

# **Data Privacy & Integrity Advisory Committee**

**Public Meeting  
December 10, 2018  
1 – 4PM**

**Privacy Office**

Protecting privacy while promoting transparency

# Web Conference Instructions

Please follow these instructions:

## CONFERENCE LINE

- Dial 1-800-616-4018.
- Please mute your phone but don't place it on hold.

## QUESTIONS

- Hold questions until the end of each session when the operator will open the line. DPIAC members have priority.

## HANDOUTS

- This presentation is also available on our website: [www.dhs.gov/privacy](http://www.dhs.gov/privacy). Search on *Privacy Committees*.

# Opening Remarks

## Sandra Taylor

Designated Federal Official

Data Privacy and Integrity Advisory Committee

## Lisa Sotto

Designated Federal Official

Data Privacy and Integrity Advisory Committee

Privacy Office

Protecting privacy while promoting transparency

# CPO Remarks

## Sam Kaplan

Chief Privacy Officer and

Chief Freedom of Information Act Officer

DHS Privacy Office

# DHS Privacy Incidents

## Breach Response

## PII Incident Strategy

Marilyn Powell  
Director of Incidents  
Privacy Office

# The Road to Our Current PII Incident Strategy

## TIMELINE:

- 2013** – MSM Security Services - Vulnerable Contractor System
- 2013** – KeyPoint (KGS) – Contractor Slow to Report Threat Intrusion.
- 2015** – OPM Breach – Actual Breach in May 2014.
- 2014** – USIS EEO & Background Check PII Breach – USIS Goes Out of Business  
**JUN 2015** – DHS/OMB Cyber Sprint
- OCT 2015** – OMP Cyber Security Implementation Plan ( M 16-04)
- SEPT 2015** – PRIV asks DPIAC for Victim Notification Recommendations
- JULY 2016** – OMB A-130 Managing Information as a Strategic Resource.
- DEC 2016** – Government-wide BPA with IPS for Credit Monitoring and Identity Theft Services
- DEC 2016** – OMB A-108 Fed Agency Responsibilities for Review, Reporting, and Publishing under the Privacy Act

# The Road to Our Current PII Incident Strategy

- TIMELINE (cont.)**
- JAN 2017** – OMB M 17-12 Preparing for and Responding to a Breach of PII.
  - FEB 2017** – **DPIAC Recommendations for Notifying Affected Individuals**
  - MAY 2017** – DHS OIG Breach
  - DEC 2017** – Privacy Incident Responsibilities and Breach Response Team  
DHS Instruction 047-01-008.
  - DEC 2017** – DHS Privacy Incident Handling Guide
  - 2017** – Equifax Breach.
  - APR 2018** – DHS First Annual Breach Response Table Top Exercise
  - MAY 2018** – DHS SOC Join Monthly Incident Practitioner Calls
  - SEPT 2018** – Component Specific Table Top Exercises Begin

# Cyber Strategy & PII Strategy

## Cybersecurity Implementation Plan (CSIP)

1. Continuous Diagnostic Monitoring
2. Identify High Value Assets and Protect them
3. Detection and response
4. Recruit and train
5. Acquisition and deploy technology

## A-130 – Managing Info as a Strategic Resource

1. ECOP Continuous Monitoring
2. DHS Compliance Document Oversight
3. Privacy Incident Response & Breach Response Team (BRT) Instruction 047-01-006 and PIHG encouraged to recognize a PII Spill & Report
4. Workforce Comm. – Targeted Recruiting; DHS PRIV Training and Outreach
5. HSAR clause use DHS-wide

# The *NEW* Cybersecurity and Infrastructure Security Agency

## Matthew Travis

Deputy Under Secretary  
National Protection and Programs Directorate

## James Burd

Acting Director, Privacy  
National Protection and Programs Directorate

December 2018

## ENTRY EXIT | TIMELINE

*Facial recognition emerged as the key to connecting a traveler's biographic and biometric data.*

## CBP'S INVESTMENT | A FACIAL MATCHING SERVICE

CBP designed a backend facial matching service, that leverages existing advanced passenger information, existing photographs from U.S. Government holdings, and is acceptable for all collection devices.

### HOW IT WORKS:

- Uses biographic APIS manifest data and existing photographs (previous CBP encounters, U.S. Passport, U.S. Visa) to build a flight gallery
- Matches “live photograph” taken prior to boarding with image from the gallery associated with the manifest
- Creates exit record, confirmed departure in ADIS

MATCH	PASSANGER NAME	DOB	DOCUMENT	STATUS
	Smith, James	01/08/1992	P TR3456201 JP	Boarded
	Sally, Jane	09/12/1980	P TR1010201 JP	Boarded
	Mark, Robert	04/05/1959	P 534564981 US	Boarded
	Tanaka, Yuri	03/27/1979	P 568049423 US	No Match
	Arntson, Keenan Lanae	09/02/1991	P TR2935948 JP	Boarded
	Matsuyama, Asuka	06/15/1983	P 759403592 US	Boarded

### WHY IT WORKS:

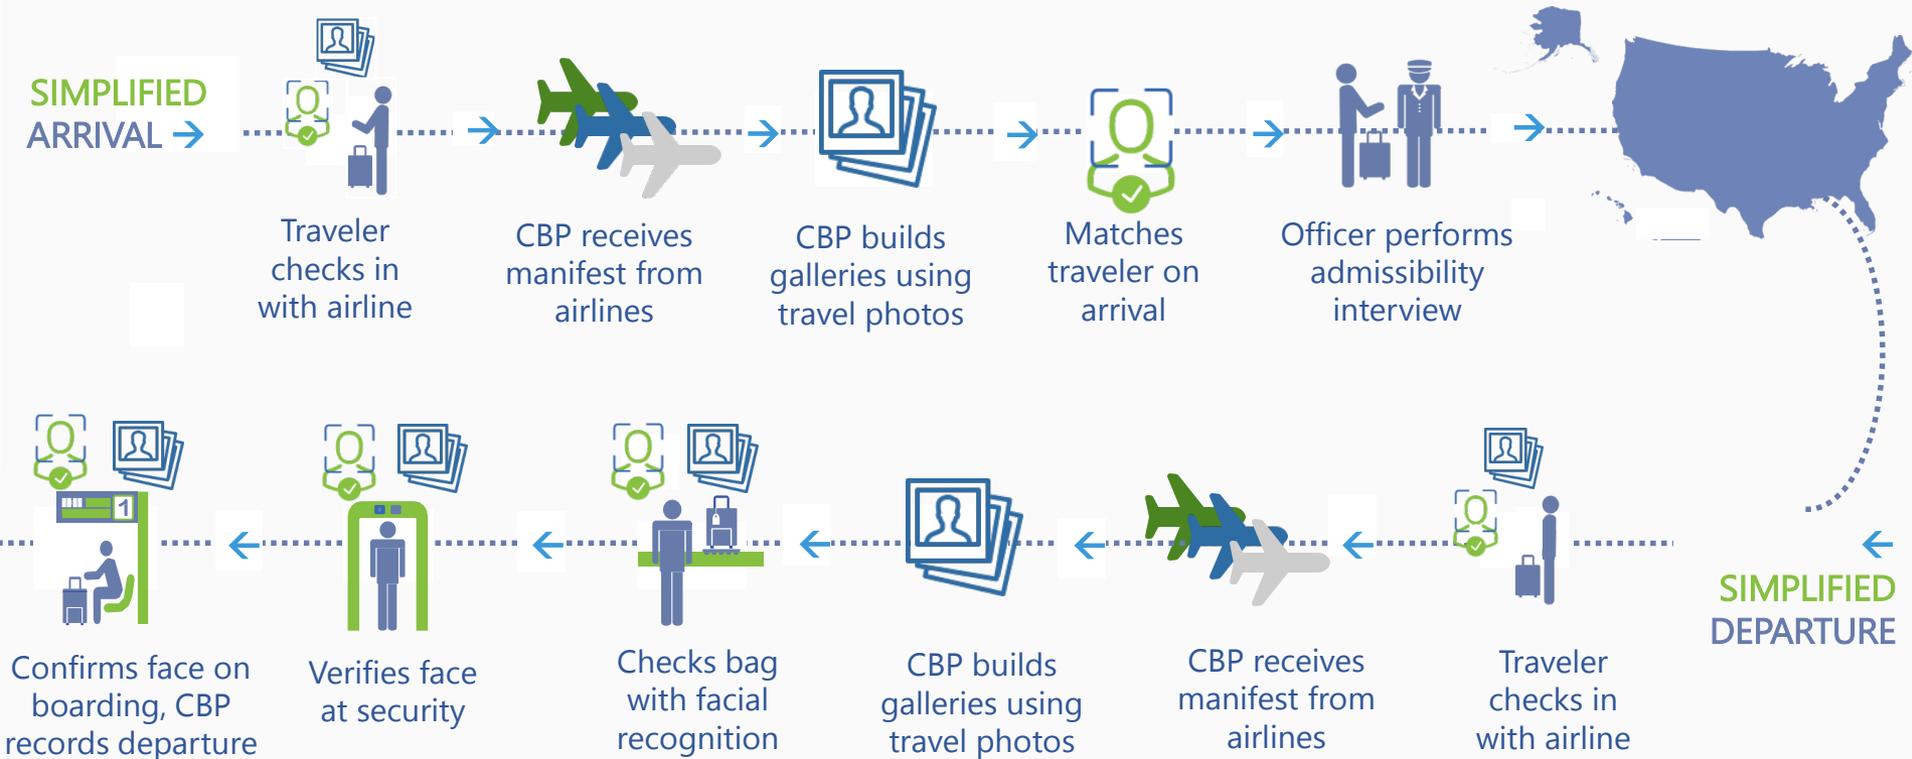

- Uses existing traveler biometrics
- No new data requirements
- Matches one to few utilizing cloud infrastructure
- Token-less processing
- Integrates into existing airport infrastructure
- Extends to land and sea environments

*CBP's Matching Service enables travel partners to achieve Simplified Travel while meeting the Biometric Exit Mandate*

# SIMPLIFIED TRAVEL | HOW IT WORKS

*Using facial recognition, CBP will confirm identity of all travelers and create a streamlined travel experience*

## SIMPLIFIED ARRIVAL | DEPLOYMENT PROGRESS

- Simplified Arrival transforms arriving into the United States by reducing complexity and improving inspectional efficiency and customer experience.
- Enables CBP Officers to focus on enforcement and admissibility
  - Three imposters have been identified.
- Currently deployed at 15 airports, including four preclearance locations.

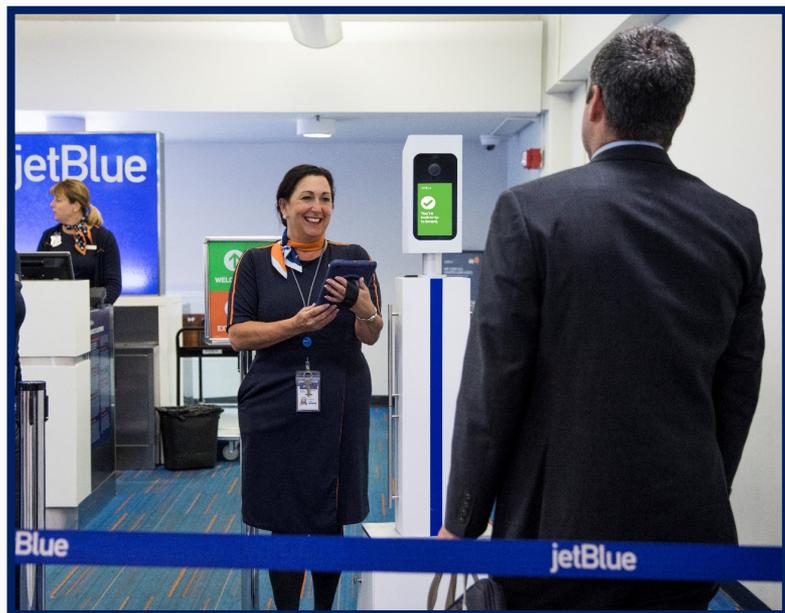

*Simplified Arrival decreases travel document scans and eliminates fingerprint capture for known travelers*

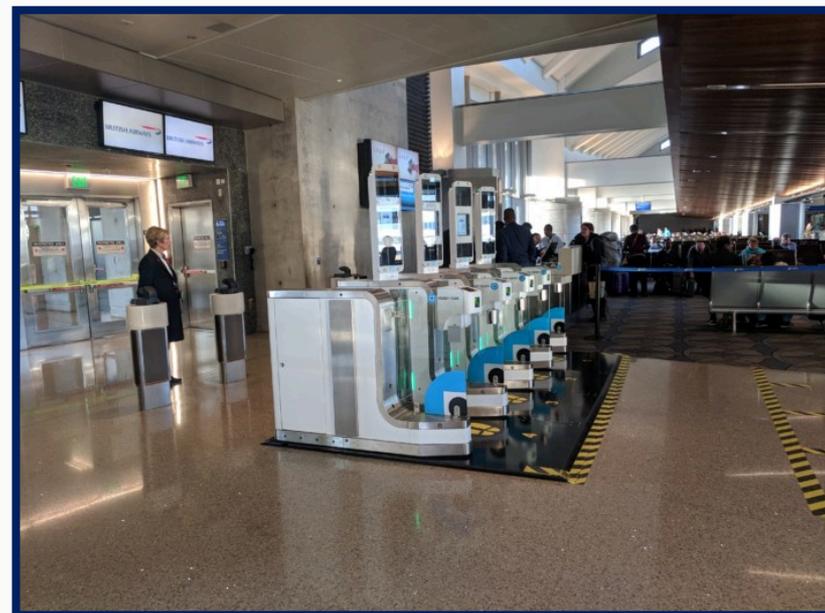

## SIMPLIFIED DEPARTURE | PARTNER SOLUTIONS IN ACTION

### JetBlue – Paperless Boarding at BOS

### Los Angeles – E-gates

*Airlines integrate facial biometrics and use CBP's agnostic matching service to board aircraft*

# STAKEHOLDER EXPANSION | 2018 PROGRESS REPORT

## APR - JUN

-  Initiated demonstration projects with new partners
-  Expanded entry to Abu Dhabi, Shannon preclearance locations
-  Secured commitments to expand with **Orlando, Delta,, Houston and San Jose**
-  Continued planning with TSA for TVS/Secure Flight Integration

