

**Homeland  
Security**

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

**Proposal to Delete Language from Section 503:**

SEC. 503. (a) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year [2008] 2009, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure through a reprogramming of funds that: (1) creates a new program, project, or activity; (2) eliminates a program, project, office, or activity; *or* (3) increases funds for any program, project, or activity for which funds have been denied or restricted by the Congress[; **(4) proposes to use funds directed for a specific activity by either of the Committees on Appropriations of the Senate or the House of Representatives for a different purpose; or (5) contracts out any function or activity for which funding levels were requested for Federal full-time equivalents in the object classification tables contained in the fiscal year 2008 Budget Appendix for the Department of Homeland Security, as specified in the explanatory statement described in section 4 (in the matter preceding division A of this consolidated Act)**], unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds. (b) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year [2008] 2009, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure for programs, projects, or activities through a reprogramming of funds in excess of \$5,000,000 or 10 percent, whichever is less, that: (1) augments existing programs, projects, or activities; (2) reduces by 10 percent funding for any existing program, project, or activity, or numbers of personnel by 10 percent as approved by the Congress; or (3) results from any general savings from a reduction in personnel that would result in a change in existing programs, projects, or activities as approved by the Congress; unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds. (c) Not to exceed 5 percent of any appropriation made available for the current fiscal year for the Department of Homeland Security by this Act or provided by previous appropriations Acts may be transferred between such appropriations, but no such appropriations, except as otherwise specifically provided, shall be increased by more than 10 percent by such transfers: *Provided*, That any transfer under this section shall be treated as a reprogramming of funds under subsection (b) and shall not be available for obligation unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such transfer. **[(d) Notwithstanding subsections (a), (b), and (c) of this section, no funds shall be reprogrammed within or transferred between appropriations after June 30, except in extraordinary circumstances which imminently threaten the safety of human life or the protection of property.]**

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

Explanation: For item (4), language is proposed for deletion to eliminate potential inconsistencies in reconciling House Reports, Senate Reports and the Joint Explanatory Statement. For item (5), language is proposed for deletion to eliminate the restrictions on contracting out functions for which funds have been appropriated for Federal FTEs. Circumstances may warrant from time to time that contracting out functions can be prudent and judicious use of federal funding resources.

Item (d) is proposed for deletion to provide the Department with greater flexibility with respect to timing of potential reprogrammings.

**Proposal to Delete *Old* Section 504:**

**[SEC. 504. None of the funds appropriated or otherwise made available to the Department of Homeland Security may be used to make payments to the “Department of Homeland Security Working Capital Fund”, except for the activities and amounts allowed in the President’s fiscal year 2008 budget, excluding sedan service, shuttle service, transit subsidy, mail operations, parking, and competitive sourcing: *Provided*, That any additional activities and amounts shall be approved by the Committees on Appropriations of the Senate and the House of Representatives 30 days in advance of obligation.]**

Explanation: This section is proposed for deletion since the April 11, 2005 report referenced in Section 6024 of P.L. 109-13 does not include any FY 2008 data. The FY 2008 Congressional Budget Justification includes FY 2008 funding estimates for each Working Capital Fund activity.

**Proposal to Delete and Insert Language in *New* Section 504:**

Proposed changes include deleting [**a request**] and [**for approval**] and inserting ‘notice thereof’.

Explanation: Proposed deletions would clarify that any submissions pursuant to this section are notifications.

**Proposal to Delete and Insert Language in *New* Section 508:**

Proposed changes include deleting [**approval**] and inserting ‘notification’.

Explanation: Proposed deletion would clarify that any submissions pursuant to this section are notifications.

**Proposal to Delete *Old* Section 510:**

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

**[SEC. 510. The Director of the Federal Law Enforcement Training Center shall schedule basic and/or advanced law enforcement training at all four training facilities under the control of the Federal Law Enforcement Training Center to ensure that these training centers are operated at the highest capacity throughout the fiscal year.]**

Explanation: This provision is proposed for deletion because it is not an authority that needs to be enforced by a general provision at this time, and is not necessary for enabling FLETC to operate in an efficient manner.

**Proposal to Delete Old Section 513:**

**[SEC. 513. (a) None of the funds provided by this or previous appropriations Acts may be obligated for deployment or implementation, on other than a test basis, of the Secure Flight program or any other follow-on or successor passenger prescreening program, until the Secretary of Homeland Security certifies, and the Government Accountability Office reports, to the Committees on Appropriations of the Senate and the House of Representatives, that all ten of the conditions contained in paragraphs (1) through (10) of section 522(a) of Public Law 108–334 (118 Stat. 1319) have been successfully met. (b) The report required by subsection (a) shall be submitted within 90 days after the Secretary provides the requisite certification, and periodically thereafter, if necessary, until the Government Accountability Office confirms that all ten conditions have been successfully met. (c) Within 90 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a detailed plan that describes: (1) the dates for achieving key milestones, including the date or timeframes that the Secretary will certify the program under subsection (a); and (2) the methodology to be followed to support the Secretary’s certification, as required under subsection (a). (d) During the testing phase permitted by subsection (a), no information gathered from passengers, foreign or domestic air carriers, or reservation systems may be used to screen aviation passengers, or delay or deny boarding to such passengers, except in instances where passenger names are matched to a Government watch list. (e) None of the funds provided in this or previous appropriations Acts may be utilized to develop or test algorithms assigning risk to passengers whose names are not on Government watch lists. (f) None of the funds provided in this or any other Act may be used for data or a database that is obtained from or remains under the control of a non-Federal entity: *Provided*, That this restriction shall not apply to Passenger Name Record data obtained from air carriers.]**

Explanation: This provision is proposed for deletion as it restricts the Department’s flexibility to execute this program in an effective and efficient manner. The Department has completed rebaselining the cost, schedule and performance goals of the program and plans to satisfy the GAO requirements in 2008.

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

**Proposal to Delete *Old* Section 514:**

**[SEC. 514. None of the funds made available in this Act may be used to amend the oath of allegiance required by section 337 of the Immigration and Nationality Act (8 U.S.C. 1448).]**

Explanation: DHS has stated in the past that the Executive Branch should continue to be responsible for the actual language of the Oath of Renunciation and Allegiance. Through the Immigration and Nationality Act, Congress has already provided a clear mandate on the necessary content and substance of the Oath.

**Proposal to Delete *Old* Section 515:**

**[SEC. 515. None of the funds appropriated by this Act may be used to process or approve a competition under Office of Management and Budget Circular A-76 for services provided as of June 1, 2004, by employees (including employees serving on a temporary or term basis) of United States Citizenship and Immigration Services of the Department of Homeland Security who are known as of that date as Immigration Information Officers, Contact Representatives, or Investigative Assistants.]**

Explanation: This provision is proposed for deletion as it restricts the Department's flexibility. The Administration has adopted an approach to provide for the fair and effective application of public-private competition. Management decisions about public-private competition, and accountability for results, should be vested with the USCIS. Agencies across the Government are using competitive sourcing to reduce costs and improve program performance.

**Proposal to Delete *Old* Section 517:**

**[SEC. 517. Section 517(b) of the Department of Homeland Security Appropriations Act, 2007 (18 U.S.C. 3056 note) is amended to read as follows: “(b) For fiscal year 2008, and each fiscal year thereafter, the Director of the United States Secret Service may enter into an agreement to perform protection of a Federal official other than a person granted protection under section 3056(a) of title 18, United States Code, on a fully reimbursable basis.”.]**

Explanation: This section is proposed for deletion because funding has been included in the U.S. Secret Service's FY 2009 budget request for this purpose. The USSS is best equipped to cover these costs rather than seek reimbursement.

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

**Proposal to Delete *Old* Section 518:**

**[SEC. 518. (a) The Secretary of Homeland Security shall research, develop, and procure new technologies to inspect and screen air cargo carried on passenger aircraft at the earliest date possible. (b) Existing checked baggage explosive detection equipment and screeners shall be utilized to screen air cargo carried on passenger aircraft to the greatest extent practicable at each airport until technologies developed under subsection (a) are available. (c) The Assistant Secretary (Transportation Security Administration) shall work with air carriers and airports to ensure that the screening of cargo carried on passenger aircraft, as defined in section 44901(g)(5) of title 49, United States Code, increases incrementally each quarter. (d) Not later than 45 days after the end of each quarter, the Assistant Secretary (Transportation Security Administration) shall submit to the Committees on Appropriations of the Senate and the House of Representatives a report on air cargo inspection statistics by airport and air carrier detailing the incremental progress being made to meet section 44901(g)(2) of title 49, United States Code.]**

Explanation: This provision is proposed for deletion because screening air cargo is already a high priority for the Department. The Department will provide the required information regardless of this provision.

**Proposal to Delete *Old* Section 519:**

**[SEC. 519. None of the funds made available in this Act may be used by any person other than the Privacy Officer appointed under section 222 of the Homeland Security Act of 2002 (6 U.S.C. 142) to alter, direct that changes be made to, delay, or prohibit the transmission to Congress of any report prepared under paragraph (6) of such section.]**

Explanation: This provision is proposed for deletion as it is inconsistent with the President's constitutional authority to coordinate and supervise all replies and comments from the Executive Branch to Congress.

**Proposal to Delete *Old* Section 521:**

**[SEC. 521. Except as provided in section 44945 of title 49, United States Code, funds appropriated or transferred to Transportation Security Administration "Aviation Security", "Administration" and "Transportation Security Support" for fiscal years 2004, 2005, 2006, and 2007 that are recovered or deobligated shall be available only for the procurement or installation of explosives detection systems, for air cargo, baggage, and checkpoint screening systems, subject to notification: *Provided*, That quarterly reports shall be submitted to the Committees on Appropriations of the Senate and the House of Representatives on any funds that are recovered or deobligated.]**

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

Explanation: This provision is proposed for deletion in an effort to provide greater flexibility in the use of appropriated resources and to consider the most pressing needs in the Department's efforts to protect the Homeland.

**Proposal to Delete Old Section 522:**

**[SEC. 522. Section 525(d) of the Department of Homeland Security Appropriations Act, 2007 (Public Law 109–295; 120 Stat. 1382) shall apply to fiscal year 2008.]**

Explanation: This provision is proposed for deletion because the management directive has been modified.

**Proposal to Delete Old Section 524:**

**[SEC. 524. The Department of Homeland Security Working Capital Fund, established pursuant to section 403 of Public Law 103–356 (31 U.S.C. 501 note), shall continue operations during fiscal year 2008.]**

Explanation: This provision is proposed for deletion because the Department is requesting a more comprehensive provision on the Working Capital Fund in new Section 529.

**Proposal to Delete Old Section 529:**

**[SEC. 529. The functions of the Federal Law Enforcement Training Center instructor staff shall be classified as inherently governmental for the purpose of the Federal Activities Inventory Reform Act of 1998 (31 U.S.C. 501 note).]**

Explanation: This provision is proposed for deletion because the Department opposes provisions that limit competitive sourcing. This provision overrides Executive Branch discretion to consider public-private competition by dictating that commercial classroom training performed at the Federal Law Enforcement Training Center is an inherently governmental activity. Precluding public-private competition for performance of these activities deprives the Department of the operational efficiencies to be gained by competition, and limits its ability to direct Federal resources to other priorities. Management decisions about public-private competition, and accountability for results, should be vested with the Department.

**Proposal to Delete Old Section 530:**

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

**[SEC. 530. None of the funds made available in this Act may be used in contravention of section 303 of the Energy Policy Act of 1992 (42 U.S.C. 13212).]**

Explanation: This provision is proposed for deletion because it is already required by codified law.

**Proposal to Delete Old Section 533:**

**[SEC. 533. None of the funds provided by this or any other Act may be obligated for the development, testing, deployment, or operation of any system related to the MAX-HR project, or any subsequent but related human resources management project, until any pending litigation concerning such activities is resolved, and any legal claim or appeal by either party has been fully resolved.]**

Explanation: This provision is proposed for deletion to provide the Department with greater flexibility with respect to its management of human resources, because strict interpretation of the provision's broad language prevents the Department from meeting basic operational needs of its management of human resources, and because it is not necessary for ensuring that the Department will adhere to judicial determinations.

**Proposal to Delete Old Section 534:**

**[SEC. 534. Section 550 of the Department of Homeland Security Appropriations Act, 2007 (6 U.S.C. 121 note) is amended by adding at the end the following: “(h) This section shall not preclude or deny any right of any State or political subdivision thereof to adopt or enforce any regulation, requirement, or standard of performance with respect to chemical facility security that is more stringent than a regulation, requirement, or standard of performance issued under this section, or otherwise impair any right or jurisdiction of any State with respect to chemical facilities within that State, unless there is an actual conflict between this section and the law of that State.”.]**

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Proposal to Delete Old Section 535:**

**[SEC. 535. (a) AMENDMENTS RELATING TO THE CIVIL SERVICE RETIREMENT SYSTEM.— (1) DEFINITIONS.—Section 8331 of title 5, United States Code, is amended—(A) by striking “and” at the end of paragraph (28), by striking the period at the end of the first paragraph (29) and inserting a semicolon, by redesignating the second paragraph (29) as paragraph (30), and by striking the period at the end of paragraph (30) (as so redesignated) and inserting “; and”; and (B) by adding at the end the following: “(31) ‘customs and border protection officer’**

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

means an employee in the Department of Homeland Security (A) who holds a position within the GS-1895 job series (determined applying the criteria in effect as of September 1, 2007) or any successor position, and (B) whose duties include activities relating to the arrival and departure of persons, conveyances, and merchandise at ports of entry, including any such employee who is transferred directly to a supervisory or administrative position in the Department of Homeland Security after performing such duties (as described in subparagraph (B)) in 1 or more positions (as described in subparagraph (A)) for at least 3 years.”. (2) DEDUCTIONS, CONTRIBUTIONS, AND DEPOSITS.—Section 8334 of title 5, United States Code, is amended—(A) in subsection (a)(1)(A), by striking “or nuclear materials courier,” and inserting “nuclear materials courier, or customs and border protection officer,”; and (B) in the table contained in subsection (c), by adding at the end the following: “Customs and border protection officer7.5After June 29, 2008.”. (3) MANDATORY SEPARATION.—The first sentence of section 8335(b)(1) of title 5, United States Code, is amended by striking “or nuclear materials courier” and inserting “nuclear materials courier, or customs and border protection officer”. (4) IMMEDIATE RETIREMENT.—Section 8336 of title 5, United States Code, is amended—(A) in subsection (c)(1), by striking “or nuclear materials courier” and inserting “nuclear materials courier, or customs and border protection officer”; and (B) in subsections (m) and (n), by striking “or as a law enforcement officer,” and inserting “as a law enforcement officer, or as a customs and border protection officer.”. (b) Amendments Relating to the Federal Employees’ RETIREMENT SYSTEM.—(1) DEFINITIONS.—Section 8401 of title 5, United States Code, is amended—(A) in paragraph (34), by striking “and” at the end; (B) in paragraph (35), by striking the period and inserting “; and”; and (C) by adding at the end the following: “(36) the term ‘customs and border protection officer’ means an employee in the Department of Homeland Security (A) who holds a position within the GS-1895 job series (determined applying the criteria in effect as of September 1, 2007) or any successor position, and (B) whose duties include activities relating to the arrival and departure of persons, conveyances, and merchandise at ports of entry, including any such employee who is transferred directly to a supervisory or administrative position in the Department of Homeland Security after performing such duties (as described in subparagraph (B)) in 1 or more positions (as described in subparagraph (A)) for at least 3 years.”. (2) IMMEDIATE RETIREMENT.—Paragraphs (1) and (2) of section 8412(d) of title 5, United States Code, are amended by striking “or nuclear materials courier,” and inserting “nuclear materials courier, or customs and border protection officer,”. (3) COMPUTATION OF BASIC ANNUITY.—Section 8415(h)(2) of title 5, United States Code, is amended by striking “or air traffic controller.” and inserting “air traffic controller, or customs and border protection officer”. (4) DEDUCTIONS FROM PAY.—The table contained in section 8422(a)(3) of title 5, United States Code, is amended by adding at the end the following: (5) GOVERNMENT CONTRIBUTIONS.—Paragraphs (1)(B)(i) and (3) of section 8423(a) of title 5, United States Code, are amended by inserting “customs and border protection officers,” after “nuclear materials couriers,” each place it appears. (6) MANDATORY SEPARATION.—Section 8425(b)(1) of title 5, United States Code, is amended—(A) by striking “or nuclear

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

materials courier who” and inserting “nuclear materials courier, or customs and border protection officer who”; and (B) by striking “or nuclear materials courier,” and inserting “nuclear materials courier, or customs and border protection officer”.

**(c) MAXIMUM AGE FOR ORIGINAL APPOINTMENT.**—Section 3307 of title 5, United States Code, is amended by adding at the end the following: “(g) The Secretary of Homeland Security may determine and fix the maximum age limit for an original appointment to a position as a customs and border protection officer, as defined by section 8401(36).”.

**(d) REGULATIONS.**—Any regulations necessary to carry out the amendments made by this section shall be prescribed by the Director of the Office of Personnel Management in consultation with the Secretary of Homeland Security.

**(e) EFFECTIVE DATE; TRANSITION RULES.**—(1) **EFFECTIVE DATE.**—The amendments made by this section shall become effective on the later of June 30, 2008, or the first day of the first pay period beginning at least 6 months after the date of the enactment of this Act. (2) **TRANSITION RULES.**—(A) **NONAPPLICABILITY OF MANDATORY SEPARATION PROVISIONS TO CERTAIN INDIVIDUALS.**—The amendments made by subsections (a)(3) and (b)(6), respectively, shall not apply to an individual first appointed as a customs and border protection officer before the effective date under paragraph (1). (B) **TREATMENT OF PRIOR CBPO SERVICE.**—(i) **GENERAL RULE.**—Except as provided in clause (ii), nothing in this section or any amendment made by this section shall be considered to apply with respect to any service performed as a customs and border protection officer before the effective date under paragraph (1). (ii) **EXCEPTION.**—Service described in section 8331(31) or 8401(36) of title 5, United States Code (as amended by this section) rendered before the effective date under paragraph (1) may be taken into account to determine if an individual who is serving on or after such effective date then qualifies as a customs and border protection officer by virtue of holding a supervisory or administrative position in the Department of Homeland Security. (C) **MINIMUM ANNUITY AMOUNT.**—The annuity of an individual serving as a customs and border protection officer on the effective date under paragraph (1) pursuant to an appointment made before that date shall, to the extent that its computation is based on service rendered as a customs and border protection officer on or after that date, be at least equal to the amount that would be payable—(i) to the extent that such service is subject to the Civil Service Retirement System, by applying section 8339(d) of title 5, United States Code, with respect to such service; and (ii) to the extent such service is subject to the Federal Employees’ Retirement System, by applying section 8415(d) of title 5, United States Code, with respect to such service. (D) **RULE OF CONSTRUCTION.**—Nothing in the amendment made by subsection (c) shall be considered to apply with respect to any appointment made before the effective date under paragraph (1). (3) **ELECTION.**—(A) **INCUMBENT DEFINED.**—For purposes of this paragraph, the term “incumbent” means an individual who is serving as a customs and border protection officer on the date of the enactment of this Act. (B) **NOTICE REQUIREMENT.**—Not later than 30 days after the date of the enactment of this Act, the Director of the Office of Personnel Management shall take measures reasonably designed to ensure that incumbents are notified as to their election rights under this paragraph, and the effect of making

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

or not making a timely election. (C) ELECTION AVAILABLE TO INCUMBENTS.—(i) IN GENERAL.—An incumbent may elect, for all purposes, either—(I) to be treated in accordance with the amendments made by subsection (a) or (b), as applicable; or (II) to be treated as if subsections (a) and (b) had never been enacted. Failure to make a timely election under this paragraph shall be treated in the same way as an election made under subclause (I) on the last day allowable under clause (ii). (ii) DEADLINE.—An election under this paragraph shall not be effective unless it is made at least 14 days before the effective date under paragraph (1). (4) DEFINITION.—For purposes of this subsection, the term “customs and border protection officer” has the meaning given such term by section 8331(31) or 8401(36) of title 5, United States Code (as amended by this section). (5) EXCLUSION.—Nothing in this section or any amendment made by this section shall be considered to afford any election or to otherwise apply with respect to any individual who, as of the day before the date of the enactment of this Act—(A) holds a position within U.S. Customs and Border Protection; and (B) is considered a law enforcement officer for purposes of subchapter III of chapter 83 or chapter 84 of title 5, United States Code, by virtue of such position.]

Explanation: This provision is proposed for deletion because the definition of “law enforcement officer” under the Federal Employees’ Retirement System and the Civil Service Retirement System is an employee whose primary duties are (1) the “investigation, apprehension, and detention of individuals suspected or convicted of offenses against the criminal laws of the United States,” and (2) employees who have “frequent and direct” contact with convicted criminals, such as prison support staff. CBP officers, while performing an important and necessary function, do not perform comparable duties.

**Proposal to Insert Language in New Section 536:**

Proposed changes include inserting ‘and thereafter’.

Explanation: This proposed change would provide the Department the flexibility to identify and respond to threats as necessary and would preclude the Assistant Secretary from having to revisit on an annual basis the determination of July 19, 2007 relating to butane lighters.

**Proposal to Delete Old Section 537:**

[SEC. 537. None of the funds provided in this Act may be used to alter or reduce operations within the Civil Engineering Program of the Coast Guard nationwide, including the civil engineering units, facilities, design and construction centers, maintenance and logistics command centers, and the Coast Guard Academy, except as specifically authorized by a statute enacted after the date of the enactment of this Act.]

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

Explanation: This provision is proposed for deletion to provide the Department with greater flexibility on use of appropriated resources.

**Proposal to Delete Old Section 538:**

**[SEC. 538. The cumulative amount appropriated in title I of this Act for the “Office of the Secretary and Executive Management” and the “Office of the Under Secretary for Management” shall be reduced by \$5,000,000.]**

Explanation: This provision is proposed for deletion because it was a one-time rescission.

**Proposal to Delete Old Section 539:**

**[SEC. 539. (a) Except as provided in subsection (b), none of the funds appropriated in this Act to the Office of the Secretary and Executive Management, the Office of the Under Secretary for Management and the Office of the Chief Financial Officer, may be obligated for a grant or contract awarded by a means other than full and open competition. (b) This section does not apply to obligation of funds for a contract awarded—(1) by a means that is required by a Federal statute, including obligation for a purchase made under a mandated preferential program, such as the AbilityOne Program, that is authorized under the Javits-Wagner-O’Day Act (41 U.S.C. 46–48c); or (2) under the Small Business Act (15 U.S.C. 631 et seq.). (c) The Secretary of Homeland Security may waive the application of this section to the award of a contract in the period of a national emergency determined by the Secretary. (d) In addition to the requirements established by this section, the Inspector General for the Department of Homeland Security shall review departmental contracts awarded through other than full and open competition to assess departmental compliance with applicable laws and regulations: *Provided*, That the Inspector General shall review selected contracts awarded during the previous fiscal year through other than full and open competition: *Provided further*, That in determining which contracts to review, the Inspector General shall consider the cost and complexity of the goods and services to be provided under the contract, the criticality of the contract to fulfilling Department missions, past performance problems on similar contracts or by the selected vendor, complaints received about the award process or contractor performance, and such other factors as the Inspector General deems relevant: *Provided further*, That the Inspector General shall report the results of the reviews to the Committees on Appropriations of the Senate and the House of Representatives.]**

Explanation: This provision is proposed for deletion to provide the Department with greater flexibility on the use of its appropriated resources and because a strict

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

interpretation of the broad language of the provision would prevent the Department from carrying out perfunctory or purely administrative operations, services and activities.

**Proposal to Delete Old Section 540:**

**[SEC. 540. Section 44940(a)(2) of title 49, United States Code, is amended by striking the period in the last sentence of subparagraph (A) and the clause (iv) of subparagraph B and adding the following, “except for estimates and additional collections made pursuant to the appropriation for Aviation Security in Public Law 108–334: *Provided*, That such judicial review shall be pursuant to section 46110 of title 49, United States Code: *Provided further*, That such judicial review shall be limited only to additional amounts collected by the Secretary before October 1, 2007.”.]**

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Proposal to Delete Old Section 541:**

**[SEC. 541. None of the funds provided by this or previous appropriations Acts shall be used to fund any position designated as a Principal Federal Official for any Robert T. Stafford Disaster Relief and Emergency Assistance Act declared disasters or emergencies.]**

Explanation: This provision is proposed for deletion because it was a one-time directive and has been superceded by provisions of the Consolidated Appropriations Act, 2008.

**Proposal to Delete Old Section 542:**

**[SEC. 542. Section 46301(a) of title 49, United States Code, is amended by adding at the end the following: “(6)FAILURE TO COLLECT AIRPORT SECURITY BADGES.—Notwithstanding paragraph (1), any employer (other than a governmental entity or airport operator) who employs an employee to whom an airport security badge or other identifier used to obtain access to a secure area of an airport is issued before, on, or after the date of enactment of this paragraph and who does not collect or make reasonable efforts to collect such badge from the employee on the date that the employment of the employee is terminated and does not notify the operator of the airport of such termination within 24 hours of the date of such termination shall be liable to the Government for a civil penalty not to exceed \$10,000.”.]**

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

**Proposal to Delete *Old* Section 545:**

**[SEC. 545. EXTENSION OF THE IMPLEMENTATION DEADLINE FOR THE WESTERN HEMISPHERE TRAVEL INITIATIVE Subparagraph (A) of section 7209(b)(1) of the Intelligence Reform and Terrorism Prevention Act of 2004 (Public Law 108–458; 8 U.S.C. 1185 note) is amended by striking “This plan shall be implemented not later than 3 months after the Secretary of State and the Secretary of Homeland Security make the certifications required in subsection (B), or June 1, 2009, whichever is earlier.” and inserting “Such plan may not be implemented earlier than the date that is the later of 3 months after the Secretary of State and the Secretary of Homeland Security make the certification required in subparagraph (B) or June 1, 2009.”.]**

Explanation: This provision is proposed for deletion to provide the Department with greater flexibility in carrying out its requirements for protecting the Homeland.

**Proposal to Delete *Old* Section 546:**

**[SEC. 546. None of the funds provided in this Act shall be available to carry out section 872 of Public Law 107–296.]**

Explanation: This provision is proposed for deletion to provide the Department with greater flexibility in carrying out its requirements for protecting the Homeland.

**Proposal to Delete *Old* Section 547:**

**[SEC. 547. None of the funds provided in this Act under the heading “Office of the Chief Information Officer” shall be used for data center development other than for the National Center for Critical Information Processing and Storage until the Chief Information Officer certifies that the National Center for Critical Information Processing and Storage is fully utilized, to the maximum extent feasible, as the Department’s primary data storage center at the highest capacity throughout the fiscal year.]**

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Proposal to Delete *Old* Section 548:**

**[SEC. 548. None of the funds in this Act shall be used to reduce the United States Coast Guard’s Operations Systems Center mission or its government-employed or contract staff levels.]**

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

Explanation: This provision is proposed for deletion to provide the Department with greater flexibility in carrying out its requirements for protecting the Homeland and in the use of appropriated resources.

**Proposal to Delete *Old* Section 549:**

**[SEC. 549. None of the funds appropriated by this Act may be used to conduct, or to implement the results of, a competition under Office of Management and Budget Circular A-76 for activities performed with respect to the Coast Guard National Vessel Documentation Center.]**

Explanation: This provision is proposed for deletion as it restricts the Department's flexibility. The Administration has adopted an approach to provide for the fair and effective application of public-private competition. Management decisions about public-private competition, and accountability for results, should be vested with the U.S. Coast Guard. Agencies across the Government are using competitive sourcing to reduce costs and improve program performance.

**Proposal to Delete *Old* Section 550:**

**[SEC. 550. (a) Notwithstanding section 503 of this Act, up to \$24,000,000 from prior year balances currently available to the Transportation Security Administration may be transferred to "Transportation Threat Assessment and Credentialing" for the Secure Flight program. (b) In carrying out the transfer authority under subsection (a), the Transportation Security Administration shall not utilize any prior year balances from the following programs: screener partnership program; explosives detection system purchase; explosives detection system installation; checkpoint support; aviation regulation and other enforcement; air cargo; and air cargo research and development: *Provided*, That any funds proposed to be transferred under this section shall not be available for obligation until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure for such funds that is submitted by the Secretary of Homeland Security: *Provided further*, That the plan shall be submitted simultaneously to the Government Accountability Office for review consistent with its ongoing assessment of the Secure Flight Program as mandated by section 522(a) of Public Law 108-334 (118 Stat. 1319).]**

Explanation: This provision is proposed for deletion because funds were proposed for a one-time transfer.

**Proposal to Delete *Old* Section 551:**

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

[SEC. 551. RESCISSIONS (a) The following unobligated balances made available pursuant to section 505 of Public Law 109–295 are rescinded: \$2,003,441 from U.S. Customs and Border Protection “Salaries and Expenses”; \$9,583,611 from Coast Guard “Operating Expenses”; \$672,230 from “United States Citizenship and Immigration Services”; \$2,790,513 from Federal Emergency Management Agency “Management and Administration”; \$127,994 from Federal Emergency Management Agency “Disaster Assistance Direct Loan Program Account”; \$5,136,819 from U.S. Immigration and Customs Enforcement “Salaries and Expenses”; \$333,520 from Federal Law Enforcement Training Center “Salaries and Expenses”; \$4,211,376 from the “Office of the Secretary and Executive Management”; \$443,672 from the “Office of the Under Secretary for Management”; \$380,166 from the “Office of the Chief Financial Officer”; \$493,106 from the “Office of the Chief Information Officer”; \$368,166 from Domestic Nuclear Detection Office “Management and Administration”; \$45,369 from the “Office of Health Affairs”; \$32,299 from the “Office of Inspector General”; \$1,994,454 from National Protection and Programs Directorate “Management and Administration”; and \$216,727 from Science and Technology “Management and Administration”. (b) From the unobligated balances of funds transferred to the Department of Homeland Security when it was created in 2003, \$59,286,537 are rescinded: *Provided*, That the rescission made under this subsection shall not be executed from the following programs: Coast Guard Retired Pay; U.S. Immigration and Customs Enforcement Violent Crime Reduction Program; Federal Law Enforcement Training Center Instructor Salaries; and Federal Emergency Management Agency National Security Support. (c) Of the amounts available under the heading “Counterterrorism Fund”, \$8,480,000 are rescinded. (d) Of the unobligated balances available in the “Department of Homeland Security, Transportation Security Administration Expenses” account, \$4,500,000 are rescinded.]

Explanation: This provision is proposed for deletion because funds were subject to a one-time rescission.

**Proposal to Delete Old Section 552:**

[SEC. 552. Notwithstanding any other provision of law, the Secretary of Homeland Security shall, under the Federal Emergency Management Agency Public Assistance Program, provide a single payment for any eligible costs for local educational agencies impacted by Hurricanes Katrina or Rita within 30 days of such request: *Provided*, That the payment for schools in Louisiana shall be submitted to the Louisiana Department of Education, which may expend up to 3 percent of those funds for administrative costs: *Provided further*, That the Federal Emergency Management Agency shall not reduce assistance in accordance with section 406(c)(1) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act for local educational agencies impacted by Hurricanes Katrina or Rita: *Provided further*, That nothing in the previous proviso shall be construed to alter the appeals or review process: *Provided further*, That section 406(d) of the Robert T. Stafford

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

**Disaster Relief and Emergency Assistance Act shall not apply to more than one facility on a school site impacted by Hurricanes Katrina or Rita.]**

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Proposal to Delete Old Section 553:**

**[SEC. 553. TECHNICAL CORRECTIONS (a) IN GENERAL.—(1) REDESIGNATIONS.—Chapter 27 of title 18, United States Code, is amended by redesignating section 554 added by section 551(a) of the Department of Homeland Security Appropriations Act, 2007 (Public Law 109–295; 120 Stat. 1389) (relating to border tunnels and passages) as section 555. (2) TABLE OF SECTIONS.—The table of sections for chapter 27 of title 18, United States Code, is amended by striking the item relating to section 554, “Border tunnels and passages”, and inserting the following: “555.Border tunnels and passages.”. (b) CRIMINAL FORFEITURE.—Section 982(a)(6) of title 18, United States Code, is amended by striking “554” and inserting “555”. (c) DIRECTIVE TO THE UNITED STATES SENTENCING COMMISSION.—Section 551(d) of the Department of Homeland Security Appropriations Act, 2007 (Public Law 109–295; 120 Stat. 1390) is amended in paragraphs (1) and (2)(A) by striking “554” and inserting “555”.]**

Explanation: This provision is no longer required as the U.S. code has been amended with the changes included in the provision.

**Proposal to Delete Old Section 554:**

**[SEC. 554. Sections 2241, 2242, 2243, and 2244 of title 18, United States Code, are each amended by striking “the Attorney General” each place that term appears and inserting “the head of any Federal department or agency”.]**

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Proposal to Delete Old Section 555:**

**[SEC. 555. Not later than 30 days after the date of enactment of this Act—(1) the Secretary of Homeland Security shall establish and maintain on the homepage of the website of the Department of Homeland Security, a direct link to the website of the Office of Inspector General of the Department of Homeland Security; and (2) the Inspector General of the Department of Homeland Security shall establish and maintain on the homepage of the website of the Office of Inspector General a direct link for individuals to anonymously report waste, fraud, or abuse.]**

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

**Proposal to Delete *Old* Section 558:**

**[SEC. 558. None of the funds made available in this Act for U.S. Customs and Border Protection may be used to prevent an individual not in the business of importing a prescription drug (within the meaning of section 801(g) of the Federal Food, Drug, and Cosmetic Act) from importing a prescription drug from Canada that complies with the Federal Food, Drug, and Cosmetic Act: *Provided*, That this section shall apply only to individuals transporting on their person a personal-use quantity of the prescription drug, not to exceed a 90-day supply: *Provided further*, That the prescription drug may not be—(1) a controlled substance, as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802); or (2) a biological product, as defined in section 351 of the Public Health Service Act (42 U.S.C. 262).]**

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Proposal to Delete *Old* Section 559:**

**[SEC. 559. None of the funds made available in this Act may be used by the Secretary of Homeland Security or any delegate of the Secretary to issue any rule or regulation which implements the Notice of Proposed Rulemaking related to Petitions for Aliens To Perform Temporary Nonagricultural Services or Labor (H–2B) set out beginning on 70 Fed. Reg. 3984 (January 27, 2005).]**

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Proposal to Delete *Old* Section 560:**

**[SEC. 560. Notwithstanding any other provision of law, Watsonville Community Hospital, or its successor trust, shall not be required to pay the Federal Emergency Management Agency additional funds related to DR–845.]**

**Proposal to Delete *Old* Section 561:**

**[SEC. 561. Notwithstanding any other provision of law, the Secretary of Homeland Security shall provide, under the Federal Emergency Management Agency Public Assistance Program, the relocation costs as estimated by the Federal Emergency Management Agency on May 5, 2006, for the Peebles School in Iberia Parish, Louisiana, which was damaged by Hurricane Rita in 2005.]**

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Proposal to Delete *Old* Section 562:**

**[SEC. 562. Notwithstanding any other provision of law, the Secretary of Homeland Security shall provide, under the Federal Emergency Management Agency Public Assistance Program, the currently uncompensated debris removal costs from Super Typhoon Paka and the firefighting costs associated with the Malojloj hardfill fire in 1998.]**

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Proposal to Delete *Old* Section 569:**

**[SEC. 569. (a) Notwithstanding any other provision of this Act, except as provided in subsection (b), and 30 days after the date that the President determines whether to declare a major disaster because of an event and any appeal is completed, the Administrator shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate, the Committee on Homeland Security of the House of Representatives, the Committee on Transportation and Infrastructure of the House of Representatives, the Committees on Appropriations of the Senate and the House of Representatives, and publish on the website of the Federal Emergency Management Agency, a report regarding that decision, which shall summarize damage assessment information used to determine whether to declare a major disaster. (b) The Administrator may redact from a report under subsection (a) any data that the Administrator determines would compromise national security. (c) In this section—(1) the term “Administrator” means the Administrator of the Federal Emergency Management Agency; and (2) the term “major disaster” has the meaning given that term in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122).]**

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Proposal to Delete *Old* Section 570:**

**[SEC. 570. If the Secretary of Homeland Security establishes a National Transportation Security Center of Excellence to conduct research and education activities, and to develop or provide professional security training, including the training of transportation employees and transportation professionals, the Mineta Transportation Institute at San Jose State University may be included as a member institution of such Center.]**

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

**Proposal to Delete *Old* Section 571:**

[SEC. 571. Effective no later than ninety days after the date of enactment of this Act, the Transportation Security Administration shall permit approved members of Registered Traveler programs to satisfy fully the required identity verification procedures at security screening checkpoints by presenting a biometrically-secure Registered Traveler card in lieu of the government-issued photo identification document required of non-participants: *Provided*, That if their identity is not confirmed biometrically, the standard identity and screening procedures will apply: *Provided further*, That if the Assistant Secretary (Transportation Security Administration) determines this is a threat to civil aviation, then the Assistant Secretary (Transportation Security Administration) shall notify the Committees on Appropriations of the Senate and House of Representatives five days in advance of such determination and require Registered Travelers to present government-issued photo identification documents in conjunction with a biometrically-secure Registered Traveler card.]

Explanation: This provision is proposed for deletion because it was a one-time directive.

**Proposal to Delete and Insert Language in *New* Section 572:**

SEC. [572] 525. Section 831(a) of the Homeland Security Act of 2002 (6 U.S.C. 391(a)) is amended by striking [“**During the 5-year period following the effective date of this Act**” and inserting] “Until September 30, 2008” and inserting in lieu thereof, “Until September 30, 2009”.

Explanation: This proposed change will provide the Department with greater flexibility in the use of appropriated resources.

**Proposal to Delete *Old* Section 573**

[SEC. 573. (a) RESCISSION.—Of amounts previously made available from the Federal Emergency Management Agency “Disaster Relief” to the State of Mississippi pursuant to section 404 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170c) for Hurricane Katrina, \$20,000,000 are rescinded. (b) APPROPRIATION.—For Federal Emergency Management Agency “State and Local Programs”, there is appropriated an additional \$20,000,000, to remain available until expended, for a grant to the State of Mississippi for an interoperable communications system required in the aftermath of Hurricane Katrina: *Provided*, That this entire amount is designated as described in section 5 (in the matter preceding division A of this consolidated Act).]

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

Explanation: This provision is proposed for deletion because funds were subject to a one-time rescission.

**Proposal to Add New Section 526:**

*SEC. 526. The adjustments in rates of basic pay for employees under the statutory pay systems that take effect in fiscal year 2009 and thereafter under sections 5303 and 5304 of title 5, United States Code, shall apply to civilian employees in the Department of Homeland Security, except that with respect to those employees covered under a pay system administered under section 114 of title 49, United States Code, the Assistant Secretary of Homeland Security (Transportation Security Administration) may determine the adjustments in rates of pay based upon performance criteria established by the Assistant Secretary, and such adjustments shall be effective as of the first day of the first applicable pay period beginning on or after January 1 of the applicable fiscal year.*

Explanation: The provision is requested to negate the requirement to give every screener an annual pay increase regardless of their performance rating.

**Proposal to Add New Section 527:**

*SEC. 527. Notwithstanding any other provision of law, should the Secretary of Homeland Security determine that the National Bio and Agro-defense Facility be located at a site other than Plum Island, the Secretary is authorized to liquidate the Plum Island asset by directing the Administrator of General Services to sell through public sale all real and related personal property and transportation assets which support Plum Island operations, subject to such terms and conditions as necessary to protect government interests and meet program requirements. The proceeds of such sale shall be deposited into a separate account that shall be available, along with any other available appropriations, for use by the Secretary in the acquisition of the site for and the construction of the National Bio and Agro-defense Facility. The Secretary may apply such gross proceeds of sale to reimburse any fund of the Secretary used to pay for the costs associated with the sale, including due diligence requirements, necessary environmental remediation, and reimbursement of expenses incurred by the General Services Administration which shall not exceed 1% of the sale price. The net proceeds will be available for other real property capital asset needs as the Secretary deems appropriate, excluding daily operations and maintenance costs. Proceeds derived from the sale shall be available to the Secretary without further appropriation until expended.*

Explanation: In the event the Secretary determines that NBAF will not be located at Plum Island, this provision will allow DHS the authority to liquidate the Plum Island assets and deposit the proceeds of the sale into a separate account for use by the Department to construct the NBAF at an alternative location.

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

**Proposal to Add New Section 528:**

*SEC. 528. The Department of Homeland Security Working Capital Fund, established pursuant to section 403 of Public Law 103–356 (31 U.S.C. 501 note), shall continue operations as a permanent working capital fund for fiscal year 2009 and thereafter: Provided, That funds provided to the Working Capital Fund shall be available for obligation until expended: Provided further, That such fund shall be paid in advance or reimbursed at rates which will return the full cost of each service, and an amount necessary to maintain a reasonable operating reserve: Provided further, That funds not to exceed 10 percent of the funding for any program, project or activity within the Working Capital Fund may be transferred to another program, project or activity within the Working Capital Fund: Provided further, That any such transfer in excess of 10 percent shall be treated as a reprogramming of funds under section 503(b) of this Act and shall not be available for obligation unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such transfer.*

Explanation: The Department’s Working Capital Fund used to be a true revolving fund with retained earnings collected to form working capital. In 2005, the Department lost many of its authorities for the working capital fund (i.e. the ability to carry funds across years and collect more than the direct usage costs) and since then, the working capital fund account has been hampered by a rigid structure that prevents the DHS Chief Financial Officer from delivering much economies of scale and efficiencies to participating users.

The Department needs a real and effective working capital fund through which it can better integrate disparate component agencies into a single department through building and maintaining department-wide infrastructure for critical management and administrative functions. Also, the procedural obstacles created by current legal restrictions prevent DHS from being good financial managers that result in a lot of waste. Hence, the Department seeks the following authorities:

- Ability to carry over funds in a no-year revolving fund account
- Ability to retain a modest level of earnings to develop operating reserves for each service offered through the working capital fund.
- Ability to reprogram only reasonably small sums of funding across PPAs within the working capital fund account without Congressional approval to cut down on processing times, while still having to report to Congress for reprogramming funding levels greater than 10% of the total collection amount of a given PPA.

**Proposal to Add New Section 529:**

*SEC. 529. Section 44923 of title 49, United States Code is amended—( a) in subsection (a)(1)—( 1) by striking “shall” and inserting “may”; and ( 2) by inserting “, including other transaction agreements,” after “grants”; and ( b) by striking subsection (d) and*

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

*redesignating subsections (e) through (j) as (d) through (i); (c) in subsection (d), as redesignated above, by inserting “up to” before “90” and by striking “95” and inserting “up to 90”; (d) in subsection (g)(1), as redesignated above—(1) by striking “(1) In general.-”; and (2) by inserting “, including other transaction agreements,” in the last sentence after “grants”; and (e) by striking paragraphs (g)(2) and (g)(3) as redesignated above.*

**Explanation:** This provision provides the Department with flexibility in use of appropriated resources to finance the installation of Explosives Detection Systems at airports.

**Proposal to Add New Section 530:**

*SEC. 530. Notwithstanding the limitations set forth in section 503(c) of this Act, funds appropriated under the heading Disaster Relief in this Act may be transferred to Disaster Readiness and Support Activities in an amount not to exceed the greater of \$50,000,000, or 25%, of the funds provided under that heading, provided that the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such transfer.*

**Explanation:** This provision will provide the Department with transfer authority to ensure FEMA has the flexibility to fund Disaster readiness and support functions in the event costs are in excess of the \$200 M requested in the Budget.

**Proposal to Add New Section 531:**

*SEC. 531. Section 535 of the Department of Homeland Security Appropriations Act, 2008 (Public Law 110–161, Division E), and the amendments contained thereto, is hereby repealed, as of the date of enactment of such Act.*

**Explanation:** This provision repeals an unfunded requirement in the Consolidated Appropriations Act, 2008, to provide CBP Officers law enforcement benefits. The Department opposes the requirement because CBP Officers, whose duties are limited to checking people and cargo for compliance with immigration and customs laws, are not inherently law enforcement officers.

**Proposal to Add New Section 532:**

*SEC. 532. In this fiscal year and thereafter, under the direction of the Secretary of Homeland Security, the United States Secret Service shall, during the period of six months immediately after an individual ceases to serve as Vice President, protect such individual if the Secretary determines that such individual is in significant danger, and the spouse of such individual if the Secretary determines that the spouse is in significant*

**Department of Homeland Security**  
**FY 2009 Explanation of Changes - General Provisions**

*danger: Provided, That the Secret Service, under the direction of the Secretary, may thereafter provide protection to such individual or spouse temporarily at any time when the Secretary determines that information or conditions warrant such protection: Provided further, That the Secret Service shall have the same authorities and functions in providing protection under this section as under laws relating to protection of the Vice President or the spouse of the Vice President, including laws that provide for obtaining assistance from executive agencies and use of passenger carriers to transport: Provided further, That the offenses and penalties prescribed by law with respect to obstruction, resistance, or interference with the performance of protective functions, including with respect to restrictions on buildings or grounds, in relation to a Vice President or spouse of a Vice President shall apply with respect to performance of protective functions under this section: Provided further, That the authority granted by this section is in addition to any authority that may otherwise be available by law. (Department of Homeland Security Appropriations Act, 2008.)*

**Explanation:** This provision is proposed to ensure that the Department is able to provide Secret Service protection to an individual who ceases to be the Vice President, and the spouse of the individual, should it be determined that such individuals are in significant danger.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Customs and Border Protection** **Salaries and Expenses**

### **I. Appropriation Overview**

#### **A. Mission Statement for Salaries and Expenses:**

For almost five years, CBP has made great strides toward securing America's borders, protecting trade and travel, and ensuring the vitality of our economy. With the creation of U.S. Customs and Border Protection, for the first time in our nation's history, responsibility for securing, controlling and managing the U.S. border is consolidated within a single agency. As America's frontline border agency, CBP employs over 54,000 highly trained and professional personnel, resources, expertise and law enforcement authorities to discharge our mission. CBP is responsible for protecting the sovereign borders of the United States at and between official ports of entry. CBP is on the frontline protecting the American public against terrorists and instruments of terror. CBP also protects economic security by regulating and facilitating the lawful movement of goods and persons across U.S. borders. CBP performs these missions with vigilance, integrity and professionalism.

CBP is responsible for ensuring that all persons and cargo enter the United States legally and safely through official ports of entry. CBP Officers prevent cross-border smuggling of contraband such as controlled substances, weapons of mass destruction, and illegal or diseased plants and animals. CBP ensures that travelers and immigrants present appropriate documentation. CBP works to prevent the illegal export of U.S. currency or other monetary instruments, stolen goods such as vehicles, and strategically sensitive technologies.

In support of this mission, CBP has instituted various programs and initiatives such as the Secure Border Initiative (SBI), a comprehensive multi-year plan to secure America's borders and reduce illegal migration, the Cargo Security Initiative (CSI), a program intended to help increase security for containerized cargo shipped to the United States from around the world and Customs Trade Partnership Against Terrorist (C-TPAT), a joint government-business initiative to build cooperative relationships that strengthen overall supply chain and border security.

CBP is the federal agency principally responsible for security of our nation's borders, both at and between the ports of entry. For the first time, one agency can develop and implement a comprehensive strategy for security and enforcement of all laws at our borders.

CBP carries out its mission without restricting the flow of legitimate trade and travel so important to our nation's economy. Accordingly, CBP has a dual mission – to prevent terrorists and their weapons of mass destruction from entering the U.S. and to facilitate legitimate trade and travel. CBP has found that by using advance information, risk management and technology, and by partnering with other nations and private industry, these goals need not be mutually exclusive.

CBP's primary field occupations include CBP Officers, Border Patrol agents, pilots, marine officers, import and entry specialists, and agricultural specialists. Its field organization is focused around 20 Border Patrol Sectors with 34 border patrol checkpoints and 69 tactical checkpoints between the ports of entry, 142 stations and substations, 20 Field Offices and 327 associated ports of entry, of which 15 are pre-clearance stations. Field personnel use a mix of air and marine assets, non-intrusive technology such as large-scale x-rays and radiation portal monitors, targeting systems, and automation to ensure the identification and apprehension of high-risk travelers and trade and the facilitation of legitimate traffic

### **Mission Statement**

We are the guardians of our Nation's borders.

We are America's frontline.

We safeguard the American homeland at and beyond our borders.

We protect the American public against terrorists and the instruments of terror.

We steadfastly enforce the laws of the United States while fostering our Nation's economic security through lawful international trade and travel.

We serve the American public with vigilance, integrity, and professionalism.

### **Core Values**

***Vigilance:*** Vigilance is how we ensure the safety of all Americans. We are continuously watchful and alert to deter, detect, and prevent threats to our Nation. We demonstrate courage and valor in the protection of our Nation.

***Service to Country:*** Service to Country is embodied in the work we do. We are dedicated to defending and upholding the Constitution of the United States. The American people have entrusted us to protect the homeland and defend liberty.

***Integrity:*** Integrity is our cornerstone. We are guided by the highest ethical and moral principles. Our actions bring honor to our agency and ourselves.

## **B. Budget Activities:**

### **Headquarter Management and Administration**

Headquarters Management and Administration provides critical policy and operational direction, mission support, including equipment, training, and technical expertise to CBP front-line personnel. This program is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

### **Border Security Inspections and Trade Facilitation at the Ports of Entry**

Inspections, Trade and Travel Facilitation at the Ports of Entry facilitates the flow of legitimate travel and trade across U.S. borders while ensuring that threats to the United States are not allowed entry. This is accomplished by using technology, intelligence and risk information, targeting and international cooperation in the screening of entering international cargo and travelers and departing export cargo. This program reduces the potential of terrorists' instruments of terror and contraband from entering the U.S. while facilitating the legal flow of people and trade by deploying CBP Officers to the ports of entry. The goal of this program is to improve compliance with trade regulations and other mandatory import/export guidance while increasing the security of the U.S. CBP has extended its zone of security beyond its physical borders through the use of bilateral and private-sector partnerships, targeting and scrutinizing advance information on people and products coming into this country. CBP is cultivating "smart borders" through the use of technology, has established a layered defense strategy and created "one face at the border," a unified, recognizable presence at the border that combines and capitalizes on the authorities and skills of our diverse workforce.

### **Border Security and Control Between the Ports of Entry**

The primary purpose of the Border Security and Control Between the Ports of Entry program is to establish and maintain effective control of U.S. borders by detecting, responding to, and interdicting border penetrations. A national strategy that consists of five objectives has been established to achieve the mission of this program: 1) Establish substantial probability of apprehending terrorists attempting to illegally enter between ports of entry, 2) Deter illegal entries through improved enforcement, 3) Detect, apprehend, and deter smugglers of humans, drugs and other contraband, 4) Leverage "Smart Border" technology to multiply the effect of enforcement personnel, and 5) Reduce crime in border communities and consequently improve quality of life and economic vitality of targeted areas. The national strategy requires increasing our national security by augmenting enforcement resources along the northern and southern border. The proper balance in the deployment of personnel, equipment, intelligence, support, technology, and infrastructure is critical. Reducing our vulnerability to the entry of terrorists, illegal aliens and drugs by increasing personnel and resources, is the key to the successful implementation of this strategy.

### **CBP Air and Marine – Salaries**

CBP Air and Marine Salaries support a staff of over 1,300 air interdiction officers/pilots, marine enforcement officers, operational support and administrative positions. It provides funding to enhance skills and expertise to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the U.S.

### **C. Budget Request Summary:**

CBP Salaries and Expense requests 46,794 positions, 45,080 FTEs, and \$7,309,354,000 for FY 2009. Excluding emergency funds provided in P.L. 110-161, total adjustments-to-base is 3,066 FTE and an increase of \$99,862,000. Program increases include 3,353 positions and 1,668 FTEs:

- Border Patrol Agent and Support – \$362.5 million is requested to hire, train and equip 2,200 new Border Patrol agents. The purpose of this initiative is two-fold: (1) add 500 new Border Patrol agents to stay on course for meeting the President’s goal of 6,000 new Border Patrol agents by the end of the 1<sup>st</sup> quarter of fiscal year 2009 (total equals 18,319); and (2) provide an additional 1,700 agents to reach 20,019 by the end of the fiscal year. Additional resources are proposed for 441 operational/mission support personnel (\$32.2 million), relocation (\$25.6 million), and training (\$22.1 million). CBP is also seeking \$149.5 million in the Construction account for new or expanded facilities to accommodate significant increases in Border Patrol agents and support staff.
- Air and Marine Staffing –\$4.0 million is requested to hire 24 Unmanned Aircraft Systems (UAS) pilots to provide adequate staffing at northern Border/Great Lakes locations as CBP expands support for border security operations consistent with the Secure Border Initiative (SBI) and the CBP Air and Marine Strategic Plan.
- Western Hemisphere Travel Initiative (WHTI) – An increase of \$106.9 million is requested in support of the WHTI implementation to complete infrastructure improvements at the top 39 Land ports of entry covering 95 percent of the land border arrivals. Funding would support an additional 89 CBP Officers (\$9.9 million) and equipment and contract services (\$97.0 million). In FY 2008, CBP received \$225 million to develop the primary vehicle application, install hardware and make the necessary lane modifications to implement WHTI at 13 high volume ports, accounting for about 68 percent of all vehicle passenger traffic at U.S. land border ports of entry. The FY 2009 increment would pay for the completion of infrastructure improvements to the remaining POEs and includes facility modifications and the build out of primary lanes as operationally necessary. In addition, it completes the implementation of the non-RFID POEs and pays for program management and support of the previously installed POEs.
- Radiation Portal Monitors (RPM) Staffing – \$35.5 million is requested for personnel and operations and maintenance support of the Domestic Nuclear Detection Office (DNDO) deployment of Radiation Portal Monitors. Of the \$35.5 million, \$27.3 million will be utilized to hire 238 CBP Officers, 20 scientists, 25 IT specialists and 12 mission support personnel to implement the deployment and to perform the subsequent operation of the RPMs at our Nation’s seaports. Funding in the amount of \$8.2 million will be utilized for operations and maintenance of RPMs and will ensure effective operation of new Advanced Spectroscopic Portals (ASP). The ASP systems are expected to operate 24 hours per day, 7 days per week, and 365 days per year.
- Passenger Screening at Land Ports of Entry - \$25.0 million is requested to hire 212 CBP officers and 22 support positions for passenger processing activities at the ports of entry on our borders with Mexico and Canada.

- US-VISIT (including 10-Print) - \$62.8 million is requested to provide the operations and maintenance (O&M) funding to sustain the US-VISIT increments within CBP. US-VISIT provided funding to CBP to develop and implement US-VISIT increments since FY 2003. These increments provide functionality critical to both US-VISIT and CBP in securing entry to the United States at the ports of entry and providing entry and exit information for aliens. Previously, CBP prepared an annual O&M request for US-VISIT funding. Beginning in FY 2009, CBP will request funding for operations and maintenance.
- Replace Obsolete Non-Intrusive Inspection (NII) Imaging Systems - \$10.0 million is requested to replace small-scale NII systems that are over 10 years old and are approaching the end of their life cycle. Funds will also be utilized to purchase NII small-scale technologies to cover identified deficiencies in inspection and detection capabilities. The remaining FY 2009 funds will be used for operations and maintenance of NII equipment. Small-scale NII equipment enables the CBP to perform more effective and efficient non-intrusive inspections and screenings of international passengers and luggage and of packages and flat mail at mail facilities and consignment centers. In addition, small-scale NII equipment enables CBP to inspect cars, trucks, railcars, and sea containers that have been identified by large-scale NII systems as potentially containing illicit goods. Such illicit goods are money, guns, ammunition, agricultural items, explosives, and chemical, biological, and nuclear agents.
- Automated Targeting System Passenger (ATS-P) –\$5.0 million is requested to begin targeting methodology improvement activities and begin to address the requirement for high priority infrastructure improvements including high availability, Service Oriented Architecture (SOA), and a simulation and testing environment to improve service delivered to CBP Officers in the field, accommodate increased volume of passengers and vehicles, provide a simulation and test environment to support passenger targeting improvements, and move towards true 24/7 system availability.
- Ground Transportation -\$8.0 million is requested to expand the use of contract transportation and guard services for the southwest border. The additional requested transportation resources will be applied along the southwest border freeing up an additional 96,000 hours for agents and officers to resume primary law enforcement and investigative duties. The primary use of the funds will be to secure transportation of detainees. Agents and Officers must perform transportation duties, if contracted services are not funded thereby removing the agents and officers from their primary missions of enforcement of the border. Guard and law enforcement custodial services will also be provided at processing centers or at medical facilities treating ill or injured detainees.
- CBP Intelligence Program –\$24.0 million is requested to hire and train 27 personnel and fund approximately 10 relocations to stand-up a 24x7 CBP National Intelligence Watch; and to develop and deploy a comprehensive and innovative Analytical Framework for Intelligence (AFI). The 24/7 Intelligence Watch will provide Total Situational Awareness for CBP decision-makers and mission partners for All Crimes/All Threats/All Hazards. AFI integrates multiple operational and intelligence databases and provides relevant data flow to the desktop automatically based on mission focus areas that are specifically designed for CBP intelligence officers.

- Conduct and Integrity Oversight - \$5.3 million is requested to hire an additional 24 GS-1801 Investigators and 5 support positions to address internal affairs staffing needs. By FY 2009, CBP will have a workforce of over 54,000 with frontline personnel conducting a mission that is vulnerable to corruption. FY 2009 will also be the second year developing a permanent, full-time cadre of investigators that is responsible for investigating all serious non-criminal misconduct allegations and lesser administrative violations involving CBP employees; as well as criminal allegations not related to corruption. In addition to addressing reports of alleged misconduct in a timely manner, the investigators will also be responsible for participating in active partnerships with the Department of Homeland Security Office of Inspector General, Immigration and Customs Enforcement's Office of Professional Responsibility and other Federal, state and local law enforcement authorities to proactively develop sources of information and new investigative subjects.
- CBP's Regulatory Program - \$1.0 million is requested to support CBP's regulatory program. The requested funds will allow CBP to obtain an additional 7 attorneys, 2 economist, 2 paralegals and 1 mission support personnel. These personnel will ensure the efficient and legally-thorough drafting of new regulations; assist in the removal of obsolete and inconsistent regulations that may pre-date the Department's creation; help issue guidance to the private sector on homeland security-related matters; and aid in the Department's compliance with new Presidential mandates concerning legal review.

## IIa. Summary of FY 2008 Budget Estimates by Program/Project Activity (PPA) excludes all 2008 emergency funding

CBP requests \$1.3 billion for Headquarters Management and Administration. This is an increase of \$45.3 million over FY 2008 Enacted. The request includes:

- increase of \$2.9 million for pay annualization, and \$8.7 million for pay inflation
- decrease of \$3.0 million for non-recurring expenses
- increase of \$3.7 million for FY 07 Supplemental annualization tail, \$3.4 million for Integrity Oversight annualization, and \$373,000 for Anti-Dumping enforcement
- program increases of \$5.3 million for conduct and integrity oversight, and \$24 million for Intelligence.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

Headquarters Management and Administration provides critical policy and operational direction, mission support, and technical expertise to CBP front-line personnel. This program is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

Headquarters Management and Administration is comprised of two main groupings: "Policy, Direction and Human Capital," and "Technology and National Support."

## Policy, Direction and Human Capital

### **Office of the Commissioner**

The Office of the Commissioner includes the Commissioner's direct staff and 4 offices:

#### Office of Intelligence and Operations Coordination (OIOC)

Effective October 1, 2007, U.S. Customs and Border Protection established the Office of Intelligence and Operations Coordination. The OIOC is responsible for two primary missions:

Intelligence Production – this effort encompasses the complete Intelligence Cycle, including: planning; collection; processing; analysis and dissemination of all-source information and intelligence in support of CBP's All Crimes/All Threats/All Hazards mission set. This effort ensures that intelligence is focused on CBP operators and operational decision-makers and is integrally linked with passenger and cargo targeting efforts.

Operational Coordination – the new office will coordinate the development of CBP-wide plans and operations, manage CBP National Incident responses, and provide organizational decision-makers with situational awareness.

Through the establishment of this office, CBP realizes greater effectiveness in combating terrorism, drug and alien smuggling, and other crimes within its jurisdiction by: improving the collection and analysis of information from CBP Officers, Border Patrol agents, Air Interdiction agents, Marine Interdiction agents, DHS and other agencies; integrating that information into larger analytic efforts; coordinating the development and implementation of intelligence-based operations; developing and evaluating targeting rules that are intelligence-based and constantly refreshed; and overseeing the establishment of field-level operational coordination and intelligence functionalities that will provide field leadership the mechanisms to share information and to plan and coordinate joint operations.

The office will be comprised of an optimal blend of operators, analysts and mission support personnel, and it will be structured in such a way as to optimize their interaction and collaboration. The office will be focused on programmatic oversight, analysis, and coordination, rather than the conduct of operations. The new OIOC will establish mechanisms to ensure the flow of valuable information to and from field intelligence assets, and the integration of field information into broader analytic products that directly support headquarters and field operations.

The Offices of Intelligence and Anti-Terrorism will be moved into the new organization, along with all resources. The appropriate resources from the headquarters Offices of Border Patrol, Field Operations, and Information Technology will also be realigned into the new office.

### Office of Chief Counsel

The Chief Counsel is the chief legal officer of CBP and reports to the General Counsel of the Department of Homeland Security through the Assistant General Counsel. The Chief Counsel serves as the Ethics Officer for the organization and is the principal legal advisor to the Commissioner of CBP and its officers. The Office of the Chief Counsel provides legal advice to, and legal representation of, CBP officers in matters relating to the activities and functions of CBP. The Office is also responsible for reviewing proposed actions to ensure compliance with legal requirements, preparing formal legal opinions, preparing or reviewing responses in all court actions, civil or criminal, involving CBP, and developing, implementing, and evaluating nationwide programs, policies, and procedures within its functional areas. The Office of the Chief Counsel has both a Headquarters and a field structure. The Headquarters office is located in Washington, D.C. and its activities are divided broadly into three functional areas under the supervision of Associate Chief Counsels: Ethics, Labor and Employment; Enforcement and Trade; and Finance. The field structure consists of Associate and Assistant Chief Counsels located in major cities across the United States who advise CBP field managers in their geographic areas.

### Office of Policy and Planning (OPP)

The Office of Policy and Planning provides leadership and direction to CBP's overall strategic and tactical planning; organizational assessment and strategic goal alignment; statistical analysis and performance measurement; resource management and risk analysis; and, policy development and implementation in the board array of issues addressed by CBP. OPP advises the Executive Staff on the development of national border security policy. It is the central coordinating point for matters related to the Government Performance and Results Act (GPRA) and the President's Management Agenda (PMA). In addition to leading CBP in the development of planning products required by GPRA, OPP assists CBP programs with providing performance measurement and vital information to justify five-year resource requests through the Future Year Homeland Security Plan (FYHSP). OPP helps CBP maintain a consistent strategic planning methodology to apply its programs and assists programs to prepare comprehensive strategic plans to address special issues and topics identified by the Commissioner. OPP coordinates all Congressional reporting and ensures reporting requirements are met an appropriate manner. OPP also serves as the liaison with external audit groups such as the Office of the Inspector General (OIG) and the Government Accounting Office (GAO) to coordinate CBP responses to external audit reports.

### Office of Equal Opportunity

The Office of Equal Opportunity is responsible for ensuring compliance with civil rights statutes and regulations. The Office ensures equal opportunity for all U.S. Customs and Border Protection employees, applicants for employment, members of the trade and traveling public without regard to race, color, religion, sex, age, national origin, or physical and mental disability. The Office provides program leadership in the formulation, implementation, and evaluation of policies and programs in the areas of dispute resolution; complaints processing; and compliance, analysis and special programs.

### **Office of International Trade (OT)**

In FY 2009, The Office of International Trade will be realigned to the Border Security Inspections and Trade Facilitation at POEs PPA.

### **Office of Internal Affairs (IA)**

The Office of Internal Affairs exercises oversight authority for all aspects of CBP operations, personnel, and facilities. IA is responsible for ensuring compliance with all bureau-wide programs and policies relating to corruption, misconduct, or mismanagement; investigating misconduct by CBP employees; and executing the internal security, integrity, management self-inspection program and operational field testing. IA also conducts personnel security investigations; educates employees concerning ethical standards and integrity responsibilities; evaluates physical security threats to CBP facilities, and sensitive information; and inspects CBP operations and processes for managerial effectiveness and improvements.

### **Office of Human Resources (HRM)**

The Office of Human Resources is responsible for ensuring effective delivery of the following services: recruiting, providing employee services and benefits, processing personnel actions, improving business processes, and facilitating workforce effectiveness. HRM promotes and enables mission accomplishments through human capital planning and utilization, strategic leadership with regard to CBP employees, labor-management relations, training and employee safety.

### **Office of Training and Development (OTD)**

The Office of Training and Development is responsible for centralized leadership and direction of all CBP training programs. OTD ensures that all training efforts meet the needs of a diverse and dispersed workforce. OTD establishes standards and policies for designing, developing, delivering, and evaluating training. OTD directly executes career development programs, basic and advanced training to all occupations, management and executive development programs, and develops and implements the annual training plan for the agency.

### **Office of International Affairs and Trade Relations (INATR)**

The Office of International Affairs and Trade Relations is responsible for coordinating and supporting foreign initiatives, programs and activities within CBP. INATR strives to extend U.S. borders by implementing programs and initiatives that promote anti-terrorism, global border security, non-proliferation, export controls, immigration, capacity building, and facilitating legitimate trade. INATR focuses on international cooperation and strengthening multi- and bi-lateral relationships to achieve international agreements and joint efforts that both facilitate and secure legitimate trade. INATR promotes expansion of the World Customs Organization (WCO) Framework of Standards for supply chain security and facilitation by providing targeted countries with training and advisory support through programs such as Capacity Building and Export Control and Border Security (EXBS). INATR provides in-country advisory support for broad-based customs reform and modernization and ensures CBP is represented at overseas

posts and influencing policy throughout the world. In addition, INATR oversees the development and communication of trade policy and serves as an objective and independent problem resolution resource for the international trade community on issues elevated to the Assistant Commissioner, INATR.

### **Office of Congressional Affairs**

The Office of Congressional Affairs is responsible for advising CBP managers on legislative and congressional matters and for assisting members of Congress and their staffs in understanding current and proposed CBP programs.

### **Office of Public Affairs (OPA)**

The Office of Public Affairs communicates CBP's mission and operations. OPA continually informs the agency's chief stakeholders, the American public, through media outreach and public information campaigns conducted via media events, news and video and photography as well as the public Web site CBP.gov, informational brochures, and a national customer service call center to address public questions/complaints. OPA also provides continual information to the CBP work force through the CBPnet intranet site, the weekly e-mailed news compilation Frontline News, and through mass e-mails. A monthly newsletter, CBP Today, is mailed to CBP personnel and other stakeholders throughout the nation. OPA acts as a conduit for information to and guidance from the Department of Homeland Security.

### Technology and National Support

#### **Office of Finance (OF)**

The Office of Finance provides high quality, cost-efficient financial management services through customer involvement and modern, integrated financial systems, in support of CBP's goal of developing and promoting more effective and efficient methods to obtain and manage financial data, resources, and capital assets, consistent with the needs of customers and stakeholders. OF is responsible for acquiring and effectively managing the assets needed to accomplish CBP's frontline mission. This includes centralized requirements, planning and implementation of CBP's facilities and fleet management programs. It also includes translating workloads and requirements into budget requests for needed resources, allocating and distributing funds after resources are made available, acquiring and distributing personnel, goods, and services that are used to accomplish CBP's mission, managing and paying for those goods and services, and reporting on costs and use of personnel, goods, and services. OF is also responsible for preparing the annual financial statements in compliance with the CFO Act, and for acting as a liaison with auditors contracted by the Inspector General to perform the CBP stand-alone Financial Statements Audit and the DHS consolidated Financial Statements Audit.

#### **Office of Information and Technology (OIT)**

The Office of Information and Technology provides integrated, comprehensive technical support to carry out the mission of CBP, as well as the Department of Homeland Security. OIT is responsible for developing, acquiring, testing, and maintaining existing technology and engineering new technology solutions; for managing the CBP

Modernization Program; for overseeing the forensic and scientific analyses in the CBP laboratory system; for designing, developing, maintaining and training personnel on CBP's automated systems; for overseeing the tactical wireless radio program; and for ensuring the reliable performance of our infrastructure. OIT also manages the computer security program; establishes automated interfaces between CBP, trade participants, and other government agencies; and provides reference library and electronic information resources.

### **Enterprise Data Management & Engineering (EDME)**

Enterprise Data Management & Engineering provides innovative Information Technology (IT) services and solutions to Office of Information and Technology (OIT), Customs and Border Protection and the Department of Homeland Security customers. EDME engineers enterprise solutions providing optimal IT data integrity and accessibility that ensures performance quality, reliability and 24x7 IT systems availability which supports the protection of our borders and the facilitation of legitimate trade. In this capacity, EDME uses industry and government best practices to integrate business and technical solutions across the OIT enterprise. EDME provides its DHS and CBP customers with financial guidance, enterprise architecture design and management, systems engineering, data center operations and services, strategic planning, security program management, technology evaluation and integration, audit coordination, and enterprise process management. As a service and mentoring organization, EDME works collaboratively with its DHS and CBP customers to provide innovative technology services and solutions through teamwork and technical excellence.

### **Enterprise Networks & Technology Support (ENTS)**

Enterprise Networks & Technology Support is responsible for enterprise architecture, design and management of CBP network infrastructures, including the shared departmental DHS OneNet. ENTS provides operational day-to-day technology support to all CBP field locations, technology training, enterprise-wide area network, security operations and helpdesk services. ENTS provides 24x7 local area network, wireless, surveillance and detection technology support to all CBP field offices, performs field outreach, manages field modernization projects and oversees all field deployments. ENTS is aggressively working to modernize CBP Field locations deploying a common wireless communications infrastructure and a consistent desktop configuration across all of CBP, while improving network diversity and survivability.

### **Targeting and Analysis Systems Program Office (TASPO)**

The Targeting and Analysis Systems Program Office is responsible for enhancing, administering, and maintaining selectivity and targeting systems and related systems that help secure the supply chain and support CBP's layered defense strategy for international cargo and passengers. TASPO systems include the Automated Targeting System (ATS), an Intranet-based enforcement and decision support tool that is the cornerstone for all Customs and Border Protection's targeting efforts. In addition to ATS, TASPO has developed and maintains other systems, including Cargo Enforcement Reporting and Tracking System (CERTS), Customs Automated Operations System (CAOS), Customs-Trade Partnership Against Terrorism (C-TPAT), and Port Radiation Inspection, Detection

& Evaluation System (PRIDE). TASPO also supports CBP operational units like the National Targeting Center (NTC), Passenger Analysis Units (PAUs), Advanced Targeting Units (ATUs), Office of Intelligence, and other analytical groups within the government.

#### **Cargo Systems Program Office (CSPO)**

The Cargo Systems Program Office is responsible for the development, maintenance, and deployment of systems (such as the new Automated Commercial Environment, the Automated Commercial System, and the Automated Export System) and interfaces that support CBP, participating government agencies, and the trade community requirements concerning the importation, exportation, and control of merchandise shipments.

#### **Passenger Systems Program Office (PSPO)**

The Passenger Systems Program Office provides application development and continued operational support of all passenger and immigration management systems hosted by CBP. PSPO integrates the Traveler Enforcement Communication System (TECS), formerly known as Treasury Enforcement Communication System, the Advanced Passenger Information System (APIS) and other systems with US VISIT.

#### **Border Enforcement and Management Systems Program Office (BEMSPO)**

The Border Enforcement and Management Systems Program Office responsibilities include system development for the full systems life cycle from planning through deployment of all Border Enforcement and Mission Support systems. BEMSPO provides concentrated support of Border Enforcement Systems for the Office of Border Patrol, the Office of Field Operations, and the Office of Air and Marine. BEMSPO also supports Management Systems solutions for the Office of Finance, the Office of Internal Affairs, the Office of Human Resource Management and the Office of Training and Development. Some of the systems supported include ENFORCE; Border Patrol Enforcement and Tracking System (BPETS); iCAD; Enterprise GeoSpatial Information System; Customs Overtime Scheduling System (COSS); Systems, Applications and Processes (SAP); CBP.gov; and CBP.net.

#### **Laboratories and Scientific Services**

Laboratories and Scientific Services is the Forensic/Scientific arm of the U.S. Customs and Border Protection providing forensic and scientific testing in the area of Trade Enforcement, Weapons of Mass Destruction, Intellectual Property Rights, and Narcotics Enforcement. Each of the eight field laboratories operates a mobile laboratory that is used at the borders for on-site emergency response and programmatic on-site border security operations. A specially trained laboratory forensic "jump" team that can be activated at a moments notice provides crime scene investigation, documentation, and testing for cases involving possible terrorist activity. In addition, CBP's scientists are rotated to the front-line of many of the busiest ports to provide on-site operational support, analysis, training, and response to alerts from CBP's sophisticated Non-Intrusive Inspection and Radiation Portal Monitor technologies.

**Workforce Management Group (WMG)**

The Workforce Management Group is responsible for providing administrative, organizational, and management support to the managers and personnel of the Office of Information and Technology (OIT). WMG's various functional areas include logistics and space management, physical security, reviewing and tracking Background Investigations (BI) packages, and Human Resource activities relating to staffing, awards, Performance Management System, Labor & Employee Relations (LER), Workers' Compensation Program, and Human Capital. In addition, the WMG supports various special projects such as audits relative to WMG, data calls, budget activities, communications, Web Content Administration and developing & preparing OIT Executive Performance Plans.

**Financial Management Group (FMG)**

The Financial Management Group formulates and executes budgets and coordinates property management for the Office of Information and Technology (OIT). FMG supports the CBP's Investment Management Process (IMP) and the approval process of CBP information technology investment and funding approvals through the Department of Homeland Security investment review process. FMG also coordinates CBP IT acquisition plans through the DHS CIO acquisition approval process. FMG works closely with all OIT organizations to ensure sound fiscal management of OIT resources, to coordinate budgets, and to participate in all program, project, and budget reviews.

\*The table above includes emergency funding of \$271 million provided in P.L. 110-161. CBP requests \$1.8 billion for Border Security Inspections and Trade Facilitation at Ports of Entry (POE). Excluding emergency funds provided, the increase of \$251.6 million over FY 2008 includes pay and non-pay inflation as well as program increases for WHTI, Radiation Portal Monitors (RPM) Staffing, Regulatory Attorneys, US-VISIT Operations and Maintenance (O&M), Passenger Screening at Land POEs, and DNDO RPM O&M staff support:

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The CBP Officer is multi-disciplined and performs the full range of inspection, intelligence analysis, examination, and law enforcement activities relating to arrival and departure of persons, conveyances, and merchandise at ports of entry. The Officer's primary responsibility is to identify potential terrorists and instruments of terror and to perform layered enforcement activities relative to counter-terrorism. These enforcement activities are to prevent the entry of terrorists and instruments of terror, harmful pests and diseases, illegal drugs and contraband, and illegal aliens and importations/exportations contrary to law and trade agreements, from entering/exiting the United States. The Officer interprets the laws and regulations of a broad range of Federal, state, and local agencies, relating to the admissibility of people, cargo and conveyances.

In FY 2008, CBP received funding for 200 new CBP Officers as authorized under the SAFE Ports Act, as well as funding for the Model Ports Program and an additional 200 CBP Officers to support Model Ports, which CBP will implement at the 20 busiest airports.

SBI program offices work with Border Patrol, Field Operations, Intelligence, and Information Technology offices to identify and provide information on developing and installing a technology and tactical infrastructure solution for border control at and between the ports of entry to DHS stakeholders. During FY 2007 and FY 2008, the SBI program made numerous advances towards providing a solution towards the goal of

border security. The initial focus of *SBI*net has been on the southwest land border sectors and between the official ports of entry where there are serious vulnerabilities to border security. In FY 2009, CBP will continue to secure the southwest border and commence *SBI*net technology and tactical infrastructure funding for the northern border sectors. Further, *SBI*net is continuing efforts to build a common operating picture (COP) of the border environment within a command center environment that will provide uniform data to all DHS agencies and be interoperable with stakeholders external to DHS. Specific programs under Border Security Inspections and Trade Facilitation at the ports of entry are covered below:

### **Trusted Traveler Programs (TT)**

Since the terrorist attacks of September 11th, CBP has placed great emphasis on developing and expanding Trusted Traveler programs for passengers and commercial truck drivers at the land borders with Canada and Mexico and developing similar programs for international air passengers. The TT programs help to identify low-risk, pre-vetted travelers by the voluntary submission of an application and subsequent vetting using automated checks for law enforcement databases, fingerprint/name checks, and an interview with a uniformed officer.

Currently, CBP TT has four credentialing programs – NEXUS Air and Highway, Secure Electronic Network for Travelers Rapid Inspection (SENTRI), SENTRI Pedestrian, and Free and Secure Trade (FAST). These programs are discussed under the FAST/SENTRI/NEXUS PPA. CBP is looking for legislative and regulatory approval to launch another air program (US PASS) at John F. Kennedy International Airport, Terminal 4, Washington Dulles International Airport, and Houston Intercontinental Airport in 2008. US PASS will implement a single integrated passenger processing system that will expedite the movement of international low-risk air travelers by providing an alternative primary inspection process for pre-approved, pre-screened eligible travelers.

### **Western Hemisphere Travel Initiative (WHTI)**

Section 7209 of the Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA), Public Law 108-458, as amended, directs the Secretary of Homeland Security, in consultation with the Secretary of State, to develop and implement a plan to require U.S. citizens (and non-U.S. citizens) to present a passport or other authorized travel document that denotes identity and citizenship when entering the United States. Consistent with the Consolidated Appropriations Act of 2008, DHS will be making the investments to prepare for implementation of this secure document requirement at land and sea border ports of entry by June 1, 2009.

Deployment of infrastructure and technology will occur primarily at the 39 high volume ports of entry that support 95 percent of the land border traffic. CBP will complete the design, development, and implementation of a new land border application utilizing Radio Frequency Identification (RFID) Technology and IT infrastructure to read, validate and process Passport Cards to be issued by the Department of State and other WHTI compliant RFID-enabled documents such as the Enhanced Driver's License.

The FY 2009 resources will be utilized to complete the rollout of WHTI, provide improved lane management, and support maintenance of the installed base including the program management office. In addition, the non-RFID POEs will be upgraded with the new vehicle primary application that will be developed under WHTI. This new land border application will fully interface with the trusted traveler database in order to allow “flex” lanes at the POEs. This will enable lanes to be used as trusted traveler, RFID only, or standard vehicle primary lanes based on the operational needs of the individual port of entry. When a member in one of the trusted traveler programs (NEXUS, SENTRI, FAST) utilizes their RFID enabled card in the Trusted Traveler Lane it will also automatically capture and satisfy WHTI document requirements, thus enhancing CBP’s ability to manage traffic flow at the land borders. Additionally, this will support the Enhanced Driver’s License Project for the States and the Native American Tribal Enrollment Project in terms of developing the requirements and support the technical interfaces necessary.

#### **Electronic Travel Authorization (ETA)**

Congress included funding for the Electronic Travel Authorization in FY 2008 to develop an internet-based system for Visa Waiver Program (VWP) travelers as required by Section 711 of the 9/11 Commission Act. ETA will give VWP travelers advanced approval to travel to the U.S. and will allow CBP to pre-vet VWP travelers, providing another tool for CBP further secure U.S. borders by pushing the zone of security outward.

#### **Immigration Advisory Program (IAP)**

Under the Immigration Advisory Program, CBP deploys Officers overseas (London, Amsterdam, Warsaw, Tokyo, and Frankfurt) to support CBP’s goal of enhancing the security of air travel by preventing terrorists from boarding commercial aircraft destined for the U. S. and reducing the number of improperly documented passengers traveling from or through a country to the U. S. IAP provides information to host countries, or appropriate authorities, regarding travelers of interest. It focuses on high-risk persons through the use of current targeting and passenger analysis information or an assessment of the passenger’s travel documentation. The goal of these efforts is the apprehension and prosecution of criminals and persons of national security interest by host countries, the disruption of attempts to smuggle aliens, and the disruption of attempts to enter the U. S. with fraudulent documents. Since IAP does not have any authority in the host country to take such action, the program works with the host country’s immigration and/or control authority and the air carrier who will take the appropriate action to prevent the person from boarding the flight to the U. S.

Since the initial deployment of IAP in June 2004 through December 1, 2007, IAP officers have assisted foreign governments and airline personnel in preventing 2,794 persons from boarding flights for the U.S., discovered 173 fraud cases (such as altered documents and imposters), identified 199 terrorists targets, saved CBP \$4,213,572 in processing costs, and saved airlines \$4,101,135 in fines.

### **Fraudulent Document Analysis Unit (FDAU)**

The Fraudulent Document Analysis Unit gathers in one location all the fraudulent documents intercepted at the ports of entry, nationally. From these documents and their accompanying apprehension reports, analysts compile profiles of smugglers, smuggling routes and methods, and trends. They target for close scrutiny at entry persons whose travel may have been arranged by a smuggler. FDAU analysts also focus on documents from terrorist-linked countries and documents presented by persons with a connection to terrorism. Analysts gather intelligence information, write regular reports and customized reports, plot trends, generate document seizure statistics, and give briefings on international travel using fraudulent documents. The products generated by the FDAU, to include training material using the actual sized documents, benefit the ports, government intelligence units within DHS, the Forensic Document Laboratory at U.S. Immigration and Customs Enforcement and other parts of the Federal Government.

### **Admissibility Review Office (ARO)**

The Admissibility Review Office provides CBP with a dedicated resource with institutional knowledge and a consistent approach in making determinations of admissibility relative to the exercise of discretion of inadmissible aliens under the Immigration and Nationality Act (INA). The ARO works extensively with the Department of State (DOS) and other agencies to determine whether inadmissible aliens may be permitted to travel as non-immigrants with waivers. They review applications submitted by aliens who have been determined by CBP Officers or consular officers to be ineligible to be admitted to the United States because of one or more grounds of inadmissibility under section 212(a) of the INA.

The ARO currently processes and adjudicates all nonimmigrant waivers of inadmissibility recommended by DOS consular officers worldwide. It also adjudicates all nonimmigrant waiver applications within the jurisdiction of CBP. The ARO is in the conceptual phase for transition of decision-making authority for all National Security Entry Exit Registration System (NSEERS) waivers from field offices to the ARO.

### **Canine Enforcement Program (CEP)**

The Canine Enforcement Program plays a crucial role in CBP's anti-terrorism and interdiction efforts. The CEP remains a major component in CBP's ability to interdict illegal narcotics, concealed humans, prohibited agriculture products, explosives and undeclared currency while facilitating legitimate trade and travel.

The CEP has established and deployed world-class detector dogs programs to augment existing technology while establishing cutting edge detection capabilities. Under these programs, the agency now provides a higher level of security and detection capability while emphasizing a seamless conduit between existing technology and the proven capabilities of detector dogs. The CEP will continue to advance and develop the anti-terrorism aspects of our mission while maintaining the traditional roles of narcotics interdiction.

### **Office of International Trade (OT)**

In FY 2009, funding for The Office of International Trade is being realigned from the Headquarters Management and Administration PPA. OT is responsible developing the national CBP trade policy and programs that facilitate legitimate trade and enforce our trade laws. OT is able to leverage a diverse array of skill sets to develop a comprehensive trade strategy and action plans, focused on results-driven strategic initiatives addressing trade facilitation, administration and enforcement issues. By promoting trade facilitation through partnership programs, OT streamlines the flow of legitimate shipments and fosters corporate self-governance as a means of achieving compliance with trade laws and regulations. OT also directs national enforcement responses through effective targeting of goods crossing the border as well as strict, swift punitive actions against companies participating in predatory trade practices, including textile transshipment and intellectual property rights infringement. A risk-based audit program is used to respond to allegations of commercial fraud and to conduct corporate reviews of internal controls to ensure importers comply with trade laws and regulations. Finally, OT provides the legal tools such as all regulations, Federal Register notices, binding rulings and decisions, informed compliance publications, to support and promote facilitation and enforcement of our trade and border security requirements.

The Office of International Trade administers the Trade Agreements Program, Textile Enforcement and Operations Program, the Antidumping Countervailing Duty (AD/CVD) Program, the Intellectual Property Rights (IPR) Enforcement Program and leads CBP's efforts on import safety. In addition, the Office of International Trade provides technical assistance and training to United States Trade Representative (USTR), international organizations, and foreign governments to further support our trade and border security policies.

### **Agriculture Programs and Liaison (APL)**

CBP's Agriculture Programs and Liaison office provides leadership, expertise, and innovation to defend the United States from the threats of bio and agro-terrorism. APL also is responsible for meeting the traditional goals of safeguarding and protecting American agriculture from the risks associated with the entry, establishment, or spread of plant pests, noxious weeds, and animal diseases. The specific activities conducted by CBP's APL fall into four general areas:

Agricultural Safeguarding is responsible for the development, clarification, and interpretation of agricultural oversight policy and procedures. In addition, they are responsible for the application strategies for maritime cargo, air cargo, land border cargo, passenger processing (air, maritime, land border), and trade facilitation and related operations.

Agriculture Policy provides policy, planning, and guidance for CBP agriculture inspection programs in order to prevent the intentional and unintentional introduction of plant and animal pests and diseases.

Agricultural Risk Analysis and Mitigation assesses and examines plant and animal pest risks with the US Department of Agriculture (USDA), provides joint trend analyses with USDA, monitors performance indicators, and reviews/develops/implements procedures for mitigation of risks to develop new agricultural-related programs with USDA.

Agro-Terror Countermeasures Program focuses on preventing the intentional introduction of ag/bio-terrorist, equipment, and weapons into the United States. In partnership with other scientific regulatory and law enforcement agencies, the program seeks to assess risks and obtain intelligence to guide the development and implementation of specific targeting and inspection systems to better protect our people, agriculture, food, beverages, and economy from ag/bio-terror attacks.

### **Air/Sea Cargo Security Verification Program**

The Air/Sea Cargo Security Verification Program establishes maritime and air cargo policy. The program's primary focus is to secure cargo against terrorists and the transport of terrorist weapons within the cargo arena, to coordinate the maritime/air programs with other law enforcement agencies, and to ensure the maximization of efforts in these environments. The program provides a critical component in the facilitation and coordination among other law enforcement agencies of combined anti-terrorism efforts while ensuring the facilitation of trade continues with minimal effect on our economy.

In the maritime environment, CBP has the lead for cargo security controls and measures to mitigate the risk of suspect shipments arriving from or departing to foreign destinations. These efforts support the CBP Cargo Security Strategy and other DHS initiatives such as implementation of the SAFE Port Act. CBP works in collaboration with DHS and its component agencies, such as the U.S. Coast Guard (USCG), on cargo and port security matters. To date, CBP and USCG have developed joint protocols for maritime operations to include law enforcement vessel boarding protocols, targeting efforts, and response matrices in the event of an incident of national significance. Additionally, CBP and USCG continue to work together to address business resumption and recovery efforts under the Maritime Infrastructure Recovery Plan and collaboratively address industry and trade issues through specific cargo and maritime federal advisory committees.

In the air environment, CBP is strengthening air cargo security measures by implementing a national targeting strategy in support of the CBP Cargo Security Strategy. CBP is coordinating with the Transportation Security Administration to maximize efforts in the air cargo security environment. Also under the Air Cargo program, CBP is supporting the DHS/Israeli work group in addressing air cargo security measures and identifying best practices.

The Cargo Security Verification Program plays an instrumental role in addressing maritime and air cargo security issues identified in the Security and Prosperity Partnership for North America and will participate in various working groups comprised of government representatives from the U.S., Mexico, and Canada.

FY 2007 Accomplishments include:

- IAP expanded to Tokyo and Frankfurt. CBP is in the process of converting Amsterdam, London and Tokyo to permanent locations in early to mid FY 2008;
- Successfully implemented the CBP-USCG Senior Guidance Team joint vessel targeting and boarding initiative, comprised of joint targeting, joint boarding teams, information sharing, training and officer exchange activities;
- Air WHTI implemented January 23, 2007.

In FY 2008, goals include:

- Execute capital investment planning development and Strategic Resource Assessments for all ports of entry facilities that reflect modern mission priorities of DHS and CBP, particularly unified processes;
- IAP will conduct pilots at up to six previously identified sites to test the feasibility of establishing permanent operations at those locations. As mandated in the Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA), CBP has identified 50 locations as presenting potential for permanent IAP operations;
- Begin implementation of WHTI at high volume land ports of entry and at seaports.

In FY 2009, goals include:

- Complete rollout of infrastructure and technology to all remaining land ports of entry;
- Deploy new vehicle primary application to non-RFID enabled ports of entry;
- Enhance Trusted Traveler Programs and Global Enrollment System.

PPA: HARBOR MAINTENANCE FEE (HMF) COLLECTION

CBP requests \$3.2 million for Harbor Maintenance Fee Collection. This is an increase of \$61,000 over the FY 2008 Enacted. The request includes:

- increase of \$21,000 for pay annualization, and \$64,000 for pay inflation

- decrease of \$24,000 for non recurring expenses.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Harbor Maintenance Fee is an Army Corps of Engineers (COE) fee, which is collected for the operation and maintenance, as well as improvements, of U.S. channels and harbors. CBP is reimbursed for a portion of the costs associated with the collection of the fee for COE.

PPA: INTERNATIONAL CARGO SCREENING

|                              | <b>Perm.<br/>Pos.</b> | <b>FTE</b> | <b>Amount</b>  |

CBP requests \$149.5 million for International Cargo Screening. This is a decrease of \$6.7 million from the FY 2008 Enacted. The request includes:

- increase of \$244,000 for pay annualization, and \$731,000 for pay inflation
- increase of \$1 million for Secure Freight annualization, \$375,000 to recur FY07 supplemental for equipment O&M, \$2.5 million to recur CSI positions from the FY07 supplemental
- decrease of \$442,000 for non-recurring expenses and a decrease of \$11.1 million for Secure Freight

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Formerly called the “Container Security Initiative” this PPA has been renamed “International Cargo Screening” to acknowledge the inclusion of Container Security Initiative (CSI) operations at 58 foreign ports and the growing Secure Freight Initiative (SFI) efforts. SFI is the next phase of CSI. The CSI/SFI program will continue its mission to prevent terrorists and terrorist weapons from entering the U. S. while also facilitating the flow of legitimate trade.

As of September 30<sup>th</sup>, 2007, CSI is now operational in 58 ports and screening over 86 percent of the volume of maritime containers destined to the U.S.

Today, CSI is the only multinational program in the world actually protecting the primary system of global trade – containerized shipping – from being exploited or disrupted by international terrorists.

The core elements of CSI are:

- Identify high-risk containers. CBP uses automated targeting tools to identify containers that pose a potential risk of terrorism, based on advance shipping information and strategic intelligence.
- Screen and evaluate containers before they are shipped. Containers are screened as early in the supply chain as possible, generally at the last port of lading.
- Use technology to scan high-risk containers to ensure that scanning can be done rapidly without impeding the movement of trade. This technology includes large-scale X-ray, gamma ray machines and/or radiation detection devices.

Through the CSI program, CBP deploys multi-disciplined teams that include CBP Officers, Intelligence Analysts, and ICE agents to selected foreign seaports throughout the world to protect the U. S. and its citizens from potential terrorist attacks in the maritime cargo environment and to help secure the primary system of international trade. CSI helps to secure an indispensable link in the chain of global trade: maritime containerized shipping. Since CSI was unveiled in January 2002, it has become a part of our government's strategy to secure the nation from the potential terrorist threat using maritime cargo containers. CSI will continue fostering partnerships with other countries and our trading partners in order to inspect all high-risk containers before they are loaded on board vessels to the United States. CBP will ensure effective coordination with host countries by conducting periodic risk evaluations of ports to assess the level of staffing and other resource needs. CBP will also encourage interagency cooperation by developing a capacity to collect and share information and trade data gathered from CSI ports. The following is a comprehensive listing of the 58 CSI operational ports.

In the Americas and Caribbean:

- Montreal, Vancouver, and Halifax, Canada
- Santos, Brazil
- Buenos Aires, Argentina
- Puerto Cortes, Honduras
- Caucedo, Dominican Republic
- Kingston, Jamaica
- Freeport, Bahamas
- Cartagena, Columbia
- Balboa, Manzanillo, and Colon, Panama

In Europe:

- Antwerp and Zeebrugge, Belgium
- Le Havre and Marseilles, France
- Bremerhaven and Hamburg, Germany
- Piraeus, Greece
- Geona, La Spezia, Livorno, Gioia Tauro, and Naples, Italy
- Rotterdam, Netherlands
- Gothenburg, Sweden
- Felixstowe, Southampton, Liverpool, Thamesport, and Tilbury, United Kingdom
- Lisbon, Portugal
- Algeciras, Valencia, and Barcelona, Spain

In Asia and the Middle East:

- Shanghai, Shenzhen, and Hong Kong, China
- Ports of Kaoshung and Chi-Lung
- Tokyo, Kobe, Yokohama, and Nagoya, Japan
- Pusan, Korea
- Quasim, Pakistan
- Port Klang and Tanjung Pelepas, Malaysia
- Singapore
- Laem Chabang, Thailand
- Colombo, Sri Lanka
- Dubai, United Arab Emirates (UAE)
- Port Salalah, Oman
- Ashdod and Haifa, Israel

In Africa:

- Durban, South Africa
- Port Alexandria, Egypt

The Secure Freight Initiative (SFI) incorporates a three-pronged approach to enhance supply chain security through the following projects: the International Container Security (ICS) and Security Filing (SF).

The ICS project will significantly strengthen maritime security and global non-proliferation efforts by integrating radiation detection, radiography, and manifest data within CBP's risk management process. ICS also fulfills the requirements of section 231 of the SAFE Port Act.

On October 12, 2007, Southampton Container Terminals, United Kingdom, Port Qasim, Pakistan and Puerto Cortez, Honduras became the first seaports to implement the Secure Freight Initiative by scanning all maritime containers destined for the United States for nuclear or radiological materials. These ports fulfill the requirements set out in the

Security and Accountability For Every (SAFE) Port Act of 2006, which establishes a program that couples Non-Intrusive Inspection (NII) and radiation detection technology. Data from these systems is then provided to U.S. officials at U.S. Customs and Border Protection's National Targeting Center for analysis.

The Security Filing (SF) project will provide additional critical data earlier in the cargo risk assessment process, prior to containerized cargo being loaded at foreign ports. These data elements will give greater visibility into the supply chain, including data associated with container movements, and supplement information now transmitted under the 24-hour rule and Trade Act requirements.

The Global Trade Exchange (GTX) project will foster a trade-managed solution that allows government to be a customer of trade services, and facilitates access to trade data, without dealing with every trade entity on a transaction or account basis. Private sector owned and operated, GTX would offer a new business model for collecting and fusing disparate international cargo data, providing governments and other parties with greater visibility into that data.

FY 2007 accomplishments include:

- Development and implementation of the Secure Freight Initiative – International Container Security provided CBP with the capability to obtain radiation and non-intrusive inspection scans of containers pre-lading in three foreign ports (Southampton, United Kingdom, Port Qasim, Pakistan and Puerto Cortez, Honduras);
- Development and dissemination of a Security Filing Notice of Proposed Rule Making (NPRM) is still ongoing;
- Expansion of CSI to 58 locations. CSI established 8 additional CSI ports during FY 2007. With these additional deployments, CSI now provides screening for over 86 percent of the maritime containers destined for the U.S.

FY 2008 goals include:

- Respond to SF NPRM comments and develop a phase in operational plan;
- Issue a Request For Quotation regarding GTX and review bids accordingly and develop a pilot program for GTX;
- Review current and potential new CSI locations for strategic importance to secure the U.S. and the global supply chain.

FY 2009 goals include:

- Expand deployment of ICS to one new site and adding more capacity at others designated ports;
- Based on findings of the GTX pilot, expand program accordingly;
- Continue to transition CSI TDY personnel to permanent status and place resources at the NTC-C in order to reduce the number of CBP Officers deployed.

CBP requests \$11 million for Other International Programs. This is an increase of \$118,000 over the FY 2008 Enacted. The request includes:

- increase of \$59,000 for pay annualization, and \$176,000 for pay inflation
- decrease of \$117,000 non-recurring expenses

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The goal of Other International Programs is to establish international partnerships that promote security and facilitation of international travel and trade. In this arena, Customs and Border Protection (CBP) implements international programs and initiatives that support the U.S. Government's objectives in anti-terrorism, border security, non-proliferation and customs and immigration laws. Other International Programs is the conduit for CBP's participation in the World Customs Organization (WCO) and in regional bodies such as the Asia-Pacific Economic Cooperation (APEC) forum; support for the negotiation of bilateral and multilateral agreements, conventions and treaties; and high-level meetings with foreign administrations. Other International Programs key objectives are:

- Identify and drive CBP's international strategy;
- Internationalizing CBP's programs and initiatives;
- Manage the international agreements process for CBP;
- Advance CBP policy agenda and international initiatives in international fora;
- Develop and maintain strategic international relationships

FY 2007 accomplishments include:

- Established a Bilateral Strategic Plan with Mexico Customs to formalize cooperative relationships on an identified set of shared interests;
- Established CBP permanent presence in 10 overseas embassies and consulates;
- Concluded three customs mutual assistance agreements, with Azerbaijan, Indonesia, and Pakistan;
- Coordinated the deployment of teams of CBP personnel to a small number of ports of entry in Iraq, leading the transition toward phased assistance to improve border control operations in that country;

- Established mechanisms for the maintenance and amendment of the WCO Framework of Standards and its associated standards pertaining to data elements;
- Began development of international strategy for immigration issues, which will include supporting expansion of the Immigration Advisory Program, promoting expansion of the Regional Movement Alert System, and identifying organizations responsible for addressing immigration matters on an international level.

FY 2008 goals include:

- Identify and pursue opportunities for cooperation with foreign governments and international organizations on issues such as the mutual recognition of customs-trade programs and "single window" data systems for international trade and customs information;
- Develop protocols related to the issuance and use of APEC Business Travel Cards in accordance with U.S. commitments;
- Assess the deployment of overseas personnel based on CBP mission needs and cooperation with foreign governments of strategic importance.

FY 2009 goals include:

- Pursue international partnerships to share best practices, exchange information, and promote the facilitation of secure travel and trade;
- Support implementation of the WCO Framework;
- Implement initiatives in support of an international immigration strategy to identify and interdict high risk travelers.

CBP requests \$64.5 million for C-TPAT. This is an increase of \$2.2 million over the FY 2008 Enacted. The request includes:

- increase of \$246,000 for annualization of FY 2007 pay, and \$636,000 for pay inflation
- decrease of \$647,000 for non-recurring expenses
- increase of \$2 million for C-TPAT annualizations of FY 2008 program increases

## **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Customs-Trade Partnership Against Terrorism (C-TPAT) program is CBP's premier trade security program. The purpose of C-TPAT is to partner with the trade community for the purpose of securing the U.S. and international supply chains from possible intrusion by terrorist organizations. C-TPAT requires the trade community participant to document and validate their supply chain security procedures in relation to existing CBP C-TPAT criteria or guidelines as applicable. CBP requires that C-TPAT company participants develop an internal validation process to ensure the existence of security measures documented in their Supply Chain Security Profile and in any supplemental information provided to CBP. As a part of the C-TPAT process, CBP C-TPAT Supply Chain Security Specialists (SCSS) and the C-TPAT participants will jointly conduct a validation of the company's supply chain security procedures. The validation process is essential to verifying the company's commitment to C-TPAT.

C-TPAT's currently has a cadre of 157 Supply Chain Security Specialists who provide advice and guidance to Customs field officers and trade community representatives on supply chain security issues. In FY 2008, CBP received funding for additional Supply Chain Specialist as authorized under the SAFE Ports Act.

The Supply Chain Security Specialists conduct C-TPAT validations, identify supply chain security vulnerabilities, and work to monitor company initiatives that address those vulnerabilities. Validations conducted by Supply Chain Security Specialists serve to determine the accuracy and effectiveness of companies' security profiles as applied to their foreign and domestic supply chains.

To better secure and facilitate the flow of goods into the United States, CBP will continue to ensure that existing and new C-TPAT partners fulfill their commitments by verifying that agreed upon security measures have been implemented. CBP will also continue to work with C-TPAT partners to further finalize minimum applicable supply chain security criteria and security best practices. C-TPAT teams travel around the globe, to visit partners, their vendors, and vendors' plants to validate that supply chain security meets C-TPAT minimum security criteria and best practices and that procedures used are reliable, accurate, effective and meet the agreed upon security standards. CBP will continue providing tools and creating incentives for the private sector to join C-TPAT, which is a prerequisite for the Free and Secure Trade (FAST) program and other CBP expedited processing programs.

As of November 29, 2007 there are 7,842 companies certified into the C-TPAT program and 6,475 have been validated.

During the first 10-months of calendar year 2007 (January to October), C-TPAT conducted 1,526 initial validations and 368 revalidations. Also during this period, and in accordance with the SAFE Port Act, C-TPAT initiated the Third-Party Validation program.

FY 2007 accomplishments include:

- Conducted a mutual recognition pilot program with the Authorized Economic Operator (AEO) program of the European Union (EU). The pilot identified the differences between the two programs and resulted in the advancement of the mutual recognition process with the EU;
- CBP signed the first Mutual Recognition Arrangement between C-TPAT and the New Zealand Customs Service's Secure Export Scheme business partnership program;
- September, 2007, C-TPAT posted the minimum-security requirements for Mexico long haul highway carriers and marine port authority and terminal operators. In addition, the minimum-security requirements for foreign manufacturers were posted in seven additional languages (Arabic, Chinese, Dutch, German, Italian, Portuguese, and Thai).

FY 2008, goals include:

- Maintaining an on-going percentage of 90 percent validated/certified partners;
- Establishing mutual recognition programs with established foreign business partnership programs.

FY 2009, goals include:

- Maintaining an on-going program of revalidations;
- Assessing the capabilities of a C-TPAT export program.

CBP requests \$11.3 million for Free and Secure Trade (Fast)/Nexus/Sentri. This is an increase of \$31,000 over the FY 2008 Enacted. The request includes:

- increase \$32,000 for pay annualization, and \$96,000 for pay inflation
- decrease of \$97,000 for non recurring expenses

## **CURRENT SERVICES PROGRAM DESCRIPTION:**

### **Free and Secure Trade (FAST)**

FAST is the cargo equivalent to facilitative programs in the passenger environment such as SENTRI and NEXUS. Through FAST, importers, commercial carriers, truck drivers, and manufacturers who enroll in the program and meet agreed upon security criteria, including participation in the Customs-Trade Partnership Against Terrorism program, are entitled to expedited clearance at the port of entry. Using electronic data transmission and transponder technology, CBP expedites clearance of approved trade participants. The FAST program fosters more secure supply chains and enables CBP to focus security efforts and inspections where they are needed most – on high-risk commerce.

CBP projects that there will be 110,000 participants in the FAST commercial driver program by the end of FY 2008. This is a 22 percent increase from FY 2007.

CBP has plans to support 205 lanes at 131 sites, 104 ports of entry, in FY 2008 – FY 2009. FAST lane expansion infrastructure is funded with the Automation Modernization Appropriation, Automated Commercial Environment (ACE) PPA.

### **NEXUS Highway and Air**

The NEXUS Highway and NEXUS Air programs are combined into one NEXUS Program with air and highway components. NEXUS is a joint US/Canada enrollment program at the northern border land ports of entry and all Canadian pre clearance ports that identifies, through a complete background check and fingerprinting, low-risk travelers. Once an applicant is identified as low-risk they are enrolled in the NEXUS program and given a Radio Frequency Identification (RFID) card that is specific to the traveler. The RFID card allows the traveler to utilize the NEXUS dedicated commuter lane, which is a specific primary lane at the land border port of entry that can only be used by NEXUS enrollees. The use of the NEXUS lane facilitates the movement of low-risk travelers. At the Canadian pre clearance airports, kiosks are used instead of commuter lanes and iris scans are used to identify low risk travelers rather than RFID cards. At the time of enrollment, travelers qualify for trusted traveler status in all modes of travel but must report to a pre clearance site to have the iris scan process performed.

In FY 2008, CBP is projecting a 663,086 person enrollment in NEXUS constituting a 370 percent increase of FY 2007 enrollment. In FY 2009, CBP is projecting approximately one million person enrolled in the NEXUS Highway and Air Program and there are no plans to add exclusive/specific NEXUS lanes. The future WHTI lane expansions will have NEXUS and SENTRI RFID capabilities.

### **Secure Electronic Network for Traveler's Rapid Inspection (SENTRI)**

SENTRI is an enrollment program at the southern land border ports of entry that identifies, through a complete background check and fingerprinting, low-risk travelers. Once an applicant is identified as low-risk they are enrolled in the SENTRI program and given an RFID that is specific to the traveler. The RFID card allows the traveler to utilize the SENTRI dedicated commuter lane, which is a specific primary lane at the land border

Ports of entry that can only be used by SENTRI enrollees. The use of the SENTRI lane facilitates the movement of low-risk travelers. The SENTRI program is located at nine southern border locations - Nogales, Arizona (1); Calexico (1) Otay Mesa (1) and San Ysidro (1), California; and Brownsville (1), Hidalgo (1), Laredo (1) and El Paso (2), Texas.

CBP is projecting a 266,721 person enrollment in SENTRI by the end of FY 2008. This represents an 88 percent increase from FY2007. In FY 2009, there is no plan to add SENTRI lanes. The future WHTI lane expansions will have NEXUS and SENTRI RFID capabilities.

### **Global Enrollment System (GES)**

CBP has developed a Global Enrollment System (GES) for all CBP registered trusted traveler programs to be operational on the CBP national network. The GES has integrated the independent CBP enrollment and validation processes into a single solution, and provides a more efficient platform to share data and perform real-time watch list and lookout checks.

The GES will also reduce the redundancy of maintaining several application processes, and allow for a quicker and accurate manner to process applications. A single online, paperless application process has been developed by CBP to support the GES and will allow a traveler to apply to multiple programs online. The on-line application (Global On-Line Enrollment System) currently supports the SENTRI program. It is envisioned that once GES is fully operational, CBP will have a single Trusted Traveler program in which a person will only have to apply for one time, pay one fee, and be registered in all modes of travel.

FY 2007 accomplishments include:

- Provided centralized on-line vetting through GES to NEXUS applicants and implement on-line fee payment and internet based self scheduling of interviews for the credentialing of both NEXUS and SENTRI applicants;
- Added Automated Biometric Identification System (IDENT)/Integrated Automated Fingerprint Identification System (IAFIS) 10 fingerprint collection to the NEXUS program;
- Opened enrollment centers and lanes at all Canadian pre-clearance ports and 7 land border ports.

FY 2008, goals include:

- Provide enrollment for FAST Driver through GES;
- Add iris scan equipment to all NEXUS and some FAST enrollment centers;
- Set up selected FAST enrollment centers to support both NEXUS and FAST.

FY 2009, goals include:

- Enroll 336,914 people in NEXUS;
- Enroll 291,773 people in SENTRI.

| Total Change 2008-2009       |                       |            | 12,117         |

CBP requests \$117.1 million for Inspection and Detection Technology. This is an increase of \$12.1 million above the FY 2008 Enacted. The request includes:

- increase of \$44,000 for pay annualization, and \$131,000 for pay inflation
- increase \$538,000 from non-recurs, and a decrease of \$12 million for PPA realignment to Border Security Inspections and Trade Facilitation at POEs
- increase of \$1 million for Radiation Portal Monitoring (RPM) Staffing annualization, \$750,000 for recurring of FY07 equipment cost for Non-Intrusive Inspection (NII) technology, \$3.5 million for supplemental tail for Domestic Nuclear Detection Office (DNDO) acquisitions
- program increases of \$8.2 million for DNDO Operation and Maintenance, and \$10 million to replace obsolete NII systems

**CURRENT SERVICES PROGRAM DESCRIPTION:**

As trade increases, CBP’s reliance on NII technology, the cornerstone of CBP’s multi-layered strategy to secure the borders, becomes more and more critical. In conjunction with CBP’s many other initiatives (Customs-Trade Partnership Against Terrorism (C-TPAT), Automated Targeting System, National Targeting Center, Container Security Initiative, etc.), NII technology allows us to work “smarter.”

Since an adversary can defeat any single sensor or device, CBP does not rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood that a nuclear or radiological weapon or weapons grade material will be detected.

CBP also uses NII technology to detect and interdict narcotics, currency, and other contraband secreted in large containers and commercial shipments. Technologies deployed to our nation's land, sea, and airports of entry include large-scale X-ray and gamma-ray imaging systems, as well as a variety of portable and handheld technologies, and radiation detection technology. To ensure the detection of radiological materials programs are coordinated effectively within DHS’ development programs, the acquisition

of RPMs are funded through DNDO. Operations and maintenance of RPMs and of the other types of NII technology is funded within this PPA.

CBP will continue to prioritize the assignment of additional NII equipment to the nation's busiest ports of entry, especially seaports. NII technologies are viewed as force multipliers that enable CBP Officers to screen or examine a larger portion of the stream of commercial traffic, while maintaining the flow of legitimate trade, cargo and passengers.

A priority plan for CBP is to screen sea-borne containerized cargo for illicit radiological materials with RPMs. By the end of calendar year 2008, CBP will be able to screen approximately 98 percent of all arriving sea containerized cargo with RPMs. The deployment of RPMs at seaports is, however, proving to be a staffing challenge. This challenge stems from the fact that CBP screens a large percent of sea cargo for illicit radiological materials with RPMs and that the majority of seaport RPMs are located at terminal exit gates where CBP Officers are not normally assigned or readily available to respond to alarming containers. For this reason, the majority of the new Officers available as a result of the FY 2008 appropriations will be deployed to seaports to ensure CBP has dedicated personnel to resolve alarms from RPMs and to conduct radiological examinations at our Nation's busiest seaports.

Since October 2002, CBP has deployed over 1,000 Radiation Isotope Identifier Devices (RIIDs) and over 16,000 Personal Radiation Detectors (PRDs) nation-wide. As of December 1, 2007 CBP has deployed a total of 192 large-scale imaging systems nationwide. Additionally, as of December 1, 2007 CBP has 1,052 operational RPMs. With the FY 2007 Supplemental Appropriations (\$121.3 million), CBP expects to deploy 24 high-energy mobile x-ray imaging systems (18 to seaports, 5 to southern border, and 1 to the Federal Law Enforcement Training Center in Glynco, Georgia); 5 rail gamma-ray imaging systems; 6 portal gamma-ray imaging systems; 8 replacement fixed high-energy x-ray imaging systems; and 20 fixed gamma-ray imaging system upgrades.

FY 2007 accomplishments included:

- By the end of FY 2007, a total of 353 RPMs were deployed on the Southern land border crossings, allowing CBP to screening 99 percent of containerized truck cargo and 95 percent of private owned vehicles (POV) traffic;
- By the end of FY 2007, a total of 241 RPMs were deployed on northern land border crossings, allowing CBP to screen 91 percent of containerized truck cargo and 81 percent of POV traffic;
- By the end of FY 2007, a total of 358 RPMs were deployed at seaports, allowing CBP to screen 93 percent of all sea-borne cargo containers.

FY 2008, goals include:

- By the end of FY 2008, a total of 371 RPMs will be deployed to the southern land border crossings, allowing CBP to screen 100 percent containerized truck cargo and 98 percent of POVs traffic for radiation;
- At northern land border crossings screen 99 percent of containerized truck cargo and 93 percent POV traffic for radiation using 380 RPMs;
- Screen 97 percent of all sea-borne cargo containers for radiation with 421 RPMs at Seaports.

FY 2009 goals include:

- Deploy :
  - 581 RPMs at northern land border crossings , allowing CBP to screen 100 percent containerized truck cargo and 99 percent of POVs traffic for radiation;
  - 382 RPMs at southern land border crossing, allowing CBP to screen 100 percent of containerized truck cargo and 100 percent POV traffic for radiation;
  - 584 RPMs at Seaports, allowing CBP to screen 98 percent of all sea-borne cargo containers for radiation;
- Replace of 20 large-scale NII systems. The systems include: 11 mobile truck gamma ray units and 9 mobile x-rays;
- Upgrade an additional 10 fixed gamma ray systems from Cesium 137 to Cobalt 60.

| Total Change 2008-2009       | ---                   | ---        | 4,970         |

CBP requests \$33 million for Systems for Targeting. This is an increase of 5 million above FY 2008 Enacted. The request includes:

- increase of \$3,000 for pay annualization, and \$9,000 for pay inflation
- decrease of \$42,000 for non recurring expenses
- increase of \$5 million for program increases to enhance and expand Automated Targeting System - Passenger.

## **CURRENT SERVICES PROGRAM DESCRIPTION:**

At the core of CBP's ability to achieve its critical border security objectives and maintain the flow of lawful commerce is the ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law-abiding travelers and commerce to move without unnecessary delay. Recent legislation and regulatory action, such as the Trade Act of 2002, the 24-hour rule and the SAFE Port Act, have made it mandatory to provide advance information about passengers and goods arriving in the United States. CBP uses computer technology and rule-based software to analyze the data provided on passengers and shipments arriving in the United States. CBP applies its targeting methods against the data to determine which passengers or shipments need to be segregated for a closer look and possible intensive inspection.

The main platform used to perform this analysis is the Automated Targeting System (ATS). The Automated Commercial System (ACS) and associated databases provide CBP Officers (including those stationed overseas at Container Security Initiative ports) with advanced notice of travelers and goods arriving at U.S. ports of entry, allowing them to cross-check the passenger and cargo manifests against databases such as the Traveler Enforcement Compliance System (TECS), the Interagency Border Inspection System (IBIS), and National Crime Information Center (NCIC) for "lookouts" for unlawful activity. CBP also uses ATS to analyze data in the Automated Export System (AES) on shipments leaving the United States.

ATS enhances the Advance Passenger Information System (APIS), ACS, and AES data by running rules developed by CBP's subject matter experts to identify travelers and shipments with high-risk travel patterns. ATS also allows CBP Officers to conduct advanced queries of these and other government databases to reveal new threat patterns.

Currently, ATS consists of six modules, all in production, that focus on exports, imports, passengers and crews (airline passengers and crew on international flights, passengers and crew on sea carriers), private vehicles crossing at land borders, and import trends over time. The six modules are ATS-Inbound which serve as the primary decision support tool for inbound targeting of cargo; ATS-Outbound which is used for targeting outbound cargo and assists in identifying exports which pose a high risk of containing goods requiring specific export licenses, narcotics, or other contraband; ATS-Passenger (ATS-P) which is used at all U.S. airports and seaports receiving international flights and voyages to evaluate passengers and crewmembers prior to arrival or departure; ATS-Land (ATS-L) provide analysis and rules-based risk assessment of private passenger vehicles crossing the nation's borders; ATS-Trend Analysis and Analytical Selectivity improve CBP's ability to examine, locate, and target for action violators of United States laws, treaties, quotas, and policies regarding international trade and ATS-International provide foreign custom authorities with automated cargo targeting capabilities and provides a systematic medium for exchanging best practices and developing and testing targeting concepts.

Future targeting system enhancements will focus on increasing data collection from internal and external sources and improving geographical unit interface display capabilities.

FY 2007 accomplishments include:

- Deployed ATS-L Personal Digital Assistant module to additional ports of entry to enhance screening of applicants for admission and private passenger vehicles;
- Coordinated with the Office of Border Patrol to pilot the ATS-L module at a U.S. Border Patrol checkpoint;
- Developed a Simulation and Test Environment (ASTE), which is designed to support the development, evaluation, and testing of ATS screening and targeting concepts.

FY 2008, goals include:

- Development of passenger and pedestrian centric components for ATS-L. The development of targeting strategies for these ATS-L components will likely be an adaptation of the techniques and methods currently employed in ATS-P with significant enhancements focused for the land border environment.

FY 2009, goals include:

- Increased information sharing situational awareness to improve border security processing by expanding the ATS Targeting Framework to field locations;
- Development of a User Defined Rule module, which is designed to support the development, evaluation, and testing of ATS cargo rules;
- Technology refresh needed to modernize and update systems, including automated screening, and provide for true 24/7 availability.

CBP requests \$24.5 million for the National Targeting Center. This is an increase of \$531,000 over FY 2008 Enacted. The request includes:

- increase of \$115,000 for pay annualization, and \$345,000 for pay inflation,
- decrease of \$139,000 for non recurring expenses
- increase of \$210,000 for Operations and Maintenance equipment costs

### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The priority mission of CBP's National Targeting Center (NTC) is to provide around-the-clock tactical targeting and analytical research support for CBP antiterrorism efforts. CBP Officers, Border Patrol agents, and Field Analysis Specialists who are experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments primarily staff the NTC. In addition to using existing databases and information to identify potential targets the NTC also develops tactical targets from raw intelligence in support of CBP's mission to detect and prevent terrorists and terrorist weapons from entering the United States.

In FY 2007, NTC Cargo (NTCC) and NTC Passenger (NTCP) operations were officially divided. The NTCC staff moved to a new NTCC facility in May of 2007. NTCC enhances remote targeting operations in support of the Container Security Initiative (CSI), supports and coordinates the International Container Scanning (ICS) component of the Secure Freight Initiative (SFI) and supports domestic port targeting. NTCC uses advanced targeting strategies as well as new tools and technologies to enhance CBP cargo targeting efforts. NTCC provides quality 24x7 tactical and strategic cargo research in all modes. NTCC staff includes CBP Officers, Agriculture Specialists, Field Analysis Specialists, Import Specialists and Intelligence Research Specialists.

NTC Passenger has integrated all key aspects of CBP targeting programs including CSI, the Immigration Advisory Program (IAP), the US-VISIT program and the Regional Movement Alert System (RMAS). In addition to providing targeting support for the expanding IAP and the RMAS programs, NTC will be responsible for the real-time targeting of all international passengers departing from or arriving in the U. S., to ensure that subjects of the No-Fly list are not permitted to board these flights.

The NTCC Cargo Unit (CU) provides cargo research and analysis on positive Terrorist Identities Datamart Environment (TIDE) passengers, responds to research requests from CBP domestic and CSI ports and conducts cargo research for NTCP and NTCC liaisons. Additionally, the CU conducts national cargo sweeps in the Automated Targeting Systems (ATS), supports Intelligence Driven Special Operations (IDSOs), and conducts Weapons of Mass Destruction/Weapons of Mass Effect (WMD/WME), agro-terrorism, and bio-terrorism and rules development. The NTCC will continue to provide support to CBP's Container Security Initiative and Secure Freight Initiative. The NTCC has dedicated staff to support and coordinate the International Container Scanning (ICS) component of SFI. The program utilizes remote technology to facilitate real time scanning and monitoring of cargo/containers destined to the United States from select

foreign ports. Targeting decisions are made based on container images, radiation alarm profiles, and cargo descriptions provided from overseas.

FY 2007 accomplishments included:

- Implementation of revised U. K. vetting procedures (Mirage II) based upon requested revisions to the ATS-P (passenger) module. These revisions have significantly streamlined the U. K. vetting process improving the NTC's effectiveness and efficiencies in targeting high-risk passengers;
- Support Transportation Security Administration's Office of Intelligence by monitoring and identifying high-risk passengers with terrorist ties and preventing them from boarding flights in foreign locations. NTC has developed a Concept of Operations (CONOPS) with TSA-OI.

FY 2008 goals include:

- Coordination and delivery of the document assessment tool (DAT) to the land border environment. NTC will support the expansion of the DAT program with targeting and analysis related to DAT document alert responses developed at the ports of entry;
- Expansion of the NTCC to continue remote targeting and CSI support roles. The remote targeting expansion for FY 2008 will include Haifa and Ashdod Israel;
- Expansion of the ability to identify watch-listed individuals who are connected to businesses and cargo shipments and to disseminate quality research products and lookouts.

FY 2009 goals include:

- Enhancing NTCP's automated systems in an effort to identify passengers with possible ties to terrorist activities;
- Expanding the NTCC support and coordination of the International Container Scanning (ICS) component of the Secure Freight Initiative by increasing the number of ports in which NTCC utilizes remote location technology to facilitate real time scanning and monitoring of cargo/containers destined for the U. S. from selected foreign ports;
- Enhancing research efficiency of positive Terrorist Identities Datamart Environment (TIDE) matches to identify possible links between terrorist related passenger events and cargo activity.

PPA: AT THE PORTS TRAINING

- CBP requests \$25 million for At the Ports Training. This is a decrease of \$35,000 from the FY 2008 Enacted for non-recurring expenses

**CURRENT SERVICES PROGRAM DESCRIPTION:**

At the Ports Training Programs are responsible for:

- (1) CBP Field Operations Academy
- (2) OTD/Use of Force Policy
- (3) OTD/Leadership and Organization Development
- (4) OTD/Border Enforcement Training
- (5) Regulatory Auditor Training
- (6) Other Training

The Office of Training and Development (OTD), through the National Training Plan (NTP), provides CBP with a comprehensive and accurate needs assessment of all standard, core, and recurring training. The NTP provides CBP’s headquarters and field managers an opportunity to advance the Secure Border Initiative by bringing the workforce together to train. The NTP also emphasizes CBP’s anti-terrorism mission as a strategic imperative, providing a robust menu of anti-terrorism related courses of every level of sophistication and covering a wide range of specialization. The NTP will continue to modernize and streamline the training and development infrastructure and ensure support of pivotal training such as firearms and tactical training, leadership, and advanced training programs. CBP will continue to utilize the NTP to successfully plan and execute training resources to effectively meet the ever expanding and evolving mission.

**CBP Field Operations Academy**

The CBP Field Operations Academy is located at the Federal Law Enforcement Training Center in Glynco, Georgia. The Academy is responsible for the development and delivery of basic, mid, and advanced-level training programs for mission critical

occupations (e.g., CBP Officers, Agriculture Specialists, Import Specialists, Entry Specialists). This training represents key components of the goal to combat terrorism, improve border security, improve inspection and control, and facilitate trade.

#### **OTD/Use of Force Policy (UFPD)**

The OTD/Use of Force Policy Division is responsible for the development, articulation and implementation of CBP use of force policy and related equipment. The OTD/UFPD seeks to research, evaluate and procure the best possible equipment while providing comprehensive asset and resource management for tactical equipment and body armor. The OTD/UFPD has developed appropriate controls, standards, training, best practices and policies in order to enhance the safety and performance of approximately 18,000 Customs and Border Protection (CBP) Officers.

#### **OTD/Leadership and Organization Development (OTD/LODD)**

The OTD/Leadership and Organization Development Division designs, develops, delivers, and evaluates training and development activities for CBP supervisors, managers, and executives. The OTD/LODD provides core and advanced leadership/supervisory/management courses to meet organization, occupational, and individual needs.

#### **OTD/Border Enforcement Training (OTD/BETD)**

The OTD/Border Enforcement Training Division primarily engages in anticipating, identifying, initiating, and analyzing occupation specific training needs of CBP's approximately 32,000 uniformed workforce, and producing customer focused training portfolios that facilitate border enforcement readiness.

The fight against terrorism remains the top priority for CBP. In support of that primary mission, OTD will continue to oversee the anti-terrorism training program ensuring employee preparedness and skill development to confront the threat of terrorist incidents or infiltration along our borders.

#### **Regulatory Auditor Training**

The OTD in partnership with the Office of International Trade provides basic, mid, and advance-level training for Regulatory Auditors. Basic training includes introduction to government auditing and CBP-specific auditing functions to include automated audit documents, report writing, interviewing techniques, valuation, and focused assessment audits. Intermediate and advanced training includes valuation, drawback, advanced writing skills, and continuing professional education needs. Other training focuses on balancing legitimate trade with security (basic and advanced financial investigations).

#### **Other Training**

OTD/Headquarters sponsors other basic and specialized training programs for various occupations offered CBP-wide. These training programs, including Canine Office of Field Operations training, are funded through the NTP but are often coordinated with other NTP Training Leads, CBP organizations, and program managers for scheduling, facilities, instructors, etc.

PPA: BORDER SECURITY AND CONTROL BETWEEN THE POE'S

|                              | <b>Perm.<br/>Pos.</b> | <b>FTE</b>    | <b>Amount</b>    |

| <b>2009 Request</b>          | <b>22,787</b>         | <b>21,466</b> | <b>3,440,505</b> |
| Total Change 2008-2009       | 2,643                 | 3,169         | 418,062          |

\*The above table includes emergency funding of \$38.0 million provided in P.L. 110-161 for this activity. The FY 2009 Budget Request is \$3.4 billion. Excluding emergency funds provided, the increase of \$456.1 million over FY 2008 is for pay and non-pay inflation as well as program increases for 2,200 Border Patrol Agents and 441 support staff, relocation costs, and ground transportation.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The National Border Patrol Strategy articulates one clear, strategic mission for the Border Patrol: To establish and maintain control of the border of the U.S. between the ports of entry. The strategic goal includes interdicting illegal aliens, smugglers, narcotics and other contraband entering the U.S. Since the terrorist attacks of September 11, 2001, preventing terrorists and terrorist weapons from entering the U.S. was added to the Border Patrol's strategic goal.

The Border Patrol developed five objectives to support the national strategy. Each objective further identifies the intended mission outcome and focus of the Border Patrol's operational planning and execution. The objectives are: (1) Establish a substantial probability of apprehending terrorists and their weapons as they attempt to enter illegally between the ports of entry; (2) Deter illegal entries through improved enforcement; (3) Detect, apprehend, and deter smugglers of humans, drugs and other contraband; (4) Leverage Smart Border Technology to multiply the effect of enforcement personnel; and (5) Reduce crime in border communities and consequently improve the quality of life and economic vitality of targeted areas. The National Border Patrol Strategy ensures that the Border Patrol deploys the appropriate mix of resources and employs appropriate tactics with the end state objective of consistently being able to detect, identify and classify, respond and resolve all illegal entries.

The Secure Border Initiative (SBI) is a comprehensive approach to immigration enforcement and directly supports the National Border Patrol Strategy. The SBI focuses broadly on two major enforcement themes, controlling the border and immigration enforcement within the United States. Controlling the border will require gaining full

control of our borders, so we can prevent illegal immigration as well as security breaches while interior immigration enforcement will focus on locating and removing aliens who are present in the United States in violation of our laws. The interior enforcement pillar is tied to the President's proposal for a temporary worker program, making broader and more aggressive enforcement practical. Both the border control and interior enforcement strategies are developed to ensure that all enforcement efforts are prioritized based on the two overarching priorities of SBI – national security and public safety.

Achieving full control of the border and effectively enforcing the law within U.S. borders requires *a transformation in the way these issues have been viewed*. Specifically, it requires integrating additional staff, new technology, and enhanced infrastructure investment, as well as a new regime of regulations and legislative proposals. In developing the SBI, DHS is taking an integrated systems approach to the problem. The entire immigration enforcement system requires review, beginning with the gathering of immigration-specific intelligence and the detection of illegal border crossings, followed by apprehension, processing, transportation, and detection of the alien, and ending with the alien's removal from the United States. A systematic approach will deploy all of these tools in stages, allowing each stage to build on the success of the earlier stages.

The SBI unified border control strategy encompasses both the northern and southern land borders, and the interdiction of cross border violations between the ports and at the official ports of entry and has three main goals:

- Detect and respond to all cross border crime
- End "Catch and Release" of Non-Mexican Illegal Aliens
- Deter cross border crime

Through the strategy, CBP will funnel all traffic to the United States through ports of entry where we have a greater level of control. The border environment is extremely complex encompassing rural, urban and remote areas as well as extreme climate variations and terrain. Therefore, any strategy must be flexible and capable of being implemented in a manner that best suits individual needs and requirements.

The Border Patrol's national strategy is based on deploying the appropriate mix of resources – personnel, tactical infrastructure and technology – to gain control of the border. A significant Border Patrol initiative is to reach a staffing level of 20,019 Border Patrol agents by September 30, 2009. To support the increase in Border Patrol agents, CBP will hire an appropriate number of operational and mission support personnel and upgrade its facilities to ensure the new resources are adequately supported. CBP also plans to add significantly to its inventory of permanent tactical infrastructure and technology deployments on the border. In FY 2008, CBP will deploy resources developed through CBP's *SBI*net program. The new resources will include technology solutions such as sensors and cameras to increase the Border Patrol's ability to detect illegal entries and to provide greater situational awareness. In addition, *SBI*net will provide new tactical infrastructure such as fences and vehicle barriers to further enhance the Border Patrol's ability to secure the border.

The Border Patrol establishes and maintains effective partnerships, formal and informal, with other Federal, state and local law enforcement agencies as well as other Federal agencies with interests in the border regions. Further, the Border Patrol maintains international partnerships to enhance border security primarily with agencies of the governments of Mexico and Canada.

### **Border Patrol National Native American Program**

The mission of the Border Patrol National Native American Program is to facilitate new partnerships, improve relationships, and increase trust throughout the Native American Indian tribes who have a nexus to the U.S. border. The program champions partnerships between tribal law enforcement, various Native American organizations and the U.S. Border Patrol in support of the national strategy. The Border Patrol National Native American Program is operational in twelve of the Border Patrol sectors. The program acts as a conduit between the Border Patrol and tribal, local, state and Federal law enforcement agencies as well as tribal councils located along both the southwest and northern borders.

The program was designed to support ongoing enforcement operations within the respective agencies while enhancing the liaison between them. As our relationship solidified, contact and responses to illicit activity along the borders has increased allowing for joint law enforcement support for both Border Patrol and Tribal Law enforcement. Routine communication and liaison between some sectors and Tribal Council officials has led to enhancing the security and safety of our Agents working in dangerous areas along the border. Through the Border Patrol National Native American Program, information sharing efforts have allowed the Border Patrol sectors to conduct All-Terrain Vehicle training, search and rescue training, advanced four wheel drive training and vehicle stops.

The Border Patrol National Native American Program is working to standardize policies and procedures and is proactively developing performance measures for the program to evaluate and measure the effectiveness of its initiatives.

### **Border Patrol Mexican Liaison Unit (MLU)**

The mission of Border Patrol Mexican Liaison Unit (MLU) is to build and maintain positive working relations and develop alliances with foreign counterparts. The emphasis of the relationship is to resolve issues and work together proactively in support of increased border safety and security. This is in direct support of two of the National Border Patrol Strategy core elements: build partnerships with other law enforcement agencies and increase border awareness. The Border Patrol MLU is operational in nine southwest border sectors. The unit has approximately 60 Agents including the national coordinator at Border Patrol headquarters in Washington, DC in addition to a coordinator at each sector. The units act as a conduit between the Border Patrol and representatives of Mexican local, state and Federal law enforcement agencies located along the

southwest border. The program was designed to support ongoing enforcement operations within their respective agencies while enhancing the liaison between them. Foreign relationships via the MLU have grown and solidified. As our relationships increase, contact and responses to illicit activity along the border increase allowing for joint law enforcement support for both sides of the southwest border. Routine communication and liaison between some sectors and Government of Mexico officials has led to enhancing the security and safety of our Agents working in dangerous areas along the border.

The MLU is working to standardize policies and procedures. The program is also seeking to standardize national reporting standards and is proactively developing performance measures for the program to evaluate and measure the effectiveness of the MLU program initiatives.

### **Integrated Border Enforcement Team (IBET)**

The Integrated Border Enforcement Teams operate as intelligence-driven enforcement teams comprised of Federal, state/provincial, and local law enforcement personnel incorporating integrated mobile response capability (air, land, marine) to provide participating law enforcement agencies a force multiplier maximizing border enforcement efforts in support the U.S. Customs and Border Protection National Strategy. IBET consists of five core agencies with law enforcement responsibilities within the border area that share information and intelligence, work coordinated operations and share resources to maximize border enforcement efficiency and effectiveness. The agencies include CBP, Immigration and Customs Enforcement, U.S. Coast Guard, Royal Canadian Mounted Police and Canada Border Services Agency. Since its inception, IBETs has enhanced border integrity and security on both sides of the U.S. and Canada border by identifying, investigating, and interdicting persons and criminal organizations that pose a threat to the national security of both the U.S. and Canada. Fifteen IBET Regions actively share information work bi-national and joint enforcement operations aimed at securing the integrity of the Canada/U.S. border.

Recent significant IBET results include:

- Red River IBET intelligence led investigation into Chinese-based organized crime operation purchasing rural properties for large-scale outdoor marijuana grows.
  - 37 arrests
  - Seizure of \$49 million worth of marijuana
  
- Atlantic IBET, Operation "Jaloux," Canadian and U.S. law enforcement major drug smuggling operation
  - 26 arrests (11 in Canada, 15 in the U.S.)
  - Seizure of 1,529 pounds of marijuana
  - Seizure of 111,800 ecstasy pills
  - Seizure of \$1.2 million in U.S. currency

- Red River IBET (July 2006) received the "Criminal Intelligence Awareness and Leadership Award" from the RCMP's Criminal Intelligence Directorate in Ottawa for the hard work and dedication of the IBET unit members.

Future plans for IBET include work to standardize procedures and IBET participation for U.S. agencies. IBET will also continue intelligence training, further expand IBET collocations and enhance outreach to local, municipal, county, State and tribal law enforcement agencies.

## **Conclusion**

In furtherance of its mission, the Border Patrol will continue in FY 2009 to use a variety of programs and initiatives to support strategic objectives. The Border Patrol will continue to plan for an appropriate mix of additional resources to achieve its strategic goal. A major future objective of the Border Patrol is to ensure that its workforce is highly mobile so that it can rapidly adjust to changes in the border security environment. The Border Patrol will continue to reevaluate its existing programs and planned initiatives as the threats and vulnerabilities to border security change in response to newly deployed border enforcement resources.

Significant Accomplishments in FY 2007 include:

- Brought an additional 75 miles of border under control by deploying the right mix of new resources and enforcement operations supported by intelligence activities.
- Constructed 70 additional miles of permanent tactical infrastructure;
- Hired 2,500 new Border Patrol agents
- Coordinated and implemented initiatives to gain and maintain control of the border;
  - Utilized existing traffic checkpoints and deployed tactical checkpoints as part of a defense-in-depth strategy.
  - Arizona Border Control Initiative (ABCI)
  - Coordinated with ICE/Detention and Removal Operations to end "catch and release" of aliens who are in the country illegally
  - Continued partnership with DoD to maintain momentum pursuant to "Operation Jumpstart."
  - Established Border Intelligence Centers (BICS) which serve as a critical tactical intelligence resource center available 24 hours to support the Border Patrol mission along our Nation's border.
  - Established the Border Patrol Mexican Liaison Unit (MLU) to create and maintain positive working relations and develop alliances with foreign counterparts.
  - Established the Border Security Evaluation Team (BSET) with a purpose to serve as a mechanism for the northern Border Patrol sectors to evaluate the level of border security within the outlying border regions of their respective sectors.

- Established the Integrated Border Enforcement Team (IBET) which consists of five core agencies with law enforcement responsibilities within the border area that share information and intelligence, work coordinated operations and share resources to maximize border enforcement efficiency and effectiveness.
  - Established the “Airfield Initiative” along the northern border. This highly innovative methodology was adopted to increase the probability of identifying and intercepting an air smuggling incursion by low-flying private aircraft.
  - Initiated Operations “Red Bull” and “Uniforce.” The strategic goal of Operations Red Bull and Uniforce is to integrate the Federal, state, and local law enforcement efforts that are focused on cross-country, over-the-road smuggling into a coordinated multi-agency, multi-jurisdictional law enforcement effort with a common objective.
  - Provide a staff officer to man the Texas Border Security Operations Center in Austin, Texas. This office works with Federal, state, local, and tribal law enforcement agencies to coordinate and plan joint enforcement operations within the State of Texas.
- Sustained established “Best Practices:”
    - Operation Against Smugglers Initiative on Safety and Security (OASISS), through binational cooperation with the Government of Mexico, prosecutes smugglers and guides who do not meet the prosecution thresholds in the U.S. Engaging the Government of Mexico in border efforts like OASISS assists CBP in more swiftly gaining control of the border.
    - Operation Streamline is a progressive enforcement effort in the Del Rio Sector that combines intensive prosecution with expeditious removal. The effort is a collaboration between personnel and resources from CBP’s Office of Border Patrol and Office of the Chief Counsel, the U.S. Attorney’s Office, Immigration and Customs Enforcement’s Office of Detention and Removal, the U.S. Federal courts, the Executive Office for Immigration Review, and the U.S. Marshals Service.
    - Operational Requirements Budget Based Planning (ORBBP) is the tool used by the Border Patrol to implement the National Border Patrol Strategy. It is a rigorous and comprehensive methodology that takes a risk-based approach in determining resource requirements, deployments and operational tactics. ORBBP is a dynamic process that recognizes the ever-changing border security environment and examines all factors, current and future, internal and external, affecting border security. It ensures that the Border Patrol engages the appropriate resources and tactics against current and projected threats and vulnerabilities. Using this methodology, the Border Patrol met or exceeded all of its performance targets for FY 2006 through strategic placement of resources.

FY 2008 planned accomplishments include:

- Bringing an additional 71 miles of border under control;
- Building 150 miles of new tactical infrastructure;
- Hiring 3,000 new Border Patrol agents;
- Hiring 688 new mission support staff;
- Relocating 172 senior Border Patrol agents to establish the appropriate supervisor ratio to support expanding workforce;
- Relocating 300 Border Patrol agents from the southwest border to the northern border based on operational requirements and threat assessments by utilizing the new “Voluntary Relocation Program” (VRP). This program is a comprehensive approach to meeting the goal of providing the northern border Sectors with the necessary manpower resources to quickly mitigate threats to the Homeland attempting to gain entry through our northern border.
- Continuing to provide the current Ground Transportation Contract capability along the southwest border. The contract will free up Border Patrol agents and ICE/DRO personnel to perform their enforcement duties as opposed to enforcement support roles.

The Office of Border Patrol (OBP) anticipates FY 2008 to be a year of unprecedented growth and accomplishment. Several factors will contribute to the successes anticipated. In addition to the efforts already outlined, new strategies and methodologies will be adopted to ensure that OBP continues to be a proactive, intelligence-driven law enforcement operation.

A major opportunity for OBP in the coming fiscal year is the establishment of permanent checkpoints in the Tucson Sector area of operation. These checkpoints will restrict the routes of egress from the border area and create a deterrence to the initial illegal entry by forcing smugglers to shift their operations to areas more difficult for them to traverse and operate, thus giving us more time to intercept those engaged in illicit/illegal activities. By working closely with members of Congress and their staffs; OBP is confident that the construction of this important enforcement tool will proceed. A new initiative to establish a Director for the Special Operations Division (SOD) is being pursued. The rationale behind this initiative focuses on increasing the response, operational, and training capabilities of the Special Operations Divisions within OBP. The goal is to provide a highly mobile, rapid response capability to react to specific terrorist threats or incidents of national significance, as well as to provide operational support to the Sector Chiefs.

The Border Patrol Tactical Unit (BORTAC) remains CBP’s premier tactical response team. BORTAC is summoned for difficult and high risk missions both nationally and internationally. In FY 2007, BORTAC continued to develop and implement the Special Operations Group (SOG) concept. SOG consists of the Border Patrol’s three special operations team including BORTAC, the Border Patrol National Special Response Team (SRT), and the Border Patrol Search, Trauma, and Rescue Team (BORSTAR). BORTAC has updated and restructured its facilities at Biggs Army Airfield in El Paso,

Texas to prepare for its transition into the SOG national facility. There was a complete renovation of the barracks, the classroom and the defensive tactics training facility located at McGregor Range, NM. BORTAC completed over 50 tactical, training and support missions during FY 2007. BORTAC trained over 85 percent of its active personnel on their Mission Essential Tasks List and hosted numerous advanced skills training sessions for both SRT and BORTAC Agents. BORTAC has worked in conjunction with the U.S. National Guard, and multiple local, state and Federal law enforcement agencies in both training and operational environments.

In the future, BORTAC will continue to train its members to improve its readiness for response to threats of National Security. BORTAC will continue to improve its facilities to prepare for the influx of the full time operators and growth in the SOG national facility.

The possibility of widespread bio-terrorism and other pandemic perils remains a paramount concern for CBP and other Federal, state, and municipal entities. OBP is a major participant/facilitator in the CBP Continuity of Operations Plan (COOP) and will continue to build on established partnerships in an effort to rapidly respond and mitigate the impact of a catastrophic incident, be it an act of terrorism or natural disaster.

OBP will establish Law Enforcement Technical Collection centers (LETCs) to improve intelligence collection and dissemination capabilities among the 20 Sectors that comprise the field Headquarters element. The best practices established will streamline and standardize the methodologies use to collect, analyze and disseminate actionable intelligence.

CBP requests \$75 million for Between the Ports Training. This is an increase of \$22 million over FY 2008 Enacted. The request includes:

- decrease of \$74,000 for non-recurring expenses
- increase of \$22.1 million to address critical needs at the Border Patrol Academy to support the hiring of Border Patrol agents.

## **CURRENT SERVICES PROGRAM DESCRIPTION:**

Between the Ports Training Programs are responsible for:

- (1) Border Patrol Academy
- (2) OTD/Use of Force Policy
- (3) OTD/Leadership and Organization Development
- (4) OTD/Border Enforcement Training
- (5) Border Patrol Agent Training
- (6) Other Training

The Office of Training and Development (OTD), through the National Training Plan (NTP), provides the CBP's national leadership with a comprehensive and accurate needs assessment of all standard, core, and recurring training. The NTP provides CBP's headquarters and field managers an opportunity to advance the Secure Border Initiative by bringing the workforce together to train. The NTP emphasizes CBP's anti-terrorism mission as a strategic imperative, providing a robust menu of anti-terrorism related courses of every level of sophistication and covering a wide range of specialization. The NTP will continue to modernize and streamline the training and development infrastructure and ensure support of pivotal training such as firearms and tactical training, leadership, and advanced training programs. CBP will continue to utilize the NTP to successfully plan and execute training resources to effectively meet the ever expanding and evolving mission.

### **Border Patrol Academy**

The U.S. Border Patrol Academy identifies and provides core operational training for Border Patrol agents to accomplish their mission of protecting the boundaries of the United States. The Border Patrol Academy is currently located in Artesia, New Mexico. Basic training for Border Patrol agents is provided at Artesia. Advanced-level training and instructor training is held at Charleston and field delivered.

### **OTD/Use of Force Policy (UFPD)**

The OTD/Use of Force Policy Division is responsible for the development, articulation and implementation of CBP use of force policy and related equipment. The OTD/UFPD seeks to research, evaluate and procure the best possible equipment while providing comprehensive asset and resource management for tactical equipment and body armor. The OTD/UFPD has developed appropriate controls, standards, training, best practices and policies in order to enhance the safety and performance of approximately 14,900 Border Patrol agents.

### **OTD/Leadership and Organization Development (OTD/LODD)**

The OTD/Leadership and Organization Development Division designs, develops, delivers, and evaluates training and development activities for CBP supervisors, managers, and executives. The OTD/LODD provides core and advanced leadership/supervisory/management courses to meet organization, occupation, and individual needs.

**OTD/Border Enforcement Training (OTD/BETD)**

The OTD/Border Enforcement Training Division primarily engages in anticipating, identifying, initiating, and analyzing occupation specific training needs of CBP’s approximately 33,500 uniformed workforce, and producing customer focused training portfolios that facilitate border enforcement readiness.

The fight against terrorism remains the top priority for CBP. In support of that primary mission, the OTD will continue to oversee the anti-terrorism training program ensuring employee preparedness and skill development to confront the threat of terrorist incidents or infiltration along our borders.

**Border Patrol Agent Training**

Training courses focus on technical, intelligence, or specialized training for Border Patrol agents. Training courses include Office of Border Patrol Technical Course for Supervisors, Border Patrol agent In Charge (PAIC) Intel Course, Emergency Medical Technician Certification, Border Patrol Search, Trauma and Rescue (BORSTAR) and Canine training.

**Other Training**

OTD/Headquarters sponsors other basic and specialized training programs for various occupations offered CBP-wide. These training programs are funded through the NTP but are often coordinated with other NTP Training Leads, CBP organizations, and program managers for scheduling, facilities, instructors, etc.

PPA: AIR AND MARINE OPERATIONS – SALARIES

| <b>2008 Enacted</b>          | <b>1,662</b>          | <b>1,513</b> | <b>226,740</b>   |
| 2009 Adjustment to Base      | ---                   | 149          | 23,539           |
| <b>2009 Current Services</b> | <b>1,662</b>          | <b>1,662</b> | <b>250,279</b>   |
| 2009 Program Change          | 24                    | 12           | 4,000            |
| <b>2009 Request</b>          | <b>1,686</b>          | <b>1,674</b> | <b>254,279</b>   |
| Total Change 2008-2009       | 24                    | 161          | 27,539           |

The above table includes emergency funding of \$14.0 million provided in P.L. 110-161 for this activity. The FY 2009 Budget Request is \$254.3 million. Excluding emergency funds provided, the increase of \$41.5 million over FY 2008 is for pay inflation as well as a program increase to support 24 UAS pilot positions.

## **CURRENT SERVICES PROGRAM DESCRIPTION:**

CBP Air and Marine (A&M) secures the borders against terrorists, acts of terrorism, drug smuggling and other illegal activity by operating air and marine branches at strategic locations along the borders. Multi-mission aircraft with advanced sensors and communications equipment provide powerful interdiction and mobility capabilities directly in support of detecting, identifying and interdicting suspect conveyances, and apprehending suspect terrorists and smugglers. CBP A&M maximizes the capabilities of air and marine assets through a cohesive joint air operations model for centralized command and control and a responsive and integrated control system for decentralized execution.

CBP A&M partners with numerous stakeholders in performing its missions throughout the continental United States and the Western Hemisphere. This includes domestic operations at the borders, source, transit and arrival zone operations, interior law enforcement support, and support to other agencies. In fulfilling the priority mission of CBP to protect the borders, CBP Air and Marine's geographical mission has a strong focus along the southern border, with a recent expansion of coverage on the northern border.

CBP Air and Marine Salaries and Expenses (S&E) appropriation covers Personnel Compensation and Benefits. This appropriation also covers expenses such as Permanent Change in Station moves, ammunition, firearms, administrative training and travel, and school tuition for dependants of employees in foreign countries.

**Description of Item:**

Additional funding in the amount of \$442.4 million is requested to hire, train and equip 2,200 new Border Patrol agents (\$362.5 million). The purpose of this initiative is two-fold: (1) adding 500 new Border Patrol agents to stay on course for meeting the President's goal of adding 6,000 new Border Patrol agents by the end of the 1<sup>st</sup> quarter of fiscal year 2009; (2) providing an additional 1,700 agents to reach 20,019 by the end of the fiscal year. Resources are proposed for 441 operational/mission support personnel (\$32.2 million), relocation (\$25.6 million), and training (\$22.1 million). CBP is also seeking an additional \$149.5 million in the Construction account for new or expanded facilities to accommodate significant increases in Border Patrol agents and support staff.

**Justification:**

Agents & Support (\$394.8 million)

To secure our borders, CBP recommends that Border Patrol agent levels should continue to increase. An additional 500 agents in FY 2009 will allow CBP to accomplish the President's goal, of adding 6,000 new Border Patrol agents by the end of the 1<sup>st</sup> quarter of

fiscal year 2009, for a total of 18,319. The remaining 1,700 (Total = 2,200) agents will also be hired in Fiscal Year 2009 in order to reach 20,019 by the end of the fiscal year.

As part of its strategy to gain and maintain the security of the Nation's border, CBP identified the requirement for additional agents based on the current operational situation, emerging threats and vulnerabilities and other operational requirements.

The mission success of the 2,200 agents is predicated on CBP also receiving additional technological and tactical infrastructure resources to complement the increase in Border Patrol agents. The technology (sensors, cameras, communication equipment, etc.) and tactical infrastructure (fence, roads, and vehicle barriers) funded in the BSFIT (Border Security, Fencing, Infrastructure and Technology) account act as force multipliers making the Border Patrol agents more effective.

In addition, resources are proposed for 441 operational/mission support personnel in FY 2009, based on the ratio of operational/mission support personnel to front line agents. Operational support positions include Sector Enforcement Specialists (SEs) to handle radio communications, automotive mechanics to maintain the Border Patrol fleet, personnel to maintain Border Patrol facilities, and information technology (IT) support staff to provide support in developing and implementing IT systems. Mission support positions include management/program analysts to advise program managers regarding specific projects and operational initiatives, attorneys to provide legal support services, human resource specialists to meet the increase in workload required to fill vacancies, training technicians to perform tasks related to delivery of basic training, and finance and procurement positions to perform duties related to increases in travel, payroll, and major acquisitions.

The following ratios were used to develop resource proposals:

- One Border Patrol operational support position for every seven Border Patrol agents;
- One CBP mission support position for every 20 agent/officer positions; and
- Seventeen positions to provide construction support.

#### Relocations (\$25.6 million)

Additional funds will be required to cover relocation expenses for Border Patrol agents since experienced supervisors may need to be moved from other locations. Once new agents complete their training and are assigned to their duty station, they are supervised by an experienced agent. CBP assumes that the Office of Border Patrol will need to pay \$90,000 on average per agent for relocation expenses for every seven additional Border Patrol agents hired. Within the additional 2,200 Border Patrol agents (BPAs) requested in FY 2009, the requirement for 275 new supervisors is included. Of the 275 new supervisory positions, 50 percent of those hires are estimated to be from local hires and the other 50 percent will be from relocations representing 138 moves.

In addition to the relocation of new supervisory agents, the Office of Border Patrol will be relocating up to 440 agents from the southern border to the northern border in FY 2009.

The increase in agents on the northern border is accomplished by moving experienced journeyman agents to remote locations along the northern border. The movement of these agents will be accomplished through the use of the Voluntary Relocation Program (VRP) which will reduce the cost of these moves to about \$30,000 per agent or less. This request supports relocation of approximately 440 Border Patrol agents.

Training (\$22.1 million)

Additional funding in the amount of \$22.1 million is requested to support non-personnel expenses related to the training of 2,200 new Border Patrol agents. Resources are required to expand the training capacity of the CBP Border Patrol Training Academy to accommodate the increased number of Agents. This funding is needed to equip the CBP Border Patrol Academy with sufficient infrastructure, technology and instructors.

**Description of Item:**

CBP requests \$4 million to provide adequate staffing at northern border/Great Lakes locations as CBP expands support for border security operations consistent with the Secure Border Initiative (SBI) and the CBP Air and Marine Strategic Plan. The positions are comprised of 24 Unmanned Aircraft Systems (UAS) pilots.

Justification

These positions are necessary for CBP Air and Marine to achieve maximum compliance with strategic goals and objectives and to support Border Patrol agents on the ground. During FY 2009, Air and Marine plans to expand its capabilities across the entire northern border by building on five primary air branches achieved by the middle of FY 2008.

Impact on Performance (Relationship of Increase to Strategic Goals)

The hiring of additional personnel supports DHS strategic goal #2, Prevention, and CBP objective: 2.2 Maximize Border Security along the northern, southern and coastal borders through an appropriate balance of personnel, equipment, technology, communication capabilities and tactical infrastructure.

**Description of Item:**

CBP requests \$106.9 million to support the WHTI implementation at additional inbound lanes at land ports of entry, which will complete coverage for 95 percent of the land border arrivals. Funding would also support an additional 89 CBP Officers (\$9.9 million) and equipment and contract services (\$97 million).

|   |                         |
|---|-------------------------|
| Program Management                      | \$ 5,862,770            |
| Communications and Outreach             | \$ 6,855,000            |
| Deployment and Implementation (26 POEs) | \$ 74,150,137           |
| Infrastructure and Support              | <u>\$ 10,116,358</u>    |
| <b>Subtotal</b>                         | <b>\$ 96,984,265</b>    |
| <br>CBP Officers                        | <br><u>\$ 9,915,735</u> |
| <b>Total</b>                            | <b>\$106,900,000</b>    |

In FY 2008, CBP received \$225 million to develop the primary vehicle application, install hardware and make the necessary lane modifications to implement WHTI at 13 high volume ports, accounting for about 68 percent of all vehicle passenger traffic at U.S. land border ports of entry. The FY 2009 increment will pay for the completion of the rollout of infrastructure and technology in support of WHTI to cover 95 percent of land border traffic (the top 39 POEs). In addition, it completes the implementation of the non-

Radio Frequency Identification (RFID) Ports of Entry (POE)s, provides for improved lane management, and pays for program management and support of the previously installed POEs.

**Justification:**

WHTI is mandated by law and requires all travelers to present acceptable travel documents that WHTI will verify at the time of crossing. WHTI will benefit CBP Officers by providing a tool to conduct the necessary authentication at the time of crossing and benefit the traveling public by speeding up the verification process to the extent possible with Radio Frequency Identification (RFID), communications technology, and improved lane management. WHTI will be developed in discrete useful segments. Each segment is capable of standing alone and each will provide value to the program. Consistent with the Consolidated Appropriations Act of 2008, DHS will be making the investments to prepare for implementation of the WHTI secure document requirement at land and sea border ports of entry by June 1, 2009.

The proposed investment will support the following elements:

- Modification to vehicle primary processing lanes at ports of entry that were not completed during FY 2008. Upon completion, RFID technology infrastructure will be deployed at the highest volume ports of entry that support 95 percent of the land border traffic and CBP will have the capability to better manage cross border traffic. Installation of RFID technology at primary inspection lanes will authenticate traveler identity and citizenship at the time of crossing.
- Development of a new software application for use on vehicle primary inspection lanes to read both RFID and non-RFID documents, validate document information, run lookout queries, correlate this information with license plate queries provided by in-lane license plate readers, display photos where available (visas, permanent resident cards, etc.) and incorporate NEXUS/SENTRI capabilities so that lanes may be used for both NEXUS/SENTRI traffic and regular vehicle traffic. CBP anticipates that NEXUS/SENTRI documents will be acceptable under WHTI. The ability to process NEXUS/SENTRI travelers on the same lanes as other WHTI travelers will expedite border traffic at the affected POEs.

| Land Port Locations                | Rank | # POV Inbound Lanes | PAX Traffic (million) <sup>1</sup> | % PAX Traffic | POE | EC* | total |

\* Enrollment Centers

<sup>1</sup> Rankings are based on FY 2006 traffic volume data.

<sup>2</sup> Although not ranked in the top 39 ports by traffic volume, Naco, Pembina and Houlton are selected to receive additional CBP Officers due to anticipated increases in workload that will develop at the port of entry in the case of Naco and at the enrollment centers in the cases of Pembina and Houlton.

### **Impact on Performance (Relationship of Increase to Strategic Goals):**

Increased traveler information provided via the WHTI investment will improve officers' decisions on admissions to the United States. This investment will incorporate new technology into additional vehicle primary lanes to enable a more effective process for validating identity and citizenship at the time of border crossing. It will improve customer service by avoiding a more time intensive and intrusive inspection process that would result from meeting the WHTI requirements without this technology. The investment also will improve operational effectiveness at the land border ports by automatically correlating license plate information and passenger documentation information, providing improved passenger information to the CBP primary inspection officer, by creating watch lists, and by performing more in-depth and automated lookout queries.

CBP Officers requested in FY 2009 will be deployed at various locations to the top 39 land POEs by crossing volume and at enrollment centers to handle the expected increase in applications to CBP Trusted Traveler programs. The new CBP Officers requested in FY2009 will complete the deployment at land POEs and enrollment centers. The locations to receive additional CBP Officers will be determined based on projected increases in workload.

WHTI will provide the means for CBP to conduct the necessary authentication of travelers at the time of crossing and will benefit the traveling public by speeding up the verification process to the extent possible with RFID and communications technology. This will counter the threat of illegal entry into the U.S. at the ports of entry, including the threat of terrorists entering the country.

\*Note: CBP has been maintaining RPMs and staffing locations that allow for the resolution of alarms since the agency was created in 2003. Funding shown represents the portion of the FY 2008 increase carried over into FY 2009.

**Description of Item:**

CBP requests \$35.5 million for personnel and operations and maintenance support of the Domestic Nuclear Detection Office (DNDO) deployment of Radiation Portal Monitors (RPMs). Of the \$35.5 million, \$27.3 million will be utilized to hire 238 CBP Officers, 20 scientists, 25 IT specialists and 12 mission support personnel to implement the deployment and to perform the subsequent operation of the RPMs at our Nation’s seaports. The remaining \$8.2 million will be utilized for operations and maintenance of RPMs and will ensure effective operation of new Advanced Spectroscopic Portals (ASP).

**Justification:**

The additional CBP Officers will ensure that a cadre of highly trained personnel will be readily available to ascertain whether an alarming container poses a national security risk or whether the alarming shipment is benign and should be released into the U.S. commerce. The additional scientists will perform program oversight which includes training, site visits, “green alarm” audits and general operations. The additional scientists will support the RPM program and the ongoing deployments of ASPs. The introduction of the ASP RPMs will result in additional training, deployment, and support issues beyond what can be accomplishment by current staff. In order to accommodate large

Ports of entry (POEs) who have increased cargo inspections, and subsequent alarms, scientist are rotated into large POEs from their usual laboratory duty station where they assist in operating technologies, provide on-site expertise in interpreting alarms, and make recommendations to resolve issues that arise. The additional IT and mission support personnel will support the offices by performing management, infrastructure related duties, and administrative functions.

Funding in the amount of \$8.2 million will be utilized for operations and maintenance of RPMs and will ensure effective operation of new ASPs. The ASP systems are expected to operate 24 hours per day, 7 days per week, and 365 days per year.

By the end of CY 2008, CBP will have deployed 488 RPMs at seaports in order to increase the ability to scan cargo for radiation. At the land border ports of entry, CBP Officers are already positioned to conduct radiological screening prior to entry into the United States. However at seaports, RPMs generally are positioned at the terminal exit gates to ensure 100 percent radiological screening of all containerized shipments exiting the seaport terminal while avoiding delays for non-alarming shipments. This ensures that trade is not unnecessarily impeded at the seaport when an RPM alarms. Since CBP Officers are currently not sited at the terminal exits, additional personnel are needed to allow CBP to screen cargo containers entering the country for radiological materials prior to exiting the seaport terminal.

Operations and maintenance will support:

- Transition operations and support from DNDO to CBP - funding will enable CBP to transition, train and knowledge share from DNDO/Pacific Northwest National Laboratory (PNNL) to CBP
- Enable CBP to establish a minimum parts reserve to respond to more routine maintenance requirements
- Provide operations and maintenance support for equipment that will come off the DNDO/PNNL provided one-year warranty (the warranty on equipment purchased and deployed throughout FY 2008 will end throughout FY 2009; thus, CBP needs funding to maintain devices as the warranty ends).
- Travel to the field to perform training, on-site support/analysis, and routine maintenance/calibration.
- Provide training and help desk support - many ports have multiple shifts of many individuals, with several employees identified to operate this equipment; thus, help desk and training support needs will increase (initial training will provide basic operational foundation); however, as equipment is used more, and/or as Officers are rotated, and/or new Officers come on-board, additional training requirements will have to be met.
- Provide preventive maintenance - routine calibration
- Provide corrective maintenance - specific calls to respond to unique problems. Uncertainties surround the new complex crystal technology and maintenance/replacement costs are unknown in the operational environment.
- Provide for replacement parts - parts for these new more complex devices, are expected to cost more than current technologies.

- Network equipment to optimize performance and use - CBP intends to have all these devices networked to monitor usage, alerts, etc. These costs are inherent in the operational cost to optimize use of the technology, and to ensure utilization metrics are monitored and available to identify when maintenance may be required.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

The deployment of CBP Officers directly supports the accomplishment of DHS Strategic Objective 2.1, to “Secure our borders against terrorists, means of terrorism, illegal drugs and violations of trade and immigration laws.” This initiative will allow CBP to reap considerable per inspection time-savings, from an average of 10 minutes required for one officer to scan an entire container to 5-8 seconds for an RPM to scan an entire container, which will enable CBP to scan 98 percent of all containers entering the country. This will also minimize the impact to trade when an alarm does occur. RPMs are capable of screening an entire conveyance and/or container for radioactive materials in seconds. Additionally, due to the RPMs being orders of magnitude more sensitive than hand held screening devices (Radiation Isotope Identifier Devices and Personal Radiation Detectors), CBP will have the capability to thoroughly screen seaport conveyances and/or shipments. The time-savings and sensitivity means that CBP can accomplish more examinations and assures that CBP can accomplish its appointed missions of securing the Nation's borders from the threat of terror and facilitating the legitimate trade that is so critical to this country and its economy.

Without the additional staffing, CBP will not be able to readily resolve RPM alarms in a timely manner and commerce will experience delays. An Officer’s presence at the terminal exit gates will ensure compliance with CBP’s mission goal of preventing the entry of illicit radiological or nuclear materials. Funding for operations and maintenance will ensure that CBP has the resources necessary to provide program oversight, have scientists on board to advise on proper response to alerts, and provide day-to-day operations and maintenance to keep equipment operational, as well as provide funding to leverage third party vendor support for corrective maintenance, preventive maintenance, parts, and technical support – beyond what CBP technical support is able to provide.

\* Current service level estimates are based on the total number of CBP Officers at the Land Border Ports of Entry.

**Description of Item:**

Funding in the amount of \$25 million is requested to hire 212 CBP Officers and 22 support positions for passenger processing activities at the ports of entry (POEs) on our borders with Mexico and Canada. Twelve of the CBP Officers will directly support the Office of Training and the Office of Field Operations Academy in Glynco, Georgia.

**Justification:**

CBP requests additional resources to support the hiring of additional CBP Officers and support positions to alleviate the current deficit of Officers for passenger processing, which is currently in excess of 850 CBP Officers. This estimate is derived from CBP’s Workload Staffing Model, which uses criteria such as passenger volume, processing times, facility constraints/expansions, number of terminals/lanes, threat and risk factors, and overtime. The model illustrates the need for additional CBP Officers to meet current passenger processing in the air, land, and sea environments.

The hiring of 200 CBP Officers would eliminate approximately one-fourth of the current Officer deficit at the land borders in the passenger environment and provide greater

assurance that CBP can perform its critical Homeland Security mission as the guardian of our borders.

CBP faces significant and constant changing challenges in protecting the U.S. at its POEs from the infiltration of terrorists and other criminal elements into the country. Transportation of explosives, improvised explosive devices (IEDs), and other harmful weapons, such as man-portable air defense systems (MANPADS), into our Nation is a significant threat. Intelligence indicates that terrorists will continue to study, experiment with, and seek chemical, biological, and radiological agents. Such weapons, due to the variety of sizes and packaging requirements, may be compact enough to transport within the passenger environment.

Threats to national security are not confined to the entry of terrorists and terrorist weapons. The illegal smuggling of drugs, monetary instruments, and aliens continue to present concerns and challenges. The trafficking of harmful drugs leads to increased violence and criminal activity across our Nation. The cyclical relationship between drug trafficking and money laundering is central to the success of drug traffickers. The revenue generated from illegal drugs funds more drug trafficking, creating an illegal and very profitable industry operating within and across our borders.

In addition to the smuggling of illegal drugs and monetary instruments, preventing the entry of illegal aliens is critical to protecting our borders. Despite increased security measures, numerous aliens attempt to enter at our ports of entry using fraudulent documents. The economic impact of these individuals is growing as the population of illegal aliens living in the U.S. increases.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

This request supports CBP's mission to prevent terrorist and terrorist weapons, including weapons of mass effect, from entering the United States. It directly aligns with DHS Strategic Goals of: 1) Prevention; (2) – Detect, deter and mitigate threats to the homeland; and 2) Service (6) - Serve the public effectively by facilitating lawful trade, travel and immigration. The initiative also directly supports CBP's Strategic Goals 1 (Preventing Terrorism at Ports of Entry) and Strategic Goal 4 (Facilitating Legitimate Trade and Travel).

The additional positions will support DHS Strategic Goal 1 and CBP Strategic Goal 1 by providing increased capability to identify and address potential threats, vulnerabilities, and their consequences that are critical to CBP's and the Nation's future. The use of human capital to analyze data, model scenarios, and align actions with assessed risk levels is central to CBP's proactive approach to operations. Adequate staffing levels, combined with the use of risk management principles and technology at our ports of entry, proactively address threats, minimize vulnerabilities, and identify consequences to maximize security at ports of entry.

The additional positions will support DHS Strategic Goal 6, and CBP Strategic Goal 4, by increasing CBP's ability to more efficiently process legitimate passengers while detaining and preventing potentially dangerous travelers from entering the U.S.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Increase 6: US-VISIT (including 10-Print)**

Strategic Goal(s) & Objective(s): 2.1 Secure the borders against terrorists, means of terrorism, illegal drugs and other illegal: by denying entrance to the US to individuals that offer a threat to national security; and 2.3 Provide end users with technology and capabilities to detect/prevent terrorism and other illegal activities: by providing biometric screening and travel document authentication.

**Description of Item:**

CBP requests \$62.8 million to fund operations and maintenance (O&M) required to sustain US-VISIT functionalities within CBP as follows:

|  |                     |
|--|---------------------|
| Software maintenance for US VISIT applications                 | \$5,600,000         |
| Hardware, software license maintenance and engineering support | \$24,300,000        |
| Operations Support, telecommunications, disaster recovery      | <u>\$32,900,000</u> |
| <b>Total</b>   | <b>\$62,800,000</b> |

The major categories for O&M costs include the below specifics:

- **Software maintenance:** Includes labor for software maintenance and changes to US-VISIT applications at air/sea and land ports Of entry (POEs). Full maintenance life cycle support includes documentation, software changes, testing, security, quality assurance, configuration management, project support and researching/resolving operational problems with the software.

- **Hardware Maintenance:** Includes maintenance of equipment and systems at the Data Center systems including processors and data storage, workstations used for US-VISIT at POEs to include a three year refresh cycle and specialized peripherals such as the cameras, ePassport readers, ten print scanners and document readers.
- **Software License Maintenance:** Includes recurring license fees for software used to support US-VISIT at both the data center and at the POEs.
- **Telecommunications:** Includes costs for bandwidth used by US-VISIT increments and labor costs for the maintenance and monitoring of the network.
- **Operational Support:** Includes labor for Data Center operations, engineering support, help desk support, security support, asset management, duty officers, situation room monitoring, auto operations support, change management and code migration support, project management support and field technology officers at the POEs to provide on the ground support.
- **Disaster Recovery:** Includes the maintenance of the environment for disaster recovery including data replication and circuit costs.

Previously, funding for operations and maintenance of US-VISIT was included in the US-VISIT appropriation.

**Justification:**

Since FY 2003, US-VISIT enhancements have improved the inspection processes at POEs that enabled changes to the CBP business processes by improving the security of the U.S. The enhancements are so intertwined with the inspection process that it is almost impossible to isolate US-VISIT functionality from other aspects of the inspections process. The infrastructure changes made as a result of US-VISIT since FY 2003 must be sustained if DHS is to continue to benefit from the enhanced inspection processes for people entering the U.S. at POEs. The recurring costs support the increased network, data processing, help desk, field support, data recovery, software systems support, etc. required to sustain the US-VISIT enhancements made to CBP's systems and infrastructure, and to ensure continued efficient processing of passengers at POEs. Without this requested O&M funding, CBP processing of over 200,000 alien entry inspections per day will be impacted by increased response times, less information available to make an inspection decision and possibly losing all capability to conduct the inspection electronically.

These increments provide functionality critical to both US-VISIT and CBP in securing entry to the U.S. at POEs and providing entry and exit information for aliens. Previously, CBP prepared an annual O&M request for US-VISIT funding. Beginning in FY 2009, CBP will request funding for operations and maintenance. US-VISIT increments and functionality supported by this request include:

- Increment 1: Improve the primary inspection process at air/sea POEs by adding biometrics checks for aliens and providing visa validation both through biometrics and presentation of the visa issuance data and photograph of the visa. Also provides alien entry and exit data for air/sea POEs and the processing of this data to determine overstays.
- Increment 2A: Improve the primary inspection process at air/sea by adding in Citizenship and Immigration Service's (CIS) documents for validation both through biometrics and presentation of the CIS document issuance data and photograph. In the air environment Increment 2A also added ePassport capability, which allows the chip on the ePassport to be read in order to present the picture and biographic data to the CBP Officer. Increment 2A added the travel document validation capability to the land border for I-94 issuance and for pedestrian primary.
- Increment 2B/3: Improve the I-94 issuance process at all land border POEs by providing biometric and biographic checks and automation of the data collection and printing of the I-94 departure coupon in one integrated process.
- Ten-Print: Ten-Print implementation is planned for FY07 and FY08 pending successful completion of some pilots. It will replace the current two-print processing to capture fingerprints for real time lookout checks against IDENT lookouts and later checks against IAFIS. Also provides biometric validation against visas, CIS documents and previous entries.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

Continued operation of US-VISIT functionality supports the following DHS and CBP Strategic Goals:

DHS:

- 2.1 Secure the borders against terrorists, means of terrorism, illegal drugs and other illegal: by denying entrance to the US to individuals that offer a threat to national security.
  - 2.1 Secure the borders against terrorists, means of terrorism, illegal drugs and other illegal: by denying entrance to the US to individuals that offer a threat to national security.
  - 2.3 Provide end users with technology and capabilities to detect/prevent terrorism and other illegal activities: by providing biometric screening and travel document authentication.

CBP:

- 1.2 Improve identification and targeting of potential terrorists and terrorists weapons, through risk management and automated advanced and enhanced information: Provides biometric screening and travel document validation.
- 4.2 Utilize start-of-the-art technologies and processes to leverage resources and to conduct examinations of all potential high-risk cargo, conveyances, and passengers: Biometric screening and travel document validation contribute to a much stronger primary inspection process than just biographic checks.
- 5.3 Cooperate with other agencies, foreign governments, and industry partners to administer and enforce the laws of the United States: US-VISIT leverages partnerships across DHS and with Department of State and Federal Bureau of Investigation (FBI).
- 6.4 Maintain a reliable, stable and secure IT infrastructure and an array of technical support services including laboratory and scientific services, tactical radio communication, field equipment maintenance / support and 24/7 customer assistance: Through the various US-VISIT projects, the infrastructure supporting primary inspections at ports of entry has been greatly enhanced. Maintaining this investment in infrastructure will ensure that US-VISIT functionality continues to be an integral part of the inspection process.

CBP Priorities supported by continued US-VISIT Operations include:

2. Prevent the entry of terrorists at the ports of entry: Biometric screening and travel document validation are key components in preventing the entry of terrorists.

**Impacts on other DHS Components and outside DHS Components:**

US-VISIT leverages partnerships across DHS and with Department of State and FBI. CBP provides the front line screening using the US-VISIT and FBI biometric information. The entry process at the POEs provides the data US-VISIT needs to identify overstays for Immigration and Customs Enforcement to investigate.

**Description of Item:**

CBP requests \$6 million to replace Non-Intrusive Imaging (NII) systems beginning with small scale systems that are over 10 years old and are approaching the end of their life cycle. The small-scale program uses hand-held equipment to inspect small-targeted cargo, parcels, luggage, and individuals, allowing system operators to examine their contents without the need for an intrusive manual search. In addition, small-scale NII equipment enables CBP to inspect cars, trucks, railcars, and sea containers that have been identified by large-scale NII systems as potentially containing illicit goods, i.e., money, guns, ammunition, agricultural items, explosives, and chemical, biological, and nuclear agents. These systems provide image information on material concealed on a person, hidden in inaccessible compartments, or enclosed in mail and parcels. The equipment protects system operators from harm by limiting their exposure to actual or potential hazardous or radioactive materials. The ability to quickly and accurately inspect cargo supports programs throughout CBP. The remaining \$4 million will be used for NII radiation monitoring equipment maintenance. Below are breakouts of the funds and systems:

|  |                 |
|--|-----------------|
| Operations and Maintenance of existing NII equipment | \$4,000         |
| Purchase and deploy 284 small-scale NII systems      | <u>\$6,000</u>  |
| <b>Total</b>   | <b>\$10,000</b> |

| <b>Small Scale NII Systems</b> |                 |
|--------------------------------|-----------------|
| <b>Type</b>                    | <b>Quantity</b> |
| Baggage X-Ray                  | 24              |
| Tool Trucks                    | 10              |
| X-Ray Vans 18                  | 10              |
| Busters                        | 100             |
| Laser Range Finders            | 60              |
| Fiberscope                     | 80              |
| <b>Total</b>                   | <b>284</b>      |

**Justification:**

The Non-Intrusive Inspection Systems Program supports the interdiction of Weapons of Mass Destruction and Effect (WMD/WME), contraband, and illegal aliens being smuggled across the United States borders, while having a minimal impact on the flow of legitimate commerce. The NII Systems Program is an essential aspect of the Customs and Border Protection’s layered enforcement strategy. The goal is to match the technology and equipment with the conditions and requirements at each inspection point, including domestic ports of entry, Border Patrol checkpoints, and overseas ports, based upon a scientific analysis of the individual conditions at that location. This synchronization will increase the effectiveness of the strategy by strengthening one of its most vital layers.

The rate of traffic across our border is increasing. Without replacement of aging systems CBP cannot meet its goals to:

- Inspect 100 percent of all targeted high-risk containers
- Inspect 15 percent of all cargo entering the US
- Inspect 100 percent of all high-risk international mail
- Provide X-ray technologies to all international mail facilities, and
- Install baggage X-ray technology at 100 percent of international airports, seaports and border crossings

For this strategy to be fully effective, the proper NII technology must be deployed to each location (i.e., high energy systems where there is high density cargo; hand-held equipment to inspect small-targeted cargo, parcels, luggage and individuals).

**Impact on Performance (Relationship of Increase to Strategic Goals):**

Continued deployment of additional NII Systems and replacement of older NII technologies support the following DHS and CBP Strategic Goals:

DHS:

- 2.1 Secure the borders against terrorists, means of terrorism, illegal drugs and other illegal activity: NII technologies enable CBP Officers to identify weapons of mass destruction and weapons of mass effect, illegal contraband, and illegal aliens before they enter the United States.

- 2.3 Provide end users with technology and capabilities to detect/prevent terrorism and other illegal activities: NII technologies allow a team of officers to perform inspections on a targeted container or conveyance quickly and safely, and relegate the far more costly and time-consuming manual inspections to containers or conveyances wherein an anomaly is revealed by the imaging system.

**CBP:**

- CBP Strategic Goal 1, Objective 1: NII technologies enable the CBP Officers to identify weapons of mass destruction and weapons of mass effect, illegal contraband, and illegal aliens before they enter the United States.
- CBP Strategic Goal 1, Objective 2: NII technologies allow a team of officers to perform inspections on a targeted container or conveyance quickly and safely, and relegate the far more costly and time-consuming manual inspections to containers or conveyances wherein an anomaly is revealed by the imaging system.
- CBP Strategic Goal 5, Objective 2: NII technologies provide an efficient means to effectively screen a wide variety of cargo entering our country through a variety of conveyances without significantly delaying or impeding commerce. The broad range of commercially available NII technologies provides the capability to detect many types of contraband.

**Impacts on other DHS Components and outside DHS Components:**

- NII imaging systems program leverages partnerships across DHS and other agencies. CBP uses the NII imaging systems to provide the front line screening to detect and interdict narcotics, currency, and other contraband secreted in POVs, RVs, buses, large sea containers and commercial shipments. NII systems are viewed as force multipliers that enable CBP Officers to screen or examine a larger portion of the stream of commercial traffic, while easing the flow of legitimate trade, cargo, and passengers.

**Department of Homeland Security**  
**U.S. Customs and Border Protection**  
**Salaries and Expenses**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 8: Automated Targeting System Passenger (ATS-P)**

Strategic Goal(s) & Objective(s): 2.1 Secure the borders against terrorists, means of terrorism, illegal drugs and other illegal activity

PPA: Systems for Targeting

Program Increase: Positions 0 FTE 0 Dollars \$5,000

\* Current Services level of \$30 million is for ATS-P maintenance.

**Description of Item:**

CBP requests \$5 million to enhance the Automated Targeting System-Passenger (ATS-P) that has been operational since 1999. The Automated Targeting System (ATS) is a web-based enforcement and decision support tool that that is the cornerstone for all CBPs targeting efforts. ATS-P is a module of ATS that focuses on passengers and incorporates intelligence information and technologies to target suspect passengers for inspection; accordingly, ATS-P allows CBP Officers to focus their efforts on passengers that would warrant further attention. Requested funds will be utilized to implement targeting methodology improvement activities and to address the requirement for high priority infrastructure improvements including high availability, Service Oriented Architecture (SOA), and a simulation and testing environment to improve service delivered to CBP Officers in the field, accommodate increased volume of passengers and vehicles, provide a simulation and test environment to support passenger targeting improvements, and move towards true 24/7 system availability.

|  |                    |
|--|--------------------|
| Advanced Analytics                           | \$500,000          |
| Simulation and testing                       | \$1,000,000        |
| Develop collaboration tools                  | \$500,000          |
| High availability focused technology refresh | <u>\$3,000,000</u> |
| <b>Total</b>                                 | <b>\$5,000,000</b> |

**Justification:**

In order to proactively protect our nation from terrorists and others who seek to harm us, CBP must continually refine the automated screening processes. This project will allow CBP to begin making a number of much-needed refinements in Automated Targeting Systems-Passenger (ATS-P) to improve targeting methodology through:

- Targeting Methodology Improvement through Advanced Analytics (Advanced Visualization Techniques, Descriptive Analysis, Association Analysis, Prediction, Text Mining, Simulation and Optimization);
- Expanding the simulation and testing environment to passenger environment;
- Developing collaboration tools to allow the National Targeting Center and the field to collaborate and improve intelligence and real time response capabilities;
- Focusing high availability technology refresh;
- Acquiring new data sources and related targeting functionality to increase targeting capabilities and evaluate improvements to screening performance;
- Expanding support for SOA to allow for the exchange of information and utilization of targeting capabilities across the CBP enterprise; and
- Expanding wireless and handheld device support to directly support operations at U.S. ports of entry.

ATS-P requires increasing resources to expand targeting coverage to completely cover the volume of passengers and vehicles and make improvements to improve targeting capabilities, coordinate intelligence, support architectural improvements to improve service delivered to CBP Officers in the field and move towards true 24/7 system availability.

ATS-P standardizes names, addresses, and similar data to enable data elements to be more easily associated with other business data to form a more complete picture of a passenger in context with previous behavior. Every passenger processed through ATS-P is subjected to a real-time risk evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering. ATS consists of modules that provide selectivity and targeting capability to support CBP inspection and enforcement activities; and modules that focus on exports, imports, passengers, land border private vehicle crossings, and import trends over time.

Without the requested funding for ATS-P:

- Passenger targeting would remain at current capabilities without the benefit of advanced analytics (i.e., targeting methodology improvement through advanced analytics such as threat modeling, advanced visualization techniques, descriptive analysis, association analysis, prediction, text mining, simulation and optimization).

- ATS-P would be unable to perform the technology refresh necessary to make improvements to support movement toward high availability, system resilience, and reduced downtime required by the business sponsor / customer (ATS-P currently requires downtime for maintenance).
- Simulation and testing capability would not be expanded to the passenger environment and introduction of the next level / next generation of targeting will be further delayed.
- ATS-P would not realize the benefits from intelligence integration, i.e., engaging terrorism experts and intelligence organizations and integrating intelligence into ATS-P targeting algorithms.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

ATS Passenger Enhancements will support the following DHS and CBP Strategic Goals:

**DHS: GOAL 2 – PREVENTION**

ATS-P helps to detect, deter, and mitigate threats to our homeland. ATS supports DHS objectives to secure our borders against terrorists, means of terrorism, illegal drugs and other illegal activity and provide operational end users with the technology and capabilities to detect and prevent terrorist attacks, means of terrorism and other illegal activities and facilitate the legitimate movement of cargo and people.

- ATS-P is an important tool in overall efforts to secure our borders against terrorists, means of terrorism, illegal drugs and other illegal activity (2.1). ATS-P contributes to DHS's objective to interdict terrorist activities by targeting unlawful migration of people, drugs and other contraband, while facilitating legitimate migration and commerce. ATS-P helps extend our zones of security beyond our physical borders by identifying, prioritizing and interdicting threats to our nation before they arrive. ATS-P supports DHS's objective of enforcing all applicable trade and immigration laws (objective 2.2) in an integrated fashion while facilitating free commerce and the flow of legal immigration and travel into the United States. ATS-P supports efforts to interdict smuggling and stop other illegal activities that benefit terrorists and their supporters. ATS-P is part of a unified, cohesive enforcement capability to actively conduct and coordinate law enforcement operations. ATS-P provides operational end users with the technology and capabilities to detect and prevent terrorist attacks, means of terrorism and other illegal activities (objective 2.3).
- ATS-P also supports Strategic Goal 6, Service. ATS-P serves the public by facilitating lawful trade and travel. ATS-P facilitates the efficient movement of legitimate cargo and people (objective 6.4). ATS-P accomplishes this by identifying trustworthy people. Through the identification of both high risk and trustworthy people, cargo, and conveyances, ATS-P promotes teamwork and increase the efficiency, effectiveness, and operational synergies of CBP Officers.

CBP: ATS-P strongly supports CBP's strategic objectives and supports the following CBP Strategic Goals.

#### GOAL 1 - PREVENTING TERRORISM AT PORTS OF ENTRY

- ATS is a law enforcement system that supports trade compliance and processing of passengers and outbound and inbound cargo. ATS-P helps improve the collection, use, analysis and dissemination of intelligence to target, identify and prevent potential terrorists and terrorist weapons from entering the United States (Objective 1.1). ATS-P helps improve identification and targeting of potential terrorists and terrorist weapons, through risk management and automated advanced and enhanced information (Objective 1.2). A primary function of CBP is to protect the borders of the United States, and ATS is the key tool for analyzing data for both inbound and outbound passengers, while remaining a critical screening system for antiterrorism. The system permits CBP inspectors to better prioritize secondary inspections. ATS-P examines Advance Passenger Information System (APIS) data, required of international air carriers under the Aviation and Transportation Security Act of 2001, along with other data from the Traveler Enforcement Communication System (TECS), suspect and violator index (SAVI), and I-94s to identify high-risk travelers before they arrive. Upon their arrival, they can then be intercepted for further evaluation while low-risk travelers are expedited.

#### GOAL 3 - UNIFYING AS ONE BORDER AGENCY

- ATS is helping to unify as one border agency (Goal 3) and present one face at the border. ATS is one of the automated tools that help to create a shared law enforcement culture throughout the agency to secure the homeland (objective 3.1). ATS-P contributes to the consolidation of anti-terrorism secondary inspections to improve CBP's ability to keep terrorists and terrorist weapons out of America, by implementing combined anti-terrorism analytical and response teams in the passenger environment (Objective 3.2). ATS-P also helps CBP establish a unified primary inspection (objective 3.4) for passenger processing for inspection missions at land border crossing ports of entry into the United States including land border crossings.
- ATS contributes to unified primary inspection (Objective 3.3). ATS identifies untrustworthy people: ATS-Passenger (ATS-P) provides an automated review of inbound and outbound passengers that helps identify travelers at high-risk for terrorist links or smuggling while facilitating travel of low-risk passengers. ATS-Land will screen motor vehicles and passengers crossing U.S. land borders.

#### GOAL 4 - BALANCING LEGITIMATE TRADE AND TRAVEL WITH SECURITY

- The automated nature of ATS greatly increases the efficiency and effectiveness of the inspector's otherwise manual and labor-intensive work, and thereby helps facilitates the more efficient movement of legitimate cargo and people while safeguarding the border and the security of the United States. In this way, ATS-P facilitates international trade and travel while enhancing homeland and border security (Objective 4.5). ATS-P utilizes available technologies and processes to leverage resources and to conduct examinations of all high-risk passengers (Objective 4.2).

#### GOAL 5 – PROTECTING AMERICA AND ITS CITIZENS (STRENGTHEN OUR CONTROL OF THE UNITED STATES BORDER)

- As the principal border agency charged with ensuring that all goods entering the U.S. comply with our laws, CBP has a fundamental role to play in the national narcotics strategy, and its own strategy includes the dismantling and disrupting of drug smuggling organizations. To ensure the role is fulfilled, CBP has a clearly identified, highly visible and fully supported narcotics strategy. ATS helps CBP Officers and ATS users capitalize on the use of information and intelligence to identify and target CBP's enforcement response to drug trafficking, illegal immigration and other illegal activities (Objective 5.1). ATS deploys automation, systems, tools and other technologies that can be used to pre-screen and identify smugglers and smuggled merchandise to increase interdiction and apprehension effectiveness (Objective 5.2).

#### GOAL 6 - MODERNIZING AND MANAGEMENT

- ATS contributes to CBP's efforts to continue to build a strong, modern management infrastructure that assures the achievement of business results. ATS contributes to the modernizing and management of CBP's information, science, and technology infrastructure. ATS-P is an important component of CBP efforts to develop and deploy innovative and secure systems and advanced technologies to improve targeting and screening of goods, people and conveyances entering the United States (Objective 6.3). ATS-P contributes directly to improve risk targeting of people and vehicles entering the United States. ATS-P is an important component of a layered systems approach of integrated and advanced technologies to focus on high-risk and priority interdiction and enforcement issues. ATS-P also provides training and development to meet the most pressing needs of customers and stakeholders that is timely, responsive, high quality, and cost effective.

**Description of Item:**

CBP requests \$8M to expand the use of contract transportation and guard services for the southwest border. The additional requested transportation resources will be applied along the southwest border based on a current needs assessment. The primary use will be for secure transportation of detainees from the point of apprehension until the detainee is turned over to Immigration and Customs Enforcement custody. Agents and officers must perform the duties, if contracted services are not funded, removing agents and officers from primary missions of enforcement of the border. Guard and law enforcement custodial services will also be provided at processing centers or at medical facilities treating ill or injured detainees. Resources will be applied to activities between the ports of entry and at ports of entry by Border Patrol agents and CBP Officers.

**Justification:**

Every apprehension on the southwest border requires transportation, security, and law enforcement custodial services until the detainee is either repatriated, or transferred to another agency. In the absence of alternative resources, CBP Agents and Officers perform these functions. In August 2006, CBP established a contract to provide transportation with specially equipped buses and vans and guard service with certified transportation security officers. This contract frees up over 600,000 hours annually,

enabling agents and officers to resume their primary law enforcement and investigative duties.

Unfortunately, even with the existing contract in place, CBP Agents and Officers continue to spend many hours transporting and guarding detainees on the southwest border. The requested funds will expand transportation and guard services on the southwest border, making approximately 96,000 additional hours available for CBP agents and officers to perform their essential, primary law enforcement and investigative duties.

**Description of Item:**

CBP requests \$24 million for this initiative containing two primary components: a systems integration effort designed specifically to support the Agency intelligence function and an increase in the number of Agency intelligence officers to allow for a 24/7 intelligence watch.

1. CBP will develop and deploy an integrated suite of software tools and supporting databases (Analytical Framework for Intelligence – AFI) to compliment the recently reorganized CBP intelligence function. It builds on the existing Automated Targeting System (ATS) and the Targeting Framework (TF) but provides significantly enhanced functionality in support of CBP’s All Crimes/All Threats/All Hazards mission set.

The AFI will incorporate advanced analytical technique capability currently available to the Department of Defense and intelligence community agencies. It will provide consolidated access to multiple CBP, DHS and other databases that currently require separate and, in some cases, geographically distinct, systems access. This effort will also expand the ATS data warehouse into a CBP enterprise data warehouse function, providing significantly greater research capability for both intelligence officers and operational personnel.

The Homeland Security Data Network (HSDN), the classified information sharing systems backbone for CBP, will also be expanded to the field through this effort to

compliment development of field intelligence capability. This request also provides for incorporation of a multi-level security (MLS) capability for sharing data between classified and unclassified environments, and reliance on an HSPD-12 compliant “single sign-on” capability to facilitate information sharing. Initial funding to begin planning and design is requested for FY 2009.

2. This initiative will also allow for the stand-up of a 24x7 CBP National Intelligence Watch that is focused on supporting CBP field operations and providing situational awareness to CBP decision-makers. This will allow for a greater than 50 percent expansion in coverage hours for the intelligence watch, which in turn will allow for a significant increase in intelligence production and a significant decrease in risk to the agency by ensuring timely review of critical, time-sensitive intelligence information. The current contract for eight intelligence analyst positions to provide staffing for a five day a week, 12 hour a day, intelligence watch will be replaced by the government positions requested here. The intelligence watch will occupy existing space at CBP Headquarters in the Ronald Reagan Building. Funding for ten relocations is included. Additionally, there will be two GS-2210, information technology positions which will ensure the effective integration of the systems components of this request.

**Justification:**

The priority mission of CBP is homeland security. For the border agency charged with managing, securing and controlling the Nation’s border, that means the CBP priority mission is to prevent terrorists and terrorist weapons from entering the United States. In addition to this priority mission, CBP also protects America and its citizens by carrying out its traditional law enforcement missions that include enforcing immigration, drug smuggling, and other criminal violations. CBP’s mission set has expanded significantly since 9/11, but the resources devoted to intelligence have not kept pace. To effectively accomplish these important missions, CBP requires timely access to relevant intelligence reporting that can be utilized to drive effective operations.

In addition to our need to receive and act internally on intelligence 24-hours per day, 7 days a week, CBP has a responsibility to ensure that CBP-generated information of intelligence value to our mission partners in the Federal, state, local, and tribal communities is appropriately reported. The Homeland Security Act of 2002 and the Implementing Recommendations of the 9/11 Commission Act of 2007 focus on the need for DHS and its components to improve intelligence and information sharing, ensuring that information gathered during the course of normal DHS business is collected, analyzed, and disseminated as appropriate. Funding this initiative will allow CBP to meet this new analysis and reporting requirement.

The requested investment funding will be used for contract services to design, develop, and implement the capabilities of the AFI, and to acquire computer servers, data storage devices and software licenses. While the CBP receives base funding for ATS, this funding is dedicated to current ATS functions, which support 24x7 operational targeting of all incoming cargo and passengers into the US. In addition, \$5 million is requested in

this budget to implement targeting methodology improvements. Still, ATS funding and hardware/software platforms are not sufficient to provide the specially designed capabilities needed for the intelligence function. In particular, ATS (and other CBP systems) lack the ability to handle classified information, which is essential to intelligence analysis. Further, existing ATS capability will be built out to support a CBP enterprise data warehouse for analysis (ATS-DW) which is currently unavailable to CBP analysts. This funding will support the development of the ATS-DW which will serve as an integration platform for outside source information.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

One of the CBP Commissioner's top priorities is to ensure that CBP is an intelligence driven organization. Funding of this initiative, coupled with other ongoing and planned intelligence initiatives, will enable CBP to achieve this priority objective. The U.S. Government's continued emphasis on homeland security, and specifically the threat of terrorism, continues to increase the volume of intelligence reporting received by CBP. The stand-up of a 24x7 CBP National Intelligence Watch will ensure that this increasing volume of reporting will be analyzed, collated, and disseminated to CBP enforcement offices in a timely manner, allowing perishable intelligence to be analyzed on while it is most actionable. This will improve CBP's ability to secure our borders by allowing Officers and Agents in the field to work with the most current intelligence information available, regardless of the time at which the intelligence is received.

One of DHS's top priorities, as well as a priority of Congress, is to improve homeland security intelligence and information sharing throughout the Federal, state, local and tribal communities. CBP is in a unique position to leverage its more than 30,000 frontline officers and agents to gain information that can be used by all our mission partners to strengthen our nation's security. To make this information usable, it must be quickly recognized, analyzed and collated, and reported to our partner agencies. Funding this initiative will allow CBP to properly staff a 24x7 intelligence watch that will work with our field offices to ensure that CBP-unique information of intelligence value is quickly identified and reported.

By providing funding to hire appropriately skilled staff to work in a 24x7 intelligence watch, this initiative directly supports CBP Strategic Objective 1.1, "Improve the collection, use, analysis and dissemination of intelligence to target, identify, and prevent potential terrorists and terrorist weapons from entering the United States." It also directly supports CBP Strategic Objective 2.1, "Enhance the intelligence program, and improve intelligence-driven operations"; CBP Strategic Objective 5.1, "Capitalize on the use of information and intelligence to identify and target the CBP enforcement response to drug trafficking, illegal immigration and other illegal activities"; and DHS Strategic Objective 2.1, "Secure the borders against terrorists, means of terrorism, illegal drugs and violations of trade and immigration laws."

<sup>1</sup> In order to handle the cases that were transferred from ICE to CBP in FY 2007 and to promote the integrity of our workforce, Internal Affairs (IA) redirected approximately \$6.2 million to accelerate the Conduct & Integrity Program the end of FY 2007. IA was able to accomplish this by restricting the hiring and the operations of other key critical and essential IA divisions that will need to be promoted in the coming year.

**Description:**

CBP requests \$5.3 million to hire an additional 24 GS-1801 Investigators and 5 support positions to address internal affairs staffing needs. By FY 2009, CBP will have a workforce of over 54,000, with frontline personnel conducting a mission that is vulnerable to corruption. FY 2009 will also be the second year developing a permanent, full-time cadre of investigators that is responsible for investigating all serious non-criminal misconduct allegations and lesser administrative violations involving CBP employees; as well as criminal allegations not related to corruption. In addition to addressing reports of alleged misconduct in a timely manner, the 50 investigators and 8 support positions that were added in FY 2008 will also be responsible for participating in active partnerships with the Department of Homeland Security Office of Inspector General, Immigration and Customs Enforcement’s Office of Professional Responsibility (ICE-OPR) and other Federal, state and local law enforcement authorities to proactively develop sources of information and new investigative subjects.

**Justification:**

Previously, CBP remained largely dependent upon ICE/OPR to police its workforce. Factors such as competing investigative priorities, staffing shortages and budget

constraints resulted in a significant backlog of OPR cases undermining CBP's ability to fulfill its management responsibilities. With the resources acquired in FY 2008, CBP will be able to initiate or effect approximately 1,350 cases of which 150 cases will result in adverse action, 600 cases will result in disciplinary action and 600 cases will be found unsubstantiated.

In addition to the above existing case load, with an additional 24 GS-1801 investigators and 5 support positions in FY 2009, CBP will initiate 1300 new cases, of which 125-150 will result in adverse action, 300 will result in disciplinary action and 650 cases will be found unsubstantiated.

Prior to hiring its own internal affairs investigative cadre, CBP routinely received investigative reports from outside agencies that were over two years old. Now, over half of the alleged misconduct cases assigned to CBP Internal Affairs investigators are completed in 6 months to a year. This increased efficiency enhances CBP's ability to carry out operations and manage its workforce. The hiring of 24 more internal affairs investigators in FY 2009 will help CBP in its goal to complete misconduct investigations in 180 days or less and promote CBP/IA's efforts to work cooperatively and collaboratively with the DHS Office of Inspector General and other law enforcement authorities on priority corruption cases involving CBP employees. Active participation by CBP internal affairs personnel in on-going corruption investigations enables CBP to assist in the establishment of investigative priorities and address potential operational vulnerabilities that impact national security. CBP/IA's partnership efforts have already led to our agents detecting active corruption in the workplace.

#### **Impact on Performance (Relationship of Increase to Strategic Goals):**

The continued growth of an anti-corruption program ensures the identification and mitigation/elimination of vulnerabilities in the workforce. A critical element of responsibility is control. The establishment and ongoing implementation of an internal anti-corruption program is dependent upon the identification of investigative priorities, timetables and deadlines for misconduct cases. Investigations will continue to be completed in line with CBP priorities.

With the alignment of an investigative function within CBP, efficiencies will continue to be realized by conducting investigations in closer cooperation with the operational management of CBP. Creating and continuing with a strong anti-corruption program provides CBP management the visibility to address corruption and serious misconduct matters as they occur. Participation in the internal affairs process affords CBP management the opportunity to mitigate operational vulnerabilities thus reducing exposure and minimizing the risk of potential terrorist activity that might be facilitated by a corrupt employee.

Supports DHS Strategic Goal 2.b "Interior Enforcement" through promotion of workforce integrity.

This initiative supports the Commissioner's objectives to:

- Strengthen employee base and integrity assurance
- Implement a proactive anti-corruption investigative program within CBP
- Ensure that allegations are investigated thoroughly, objectively and timely by CBP investigators

To avoid duplication of effort and ensure the most effective, efficient and deployment of resources, IA will investigate serious non-criminal conduct using GS-1801, personnel. All other matters will be processed through and referred to the CBP IA Investigative Operations Division fact-finders program or CBP management for action as deemed appropriate.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and Expenses  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 12:**                      CBP’s Regulatory Program

DHS Strategic Goal(s) & Objective: 2 PREVENTION - Provide Legal Basis for CBP Initiatives designed to Secure the borders against terrorists, means of terrorism, illegal drugs and other illegal activity; 6 SERVICE - Provide Public Guidance and Direction to Facilitate Lawful Trade and Travel; and 7 ORGANIZATIONAL EXCELLENCE - Provide uniformity and efficiencies in regulations to promote unified DHS front line.

**Description of Item:**

CBP requests \$1 million to support CBP’s regulatory program. The requested funds will allow CBP to obtain an additional 7 attorneys, 2 economists, 2 paralegals and 1 mission support personnel. These personnel will ensure the efficient and legally-thorough drafting of new regulations; assist in the removal of obsolete and inconsistent regulations that may pre-date the Department’s creation; help issue guidance to the private sector on homeland security-related matters; and aid in the Department’s compliance with new Presidential mandates concerning legal review and processing of significant guidance documents issued by CBP.

**Justification:**

CBP Attorneys within Regulations and Rulings developed the first Advance Passenger Information System (APIS) Regulations in 2002 (with further revisions in 2005 and in 2007), the Trade Act of 2002 Advance Cargo information regulations in 2003, the Western Hemisphere Travel Initiative (WHTI) regulations (2006 and currently) requiring specific travel documents for persons arriving and leaving the U.S., and currently, the SAFE Port Act regulations to establish requirements for additional entry level data

elements for cargo shipped to the U.S. The steps necessary to satisfy these initiatives are legally complex and labor intensive and require extensive reviews by OMB for their economic impact. In addition, a variety of trusted traveler programs are being developed through Federal Register Notices and regulations e.g. (USPASS) prepared by Regulations and Rulings Attorneys. They also developed and must continue to develop the SORN and PIA for the new Automated Targeting System –Passenger module, *SBI<sub>net</sub>*, and for many other instruments required to support DHS border security initiatives and regulations.

As a consequence of all of these new laws, regulations, and the transition into the Department, all pre-existing regulations must be updated to reflect new requirements and reconciled to resolve conflicts and overlapping between legacy Customs Service and Immigration and Naturalization Service (INS) rules and procedures. Finally, the Administration's new requirements under recently issued Executive Order 13422 to identify all significant guidance documents issued will create an entirely new host of responsibilities for Regulatory Attorneys in CBP that did not previously exist.

In FY 2006, the structure of the Regulations and Rulings Attorneys was reorganized to help address these new requirements while meeting traditional customs responsibilities with existing staff. As border security measures have increased, Free Trade Agreements (FTA) also necessitating regulatory work products proliferated, and the SAFE Port Act of 2006 has required that attorneys be designated to work on FTA regulations.

In FY 2006-2007, the Border Security Regulations Branch within Regulations and Ruling had 33 projects and 6 staff attorneys and a supervisory attorney. Due to the complexity of WHTI-I and II and APIS, Border Security assigned 3 attorneys to work those projects full time. At the same time, the Trade and Commercial Regulations Branch had a minimum of 63 regulatory projects that included several time-consuming major Free Trade Agreement regulations, a noted priority under the SAFE Port Act.

At the present, CBP employs 2 economists to serve all of the agency's rulemaking needs. The economists conduct impact analyses on CBP's own regulatory projects, and coordinate and review the regulatory impact assessments relating to other DHS component initiatives. Additional economists will serve to alleviate CBP's concern with being able to respond to the Administration in a timely fashion on its highest priority regulatory projects.

### **Impact on Performance (Relationship of Increase to Strategic Goals):**

Enhancement of CBP's Regulatory Program will provide key support for the following DHS and CBP Strategic Goals.

DHS GOAL 2 – PREVENTION/ CBP GOAL 1: PREVENTING TERRORISM AT PORTS OF ENTRY

- The Regulations, other Federal Register Notices (described above) and Interpretive Guidance developed by CBP Attorneys in Regulations and Rulings, Office of International Trade, establish specific legal foundation for many CBP border security initiatives. To further support legal and operational implements of anti-terrorism, CBP Attorneys within Regulations and Rulings must establish civil enforcement guidelines relating to these initiatives, such as guidelines for the assessment and mitigation of penalties relating to new advance information requirements for Trade Act-cargo security, APIS violations, Maritime Transportation Security Act (MTSA) requirements and now the new SAFE Port Act requirements. These instruments in addition to case by case rulings and decisions on these laws serve as guidance documents for the private sector on border security requirements.
- With additional staffing of attorneys, economists and paralegals, a more organized process for developing, reviewing and managing these high priority border security projects can be implemented and allow for faster feedback to the department on the necessary pass-backs relating to major border security regulatory projects. CBP would be able to develop more quickly, without compromising quality, Regulations and Federal Register Notices that establish legal framework for new Border Security Initiatives because more than a single attorney can be regularly assigned to major rulemaking projects such as APIS, WHTI without falling behind in other essential rulemaking projects.

**DHS GOAL 6 SERVICE/ CBP GOAL 3 UNIFYING AS ONE BORDER AGENCY and  
CBP GOAL 4 FACILITATING LEGITIMATE TRADE AND TRAVEL**

- With an enhanced Regulatory Program, CBP will be able to provide better service and efficiencies in the administrative process for regulatory projects and issuance of decisions, rulings and other guidance documents to the private sector to assist in their meeting the new border security requirements.
- First, as mentioned above, with more staffing all regulatory projects can be processed faster by the office as a whole. Through a pre-existing tracking system under which the work of all attorneys on any given project can be accounted, reports on the status of these major projects can be readily obtained at anytime during the process. Also, with additional staffing, comprehensive rulemaking projects can be initiated in the regulations branches to remove and update legacy Customs Service and INS agency regulations currently codified in titles 19 and 8 of the Code of Federal Regulations. This will provide legal tools to support unified methods and consistencies in administrative procedures for processing of goods and people at our front lines.
- Finally, with additional staffing, CBP can improve the timeline in providing legal guidance (rulings and decisions) to the private sector on specific issues emanating from the application of the new border security laws and regulations to specific facts and circumstances.

DHS GOAL 7 ORGANIZATIONAL EXCELLENCE/ CBP GOAL 6 MODERNIZING AND MANAGING

- With additional regulatory attorney staffing CBP will be able to establish a comprehensive process for assisting the agency in meeting the new requirements under OMB's Good Guidance Bulletin (E.O. 13422) that requires a listing of significant guidance documents, reasons for their issuance, procedures for issuance or reasons for exemption from the OMB procedures. While legacy Customs Service guidance documents may be exempt from these new procedures under a Treasury waiver, none of legacy INS documents, such as guidance relating to title 8 regulatory requirements will be covered by this exemption. This is because even before today's heightened terrorist alert environment, immigration related regulations and notices were generally considered by OMB as "significant". As a result CBP expects to have to comply with this new requirement for all guidance documents relating to title 8 regulatory requirements.

## V. Exhibits and Other Supporting Material

### A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of laws relating to border security, immigration, customs, and agricultural inspections and regulatory activities related to plant and animal imports; purchase and lease of up to ~~6,300~~[4,500] (~~2,300~~~~3,300~~ for replacement only) police-type vehicles; and contracting with individuals for personal services abroad; [~~\$6,802,560,000~~]~~\$7,309,354,000~~, of which [~~\$3,093,000~~]~~\$3,154,000~~ shall be derived from the Harbor Maintenance Trust Fund for administrative expenses related to the collection of the Harbor Maintenance Fee pursuant to section 9505(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 9505(c)(3)) and notwithstanding section 1511(e)(1) of the Homeland Security Act of 2002 (6 U.S.C. 551(e)(1)); of which not to exceed \$45,000 shall be for official reception and representation expenses; of which not less than [~~\$226,740,000~~]~~\$254,279,000~~ shall be for Air and Marine Operations; [of which \$13,000,000 shall be used to procure commercially available technology in order to expand and improve the risk-based approach of the Department of Homeland Security to target and inspect cargo containers under the Secure Freight Initiative and the Global Trade Exchange; of which such sums as become available in the Customs User Fee Account, except sums subject to section 13031(f)(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(f)(3)), shall be derived from that account; ] of which not to exceed \$150,000 shall be available for payment for rental space in connection with preclearance operations; and of which not to exceed \$1,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security: Provided, [That of the amount provided under this heading, \$323,000,000 is designated as described in section 5 (in the matter preceding division A of this consolidated Act): Provided further,] That for fiscal year [~~2008~~]~~2009~~, the overtime limitation prescribed in section 5(c)(1) of the Act of February 13, 1911 (19 U.S.C. 267(c)(1)) shall be \$35,000; and notwithstanding any other provision of law, none of the funds appropriated by this Act may be available to compensate any employee of U.S. Customs and Border Protection for overtime, from whatever source, in an amount that exceeds such limitation, except in individual cases determined by the Secretary of Homeland Security, or the designee of the Secretary, to be necessary for national security purposes, to prevent excessive costs, or in cases of immigration emergencies: [Provided further, That of the amount made available under this heading, \$202,816,000 shall remain available until September 30, 2009, to support software development, equipment, contract services, and the implementation of inbound lanes and modification to vehicle primary processing lanes at ports of entry; of which \$100,000 is to promote information and education exchange with nations friendly to the United States in order to promote sharing of best practices and technologies relating to homeland security, as authorized by section 879 of Public Law 107-296; and of which \$75,000,000 may not be obligated until the Committees on Appropriations of the Senate and the House of Representatives receive a report not later than 120 days after the date of enactment of this Act on the preliminary results of testing of pilots at ports of entry used to develop and implement the plan required by section 7209(b)(1) of the Intelligence Reform and Terrorism Prevention Act of 2004 (Public Law 108-458; 8 U.S.C. 1185

note), which includes the following information: (1) infrastructure and staffing required, with associated costs, by port of entry; (2) updated milestones for plan implementation; (3) a detailed explanation of how requirements of such section have been satisfied; (4) confirmation that a vicinity-read radio frequency identification card has been adequately tested to ensure operational success; and (5) a description of steps taken to ensure the integrity of privacy safeguards]. (Department of Homeland Security Appropriations Act, 2008.)

### Headquarters Management and Administration

Headquarters Management and Administrative provides critical policy and operational direction, mission support, including equipment, training, and technical expertise to CBP front-line personnel. This program is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

### Summary Justification and Explanation of Changes

|                              | 2007             | 2008             | 2009             | 2008 to 2009    |
|------------------------------|------------------|------------------|------------------|-----------------|
|                              | Actual           | Enacted          | Request          | Change          |
| <b>Salaries and Benefits</b> | <b>\$398,703</b> | <b>\$380,078</b> | <b>\$401,673</b> | <b>\$21,595</b> |

Salaries and Benefits includes costs for 3,767 FTEs. The FY 2009 request includes an increase of \$8,607,000 for pay inflation, a increase of \$2,851,000 for pay annualization, a increase of \$3,381,000 for Integrity Oversight annualization, program increases of \$6,629,000, a annualization increase of \$3,002,000 for the FY 2007 Supplemental and a decrease of \$2,874,000 for non-recurring expenses.

|               | 2007            | 2008            | 2009            | 2008 to 2009 |
|---------------|-----------------|-----------------|-----------------|--------------|
|               | Actual          | Enacted         | Request         | Change       |
| <b>Travel</b> | <b>\$27,334</b> | <b>\$25,755</b> | <b>\$25,821</b> | <b>\$66</b>  |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2009 request includes \$67,000 in annualization from the FY 2007 Supplemental.

|                                 | 2007           | 2008           | 2009           | 2008 to 2009 |

**Inspections, Trade & Travel at the POE's**

The purpose of Inspections, Trade and Travel Facilitation at Ports of Entry (POEs) is to facilitate the flow of legitimate travel and trade across U.S. borders, while ensuring that threats to the United States are not allowed entry, using technology, intelligence and risk information, targeting, and international cooperation in the screening of entering international cargo and travelers and departing export cargo. This program reduces the potential of terrorists, instruments of terror, and contraband from entering our country, while facilitating the legal flow of people and trade by deploying CBP Officers, Agricultural Specialists, and Imports Specialists to the ports of entry. The goal of this program is to improve compliance with trade regulations and other mandatory import/export guidance while increasing the security of the United States.

**Summary Justification and Explanation of Changes**

|                              | 2007               | 2008               | 2009               | 2008 to 2009    |

**International Cargo Screening**

International Cargo Screening (ICS), which includes CBP's Container Security Initiative (CSI) and Secure Freight Initiative (SFI), enhance the security of maritime containerized shipping from exploitation by terrorists. ICS's goal is three-fold: (1) to expand operations to new critical international seaports; (2) to secure and improve operations at existing ports; and (3) to encourage global efforts to enhance maritime container security through capacity building. Working with foreign administrations, CSI is designed to achieve a more secure maritime trade environment while ensuring the need for efficiency in global commerce. The three core elements of the program are: (1) establishing security criteria and identify high-risk containers; (2) scanning those containers identified as high-risk prior to arrival at U.S. ports; (3) using technology to quickly scan high-risk containers.

The SFI builds on the operational pillars of the DHS Container Security Initiative (CSI) and the Department of Energy Mega ports initiative to maximize radiological and nuclear screening of U.S. bound maritime containers in foreign ports of departure. It merges data from a next generation risk assessment screening program and an overseas integrated detection network with existing and new information regarding maritime containers transiting through the supply chain in order to create detailed records for CBP's risk management process to target maritime containers that pose a threat.

**Summary Justification and Explanation of Changes**

**Other International Programs**

The goal of Other International Programs is to extend the U.S. zone of security beyond US Borders by promoting international border security and global standards. In this arena, CBP implements programs and initiatives that support the U.S. Government's objectives in anti-terrorism, border security, non-proliferation, export controls, immigration and capacity building. This program's efforts foster and facilitate legitimate international trade, increase compliance, build alliances to combat trans-national crime, reduce corruption, strengthen border controls, promote the rule of law and enhance economic stability throughout the world. This is accomplished through the development and maintenance of collaborative relations with foreign governments, the development of international strategies, and representation of CBP positions in various international forums, international technical assistance and training, and the negotiation of international agreements.

In FY 2009, CBP will pursue international partnerships to share best practices, exchange information and promote the facilitation of secure travel and trade; actively support implementation of the World Customs Organization framework; and implement initiatives to support an international immigration strategy to identify and interdict high risk travelers.

**Summary Justification and Explanation of Changes**

|                              | 2007           | 2008           | 2009           | 2008 to 2009 |

**C-TPAT (formerly C-TPAT/FAST/NEXUS/SENTRI)**

The Customs-Trade Partnership Against Terrorism (C-TPAT) is a partnership between the Federal government and private industry. It is an effort that CBP has undertaken with the business community to secure the supply chain. The goal of C-TPAT is to develop and maintain a secure supply chain, from factory floor to port of entry, which enables CBP to facilitate trade and ensure safe and secure borders. C-TPAT is designed to use and enhance the security processes and procedures currently employed by the trade community and ensure that international shipments are not compromised nor diverted by terrorists or their accomplices.

**FAST/NEXUS/SENTRI**

The Free and Secure Trade (FAST) program is the cargo equivalent to facilitative programs in the passenger environment such as SENTRI and NEXUS. Importers, commercial carriers, truck drivers, and manufacturers (for Southern Border FAST), who enroll in FAST and meet agreed upon security criteria, including participation in the C-TPAT program, are entitled to expedited clearance at the port of entry. Using electronic data transmission and transponder technology, CBP expedites clearance of approved trade participants. The FAST program fosters more secure supply chains and enables CBP to focus security efforts and inspections where they are needed most – on high-risk commerce while making sure legitimate, low-risk commerce is not unnecessarily delayed.

**Inspection and Detection Technology**

As trade increases, CBP's reliance on Non-Intrusive Inspection (NII) technology to secure the borders becomes increasingly critical. In conjunction with CBP's many other initiatives (C-TPAT, Automated Targeting System (ATS), National Targeting Center (NTC), Container Security Initiative (CSI), etc.), NII allows us to work smarter. An adversary can defeat any single sensor or device, and therefore, CBP does not rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood that a nuclear or radiological weapon or weapons grade material will be detected. In addition, CBP uses NII technology to detect and interdict narcotics, currency, and other contraband secreted in large containers and commercial shipments.

NII technology has been the cornerstone of CBP's multi-layered strategy. Technologies deployed to our nation's land, sea, and airports of entry include large-scale X-ray and gamma-imaging systems, as well as a variety of portable and handheld technologies, to include our recent focus on radiation detection technology. NII technologies are viewed as force multipliers that enable us to screen or examine a larger portion of the stream of commercial traffic while facilitating the flow of legitimate trade, cargo and passengers.

**Summary Justification and Explanation of Changes**

|                              | 2007           | 2008       | 2009       | 2008 to 2009 |

**Systems for Targeting**

At the core of CBP's ability to achieve its critical border security objectives and maintain the flow of lawful commerce is CBP's ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law abiding travelers and commerce to continue to their destination without unnecessary delay. Legislation and regulatory action, such as the Trade Act of 2002 and the Safe Port Act, respectively, have made it mandatory to provide advance information about passengers and goods arriving in the U.S. CBP uses computer technology and rule-based applications to analyze the data provided on passengers and shipments arriving in the U.S. CBP applies its targeting methods against the data to determine which passengers or shipments need to be segregated for a closer look and possibly inspection.

The main platform CBP uses to analyze arriving passenger and shipment data is the Automated Targeting System (ATS). ATS is a web-based enforcement and decision support tool that is the cornerstone for all CBPs targeting efforts. ATS incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. In this way, ATS allows CBP officers to focus their efforts on cargo shipments and passengers that most warrant further attention. ATS standardizes names, addresses, ship names, and similar data so these data elements can be more easily associated with other business data to form a more complete picture of a passenger, import, or export in context with previous behavior of the parties involved. Every passenger and shipment processed through ATS is subjected to a real-time risk evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering.

**National Targeting Center**

The priority mission of the U.S. Customs and Border Protection's National Targeting Center (NTC) is to provide around-the-clock tactical targeting and analytical research support for CBP anti-terrorism efforts. NTC is primarily staffed by CBP Officers and Field Analysis Specialists who are experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments. The NTC staff develops tactical targets from raw intelligence in support of the CBP mission to detect and prevent terrorists and terrorist weapons from entering the United States. NTC supports all CBP field elements, including Container Security Initiative personnel stationed in countries throughout the world, with additional research assets for passenger and cargo examinations.

**Summary Justification and Explanation of Changes**

|                              | 2007            | 2008            | 2009            | 2008 to 2009 |
|------------------------------|-----------------|-----------------|-----------------|--------------|
|                              | Actual          | Enacted         | Request         | Change       |
| <b>Salaries and Benefits</b> | <b>\$14,722</b> | <b>\$15,336</b> | <b>\$15,655</b> | <b>\$319</b> |

Salaries and Benefits includes costs for 131 FTEs. The FY 2009 request includes increases of \$115,000 for pay annualization, a increase of \$345,000 for pay inflation, and a decrease of \$139,000 in non recurring expenses.

|               | 2007           | 2008           | 2009           | 2008 to 2009 |

**Training at the Ports of Entry**

The Office of Training and Development exists to develop and deliver basic, mid, and advanced level training programs for all CBP employees, especially mission critical occupations (e.g., CBP Officers, Agricultural Specialists, Imports Specialists, and Entry Specialists) at the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of combating terrorism, improving border security, improving inspection and control, and facilitating trade.

**Border Security and Control Between the POEs**

The Office of Border Patrol (OBP) has been delegated with the authority and responsibility to deliver the Executive Branch Program for "Border Security and Control between the Ports of Entry." The primary purpose of this program is to prevent the entry of terrorists and their instruments of terror, illegal immigrants, and contraband, while facilitating the legitimate flow of people, goods, and services on which the economy depends. The program will be accomplished through the judicious use of resources including personnel, surveillance technology, communications, and transportation, facilities, and mission support activities.

Border Patrol agents deter uncontrolled entry into the interior of the U.S. by: the rapid detection, interception, and apprehension of illegal entrants at or near the border; interdicting or deterring illegal aliens, drug smugglers, potential terrorists and criminals from attempting illegal entry between ports-of-entry; and causing persons seeking admission into the U.S. to present themselves at designated ports for inspection.

Strategic issues and challenges evolve around integrating unique and broader enforcement authorities working to uncover systemic vulnerabilities that pose a threat to the Nation and its economy and work to eliminate vulnerabilities as quickly as possible. Through an array of investigative processes in the areas of smuggling, finance and national security, OI is challenged to identify the people, materials, & funding essential to sustaining terrorist threats and criminal enterprises, and to disrupt and dismantle their operations.

The requested amount will help address Investigations' strategic challenges of disrupting terrorist threats and preventing potential terrorists and immigration violators from entering the country. More effective immigration enforcement will contribute to enhanced national security as well as greater deterrence.

**Training between the Ports of Entry**

The Office of Training and Development exists to provide core operational training for Border Patrol Agents whose primary responsibility lies between the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of safeguarding the borders of the United States. This training ensures that CBP is able to rapidly deploy a highly motivated, well-trained workforce, both on a temporary and permanent basis, who can quickly respond to potential terrorist threats, shifts in smuggling patterns and other national security threats.

**Air and Marine Operations - Salaries**

The purpose of Air and Marine Salaries is to apply the skills and expertise of CBP air and marine personnel to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States. Having aircraft and vessels along the borders reduces the quantity of drugs entering the U.S. and minimizes threat levels. The goal of this program is to deny the use of air, land and coastal waters for conducting acts of terrorism and other illegal activities against the United States.

**Summary Justification and Explanation of Changes**

|                              | 2007             | 2008             | 2009             | 2008 to 2009    |

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U.S. Customs and Border Protection Border Security, Fencing, Infrastructure, and Technology

### I. Appropriation Overview

#### A. Mission Statement:

This appropriation provides continued funding for the SBI Program offices and the Program Executive Office (PEO), the component of the Secure Border Initiative (SBI) tasked with developing and installing a technology and tactical infrastructure solution enabling a more effective and efficient method for controlling border security. The initial focus of *SBI*net technology and tactical infrastructure has been on the southwest land border sectors and between the official ports of entry where there are serious vulnerabilities to border security. This request continues securing the southwest border. Further, *SBI*net is continuing efforts to build a common operating picture (COP) of the border environment within a command center environment, which will provide uniform data to all Department of Homeland Security (DHS) agencies and be interoperable with stakeholders external to DHS. Customs and Border Protection (CBP) is the lead agency within DHS for the development and deployment of *SBI*net technology and tactical infrastructure to secure America's borders.

Secretary Chertoff created SBI to bring clarity of mission, effective coordination of DHS assets, and greater accountability to the work of DHS in securing the Nation's borders. It also has galvanized DHS action in support one of the President's core objectives, immigration reform. This plan focuses on DHS's efforts to gain effective control of the borders, initially at the southwest land border.

Pursuit of the Presidential objectives will allow us to build upon progress to date in gaining control of the border. This work will include: strong border security enhancements that incorporate new technology, security infrastructure, and additional personnel to identify and interdict illegal entries.

The challenge of securing America's land, air, and sea borders involves numerous interrelated objectives and the ongoing work of multiple DHS components. It also entails close coordination with other Federal Departments, foreign governments, and State, local, tribal, and private sector partners. Four operating components at DHS have especially central roles regarding border security: CBP, Immigration and Customs Enforcement (ICE), U.S. Citizenship and Immigration Services (USCIS), and the United States Coast Guard (USCG). Other policy, intelligence, and support organizations within DHS also assist with this broader mission.

SBI has made DHS a more effective, matrix-managed organization and less of a bureaucracy defined by rigid stove pipes. This program coordinates and strengthens performance at DHS in meeting our border security obligations. It also reinforces a sense of urgency about the mission of border security, imposes a greater degree of accountability, and will promote innovation.

The SBI Program Executive Office (PEO) and programs (*SBI*net Systems Program Office (SPO) and Tactical Infrastructure Program Manager) have been working as a focal point for coordination within the Department on border enforcement efforts. The SBI PEO office manages comprehensive new investments regarding technology, response capabilities, and infrastructure at the border through the

SBI*net* procurement. The program offices are staffed with Government professionals in all program areas, supported by contracted staff necessary to accomplish the mission.

## **B. Budget Activities**

- **Development and Deployment:** The SBI*net* and SBI Tactical Infrastructure programs, working in conjunction with Border Patrol, Field Operations, Intelligence, and Information Technology offices, is tasked to identify and provide information on developing and installing a technology and tactical infrastructure solution for border control to DHS stakeholders. During FY 2007 and FY 2008, the SBI program has made significant advances towards providing a solution towards the goal of border security. The program has developed and implemented projects; Project 28 (Tucson sector near Sasabe); FenceLab (working with Sandia National Lab); Texas Mobile System (eastern area of El Paso sector); and the Barry M. Goldwater Range (BMGR) (in the Yuma Sector), PF 225 and VF 300, the fence and vehicle barrier projects scheduled for completion by the end of calendar year 2008. These projects have provided valuable lessons which will be applied to other SBI*net* plans, allowing for sound managerial decisions which resulted in highly efficient, lower cost solutions for the government.

Within SBI*net*, the initial development and deployment of the common operating picture (COP) is ongoing. The COP will provide uniform data to all DHS agencies and be interoperable with stakeholders external to DHS. COP will enable users to: make sound tactical, operational and strategic decisions; quickly inform CBP and other DHS components of strategic implications of mission success; rapidly exchange strategic, operational, and tactical information with supporting commands and interagency organizations; effectively plan, execute, and evaluate multiple mission events; and effectively interface with DHS partners to satisfy mission requirements.

SBI*net* Tactical Infrastructure program, working with CBP Asset Management, Border Patrol, and the Army Corps of Engineers and contractors, is completing 370 miles of fence and 300 miles of vehicle barriers along the southwest border sectors by the end of calendar year 2008. This task provided physical infrastructure to mostly urban areas along the southwest border, giving Border Patrol flexibility to adjust their focus to other areas of need. Along with the building of the infrastructure, SBI*net* is implementing technological and surveillance solutions in portions of Tucson, Yuma, and El Paso sectors on the southwest border. This involves the designing, systems engineering, and various testing of the solution prior to installation in the sectors.

- **Operations and Maintenance:** Included in the funding is the operational support required by the SBI*net* technology and tactical infrastructure projects, inclusive of Integrated Logistics Support and legacy systems integration and support. This support includes the wireless, and satellite communication usage charges, the COP operations center, manning of a SBI*net* technology systems Customer Support Help Desk, and SBI*net* IT Systems Support,. Operations and Maintenance funding is requested to begin supporting the constructed infrastructure and implemented technological solutions which were funded in FY 2007 and in FY 2008.
- **Program Management:** Covers the personnel and work related to the planning, organizing, coordinating, authorizing, and controlling of the program to meet technical, quality, cost, and

schedule requirements over the period of the contract. Program Management includes the areas of business management, supplier management and procurement, relocation expenses, security, regulatory management (environmental, real estate, and communications spectrum), and quality and mission assurance.

**C. Budget Request Summary:**

CBP requests 200 (FTP) full time positions, 185 FTE and \$775,000,000 for FY 2009. Excluding emergency funding provided in P.L. 110-161, the total adjustments-to-base is an increase of \$325,390,000. Program increases include 30 positions and \$277,610,000 to:

Continue efforts to develop and deploy a technology and tactical infrastructure border security system solution. Additional useful segments of technology and tactical infrastructure are required along the border. FY 2007 and FY 2008 funding provided fencing, barriers, and technological solutions in some of the southwestern border sectors. FY 2009 funding will enable SBInet to continue the technological, surveillance and tactical infrastructure projects. Along with the SBInet solution, the SBInet team will focus on providing the COP to southwest border sectors, enabling the Border Patrol (BP) agents to have a more complete operational picture across the southern border. Some additional tactical infrastructure (fence, barriers, lights, roads) will be completed along the border further assisting the BP agents in operation. Funding will be used to administer the SBI PEO, SBInet Tactical Infrastructure PM and the SBInet SPO which is responsible for the work related to the planning, organizing, coordinating, authorizing, and controlling of the SBInet solutions to meet technical, quality, cost, and schedule requirements over the period of the contract.

\*The above table includes emergency funding of \$1,053 million provided in P.L. 110-161. CBP requests \$275 million for development and deployment. Excluding emergency funds provided, the increase of \$240.0 million over FY 2008 is to continue providing tactical infrastructure, technological and surveillance packages to additional southwest border sectors.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

##### **Development and Deployment**

*SBI*net (technology and tactical infrastructure) is the component of the Secure Border initiative (SBI) that is developing and installing the technology and tactical infrastructure solution that will result in effective control of the U.S. borders with Mexico and Canada. *SBI*net will implement the optimal mix of proven current and next generation technologies and processes that will detect entries when they occur; identify what the entries are; and classify their levels of threat. When fully implemented, this system of systems will improve agent ability to rapidly and effectively respond to illegal activities and help DHS manage, control, and secure the border. *SBI*net will serve as a force multiplier, and augment interconnectivity with other agencies responsible for public safety and counter-terrorism. *SBI*net will initially focus on securing the southwest border where the most serious vulnerabilities exist.

In FY 2007, *SBI*net initiated various projects attempting to provide a lower cost, higher deterrence physical barrier system to meet the goals of the DHS. In this effort *SBI*net worked on a number of projects: Project 28, a Proof of Concept technical solution covering 28 miles of the Tucson Sector border (Sasabe area); Texas Mobile System, a 30 mile section of El Paso Sector (Texas side); Fence Lab, a development project working in conjunction with Sandia National Laboratory looking at various types of physical barriers/fences; and the Barry M. Goldwater Range (BMGR) in the Yuma Sector, a 34 mile initial project securing the range using a bollard and fence combination for effectiveness. *SBI*net initiated the first increment of the CBP common operating picture (COP) of the border environment, within a command center environment, that provided integrated situational awareness information to enforcement personnel, to all DHS agencies, and interoperability with stakeholders

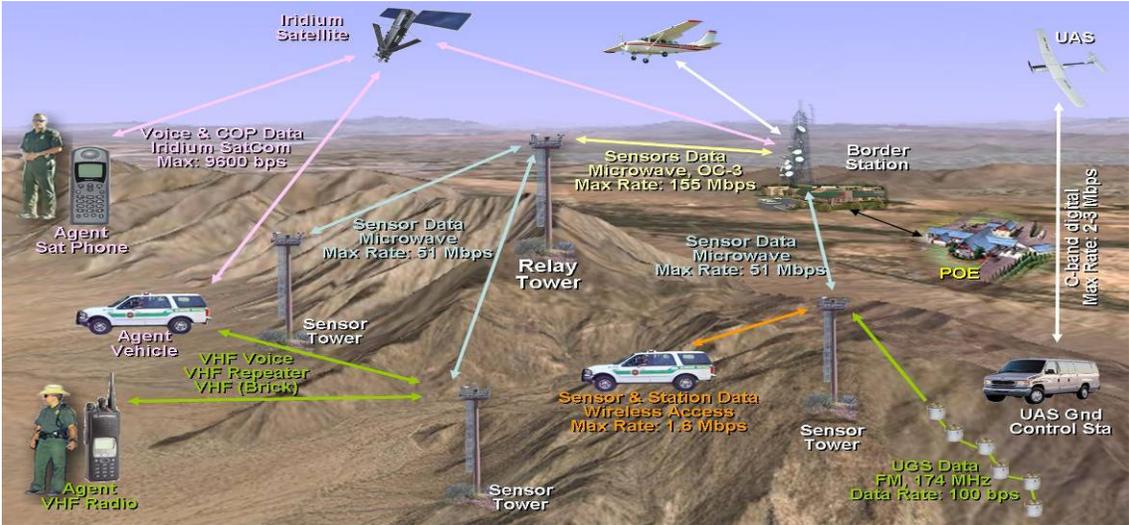

external to DHS. Also, with the balance available from FY 2007 funds and funding received in FY 2008, a team comprised of SBI Tactical Infrastructure PM, CBP Asset Management, Army Corps of Engineers, Border Patrol and commercial contractors worked on fencing projects, with the goal of completing 370 miles of fence built by the end of December, 2008.

FY 2008 funding will be used to continue efforts towards completing the 370 miles of fencing and 300 miles of vehicle fence (barriers) and technology towers and ground sensors. Funding was used to provide required regulatory, communications and operations work on potential future environmental issues, such as environmental assessments, real estate issues, permits, etc., laying the groundwork for the upcoming projects. The Common Operating Picture is being developed and deployed in southwest border sectors. Once completed on the southwest border, CBP agents in these sectors will have access to vital tactical information occurring on the Southern border. Real-time situational awareness is a key factor of the overall solution for deterring, identifying and apprehending illegal traffic, as well as greatly enhancing agent safety. A major part of this COP technology will be the introduction of satellite telephones, as well as computer technology installed in the agent's vehicles.

For FY 2009, the focus will be on providing tactical infrastructure, technological and surveillance packages to additional southwest border sectors. Also, some funding will allow for systems engineering and designing for additional southwest border sectors. Funding will allow modest continued expansion of the Common Operating Picture for the southwest border sectors. Requested funding will also initiate actions to begin to replace existing Border Patrol agent hand-held tactical communication with upgraded digital versions. This technology infusion will facilitate enhanced horizontal integration of information among agents as well as a vertical flow of information up and down the chain of command. With FY 2009 funds, some additional infrastructure will be built in southwest border sectors based on Border Patrol operational requirements for fence, barriers, roads and lighting.

Figure 1 presents a conceptual view of the types of technologies that may be deployed in areas where the vanishing point provides Agents with more time to respond to detected illegal entries than in heavily populated areas or those in proximity to major roadways. Figure 2 presents views of bollard and pedestrian fence along the border.

| <b>2009 Current Services</b> | ...         | ...        | <b>410,000</b> |
| 2009 Program Change          | ...         | ...        | 0              |
| <b>2009 Request</b>          | ...         | ...        | <b>410,000</b> |
| Total Change 2008-2009       | ...         | ...        | 337,000        |

CBP requests \$410 million for Operations and Maintenance.

- Increase of \$337 million above the FY 2008 enacted appropriation for items purchased in FY 2007 and FY 2008 as well as satellite communications usage fees.

**Operations and Maintenance**

SBInet operations and maintenance funds are required to support sensors, cameras and tactical infrastructure purchased in the prior year(s), wireless communications, operations and maintenance of new SBInet technology, and operations and maintenance for 370 miles of fence and 300 miles of vehicle fence (barriers) tactical infrastructure required for border control. This includes tactical infrastructure (vehicle barriers, fences, port of entry barriers, lights, and roads), power and data infrastructure, equipment supporting checkpoints, and necessary COP-related structures, a Network Operations Center and Security Operations Center, internal customer support for the systems, and IT systems support. All activities and processes require funding to support and maintain the SBI solution, including maintenance management, system support analysis, call center operations, asset management, critical property, spare parts storage, management and inventory records, field services, maintenance, overhaul, and training.

Recurring funding is required for operations and maintenance of the prime mission products acquired with previous acquisition funding and legacy equipment incorporated into the SBI program:

- Operations and maintenance for field agent systems which involve the communication and COP-related components deployed to the field with the agent or in the agent’s vehicle.
- Operation and maintenance of physical infrastructure that has been built through FY 2007 and FY 2008. The completion of the 370 miles of fence, 300 miles of vehicle barriers and 70 towers of technology and surveillance requires regular maintenance intervals and maintenance and repairs.
- Operations and maintenance for surveillance and detection systems for improved identification capabilities across all border environments including, new cameras, sensors, and agent surveillance tools.
- Operations and maintenance for command, control, and communications systems which will include all work associated with providing the COP, case processing, intelligence systems and applications, wireless communications, and IT.
- Operation and maintenance of mobile response platforms including sensor and wireless communications upgrades for manned aircraft, unmanned surveillance aircraft, water vehicles, and rapid response vehicles and mobile radar units.

| Total Change 2008-2009       | 30          | 15         | 26,000        |

CBP requests \$90 million for Program Management. This request is an increase of \$26 million above FY 2008.

- Annualization of \$23.39 million to be properly staffed to provide government management and oversight of the program, field offices, and manage contracts.
- Program enhancement of \$2.610 million to fund 30 additional program management positions.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The SBI Programs are managed by the *SBI*net Systems Program Office (SPO) and the Tactical Infrastructure Program Manager, who report to the CBP SBI PEO. The programs are organized in a line/matrix fashion with six line and four staff directorates reporting to the Program Managers. This organizational structure allows for the concentration of subject matter expertise into appropriate directorates, creating a resource pool immediately available to staff Integrated Project Teams and execute projects under the SBI Programs.

SBI efforts will be and are executed through a series of task orders. Each task order will be managed by a qualified Project Manager and a Contracting Officer Technical Representative (COTR). The Program and Project Managers have cost, schedule and performance accountability for their tasks and report directly to the Director, Projects. The project control division maintains earned value monitoring and oversight of the task orders. Contracted support has been procured from various companies building a knowledgeable team with experience in required fields.

For FY 2009, the PEO, TI PM and *SBI*net SPO require staffing with 200 Government employees (30 additional over 2008) and some additional contracted non-supervisory contractors. In FY 2009, with the emphasis on progress in the southwest border and planning in the northern sectors, teams of people will be working on the various mix of technology and tactical infrastructure to best secure the border.

#### 1. Change/ Initiative 1: SBI<sub>net</sub> Development and Deployment

**1.a. Description:** Additional funding in the amount of \$275 million is requested to develop and deploy the Secure Border Initiative program technology and tactical infrastructure. Additional resources are required for the design, deployment, and integration of surveillance and sensing platforms and detection technologies and to fund tactical infrastructure requirements.

**1.b. Justification:** Achieving effective control of the border requires the optimum mix of technology and infrastructure, as well as response assets and personnel, which will provide maximum tactical advantage in each unique border sector environment. Prioritized development and deployment of the appropriate mix of technology and infrastructure (ie: roads, fence, lighting, barriers, sensors, and mobile and fixed towers etc.) will ensure resources are used optimally to secure the border. Because the SBI<sub>net</sub> components are inter-dependent, every component is vital to the overall system's success. A system with the technological ability to predict, detect, identify, and survey illegal entries and criminal activity, but without the human capability for a rapid response or interdiction cannot complete the law enforcement mission. Conversely, law enforcement personnel with inadequate intelligence, inadequate physical and technological infrastructure to provide situational awareness, or equipment necessary to conduct enforcement activities are much less likely to be effective in today's dynamic border enforcement environment. SBI<sub>net</sub> will integrate multiple state of the art systems and traditional security infrastructure into a single comprehensive border security suite. When deployed, SBI<sub>net</sub> will provide an increased enforcement response capability for BP agents, and augment interconnectivity with other agencies responsible for public safety and security.

Further, achieving effective control of the border requires the capability to detect entries when they occur, identify and classify the entry, and provide situational awareness and a common operating picture to multiple law enforcement agencies. Existing border monitoring technologies are limited and are not integrated with other law enforcement systems, do not maximize capability and range of detection (air, land, river/lake), and provide limited capabilities to agents in the field. Although various technologies have been fielded to address mission needs, until now, there has been no comprehensive approach to address the entire range of threats posed. *SBI*net addresses these deficiencies by developing and deploying the proposed solutions that best support the full range of mission requirements. The *SBI*net solution will integrate multiple state-of-the-art systems and traditional security infrastructure into one comprehensive border security suite for DHS and CBP.

*SBI*net technology will implement the optimal mix of technologies and processes that will detect entries when they occur; identify what the entries are; and classify their levels of threat (who they are, what they are doing, how many, etc.). When implemented, this strategy will improve agent and officer ability to rapidly respond to illegal activities and help DHS manage, control, and secure the border. *SBI*net technology will provide increased enforcement capability for CBP agents, officers, and officials, and augment interconnectivity with other agencies responsible for public safety and counter-terrorism.

The initial focus of *SBI*net is on the southwest land border and between the ports of entry where there are serious vulnerabilities to border security. Further, *SBI*net has begun building the common operating picture (COP) of the border environment within a command center environment, which will provide uniform data to all DHS agencies and be interoperable with stakeholders external to DHS.

FY 2007 and 2008 funds will be used to complete 370 cumulative miles of fence, 300 miles of vehicle barrier systems, and 70 towers that will improve deterrence, detection, and apprehension of illegal entrants into the United States. The funds support procurement of the surveillance technology which includes mobile and fixed towers, and unattended ground sensors (UGS). Additionally, funds will be used to support the ongoing Command and Control Upgrades in the form of fixed and mobile command and control systems which contribute to the border COP. These resources are required to deliver communications capabilities for data networks, law enforcement (tactical) voice communications via radio, and high-bandwidth wireless capacity to deliver integrated data/video/sensor information to Agents in remote field locations. Ultimately when completed, this enhanced communications capability will also provide the "back-haul" for remote sensor units to local and national command centers, and to the nation-wide Internet Protocol (IP) network for distribution to DHS, other agencies, and state and local users.

The requested FY 2009 funds will be used to continue efforts on the southwest land border sectors. The \$275 million will be used to partially:

- Expand the COP into additional sectors;
- Deploy the *SBI*net solution to some of the Rio Grande Valley sector;
- Begin to design and engineer plans for the remaining southwest border sectors
- Continue to upgrade Border Patrol hand-held tactical communication radios
- Continue to install additional fencing in the Tucson, Yuma, El Centro and San Diego sectors;
- Plan and work environmental and real estate issues for future *SBI*net deployments on the Southern border;
- Continue Mission Engineering and Testing and Evaluation tasks,

- And provide logistics support of increased installed surveillance and detection systems and tactical infrastructure.

**1.c. Performance Impact:** *SBI*net will provide CBP and other DHS enforcement agencies with unprecedented capabilities for planning, directing and conducting border enforcement operations. The means for objectively evaluating the performance and effectiveness of security and enforcement actions will also be addressed.

In conjunction with the DHS infrastructure, communications systems will disseminate operational orders in real-time. Managers will have the ability to redeploy resources rapidly as DHS priorities or national crises evolve. At the command and control (C2) level, *SBI*net will work with other systems to provide managers with continuous situational awareness, integrating new levels of collaboration and cooperation with other professionals and enforcement agencies. As Agents report on activities, submit enforcement intelligence, and collaborate electronically from field locations, the command and control level will receive a comprehensive view of the border enforcement environment.

*SBI*net contributes to the goal of gaining effective control of the border. In order to accomplish this goal, CBP must be able to consistently:

- Detect - Detect entries when they occur;
- Identify/Classify - Identify what the entry is and classify its level of threat (who they are, what they are doing, how many, etc);
- Respond - Effectively and efficiently respond to the entry; and
- Resolve - Bring the situation to the appropriate law enforcement resolution.

*SBI*net will contribute to the following CBP Strategic Goals/Objectives:

2.1: Enhance the intelligence program and improve intelligence-driven operations.

2.2: Maximize border security, along the southern border, through an appropriate balance of personnel, equipment, technology, communications capabilities and tactical infrastructure.

2.3: Expand specialized teams and rapid-response capabilities to enhance control of the borders, with expansion to problematic areas as identified through continuing threat assessments.

6.3: Develop and deploy innovative and secure systems and advanced technologies including Automated Commercial Environment (ACE), Advanced Passenger Information System (APIS), U.S. Visitor Immigrant Status and Information Technology (US-VISIT), Automated Targeting System (ATS), radiation portal monitors, Non-Intrusive Inspection (NII) systems and Secure Border Initiative to improve targeting and screening of goods, people and conveyances entering the United States.

**Program Increase 2:****BSFIT – SBI<sup>net</sup> Program Management Office**Strategic Goal(s) & Objective(s): 2.1 – Secure our borders against terrorists, means of terrorism, illegal drugs and violations of trade and immigration laws.

**2. Change/Initiative 2:** SBI Program Offices (PEO, SBI<sup>net</sup> SPO, Tactical Infrastructure PM, Acquisition Office)

**2.a. Description:** Additional funding in the amount of \$2.6 million is requested to manage the Secure Border Initiative program, in order to continue meeting the President’s plan for effective control of the border.

**2.b. Justification:** The SBI<sup>net</sup> Programs are managed by the SBI Program Executive Office (PEO) the System Program Office (SPO), and the Tactical Infrastructure PM which report to the CBP SBI Executive Director. The PEO has oversight of all SBI programs, including SBI<sup>net</sup>, Tactical Infrastructure, and the Transportation Program as well as coordinating CBP’s SBI strategic focus, plans and execution. The PMs are responsible for the work related to the oversight, planning, organizing, coordinating, authorizing, and controlling of the program to meet technical, quality, cost, and schedule requirements. This includes business management, supplier management and procurement, security, regulatory management (environmental clearance requirements, real estate legal matters, and communications spectrum), and quality and mission assurance.

The SBI PMs are organized in a line/matrix fashion with six line and four staff directorates reporting to the Program Managers. This organizational structure allows for the concentration of subject matter expertise into appropriate directorates, creating a resource pool immediately available to staff Integrated Project Teams and execute projects under the SBI<sup>net</sup> Programs. The funding increase over 2008 supports the PEO, SBI TI PM, and SBI<sup>net</sup> SPO and will provide for technical expertise in areas such as ground and electro-optical sensors, radars, sensor fusion and processing, wireless and microwave engineering, field equipment installation technical support, tactical infrastructure materials supply and supply chain management, and contracting officers and contracts managers.

The critical nature of funding and staffing program management has been emphasized by DHS Investment Review Board, the DHS OIG and the GAO. In the December, 2006 DHS OIG report of the Major Management Challenges Facing DHS, acquisition and contract management is prominent. Specific reference by the OIG is for the SBI<sup>net</sup> Program to have a sound foundation to “effectively oversee and assess contractor performance and effectively control cost and schedule.” Further, in July,

2006, the GAO cited numerous challenges in the “Challenges in Creating and Effective Acquisition Organization” highlights “the need for improved oversight of contractors and management reviews that provides decision makers with critical information at the right time.”

SBI efforts are executed through a series of task orders. Each task order is managed by a qualified Project Manager. The Project Managers have cost, schedule, and performance accountability for their tasks and report directly to the Projects Director. The project control division maintains earned value monitoring and oversight of the task orders. Contracted support from various companies completes a well rounded and skilled team with experience in required fields. The PEO, SBI TI PM and SPO are dedicated to the best practice principles for program management and contract administration used within the government and is taking the necessary steps to ensure these principles are maintained and followed throughout the contract's lifecycle.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

#### Department of Homeland Security U.S. Customs and Border Protection

#### Justification of Proposed Changes in Border Security Fencing, Infrastructure, and Technology Appropriation Language

For acquisition and recurring expenses to develop, deploy, operate, maintain and provide program management [expenses] **for customs and border protection fencing, infrastructure, and technology; purchase and lease of up to 118 passenger motor vehicles capable of off-road use, without regard to the purchase price limitation specified in 13 U.S.C. section 1343; [\$1,225,000,000,] \$775,000,000** to remain available until expended [: Provided, That of the amount provided under this heading, \$1,053,000,000 is designated as described in section 5 (in the matter preceding division A of this consolidated Act): Provided further, That of the amount provided under this heading, \$650,000,000 shall not be obligated until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure, prepared by the Secretary of Homeland Security and submitted within 90 days after the date of enactment of this Act, for a program to establish a security barrier along the borders of the United States of fencing and vehicle barriers, where practicable, and other forms of tactical infrastructure and technology, that includes:]

[(1) a detailed accounting of the program's progress to date relative to system capabilities or services, system performance levels, mission benefits and outcomes, milestones, cost targets, program management capabilities, identification of the maximum investment (including lifecycle costs) required by the Secure Border Initiative network or any successor contract, and description of the methodology used to obtain these cost figures;]

[(2) a description of how activities will further the objectives of the Secure Border Initiative, as defined in the Secure Border Initiative multi-year strategic plan, and how the plan allocates funding to the highest priority border security needs;]

[(3) an explicit plan of action defining how all funds are to be obligated to meet future program commitments, with the planned expenditure of funds linked to the milestone-based delivery of specific capabilities, services, performance levels, mission benefits and outcomes, and program management capabilities;]

[(4) an identification of staffing (including full-time equivalents, contractors, and detailees) requirements by activity;]

[(5) a description of how the plan addresses security needs at the Northern Border and the ports of entry, including infrastructure, technology, design and operations requirements;]

[(6) a report on costs incurred, the activities completed, and the progress made by the program in terms of obtaining operational control of the entire border of the United States;]

[(7) a listing of all open Government Accountability Office and Office of Inspector General recommendations related to the program and the status of Department of Homeland Security actions to

address the recommendations, including milestones to fully address them;]

[(8) a certification by the Chief Procurement Officer of the Department that the program has been reviewed and approved in accordance with the investment management process of the Department, and that the process fulfills all capital planning and investment control requirements and reviews established by the Office of Management and Budget, including Circular A-11, part 7;]

[(9) a certification by the Chief Information Officer of the Department that the system architecture of the program is sufficiently aligned with the information systems enterprise architecture of the Department to minimize future rework, including a description of all aspects of the architectures that were and were not assessed in making the alignment determination, the date of the alignment determination, and any known areas of misalignment along with the associated risks and corrective actions to address any such areas;]

[(10) a certification by the Chief Procurement Officer of the Department that the plans for the program comply with the Federal acquisition rules, requirements, guidelines, and practices, and a description of the actions being taken to address areas of non-compliance, the risks associated with them along with any plans for addressing these risks, and the status of their implementation;]

[(11) a certification by the Chief Information Officer of the Department that the program has a risk management process that regularly and proactively identifies, evaluates, mitigates, and monitors risks throughout the system life cycle and communicates high-risk conditions to U.S. Customs and Border Protection and Department of Homeland Security investment decision makers, as well as a listing of all the program's high risks and the status of efforts to address them;]

[(12) a certification by the Chief Human Capital Officer of the Department that the human capital needs of the program are being strategically and proactively managed, and that current human capital capabilities are sufficient to execute the plans discussed in the report;]

[(13) an analysis by the Secretary for each segment, defined as no more than 15 miles, of fencing or tactical infrastructure, of the selected approach compared to other, alternative means of achieving operational control; such analysis should include cost, level of operational control, possible unintended effects on communities, and other factors critical to the decision making process;]

[(14) a certification by the Chief Procurement Officer of the Department of Homeland Security that procedures to prevent conflicts of interest between the prime integrator and major subcontractors are established and that the Secure Border Initiative Program Office has adequate staff and resources to effectively manage the Secure Border Initiative program, Secure Border Initiative network contract, and any related contracts, including the exercise of technical oversight, and a certification by the Chief Information Officer of the Department of Homeland Security that an independent verification and validation agent is currently under contract for the projects funded under this heading; and]

[(15) is reviewed by the Government Accountability Office:]

[Provided further, That the Secretary shall report to the Committees on Appropriations of the Senate and the House of Representatives on program progress to date and specific objectives to be achieved through the award of current and remaining task orders planned for the balance of available appropriations: (1) at least 30 days prior to the award of any task order requiring an obligation of funds in excess of \$100,000,000; and (2) prior to the award of a task order that would cause cumulative

obligations of funds to exceed 50 percent of the total amount appropriated: Provided further, That of the funds provided under this heading, not more than \$2,000,000 shall be used to reimburse the Defense Acquisition University for the costs of conducting a review of the Secure Border Initiative network contract and determining how and whether the Department is employing the best procurement practices: Provided further, That none of the funds under this heading may be obligated for any project or activity for which the Secretary has exercised waiver authority pursuant to section 102(c) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1103 note) until 15 days have elapsed from the date of the publication of the decision in the Federal Register]. (Department of Homeland Security Appropriations Act, 2008)

### **Explanation of Changes:**

Proposed changes in language deletes references made in the FY 2008 appropriation for an emergency designation and the limitation of funding tied to the requirement for a Congressional report within 60 days of the FY 2008 enacted appropriation.

The BSFIT appropriation account requires authority to lease or purchase vehicles capable of off-road use to ensure that System Program Office (SPO) staff can execute their responsibilities safely, efficiently and effectively. The SBI SPO staff frequently attend meetings with communities and Native American Nations, conduct site surveys and monitors contractor performance in deploying the *SBI<sub>net</sub>* solution. These responsibilities require frequent travel on dirt roads or sand in all weather conditions to locations that are not accessible in standard automobiles. The SBI-SPO staff is funded through the BSFIT appropriation; therefore, it is a requirement for vehicle purchases and leases to be funded from this appropriation account.

