- The ATD Unit is also researching piloting a program that would utilize “kiosk” type hardware like the U.S. Visitor and Immigrant Status Indicator Technology (US-VISIT) program. With this technology, an alien could report according to a schedule by scanning their fingerprint and having their photo taken at a “kiosk”. This concept could potentially revolutionize the way ICE DRO supervises non-detained aliens; and
- Increase the number of inmates screened and processed by 57,600.

**Investigations (OI)** - ICE received \$1,739 million for Investigations activities in FY 2008:

- \$1,597.4 million in the Investigations budget activities within the Salaries and Expenses appropriation;
- \$59.7 million in the Intelligence PPA within the Salaries and Expenses appropriation;
- \$56.2 million in the Student Exchange Visitor Program (SEVP) account; and
- \$13.6 million in the Immigration User Fee account.
- \$12.9 million in the Automation account

Funds will be used to pursue investigations into a broad array of law enforcement, public safety, and national security issues, including: illegal imports and exports (components and precursors to weapons of mass destruction (WMD), munitions, weapons, and dual-use technologies); financial crimes; commercial fraud; human smuggling and trafficking; narcotics smuggling; child pornography and exploitation; document and benefit fraud; and visa fraud to include student and worker visas. This funding includes enhancements to expand targeted investigative efforts in worksite and compliance enforcement and increased support to State and local law enforcement through expanded 287(g) training. This funding will also enable ICE to combine efforts with U.S. Customs and Border Protection (CBP) and the Food and Drug Administration (FDA) to target, interdict, and investigate the importation of substandard, tainted, and counterfeit products being imported into the United States from the People's Republic of China (PRC).

ICE is also implementing many reform initiatives which will reduce operating costs and achieve economies of scale. OI has created Document and Benefit Fraud Task Forces, which build on existing partnerships to bring together the specific expertise of numerous law enforcement agencies and departments to collaborate in conducting and managing complex and cross-cutting investigations. This has increased ICE's ability to target high-impact investigations, resulting in significantly higher quality cases and enforcement results. The SEVP has created a Certification Review Process which has allowed SEVP to eliminate the backlog of all initial certification cases and identify more than 10,000 case files of Student and Exchange Visitor Information System (SEVIS)-approved schools to be centralized at ICE Headquarters.

Strategic issues and major challenges revolve around integrating enforcement authorities to detect and eliminate vulnerabilities that harm our citizens, national security, and the economy. ICE will continue aggressive enforcement activities against egregious employers of unauthorized workers to promote a healthier economy, reduce potential threats to critical infrastructure facilities, and reduce the demand for illegal workers. ICE will prioritize leads and expand investigative efforts to locate those out-of-status visitors who pose a potential threat to the safety and security of the United States using data from SEVIS and US-VISIT.

ICE will also expand the 287(g) program, delegating authority to more State and Local Law Enforcement Officers to enforce limited immigration functions. As of December 2007, there were 34 current and active 287(g) Memorandums of Agreement in place. The program uses certified instructors from the Federal Law Enforcement Training Facility (FLETC) in Glynco, Georgia to train the Task Force Officers (TFOs) and Jail Enforcement Officers (JEOs) from the participating jurisdictions. In FY 2008, ICE received a \$26 million increase for State and local immigration enforcement support. This funding will be used for training of State and Local Law

Enforcement Officers and computer equipment to facilitate communication between law enforcement agencies and ICE.

### Key Accomplishments/Planned Accomplishments

In FY 2007, ICE:

- Increased the number of large scale operations involving egregious violators or employers with significant numbers of unauthorized aliens, and in total for the year made 863 criminal arrests and 4,077 administrative arrests for all worksite investigations;
- Trained an additional 426 State and Local Law Enforcement Officers to enforce Federal immigration laws, who processed over 21,900 criminal aliens;
- Assumed administrative control of the Human Smuggling and Trafficking Center (HSTC);
- Continued WMD training and conducted Project Shield America visits to manufacturers/distributors/exporters of dual-use/military technology;
- Increased coordination with the Departments of State (DOS) and Defense and the Intelligence Community on export enforcement and national security programs;
- Expanded the worksite enforcement and compliance enforcement programs, ICE Mutual Agreement between Government and Employers (IMAGE), the Document and Benefits Fraud Task Forces, Operation Community Shield, Border Enforcement Security Task Force (BEST), participation in Joint Terrorism Task Force (JTTF), and training for 287(g) program participants; and
- Realigned overseas staffing levels to better address the increasing need to disrupt and dismantle human trafficking and smuggling organizations and other criminal organizations based in Eastern Europe.

