</table>

**Metrics:**

- **PMIS - Total Customer Throughput (Unadjusted):**
  - The table lists the throughput for various airports and checkpoints across different dates, with the throughput measured in passenger-miles (PMIS) for a specific period from 3/15/2015 to 3/21/2015.
  - The metrics include various checkpoints and their corresponding throughputs.
  - The throughputs range from 0 to 1,483 passenger-miles per day, with some airports having multiple checkpoints with varying throughputs.
  - The table also indicates that the throughputs are unadjusted, meaning they are not corrected for any external factors such as traffic density or time of day.
