SYSTEM ASSESSMENT AND VALIDATION FOR EMERGENCY RESPONDERS (SAVER)

SAVER Project List*

Homeland Security
Science and Technology

The U.S. Department of Homeland Security (DHS) established the System Assessment and Validation for Emergency Responders (SAVER) Program to assist emergency responders making procurement decisions. Located within the Science and Technology Directorate (S&T) of DHS and managed by the National Urban Security Technology Laboratory (NUSTL), the SAVER Program conducts assessments and validations on commercial equipment and systems, and provides those results along with other relevant equipment information to the emergency responder community in an operationally useful form.

Public SAVER documents are available at: www.dhs.gov/science-and-technology/SAVER. Limited distribution documents are available at: communities.firstresponder.gov.