In FY 2008, ICE will:

- Expand the BEST program to the Northern Border;
- Initiate export enforcement programs dedicated to specific dual-use and military technology;
- Develop an employer outreach training curriculum and deliver training to Special Agents in the field on the IMAGE program;
- Expand the IMAGE employer outreach program from the headquarters level to the field level through locally-delivered presentations and speeches from IMAGE officials;
- Expand IMAGE training to increase the IMAGE outreach to provide employers with the latest information available to assist them in hiring and maintaining an authorized workforce;
- Expand the Compliance Enforcement programs by hiring additional special agents, program managers and support staff;
- Expand Firewall Operations and outbound bulk cash smuggling operations for domestic and foreign locations;
- Expand 287(g) training and provide an annual 287(g) e-training refresher course;
- Expand worksite and gang enforcement activities; and
- Expand the network of Trade Transparency Unit (TTUs) with additional foreign governments.

FY 2009 Projected Accomplishments:

- Increase national security and critical infrastructure investigations, especially at ports of entry and other sensitive facilities that attract terrorists and/or illegal and undocumented workers;
- Identify, target, dismantle, and counter methods and vulnerabilities exploited by criminal organizations engaged in highly profitable trade crimes;
- Strengthen the security of the southwest border and targets border vulnerabilities along the entire U.S. border;
- Reduce vulnerabilities of drug activity along the southwest border that assists efforts to dismantle and disrupt drug smuggling and trafficking organizations;
- Reduce vulnerabilities by providing information and intelligence to assist efforts to dismantle and disrupt human smuggling and trafficking organizations;
- Identify and implement new technologies for conducting Internet intercepts and remote video over Internet protocol surveillance;
- Establish national and regional ICE digital forensic laboratories; and
- Support the administration and the operations of the HSTC which will allow the center to carry out the functions mandated under the Intelligence Reform and Terrorist Prevention Act (IRTPA) to serve as the Government focal point for all information relative to human smuggling, human trafficking and clandestine terrorist travel; and allow for significant analytical enhancement to the information collected.

**International Affairs-** ICE received \$110.3 million for International activities in FY 2008:

- 110.3 million for International budget activities within the Salaries and Expenses appropriation;

OIA is the largest international investigative component within DHS, and interacts with the international community on behalf of ICE through investigations of immigration and customs violations, representation with international organizations, conducting international training and guiding repatriation efforts. OIA also manages the Visa Security Program (VSP) and the International Visitor's Program. The Visa Security operations conduct targeted, in-depth vetting of individual visa applications and applicants prior to issuance, and make recommendations on denials or revocations of individual applications when warranted.

OIA's law enforcement presence overseas assists in the collaboration with foreign counterparts to combat criminal and terrorist activities. In FY 2008, OIA's funding will focus on realigning overseas staffing levels to address the need of disrupting human trafficking, smuggling and other criminal organizations in Eastern Europe. OIA will also work to assist in the creation of additional TTUs.