- 10 vehicles are required for the southwest Field office to be used by employees in executing their official duties associated with deploying the *SBI<sub>net</sub>* solution including: transportation to and from meetings with border communities and Native American Nations, conducting site surveys and review of progress in deploying the *SBI<sub>net</sub>* solution.
- 108 Rapid Response Transport (RRT) vehicles are required for the Tucson (30); Yuma (12); El Paso (30); and Rio Grande (36) sectors. The RRT's are used to transport people from the point of apprehension to the booking/detention facility and will be procured by the *SBI<sub>net</sub>* prime contractor, Boeing, and will be equipped with law enforcement technology that is integrated into the *SBI<sub>net</sub>* solution. The basic methodology used to calculate the requirements for these vehicles is 10 per corridor in a sector. Additional vehicles are proposed in sectors where there are highway checkpoints outside of the corridor. The Ground Transportation contract (\$50 million) requires that those apprehended are picked up at the border patrol offices.

## **G. Capital Investment and Construction Initiative Listing**

On October 4, 2006, the Department of Homeland Security Appropriations Act, (P.L. 109-295) provided CBP with a new appropriation for Border Security, Fencing, Infrastructure and Technology.

CBP will deliver the SBI net capital investment plan, including a timetable, which will become the basis of the Capital Investment and Construction Initiative Listing after completion of a DHS Investment Review Board (IRB) in FY 2008. CBP will provide the details of this plan as soon as they become available.

In FY 2007 and 2008, SBI initiated various projects attempting to provide a lower cost, higher deterrence physical barrier system to meet the goals of the DHS. In this effort *SBI*net worked on a number of projects: Project 28, a technical solution covering 28 miles of the Tucson Sector border (Sasabe area); Texas Mobile System, a 29 mile section of El Paso Sector (Texas side) that provided the impetus for future fencing solutions for other sectors; Fence Lab, a development project working in conjunction with Sandia National Laboratory looking at various types of physical barriers/fences; and the Barry M. Goldwater Range (BMGR) in the Yuma Sector, a 34 mile initial project securing the range using a bollard and fence combination for effectiveness. In 2008, SBI will complete additional fence and vehicle fence projects.

For FY 2009, SBI will provide tactical infrastructure such as fence, barriers, roads and lighting as well as technological and surveillance packages to additional southwest border sectors.

**Mission Statement**

The SBInet Program Management Office (PMO) will identify and provide relevant information to DHS stakeholders in a timely manner, using open information architecture. To achieve this strategic goal CBP will lead the effort to develop a Common Operating Picture (COP) that provides situational awareness necessary to improve mobility, rapid response, officer safety, and intelligence.

**Summary Justification and Explanation of Changes**

|               | 2007           | 2008           | 2009         | 2008 to 2009     |

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U.S. Customs and Border Protection Automation Modernization

### I. Appropriation Overview

#### **A. Mission Statement for Automation Modernization:**

To further the U.S. Customs and Border Protection (CBP) mission of securing our nation's borders while facilitating legitimate trade, CBP is in the midst of modernizing its information systems. The foremost automation effort is the phased implementation of the Automated Commercial Environment (ACE), which is being developed and deployed in increments and will replace the current trade management system, the Automated Commercial System (ACS). ACE will provide tools and enhance the business processes that are essential to securing U.S. borders from terrorists by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. ACE capabilities have been designed to identify potential risks, analyze information prior to arrival of people and cargo, and provide intelligence in easy-to-use formats. As a web-based system, ACE will provide users from government and the trade community with new, more efficient ways of accessing, processing, and sharing trade-related information. Critical Operations Protection and Processing Support (COPPS) provides nearly all the CBP Information Technology (IT) infrastructure to operate and maintain mission-critical IT systems requisite to secure the borders while facilitating legitimate trade and travel. The Traveler Enforcement Communication System (TECS) provides critical border enforcement and Port of Entry (POE) processing capabilities. TECS Modernization is a multi-year project that will enhance CBP's mission capabilities by developing and deploying a modernized TECS.

#### **B. Budget Activities:**

##### Automated Commercial Environment / International Trade Data System (ITDS)

CBP is modernizing its business processes, information technology systems, and infrastructure to provide the functionality needed to support its mission and sustain its global leadership position in the years to come. ACE is CBP's response to the explosive growth in trade volume and will supplement and replace the Automated Export System (AES) and ACS. Within DHS, ACE is a much-needed tool to combat illegal activities and terrorist threats to the United States. In addition, ACE satisfies numerous legislative mandates that could not otherwise be achieved. The International Trade Data System (ITDS) is intended to be a secure, integrated, government-wide vehicle for the electronic collection, use, and dissemination of trade and transportation data. To become a single window to the trade, ITDS will require the participation of approximately 79 Federal entities.

##### Critical Operations Protection & Processing Support (COPPS) /TECS Modernization

COPPS provides nearly all the CBP IT infrastructure. The information technology systems supported by CBP's IT infrastructure allow for implementation of the unified border policy by providing efficient and effective sharing of information and images among the trade community and law enforcement agencies. COPPS supports the operations of CBP Officers and Border Patrol agents at the Ports of

Entry and between the Ports of Entry, and provides for coordinated targeting, command, control, and communications capabilities across CBP. IT systems are vital tools used by CBP and other Federal agencies to defend our borders. They assist CBP Officers and Border Patrol agents in identifying potential catastrophic threats, including terrorists, weapons of mass destruction, and biological agents, as they attempt to enter the country, while simultaneously facilitating legitimate trade and travel. TECS is a key border enforcement system for CBP and DHS that plays an essential role in the screening of travelers entering the U.S. and in supporting the screening requirements of other Federal agencies. The current TECS is over 18 years old and uses technology that cannot be supported into the future. Maintaining TECS functionality is critical to CBP's border enforcement mission. The modernization program will replace the mainframe components of TECS with a sustainable technical architecture including modern databases and graphical user interfaces.

### **C. Budget Request Summary**

For FY 2009, the Automation Modernization request is 63 positions, 63 FTE, and \$511,334,000. The total adjustments-to-base is a decrease of \$275,000. Program increases include \$25,000,000 for TECS Modernization and \$10,000,000 for Terrorism Prevention Systems Enhancements (TPSE):

- Traveler Enforcement Communication System (TECS) - \$25 million is requested to support TECS. TECS is a key system for border enforcement and sharing of information on persons who are inadmissible or may pose a threat to the security of the United States. TECS is the primary subject record "watch list" database for DHS. Immigration and Customs Enforcement (ICE), the Transportation and Security Administration, U.S. Citizenship and Immigration Services (USCIS) and US-VISIT rely on TECS for the biographic vetting of people. TECS Modernization will ensure this capability is available into the future. The continued funding stream of resources received in FY 2008 and requested in FY 2009 will support:
  - complete security management efforts that started in FY08
  - continue improvements to the secondary inspections operations that started in FY08 by modernizing the process systems-wide that currently requires CBP officers to access several systems and re-enter data when a person is not admitted at a POE and moved to a secondary location
  - implement subject record modernization
  - provide vetting services for other systems and agencies
  - implement modernization of databases
- Terrorism Prevention System Enhancements (TPSE) - \$10 million is requested to support TPSE. TPSE provides 24/7 systems availability, network redundancy, and monitoring. The TPSE and COPPS funding will support recurring infrastructure needs (software licensing, hardware maintenance, data storage, data redundancy, network circuits, etc.). The demand for 100 percent systems and network availability (24/7/365) has increased associated infrastructure costs, and this funding will sustain investments made to reduce downtime and increase mission critical systems availability to CBP personnel worldwide.

## II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)

**Department of Homeland Security**  
**U.S. Customs and Border Protection**  
**Automation Modernization**  
 Summary of FY 2009 Budget Estimates by Program/Project Activity  
 (Dollars in Thousands)

| Program/Project Activity                                | FY 2007<br>Actual |                  | FY 2008<br>Enacted |                  | FY 2009<br>Request |                  | Increase (+) or Decrease (-) For FY 2009 |                 |                 |                 |                     |              |

| <b>Total Changes 2008-2009</b> | <b>...</b>  | <b>...</b> | <b>- 118</b>     |

- CBP requests \$316.9 million for this activity; a decrease of \$118,000 from FY 2008:
- Pay annualization - \$72,000
- Pay raise - \$169,000
- Non-pay inflation - \$6.2 million
- Management Efficiency - a decrease of \$6.5 million

**CURRENT SERVICES PROGRAM DESCRIPTION:**

ACE is the U.S. trade processing system designed to consolidate and automate import processing. The ACE project was begun in FY 2001, and completion is scheduled for FY 2011 at an estimated cost of \$3.3 billion.

Automating time-consuming and labor-intensive transactions will allow goods through ports and onto markets faster and at lower cost will simplify dealings between CBP, the trade community, and other government agencies. CBP personnel will have automated tools and better information to decide - before a shipment reaches U.S. borders - what cargo should be targeted because it poses a potential risk, and what cargo can be expedited because it complies with U.S. laws.

ACE benefits include:

- Enhancing border security
- Expediting trade flow
- Increasing access to on-line data
- Simplifying and expediting cargo release
- Replacing transaction and paper based processing with a national account-based processing
- Providing periodic monthly payment ability and account statements

FY 2007 carried ACE beyond its midpoint for funding, schedule, and functionality as \$1.9 billion of the \$3.3 billion lifecycle cost estimate has been appropriated (approximately 60%); 5 of the 9 years of software development have elapsed (approximately 65%); and 7 of the 10 releases of ACE

functionality have been deployed. A description of each release and associated performance date is provided below.

**ACE Foundation (Release 1): COMPLETE**

The ACE Foundation (Release 1) provided the first infrastructure investment for the deployment platform for ACE and established security measures that are consistent across ACE.

**Account Creation (Release 2): COMPLETE**

The ACE Account Creation (Release 2) provided CBP Account Managers and selected importers controlled access to information (such as the account's trade activity), and facilitated collaboration and communication among the various groups. This release laid the initial foundation for an account management structure that will eventually encompass all segments of the trade community and become a principal tool for CBP Officers to assess national compliance and supply chain data. This tool continues to roll out to additional users, and has altered the methodology CBP employs to research and analyze supply chain information and achieve improvements in trade compliance. As of November 2007, a total of 7,867 CBP personnel and 13,588 ACE accounts have access to the ACE Secure Data Portal.

**Periodic Payment (Release 3): COMPLETE**

The ACE Periodic Payment (Release 3) expanded the account management framework to a larger trade audience such as brokers, carriers, and CBP Officers overseeing those areas. Monthly payment and statement capabilities are available within the account-based system. Duties and fees no longer have to be paid on a transaction-per-transaction basis, and companies can more easily track their activities through customized account views and reports. ACE periodic payment users have the ability to wait until the 15<sup>th</sup> working day of the next month to pay for shipments released during the previous calendar month. This provides a potentially significant cash flow benefit. Since the first payment was made in July 2004 through November 9, 2007, nearly \$18 billion in duties and fees have been paid through ACE monthly statements.. Over \$1 billion in payments were collected via October 2007 statements, representing approximately 38% of adjusted total statement collections.

**Screening Foundation (Release S1): COMPLETE**

The ACE Screening Foundation (Drop S1) established the long-term foundation for modernizing screening and targeting. It uses a business rules engine to enhance the screening capabilities for all manifest and entry transactions. The business rules engine provides two significant benefits. First, it allows end users to define and maintain rules and data sources instantaneously without the assistance of a technical expert. Second, end-users are able to develop rules, perform impact assessments, and request approval for rule deployment. New rules can be added without software changes.

Additionally this release established a centralized standard data store for all screening and targeting criteria and results, and facilitated the ability to determine the reasons for an exam. It enhanced existing capability by enabling management of screening and targeting criteria by the business end-user using any combination of data related to manifest and entry processing that can be derived from existing data.

### **Targeting Foundation (Release S2): COMPLETE**

Targeting Foundation (Drop S2) established the targeting platform and foundation for CBP. Just as Screening Foundation (S1) established the foundation for screening, the targeting platform established the merged, service-oriented architectural basis upon which analytical capabilities are deployed.

Targeting Foundation (S2) modernized the core workflow of the National Targeting Center (NTC). Through the targeting platform, the NTC has the ability to initiate activities, foster collaboration among analysts, and access past activity logs for additional intelligence. A core set of analytical capabilities within the targeting platform enables CBP analysts to develop actionable intelligence. Analysts have the ability to conduct searches of disparate data, both structured and unstructured. They also have the ability to research and collaborate on a real-time basis with other analysts. Sophisticated text analytics aid the analysts in finding relevant facts and discovering new relationships in the data. Analysts may annotate, store, and classify their findings for reference by others.

### **e-Manifest: Trucks (Release 4): COMPLETE**

The ACE e-Manifest: Trucks (Release 4) provides an electronic truck manifest, a primary CBP Officer interface, and expedited importation processing. The CBP Officer interface consolidates more than seven separate cargo release systems to provide CBP Officers with a comprehensive view of enforcement and transaction history data to enhance enforcement capabilities and simultaneously expedite the movement of trade. The electronic manifest provides one method to fulfill the mandate from the Trade Act of 2002 to provide advance cargo data for truck shipments.

e-Manifest: Trucks provides for the automated manifest processes to determine the admissibility of cargo, conveyance, and equipment arriving in the United States. The release interfaces with the Automated Targeting System (ATS) to provide screening data to CBP primary officers to target high-risk transactions. This release includes the provisions for the Federal Motor Carrier Safety Administration (the first participating government agency) to manage truck safety issues at U.S. land borders.

In November 2007, CBP completed the deployment of ACE e-Manifest: Trucks (Release 4) functionality. All 99 U.S. land border ports of entry are now equipped to accept and process e-Manifests. In January 2007, CBP began the phased enforcement of the mandatory filing of truck e-Manifests prior to arrival at a U.S. land border port of entry. Currently, the mandatory e-Manifest policy is in effect at 95 of 99 land border ports of entry, including all ports along the southern border. On average, e-Manifests can be processed 33 seconds faster than a traditional paper manifest. As of October 31, 2007, e-Manifests represent 99 percent of all manifests filed.

### **Advanced Targeting Capabilities (Release S3): COMPLETE**

Advanced Targeting Capabilities (Release S3) extend the targeting platform by adding new tools and models that allow more robust analysis of data to support extended targeting. This release provides opportunities for viewing the data in new ways and enhancing the ability to target outlying data, and implements metrics and compliance measures that provide insight into and feedback on the operational and technical targeting effectiveness.

### **Entry Summary, Accounts, and Revenue (ESAR) (Release 5)**

ESAR provides enhanced accounts management functions, a single source for master data, and integrated account-based, financial and entry summary processing. This release builds upon ACE Account Creation (Release 2) through e-Manifest: Trucks (Release 4) by adding functionality to

existing accounts management, periodic payment, ledger, and screening processing. The functionality for Release 5 is divided into two drops.

**ESAR: Master Data and Enhanced Accounts (Drop A1): COMPLETE**

Master Data and Enhanced Accounts (Drop A1) functionality includes enhanced account creation and maintenance using SAP Customer Relationship Management (CRM) and a portal for data management and edit checking. This release expands on prior ACE releases by adding most account types and corresponding system master data. Release 5 expands the current importer, broker, and carrier accounts management activities to treat any entity doing business with CBP as an account.

A key aspect of Master Data and Enhanced Accounts (Drop A1) is the establishment of ACE as the lead system for all specified master data elements required for CBP systems processing. This means that the creation and maintenance of master data elements and related reference files will originate in ACE and be distributed to other CBP systems.

**ESAR: Entry Summary and Revenue (Drop A2): WINTER 2011**

Entry Summary and Revenue (Drop A2) will use SAP's integrated components to deliver the entry summary business process through liquidation: specifically electronic refund processing, debt management, centralized bond processing (including bond sufficiency checks) full accounts receivable sub-ledger processing, and Web-based collection processing via data exchange with pay.gov. Entry Summary and Revenue (Drop A2) will also provide integration between the ACE subsidiary ledger and the CBP general ledger to include financial information for all ACE accounts.

Entry Summary and Revenue (Drop A2) will expand ACE to encompass entry summary; liquidation/closeout processing; reconciliation processing; calculation of duties, taxes and fees; PGA interfaces; prior disclosure; post summary corrections; bond application/storage; bond sufficiency; team review; protest; CBP-issued licenses/permits/certificates and other documentation; accounts receivable; collections and receipts; and refunds.

**E-Manifest: All Modes and Cargo Release (Release 6 – dates are provided in the following drop levels)**

E-Manifest: All modes and Cargo Release (Release 6) establishes the common repository for a multi-modal manifest (MMM) application and automates cargo release processing. This release will bring existing applications into the shared MMM environment and support CBP agreements such as the Container Security Initiative and the Security and Prosperity Partnership with Canada and Mexico.

The MMM environment will bring all modes of transportation (sea, rail, air, truck, and pipeline) into a common processing environment and extend Web portal access on import and export transactions for CBP external trade partners and PGA users. The MMM environment will also enfranchise the custodial community of port authorities, ocean terminal operators, warehouse proprietors, foreign trade zone (FTZ) operators, and others associated with the cargo control, materials handling and 3<sup>rd</sup> party logistics of international transportation and commerce.

In addition to the cargo control transportation manifest, the Automated Broker Interface (ABI) that governs the cargo release process will be modernized to operate in the new MMM environment. Stand-alone applications such as the Vessel Management System (VMS) and the Mail Entry Writing System (MEWS) will be modernized and enfolded into the wider MMM environment creating a coherent cargo control and release application environment.

**E-Manifest: Rail and Sea Manifest (Drop M1): FALL 2008**

E-Manifest: Rail and Sea (Drop M1) will provide a common repository user interface, shared cargo control software, and an account-based trade interface with web portal access for the rail and sea modes of transportation within the new MMM environment.

Ocean and rail manifest will be modernized for the trade community and for the CBP officer. The entry filer will continue to submit data through the ABI gateway into the cargo release system in ACS. After acceptance, the entry data will be processed through ATS for risk assessment and after screening, the results of processing will be sent into the ACE cargo control component of MMM from which status notifications will be sent to the rail and sea carriers.

E-Manifest: Rail and Sea (Drop M1) will also deliver to the CBP Officer the capability to view a rail, sea, or truck shipment at the bill of lading level along with the entry data and associated screening and targeting results via the ACE Secure Data Portal. The ACE Secure Data Portal will provide a consolidated view of manifest, entry and reference file information that will expedite pre-arrival processing and provide to the CBP Officer the capability to place holds, remove holds and electronically complete the cargo processing in advance of actual conveyance arrival.

**E-Manifest: Air Manifest & Cargo Release (Drop M2): SUMMER 2010**

E-Manifest: Air Manifest & Cargo Release (Drop M2) will modernize Air Manifest and cargo release. For the air mode of transportation, this drop of ACE functionality will bring all of the functionality brought to the rail and sea modes as noted above plus enhanced split shipment bill of lading handling and other enhancements. E-Manifest: Air Manifest & Cargo Release (Drop M2) will also result in the truck, rail, ocean, and air modes of transportation sharing a common repository. To the external trade partner, the Web portal will provide access to their carrier accounts and a true MMM environment for the four main categories of transportation providers that interchange cargo as it moves through the international supply chain network en route to, within or as it is being exported from the United States.

E-Manifest: Air Manifest & Cargo Release (Drop M2) will also deliver to the CBP Officer the capability to view a rail, sea, truck and air shipment at the bill of lading level along with the related entry data and the associated results of the screening and targeting results via the ACE Secure Data Portal. The portal will provide a consolidated view of manifest, entry and reference file information that will expedite pre-arrival processing and provide to the CBP Officer the capability to place holds, remove holds and electronically complete the cargo processing for these shipments in advance of actual conveyance arrival.

**E-Manifest: Exports and Mail Entry Writing System (MEWS) (Drop M3): FALL 2011**

E-Manifest: MEWS (Drop M3) will bring export cargo processing into the MMM environment, providing export manifest reporting capabilities for truck, sea, rail, and air. One significant difference from the previous drops is that there is no 'entry' or Cargo Release processing on export shipments since export goods are leaving the United States (no duty or tax is being collected).

E-Manifest: MEWS (Drop M3) will also include the modernization of MEWS. The MEWS data will be made available to screening and targeting for risk assessment and criteria screening to enhance the CBP ability to target, select, and intercept injurious shipments entering the country via international mail.

**Exports and Cargo Control (Release 7 - dates are provided in the following drop levels)**

Exports and Cargo Control (Release 7) completes the Account Management, Revenue, Manifest and Release, and Export Processes. This release will include ESAR: Drawback, Enhanced Protest, and Import Activity Summary Statement (IASS, Drop A3) and e-Manifest: Custodial Entities, Pipelines, and Batch Processes (Drop M4).

**ESAR: Drawback, Protest and Import Activity Summary Statement (Drop A3): FALL 2012**

This drop of ACE functionality will include Drawback, IASS, and Enhanced Protest. The implementation of the IASS will constitute a major change to the current commercial process for CBP, PGAs, and the trade community. There will be an impact to the existing CBP and PGA users who will utilize the expanded capabilities. However, most users will already be using ACE, so familiarity with the form and feel of the system will allow rapid assimilation of new functionality with only limited training.

**E-Manifest: Custodial Entities and Pipelines (Drop M4): FALL 2012**

E-Manifest: Custodial Entities and Pipelines (Drop M4) will bring the custodial cargo control partners (terminal operators, ocean/air port authorities, container stations, warehouses) of the international transportation providers and entry filers into the consolidated MMM environment, along with the final mode of transportation, the international pipeline operators.

The custodial partners are the trusted trade partners that have physical custody of imported merchandise prior to delivery authorization of the imported goods, or have physical possession of goods subject to export control regulations prior to the actual departure of those goods from the United States. These constitute the custodial community within the MMM operational environment.

In addition, this drop of ACE functionality will automate the declaration and cargo control procedures governing import and export cargo movements via pipelines. Data related to pipeline importations will be provided to screening and targeting for risk assessment and the CBP field officer will have the ability to view screening and targeting results for pipeline importations along with rail, sea, truck, air shipments and cargo release (entry) data.

**International Trade Data System (ITDS)** is intended to be a secure, integrated, government-wide vehicle for the electronic collection, use, and dissemination of trade and transportation data. To become a single window to the trade, ITDS will require the participation of approximately 79 Federal entities.

PPA: COPPS

|                               | <b>Perm</b> |            |                  |

CBP request \$194.5 million for this activity; an increase of \$34.7 million over FY 2008:

Pay raise - \$3,000

Non-pay inflation - \$3.2 million

Management efficiency – a decrease of \$3.4 million

Program increase - \$25 million for TECS

Program increase - \$10 million for TPSE

### **CURRENT SERVICES PROGRAM DESCRIPTION:**

Critical Operations Protection and Processing Support (COPPS) supports the CBP IT infrastructure. The systems supported by CBP's IT infrastructure allow for a unified border presence and provide for more efficient and effective sharing of information and images amongst trade and law enforcement agencies. The IT systems are vital tools that CBP and other Federal agencies use to defend our borders and support our ports of entries. The systems assist CBP in identifying potential catastrophic threats, including terrorists, weapons of mass destruction, and biological agents, as they attempt to enter the country. In FY 2007, these IT systems provided the means for enforcing the U.S. criminal and trade laws and for collecting in excess of \$30 billion in revenue associated with international trade and commerce.

CBP facilitates trade growth, economic development, and the efficient processing of international travelers through the use of comprehensive, integrated surveillance, detection, scientific, forensic, and information systems technology. COPPS is the backbone supporting all of these capabilities. The technology utilized within CBP's infrastructure enables CBP to continually improve the selectivity of low-risk and high-volume cargo, vehicles, and people, while expediting clearance processes. The infrastructure provides the basis for maintaining a sound trade management system that maximizes compliance with the law, moves legitimate cargo efficiently; targets high risk shipments, secures our borders, facilitates movement of international travel, protects the public from contraband, and maintains a strong support structure to achieve desired business results for both CBP and stakeholders.

COPPS provides networks, voice communications, data center, Technical Support Center (help desk), and e-mail. COPPS serves as the backbone for mission critical trade and law enforcement systems. The major mission critical systems, applications, and programs supported include the Automated Commercial System (ACS); The Traveler Enforcement Compliance System (TECS); Automated Export System (AES); Advanced Passenger Information System (APIS) and e-APIS; Free and Secure Trade (FAST); Seized Asset and Case Tracking System (SEACATS); CBP's Financial and Human Resources Management Systems; Fingerprinting and Identification System (IDENT); the Arrival Departure Information System (ADIS); the Port Radiation Identification Detection and Evaluation (PRIDE) system; the Enterprise Data Warehouse system; the Border Patrol Enforcement Tracking

System (BPETS); the Automated Targeting System (ATS); and the Secure Freight Initiative (SFI). These systems directly support CBP's mission:

- ACS is the comprehensive system that is used by CBP to track, control, and process all commercial goods imported into the United States. ACS facilitates merchandise processing, reduces paper work and cuts processing costs for both CBP and the trade community. ACS facilitates overall cargo processing to speed imports to the trade community and into the national economy. ACS applies analytical techniques, such as the Border Release Advanced Selectivity System (BRASS), to enforce border and transportation security while enabling implementation of NAFTA. ACS shares electronic data collection and distribution services with other government agencies.
- TECS is used by CBP and other federal and state agencies to provide screening data for people and vehicles entering the United States. TECS is responsible for providing border and transportation security at border and foreign locations, including those that are part of the Container Security Initiative (CSI) and United States Visitor Immigration Status Indication Technology (US-VISIT) projects.
- AES is the comprehensive system used by CBP, the Foreign Trade Division of the Bureau of Census (Commerce), the Bureau of Export Administration (Commerce), the Office of Defense Trade Controls (State), other Federal agencies, and the export trade community to track, control, and process all goods exported from the U.S. AES is the central point through which export shipment data, required by multiple agencies, is electronically filed and is used to identify exports with potential safety and security risks, such as HAZMAT and munitions type cargo. AES provides improved information sharing, enhanced quality of decision making through shared information, and support for intelligence, border and transportation security.
- APIS permits research on passengers on international flights before their arrival in the United States. APIS collects biographical information (name, date of birth, country of residence, etc.) from international air passengers before their departure for the U.S. Air carriers submit passenger data shortly after takeoff, allowing the data to be checked against TECS and the ATS-P before the passengers arrive. TECS includes lookout data from CBP, the State Department, and over twenty other Federal agencies. Passengers' names also are checked against the wanted person and criminal history files at the FBI's National Crime Information Center (NCIC). eAPIS allows Internet access to authorized users to submit flight data for processing and is used by small carriers.
- SEACATS is the cradle-to-grave system for tracking all activity associated with seized and forfeited property from the initial enforcement interest in the property until its final disposal. SEACATS tracks the flow of any expenses and movement of the property from one site and location to another throughout the forfeiture process. SEACATS also provides the system of administrative adjudication for all CBP Fines and Penalty processing. The system interfaces with other internal CBP systems and with the Internal Revenue Service, the Justice Department and Treasury Forfeiture Funds and supports requirements for seized and forfeited property, fines, penalties, and liquidated damages.

- CBP's Financial and Human Resource (HR) Management Systems manage administrative systems. These systems include SAP financial management, payroll, various inventory systems to track assets from helicopters to badges, as well as HR.
- An interface to Automated Biometric Identification System (IDENT) is deployed with the Enforcement Apprehension Booking Module (EABM). IDENT allows CBP to track individuals that have had previous encounters with CBP, and it provides statistical and intelligence data based on biometrics, which includes picture and ten print. IDENT allows CBP to identify known criminal aliens and individuals with active wants and warrants.
- An interface to Integrated Automated Identification System (IAFIS) currently has a limited deployment with EABM. The IAFIS capability allows CBP to positively identify any individual in the FBI Criminal Master File that has a criminal record. These responses are sent to the user along with the criminal history in approximately 3 minutes.
- ATS is an Intranet-based enforcement and decision support tool that is the cornerstone for all CBP targeting efforts. ATS is used for assessing travelers and cargo shipments to combat or prevent transnational crimes, and for risks that may be related to terrorism.
- BPETS is a tracking system that provides a single, standardized format for reporting Border Patrol data. This system allows Border Patrol to analyze incident report data and maximize deployment of resources. BPETS is the main source solution to provide reporting for the Congressional mandated Government Performance Results Act (GPRA) within OBP.

Other IT systems funded by and described under other accounts could not function without the basic IT infrastructure provided by COPPS. Among these systems are US VISIT, ACE, and the International Trade and Data System (ITDS) in addition, high-priority CBP programs, such as CSI depend on the IT infrastructure for their effectiveness.

Network and communications provided by COPPS include Blackberry servers, voice telephone (landline and cellular), audio/video conferencing, Internet, extranet and help desk and Value Added Network (VAN) connections. Communications also includes network bandwidth and fiber optic capabilities.

Hardware includes back up generators, scanners, hand held computers, a network operations center, LANs, WANs, routers, encryptors, gateways, firewalls, mainframe computers, workstations, file/email/database/application servers, modems, and VAN connections. Software includes application development tools, Operating Systems, Program and Configuration Management tools, Office Automation tools, Section 508 tools, testing tools, LAN/WAN administration tools, and other management tools.

The CBP National Data Center (NDC) houses the centralized infrastructure equipment supporting mission critical systems. Extensive connectivity and support facilities exist at the NDC, ranging from a large computer room and control center to back up power, storage, and generators. The primary technical environments for major applications are mainframe and UNIX environments. The mainframe systems run z/OS, CICS, DATACOM/DB, WebSphere, MQ Series, supporting applications written in Assembler, COBOL, and Java. The UNIX systems run Solaris OS, Oracle, MQ Series, and applications developed in C, C++, and Java. The magnitude of the workload supported by the NDC is

illustrated by the fact that the mainframes support over 100,000 users. In addition, the IT infrastructure currently supports over 47,000 users, full-time and other than full-time CBP staff. Additionally, CBP supports connectivity for more than 100 Federal, State, local, international government agencies, and more than 3,000 commercial organizations. The infrastructure supports over 50,000 desktop workstations/PCs, 25,000 laptops, 11,500 network printers, 5,750 host printers, 700 domain controllers, more than 225 application servers (Microsoft/Intel based), 850 Novell Servers, four mainframes, 3,500 switches, and over 1,300 routers.

By keeping the IT infrastructure stable, available, and reliable, CBP greatly enhances the ability of CBP Officers to make timely decisions and to take appropriate action in protecting our Nation's borders. CBP's infrastructure requirements continue to grow, both in response to greater DHS requirements and in response to the natural and beneficial growth of international trade and immigration. CBP's trade systems receive data from over 12,500 brokers, freight forwarders, and others representing the trade community. It is imperative that the infrastructure is augmented each year to accommodate this growth. Without the updated technology CBP will not be able to keep up with demand and maintain acceptable response times. Software and hardware maintenance costs increase at an average rate of 15% per year. Critical system licenses include VERITAS, IBM, Tivoli, Mainframe support, Oracle, DB2, Fujitsu, and Websphere MQ. Mainframe and UNIX DASD (direct access storage device) growth continues at an average rate of 15% per year.

FY 2007 accomplishments include supporting 59,008 CBP users (including CBP staff and contract staff) and converting over 46,000 users to Active Directory and Exchange. 100% of CBP desktops were refreshed with the 3270 mainframe emulator. 100% of Information Technology Field Technology Officers were trained on Windows XP, MS Exchange, and MS Active Directory. The percentage of mainframe capacity used remains at desirable <80%. The Traveler Enforcement Compliance System (TECS) is available to end users 98.7% of time and the network is available 99.4% of the time.

FY 2008 planned accomplishments include supporting over 60,000 CBP users (including CBP staff and contract staff), converting any additional CBP staff to Active Directory and Exchange, and completing CBP migration to Windows XP. 100% of Certification and Accreditation packages in Risk Management System and FISMA with improved quality are planned. Satellites are planned to be installed at the top 100 CBP Ports of Entry to provide network redundancy. Percentage of mainframe capacity used should remain at desirable <80%. The Traveler Enforcement Compliance System should be available to end users 98.7% of time and the network available 99.4% of the time.

FY 2009 planned accomplishments include supporting 61,000 CBP users (including CBP staff and contract staff). CBP plans to complete enterprise wide CBP Data Reference, Conceptual, Logical, and Physical data models. A baseline image of the latest Microsoft desktop operating system (Vista) is scheduled to be approved. Renewal of certification and accreditation (C&A) for systems with expiring C&A is also planned. The percentage of mainframe capacity used should remain at desirable <80%. The Traveler Enforcement Compliance System is available to end users 98.7% of time and the network is available 99.4% of the time.

**IV. Program Justification of Changes**

**Department of Homeland Security  
U.S. Customs and Border Protection  
Automation  
Justification of Program Changes**

(Dollars in Thousands)

**Program Increase:**                      TECS Modernization

Strategic Goal(s) & Objective(s): 2.1 Secure the borders against terrorists, means of terrorism, illegal drugs and other illegal activity; 2.3 Provide end users with technology and capabilities to detect/prevent terrorism and other illegal activities; 6.4 Facilitate the legitimate movement of cargo and people:

**Description of Item:**

CBP requests \$25 million to support The Traveler Enforcement Communication System (TECS) which is a key system for border enforcement and sharing of information about people who are inadmissible or may pose a threat to the security of the United States. Funding will support:

|                                   |                     |
|-----------------------------------|---------------------|
| Planning Support for future years | \$1,500,000         |
| Contract Development Services     | \$15,500,000        |
| Hardware and Software Licenses    | <u>\$8,000,000</u>  |
| <b>Total</b>                      | <b>\$25,000,000</b> |

TECS plays an essential role in the screening of travelers entering the US and in supporting the screening requirements of other Federal agencies. TECS is the primary lookout record database for all of DHS. TECS currently:

- Provides subject record “watch list” processing for DHS and other agencies. This includes maintenance of lookout records and vetting services against these records.
- Supports primary and secondary inspections at the POEs.
- Receives and processes passenger manifests from carriers.

- Supports over 70,000 users from over 20 Federal agencies responsible for traveler processing, investigations, case management and intelligence.
- Provides entry/exit data to other systems/agencies.
- Provides a real time interface with Federal Bureau of Investigation's National Criminal Information Center (NCIC) and Integrated Automated Fingerprint Information System (IAFIS) for on line-queries of wants/warrants and criminal history records.
- Provides a real time interface to National Law Enforcement Telecommunications System (NLETS) for on-line queries of drivers licenses, vehicle registration and state wants/warrants from all 50 states and Canada.
- Processes over 2,000,000 transactions daily.

**Justification:**

TECS Modernization received \$25 million in FY 2008 as the first year of a multi-year modernization program. Funds requested in FY 2009 will continue modernizing the system to include:

- Improve data integration and search capabilities. Improved data integration will enable information relevant to a border crossing decision readily available to front-line CBP officers.
- Reduce the possibility of subjecting an individual to repeated examinations due to a false watch list hit. The updated systems will include mechanisms to prevent repeated referrals to secondary inspection for the same issue.
- Improve access to person-centric information by government officials for better decision-making. The updated system will provide mechanisms to allow more flexible access by other systems and authorized agencies. These same mechanisms will allow information from other systems to be more easily integrated with information from TECS.
- Improve the effectiveness and efficiency of primary and secondary inspections by simplifying use of the system, such as eliminating the need to reenter information.
- Improve flexibility to incorporate new capabilities and respond to evolving threats. The new system will provide the means to rapidly create or change support for end-to-end business processes. Functionality, such as watch list checks, will be integrated into business processes in a plug-and-play manner.
- Eliminate dated computer programs and technology that cannot be relied upon to support the CBP mission in the long term. The current TECS system was developed two decades ago using mainframe technology and 1980s concepts. The new system will incorporate modern technology and user interface concepts.
- Comply with CBP and DHS Service-Oriented Architecture directions, allowing person-screening functions to be more easily combined with other services to support end-to-end business process.

The continued funding stream of resources received in FY 2008 and requested in FY 2009 will support:

- complete security management efforts that started in FY08
- continue improvements to the secondary inspections operations that started in FY08 by modernizing the process systems-wide that currently requires CBP officers to access several systems and re-enter data when a person is not admitted at a POE and moved to a secondary location

- implement subject record modernization
- provide vetting services for other systems and agencies
- implement modernization of databases

**Performance Impact:**

TECS Modernization will support the following DHS and CBP Strategic Goals:

**DHS:**

- 2.1 Secure the borders against terrorists, means of terrorism, illegal drugs and other illegal: by denying entrance to the US to individuals that offer a threat to national security.
- 2.3 Provide end users with technology and capabilities to detect/prevent terrorism and other illegal activities: by modernizing and upgrading screening systems already in place as well as implementing new initiatives, capabilities and functionalities.
- 6.4 Facilitate the legitimate movement of cargo and people: by successfully maintaining accurate and up to date information about individuals with negative and dangerous behavioral records and provide vetting servicing for specific names when requested by other national security related authorities.

**CBP:**

- 1.2 Improve identification and targeting of potential terrorists and terrorists weapons, through risk management and automated advanced and enhanced information: improved sensitive search capabilities will advance our ability to correctly identify persons of interest on watch lists.
- 1.4 Push the nation’s zone of security beyond physical U.S. borders through partnerships and extended border initiatives to deter and combat the threat of terrorism: the modernized system will allow information to be more readily exchanged with foreign governments.
- 3.3 Establish a unified primary inspection process for passenger processing at all ports of entry into the United States and fully integrate analysis and targeting units: Inspection of people is a primary mission of TECS. The modernized system will support unified processes, utilizing information from multiple systems, and will be more flexible to support future changes in this process.
- 3.4 Leverage the expertise, capabilities and legal authorities of the CBP Officers to establish antiterrorism secondary inspections: the inspection of people at secondary is supported by TECS. The modernized system will be better able to allow information from multiple systems to be incorporated seamlessly into a single end-to-end secondary inspection process.
- 4.1 Modernize automated import, export and passenger processing systems to improve risk assessment and enforcement decision-making: the program will modernize the core passenger processing system of CBP.
- 4.2 Utilize start-of-the-art technologies and processes to leverage resources and to conduct examinations of all potential high-risk cargo, conveyances and passengers: modernized TECS will improve detection of high-risk passengers through techniques such as linguistically sensitive

searches. Modernized TECS will also support the processing of vehicles in non-commercial lanes at land border POEs.

- 4.5 Facilitate international trade and travel: the modernized system will be better able to exchange information with foreign governments.
- 5.3 Cooperate with other agencies, foreign governments and industry partners to administer and enforce the laws of the United States: the modernized architecture will improve ability to flexibly exchange information with other agencies' systems.
- 6.3 Develop and deploy innovative and secure systems and advanced technologies including Automated Commercial Environment (ACE), Advance Passenger Information System (APIS), US-VISIT, Automated Targeting System (ATS), radiation portal monitors, Non-Intrusive Inspection (NII) systems, and America's Shield Initiative to improve targeting and screening of goods, people and conveyances entering the United States: this project will develop and deploy state-of-the-art capabilities for passenger and vehicle screening.
- 6.4 Maintain a reliable, stable and secure IT infrastructure and an array of technical support services including laboratory and scientific services, tactical radio communication, field equipment maintenance / support and 24/7 customer assistance: this project will eliminate technical components that are approaching end of life and may not be able to effectively serve the mission long term.

CBP Priorities supported by TECS Modernization include:

- 2. Prevent the entry of terrorists at the ports of entry: the project will improve the information available for officers both in primary and secondary to use in making admissibility decisions and determining possible terrorists.
- 6. Increase mechanisms to facilitate legitimate trade and travel: TECS Modernization will provide better support for the "Trusted Traveler" programs to help with both the vetting of applicants and processing of entry transactions.
- 7. Strengthen technology acquisition and deployment: TECS Modernization will use modern project management principles to guide its execution, coordinating with other program offices such as ACE and US-VISIT. TECS Modernization will acquire and deploy state of the art technology.
- 9. Unification as one border agency: TECS Modernization will provide enhanced primary and secondary processing that aligns with current CBP processes, eliminating any system relics from pre DHS operations.

### **Impacts on other DHS Components and outside DHS Components:**

TECS is the primary screening system to process travelers entering the US at Ports of Entry. TECS is used throughout DHS including CBP, ICE, Citizenship and Immigration Services (CIS) and Transportation Security Administration (TSA). Many other applications within DHS rely on TECS processing and data; including but not limited to ACE, US-VISIT, ATS, Arrival Departure Information System (ADIS), Seized Assets and Case Tracking System (SEACATS), and APIS.

TECS is the primary subject record “watch list” database for DHS. ICE, TSA, CIS and US-VISIT all rely on TECS for the biographic vetting of people in the completion of their missions. TECS Modernization will provide enhanced support for this vetting and ensure this capability is available into the future. TECS Modernization will coordinate with other efforts within DHS that require biographic vetting and subject record creation services such as ICE’s Case Management project and CIS’s Transformation project.

The Department of State is dependent on TECS for lookout record exchanges so that both consular officers and DHS officers can access the same lookout records. Many other Government agencies such as the Federal Bureau of Investigation (FBI), Drug Enforcement Agency (DEA), Treasury and Department of Defense (DOD) provide records to TECS for screening people entering the country as well as use TECS on line to run queries that benefit their agencies.

**Program Increase 2: Terrorism Prevention Systems Enhancements (TPSE)**

Strategic Goal(s) & Objective(s): 2.1 Secure the borders against terrorists, means of terrorism, illegal drugs and other illegal activity; 2.3 Provide end users with technology and capabilities to detect/prevent terrorism and other illegal activities

\* Funding was provided in the Salaries & Expenses appropriation.

**Description of Item:**

CBP requests \$10 million to support the Terrorism Prevention System Enhancements (TPSE), which enhances CBPs ability to provide 24/7 systems availability, network redundancy, and monitoring. TPSE and COPPS funding will support recurring infrastructure base needs, and infrastructure enhancements made with FY 2008 initiative funding, (software licensing, hardware maintenance, data storage, data redundancy, network circuits, etc.). The demand for 100 percent systems and network availability (24/7/365) has resulted in increased infrastructure costs. Funding will sustain infrastructure investments made to reduce downtime, and increase mission critical systems availability to CBP personnel worldwide.

**Justification:**

To support the worldwide scope and mission that CBP has today, systems are being modernized and networks reengineered to deliver a robust, fault tolerant, high assurance, high availability, and distributed service oriented architecture designed to minimize cost and downtime while providing flexibility and the ability to handle surge requirements, and failover capabilities. Our current infrastructure contains many single points of failure and outdated components that have caused repeated failures at CBP ports of entry. Funding will enable CBP to sustain enhancements made in FY 2008 to improve communications, power distribution, networking and computing capabilities to support our worldwide screening responsibilities. It will provide recurring infrastructure funding to improve CBP's 24/7x365 systems and network operation availability, and to minimize single points of failure. CBPs expanded worldwide operations scope, and demand for 100 percent systems availability, require that mission critical systems be available 100 percent of the time. This is a fundamental change since current systems were designed to be down for routine preventative maintenance on a regular basis.

Without the operations and maintenance funding to sustain FY08 enhancements, CBP will risk the backup of an average of 46,000 people for every hour of downtime, or release people without proper

screening and record keeping. This could result in terrorist, criminal and other undesirables entering the United States unchecked, and possibly compromise the safety of CBP officer's due to a lack of essential communication support.

### **Performance Impact:**

TPSE will support the following DHS and CBP Strategic Goals:

#### **DHS:**

- 2.1 Secure the borders against terrorists, means of terrorism, illegal drugs and other illegal: by expanded worldwide operations scope which encompasses a 7 day/24 hour operational responsibility requiring that all border and port screening systems be available 100% of the time.
- 2.3 Provide end users with technology and capabilities to detect/prevent terrorism and other illegal activities: by meeting future processing, and storage/backup requirements for passenger screening requirement.
- 6.4 Facilitate the efficient movement of legitimate cargo and people: without TPSE, CBP will be forced to backup an average of 46,000 people for every hour of downtime or else release people without proper screening and record keeping. This could result in terrorist, criminal and other undesirables entering the United States unchecked, and it could result in putting CBP officer's safety at first due to a lack of essential communication support.

#### **CBP:**

- 6.3 Develop and deploy innovative and secure systems and advanced technologies including ACE, APIS, US-VISIT, ATS, radiation portal monitors, NII systems, and America's Shield Initiative to improve targeting and screening of goods, people and conveyances entering the United States: the expanded worldwide operations scope which encompasses a 7 day/24 hour operational responsibility requires that all border and port screening systems be available 100% of the time.
- 6.4 Maintain a reliable, stable and secure IT infrastructure and an array of technical support services including laboratory and scientific services, tactical radio communication, field equipment maintenance / support and 24/7 customer assistance: supporting the worldwide scope and mission that CBP has today requires reengineering and deploying a robust, fault tolerant, high assurance, high availability, and distributed service oriented architecture designed to minimize cost and downtime while providing flexibility and the ability to handle surge requirements.

### **Impacts on other DHS Components and outside DHS Components:**

Funding will sustain enhancements made in communications, power distribution, networking and computing capabilities to support our worldwide screening responsibilities.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
U.S. Customs and Border Protection  
Justification of Proposed Changes in Appropriation Name  
Appropriation Language**

For expenses for U.S. Customs and Border Protection automated systems, [\$476,609,000] **\$511,334,000**, to remain available until expended, of which not less than **\$316,851,000** [\$316,969,000] shall be for the development of the Automated Commercial Environment: *Provided*, That of the total amount made available under this heading, [\$216,969,000] **\$216,851,000** may not be obligated for the Automated Commercial Environment program until 30 days after the Committees on Appropriations of the Senate and the House of Representatives receive **a plan for expenditure prepared by the Secretary of Homeland Security that**

**(1) meets the capital planning and investment control review requirements established by the Office of Management and Budget, including Circular A-11, part 7;**

**(2) complies with the Department of Homeland Security information systems enterprise architecture;**

**(3) complies with the acquisition rules, requirements, guidelines, and systems acquisition management practices of the Federal Government;**

**(4) includes a certification by the Chief Information Officer of the Department of Homeland Security that an independent verification and validation agent is currently under contract for the project; and**

**(5) is reviewed and approved by the Department of Homeland Security Investment Review Board, the Secretary of Homeland Security, and the Office of Management and Budget**

[report on the results to date and plans for the program from the Department of Homeland Security that includes:]

[(1) a detailed accounting of the program's progress up to the date of the report in meeting prior commitments made to the Committees relative to system capabilities or services, system performance levels, mission benefits and outcomes, milestones, cost targets, and program management capabilities;]

[(2) an explicit plan of action defining how all funds are to be obligated to meet future program commitments, with the planned expenditure of funds linked to the milestone-based delivery of specific capabilities, services, performance levels, mission benefits and outcomes, and program management capabilities;]

[(3) a listing of all open Government Accountability Office and Office of Inspector General recommendations related to the program, with the status of the Department's efforts to address the recommendations, including milestones for fully addressing them;]

[(4) a certification by the Chief Procurement Officer of the Department that the program has been reviewed and approved in accordance with the investment management process of the Department, and that the process fulfills all capital planning and investment control requirements and reviews established by the Office of Management and Budget, including Circular A-11, part 7, as well as supporting analyses generated by and used in the Department's process;]

[(5) a certification by the Chief Information Officer of the Department that an independent validation and verification agent has and will continue to actively review the program;]

[(6) a certification by the Chief Information Officer of the Department that the system architecture of the program is sufficiently aligned with the information systems enterprise architecture of the

Department to minimize future rework, including a description of all aspects of the architectures that were and were not assessed in making the alignment determination, the date of the alignment determination, any known areas of misalignment along with the associated risks and corrective actions to address any such areas;]

[(7) a certification by the Chief Information Officer of the Department that the program has a risk management process that regularly and proactively identifies, evaluates, mitigates, and monitors risks throughout the system life cycle, and communicates high-risk conditions to U.S. Customs and Border Protection and Department of Homeland Security investment decision makers, as well as a listing of the program's high risks and the status of efforts to address them;]

[(8) a certification by the Chief Procurement Officer of the Department that the plans for the program comply with the Federal acquisition rules, requirements, guidelines, and practices, and a description of the actions being taken to address areas of non-compliance, the risks associated with them along with any plans for addressing these risks and the status of their implementation; and]

[(9) a certification by the Chief Human Capital Officer of the Department that the human capital needs of the program are being strategically and proactively managed, and that current human capital capabilities are sufficient to execute the plans discussed in the report]. (Department of Homeland Security Appropriations Act, 2008.)

### **Explanation of Changes**

The terms are revised to allow flexibility in making the most effective distribution of resources.

**B. FY 2008 to FY 2009 Summary of Changes**

### ACE Mission Statement

ACE will provide tools and enhance the business processes that are essential to securing U.S. borders from terrorists by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. ACE capabilities have been designed to identify potential risks, analyze information prior to arrival of people and cargo, and provide intelligence in easy-to-use formats. As a web-based system, ACE will provide users from government and the trade community with new, more efficient ways of accessing, processing, and sharing trade-related information.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U. S. Customs and Border Protection (CBP) Construction

### I. Appropriation Overview

#### A. Mission Statement for CBP Construction

The CBP Construction program provides the facilities and associated infrastructure required to effectively meet CBP's dual mission of securing the nation's border while facilitating legitimate travel and trade. A key mission of the Border Patrol is to obtain and maintain operational control of the border, defined as the ability to detect, respond to, and interdict illegal border penetrations. The CBP Construction Program addresses requirements on the northern and southern borders for new and enhanced facilities to fulfill immediate operational needs, to accommodate increasing capacity demands associated with new Agent, Officer, Pilot, and Asset deployments, to modify/correct deficiencies within existing structures, and to replace temporary structures with permanent solutions.

Stations and sector facilities are critical to Border Patrol operations, in that they provide logistical support to the field Agents, supplying strategically-located bases to improve mobility and promote maximum time on patrol. Air and Marine facilities are critical to the protection of the aviation/marine fleets, which allow for swift and integrated detection/interdiction efforts where land units cannot adequately respond. Functioning land ports of entry (LPOE) are integral for the daily operations and the capabilities of assets at the border to detect, deter and disrupt terrorist activities. Appropriate government-furnished housing is critical for those CBP Officers and Agents deployed to areas where the local housing markets are unable to fulfill their housing and associated infrastructure requirements.

The CBP Construction program directly supports the National Border Patrol Strategy, which was developed to facilitate the concentration of the Border Patrol's resources in the highest risk areas to establish and maintain a foundation for operational control over our Nation's border. The Construction program also supports the Air and Marine National Strategic Plan, as well as modernization of the facility requirements for Officers at CBP-owned LPOEs.

#### **B. Budget Activities:**

**Major Construction:** Addresses strategic requirements for planning, design, and construction of new and modernized/enhanced facilities and associated infrastructure. Includes Border Patrol sector headquarters, stations, and checkpoints.

**Minor Construction and Alterations:** Provides for planning, design, and construction of small structures and buildings, to include checkpoints and forward deployed tactical operations

and alien processing facilities. Also includes alterations, expansions, and enhancements to existing facilities.

**Operations, Maintenance, and Repairs:** Provides for the sustainment of facilities through replacement of consumables and adjustment or minor repair of mechanical support systems and structures. Funds service contracts and the purchase of materials needed to maintain and repair facilities. Includes the correction of functional and physical inadequacies within existing facilities, and restoration of damaged systems.

**Lease Acquisition Base:** Provides for the planning, design, and build-out of leased Border Patrol facilities. Includes new leasing actions and leasehold improvements.

**Planning:** Provides for special studies related to resource condition assessments, strategic resource allocations, valuation and depreciation methodologies, and reconciliation of assets and other management initiatives. The studies ensure facility investments are consistent with CBP's operational strategies.

**Housing:** The CBP Housing Initiative will expedite the development of a CBP employee housing plan to support a significant increase in the number of Border Patrol Agents and CBP Officers planned for hire and deployment throughout the United States. The CBP Housing Initiative shall minimize the gap between existing housing capacity and projected requirements by developing an optimized mix of housing solutions.

**CBP Air and Marine Facilities:** Addresses strategic requirements for new or modernized facilities required for the expansion, improvements, additions or replacements to adequately protect the aviation and marine fleets.

**LPOE Modernization:** Addresses deficiencies at the CBP-owned land ports of entry (LPOEs), which include the need for enhanced security, upgraded commercial inspection facilities, and significant age and facility distress.

**Advanced Training Center:** Addresses requirements for the planning, design, and construction of the Advanced Training Center in Harpers Ferry, West Virginia.

### **C. Budget Request Summary:**

CBP requests \$363,501,000 for FY 2009. Excluding emergency funding of \$61,000,000 provided in P.L.110-161, total adjustments-to-base is a decrease of (\$83,375,000). Program increases include \$149,513,000 to construct new and expanded facilities to accommodate current and additional Border Patrol staff and \$10,000,000 for modernization of the LPOE inventory.

\*The above table includes emergency funding of \$61.0 million provided in P.L. 110-161. CBP requests \$363.5 million for this activity. Excluding emergency funds provided, the increase of \$76.1 million over FY 2008 is for non-pay inflation as well as program increases for Border Patrol facilities and land ports of entry (LPOEs).

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The CBP Construction program provides the facilities that CBP Border Patrol, Field Operations, and Air and Marine need to perform their enforcement missions. The current services program provides environmental planning, site planning, site acquisition, design services, and construction of new buildings. It builds out leased space, and repairs, renovates, and alters government owned and leased space. The program also funds routine facility operations and maintenance. The FY 2009 current services program of \$203.9M includes costs for the following:

- Border Patrol major construction - \$105.7M
- Minor construction and alterations - \$25.4M
- Lease acquisition - \$21.6M
- Planning - \$2M
- Operations, maintenance and repairs - \$17.6M
- Housing - \$15M
- Air and Marine facilities - \$16.6M

The Office of Border Patrol has experienced significant growth during the last several years, with considerable impact to an already aging and deficient facility portfolio.

Adequate stations and sector facilities are critical to Border Patrol operations. They provide logistical support to the field Agents, supplying strategically located bases to improve mobility and promote maximum time on patrol.

Border Patrol sector headquarters provide operational command, control and communications in the sector's area of responsibility. Missions and capabilities supported by these buildings include remote video surveillance of the border, intelligence analysis and planning, vehicle maintenance and storage, operational planning, training, and personnel support. Sector headquarters also plan the strategic deployment of agents to Border Patrol stations and camp details within the sector.

Strategically located Border Patrol stations facilitate Border Patrol agent mobility and deployment to areas of illegal activity. Border Patrol station activities include command, control and communications, illegal alien detention and processing, air and marine operations, search and rescue, tactical team staging, intelligence unit support, canine and horse operations, interior repatriation, SBInet technology, vehicle maintenance and storage, administration, training, and law enforcement coordination.

Temporary and self-sustaining Border Patrol forward operating bases placed in remote locations facilitate rapid responses to shifting patterns of criminal activity. Forward operating bases provide habitability for Border Patrol Agents in addition to providing communications support.

Additional resources are also required for the expansion of the CBP Air and Marine (A&M) facility infrastructure. Aging facilities require improvements, additions or replacements to adequately protect the aviation fleet. Because land units and agents alone are not always appropriate or cannot reach specified areas in the time necessary to properly respond to a threat, an integrated and coordinated air (and marine) effort must be able to detect, interdict, and prevent unlawful movement of people, acts of terrorism, illegal drugs and other contraband moving toward or crossing the borders of the United States.

Further resources are also required to modernize land ports of entry (LPOEs) to improve operations and the capabilities of assets at the border to detect, deter and disrupt terrorist activities while facilitating legitimate travel and trade. Critical deficiencies exist at the LPOEs, which include the need for enhanced security, upgraded and expanded inspection facilities, and significant age and facility distress. Funding will be used to supplement appropriations from the U.S. General Services Administration's Federal Buildings Fund, and will allow for the expedited design and delivery of key LPOE modernization efforts.

The CBP Housing Initiative will expedite the development of a CBP employee housing plan to support a significant increase in the number of Border Patrol agents and officers planned for hire and deployment throughout FY 2009. The CBP Housing Initiative shall minimize the gap between existing housing capacity and projected requirements by developing an optimized mix of housing solutions.

## Major Construction Accomplishments

In FY 2007, contracts were initiated for multiple “rapid response” initiatives. With the 6,000 additional agents to be deployed, CBP has adopted an aggressive rapid response strategy, prioritizing those sites most affected by the agent increase by operational need, current station conditions, lead-time requirements, cost effectiveness, and strategic impact. The resulting plan includes a mix of permanent and temporary solutions, with temporary transitional projects closely aligned to the schedule for permanent facility construction.

In FY 2007, CBP completed construction of the following Border Patrol projects: Border Patrol Station in Yuma, AZ, to include detention and enforcement operations; Border Patrol Station in Sanderson, TX; Border Patrol Station in Jackman, ME; Border Patrol Station in Calais, ME; and a Border Patrol Station in Massena, NY. New stations were also completed via the leasing program in the following locations: Eagle Pass, TX; Van Horn, TX; Scobey, MT; Marathon, FL; and Port Huron, MI. Additionally, the Buffalo Border Patrol Station relocated to a new leased facility in Tonawanda, NY.

In FY 2007, funds were applied to Phase III of the Advanced Training Center in Harper’s Ferry, West Virginia. Phase III includes planning, design, and implementation/construction of the following: infrastructure expansion, warehouse construction, and the leadership academy.

In FY 2008, the following major construction projects will be initiated for Border Patrol: New Border Patrol Stations for Boulevard, CA; Fabens, TX; Las Cruces, NM; Freer, TX; a vehicle maintenance facility for El Paso, TX. Proposed leasing projects in FY 2008 include Border Patrol Stations in Niagara Falls, NY; Marfa, TX; Lake Charles, LA; Port Angeles, WA; Houlton, ME; El Centro, CA; Whitefish, MT; Sector Headquarters additions in Detroit, MI and Blaine, WA; Training facilities for El Paso, TX and parking for Tucson, AZ.

In FY 2008, the following will be initiated for Air and Marine: enhanced hangar, maintenance and administrative facilities for Yuma, AZ, Uvalde, TX, Laredo, TX, and Marfa, TX; and a new Unmanned Aircraft System Hangar and Flight Center for Sierra Vista, AZ.

In FY 2008, the following Border Patrol projects are scheduled for delivery: El Centro Border Patrol Sector Headquarters in Imperial, CA; Border Patrol Station in Willcox, AZ, to include administrative and detention facilities; Border Patrol Station in Campo, CA; Border Patrol Station in Brownsville, TX; Border Patrol Station in El Paso, TX; Border Patrol Station in Sumas, WA; Border Patrol Station in Fort Hancock, TX; and a Border Patrol Station in Van Buren, ME. Funds will also be used to fulfill remaining rapid response requirements on the Northern and Southern Borders.

In FY 2008, CBP Construction funds will be used for Phase IV of the Advanced Training Center in Harper’s Ferry, West Virginia. Phase IV includes the following: dormitory, utility yard, infrastructure extension, maintenance contractor facility, and vehicle maintenance

storage facility. Completion of the Advanced Training Center will likely entail two additional phases.

In FY 2009, the following major construction projects will be initiated for Border Patrol: Presidio, TX, Border Patrol Station; Indio, CA, Border Patrol Station; Comstock, TX, Border Patrol Station; a Vehicle Maintenance Facility for El Centro; and checkpoints for Swanton, VT. Funds will also be used to fulfill remaining construction requirements for ongoing projects.

In FY 2009, the following Border Patrol locations are scheduled for delivery: Lordsburg Border Patrol Station in Lordsburg, NM; and the Casa Grande Border Patrol Station in Casa Grande, AZ.

**Border Patrol Facilities: \$149,513**

Description of Item

The CBP Construction program provides the facilities that Border Patrol needs to perform its enforcement mission. Funding is needed for facilities to accommodate increased presence on both the northern and southern borders and to enhance the mission and operational capabilities of CBP.

This initiative will address requirements on the northern and southern borders for new and enhanced facilities to fulfill immediate operational needs, to accommodate increasing capacity demands associated with new Agent deployments, to modify/correct deficiencies within existing structures, and to replace temporary structures with permanent solutions.

The planned facilities for FY 2009 include Border Patrol stations, Sector Headquarters, and checkpoints strategically located to allow agents and special teams to respond

quickly and maintain maximum time on patrol. Current facilities are at or exceeding capacity. This investment will enable CBP to adequately sustain BP personnel and/or operations.

Please note that the current services level includes only the major construction base for Border Patrol Facilities. Other budget segments—minor construction and alterations, lease acquisition, repairs, operations, and maintenance, housing, planning, and Air and Marine facilities are reflected in the current services level for the CBP-wide Construction Program. The program increase for Border Patrol includes major construction projects to accommodate newly deployed agents and to replace temporary structures with permanent solutions.

FY 2009 funds are currently planned for allocation to the following major construction projects:

| <b>FY2009 Border Patrol Major Construction<br/>(Current Services in Thousands)</b> |                |
|--|----------------|
| Boulevard Border Patrol Station  | 31,000         |

| <b>Total</b>   | <b>149,513</b> |

The Office of Border Patrol uses a standardized national planning process, known as the Operational Requirements Based Budgeting Program (ORBBP). This process provides for allocation-based spending plans, tied directly to operational orders and measurable goals, at all levels within the organization. This process takes into account the incremental nature of the Office of Border Patrol’s strategy, reflected as levels one through five. Each Sector and Station establishes operational levels in their operational plans (ORBBP). These levels list goals and steps within each operational level that can be accomplished when supported with the requisite resources identified in the plan. Each level improves operations and builds on the successes of the previous levels to establish,

expand, and maintain border control throughout the area of responsibility. The ultimate goal in Level 5 of each of plan is to establish operational control of the border.

A facilities module to the ORBBP was introduced at the 2008 planning conference. In part, the goal was to standardize information from the field used to prioritize projects for new construction and leasing and to directly correlate field facility needs with operational requirements at several levels.

Projects were selected to receive funds in FY 2009 based on the following:

- Target ORBBP level
- Focus Sectors cited in CBP's National Strategy – stations in these areas are given highest priority
- Location and the number of agents to be deployed
- Condition Site Assessments – Physical condition and age of the inventory
- Earmarks in appropriations language

Each station will be scalable to support future growth, and land acquisition will be based on level 5 projections to permit expansion over time, as needed.

#### Justification

The Office of Border Patrol has experienced significant growth during the last several years, with considerable impact to an already aging and deficient facility portfolio. Adequate stations, checkpoints, and sector facilities are critical to BP operations, in that they provide logistical support to the field Agents, supplying strategically-located bases to improve mobility and promote maximum time on patrol.

Failure to provide proper facilities for Border Patrol agents will result in diminishing returns from the investment in additional Agents. Additionally, inadequate and over crowded facilities present increased life and safety risks.

FY 2009 funds will contribute to the transition to permanent facilities for some of the “bridge” facility solutions that were put in place to accommodate the 6,000 Border Patrol agent increase. Bridge solutions were defined to fulfill immediate Agent needs, assuming that longer-term requirements would be met via new construction and leasing projects. While these interim solutions provide much-needed administrative workspace, detention/processing areas, muster space, and parking for the Agents, they are intended to address operational needs on a short-term basis. Use of interim facilities beyond their projected life span will result in increasing repair, operations, and maintenance costs and operational budget drain. CBP requires new initiative funds to replace or enhance these transitional measures and to address the aging facility portfolio and administrative support needs.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

The addition of new and expanded Border Patrol Stations will provide strategically located bases to facilitate agent mobility and rapid deployment to areas of heaviest illegal

activity. Missions and capabilities enabled by these facilities include staging and deployment of Border Patrol Agents, tactical and search and rescue teams; command, control and communications; detention and processing, intelligence unit support, canine and equestrian operations, interior repatriation, SBInet technology, fleet maintenance and storage, administrative, training, and law enforcement coordination.

**LPOE Modernization \$10M**

Description of Item

To effectively meet CBP’s dual mission of securing the nation’s border while facilitating legitimate travel and trade, the LPOE Modernization initiative requires funding to address outstanding deficiencies at existing CBP-owned inspection facilities. Specifically, FY 2009 funds are currently planned for allocation to the following:

| <b><i>FY 2009 Program (Program Increase)</i></b>             |       |
|--|-------|
| Renovation and Alteration of CBP-owned Inspection Facilities | \$10M |

The LPOE Modernization initiative will allow CBP to expedite design and delivery of facility solutions to address deficiencies and shortfalls, such as the following, which were identified through CBP’s Strategic Resource Assessment process:

- 70% of CBP-owned LPOEs have no enclosed operational secondary inspection garage, but operate in locations in which outdoor secondary inspections become infeasible to perform due to weather.
- 30% of CBP-owned LPOEs have no commercial inspection facilities but are required to inspect commercial traffic. At these ports, officers conduct inspections on the roadway, causing safety concerns.
- Most CBP-owned ports have extremely limited perimeter security measures (i.e., fencing, lighting, camera surveillance, etc.)
- 40% of CBP-owned ports’ useful life has expired, being built before 1975 with no significant repair or upgrade.

- 38% of CBP-owned ports have no primary inspection booths.
- 32% of CBP-owned ports have less than 1,000 usable square footage (SF); some ports are only 300 usable SF whereas the design guide smallest prototype calls for 2,700 usable SF. Only 7 CBP-owned ports conform to current space standards.
- Several sites are severely constrained to the point of necessitating the evaluation of introducing a new port along the border to mitigate traffic congestion by providing an alternative outlet for cross-border traffic.

### Justification

The LPOE Modernization initiative will facilitate the execution of much needed improvements to locations along the northern and southern border. These locations are in desperate need of refurbishment to accommodate the traffic volume and inspection technology of the twenty-first century as well as the staffing and security requirements in a post-9/11 environment. Without these funds, CBP will continue to operate with port environments unfit to optimally accommodate the officers executing their inspection duties and the traffic volume entering and exiting the United States. By not actively addressing deficiencies now, the cost of doing so in the future will significantly increase.

### Impact on Performance (Relationship of Increase to Strategic Goals)

The LPOE Modernization initiative serves this priority by improving operations and the capabilities of assets at the border to detect, deter and disrupt terrorist activities. The project relates to CBP Strategic Goal #1, "Preventing Terrorism at Ports of Entry," directly enhancing Objective 1.3, "strengthen CBP's defense-in-depth approach through the use of state-of-the-art detection and sensor technology, resources, and training" since the technology in question generally requires the expanded footprint provided in the upgrade designs for the land ports.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
U.S. Customs and Border Protection  
Justification of Proposed Changes in Construction  
Appropriation Language**

For necessary expenses to plan, construct, renovate, equip, and maintain buildings and facilities necessary for the administration and enforcement of the laws relating to customs and immigration, **\$363,501,000** [\$348,363,000,] to remain available until expended [; of which \$39,700,000 shall be for the Advanced Training Center: Provided, That of the amount provided under this heading, \$61,000,000 is designated as described in section 5 (in the matter preceding division A of this consolidated Act)]. (Department of Homeland Security Appropriations Act, 2008.)

#### **Explanation of Changes:**

None.

**NAME OF CONSTRUCTION INITIATIVE**  
**U.S. Customs and Border Protection Construction Program**

**1. Project Description, Justification and Scope**

The CBP Construction program provides the facilities and associated infrastructure required to obtain and maintain operational control of the border, defined as the ability to detect, respond to, and interdict illegal border penetrations. Achieving control of the border is an essential component of the CBP mission to prevent terrorists and terrorist weapons from entering the United States. The Construction Program addresses requirements on the northern and southern borders for new and enhanced facilities to fulfill immediate operational needs, to accommodate increasing capacity demands associated with new Agent, Officer, Pilot, and asset deployments, to modify/correct deficiencies within existing structures, and to replace temporary structures with permanent solutions.

The CBP Construction program provides the facilities that the Offices of Border Patrol and Air and Marine need to perform their enforcement missions. The Construction Program also supports the modernization of the Office of Field Operations' LPOEs.

The proposed construction budget addresses facility requirements at Border Patrol sector headquarters, stations, checkpoints and forward operating bases, CBP-owned land ports of entry, Air and Marine hangar facilities, and housing to accommodate Agent and Officer increases.

At the start of FY 2007, the existing Border Patrol facilities were designed to accommodate approximately 9,100 agents. At the time, there were approximately 12,500 agents using these facilities, leaving a "facility gap" of roughly 3,400 overcrowded agents. In addition, the 6,000 agent increase in deployment scheduled to be completed in December 2008 further contributed to this "facility gap." The "facility gap" will grow even further with the anticipated increase of 2,200 additional agents during FY 2009. In addition, 40% of existing facilities are over 30 years old, which increases the cost of their operations and maintenance. FY 2009 funds are required to continue the transition of CBP's newly deployed Agents from "bridge" facility solutions to permanent facilities. Bridge solutions were defined to fulfill immediate Agent needs, assuming that longer-term requirements would be met via new construction and leasing projects.

A rapid response component has not been specifically included for FY 2009, pending communication and analysis of the deployment strategy for additional Agents in FY 2009. The plan may be amended in the future as need and deployment strategy dictate.

Additional funding for the Air and Marine Operations Center will enable central command and control of Unmanned Aircraft Systems (UAS) across the entire border and promote full intelligent fusion capability for DHS and national assets.

FY 2009 funds are needed to address critical deficiencies at the land ports of entry, which include the need for enhanced security, upgraded commercial inspection facilities, and

significant age and facility distress. Most CBP owned facilities on the northern border are 30-40 years old and have expired useful life-cycles. Examples of urgent/critical needs include roof replacement and repair, appropriate weather conditioning, and flooding mitigation.

## 2. Significant Changes

The FY 2009 budget request includes special initiative funding for Border Patrol, Air and Marine, housing, and land port of entry facilities. Funding is needed for facilities to accommodate increased presence on both the northern and southern borders and to enhance the mission and operational capabilities of CBP. Funding is also needed to address critical deficiencies at existing facilities.

In FY 2007, funding for Tactical Infrastructure was moved to the Border Security Fencing, Infrastructure, and Technology Appropriation.

## 3. Project Schedule

| Project Locations      | Description                     | Fiscal Year    |                       |
|------------------------|---------------------------------|----------------|-----------------------|
|                        |                                 | Planning Begin | Construction Complete |
| Ajo, Arizona           | 350 Agent Border Patrol Station | April-05       | September-10          |
| Sonoita, Arizona       | 250 Agent Border Patrol Station | April-05       | September-11          |
| Lordsburg, New Mexico  | 350 Agent Border Patrol Station | August-05      | December-09           |
| Welton, Arizona        | 375 Agent Border Patrol Station | December-05    | October-10            |
| Calexico, CA           | 450 Agent Border Patrol Station | January-06     | January-12            |
| Casa Grande, Arizona   | 450 Agent Border Patrol Station | January-06     | December-10           |
| Blythe, CA             | 250 Agent Border Patrol Station | March-07       | December-12           |
| Tucson, Arizona        | Checkpoints SR 85, SR90, & I-19 | June-07        | February-13           |
| Boulevard, California  | 250 Agent Border Patrol Station | January-09     | March-13              |
| Fabens, TX             | 375 Agent Border Patrol Station | January-10     | April-15              |
| Las Cruces, New Mexico | 250 Agent Border Patrol Station | January-10     | March-15              |
| Presidio, TX           | 100 Agent Border Patrol Station | March-10       | February-15           |
| Comstock, TX           | 225 Agent Border Patrol Station | November-08    | October-12            |

|                                  |                                  |            |              |

| Air and Marine Operations Center | Unmanned Aircraft System Command | Nov-08     | Nov-11       |
| Yuma, AZ                         | Hangar                           | Nov-07     | Sep-10       |
| Laredo, TX                       | Hangar                           | Nov-07     | Sep-11       |
| Marfa, TX                        | Hangar                           | Nov-07     | Sep-10       |
| Uvalde, TX                       | Hangar                           | Nov-07     | Sep-11       |
| El Paso , TX                     | Facility Consolidation           | Nov-08     | Sep-12       |
| Southeast UAS                    | Unmanned Aircraft System Center  | Nov-08     | Sep-11       |
| El Centro, CA                    | Hangar                           | Nov-08     | Nov-11       |

Please note that the project schedule provided is subject to change, as operational priority dictates. The schedule is also based on assumptions of funding availability in future years for the listed projects. The schedule does not include a rapid response component at this time, pending identification and analysis of the FY 2009 deployment strategy; however the project listing and associated schedules will likely change if a rapid response requirement is introduced.

#### 4. Schedule of Project Funding

(Dollars in Thousands)

| BP Major Construction – Multiple Projects   |       |           |           |           |           |
|---|-------|-----------|-----------|-----------|-----------|
|   | Prior | FY 2007   | FY 2008   | FY 2009   | Total     |
| Appropriation                               |       | \$187,819 | \$170,026 | \$255,286 | \$613,131 |
| Obligation (planned)                        |       | \$187,819 | \$170,026 | \$255,286 | \$613,131 |

**5. Cost Estimate Detail and Changes  
(Dollars in Thousands)**

Detailed cost estimates for Minor Construction/Repairs and Lease Acquisition Base are developed once funding has been obtained and projects have been prioritized. For Major Construction (Border Patrol, Air and Marine, Housing, and LPOE), a typical breakout by phase is below:

| Major Construction – BP, Air and Marine, Housing, and LPOE Modernization | Estimate         |
|--|------------------|
| <i>Detailed Breakdown of Project phases:</i>                             |                  |
|  |                  |
| Planning, Environmental, Site Acquisition (6%)                           | \$17,812         |
| Design (6%)  | \$17,812         |
| Site Improvement/Utilities (10%)   | \$29,687         |
| Buildings (35%)  | \$103,903        |
| Auxiliary Costs - cabling, furniture, equipment, security (5%)           | \$14,843         |
| Construction Management (4%)   | \$11,875         |
| Project Management (2%)  | \$5,937          |
| Contractors General Conditions and Profit (23%)                          | \$68,279         |
| Escalation to mid point of construction (4%)                             | \$11,875         |
| Contingencies: Construction Phase (5%)                                   | \$14,843         |
|  |                  |
| <b>Project Total:</b>  | <b>\$296,866</b> |

**6. Method of Performance**

Facility construction requirements are executed through the US Army Corps of Engineers. Through a Memorandum of Agreement, the USACE provides CBP with consolidated program management services for real estate planning and acquisition, planning and programming, environmental protection, design and cost engineering, construction and warranty enforcement and integrated occupancy services.

For facilities and construction projects, the schedule and funding are tracked within the current CBP SAP ERP system. The SAP system includes modules that store specific information on each asset. That information is automatically linked to key information systems and includes modules that cover all aspects of the assets. The real property profile performance data can be used to produce financial, procurement, and real property indices for measuring the performance of the assets. Projects in Progress are tracked and reported on a monthly basis by Project Managers in the field. The tracking consists of monitoring the project delivery for construction and leasing through industry standards, including tracking each specific project’s schedule, scope, and budget.

The major performance indices include:

1. Facility Condition - Condition surveys are performed on a periodic basis to ascertain the true condition of the asset. A Strategic Resource Assessment will be the primary means by which this information will be generated in the future.
2. Facility Utilization - These indices track the square footage of space and the number of FTE's assigned.
3. Operating Costs - These indices track the cleaning / janitorial, maintenance and utility costs at the asset level.
4. Mission Dependency - The primary categories include: Mission Critical, Mission Dependent Not Critical, and Non Mission Dependent.
5. Energy Consumption - As part of the Operating Costs Indices, energy consumption and conservation measures are tracked separately.
6. National Historical Preservation Assets - Real Property Assets that could be eligible for the National Historical Preservation List are tracked.

**7. Related Annual Funding Requirements  
(Dollars in Thousands)**

|   | (FY 2009)        |              |
|---|------------------|--------------|
|   | Current Estimate | FY08 Enacted |
| Major Construction – Border Patrol      | \$255,286        | \$170,026    |
| Major Construction – Air and Marine     | \$16,600         | \$30,000     |
| Major Construction – LPOE Modernization | \$10,000         | 0            |
| Minor Construction and Alterations      | \$25,400         | \$34,633     |
| Lease Acquisition                       | \$21,600         | \$21,204     |
| Operations, Maintenance and Repairs     | \$17,600         | \$15,800     |
| Planning                                | \$2,015          | \$12,000     |
| Harpers Ferry                           | 0                | \$39,700     |
| Housing                                 | \$15,000         | \$25,000     |
| Total                                   | \$363,501        | \$348,363    |

**8. Budget Allocation to Programs**

| Program              | Allocated Budget (\$ thousands) |                 |
|----------------------|---------------------------------|-----------------|
|                      | FY 2008 Enacted                 | FY 2009 Request |
| Construction Program | \$348,363                       | \$363,501       |
| Total                | \$348,363                       | \$363,501       |

**9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders**

The construction program complies with the IMMIGRATION AND NATIONALITY ACT (INA), Section 235 Inspection by Immigration Officers; Expedited Removal of Inadmissible Arriving Aliens; Referral For Hearing; Section 287 Powers of Immigration Officers and Employees and in the ILLEGAL IMMIGRATION REFORM AND IMMIGRANT RESPONSIBILITY ACT OF 1996 (IIRIRA) - Section 102 Improvement of Barriers at Border, and the Homeland Security Act of 2002.

**PPA Mission Statement**

Provide the facilities that the US Customs and Border Protection needs to perform its enforcement and trade facilitation mission.

|                                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Transportation of Things</b> | <b>\$563</b>           | <b>\$0</b>              | <b>\$0</b>              | <b>\$0</b>                     |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. No funding is requested for FY09.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Advisory and Assistance Services</b> | <b>\$67</b>            | <b>\$0</b>              | <b>\$0</b>              | <b>\$0</b>                     |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. No funding is requested for FY09.

|                       | <b>FY 2007</b>  | <b>FY 2008</b>   | <b>FY 2009</b>   | <b>FY 2008 to 2009</b> |
|-----------------------|-----------------|------------------|------------------|------------------------|
|                       | <b>Actual</b>   | <b>Enacted</b>   | <b>Request</b>   | <b>Change</b>          |
| <b>Other Services</b> | <b>\$30,828</b> | <b>\$123,372</b> | <b>\$123,017</b> | <b>(\$355)</b>         |

Other services include report contractual services with non-Federal sources that are not otherwise classified under this object class. FY09 Funding request reflects increase in Border Patrol Agent deployment.

|  | <b>FY 2007</b> | <b>FY 2008</b> | <b>FY 2009</b> | <b>FY 2008 to 2009</b> |

| <b>Purchase from Government Accounts</b> | <b>\$77</b>    | <b>\$0</b>     | <b>\$0</b>     | <b>\$0</b>             |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. No funding is requested for FY09.

|  | <b>FY 2007</b>  | <b>FY 2008</b>  | <b>FY 2009</b>  | <b>FY 2008 to 2009</b> |
|--|-----------------|-----------------|-----------------|------------------------|
|  | <b>Actual</b>   | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>          |
| <b>Operation &amp; maintenance of facilities</b> | <b>\$67,588</b> | <b>\$15,800</b> | <b>\$17,600</b> | <b>\$1,800</b>         |

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. FY09 Funding request reflects increase in Border Patrol agent deployment.

|   | <b>FY 2007</b> | <b>FY 2008</b> | <b>FY 2009</b> | <b>FY 2008 to 2009</b> |
|---|----------------|----------------|----------------|------------------------|
|   | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>          |
| <b>Operation &amp; Maintenance of equipment</b> | <b>\$174</b>   | <b>\$0</b>     | <b>\$0</b>     | <b>\$0</b>             |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. No funding is requested for FY09.

|                                 | <b>FY 2007</b> | <b>FY 2008</b> | <b>FY 2009</b> | <b>FY 2008 to 2009</b> |
|---------------------------------|----------------|----------------|----------------|------------------------|
|                                 | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>          |
| <b>Supplies &amp; materials</b> | <b>\$1,149</b> | <b>\$0</b>     | <b>\$0</b>     | <b>\$0</b>             |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. No funding is requested for FY09.

|                  | <b>FY 2007</b>  | <b>FY 2008</b> | <b>FY 2009</b> | <b>FY 2008 to 2009</b> |
|------------------|-----------------|----------------|----------------|------------------------|
|                  | <b>Actual</b>   | <b>Enacted</b> | <b>Request</b> | <b>Change</b>          |
| <b>Equipment</b> | <b>\$63,907</b> | <b>\$0</b>     | <b>\$0</b>     | <b>\$0</b>             |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. No funding is requested in FY09.

|                              | <b>FY 2007</b>   | <b>FY 2008</b>   | <b>FY 2009</b>   | <b>FY 2008 to 2009</b> |
|------------------------------|------------------|------------------|------------------|------------------------|
|                              | <b>Actual</b>    | <b>Enacted</b>   | <b>Request</b>   | <b>Change</b>          |
| <b>Land &amp; Structures</b> | <b>\$227,346</b> | <b>\$287,868</b> | <b>\$222,884</b> | <b>(\$64,984)</b>      |

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. FY09 funding request reflects a decrease for termination of one-time Border Patrol Agent facilities.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U.S. Customs and Border Protection Air and Marine Interdiction, Operation, Maintenance, and Procurement

### **I. Appropriation Overview**

#### **A. Mission Statement:**

We protect the American people and Nation's critical infrastructure through the coordinated use of integrated air and marine forces to detect, interdict and prevent acts of terrorism and the unlawful movement of people, illegal drugs and other contraband toward or across the borders of the United States. CBP Air and Marine's (A&M) core competencies include: air and marine interdiction, air and marine law enforcement, and air and national border domain security. A&M has a staff of over 1,300 personnel, including pilots and aircrew, air and marine law enforcement officers, operations specialists, logistics and maintenance support personnel, and administrative personnel. By the end of FY 2008, mission critical assets will consist of over 286 aircraft (including fixed wing, rotary helicopters, and unmanned aircraft systems), 195 marine vessels, a national air and marine operations center, fixed and mobile surveillance equipment, ground vehicles, training facilities, maintenance facilities, aircraft hangers, and marine facilities located along all of the nation's borders and at key interior support locations.