## JUL - SEPT

-  Executed demonstration projects with new partners
-  Expand entry and exit deployments
-  Secured commitments with **Dulles, Tampa, San Francisco, Los Angeles, Austin, Dallas Ft. Worth**
-  Performed Phase II TSA Pilot Monitor progress

## SEPT - DEC

-  Prioritize stakeholders for '19, continue demonstrations
-  Monitor stakeholder commitments
-  Continue working with TSA on Integration
-  Secured commitment with new partners **Las Vegas, BWI, Salt Lake City, Ontario** and working finalize with other participating

Airline Partnership:

*Our stakeholders are ready for seamless travel, and CBP is enabling the ability to move forward*

## SIMPLIFIED TRAVEL | BENEFITS

By Partnering with CBP, our stakeholders will see benefits from entry to exit utilizing our matching service including:

- **Faster Flight Clearance Times on Arrival:**
  - CBP has measured an average of **11.8 minute faster** Flight Clearance Times across sites that have deployed facial recognition processing on Entry
- **Faster Boarding Times:**
  - Lufthansa reported boarding **350 passengers** onto an A380 in **20 minutes** at LAX
  - British Airways reports **significantly faster boarding times** vs. standard process at MCO
- **Enhanced Customer Experience:**
  - JetBlue reports biometric boarding **meters passengers better**, resulting in less waiting time in the jet way and passengers just walk to their seats
- **Better use of CBP Staffing:**
  - Elimination of fingerprinting and passport swipes increases throughput and allows CBP officers to **focus on interview and inspection**

*Partners achieve significant operational improvements through the implementation of biometrics for entry/exit*

## BIOMETRIC PROCESS | OPERATIONAL PERFORMANCE

### EXIT

6,000

flights processed

981,000

participating  
passengers

### ENTRY

38,000

flights processed

3.6 million

participating  
passengers

### PRECLEARANCE

9,400

flights processed

1.3

million  
participating  
passengers

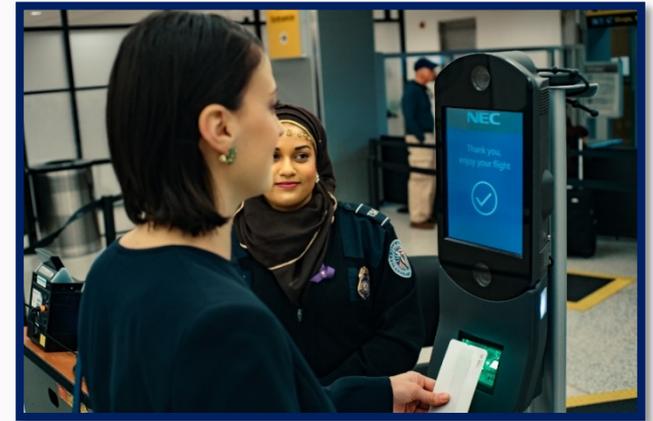

## PARTNERSHIP WITH TSA | PROGRESS AND PLANS

TSA is evaluating the use of facial recognition utilizing CBP's facial matching service. The integration of facial recognition for identity verification will enhance security and better utilize resources, while moving towards a frictionless travel experience.

- **Phase I:** October 2017 at JFK Terminal 7. Examined the viability of utilizing facial recognition to verify the identity of travelers at the TSA checkpoint.
- **Phase II:** August 2018 at Los Angeles International Airport's Tom Bradley International Terminal.
- **Phase III:** 2019 - Full integration between CBP and TSA

*Integration between CBP and TSA will expand the seamless travel experience*

## SIMPLIFIED SEA & LAND TRAVEL | PROGRESS AND PLANS

### Sea:

- CBP is pursuing partnerships with the cruise line industry to transform the embark and debark process.
- Early results indicate the use of biometrics enhances CBP enforcement activities while simultaneously streamlines traveler inspections.

### Land:

- **Vehicle at Speed**
  - Capturing faces inside inbound and outbound vehicles traveling at speed in Anzalduas, Texas.
- **Pedestrian Technical Demonstrations**
  - Entry operations at San Luis and Nogales, Arizona.
  - At least 38 imposters already identified.