Key Accomplishments/Planned Accomplishments

In FY 2007 ICE:

- Established TTUs locations in Columbia, Paraguay, Argentina and Brazil. Currently, OIA is in the process of establishing a TTU in Mexico. As a result of these additional TTUs, closed investigations have increased by 15%;
- The International Law Enforcement Academies (ILEA), OIA coordinated training for approximately 1,154 participants in areas of human trafficking, financial crimes, commercial fraud, child exploitation, intellectual property rights, fraudulent documents, and arms trafficking. Participants included local and national police, customs and immigration officers, and prosecutors;
- Expanded VSP overseas deployment to nine posts in eight countries and trained more than 40 special agents to serve as visa security officers. ICE investigations through this program resulted in the denial of more than 750 visas and the initiation of more than 140 investigations;
- Worked with the Mexican government to rescue 15 victims of human trafficking, training approximately 250 law enforcement officers from different Mexican agencies in the different areas Global Trafficking in Persons Program (G-TIP) investigations, such as cyber crimes, electronic surveillance, trafficking investigations, and victim assistance;
- Provided export control and related border security training to authorities in 7 countries;
- Provided bulk cash smuggling operational training to customs and law enforcement personnel in the Philippines. This bulk cash smuggling enforcement initiative resulted in several cash seizures with the assistance of U.S. Government personnel and assets;
- Conducted multilateral bulk cash smuggling enforcement operation with United Kingdom (U.K.) and Pakistan law enforcement authorities. These operations resulted in thirteen currency seizures in the United States and the U.K.;
- Funded and managed the upgrade of IT systems at 47 international locations in support of creating a standard operating environment to perform ICE and OIA operational and administrative functions;
- Coordinated data sharing with the Overseas Building Operations/DOS to ensure accurate data was reported to calculate ICE's share of the embassy costs under the Capital Security Cost Sharing Program. This reconciliation process prevented OIA from being charged for other agency's positions;
- Utilized the International Bulk Cash Smuggling Training Program to (working closely with OI) OIA provided at least 6 overseas training courses to more than 255 foreign law enforcement officers in 34 countries;
- Identified and implemented 3 global OIA staffing actions to optimize the international investigative goals;
- Developed OIA as an individual component and identified standard operating procedures, processes, and tools to enhance operations at domestic and foreign offices;
- Completed 43 end-of-tour rotations of employees and dependents from overseas, and filled 70 positions in support of strategic and operational goals;
- Thirteen attaché positions were recruited under the new dual 1811/1801 announcements and are in the process of selection to deploy in FY 2008;
- OIA has deployed DDOs to 3 countries and will complete deployment to 6 additional overseas locations in early FY08; and

- Funded and managed the upgrade of IT systems at 47 international locations in support of creating a standard operating environment to perform ICE and OIA operational and administrative functions.

In FY 2008, ICE will:

- Realign overseas staffing levels to address the increasing need to disrupt and dismantle human trafficking and smuggling organizations and other criminal organizations in Eastern Europe;
- Increase overseas deployment of visa security officers according to risk-based assessments;
- Expedite task force efforts to identify and investigate (Politically Exposed Persons) (PEP) in coordination with foreign governments;
- Assist in the creation of additional TTUs with interested foreign governments;
- Continue to support all ICE and other DHS international enforcement efforts; and
- Continue to expand the VSP program to new sites, and expand the VSP role in the Security Advisory Opinion (SAO) Process.

FY 2009 Projected Accomplishments:

- Support ICE and other DHS law enforcement related programs overseas;
- Participate in efforts to establish formal TTUs;
- Continue to expand the VSP program, consistent with the 5-Year Expansion Plan, by opening two new VSP offices in Istanbul, Turkey and Beirut, Lebanon;
- Identify, disrupt, and dismantle organizations involved in circumventing established laws and procedures designed to stem systemic vulnerabilities;
- Continue task force efforts to identify and investigate PEPs in coordination with foreign governments;
- Assign officers to overseas visa-issuing posts to enhance visa security by vetting visa applicants, providing expert advice and training to DOS Consular Officers;
- Increase its coverage of the highest risk visa activity worldwide;
- Deter, dismantle, and disrupt human smuggling organizations in Eastern Europe; and
- Improve and expand the global reach in the investigative areas of human trafficking, anti smuggling, money laundering, child exploitation, fraud and sensitive technology investigations, as well as reduce the threat associated with foreign nationals transiting the United States;
- Support the DHS international mission.

**Federal Protective Service (FPS)** - In FY 2008, FPS received authority to collect \$613 million in basic security and building security fees in order to provide law enforcement and security within GSA-owned and operated Federal facilities nationwide. These funds will allow FPS to maintain current services and staff.