#### **B. Budget Activities:**

In the summer of 2006, CBP A&M developed and submitted to Congress an Air Strategic Plan that defines the end state for the air force based on ongoing threat assessments, mission requirements determined by higher authority, and the evolving requirements of the Secure Border Initiative (SBI). The plan was updated in FY 2007 to include marine strategic plans, an expanded plan for Unmanned Aircraft Systems (UASs), revised staffing projections, a facilities enhancement approach, and updates to the ten-year investments model provided in the baseline plan submission to Congress. A&M's approach to executing the plan can be divided along the three major border security areas of responsibility (AOR). Five primary air branches and supporting units will be established along the northern border by the second quarter of FY 2008. Consideration will be given to establishing secondary or satellite sites to support the concentration of assets needed to meet specific threats as they are identified. Use of A&M's UAS capabilities to obtain increased intelligence and gain better situational awareness in support of SBI will be expanded based on the results of operational demonstrations conducted from the joint CBP/Air National Guard (ANG) base in North Dakota during early FY 2008. Both air and marine operations will expand along the Great Lakes and the northwestern and northeastern maritime approaches to our borders as additional aircraft, marine vessels, and personnel are deployed. The delivery of new aircraft and additional pilots/air crew will enable increased tactical support to the Border Patrol along the southwest border as the number of agents on the ground increases. The UAS branch, first established in Sierra Vista in FY 2006, will expand its operations as additional systems are delivered and deployed. Within the southeast coastal area of

responsibility (AOR), P-3 aircraft wing operations will increase as assets are delivered from extensive depot-level rework. Use of the UAS in a maritime role will expand based on the results of operational demonstration conducted from Florida in late FY 2008. Maritime demonstrations of UAS capabilities in the Southwest approaches to the U.S. are also planned. Marine operations in the Gulf of Mexico will be enhanced as new interceptor vessels replace the aging Black Night Interceptors and additional sea-borne radar platforms are acquired. The investments needed to achieve A&M's end state and to support the operational objectives discussed above can be described in five broad categories discussed below.

Aircraft Safety and Service Life Extension. The average age of CBP A&M aircraft is over 22 years old, and the aircraft in the P-3 fleet are over 40 years old. In order to extend the useful life of these essential assets, CBP A&M established a Service Life Extension Program (SLEP). Using funds provided in FY 2006 through FY 2008, CBP A&M defined SLEP requirements, purchased new replacement wing/tail assemblies along with long lead critical stress components, and undertook a series of special structural inspections incorporated into planned depot maintenance (PDM) to ensure P-3 aircraft can safely fly for up to 20 additional years. CBP entered into a partnership with the U.S. Navy to share technical information and expertise, share common production capabilities, and to provide mutual parts support. The FY 2009 budget request contains funds within its base to continue sustainment and SLEP efforts.

In cooperation with the U.S. Army, A&M entered into a joint effort to convert up to 16 of its 25-year-old UH-60A Medium Lift Helicopters (MLHs) to UH-60L versions. Based on early projections, the conversions could increase individual aircraft service lives by 10-15 years, and reduce annual maintenance costs by 30-37%. The U.S. Army began its prototype efforts in late FY 2007 and established a fully functional production line in late FY 2008. A&M plans to induct 1-2 helicopters each year depending on operational commitments.

Establishment of a Strategic Intelligence, Surveillance, and Interdiction Capability. In FY 2006, CBP established an Unmanned Aircraft System (UAS) Program that will be the key element of the agency's strategic intelligence, surveillance, and interdiction capability. The total capability will include the P-3 Maritime Patrol Aircraft and the DHC-8 Multi-role Patrol Aircraft (MPA), and will be coordinated by an expanded national Air and Marine Operations Center (AMOC) in Riverside, California that will enable the most efficient use of resources and the timely dissemination of tactical information and new intelligence. The strategic plan currently calls for up to three squadrons of UASs to be deployed along the southwest border, northern border, and southeast maritime operating area. The end-state objectives for the MPA changed in FY 2007. The DHC-8 manufacturer decided to close the DHC-8/Q300 production line in favor of a larger, more commercially viable DHC-8/Q400. CBP A&M has concluded that the larger Q400 is not suitable for its missions and, instead, will pursue the acquisition of a smaller, twin-engine, Multi-Role Enforcement aircraft (MEA) capable of operating effectively over land and water. Requirements will be defined in FY 2008 for an initial acquisition in early FY 2009.

Air Recapitalization and Modernization. The present air fleet consists of 19 different aircraft types. Currently, seven of ten aircraft types have exceeded their normal service life expectancy, some by as much as almost two times the industry average. The impact has been an unavoidable loss of operational sorties because of additional maintenance down time due to increased

inspections and a shrinking pool of spare parts. To accomplish its border security, anti-drug, and customs and immigration enforcement support missions, a more flexible and supportable air fleet is needed. To this end, the air fleet will be standardized, emphasizing the use of multi-mission assets that can be deployed to multiple locations as the threat changes over time. The strategic objective is to reduce the types of aircraft to eight or nine, and to increase the total number of aircraft to a level consistent with operational demands. The total will likely change over time as the nature of the threat changes, therefore the A&M strategic plan and end-state model will be updated accordingly.

Marine Recapitalization and Modernization. A&M will begin to replace its aging fleet of Black Night Interceptor vessels in FY 2008, and plans to continue acquiring replacement vessels in FY 2009. A&M will continue the outfitting of seized boats with radars, sensors, data and communications systems, and at-sea refueling capabilities, to be used as radar platforms. The objective is to have up to 10 platforms deployed across all of the maritime operating areas. Over the past year, A&M has worked with the Border Patrol to standardize the types of riverine vessels providing direct interdiction support to its agents. With the decision made on a new class of riverine vessels, A&M will begin/continue purchasing sufficient assets in FY 2009 to replace the existing craft and to increase the overall size of the riverine force. In addition, A&M will expand marine maintenance and training operations in St. Augustine, FL, and McAllen, TX, with improvements to shops, equipment, and stowage facilities.

### **C. Budget Request Summary**

CBP requests \$528,000,000 for this activity in FY 2009. Excluding emergency funds provided in P.L.110-161, total adjustments-to-base is an increase of \$31,584,000 over FY 2008. Program increases include \$20,369,000 to:

- Provide \$7.0 million to base funding for the acquisition of two Multi-Role Enforcement aircraft and spares, \$6.0 million to base funding for the acquisition of one complete UAS system, ground control and spares, and \$7.4 million to acquire marine interceptor vessels.

## II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA) including Emergency Funding

**Department of Homeland Security**

**Air and Marine Interdiction, Operations, Maintenance, and Procurement**  
**Program Performance Justification**  
(Dollars in thousands)

PPA: OPERATIONS AND MAINTENANCE

|                              | <b>Pos</b> | <b>FTE</b> | <b>Amount</b>    |
|------------------------------|------------|------------|------------------|
| <b>2007 Actual</b>           | ...        | ...        | <b>\$279,709</b> |
| <b>2008 Enacted</b>          | ...        | ...        | <b>353,614</b>   |
| 2009 Adjustment to Base      | ...        | ...        | 26,408           |
| <b>2009 Current Services</b> | ...        | ...        | <b>380,022</b>   |
| 2009 Program Changes         | ...        | ...        | 0                |
| <b>2009 Request</b>          | ...        | ...        | <b>380,022</b>   |
| Total Change 2008-2009       | ...        | ...        | 26,408           |

CBP requests \$380.0 million for this activity. The request is \$26.4 million over FY 2008. This request includes:

- A decrease of \$0.3 million for non-recurrals.
- An increase of \$14.8 million for maintenance for FY 2008 asset increases.
- An increase of \$11.9 million for the FY 07 supplemental tail.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

CBP A&M secures the borders against terrorists, acts of terrorism, drug smuggling and other illegal activity by operating air and marine branches at strategic locations along the borders. Multi-mission aircraft with advanced sensors and communications equipment provide powerful interdiction and mobility capabilities directly in support of detecting, identifying and interdicting suspect conveyances, and apprehending suspect terrorists and smugglers. CBP A&M maximizes the capabilities of air and marine assets through a cohesive joint air operations model for centralized command and control and a responsive and integrated control system for decentralized execution.

CBP A&M partners with numerous stakeholders in performing its missions throughout the continental United States and the western hemisphere. This includes domestic operations at the borders; source, transit and arrival zone operations; interior law enforcement support; and support to other agencies. Truly crosscutting within the Department and the Federal government as a whole, the unique capabilities of CBP A&M serve as both a stand-alone entity and as a force multiplier. In fulfilling the priority mission of CBP to protect the borders, our geographical disposition has shifted from a concentration on the southern border to include all of our Nation's borders. CBP A&M's priority mission is to continue protecting the American

people and critical infrastructure by using an integrated and coordinated air and marine force of over 1,300, to include pilots and air crew, fixed wing aircraft, rotary helicopters, unmanned aircraft systems, marine vessels, a national air and marine operations center, and surveillance equipment, to detect, interdict and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States.

#### FY 2007 Significant Accomplishments

In 2007 CBP A&M air wings flew over 98,000 mission hours in support of national border security operations, and established its fourth primary northern border air branch in North Dakota. The FY 2007 supplemental Appropriation (P.L. 110-28) provided funding to accelerate the establishment of the fifth and last primary air branch in Detroit, MI. In addition to acting as a deterrent to illegal entry into the U.S. by air, land, and sea, CBP A&M air assets were directly involved in the apprehension of 204,665 undocumented aliens; 925 criminal arrests; and the seizure of approximately 200,000 pounds of narcotics, 4 aircraft, 26 marine vessels, 140 vehicles, and over \$105 million in currency.

#### FY 2008 Planned Accomplishments

Establish the fifth and last primary northern border air branch in Detroit, MI. Assess the need for secondary and satellite sites based on the results of operations across the northern border. Expand UAS operations as additional systems are delivered to the southwest border, deployed for test and evaluation to the northern border, and re-outfitted with maritime search radars for test and evaluation in the southeast coastal area of responsibility. Accomplish delivery of new aircraft and the hiring of new pilots and aircrew to enable A&M to respond to the planned increase in Border Patrol agents along the southwest and northern borders. Outfit and deploy to the Great Lakes additional marine interceptors purchased in FY 2007 and FY 2008, and test and evaluate the first new prototype riverine vessels against Border Patrol mission requirements. Incorporate all legacy assets into a single, more effective logistics and maintenance support arrangement as a result of the new nationwide aviation maintenance contracts.

#### FY 2009 Planned Accomplishments

The FY 2009 request supports the continuation of logistics and maintenance integration efforts, expanded flight hours in response to increasing mission demands from the Border Patrol and Immigration and Customs Enforcement. The \$36.7 million provided for improved aviation maintenance in FY 2008 recurs in FY 2009, along with funds for follow-on operational support of the assets shown above. Flight hours across A&M have increased in direct correlation to the growth of ground agents within office of Border Patrol since FY 2006.

## PPA: PROCUREMENT

|                              | <u>Pos</u> | <u>FTE</u> | <u>Amount</u>    |
|------------------------------|------------|------------|------------------|
| <b>2007 Actual</b>           | ...        | ...        | <b>\$217,722</b> |
| <b>2008 Enacted</b>          | ...        | ...        | <b>216,433</b>   |
| 2009 Adjustment to Base      | ...        | ...        | -88,824          |
| <b>2009 Current Services</b> | ...        | ...        | <b>127,609</b>   |
| 2009 Program Changes         | ...        | ...        | 20,369           |
| <b>2009 Request</b>          | ...        | ...        | <b>147,978</b>   |
| Total Change 2008-2009       | ...        | ...        | - 68,455         |

\*The above table includes emergency funding of \$94.0 million provided in P.L. 110-161 for this activity. The FY 2009 Budget Request is \$148.0 million. Excluding emergency funds provided, the increase of \$25.5 million over FY 2008 is for non-pay inflation as well as a program increase for aircraft and vessels acquisitions.

### Current Services Program Description:

The CBP A&M Procurement PPA recurs each fiscal year and is used to acquire new aircraft and marine vessels, retire unserviceable assets, upgrade sensors and surveillance capabilities, and support the expansion of mission capabilities along the borders in response to ongoing threat assessments and mission assignments directed by higher authority.

In FY 2007, the Congress provided \$70 million for the P-3 Service Life Extension Program (SLEP), which is expected to take 8-10 fiscal years to complete for all 16 CBP assets. In FY 2008, the P-3 SLEP funding recurs within this PPA, adjusted as safety and depot repair and material requirements change.

The Unmanned Aircraft Systems PPA was consolidated into this PPA in the FY 2007 enacted budget. Unmanned Aircraft Systems (UASs) will continue to be used in securing the border of the United States by providing strategic intelligence, surveillance, and interdiction support. CBP was the first Federal law enforcement agency to fly UASs on a sustained basis, outside of controlled airspace, within the United States.

Since the start of operations in 2004, UASs have been instrumental in the apprehension of undocumented aliens, the seizure of drugs, and the recovery of stolen vehicles. UASs have proven effective in locating subjects during the hours of darkness and providing a situational awareness and officer safety capability that is unparalleled.

### 2007 Significant Accomplishments

FY 2007 saw the delivery and deployment of the last of 15 new EC-120 Light Observation Helicopters to A&M air branches across the southwest and northern borders, along with the delivery of two new AW-139 Medium Lift Helicopters, and the delivery of the first 2 of 20 new AS-350 Light Enforcement Helicopters. A&M completed the integration and test of its

third DHC-8 Multi-role Patrol Aircraft and accepted the delivery of its fourth asset. In a joint acquisition with the U.S Army, an order was placed for three to four UH-60M Medium Lift Helicopters for delivery starting in FY 2009, and key decisions were made on the final configuration of the Manned Covert Surveillance Aircraft (MCSA) mission package being acquired under a joint CBP/U.S. Coast Guard acquisition. In addition, five new interceptor class marine vessels were purchased and began their deployment to the Great Lakes.

In FY 2007, Congress provided \$70 million of which about \$30 million was used to purchase the new wing/tail assemblies for the SLEP. The remainder was used to continue conducting special structural inspections (SSIs) and extended special structural inspections (ESSIs), acquire other long-lead components, repay the loan of Navy materials needed to place the aircraft back in service as soon as possible, and for emergent requirements coming out of the service life assessment. The FY 2008 budget contains \$47 million in the recurring procurements base to continue new wing/tail procurements, continue the SSIs/ESSIs, and to continue long-lead material purchases.

The results of the P-3 service life assessment were delivered to the government in May 2007, allowing for the definition of SLEP requirements and the development of a new cost estimate through planned completion over the next 8-10 years. Work continued on a competitive contract for the SLEP with a projected award in late FY 2008 or early FY 2009. A&M continued to conduct a series of SSIs and ESSIs according to Navy standards, which has allowed the P-3 aircraft to operate safely until they undergo complete over haul and their service lives can be extended by about 20 years. A&M awarded a contract for 2-3 new wing and tail assemblies for the SLEP, which should be delivered in FY 2009, along with numerous long-lead components needed for both the SSIs/ESSIs and the SLEP.

FY 2007 funding for the UAS Program totaled of \$30.4 million. These funds allowed A&M to complete the purchase of the last two of six systems placed on order in FY 2006 and FY 2007. UAS number two, delivered in the summer of 2007, was used to conduct an operational test along the northern border. Work began on the capability to command all of CBP's UASs from the Air and Marine Operations Center (AMOC) in Riverside, CA, and some control room components were acquired along with the last two systems.

In addition of all of the above, the fourth of five primary air branch sites along the northern border was established at Grand Forks, North Dakota. The FY 2007 supplemental appropriation (P.L. 110-28) provided funding to accelerate the establishment of the fifth and last primary air branch in Detroit, MI.

#### 2008 Planned Accomplishments

The fifth and final primary air branch along the northern border will open in the second quarter of FY 2008. A&M will continue several acquisition efforts started in FY 2007 including: five additional Light Observation Helicopters (LOH), bringing the total EC120 to 20; the purchase of new UH-60M MLHs; the purchase of up to three Multi-Role Enforcement Aircraft as the follow on platform for the DHC-8 MPAs which were taken out of production by the manufacturer in FY 2007, and the purchase and delivery of up to 18 new AS-350 LEHs. A contract will be awarded for up to three new sensor packages for the C-550 Interceptor aircraft,

with the first deliveries to start before the end of the fiscal year. The conversion of UH-60A MLHs to UH-60Ls will start with the first aircraft to be inducted into the Army production line in 2008. In addition, \$1.1 million in the recurring procurement base will be used to purchase marine interceptors to replace the Black Night Interceptors. \$12 million was provided to establish 11 new marine enforcement units.

The FY 2008 enacted budget included \$47.0 million to continue the P-3 SLEP and extend the service life of CBPs existing aircraft by about 20 years. The FY 2009 budget request includes \$9.0 million above that level, for a total funding level of \$56 million for P-3 SLEP in keeping with the A&M Strategic Plan. The funds will be used to continue new wing/tail assembly procurements, purchase wing/tail refurbishment kits for aircraft that do not need new wings/tails, continue the special structural inspections (SSI) and extended special structural inspections (ESSI), and begin the SLEP of the first of the 16 P-3 aircraft in the CBP inventory.

The \$18 million in recurring procurement funds for the UAS Program will enable A&M to purchase synthetic aperture radars (SARs) for its Predator-B aircraft, ground control units for deployment of the systems to multiple locations, and spare parts to improve operational readiness. It should also cover the costs for a test of UAS maritime surveillance capabilities.

#### 2009 Planned Accomplishments

The FY 2009 budget request will enable A&M to continue acquisitions started in FY 2008 and to purchase additional assets including one complete UAS with ground control and spares, two Multi-Role Enforcement Aircraft which replace the Multi-Role Patrol Aircraft taken out of production in FY 2007, conversion of two UH-60A to L model MLHs, 1 C-550 interceptor upgrade, maritime interceptors, radar platforms, riverine craft and additional spare parts for improved readiness.

Description of Item

This initiative will increase CBP’s ability to detect and respond to land and maritime incursions along our Nation’s borders preventing drug trafficking, alien smuggling and other criminal activities, including terrorist networks. The following draft spend plan depicts approximately how resources would be distributed:

- \$7.0M, added to current base funding for the acquisition of two Multi-Role Enforcement aircraft and spares
- \$6.0M, added to current base funding for the acquisition of one complete UAS system, ground controls, and spares
- \$7.4M to acquire 49 marine interceptor vessels

Justification

Current intelligence suggests the threat to national security manifests itself primarily in the potential for regular and repeated encounters with foreign terrorists and their conveyances both between and at the ports of entry (POEs). This enhancement will improve surveillance and response. This request is consistent with CBP’s overall recapitalization strategy.

FY 2009 additional funding to the procurement base will enable the acquisition of two additional aircraft and spares, the acquisition of one complete Unmanned Aircraft System and the acquisition of marine vessels to be deployed to various sites and for the operating tempo to be increased across the border. With the first UAS demonstrations completed in FY 2007 and FY 2008, a flexible basing and deployment scheme will be in place, allowing CBP to gain vital intelligence and situational awareness. An additional UAS will be added to its fleet to execute upon this basing and deployment scheme.

Within the total enhanced border security approach, emphasis on gaining control along the Great Lakes and St. Lawrence Seaway will be supported by the new marine vessels acquisition started in FY 2007. Five new interceptor class vessels will have been deployed for nearly a year with more new vessels being delivered by the start of FY 2009. The introduction of additional riverine craft will give the Border Patrol expanded shallow water interdiction capabilities. As FY 2009 progresses, periodic surge operation into suspect transit corridors will help determine if additional marine operating sites will be required along the lakes to reduce transit times to areas of high threat traffic.

Working with UASs launched from multiple sites and MPA's deployed from Detroit, marine units from Detroit, Buffalo and Swanton will enforce border security and gain operational intelligence. In addition to supporting ground and marine interdiction operation, fixed wing, short-range reconnaissance and interceptor aircraft will engage in air interdiction and suspect tracking.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

This enhancement directly supports DHS Strategic Goal #1: Effectively Control our Borders. Air and Marine provides direct marine and aerial support to CBP, DHS, as well as, other Federal, State and local law enforcement. The impact of not receiving funding jeopardizes Air and Marine's capacity and capability to sustain traditional and emergent operations, including the Secure Border Initiative.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
U.S. Customs and Border Protection  
Justification of Proposed Changes  
Air and Marine Interdiction, Operations, Maintenance, and Procurement  
Appropriation Language**

For necessary expenses for the operations, maintenance, and procurement of marine vessels, aircraft, unmanned aircraft systems, and other related equipment of the air and marine program, including, operational training and mission-related travel, and rental payments for facilities occupied by the air or marine interdiction and demand reduction programs, the operations of which include the following: the interdiction of narcotics and other goods; the provision of support to Federal, State, and local agencies in the enforcement or administration of laws enforced by the Department of Homeland Security; and at the discretion of the Secretary of Homeland Security, the provision of assistance to Federal, State, and local agencies in other law enforcement and emergency humanitarian efforts, **\$528,000,000** [\$570,047,000], to remain available until expended: [Provided, That of the amount provided under this heading, \$94,000,000 is designated as describe in section 5 (in the matter preceding division A of this consolidate Act):] *Provided [further],* That no aircraft or other related equipment, with exception of aircraft that are one of a kind and have been identified as excess to United States Customs and Border Protection requirements and aircraft that have been damaged beyond repair, shall be transferred to any other Federal agency, department, or office outside of the Department of Homeland Security during fiscal year [2008] **2009** without the prior notification to the Committees on Appropriations of the Senate and the House of Representatives. (*Department of Homeland Security Appropriations Act, 2008.*)

### 1. Project Description, Justification and Scope

#### Project Description

In the summer of 2006, CBP A&M developed and submitted to Congress a Strategic Air Plan that defines the end state for the air force based on ongoing threat assessments, mission requirements determined by higher authority, and the evolving requirements of the Secure Border Initiative (SBI). In 2007, this Plan was updated to incorporate Marine vessels and Unmanned Aircraft Systems (UAS). The UAS PPA was formally merged into CBP A&M Procurement PPA in FY 2007.

The Air Plan calls for the air and marine fleets to be standardized, emphasizing the use of multi-mission assets that can be deployed to multiple locations as the threat changes over time. The O&M Procurement PPA recurs each fiscal year and is used to acquire new aircraft and marine vessels, UAS, retire unserviceable assets, upgrade sensors and

surveillance capabilities, and support the expansion of mission capabilities along the borders in response to ongoing threat assessments and mission assignments directed by higher authority.

**Program Justification**

*Gain operational control of the borders*

Through the coordinated use of integrated air and marine force to detect, interdict and prevent acts of terrorism and the unlawful movement of people, illegal drugs and other contraband toward or across the borders of the United States. Terrain, weather, and distance are significant obstacles along much of the southern, northern, and coastal borders. Air & Marine support acts as a force multiplier, allowing personnel and equipment to be transported efficiently and effectively. This support also provides rapid-response relocation of personnel and equipment, to safeguard people and critical infrastructure from acts of terrorism, natural disasters and other emergencies. The Air Safety and Life Extension Contract supports the aircraft that makes it possible for CBP Air & Marine to perform this mission.

**2. Significant Changes**

The funds requested will enable continued support for program operations through FY 2009 and include an increase to maintain current levels.

**3. Project Schedule**

|                   | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
|-------------------|---------|---------|---------|---------|
| Aircraft Acquired | 16      | 14      | 30      | 2       |

**5. Cost Estimate Detail and Changes  
(Dollars in Thousands)**

Not Applicable

**6. Method of Performance**

1. Is there a project (investment) manager assigned to the investment?

Yes

If so, what is his/her name?

Charles Bourquardez

2. Is there a contracting officer assigned to the investment?

Yes

If so, what is his/her name?

Sharon Lim

3. Is there an Integrated Project Team?

Yes

If so, list the skill set represented.

The IPT is comprised of individuals from the Office of CBP Air, Office of Finance, Office of Information and Technology, Technology Systems Program Office (TSPO), Office of Chief Counsel, SBI-PMO, and Office of Border Patrol representing systems acquisition, project management, systems engineering, legal review and test and acceptance.

4. Is there a sponsor/owner for this investment?

Yes

If so, identify the sponsor/process owner by name and title and provide contact information.

Michael C. Kostelnik, Assistant Commissioner, Office of CBP Air & Marine, (202) 344-3950.

| Fiscal Year | Strategic Goal(s) Supported  | Performance Measure / Type                                  | Explanation or Description  | Target or Goal  | Actual Performance Results  | Performance Metric Improvement   |
|-------------|--|---|---|---|---|--|
| 2009        | DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity | Provide Strategic Air Coverage<br><br>Long Term/<br>Outcome | This measure shows the progress made toward expanding strategic air surveillance coverage along the borders and approaches to the borders of the U.S. by the end of the decade. The measure is the percent of border miles at risk that is under surveillance by CBP patrol-type aircraft (including unmanned aircraft systems). Measuring surveillance is an evolving metric. In FY 2003 and FY 2004 metrics were based on the measurement of 7200 P-3 flight hours provided in support of drug enforcement. In FY 2005, the UAV was | 2003 – 2400<br><br>2004 – 2400<br><br>2005 – 7200<br><br>*2006 – 7200<br><br>2007 – 60% (of border at risk)<br><br>2008 – 70%<br><br>2009 – 80%<br><br>2010 – 90% | 2003 – 4700<br><br>2004 – 6700<br><br>2005 – 7500<br><br>2006 – 55% | Effective FY07 the measure will be represented by the miles of at risk borders under strategic air surveillance in response to the anti-terrorism mission. |

|      |  |   |  |  |  |     |
|------|--|---|--|--|--|-----|
|      |  |   | introduced and added to these total hours.   |  |  |     |
| 2009 | DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity | Extend the Zone of Security Beyond the Nation's Physical Boundaries<br><br>Long Term/ Outcome | This measure monitors A&M efforts in reducing, with the intent of ultimately denying, the use of border air space for acts of terrorism or smuggling using intelligence and threat assessments. The number of Targets of Interest (TOI) has been reduced over time as strategic surveillance and tactical responses by CBP interceptors and patrols, work with the Border Patrol on the ground, to deter the use of air routes into the U.S. A&M continues to gather and analyze intelligence on past and current threat | 2003 – 20<br>2004 – 11<br>2005 – 10<br>2006 – 10<br>2007 – 10<br>2008 – 10 | 2003 – 20<br>2004 – 11<br>2005 – 10<br>2006 – 13 | N/A |

|  |  |  |   |  |  |  |
|--|--|--|---|--|--|--|
|  |  |  | <p>patterns to forecast and disseminate information about potential and emerging threats. To highlight the effectiveness of these practices, commencing in the 1970's, there were over 7,000 known Targets Of Interests (TOI) violating the southwestern border airspace. This number was reduced to approximately 150 in the mid-1980's and further reduced to 10 in 2005. The targeted goal for this measure is to maintain this low level of border incursions at a minimum and reduce it if possible, until there are no border incursions.</p> |  |  |  |

**Mission Statement**

CBP Air & Marine (A&M) is responsible for the protection of the people and critical infrastructure of the United States. CBP A&M identifies, deters, interdicts, and investigates acts of terrorism and smuggling arising from unlawful movement of people and goods into and out of the United States with an integrated and coordinated air and marine force. CBP A&M has historically conducted missions along the southern borders of the United States, Mexico, South America and the Caribbean. Since September 11, 2001, CBP A&M has established a presence along the Northern Border. CBP A&M has a staff of over 1,300 pilots, law enforcement officers, operational support, and administrative positions. Mission critical assets consist of aircraft (including fixed wing and rotary helicopters), marine vessels, P-3 surveillance aircraft, surveillance equipment, maintenance facilities and hangars. With the transfer of the Unmanned Aircraft Systems (UAS) and Border Patrol assets, U. S. Customs and Border Protection (CBP) has been able to achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets.

**Summary Justification and Explanation of Changes**

|                       | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008-2009<br>Change |
|-----------------------|----------------|-----------------|-----------------|---------------------|
| <b>Travel (OC 21)</b> | \$ 9,087       | \$ 17,336       | \$ 15,240       | \$ (2,096)          |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Decrease reflects reprogramming of \$1,500,000 to S&E, and a cost savings of (\$596,000).

|   | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008-2009<br>Change |
|---|----------------|-----------------|-----------------|---------------------|
| <b>Transportation of Things (OC 22)</b> | \$ 877         | \$ 1,565        | \$ 942          | \$ (623)            |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidents to the transportation of things. Decrease reflects a cost saving of (\$623,000).

|                            | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008-2009<br>Change |
|----------------------------|----------------|-----------------|-----------------|---------------------|
| <b>Other Rent (OC23.2)</b> | \$ 14,282      | \$ 19,348       | \$ 14,741       | \$ (4,607)          |

Payments to a non-Federal source for rental of space, land, and structures. Decrease reflect a cost saving of (\$4,607,000).

|                                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008-2009<br>Change |
|---------------------------------|----------------|-----------------|-----------------|---------------------|
| <b>Other Services (OC 25.2)</b> | \$ 179,710     | \$ 246,718      | \$ 255,765      | \$ 9,047            |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Increase reflects an increase of \$26,801,000 for adjustments to base for maintenance and operation of FY 2008 initiatives, a decrease of \$15,500,000 in carryover from FY 2008 and a reprogramming of \$2,000 to S&E, and a decrease of base adjustment of \$254,000.

|   | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008-2009<br>Change |
|---|----------------|-----------------|-----------------|---------------------|
| <b>Supplies &amp; materials (OC 26.0)</b> | \$ 72,001      | \$ 82,605       | \$ 73,558       | \$ (9,047)          |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction of manufacture, (c) used to form a minor part of equipment of property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. Decrease of \$9,047,000 reflects decrease of \$4,000,000 in carryover from FY 2008, \$1,500,000 in reprogramming to S&E, and a cost savings of (\$3,547,000).

|                            | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008-2009<br>Change |
|----------------------------|----------------|-----------------|-----------------|---------------------|
| <b>Equipment (OC 31.0)</b> | \$ 3,752       | \$ 5,575        | \$ 19,777       | \$ 14,202           |

Equipment includes all costs for the purchase of personal property of a durable nature or the installation of equipment when performed under contract. Increases reflects adjustment to base of \$14,202,000 for maintenance and operation of FY 2008 initiatives.

|                                 | Actual    | Enacted   | Request  | Change      |
| <b>Other Services (OC 25.0)</b> | \$ 24,031 | \$ 55,652 | \$ 4,378 | \$ (51,274) |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Net change reflects decrease of \$19,330,000 in carryover from FY 2008, \$9,000,000 annualization for P-3 SLEP and \$40,944,000 non-recur of FY 2008 increase.

|   | 2007     | 2008      | 2009      | 2008-2009 |
|---|----------|-----------|-----------|-----------|
|   | Actual   | Enacted   | Request   | Change    |
| <b>Supplies &amp; materials (OC 26.0)</b> | \$ 1,773 | \$ 27,355 | \$ 40,367 | \$ 13,012 |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction of manufacture, (c) used to form a minor part of equipment of property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. Change reflects increase of \$13,012,000 for Aircraft/Vessels Acquisitions.

|                            | 2007       | 2008       | 2009       | 2008-2009    |
|----------------------------|------------|------------|------------|--------------|
|                            | Actual     | Enacted    | Request    | Change       |
| <b>Equipment (OC 31.0)</b> | \$ 168,621 | \$ 403,140 | \$ 103,106 | \$ (300,034) |

Equipment includes all costs for the purchases of personal property of a durable nature or the installation of equipment when performed under contract. Funding provides for the procurement of aircraft. Change reflects an increase of \$7,357,000 for Aircraft/Vessels Acquisitions, decrease of \$56,254,000 non-recur for FY 2008 funding increases, and a decrease of \$251,137,000 in carryover from FY 2008.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U.S. Customs and Border Protection COBRA User Fees

### I. Appropriation Overview

#### A. Mission Statement for Appropriation Name:

Customs and Border Protection user fees are authorized under Title 19 U.S.C. 58c, fees for certain customs services. The fees were created by the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA). COBRA fees are made available through permanent/indefinite appropriation created by the user fee statute. CBP collects customs inspection fees to cover the cost of providing customs inspections of commercial operations, including, but not limited to, all costs associated with commercial passenger, vessel, vehicle, aircraft, and cargo processing.

The fees are deposited in the Customs and Border Protection User Fee Account (No Year) at the U.S. Treasury. The excess of collections over inspectional overtime and preclearance costs are available without fiscal year limitation, except that \$30 million of such excess remains in a contingency fund for use in any year in which receipts are insufficient to cover the costs of providing the services described in the statute.

The COBRA statute mandates that the fee collections be used to pay for (in the order listed):

- All inspectional overtime
- Premium Pay
- Civil Service Retirement and Disability Fund (Agency Contribution)
- Excess Preclearance
- Foreign Language Proficiency Awards
- Enhanced Equipment and Support

#### B. Budget Activities:

Not Applicable

#### C. Budget Request Summary

Collections for COBRA Fees in FY 2009 are estimated at \$410,666,129 and an increased of \$18,520,000 over FY 2008. This increase reflects an expected air passenger growth rate forecasted by the Federal Aviation Administration (FAA).

\* FY 2007 and FY 2008 values reflect updated collections and estimates

Most of the COBRA User fees have not been raised since original authority was given in the Consolidated Omnibus Budget Reconciliation Act of 1985. The fees are set legislatively and any rate adjustments require a statutory change. These limitations were modified by the American Jobs Creation Act of 2004 (P.L. 108-357 Section 892). The Act provided authority to increase COBRA individual fees up to ten percent for each fee beginning in FY 2006.

The majority of funds for COBRA fees come from air passenger fees. For FY 2009, the increase in the COBRA collection is primarily driving by an expected 4.8% increase in air passenger volume based on the Federal Aviation Administration's (FAA) air passenger volume forecast and observed trends in user fee collections.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The components of the COBRA User fee account are: international air and sea passenger, commercial trucks, loaded rail cars, commercial vessels, private aircraft and vessels, dutiable mail, customs broker permits, barges/bulk carriers and cruise vessel passenger fees.

**PPA Mission Statement**

Customs and Border Protection user fees are authorized under Title 19 U.S.C. 58c, fees for certain customs services. The fees were created by the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA). COBRA fees are made available through permanent/indefinite appropriation created by the user fee statute. CBP collects customs inspection fees to cover the cost of providing customs inspections of commercial operations, including, but not limited to, all costs associated with commercial passenger, vessel, vehicle, aircraft, and cargo processing.

The fees are deposited in the Customs and Border Protection User Fee Account (No Year) at the U.S. Treasury. The excess of collections over inspectional overtime and preclearance costs are available without fiscal year limitation, except that \$30 million of such excess remains as a contingency for use in any year in which receipts are insufficient to cover the costs of providing the services described in the statute.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Customs and Border Protection Immigration Inspection User Fees (IUF)**

### **I. Appropriation Overview**

#### **A. Mission Statement for Appropriation Name:**

The Department of Justice Appropriation Act of 1987 (P.L. 99-591) authorized the collection of user fees for processing commercial air and sea passengers. This law codified as 8 U.S.C. 1356(h) established the two fees to generate revenues that would reimburse, “the appropriation for expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels.”

#### **B. Budget Activities:**

Not Applicable

#### **C. Budget Request Summary**

Collections for CBP IUF in FY 2009 are estimated at \$570,059,000, an increase of \$8,105,000 over FY 2008. This increase is attributable to an increase in air passenger arrivals from foreign locations (Based on the Federal Aviation Administration’s air passenger forecast and observed collection trends) and a minor reduction in the volume of cruise line passengers based on observed collection trends. The collections estimate represents CBP’s portion of the immigration user fee.

\* FY 2007 and FY 2008 values reflect updated collections and estimates

As established by a Memorandum of Understanding (MOU) signed by CBP and ICE in 2004, collections from air and sea passenger inspection user fee are shared between the two DHS components in an 82.63% and 17.37% basis, respectively. CBP expects to receive an additional \$8.1 million from IUF collections in FY 2009. This increase is attributable to an increase in air passenger arrivals from foreign locations (Based on the Federal Aviation Administration's air passenger forecast and observed collection trends) and a minor reduction in the volume of cruise line passengers based on observed collection trends.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

These funds will be used for the maintenance and updating of systems to track criminal and illegal aliens at air and sea ports of entry in areas with high apprehensions to deter illegal entry, and the repair, maintenance, and construction of border facilities.

As authorized by law, funds from the immigration user fees are used by CBP and ICE to cover the costs of immigration inspection services. At air and sea ports of entry specifically, the fees cover the costs of immigration personnel, the maintenance and updating of systems to track criminal and illegal aliens in areas with high apprehensions to deter illegal entry, and the repair, maintenance, construction of border facilities, and detention and removal services.

**PPA Mission Statement**

The Department of Justice Appropriation Act of 1987 (P.L. 99-591) authorized the collection of user fees for processing commercial air and sea passengers. This law codified as 8 U.S.C. 1356(h) established the two fees to generate revenues that would reimburse "the appropriation for expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels."

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U.S. Customs and Border Protection Land Border Inspection Fee

### I. Appropriation Overview

#### A. Mission Statement for Appropriation Name:

The Department of Justice Appropriation Act of 1990 (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the fees to recover costs incurred in the following categories involving the operation of various pilot programs:

- Overtime inspection services;
- Expansion, operation and maintenance of information technology systems for non-immigrant control;
- The hiring of temporary and permanent inspectors;
- Minor construction costs associated with the addition of new traffic lanes;
- Detection of fraudulent travel documents; and
- Administrative expenses of account.

The following fees are deposited into the Land Border Inspection Fee account:

- Dedicated Commuter Lane additional vehicle (DCL)
- Arrival/Departure Land Border (I-94)
- Non-Immigrant Visa Waiver (I94W)
- Canadian Boat Landing Permit Individual (I-68)
- Canadian Boat Landing Permit Family (I-68)
- Replacement of Non-resident Mexican Crossing (I-190)
- NEXUS
- SENTRI
- Fast Driver Application Fee

#### B. Budget Activities:

Not applicable.

### **C. Budget Request Summary**

Collections for Land Border Inspection Fee in FY 2009 are estimated at 287 positions and \$26,880,129. An increase of \$371,126 over FY 2008 is based on higher than expected growth in some of the fee categories and a change in the SENTRI program. In the past, enrollment and fee payment for the SENTRI program was required every two years. It is now every five years, which will decrease the funds available in this account by changing the fee payment cycle.

CBP anticipates an increase of \$ 371,000 in Land Border Inspection Fees in FY 2009 as compared to the FY 2008 Request.

#### **CURRENT SERVICES PROGRAM DESCRIPTION**

As authorized by law, Land Border Inspection Fees are used to cover part of CBP's costs of immigration inspections at land border ports of entry. This includes inspections of pedestrians, buses, passenger occupancy vehicles, and rail cars. It also includes antiterrorism efforts, dedicated lane programs, and forms processing.

**PPA Mission Statement**

The Department of Justice Appropriation Act of 1990 (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the fees to recover costs incurred in the following categories involving the operation of various pilot programs:

- Overtime inspection services;
- Expansion, operation and maintenance of information technology systems for nonimmigrant control;
- The hiring of temporary and permanent inspectors;
- Minor construction costs associated with the addition of new traffic lanes;
- Detection of fraudulent travel documents; and
- Administrative expenses of account.

**Summary and Justification of Explanation changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Salaries and Benefits</b> | <b>\$32,748</b>        | <b>\$27,733</b>         | <b>\$26,591</b>         | <b>(\$1,143)</b>              |

Salaries and Benefits include costs for 287 FTEs.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Travel</b> | <b>\$9</b>             | <b>\$0</b>              | <b>\$0</b>              | <b>\$0</b>                    |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations.

|  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|--|----------------|-----------------|-----------------|-----------------------|
| <b>Communication, Utilities, and miscellaneous charges</b> | \$74           | \$0             | \$0             | \$0                   |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

|   | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Customs and Border Protection Immigration Enforcement Fines**

### **I. Appropriation Overview**

#### **A. Mission Statement for Appropriation Name:**

The Immigration Enforcement account was established under Section 382 of the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996. Previously, similar fines were collected and deposited into the Immigration User Fee account. In addition to creating this account, IIRIRA also added new types of fines, such as those fines levied against aliens for failure to depart the United States after being so ordered.

The authorized uses of this fund consist of the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

#### **B. Budget Activities:**

Not applicable.

#### **C. Budget Request Summary**

Collections for Immigration Enforcement Fines in FY 2009 are estimated at \$3,331,000, an increase of \$47,000 over FY 2008. This increase reflects an expected air passenger growth rate forecasted by the Federal Aviation Administration.

\* FY 2007 and FY 2008 values reflect updated collections and estimates

Due to an anticipated increase in air passengers arriving to the United States from foreign locations, as forecasted by the Federal Aviation Administration (FAA) and based on observed collection trends, collections in Enforcement Fines are projected to increase by \$47,000 in FY 2009.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

These funds will be used for the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens at air and sea ports of entry in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

**PPA Mission Statement**

The Immigration Enforcement account was established under Section 382 of the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996. Previously, similar fines were collected and deposited into the Immigration User Fee account. In addition to creating this account, IIRIRA also added new types of fines, such as those fines levied against aliens for failure to depart the United States after being so ordered.

The authorized uses of this fund consist of: the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Customs and Border Protection APHIS User Fees**

### **I. Appropriation Overview**

#### **A. Mission Statement for Appropriation Name:**

Section 2509 of the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorized USDA to collect user fees for various services. The law codified as 21 U.S.C. 136 established seven types of Plant Protection and Quarantine (PPQ) user fees, six of which are the Agriculture Quarantine and Inspection (AQI) fees, known to CBP as the APHIS user fees. The six established processing fees are for international air passenger, commercial aircraft clearance, commercial vessel, commercial truck, commercial truck decal and loaded rail car. The revenues from these fees are used to reimburse the full costs incurred in providing the inspectional activities associated with the APHIS user fees.

#### **B. Budget Activities:**

Not Applicable

#### **C. Budget Request Summary**

Collections for APHIS Fees in FY 2009 are estimated at 2,332 positions and \$333,433,000. The total adjustments-to-base is \$12,824,000. The estimated increase in collections is primarily driven by an anticipated growth in air passengers arriving from foreign location, as forecasted by the Federal Aviation Administration (FAA) and based on observed collection trends.

\* FY 2007 and FY 2008 values reflect updated collections and estimates

CBP anticipates an increase of \$12.8 million in APHIS fees during FY 2009 based on the Federal Aviation Administration (FAA) air passenger volume forecast and based on observed collection trends.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

These funds will be used for international air passenger, commercial aircraft clearance, commercial vessel, commercial truck, commercial truck decal and loaded rail car inspectional activities associated with the APHIS user fees.

**PPA Mission Statement**

Section 2509 of the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorized USDA to collect user fees for various services. The law codified as 21 U.S.C. 136 established seven types of Plant Protection and Quarantine (PPQ) user fees, six of which are the Agriculture Quarantine and Inspection (AQI) fees, known to CBP as the APHIS user fees. The six established processing fees are for international air passengers, commercial aircraft clearance, commercial vessels, commercial trucks, commercial truck decals, and loaded rail cars. The revenues from these fees are used to reimburse the full costs incurred in providing the inspectional activities associated with the passengers and conveyances that are subject to the fees.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Customs and Border Protection Small Airport User Fee**

### **I. Appropriation Overview**

#### **A. Mission Statement for Appropriation Name:**

Small or User Fee Airport Facilities is authorized under Title 19 U.S.C. 58b and administered under Title 19 U.S.C. 58c (b) (9) (A) (i). The User Fee Airports program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The fee charged under this program is set forth in a Memorandum of Agreement between the small or user fee airport facility and the agency, and may be adjusted annually as costs and requirements change.

#### **B. Budget Activities:**

Not applicable.

#### **C. Budget Request Summary**

Collections for Small Airport User Fee requests 54 positions and \$7,057,000 for FY 2009.

## II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)

\* FY 2007 values reflect updated collections

There are no increases for FY 2009.

#### **CURRENT SERVICES PROGRAM DESCRIPTION**

The User Fee Airports program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The amount charged is determined by how many CBP Officers are stationed at the port and whether it is a new or existing facility. New facilities have a higher charge for the first year to recover up front costs.

### PPA Mission Statement

Small Airport Facilities is authorized under Title 19 U.S.C. 58b and administered under Title 19 U.S.C. 58c (b) (9) (A) (i). The User Fee Airports program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The fee charged under this program is set forth in a Memorandum of Agreement between the small airport facility and the agency, and may be adjusted annually as costs and requirements change.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Customs and Border Protection Puerto Rico Trust Fund**

### **I. Appropriation Overview**

#### **A. Mission Statement for Appropriation Name:**

Title 48 U.S.C. 740 authorizes the collections of duties, user fees and taxes in Puerto Rico and the creation of the Puerto Rico Trust Fund . Collections in Puerto Rico, less the costs of providing inspection and law enforcement services in the Island, are paid into the treasury of Puerto Rico, to be expended as required by law for the Government of Puerto Rico and the benefit thereof. These collections are intended to fund the inspection of passengers and merchandise entering Puerto Rico from foreign locations, and to combat criminal elements that have focused on Puerto Rico as a gateway to illegally introduce narcotics into the mainland of the U.S.

#### **B. Budget Activities:**

Not applicable.

#### **C. Budget Request Summary**

Collections of duties, user fees, and taxes in Puerto Rico in FY 2009 are estimated at \$96,719,000. Based on collection trends and the economic recession Puerto Rico is currently facing, CBP expects a one percent (1%) decrease in collections in FY 2009.

\* FY 2007 and FY 2008 values reflect updated collections and estimates

A decrease of \$971,000 from FY 2008 Request is anticipated, due to observed collection trends and the economic recession Puerto Rico is currently facing

#### **CURRENT SERVICES PROGRAM DESCRIPTION**

CBP and US Immigration and Customs Enforcement (ICE) have entered into a Memorandum of Agreement with the government of Puerto Rico to provide customs inspection and enforcement services in Puerto Rico and enhancing the enforcement of United States laws. This includes the collecting of the duties and taxes deposited into this trust fund. In exchange, CBP and ICE are reimbursed for these services from the trust fund.

### PPA Mission Statement

The duties and taxes related to the Puerto Rico Trust Fund are authorized under Title 48 U.S.C. 740. The duties and taxes collected in Puerto Rico, less the costs of providing inspection and law enforcement services, are paid into the treasury of Puerto Rico, to be expended as required by law for the Government of Puerto Rico and the benefit thereof. These funds are intended to combat criminal elements who have focused on Puerto Rico as a gateway to illegally introduce narcotics into the mainland of the U.S.

|                              | <b>2007<br/>Actual</b> | <b>2007<br/>Enacted</b> | <b>2008<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | <b>\$47,622</b>        | <b>\$33,511</b>         | <b>\$31,496</b>         | <b>(\$2,016)</b>               |

Salaries and Benefits include costs for 529 FTE.

| <b>Other Services</b> | \$10,457               | \$41,997                | \$39,472                | (\$2,525)                      |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

|  | <b>2007<br/>Actual</b> | <b>2007<br/>Enacted</b> | <b>2008<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|--|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Purchase from Government Accounts</b> | \$29,404               | \$0                     | \$0                     | \$0                            |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2006 request includes an increase of \$372,000 in non-pay inflation.

|  | <b>2007<br/>Actual</b> | <b>2007<br/>Enacted</b> | <b>2008<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|--|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Operation &amp; maintenance of facilities</b> | \$483                  | \$0                     | \$0                     | \$0                            |

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2006 request includes an increase of \$83,000 in non-pay inflation.

|   | <b>2007<br/>Actual</b> | <b>2007<br/>Enacted</b> | <b>2008<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Operation &amp; Maintenance of equipment</b> | \$2,394                | \$0                     | \$0                     | \$0                            |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2006 request includes an increase of \$115,000 in non-pay inflation.

|                                 | <b>2007<br/>Actual</b> | <b>2007<br/>Enacted</b> | <b>2008<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Supplies &amp; materials</b> | \$1,026                | \$0                     | \$0                     | \$0                            |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

|                  | <b>2007<br/>Actual</b> | <b>2007<br/>Enacted</b> | <b>2008<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Equipment</b> | \$1,964                | \$22                    | \$21                    | \$0                            |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

|                              | <b>2007<br/>Actual</b> | <b>2007<br/>Enacted</b> | <b>2008<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Land &amp; Structures</b> | <b>\$0</b>             | <b>\$1,104</b>          | <b>\$1,038</b>          | <b>(\$66)</b>                  |

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease.

|                                       | <b>2007<br/>Actual</b> | <b>2007<br/>Enacted</b> | <b>2008<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Grants/Subsidies/Contributions</b> | <b>\$14,158</b>        | <b>\$1,609</b>          | <b>\$1,512</b>          | <b>(\$97)</b>                  |

Grants/subsidies/contributions include cash payments to States, other political subdivisions, corporations, associations, individual, etc.

|                | <b>2007<br/>Actual</b> | <b>2007<br/>Enacted</b> | <b>2008<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|----------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Refunds</b> | <b>\$0</b>             | <b>16,820</b>           | <b>15,809</b>           | <b>(1,011)</b>                 |

Payments of amounts previously collected by the Government.

|                    | <b>2007<br/>Actual</b> | <b>2007<br/>Enacted</b> | <b>2008<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|--------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Unvouchered</b> | <b>\$0</b>             | <b>\$4,422</b>          | <b>\$4,156</b>          | <b>(\$266)</b>                 |

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement personnel to informants, which are not subject to detailed vouchering or reporting.

#### A. Mission and Description of U.S. Customs and Border Protection

The priority mission of U.S. Custom and Border Protection (CBP) is homeland security. As the agency charged with managing and securing our nation’s borders, that means that CBP’s priority mission is to prevent terrorists and terrorist weapons from entering the United States. An important aspect of this priority mission involves improving security at our borders and ports of entry, but it also means extending our zone of security beyond our physical borders. This extended border strategy is essential to creating smart borders leveraged by technology and a layered defense-in-depth strategy through interior checkpoints and enforcement operations.

At the same time, CBP continues to perform its traditional missions. These include apprehending individuals attempting to enter the United States illegally, stemming the flow of illegal drugs and other contraband, protecting our agricultural and economic interests from harmful pests and diseases, regulating and facilitating international trade, collecting revenue, and enforcing U.S. trade laws.

While carrying out these missions, CBP must strive to do so without unnecessarily restricting the flow of legitimate trade and travel that is so important to our nation’s economy. CBP has found that by employing advanced analytical tools for information collection, risk management and technology, and by partnering with other nations, private industry, and other stakeholders, these missions need not be mutually exclusive.

A key consideration of CBP’s overall threat and environmental evaluation is the DHS Secure Border Initiative (SBI). SBI is a comprehensive multi-year plan to secure America’s borders and reduce illegal migration. This effort looks at all aspects of the problem: deterrence, detection, apprehension, and detention and removal. As stated by the Secretary, the goal of SBI is to support the President's core objectives for comprehensive immigration reform, which is built upon three

pillars: improving border security and increasing interior enforcement. Using the right mix of technology, personnel, infrastructure, and supporting resources, including necessary rapid response capabilities, SBI will provide the tools and resources necessary to gaining and maintaining effective control of our borders.

CBP's primary field occupations include CBP Officers, Border Patrol Agents, Pilots, Marine Officers, Import and Entry Specialists, and Agricultural Specialists. Its field organization includes 20 Border Patrol Sectors with 34 permanent traffic checkpoints and 69 tactical traffic checkpoints between the ports of entry; 142 stations and substations; 20 Field Operations Offices and 326 associated ports of entry, of which 15 are pre-clearance stations in other countries; and 27 Air and Marine Centers and Branches. Field personnel use a mix of air and marine assets, non-intrusive technology such as large-scale imaging devices (imaging systems using x-ray and gamma ray technology), radiation portal monitors, automated targeting systems, and automation in support of efforts to identify and apprehend undocumented aliens and high-risk travelers, and to facilitate legitimate traffic and trade.

## B. Major Activities and Key Strategic Issues

CBP uses the resources appropriated by Congress to achieve its strategic goals and priorities. During the development of these goals and priorities, careful consideration has been given to the National Strategy for Homeland Security, The Presidential Directive on National Security, the National Drug Control Strategy, Executive Orders, the Department of Homeland Security (DHS) Strategic Plan, and the CBP 2005-2010 Strategic Plan to ensure alignment and mutual support. CBP's investments also reflect the goals and objectives of programmatic plans such as the National Border Patrol Strategy. Finally, the results of work done under the President's Management Agenda (PMA), and evaluations conducted by the Government Accountability Office (GAO) and the Office of the Inspector General (OIG), as well as the Performance Assessment Rating Tool (PART) processes have been used to prioritize effort and target capital investments.

CBP continues to identify opportunities to enhance its mission effectiveness. The Commissioner has identified three guiding principles that are critical to the success of CBP: Integration, Partnerships, and Integrity.

### **Integration**

Since the creation of CBP in March of 2003, CBP has made great strides in becoming the unified border agency for the United States. Its role in securing the homeland is clear: secure our borders while simultaneously facilitating legitimate trade and travel. We must now move to the next stage of our integration: ensuring that CBP can act as one, unified entity, leveraging all the information and intelligence at our disposal to successfully execute our mission and adjusting our organization at the national and field levels, as appropriate.

### **Partnerships**

National security is a team effort. In everything we do, we seek to identify and capitalize on relationships with partners whose participation and inclusion could contribute to our success. CBP must continue to foster mutually beneficial partnerships with DHS components, the Intelligence Community, Federal, state and local governments and law enforcement organizations, tribal groups and the business and trade communities.

### **Integrity**

As one of our agency's values states, "Integrity is our cornerstone." We all know that any single corrupt act of commission or omission represents a potential threat to national security. Our every action, therefore, must be guided by the highest ethical and moral principles. We must strive to foster a culture of integrity. At the same time, we must ensure that the organization has a robust system to identify and correct misconduct.

## **Major Activities**

To ensure that CBP is focused on carrying out its vital mission, the Commissioner has identified six short-term performance goals that were used to develop the FY 2009 Budget request. Resources appropriated for FY 2008 and requested in FY 2009 Budget Submission will be used to fund CBP programs and activities consistent with the following short-term performance goals:

1. Ensure that CBP Uses Intelligence To Guide Operations and Has the Capability to Do So;
2. Leveraging Personnel, Technology, And Infrastructure To Achieve Effective Control Of Our Borders;
3. Strengthen And Enhance Supply Chain Security;
4. Enhance Facilitation Of Legitimate Trade And Travel;
5. Improve Security And Facilitation of International Commerce; and
6. Build A Strong, Modern Management Infrastructure That Assures The Achievement Of Business Results.

### Ensure That CBP Uses Intelligence To Guide Operations And Has The Capability To Do So

To effectively prevent terrorists and terrorist weapons from entering the U.S. and most effectively address CBP's traditional missions, CBP will develop an enterprise-wide intelligence system that enhances border awareness and operational capability. CBP will use this system to obtain, analyze, and efficiently disseminate intelligence information throughout the organization, in coordination with DHS, the Intelligence Community and other Federal, state and local government stakeholders.

### Leverage Personnel, Technology, And Infrastructure To Achieve Substantial Control Of Our Borders

CBP will continue its efforts to effectively control the northern, southern, and coastal borders, both at and between Ports of Entry. CBP will accomplish this through continued implementation of the Secure Border Initiative (SBI) and use of the most effective balance of investments in personnel, technology, infrastructure and rapid response capabilities.

### Strengthen And Enhance Supply Chain Security

CBP will continue to "push our border outward" by further enhancing our ability to determine the risk posed by U.S.-bound cargo earlier in the supply chain. CBP will seek to build on the success of the Container Security Initiative (CSI) and the Customs-Trade Partnership Against Terrorism (C-TPAT) and look for innovative ways to efficiently and effectively screen and scan inbound cargo prior to its lading overseas.

### Enhance Facilitation Of Legitimate Trade And Travel

Our agency will continue to develop programs to enhance our ability to identify and respond to high-risk individuals, cargo, and conveyances, while continuing to facilitate the movement of legitimate trade and travel, e.g., the Western Hemisphere Travel Initiative (WHTI). This will include programs to more effectively screen travelers using biometric, biographic, and other data,

and the expansion of “Frequent Traveler” programs, such as NEXUS, Secure Electronic Network for Traveler’s Rapid Inspection (SENTRI), and Free and Secure Trade (FAST).

#### Improve Security And Facilitation of International Commerce

CBP will continue to take the lead in ensuring that the World Customs Organization (WCO) Framework is broadly implemented throughout the world in order to improve the security and facilitation of global trade. This includes the continuation of a strong capacity building program within CBP to coordinate our own activities within the U.S. and with world development organizations, as well as with other customs administrations around the world.

#### Build A Strong, Modern Management Infrastructure That Assures The Achievement Of Business Results

All of our mission support functions – whether Information Technology, Finance, Internal Affairs, or Human Resources Management – are essential to our ability to operate in a complex and constantly changing world. CBP will continue to build upon and improve the level and quality of service that our mission support functions provide.

### **Key Strategic Issues**

CBP faces tremendous internal and external challenges in carrying out homeland security and traditional missions mandated by law and in implementing the CBP strategic goals and priorities. They include:

#### Combating Terrorism and Crime

Criminals hold distinct advantages over the law enforcement community by using sophisticated international criminal cooperation and using legitimate businesses as cover. Terrorists may exploit established smuggling and illegal immigration routes in order to penetrate our borders. The capability of criminals to leverage technology to conduct and hide crimes also provides challenges for the law enforcement community. CBP recognizes that increased enforcement efforts at the ports of entry may cause criminals and terrorists to shift the focus of their efforts toward identified or perceived vulnerabilities between the ports. The globalization of terrorism and crime also requires strong law enforcement partnerships with foreign partners.

#### Impact of Globalization

The safety of global trade is both an economic issue and a security concern. A weapon of mass destruction or weapon of mass effect, detonated at a United States port of entry, could cause a \$1 trillion disruption to the economy. Increased global trade brings more diverse product design and production methods, more stakeholders and modes of transportation, and with all of this, greater opportunities for criminals and terrorists to profit from or disrupt the U.S. economy. More duty-free goods will require increased oversight to ensure eligibility for decreased duty rates. To fight illegal trade practices, the government must continue inspecting for illegal imports and enforcing trade laws. Foreign governments, shippers, vendors and the trade community must be relied upon to collect and share information and to assure that supply-chain processes are secure. Increased passenger travel and trade volumes also provide increased opportunities for transmission of highly pathogenic influenza, which border management agencies must anticipate and be prepared to control.

### Facilitating Travel and Trade While Ensuring Security and Safety

In 2007, CBP Officers inspected 400 million travelers and more than 125 million cars, trucks, buses, trains, vessels, and aircraft. CBP will continue to face the challenge of enhancing mechanisms to facilitate legitimate trade and travel to keep terrorists and their weapons out of the United States. CBP must obtain and improve the quality of advance information to target high-risk travelers and trade in the face of continued global migration and diverse international passenger travel. The public's expectation of speedy, consistent processing, and global trade needs for tailored, speedy delivery, will require CBP to find more efficient ways to securely process passengers, conveyances, and freight. Key to these efforts will be partnerships with Canada and Mexico, with whom CBP will pursue tightened border security while seeking to reduce delays and improve relations.

### Technology and Innovation

Innovative technology solutions for monitoring, inspection, information sharing, and enforcement will grow, but also will bring implementation and standardization challenges. Using the right combination of an integrated solution of technology, personnel, and infrastructure will advance our mission to secure effective control of the border. Advanced technology and a distributed, open, wireless, and mobile environment will be available to CBP, but technological advances and new products will also challenge the workforce, requiring additional skill sets and training.

### Workforce and Integration Challenges

CBP continues to respond to the challenges posed by reorganization and integration of the homeland security mission, including extension of a new culture, carrying out established priorities, and training employees. In addition, the more general challenges of the 21st Century involve growing workforce complexity, aging staffs, changes in core occupations, contracting reforms, and the demand for more innovative recruiting, retention and reinvigoration/training programs, diversity, mobility, and instant electronic connectivity.

### Drug Interdiction

In furtherance of National Drug Control Strategy, in FY 2007 CBP seized 2,786,137 pounds of marijuana, 281,371 pounds of cocaine, and 2,167 pounds of heroin. At the ports, the procedures and technology being employed by CBP to prevent terrorism and the entry of weapons of mass destruction have also proven to be very effective in the interdiction of illegal drugs. Between the ports, efforts to improve the infrastructure and technology—particularly on the southern border—should result in the overall reduction of illegal activity, including drug interdiction. CBP will continue to expand its detection capabilities for overall border security, including the prevention of entry of illegal drugs.

### Immigration

In FY 2007, CBP apprehended or found inadmissible 1 million individuals attempting to enter the country illegally at and between the ports of entry, and rescued 1,875 migrants in distress. CBP will continue to be challenged by immigration issues including balancing efforts to enable lawful immigration while combating illegal immigration, smuggling, document fraud, large scale migration, human and drug trafficking, and other border issues.

## C. Resources Requested and Performance Impact

### Major Changes within the Base Level

The FY 2009 funding request will allow CBP to fulfill its priority mission of preventing terrorists and terrorist weapons from entering the United States while facilitating legitimate travel and trade. This request will provide CBP with the opportunity to transform border control and security at and between ports of entry, using an effective mix of manpower and technology. It will also provide additional means for extending our zone of security beyond our physical borders – so that American borders are not the first line of defense against terrorism. Furthermore, CBP will be able to continue to focus on its traditional mission of enforcing trade, agriculture, and immigration laws at our borders. CBP will continue to reallocate resources from lower to higher priorities to meet its strategic goals and objectives.

CBP requests a total of \$9.5 billion in FY 2009, an increase of \$64.6 million from the FY 2008 enacted budget \$9.4 billion (including emergency funds). This funding level will allow CBP to maintain current services level and improve its mission capability by providing additional support for important activities and programs in CBP. The FY 2009 budget request will allow CBP to increase direct FTE from 40,654 in FY 2008 to 45,080 in FY 2009, including, 1,844 FTE for annualization of 3,000 additional Border Patrol Agents and support personnel, 104 FTE annualization for CBP Officers as Authorized by the Security and Accountability for Every Port (SAFE) Act, 117 FTE for annualization of CBP Officers, 102 FTE for annualization of positions in the Western Hemisphere Travel Initiative (WHTI), 41 FTE annualization for Marine Enforcement Units, 29 FTE for annualization of Conduct and Integrity Oversight 27 FTE for annualization of Radiation Portal Monitors Staffing (RPM), 25 FTE annualization for Customs Trade Partnership Against Terrorism (C-TPAT), 8 FTE for annualization of the Secure Freight Initiative, 4 FTE annualization for Anti-Dumping Enforcement and 11 FTE annualization for Electronic Travel Authorization.

### Increments over Current Service Level

Within the FY 2009 President's Budget, CBP is requesting an additional number of FTE in the following programs: 1,321 FTE for 2,200 new Border Patrol Agents and 441 operation and mission support personnel; 45 FTE for 89 CBP Officers for the Western Hemisphere Travel Initiative (WHTI); 117 FTE to hire 212 CBP Officers and 22 support for Passenger Screening at Land Ports of Entry (POE); and 137 FTE for 238 CBP Officers, 20 scientists, 25 IT specialists and 12 mission support for Radiation Portal Monitors (RPM) Staffing Operation and Maintenance. Also included are 12 FTE for 24 Air & Marine Unmanned Aircraft Systems (UAS) pilots, 6 FTE for 7 Attorneys, 2 Economists, 2 Paralegals, and 1 mission support person for the Regulatory Program, 14 FTE for 27 personnel in the CBP Intelligence Program and 15 FTE for 24 Investigators and 5 support personnel in Conduct and Integrity Oversight, 15 FTE for 30 positions in the Border Security, Fencing, Infrastructure and Technology (BSFIT) appropriation, and 1 FTE for 2 positions in Ground Transportation.

Funds for program enhancements have significant performance impact for CBP. The following is a list of programs or activities for which CBP seeks additional funding in FY 2009.

- Border Patrol Agent and Support Hiring – CBP requests \$442.4 million to hire, train and equip 2,200 new Border Patrol Agents (\$362.5 million). The purpose of this initiative is two-fold: (1)

add 500 new Border Patrol Agents to stay on course for meeting the President's goal of 6,000 new Border Patrol Agents by the end of the 1<sup>st</sup> quarter of fiscal year 2009 (total equals 18,319); (2) provide an additional 1,700 agents to reach 20,019 by the end of the fiscal year. Resources are proposed for 441 operational/mission support personnel (\$32.2 million), relocation (\$25.6 million), and training (\$22.1 million). CBP is also seeking an additional \$149.5 million in the Construction account for new or expanded facilities to accommodate significant increases in Border Patrol Agents and support staff.

- SBI<sup>net</sup> - \$775 million and 30 positions are requested to continue efforts to develop and deploy a technology and tactical infrastructure border security system solution. Additional segments of technology and tactical infrastructure are required to secure the border. Along with the SBI<sup>net</sup> solution, the SBI<sup>net</sup> team will focus on providing the COP to southwest border sectors, enabling agents to have a more complete operational picture across the border.
- Border Patrol Facilities - \$149.5 million is requested to address growing CBP facility requirements. The unprecedented growth of the Office of Border Patrol, which had expanded by almost 50% in the last several years, has placed significant strain on already aging and overcrowded facilities. Funding will be utilized to maintain the operational capabilities of existing facilities, and to plan, design, and construct new facilities.
- Air and Marine Aircraft/Vessels Acquisitions - \$20.4 million is requested; 7 million for two Multiple Enforcement Aircraft (MEA) and spares; \$6.0 million will contribute towards the acquisition of one complete UAS system, ground control and spares; and \$7.4 million to acquire marine interceptor vessels.
- Air and Marine Staffing - \$4 million is requested to hire 24 Unmanned Aircraft Systems (UAS) pilots to provide adequate staffing at Northern Border/Great Lakes locations as CBP expands support for border security operations consistent with the Secure Border Initiative (SBI) and the CBP Air and Marine Strategic Plan.
- Western Hemisphere Travel Initiative (WHTI) – An increase of \$106.9 million is requested in support of the WHTI implementation to complete infrastructure improvements at the top 39 Land Ports of Entry covering 95 percent of the land border arrivals. Funding would support an additional 89 CBP Officers (\$9.9 million) and equipment and contract services (\$97.0 million). In FY 2008, CBP received \$225 million to develop the primary vehicle application, install hardware and make the necessary lane modifications to implement WHTI at 13 high volume ports, accounting for about 68 percent of all vehicle passenger traffic at U.S. land border ports of entry. The FY 2009 increment would pay for the completion of infrastructure improvements to the remaining POEs and includes facility modifications and the build out of primary lanes as operationally necessary. In addition, it completes the implementation of the non-RFID POEs and pays for program management and support of the previously installed POEs.
- Radiation Portal Monitors (RPM) Staffing/O&M - \$35.5 million is requested for personnel and operations and maintenance support of the Domestic Nuclear Detection Office (DNDO) deployment of Radiation Portal Monitors (RPMs). Of the \$35.5 million, \$27.3 million will be used to hire 238 CBP Officers, 20 Scientists, 25 IT Specialists and 12 mission support personnel to implement the deployment and to perform the subsequent operation of the radiation portal monitors (RPMs) at our Nation's seaports. Funding in the amount of \$8.2 million will be used for operations and maintenance of RPMs and will ensure effective

operation of new Advanced Spectroscopic Portal monitors (ASPs). The ASP systems are expected to operate 24 hours per day, 7 days per week, and 365 days per year.

- Passenger Screening Requirements at Land Ports of Entry - \$25 million is requested to hire 212 CBP Officers and 22 support positions for passenger processing activities at the Ports of Entry (POEs) on our borders with Mexico and Canada.
- Continue Inspection Enhancements (US-VISIT) including 10-Print - \$62.8 million is requested to provide the operations and maintenance (O&M) funding to sustain the US-VISIT increments within CBP. US-VISIT provided funding to CBP to develop and implement US-VISIT Increments since FY 2003. These increments provide functionality critical to both US-VISIT and CBP in securing entry to the U.S. at the Ports of Entry (POEs) and providing entry and exit information for aliens. Previously, CBP prepared an annual O&M request for US-VISIT funding. Beginning in FY 2009, CBP will request funding for operations and maintenance in FY 2009 and future years.
- Traveler Enforcement Communication System (TECS) Modernization – \$25 million is requested to support The Traveler Enforcement Communication System (TECS) which is a key system for border enforcement and sharing of information about people who are inadmissible or may pose a threat to the security of the United States. TECS is the primary subject record “watch list” database for the Department of Homeland Security (DHS). Immigration and Customs Enforcement (ICE), Transportation and Security Agency, Citizenship and Immigration Service (CIS) and US-VISIT all rely on TECS for the biographic vetting of people in the completion of their missions. TECS Modernization will provide enhanced support for this vetting and ensure this capability is available into the future. The continued funding stream of resources received in FY 2008 and requested in FY 2009 will support the completion of the security management efforts, continuing the effort for secondary inspections operations, beginning subject record clean up, primary query, subject record maintenance and subject record storage, providing vetting services for other systems and agencies, and beginning data management services to remove the dependency on the obsolete database.
- Non-Intrusive Inspection (NII) Imaging Systems - \$10 million is requested to replace small-scale NII systems that are nearly 10 years old, and are approaching the end of their life cycle. Funds will also be utilized to purchase NII small-scale technologies to cover identified deficiencies in inspection and detection capabilities. The remaining FY 2009 funds will be used to operate and maintain NII equipment. Small-scale NII equipment enables the CBP to perform more effective and efficient non-intrusive inspections and screenings of international passengers and luggage and of packages and flat mail at mail facilities and consignment centers. In addition, small-scale NII equipment enables CBP to inspect cars, trucks, railcars, and sea containers that have been identified by large scale NII systems as potentially containing illicit goods. Such illicit goods are money, guns, ammunition, agricultural items, explosives, and chemical, biological, and nuclear agents.
- Terrorism Prevention System Enhancements (TPSE) - CBP requests \$10 million and one position to support TPSE which is needed to ensure 24/7 systems availability, network redundancy, and monitoring, in the Passenger area. This initiative seeks funding to enhance communications, power distribution, networking and computing capabilities to support our worldwide screening responsibilities. This will result in a much more robust infrastructure capability, with reasonable fail over capability from CBP’s National Data Center to the DHS

date center to ensure a stable and reliable systems availability for CBP screening. The expanded worldwide operations scope which encompasses a 7 day/24 hour operational responsibility requires that all border and port screening systems be available 100% of the time.

- Automated Targeting System Passenger (ATS-P) - \$5 million is requested to begin targeting methodology improvement activities and begin to address the requirement for high priority infrastructure improvements including high availability, Service Oriented Architecture, (SOA), and a simulation and testing environment to improve service delivered to CBP Officers in the field, accommodate increased volume of passengers and vehicles, provide a simulation and test environment to support passenger targeting improvements, and move towards true 24/7 system availability.
- Land Ports of Entry Modernization (LPOEs) - \$10 million is requested to address deficiencies at the CBP-owned land ports of entry (LPOEs), which include the need for enhanced security, upgraded commercial inspection facilities, and significant age and facility distress.
- Ground Transportation - \$8 million is requested to be applied along the Southwest Border which will free up an additional 96,000 hours for agents and officers to resume primary law enforcement and investigative duties. The primary use will be for secure transportation of detainees. Agents and Officers must perform the duties, if contracted services are not funded, removing Agents and Officers from primary missions of enforcement of the border. Guard and law enforcement custodial services will also be provided at processing centers or at medical facilities treating ill or injured detainees. Funding will also be used to hire 2 additional positions and expand the use of contract transportation and guard services for the Southwest Border.
- CBP Intelligence Program – \$24 million is requested to hire and train 27 personnel and fund approximately 10 relocations to stand-up of a 24x7 CBP National Intelligence Watch; and to develop and deploy a comprehensive and innovative Analytical Framework for Intelligence (AFI). The 24/7 Intelligence Watch will provide Total Situational Awareness for CBP decision-makers and mission partners for All Crimes/All Threats/All Hazards. AFI integrates multiple operational and intelligence data bases, provides relevant data flow to the desktop automatically based on mission focus areas and is specifically designed for CBP intelligence officers.
- Conduct and Integrity Oversight - \$5.3 million is requested to hire an additional 24 GS-1801 Investigators and 5 support positions to address internal affairs staffing needs. By FY 2009, CBP will have a workforce of over 54,000 with frontline personnel conducting a mission that is vulnerable to corruption. FY 2009 will also be the second of a planned 5-year development of a permanent, full-time cadre of investigators that is responsible for investigating all serious non-criminal misconduct allegations and lesser administrative violations involving CBP employees; as well as criminal allegations not related to corruption. In addition to addressing reports of alleged misconduct in a timely manner, the investigators will also be responsible for participating in active partnerships with the Department of Homeland Security Office of Inspector General, Immigration and Customs Enforcement's Office of Professional Responsibility and other Federal, state and local law enforcement authorities to proactively develop sources of information and new investigative subjects.

- CBP's Regulatory Program – \$1 million to support CBP's regulatory program. The requested funds will allow CBP to obtain an additional 7 attorneys, 2 economists, 2 paralegals and 1 mission support personnel. These personnel will aid in performing efficient and legally-thorough drafting of new regulations; aid in the removal of obsolete and inconsistent regulations that may pre-date the Department's creation; aid in issuing guidance to the private sector on homeland security-related matters; and aid in the Department's compliance with new Presidential mandates concerning legal review and processing of significant guidance documents issued by CBP.

D. How CBP Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.

Border Security Inspections and Trade Facilitation at POE's Long Term Performance Goal – Improve the targeting, screening, and apprehension of high-risk international cargo and travelers while providing processes to facilitate the flow of safe and legitimate trade and travel.

- Goal 1 – Continue to Protect Our Nation From Dangerous People
- Objective 1.1 – Achieve Effective Control of Our Borders

Border Security and Control Between POE's Long Term Performance Goal – To gain effective control in areas deemed as high priority for terrorist threat potential or other national security objectives through the establishment of the Operational Requirements-Based Budgeting Program.

- Goal 1 – Continue to Protect Our Nation From Dangerous People
- Objective 1.1 – Achieve Effective Control of Our Borders

Automation Modernization Long Term Performance Goal – Improve the threat and enforcement information available to decision makers from legacy and newly developed systems for the enforcement of trade rules and regulations and facilitation of U.S. trade.

- Goal 1 – Continue to Protect Our Nation From Dangerous People
- Objective 1.1 – Achieve Effective Control of Our Borders

Air and Marine Operations Long Term Performance Goal – Deny the use of air, land and coastal waters for conducting acts of terrorism and other illegal activities against, the United States.

- Goal 1 – Continue to Protect Our Nation From Dangerous People
- Objective 1.1 – Achieve Effective Control of Our Borders

Border Security Fencing, Infrastructure, and Technology Long Term Performance Goal - Gain effective control of our land and maritime borders by developing and deploying the optimal mix of personnel, infrastructure, technology, and response capabilities to identify, classify, and interdict cross-border violators.

- Goal 1 – Continue to Protect Our Nation From Dangerous People
- Objective 1.1 – Achieve Effective Control of Our Borders

E. Performance Based Budget Highlights by Program

*Note: The FY 2008 Enacted level includes \$1,531M in emergency funding provided in P.L. 110-161; FY 2007 is Revised Enacted including supplemental funding and transfers.*

For each Future Year Homeland Security Program, the performance goal, performance measures, budget including allocation of non-programmatic overhead, and FTE are:

**Performance Budget Highlights by Program**

| <b>Measure:</b> Border Miles Under Effective Control (including certain coastal sectors).  |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure depicts the Number of Border Miles Under Control where the appropriate mix of personnel, technology, and tactical infrastructure has been deployed to reasonably ensure that when an attempted illegal alien is detected, identified and classified, that the Border Patrol has the ability to respond and that the attempted illegal entry is brought to a satisfactory law enforcement resolution. As the Border Patrol continues to deploy additional resources based on risk, threat potential, and operational need, the number of miles under control will increase. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>   | None    | 150     | 338     | 524     | 674     | 742     |
| <b>Actual:</b>   | None    | 288     | 449     | 599     | N/A     | N/A     |

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Border Miles with increased situational awareness aimed at preventing illegal entries per year.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure indicates the number of border miles where the situational awareness has increased, or improved, to prevent illegal entries into the U.S. The Border Patrol uses the following levels to describe border security from the least secure to the most secure: Remote/Low Activity; Less Monitored; Monitored; and Controlled. Border regions classified as Remote/Low Activity are generally characterized by rugged and inaccessible terrain. By raising the border security status to Less Monitored (or higher), the Border Patrol improves its situational awareness and border security. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | None    | None    | 136     | 100     | 100     |
| <b>Actual:</b>  | None    | None    | None    | 387     | N/A     | N/A     |

**Measure:** Number of Border Patrol Agents trained in rescue and emergency medical procedures.

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Description of Measure:</b> This measure will examine the number of agents trained and certified in rescue and emergency medical procedures. One of the Border Patrols Border Safety Initiative (BSI) objectives is to increase the number of agents trained and certified in rescue and emergency medical procedures at the field agent level to improve the Border Patrols capabilities to prevent and respond to humanitarian emergencies in order to create a safer and more secure border region. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | None    | None    | 510     | 690     | 690     |

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of apprehensions at Border Patrol checkpoints.  |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure examines the effectiveness of checkpoint operations in apprehensions as they relate to border enforcement activities and serves as a barometer for measuring operational effectiveness. Checkpoints are temporary and permanent facilities used by the Border Patrol to monitor traffic on routes of egress from border areas and are an integral part of the Border Patrols defense - in - depth strategy. As such, activities that occur at checkpoints serve as measures not only of checkpoint operational effectiveness but as barometers of the effectiveness of the Border Patrols overall national border enforcement strategy to deny successful illegal entries into the United States. This measure will examine one checkpoint activity, apprehensions, and compare it to the Border Patrol apprehensions nationwide. This comparison will measure checkpoint effectiveness in terms of apprehensions as well as provide insights into the overall effectiveness of the Border Patrols national strategy. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | None    | 5 - 10% | 5 - 10% | 3 - 8%  | 3% - 8% |

|   |         |         |         |          |          |          |
|---|---------|---------|---------|----------|----------|----------|
| <b>Measure:</b> Percent of traffic checkpoint cases referred for prosecution to the U.S. Attorney's office.   |         |         |         |          |          |          |
| <b>Description of Measure:</b> This measure will examine the percent of border related cases brought by the Border Patrol and originating from traffic checkpoint operations that are referred to one of the 92 U.S. Attorneys located throughout the United States, Puerto Rico, and the Virgin Islands for prosecution compared to the total number of apprehensions at traffic checkpoints. This measure will depict the effectiveness of Border Patrol checkpoint operations in identifying and prosecuting dangerous criminals, thus enhancing overall public safety. All apprehensions by OBP are considered arrests (administrative or criminal). The number of cases referred for prosecution by OBP and being tracked in this measure are criminal arrests only. |         |         |         |          |          |          |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007  | FY 2008  | FY 2009  |
| <b>Target:</b>  | None    | None    | None    | 3% - 13% | 8% - 15% | 8% - 15% |
| <b>Actual:</b>  | None    | None    | N/A     | 13%      | N/A      | N/A      |

|   |         |         |         |             |             |           |

| <b>Measure: Air Passenger Apprehension Rate for Major Violations.</b>  |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure provides a statistically valid estimate of the apprehension rate of air passengers for major violations at the international airports. The data are derived from the results of inspections for major violations among air passengers traveling to the U.S. from international airports. A major violation involves serious criminal activities such as air passengers transporting illegal drugs, guns, or other banned substances into the U.S. The measure uses statistical sampling methods to estimates potential threats and gauges the effectiveness of Customs and Border Protection (CBP) Officers in interdicting those threats among air passengers arriving at international airports. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>   | None    | None    | None    | N/A     | 41%     | 41.5%   |
| <b>Actual:</b>   | None    | None    | None    | 40.3%   | N/A     | N/A     |

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure: Air Passengers Compliant with Laws, Rules, and Regulations (%).</b>   |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure is the Compliance Rate of international air passengers with all of the laws, rules, and regulations that CBP enforces at the Ports of Entry, with the exception of agriculture laws and regulations. It is also referred to as the air Compex rate. It results from a statistical sampling technique that is outcome/result driven. It is an outcome measure because it estimates the threat approaching the port of entry and the effectiveness of officer targeting toward that threat. The measure is valid because it encompasses enforcement actions taken at a port of entry and a statistically valid random sampling of passengers who are considered low risk and would not otherwise be examined. These data are used to determine the actual percentage of travelers who are compliant with all of the laws, rules, regulations, and agreements enforced by CBP. |         |         |         |         |         |         |

|  |  |  |  |  |  |  |
|--|--|--|--|--|--|--|
| <b>Measure: Border Vehicle Passengers in Compliance with Agricultural Quarantine Regulations (percent compliant).</b>  |  |  |  |  |  |  |
| <b>Description of Measure:</b> The measure shows CBP's success at maintaining a high level of security in the land border environment by measuring the degree of compliance with U.S. Department of Agriculture (USDA) agricultural quarantine regulations and other mandatory agricultural product restrictions. CBP randomly samples border vehicle passengers for compliance with all USDA laws, rules, and regulations using USDA guidance on sampling procedures. |  |  |  |  |  |  |

|                     |         |         |         |         |         |         |

| <b>Measure:</b> Compliance rate for Customs - Trade Partnership Against Terrorism (C - TPAT) members with the established C - TPAT security guidelines.  |         |         |         |         |         |         |
| <b>Description of Measure:</b> After acceptance into the C - TPAT program, all C - TPAT members must undergo a periodic validation in which CBP examiners visit company locations and verify compliance with an industry - specific set of CBP security standards and required security practices. These validations are prepared using a weighted scoring system that is used to develop an overall compliance rate for each company. This measure provides a summary of the overall Compliance Rate achieved for all validations performed during the Fiscal Year. |         |         |         |         |         |         |

| <b>Measure:</b> Number of foreign cargo examinations resolved in cooperation with the Container Security Initiative.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure provides an indicator of the benefit of locating CBP Officers at foreign locations that are cooperating with CBP under the Container Security Initiative (CSI). It provides the number of container examinations processed or mitigated by foreign Customs officials that were identified by CBP CSI as higher - risk and accepted as meeting CBP examination standards and requirements. These examinations would otherwise have taken place at US ports of entry. It is an indication of the number of higher - risk cargo shipments identified and examined prior to embarkation from foreign ports to US destinations. |         |         |         |         |         |         |

| <b>Measure:</b> Percent of sea containers screened for contraband and concealed people.   |         |   |         |         |         |         |
| <b>Description of Measure:</b> The measure shows the progress towards increasing security by measuring the percent of sea containers arriving at seaports that were screened for contraband and concealed people using Non - intrusive (NII) technology. NII technology consists of x - ray imaging and electro - magnetic imaging equipment that is very effective at inspecting trucks, containers, and packages for shapes, density, and hidden cargo. It is very effective at identifying weapons, narcotics, smuggled humans, and concealed cargo. NII equipment is not effective at identifying radioactive or weapons - grade materials. NII equipment and radiation portal monitor (RPM) equipment use very different technologies that accomplish distinctly different things. They complement each other and work together to fully screen cargo. |         |   |         |         |         |         |

| <b>Measure:</b> Number of airspace incursions along the southern border. (Extending the physical zone of security beyond the borders)   |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure shows the number of airspace incursions along the southern border. A consistent standard of less than 10 incursions each year is an aggressive standard we strive to maintain. The measure monitors AM efforts in reducing, with the intent of ultimately denying, the use of border air space for acts of terrorism or smuggling using intelligence and threat assessments. The number of TOI has been reduced over time as strategic surveillance and tactical responses by CBP interceptors and patrols, work with the Border Patrol on the ground, to deter the use of air routes into the U.S. AM continues to gather and analyze intelligence on past and current threat patterns to forecast and disseminate information about potential and emerging threats. The targeted goals for this measure are to maintain this low level of border incursions at a minimum and reduce it if possible, until there are no border incursions. |         |         |         |         |         |         |

| <b>Measure:</b> Percent of air support launches accomplished to support border ground agents to secure the border.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> In FY 2006, all air assets of CBP were merged into CBP Air and Marine (AM), creating the largest law enforcement air force in the world with enhanced mission support to AM's primary customer, the Office of Border Patrol. A primary and important measure for Air and Marine (AM) is its capability to launch an aircraft when a request is made for aerial support. This measure captures the percent of all requests made for air support to which AM was able to respond. |         |         |         |         |         |         |

| <b>Measure:</b> Percent of at - risk miles under strategic air surveillance. (Strategic air coverage)   |  |  |  |  |  |  |
| <b>Description of Measure:</b> The measure is represented by the percent of at risk miles under strategic air surveillance and is evaluated according to up - to - the - minute information and |  |  |  |  |  |  |

intelligence. This measure describes the area of the U.S. border determined to be under the span of control of CBP Air and Marine (AM) assets. CBP AM uses a multi - level layer to aerial response and support to accomplish this goal: 1) Strategic surveillance for the P - 3 and UAS aircraft, 2) Intelligence driven support for the rapid deployment of forces, and 3) Strategic and tactical support to ground law enforcement such as Office of Border Patrol and Immigration and Customs Enforcement.

iii. Status of Congressionally Requested Studies, Reports, and Evaluation

**Department of Homeland Security  
Immigration and Customs Enforcement (ICE)**

| <b>Fiscal Year</b> | <b>Due Date</b>                                   | <b>Reference/Citation</b> | <b>Requirement</b>  | <b>Status</b>  |
|--------------------|---|---------------------------|---|--|
| 2008               | 7/31/2008   | House Report, p. 46       | ICE Financial Management - The conferees direct ICE to examine its allocation of resources across its headquarters functions and brief the Committee on any shortcomings that have the potential to impair ICE financial management by June 30, 2007. [July 31, 2008]   | Request due date of July 31, 2008 consistent with original date.   |
| 2008               | 2/5/2008  | House Report, p. 46       | Vehicle Fleet Management plan - ICE is directed to submit a Vehicle Fleet Management plan, with a detailed, five-year investment plan across all types of ICE vehicles, with its FY 2009 budget submission.   | Completed  |
| 2008               | 2/5/2008  | House Report, p. 43       | OPR Detention Compliance - ICE is strongly encouraged to establish a full-time OPR presence in each of the 24 Detention and Removal Operations field offices to monitor detention standard compliance. ICE should report to the results of its detention standards compliance efforts, with the submission of the fiscal year 2009 budget.  | Completed  |
| 2008               | 1/1/2008  | House Report, p. 44       | BEST Integration - ICE is directed to report to the Committee no later than January 1, 2008, on the execution of BEST funds in conjunction with several DHS activities (ICE-led Human Smuggling and Trafficking Center, the Customs and Border Protection-led Alien Smuggling Interdiction office, and the Intelligence and Analysis-led Integrated Border Intelligence Program). | Need to request extension for submission of report.  |
| 2008               |   | Conference Report, p. 29  | BEST Briefing - ICE is directed to brief the Committee on Appropriations on how the BEST program is supporting an integrated border security operation at DHS as well as the new locations of proposed BEST operations.   | This content of this briefing should be consistent with the aforementioned report and should be timed accordingly. |
| 2008               | 3/26/2008   | House Report, p. 45       | Textile Transshipment - ICE is directed to report on its execution of the five-year strategic plan regarding textile transshipment enforcement. [within 90 days]  |  |
| 2008               | 3/26/2008   | Senate Report, p. 49      | Air/Support Investigations - The Committee requests a Joint CBP/ICE briefing within 90 days after the FY 2008 Appropriation is enacted that addresses how air support to investigations is adjudicated.   | ICE and CBP need to meet to discuss strategy for briefing  |
| 2008               | 2/5/2008  | House Report p. 43        | Detention Facilities - ICE is expected to report the results of its detention standards compliance efforts, with the submission of the fiscal year 2009 Budget.   | Completed  |
| 2008               | 7/31/2008   | Senate Report, p. 51      | Family Detention - ICE is directed to provide quarterly briefings to the Committee on family detention space needs and detention standards, with the first briefing to occur on or before July 31, 2007. [July 31, 2008]  | Request due date of July 31, 2008 consistent with original date.   |
| 2008               | 3/26/2008   | Conference Report, p. 28  | Family Detention - ICE is directed to publish and maintain standards governing the care of families with children in detention facilities. [within 90 days]   |  |
| 2008               | Due January 31; April 30; July 31; and October 31 | Senate Report, p. 51      | Deportation Report - ICE is directed to continue submitting its quarterly report to Appropriations Committees comparing the number of deportation, exclusion, and removal orders sought and obtained by ICE, with the first report due January 31, 2008.  |  |
| 2008               | Weekly throughout FY 2008                         | Conference Report p. 27   | DRO Custody Operations - ICE must provide weekly updates on the detained population throughout FY 2008.   | First report due January 11, for week ending January 4.  |
| 2008               | 3/26/2008   | Conference Report p. 26   | DRO CAP - ICE is required to submit a plan identifying how it will manage it's identification of the criminal alien population, including an explanation of the staffing and technology solutions it will apply. [Within 3 months of enactment of this Act.]  |  |
| 2008               | 2/8/2007  | Senate Report, p. 51      | Unaccompanied alien minors - The conferees are disappointed that ICE has not submitted the report on unaccompanied alien minors that was due to the Committees on Appropriations by February 8, 2007. ICE is directed to submit the report immediately and is encouraged to make coordinating polices regarding unaccompanied alien minors a key priority.                        | Either provide the report within 30 days, or immediately responded with anticipated submission date.               |

| Fiscal Year | Due Date   | Reference/Citation                                    | Requirement   | Status  |
|-------------|------------|---|---|---|
| 2008        | 3/26/2008  | Conference Report, p. 28                              | Unaccompanied minors - The Committee directs ICE to develop and publish standards for the temporary care of children and ensure ICE transfers custody of unaccompanied alien minors to the Office of Refugee Resettlement (ORR) within 72 hours. [within 90 days] |   |
| 2008        | 11/1/2008  | House Report, p. 42                                   | Alternatives to Detention (ATD) program expansion report - ICE is directed submit to report the cities that will be included in ATD as it expands by November 1, 2008. This report will include the schedule for establishing ATD in the new locations.           |   |
| 2008        | 3/26/2008  | Conference Report, p. 28                              | ICE is directed to brief the Committee on Appropriations within 90 days of the date of the enactment of this Act on actions it has taken to implement the changes to the repatriation process for unaccompanied minors. [within 90 days]                          |   |
| 2008        |            | House Report, p. 47                                   | FPS - Quarterly Staffing Report by FPS police location.   | Dates tie to end of pay period except for last report |
| 2008        | 12/31/2007 | Senate Report <i>xxx-xx</i> , <i>Title II</i> , p. 54 | FPS Funding Certification - The Department in coordination with OMB is directed to certify in writing, by November 1, 2007, that FPS will be fully funded in fiscal year 2008 through revenues and collection of security fees. A similar certification shall     | Completed   |
| 2008        | 3/26/2008  | Conference Report, p. 31                              | DHS and FPS are required to brief Committee on Appropriations on the FPS alignment, mission requirements with staffing and resources necessary to carry the organizations responsibilities. [within 90 days]  |   |
| 2008        |            | House Report, p. 48                                   | Construction - ICE is restricted from using any funds to privatize until ICE provides a privatization plan that includes a 30-year cost comparison of government-owned versus privatized detention operations.  | Privatization plan is being developed                 |
| 2008        | 3/26/2008  | House Report, p. 48;<br>Senate Report, p. 54          | Atlas - The Committee continues the requirement for ICE to produce a detailed expenditure plan for the Atlas Program. [within 90 days]  |   |

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Immigration and Customs Enforcement (ICE)** **Salaries and Expenses**

### **I. Appropriation Overview**

#### **A. Mission Statement:**

Programs funded through the Salaries and Expenses account contribute to the ICE mission of bringing a unified and coordinated focus to the enforcement of Federal immigration and customs laws. Salaries and Expenses resources are used to combat terrorism and illegal immigration activities through investigating, detaining and prosecuting both criminal and other aliens, and domestic gangs. These activities protect the infrastructure and persons within the United States.

