Dams Sector

29. April 6, Associated Press – (California; Oregon) **Officials sign unusual pact to tear down hydroelectric dams.** The U.S. Interior Secretary signed a two-part agreement with the State governors of Oregon and California April 6, agreeing to tear down four hydroelectric dams along the Klamath River, restore tribal lands, provide additional water for farmers and ranchers, as well as continue to work on a six-year-old settlement, among other actions, after discovering the dams were preventing salmon from migrating to historic spawning grounds and degrading the water quality, thereby causing fish disease and an algae surge. Officials stated the project will be one of the largest river restoration plans in U.S. history. Source: [http://abcnews.go.com/US/wireStory/officials-sign-unusual-pact-tear-klamath-dams-38202127](http://abcnews.go.com/US/wireStory/officials-sign-unusual-pact-tear-klamath-dams-38202127)
30. *April 6, Dallas Morning News* – (Texas) **High-risk Lewisville Lake dam gets congressional funding for important safety improvements.** The U.S. Army Corps of Engineers announced April 6 that they will accelerate repairs to the Lewisville Lake dam to begin in 2018, two years earlier than scheduled after officials found a “sand boil” near the dam, indicating a potential tunnel underneath the infrastructure that could cause dam failure, displacement of 431,000 people, innumerable deaths, potential floodwaters in downtown Dallas, and about $21 billion in damages. In addition, the project will include additional monitoring equipment, a new drainage system, and spillway anchors to ensure the water does not sweep dirt as it flows. Source: [http://thescoopblog.dallasnews.com/2016/04/high-risk-lewisville-lake-dam-gets-congressional-funding-for-safety-improvements.html/](http://thescoopblog.dallasnews.com/2016/04/high-risk-lewisville-lake-dam-gets-congressional-funding-for-safety-improvements.html/)