Key strategic issues and major challenges for FPS in FY 2008:

- FPS will transition to a new mission focus by realigning its workforce using a risk-based model;

- FPS will maximize resources and refocus some of its activities towards setting security standards and measuring compliance linked to the protection of Federal property.

### Key Accomplishments/Planned Accomplishments

#### In FY 2007, ICE:

- Provided significant and appropriate law enforcement and security services for approximately 9,000 facilities;
- Monitored alarm accounts daily for intrusion detection, fire, and personnel protection;
- Responded to alarm activations, incidents on Federal property, weapons and explosives incidents, demonstrations and disturbances, accident-related incidents, and fire-related incidents;
- Served as the Federal lead for the Government Facilities Sector under the National Infrastructure Protection Plan (NIPP), directly supporting DHS overall goals and objectives with regard to enhancing the protection of our Nation's critical infrastructures and key resources; and
- Realigned its mission, workforce and resources to strengthen Federal physical security policies, procedures and standards that apply to Federal buildings and enhance oversight and inspection capabilities.

#### In FY 2008, ICE will:

- Improve the strategic methods used in identifying and reducing real and/or perceived threats faced by customers;
- Continue intelligence and information sharing with organizations as appropriate, to include other DHS agencies, State and local law enforcement, and building management;
- Provide law enforcement and security services at national security events that pose increased threats at or in the vicinity of Federal facilities, including the Democratic National Convention, the Republican National Convention, the Inauguration, Presidential Transition, and any related demonstrations, and protests; and
- Strengthen security standards representing the key elements for reducing threat and vulnerability levels at Federal facilities.

#### FY 2009 Projected Accomplishments:

- Complete risk-based security standards tied to intelligence;
- Continue to conduct building security assessments at federal buildings based on risk;
- Continue to monitor agency compliance with security standards by conducting annual inspections to ensure agency compliance at level 3 and level 4 buildings and consistent with risk;
- Continue to improve contract management by hiring up to 70 contracting officers to award necessary contracts; and
- Continue to work with client agencies to strengthen business processes and service.

**Automation and Modernization** – Prior to FY 2008, Atlas (Infrastructure) was the sole program funded under ICE Automation Modernization. Beginning in FY 2008, the ICE Automation Modernization program is being expanded to include the DROM, Mobile IDENT/ENFORCE, and Immigration Enforcement Systems Upgrades. In FY 2009, the ICE

Automation Modernization program will be further expanded to include specific discreet IT initiatives, including Homeland Enforcement and Communications System (HECS), Atlas - Tactical Communications, and the replacement of Financial Systems.

The Automation Modernization program will allow ICE to improve information sharing with DHS and across ICE organizations, strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

#### Key Accomplishments/Planned Accomplishments

From the inception of ICE's Automation Modernization appropriation in FY 2004 through FY 2007, ICE received \$104 million in non-expiring appropriations.

#### In FY 2007, ICE:

- Began establishing a stable, secure, integrated infrastructure as a foundation for all IT modernization efforts;
- Migrated ICE users to a common DHS-wide e-mail system;
- Deployed new desktops to 4,400 ICE users;
- Completed the migration of ICE sites to DHS OneNet;
- Prototyped an ICE data warehouse integrating information from disparate enforcement systems for enhanced reporting and decision support;
- Prototyped capability to rapidly share ICE information with other law enforcement agencies;
- Upgraded to the ICE Web application platform;
- Established a Single Sign On framework for applications supporting Active Directory authentication and enabled Single Sign On for ICE e-mail;
- Completed integration of the Architecture Engineering test lab; and
- Established program management oversight, including Independent Verification and Validation services.

#### In FY 2008, ICE will:

- Complete several initial infrastructure investments under Atlas – Infrastructure;
- Expand Automation Modernization to include DROM, Mobile IDENT/ENFORCE, and Immigration Enforcement Systems Upgrades;
- Expand the eTD system to include up to 25 participating countries and all non-participating countries (those countries who have not signed a Memorandum of Understanding (MOU) to use eTD for issuing electronic travel documents);
- Deploy EARM system to replace the Deportable Alien Control System (DACS) system and complete disposition procedures for the DACS system;
- Expand data sharing and integration with external agencies of the EARM system and implement enterprise reporting system for the DRO Executive Information Unit;
- Develop portable IDENT, a component of SBI, for use in the positive identification and processing of aliens in remote places; and

- Upgrade services (including systems design, development, and deployment) of new and enhanced IT systems that were needed to build out the ENFORCE infrastructure necessary to support multiple law enforcement communities, support initiatives such as SBI, and facilitate integration efforts such as the one between the Law Enforcement Service Center (LESC) and Office of Investigations.

FY 2009 Projected Accomplishments:

- Initiate the HECS program and the Financial System Replacement program.
- Develop HECS architecture and ICE high-level design, and establish Investigative Case Management development integration environment and testing environment;
- Integrate information from additional enforcement systems into the ICE data warehouse (Infrastructure); and upgrade the ICE tactical communications hub in preparation for full upgrade of ICE to federal standards for security and interoperability (Tactical Communications);
- Develop and deploy version one of the Detainee Location Tracking Module as part of the Bed Space and Transportation Management System, expand the ICE Data warehouse data capacity and reporting capability to support the DRO IT data, and expand Web Services to allow the Electronic Travel Document application to communicate with other internal or external applications; and
- Document processing of core financial functions that will be migrated to DHS Enterprise Solution, develop requirements to address functionality in current Federal Financial Management System (FFMS), and purchase software licenses.

**C. Resources Requested and Performance Impact**

ICE’s total budget request for FY 2009 is \$5,676 billion.

Enhancement Requests and Planned Achievements

ICE requests \$163.5 million in discretionary resources for program enhancements in the following key areas:

- **Additional Bed Space and Removal Costs.....\$46.0M (39 FTE)**  
This request provides 725 additional beds, staffing, and associated removal costs required to meet current demand and demand generated by increased enforcement activities. (275 additional beds will also be added through increased collections of the Immigration User Fee and through the Breached Bond Detention Fund.).
- **Cyber Crime .....\$5.7M (20 FTE)**  
This request funds positions within the Office of Cyber Crime Center (C3) and those programs directly supporting cyber crime investigations. With this staffing increase, ICE would increase investigations of cyber related crimes related to identity and benefit fraud, child exploitation, money laundering as well as supporting other investigations by providing digital forensics and electronic monitoring.

- **National Security/Critical Infrastructure Investigations.....\$11.8M (36 FTE)**  
 This request funds positions to increase national security and critical infrastructure investigations especially at ports of entry and other sensitive facilities that attract terrorists and/or illegal and undocumented workers.
- **Commercial Fraud/Intellectual Property Rights (IPR).....\$4.6M (14 FTE)**  
 This request funds positions for priority Commercial Fraud, IPR, TTU and requisite supporting investigative programs at the C3. These resources will be used to identify, target, counter, and dismantle methods and vulnerabilities exploited by criminal organizations engaged in highly profitable trade crimes, such as trafficking counterfeit merchandise and pharmaceuticals.
- **Outbound Enforcement.....\$1.0M (3 FTE)**  
 This request funds positions to increase outbound enforcement support that prevents arms and strategic technologies, deemed exports, contraband, and money from leaving the United States. This request will increase outbound enforcement investigations especially at Ports of Entry, the border, and sensitive facilities that are vulnerable to illegal procurement and export of sophisticated U.S. technology and weapons.
- **Visa Security Program.....\$3.4M (3 FTE)**  
 This request funds deployment of two additional overseas Visa Security Units in high-risk locations such as Istanbul, Turkey and Beirut, Lebanon.
- **Security Management Unit/ Workforce Integrity.....\$7.1M (19 FTE)**  
 This request would fund law enforcement positions and support staff within the Office of Professional Responsibility, including \$4.1M to support workforce integrity efforts and \$3M for positions in support of the Security Management Unit that is responsible for centralization, management, and operational oversight of ICE internal security functions.
- **State and Local Law Enforcement Support.....\$12.0M (7 FTE)**  
 The request funds \$2.67 M in initial training, training travel, and annual refresher training for 200 State and Local Law Enforcement Officers under the 287(g) program, which serves as a force multiplier for ICE immigration enforcement, with ICE training, certifying, and supervising State and Local Law Enforcement Officers. The request would also fund \$8M for necessary IT connectivity for state and local participants and \$1.33M for other costs within ICE to support program growth.
- **Automation Modernization..... \$57.0M (4 FTE)**  
 This request helps ICE build its information technology infrastructure, specifically efforts aimed at modernizing HECS – ICE’s portion of the DHS investigative case management system, ATLAS – Infrastructure and Tactical Communications, DROM, and ICE’s transition to the DHS financial system. Requested resources will advance efforts to replace outdated, unreliable systems that challenge IT information-sharing.
- **Co-Location of ICE Facilities..... \$12.3M (1 FTE)**

This request funds a portion of first-phase requirements to consolidate ICE core mission functions in cities where ICE currently occupies multiple locations. The initiative proposes to facilitate ICE-wide physical integration through co-location of facilities that provide safe, secure, and efficient workspace conducive to achieving the ICE mission.

- **Human Resource Workforce Increases ..... \$0.8M (5 FTE)**  
This funding will strengthen the Office of Human Capital to provide more customized service, confidence in information, and consistent handling of ICE-related personnel matters.
  
- **Training Consolidation and Integration ..... \$1.8M (14 FTE)**  
This funding will facilitate the consolidation of all ICE training coordination and oversight, including improved training delivery and support at both the ICE Academy and the Leadership Development Center.

**Summary of FY 2009 Enhancements (dollars in thousands):**

|   | Legal        | OI            | OIA          | Intel      | DRO           | Automation    | Total          |
|---|--------------|---------------|--------------|------------|---------------|---------------|----------------|
| Co-Location of ICE Facilities           | 918          | 6,166         | 196          | 280        | 4,740         |               | 12,300         |
| HR Workforce Increases                  | 60           | 401           | 13           | 18         | 308           |               | 800            |
| Training Consolidation and Integration  | 134          | 902           | 29           | 41         | 694           |               | 1,800          |
| Domestic Visa Security                  |              |               | 3,400        |            |               |               | 3,400          |
| Cyber Crime                             |              | 5,700         |              |            |               |               | 5,700          |
| Commercial Fraud/IPR                    |              | 4,600         |              |            |               |               | 4,600          |
| Critical Infrastructure                 |              | 11,800        |              |            |               |               | 11,800         |
| Outbound Enforcement                    |              | 1,000         |              |            |               |               | 1,000          |
| Workforce Integrity Investigations/ SMU | 530          | 3,557         | 113          | 162        | 2,738         |               | 7,100          |
| Additional Bed Space/Staffing           | 285          | 236           | 7            | 11         | 45,461        |               | 46,000         |
| 287(g)                                  | 1,065        | 7,348         | 135          | 193        | 3,259         |               | 12,000         |
| HECS (formerly TECS) Replacement        |              |               |              |            |               | 15,700        | 15,700         |
| Atlas                                   |              |               |              |            |               | 13,000        | 13,000         |
| Tactical                                |              |               |              |            |               | 10,000        | 10,000         |
| DRO IT Modernization                    |              |               |              |            |               | 11,300        | 11,300         |
| Financial System                        |              |               |              |            |               | 7,000         | 7,000          |
| <b>Total ICE Enhancements</b>           | <b>2,992</b> | <b>41,710</b> | <b>3,893</b> | <b>705</b> | <b>57,200</b> | <b>57,000</b> | <b>163,500</b> |

**Detention and Removals Operations (DRO)** – ICE requests \$3,002.8 million for DRO in FY 2009:

- \$2,579.6 million in the five Detention and Removal budget activities within S&E;
- \$241.5 million for Legal Proceedings;
- \$75.0 million in Breached Bond Detention Fund account; and
- \$103.5 million in the Immigration User Fee account.