# SIMPLIFIED TRAVEL | COMMITMENT TO PRIVACY

## • Transparency Efforts:

- Two Briefing Sessions for Privacy Advocates and Stakeholders in 2017-18 in Washington, DC and San Francisco, CA
- DHS Data Privacy and Integrity Advisory Committee Meeting
  - September 19, 2017 in DC
  - May 11, 2018 (conference call)
  - July 10, 2018 (tour of Orlando airport and briefing)
  - December 10, 2018 (release of DPIAC Report)

## • Notification to the Public:

- Privacy Impact Assessments
  - 10 PIAs have been published relating to CBP facial recognition efforts, available at: [www.dhs.gov/privacy](http://www.dhs.gov/privacy)
  - A new comprehensive TVS PIA was published November 14, 2018
- Online Content at CBP.GOV
  - Fact Sheets
  - Frequently Asked Questions
- Signage at Demonstration Sites, Tear Sheets and Gate Announcements in some locations
- U.S. Citizens not wishing to have a photo taken may request an alternative identity verification process

**Biometric Exit Process**

U.S. Customs and Border Protection (CBP) is collecting facial images from all travelers departing the United States on this flight. CBP will use the images to verify each traveler's identity. CBP is authorized to collect this information by the 2015 Enhanced Border Security and Visa Entry Reform Act (EBSA), the Intelligence Reform and Terrorism Prevention Act of 2004, and the Departmental Administration Act of 2011 (DACA). CBP is required to notify you that it will collect and use your facial image for identification purposes. Your facial image will be matched and then stored for no more than the retention period set by the U.S. Department of Homeland Security. Your facial image, however, may be used to provide other proof of identification, and in some cases provide other benefits and services, for the retrospective purposes.

**Who will be participating in the exit process?**

1. CBP is required to verify the identities of all travelers departing the United States on this flight. CBP will conduct exit interviews on exit.

**What information will CBP collect during this process?**

1. A biometric facial photograph provided by the traveler.

**Will my personal data be shared or stored?**

1. The facial image provided for identification purposes will be stored in the system. CBP is authorized to provide the primary biometric data to the U.S. Department of Homeland Security. This data is available at [www.dhs.gov/privacy](http://www.dhs.gov/privacy).

**When can I receive more information about this process and other CBP programs?**

1. More information is available at [www.dhs.gov](http://www.dhs.gov), U.S. CBP 1-800-541-3000.

**What options are available if I experience difficulty?**

1. There are alternative means of identification available at the 100 Border Welcome Inspection Program (BWIP) at airports.

Please visit the U.S. Customs and Border Protection website at [www.cbp.gov](http://www.cbp.gov).

Your photograph is being taken to verify your identity before boarding the aircraft to confirm the passport for other than you are using for international travel.

If you are a U.S. citizen, you will receive a biometric confirmation of departure from the United States 14 days after 14 days. For most non-U.S. citizens, the photograph will be used as a biometric confirmation of departure from the United States.

If you do not wish to have your picture taken, please see a CBP officer to request alternative procedures for identity verification and/or biometric confirmation of departure from the United States.

For more information please visit our website at [www.cbp.gov](http://www.cbp.gov).

**U.S. Customs and Border Protection**

**Facial Comparison Technology Testing**

**BACKGROUND**

U.S. Customs and Border Protection (CBP) is evaluating technologies and deploying new capabilities to improve operational processes at U.S. ports of entry. Beginning in March through May 2015, CBP will test facial comparison technology at Washington Dulles International Airport. This project will focus on U.S. citizens presenting an ePassport when returning to the United States. CBP established biometric screening procedures based on fingerprints for non-U.S. citizens in 2004.

**DESCRIPTION**

The U.S. Face ePassport project is a short-term, biometric project that will assist in determining the feasibility of using facial comparison technology to help identify imposters attempting to enter the country using U.S. ePassports. The U.S. Department of State stored the passport holder's digital photo within the ePassport chip to enable the use of biometric comparison for border security, law enforcement, counterterrorism, and fraud prevention at the border. This technology is only one of many tools CBP officers will use to make admissibility decisions. A CBP officer, not the system, will make all decisions concerning entry into the United States.

**Operational goals of this project are to:**

- Determine the viability of facial comparison technology to assist officers in identifying possible imposters and
- Determine if facial comparison technology can easily be incorporated into the current arrival process.

**BIOMETRIC PROCESS**

During the project, randomly selected travelers will be directed to inspection booths equipped with facial comparison technology. The technology will compare an image of the traveler taken during the normal inspection process to the image stored in the U.S. ePassport. The images taken will be used for purposes of this limited project only and will not be stored or shared with any other party or system. CBP is dedicated to protecting the privacy of all travelers.

**BENEFITS**

This short-term, biometric project has the potential to:

- Enhance national security;
- Eliminate the impostor threat;
- Advance the integration of multiple biometrics into the inspection process; and
- Transform the passenger inspection process.

Ultimately, this project will provide officers with an automated tool to assist in the identification of possible fraud. It is anticipated that travelers will experience little or no delay during the inspection process. CBP officers will use the results in addition to their standard screening methods to verify that the person applying for entry into the United States is the same person to whom the ePassport was legally issued.

Following the project, CBP will conduct a full evaluation to inform the next steps to advance the CBP mission.

For more information, visit [CBP.gov](http://CBP.gov).