#### **B. Budget Activities:**

##### **Legal Proceedings**

The Office of the Principal Legal Advisor (OPLA) provides the legal advice, training, and services required to support the ICE mission. As the legal representative for the U.S. Government at immigration court hearings, OPLA attorneys handle a variety of immigration-related issues that range from contested removals to custody determinations to applications for administrative relief. Additionally, OPLA provides legal advice in customs-related enforcement actions, represents the Government in Merit System Protection Board and Equal Employment Opportunity hearings, provides ethics advice, and handles matters involving commercial and administrative law.

##### **Investigations**

The Office of Investigations (OI) is divided into four broad investigative categories: National Security; Financial and Trade; Smuggling and Public Safety; and Investigative Services. OI enforces trade and immigration laws through the investigation of activities, persons, and events that may pose a threat to the safety or security of the United States and its people. OI also investigates illegal trafficking in weapons (including weapons of mass destruction), the smuggling of narcotics and other contraband, human smuggling and trafficking, money laundering and other financial crimes, fraudulent trade practices, identity and benefit fraud, child pornography, child sex tourism, and health and public safety dangers.

##### **International Affairs**

The Office of International Affairs (OIA) conducts investigative efforts in over 50 foreign locations. OIA represents the international assets of all ICE programs and collaborates with U.S. Citizenship and Immigration Services (CIS), U.S. Customs and Border Protection (CBP), and other DHS components. OIA works with foreign governments and international partners to facilitate the enforcement of U.S. customs and immigration laws beyond U.S. borders and operates the Visa Security Program (VSP).

## **Intelligence**

The Office of Intelligence collects, analyzes information on critical homeland security vulnerabilities that could be exploited by terrorist and criminal organizations. Intelligence utilizes data and information on the movement of people, money, and materials into, within, and out of the United States to provide accurate and timely reporting to ICE leadership and field agents. Intelligence Operations' Field Intelligence Units (FIUs) are the agency's primary vehicle for intelligence analysis in support of field operations and enforcement. FIUs link headquarters and other field components for intelligence collection, integration, analysis, and dissemination.

## **The Office of Detention and Removal Operations (DRO)**

DRO is responsible for ensuring that every alien who has been ordered removed departs the United States through fair enforcement of the Nation's immigration laws and coordination with foreign governments to ensure countries will accept removable aliens. DRO is comprised of five Program/Project Activities:

**Custody Operations Program** – This program provides safe, secure, and humane detainment for removable aliens and seeks to ensure that aliens in ICE custody appear for their immigration hearings and subsequent removal from the United States.

**Fugitive Operations Program** – This program locates and apprehends fugitive aliens in the United States. ICE strives to identify and apprehend all fugitives, creating a deterrent to potential absconders and increasing the integrity of the immigration enforcement process.

**Criminal Alien Program** – This program identifies criminal aliens who are incarcerated within Federal, State, and local correctional facilities, to ensure that they are not released into the community by securing a final order of removal prior to the termination of their sentence. Upon completion of their criminal sentences, aliens are transferred to ICE custody to remove them from the United States.

**Alternatives to Detention Program** – This program places low-risk aliens under various forms of intensive supervision rather than traditional detention as a cost-effective way to ensure their appearance for an immigration hearing or for removal. This program lowers the risk that aliens will become fugitives.

**Transportation and Removal Program** – This program provides safe and secure transportation of aliens in ICE custody and prepares for and conducts the removal of aliens from the United States, as ordered by an immigration judge.

## **Management and Administration**

The Offices of the Assistant Secretary (OAS), the Chief Financial Officer (OCFO), the Chief Information Officer (OCIO), Acquisition Management, and the Office of Professional Responsibility (OPR) perform the management and administration (M&A) activities for ICE. The M&A activities include executive and overall leadership direction, strategic planning, policy development, and administrative support for the human, financial, information, and physical resources required to facilitate the operational capabilities of a productive ICE workforce.

**C. Budget Request Summary:**

The U.S. Immigration and Customs Enforcement requests 17,564 positions, 17,395 FTE, and \$4,690,905,000.00 for the FY 2009 Request. Excluding emergency funding provided in P.L. 110-161, the total adjustment-to-base is 1,169 FTE and \$413,288,000.00. The program increases include 315 positions, 161 FTE, and \$106,500,000.00 to fund:

- **Additional Bed Space and Removal Costs.....\$46.0M (39 FTE)**  
This request provides 725 additional beds, staffing, and associated removal costs required to meet current demand and demand generated by increased enforcement activities. (An additional 275 beds will also be added through increased collections of the Immigration User Fee and through the Breached Bond Detention Fund.)
  
- **Cyber Crime Investigations.....\$5.7M (20 FTE)**  
This request funds positions within the Office of Cyber Crime Center (C3) and those programs directly supporting cyber crime investigations. With this staffing increase, ICE would increase investigations of cyber related crimes related to identity and benefit fraud, child exploitation, money laundering as well as supporting other investigations by providing digital forensics and electronic monitoring.
  
- **National Security/Critical Infrastructure Investigations.....\$11.8M (36 FTE)**  
This request funds positions to increase national security and critical infrastructure investigations especially at Ports of Entry and other sensitive facilities that attract terrorists and/or illegal and undocumented workers.
  
- **Commercial Fraud/Intellectual Property Rights (IPR).....\$4.6M (14 FTE)**  
This request funds positions for priority Commercial Fraud, IPR, Trade Transparency Unit (TTU) and requisite supporting investigative programs at the Cyber Crimes Center. These resources will be used to identify, target, counter, and dismantle methods and vulnerabilities exploited by criminal organizations engaged in highly profitable trade crimes, such as trafficking counterfeit merchandise and pharmaceuticals.
  
- **Outbound Enforcement.....\$1.0M (3 FTE)**  
This request funds positions to increase outbound enforcement support that prevents arms and strategic technologies, deemed exports, contraband, and money from leaving the United States. This request will increase outbound enforcement investigations especially at Ports of Entry, the border, and sensitive facilities that are vulnerable to illegal procurement and export of sophisticated U.S. technology and weapons.
  
- **Visa Security Program.....\$3.4M (3 FTE)**  
This request funds deployment of two additional overseas Visa Security Units in high-risk locations such as Istanbul, Turkey and Beirut, Lebanon.
  
- **Workforce Integrity/Security Management Unit .....\$7.1M (19 FTE)**  
This request would fund law enforcement positions and support staff within the Office of Professional Responsibility, including \$4.1 M to support workforce integrity efforts and \$3M for positions in support of the Security Management Unit that is responsible for centralization, management, and operational oversight of ICE internal security functions.

- **State and Local Law Enforcement Support (287(g)).....\$12.0M (7 FTE)**  
 The request funds \$2.67 M in initial training, training travel, and annual refresher training for 200 State and local law enforcement officers under the 287(g) program, which serves as a force multiplier for ICE immigration enforcement, with ICE training, certifying, and supervising State and local law enforcement officers. The request would also fund \$8M for necessary IT connectivity for State and local participants and \$1.33 M for other costs within ICE to support program growth.
- **Co-Location of ICE Facilities .....\$12.3M (1 FTE)**  
 This request funds a portion of first-phase requirements to consolidate ICE core mission functions in cities where ICE currently occupies multiple locations. The initiative proposes to facilitate ICE-wide physical integration through co-location of facilities that provide safe, secure, and efficient workspace conducive to achieving the ICE mission.
- **Human Resource Workforce Increases ..... \$0.8M (5 FTE)**  
 This funding will strengthen the Office of Human Capital to provide more customized service, confidence in information, and consistent handling of ICE-related personnel matters.
- **Training Consolidation and Integration.....\$1.8M (14 FTE)**  
 This funding will facilitate the consolidation of all ICE training coordination and oversight, including improved training delivery and support at both the ICE Academy and the Leadership Development Center.

U.S. Immigration and Customs Enforcement requests \$241.5 million for this activity. This is an increase of \$10.4 million for annualization of prior year funding, and pay inflation.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

ICE Legal Proceedings (also referred to as the Office of the Principal Legal Advisor or OPLA) provides the legal representation, advice, training, and services required to support the ICE mission. Pursuant to section 442(c) of the Homeland Security Act, OPLA is the exclusive legal representative for ICE and the DHS legal component authorized to represent the government in all exclusion, deportation, and removal proceedings before the Department of Justice's Executive Office for Immigration Review (EOIR).

As the legal representative for the U.S. Government at immigration court hearings, OPLA attorneys handle a variety of immigration-related issues that range from contested removals to custody determinations to applications for administrative relief. Many of the hearings involve criminal aliens, while others involve terrorists and human rights abusers. Additionally, OPLA provides critical legal support to ICE operational elements concerning customs, worksite enforcement, ethics, employment law, tort claims, and administrative law issues.

OPLA consists of a headquarters component and 26 Chief Counsel Offices (CCOs). The areas of responsibility for these CCOs are consistent with the 26 domestic areas of responsibility within the ICE Office of Investigations (OI). Additionally, a Mission Support Division provides administrative services to OPLA's operational elements. The following highlights the primary duties and responsibilities of OPLA's Headquarters divisions:

- Appellate and Protection Law Division (APLD). APLD has various primary areas of responsibility which includes the following: appellate and motions practice before the Board of Immigration Appeals (BIA); Federal litigation review; and protection law issues. APLD reviews all ICE appeals to the BIA and plays a lead role in briefing the most significant cases. APLD provides assistance and legal guidance daily to the Chief Counsel Offices and other OPLA/HQ Divisions on appellate and motion practices, as well as protection law issues. In addition, APLD reviews and makes recommendations on adverse Federal litigation impacting ICE and provides guidance to the CCOs on developments in the Federal courts. APLD works closely with the Department of Justice's Office of Immigration Litigation (OIL), DHS Office of the General Counsel, and United States Attorney Offices in developing legal strategy and briefing in significant Federal cases. Furthermore, APLD reflects the commitment within ICE and OPLA to the sound and thoughtful handling of protection law issues and cases. The immigration courts and BIA adjudicates tens of thousands of requests for asylum, withholding of removal and for protection under the Convention Against Torture annually. These proceedings play a critical role in the development of United States protection law, including the issuance of decisions by the BIA and in Federal courts. APLD also has primary responsibility for handling automatic and discretionary stays of immigration court bond decisions, oral arguments before the BIA, and recommendations to certify cases to the Attorney General.
- Commercial and Administrative Law Division (CALD). CALD provides legal advice to ICE and represents ICE in the areas of fiscal law, Federal tort claims and Bivens actions, memoranda of understanding and other agreements, contract law, breached bonds, and a range of other administrative law matters in support of ICE operations. CALD also adjudicates administrative tort claims, provides guidance and legal advice concerning procurement actions, and develops and coordinates ICE legal policy in these areas. CALD represents ICE before the Government Accountability Office and the Civilian Board of Contract Appeals in procurement matters. CALD further assists Department of Justice litigation attorneys in representing ICE before the various Federal courts in Federal tort claims and Bivens cases, procurement matters, and other administrative law matters.
- Enforcement Law Division (ELD). The ELD is responsible for handling traditional immigration enforcement issues, general officer authority issues, and providing legal advice on custom issues. The demand for high quality products from ELD has increased tremendously in recent years. This is illustrated by the dramatic increase in worksite enforcement activities and the need for increased ELD client advice in the areas of detention, expedited removal, stipulated removal, reinstatement of removal and custody determinations. ELD plays a significant role in worksite enforcement operations, including review of warrant affidavits, providing legal advice to operational planners and agency leadership, traveling to the site to provide advice on legal issues arising during operations, and working extensively with the Department of Justice in related Federal court litigation. Further, ELD provides legal support and counsel to the national security and cybercrimes sections of ICE Office of Investigations, as well as the Office of International Affairs, on highly specialized issues generated by these organizations.

Additionally, any proposed legislation or regulation on both immigration and customs issues requires ELD attention and expertise, whether to draft, negotiate, advise, or comment. OPLA's Regulatory Counsel has various major functions and plays a significant role in ICE's mission, which includes: drafting and assisting others in drafting ICE regulations, including changes in response to comments received during the clearance process, or public comments on a proposed or

interim rule; guiding ICE regulations through the clearance process to the publication in the Federal Register of a proposed rule and ultimately a final rule; and reviewing regulations proposed by other agencies that affect ICE's operations.

- Ethics Office. The Ethics Division administers the ICE Federal government Standards of Conduct Program, providing training, counseling, and management of the ethics financial disclosure process for all ICE employees. The Ethics Division provides legal professional responsibility advice to ICE attorneys and oversees management inquiries into OPLA employee misconduct complaints.
- Human Rights Law Division (HRLD). HRLD coordinates ICE's litigation efforts nationwide to pursue criminal prosecutions and judicial orders of removal against human rights abusers. HRLD team members work closely with the Offices of Investigations and Detention and Removal to provide legal advice to agents and officers in the identification, investigation, prosecution, and removal of individuals involved in human rights abuses such as genocide, extrajudicial killings, and torture. Additionally, HRLD works closely with the Departments of State and Justice, intelligence agencies and non-governmental organizations to ensure that the United States does not become a safe haven for human rights abusers. HRLD currently has a caseload of 800 cases in various stages of litigation involving individuals from 85 different countries.
- Labor and Employment Law Division (LELD). LELED provides legal advice and represents ICE in the areas of employment and labor law. LELED represents ICE before the Equal Employment Opportunity Commission, the Merit Systems Protection Board, and the Federal Labor Relations Authority in employment and labor matters, and LELED further assists Department of Justice litigation attorneys in representing ICE before the various Federal courts in Freedom of Information Act and Privacy Act cases, and other labor law matters.
- Legislative Counsel. Legislative Counsel reviews legislation for ICE to determine the impact of the proposal on the agency. In addition, Legislative Counsel drafts and reviews legislative proposals for ICE, including coordinating the legislation, and legislative proposals with the ICE Office of Congressional Relations, Office of Policy and ICE Executive Secretariat, as well as coordinating with the DHS Office of the General Counsel and DHS Policy Office.
- National Security Law Division (NSLD). NSLD provides legal advice and oversees litigation involving special interest cases, including those involving international terrorism, counter-terrorism, espionage, and other national security matters. The legal work performed by the NSLD is critical to ICE's efforts to protect the nation's security. NSLD attorneys are involved in a fast-paced practice, working closely with other Federal law enforcement and intelligence agencies, including the FBI and CIA, and routinely make decisions that have an immediate impact on national security. Specifically, NSLD attorneys oversee and coordinate removal proceedings involving terrorists and foreign intelligence agents, provide legal support and training to ICE's Office of Investigations (especially the Counter Terrorism Unit, National Security Integration Center, and Visa Security Unit) and Office of Intelligence, and liaison with the Civil and Criminal Divisions of the Department of Justice.
- Strategic Management Division (SMD). SMD is responsible for managing OPLA's strategic plan to ensure that OPLA maintains a trained, professional, highly motivated, and client-focused staff who will effectively and efficiently handle all legal matters within OPLA's areas of responsibility. SMD is responsible for assessing OPLA's current strategic objectives to determine whether

refinements are necessary and ultimately advance OPLA to the realization of its 3-5 year vision. This vision includes the following goals: provide professional, highly motivated, and client focused staff in sufficient number to promptly and effectively prosecute immigration and customs law violators, particularly those who threaten the safety of our citizenry; meet the criminal, civil and administrative litigation, legal advice, and other legal service needs of ICE and DHS by deploying state-of-the-art technology and training our staff in both substantive specialties and knowledge-management capabilities; embed attorneys with ICE operational managers to provide them with assistance; provide training to ICE legal and operational components; facilitate communication among DHS and ICE legal and operational components; advance the ICE mission with DOJ, the U.S. Attorneys, and the broader law enforcement community; encourage the proper exercise of prosecutorial discretion; and reward outstanding employee performance.

SMD has deployed General Counsel Electronic Management System (GEMS) software and hardware for case and project management. When fully developed and deployed, GEMS will provide vital statistics and reporting to DHS and Congress regarding the work products of ICE Counsel. The system's robust tracking capabilities will reduce and prevent fraud in the immigrant application process by providing comparative access to documents and other data filed by aliens in immigration court. GEMS will expedite and improve attorney preparation of immigration cases and assure that OPLA provides a uniform application of immigration policies and practices. GEMS also provides a greater knowledge base to the Department of Justice attorneys who work on immigration matters and to Department of State officers so they may ascertain the status of aliens' appeals of visa petitions and removal hearings.

- Training Division (TD). OPLA's TD is responsible for a variety of training events such as, Management Meetings, New Attorney Training, Specialty Law training - National Security, Human Rights, Labor Law, and the Leadership Development Training Program specifically tailored for OPLA managers. The TD coordinates and facilitates training with other Federal, State and local government agencies (i.e., 287(g) training). Finally, the TD tracks training for all OPLA employees and ensures compliance with mandatory ICE training requirements.

The following illustrates the workload and the types of cases for which OPLA is responsible.

Immigration Court Cases. In FY 2007, of a total of 334,607 matters received (including 278,137 proceedings), immigration courts completed 328,425 matters and 272,879 proceedings, including 115,017 that involved detained aliens. Immigration court matters litigated by ICE OPLA attorneys included over 58,783 asylum filings and immigration courts adjudicated over 28,000 applications for the Convention Against Torture.

Also in FY 2007, the Board of Immigration Appeals (BIA) completed 35,393 of 36,438 cases received and published 40 decisions. The government prevailed in over 70% of the published cases.

Expedited removals of criminal aliens in FY 2007 resulted in ICE issuing 272,000 administrative removals and 59,000 reinstatements of final orders - both requiring legal interaction, review, and oversight.

Additionally, Immigration court matters litigated by ICE OPLA attorneys in OPLA's 26 Chief Counsel Offices included over 50,000 asylum filings. Additionally, the immigration courts adjudicated over 31,000 applications for the Convention Against Torture.

In FY 2007, OPLA's Commercial and Administrative Law Division and components that are now the Labor and Employment Law Division:

- Completed 144 of the 294 Equal Employment Opportunity cases received;
- Completed 81 of the 117 Merit Systems Protection Board cases received;
- Completed 25 of the 61 employment law cases filed in Federal Courts;
- Wrote or reviewed 674 disciplinary personnel actions
- Provided over 228 hours of training to ICE managers in the areas of EEO law, disciplinary actions, and performance management;
- Provided litigation support through its Tort Litigation Team in approximately 125 Bivens or Federal Tort Claims Act (FTCA) lawsuits, of which 45 were dismissed, settled, or litigated to completion; and
- Adjudicated approximately 500 administrative FTCA claims.

In FY 2007, 18,035 criminal immigration cases were filed against 19,590 defendants as a result of the assistance from OPLA attorneys with the prosecution of these cases.

In FY 2007, OPLA attorneys spent significant time assisting the Department of Justice, Office of Immigration Litigation (OIL) with immigration-related Federal court litigation. According to statistics compiled by OIL, immigration-related Federal court litigation has soared in recent years, from 5,478 cases in FY 2001 to 19,945 cases in FY 2007.

Special Interest Cases. In FY 2007, OPLA attorneys handled 820 special interest cases involving national security risks in addition to 1,000 cases involving human rights abusers. Additionally, approximately 1,300 cases are under active investigation by ICE operations components as potential national security risks and 375 others are in removal proceedings.

In addition to the specific workload statistics above, OPLA provides legal advice and guidance on a myriad of issues, including but not limited to: FOIA/Privacy disclosure issues; MOUs and bid protests; custody/detention issues; search and seizure authorities; customs law; procurement and financial issues; contracts; union/labor issues; ethics, including required financial disclosures; debt collection; legislation; regulations; and various ICE initiatives. The legal advice and legal services aspect of OPLA's responsibilities is challenging to capture as a specific workload measure, but it represents a considerable workload burden on top of the litigation/prosecutorial responsibilities required of the program.

Enhancements for FY 2007 enabled OPLA to increase the attorney-to-immigration judge ratio from 2 to 1 to 2.3 to 1. The higher ratio increases the number of attorneys that are available to go to immigration court, thereby allowing attorneys to spend more time out of court to prepare cases and to handle collateral duties. OPLA also assigned seven additional attorneys to various U.S. Attorneys' Offices across the nation to handle criminal prosecutions. The enhancements also supported the increase in the number of attorneys stationed within Headquarters OPLA to cover the demands of national level, policy and guidance issues.

In FY 2008 and FY 2009, OPLA will continue to refine and improve business processes that will increase efficiency to better address increasing workload demands. As a result, OPLA will deploy resources more effectively to support critical enforcement initiatives, provide for a more thorough review of 287 (g) agreements and improve 287 (g) training, and recognize a far greater capacity to

provide high quality and timely legal guidance and counsel to operational components and the Assistant Secretary.

\* The above table includes emergency funding of \$50.2M provided in P.L. 110-161 for this activity. The FY 2009 Budget Request is \$1.7 billion. Excluding Emergency funds provided, the increase over FY 2008 is \$134.0 million for pay and non-pay inflation as well as a total program increase for Cyber Crime, National Security Protection Critical Investigators, Commercial Fraud/IPR, State and Local, and Outbound Enforcement.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Investigations (OI) enforces trade and immigration laws through the investigation of activities, persons, and events that may pose a threat to the safety or security of the United States and its people. Investigations lead to the arrest and prosecution of perpetrators and/or result in the removal of individuals posing risks to national security or public safety. OI investigates: illegal trafficking in weapons and proliferation of sensitive U.S.-origin military and dual-use technology (including weapons of mass destruction); the smuggling of narcotics and other contraband; human smuggling and trafficking; money laundering and other financial crimes; fraudulent trade practices; identity and benefit fraud; child pornography; child sex tourism; and health and public safety dangers. Special agents within OI play a key role in maintaining the safety and security of the United States relative to trade and commerce, financial markets, contraband, industrial and strategic parity, and immigration and border integrity. In partnership with local, state, national and international governments and agencies, OI uses its immigration and customs authorities to address vulnerabilities and prevent violations that threaten national security and public safety. OI is the preeminent investigative law enforcement agency dedicated to border security and the protection of the vulnerabilities that threaten our nation's borders.

OI identifies violators, prepares viable cases for prosecution, and, when appropriate, seizes illegally acquired assets - both in the United States and overseas (through cooperative host government law enforcement). A major contributor to the success of investigative efforts is close coordination and cooperation with Federal, State, local, and tribal law enforcement agencies.

Through inter/intra governmental partnerships and the use of innovative investigative techniques supported by intelligence, OI:

- Reduces the number of terrorists and other criminals who penetrate and pose a threat to the U.S. economy by gaining employment in critical and sensitive areas;
- Identifies and dismantles criminal organizations that exploit the nation's financial systems and engage in illegal money laundering, seizing illicitly acquired funds;
- Prevents the importation of Weapons of Mass Destruction (WMD) and other instruments of terror into the United States from abroad;
- Investigate efforts by international terrorists and hostile adversaries to obtain WMD materials and sensitive U.S.-origin military and dual-use technologies, arms and weapons, funds, and other support from U.S. and foreign sources;
- Investigates out-of-status and other aliens who pose a potential danger to the American people or infrastructure;
- Disrupts criminal organizations involved in narcotics smuggling and money laundering through multi-defendant prosecutions and seizures of drugs and monetary assets;
- Reduces potentially hazardous, harmful, and/or life-threatening situations caused by the importation of prohibited or illegal commodities;
- Enforces embargoes, trade agreements, and sanctions imposed by the United States government against foreign countries;
- Protects Intellectual Property Rights (IPR), including trademarks and copyrights;
- Investigates a variety of trans-border computer crimes being committed via the Internet;
- Safeguards children and potential victims from exploitation through crimes involving pornography, sex tourism, and forced child/prison labor;
- Disrupts those who deal in human trafficking and denies safe haven to those who violate human rights; and
- Identifies and targets organizations and individuals engaged in identity and benefit fraud.

OI's investigative activities are organized into four broad areas: national security investigations; financial investigations; smuggling, public safety, and worksite investigations; and investigative services.

**National Security Investigations:** OI works to deter and dismantle terrorist groups, individuals, and companies involved in the illegal procurement and movement of weapons of mass destruction and their materials and components. National Security Investigations personnel work closely with the Federal Bureau of Investigation's Joint Terrorism Task Forces (JTTFs). JTTFs utilize the collective resources of the participating agencies for the prevention, deterrence, and investigation of terrorism and related activities occurring in or affecting the United States.

The Arms and Strategic Technology Investigations (ASTI) program has a leading role in U.S. Government efforts to prevent foreign adversaries from illegally obtaining U.S. military and dual use products and sensitive technology, including weapons of mass destruction components. ICE special agents possess the U.S. Government's most extensive expertise, longest ranging experience, and broadest export-related authorities.

Project Shield America is ICE's public and industry outreach program for preventing the illegal export of sensitive U.S. munitions and strategic technology. Under this program, ICE special agents visit U.S. manufacturers and exporters of arms and sensitive military and dual-use goods to educate them

about U.S. export laws and solicit their assistance in identifying potential illegal exports. Since late 2001, ICE special agents have conducted more than 14,000 presentations, resulting in many tips that have led to ICE criminal investigations.

Millions of nonimmigrant aliens enter the United States every year to visit, work, and attend school. An estimated 100,000 of these aliens annually will overstay or violate the terms of their authorized period of admission, for economic, personal reasons, and criminal reasons. In an effort to combat this threat, the Federal Government has implemented the National Security Entry Exit Registration System (NSEERS), the Student and Exchange Visitor Information System (SEVIS), and U.S. Visitor and Immigrant Status Indicator Technology (US-VISIT) to track nonimmigrant aliens in the United States. The responsibility for enforcing these systems lies with the Compliance Enforcement Unit.

The Threat Analysis Section (TAS), a part of ICE's National Security Integration Center, is a specialized group of agents and intelligence analysts who proactively identify persons of interest from within the non-immigrant community of visitors, students, and temporary workers in the United States. The TAS uses the latest computer technology and unlimited access to immigration, law enforcement, and intelligence information to identify hidden links and associations between persons and events that could indicate a previously unknown threat.

National Security Investigations personnel participate in the Human Smuggling and Trafficking Center (HSTC), which combines ICE's resources with other Federal agency representatives from the policy, law enforcement, intelligence, and diplomatic arenas to work together to achieve increased progress in addressing the problems of human smuggling, human trafficking, and clandestine terrorist mobility.

**Financial Investigations:** OI identifies, investigates, disrupts, and dismantles criminal organizations and the complex systems used to launder funds generated from smuggling, human trafficking, financial scams, commercial fraud and intellectual property rights violations, forced child labor, and other criminal activity. In coordination with private sector partners, OI reduces the vulnerability of U.S. financial systems to exploitation by terrorist and other criminal organizations, and seizes illicit proceeds derived from and used for criminal activity. In view of the significant role that financial assets and money laundering play in sustaining criminal organizations and criminal activity, all ICE investigations include a financial component.

The Cornerstone initiative focuses on coordination and cooperation with other domestic and foreign law enforcement agencies and the private sector to eliminate vulnerabilities in U.S. financial systems and disrupt and dismantle alternative financing mechanisms that terrorists and other criminals use to earn, move, and store illicit funds.

The Commercial Fraud Unit and National Center for Intellectual Property Rights (IPR Center) targets predatory and unfair trade practices that threaten our economic stability, restrict the competitiveness of U.S. industry in world markets, and place the public health and safety of the American people at risk.

The Trade Transparency Unit (TTU) and Money Laundering Coordination Center (MLCC) provide the analytical infrastructure to support financial and trade investigations. The TTU provides the capability to identify and analyze complex trade-based money laundering systems, such as the estimated \$5 billion-per-year drug money-laundering scheme known as the Black Market Peso Exchange (BMPE). The TTU has the unique ability to not only analyze domestic trade and financial data, but also trade and financial data of foreign cooperating partners.

OI actively participates in collaborative investigative task forces with other Federal, State, local, and international law enforcement agencies (e.g., High Intensity Financial Crime Area programs, Joint Vetting Units, Financial Action Task Forces) targeting terrorist financing and transnational money laundering.

**Smuggling/Public Safety/Worksite Investigations:** OI identifies, deters, interdicts, and investigates activities associated with the unlawful movement of people and goods into and out of the country. In addition to conducting investigations targeted at disrupting and dismantling activities of groups and individuals engaged in the smuggling of humans and contraband, OI investigates human rights violations, exploitation of individuals, importation of hazardous and prohibited items, identity and benefit fraud, critical infrastructure protection/worksite enforcement, and violent criminal aliens.

Agents are confronted with numerous challenges in the effort to combat drug traffickers and, ultimately, significantly reduce the amount of illegal drugs introduced into the United States each year. Drug smuggling organizations continue to develop new and sophisticated methods to smuggle drugs into the United States by developing new techniques, organizing internal conspiracies (i.e., criminals target corrupt personnel within a company or transportation industry to introduce contraband into otherwise legitimate cargo or conveyances), using various transshipment routes, and attempting to corrupt law enforcement officers. Resources and support for these investigative efforts are enhanced through increased coordination and cooperation with other Federal, State, local, and foreign law enforcement agencies and through participation in task forces such as the Organized Crime Drug Enforcement Task Force, the High Intensity Drug Trafficking Area, and the High Intensity Financial Crime Area programs.

Identity and benefit fraud is a vulnerability of national security because it enables terrorists and criminals to exploit the legitimate immigration process and obtain “legal” status in the United States via fraudulent means. Benefit fraud is an extremely lucrative form of organized white-collar crime; it is complex and challenging to investigate, and often involves sophisticated, multi-layered schemes with multiple co-conspirators that take years to investigate and prosecute. OI focuses on identifying and targeting the most significant, prolific, and egregious violators, and individuals and organizations that pose a risk to national security or public safety.

Violent criminal aliens, such as sexual predators and street gang members, pose a significant threat to public safety. In partnership with State and local law enforcement, OI investigates foreign-born sex offenders for violations of laws in order to remove them from the community and the country. Likewise, OI coordinates investigations with domestic and international law enforcement to disrupt and dismantle street gangs with foreign-born members which have been involved in various crimes with a nexus to the border, such as drug and human smuggling, weapons trafficking, document fraud, and the export of stolen goods. OI also works to deny safe haven to human rights violators in the United States by investigating their violations of U.S. criminal and immigration laws.

Through worksite enforcement initiatives, OI works with the Federal and private sector to prevent criminals and terrorists from infiltrating the U.S. economy by gaining employment in critical and sensitive areas. OI enforcement operations prioritize and target the most important, yet vulnerable, facilities for enforcement activity, and identify and remove unauthorized facility workers through multi-agency screening and arrest operations. Furthermore, OI is applying sanctions to criminal employers whose employment practices constitute worker exploitation or have a nexus to alien smuggling or fraud. OI also conducts enforcement operations and I-9 audits on egregious violators that are not complying with the Employment Eligibility Verification requirements and have adopted

the use of unauthorized workers as part of their business strategy. OI also conducts proactive outreach presentations and seminars under the ICE Mutual Agreement between Government and Employers (IMAGE) program to educate employers and trade associations as to their legal responsibilities that will help them remain in or achieve compliance with immigration and related laws.

**Investigative Services:** OI provides investigative support services to all categories of investigation, through operations including the Law Enforcement Support Center (LESC), the Cyber Crimes Center (C3), and the Forensic Document Laboratory (FDL). The LESG provides around-the-clock immigration identity and status information and real time law enforcement assistance to Federal, State, and local law enforcement officers regarding individuals that they encounter during the course of their duties. The C3 manages Operation Predator, an effort that targets sexual predators of children, and investigates and provides computer forensics on domestic and international criminal activities occurring on, or facilitated by, the Internet, including document and benefit fraud, arms and strategic technology, money laundering, counterfeit pharmaceuticals, child pornography, and child sex tourism investigations. The FDL is the only Federal crime laboratory dedicated exclusively to detecting and deterring travel and identity document fraud. Technical Operations assists the field by providing support for technical equipment needs including, tracking devices, video equipment, body wires, covert entry, Title III equipment, Telecom Linking System, as well as supporting all ICE OI Title III telephone, email and Internet Protocol intercepts, and pen registers. Technical Operations provides training in Undercover Operative classes, Designated Technical Agent classes, Technical Enforcement Officer classes, Title III classes, Penlink, and to foreign governments.

FY 2007, OI:

- Increased the number of large scale operations involving egregious violators or employers with significant numbers of unauthorized aliens;
- Trained an additional 426 State and local Law Enforcement Officers to enforce Federal immigration laws in 11 border and interior states through the 287(g) program;
- Expanded the compliance enforcement program by hiring 49 special agents and support staff;
- Implemented a program to proactively identify SEVIS certified schools utilizing the system for fraud or alien smuggling and train agents on accessing SEVIS and US-VISIT information;
- Assumed administrative control of HSTC;
- Established the National Export Enforcement Coordination Network to better coordinate DHS and intelligence community cooperation in export enforcement and proliferation of WMD technologies;
- Improved inquiry response time at LESG;
- Provided logistical support and coordination for the Textile Production Verification Teams (TPVT) visits scheduled for FY 2007 and investigate leads from the TPVTs for potential transshipment violations;
- Implemented the Designated School Official background check program and the school recertification program for SEVIS;
- Created advanced WMD curriculum and provided training in coordination with Argonne and Savannah River National Laboratories to ASTI agents in refocusing investigative assets on WMD proliferation investigations;
- Conducted 1,127 Project Shield America visits to manufacturers/distributors/exporters of dual-use/military technology;
- Provided formal advanced export-related investigative training to 180 ICE personnel;
- Established an advanced training program for ICE JTTF special agents;

- Continued implementation of the BMPE initiative;
- Created three additional TTUs with interested foreign governments and increased investigations in coordination with these countries;
- Continued Cornerstone's outreach/training for trade and financial business communities;
- Expanded the ability of the C3 to investigate the sale and distribution of fraudulent travel and identity documents through the Internet, provided additional data analysis, data archiving, disaster recovery, and advanced examinations within the digital evidence network;
- Expanded the C3 in identifying organizations utilizing Internet financial sectors to promote the unlawful sale, transportation, or diversion of licensable U.S. munitions list commodities;
- Expanded efforts of the ICE Cornerstone program by focusing specifically on Internet based financial sectors vulnerable to exploitation by terrorists and other criminal organizations involved in transnational money laundering (C3's E-Cornerstone initiative);
- Increased the speed, accuracy, and efficiency of immigration enforcement information being entered at the LESC into the National Crime Information Center (NCIC) database;
- Developed an IMAGE participant training conference and started design for IMAGE Conference Center;
- Under Operation Community Shield, implemented a national initiative called SURGE (Specialized Urban Response Gang Enforcement);
- Rolled-out a deemed export initiative targeting non-immigrants with unauthorized access to export controlled technology and information;
- Established six new Document and Benefit Fraud Task Forces (DBFTFs) to focus on immigration fraud, including employment-based immigration fraud (H1 and L visas);
- Created additional Border Enforcement Security Task Forces (BESTs) in Texas, California, and Arizona to target violent criminal organizations along the border;
- Continued to implement Operation Firewall a bulk cash smuggling initiative designed to target bulk cash smuggling shipments in route to our borders, at our borders, and beyond our borders; and
- Implemented *Hands Across the World* in eight countries to educate key foreign law enforcement and U.S. Embassy personnel around the world on money laundering, with an emphasis on bulk cash smuggling.

FY 2008, OI will:

- Initiate export enforcement programs dedicated to specific dual-use and military technology;
- Develop an employer outreach training curriculum and deliver IMAGE training to OI agents in the field on the IMAGE program;
- Expand the IMAGE employer outreach program from the headquarters level to the field level through locally delivered presentations and speeches from IMAGE officials;
- Expand the Compliance Enforcement programs by hiring additional special agents, program managers, and support staff;
- Establish a visa waiver enforcement program that applies sophisticated name analysis software to investigate violators that pose an elevated risk to national security;
- Expand and utilize the National Security Integration Center (NSIC);
- Establish the Designated School Official background check program and the school recertification program for SEVIS;
- Establish and expand the National Export Enforcement Coordination Network;
- Reduce the nation's vulnerability to exploitation of nonimmigrant visas by increasing compliance enforcement actions;

- Assume control of financial oversight for the HSTC;
- Implement Bulk Cash Smuggling (BCS) enforcement strategy and training;
- Activate the Bulk Cash Smuggling Center, within the LESC, to provide real time investigative and logistical support to law enforcement agents encountering bulk cash smuggling and other money laundering activity;
- Implement enforcement action against fraudulent trade schemes used by terrorists/other criminal organizations to support their illegal activities;
- Seize fraudulent documents in transit between the producers and end-users before they can be used (Operation Wing Clip);
- Continue Cornerstone’s outreach and training for the trade and financial business communities;
- Expand the Airport Security Program into the top 50 international U.S. airports;
- Expand the number of DBFTFs from 17 to 26;
- Under Operation Community Shield, expand gang enforcement by creating mobile gang enforcement teams for deployment to high threat gang areas and expand BESTs to target violent criminal organizations along the Northern border;
- Expand activities to disrupt/eliminate the most significant contraband/human smuggling/transportation organizations;
- Improve implementation of asset forfeiture related to organizations involved in identity and benefit fraud;
- Expand the ability of C3 to investigate the full range of immigration identity and benefit fraud categories occurring through the Internet;
- Continue to expand the resources of the ICE Cyber Crimes Program and the Digital Forensics Program to match the growth of Internet-related and high-tech criminal activity investigated by ICE and promote operational efficiency;
- Increase aggressive intelligence collection and investigations of criminal activity involving Internet financial sectors and the Global E-Currency Transfer System (GETS);
- Roll out a foreign outreach program targeting businesses that buy and sell U.S. dual-use and military technology and initiate export enforcement programs dedicated to specific dual-use and military technology;
- Continue outreach and enforcement activities against illegal Money Services Businesses;
- Implement the “security bond” initiative with CBP, targeting illegal in-bond diversion;
- Implement special operations targeting violations of “Anti-dumping” regulations;
- Continue an initiative to exchange information and conduct joint investigations with the People’s Republic of China (PRC);
- Expand cyber investigative services in the areas of fraudulent identity and travel documents sold on the Internet, and online trans-border money laundering;
- Participate in efforts to establish formal TTUs;
- Partner with the U.S. Department of Defense (DoD) and create a uniform process to access military installations for worksite enforcement, and expand the IMAGE program;
- Continue to target egregious employers who are knowingly hiring illegal aliens, especially those that are in the critical infrastructure industries;
- Assume control of financial oversight for the HSTC;
- Continue existing efforts by C3 to investigate and coordinate cases involving intellectual property violations (to include pharmaceuticals) and illegal export violations occurring online;
- Continue targeted investigations of identified human rights violators/support networks; and in coordination with foreign governments, expedite task force efforts to identify/investigate Politically Exposed Persons (PEPs); and

- Construct an I3 Center which will house IMAGE, IPR, and SAC DC Identity and Benefit Fraud Task Force and will allow IMAGE and IPR to conduct corporate outreach.

FY 2009, OI will:

- Continue foreign outreach program targeting businesses that buy and sell U.S. dual-use and military technology (the program will be rolled out in conjunction with foreign law enforcement and export licensing agencies);
- Expand deemed export initiative targeting non-immigrants with unauthorized access to exported controlled technology and information;
- Continue training program for agents on accessing SEVIS and US-VISIT information;
- Deploy SEVIS II to better monitor foreign students and improve operability;
- Expand participation in the HSTC to select foreign law enforcement and intelligence agencies;
- Expand the ability of C3 to address the increases in digital data forensics volumes, while developing new tools and methods to manage and improve the analysis of derived digital information;
- In coordination with CBP, implement the “security bond” initiative, targeting illegal in-bond diversion, at four ports/ICE offices;
- Implement special operations at select ports to identify and target U.S. Anti-Dumping and Countervailing Duty (AD/CVD) evasion schemes;
- Continue an initiative to exchange information and conduct joint investigations with the People’s Republic of China (PRC);
- Expand the worksite enforcement program by increasing the number of large scale arrests of egregious violators or employers with significant numbers of unauthorized workers in historically problematic industries not addressed by ICE in recent years;
- Continue to expand the DBFTFs to focus on immigration fraud, including employment-based immigration fraud (H1 and L visas);
- Expand BESTs to target violent criminal organizations along the border operating in major U.S. cities with significant international travel and commerce;
- Establish a Human Rights Violators Center to prevent human rights violators from entering the U.S., and identify, locate, prosecute and remove those offenders already in the U.S.;
- Provide 287(g) training to additional participating State and local agencies and implement a 287(g) e-training annual refresher course;
- Continue to enhance the capability of the LESC to provide real time assistance to Federal, State, local and tribal law enforcement officers who encounter criminal or wanted aliens;
- Expand digital data services and cyber intercept services to the field;
- Continue the implementation of regional cyber-technical service centers (six locations, collocated at ICE Special Agent in Charge Offices) to augment field-level digital media forensic operations;
- Seize fraudulent documents in transit between the producers and end-users before they can be used (Operation Wing Clip);
- Expand C3’s investigative role in the areas of fraudulent identity and travel documents sold on the Internet, and online trans-border money laundering;
- Continue to expand the data storage, forensic, and analytical capabilities of the ICE Digital Forensics Program through the additional two regional offices;
- Expand partnerships with more foreign governments through the Global Trafficking in Persons (G-TIP) program;
- Reduce vulnerabilities in U.S. critical infrastructure, unlawful acquisition of export restricted

technology, and unlawful entry of unauthorized non-immigrants into the United States;

- Mitigate threats posed by foreign nationals operating outside and within the United States. Seek to identify and prosecute individuals, corporations and criminal organizations that unlawfully attempt to gain illegal entry into the United States, acquire export restricted information and technology and/or access critical infrastructure facilities;
- Address cyber vulnerabilities through holistic investigative approaches leveraging criminal enforcement authorities as well as analytical capabilities unique to ICE;
- Strengthen U.S. partnerships with the legitimate international trade community and trademark and rights holders who depend upon and aid in the investigation of Commercial Fraud and IPR Crime;
- Strengthen the U.S. economy by ensuring legal goods are shipped into and out of the U.S.;
- Through C3, provide some form of cyber investigative or cyber technical support across almost all investigative case categories for which ICE is responsible;
- Provide a seamless and cohesive center for ICE's Internet-related investigations where leads are received from domestic and foreign sources, validated for violations of U.S. law, and then disseminated to ICE domestic and foreign field offices for further investigation;
- Provide cyber crime and forensic training to OI agents, as well as other Federal, State, local, and international law enforcement officers; and
- Identify and pursue the criminal continuum from countries of source and transit to the United States.

U.S. Immigration and Customs Enforcement requests \$128.9 million for this activity. This is an increase of \$18.5 million for annualized prior year funding, pay and non-pay inflation.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of International Affairs (OIA) conducts criminal investigations of legal violations involving contraband smuggling, immigration violations, money laundering, arms/technology trafficking, child sexual exploitation (child pornography and child sex tourism), and cyber crimes overseas. OIA also acquires law enforcement intelligence and information, supports other programs such as the Container Security Initiative (CSI), conducts international training, develops and implements the Visa Security Program (VSP), and act as the in-country ICE liaison with foreign governments and Embassy staff.

OIA is responsible for the enforcement of health and safety issues, including tainted or prohibited foodstuffs, unsafe toys, and consumer products that are imported into the United States. OIA coordinates with foreign counterparts to share information under the bilateral agreements and Customs Mutual Assistance Agreements (CMAAs). The office refers foreign leads to domestic ICE investigation offices and handles ICE investigative leads. The office investigates and enforces laws for other Federal agencies that have a Memorandum of Understanding with DHS and any other matters as directed by the Secretary of DHS. OIA may also serve as Senior DHS representatives in some overseas locations.

In implementing the VSP, OIA is working closely with the Department of State to provide an additional level of review and security needed to enhance national security by identifying terrorists, other criminals, and persons of special interest from foreign locations. The VSP enhances the security of visa issuance at high-risk overseas posts by deploying highly skilled and experienced law enforcement officers who conduct an in-depth investigative review of visa applications that raise security concerns, investigate concerns relating to visa fraud and other criminal activity which can exploit the visa system, and provide advice and training on security issues to Department of State consular officers, thereby enhancing their ability to screen security risks as they adjudicate visas.

In addition to supporting the goals of DHS, OIA's activities also support the goals set forth by the Department of State in the areas of regional stability, counter-terrorism, homeland security, weapons of mass destruction, international crime and drugs, economic prosperity, and public diplomacy.

FY 2007, ICE:

- Established Trade Transparency Units (TTUs) locations in Colombia, Paraguay, Argentina and Brazil. Currently, OIA is in the process of establishing a TTU in Mexico. As a result of these established TTUs, closed investigations have increased by 15 percent;
- The International Law Enforcement Academies (ILEA), ICE OIA coordinated training for approximately 1154 participants in areas of human trafficking, financial crimes, commercial fraud, child exploitation, intellectual property rights, fraudulent documents, and arms trafficking. Participants included local and national police, customs and immigration officers, and prosecutors;
- Visa Security Program expanded overseas deployment to nine posts in eight countries and trained more than 40 special agents to serve as visa security officers. ICE investigations through this program resulted in the denial of more than 750 visas and the initiation of more than 140 investigations;
- Worked with the Mexican government to rescue 15 victims of human trafficking, training approximately 250 law enforcement officers from different Government of Mexico agencies in the different areas Global Trafficking in Persons Program (G-TIP) investigations, such as cyber crimes, electronic surveillance, trafficking investigations, and victim assistance;
- Provided Export Control and Related Border Security training to authorities in seven countries;
- Provided bulk cash smuggling operational training to customs and law enforcement personnel in the Philippines. This bulk cash smuggling enforcement initiative resulted in several cash seizures with the assistance of U.S. Government personnel and assets;
- Conducted multilateral bulk cash smuggling enforcement operation with United Kingdom and Pakistan law enforcement authorities. Operation resulted in 13 currency seizures in the United States and the United Kingdom;
- Funded and managed the upgrade of IT systems at 47 international locations in support of creating a standard operating environment to perform ICE and OIA operational and administrative functions;
- Coordinated data sharing with the Overseas Building Operations / Department of State to ensure accurate data was reported to calculate ICE's share of the embassy costs under the Capital Security Cost Sharing Program. This reconciliation process prevented OIA/ICE from being charged for other agencies' positions;
- Utilized the International Bulk Cash Smuggling Training Program and, working closely with the Office of Investigations, provided overseas training courses to more than 255 foreign law enforcement officers in 34 countries;
- Identified and implemented three global OIA staffing actions to optimize the international investigative goals;
- Developed OIA as an individual component and identified standard operating procedures, processes, and tools to enhance functions domestic and foreign offices;
- Completed 43 end-of-tour rotations of employees and dependents from overseas, and filled 70 positions in support of strategic and operational goals;
- New Supervisory Detention and Deportation Officer Attaché positions were created and classified with 6c law enforcement coverage and AUO;
- Thirteen attaché positions were recruited under the new dual 1811/1801 announcements and are in the process of selection to deploy in FY 2008;

- Deployed DDOs to three countries and will complete deployment to six additional overseas locations in early FY 2008; and
- Funded and managed the upgrade of IT systems at 47 international locations in support of creating a standard operating environment to perform ICE and OIA operational and administrative functions.

FY 2008, ICE will:

- Realign overseas staffing levels to address the increasing need to disrupt and dismantle human trafficking and smuggling organizations and other criminal organizations in Eastern Europe;
- Increase overseas deployment of visa security officers according to risk-based assessments;
- Expedite task force efforts to identify and investigate PEPs in coordination with foreign governments;
- Assist in the creation of additional TTUs with interested foreign governments;
- Provide logistical support and coordination for the TPVT visits scheduled for FY 2007 and investigate leads from the TPVTs for potential transshipment violations;
- Continue to support all ICE and other DHS international enforcement efforts; and
- Continue to expand the VSP program to new sites, and expand the VSP role in the Security Advisory Opinion (SAO) Process.

FY 2009, OIA will:

- Support ICE and other DHS law enforcement related programs overseas;
- Participate in efforts to establish formal TTUs;
- Continue to expand the VSP program, consistent with the 5-Year Expansion Plan, by opening two new VSP offices in Istanbul, Turkey and Beirut, Lebanon;
- Identify, disrupt, and dismantle organizations involved in circumventing established laws and procedures designed to stem systemic vulnerabilities;
- Continue task force efforts to identify and investigate PEPs in coordination with foreign governments;
- Assign officers to overseas visa-issuing posts to enhance visa security by vetting visa applicants, providing expert advice and training to DOS Consular Officers;
- Increase its coverage of the highest risk visa activity worldwide;
- Deter, dismantle, and disrupt human smuggling organizations in Eastern Europe; and
- Improve and expand the global reach in the investigative areas of human trafficking, anti smuggling, money laundering, child exploitation, fraud and sensitive technology investigations, as well as reduce the threat associated with foreign nationals transiting the United States.

U.S. Immigration and Custom Enforcement requests \$62.0 million for this activity. This is an increase of \$2.2 million for annualized prior year funding, pay and non-pay inflation.

**CURRENT SERVICES PROGRAM DESCRIPTION**

The ICE Office of Intelligence is responsible for managing the ICE intelligence system and its operational functions, including the activities of the Headquarters staff, as well as field offices spread throughout the country. The overall aim is to ensure that intelligence developed or received is processed, analyzed, and disseminated to ICE executive management and to operational units as it pertains to Homeland Security, infrastructure protection, and the illegal movement of people, money, and cargo entering, exiting, transitioning, or moving within our Nation's borders. The Office of Intelligence recognizes that threats related to immigration and customs issues are greatly facilitated by the illegal or uncontrolled migration of aliens across our borders. The staff, assets, and resources of ICE Intelligence operate across the entire nation, in support of the following programmatic and functional areas:

- **Arms and Strategic Technology:** This program focuses on the identification and disruption of individuals and organizations involved in the unauthorized movement and procurement of critical technology, dual-use goods, chemical, biological, radiological, nuclear/conventional weapons, and unauthorized U.S. exports to prohibited countries. ICE Intelligence produces hundreds of leads and Homeland Security Intelligence Reports for ICE operational components and other DHS customers.
- **Human Smuggling and Public Safety:** This focus is on human smuggling, trafficking in persons, immigration benefit fraud, mass migration and threats to public safety emanating from street gangs. Intelligence personnel assist ICE investigators in leveraging intelligence community resources through intelligence research and continuing liaison. The intelligence activity within this function also deals with violent gangs and criminals in the homeland, using immigration authorities and resources to gather information regarding foreign-born suspects, violators, and gang members.

- **Contraband Smuggling:** Intelligence production here deals with international narcotics trafficking organizations, and the disruption of smuggling groups and their operations. While narcotics is of primary importance, other forms of contraband trafficking, such as smuggling of prohibited goods are also of intelligence interest.
- **Illicit Finance and Trade Fraud:** This involves intelligence support with regard to illicit movements of money or financial instruments, as well as other commerce-related crime issues such as international trade violations, protection of intellectual property rights, and investigations of public health threats that cross our borders.
- **International Intelligence –** Extending the ICE Intelligence reach beyond our borders, this capability supports ICE offices worldwide with intelligence services and exchange of relevant information.
- **Collections and Requirements –** This serves a quality assurance function, ensuring that intelligence reporting and services are timely, relevant, and responsive to the needs and requirements of the agency.
- **Field Intelligence Groups –** The Office of Intelligence has enhanced its support of ICE offices across the country by expanding the intelligence field structure from six regional offices to twenty-six Field Intelligence Groups (FIG), collocated in cities with ICE investigative offices. This will bring a strategic level of support to ICE operations throughout the homeland.

### **Key Accomplishments**

In FY 2007, the ICE Office of Intelligence reported the following successes that reflect its mission of supporting its customers in achieving the strategic goals of the Agency:

- Provided analytical support to the National Security Council Interagency Working Group on Human Smuggling (NSC/IWG) which has as its targets the highest priority smuggling cases within ICE—smugglers who have the capability to potentially transport terrorists clandestinely into the Homeland by:
  - Providing case support to 9 NSC investigations,
  - Drafting 16 assessments in the past year.
  - Providing data leading to the arrests of three major NSC
  - Providing intelligence which has led to disrupting 26 national level alien smuggling targets.
- ICE Intelligence has partnered with Domestic Security Section (DSS) and the Department of Justice to lead an aggressive, integrated initiative, the Extraterritorial Criminal Taskforce (ECT). The ECT is designed to leverage existing law enforcement, intelligence, and policy making resources and capabilities of the USG to attack the most significant criminal travel networks and support the U.S. and foreign prosecution of targets. In addition, the ECT Strike Force initiative aims to systematically disrupt and dismantle the international and domestic operations of criminal travel networks, identify and seize assets and illicit proceeds, and fix identified systemic vulnerabilities that are exploited by criminal elements to undermine immigration and border controls through proactive transnational investigations.
- Accomplishments included:

- Provided initial target analysis that resulted in 9 new international smuggling cases and authorized 25 intelligence assessments to support the ECT Strike Force.
- Arrested two major ECT Targets.
- ICE Intelligence conducted analysis in support of ICE Identity and Benefit Fraud initiatives and initiates analysis that identifies patterns and trends affecting national security issues. ICE Intelligence successfully completed its Operation Ardent Guardian, a nationwide initiative to identify asylum applicants linked to terrorism. Finally, ICE Intelligence helped maintain and update the primary immigration benefit fraud database utilized by the ICE Office of Investigations.
- ICE Intelligence provided intelligence support for the National Export Enforcement Coordination Network (NEECN), a major Office of Investigations initiative. ICE Intel also made intelligence information available to field offices through the ProNet program. ProNET is a national program that provides dynamic, near real time analytical application of current intelligence targeting international weapons of mass destruction (WMD) procurement networks. ICE Intel through the NEECN accomplished the following:
  - Issued 21 Homeland Security Intelligence Reports (HSIRS) in response to field requests for information.
  - Provided training to ICE agents both domestically and abroad on the ProNet program and the role of the ICE Office of Intelligence in the NEECN program.
  - Provided data exploitation services, through ProNet, of information obtained as a part of a major OI investigation.

ICE Intelligence established a Request for Information (RFI) System that allowed for tracking program-wide inputs to ensure alignment with ICE's strategic goals, customer goals and needs, better manage Intel's program resources, and monitor outcomes. The RFI system enables program leadership to quickly monitor customer requirement status, type, and satisfaction rates. The RFI system is an essential tool in documenting metrics for performance management and is applied to all program components.

- The National Intelligence Support Unit (NISU) of HQ, Intel provided Document Exploitation (DocEx) services - the initial year of DocEx implementation - to six different customers from the Office of Investigations, the Office of International Affairs, and the Student and Exchange Visitors Program. These services exploited large volumes of a wide variety of types of media in support of operations on four continents. The successful implementation of the DocEx program led the "Protecting the Homeland" award from the Assistant Secretary for this intelligence support. This effort represented an important step in better integrating innovative and highly effective intelligence support to Intel customer by assessing varied media resources (e.g., photos, receipts, phone books, and documents of all types) in order to establish intelligence leads which are captured in this data base

In FY 2008 and FY 2009, Intel's resources will continue to be directed by our Request for Information (RFI) System to support our customer's requirements for intelligence products. Intel will expand and refine the Field Intelligence Groups (FIGs) to fully support our customers in achieving the strategic goals of the Agency. Our Document Exploitation Team (DocEx) will be expanding to offer increased support to the Office of International Affairs and others. By building upon our successes from last year we will continue to meet our mission; ensuring that intelligence developed or received is

disseminated to ICE executive management and operational units as it pertains to Homeland Security, infrastructure protection, and the illegal movement of people, money, and cargo entering, exiting, transiting, or moving within our Nation's borders.

\* The above table includes emergency funding of \$186.0 M provided in P.L. 110-161 for this activity. The FY 2009 Budget Request is \$1.8 billion. Excluding Emergency funds provided, the increase over FY 2008 is \$252 million for pay and non-pay inflation as well as a total program increase for additional Bed Space and Staffing.

**CURRENT SERVICES PROGRAM DESCRIPTION**

Custody Operations provides safe, secure, and humane conditions of confinement for aliens taken into custody or apprehended by ICE (e.g., Fugitive Operations, Criminal Alien Program, Office of Investigations) and other law enforcement entities, such as the Office of the Border Patrol, and State, county, and local law enforcement jurisdictions within the United States. Custody Operations ensures that detained aliens appear for their immigration hearings and for their subsequent removal if so ordered by the immigration court.

ICE secures bed space capacity in numerous detention facilities, and monitors these facilities for compliance with National Detention Standards. These standards specify the living conditions appropriate for detainees and ensure that detainees are treated with dignity and respect, and that they receive the best possible care while they are housed at a facility. The Detention Facilities Inspection Group (DFIG) monitors conditions of confinement where ICE detainees are held in order to ensure that facilities utilized by ICE maintain appropriate conditions of confinement consistent with correctional industry standards and practices.

ICE owns and operates eight secure detention facilities called Service Processing Centers (SPCs). They are located in: Aguadilla, Puerto Rico; Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Miami, Florida; Los Fresnos, Texas; and San Pedro, California. The newest SPC, the Buffalo Federal Detention Facility in Batavia, houses 378 beds for detained aliens, with additional bedspace set aside for other Federal agencies. ICE implemented a design-build approach to enhance the physical plant of our SPCs and support facilities. Construction of two new administration and processing complexes at the Krome SPC in Miami and the Port Isabel SPC in Texas were completed during FY 2006. These capital improvements have greatly improved operational efficiency at these

locations by improving internal logistics and meeting the national standards for conditions of confinement.

ICE utilizes seven contract detention facilities, which are run by contractors solely for ICE. These facilities are located in: Aurora, Colorado; Houston, Texas; Tacoma, Washington; Elizabeth, New Jersey; Broward County, Florida; Pearsall, Texas; and San Diego, California. Through nationwide Inter-governmental Service Agreements (IGSA), ICE contracts for additional bed space with State and local detention facilities. Further, ICE supplements detention capacity through an arrangement with the Federal Bureau of Prisons' Federal Detention Center in Oakdale, Louisiana, for additional bed space as needed.

During FY 2006, ICE launched efforts to consolidate the detained population in select detention facilities based on careful analysis of immigration, geographical and legal requirements. To this end, in FY 2007, ICE has moved forward with plans to consolidate its detention capacity across the country by building a system which will include facilities of 1,000 beds or greater located strategically across the United States. ICE opened the first of these facilities in Stewart County, Georgia. These facilities will serve designated cases throughout the adjudication process and will increase efficiency due to the immediate proximity between the detainee and case management staff, attorneys, Executive Office of Immigration Review (EOIR), and removal locations. The plan includes maximizing the utilization of existing facilities and excess detention capacity in an effort to reduce costs and activation time. ICE will continue to consolidate populations according to strategic geographic areas such as San Diego, Phoenix, San Antonio, Seattle, New York and Houston.

Apprehensions are increasing due to the recent resource enhancements for immigration enforcement staff (e.g., Fugitive Operations, Criminal Alien Program, Border Patrol) and the Department's commitment to maintaining an end to the "catch and release" of illegal aliens along the Southwest Border. Key to ICE's success in managing a growing detention population has been the creation of the ICE Detention Operations Coordination Center (DOCC) to manage detention and transportation resources on a national level. The national management of these resources has allowed ICE to support apprehensions in field offices with limited detention capacity by transporting cases to field offices with excess detention capacity. This practice greatly increases ICE's efficient use of finite detention resources and promotes successful accomplishment of our immigration enforcement mission, including providing detention facilities meeting the highest standards.

ICE's overall detention strategy for adding more space has been through a combination of privately-owned and-operated facilities, contract facilities, and inter-governmental service agreements with State and local facilities. ICE is conducting a three-phased study which will look into the feasibility, cost-benefit, and potential transition of SPC bed space requirements to the private sector. ICE completed the first phase of the study and is working on completing the second phase to address the specific privatization issues, costs and benefits, and transition requirements on an individual facility basis.

Primary healthcare for alien detainees is managed by the Division of Immigration Health Services (DIHS), which became a component of DRO operations as of October 1, 2007. Through comprehensive health screening and the provision of direct patient care and managed care services to approximately 20,000 detainees, DIHS directly impacts the globalization of communicable disease and serves as a model for global health services delivery. A managed healthcare program is available system-wide to ensure adequate and appropriate care is provided to all detainees at the lowest possible cost.

The breadth of the responsibilities within the detention program requires a readiness to respond to a wide variety of emergency situations. A significant example is mass migration planning. ICE has been an essential component in the development of Operational Plan Vigilant Sentry; DRO is responsible for the security, custody, and transportation of arriving migrants during a mass migration event. DRO continues to lead the way in further refinement of the plan, particularly in regard to the utilization of the Migrant Operations Center located at the U.S. Naval Base in Guantanamo Bay, Cuba. ICE has helped define organizational responsibilities for management of migrants interdicted at sea and taken to the Migrant Operations Center. ICE has modified existing buildings and created new structures to maintain custody of interdicted migrants until their cases can be resolved. In addition, ICE has made preparations to carry out its responsibilities on Guantanamo in the event of a mass migration.

As part of planning for a mass migration or disaster, the DRO Incident Response Unit has created contingency plans for DRO resources to remain readily available for deployment in the event of a natural disaster, terrorist attack, or mass immigration emergency will be reviewed and modified based on lessons learned from recent hurricanes.

### **Key Accomplishments:**

#### FY 2007:

- Custody Operations implemented several technology-driven resources to achieve greater program management efficiency. These include:
  - The development of a customized bed space forecast model based upon transportation routes, apprehension forecasts, and historical length of detention data and case type; The development of a tracking system to track acquisition and procurement information to better align ICE components and easily track key projects;
  - Institution of Special Response Training (SRT) for field offices with dedicated SRT Teams to ensure that each SPC has fully operational and trained SRT personnel; and
  - Initiating the second phase of the ICE study of the costs and benefits of consolidating contracts at all SPCs, including detention services, in accordance with A-76 efforts.
- The Detention Standards Compliance Unit (DSCU) entered into an annual detention compliance inspection contract with Creative Corrections, who will conduct annual review of detention facilities housing ICE detainees and assist with program management, inspection schedules, and reports and an On-Site Detention Standards Compliance Contract with the Nakamoto Group, who will provide on-site compliance verification for detention facilities housing ICE detainees, including an automated reporting function to allow DRO to monitor the current compliance status of any particular facility.
- DCSU is currently in the final stages of modernizing ICE's National Detention Standards (NDS) to update agency policy regarding detention and brings ICE DRO practices in alignment with industry standards. The new standards are Performance-based Standards (PBS) which, focus on the *results or outcomes* the required procedures are expected to accomplish. Much like strategic planning, each detention standard is intended to produce expected outcomes that are clearly stated, rather than merely assumed. This new format improves the delivery of care to detainees and affords ICE the opportunity to measure outcomes over time. The use of performance-based standards encourages service providers to find optimal ways to meet

performance criteria, resulting in more efficient operations while still ensuring safety, security and appropriate conditions of confinement for the detained population.

- In FY 2007, medical examinations resulted in the detection of 175 cases of detainees with active tuberculosis, and 245 cases of other infectious diseases. Working with the countries of origin, DRO coordinated removals of 198 individuals with active and potentially active tuberculosis. This effort was supported by our coordinated ongoing collaborations among Federal, State, local, and foreign national public health officials, ICE officials and officers, and non-governmental entities to facilitate continuity of care for patients with active tuberculosis who are repatriated before treatment completion, to enable them to continue treatment without interruption and working with the countries of origin, thus minimizing threats to public health domestically and globally and minimizing acquisition of drug-resistant and multi-drug-resistant tuberculosis.

In FY 2008 and FY 2009, Custody Operations will continue to enhance its efforts and capitalize on increasing efficiencies and successes. DRO will:

- Continue to support the President's policy of ending "catch and release" at the northern and southern U.S. borders;
- Continue to support the 287(g) initiative and any additional State and local jurisdictions through the provision of detention space for detainees arrested by municipal law enforcement jurisdictions and brought to DRO custody;
- Continue its aggressive inspection program;
- Provide standard-quality conditions for additional facilities;
- Continue its aggressive inspection program;
- Provide standard-quality conditions for additional facilities;
- Sustain American Correctional Association (ACA) accreditation for all DRO-operated facilities; and
- Support the Criminal Alien Program and Fugitive Operations teams in their FY 2008 and FY 2009 apprehension targets.

\* The above table includes emergency funding of \$32.8 M provided in P.L. 110-161 for this activity. The FY 2009 Budget Request is \$237.6 million. Excluding Emergency funds provided, the increase over FY 2008 is \$42.6 million for pay and non-pay inflation.

**CURRENT SERVICES PROGRAM DESCRIPTION**

The National Fugitive Operations Program (NFOP) is responsible for reducing the fugitive alien population in the United States. At the end of FY 2007, there was estimated to be 594,756 fugitive aliens at large in the United States, according to the DRO Deportable Alien Control System (DACs). ICE works to reduce the fugitive alien population through the use of Fugitive Operations Teams (FOTs).

A Fugitive Operations Team is made up of:

- 1 Supervisory Deportation Officer (SDO);
- 4 Detention Officers (DOs);
- 1 Immigration Enforcement Agent (IEA); and
- 1 Deportation Assistant (DA).

In 2006, DRO created the Fugitive Operation Support Center (FOSC) to enhance the efficiency and effectiveness of the NFOP. The FOSC reviews and updates ICE fugitive alien cases in DACs, provides comprehensive leads to the FOTs, closes cases once deemed appropriate to do so and overall facilitates the efforts to meet the goal of 1,000 arrests per Area-of-Responsibility (AOR) per FOT. As a component of the NFOP, the goal established for FOSC is to eliminate 26,000 cases from the fugitive population each fiscal year. The fugitive alien population at the end of FY 2006 was 37,970 less than the population of 632,726 recorded on October 1, 2006.

The FOSC will conduct analysis, screening, background checks, and related support activities for the vetting of ICE fugitive aliens. This will allow the FOSC to reconcile data from external government and private sources. After analyzing vetting, and compilation, actionable information will be disseminated to FOTs. When operational, each Field Office FOT seeks to achieve a Field Office Area

of Operational Responsibility (AOR) goal of 1,000 arrests per FOT per annum. As the teams become fully staffed, the total amount of ICE fugitive and illegal aliens arrested will continue to increase significantly.

**Key Accomplishments:**

FY 2007:

- There was a 95 percent increase in the total number of ICE fugitive arrests as compared to the same time period in FY 2006.
- There was a 64 percent increase in the total number of ICE fugitive enforcement activities conducted by FOTs as compared to the same time period in FY 2006.
- All 75 funded Fugitive Operations teams (FOTs) became operational, conducting enforcement activities across the United States. Presently, all 24 DRO Field Offices have at least one operational FOT.
- FOTs arrested 30,408 illegal aliens. Of the total aliens arrested, 18,324 were ICE fugitive aliens, of which, 2,679 were criminal fugitive aliens. The remaining 12,084 arrests were comprised of non-fugitives, of which 2,755 were criminal aliens.
- 112,147 ICE fugitives were eliminated from the ICE fugitive alien population backlog.
- NFOP enforcement activities resulted in the removal from the U.S. of 64,545 fugitive aliens.
- The FOSC conducted 73,285 enforcement activities assisting in the reduction of the fugitive backlog.

FY 2008 and FY 2009 DRO will:

- Use additional funds provided by the Congress for an additional 29 teams, increasing the total number of funded teams to 104. By the end of FY 2009, all 104 Fugitive Operations Teams (FOT) are expected to be operational and conducting enforcement activities across the United States.
- Continue to develop procedures to process and analyze DACS fugitive data utilizing batch procedures.

U.S. Immigration and Custom Enforcement requests \$204.2 million for this activity. This is an increase of \$14.8 million for annualized prior year funding, pay and non-pay inflation.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Criminal Alien Program (CAP) identifies criminal aliens who are incarcerated in Federal, State, and local facilities and prepares them for immigration proceedings, ensuring that they are not released into the community. The identification and processing of incarcerated criminal aliens prior to their release into DRO's custody reduces the overall cost and burden to the Federal Government. CAP identifies these criminal aliens through interviews at the facilities and matches those criminal aliens with the list of removal orders and prepares to them for removal out of the country as soon as their criminal sentence is over. The program ensures the safety of our citizens as well as the national security of the United States by removing dangerous, often recidivist, criminal aliens before they engage in additional criminal activity.

A CAP team is made up of:

- 1 Supervisory Deportation Officer;
- 1 Deportation Officers;
- 6 Immigration Enforcement Agents; and
- 2 Deportation Assistants

While the total detained criminal alien population serving sentences at the Federal, State, and local level is not known, however, ICE removed over 90,000 criminal aliens in FY 2007. State and local correctional departments maintain independent data systems, and many do not track the immigration status of their prisoners. To resolve these issues, DRO is working with the States to receive their data and then compare the information given to the ICE immigration databases.

In FY 2007, DRO completed a comprehensive study of all known jail and prison facilities (Federal, State, and county) in the United States and provided a weighted score of risk to each. ICE's goal is to

achieve 100 percent screening in all jails and prisons to determine nationality of all incarcerated individuals. ICE is utilizing a phased approach to bring all facilities to 100 percent screening as resources become available by using the risk based assessment. Once the program has been fully developed and funded, a report will be prepared and forwarded to Congress that will:

- 1) present a strategy for U.S. Immigration and Customs Enforcement to identify every criminal alien, at the prison, jail, or correctional institution in which they are held;
- (2) establish the process U.S. Immigration and Customs Enforcement, in conjunction with the U.S. Department of Justice, will use to make every reasonable effort to remove, upon their release from custody, all criminal aliens judged deportable;
- (3) present a methodology U.S. Immigration and Customs Enforcement will use to identify and prioritize for removal criminal aliens convicted of violent crimes;
- (4) define the activities, milestones, and resources for implementing the strategy and process described in sections (1) and (2); and
- (5) include program measurements for progress in implementing the strategy and process described in sections (1) and (2).

### **Accomplishments:**

#### FY 2007

- In FY 2007, CAP issued 164,296 charging documents. This exceeds the CAP fiscal year 2006 total by over 140%.
- In FY 2007, a total of 2,746 cases were presented to the U.S. Attorney's office for criminal prosecution. Of those, 1,808 cases have been accepted.
- In FY 2007, the 287(g) program trained 426 State/local law enforcement officers and entered into 26 Memorandums of Agreement (MOA), which allowed ICE to leverage the resources of State and local law enforcement as a force multiplier.

#### FY 2008

- ICE will work to deploy the 30 additional teams that were funded. Each IEA will be responsible for conducting an estimated 600 interviews per year, and also be responsible for issuing 300 charging documents per year.
- ICE will use the additional \$200 million provided in the FY 2008 Omnibus bill to create a strategy and add additional resources to identify every criminal alien at the prison, jail, or correctional institution in which they are held.
- CAP will work to improve program efficiency in the interviewing and processing of individuals that are amenable to removal by:
  - Continuing the deployment of over 200 Video Teleconference (VTC) systems to CAP programs throughout the country;
  - Commencing VTC hearings and interviews in at least 7 new U.S. Bureau of Prisons (BOP) facilities;
  - Develop and implement an electronic system based on metrics to track productivity at the local, State, and Federal institutions; and
  - Streamlining the Federal CAP system by working with the U.S. Marshal Service to obtain electronic booking data. Matching this data against ICE databases will help the BOP to

more efficiently and effectively designate foreign-born nationals in Federal CAP sites where immigration hearings can be conducted via VTC or on site.

In FY 2009, CAP will continue to increase efforts to identify criminal aliens who are incarcerated in Federal, State, and local facilities, and the additional personnel will help to ensure that these criminals are not released into the community while preparing for immigration proceedings.

\* The above table includes emergency funding of \$10.0 M provided in P.L. 110-161 for this activity. The FY 2009 Budget Request is \$58.2 million. Excluding Emergency funds provided, the increase over FY 2008 is \$12.4 million for pay and non-pay inflation.

**CURRENT SERVICES PROGRAM DESCRIPTION**

National security and public safety are ICE’s first priorities. To that end, ICE detains all aliens who pose a threat to community safety or national security, and those required to be detained under the Nation’s immigration laws. The Alternatives to Detention (ATD) Program was created to enable ICE to maintain current detention levels, and to monitor aliens who are likely to comply, without detention, with immigration proceedings. ATD is comprised of two primary programs; Electronic Monitoring Program (EMP) and the Intensive Supervision Appearance Program (ISAP); and a separate Bond Unit within ISAP.

The EMP is designed to assist in compliance with appearance at court and removal orders without detention in a detention facility. Under this program, aliens awaiting immigration court hearings or removal wear either a monitoring ankle bracelet or report by telephone to a voice recognition system monitored by an ICE case manager. The EMP program can have an unlimited number of participants and is now offered in DRO offices nationwide.

The ISAP is a program for aliens who are pending immigration court proceedings or awaiting removal from the United States, residing within the managed area, and not deemed a threat by DHS. Contract case specialists are assigned a limited caseload of participants and are responsible for monitoring those participants in the community by using tools such as electronic monitoring (bracelets), home visits, work visits, and reporting by telephone. Compliance with ISAP is a condition of release. Non-compliance could result in stricter supervision or return to detention. ISAP can supervise up to 1,800 aliens within prescribed service areas at the following locations: Baltimore; Philadelphia; Miami, and Delray, Florida; St. Paul; Denver; Kansas City; San Francisco; and Portland, Oregon.

In FY 2007, ATD Programs were re-focused as part of DRO “removal” strategy rather than the “release” strategy. The ISAP case model has become more flexible this year, creating options for supervision of more participants. ATD curriculum was added to training in DRO areas such as FLETC and the Leadership Development Center. There has been an increase in filling ATD staff vacancies at the field level, which has contributed to more supervision being available nation-wide.

- The Intensive Supervision Appearance Program (ISAP) was expanded during FY 2007, more than doubling the amount of individuals supervised by the program from the original 1,800 to 4,000 participants daily. The expansion added ISAP services to Los Angeles (1,000), New York City (1,000), and Orlando (200). Throughout the year, 2,958 individuals were supervised in ISAP; resulting in a 96% attendance rate at final decision hearings. For those ISAP cases who received final court decisions (final removal orders or voluntary departure orders) an overall 48% of aliens complied with the judge’s decision. This is a marked increase when compared to the benchmark statistic from a 2003 DOJ/OIG study, which cites a 13% compliance rate for the same measures.
- In FY 2007, DRO added a new program to its cadre of Alternatives to Detention (ATD) supervision tools with the award of the Enhanced Supervision Reporting (ESR) contract to address the need for less intensive or intermediary supervision levels. The ESR program will assist with the supervision of its participants via in-person reporting and case management. This program is expected to be operational near the end of the first quarter in 2008.