The FY 2009 request will provide for 1,000 additional beds and improve detention management and IT systems. The funds will also enhance performance by:

- Maintaining the CAP teams from the emergency FY 2008 funding allocated in the following cities: Chicago, Dallas; El Paso; Houston; and San Antonio. This minimizes the need for DRO detention and enhances the ability to remove these aliens upon release from incarceration. These improvements will reduce the fugitive population and ensure aliens have full recourse of law during proceedings;

- Centralizing Ticketing Operations and increasing air transportation support. This includes the use of the JPATS and leasing of aircrafts for alien removals. These efforts will enhance the effectiveness and efficiency of ICE's removal operations; and
- Allowing DHS to hire personnel along the enforcement continuum in FYs 2007 and 2008, including Border Patrol Agents, Special Agents, Deportation Officers, and IEAs.

Much of ICE's FY 2009 request funds requirements included in Homeland Security Presidential Directives and legislation. The Department of Homeland Security's statutory mission as expressed in the Homeland Security Act of 2002, together with the statutory mandate to carry out corresponding functions transferred to ICE, include the prevention of terrorist attacks within the United States and the reduction of the vulnerability of the U.S. to terrorism, drug interdiction and trafficking. The ICE FY 2009 Budget accounts for needed enhancements to fulfill these agency obligations, including analyzing seized electronic devices and digital media using methods needed to handle and preserve that evidence for criminal prosecution, fulfilling obligations imposed by the USAPATRIOT Act to create laboratories and personnel to support the National Digital Forensic Laboratory, and protecting critical infrastructure through vigorous investigation of criminal and terrorist financial networks.

In addition to requesting new funds in FY 2009, ICE is also implementing some reform initiatives to increase operating and performance efficiencies. ICE began additional JPATS routes and charter flights to Central America, which are helping maximize the use of detention space and increase the flexibility of the charter and JPATS flight schedules. A Detention Operations Coordination Center was created to maximize the efficiency of air and ground transportation, and eTDs are now being used, which decrease detention times and costs by accelerating the travel document process.

**Office of Investigations (OI)** – ICE requests \$1,871.3 million for Investigations activities in FY 2009:

- \$1,679.2 million in the Investigations budget activities within the Salaries and Expenses appropriation;
- \$61.9 million in the Intelligence PPA within the Salaries and Expenses appropriation;
- \$119.6 million in the SEVP account; and
- \$14.1 million in the Immigration User Fee account.

OI will improve the enforcement of immigration and trade enforcement, enhancing homeland security and deterring terrorists and other criminals from entering the United States. OI will uproot the infrastructure within the criminal continuum that:

- Facilitates illicit transnational and domestic travel;
- Illegally manufactures, facilitates and sells fraudulent identity documents, facilitates the fraudulent acquisition of immigration benefits;
- Knowingly hires unauthorized workers;
- Exploits victims for the purpose of commercial sex or forced labor; and
- Launders criminal proceeds.

The FY 2009 request will be used to improve performance by:

- Strategically enhancing OI by requesting resources for a continuum of operations so there will be no strain on supporting programs;
- Training additional State and local law enforcement personnel under Section 287(g), and improve the LESC's response time to inquiries from State and local law enforcement personnel; and
- Supporting State and local law enforcement by aggressively investigating all aspects of local criminal behavior exploiting vulnerabilities at the border.

OI's primary measure for performance is the percentage of investigations that have resulted in an enforcement consequence. Annual targets for this measure were developed in FY 2003, based on data drawn from several data-reporting sources. OI transitioned to a new consolidated data system in FY 2004, making FY 2005 the first complete year of collecting data in a uniform manner through the use of a single source. However, in FY 2006, OI discovered that a number of investigative cases with an enforcement consequence had been affected by the unapproved inclusion of administrative arrest data into the criminal arrest database. OI initiated a certification process to correct the errant figures and targets for FY 2007 and beyond. An enhancement of the data system was also made to accommodate, and separately account for, both criminal and administrative arrests in the system.

**International Affairs** – ICE requests \$128.8 million for International activities in FY 2009:

- 128.8 million in the International budget activities within the Salaries and Expenses appropriation.