CBP Publication No. 0308-0405  
03/15

CBP commitment to transparency builds public trust while enhancing security

## PRIVACY BY DESIGN | COMMITMENT TO PRIVACY

### • Limited Retention of Facial Images:

- *CBP Systems:* Facial images of U.S. Citizens are securely stored for up to 12 hours after capture for COOP purposes.
- *IDENT:* Photos of in-scope travelers are securely stored in DHS IDENT to meet the biometric exit requirement and to ensure the accuracy of future matching encounters at the border with the TVS.
- *Airline/Airport Partners:* CBP has developed business requirements which do not allow approved partners to retain the photos they collect--for purposes of identity verification through the TVS--for their own business purposes. These partners must purge the photos, once they are transferred to CBP and must allow CBP to audit compliance.

### • Enhanced Security Measures:

- *Encryption:* Strong encryption is used for data, both in transit and at rest.
- *Access Controls:* Access to the collection device is granted only to authorized CBP personnel and representatives.
- *Security of Biometric Matching Service:* The TVS creates irreversible templates of the historic and newly-captured photos and uses a Unique identifier to connect travelers' biographic information with their facial images. An audit trail is created. The TVS is walled off from the APIS biographic data, which has been required since 2005.

### • Minimizing and Mitigating Algorithm Bias:

- *Bias:* CBP continually monitors and tests the TVS for performance bias. To date, no significant bias has been found. The TVS was developed using diverse training sets and matches against a limited set of faces on the flight manifest.
- *NIST:* A recent NIST vendor test found significant gains (i.e., 20 times) in accuracy in the past five years. NIST found that with high quality photos, the most accurate algorithm can identify matches with only a 0.2 percent error rate.
- *CBP Partnerships on Testing and Evaluation:* CBP is collaborating with NIST, the DHS Science & Technology and Office of Biometric Identity Management to test technologies developed by specified vendors and to evaluate algorithms.

## SIMPLIFIED TRAVEL | THANK YOU

# DHS Immigration Data Integration Initiative

**Briefing for DHS Data Privacy and Integrity Advisory  
Committee (DPIAC)**

*December 10, 2018*

# Overview & Scope

- The need: DHS immigration data are dispersed across four dozen data systems, creating fragmented data sets across the immigration domain
  - Congress and the Trump Administration—and essentially every data scientist in the world—recognize the need for enterprise standards and data integration
- IDII Vision: Centralize and validate an authoritative set of linked immigration data that stakeholders can rely on for operational research, reporting, and analysis

# Overview & Scope

- Three lines of work to accomplish this goal:
  - Enterprise data standards
  - Person-level data linkages + data policies
  - Common IT environment + data tools
- Benefits:
  - Operational efficiencies
  - Faster, more comprehensive, more consistent reporting
  - Supports research and evidence-based policy-making

# Background & Authority

# Accomplishments to Date: Data Standards

Available Standards
Class of Admission (COA)
Country
Department of State Consular / Post Codes
Employment Authorization Document (EAD)
EOIR Court Locations
Eye Color
Hair Color
ICE Detention Locations*
Marital Status
Occupation
Race
USCIS History Action Codes (HAC)
Zip Codes
Standards Under Development
Address
Language Type
North American Industry Classification System (NAICS)
Religion Type
State

# Accomplishments to Date: IT Implementation

- OIS staff serve as the beta-testers for the near-term, interim IDII solution
  - OIS can now pull USCIS data directly from USCIS eCISCOR and CBP ADIS
  - OIS staff transitioning to USCIS SAS Predictive Modeling Environment (PME) and Amazon Cloud storage capabilities
  - Use of sFTP to migrate historic data and for CBP and ICE to securely transfer new data requests
- In development: direct access to CBP's BorderStat and TECS systems

## Accomplishments to Date: Privacy Policies

- Finalized a Privacy Threshold Analysis covering OIS instance of IDII Interim Environment in USCIS SAS-PME
- Finalized a Privacy Impact Assessment covering OIS operations, including the IDII program
- In discussion with S&T Center for Accelerating Operational Efficiency (CAOE) to support IDII re-identification testing

# Accomplishments to date: OIS/IDII Flow Dataset

**Person-centric** dataset that uses **smart matching algorithms** to link people and events

People and events from 19 different datasets from **ICE, CBP, USCIS, and DOJ/EOIR**

**Identifiers and data quality vary** across sources and datasets

People are assigned an OIS person-centric ID so that **PII can be removed** for data sharing

Data are **event-based**, linking an individual's experience of **events across components**

Provides a **complete picture** of how people move **through the immigration system**

OIS is working with the IDII Data Policy and Oversight Working Group to **standardize a DHS "best practice"** for creating person-centric datasets

---

OIS combined 19 datasets matched by person identifiers to create the current version of the **Flow Dataset** to support IDII – Re-matched each time new waves of data are added

