

## Vehicle Telematics

The Department of Homeland Security (DHS) established a Vehicle Telematics Blanket Purchase Agreements (BPA) to provide installation and maintenance of vehicle telematics solutions for DHS light, medium, and heavy-duty vehicles located in the United States, Puerto Rico, Guam, American Samoa, U.S. Virgin Islands, Northern Mariana Islands, and associated territorial waters and airspace.

### Key Contract Vehicle Features:

- Captures comprehensive vehicle telematics data to include engine diagnostics, vehicle monitoring, maintenance alerts, locator services, and fuel management;
- Originally developed to meet an executive order, it improves the ability to manage greenhouse gas emissions through collected data;
- Provides options for customization and provides software updates as required;
- Improves fleet management and fleet optimization at both Component and Department levels;
- Provides efficient record keeping of current assets and captures data of underutilized assets;
- Provides telematics coverage in remote areas;
- Provides customized interface and data collection to meet Component needs;
- Provides continuous tech support and updates as required; and
- Provides options that allow near real-time oversight of fleet operations.

### Period of Performance (POP):

Five years (4/13/2017 - 4/12/2022)

### Number of Awardees:

Three large businesses
