System Assessment and Validation for Emergency Responders

The U.S. Department of Homeland Security (DHS) established the System Assessment and Validation for Emergency Responders (SAVER) Program to assist emergency responders making procurement decisions.

Located within the Science and Technology Directorate (S&T) of DHS, the SAVER Program conducts objective assessments and validations on commercial equipment and systems, and provides those results along with other relevant equipment information to the emergency response community in an operationally useful form. SAVER provides information on equipment that falls within the categories listed in the DHS Authorized Equipment List (AEL). The SAVER Program mission includes:

- Conducting impartial, practitioner-relevant, operationally oriented assessments and validations of emergency responder equipment; and
- Providing information that enables decision makers and responders to better select, procure, use, and maintain emergency responder equipment.

Information provided by the SAVER Program will be shared nationally with the responder community, providing a life- and cost-saving asset to DHS, as well as to Federal, state, and local responders.

The SAVER Program is supported by a network of technical agents who perform assessment and validation activities. Further, SAVER focuses primarily on two main questions for the emergency responder community: "What equipment is available?" and "How does it perform?"

Portable Decontamination Showers

Portable decontamination showers are used by emergency responders to eliminate or decrease the amount of suspect contamination on responders and civilians during emergency incidents. These showers can be deployed at incident locations for on-scene treatment when fixed showers or integrated response vehicles are not available.

To assist emergency responders in selecting the right portable decontamination shower for their jurisdiction, Science Applications International Corporation (SAIC) has prepared a market survey report for the System Assessment and Validation for Emergency Responders (SAVER) Program. The *Portable Decontamination Showers Market Survey Report* provides a snapshot of the current commercial market place.

All reports in this series will be placed in the SAVER section of the Responder Knowledge Base website (<https://www.rkb.us/saver>) as they become available. Information on other technologies evaluated by the SAVER Program can also be found on the website.