---

# Datasets Currently in the Flow Dataset

## U.S. Citizenship and Immigration Services (USCIS)

- Affirmative Asylum (RAPS)
- USCIS Applications and Defensive Asylum (APSS)
- Deferred Action for Childhood Arrivals (ELIS)
- Legal Permanent Residents (ELIS IV)
- Employment Authorization Documents (CLAIMS3)

## Immigration and Customs Enforcement (ICE) Enforcement and Removal Operations (ERO)

- ERO Charging Documents Issued
- ERO Administrative Arrests
- ICE Initial Book-Ins
- ICE Releases/Final Book-Outs
- ICE Removals and Returns

## ICE Homeland Security Investigations (HSI)

- HSI Administrative and Criminal Arrests

## Customs and Border Protection (CBP) Office of Field Operations (OFO)

- OFO Inadmissibles

## CBP U.S. Border Patrol (USBP)

- USBP Apprehensions

## DHS

- Removals and Returns

## DOJ Executive Office for Immigration Review (EOIR)

- EOIR Bonds
- EOIR Schedule
- EOIR Appeals
- EOIR Proceedings
- EOIR Case Information

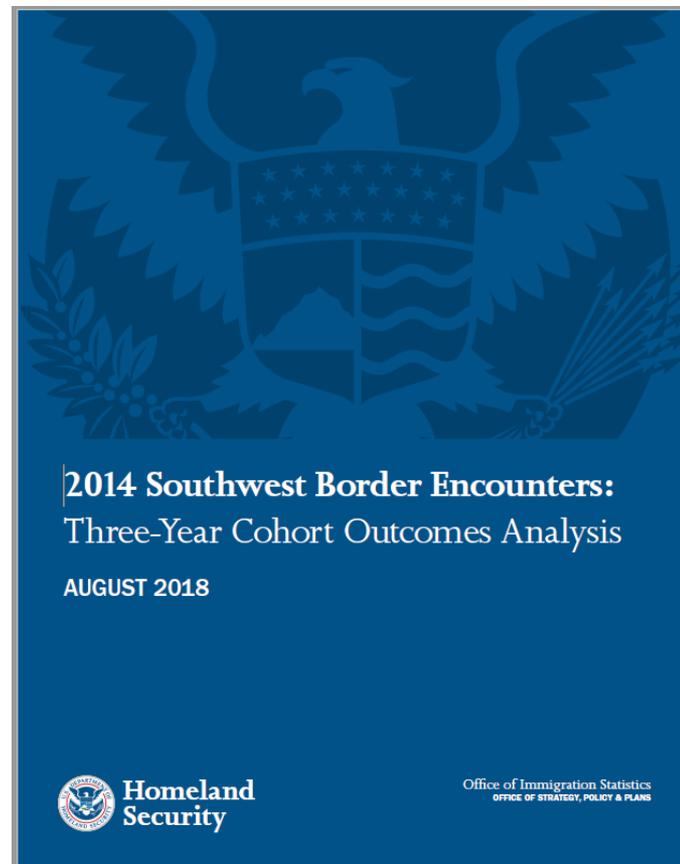

---

The Flow Dataset encompasses 12.1 million unique individuals and 51 million events covering fiscal years 2013 through 2018 Q3

---

# Accomplishments to Date: Data services

- August 2018, 2014 Southwest Border Encounters: Three-Year Cohort Outcomes Analysis
- Enforcement Lifecycle/Flow tables to support White House, S1/SAG, C1, DOJ/DAG, CBP/MCAT, ICE/Policy, ICE/SOA

