Project 25 Compliance Assessment Program

Project 25 Compliance Assessment Program Requirements

March 2010

Notice of Disclaimer and Limitation of Liability

The Project 25 Compliance Assessment Program (P25 CAP) provides equipment purchasers demonstrated evidence of a product’s compliance with a select group of requirements within the suite of P25 standards. The test procedures used to validate these requirements are also part of the P25 suite of standards. While successful tests will demonstrate P25 compliance for the specific requirements tested, the conclusions drawn from these tests do not apply to every environment or need that individual users may have. P25---CAP---mandated tests only demonstrate product compliance with the test procedures listed in the Supplier’s Declaration of Compliance (SDOC) and, therefore, only attest to a product’s compliance with specific requirements within the P25 standard.

The equipment supplier’s authorized representative signatory to the SDOC bear full responsibility for the content, completeness, and accuracy of the SDOC. Neither the National Institute of Standards and Technology nor the U.S. Department of Homeland Security shall bear any responsibility for incomplete or inaccurate statements within an SDOC.

Revision History

| Version | Date | Description |
|-------------|--------------------|--|
| First draft | May 8, 2009 | Draft released for review. |
| Release | June 29, 2009 | Date by which SDOC/STR are required to be up to date added. |
| Release | September 18, 2009 | Clarified text regarding expectation for SDOC/STR compliance with changes to relevant testing Compliance Assessment Bulletins. |
| Draft | December 4, 2009 | Clarified documented evidence required for grantees purchasing P25 equipment, updated grant guidance language, and added the ISSI requirements. |
| Release | March 5, 2010 | Changed timeline for updating SDOCs/STRs based on CAB revisions to 12 months. Clarified that effective date supersedes issue date of a CAB. Release version approved on March 5, 2010. |

1 Introduction

The Project 25 Compliance Assessment Program (P25 CAP) is a voluntary program that allows P25 equipment suppliers to formally demonstrate their products' compliance with a select group of requirements within the suite of P25 standards. The purpose of the Program is to provide emergency response agencies with evidence that the communications equipment they are purchasing meets P25 standards for performance, conformance, and interoperability.

The Program requires test laboratories to demonstrate their competence through a rigorous and objective assessment process. Such a process promotes the user community's confidence in, and acceptance of, test results from recognized laboratories. All equipment suppliers that participate in the P25 CAP must use DHS--recognized laboratories to conduct performance, conformance, and interoperability tests on their products. P25 equipment suppliers will release Summary Test Reports and Supplier's Declarations of Compliance based on testing from laboratories recognized by the U.S. Department of Homeland Security (DHS). This documentation will increase the public's confidence in the performance, conformance, and interoperability of P25 equipment.

Performance, conformance, and interoperability issues are likely to occur in all communications technologies and especially in ones such as P25 where protocols constantly adapt to changing user requirements. Such problems should be resolved within the P25 CAP and, notably, before product launch and deployment. Further, the declaration of compliance--related documents developed by Program participants will provide useful technical information about the equipment.

The P25 CAP will provide the more than 60,000 emergency response agencies nationwide with a consistent and tractable perspective of P25 product compliance. It will also provide a means of verifying that Federal grant dollars are being invested in standardized solutions and equipment that promote interoperability.

1.1 Scope

The SAFECOM *Recommended Guidance for Federal Grant Programs* states that grant applicants using funds to purchase P25 equipment must obtain Supplier's Declarations of Compliance (SDOC) and Summary Test Reports (STR) posted to the website. The evidence should show that the equipment has been tested based on all of the applicable, published P25 CAP Compliance Assessment Bulletins covering performance, conformance, and interoperability. This document provides the requirements for the P25 CAP, including an overview of the P25 interfaces that are currently covered by the P25 CAP, and when the applicable SDOCs and STRs are required.

2 SAFECOM Project 25 Grant Language Excerpt

[1] When purchasing Project 25 LMR equipment/systems, grantees will, at a minimum, ensure the vendor has participated in equipment testing consistent with the Project 25 Compliance Assessment Program (P25 CAP). Where such equipment is covered in the Project 25 Compliance Assessment Program Requirements document³, it must be tested in accordance with applicable standards and policies of the P25 CAP, and evidence of this testing must be documented through Supplier’s Declarations of Compliance and Summary Test Reports that have been posted to the website.

Additionally, when P25 LMR equipment/systems are purchased with a non-standard, proprietary feature/capability and a comparable feature/capability is part of the standard, the P25 LMR equipment/systems must include the standards-based feature/capability.

3 P25 Compliance Assessment Program Recommended Best Practices

In general, the Office for Interoperability and Compatibility within DHS believes that it is a best practice for public safety agencies procuring P25 equipment to require that SDOCs and STRs be demonstrable on the website during that agency’s purchasing process. The agency can make the most informed decision regarding which manufacturers are participating in the Program, the results of testing each manufacturer’s products, and which products to purchase.

4 Supplier’s Declaration of Compliance and Summary Test Report Requirements

SDOCs and STRs are required to be compliant with all relevant, current Compliance Assessment Bulletins on the effective date. SDOCs and STRs issued prior to an effective date for a Compliance Assessment Bulletin are required to be up to date twelve months following the relevant effective date(s).

³ This document.

5 Baseline Common Air Interface Compliance Assessment Requirements

5.1 Performance Tests

P25 Phase 1 Common Air Interface devices will require both SDOCs and STRs by **November 6, 2009**, at the latest, where performance testing accommodates the most current version of the P25 CAI Baseline Testing Requirements Compliance Assessment Bulletin [2].

5.2 Conformance Tests

No tests are defined or required at this time.

5.3 Interoperability Tests

P25 Phase 1 CAI devices will require both SDOCs and STRs by **November 6, 2009**, at the latest, where interoperability testing accommodates the most current version of the P25 CAI Baseline Testing Requirements Compliance Assessment Bulletin [2].

6 Baseline Inter Radio Frequency Sub--System (ISSI) Compliance Assessment Requirements

6.1 Performance Tests

No tests are defined or required at this time.

6.2 Conformance Tests

P25 ISSI implementations will require both SDOCs and STRs by **March 5, 2011**, at the latest, where conformance testing accommodates the most current version of the P25 ISSI Baseline Testing Requirements Compliance Assessment Bulletin [3].

6.3 Interoperability Tests

P25 ISSI implementations will require both SDOCs and STRs by **March 5, 2011**, at the latest, where interoperability testing accommodates the most current version of the P25 ISSI Baseline Testing Requirements Compliance Assessment Bulletin [3].