In FY 2008 and FY 2009, existing ATD contracts (EMP and ISAP) will be assessed upon expiration during FY 2008 and FY 2009 respectively to determine possible improvements to program effectiveness.

- The Electronic Monitoring Program will end in early December 2007, when a transition to the replacement Enhanced Supervision / Reporting Program (ESR) will occur. The transition will allow a more effective monitoring program by providing structured and closely supervised electronic monitoring, residence verification, home visits, in-person reporting and document information collection with an emphasis on increased compliance with immigration requirements for program participants. (In addition, the case management workload will be reduced for field officers.)
- The Intensive Supervision Appearance Program (ISAP) will end during FY 2009. The ATD Unit will conduct a study to see which type of pilot program best suits the DHS mission (ISAP and / or ESR), and will announce the surviving or replacement ATD program during FY 2009 as a new contract. An ISAP-like program will continue to be a part of the ATD supervised release programs.
- The ATD Unit is also researching piloting a program that would utilize “kiosk” type hardware like the US-VISIT program. With this technology, an alien could regularly report, but instead of reporting to a DRO Officer, the alien would scan his fingerprint and have his photo taken at a “kiosk”. This concept could potentially revolutionize the way ICE DRO supervises non-detained aliens. This is one of DRO’s additional detention alternative that is being explored.)

The Bond Management Unit, also funded within the Alternatives to Detention Program, is responsible for developing, implementing and administrating ICE bond policy and providing oversight to DRO field offices ensuring that bond issues, including litigation, are resolved quickly.

In FY 2007, the Bond Management Unit (BMU) has:

- Implemented an internal web site providing field updated guidance and policy on bond management;
- Updated basic and advance deportation officer training course at FLETC;
- Implemented the Bond Backlog Action Team (BBAT) to assist in bond backlog reduction;
- Instituted monthly bond teleconference with field users;
- Created the Surrender Regulation Implementation Plan,
- Continued to update bond policy with current DRO enforcement dynamics.
- In FY 2007, the Bond Management Unit (BMU) advanced the cause of bond reform by providing updated policy and procedure memoranda to all DRO Field Offices.
- The BMU established the Bond Backlog Action Team (BBAT) contract, which completed 16,352 bond actions resulting in \$8,295,450.00 cancellations and \$9,960,000.00 breaches. The cancellations and breaches result in a savings of interest that is paid on the bonds by ICE. The \$9.9M from the breach of bonds goes back into the Breach Bond Fund.

In FY 2008 and FY 2009, the Bond Management Unit will continue to enhance and refine the immigration bond program through implementation of policy and regulations as well as continue training field personnel on bond administration.

\* The above table includes emergency funding of \$33.4 M provided in P.L. 110-161 for this activity. The FY 2009 Budget Request is \$290.4 million. Excluding Emergency funds provided, the increase over FY 2008 is \$32.3 million for pay and non-pay inflation.

**CURRENT SERVICES PROGRAM DESCRIPTION**

The Transportation and Removal Program provides safe and secure transportation of aliens in ICE custody. It also prepares for and conducts removals from the United States, as ordered by an immigration judge.

The Removal Management Division formulates all DRO transportation and removal policy, conducts transportation and removal planning, defines and projects transportation and removal requirements, and oversees and supports Field Office Directors' (FODs) execution of transportation and removal funding. The division carries out its responsibilities through five supporting units: (1) Air Transportation; (2) Travel Document; (3) Centralized Ticketing; (4) JPATS-Liaison Unit (JLU) in Kansas City, Missouri, and (5) Custody Determination Unit (CDU), including oversight of the DRO Cuban Unit and Post Order Custody Review (POCR) operations.

The **Air Transportation Unit (ATU)** - manages all special air charter missions for ICE and provides procurement-support for the JPATS Liaison Unit in Kansas City. It also provides management and oversight over the Detention Operations Coordination Center (DOCC) and the Worksite Enforcement Operations Support (WSE Support) component. Both the DOCC and the WSE Support components have air transportation requirements on a very regular basis, either contracted charter flights or JPATS flights.

The **Travel Document Unit (TDU)** - conducts diplomatic and liaison activities for the purpose of removing persons from the U.S. through the procurement of travel documents. The TDU has been involved in an interagency Visa Sanctions Working Group to compel greater cooperation from several countries that routinely refuse to accept or unreasonably delay the repatriation of their nationals.

Another key initiative of the TDU has been to develop, implement and deploy the electronic Travel Document System (eTD) to all Field Offices and to some foreign governments for the issuance of travel documents.

The **JPATS-Liaison Unit (JLU)** - manages the DRO portion of the Justice Prisoner and Alien Transport System (JPATS). The JLU oversees all of the operational aspects of scheduling JPATS flights for ICE DRO field offices, ensuring all future requirements are being met and conducting all required operational coordination with field offices, receiving countries and respective ICE Attachés and the JPATS senior management in Kansas City, Missouri.

The **Custody Determination Unit (CDU)** - has ensured compliance with applicable custody review regulations, thereby reducing adverse litigation and limiting DRO's liability in court actions. The Field Oversight Program, developed by CDU, monitors and oversees case management operations of detained aliens under a final order of removal. This program has ensured that field offices follow up on custody reviews, travel document requests, and take appropriate case management actions in the cases of detained aliens.

The Transportation and Removal Program also includes case management activities. Aliens apprehended for violation of immigration law must be processed expeditiously and in accordance with laws and regulations. The Case Management Program ensures that apprehended aliens are processed through the immigration legal system and afforded rights under the law by managing alien cases initiated by other immigration enforcement programs pending a final decision on the case by an immigration judge.

The Executive Information Unit (EIU) coordinates the development and deployment of the Detention and Removal Operations Modernization (DROM) investment. DROM will improve technology and business processes to better manage, track, and report on the movement of aliens through the immigration enforcement lifecycle. A major goal of DROM is to replace the Deportable Alien Control System (DACS), a 23 year-old mainframe system, with a new Detention and Removal Case Management system. The first step to retiring DACS was the deployment of the ENFORCE Alien Detention Module (EADM). EADM was deployed nationwide on September 30, 2007 and replaced the detention functionality of DACS. The deployment of EADM reduced the administrative detention book-in processing time per alien from approximately 30 minutes to approximately 4 minutes. This will allow DRO operational flexibility to perform additional enforcement actions. DRO is currently finalizing development of the ENFORCE Alien Removal Module (EARM) which will replace the case management functionality of DACS. The continuation of DROM is expected to reap similar benefits throughout every aspect of DRO operations.

## **Accomplishments:**

### FY 2007

- The Removal Management Division (RMD) contributed to the increase of the number of removals by over 10 percent of FY 2006 numbers by creating the following efficiencies in the removal process:
  - Utilizing leased charters to increase DRO removal efforts;
  - Development of the Detention Operations Coordination Center (DOCC);
  - Deployment of the *Electronic* Travel Document System (eTD); and
  - Utilizing Video Teleconferencing to conduct consular interviews.

- In FY 2007, DRO removed 276,912 aliens, which includes 40,534 Voluntary Returns (VRs).
- The Case Management Unit (CMU) provided several training initiatives by conducting training and guidance to Field Offices and the FLETC DRO transition course.
- The Centralized Ticketing Unit (CTU) completed training on the e-Country Clearance program recently implemented by the Department of State. This web-based system will replace former modes of official notification to foreign posts of impending escort removal operations.
- CTU facilitated the implementation of an e-Travel system, which will consolidate all ticketing, foreign post notification, and coordination related to official travel and alien foreign removal. This system is designed to automate all aspects of removal scheduling which will reduce the average length of custody stay for detained aliens.
- In FY 2007, the CTU increased efficiency in itinerary and ticket acquisitions as well as country clearance notifications, which greatly contributed to the 10% increase of removals realized in FY 2007. The total number of tickets purchased was 27,226, of which 9,814 were escorted removals and 17,412 were non-escorted removals.
- In FY 2007, ICE moved 163,656 aliens by air compared to 73,495 in FY 2001. This represents a 122% increase in removals over six years. RMD anticipates a 10% increase in alien removals during FY 2008, largely due to improved processing by electronic travel documents and the JPATS organization acquisition of two additional aircraft and augmentation of those assets with ICE managed leases.
- The Detention Operations Coordination Center (DOCC), established in FY 2006 to ensure that all Field Offices have adequate detention space for routine apprehensions, coordinate special operations requiring large numbers of detention beds, and manage bed space on a national scale, coordinated the movement of 19,389 aliens in FY 2007, assisted with the handling and movement of detainees in 2 Worksite Enforcement Operations and assisted with the handling and movement of detainees in 33 Fugitive Task Force Operations.
- In FY 2007, the Mexican Interior Repatriation Program (MIRP) apprehended 69,438 Mexican Nationals, of which 60,898 were eligible to participate in the MIRP. Out of the eligible participants, 34,233 were interviewed by Government of Mexico to evaluate the participation in the program. As a result of the interviews, 13,865 participants were repatriated to Mexico City.
- During FY 2007 a total of 9 International Special Charters were flown to return alien nationals to Cambodia, Egypt, Ghana, Jordan, Liberia, Pakistan, Palestine, and the Philippines. A total of 772 aliens were returned to their countries.
- During FY 2007 the Operations Support and Coordination Unit (OSCU) provided 159 Domestic and Central America charter flights to support the DRO removal mission. These flights included 143 charter flights to remove 16,642 Other Than Mexican (OTM) alien nationals, 14 charter flights to move 1,425 aliens domestically, and 2 charter flights to remove 180 Mexican nationals.

- In FY 2007, the Travel Document Unit (TDU), in conjunction with the Office of the Chief Information Office, deployed the *Electronic* Travel Document System (eTD) to all 24 ICE DRO Field Offices and consulates of Guatemala, Honduras and El Salvador. The eTD dramatically decreased the number of days it takes to issue travel documents from 14 days to 6 days in FY 2007.
- In FY 2007, Video Teleconferencing equipment, utilized in conjunction with eTD to facilitate consular interviews, were installed in the following DRO Field Offices; Buffalo, NY, Houston, TX, Chicago, IL, San Francisco, CA, York, PA and Omaha, NE. Additional installations were completed at consular locations for the Governments of El Salvador and Guatemala.
- DRO created twelve permanent Deportation Liaison Officer (DLO) positions to oversee and coordinate removals from abroad.

In FY 2008, DRO was provided \$44.0 million that includes \$17.6 million for Centralized Ticketing Operations and \$26.4 million for additional air transportation support, including the use of the Justice Prisoner and Alien Transportation System (JPATS) and leasing of aircrafts for alien removals. DRO will continue to engage other government agencies and embassies to accelerate and expedite the issuance of travel documents for aliens pending removal from the United States. DRO will continue to develop and expand deployment of the eTD system as well as encourage other foreign governments to use the system and increase its use of JPATS.

In FY 2009, DRO will continue to engage other government agencies and embassies to accelerate and expedite the issuance of travel documents for aliens pending removal from the United States. DRO will also increase its use of JPATS to expedite the removal of aliens with removal orders.

**Description of Item**

The funding will provide 725 additional beds, \$8.02 M in removal support and 74 positions within ICE to support the additional bed space. The bedspace requested is the estimated need for the increase in enforcement activities.

**Personnel Costs**

- Deportation Officer (10 FTE) - \$3.48 M
- Immigration Enforcement Agent (20 FTE) - \$5.20 M
- Deportation Assistant (5 FTE) - \$0.75 M
- \$0.72 M in resources for associated legal and acquisitions support for the program activities:
  - Legal Support (2 FTE) - \$0.25 M
  - OAQ Support (2 FTE) - \$0.47 M

**Non-Personnel Costs**

- 725 Beds (\$99/day cost) - \$26.20 M
- Removal Costs (\$1,000/removal) - \$8.02 M
- Other Support Costs - Information Technology, Facilities, Financial, OPR - \$1.60 M

**Justification**

Effectively addressing illegal immigration requires an immigration enforcement continuum comprised of intelligence, investigations, apprehension, detention, due process, and removal. While each component of the continuum is important, detention and removal are the primary enforcement tools of the immigration enforcement effort. Without these tools, apprehension becomes a synonym for catch-and-release, a mere hindrance to the illegal entrant, and the entire immigration enforcement effort

looses credibility with immigration violators, criminal organizations, potential terrorists, and U.S. citizens. As a result, the Custody Management function must be adequately funded to perform its role within the entire scope of illegal immigration.

As a result of the Secure Border Initiative (SBI), DHS began hiring of Border Patrol Agents, Special Agents, Deportation Officers, and Immigration Enforcement Agents, all of which increase apprehensions, which in turn require additional bed space. To further address the illegal immigration issue, State and local law enforcement officers have been granted special authority under Section 287(g) of the Immigration and Nationality Act to enforce limited immigration functions, thereby creating a force multiplier effect for the enforcement of immigration laws.

ICE continuously looks for ways to become more efficient and reduce bed space needs through steps like the consolidation of detention capacity and establishing a Detention Operations Coordination Center.

The beds provided in the request will support the ending of “catch and release” at the northern and southern U.S. borders and continuation of “catch and return”; the 287(g) initiative and any additional State and local jurisdictions that are added to the existing level of effort in this program; and other increases in enforcement successes and additional DHS personnel increases (e.g., Border Patrol agents).

Any increase in bedspace needs to be accompanied by an appropriate mission support staff. There are critical functions that need to be carried out by legal, acquisitions, and information technology staff. For example, ICE follows the DHS cost-to-spend preferred goal of 1.9 percent, which, for example, correlates with the need for one FTE for every \$8 million of additional contract award obligations. These requested positions have been included in the request.

#### Bedspace History and FY 2009 Request

| FY 2007 | FY 2008 | FY 2009 Request* |
|---------|---------|------------------|
| 27,500  | 32,000  | 33,000           |

\*In addition to the \$46 M enhancement, an additional 275 beds will be paid for through increased collections of the Immigration User Fee and through the Breached Bond Detention Fund.

#### **Impact on Performance (Relationship of Increase to Strategic Goals):**

##### Objective 1.1: Achieve Effective Control of Our Borders

- Ensure sufficient and appropriate bed space is available based on detention category, characteristics, and conditions of release.
- Enhance partnership with other Federal detention agencies for better use of their resources to include facilities and training.
- Develop a National Custody Management Program promoting the effective utilization of available bed space and alternative detention settings.
- Develop transportation and logistics systems to optimize the efficient use of bed space and support removal operations.

Increasingly, immigration and removal policy has generated a greater and more diverse population of aliens that require detention space. Consequently, detention strategies and resources must be increased along with other programs and initiatives to ensure they are properly supported and can meet their

intended accomplishments. For example, the Custody Management Program has entered into numerous inter-agency agreements with other Federal agencies in order to accomplish its mission.

**Description of Item and Justification**

This request will fund 72 positions needed within the ICE Office of Investigations to increase national security and critical infrastructure investigations at Ports of Entry and other sensitive facilities that attract terrorists and/or illegal and undocumented workers. ICE is the primary investigative authority responsible for the investigation of Federal violations at U.S. Ports of Entry, to include national security related violations. Additionally, ICE utilizes its unique immigration authorities to conduct investigations regarding the illegal employment of undocumented foreign workers by businesses throughout the United States, to include sensitive facilities, which support the critical infrastructure of the United States. Funding is requested for 53 Special Agents and 19 support positions, in accordance with the GAO-approved workforce model.

**Personnel Costs**

\$11.800 million of this increase will fund personnel costs for 72 positions:

- 10 Supervisory Special Agents/ASAC/DSAC
- 43 Special Agents
- 2 Seized Property Specialists
- 5 Criminal Research Specialists
- 1 Forensic Document Examiner
- 1 Forensic Document Examiner Assistant
- 1 Staff Assistant
- 1 Evidence Coordinator
- 2 Investigative Assistants
- 3 Mission Support Specialists
- 3 Management and Program Analysts

## **Justification**

The request provides funding for the following program areas, which directly supporting these investigative activities.

### **Arms and Strategic Technology Investigations (ASTI)**

ICE is requesting funding for 12 Special Agents, 2 Supervisory Special Agents, 1 Criminal Research Specialist, 1 Investigative Assistants, 2 Mission Support Specialists, and 2 Management and Program Analysts nationwide to effectively respond to and support the task of identifying and addressing non-immigrant foreign nationals with access to sensitive United States Munitions List (USML) and dual-use research as captured in the International Traffic and Arms Regulations (ITAR) and the Export Administration Regulations (EAR). This program supports ICE's Operation TECH DEFENSE deemed export initiative to ensure that H-1B (alien in a specialty occupation) and L-1 (inter-company transfers) non-immigrants working in U.S. sensitive technology manufacturing and research facilities (e.g. weapons of mass destruction) have the proper authorization to conduct such work. TECH DEFENSE will target H-1B and L-1 non-immigrants/visa holders from special interest countries. This effort will also identify those businesses and higher learning institutes allowing foreign nationals unauthorized access to controlled technology in violation of deemed export regulations.

### **Worksite Enforcement**

ICE is requesting 3 Special Agents to conduct critical infrastructure worksite investigations. ICE will be able to target an increased number of critical infrastructure sectors for compliance/enforcement actions. Additionally, by increasing the number of investigations, ICE will be able to reduce the vulnerabilities in critical infrastructure industries and sectors. ICE agents focus investigations on sites related to critical infrastructure and national security such as nuclear power plants, chemical plants, military bases, defense facilities, airports and seaports. ICE works with employers in these cases to identify and immediately remove illegal workers from sensitive facilities and locations where they are in a position to cause harm.

### **Commercial Fraud**

ICE requests 3 Special Agents to enhance the undercover efforts at critical Ports of Entry to stem the flow of counterfeit goods into the United States. In FY 2005, the Administration responded to the growing threat of global counterfeiting by establishing the Strategic Targeting of Piracy! (STOP!) Initiative. Recently, foreign law enforcement counterparts from both Canada and the People's Republic of China (PRC) have requested the initiation of partnerships with ICE to further our joint transnational anti-counterfeiting efforts. This enhancement adds to that effort and reduces the threat to our national security by strengthening our enforcement efforts in counterfeit goods flowing into our Ports of Entries which could be used to fund terrorist groups and other criminal organizations.

### **Identity and Benefit Fraud**

ICE is requesting 3 Special Agents to assist national security and critical infrastructure efforts by targeting identity and benefit fraud. Identity and benefit fraud presents a national security vulnerability by which illegal aliens, to possibly include terrorists and other persons who pose a risk to public safety, can not only gain entry into the United States but remain here under a guise of legitimacy. Aliens who engage in filing frivolous and/or fraudulent immigration applications receive immigration benefits to which they are not entitled. Access to critical infrastructure sites such as our nation's airports, other types of mass transportation, nuclear facilities and other critical infrastructures has been successfully achieved through the use of fraudulent documents.

### Financial Investigations

ICE is requesting 3 Special Agents to focus its financial investigations program to specifically address crimes associated with national security and critical infrastructure investigations. ICE aggressively pursues the financial component of every investigation. ICE has many long-standing and recently implemented enforcement initiatives concerning national security: money-laundering, bulk cash smuggling, unlicensed money service businesses, and corrupt foreign officials, all of which pose threats to national security and critical infrastructure.

### Cyber Crimes Center (C3)

This request will fund 2 Special Agent positions and 1 Criminal Research Specialist position in support of the E-Cornerstone program, which is managed by the C3. E-Cornerstone is the “cyber” extension of the ICE Cornerstone financial initiative. The mission of E-Cornerstone is to disrupt, dismantle, and eliminate vulnerabilities within Internet financial sectors and services before terrorists and other criminal organizations can exploit them. The information developed by E-Cornerstone efforts will help ICE, as well as other law enforcement and intelligence agencies, protect critical infrastructure by understanding terrorist and criminal financial networks and their use of emerging Internet financial services, search them out, and disrupt their operations.

### Forensic Document Laboratory (FDL)

ICE is requesting 1 Forensic Document Examiner, 1 Staff Assistant, 1 Forensic Document Examiner Assistant, and 1 Evidence Coordinator to support ICE national security investigations. The FDL provides real-time support to ICE agents (in addition to officers of other Federal, State and local agencies) in the determination of authenticity of suspect travel and identity documents. In addition, the Forensic Document Examiners will conduct scientific examinations of questioned document evidence and disputed handwriting/printing and provide testimony as expert witnesses in judicial proceedings.

### Asset Forfeiture

ICE is requesting 2 Special Agents, 1 Supervisory Special Agent, and 1 Criminal Research Specialist devoted to related national security asset forfeiture investigations, and 2 Seized Property Specialists to store and maintain seized property and evidence related to national security and critical infrastructure cases. Illicit proceeds are gained by organizations utilizing undocumented workers at Ports of Entry and/or In-Bond warehouses and are used to sustain the criminal activity and to fund other criminal endeavors. Asset forfeiture laws allow ICE agents to seize and forfeit the illicit proceeds and other criminally derived assets from critical infrastructure cases.

### National Security Integration Center (NSIC)

The NSIC request would fund 5 Supervisory Special Agent positions at ICE Headquarters. The NSIC CIP Section will provide support to ASTI’s Operation TECH DEFENSE. NSIC will also initiate another operation to identify Special Interest Aliens (SIA) that allegedly have access to Chemical, Biological, Radiological, and Nuclear (CBRN) technology and pose a threat to national security of the United States. NSIC, in coordination with IC members, the Department of Defense (DOD) and Defense Criminal Investigative Service (DCIS), would work to identify high value targets and develop an appropriate response to mitigate any potential threat to national security or critical infrastructure.

### Counter Terrorism Unit (CTU) and Joint Terrorism Task Force (JTTF)

This request will fund 4 Special Agents in ICE field offices. The CTU section has programmatic oversight of ICE personnel assigned to JTTFs and the ICE Liaison Section at the CBP National Targeting Center (NTC). CTU components coordinate with law enforcement and intelligence agencies to review derogatory information associated with subjects that pose a threat to national security or

critical infrastructure facilities. In addition to ICE JTTF responses to ports of entry to interview Terrorist Identities Datamart Environment (TIDE) watch-listed subjects, ICE JTTF agents are routinely involved in the vetting of subjects that have access to military installations and secure areas of air and seaports. As the second largest contributor of agents to the JTTF, ICE JTTF agents investigate and respond to threats against critical sectors of the economy, including banking and finance, transportation, energy, communications, and emergency services in coordination with the CTU.

#### Compliance Enforcement

ICE is requesting 6 Special Agents, 2 Supervisory Special Agents, 2 Criminal Research Specialists, 1 Investigative Assistant, 1 Mission Support Specialist, and 1 Management and Program Analyst at ICE Headquarters to support the Visa Waiver Enforcement Program (VWEP). Under the Visa Waiver Program (VWP), the United States authorizes expedited entry of non-terror producing nations who share the same ideals and values of the United States. In FY 2006, the VWP expedited the entry of more than 15 million citizens from the 27 visa waiver countries. Unlike non-participating countries, there is no initial screening through the Department of State prior to applying for admission to the United States. Individuals who are citizens of Visa Waiver Countries and have ties or allegiance to terrorist organizations could enter the United States with less concern of being identified as they face less scrutiny. The 6 Special Agent positions would provide 6 SAC offices with a dedicated FTE to investigate targeted VWP overstays identified through the VWEP.

#### Human Smuggling and Trafficking

ICE is requesting 5 Special Agents assist critical infrastructure and national security violations that involve smuggling or trafficking in aliens or some other form of worker exploitation. Illegal workers frequently lack the employment protections afforded those with legal status and are less likely to report worksite safety violations and other concerns. Furthermore, their illegal status leaves them vulnerable to exploitation by unscrupulous employers who may pay them substandard wages or force them to endure intolerable working conditions. Increases to the smuggling and trafficking unit, coupled with the focus on the continuum of illegal immigration, will result in increased arrests of egregious critical infrastructure employers, especially at Ports of Entry, who work with document vendors and human smugglers to facilitate the entry and continued presences of undocumented aliens.

In the event that this initiative is not funded there will be potential adverse consequences from the higher possibility of terrorists, criminals, and other persons of suspect entering the U.S., and illegal workers working in areas that support our national security and critical infrastructure.

#### **Impact on Performance (Relationship of Increase to Strategic Goals):**

ASTI, Worksite Enforcement, Commercial Fraud, Identity and Benefit Fraud, Financial Investigations, C3, FDL, Asset Forfeiture, NSIC, CTU, and Human Smuggling and Trafficking all promote DHS strategic objective 1.1 of the DHS Strategic Plan “Achieve Effective Control of Our Borders.” This national security and critical infrastructure initiative also supports SBI in its goal of “Build a strong compliance and enforcement system for law abiding employers” by working to aggressively investigate all aspects of those employers who make it their business practice to work with smuggling and trafficking organizations to induce the illegal entry and knowingly hiring of undocumented aliens within critical infrastructures and Ports of Entry. In addition, the increases for fiscal year 2009 will allow ICE to address critical infrastructure vulnerabilities through a holistic investigative approach leveraging Title 8 and export enforcement authorities as well as analytical capabilities unique to ICE.

Description of Item

ICE is requesting positions for Commercial Fraud, Intellectual Property Rights (IPR), Trade Transparency Unit (TTU) and requisite supporting investigative programs at the Cyber Crimes Center (C3), in accordance with the GAO-approved workforce model. These resources will be used to identify, target, counter and dismantle methods and vulnerabilities exploited by criminal organizations engaged in highly profitable trade crimes. These crimes include trafficking of counterfeit merchandise including pharmaceuticals, and smuggling commodities otherwise restricted or prohibited from being imported into the United States. These resources will also enable ICE to combine efforts with U.S. Customs and Border Protection (CBP) and the Food and Drug Administration (FDA) to target, interdict, and investigate the importation of substandard, tainted, and counterfeit products being imported into the United States from the People's Republic of China (PRC). Operation Guardian specifically targets goods and commodities from PRC. However, while conducting joint enforcement operations with our law enforcement partners it is possible that law enforcement officers will encounter tainted and/or substandard goods imported from countries other than the PRC. If deemed appropriate, an enforcement action will be taken.

**Personnel Costs**

\$4.188 million of this increase will fund 28 positions:

- 1 Supervisory Special Agent
- 14 Special Agents
- 2 Information Technology Specialists
- 6 Criminal Research Specialists
- 2 Investigative Assistants
- 2 Mission Support Specialists
- 1 Management and Program Analysts

## **Non-Personnel Costs**

The remaining \$0.412 million in resources will fund contract support at the Cyber Crimes Center for trained contract personnel in digital forensics who will perform duties and provide on-the-job training for existing personnel to support Commercial Fraud and IPR investigations.

## **Justification**

The request provides funding for the following program areas, which directly supporting these investigative activities.

### **Commercial Fraud/Intellectual Property Rights (IPR)**

IPR violations are the fastest growing trade crime. ICE IPR investigations address the burgeoning underground economy that now touches upon almost every consumer and industrial good produced. These counterfeited goods, almost exclusively produced off-shore, include everything from toiletries, pharmaceuticals, electronics, computer hardware, telecommunication equipment, and auto parts, to name a few. IPR crime hurts the economy of every developing nation, and is especially critical to the U.S economy and the innovation at its core.

ICE is requesting 9 Special Agents, 1 Supervisory Special Agent, 1 Criminal Research Specialist, 1 Investigative Assistant, 1 Mission Support Specialist, and 1 Management and Program Analyst to continue to expand commercial fraud efforts. Agents will be strategically placed on priority enforcement cases, including: Public Health & Safety, In-Bond Diversion, Free Trade Agreement Enforcement, Textile Transshipment, Anti-Dumping and Countervailing Duty (AD/CVD), and IPR investigations.

Commercial Fraud investigations contend with predatory and unfair trade practices that threaten our economy, restrict the competitiveness of U.S. industry in world markets, endanger the public health and safety of the American people, and negatively impact revenue collection by the Federal government. Staffing increases will strengthen U.S. partnerships with the legitimate international trade community and trademark and rights holders, who depend upon and aid in the investigation of Commercial Fraud and IPR Crime.

To contend with the importation and distribution of harmful PRC produced products, ICE is proposing to combine the efforts of ICE, CBP, and FDA to target, interdict, and investigate the importation of substandard, tainted, and counterfeit products in high-risk categories being imported into the United States. Joint enforcement efforts will focus on high-risk product categories that directly affect public health and safety and will include, but not be limited to, the following: food, pharmaceuticals, aircraft or automobile parts, toys, and building and manufacturing components.

### **Trade Transparency Unit Investigations (TTU)**

To augment the capability of trade-based money laundering investigations, ICE is requesting 3 Special Agents, 1 Criminal Research Specialist, 1 Investigative Assistant, and 1 Mission Support Specialist. These domestic positions will support trade-based money laundering investigations to specifically address and support investigations generated by the TTU headquarters, ICE OIA Attaché Offices and established foreign TTU Offices and Modules. TTU supports commercial fraud by comparing import and export data with partnering nations to identify cases relating to commercial fraud and trade-based money laundering.

### Cyber Crime Center (C3)

For the C3's ICE National Digital Forensic Laboratory Program (NDFP), ICE requests 1 Special Agent, 2 Criminal Research Specialists, and 2 Information Technology Specialists to support the NDFP. The successful investigation and prosecution of criminal violations by ICE is largely dependent on the ability to process and analyze data obtained from seized electronic devices and digital media. Examples of these devices and media include, but are not limited to, personal computers, network file servers, notebook computers, cell phones, personal digital assistants, digital cameras, and external storage devices such as flash drives. Advancements in technology have led to substantial increases in the storage capacity of such devices and media at an alarming rate. To address this growing concern, ICE has established national and regional ICE digital forensic laboratories. These laboratories will only become a vital resource supporting ICE investigations nationwide when properly staffed with a cadre of properly trained and dedicated personnel. This will enable C3 to concentrate on providing digital forensic services that will deliver evidentiary data to case agents as expeditiously as possible.

For the C3's Digital Evidence Exploitation, ICE requests 1 Criminal Research Specialist as well as \$412 thousand in contract support and specialized forensics training to necessitate the development of enhanced capabilities to search and analyze the vast amounts of complex digital data recovered during investigations. C3 requires new resources for deployment in the digital forensic laboratories, which will enable trained personnel to more efficiently carve valuable evidence from large volumes of data in a timely manner.

For the C3's Digital Intercept Program, ICE requests 1 Special Agent and 1 Criminal Research Specialist. Digital communications between handheld electronic devices, computers, and networks, including wireless services, are becoming increasingly common in today's society. C3 has an immediate need to establish the capability to lawfully intercept digital communications and provide the content of these communications in support of ICE investigations nationwide. Once intercepted, C3 will be legally required to quickly and efficiently minimize the relevant communications for review and analysis by properly trained personnel.

### **Impact on Performance (Relationship of Increase to Strategic Goals):**

Commercial Fraud/IPR, TTU, and C3 all promote DHS strategic objective 1.1 of the DHS Strategic Plan "Achieve Effective Control of Our Borders." This Initiative also strengthens the U.S. economy by ensuring legal goods are shipped into and out of the U.S. ICE is the only Federal agency that incorporates decades of trade fraud and anti-money laundering experience to detect trade-based money laundering. Individuals and criminal enterprises have long taken advantage of international trade mechanisms to avoid taxes, tariffs, and customs duties, and conceal the ownership of funds. Typical scenarios include undervaluation, overvaluation, and misclassification of the imported and exported merchandise. These transactions facilitate the transfer of funds across international borders. ICE is the only U.S. law enforcement agency to partner with foreign countries to share import and export data for the purpose of initiating and enhancing investigations into trade based money laundering.

Without this funding, ICE would be less effective in investigating predatory and unfair trade practices that threaten our economy. There will be potential adverse consequences that would restrict the competitiveness of U.S. industry in world markets, endanger the public health and safety of the American people, and negatively impact revenue collection by the Federal government.

**Description of Item**

This request will fund 39 positions, in accordance with the GAO-approved workforce model, needed within the Office of Investigation’s Cyber Crime Center (C3) and those programs directly supporting cyber crime investigations. With this staffing increase, the Office of Investigations will increase investigations of cyber related crimes related to identify and benefit fraud, child exploitation, money laundering as well as supporting other investigations by providing digital forensics and electronic monitoring.

**Personnel Costs**

\$5.7 million of this increase will fund personnel costs for 39 positions:

- 7 Supervisory Special Agents
- 5 Special Agents
- 18 Criminal Research Specialists
- 7 Mission Support Specialists
- 1 Management and Program Analyst
- 1 Professional Victim Assistant Staff

**Justification**

The request provides funding for the following program areas, which directly supports these investigative activities.

ICE, by virtue of its vested authority, has always been at the front line of protecting children and defending against the illegal trafficking and distribution of child pornography into and throughout the United States. ICE has also grown to become the recognized expert in the trans-border, and

transnational aspects of online money laundering through the extensive experience and concentrated technical expertise at the C3.

Established in 1996, C3 is ICE's high technology center with responsibility for developing, managing, and supporting Internet and cyber-related ICE investigations in ICE Office of Investigation field offices and the Office of International Affairs attaché offices. C3 provides some form of cyber investigative or cyber technical support across almost all investigative case categories for which ICE is responsible. C3 is comprised of the Child Exploitation Section, the Cyber Crimes Section, and the Cyber Technical Services Section, which are all supported by highly specialized investigative networks and tools managed by full-time support staff and contractors. These three (3) sections work together to provide a seamless and cohesive center for ICE's Internet-related investigations where leads are received from domestic and foreign sources, validated for violations of U.S. law, and then disseminated to ICE domestic and foreign field offices for further investigation. In addition to C3's operational functions, C3 also provides cyber crime and forensic training to ICE Office of Investigations agents, as well as other Federal, State, local, and international law enforcement officers.

#### Information Technology

ICE requests 1 Management and Program Analyst and 3 Mission Support Specialists to utilize overt and covert networks and the Internet to pursue criminals who commit their crimes with startling efficiency in the relative anonymity of cyberspace. C3 has supplemented these networks with automated tools such as the E-Crimes system and the National Child Victim Identification System (NCVIS). Overt networks at C3 provide general Internet access and present a positive public image, while the covert networks provide crucial, unattributed investigative access to the Internet. The E-Crimes system is a knowledge management system used to track the workflow of ongoing investigations. E-Crimes features a database for electronically creating, sending, and tracking administrative summons in support of cyber investigations. NCVIS, the leading law enforcement system of its type in the United States, is a secure computer-based initiative, which has been developed and managed by C3 as a proactive investigative tool designed to facilitate the identification and prosecution of offenders, using known, digital images and video of identified victims of child sexual exploitation.

#### ICE National Digital Forensic Laboratory Program (NDFP)

ICE requests 9 Criminal Research Specialists and 2 Mission Support Specialists to support the NDFP. The NDFP at C3 supports every investigative category, special initiative, and operation within ICE due to the prevalence of digital evidence. The successful investigation and prosecution of criminal violations by ICE is largely dependent on the ability to process and analyze data obtained from seized electronic devices and digital media. Examples of these devices and media include, but are not limited to, personal computers, network file servers, notebook computers, cell phones, personal digital assistants, digital cameras, and external storage devices such as flash drives. Advancements in technology have led to substantial increases in the storage capacity of such devices and media at an alarming rate. To address this growing concern, ICE has established national and regional ICE digital forensic laboratories. These laboratories will only become a vital resource supporting ICE investigations nationwide when properly staffed with a cadre of properly trained and dedicated personnel. This will enable C3 to concentrate on providing digital forensic services that will deliver evidentiary data to case agents as expeditiously as possible.

#### Digital Evidence Exploitation

ICE requests 1 Mission Support Specialist to necessitate the development of enhanced capabilities to search and analyze the vast amounts of complex digital data recovered during investigations. C3

requires new highly specialized tools and resources for deployment in the national and regional digital forensic laboratories, which will enable trained personnel to more efficiently carve valuable evidence from large volumes of data in a timely manner.

#### Digital Intercept Program

To augment the Digital Intercept Program, ICE requests 1 Supervisory Special Agent and 1 Mission Support Specialist in order to efficiently intercept digital communications by sophisticated criminal elements. Digital communications between handheld electronic devices, computers, and networks, including wireless services, are becoming increasingly common in today's society. C3 has an immediate need to establish the capability to lawfully intercept digital communications and provide the content of these communications in support of ICE investigations nationwide. Once intercepted, C3 will be legally required to quickly and efficiently minimize the relevant communications for review and analysis by properly trained personnel.

#### Title 3 Program

This request will fund 1 Supervisory Special Agent C3 position that will support the administration of the National Title 3 Program and will be responsible for processing Title 3 applications submitted by ICE field offices for legal sufficiency; the generation of agency action letters to the Department of Justice, Office of Enforcement Operations supporting the intercept; reviewing and processing Title 3 funding requests and the processing of agency Electronic Surveillance requests for ICE, FBI, DEA and other Federal agency wiretaps. This position will also assist the Title 3 National Program Manager with the formulation of policy, position papers, and budget requests, oversight of the national Title 3 monitor, translation and transcription contracts and the preparation of the annual Title 3 report to the Department of Justice.

#### Operation Predator

ICE requests 5 Special Agents and 5 Criminal Research Specialists to support Operation Predator. Operation Predator targets a variety of violators, including commercial web sites and individuals that engage in Internet child pornography; individuals who travel internationally for child sex tourism or who facilitate such travel; individuals who engage in the human smuggling and trafficking of minors into the United States for illicit sexual purposes such as prostitution, worksite exploitation, and/or any crimes resulting in the harm, injury or death of a minor – *not* including the smuggling of children by parents for family unity reasons; criminal aliens who have been convicted of local, State, or Federal offenses against minors (individuals under the age of 18) and are now eligible for removal from the United States; and those same criminal aliens who have been previously deported from the United States for such offenses but have re-entered the country illegally. C3 reviews, develops, assigns, and forwards investigative leads to ICE field offices, domestic and international alliances of law enforcement agencies, and private industry partners dedicated to combating child exploitation. C3 is a full-time partner with the National Center for Missing and Exploited Children and a founding member of the Virtual Global Task force. Since July 2003, C3 has affected 10,331 criminal and administrative arrests under Operation Predator.

#### Victim Witness Assistance

ICE is requesting one administrative Professional Victim Assistant. Cyber enforcement activities have included the identification of hundreds of victims that have been exploited for child pornography, child sex tourism, or child trafficking purposes. The new position will also support identification of identity theft victims and provide services as mandated by statute.

#### Operation E-Cornerstone

ICE requests 2 Supervisory Special Agents and 1 Criminal Research Specialist to support ICE's Operation Cornerstone at C3. ICE continually targets the penetration of Internet financial sectors, as well as the largely unregulated Global E-Currency Transfer System (GETS), by terrorists and other criminal organizations. These non-traditional financial systems are flourishing on the Internet and are the payment method of choice for illegal products and services. These non-traditional financial systems provide services that can assist criminals in all stages of the money laundering process. Currently, C3 is working in coordination with several ICE field offices on numerous web sites associated with GETS systems suspected to be involved in illegal activity to include operating as unlicensed money services, money laundering, and possible radical Islamic activities. Expansion of the resources available to support E-Cornerstone is justified to fully address the threat that these non-traditional systems pose to traditional money laundering investigations.

#### IPR - Pharmaceuticals

ICE is requesting 1 Supervisory Special Agent and 1 Criminal Research Specialist to fulfill the increasing challenges of protecting trademarks and other intellectual property rights of the Internet through highly specialized ICE investigations nationwide and internationally. C3 currently supports all ICE investigations involving the importation of counterfeit, as well as diverted, pharmaceuticals, via the Internet. Importations of unregulated pharmaceuticals are a threat to public health and safety, contribute to the growing addiction rates and drug overdoses, and negatively impact the legitimate drug market.

#### Operation IDNet

To augment identity and benefit fraud investigations, ICE is requesting 1 Supervisory Special Agent and 1 Criminal Research Specialist. C3 initiated Operation IDNet as a national level program designed to provide a proactive means of identifying and investigating suspect web sites and email addresses in order to target and prosecute violators engaged in the illegal manufacture, sale, and distribution of fraudulent and novelty identification and immigration documents over the Internet. Operation IDNet is also aimed at identifying terrorist/criminal travel facilitators and constraining terrorist/criminal mobility as a primary means of protecting national security. Examples of fraudulent identification and immigration documents include, but are not limited to, Social Security cards, driver's licenses, visas, passports, and work authorizations. These documents are commonly used by criminal aliens to enter the United States illegally, fraudulently obtain employment and benefits, and in furtherance of numerous other criminal activities impacting the secure border initiative such as work site enforcement violations, human trafficking and smuggling, and threats to national security and public safety.

#### IPR-Operation PseudoNET

ICE is requesting 1 Supervisory Special Agent and 1 Criminal Research Specialist to manage the cyber aspect of the investigation of International Property Rights (IPR) violations (copyright and trademark infringement and theft of trade secrets) that have increased due to the expanse of enabling technology allowing for simple and low cost duplication of copyrighted merchandise for profit. C3 has targeted criminal organizations responsible for producing, smuggling and distributing counterfeit products utilizing the Internet to facilitate their crimes. C3 directly coordinates its anti-counterfeiting efforts with the National IPR Center. C3 recently initiated Operation PseudoNET, a joint C3/CCIPS IPR enforcement project targeting sellers of pirated software, counterfeit software and counterfeit hard goods via online auction sites.

Criminal use of electronic devices and, particularly, the Internet is a growing problem. If additional funding is not provided, there will be adverse consequences which will include an increase in trans-border, and trans-national crimes facilitated by the Internet to include child pornography as well as

crimes involving E-currencies. Additionally, C3 will be forced to scale back proactive efforts which will result in a significant decline in the number of national level cyber investigations, across all investigative case areas. Many successful investigations and prosecutions of criminal violations by ICE are largely dependent upon the ability of C3 to process and analyze data obtained from seized electronic devices and digital media. If additional resources are not dedicated to these efforts, it is likely that C3 will not be able to maintain the current capacity to develop this valuable evidence into criminal prosecutions.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

C3, Victim Witness Assistance, and Title 3 all promote DHS strategic objective 1.1 of the DHS Strategic Plan “Achieve Effective Control of Our Borders.” In addition, the increases for fiscal year 2009 will allow ICE to address cyber vulnerabilities through a holistic investigative approach leveraging criminal enforcement authorities as well as analytical capabilities unique to ICE.

**Description of Item**

This request will fund five positions needed within the Office of Investigations to increase outbound enforcement support and those programs directly supporting outbound enforcement operations, specifically a joint effort to stem the flow of illegally smuggled weapons at the Southwest Border region. Outbound enforcement prevents arms and strategic technologies, deemed exports (e.g. any release of export controlled technologies or software to a foreign national is “deemed to be an export” to the foreign national’s home country), contraband, and money from leaving the United States. With this staffing increase, ICE will increase outbound enforcement activities that are critical to stem the flow of illegal activity at the border and especially at Ports of Entry, borders, and sensitive facilities that are vulnerable to illegal procurement and export of sophisticated U.S. technology and weapons. The requested agents will be located within geographic areas along the Southwest Border of the United States with the greatest threat of illegal munitions exportation.

**Personnel Costs**

\$1 million in personnel costs is requested for funding five Special Agent positions:

- 4 Supervisory Special Agents
- 1 Special Agent

**Justification**

For the Arms and Strategic Technology Investigations (ASTI) program, ICE is requesting funding for 1 Special Agent and 4 Supervisory Special Agents, personnel for the ASTI Program to effectively respond to and support the task of identifying and investigating the illegal export of weapons of mass destruction components and precursors, sensitive United States Munitions List (USML) and dual-use technology regulated by the Arms Export Control Act, International Traffic and Arms Regulations (ITAR), the Export Administration Regulations (EAR) and the International Emergency Economic

Powers Act. Due to the complex nature of national security investigations, ICE needs supervisory Senior Special Agents who have the necessary knowledge, skills, and abilities to manage Special Agents acting to thwart the complicated transnational threat of illegal exportation of military technology and weapons going out of the United States. Despite the outstanding success in criminal prosecutions, ICE continues to observe aggressive efforts by brokers and businessmen seeking illicit gain through the illegal acquisition and export of U.S. origin technology and arms. Of greatest concern to ICE, is the proliferation of weapons of mass destruction and related components and precursors into the hands of rogue countries and terrorist organizations. The increase provides funding for the criminal investigators required nationwide to assist in effectively responding to the threat of illegal exports, especially at the Southwest Border, involving WMD components and precursors, military technology and weapons, and dual-use technologies.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

ASTI promotes DHS strategic objective 1.1 of the DHS Strategic Plan “Achieve Effective Control of Our Borders.” This outbound enforcement initiative also supports State and local law enforcement by aggressively investigating all aspects of local criminal behavior exploiting vulnerabilities at the border. In addition, this initiative strengthens ICE’s enforcement of 18 USC 1960, which allows ICE to impose fines or prison terms for those involved with foreign or domestic unlicensed money transmitting businesses.

In the event that this initiative is not funded there will be potential adverse consequences from the higher possibility of terrorists, criminals, and other persons of suspect advancing their criminal activities by receiving sensitive technologies, and illegal proceeds from criminal activity (bulk cash), originating from the U.S.

**Department of Homeland Security  
Office of Detention and Removal Operations

\* The FY 2008 funding included bed space. In the FY 2009 request, all new bed space is consolidated in a separate request.

**Description of Item**

This request will fund Office of Investigations training for approximately 200 new State and local law enforcement officers (LEOs) and refresher training for 850 previously-trained LEOs. Funding will also provide for travel for these individuals and IT connectivity for the participating jurisdictions under the Section 287(g) Program.

Section 287(g) of the Immigration and Nationality Act authorizes the Secretary of Homeland Security to enter into written agreements to delegate authority to enforce Federal immigration laws to State and local law enforcement officers. Participation by state and local governments is completely voluntary. Delegation is granted only after extensive training from ICE, and delegated officers perform immigration enforcement functions under direct ICE supervision. Section 287(g) requires that a written Memorandum of Understanding (MOU) be created that defines the authorities being certified, the training requirements, the required supervision, the length of the agreement, and any other important issues, including regular meetings to review progress and adherence to the MOU.

ICE ACCESS (Agreements of Cooperation in Communities to Enhance Safety and Security) is the portal through which local law enforcement may interface with various ICE programs to combat specific challenges in their communities. ICE developed the ACCESS program in response to the widespread interest from local law enforcement agencies (more than 100) who have requested ICE assistance through the 287(g) Program. This enhancement will leverage the ICE ACCESS successes and expand its use.

**Personnel Costs**

- \$1.32 M in resources for associated management, legal, and acquisitions support for increased 287(g) program activities:
  - Office of Investigations – (2 FTE) \$0.43 M

- Legal Support – (2 FTE) \$0.43 M
- OAQ Support – (3 FTE) \$0.46 M

### **Non-Personnel Costs**

- \$2.68 M in resources will fund initial training and training travel for approximately 200 State and local officers and annual refresher training for 850 previously trained State and local law enforcement officers.
- \$8.0 M for information technology assistance for new participants in the program and continuation of ICE ACCESS.

### **Justification**

The 287(g) program serves as a force multiplier for ICE immigration enforcement, with ICE training, certifying, and supervising State and local law enforcement officers. These officers can perform immigration-related enforcement operations targeting criminal aliens, fraudulent document vendors, illegal aliens working in sensitive critical infrastructure positions, and violent sexual offenders.

As of December 2007, ICE has an MOU with 34 law enforcement agencies across the United States, and there are twenty jurisdictions that have submitted requests to participate in the 287(g) program. In addition to the pending requests, ICE will expand the 287(g) program to the requesting agencies where it is expected to have the most impact and be mutually beneficial to ICE and the local agency.

The level of interest in the 287(g) Delegation of Authority Program from State and local agencies has increased tremendously, thus creating the potential for a powerful force multiplier to better enforce immigration laws and consequently better secure the homeland. The additional funding will help the 287(g) program to meet these increasing demands.

### **Impact on Performance (Relationship of Increase to Strategic Goals):**

The 287(g) program promotes DHS strategic objective 1.1 of the DHS Strategic Plan “Achieve Effective Control of Our Borders.” This initiative also supports State and local law enforcement by aggressively investigating all aspects of local criminal behavior with a nexus to illegal immigration. The 287(g) program ensures that ICE is in compliance with section 287(g) of the Immigration and Nationality Act (INA) to provide direct ICE supervision to State and local law enforcement entities that have entered into Memorandum of Agreements (MOA) with ICE.

The State and Local initiative, under the 287(g) Program, is designed to enable State and local law enforcement personnel, incidental to a lawful arrest and during the course of their normal duties, to question and detain individuals for potential removal from the U.S., if these individuals are identified as undocumented illegal aliens and they are suspected of committing a state or local crime. Funding the State and Local initiative allows State and local law enforcement to enforce Federal immigration laws as they encounter illegal aliens in their daily activities. By not funding this activity, State and local law enforcement will not be in a position to enforce immigration laws for illegal aliens who have committed some kind of criminal offense. State and local participation in the 287(g) Program generally results in significant cost savings as well as enhanced community safety to the state and local law enforcement agency; however, the program can generate significant costs to ICE.

**Description of Item:**

ICE requests an increase of \$3.4 million for the Office of International Affairs, Visa Security Program (VSP), adding 6 positions to create additional overseas Visa Security Units in high-risk locations such as Istanbul, Turkey and Beirut, Lebanon.

**Personnel Costs**

The requested \$3.4 million will fund the following 6 positions:

- 2 Senior Special Agents
- 4 Special Agents

**Justification**

The Office of International Affairs (OIA) Visa Security Program (VSP), mandated by Section 428 of the Homeland Security Act of 2002 (HSA), extends the border overseas to prevent terrorists, criminals, and other ineligible applicants from receiving U.S. visas.

The VSP is the first-line of defense in preventing terrorists and other criminals from gaining access to the United States through a legally obtained visa. The integration of experienced ICE law enforcement officers in the visa process maximizes its use as a counterterrorism tool through the generation of new watch list entries, intelligence reports, investigative leads, and identification of patterns in visa fraud.

ICE OIA developed the VSP Five-Year Expansion Plan which includes a prioritized expansion to the 32 highest-risk visa issuing posts. According to the plan, VSP will cover approximately 75% of the highest risk visa activity posts by 2013.

VSP expansion efforts are consistent with critical homeland security initiatives - the Homeland Security Council (HSC) Deputies Committee has stated in support of the VSP Five-Year Expansion Plan that "Immigration and Customs Enforcement (ICE) should move forward with expansion of the

VSP, as part of the planned five-year expansion, to cover 75% of the highest risk visas issued worldwide...”

VSP expansion overseas is part of the National Implementation Plan (NIP) on Counterterrorism: “2.4.5: Expand the Visa Security Program (HSA 428 ) to enhance the US Government’s ability to screen visa applicants. (Co-Leads [as mandated by the Homeland Security Act, Section 428] Department of Homeland Security (DHS), Department of State (DOS); Partner(s): Department of Justice (DOJ).”

**Impact on Performance (Relationship of Increase to Strategic Goals):**

This program supports DHS Strategic Goal 2 - Prevention, Objective 2.2 “Enforce trade and immigration laws.” By extending DHS law enforcement capabilities into the visa process, VSP strengthens border security, interior enforcement, and screening coordination. Performance results include a reduction in visa issuance to malafide aliens, identification of “not yet known” threats to national security that traditional screening systems do not detect, and the initiation of important interior enforcement investigations that result from overseas VSP efforts.

The presence of Visa Security Officers at overseas visa-issuing posts: prevents terrorists, criminals, and other ineligible applicants from receiving U.S. visas, and maximizes the visa process as a law enforcement and counterterrorism tool; provides direct law enforcement expertise in the review and issuance of visas to individuals seeking to enter the U.S., to include initiating actions related to the Secretary of Homeland Security’s authority to refuse visas in accordance with law; and initiates investigative activity in cases of homeland security threats and immigration fraud and generate leads and support for domestic investigations.

Activities of VSP have been developed to prevent terrorists and criminals from obtaining legitimate travel documents enhances border security by denying those intending to do us harm from reaching our borders. By extending law enforcement participation to the visa issuance process, the Visa Security program identifies, prioritizes, and interdicts threats to our nation before they physically arrive.

**Description of Item**

This program increase provides the Office of Professional Responsibility (OPR) \$4.1 million for Workforce Integrity to relieve administrative burden of OPR Special Agents and improve investigative technical support. In addition, increase provides \$3.0 million to support a field security function of OPR’s Security Management Unit (SMU) that is responsible for centralization, management, and operational oversight of ICE internal security activities.

*Workforce Integrity:*

**Personnel Costs**

Of the \$4.1 M for Workforce Integrity, \$2.28 M would fund the following 24 positions:

- 3 Criminal Investigators;
- 3 Technical Enforcement Officers;
- 2 Program Management Analysts;
- 4 Program Management Analysts/Officers;
- 6 Criminal Research Specialists;
- 2 Clerks; and
- 4 Investigative Assistants.

**Non-Personnel Costs**

\$1.82 M is required to fund upgrades to Digital spectrum vehicle and handheld communication equipment, purchase specialized technical surveillance equipment, provide additional travel for technical support training, and allow for the purchase of single use supplies needed for evidentiary purposes.

*Security Management Unit (SMU):*

## **Personnel Costs**

Of the \$3.0 M for the SMU, \$1.97 M would fund the following 14 positions of which 8 are field based:

- 6 Security Inspectors;
- 2 Supervisory Security Inspectors;
- 2 Information Security Specialists;
- 1 Operational Security Specialist;
- 2 Supervisor Administrative Security Specialists; and
- 1 Management and Program Analyst

## **Non-Personnel Costs**

The remaining \$1.03 M is required to fund a commercial off the shelf (COTS) Security Management Database, contract support for minor customization, branding and training, supporting hardware (servers, racks), and licensing. This critical time-saving tool will provide incident tracking, compile facility CAD files, maintain assignments of secure equipment, and track security assessment and related tasking status in both office and mobile environments. This tool will provide the SMU Security Inspectors the ability to enter and cross reference data while performing site visits. This ability will result in faster identification of vulnerabilities and implementation of countermeasures thereby ensuring the safety and protection of agency personnel, information, and facilities.

## **Justification**

### *Workforce Integrity:*

OPR is responsible for addressing all criminal allegations of misconduct involving employees of ICE and CBP that are referred by the DHS OIG. Currently, ICE OPR services a workforce of over 80,000 full time Federal employees and contractors employed within CPB and ICE. During FY 2007, the ICE/CBP Joint Intake Center (the entity responsible for recording, classifying and appropriately routing misconduct allegations involving ICE and CBP employees) processed over 6,800 allegations of employee misconduct. As the level of workforce increases within ICE and CBP, the number of misconduct allegations in need of investigation by OPR Special Agents (SAs) inherently grows. With the growth in investigations are the administrative requirements associated with them.

The program increase provides for four Program Management Analyst/Officers and two Clerks dedicated to providing administrative mission support, such as human resource actions, acquisition management, budget, and training to relieve OPR SAs of many of the administrative services required day to day (i.e. acting as purchase card holders, photocopying reports, working to execute new contracts for space and other operational support functions, etc). These positions would alleviate non-investigative workload to allow OPR Senior SAs to focus primarily on conducting investigations. The two GS-14 Program Management Analysts requested would audit the ICE Certified Undercover Operations to ensure that the funds expended during an ICE Undercover Operation are properly justified, documented, and appropriately tracked.

To keep pace with changing and advancing technologies used by criminals to thwart investigations, OPR requires an infusion of technical and specialized skill sets to support investigations that are complex, labor intensive, and that involve suspected acts of terrorism. To this end, the program increase provides for three SAs, six Criminal Research Specialists, three Technical Enforcement Officers, and four Investigative Assistants to investigate, research, monitor and compile information.

*Security Management Unit (SMU):*

Recently, the National Archives and Records Administration (NARA), Information Security Oversight Office conducted a review of the protection and handling of the National Security Information for ICE and determined that the current services being provided in this area were inadequate to meet the standards as outlined in Executive Order 12958. To address NARA's findings, OPR will begin to implement a plan in FY 2008 to consolidate and centralize internal security functions through the establishment of the SMU.

Full implementation of the plan will require a significant level of effort to adequately address the deficiencies identified by NARA to prevent vulnerabilities of security and to secure access to classified information of national security. This program increase will provide for eight Security Inspectors, five Security Specialists, and one Management/Program Analyst at Headquarters and in the field to begin correcting the deficiencies identified in the areas of policy, physical security, field operations, administrative security, and special security. In addition, funding is provided for the security management database, repair costs for security systems, and contractor support.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

OPR supports the Strategic Objective 5.5.1 – Strengthen and Unify DHS. By supporting workforce integrity, OPR is equipped to enforce measures that prevent and eliminate unfavorable and criminal activities within the CBP and ICE workforce that could potentially harm the image of DHS and its code of honorable employee behavior and high ethical standards.

Past data analysis supports that ICE OPR operates at an efficient and effective level when their investigators carry no more than 8 criminal investigations each. Without the program increase, OPR will not have the ability to grow in size commensurate to growth within ICE and CBP, leaving both agencies vulnerable to insider threats. A lack of needed growth will render OPR unable to timely investigate, research, monitor, audit and compile information needed to criminally prosecute corrupt ICE and CBP employees or support the Agency ability to sustain administrative disciplinary action due to investigative delays. This inability to timely address issues of criminal misconduct leaves both CBP and ICE vulnerable to undetected corruption within its employee ranks, posing a threat to the organizational health of each agency as well as to National Security.

Without the addition of Program Management Analysts, OPR will be unable to perform Congressionally Mandated Audits of ICE Undercover Operations. This could impact ICE's ability to utilize this highly successful and sought after investigative technique. Without the addition of the requested administrative support, OPR Senior Special Agents will be unable to devote 100% of their time investigating allegations of criminal misconduct/integrity issues. Agents will be required to continue to assume administrative functions normally provided by a mission support staff, leaving ICE and CBP vulnerable to undetected insider threats involving corruption and acts of terrorism, including the mishandling of sensitive national security information.

Additional staff is needed to begin development and implementation of the SMU at ICE headquarters and in the field. If deficiencies in the areas of policy, physical security, field operations, administrative security, and special security are not properly addressed, ICE is at increased risk of losing access to the National Security Information.

HCOP program areas, ICE's OHC needs seasoned professionals specializing in areas that can target the HCOP areas mentioned above. These positions include:

- Management/Program Analysts with Classification Program Manager and Classification Program Specialist experience, with the experience creating, editing, and managing the position descriptions (PD) library of ICE jobs. Two Classification Analysts would conduct and develop competencies and targets for specific ICE positions and more effectively target recruitment efforts to meet workforce authorization levels and experience desires.
- Management/Program Analysts with experience administering retirement programs in the Federal government, especially in the area of Federal law Enforcement Officers. Proper retirement preparation is critical toward completion of each ICE employee's work-life cycle, particularly among law enforcement personnel, who have a Federally-mandated retirement age much earlier than most careers – 57 years of age.
- Management/Program Analysts with a Benefits Program Manager/Specialist background would provide program oversight and expert guidance to ICE senior leadership on developing and maintaining ICE's benefits program, which is a key to hiring the talented individuals necessary to help ICE meet its mission.
- Employee and Labor Relations (E&LR) Specialists are a crucial part of the management process and key members of a well-qualified Human Resources staff. E&LR services are not provided by Customs and Border Protection (CBP) under DHS' Tri-Bureau shared services agreement. Each agency's collective bargaining agreements (CBAs) are unique to that specific agency, its mission, and the employee population and job specialties within it. ICE's mission and labor agreements differ from CBP's, and DHS recognized this when shared services was created, leaving E&LR responsibilities to ICE. E&LR Specialists ensure proper, professional conduct across ICE's workforce through their knowledge and enforcement of ICE's CBAs. Because of the uniqueness of ICE's CBAs with its employees, an increase in the workforce levels for this specialty is critical. The average case-to-specialist ratio for many Federal agencies in the National Capital Region is about 600:1 (by comparison within DHS, CBP's ratio is 450:1). Even with contractor support OHC E&LR case-to-specialist ratio averages more than 1100:1. These three additional positions will allow a more manageable case-to-specialist ratio of 900:1.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

The requested Management/Program Analyst positions are critical to ensuring ICE OHC can effectively support DHS Strategic Goal 5 and Objective 5.1: Strengthen and Unify DHS Operations and Management while implementing the DHS HCOP. These positions will enhance OHC's ability to manage all personnel aspects of the ICE workforce while continuing to process new authorized ICE positions to meet Congressional and OMB objectives, special hiring authorities, and the President's Management Agenda goal of Strategic Management of Human Capital. Each Specialist area would be the authoritative 'one-stop' for all actions in his/her respective HC function before processing through the respective service centers.

**Description of Item**

The ICE training infrastructure has lagged behind the evolution of the organization it supports, and this program increase addresses that critical shortfall. This increase funds 27 positions within the ICE Office of Training and Development (OTD) to facilitate the consolidation of all ICE training coordination and oversight as well as improve training delivery and support at the ICE Academy and the Leadership Development Center (LDC).

These positions will be deployed to three locations: ICE Headquarters' OTD in Washington, DC; the ICE Academy in Glynco, Georgia; and the LDC in Dallas, Texas.

**Personnel Costs**

\$615,040 provides for eight positions at OTD:

- 1 Assistant Director for Management & Chief of Staff;
- 1 Unit Chief (Career Development Programs);
- 1 Instructional System Specialist
- 1 Management & Program Analyst (Accreditation);
- 2 Budget Analysts;
- 1 Office Manager; and
- 1 General Assistant.

\$982,720 provides 16 positions at the ICE Academy:

- 1 Chief of Staff;
- 1 Unit Chief (Mission Support);
- 2 Instructional System Specialist
- 2 Budget Analysts;

- 1 Program Manager (Academy Class Management System);
- 3 Mission Support Specialists;
- 4 Training Technicians; and
- 2 General Assistants.

\$202,240 provides three positions at LDC:

- 1 Training Instructor;
- 1 Instructional System Specialist; and
- 1 Mission Support Assistant.

### **Justification**

Currently, ICE's training program lacks integration and an overall agency direction that is attributable for the most part to the formation of ICE in 2003 when training resources associated with three formerly separate and mission independent agencies- legacy Immigration and Naturalization Service, legacy U.S. Customs Service, and Federal Protective Service - were combined. Since then, training has been realigned under several offices, functioning in a disjointed and uncoordinated fashion. This has resulted in programmatic inefficiency characterized by duplication of effort, data access problems, a lack of consistency and coordination, and a poor professional image.

In FY 2008, ICE took steps to integrate and consolidate training by implementing additional courses and support for new and mid-career managers to improve financial management skills and abilities. Using \$1.750M in funding, ICE began additional training in four disciplines – finance, procurement, labor management relations, and civil rights. These funds were used to augment existing courses, develop new training at ICE's Leadership Development Center and in the field, and provide on-line courses. The FY 2009 request will build on those successes.

### **Headquarters' OTD Positions**

The positions requested for OTD would manage and coordinate the needed integration and consolidation functions, providing overall direction for ICE training and an ICE focus rather than a program-specific focus. The positions would facilitate compliance with Government Employees Training Act requirements to supplement and extend employee self-development, self-improvement, and self-training by government sponsored programs.

The resources would directly impact achievement of DHS Human Capital Operation Plan efforts to create high quality learning and development programs within ICE. The resources would provide positions with both supervisory and individual employee expertise for internal mission support functions as well as positions needed to develop, implement, and monitor compliance with ICE training policy to achieve and maintain accreditation. The OTD positions would also manage and coordinate efforts to establish ICE baseline continuing education requirements, aimed at keeping the workforce informed of changing and new immigration, customs, and other laws enforced by ICE.

### **ICE Academy Positions**

The 16 positions requested for the Academy would execute the ICE training integration and consolidation guidance developed by OTD. The positions would also act as the Academy's single point of contact to the Federal Law Enforcement Training Center (FLETC). Currently, there are two other points of contact besides OTD: (1) the Office of Investigations training division, and (2) FPS, which has independently worked with FLETC as a stand-alone customer since before the creation of

ICE. ICE would be best served by a single point of contact with FLETC in Glynco to ensure that communication and coordination with FLETC reflects an agency rather than individual program perspective. The requested Academy positions would also conduct the detail work needed for establishing baseline continuing education requirements based on the dynamic and complex immigration laws that ICE enforces.

#### Leadership Development Center Positions

The LDC develops and provides supervisory leadership training and situational leadership for law enforcement. The three positions for the LDC would support training through the delivery of leadership-focused training that accommodates both program specific needs and promotes a unified ICE culture through the development of curriculum and training objectives that are integrated among the programs and specific to the ICE mission. The instructor and mission support positions are needed for increased training requirements. There is no dedicated instructional system design capability on the current LDC staff, and instructor staff cannot meet both platform and course development demands. The requested instructional system specialist will fill this void and negate the need to seek contract or other outside assistance for skills that should be part of the permanent LDC staff.

#### **Impact on Performance (Relationship of Increase to Strategic Goals):**

This program increase supports Department Strategic Goal 5 (strengthen and unify DHS operations and management) in an effort to integrate and consolidate training programs that promotes solidarity among ICE programs as opposed to individual program focus. This program increase would provide the dedicated staffing required to implement training integration and consolidation for ICE and is consistent with building a strong infrastructure aimed at improving and developing core competency skills throughout the organization with a focus on succession planning and leadership.

The requested resources would help to establish baseline continuing education requirements for ICE – a need underscored by the complexity of the laws ICE routinely enforces. Other tangible benefits will be agency focused training policy development, and training programs that are based on recognized best practices through achieving and maintaining accreditation by the Federal Law Enforcement Training Accreditation Board.

The FY 2006 House Congressional Appropriations Committee Report 109-79 cited "...ICE's need to co-locate all of ICE's legacy personnel, particularly within the Office of Investigations. Physical co-location is needed to unify personnel and manage a cohesive workforce... within a significantly shorter period than five to seven years."

Physically collocating all of ICE's legacy offices would support efforts to unify personnel and manage a cohesive workforce. In many cities, ICE staff is located at three, four or more geographically dispersed sites. This dispersion hampers coordination and communication, and makes it challenging to supervise the workforce. The current structure also makes inefficient use of administrative service and other support. (e.g., vehicle support.) Finally, as ICE's workforce has increased significantly in recent years, overcrowding has become a major challenge, affecting employee morale and productivity. This funding would provide the resources to start the process of co-location to address these problems.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

Co-location of facilities is critical to ICE's overall success. The present disjointed nature of office locations hampers the operational and financial efficiency of the Agency. In addition to unifying personnel and allowing the management of a unified workforce, co-location promotes agency-wide cohesiveness in safe, secure, efficient workspaces to carryout ICE law enforcement duties.

The program increase will help to advance ICE co-location efforts and to realize potential long term savings and operational efficiencies in areas such as building security, rent, and shared utility costs.

### PPA Mission Statement

ICE Legal Proceedings (also referred to as the Office of the Principal Legal Advisor or "OPLA") provides the legal advice, training, and services required to support the ICE mission while defending the immigration laws of the U. S. in the administrative and federal courts and is the legal representative for ICE. OPLA is the DHS legal component within ICE that is authorized to represent the Government in immigration proceedings that end up in immigration courts.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$114,400              | \$164,091               | \$169,466               | \$5,374                        |

Salaries and Benefits includes costs for 1,265 FTEs. The FY 2009 request includes an increase of \$5,374,000 for pay inflation and SBI-related program increases.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | \$3,965                | \$9,243                 | 9,520                   | \$277                          |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2009 request includes an increase of \$277,000 non-pay inflation and SBI-related program increases.

|                                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Transportation of Things</b> | \$298                  | \$379                   | 390                     | \$11                           |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2009 request includes an increase of \$11,000.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>GSA rent</b> | \$13,952               | \$14,202                | 14,628                  | \$426                          |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 request includes an increase of \$426,000 in non-pay inflation.

|                   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

**PPA Mission Statement**

In the Office of Investigations (OI), our broad Homeland Security mission is to defend the Nation by enforcing trade and immigration laws through investigations that target the people, money, and materials that support terrorist and other criminal activities. We work under that mandate by dividing our investigative effort into three broad investigative categories: National Security, Financial and Trade, and Smuggling and Public Safety. These three categories represent the general priorities we use to guide our efforts in our daily activities. Each priority can be broken down into many different sub-categories and, in fact, are operationally interrelated in a great many cases.

**Summary Justification and Explanation of Changes**

|                              | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|------------------------------|---------------|----------------|----------------|---------------------|
|                              | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |

**PPA Mission Statement**

Office of International Affairs (OIA) expands the investigative efforts of the Office of Investigations to over 50 foreign locations. The OIA represents the international assets of all ICE programs and collaborates with U.S. Citizenship and Immigration Services, U.S. Customs and Border Protection, and other DHS components. The OIA liaises with foreign governments and international partners to facilitate the enforcement of U.S. customs and immigration laws beyond our borders in an effort to interdict criminals and prevent or disrupt criminal activity. OIA also executes the operational mandate of Section 428 of the Homeland Security Act through ICE's Visa Security Program.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

**PPA Mission Statement**

Intelligence - Collect, analyze and share information on critical homeland security vulnerabilities that could be exploited by terrorist and criminal organizations. The Office of Intelligence focuses on data and information related to the movement of people, money and materials into, within and out of the United States to provide accurate and timely reporting to ICE leadership and field agents in support of enforcement operations. ICE's intelligence functions are managed by a highly trained team of professionals with expertise in data and threat analysis, languages, financial investigations, counterterrorism and a number of other areas. ICE intelligence professionals process information from a variety of sources to provide assessments of patterns, trends and new developments in a wide range of law enforcement areas. These include the following areas:

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$33,532               | \$37,937                | \$38,494                | \$557                          |

Salaries and Benefits includes costs for 332 FTEs. The FY 2009 request includes an increase of \$557,000 in personnel compensation to support the Secure Border Fusion Program.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | \$1,241                | \$1,530                 | \$1,561                 | \$31                           |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2008 request includes a increase of \$31,000 to cover non-pay inflation.

|                                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Transportation of Things</b> | \$167                  | \$69                    | \$70                    | \$1                            |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2009 requests an increase of \$1,000.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>GSA rent</b> | \$2,617                | \$2,626                 | \$2,678                 | \$53                           |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 request includes an increase of \$53,000.

|  | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|--|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Communication, Utilities, and miscellaneous charges</b> | \$1,238                | \$1,275                 | \$1,351                 | \$76                           |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2009 request includes an increase of \$76,000.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Printing</b> | \$1                    | \$1                     | \$1                     | \$0                            |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2009 request includes no changes.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

**PPA Mission Statement**

Immigration enforcement authorities apprehend potentially removable aliens. In many cases, these aliens must be detained while they go through immigration proceedings and until they are removed. Often the number of apprehensions exceeds the detention space available and DRO must prioritize which cases will be detained. Custody Operations provides safe, secure, and humane confinement for these aliens. It also ensures that aliens in ICE custody appear for their immigration hearings, and then for their subsequent removal.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$481,267              | \$548,437               | \$556,373               | \$7,937                        |

Salaries and Benefits includes costs for 4,782 FTEs. The FY 2009 request includes an increase of \$7,937,000 in personnel compensation to support the Secure Border Initiative (SBI).

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

**PPA Mission Statement**

The Criminal Alien Program (CAP) ensures that aliens are not released back into the community before they are removed from the United States. Through the CAP, ICE officers interview incarcerated aliens to determine whether they are amenable to immigration proceedings. If a case receives a final order of removal, ICE officers will immediately take that alien into custody upon completion of his or her criminal sentence and then prepare that case for removal.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

**PPA Mission Statement**

The Alternatives to Detention program places low-risk aliens under various forms of intensive supervision rather than traditional detention as a cost-effective way to ensure their appearance for an immigration hearing or for removal. This program lowers the risk that aliens will be fugitives.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U.S. Immigration and Customs Enforcement Automation Modernization

### **I. Appropriation Overview**

#### **A. Mission Statement for Automation Modernization:**

In FY 2009, ICE will include several information technology (IT) transformational initiatives in the Automation Modernization program: ICE's Homeland Enforcement Communication System (HECS), Atlas Program – Infrastructure and Tactical Communications, Detention and Removals Operations IT Modernization (DROM), and the replacement of ICE's Financial System. Aligning all IT modernization initiatives under the Automation Modernization appropriation will help ICE standardize IT investment management and delivery.

The Automation Modernization program will allow ICE to improve information sharing with the Department of Homeland Security (DHS) and across ICE organizations, strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices. The resources are available until expended.

#### **B. Budget Activities:**

In FY 2009, the Automation Modernization Program focuses on specific, discrete IT activities to achieve its mission, including ICE's Homeland Enforcement Communication System (HECS), Atlas IT Infrastructure and Tactical Communications, Detention and Removals Operations IT Modernization (DROM), and the replacement of Financial Systems.

##### ***Homeland Enforcement Communication System (HECS)***

The request will fund the modernization of the ICE portion of the DHS Investigative Case Management system. HECS will greatly improve workflow processes, improve interoperability with DHS and other Federal law enforcement and homeland security intelligence analysis and visualization tool sets, enhance the quality of law enforcement information sharing within DHS and external to DHS, and improve the collection of more consistent, timely, and accurate performance information on law enforcement activities and outcomes.

##### ***Atlas – Infrastructure and Tactical Communications***

The Atlas projects will improve infrastructure, consolidate and standardize IT equipment, improve the technology and functionality of IT products and services available to ICE employees, and ensure security of all equipment.

Atlas integrates enforcement capability rooted in a "One DHS" vision that includes sharing information, coordinating systems for identifying threats, forging DHS-wide standards, and weaving

together networks. To this end, the Atlas program seeks to create and sustain a secure, scalable IT environment that supports ICE law enforcement programs, enabling better delivery of the right information to the right people when needed.

### ***DRO Modernization (DROM)***

The DROM funding will support the systems upgrades and improvements of DRO business processes for the detention and removal of illegal aliens from the United States, as well as support the requirements of the Secure Border Initiative (SBI). DROM will effect improvements in the areas of real-time dynamic data reporting, detainee management, management of detention beds and tracking detainees, bed-space availability management, and transportation management for detention and removals.

### ***Replacement of Financial Systems***

The Financial Systems replacement initiative supports ICE's portion of the DHS enterprise-wide initiative of consolidating a number of financial systems. This initiative will support ICE's migration to the new DHS Financial System and will result in improved financial services. This will help ICE achieve and sustain unqualified financial audit opinions and perform effective financial management.

### **C. Budget Request Summary:**

ICE requests 14 positions, 11 FTE, and \$57,000,000 for FY 2009 to continue the modernization of its information technology and systems infrastructure for the following program initiatives. This includes program increases of 7 positions, 4 FTE, and \$57,000,000 million.

- HECS (\$15.7M): Develop HECS architecture and ICE high-level design, and establish Investigative Case Management development integration environment and testing environment;
- Atlas Infrastructure (\$13.0M) and Tactical Communications (\$10.0M): Integrate information from additional enforcement systems into the ICE data warehouse (Infrastructure); and upgrade the ICE tactical communications hub in preparation for full upgrade of ICE to federal standards for security and interoperability (Tactical Communications);
- DRO Modernization (\$11.3M): Develop and deploy version one of the Detainee Location Tracking Module as part of the Bed Space and Transportation Management System, expand the ICE Data warehouse data capacity and reporting capability to support the DRO IT data, and expand Web Services to allow the Electronic Travel Document application to communicate with other internal or external applications; and
- Replacement of Financial System (\$7M): Document processing of core financial functions that will be migrated to DHS Enterprise Solution, develop requirements to address functionality in current Federal Financial Management System (FFMS), and purchase software licenses.

U.S. Immigration and Customs Enforcement requests \$57 million for this activity. This is an increase of \$26.3 million over FY 2008, and will be used for Information Technology enhancements in a variety of areas.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Prior to FY 2008, Atlas (Infrastructure) was the sole program funded under ICE Automation Modernization. Beginning in FY 2008, the ICE Automation Modernization program is being expanded to include the Detention and Removals Operations IT Modernization (DROM), Mobile IDENT/ENFORCE, and Immigration Enforcement Systems Upgrades. In FY 2009, the ICE Automation Modernization program will be further expanded to include specific discreet IT initiatives, including HECS, Atlas - Tactical Communications, and the replacement of Financial Systems.

Atlas Infrastructure integrates ICE enforcement capability with a “One DHS” vision that includes sharing information, coordinating systems for identifying threats, forging DHS-wide standards, and integrating networks. The Atlas program creates and sustains a secure, scaleable IT environment that supports ICE law enforcement programs – enabling efficient delivery of necessary information, through eight projects:

- (1) Common Computing Environment: Migrates all ICE users to Microsoft Exchange, deploys new desktops to ICE users, and centralizes file services for all ICE users.
- (2) Integration: Migrates ICE to the DHS OneNet, deploys streaming video to 70 major ICE locations, and upgrades local area network infrastructure at all ICE sites.
- (3) ICE Mission Information: Deploys a data warehouse at ICE that consolidates data and reporting from disparate investigative and enforcement systems and establishes capability to rapidly share ICE information with other law enforcement agencies.

- (4) Information Assurance: Implements Single Sign On for all ICE users and implements additional capabilities that enhance network and application security throughout ICE.
- (5) Architecture Engineering: Consolidates and creates a state-of-the-art lab to manage, operate, evaluate, and test IT systems for alignment to technology requirements, the DHS Architecture and mission objectives.
- (6) Data Center Migration: Evaluates alternatives, inventories systems, and plans migration execution in preparation for moving all ICE data center hardware and applications to DHS data centers.
- (7) Tactical Communications: Provides ICE with secure, interoperable wireless communications aligned with DHS plans for a single, integrated wireless network and deploys mobile communications networks to support field operations and disaster response efforts.
- (8) Transformation Planning: Provides planning and programmatic oversight to manage program cost, schedule, and performance.

From the inception of ICE's Automation Modernization appropriation in FY 2004 through FY 2007, ICE received \$104 million in non-expiring appropriations. To establish a stable, secure, integrated infrastructure as a foundation for all ICE IT modernization efforts, the Atlas Infrastructure program has used these funds to accomplish the following:

- Obligated \$77.3 million on contracts for planned ICE IT modernization activities (the remaining \$26.7 million will be obligated in FY 2008);
- Migrated ICE users to a common DHS-wide e-mail system;
- Deployed new desktops to 4,400 ICE users;
- Completed the migration of ICE sites to DHS OneNet;
- Prototyped an ICE data warehouse integrating information from disparate enforcement systems for enhanced reporting and decision support;
- Prototyped capability to rapidly share ICE information with other law enforcement agencies;
- Upgraded to the ICE Web application platform;
- Established a Single Sign On framework for applications supporting Active Directory authentication and enabled Single Sign On for ICE e-mail;
- Completed integration of the Architecture Engineering test lab; and
- Established program management oversight, including Independent Verification and Validation services.

#### FY 2008 Projected Accomplishments

In FY 2008, ICE is expending \$30.7 million for the Automation Modernization program. ICE will use \$15.0 million of these funds, along with prior year fund balances of \$26.7 million, to complete several initial infrastructure investments under Atlas Infrastructure. In addition, using the remaining \$15.7 million the ICE Automation Modernization program will be expanded to include DROM, Mobile IDENT/ENFORCE, and Immigration Enforcement Systems Upgrades.

Because Automation Modernization is now expanding to encompass multiple major initiatives funded in the FY 2008 Appropriations Act, ICE has established a Program Executive Office (PEO) to standardize, streamline and coordinate IT program management plans and activities. In

its capacity as an overarching governance Division, the PEO will perform portfolio management functions for all Automation Modernization activities, centralize common program management functions, and ensure alignment between major initiatives to avoid gaps or duplication of effort. Each major Automation Modernization initiative will maintain a distinct Program Management Office (PMO) and associated integrated project teams to execute PMO functions specific to that initiative within overarching PEO governance. This approach to program management will: ensure alignment of initiatives to address each IT modernization requirement without duplication of effort; standardize practices and mitigate risks for all Automation Modernization activities; reduce program overhead costs by centralizing functions not specific to one initiative; and ensure stringent oversight of cost, schedule and performance specific to each initiative.

During the fiscal year, the Automation Modernization initiatives will achieve the following.

#### Atlas - Infrastructure

- Obligate \$15.0 million and all remaining prior year fund balances carried into FY 2008 (\$26.7 million) for planned ICE IT modernization activities;
- Complete desktop deployments to 12,600 remaining ICE users;
- Deploy centralized file services to 60% of ICE users;
- Deploy streaming video to 70 major ICE locations and to remaining ICE users through remote access;
- Modernize the entire computing environment at all ICE overseas offices;
- Complete the first full release of the ICE data warehouse and integrate information from additional enforcement systems;
- Establish base system interoperability capabilities enabling rapid sharing of ICE information with other law enforcement agencies;
- Establish a Single Sign On framework for all ICE applications, including legacy mainframe systems;
- Pilot IT audit log analysis capabilities to improve security monitoring; and
- Complete Data Center Migration planning activities.

#### DRO Modernization

ICE will expend \$11.5 million to accomplish the following:

- Expand the Electronic Travel Document (eTD) system to include up to 25 participating countries and all non-participating countries (those countries who have not signed a Memorandum of Understanding (MOU) to use eTD for issuing electronic travel documents);
- Deploy Enforce Alien Removal Module (EARM) system to replace the Deportable Alien Control System (DACS) system;
- Complete disposition procedures for the DACS system;
- Expand data sharing and integration with external agencies of the EARM system;
- Implement enterprise reporting system for DRO Executive Information Unit; and
- Award Bed Space and Transportation (BS&T) Contract(s).

### Mobile IDENT/ENFORCE

ICE will expend \$2.2 million to develop portable IDENT, a component of Secure Border Initiative (SBI), for use in the positive identification and processing of aliens in remote places. These funds are being used to accomplish the following:

- Develop portable IDENT to positively identify aliens, which is critical to the success of SBI, particularly for both Interior Enforcement initiatives, and Temporary Workers Program (TWP) deployment.
- Process aliens outside established ICE IDENT processing facilities, including jails (under INA 287g), work sites, courts, and other locations requiring mobile capabilities.

### Immigration Enforcement Systems Upgrade

ICE is expending \$2.0 million to upgrade services (including systems design, development, and deployment) of new and enhanced IT systems that were needed to build out the ENFORCE infrastructure necessary to support multiple law enforcement communities, support initiatives such as SBI, and facilitate integration efforts such as the one between the Law Enforcement Service Center (LESC) and Office of Investigations (OI). These funds will be used to accomplish the following:

- Replace and modernize ICE's investigative systems through the Consolidated Enforcement Environment (CEE) program. Existing ICE investigative and case management systems were rapidly reaching peak capacity and the technologies underlying the primary ICE case management system were well past their lifecycle limits. Given the significant increase in the number agents needed to enforce the TWP and the potentially large increase in cases to be investigated, ICE believed that a new, modern case management system with integrated analytical and reporting applications was essential to an effective and enforceable TWP.
- Upgrade technology to support underlying infrastructure. The law enforcement community (including State, local and DoJ) accesses multiple, disparate applications when processing cases. This upgrade enhanced the ability to efficiently process cases, thus improving information integrity.

