	\$28,207	\$29,293	\$1,086

This object class covers the purchase of capitalized and non-capitalized assets. The FY 2016 request reflects the net effect of funding associated with divestment or delivery of new assets.

V. Centrally Managed Accounts Mission Statement

This request provides funding for accounts centrally managed at Coast Guard Headquarters such as: Federal Telephone System (FTS) accounts, Standard Workstation recapitalization, ammunition replenishment, recapitalization of buoys, GSA Rent, postal expenses and Mass Transit benefits. Request includes critical support elements for Coast Guard operations. Lease of adequate office space, effective communications (computers, phones, etc.), and operational gear (ammunition) are all part of those critical support requirements.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$53,018	\$60,082	\$57,940	(\$2,142)

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The FY 2016 request reflects net impact of increased costs associated with GSA buildings occupied by the Coast Guard and the termination of GSA rental agreements as part of the consolidation of Coast Guard offices in the National Capital Region.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$67,858	\$54,598	\$55,947	\$1,349

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters and aircraft, utility costs, postal costs and cutter, boat and aircraft fuel requirements. The change reflects the net impact of annualization of prior year initiatives, asset decommissionings, operational adjustments, and management efficiencies.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$58,797	\$60,975	\$58,568	(\$2,407)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals development, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2016 request reflects the net of follow-on funding for new assets and management efficiencies associated with contract services.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$100,026	\$98,535	\$98,539	\$4

Purchases from Government Accounts include costs for purchases from other Federal government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g., MIPR). The FY 2016 request reflects the annualization of prior year initiatives.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$9,987	\$15,118	\$12,992	(\$2,126)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2016 request reflects the net of funding associated with divestment or delivery of new assets, management efficiencies, and operational adjustments.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$6,411	\$5,762	\$5,684	(\$78)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare parts inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2016 request reflects the net change associated with the FY 2015 ATON programmatic reduction and new surface asset follow-on costs.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$30,074	\$31,329	\$31,151	(\$178)

Equipment provides for the purchase of capitalized and non-capitalized assets. The FY 2016 request reflects the net change associated with an increase for new surface and air asset follow-on costs and divestiture of assets.

VI. Intermediate and Depot Level Maintenance Mission Statement

Request provides service-wide funding to support the major maintenance and repair of Coast Guard aircraft, electronics systems, shore facilities and vessels not appropriated in the Coast Guard Acquisition, Construction & Improvements (AC&I) appropriation. This includes materials, services and supplies necessary for depot-level repair of buildings, structures, ground, towers, runways, aids to navigation, aircraft, and aircraft equipment.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$9,005	\$7,231	\$7,260	\$29

Travel funds cover the costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2016 request reflects travel funding requirements associated with the addition of follow-on shore support personnel for new surface assets.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$5,225	\$5,343	\$6,827	\$1,484

Communications, utilities, and miscellaneous charges include all payments for rent or lease of information technology equipment and services, postal services and equipment, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters and aircraft, utility costs, postal costs, and cutter, boat, and aircraft fuel requirements. The FY 2016 request reflects an increase for new surface asset follow-on costs.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$61,050	\$55,483	\$59,317	\$3,834

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, state and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2016 request reflects an increase for mission support for new aviation assets.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$397,657	\$368,523	\$352,110	(\$16,413)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals development, architectural and engineering services, independent/third-party analysis of Coast Guard programs, and other initiatives focused on improving performance of Coast Guard missions. The FY 2016 request reflects the net change associated with targeted reductions to Professional and Assistance contracted services and increases for remediation of cyber-security vulnerabilities.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$11,202	\$10,562	\$10,536	(\$26)

Purchases from Government Accounts include costs for purchases from other Federal government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g., MIPR). The FY 2016 request reflects the net change associated with new surface asset follow-on costs and changes to contract services.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.4 Operation and Maintenance of Facilities	\$192,955	\$156,960	\$160,361	\$3,401

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. This request provides for the operation and maintenance of recapitalized shore facilities scheduled for completion prior to FY 2016.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$168,530	\$139,706	\$149,254	\$9,548

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats and aircraft) and supporting systems. The FY 2016 request reflects an increase for new asset follow-on costs.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$220,124	\$207,662	\$206,776	(\$886)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare parts inventories for cutters, boats and aircraft, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2016 request reflects the net result of funding associated with the delivery and decommissioning of assets.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$44,462	\$40,778	\$40,653	(\$125)

This object class covers the purchase of capitalized and non-capitalized assets. The FY 2016 request reflects the net change associated with new surface asset follow-on costs.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
32.0 Land and Structures	\$10,086	\$7,206	\$9,168	\$1,962

The FY 2016 request reflects an increase associated with facility upgrades at Air Stations San Francisco and Humbolt Bay to accommodate the relocation of Air Station Los Angeles as well as facility upgrades associated with establishment of the support structure for C27Js.

Physicians' Comparability Allowance (PCA) Worksheet

Department of Homeland Security: U.S. Coast Guard

Table 1

	PY 2014 (Actual)	CY 2015 (Estimates)	BY 2016 (Estimates)	
1) Number of Physicians Receiving PCAs	2	4	4	
2) Number of Physicians with One-Year PCA Agreements	0	0	0	
3) Number of Physicians with Multi-Year PCA Agreements	2	4	4	
4) Average Annual PCA Physician Pay (without PCA payment)	\$146,355	\$146,355	\$146,355	
5) Average Annual PCA Payment	\$30,000	\$30,000	\$30,000	
6) Number of Physicians Receiving PCAs by Category (non-add)	Category I Clinical Position	0	0	0
	Category II Research Position	0	0	0
	Category III Occupational Health	2	4	4
	Category IV-A Disability Evaluation	0	0	0
	Category IV-B Health and Medical Admin.	0	0	0

- 7) If applicable, list and explain the necessity of any additional physician categories designated by your agency (for categories other than I through IV-B). Provide the number of PCA agreements per additional category for the PY, CY and BY.

N/A

- 8) Provide the maximum annual PCA amount paid to each category of physician in your agency and explain the reasoning for these amounts by category.

During FY' 14, \$75,000 in PCA was paid to three Coast Guard physicians in Category III at the National Maritime Center (NMC). One physician was hired on 20OCT13 and departed on 19APR14 for other job opportunities

- 9) Explain the recruitment and retention problem(s) for each category of physician in your agency (this should demonstrate that a current need continues to persist).

The NMC is situated in the National Capital Region commuting area with four private hospitals, a major VA Regional Medical Center, two additional local VA facilities, and a major Army medical command and is therefore subject to a significant level of competition in the hiring of physicians. In addition, the VA and numerous other agencies are authorized by P.L. 108-445 to pay market level physician salaries that the Coast Guard cannot compete with as evidenced by the declination of several candidates for physician positions. For example, an entry level physician at the VA is now paid approximately \$195,000 for the level of experience expected to manage a National Safety Program while the best the Coast Guard can offer at the GS-14 level is \$166,771 annually without recurring retention bonuses throughout the entirety of the physician's Coast Guard career. Therefore, recruiting an experienced physician with a unique specialty such as occupational medicine is made more difficult by the higher salary paid by the VA under current law. The local VA Center regularly has approximately 10 vacancies announced at salary ranges from \$99,000 to \$375,000 per year. Until implementing PCA, NMC experienced three long term vacancies of category III physicians with few qualified candidates; one applicant presented a revoked medical license and numerous qualified applicants declined based on salary or retirement benefit considerations.

- 10) Explain the degree to which recruitment and retention problems were alleviated in your agency through the use of PCAs in the prior fiscal year.

NMC utilizes a combination of Recruitment incentives (Superior Qualifications Appointments combined with recruitment and retention bonuses), in addition to PCA, to approach the salaries offered by VA and private sector physicians in the national Capitol region (NCR). In addition, the recent federal civilian employee pay freeze has exacerbated the need to rely on retention bonuses to retain the physicians currently employed at the NMC.

- 11) Provide any additional information that may be useful in planning PCA staffing levels and amounts in your agency.

BUDGET REQUEST AND SUPPORTING INFORMATION

United States Coast Guard Environmental Compliance and Restoration

I. Appropriation Overview

A. Mission Statement for Environmental Compliance and Restoration:

The Environmental Compliance and Restoration (EC&R) appropriation provides funding for environmental cleanup, sustainment, and restoration of current and former contaminated Coast Guard facilities, and engineering remedies on Coast Guard assets for the purpose of obtaining or restoring compliance with environmental laws and preventing contamination and environmental damage.

EC&R funding ensures the Coast Guard maintains its responsibilities associated with environmental stewardship. The Coast Guard complies with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Superfund Amendments and Reauthorization Act, Resource Conservation and Recovery Act (RCRA), and other applicable Federal or State laws to clean up contamination at current and former Coast Guard properties.

B. Budget Activities:

EC&R activities include site investigation and remediation activities at shore facilities; to include Coast Guard property slated for divestiture or transfer, and engineering changes to Coast Guard buildings and structures for the purpose of complying with environmental laws and preventing contamination and environmental damage.

C. Budget Request Summary:

The FY 2016 President's Budget request provides 25 positions, 24 FTE, and \$13.269 million for EC&R activities. This request provides for environmental remediation and restoration of Coast Guard facilities, including site assessment, remediation, and long term monitoring and management at Coast Guard facilities.

This request continues long term monitoring at 33 sites, begins or continues investigation/remediation site work for 21 sites, and displays a commitment to ongoing identification, investigation, cleanup, and long-term management of contamination from hazardous substances and pollutants for Coast Guard systems, buildings, structures, and assets.