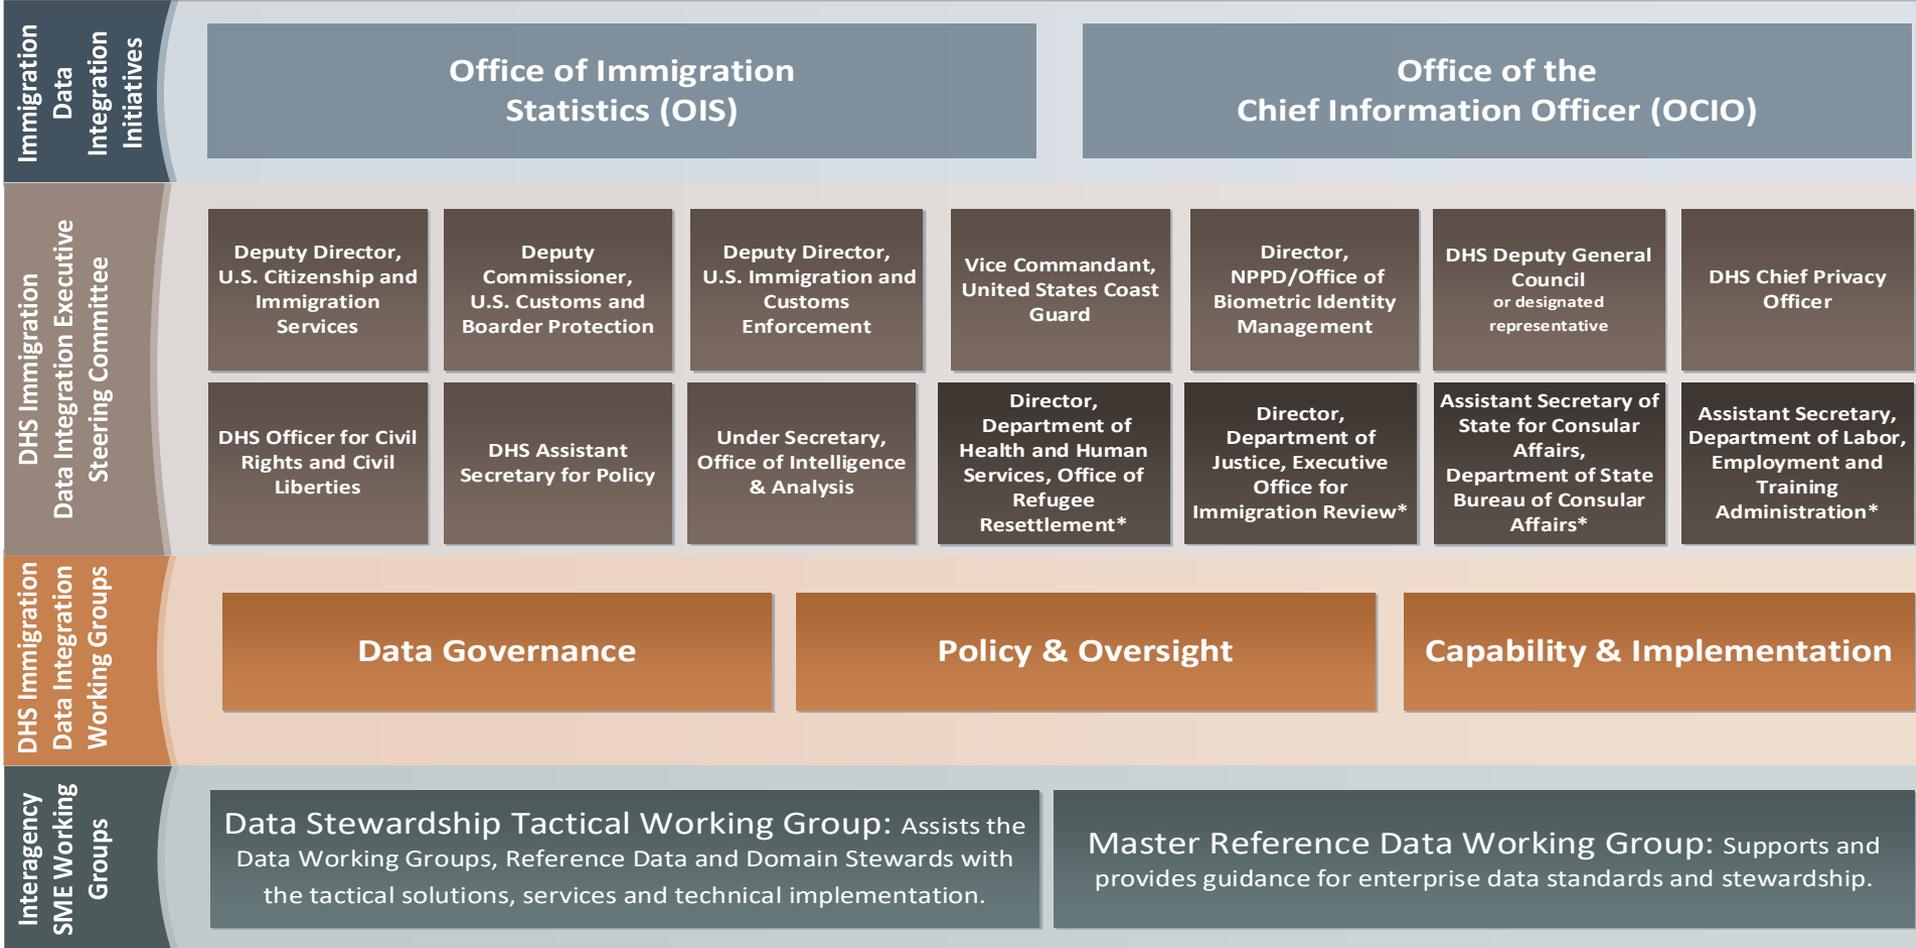

# 2019 Priorities

- Firm up quarterly data refresh
- Continue processing high priority use cases
- Continue publishing new data standards supporting use cases
- Maintain data change requests supporting published data standards
- Establishing monthly data refresh for selected elements
- Initial data visualization tools (dashboard prototypes/wire frames)
- Initial work on long-term IDII environment