### FY 2009 – Projected Accomplishments

In FY 2009, ICE will further expand Automation Modernization activities with the initiation of the Homeland Enforcement and Communications System (HECS) program and the Financial System Replacement program. Atlas and DROM will continue to move toward completion of their efforts to modernize ICE IT infrastructure and IT support of Detention and Removal Operations. Using requested FY 2009 funds, the Automation Modernization programs will achieve the following:

#### HECS

- Develop HECS architecture and ICE high-level design;
- Acquire facility, infrastructure, program management tools;
- Complete alternative analysis and acquisition strategy;
- Process analysis and requirements definition; and
- Establish Investigative Case Management (ICM) development and integration environment and testing environment.

### Atlas – Infrastructure and Tactical Communications

- Integrate information from additional enforcement systems into the ICE data warehouse;
- Complete deployment of the ICE portion of a DHS-wide Single Sign On solution;
- Implement an automated network vulnerability scanning solution;
- Make emergency response mobile tactical communications kits available to ICE;
- Deploy mobile law enforcement tactical communications networks for ICE;
- Upgrade the ICE tactical communications hub in preparation for full upgrade of ICE to P.25 standards for security and interoperability;
- Upgrade 1 of 17 ICE regions remaining on outdated tactical communications infrastructure to P.25 standards for security and interoperability; and
- Continue sound project management, strategic IT planning and Independent Verification and Validation (IV&V).

### DRO Modernization (DROM)

- Develop and deploy Bed Space and Transportation (BS&T) Management System - Detainee Location Tracking (DLT) Module version 1. DRO will implement biometric finger scanning with a combination of fixed and mobile devices to positively identify and track detainees remotely, improve officer safety, and enhance mission effectiveness. Fixed biometric scanners will record detainees as they enter or exit key facility sally ports and key locations within major DRO detention facilities.
- Expand the ICE Data warehouse data capacity and reporting capability to support the DRO IT enhancements (e.g., Enforce Alien Removal Module (EARM), BS&T-DLT) and new data sources.
- Expand Web Services to allow the Electronic Travel Document (eTD) application to communicate with other internal or external applications such as the Justice Prisoner and Alien Transportation Service (JPATS) scheduling tool, DHL web interface and the EARM. This will enhance the end-user experience by consolidating services from multiple applications into the single eTD application.
- Establish a Program Management Office to provide oversight, sound project management and integrate IV&V activities within DRO modernization efforts.

### Replacement of Financial System

- Develop ICE requirements in support of the DHS' Transformation and System Consolidation initiative for the following:
  - user access controls with DHS Enterprise Solution;
  - transitioning from client-server to web-based access by users;
  - financial reporting (both for migration of existing reports, development of new ones);
  - interface with various COTS Applications that comprise the Shared Baseline;
  - user testing of DHS Enterprise Solution;
- Conduct a GAP analysis showing discrepancy between current system processing and DHS Enterprise Solution – Resolution of gaps (Requirements for how DHS Enterprise Solution will address discrepancies.);
- Develop detailed requirements to address functionality in current Federal Financial Management System (FFMS) that will require customization in DHS Enterprise Solution;

- Determine interface requirements with various COTS applications that comprise the Shared Baseline; and
- Document current FFMS processing of core financial functions that will be migrated to DHS Enterprise Solution.

**Description of Item**

The HECS request will fund the modernization of the ICE portion of DHS Investigative Case Management (ICM) system. This is a DHS-wide case management solution for investigations that replaces the TECS Case Management (CM) module and provides a transition plan for consolidating and retiring CM systems; identifying common business needs, reusable business components and services across DHS that relate to investigative case management. HECS will expand DHS' ability to capture and index or publish unstructured case information currently hidden in paper folders. It will expand DHS' ability to collect data using Federal standardized data formats, such as NIEM (National Information Exchange Model).

Under the HECS Program, ICE will collaborate with U.S. Customs and Border Protection (CBP) to design, build, and deploy a modern DHS enterprise architecture compliant replacement for the legacy Treasury Enforcement Communications System (TECS). Under this collaborative program, ICE will have lead responsibility for the development of ICM and related law enforcement services that will be adaptable for use by all DHS law enforcement components.

ICE will also collaborate with CBP to define the services oriented architecture (SOA) for the entire HECS solution. The HECS architecture will align with services defined in the DHS enterprise architecture (EA) service reference model (SRM). The architecture will make maximum use of services previously created by other DHS and Federal agencies, as well as ensure that new services developed by the HECS program are reusable with DHS.

The ICE investigative case management contribution to the HECS Program will address the following DHS law enforcement and homeland security functional needs:

- Greatly improved workflow processes, which will provide ICE and other DHS law enforcement organizations with capabilities to better manage case progress and allocate resources according to DHS mission priorities;
- Improved interoperability with DHS and other Federal law enforcement and homeland security intelligence analysis and visualization tool sets, including those of the Department of State and Department of Justice; and
- Collection of higher quality law enforcement information for sharing within DHS and external to DHS as required by the Intelligence Reform and Terrorist Prevention Act (IRTPA) and in accordance with controlled unclassified information (CUI) standards.

**Personnel Costs (\$0.541M)**

- 1 ICE Program Manager to (oversee and provide direction in the development and replacement of TECS)
- 1 IT Project Manager
- 1 ICE Services Architect
- 1 Business Manager (associated with performance and portfolio management of LE application environment)
- 1 Law Enforcement Liaison Coordinator (to coordinate activities with non-ICE DHS components and Federal Law Enforcement community)

**Non-Personnel Costs (\$15.159M)**

Detailed design, development, testing, and integration services:

- Develop HECS architecture and ICE high-level design
- Acquire facility, infrastructure, program management tools
- Complete alternative analysis and acquisition strategy
- Process analysis and requirements definition
- Establish ICM development and integration environment
- Establish ICM testing environment

**ICE Program Management Office to Ensure Program Adherence to Planned Cost, Schedule and Performance:** HECS will fund a contractor program management office (PMO) to ensure sound program planning, proper use of appropriated funds, and delivery of stated results within planned cost and schedule. The PMO will maintain and update program plans in adherence with DHS Enterprise Architecture, DHS investment review requirements and the capital planning and investment control review requirements established by the Office of Management and Budget, including Circular A-11, part 7. The PMO will also provide rigorous financial and acquisition management, reporting and oversight to ensure compliance with the rules, requirements, guidelines, and systems acquisition management practices of the Federal Government. Finally, a portion of PMO funds will be set aside to contribute to a single independent verification and validation (IV&V) agent for all Automation Modernization activities. The IV&V agent will ensure that each program adheres to stated plans and policies, that programs do not duplicate effort, and that program plans align with a coherent, unified strategy for improving information technology support of the ICE mission.

## **Justification**

A new case management system is required because the current case management system, TECS which is a 20-year old mainframe system, is in the process of being decommissioned due to increased operational costs and concerns with the ability to reconstitute the existing data center environment. Currently, there are over 4,000 OI users opening investigation cases everyday involving crimes, administrative violations, and employee conduct, and greater than 12,000 users within DHS. Because of the age and composition of DHS, many of these users operate and maintain their cases on pre-DHS legacy systems.

In many cases, these systems are text based and cannot manage electronic media formats, such as biometrics, surveillance videos, photographs, scanned document images, and audio - many of the things investigators use in their jobs today. This creates increased operational costs for the department due to the need to hire support contractor personnel that are capable of maintaining and patching these multiple platforms. This in turn leads to inconsistencies in data due to those multiple systems and lack of an underlying data model.

In anticipation of retiring the 20-year old TECS system, CBP has begun migrating pieces of TECS to newer more advanced platforms, leaving the Case Management module to ICE. By FY 2010, CBP plans to migrate their pieces of TECS off the mainframe, and the cost to ICE will increase exponentially. In FY 2007, CBP started planning the migration – two pieces owned by CBP Screening and SEACATS, a system for seized property and evidence tracking and liquidation, meaning that ICE would expend approximately \$10 million via transfer to CBP for current services. In FY 2009/2010, CBP plans to finish development, thus ICE would be expected to pay \$20 million for cumulative O&M plus the expected additional burdens. Without the investment in HECS, it is estimated that by FY 2011, after the CBP migrates off TECS, leaving Case Management as the only application left, the impact to ICE could swell to \$45 million to account for the additional burden of maintaining the whole mainframe for Case Management.

## **Impact on Performance (Relationship of Increase to Strategic Goals)**

This program directly supports accomplishment of DHS Strategic Objective 5.1 Strengthen and Unify DHS Operations and Management. HECS will develop productive information sharing relationships within the Department; and with other federal agencies, State, local and tribal governments, international partners, the private sector, and the American public which will optimize interdependencies and strengthen interrelationships. HECS will provide appropriate incentives for non-federal entities to increase information sharing with the Federal Government, consistent with privacy and security policies.

HECS supports ICE's Objective 5.3 – Produce and share timely, accurate, secure, and relevant information. ICE will identify and implement new technologies to address gaps in its current ability to produce and share timely, accurate, relevant, and secure information.

An investment in HECS will increase ICE's ability to share data with law enforcement partners in all arenas (Federal, State, Local, and Tribal) thus allowing effective participation in the Information Sharing Environment (ISE) and supporting our ability and obligation to share within the ISE. The

impact of successful implementation of HECS will enable other law enforcement agencies to better accomplish their missions by providing a real-time data repository and a powerful analysis and decision support tool.

| <b>Total Request</b>   | <b>7</b>       | <b>7</b> | <b>\$56,433</b> | <b>7</b>        | <b>7</b> | <b>15,000</b>   | <b>7</b>        | <b>7</b> | <b>\$13,000</b> |

**Description of Item**

In FY 2008, Atlas plans to obligate \$15.0 million and the remaining \$26.7 million of non-expiring funds from prior years. Therefore, Atlas requires provision of this FY 2009 funding request to continue its planned modernization of outdated ICE IT infrastructure. Atlas activities aim to accomplish the following:

- (1) improve information-sharing across the DHS and ICE organizations;
- (2) strengthen information availability;
- (3) provide a fully secure IT environment;
- (4) improve workforce productivity; and
- (5) migrate ICE infrastructure to the DHSOne Network.

Realization of these program goals will directly improve the quality, speed and extent to which ICE can enforce trade and immigration laws, control our borders, prevent terrorist acts, and respond to national emergencies.

**Non-Personnel Costs**

To continue execution of Atlas plans for ICE IT infrastructure modernization in alignment with program goals, Atlas requests \$13 million in FY 2009 to:

- Integrate ICE data and share ICE data with other enforcement agencies by continuing a multi-year investment in an ICE enterprise data warehouse;
- Enhance network security to better prevent, detect and act upon security breaches by implementing network security vulnerability scanning tools;

- Continue sound program management and oversight by funding seven existing government personnel;
- Support planning, reporting and management of cost, schedule and performance by funding a contractor program management office; and
- Conduct Independent Verification and Validation of program activities

## **Justification**

**Integrate ICE Data and Share ICE Data with Other Enforcement Agencies:** Atlas requires \$4.9 million to continue a multi-year investment in an ICE enterprise data warehouse. This investment focuses on delivering the best data on a given subject in clear, integrated reports derived from the many systems supporting execution of the ICE mission. Once complete, the data warehouse will allow ICE to quickly create and deliver high quality reports to ICE personnel or external law enforcement partners. Without this investment, ICE must continue assembling reports from the often-disjointed output of different systems. Perpetuating this process will lead to lost time that could otherwise be spent furthering the ICE enforcement mission; will lead to incomplete report content since not every individual knows the best data sources for every subject; and will exacerbate missed connections between data held in different systems. Inadequate reporting capabilities directly impact the quality, speed and extent to which ICE can investigate violations of law, prevent acts of terrorism, and remove detained aliens.

**Enhance Network Security to Better Prevent, Detect and Act upon Security Breaches:** Atlas requires \$2.8 million to implement automated network security vulnerability scanning tools. These tools will quickly identify security gaps in those systems. As a result, ICE will have the ability to take preventative actions and quickly respond to security breaches before they jeopardize ICE operations. Without these tools, security breaches are less likely to be prevented, detected or responded to in a timely manner, jeopardizing the integrity and privacy of sensitive ICE information.

**Continue Sound Government Program Management, Oversight:** Atlas requires \$1.4 million to fund seven existing government personnel to plan future program activities, ensure external stakeholder involvement and ensure program adherence to cost, schedule and performance goals.

**Ensure Program Planning and Reporting:** Atlas requires \$3.3 million to fund a contractor program management office (PMO) to ensure sound program planning, proper use of appropriated funds, and delivery of stated results within planned cost and schedule. The PMO will maintain and update program plans in adherence with DHS Enterprise Architecture, DHS investment review requirements and the capital planning and investment control review requirements established by the Office of Management and Budget, including Circular A-11, part 7. The PMO will also provide rigorous financial and acquisition management, reporting and oversight to ensure compliance with the rules, requirements, guidelines, and systems acquisition management practices of the Federal Government.

**Conduct Independent Verification and Validation of Program Activities:** Atlas requires \$0.6 million to contribute to a single independent verification and validation (IV&V) agent for all Automation Modernization activities. The IV&V agent will ensure that each program adheres

to stated plans and policies; that programs do not duplicate effort; and that program plans align with a coherent, unified strategy for improving information technology support of the ICE mission. The IV&V agent will also monitor program activities to identify strengths and weaknesses and recommend actions for continuous program improvement.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

One of Secretary Chertoff's top priorities focuses on the ability of DHS to share mission information with federal, state, local, and tribal homeland security partners. Atlas activities planned in FY 2009 directly address ICE IT infrastructure gaps hindering the sharing, management, analysis, security and privacy of mission information. In addition, Atlas activities planned in FY 2009 address infrastructure deficiencies that must be corrected before other Automation Modernization programs can fully deploy planned capabilities.

By the start of FY 2009, the program will have exhausted all prior year funding and will cease executing on the ICE IT modernization strategy until additional funding is provided. Without support for core infrastructure investments under Atlas, gaps in information technology capabilities will continue to hinder the ability of ICE to meet its mission obligations under DHS Strategic Objective 5.1: Strengthen and Unify DHS Operations and Management and ICE's Objective 5.3 – Produce and share timely, accurate, secure, and relevant information.

Description of Item

On January 3, 2007, Secretary Chertoff stated, "The 9/11 Commission identified interoperable communications as a major challenge" and, "the willingness of emergency response leaders and local officials to make this issue their priority is what will continue to drive progress on one of 9/11's most important lessons." This request of \$10.0 million will enable the front line law enforcement personnel within ICE to begin to meet the challenge set forth by the 9/11 Commission.

**Non-Personnel Costs**

Atlas requests \$10 million to initiate modernization efforts toward secure, interoperable ICE wireless communications aligned with DHS plans for a single, integrated wireless network and:

- Improve communications during disasters, emergencies, and crises by making secure, interoperable emergency response tactical communications kits available for nationwide rapid deployment;
- Support special operations, surveillance and task forces by making secure, interoperable communications vans available for nationwide rapid deployment; and
- Improve officer safety, operational security and combined operations effectiveness by deploying secure, interoperable tactical communications systems (to include upgraded infrastructure, hand-held radios and vehicle radios) in 1 of 17 ICE regions remaining on legacy systems.

## **Justification**

Since the formation of DHS, there has been no significant investment into ICE tactical communications systems. As a result, ICE agents and officers are still employing several different radio versions and communications networks inherited during the formation of ICE from multiple federal agencies. Continued reliance on these legacy networks often leaves ICE personnel unable to communicate between themselves, much less other federal, state, local, and tribal law enforcement, public safety, and first responder partners. In many instances, legacy networks also contain inadequate coverage areas to meet expanding ICE operational responsibilities.

With respect to operational security, legacy networks do not meet the Advanced Encryption Standard (AES) for secure, digitally encrypted wireless communications. This leaves ICE communications extremely vulnerable to intercept, compromise, and spoofing, which jeopardizes officer safety and prevents ICE from effectively conducting classified national security operations.

Finally, DHS and several other ICE law enforcement partners have initiated efforts to create an integrated, DHS-wide tactical communications network that is fully interoperable with partner communication networks. This funding request represents the start of ICE's contribution toward ongoing joint modernization efforts that aim to share sites, systems, and/or capabilities. Joint efforts reduce infrastructure redundancy, offer economies of scale, reduce overall cost for all participants and prevent further isolation of ICE agents and officers as law enforcement partners move off of legacy shared systems.

Without this investment, front line ICE law enforcement personnel will continue to use legacy communications networks that do not meet the challenge set forth by the 9/11 Commission. As a result, ICE will suffer the following detriments on daily operations and its overall mission:

- Grave threat to officer safety and operational security during routine field operations and emergency response situations;
- Further isolation of ICE personnel during field operations as partners move off shared legacy systems;
- Significant threat to effective ICE participation in classified or combined national security operations; and
- Unexpected communications outages as some current equipment becomes so old that it is no longer serviced or repairable by the manufacturer.

These gaps in basic ICE operational and national emergency response communications capabilities, four years after the creation of the Department of Homeland Security, are not acceptable.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

Tactical communications equipment and systems are used daily by ICE agents and officers to conduct operations that fulfill DHS' Strategic Objective 5.1 Strengthen and Unify DHS Operations and Management and ICE's Objective 5.3 - Produce and share timely, accurate, secure, and relevant information. The tactical communications systems currently employed by ICE agents and officers are not integrated and they do not meet current standards for voice security and interoperability. By participating in joint efforts to modernize DHS and national law enforcement tactical communications networks, ICE will not just improve the safety and effectiveness of its own personnel, but will also be able to better coordinate and support law enforcement partners during combined operations. In addition, ICE, DHS and other partners will be able to share long-term cost savings through efficient spectrum usage, enhanced reliability/maintainability, shared operational costs, and more favorable quantity pricing.

Because tactical communications systems are the daily lifelines for ICE agents and officers that serve on the frontlines of the homeland, failure to upgrade, replace, and modernize these systems represents a grave threat to officer safety, operational security, and overall enforcement effectiveness. Adding ICE as an active participant to joint modernization efforts extends benefits in safety, security and cost efficiency among ICE and its law enforcement partners.

Description of Item

The Office of Detention and Removal Operations Modernization (DROM) Program was established to support the systems upgrades and improvements of DRO business processes for the detention and removal of illegal aliens from the United States. The necessity of this program became clear as a result of the Departments focus on securing the border through the Secure Border Initiative (SBI), which is a comprehensive multi-year plan to secure America’s borders and reduce illegal migration. As noted by DHS Secretary Michael Chertoff, the overall vision for the SBI includes the requirement to “... expand detention and removal capabilities to eliminate ‘catch and release’ once and for all...” As a result, DHS began the transition from “catch and release” to “catch and remove” border enforcement.

In response to DHS requirements and focus, DROM provides the means to meet the mission needs of DRO and meet the SBI requirements. The DROM program mission is therefore stated in terms effecting improvements in the following targeted areas:

- (a) **real-time dynamic reporting on statistics and metrics** for events from apprehension through the detention and removal process;
- (b) **detainee management**, to include the ability to identify the status of an individual alien’s case from apprehension to removal;
- (c) **management of detention beds and detainees** to improve the ability to track, count and manage detainees, including a system that stores all alien’s data for providing DRO personnel with necessary information to expedite the removal process;
- (d) **bed-space availability management system** that can provide real-time visibility into the availability of beds by location, by relative likelihood of availability, and by alien

characteristic or classification, and to explore the capability of any potential system to make reservations and cancellations; and

(e) **transportation management** for scheduling and routing detainees for detention and removal to improve fleet management and coordination of transportation events and needs.

### **Non-Personnel Costs**

DROM requests \$11.3 million in FY 2009 to support modernization efforts in the areas of real-time dynamic data reporting, case management, management of detention beds and tracking detainees, bed-space availability management system, and transportation management for detention and removals:

- Implement Bed Space and Transportation (BS&T) Management System - Detainee Location Tracking (DLT) Module v1;
- Enable DROM Data Sharing Project and procure services;
- Expand Electronic Travel Documents (eTD) to additional foreign consulates; and
- Establish a Program Management Office to provide oversight, sound program management and integrate IV&V activities within DRO modernization efforts.

### **Justification**

**Bed Space and Transportation (BS&T) Management System - Detainee Location Tracking (DLT) Module v1:** DROM requests \$6.0M to increase the efficiency and capacity of the detention and removal system and develop an optimized detention space and logistics systems to optimize the efficient use of bed space and support removal operations. DRO will be able to begin implementation of the first of three modules in the DRO Bed Space and Transportation (BS&T) Management System – the Detainee Location Tracking (DLT) Module. In this version of the DLT solution, DRO will implement biometric finger scanning with a combination of fixed and mobile devices. Fixed biometric scanners will record detainees as they enter or exit key facility sally ports and key locations within major DRO detention facilities. DRO personnel will use secure, wireless, GPS-capable mobile fingerprint scanners to capture key events, verify the detainee’s identity, and update central status tracking databases. Key to the overall Bed Space and Transportation Management system, the DLT module provides the automation capability for DRO to better validate and maintain person-centric detainee data; track alien movement in/out of facilities to meet situational awareness needs; provide detainee identification and deportation status; and automatically close cases allowing accurate detainee-to-bed data when reporting bed availability and removal statistics.

**Data Sharing:** DROM requests \$2.0M to address one of the top SBI goals - Ensure that border security information and intelligence is shared among stakeholders. The DROM Data Sharing project provides a comprehensive integrated information technology system that provides operational and managerial data to support all levels of DRO activities. The data warehouse service provides the DROM major applications an integrated system that collects and disseminates intelligence data and trends on a real-time basis. It is a major component that enables DRO to support the Department’s goal for ensuring border security information and intelligence is shared among stakeholders.

DRO will procure the ICE data warehouse services of the ICE Integrated Decision Support Services (IIDS) to expand data capacity and reporting capability of the DRO enhancements (e.g., EARM, BS&T-DLT) and new data sources. A key feature will be report-generating tools that give users the ability to generate custom reports as well as standardized reports.

The ICE baseline warehouse will be expanded to provide full support for business performance management (BPM). BPM will enable DRO the ability to define, measure, monitor, and manage its operational and financial performance against strategic goals.

**Electronic Travel Documents (eTD):** DROM requests \$0.8M to implement the Electronic Travel Documents (eTD) system, which will address the Department's objective to increase removal efficiency and effectiveness of the entire removal process and significantly reduce the time to prepare and process the travel documents necessary for the removal of aliens from the country. The eTD project provides DRO the system to reduce the time preparing and copying documents for travel document approval, saving deportation officers a significant amount of time when collecting information for DRO Headquarter data calls. Since travel documents can be filed electronically via eTD, alien removals can be significantly improved, saving detention costs. The requested funding will allow the Electronic Travel Documents system (eTD) to expand to additional "participating" foreign consulates. It will also be expanded enterprise-wide giving all DRO agents the capability of generating and transmitting electronic travel documents for removals to "non-participating" countries (those countries who have not signed a MOU to use eTD for issuing electronic travel documents).

**Ensure Program Adherence to Planned Cost, Schedule and Performance:** DROM requires \$2.5 million to fund a contractor program management office (PMO) to ensure sound program planning, proper use of appropriated funds, and delivery of stated results within planned cost and schedule. The PMO will maintain and update program plans in adherence with DHS Enterprise Architecture, DHS investment review requirements and the capital planning and investment control review requirements established by the Office of Management and Budget, including Circular A-11, part 7. The PMO will also provide rigorous financial and acquisition management, reporting and oversight to ensure compliance with the rules, requirements, guidelines, and systems acquisition management practices of the Federal Government. Finally, a portion of PMO funds will be set aside to contribute to a single independent verification and validation (IV&V) agent for all Automation Modernization activities. The IV&V agent will ensure that each program adheres to stated plans and policies; that programs do not duplicate effort; and that program plans align with a coherent, unified strategy for improving information technology support of the ICE mission.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

DROM directly supports DHS' Strategic Objective 5.1 - Strengthen and Unify DHS Operations and Management and ICE's Objective 5.3 - Produce and share timely, accurate, secure, and relevant information. By funding this initiative, ICE will be able to realize the following benefits that are aligned in meeting DHS and ICE's Objectives:

- Enhance user communication and collaboration; minimize detention stay of detainees by allowing consulate information sharing;
- Positively identify and track detainees from remote locations;
- Improve officer safety and enhance mission effectiveness;
- Provide access to meaningful, accurate, and timely investigative data; and
- Provide system scalability and ability to match evolving requirements.

Description of Item

ICE requests a total of \$7 million to support ICE’s migration to the new Department of Homeland Security’s Financial System referred to as the Transformation and Systems Consolidation (TASC) Baseline. During the transition, ICE will be required to operate and maintain its existing financial system in parallel with the TASC Baseline until full migration and data conversion has been accomplished. With the support of the Congress, ICE has made tremendous progress in Financial Management. These requested resources will help ICE sustain and repeat this progress as ICE prepares to migrate to the TASC Baseline.

**Personnel Costs (\$0.187M)**

- 1 IT Program Management Specialist
- 1 IT Specialist

**Non-Personnel Costs (\$6.823M)**

- Detailed requirements, GAP analysis, design, development, testing and integration services
- Software licenses/hardware purchases

Justification

ICE continues to partner with the DHS Chief Financial Office, our current customer base and the other DHS components associated with the TASC effort to implement the Congressional direction to consolidate the number of financial systems in DHS while continuing to improve financial service.

The requested funds will be used to provide management and technical activities associated with the new financial system and sustain the current Federal Financial Management System until the new TASC Baseline is available for ICE. This request includes detailed requirements gathering, conducting a gap analysis, preparing a process flow document, software development and modification, testing, helpdesk, operations and maintenance for the system, change management and functional support. It will include:

- Incorporating any ICE unique procurement, financial and asset management technical and business process requirements into the integrated solution. ICE's current configuration of PRISM, E-Travel, Document Imaging and Sunflower systems will require specific gap analyses for each of the current requirements to the migration to the proposed solution;
- Ensuring ICE reporting requirements are properly identified, developed and tested. ICE's existing inventory of reports encompasses requirements at the analyst, program, agency wide and CFO and Congressional level. Verifying and validating that we will be able to maintain and improve the existing level of reporting capabilities will require extensive analysis and programming capabilities;
- Identifying and planning for the elimination of manual processes and controls no longer necessary as a result of the delivery of the TASC baseline. An impact analysis based on the successful migration of current customers to TASC baseline and proposed system and process enhancements will need to be conducted to determine the impact on current ICE systems, processes and workforce; and
- Leveraging the investment and lessons learned through current TASC effort to insure that the ICE migration can build upon the lessons learned and experiences of the previous efforts to fill the remaining gaps. Data conversion and clean-up prior to migration will be necessary to prepare for ICE's migration.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

This program directly supports accomplishment of DHS Strategic Objective 5.1 Strengthen and Unify DHS Operations and Management and ICE's Objective 5.3 - Produce and share timely, accurate, secure, and relevant information. The successful coordination and implementation of the TASC baseline in ICE will support the DHS Goals in the following areas:

- Gaining greater visibility into DHS' financial activities through timely, accurate, and useful financial-related data;
- Improving systems and processes that can be validated through a clean audit opinion;
- Providing reasonable assurance about internal controls over financial reporting, and;
- Providing efficient financial management services.

### PPA Mission Statement

In FY 2009, ICE has included several information technology (IT) transformational initiatives into the Automation Modernization program: ICE's Homeland Enforcement Communication System (HECS), Atlas Program – Infrastructure and Tactical Communications, Detention and Removals Operations (DRO) Modernization program, and the replacement of ICE's Financial System.

The Automation Modernization program will allow ICE to improve information sharing across the Department of Homeland Security (DHS) and ICE organizations, strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | <b>\$920</b>            | <b>\$655</b>            | <b>\$1,696</b>          | <b>\$1,041</b>                 |

Salaries and Benefits include costs of 14 FTEs (7 new in FY2009) to provide management and oversight for Automation Modernization programs. A \$1,041,000 increase is requested for 7 additional positions required to manage the increased number of programs funded through Automation Modernization.

|               | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | <b>\$4</b>              | <b>\$0</b>              | <b>\$15</b>             | <b>\$15</b>                    |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2009 request includes a \$15,000 increase to facilitate on-site technical support for installation and maintenance of new systems.

|  | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|--|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Communication, Utilities, and miscellaneous charges</b> | <b>\$0</b>              | <b>\$0</b>              | <b>\$108</b>            | <b>\$108</b>                   |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Includes Blackberry/pager/cellular phone/land line service. The FY 2009 request includes a \$108,000 increase to fund the costs of these services and this equipment

|   | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Advisory and Assistance Services</b> | <b>\$17,778</b>         | <b>\$14,399</b>         | <b>\$20,451</b>         | <b>\$6,052</b>                 |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign government, State and local government, tribes, etc.) as well as from other units within the Federal Government. A \$6,052,000 increase is requested to support new Automation Modernization initiatives.

|                       | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------------|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Other Services</b> | <b>\$300</b>            | <b>\$0</b>              | <b>\$110</b>            | <b>\$110</b>                   |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. For Automation Modernization costs associated with payroll, recruitment, human resource services, background investigations, and permanent change of station (if required) are included. A \$110,000 increase is requested to support 7 added positions.

|  | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|--|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Purchase from Government Accounts</b> | <b>\$360</b>            | <b>\$1,992</b>          | <b>\$31</b>             | <b>(\$1,961)</b>               |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. For Atlas, costs are associated with career development training for 35 FTE. The FY 2009 request includes a decrease of \$1,961,000.

|---|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Operation &amp; Maintenance of equipment</b> | <b>\$560</b>            | <b>\$2,000</b>          | <b>\$27</b>             | <b>(\$1,973)</b>               |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2009 request includes a decrease of \$1,973,000.

|                                 | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Supplies &amp; materials</b> | <b>\$11</b>             | <b>\$0</b>              | <b>\$13</b>             | <b>\$13</b>                    |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2009 request includes a \$13,000 increase.

|                  | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Equipment</b> | <b>\$36,500</b>         | <b>\$11,654</b>         | <b>\$34,549</b>         | <b>\$22,895</b>                |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. For Automation Modernization programs, costs are primarily associated with updated application hardware environments, off-the-shelf software licenses upon which to run modernized ICE applications, customized software to enhance existing ICE applications, and tactical communications equipment (including radios, infrastructure such as repeaters, fly-away communication kits and mobile law enforcement communications vans). The \$22,895,000 increase is requested to support the increased number of programs funded through Automation Modernization.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Immigration and Customs Enforcement** **Construction**

### **I. Appropriation Overview**

#### **A. Mission Statement for Construction:**

The Construction Program provides housing, processing, medical, administrative, and support facilities needed to assist and meet the needs of Detention and Removal activities. The Construction account funds are available until expended.

#### **B. Budget Activities:**

The ICE Construction Program has the authority to plan, design, and construct housing, processing, medical, administrative, and support facilities not consistent with privatization to support the detention of aliens, as well as perform repair and alteration of existing structures.

#### **C. Budget Request Summary:**

ICE requests no additional funding for FY 2009. ICE will use carry-forward resources to perform necessary repairs of facilities and to make other expenditures.

**II-A. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)**

ICE requests no new funding for this activity.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

ICE relies on a mix of Service Processing Centers (SPCs) that it owns and operates, as well as more than 40 Inter-governmental Service Agreement facilities owned by State and local governments and contractor-owned and operated facilities to house individuals who have entered the United States illegally and are undergoing adjudication. At present, approximately 84 percent of the detainee population is housed at contractor or state or local government-owned and operated facilities, with the remaining 16 percent housed at eight ICE-owned SPCs. The eight SPCs are located in: Aguadilla, Puerto Rico; El Centro, California; San Pedro, California; Port Isabel, Texas; Batavia, New York; Florence, Arizona; El Paso, Texas; and Krome, Florida.

The number of illegal alien detainees held in the DHS/ICE system has risen significantly in recent years, with a corresponding increase in the cost for housing and serving this population. Projections show this population continuing to grow for the foreseeable future, further burdening the ICE-owned and operated SPC facilities.

For this reason, ICE initiated a three-phased study to determine if some level of privatization of detention facilities would be cost-effective for ICE. Phase I of this study consisted of a review of physical conditions and market values of the SPCs, development of a cost model, and development of strategic options along a spectrum from status quo to full privatization. Phase I was completed in March 2007. The results of Phase I indicated that a privatization option (either ICE-owned/contractor-operated or contractor-owned/contractor-operated) showed sufficient promise in order to warrant proceeding with Phase II of the study. Phase II of the study was begun in July 2007, with a projected completion date of March 2008. Phase II has continued and expanded the analysis begun in Phase I,

and will be addressing specific privatization issues, high level cost and benefits, and transition requirements on an individual facility basis. Congress will be provided a report of the results of Phase II once it is completed.

In FY 2007:

- ICE received \$30 million in Construction supplemental funding, which was used for a system-wide security upgrade, utility upgrades and other pressing repair and alteration projects. The security upgrade is currently in the planning stage and the contract for the water distribution system is in final negotiations with the local water district in Port Isabel.
- ICE completed a systemic assessment of the physical condition of all of the SPCs. This assessment identified facilities and systems in need of repair or replacement, as well as structures deemed beyond repair. This information will be used to guide future repair work should the SPCs be privatized or not.

In FY 2008, ICE will use the \$16.5 million Construction Program funding for alteration and repairs to existing ICE-owned SPCs based on priorities identified in the facility assessment completed in FY 2007. The assessment identifies electrical, mechanical, roof replacements, etc.

In FY 2009, ICE will use any available carry-forward funding to maintain ICE-owned facilities.

## **G. Capital Investment and Construction Initiative Listing**

### **U.S. Immigration and Customs Enforcement Construction**

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 and other immigration statutes authorize ICE to detain illegal aliens who are charged with immigration violations, have entered the United States illegally, or have been ordered to leave the country. These aliens can be detained while their immigration proceedings are administered, which in turn facilitates their proper and expedient removal from the country. ICE's Office of Detention and Removal (DRO) administers a national detention program that uses funding appropriated specifically for the care of these aliens and includes the transportation, housing, subsistence, medical care, and guard service necessary to provide safe and humane environments for the detainee population and detention staff. The responsibility begins when a detainee enters DRO custody and continues until the alien can be released into the community or removed from the United States.

The ICE Construction Program provides housing, processing, medical, administrative, and support facilities needed to support the detention of aliens. These expansion projects are part of an ongoing capital investment program that is intended to meet the growing national demand for detention capacity. ICE continues to address the need for bed space and support facilities required to handle the processing and removal of aliens during immigration proceedings, relative to the total number of potentially removable aliens in the country.

In FY 2009, zero dollars are requested in support of the Construction Program. Carry-forward funds will be used for maintenance of existing ICE-owned SPCs.

#### **Facility Repair & Alterations**

##### **1. Project Description, Justification, and Scope**

Repair and alteration projects are continually identified at existing ICE owned facilities. These projects are not capital construction projects, but are repair and alteration projects necessary to maintain government owned facilities and ensure they comply with life safety requirements and code compliance.

##### **2. Significant Changes**

In FY 2009, carryover funds within the no-year Construction account will be used for emergency repairs and alterations. There are no new planned construction projects planned for FY 2009, as reflected in the table below.

### 3. Project Schedule

|                        | <b>Work Initiated</b> | <b>Work Completed</b> | <b>Physical Start</b> | <b>Physical Complete</b> | <b>Total Estimated Cost (000)</b> | <b>Total Project Cost (000)</b> |
|------------------------|-----------------------|-----------------------|-----------------------|--------------------------|-----------------------------------|---------------------------------|
| FY 2009 Budget Request | -                     | -                     | 10/01/2008            | 9/30/2009                | 0                                 | 0                               |

### 4. Schedule of Project Funding

|   | Dollars in Thousands |                |                |                |              |
|---|----------------------|----------------|----------------|----------------|--------------|
|   | <b>Prior</b>         | <b>FY 2007</b> | <b>FY 2008</b> | <b>FY 2009</b> | <b>Total</b> |
| <b>Obligation (actual and planned)</b>  | \$6,541              | \$5,872        | \$16,500       | \$0            | \$28,913     |
| <b>Expenditure (actual and planned)</b> | \$6,541              | \$5,872        | \$16,500       | \$0            | \$28,913     |

Repair and alteration projects are not capital construction projects and are not illustrated in the same manner as capital construction projects. Breakdown of projects related to expenditures is modified to reflect segments of repair and alteration.

### 5. Method of Performance

All detention-related projects are currently planned, managed, and monitored through an interagency service agreement with U.S. Customs and Border Protection (CBP). CBP, in turn, contracts with the United States Army Corps of Engineers (USACE) to provide for environmental documentation, planning, design, construction, procurement, and management of services to include construction design, planning, and project management. In the coming year, ICE will explore ways to improve the effectiveness and efficiency of its detention facilities program, including the potential for moving some of the work now performed by CBP in-house.

### 6. Budget Allocation to Programs

|                       | Allocated Budget (Thousands) |
|-----------------------|------------------------------|
| <b><u>Program</u></b> | <b>FY 2009</b>               |
| Construction          | \$0                          |
| <b>Total</b>          | <b>\$0</b>                   |

## **7. Compliance with Applicable Public Laws, Regulations, Standards and Executive Orders**

The United States Army Corps of Engineers (USACE) is responsible for the compliance of all applicable laws, code compliance, regulations and standards for all ICE projects. The services being provided by USACE are managed and monitored by CBP. A service level agreement between ICE and CBP outlines the roles and responsibilities of both ICE and CBP in accomplishing the execution of all capital construction and repair and alteration projects at ICE facilities.

ICE projects must comply with the following life-safety codes and standards:

- Local building codes or the latest edition of one of the model building codes, including Uniform Building Code (UBC); Building Officials & Code Administrators International (BOCA); Standard Building Code (SBC); and International Building Code 2000 (IBC)
- National Fire Protection Association (NFPA) Standard 101 Life Safety Code
- National Electric Code

ICE Facilities must also comply with the ICE Detention Design Guidelines (2002 edition), and the ICE Detention Construction Guidelines (2004 edition).

Handicapped accessibility codes and standards apply to ICE facilities as follows:

- Facilities must comply with the Uniform Federal Accessibility Standards, Federal Standard 795
- Facilities should comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG)

### PPA Mission Statement

The Construction account funds are available until expended. The Construction account uses its resources to plan, construct, renovate, equip, and maintain buildings and facilities necessary for the administration and enforcement of customs and immigration laws.

### Summary Justification and Explanation of Changes

|                              | 2007<br>Actual | 2008<br>Request | 2009<br>Request | 2008 to 2009<br>Change |
|------------------------------|----------------|-----------------|-----------------|------------------------|
| <b>Salaries and Benefits</b> | \$14           | \$1,553         | \$0             | (\$1,553)              |

Salaries and Benefits includes costs for 9 FTEs. The FY 2009 request includes a decrease of \$1,553,000 in personnel compensation.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U.S. Immigration and Customs Enforcement Federal Protective Service

### **I. Appropriation Overview**

#### **A. Mission Statement for FPS Offsetting Collections:**

The Federal Protective Service (FPS) is the Federal law enforcement authority responsible for the protection and security of Federally-owned and -leased and all General Services Administration (GSA) buildings, property, and personnel. FPS operations focus on law enforcement and reduction of Federal facility vulnerabilities to criminal and terrorist threats, while ensuring that public facilities are safe, secure, and available as a vital part of every day American life. FPS is a standard-setting and compliance-centered operation, focused on the protection of Federal property contained in Title 40 USC 1315 and under the authorities of the sector-specific agency for the National Infrastructure Protection Plan (NIPP). FPS employs approximately 1,100 Law Enforcement Officers and civilian employees and the services of 15,000 contract security guards strategically located throughout the Nation to provide security and law enforcement coverage to facilities in its purview.

#### **B. Budget Activities:**

**Basic Security** - The basic security rate covers various types of security services, such as law enforcement on Federally-controlled property, preliminary investigations of incidents, and capture and detention of suspects. This rate also includes the monitoring of 24-hour security alarms, providing nationwide dispatch services, conducting building security assessments, and sharing of current intelligence on domestic and foreign terrorist threats. The rate will be \$0.58 per square foot in FY 2009.

**Building Specific Security** - Building Specific Security is based on security countermeasure requirements specific to a particular building. The two components are the Contract Security Guard and Security Systems programs. The Contract Security Guard program includes access control to facility entrances and exits, employee and visitor identification checks, monitoring security equipment, and roving patrols of the interior and exterior of Federal facilities. The Security Systems program includes the purchase, installation, and maintenance of security equipment, such as cameras, alarms, magnetometers, and x-ray machines. Security equipment is based on identified projects in security surveys and standard replacement schedules.

#### **C. Budget Request Summary:**

ICE requests 950 positions, 950 FTE, and the authority to spend its fees, estimated at \$616,000,000, for FY 2009. This request represents an anticipated \$3,000,000 increase in fees collected. The FY 2009 budget request does not reflect the increased staffing levels required in the FY 2008 Omnibus Appropriations bill. The bill passed too late in the budget process to institute the necessary fee increases, and the Department intends to seek repeal of the minimum staffing level provision.

## II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)

U.S. Immigration and Customs Enforcement requests the authority to spend the offsetting collections for this authority, estimated at \$616 million.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Federal Protective Service (FPS) is the Federal law enforcement organization responsible for the protection and security of Federal buildings, property, and personnel across the Nation. FPS operations focus on the reduction of Federal facility vulnerabilities to criminal and terrorist threats, while ensuring that public facilities are safe, secure and remain available as a vital part of every day American life.

In FY 2008, FPS continues to realign its mission, workforce, and resources to strengthen Federal physical security policies, procedures, and standards that apply to Federal buildings and enhance oversight and inspection capabilities. FPS has evolved into a standards-setting and compliance-centered operation, focused on the protection of Federal property contained in Title 40 USC 1315 and under the authorities of the sector-specific agency for the National Infrastructure Protection Plan (NIPP). The focus is more on policy, standards, and oversight, relying on the work of FPS Inspectors. FPS now has three main focus areas. These include security policy and standards; building assessments; and monitoring agency compliance with security standards.

The basic security program currently covers various types of security services such as: responding to emergency calls; coordination of Occupant Emergency Plans; consultations with Building Security Committees on security countermeasures; building threat assessments; and the development of action plans to reduce threats and criminal investigations through the dissemination of current intelligence on domestic and foreign terrorist threats. Additionally, the basic security program includes the FPS day-to-day operational expenses, including rent, information technology, and general overhead costs. In FY 2008 and FY 2009, the new basic security initiatives include providing law enforcement and

security services at national security events that pose increased threats at or in the vicinity of Federal facilities. Such events include the Democratic National Convention, the Republican National Convention, the Inauguration, Presidential Transition, demonstrations, and protests.

The FY 2009 request provides for an increase of \$3 million (or \$0.01 per square foot increase to the basic security fee) to fund the FPS overhead costs. FPS will continue to implement and maintain its new billing system that will enable client agencies to include these charges and reduce the use of individual reimbursable agreements to obtain these services.

The building specific fee is charged to all building tenants based on the recurring security requirements specific to a particular building, and is based on the costs for contract security guards and security systems programs. The contract security guard program includes: (1) access control to facility entrances and exits; (2) employee and visitor identification checks; (3) monitoring security equipment; and (4) roving patrols of the interior and exterior of Federal facilities. The contract security guard represents the first line of defense against potential criminals and terrorists of Federal workplaces. The security system program includes the purchase, installation, and maintenance of security equipment, (cameras, alarms, magnetometers and x-ray machines). The security equipment is based on the identified mandatory projects in the security surveys and standard replacement schedules.

The FPS strategic goal continues to be the protection of Federal facilities and employees through a comprehensive law enforcement and security program. FPS security operations include regular building security assessments of Federal facilities, nationwide communications, alarm monitoring, and dispatching services, and administration of contract guards within Federal facilities.

Following September 11, 2001, FPS has faced the new reality of protecting and securing Federal facilities by continuously improving its ability to respond to new and changing threats. Through various FPS programs, Federal facilities remain protected, yet open and welcoming to legitimate visitors, and secure for all Federal employees and officials to perform their missions in service to the American public.

In FY 2007, FPS:

- Provided significant and appropriate law enforcement and security services for the approximately 9,000 facilities to accommodate the FPS mission;
- Monitored alarm accounts daily for intrusion detection, fire, and personnel protection;
- Received and responded to alarm activations, incidents on Federal property, weapons and explosives incident, demonstrations and disturbance incidents, accident-related incidents, and any fire-related incidents;
- Served as the Federal lead for the Government Facilities Sector under the National Infrastructure Protection Plan (NIPP), directly supporting DHS overall goals and objectives with regard to enhancing the protection of our Nation's critical infrastructures and key resources; and
- Realigned its mission, workforce and resources to strengthen Federal physical security policies, procedures and standards that apply to Federal buildings and enhance oversight and inspection capabilities.

In FY 2008, FPS plans to:

- Improve the strategic methods used in identifying and reducing real and/or perceived threats faced by customers;
- Continue intelligence and information sharing with organizations as appropriate, to include other DHS agencies, state and local law enforcement, and building management;
- Provide law enforcement and security services at national security events that pose increased threats at or in the vicinity of Federal facilities, including the Democratic National Convention, the Republican National Convention, and related demonstrations and protests; and
- Strengthen security standards representing the key elements for reducing threat and vulnerability levels at Federal facilities.

In FY 2009, FPS will:

- Provide law enforcement and security services at national security events that pose increased threats at or in the vicinity of Federal facilities, including the Inauguration, Presidential Transition, and related demonstrations and protests;
- Complete risk-based security standards tied to intelligence;
- Continue to conduct building security assessments at federal buildings based on risk;
- Continue to monitor agency compliance with security standards by conducting annual inspections to ensure agency compliance at level 3 and level 4 buildings and consistent with risk;
- Continue to improve contract management; and
- Continue to work with client agencies to strengthen business processes and service.

#### **IV. Program Justification of Changes**

Not Applicable

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
U.S. Immigration and Customs Enforcement  
Justification of Proposed Changes in Federal Protective Service  
Appropriation Language**

The revenues and collections of security fees credited to this account shall be available until expended for necessary expenses related to the protection of federally-owned and leased buildings and for the operations of the Federal Protective Service. [Provided, That the Secretary of Homeland Security and the Director of the Office of Management and Budget shall certify in writing to the Committees on Appropriations of the Senate and the House of Representatives no later than December 31, 2007, that the operations of the Federal Protective Service will be fully funded in fiscal year 2008 through revenues and collection of security fees, and shall adjust the fees to ensure fee collections are sufficient to ensure the Federal Protective Service maintains, by July 31, 2008, not fewer than 1,200 full-time equivalent staff and 900 full-time equivalent Police Officers, Inspectors, Area Commanders, and Special Agents who, while working, are directly engaged on a daily basis protecting and enforcing laws at Federal buildings (referred to as “in-service field staff”).] (Department of Homeland Security Appropriations Act, [2008] 2009.)

**Explanation of Changes:**

The change removes the FY 2008-specific level of personnel language.

### Mission Statement

Federal Protective Service (FPS) is the Federal law enforcement organization responsible for the protection and security of Federally-owned and leased buildings, property, and personnel across the Nation. FPS operations focus on law enforcement and reduction of Federal facility vulnerabilities to criminal and terrorist threats, while ensuring that public facilities are safe, secure and remain available as a vital part of every day American life. FPS uses approximately 15,000 contract security guards and 950 Law Enforcement Officers and civilian employees who are strategically located throughout the Nation to provide security and law enforcement coverage to all General Services Administration (GSA)-owned and -operated Federal facilities. The FPS currently performs all necessary security and protection functions at more than 8,900 federally owned and leased locations throughout the nation, totaling approximately 330 million square feet of space, housing more than 1.1 million Federal personnel.

The FY 2009 FPS security collections cover the cost of various types of security services such as the law enforcement response to emergency calls, preliminary investigation of incidents and apprehension of suspects, the FPS Mega Center that maintains 24-hour security alarm monitoring and provides nationwide communication dispatch to enforcement personnel, the physical security initiatives including security awareness programs for tenants, coordination of Occupant Emergency Plans, and consultations with Building Security Committees on security countermeasures for Federal facilities. In addition, these collections are used to conduct building threat assessments of Federal facilities and to develop action plans to reduce the threats, to acquire, install, and maintain security countermeasures, and to participate in the criminal investigations wherein there is sharing of current intelligence on domestic and foreign terrorist threats.

### Summary Justification and Explanation of Changes

|                              | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|------------------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Salaries and Benefits</b> | \$128,838      | \$101,733       | \$115,500       | \$13,767              |

Salaries and Benefits includes costs for 950 FTEs. The FY 2009 request includes an increase of \$13,767,000 in personnel compensation.

|               | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------|----------------|-----------------|-----------------|-----------------------|
| <b>Travel</b> | \$1,297        | \$11,151        | \$9,100         | (\$2,051)             |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2009 request includes a \$2,051,000 decrease. Funding in the travel area will be used to complete all Building Security Assessments and training requirements.

|                                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Transportation of Things</b> | \$9,714        | \$10,550        | \$650           | (\$9,900)             |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2009 request includes a \$9,900,000 decrease.

|                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|-----------------|----------------|-----------------|-----------------|-----------------------|
| <b>GSA rent</b> | \$24,352       | \$20,117        | \$25,500        | \$5,383               |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 request includes a \$5,383,000 increase.

|  | FY 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|--|-------------------|-----------------|-----------------|-----------------------|
| <b>Communication, Utilities, and miscellaneous charges</b> | \$6,963           | \$7,039         | \$3,200         | (\$3,839)             |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2009 request includes a \$3,839,000 decrease.

|                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|-----------------|----------------|-----------------|-----------------|-----------------------|
| <b>Printing</b> | \$1,311        | \$1,782         | \$100           | (\$1,682)             |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2009 request includes a decrease of \$1,682,000.

|  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|--|----------------|-----------------|-----------------|-----------------------|
| <b>Operation &amp; maintenance of facilities</b> | \$333,789      | \$447,024       | \$455,250       | \$8,226               |

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2009 request includes an increase of \$8,226,000.

|                                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Supplies &amp; materials</b> | \$3,507        | \$9,735         | \$3,500         | (\$6,235)             |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2009 request includes a decrease of \$6,235,000.

|                  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Equipment</b> | \$6,240        | \$3,869         | \$3,200         | (\$669)               |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2009 request includes a decrease of \$669,000.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Immigration and Customs Enforcement** **Student and Exchange Visitor Program**

### **I. Appropriation Overview**

#### **A. Mission Statement for Student and Exchange Visitor Program:**

The Student and Exchange Visitor Program's (SEVP) mission is to enhance national security by collecting, maintaining, and providing reliable information on foreign students, exchange visitors, and the schools and exchange programs that host them. SEVP is an enforcement tool to assist in keeping our nation safe while facilitating the participation of students and exchange visitors in the academic programs in the United States.

#### **B. Budget Activities:**

SEVP administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, and J visa classification) in the United States. SEVP also provides outreach and training for SEVIS users. SEVIS is used by ICE's Compliance Enforcement Unit (CEU) to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools. The CEU also uses SEVIS to identify schools and exchange visitor programs that are not in compliance with regulatory requirements.

#### **C. Budget Request Summary:**

ICE requests 387 positions, 261 FTE, and \$119,580,000 for SEVP in FY 2009. The additional 252 positions, 126 FTE, and \$63,380,000, will be funded by an increase in the fees SEVP estimates it will collect based on the most recent fee study. The increase will allow ICE to

- Enhance SEVIS functionality and data integrity;
- Increase outreach and training provided to the academic community;
- Enhance the sharing of SEVIS data with Federal partners; and
- Increase the monitoring and oversight of schools hosting foreign students through the recertification process, allowing for greater enforcement of immigration laws.

| 2009 Program Change          | -                          | -          | -              |
| <b>2009 Request</b>          | <b>387</b>                 | <b>261</b> | <b>119,580</b> |
| Total Change 2008-2009       | 252                        | 126        | 63,380         |

ICE requests \$119.6 million for this activity. This increase of \$63.4 million over FY 2008 will support School Recertification Programs, hiring and deployment of Liaison Officers for participating schools, expanded Compliance Enforcement activities, and updated information technology for tracking students in SEVIS.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Student and Exchange Visitor Program (SEVP) works to enhance national security by collecting, maintaining, and providing reliable information on foreign students, exchange visitors, and the schools and exchange programs that host them. SEVP facilitates the participation of students and exchange visitors in the academic programs in the United States and works to ensure the programs are not used to illegally allow entrance into the country.

SEVP administers the Student and Exchange Visitor Information System (SEVIS) and the program required to maintain it. SEVIS collects, maintains and provides information on foreign students, exchange visitors and their dependents on F, M, and J visas while studying in the United States. SEVIS also maintains information on the schools and program sponsors authorized to use SEVIS and host foreign students and exchange visitors. SEVIS assists in the identification of those who are not in compliance with visa rules and immigration law and who may be a threat to national security.

SEVIS is ICE's core technology in this critical homeland security mission. It is the first electronic web-based system that provides real-time, up-to-date information on F, M, and J visa holders. The system can be accessed electronically at any time making it an effective law enforcement tool used by

Agencies within the Department of Homeland Security. SEVIS is used by the Compliance Enforcement Unit (CEU) to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools. SEVP and CEU also use SEVIS to identify schools and exchange visitor programs that are not in compliance with regulatory requirements. Information maintained in SEVIS is instrumental in supporting ICE's role in conducting human smuggling investigations that identify, disrupt and prosecute criminal organizations involved in the bringing in, transporting and harboring of illegal aliens into the United States.

All prospective students and exchange visitors are required to pay a SEVP processing fee electronically or check by using the Form I-901 (\$100 for most and \$35 for some exchange visitors) prior to seeking a visa at consulates and embassies overseas. This fee, in addition to the fees collected from schools seeking certification to host nonimmigrant students, provides the full funding for SEVP, including CEU agents that support enforcement of SEVP policies and regulations.

In FY 2007, SEVP continued to administer and manage SEVIS, administer the School Certification Program, and support compliance enforcement. Specifically, SEVP:

- Enhanced data integrity by maintaining data-fix processing times of 30 days or less and system interfaces that are 75-90 percent effective with US Customs and Border Protection's (CBP) Arrival and Departure Information System (ADIS) and US Citizenship and Immigration Services' (USCIS) Computer Linked Application Information Management System (CLAIMS);
- Initiated three data validation exercises with select schools to determine the timeliness of information updates by school officials. SEVP will continue to require validation exercises as a measure of school accountability and data integrity;
- Established a school compliance team to review school accountability with regulatory reporting requirements;
- Implemented direct, real-time interface with Foreign Terrorist Tracking Task Force (FTTTF) to provide FTTTF with direct, electronic access to the foreign student and exchange visitor information in SEVIS to identify potential threats to national security;
- Provided support to USCIS' Systematic Alien Verification for Entitlements (SAVE) Program using the Verification Information System (VIS) to prevent fraud through the immediate provision of automated immigration status information to participating federal, state, and local government agencies;
- Incorporated SEVIS training in law enforcement training courses so that new law enforcement officials will be able to understand, appropriately interpret and apply SEVIS data;
- Enhanced the web-based training module for schools through the addition of testing capability. This added capability can be used to assess school and program officials' skill in entering information in SEVIS as well as their level of comprehension;
- Enhanced SEVIS reporting capabilities with a limited, internal implementation of the SEVP Decision Support System;
- Completed fee study for current and future program requirements with a plan to prepare a comprehensive fee rule;
- Completed Phase 1 of the SEVIS enhancement initiative. A feasibility study was conducted in collaboration with the Department of State, CBP, USCIS, US-VISIT, the FBI, and educational institutions regarding their current and future requirements of SEVIS. Based on this extensive input, it was decisively concluded that a completely new SEVIS system (SEVIS II) is required;

- Began Phase 2 of the SEVIS enhancement initiative which included the development of a SEVIS II Business Case Study, a process that will identify and define the detailed requirements of and costs for SEVIS II; and
- Established an appeals procedure within ICE for schools denied certification.

In FY 2008 SEVP plans to:

- Continue preparation for recertification of all SEVIS certified schools;
- Increase staffing for school compliance to identify and remove non-compliant schools;
- Ensure the continued success of SEVIS fee payment processing;
- Improve SEVIS interoperability and data sharing capabilities;
- Expand the SEVP Decision Support System. Initial efforts delivered data reporting, querying and analysis capability in support of SEVP Headquarters and CEU. SEVP will deliver the Decision Support System in stages to multiple other internal and external user groups in the fall of 2007;
- Continue to provide effective training of SEVIS users;
- Maintain outreach to the academic community;
- Continue the development of SEVIS II;
- Increase carry-forward funds as a capital reserve for SEVIS II where appropriated funds are not available;
- Commence digitizing more than 8,000 SEVIS files; and
- Increase enforcement of school compliance requirements

For FY 2009, SEVP will support the following initiatives:

- **School Recertification Program:** The budget request to fund additional positions to provide a recertification program capability for the Student and Exchange Visitor Program (SEVP) will enable SEVP to attain DHS' and ICE's strategic objectives to: 1) secure our borders against terrorists; 2) enforce immigration laws; and 3) serve the public effectively by facilitating lawful trade and immigration. We will attain these strategic objectives by using the requested increase to provide improved compliance enforcement through a comprehensive review of potential violation leads identified among foreign students and exchange visitors who have been authorized entry into the United States to participate in our academic programs.

ICE will use \$3.2 million of available revenue to fund 33 additional positions to provide a recertification program capability for the Student and Exchange Visitor Program (SEVP).

The requested increase will fund the following:

- 1 GS-0343-14 Management and Program Analyst
- 6 GS-0343-13 Management and Program Analysts
- 11 GS-0343-12/13 Management and Program Analysts
- 12 GS-0343-7/9/11 Management and Program Analysts
- 3 GS-0301-7 Program Assistants

Homeland Security Directive No. 2 requires DHS to conduct ongoing and periodic review of all educational institutions certified to accept nonimmigrant students. SEVP developed a certification process that educational institutions undergo to receive authorization to enroll

nonimmigrant students. This certification process includes an ongoing commitment by educational institutions to maintain current and accurate records in SEVIS on their nonimmigrant students.

The Enhanced Border Security and Visa Entry Reform Act of 2002 mandated that DHS conduct a recertification of certified educational institutions every two years. SEVP recertification is a review of an educational institution previously certified to affirm that the educational institutions remains eligible and is complying with regulatory recordkeeping, retention, and reporting requirements. The focus of recertification is past performance coupled with a review to ensure that the educational institution maintains its basic eligibility for initial certification. The process may include an on-site visit or review.

Approximately 8,900 educational institutions have been certified by SEVP, some for more than two years, but none have been recertified.

These positions and related support costs will provide improved compliance enforcement through a comprehensive review of potential violation leads identified among foreign students and exchange visitors who have been authorized entry into the United States to participate in our academic programs.

- **Liaison Officers:** The budget requests to fund the hiring and deployment of the Liaison Officers for the Student and Exchange Visitor Program (SEVP) will enable SEVP to improve its ability to effectively ensure optimal compliance by the academic community with immigration law, and thus support DHS' attainment of its' strategic goal to detect, deter and mitigate threats to our homeland through securing our borders against terrorists and enforcing our immigration laws.

ICE will use \$7.1 million in available revenue to fund 64 additional positions to support the Student and Exchange Visitor Program (SEVP). These positions and related support costs will provide support to educational institutions that desire to host foreign students and exchange visitors. By statute, these institutions require initial certification by SEVP and subsequent recertification every two years. Rather than educational institutions across the country dealing exclusively with SEVP headquarters in Washington, SEVP will locate Liaison Officers in 26 offices throughout the United States (co-located with ICE Special Agents in Charge) to provide more localized support and services to these educational institutions.

The requested increase will fund the following:

- 61 GS-0343-12/13 Management and Program Analysts
- 3 GS-0343-7/9/11 Management and Program Analysts

These Liaison Officers will be the eyes and ears of SEVP with educational institutions that are certified by SEVP. They will assist these institutions in achieving certification and recertification. They will perform recertification visits and train the institutions on using SEVIS and SEVIS II. They will provide a local face to these institutions for SEVP issues, follow up leads about potential institutional non-compliance, and be available to trouble-shoot individual student scenarios as requested by the institutions. In addition, these Liaison Officers will provide assistance and training to ICE agents who access SEVIS/SEVIS II data for compliance enforcement purposes and other government officers who locally need a SEVIS

expert to assist with training and compliance. The additional officer training would include system users from the US Customs and Border Protection and the US Citizenship and Immigration Services.

Educational institutions have difficulties with the requirements and controls that SEVP has instituted. SEVP has dealt openly and honestly with this community to defuse any problems, but the educational community wants more help in complying with SEVP requirements.

The initial fee rule for the SEVIS I-901 fee collected from foreign students and exchange visitors indicated that a portion of that fee would be for liaison activities. To date, SEVP has only been able to provide liaison from Washington headquarters. The result has been sometimes questionable data quality for information input into SEVIS by the educational institutions and little ability by SEVP to address the problems at 8,900 institutions located all over the country.

- **Compliance Enforcement:** The budget request to expand ICE's SEVIS compliance enforcement efforts are essential to support ICE and DHS' strategic objectives to prevent the unlawful exploitation of our nation's people and institutions by alien violating laws within the homeland, and to enforce alien compliance with our immigration, customs, and criminal laws.

ICE will use \$26.78 million of available revenue to fund 155 additional positions to support an expansion of ICE's SEVIS compliance enforcement efforts dealing with foreign students and criminal investigations into SEVIS certified institutions. The increase would provide an additional 155 positions to supplement the 79 positions contained in the funding within guidance. These positions and related support costs will provide improved compliance enforcement through a comprehensive review of potential violator leads identified among foreign students and exchange visitors who have been authorized entry into the United States. They will also increase ICE's ability to pursue criminal violations, including alien smuggling and fraud, conducted by SEVIS certified schools and programs.

The requested increase will fund the following:

- 10 GS-1811-14 Senior Special Agents
- 109 GS-1811-5/7/9/11/12/13 Special Agents
- 18 GS-0132-9/11 Intelligence Research Specialists
- 18 GS-1802-5/7/9 Investigative Assistants

The new Special Agents will be used to investigate administrative and criminal violations related to individual students, and schools certified by ICE to accept foreign students. The ICE Headquarters Compliance Enforcement Unit (CEU) identifies student status violators from data contained in SEVIS and assigns leads to ICE field offices for investigation by Special Agents. Those students determined to be in violation are arrested and placed into removal proceedings.

In addition, these Special Agents will conduct investigations of individuals and institutions that seek to exploit the student and exchange visitor visa programs through fraud. Such investigations may include instances where the student visa process has been abused to bring foreign nationals into the United States for financial gain. Violations that are investigated

include alien smuggling, visa fraud, false statements, mail fraud, wire fraud, and money laundering.

- **SEVIS II:** Fundamental to the attainment of any DHS and ICE strategic objective to detect and deter threats to our homeland through terrorist exploitation of legitimate student entry pathways into the Homeland is SEVP's ability to collect information and track legitimate non-immigrant students and certified schools. This tracking can only be accomplished through the SEVIS system; SEVIS II is the proposed newly configured deployment to SEVIS I which provides essential technologies.

ICE requests a total of \$26.3 million in FY 2009 to replace the current Student and Exchange Visitor information System (SEVIS). In FY 2007 and 2008, SEVP will use funding from available fee collections or fee collection carryover to ensure a quick start to this program. SEVP currently uses available funding within-guidance (fee collections) to support SEVIS operations. From FY 2007 to FY 2009, some of these resources will also provide limited support toward the development of SEVIS II. However, in FY 2008, \$12.5 million of carry forward fees will be provided by SEVP as part of the start-up cost for SEVIS II. Therefore, it is critical that the increased fees are approved.

**Unfunded Mandates and Performance Impact:** In light of recent intense interest by the Administration and Congress on student visa vulnerabilities and to better position ICE to control the interior enforcement of our border and promote lawful immigration; ICE is pursuing a re-engineering of SEVIS into a system that fully meets the needs of law enforcement, educational institutions, and other agencies, all of whom rely heavily on SEVIS data when making informed decisions.

The current SEVIS does not adequately meet the needs of the national security, law enforcement, and educational institution communities, all of whom rely heavily on SEVIS data and its interoperability. This inadequacy has been confirmed by a comprehensive and recently completed (January 2, 2007) feasibility study. SEVIS' shortcomings in the area of servicing national security and law enforcement agencies stem primarily from the fact that it was designed to track documents as opposed to individuals, thus creating the real possibility of an individual being identified by numerous different records within the system, and making it difficult to comprehensively track the activities of an individual. The current SEVIS configuration presents, among many, two especially critical vulnerabilities to national security that cannot be eliminated by altering or upgrading the current system.

The first shortcoming is that SEVIS cannot accommodate the use of biometric information to positively identify students. DHS agencies such as US Citizenship and Immigration Services (USCIS) are moving from record-based databases to individual-based systems, which provide improved historical tracking and enhanced fraud detection. A central component of this concept is the inclusion of biometric identifiers, namely the United States Visitor and Immigrant Status Indicator Technology (US-VISIT) Fingerprint Identification Number (FIN) and a photographic image. Any transaction with respect to the student (e.g., I-20 issuance, change in status, reinstatements, and transfers) will be recorded as an event and tracked historically. Without SEVIS' capability to make use of biometric information to positively confirm students' identities, two vulnerabilities continue to exist: (1) individuals ineligible for entry into the United States can gain entrance because SEVIS limits searches and analysis of data to name-based checks and biographical information that can be thwarted by name changes or data entry errors; and (2) primary inspectors at the ports of entry are often unable to verify

the currency or legitimacy of members missing required documents because they can not definitively confirm the SEVIS identity and status of the individual standing before them.

The second shortcoming of SEVIS is that it has extremely limited search capability, making it difficult to interoperate with the tracking and monitoring systems of other key national security and law enforcement agencies. The result is that a student who has violated his/her status requirements in SEVIS sometimes clears the screenings of other agencies or programs (e.g., Department of State, USCIS, US-VISIT) because their changed status is not easily and quickly accessible to other agencies through their systems.

FY 2009 funding within the fee account will not be sufficient to cover the full cost of SEVIS II unless the increased fees are approved.

**Accomplishment and results to be gained from increased funding for SEVIS II:** SEVIS II initiative supports the DHS Strategic Goal of Prevention, Objective 2.2, Enforce Trade and Immigration Laws. It will meet the needs of the intelligence and enforcement communities increasing the ability to track and monitor individuals; integrate seamlessly with other intelligence systems; and provide real-time critical individual based information. The major accomplishments/results to be gained if SEVIS II is funded are to:

- Accommodate the use of biometric information to positively identify students and exchange visitors, inclusion of biometric identifiers.
- Search and analyze to name-based checks and biological information:
- Provides primary end users (port of entry and departure, and investigators) with the ability for real-time verification of data:
- Provide enhanced search capability, and tracking and monitoring systems of other key national nation security and law enforcement agencies:

A newly configured and deployed SEVIS II system that is based on tracking and monitoring individuals rather than records, and that is highly interoperable with all of our stakeholders, would eliminate critical vulnerabilities.

**Current Reform Initiatives under SEVIS:** The current SEVIS succeeded in eliminating much of the manual and paper intensive process that institutions were required to submit. It maintains the basic biographic information on students and exchange visitors, but it falls short of meeting the needs of the enforcement and intelligence communities. System shortcomings stem primarily from the fact that SEVIS was designed to track documents as opposed to individuals, making it difficult to monitor individuals without a backend process that is resource intensive.

**Schedule / Implementation plan / Capability increases / Timeline of deliverables:** The SEVIS II business case will be developed during FY 2007 and 2008. Available fee collections or fee collection carryover funding would support the \$2.7 million cost for the business case development.

In FY 2008, the SEVIS II Acquisition Strategy will result in a contract award by the second half for systems development. The total SEVIS II cost for FY 2008 is \$12.5 million. Available fee collections or fee collection carryover funding would support the \$12.5 million cost for the business case development.

FY 2009 will see the completion of systems development, continuation of program support, and SEVIS transition and data migration to SEVIS II, assuming increased fees are approved.

### PPA Mission Statement

The Student and Exchange Visitor Program (SEVP), which is a division of U.S. Immigration and Customs Enforcement (ICE), administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, J visa classification) in the United States. SEVIS is designed to keep our nation safe while facilitating the participation of students and exchange visitors seeking to study in the United States.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U.S. Immigration and Customs Enforcement Breached Bond Detention Fund

### **I. Appropriation Overview**

#### **A. Mission Statement for Breached Bond Detention Fund:**

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of \$8,000,000 posted under the INA, which are recovered by the Department of Justice, are deposited as offsetting collections into this fund.

#### **B. Budget Activities:**

Amounts deposited into the fund, which remain available until expended, can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

#### **C. Budget Request Summary:**

For FY 2009 ICE requests 63 positions, 63 FTE, and \$75,000,000. The total adjustment-to-base is 0 FTE and an \$11,200,000 increase in collections. This will allow for the funding of 2,040 detention beds.

| <b>2009 Current Services</b> | <b>63</b>        | <b>63</b>  | <b>75,000</b> |
| 2009 Program Change          | -                | -          |               |
| <b>2009 Request</b>          | <b>63</b>        | <b>63</b>  | <b>75,000</b> |
| Total Change 2008-2009       | -                | -          | 11,200        |

U.S. Immigration and Customs Enforcement requests \$75 million of authority for this account. This is an increase of \$11.2 million over the FY 2008 enacted level for fee collections. Increased authority will allow ICE to fund an additional 200 detention beds.

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond/Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury.

All collections in excess of the first \$8,000,000 are deposited as offsetting collections into the Breached Bond Detention fund. Amounts deposited into the fund, which remain available until expended, are used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

ICE uses these resources to support bed space and related staff. These resources will support an estimated 2,040 beds in FY 2009. These funds also support 63 staff including bond control specialists, immigration enforcement agents, and administrative personnel.

### PPA Mission Statement

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond/Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of \$8,000,000 posted under the INA, which are recovered by the Department of Justice, are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

### Summary Justification and Explanation of Changes

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Immigration and Customs Enforcement** **Immigration Inspection User Fees**

### **I. Appropriation Overview**

#### **A. Mission Statement for Immigration Inspection User Fees:**

The ICE Immigration User Fee account is a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry as codified in 8 U.S.C. 1103, 1356, section 286, of the Immigration and Nationality Act. These fees are used to recover some of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air and sea ports. These ICE activities encompass: expanding, operating, and maintaining information systems for nonimmigrant control; detecting fraudulent documents used by passengers traveling to the United States; investigating and establishing the government's legal position regarding all detentions; providing detention and removal services for inadmissible aliens arriving on commercial aircraft or vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry; and providing training and technical assistance to commercial airline and vessel personnel regarding detection of fraudulent documents. All deposits into the Immigration User Fee account are available until expended.

#### **B. Budget Activities:**

The Immigration Inspection User Fee will fund 276 positions.

#### **C. Budget Request Summary:**

ICE requests 276 positions, 276 FTE, and \$117,600,000 for FY 2009. The increase of \$4,100,000 for FY 2009 over FY 2008 represents a projected increase in fee collections based on increased passenger volume and will allow for the funding of 2,075 detention beds.

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Immigration Inspection User Fees**  
**Program Performance Justification**  
(Dollars in thousands)

**PPA: Immigration Inspection User Fees**

|                              | <b>Perm.</b>     |            |                |
|------------------------------|------------------|------------|----------------|
|                              | <b>Positions</b> | <b>FTE</b> | <b>Amount</b>  |
| <b>2007 Actual</b>           | 178              | 159        | 98,496         |
| <b>2008 Enacted</b>          | 276              | 276        | 113,500        |
| 2009 Adjustments-to-Base     |                  |            | 4,100          |
| <b>2009 Current Services</b> | <b>276</b>       | <b>276</b> | <b>117,600</b> |
| 2009 Program Change          | -                | -          | -              |
| <b>2009 Request</b>          | <b>276</b>       | <b>276</b> | <b>117,600</b> |
| Total Change 2008-2009       | -                | -          | 4,100          |

U.S. Immigration and Customs Enforcement requests \$117.6 million for this activity. This is an increase of \$4.1 million over FY 2009. The increased authority will allow ICE to fund an additional 75 detention beds.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Immigration User Fee account was established as a repository for fees collected from arriving airline passengers for immigration inspection and fines imposed to prevent unauthorized landing and unlawful bringing of aliens into the United States, penalties for document fraud, and liquidated damages and expenses collected. The fees cover the cost of providing detention and removal services for inadmissible aliens arriving on commercial aircraft and vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry. All deposits into the Immigration User Fee account are available until expended.

### PPA Mission Statement

The Immigration User Fee account was established as a repository for fees collected from arriving airline passenger for immigration inspection and fines imposed to prevent unauthorized landing and unlawful bringing of aliens into the United States, penalties for document fraud, and liquidated damages and expenses collected. The fees cover the cost of providing detention and removal services for inadmissible aliens arriving on commercial aircraft and vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry. All deposits into the Immigration User Fee account are available until expended.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$17,924               | \$27,382                | \$28,380                | \$998                          |

Fiscal Year 2009  
Congressional Justification

**FY 2009 PRESIDENT’S BUDGET REQUEST STRATEGIC CONTEXT**

**U.S. Immigration and Customs Enforcement**

**TABLE OF CONTENTS**

I. STRATEGIC CONTEXT FOR FY 2009 BUDGET

- A. Mission and Description of U.S. Immigration and Customs Enforcement .....ICE-2
- B. Major Activities and Key Strategic Issues .....ICE-3
- C. Resources Requested and Performance Impact .....ICE-13
- D. Program Performance Highlights, Resources and Alignment to Strategic Goals.....ICE-19
- E. Digest Tables by FYHSP Programs .....ICE-23

## **A. Mission and Description of U.S. Immigration and Customs Enforcement**

U.S. Immigration and Customs Enforcement (ICE) is the largest investigative bureau within the Department of Homeland Security. ICE currently employs approximately 16,800 Federal law enforcement officers and civil servants throughout the United States and overseas.

ICE's mission is to protect America and uphold public safety by targeting the people, money, and materials that support terrorists and criminal activities. ICE fulfills this mission by investigating violations of immigration and customs laws

ICE's four main operations are detention, investigation, international enforcement, and protection.

The *Office of Detention and Removal Operations (DRO)* processes, detains, and removes criminal aliens, aliens residing illegally in the United States, and non-immigrants apprehended for infraction of immigration laws (including administrative violations). DRO is responsible for the safe and humane treatment of detained aliens while in ICE custody. This includes the safe and secure transportation from the point of apprehension through each phase of their immigration proceedings including removal of the alien from the United States. In addition to managing the detained alien population, the Criminal Alien Program (CAP) identifies criminal aliens who are incarcerated in Federal, State, and local facilities. CAP prepares criminal aliens for immigration proceedings and ensures that they are not released into the community. DRO also manages the ICE Fugitive Operations program that locates and captures aliens who have violated conditions of release and subsequently absconded.

The *Office of Investigations (OI)* enforces trade, immigration, and customs laws. OI investigates a wide range of criminal activities including: illegal immigration; weapons trafficking (including weapons of mass destruction and nuclear, biological, chemical, and radiological agents); narcotics and contraband smuggling; human smuggling and trafficking; money laundering and other financial crimes; fraudulent trade practices and intellectual property rights violations; child pornography; and child sex tourism.

The *Office of International Affairs (OIA)* enhances and promotes the ICE mission of protecting the United States by using an international, multi-faceted, law enforcement approach and partnering with foreign and domestic counterparts to combat criminal and terrorist activities.

The *Federal Protective Service (FPS)* reduces vulnerabilities to Federal facilities based on criminal and terrorist threats. FPS employs a mix of contract security guards and law enforcement officers to provide security and law enforcement coverage to all General Services Administration owned and leased Federal buildings, property, and personnel across the Nation.

## **B. Major Activities and Key Strategic Issues**

As ICE continues to move forward and maintain focus on changing threats, many strategic issues face the organization. One of the most comprehensive issues ICE faces is the Secure Border Initiative (SBI). The SBI focuses on two major immigration enforcement themes: controlling the border and interior enforcement within the United States. ICE's interior enforcement investigations and activities will eliminate vulnerabilities in the legal immigration process. As a result, violators are more likely to be criminally prosecuted and removed from the United States. ICE will strengthen efforts to combat document fraud, improve visa compliance, improve cooperation with State and local law enforcement and monitor worksites to ensure that employers who violate the law are punished. ICE also pursues both effective and efficient ways to enforce immigration and customs compliance – directing resources toward activities that present the greatest threats.

Once apprehended the Detention and Removal program ensures the physical custody of aliens pending completion of the removal process. ICE has created efficiencies to improve the management of the detention and removal process and ended the catch and release of non-Mexicans (OTMs) crossing the Southwest and Northern border.

**Detention and Removals Operations (DRO)** – In FY 2008 DRO received \$3,118 million:

- \$2,689 million in the five Detention and Removal budget activities within S&E;
- \$231.1 million for Legal Proceedings;
- \$16.5 million in Construction appropriation;
- \$63.8 million in Breached Bond Detention Fund account; and
- \$99.8 million in the Immigration User Fee account.
- \$17.8 million in the Automation account.

ICE will focus on the identification, process and removal of criminal aliens incarcerated at Federal, State and local institutions through the CAP program. The number of CAP teams will be expanded to increase the coverage throughout the United States in FY 2008. Upon completing their prison sentence, aliens who have been identified as removable via the CAP program are taken into ICE custody and expeditiously removed. After a criminal alien has been judged deportable, Fugitive Operation teams are tasked with ensuring compliance of the removal orders. Over the next five years, ICE plans to significantly increase its fugitive operations.

In FY 2007, DRO conducted a comprehensive study of all known jails and prisons (Federal, State and county) within the United States with the goal of achieving 100% screening in all facilities to determine nationality of incarcerated individuals. ICE used a risk based approach and assigned each facility a weighted score of risk. The plan is to develop and fund a program which will screen jails and prisons to enhance the methodology and process of identifying, prioritizing, and efficiently removing criminal aliens from the United States.

Additionally, in FY 2007, the total funded detention bed space was 27,500. The actual average daily population of detainees held in ICE custody in FY 2007 was 27,883. The FY 2008

Omnibus emergency funding provides for an additional 4,500 beds, for a total of 32,000. In FY 2009, ICE is requesting an additional 1,000 beds for a total of 33,000.

The detention strategy for adding more space historically has been through a combination of ICE-owned Service Processing Centers (SPCs), inter-governmental service agreements with State and local facilities, and fully contracted facilities. At the request of the Department, ICE is conducting a three-phase study to look into the feasibility, costs, and benefits of potentially transitioning the ownership of ICE SPCs to the private sector. In March 2007, ICE completed the first phase of the privatization study and is finalizing the second phase that addresses specific privatization issues, costs and benefits, and transition requirements on an individual facility basis.

### Key Accomplishments/Planned Accomplishments

In FY 2007, ICE:

- Fugitive Operation Teams (FOT) arrested 30,408 illegal aliens. Of the total aliens arrested, 18,324 were fugitive aliens, of which, 2,679 were criminal fugitive aliens. The remaining 12,084 arrests were comprised of non-fugitives, of which 2,755 were criminal aliens;
- Upgraded the Fugitive Case Management System (FCMS) 1.2 before the end of fiscal year, a comprehensive data collection system used to accurately track field statistics in support of the overall DRO mission. FCMS is also utilized to generate reports and measure FOT activity;
- Increased the number of operational FOTs deployed nationwide, from 50 to 75. These additional teams will help maximize the efficiency of ICE immigration enforcement efforts to locate, arrest, and remove fugitive aliens from the United States;
- Continued the expansion of the CAP to include the early identification and placement in immigration proceedings of criminal aliens incarcerated in Federal, State or local facilities to increase the ability to remove these aliens upon their release from incarceration;
- Issued 164,296 charging documents through the CAP program. This exceeds the CAP fiscal year 2006 total by over 140%;
- Presented 2,746 cases to the U.S. Attorney's office for criminal prosecution. Of those, 1,808 cases were accepted;
- Implemented a DRO Modernization (DROM) project, in order to better manage bed space, cases and overall DRO operations;
- Increased its use of expedited removal, a legal process that allows ICE to remove illegal aliens without a formal hearing before an immigration judge if the aliens have no credible claim to asylum or any other relief from deportation; and
- Removed 276,912 aliens.

In FY 2008, ICE will:

- Expand the Transportation Management program to remove the increased number of removable aliens because of increased border enforcement, the expansion of expedited removal operations, and implementation of a comprehensive CAP Program;

- Expand CAP teams by 30. The additional team enhancements will be used to increase CAP coverage throughout the United States. Each Immigration Enforcement Agent (IEA) will be responsible for conducting an estimated 600 interviews per year, and also be responsible for issuing 300 charging documents per year;
- Apprehend over 50,000 aliens within the United States with FOTs;
- Achieve 100% screening of all jails and prisons (Federal, State, and local.) ICE is utilizing a phased approach to bring all facilities to 100% screening as resources become available by using a risk based assessment; and
- Continue to engage other government agencies and embassies to accelerate and expedite the issuance of travel documents for aliens pending removal from the United States. In FY 2008, DRO received a \$44.0 million enhancement that includes \$17.6 million for Centralized Ticketing Operations and \$26.4 million for additional air transportation support, including the use of the Justice Prisoner and Alien Transportation System (JPATS) and leasing of aircrafts for alien removals. DRO will continue to develop and expand deployment of the Electronic Travel Document (eTD) system as well as encourage other foreign governments to use the system and increase its use of JPATS.

FY 2009 Projected Accomplishments:

- The efforts of the additional 29 FOTs received in FY 2008 will continue to enhance those already in existence in the reduction of the fugitive alien population. These teams in FY 2009 will continue to conduct over 90,000 enforcement activities designed to eliminate existing cases for the Fugitive Operations Program.
- Expand Web Services to allow the eTD application to communicate with other internal or external applications such as the JPATS scheduling tool, DHL (world-wide package company) web interface and the Enforce Alien Removal Module (EARM). This will enhance the end-user experience by consolidating services from multiple applications into the single eTD application;
- Allow for fee processing. The current eTD application facilitates the process for issuing travel documents between the United States and foreign governments. The fee processing enhancement will automate travel document processing fees to be transferred and administered electronically;
- Increase the number of correctional facilities with 100% screening of foreign-born inmates by 500 facilities with the use of technology, enhanced staffing and process improvement;
- Establish 287g or DRO/CAP on-site offices at correctional reception centers in all 50 states and in the 100 largest county or local correctional reception centers in the country;
- The Intensive Supervision Appearance Program (ISAP) will end during FY 2009. The Alternatives to Detention (ATD) program will conduct a study to see which type of program best suits the DHS mission (ISAP and/or Enhanced Supervision Reporting (ESR)) ;