III. Current Services Program Description by PPA

**Department of Homeland Security
U.S. Coast Guard
Environmental Compliance and Restoration
Program Performance Justification**
(Dollars in Thousands)

PPA: Environmental Compliance and Restoration

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	25	25	\$13,164
FY 2015 President's Budget	25	24	\$13,214
2016 Adjustments-to-Base	-	-	\$55
FY 2016 Current Services	25	24	\$13,269
FY 2016 Program Change	-	-	-
FY 2016 Total Request	25	24	\$13,269
Total Change 2015 to 2016	-	-	\$55

The FY 2016 President's Budget requests 25 positions, 24 FTE, and \$13.269 million for EC&R.

CURRENT SERVICES PROGRAM DESCRIPTION:

The purpose of the EC&R Appropriation is to carry out a program of environmental compliance and restoration at current and former Coast Guard facilities. The program involves the identification, investigation, cleanup, and long-term management of contamination from hazardous substances and pollutants, as well as engineering changes (i.e., physical changes) to Coast Guard systems, buildings, structures, and assets in order to bring Coast Guard facilities into compliance with environmental laws, to prevent contamination, or to preclude an environmental liability.

Funding requested is planned to be allocated by EC&R activity as follows:

- | | |
|---|-----------------|
| 1. Site Investigation/Remediation Activities (21 locations) | \$6.939 million |
| 2. Long Term Management of Restoration Project Sites (36 locations) | \$2.183 million |
| 3. Environmental Compliance Projects and Activities | \$750,000 |
| 4. Salaries | \$3.397 million |

Depending on project complexity and conditions identified during routine monitoring, detailed site surveys, or field work project, sites may undergo investigation and assessment, remediation, restoration, and/or long term management in a phased approach, requiring a funding distribution across multiple years. The table below provides a detailed listing of each planned FY 2016 EC&R project based on current information regarding prioritization of work. The list may be adjusted as new information is discovered based upon the completion of assessments and project risk priority.

Project Title	Estimated Cost (\$K)
Site Investigation/Remediation Activities	
Base Mobile - Site Remediation (Groundwater Contamination)	65
Station Fort Pierce - Site Remediation (Groundwater Contamination)	140
Station Grand Haven - Site Remediation (Underground Storage Tank (UST) Release)	315
Omega Station Oahu - Site Remediation (Polychlorinated Biphenyls (PCB) Soil Contamination)	730
Anclote Key Lighthouse - Site Remediation (Lead & Mercury Soil Contamination & Groundwater Contamination)	945
Egmont Key Lighthouse - Site Remediation (Lead Soil Contamination)	85
Air Station Annette Island - Site Remediation (Various Locations with Multiple Contamination Release)	2,000
Mount Diablo Radio Station - Site Remediation (Lead & Total Petroleum Hydrocarbons (TPH) Soil Contamination)	995
Marine Safety Unit Valdez - Site Remediation (UST Release)	370
LORAN Station Saipan (former) - Site Investigation (Potential Improper Waste Disposal)	125
Robinson Point Light Station - Site Remediation (Lead & TPH Soil Contamination)	40
Aiki Point Light Station - Site Remediation (Lead Soil Contamination)	70
Station Rochester - Site Remediation (UST Release)	100
Barnegat Lighthouse - Site Remediation (UST Release)	70
Hanapepe Point Lighthouse - Site Remediation (Lead Soil Contamination)	30
Nawiliwili Harbor Lighthouse - Site Remediation (Lead Soil Contamination)	30
Pauwela Point Lighthouse - Site Remediation (Lead Soil Contamination)	30
Cape Kumukahi Point Lighthouse - Site Remediation (Lead Soil Contamination)	30
Beavertail Lighthouse - Site Remediation (Lead Soil Contamination)	150
Watch Hill Lighthouse - Site Remediation (Lead Soil Contamination)	210
LORAN Station Ulithi (former) - Site Remediation (Asbestos Containing Materials & Lead-Based Paint Contamination)	409
Subtotal Site Investigation/Remediation Activities	\$6,939

Project Title	Estimated Cost (\$K)
Long Term Management of Remediation Projects	
CG Yard (Site 9) - Long Term Monitoring (LTM)	17
Base Kodiak / Site 1 (CG Landfill) - LTM (Post-closure Maintenance & Monitoring)	57
Base Kodiak / Site 7A (Former Barrel Storage Area) - LTM	132
Base Kodiak / Site 6A (Motor gasoline) - Post-Closure Maintenance & Annual Groundwater Monitoring of UST Leaks	57
Base Kodiak / Site 2 (Former Navy Landfill) - LTM	42
Base Kodiak / Site 3 (Former Dry Cleaning/Laundry Facility) – LTM (Post Site Restoration)	258
Base Kodiak / Site 10/11 (Air Station Paint Storage) - LTM (JP-5 Spill Cleanup)	240
Base Kodiak / Site 23 (Former Power Plant) - (Additional Corrective Measure Study & LTM)	178
Base Elizabeth City / Bldg 77 (Stripping Shop Release) LTM of Ground Water Contamination	40
Base Elizabeth City / Solid Waste Management Unit (SWMU) 32/37/38 - LTM (Maintenance & Monitoring of Phyto remediation at Former Fuel farm)	115
Base Elizabeth City / SWMU 64 (Bldg 75 Spent Solvent Release) - LTM	65
Base Elizabeth City / Bldg 79 - LTM (Electroplating Shop Release)	35
Base Elizabeth City / SWMU 28/56 (North Beach disposal Area) - LTM	180
Air Station Traverse City - Site Cleanup of Asbestos Containing Materials (ACM) (Annual Site Inspection & Cleanup of Transite Siding)	25
Base Elizabeth City / SWMU 33 (Former Waste Storage Area) - Site Restoration LTM	45
Base Elizabeth City / SWMU 15 (Former Burn Area & Landfill) - LTM (Phyto remediation System Operations and Maintenance)	35
CG Yard (Site 7) - LTM & Land Use Controls (LUCs)	36
Base Ketchikan (Marine Railway Area) - LTM (Marine Sediments Metals Contamination)	14
Base Elizabeth City / SWMU 62 - LTM (Seaplane Pipeline Release Site)	25
Base Elizabeth City / SWMU 55 (Gate 1) - LTM	15
Training Center Petaluma (Small Arms Firing Range) - LTM (Groundwater monitoring)	130

Project Title	Estimated Cost (\$K)
Egmont Key Lighthouse - LTM (Natural Attenuation of Groundwater Contamination)	8
Station Sabine - Site Restoration (Groundwater Contamination)	35
LORAN Station Yap (former) - LTM (Post - Cleanup Monitoring)	100
Detachment Sandy Hook - LTM (Monitoring of Natural Attenuation)	100
Base Elizabeth City / Former Navy Dispensary & Barracks Site - LTM (Natural Attenuation of Groundwater)	20
Guard Island Lighthouse - LTM (Inspection/Monitoring of Land Cap & Institutional Controls)	5
Station Bodega Bay (Former Drum Storage Area) - LTM (Ground Water Sampling)	65
Station Port Angeles - Site Restoration (Groundwater monitoring @ former UST)	23
Air Station Clearwater - LTM (Monitoring of Natural Attenuation of Fuel Release at Fuel Handling Hydrant #3)	6
Air Station Clearwater (Soil Contamination Former Burn Pit) - LTM	65
Sentinal Island Lighthouse (former) - LTM/Inspections of Soil Cap	11
Coast Guard Academy (Shipyard Parcel 1) - LTM (Inspection/Monitoring of Engineering Controls)	4
Subtotal Long Term Management of Remediation Projects	\$2,183
Environmental Compliance Projects & Activities	\$750
Salaries	\$3,397
Total FY 2016 Request	\$13,269

IV. Program Justification Changes

Environmental Compliance and Restoration Mission Statement

Environmental Compliance and Restoration (EC&R) will provide for (1) environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, and (2) engineering fixes on Coast Guard assets to comply with environmental laws and keep environmental damage from developing. Failure to meet restoration or compliance responsibilities could subject the Coast Guard to fines, penalties, or shutdown of operational assets by environmental regulators. In addition, Coast Guard EC&R funding supports site investigation and remediation activities at shore facilities slated for property divestiture or transfer actions.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$2,659	\$2,469	\$2,509	\$40
11.5 Other Personnel Compensation	\$30	\$17	\$17	-
11.6 Military Personnel-Basic Allowance for Housing	\$32	\$25	\$25	-
11.7 Military Personnel	\$80	\$60	\$61	\$1
12.1 Civilian Personnel Benefits	\$744	\$766	\$780	\$14
12.2 Military Personnel Benefits	\$7	\$5	\$5	-
Total, Salaries & Benefits	\$3,552	\$3,342	\$3,397	\$55

The FY 2016 request includes the proposed pay raise (1.3 percent for military and 1.3 for civilians), medical benefits, and other mandatory personnel entitlements. The increase in civilian allowances is due to a rise in government cost contribution for various Federal Employee benefits to include Federal Government Life Insurance, Federal Employee Health Benefits, Federal Government Thrift Savings Plan contribution, and the requirement for non-recurring funding for the compensable workday of February 29, 2016.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
24.0 Printing and Reproduction	\$1	\$4	\$2	(\$2)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. Funding includes charges associated with publication of Coast Guard training manuals, operational instructions, reports and other Coast Guard directives. Funding in FY 2016 reflects the anticipated need.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$395	\$1,513	\$594	(\$919)

Advisory and assistance includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Funding in FY 2016 reflects the anticipated need.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$4,675	\$17,917	\$9,087	(\$9,092)

Other services include contracts with non-Federal sources that are not otherwise classified under Object Class 25. This request reflects consideration of prior-year unobligated balances.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$1,230	\$4,714	\$60	(\$4,654)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. FY2016 request reflects the anticipated need for supplies and material cost.

