

# The Front Door to Homeland Security Information

The Homeland Security Information Network (HSIN) is the DHS designated system for real-time information sharing and collaboration among homeland security partners. From every level of government to the private, international and non-profit sectors, HSIN connects partners and streamlines interagency collaboration to advance the DHS mission.

## Trusted Solution

Ensuring Protected Information Sharing for Mission Partners

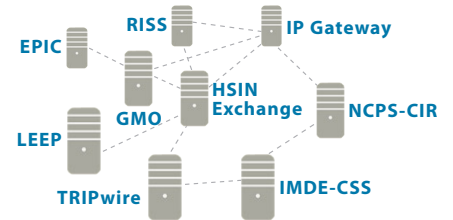

## Interoperable

Connecting Diverse Systems and Mission Areas

### FEDERATED CONNECTIONS

Simplified access for partner systems: log in once to access vital information and collaborate with other verified partners

### PORTAL CONSOLIDATION

Consolidation of unique information sharing systems on HSIN for enhanced information and partner collaboration

## Mission-Based

From Daily Operations to Planned Events and Exercises and Incident Response, HSIN Supports Your Mission

### Daily Operations

HSIN supports daily operations by providing real-time information sharing that streamlines processes, and improves situational awareness and decision-making in users' unique areas of operation.

- Cybersecurity
- Counternarcotics
- Border Security
- School Safety
- Event Security
- Combating Transnational Organized Crime
- Infrastructure Protection
- Disaster Planning and Mitigation

### Planned Events and Exercises

HSIN brings planning expertise, effective solutions, extensive experience and the support of HSIN Mission Advocates—subject matter experts on the HSIN platform—to help ensure the safety and security of planned events and exercises.

- State of the Union Address
- U.N. General Assembly
- NFL Super Bowl
- MLB All-Star Game
- NHL Stanley Cup Finals
- Boston Marathon
- Lollapalooza

### Incident Management and Emergency Response

Emergency services professionals and law enforcement rely on HSIN to help prevent, protect, respond to and recover from unplanned incidents, sharing information in real time to work as a cohesive team.

- Public Health Emergencies
- Active Shooters
- Terrorism
- Hurricanes/Tornados
- Wildfires
- Floods
- Human Trafficking
- Earthquakes

## Features You Need—A Solution You Can Trust

### HSIN Chat

HSIN Chat provides a trusted environment for instant messaging, allowing:

- Quick answers to questions
- Real-time information sharing
- Unclogged email inbox
- Chat one-on-one or in groups

### HSIN Connect

Robust web conferencing tool provides a trusted environment for:

- Real-time collaboration
- Web-based training
- Large-scale webinars
- Instant analysis and response

### HSINbox

Communicate with mission partners:

- Secure messaging
- Attach documents, links, notes
- Manage email distribution

### HSIN Learn

Complete solution for rapid, online training designed to help users apply HSIN to meet mission requirements:

- Self-paced computer based operational training
- Customized assistance and instructor-led training
- Instruction on how to use HSIN features and build and maintain a HSIN community

### HSIN Exchange

A nationwide request for information (RFI) solution:

- Manages and prioritizes RFIs
- Centralizes processes and increases efficiency
- Delivery metrics to avoid duplicative responses
- Provides communications and interoperability across all fusion centers and interagency partners

### Geospatial

Mapping capabilities and applications:

- Geographical data sharing from various sources on one display
- Provides mapping of incident scenes and planned event sites
- Tracks movements/changes over time
- Regular weather updates surrounding specific events and incidents

## HSIN Mission Advocates

HSIN Mission Advocates are trusted advisors, business consultants and information integrators who specialize in many areas including the following:
