

**4.0 INDEX**

The index of key terms was developed based on specific public comments regarding a particular resource or topic area or for terms that could not be found through use of the table of contents. Resource areas that are referenced in the table of contents or terms (i.e., NBAF) that are found throughout the document are not contained in this index. The reason for this approach, for commonly used terms, is that the reader can most effectively be directed to the particular resource section of interest through use of the table of contents.