BUDGET REQUEST AND SUPPORTING INFORMATION

United States Coast Guard Reserve Training

I. Appropriation Overview

A. Mission Statement for Reserve Training:

As the principal Federal agency charged with maritime safety, security, and environmental stewardship, the Coast Guard protects vital economic and security interests of the United States from internal and external maritime risks and threats. The Coast Guard Reserve may be called upon to provide units and personnel to augment active duty Coast Guard forces during times of crisis, domestically or worldwide.

B. Budget Activities:

The Reserve Training appropriation facilitates training, operation, and administration of the Coast Guard Reserve Program. Coast Guard Reserve Forces provide qualified and trained personnel for active duty in the event of conflict, national emergency, or natural and man-made disasters. Reservists maintain their readiness through mobilization exercises and duty alongside regular Coast Guard members during routine and emergency operations. Reservists will continue to serve as a cost-effective surge force to enhance the Nation's resilience to disasters.

C. Budget Request Summary:

The FY 2016 President's Budget requests 416 positions, 416 FTE, and \$110.614 million for Reserve Training. This request provides necessary resources for the training, operation, and administration of the Coast Guard Reserve Program, including training, equipping, and ensuring the readiness of a 7,000 member Coast Guard Reserve workforce.

Program Performance Justification**
(Dollars in Thousands)

PPA: Reserve Training

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	474	503	\$120,000
FY 2015 President's Budget	416	416	\$109,605
2016 Adjustments-to-Base	-	-	\$1,009
FY 2016 Current Services	416	416	\$110,614
FY 2016 Program Change	-	-	-
FY 2016 Total Request	416	416	\$110,614
Total Change 2015 to 2016	-	-	\$1,009

The FY 2016 President's Budget requests 416 positions, 416 FTE, and \$110.614 million for Reserve Training.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Coast Guard Reserve is the Coast Guard's surge military workforce and provides a cost-effective and versatile capacity to respond to major contingencies, such as natural and man-made disasters, maritime homeland security, national security, and other significant events.

The Coast Guard Reserve is a cornerstone of service readiness for contingency response. Coast Guard reservists also augment active duty forces through Inactive Duty Training and Active Duty Training periods. This request for funding ensures these reservists are fully trained and ready to perform vital missions when called upon to do so. Demand for Reserve support to a variety of contingencies remained high in FY 2014. As an example, a reserve force contingent was activated to support response and recovery operations related to the discharge of over 165,000 gallons of oil following the collision of the M/V Summer Wind and the "Kirby 27706" in Galveston Bay near Texas City, TX.

This request sustains 416 Full Time Support (FTS) military and civilian positions. This staff develops training policy and doctrine and manages all recruiting, formal training, personnel, and resource program oversight.

The Reserve workforce will remain a critically important component of the Coast Guard and will continue to have the requisite workforce strength to surge in response to national disasters and contingencies (i.e., flooding, earthquakes, terrorist and pollution incidents, and hurricanes).

Reserve Training Mission Statement

This PPA request funds compensation of active duty military service members and civilian personnel who support the Reserve Training program, and the 7,000 Coast Guard Reservists who are part of the Selective Reserve. This category also includes pay, allowances, employer's share of FICA, Social Security credits, operations, maintenances and other administrative expenses.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$6,575	\$6,125	\$6,216	\$91
11.3 Other than Full-Time Permanent	\$11	\$10	\$10	-
11.5 Other Personnel Compensation	\$100	\$93	\$93	-
11.6 Military Personnel-Basic Allowance for Housing	\$10,254	\$9,871	\$9,883	\$12
11.7 Military Personnel	\$76,679	\$70,365	\$71,160	\$795
11.8 Special Personal Services Payments	\$214	\$214	\$214	-
12.1 Civilian Personnel Benefits	\$1,635	\$1,585	\$1,607	\$22
12.2 Military Personnel Benefits	\$8,326	\$7,270	\$7,357	\$87
13.0 Benefits for Former Personnel	\$232	\$212	\$214	\$2
Total, Salaries & Benefits	\$104,026	\$95,745	\$96,754	\$1,009

Salaries and Benefits provide funds for compensation directly related to duties performed by active duty military and civilian personnel. The FY 2016 request includes the proposed pay raise (1.3 percent military and 1.3 percent civilian). The increase in civilian allowances is due to a rise in government normal cost contribution for various Federal Employee benefits to include Federal Government Life Insurance, Federal Employee Health Benefits, Federal Government Thrift Savings Plan contribution, and the requirement for non-recurring funding for the compensable workday of Feb 29, 2016.

BUDGET REQUEST AND SUPPORTING INFORMATION

United States Coast Guard Acquisition, Construction and Improvements

I. Appropriation Overview

A. Mission Statement for Salaries and expenses:

Acquisition, Construction and Improvement (AC&I) provides for the acquisition, construction, rebuilding, and improvement of vessels, aircraft, shore facilities and military housing, aids to navigation (ATON) systems and facilities, and command, control, communications and computer systems and related equipment. Funds appropriated for AC&I are managed by Coast Guard acquisition project managers who oversee these projects and apply best practices, in accordance with the Coast Guard's Major Systems Acquisition Manual (MSAM) and applicable Department of Homeland Security (DHS) management directives, to optimize the return on recapitalization investments.

B. Budget Activities:

The AC&I appropriation funds the acquisition of new capital assets, construction of required facilities, and physical improvements to existing facilities and assets. The appropriation covers Coast Guard-owned and operated vessels, aircraft, shore facilities and other items such as command, control, communications and computer equipment. Through processes documented in the MSAM, acquisition managers are required to follow a continuum of activities ranging from pre-acquisition concept development to deployment and sustainment. Activities and documentation produced throughout the acquisition lifecycle inform budget requests and budget-related project activities

C. Budget Request Summary:

The FY 2016 President's Budget requests 898 positions, 881 FTE, and \$1.017 billion for AC&I. The following is the funding for each sub-appropriation:

- Vessels - \$533,900,000
- Aircraft - \$200,000,000
- Other - \$65,100,000
- Shore and ATON - \$101,400,000
- Personnel and Management - \$116,868,800

FY 2016 Total Request	-	-	\$533,900
Total Change 2015 to 2016	-	-	(\$269,100)

The President's Budget requests \$533.900 million for AC&I.

SUBAPPROPRIATION DESCRIPTION:

Primary operational resource supported: Surface Assets

The Vessels subappropriation provides funding to recapitalize and/or improve the Coast Guard's fleet of boats and cutters. With many of the Coast Guard's cutters operating beyond their planned service life, these recapitalization and sustainment projects are critical to ensuring the continued mission effectiveness and readiness of the Coast Guard's surface fleet. FY 2016 funding continues initial work towards acquisition of a new Polar Icebreaker; supports the Survey and Design of Vessels and Boats; including a material condition Assessment on POLAR SEA, and continues the National Security Cutter (NSC), Offshore Patrol Cutter (OPC), Fast Response Cutter (FRC), Cutter Boats, and In-Service Vessel Sustainment (ISVS) projects. The Coast Guard's fleet of boats and cutters supported within this program collectively perform all eleven statutory Coast Guard missions in the offshore, coastal and inland operating areas.

The Coast Guard's future fleet of NSCs, OPCs and FRCs are replacing the current fleet of High and Medium Endurance Cutters and Island-Class Patrol Boats. These cutters will provide improved endurance, speed, sea-keeping, surveillance, and persistent presence in the offshore area of responsibility (AOR).

Total Change 2015 to 2016	-	-	\$132,000

The President's Budget requests \$200.000 million for AC&I.

SUBAPPROPRIATION DESCRIPTION:

Primary operational resource supported: Aviation Assets

The Aircraft subappropriation provides funding for recapitalization and sustainment of the Coast Guard's fleet of aging aircraft. It is comprised of fixed and rotary-wing aircraft sustainment projects.

The Coast Guard's fleet of fixed and rotary wing aircraft supported within this program collectively performs all Coast Guard missions in the Offshore, Coastal and Inland AORs. The land-based fixed-wing aircraft include the HC-144A, HC-130H/J and HC-27J aircraft. The HC-144A is the Coast Guard's primary medium-range fixed-wing aircraft. The Coast Guard's fleet of existing HC-130Hs and HC-130Js provide long range surveillance fixed-wing capability. Each of these fixed-wing aircraft enables the Coast Guard to conduct airborne surveillance, detection, classification and identification of vessels and other aircraft. The newly acquired HC-27J aircraft will provide additional maritime patrol capability as they become operational in the Coast Guard fleet.

The Coast Guard's fleet of rotary wing aircraft includes the HH-60 and HH-65 helicopters. The HH-60 is a medium-range recovery helicopter, and the HH-65 is a short-range recovery helicopter. Both aircraft are deployed from land-based air stations; the HH-65 is also deployed routinely aboard the Coast Guard's fleet of NSCs, WHECs, and WMECs.

FY 2016 Total Request	-	-	\$65,100
Total Change 2015 to 2016	-	-	\$7,800

The President's Budget requests \$65.100 million for AC&I.

SUBAPPROPRIATION DESCRIPTION:

Primary operational resource supported: Command, Control, Communications, Computers and Information Technology (C4IT), Acquisition Management

The Other subappropriation procures hardware and software, including initial acquisition, development or construction or improvement of any system, software or equipment costing over \$1.0 million per usable segment or item, or \$10.0 million total project cost. In FY 2016, funding will support continued progress on build-out of Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) systems, and CG-Logistics Information Management System (CG-LIMS). This subappropriation also provides funding for Program Oversight and Management (PO&M).

The Coast Guard leverages its C4ISR capability to effectively execute a broad mission set in an immensely challenging operating environment. Assets are able to receive, evaluate and act upon information obtained through the capability provided by the systems supported in this program. The C4ISR project provides standardized capability to major cutters and aircraft, facilitating interoperability and information sharing. The CG-LIMS project is replacing redundant and obsolete logistics systems with one single integrated IT system capable of providing enhanced configuration management, supply support, and improved financial accountability. PO&M is critical for efficient oversight and execution of the Coast Guard's acquisition programs.

Total Change 2015 to 2016	-	-	\$60,820

The President's Budget requests \$101.400 million in FY 2016 for AC&I.

SUBAPPROPRIATION DESCRIPTION:

Primary operational resource supported: Shore Units, Military Housing and Aids-to-Navigation (ATON)

The AC&I shore facilities, military housing and ATON subappropriation provides funding for the acquisition, construction, rebuilding, and improvement of the Coast Guard's shore facilities, military housing, ATON and related equipment. Shore facilities are critical to supporting all Coast Guard operations and addressing the shore-side needs of the service's operational communities. This funding also provides infrastructure upgrades at new cutter homeports and air stations to ensure these facilities are fully functional and ready prior to arrival of new assets.

Total Change 2015 to 2016	-	-	\$1,556

The President's Budget requests 898 positions, 881 FTE, and \$116.869 million for AC&I.

SUBAPPROPRIATION DESCRIPTION:

Primary operational resource supported: Personnel to support program management of all acquisitions.

AC&I has a specific annual subappropriation to fund "personnel compensation and benefits and related costs." The primary activities include project management, financial management, support services, training, and workforce certification. Coast Guard acquisition programs rely on an appropriate level of government acquisition professionals with the competencies and capacity to manage acquisitions in accordance with CG and DHS policies, while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act, DHS certification level requirements, and OMB Circular A-76.

Survey and Design - Vessels and Boats

\$9,000

Project Description, Justification and Scope

Funds survey and design work in direct support of the In-Service Vessel Sustainment (ISVS) project. As in-service vessels continue to age, this program conducts detailed hull condition surveys, along with engineering design work that will be used to plan future projects. Examples of the work to be performed under this project include: detailed assessment of the material condition of the current fleet's hull, mechanical and electrical systems and subsystems; study and analysis of engineering systems to evaluate suitability for use in sustainment projects; conducting market research for systems and subsystems and assessment of system alternatives. Preliminary survey and design work is essential to properly plan and scope sustainment projects, such as Midlife Maintenance Availabilities (MMA), Mission Effectiveness Projects (MEP) and Service Life Extension Projects (SLEP).

This request provides funding to support multi-year engineering survey and design efforts for CGC HEALY (420-foot Icebreaker) and the 175-foot Coastal Buoy Tender (WLM), and a Material Condition Assessment (MCA) for CGC POLAR SEA.

HEALY is a multi-mission platform that primarily supports research missions in the Arctic. HEALY is also capable of performing search and rescue, ship escort, environmental protection, and enforcement of laws and treaties as operations dictate. Engineering evaluations indicate that certain systems, including surface search radar, motor generator sets, and the main propulsion control and monitoring system potentially need to be replaced or refurbished to prevent degradation of operational readiness and to stabilize maintenance costs. Funds requested will be used to assess these systems to determine a proper course of action.

The 14 175-foot Coastal Buoy Tenders are tasked with maintaining aids to navigation, search and rescue, law enforcement, migrant interdiction, marine safety, environmental incident response, and light ice breaking operations. The 175-foot Coastal Buoy Tenders began entering service in 1996 and are approaching the need for MMA. Funds requested will be used to assess weight handling equipment, refrigeration systems, main propulsion control and monitoring system, habitability outfitting, and similar systems to determine if recapitalization due to obsolescence is required.

POLAR SEA is one of two Coast Guard heavy icebreakers capable of providing icebreaking mission support in both Polar Regions. Currently POLAR SEA is not operational and is moored at Base Seattle in an inactive status. Funding is for a MCA and follow-on analysis that will enable the Coast Guard to identify and assess the level of effort required should a decision be made to return the vessel to active service and extend its service life.

Early planning, requirements development, and cost estimating in support of acquisition and sustainment projects are critical to proper planning and acquisition oversight.

This project will be conducted in compliance with the National Environmental Policy Act (NEPA).

In-Service Vessel Sustainment (ISVS)

\$68,000

Project Description, Justification and Scope

The In-Service Vessel Sustainment (ISVS) program is designed to perform life-cycle event vessel repair availabilities such as Mission Effectiveness Projects (MEP), Mid-Life Maintenance Availabilities (MMA), and Service Life Extension Projects (SLEP) on the Coast Guard's existing fleet of vessels.

FY 2016 funding completes the third of four phases of the CGC EAGLE SLEP; continues SLEP efforts on the 140-foot ice breaking tugs (WTGB); continues MMA efforts on the 225-foot ocean going buoy tender (WLB) fleet; and continues sustainment project work on the 47-foot Motor Life Boats (MLB).

This program ensures in-service vessels meet or exceed their design service life through the recapitalization of hull, mechanical, electrical (HM&E) and electronic systems that have been identified as the highest contributors to maintenance costs and decreasing operational availability.

CGC EAGLE (WIX-327): CGC EAGLE, which was built in 1936, completed her last SLEP in 1983. Engineering surveys indicated EAGLE required a second SLEP to ensure safe and reliable operation. EAGLE's SLEP is divided into four phases to allow the cutter to meet annual operational commitments. Systems targeted for recapitalization include: gyrocompass, anchor windlass, main engine, waste water treatment systems, reverse osmosis system, berthing area habitability, and masts. Additionally, an oily water separator upgrade, and trash compactor space re-configuration will support compliance with 21st Century environmental regulations.

140-foot Ice Breaking Tugs (WTGBs): The lead ship in this class was placed in service in 1978 and has been in continuous service for 32 years. This sustainment program is the first to be performed on this fleet. Specific system upgrades and improvements to be addressed include: propulsion plant, heating, ventilation, and air conditioning (HVAC) systems, installation of an engine room fire suppression system, boat launching davit replacement, exhaust configuration modifications, and crew habitability improvements to meet current standards. Additionally, an upgraded oily water separator will support compliance with 21st Century environmental regulations.

225-foot Ocean Going Buoy Tenders (WLBs): This class was placed in service in 1996 and was designed to meet a 30-year service life. Achieving that 30-year service life is predicated upon performing a mid-life availability to address obsolescence of select engineering systems. The WLB MMA is intended to include a stability assessment; electrical load analysis; upgrades to the machinery control system, controllable pitch propeller system, and HVAC systems; an overhaul of the buoy tending crane and other auxiliary systems; topside preservation; overhauls of deck equipment and weight handling gear; and crew habitability updates.

47-foot Motor Life Boat (MLB): The fleet of 47-foot MLBs was constructed from 1997 to 2003 and was designed for a 25-year service life. The boats continue to serve, but many of the critical

systems have become obsolete or difficult to support. Engineering evaluations identified that the propulsion system (engines, reduction gears, and the integrated control system), and a variety of mission-specific equipment including the tow reel and survivor compartment components require recapitalization. To prevent loss of operational readiness and to stabilize maintenance costs, various structural repairs and watertight closure recapitalization are necessary.

FY 2014 Key Events

- Began production work on the first 140-foot WTGB SLEP;
- Began production work on the first phase of EAGLE SLEP;
- Performed condition assessments on the second and third 140-foot WTGBs in preparation for SLEP;
- Began engineering work and ordered materials for the first 225-foot WLB;
- Ordered materials for the second 140-foot WTGB SLEP.

FY 2015 Planned Key Events

- Begin production work on the second 140-foot WTGB SLEP;
- Begin production work on the second phase of EAGLE SLEP;
- Order materials for third 140-foot WTGB SLEP;
- Continue engineering work for the 225-foot WLB;
- Begin engineering work for the 47-foot MLB sustainment project.

FY 2016 Planned Key Events

- Begin production work on the third and fourth 140-foot WTGB SLEP;
- Begin production work on the third phase of EAGLE SLEP;
- Begin production work on the first 225-foot WLB and order materials for the second and third 225-foot WLB;
- Continue engineering work on 47-foot MLB sustainment project.

Funding History¹

<i>FY</i>	<i>\$K</i>	<i>Major Activity Associated with Appropriated Funding</i>
2012	\$14,800	140' WTGB SLEP

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

National Security Cutter (NSC)

\$91,400

Project Description, Justification and Scope

This funding provides \$91.4 million for the Structural Enhancement Dry-dock Availability (SEDA) on the second NSC and Post Delivery Activities (PDA) for the fifth through eighth NSCs.

These Legend Class Cutters are replacing the legacy High Endurance Cutters (HEC), built between 1967 and 1972. Compared to HECs, the NSCs provide increased endurance, intelligence, and maritime domain awareness capability in the offshore environment. The NSC, along with the Offshore Patrol Cutter (OPC), will comprise the Coast Guard's offshore response capability for the next 40 years, and is an essential element of DHS's layered security posture. NSC missions are primarily focused on drug interdiction, fisheries enforcement and defense readiness. NSCs also perform search and rescue, ports, waterways and coastal security, migrant interdiction; and serve as mobile command and control platforms for surge operations. Completion of the NSC project will improve long-term capacity and capability in the execution of long-range and extended Coast Guard mission assignments offshore and integrate operations with the Department of Defense. SEDA on NSC-1 and NSC-2 will ensure a 30 year service life of the hull structure in the planned operating environment. Funding for NSC's 5-8 Post Delivery Activities will support items necessary to make these cutters ready for operations.

FY 2014 Key Events

- Christened & Launched NSC-5;
- Constructed first 100 tons of NSC-6;
- Awarded Segment 2 LLTM and Production contract for NSC-7;
- Delivered NSC-4;
- Awarded Segment 1 LLTM for NSC-8.

FY 2015 Planned Key Events

- Keel laying for NSC-6;
- Deliver NSC-5;
- Christening & Launch of NSC-6;
- Start Fabrication (formal recognition of first 100 tons constructed) of NSC-7;
- Award Segment 2 LLTM and Production contract for NSC-8;
- Award SEDA contract for first NSC.

FY 2016 Planned Key Events

- Keel laying for NSC-7;
- Acceptance Trials for NSC-6;
- Start Fabrication of NSC-8;
- Award SEDA contract for second NSC.

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

Offshore Patrol Cutter (OPC)

\$18,500

Project Description, Justification and Scope

This funding will support technical review of Preliminary & Contract Design (P&CD) deliverables to complete the P&CD phase. Funding also provides technical support for the development of C4ISR and Combat System requirements, creation of Government Furnished Information that will inform and support production, detailed manpower analyses for crew and shore support, evaluation of P&CD contractor accounting and Earned Value Management systems, test and evaluation planning and updates to acquisition documents.

The OPC acquisition is planned to provide a capability level between the National Security Cutter (NSC) and Fast Response Cutter (FRC), and replace the Coast Guard’s fleet of Medium Endurance Cutters (MEC) – one MEC class has exceeded its designed service life and the other MEC class is approaching its end of service life. The OPC program has a two-phase acquisition strategy. In Phase I, three contracts for P&CD were awarded to competing contractors in FY14. The Administration’s request includes a General Provision permitting a transfer to the OPC project if the program is ready to award the next phase of vessel acquisition in FY 2016.

FY 2014 Key Event

- Awarded three P&CD contracts.

FY 2015 Key Event

- Evaluate P&CD contract deliverables.

FY 2016 Planned Key Events

- Evaluate P&CD contract deliverables and complete P&CD Phase I.

Funding History¹

<i>FY</i>	<i>\$K</i>	<i>Major Activity Associated with Appropriated Funding</i>

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

Fast Response Cutter (FRC)

\$340,000

Project Description, Justification and Scope

Funds production of six Fast Response Cutters (FRC), associated contract line items, project management costs, Economic Price Adjustment (EPA), Antecedent Liabilities (A/L), current year Post Delivery Activities (PDA), Government Furnished Equipment (GFE), and Logistics and Technical Support. The funding supports Base Award of the Phase II re-compete FRC production contract using Re-procurement Data Licensing Package (RDLP) deliverables. The Phase II contract will be structured with annual options for procurement of four, five, or six cutters.

The FRCs are replacing the 110-foot Island Class patrol boats and will similarly operate in the coastal zone. Examples of FRC missions include: Search and Rescue, Migrant Interdiction, Living Marine Resource Enforcement, Drug Interdiction and Ports, Waterways and Coastal Security. FRCs provide enhanced capabilities over the 110-foot patrol boats including improved C4ISR capability and interoperability; stern launch and recovery (up through sea state 4) of a 40-knot, Over-the-Horizon, 7-meter cutter boat; a remotely-operated, gyro-stabilized MK38 Mod 2 25mm main gun; improved sea keeping; and enhanced crew habitability.

Other capabilities include:

- The ability to conduct shipboard migrant interdiction evolutions, including detection, tracking, interdiction, embarkation and disembarkation, administrative processing, and retention onboard;
- The ability to patrol areas where suspected illegal migrant, drug, or fisheries activities may occur, and dispatch boarding teams to suspect vessels and subsequently escort them to their final disposition;
- The ability to search for, locate, and recover distressed mariners, provide medical assistance or evacuation, and provide safe transport. The FRC will also provide the ability to control damage to distressed vessels and other property, provide dewatering equipment and mechanical assistance, and tow disabled vessels.

FY 2014 Key Events

- Delivered FRCs #8-10;
- Awarded option for FRCs #25-30.

FY 2015 Planned Key Events

- Delivery of FRCs #11-15;
- Award option for FRCs #31-32;
- Commence Final Operational Test and Evaluation (FOT&E);
- Release Request for Proposals (RFP) for Phase II re-compete FRC production contract.

FY 2016 Planned Key Events

- Delivery of FRCs #16-20;
- Award Phase II re-compete FRC production contract, including FRCs #33-38.

Cutter Boats

\$3,000

Project Description, Justification and Scope

This request continues funding for production of multi-mission cutter boats – LRI (Long Range Interceptor) and OTH (Over The Horizon) – that will be fielded on the National Security Cutter. This request funds production of one Cutter Boat Long Range Interceptor II (CB-LRI-II), and two CB-OTH-IVs, along with project and technical support.

The CB-LRI-II is a 35-foot cutter boat. The CB-LRI-II provides enhanced capabilities compared to legacy cutter boats such as higher speeds, extended range, better sea-keeping, an enclosed cabin for crew protection, and improved communications and connectivity to the parent cutter.

The CB-OTH-IV is a 26-foot cutter boat. The CB-OTH-IV also provides enhanced capabilities compared to legacy cutter boats. The CB-OTH-IV operates beyond sight of the parent cutter (over the horizon) to deploy boarding parties to pursue and interdict targets of interest, and perform Search and Rescue (SAR) operations

FY 2014 Key Events

- Awarded CB-LRI-II production contract
- Ordered: CB-OTH-IV #10-11 and CB-LRI-II #2-6
- Delivered: CB-OTH-IV #3-9 and CB-LRI-II #2-3

FY 2015 Planned Key Events

- Order: CB-OTH-IV #12-13 and CB-LRI-II #7
- Deliver: CB-OTH-IV #10-11 and CB-LRI-II #4-6

FY 2016 Planned Key Events

- Ordered: CB-OTH-IV #14-15 and CB-LRI-II #8
- Deliver: CB-OTH-IV #12-13 and CB-LRI-II #7

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

Polar Icebreaker

\$4,000

Project Description, Justification and Scope

This funding continues initial acquisition activities for a new polar icebreaker, intended to provide continued polar icebreaking capability following the projected end of service life of CGC POLAR STAR. This effort will consider requirements analyses including the High-Latitude Mission Analysis Report and the Polar Icebreaker Business Case Analysis, in addition to the priorities of the U.S. Strategy for the Arctic Region.

This funding will be used to continue development of programmatic planning documents required under the USCG Major Systems Acquisition Manual, including a Life-Cycle Cost Estimate and modeling, simulation, and testing (as required). This funding will also support the development of an initial cutter specification. These efforts will lead to development of a Request for Proposal (RFP).

FY 2014 Key Events

- Approved Capability Development Plan ;
- Developed Preliminary Operational Requirements Document;
- Developed Alternatives Analysis Study Plan.

FY 2015 Planned Key Events

- Preliminary Operational Requirements Document approval;
- Operational Requirements Document development/approval;
- Finalize Alternatives Analysis;
- Complete Initial Life-cycle Cost Estimate;
- Conduct Feasibility Studies.

FY 2016 Planned Key Events

- Commence RFP Development;
- Commence Indicative Design.

HC-144A Conversion, Sustainment

\$3,000

Project Description, Justification and Scope

This request funds spare parts for the 18 Maritime Patrol Aircraft (MPA) and 17 mission systems pallets (MSP) on contract. The HC-144A aircraft are stationed at Mobile, Alabama; Miami, Florida; Cape Cod, Massachusetts; and Corpus Christi, Texas.

The HC-144A Ocean Sentry is a medium-range surveillance (MRS) and transport fixed-wing air capability; complementing the long-range, heavy-lift four-engine HC-130 aircraft. The two-engine high-efficiency turboprop design allows extended surveillance and quick response capability at a relatively low cost per flight hour. The HC-144A is a multi-mission platform that performs Search and Rescue; Alien Migrant Interdiction Operations; Counter-Drug; Ports, Waterways and Coastal Security; Marine Environmental Protection; and International Ice Patrol missions, as well as assistance with cargo and personnel transport in support of DHS and Coast Guard missions. The aircraft can perform aerial delivery of Search and Rescue equipment, such as rafts, pumps, and flares, and, can be used as an On-Scene Commander platform.

FY 2014 Key Events

- Delivered MPA #16 – 18;
- Delivered five Mission System Pallets (#13 – 17);
- Began development of next generation mission system;
- Awarded Multi-year AC&I/OE Spares contract to EADS N.A.;
- Accepted delivery of Flight Simulator to Aviation Training Center (ATC) Mobile, AL;
- Initiated operations at Air Station Corpus Christi, TX and retired final HU-25 Falcon.

FY 2015 Planned Key Events

- Procure initial spare parts and training devices;
- Continue development and testing of next generation mission system;
- Begin simulator operations at ATC Mobile;
- Complete HC-144 Ocean Sentry Refresh (OSR) installation and test flights to address system obsolescence in the HC-144 Flight Management System.

FY 2016 Planned Key Events

- Conduct Test and Evaluation of next generation mission system;
- Continue procurement of initial spare parts.

Funding History¹

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>
2010 & Prior	\$801,510	Procure MPA #1 - #14; Simulator, Initial Spares
2011	\$44,920	Procure MPA #15
2012	\$143,500	Procure MPA #16 - #17; Up to five MSPs; Initial Spares
2013	\$43,115	Procure MPA #18; Missionize MPA #18; Initial Spares

¹ Table reflects net funding, appropriations received (+/-) reprogrammings and less rescissions. FY 2015 amounts reflect the FY 2015 Request

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

HC-27J Conversion, Sustainment

\$102,000

Project Description, Justification and Scope

This request continues funding of the Asset Project Office (APO) for the HC-27J aircraft. Activities include aircraft regeneration, aircraft induction to stand-up the first operational HC-27J air station, contractor logistics support, training, spares procurement, and coordination of airworthiness evaluations with Naval Air Systems Command (NAVAIR). This funding also commences the Non-Recurring Engineering (NRE) work for aircraft missionization.

The HC-27J is a medium-range surveillance (MRS) and transport aircraft. The two-engine high-efficiency turboprop design allows extended surveillance and quick response capability at an anticipated lower cost per flight hour than the HC-130H/J. The HC-27J will be a multi-mission asset that performs Search and Rescue; Alien Migrant Interdiction Operations; Counter-Drug; Ports, Waterways, and Coastal Security; Ice Operations; and Marine Environmental Protection missions, as well as assist with cargo and personnel transport in support of DHS and Coast Guard Missions.

FY 2014 Key Events:

- Stood-up initial phase of APO;
- Established of Contractor Logistics Support contracts;
- Coordinated Airworthiness through NAVAIR;
- Began aircraft regeneration;
- Began procurement of logistics (initial issue spare parts, documentation, training).

FY 2015 Planned Key Events:

- Continue APO operations;
- Continue Contractor Logistics Support;
- Continue Airworthiness efforts coordinated with NAVAIR;
- Continue Aircraft regeneration and induction;
- Continue Procurement of logistics (initial issue spare parts, documentation, training).

FY 2016 Planned Key Events:

- Continue APO operations;
- Continue Contractor Logistics Support;
- Continue Airworthiness efforts coordinated with NAVAIR;
- Continue Aircraft regeneration and induction;
- Continue Procurement of logistics (initial issue spare parts, documentation, training);
- Begin Non-Recurring Engineering (NRE) for aircraft missionization;
- Stand-up at first operational HC-27J air station.

H-65 Conversion and Sustainment Project

\$40,000

Project Description, Justification and Scope

Continues modernization and sustainment of the Coast Guard’s H-65 helicopter fleet. The modernization effort includes reliability and sustainability improvements where obsolete components are replaced with modernized sub-systems, including an integrated cockpit and sensor suite. The project is comprised of six Discrete Segments (DS). Each of the six discrete segments consists of upgrades and modernization of aging components and sub-systems necessary to sustain readiness, stabilize maintenance costs, and comply with Federal Aviation Administration safety requirements. DS1 (Re-Engine), DS2 (National Capital Region Air Defense (NCRAD)), DS3 (Airborne Use of Force (AUF)) and DS4 (Obsolete Component Modernization) were fully funded through prior year appropriations. DS5 (Shipboard Handling, Securing and Traversing System (SHSTS)) was cancelled in FY 2012. DS6 (Automatic Flight Control System (AFCS) / Avionics) was started with prior year funding and will be continued with funds requested in FY 2016.

FY 2014 Key Events:

- Continued DS4 Full Rate Production;
- Continued DS6 (AFCS/Avionics) cockpit modernization design and integration;

FY 2015 Key Events:

- Complete DS4 Full Rate Production and transition to sustainment;
- Continue DS6 (AFCS/Avionics) cockpit modernization design and integration;
- Begin Developmental Test and Evaluation (DT&E) of MH-65E;
- Begin Validation and Verification (V&V) MH-65E build;
- Contract for Non-recurring Engineering (NRE) for AFCS upgrade.

FY 2016 Planned Key Events:

- Continue DS6 (AFCS/Avionics) cockpit modernization design and integration;
- Complete DT&E and V&V of MH-65E build;
- Begin construction of MH-65E Low Rate Initial Production Aircraft.

Funding History¹

HC-130J Acquisition, Conversion, Sustainment

\$55,000

Project Description, Justification and Scope

This request funds procurement of initial spare parts for activation of the second operational HC-130J unit. The HC-130J project includes acquisition of HC-130J aircraft, development and installation of the mission system, and logistics. Logistics includes acquiring spares, trainers, lab support, training for operations and maintenance, technical publications, facilities, and support equipment.

The HC-130J aircraft are replacing the aging Coast Guard HC-130H fleet. The HC-130J is a major contributor to performance of the Coast Guard's statutory missions with specific contributions to Department of Homeland Security and Coast Guard Programs of Maritime Law Enforcement, Maritime Response, Defense Operations, Ports, Waterways and Coastal Security, and Marine Transportation System Management.

FY 2014 Key Events

- Completed Observer Station delivery and Flight Test;
- Developed follow-on mission system architecture;
- Completed Hi-Resolution Software Test on aircraft.

FY 2015 Planned Key Events

- Award missionization of C-130J #9 (planned delivery in FY17);
- Award production and missionization of C-130J #10 & #11;
- Being testing of next generation mission system prototype;
- Procure first production Observer Station.

FY 2016 Planned Events

- Procure long lead spares to support stand up of a second HC-130J unit;
- Accept missionized C-130J #7 & 8;
- Continue testing of next generation mission system prototype.

HC-130J Funding History¹

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>
2010 & Prior	\$154,643	Missionization of aircraft; spares and Fleet Introduction.
2011	\$3,992	Remaining logistics to support 4000 program hours.
2014	\$129,210	HC-130J #11 & Mission System (MS) Installation, Follow-on mission system development, Spares, Observer Station
2015	\$8,000	Spares
<i>Total</i>	<i>\$295,845</i>	<i>Funding received for FY 2004 through FY 2014</i>

¹ Table reflects net funding, appropriations received (+/-) reprogrammings and less rescissions. FY 2015 amounts reflect the FY 2015 Request

LRS (HC-130H/J) Funding History¹

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>
2012	\$16,000	HC-130H A1U and CWB, HC-130J #9 missionization
2012	\$63,500	USAF appropriation; transferred to USCG for HC-130J baseline #9
2013	\$85,606	Procurement and missionization of HC-130J #10.
<i>Total</i>	<i>\$165,106</i>	<i>Funding received FY 2012 through FY 2015</i>

Contract Information

U.S. Coast Guard - FY 2016 Congressional Justification

Program Oversight and Management

\$20,000

Project Description, Justification and Scope

Provides funding for Program Oversight and Management (PO&M). PO&M funding supports cross-cutting activities associated with the transition of the Coast Guard’s assets from acquisition to operations, including delivery, provision of logistics, training and other services necessary to ensure seamless integration into the operational fleet.

FY 2016 Activities Supported by Program Oversight and Management (PO&M)

Procurement	Justification
Senior Oversight	Computer support, project management site visits, management support priorities and supplies.
Contract Operations	Contracting Officer (KO) contract specialist support for Major System Acquisition projects, Defense Contract Management Agency (DCMA)/ Defense Contract Audit Agency (DCAA) support services.
Acquisition Workforce Management	Program training, strategic & tactical human capital support, Sustainment/Acquisition-Composite Model (SACOM) support for staff levels, program management & acquisition support.
Acquisition Support	Program management, systems engineering, and acquisition management support.
Strategic Planning & Communication	Strategic planning support, as required by the CG and Department of Homeland Security (DHS), communication management support, external coordination support, required reports and responses.
Testing and Evaluation	Execution of Surface, Aviation, Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR), and Logistics development and testing programs.
Resource Management	Acquisition Performance Management System (APMS) support and software upgrade support, (SAS) renewal, capitalization & audit remediation support, internal controls support, and Life Cycle Cost Estimating (LCCE) support.
Acquisition Programs Oversight	Naval Sea Systems Command (NAVSEA) programmatic support, Naval Surface Warfare Center (NSWC) / NAVSEA direct-site support, program management support, and site visits.
Acquisition Programs – Aviation	Program management support to include administrative, business finance, accounting, risk management, schedule analysis, costs analysis; and site visits.
Acquisition Programs – Surface	Program management support to include administrative, business finance, accounting, risk management, schedule analysis, costs analysis; logistics support, and site visits.
Acquisition Programs – C4ISR	Program management support for program status control reporting, emerging issue resolution, cross domain issues, technical expertise; Integrated Product Team (IPT) support; and Major System Acquisition project coordinator at Space and Naval Warfare Systems Command (SPAWAR); and site visits.
Acquisition Programs Logistics	Program management support for surface & air assets, technical documentation, and performance management, and site visits.

C4ISR

\$36,600

Project Description, Justification and Scope

Funds the design, development, and information assurance posture of Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) Integrated hardware and software systems on National Security Cutters (NSC), Offshore Patrol Cutters (OPC), Fast Response Cutters (FRC), Long Range Surveillance (LRS) aircraft, and Medium Range Surveillance (MRS) aircraft. These assets are using interoperable C4ISR system designs to optimize lifecycle costs and operational effectiveness.

The requested funds in FY 2016 will be used for the following activities:

- Tailoring SEAWATCH for OPC. Provide technical assistance for the OPC project by leading the tailoring of C4ISR systems onboard the OPC;
- Supporting the development, integration, and back-fit of a Segment 2 suite for the next in-service NSC (delivered with Segment 1);
- Providing Information Assurance (IA) / TEMPEST / Certification and Accreditation (C&A) expertise to newly acquired surface and aviation assets. New USCG assets must be delivered with Authority to Operate (ATO) through the Designated Approval Agency (DAA);
- The continued operation of C4ISR development labs and test & integration labs that provide product suitability validation and proper network integration and readiness for platform acceptance and installation on surface and aviation assets;
- Necessary Diminishing Manufacturing Source (DMS) solutions for the test and integration labs and for assets in production;
- Logistics support, including analysis, development, and products, to ensure operational capability and readiness of the C4ISR systems and interfaces, and their integration with USCG assets. This includes technical and training documentation, as well as the initial sparing analysis required to transition the C4ISR system baseline release to asset managers for platform installation, testing, and deployment;
- Engineering Change Proposals (ECPs) development, including software and systems engineering oversight, to accommodate capability upgrades and design modifications related to C4ISR while the asset is in production;
- Project execution support services for planning, development, engineering, configuration management, safety, and other required disciplines.

FY 2014 Key Events:

Aviation assets

- Successfully tested new portable SIPRNET capability on HC-130 aircraft, providing for a common aviation (HC-130J/HC-144A) architecture.

Surface assets

- Installed and tested software v6.2.2 update to Segment 2 Technology Demonstrator on CGC WAESCHE;
- Provided C2 and navigation (SEAWATCH) Technical Data Package to OPC vendors;

- Obtained unclassified (SBU) Type ATO for FRC class and classified (C-LAN) Type IATO for FRC class;
- Installed Ku-Band Satellite Communications on twelve of thirteen 270' WMECs, all six 378' WHECs, and NSCs 1-3;
- Installed SEAWATCH-270 on five of thirteen 270' WMECs

Labs

- Operate verification labs to facilitate fielding of Segment 2. Operate baseline labs for NSCs and aviation assets in production.

FY 2015 Planned Key Events:

Aviation assets

- Coordinate and plan for obtaining ATO and TEMPEST certification.

Surface assets

- Back-fit Segment 2 suite;
- Procure Segment 2 suite for future back-fit;
- Continue tailoring SEAWATCH for the OPC;
- Assist the NSC project with C4ISR testing and implementing engineering changes;
- Assist FRC and NSC projects with achievement of ATO and conducting TEMPEST inspections.

Labs

- Operate verification labs to facilitate fielding of Segment 2.
- Posture labs for transition to sustainment.

FY 2016 Planned Key Events:

Aviation assets

- Coordinate and plan for obtaining ATO and TEMPEST certification.

Surface assets

- Back-fit Segment 2 suite;
- Continue tailoring SEAWATCH for the OPC;
- Assist the NSC project with C4ISR testing and implementing engineering changes;
- Assist FRC and NSC projects with achievement of ATO and conducting TEMPEST inspections.

Labs

- Operate verification labs to facilitate fielding of Segment 2.
- Operate baseline labs for NSCs and aviation assets in production.
- Posture labs for transition to sustainment.

Funding History¹

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Appropriation</i>
2002-2010	\$617,697	NSC, MPA/MSP Segment 1 and 2; FRC support; Cutter Segment 5
2011	\$33,333	NSC, MPA/MSP Segment 2; FRC IA support
2012	\$40,214	NSC, MPA/MSP Segment 2; Cutter Segment 5; FRC, OPC IA support
2013	\$38,523	NSC, MPA/MSP Segment 2; Cutter Segment 5; FRC, OPC IA support
2014	\$40,226	NSC Segment 2 equipment purchase; FRC/OPC IA support; OPC SEAWATCH tailoring
2015	\$36,300	NSC Segment 2 development, integration & back-fit; FRC/NSC TEMPEST inspections; OPC SEAWATCH tailoring
<i>Total</i>	\$806,293	<i>Funding received for FY 2002 through FY 2015</i>

Segment 1 developed a closed and complex C4ISR baseline for NSCs, HC-144As, and HC-130Js. Developed through the Integrated Coast Guard Systems (ICGS) contractor, this system is proprietary and does not allow the Coast Guard the ability to manage additional development outside of the prime contractor, nor does it provide an affordable means for software sustainment. Segment 1 is fully fielded.

Segment 2 began the transition of the proprietary system developed in Segment 1 towards an open architecture owned and controlled by the Coast Guard. It separated the Segment 1 design into modular, scalable, functional components with clear interfaces allowing the Coast Guard to manage changes and sustain the system separate from the prime contractor. Segment 2 establishes a common baseline across the NSC, HC-144A, and HC-130J assets.

Segment 5 (Upgrades to existing assets) - *In-Service Cutters*: 210ft and 270ft Medium Endurance Cutter (MEC); 378ft High Endurance Cutter (HEC); *Shore Facilities*: Communications Area Master Stations (CAMS); Training Center Petaluma; Communication Stations (COMMSTAs).

CG-LIMS

\$8,500

Project Description, Justification and Scope

Funds the development and delivery of the Coast Guard Logistics Information Management System (CG-LIMS). This funding will continue CG-LIMS configuration and phased deployment to Coast Guard operational assets and support facilities. Specifically, the funding continues to support configuration and testing of the Maintenance Management, Supply Chain Management and Technical Information Management functionality. The funding will also support the implementation of CG-LIMS for fixed and rotary wing aircraft, as well as boat product lines.

CG-LIMS:

- Directly supports the Coast Guard modernization goal of a unified logistics system that improves mission-readiness, operational effectiveness, and decision-making by enabling decision support at the enterprise and tactical level;
- Enables product line management by providing total asset visibility throughout the enterprise;
- Will be the tool through which all maintenance is managed and how the enterprise supply chain is driven;
- Will organize and manage all technical information relating to Coast Guard assets, including technical publications and manuals, drawings, maintenance procedures, and maintenance data in the system;
- Will tightly integrate and configure the components of configuration management, maintenance management, supply chain management, and technical information management to allow efficient execution of a standardized business process.

CG-LIMS is planned for phased implementation by segments, as follows:

Segment	Functionality That Will Be Provided
1	Configuration and Maintenance Management (CM and MM)
2	Supply Chain Management (SCM)
3	Technical Information Management (TIM)

FY 2014 Key Events

- Continued development of Segments 1 CM/MM and 2 SCM;
- Continued pilot deployment with HC-144A MPA;
- Began Segment 3 TIM development;
- Established Initial Operating Capability (IOC) of CG-LIMS with HC-144A MPA.

FY 2015 Planned Key Events

- Continue development of Segments 1 CM/MM, 2 SCM, and 3 TIM;
- Plan and develop interfaces and integration with Coast Guard Financial Systems;
- Continue CG-LIMS pilot deployment with HC-144A MPA and begin induction of a second Coast Guard asset class.

FY 2016 Planned Key Events:

- Continue development of Segments 1 CM/MM, 2 SCM, and 3 TIM;

- Interface and integration with Coast Guard Financial Systems;
- Continue CG-LIMS deployment to operational units.

Funding History¹

<i>FY</i>	<i>\$K</i>	<i>Major Activity Funded by Net Appropriation</i>

U.S. Coast Guard - FY 2016 Congressional Justification

Major Shore - Improve Pier for Move of 210' WMECs to Little Creek, VA **\$3,000**

Project Description, Justification and Scope

Funds pier and facility improvements at U.S. Navy’s Joint Expeditionary Base Little Creek in Hampton Roads, Virginia to support the homeport shift of two 210-foot Medium Endurance Cutters (WMECs) from Cape May, New Jersey. The scope of work includes pier improvements that enable different berthing configurations when both vessels are present and the construction of a facility for shipping, receiving, and stowage of materiel for the two 210-foot WMECs.

As a result of deteriorating pier conditions in Cape May, New Jersey, and plans to use the Cape May pier as a future Fast Response Cutter homeport, the Coast Guard is relocating the two Cape May 210-foot WMECs to the U.S. Navy’s Joint Expeditionary Base (JEB) Little Creek.

The modifications will ensure JEB Little Creek can adequately support in-port activities of two WMECs.

Moorings at JEB

Pier facility at JEB

Significant Changes

This is a new project.

Project Schedule

<u>Project Description</u>	Dates by Fiscal Year & Quarter				Total Estimate
	Design Work		Project Work		
	<u>Initiated</u>	<u>Completed</u>	<u>Initiated</u>	<u>Completed</u>	<u>Cost</u>

<hr/>					
<u>Breakdown of Project Expenditures</u>					
Construction / Acquisition				2,750	2,750
Survey, Design & Engineering				175	175
Project Management				75	75

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project will comply with all applicable design codes and with the National Environmental Policy Act (NEPA).

Major Shore - Renovate Utilities at Air Station Barbers Point

\$20,000

Project Description, Justification and Scope

Funds a new electrical distribution system, associated components, and equipment to supply Coast Guard Air Station Barbers Point with a dependable electrical power supply. The project requires close coordination and collaboration with the local electrical utility and the State of Hawaii to ensure compliance with national electrical distribution and utility systems standards.

Coast Guard Air Station Barbers Point is located at the southwest corner of the Kalaeloa Airport (a joint-use State of Hawaii airport). The airport and its surroundings are a former Naval air station closed in 2000 as a result of the 1993 Base Closure and Realignment Commission findings. All utilities have transferred ownership with the exception of the electrical utility which has been retained by the U.S. Navy and runs under the Kalaeloa Airport. Due to the degraded condition and lack of privatization interest, there is no plan for the electrical distribution system to be privatized.

The deteriorating, Navy-owned distribution system is the only source of electrical power to Coast Guard Air Station Barbers Point and it is at the end of its useful service life. The poor reliability and maintainability of the existing system creates unacceptable mission impacts for the Air Station and the assigned aircraft. This project will help ensure viability of Air Station Barbers Point for all required Coast Guard activities.

Corroded Transformer

Project Management				25	25

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project will comply with the National Environmental Policy Act (NEPA).

Major Shore - Replace Dry-dock Facility at CG Yard (OAKRIDGE) Phase I **\$6,000**

Project Description, Justification and Scope

Funds Phase I of the replacement of floating dry-dock capacity at the Coast Guard Yard, the Coast Guard's only organic shipyard. Phase I includes wharf and waterside demolition, construction, and the disposal of the floating dry-dock OAKRIDGE. Subsequent Phase II efforts would include demolition and construction of a landside transfer platform, a west berth, and a rail mounted portal crane.

The 536-foot long floating dry-dock OAKRIDGE was commissioned for Navy service in 1944. OAKRIDGE constitutes 20% of dry-dock capacity at the Coast Guard Yard; this dry-dock capacity is required in order to execute In-Service Vessel Sustainment projects, critical ship maintenance and repair work, as well as meet future unplanned and emergent repairs. The remaining 80% of the Coast Guard Yard's dry-dock capacity is provided by a ship-lift, which is a single lift and rail system that enables a ship to be lifted and then transferred in a horizontal direction to provide additional space for another vessel. Phase II efforts would add capacity to the landside transfer area available for vessels dry-docked by the ship-lift.

OAKRIDGE is beyond its useful service life and in extremely poor material condition. In 2011, OAKRIDGE sank, and while it was temporarily returned to service in November 2013, it is not likely it can remain in service past 2017. With continued deterioration and the end-of-service of OAKRIDGE, the Yard will lose 20% dry-dock capacity. Funding will ensure the Yard's organic ship repair capability is sustained, allowing the Coast Guard to complete repair, maintenance, and In Service Sustainment for Coast Guard vessels.

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project will comply with the national Environmental Policy Act (NEPA).

Major Shore - Protect Waterfront Operations at Siuslaw River, OR **\$5,000**

Project Description, Justification and Scope

Funds erosion control work for the Station Siuslaw River, Oregon waterfront. The scope of work involves shoreline stabilization to stop the loss of approximately 1.5 feet of shore line and approximately 3 inches of river bottom per year.

As a result of shoreline erosion, there is danger that Station Siuslaw River can lose the elevated walkway leading to the Station’s covered mooring for the ready boats. Twice during the past 10 years, Station personnel have had to limit access to the covered mooring during periods of high wind due to instability of the structure in the river bottom. Additional pilings and bracing have been placed around the perimeter of the moorings to provide temporary stabilization.

This project will ensure Station Siuslaw River remains a viable facility to support Coast Guard operations in this area.

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project will comply with the National Environmental Policy Act (NEPA).

U.S. Coast Guard - FY 2016 Congressional Justification

Major Shore - Provide Permanent Station Facilities - Station Vallejo **\$7,400**

Project Description, Justification and Scope

Funds the construction of new, permanent facilities for Station Vallejo, California.

Station Vallejo has been located in a temporary facility at the City of Vallejo Marina since the Station’s lease with the California Military Academy expired in 2001. The temporary buildings are undersized for the number of station personnel and are in poor condition. The new facilities will provide permanent facilities in Vallejo, California, which is centrally located in the Station’s area of responsibility that covers San Pablo and Suisun Bays. This project will help ensure Station Vallejo can perform critical Coast Guard missions from this location.

Existing Facilities (temporary buildings)

Pier facilities

U.S. Coast Guard - FY 2016 Congressional Justification

Shore Infrastructure Survey and Design

\$500

Project Description, Justification and Scope

Includes survey and design funding required for future year Acquisition, Construction, and Improvement (AC&I) shore projects.

Funding supports the shore infrastructure planning process by funding engineering studies and analyses, master plans, NEPA/Environmental Studies, Soil Classification, real property and land acquisition. Project development concepts including waterfront studies, design initiatives, and rough order of magnitude estimates for project completion are included. The projects supported by this request contribute to mission support and sustainment of front-line units.

Significant Changes

No significant changes.

Compliance with Public Laws, Regulations, Standards & Executive Orders

This project will comply with the National Environmental Policy Act (NEPA).

Major Acquisition Systems Infrastructure (MASI)

\$54,500

Project Description, Justification and Scope

This request supports shore facility infrastructure modifications, upgrades, and new construction associated with home-porting new or modified cutters, boats, and aircraft. The project also supports infrastructure modifications, upgrades, and new construction to provide logistics, maintenance, and training support for new or modified cutters, boats, and aircraft.

Facility and Infrastructure Upgrades – Funding in FY 2016 will complete the following facility upgrades and infrastructure improvements:

- Pier, support facility, shore-power modifications, and associated base infrastructure improvements to support the National Security Cutter homeport at USCG Base Honolulu. This home-port will accommodate two NSCs. The funding will support the design and construction of homeport facility additions, improvements, and renovations at Honolulu, HI. The funding provides improvements such as electrical and other shore-tie upgrades; dredging to accommodate deeper drafts where necessary; structural improvements to the piers and wharfs to accommodate larger loads; relocation and/or incorporation of existing Base Honolulu functions, both waterfront and shore side, for proximity and constructability; shore side facilities for storage, maintenance, and other in-port activities associated with the arrival of the new NSCs. This location is essential to the planned operational force lay-down and needs to be modified in order to accommodate the NSCs. The funding enables facilities to meet asset delivery schedules and threshold facilities requirements based on NSC dimensions, shore-tie requirements, operational needs, crewing status, and maintenance schedules.
- New Medium Range Surveillance (MRS) depot maintenance facilities at the Aviation Logistics Center (ALC) in Elizabeth City, North Carolina. This project provides funding for a new hangar to perform depot-level maintenance on MRS aircraft to include the HC-144A and C-27J. ALC will have a steadily increasing depot-level maintenance workload as the C-27J airframes are introduced into the USCG fleet. This project will allow for the efficient and effective execution of C-27J programmed depot-level maintenance at ALC alongside the HC-144 aircraft.
- Provide engineering, environmental, and feasibility studies and analyses for future-year facilities projects covered under this acquisition program. This funding establishes a 5-year planning window to properly budget for force location decisions in association with future asset deliveries. Planning activities will integrate siting decisions for different classes of cutters and aircraft over the long-term planning horizon. This funding also covers any support contracts necessary to maintain the day-to-day functions, oversight, support, and management of this appropriation.

Contract Information

All Major Acquisition Systems Infrastructure (MASI) projects are executed by the Coast Guard with technical oversight provided by the Shore Infrastructure Logistics Center, the Facilities Design and Construction Center, and Civil Engineering Units located around the United States. Each project is contracted to a construction contractor for execution.

Significant Changes

No significant changes.

U.S. Coast Guard - FY 2016 Congressional Justification

Minor AC&I Shore Construction Projects **\$5,000**

Project Description, Justification and Scope

Provides funds to complete minor AC&I shore facility construction projects. These projects are typically less complex and require less advance planning than major shore projects. Funds will be used to complete minor projects that have cost estimates which exceed the construction authority provided in the Operating Expense appropriation. For example, this may include:

- Emergency repair projects which have cost estimates that are greater than 50% of the plant replacement value;
- Minor facility improvements, which cost more than one million dollars, that are needed to adapt to changing facility activities.

Significant Changes

No significant changes.

This project will comply with the National Environmental Policy Act (NEPA).

U.S. Coast Guard - FY 2016 Congressional Justification

Direct Personnel Costs

\$116,869

Project Description, Justification and Scope

Funds the salaries, compensation and support costs (including annual pay raise and Cost of Living Allowance adjustments) for personnel who manage, execute and administer multi-year funded projects within the Acquisition, Construction and Improvements (AC&I) Program including the FY16 compensable work day. The requested funding level will support a total of 881 FTE. These personnel will support projects requested in this budget submission, as well as prior year funded AC&I projects, by performing planning, design, engineering, contracting, project management, quality assurance and logistics support activities. This ensures the products and services acquired through the AC&I program are completed on time, on budget and in compliance with performance requirements.

Significant Changes

No significant changes.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$4,210	\$2,777	\$3,620	\$843

Travel includes all costs of transportation of persons, subsistence of travelers and incidental travel expenses in accordance with Federal travel regulations. Specifically, this funds transport of personnel in support of training, project management and oversight of the Survey and Design, National Security Cutter, Offshore Patrol Cutter, Cutter Boats, In-Service Vessel Sustainment and Polar Icebreaker. Funding in FY 2016 reflects the anticipated need.