The VSP program extends the border overseas to prevent terrorists, criminals, and other ineligible applicants from receiving U.S. visas. The program is the first-line of defense in preventing terrorists and other criminals from gaining access to the United States through a legally obtained visa. The integration of experienced ICE law enforcement officers in the visa process maximizes its use as a counterterrorism tool through the generation of new watch list entries, intelligence reports, investigative leads, and identification of patterns in visa fraud.

OIA's long-term plan is to expand the Visa Security Units to the 32 highest-risk visa issuing posts. According to the plan, VSP will cover approximately 75% of the highest risk visa activity posts by 2013. The FY 2009 funding will allow OIA's planned deployments of two additional Visa Security Units in Istanbul, Turkey and Beirut Lebanon; both designated as high risk locations.

The OIA performance impact strengthens border security, interior enforcement, and screening coordination. Performance results include a reduction in visa issuance to malafide aliens, identification of "not yet known" threats to national security that traditional screening systems do not detect, and the initiation of important interior enforcement investigations that result from overseas VSP efforts. The VSP activities also prevent terrorist and criminals from obtaining legitimate travel document and denies immediately those who intend to do us harm from ever reaching the U.S. borders.

**Federal Protective Service (FPS)** – ICE requests 950 positions, 950 FTE, and the authority to spend its fees (estimated at \$616 million) for FY 2009.

The FY 2009 request provides for a basic security fee increase of \$3 million (or \$0.01 per square foot) to fund the FPS overhead costs. FPS will continue to implement and maintain the new billing system being established in FY 2008 that will enable client agencies to include these charges and reduce the use of individual reimbursable agreements to obtain these services. The building specific fee is charged to all building tenants based on the recurring security requirements specific to a particular building, and is based on the costs for contract security guards and security systems programs. The contract security guard program includes: (1) access control to facility entrances and exits; (2) employee and visitor identification checks; (3) monitoring security equipment; and (4) roving patrols of the interior and exterior of Federal facilities. The contract security guard represents the first line of defense against potential criminals and terrorists of Federal workplaces. The security system program includes the purchase, installation, and maintenance of security equipment, (cameras, alarms, magnetometers and x-ray machines). The security equipment is based on the identified mandatory projects in the security surveys and standard replacement schedules.

The FPS strategic goal continues to be the protection of Federal facilities and employees through a comprehensive law enforcement and security program. FPS security operations include regular building security assessments of Federal facilities, nationwide communications, alarm monitoring, and dispatching services, and administration of contract guards within Federal facilities.

**Automation Modernization** – ICE requests \$57 million and 7 positions for Automation Modernization in FY 2009:

- \$15.7 M for the HECS Replacement which supports the joint venture with CBP to replace the TECS system that complements the Investigative Case Management system and includes case file management, link analysis, evidence management, and other investigative capabilities;
- \$13.0 M for Atlas Infrastructure – Continues modernization of outdated ICE IT and its alignment with DHS Enterprise Architecture, resulting in improved workforce productivity and the enhanced ability to share ICE mission enforcement information with other law enforcement partners;
- \$10.0 M for Atlas Tactical Communications – Secures wireless communications for investigation and detention personnel to improve coordination both within ICE and between other law enforcement partners;
- \$11.3M for DROM – Implements bed space management, location tracking of aliens, and integrated removal applications to reduce average time that aliens are held in custody, thus saving time preparing travel documents, lowering detention costs, and accommodating increased deportation volumes; and
- \$7.0 M for Replacement of Financial System - Completes ICE's migration to the new DHS Financial System, referred to as the Transformation and Systems Consolidation (TASC) Baseline, and improve ICE's financial service.

The FY 2009 request will be used to improve performance within Automation Modernization by allowing ICE to build an information technology infrastructure which would support a more secure environment and foster better communication and information sharing between other law enforcement partners. ICE will also use these funds to migrate from outdated IT systems and also complete migrations to new financial system. One of ATLAS' primary performance indicators measures the percent of investigative and enforcement personnel with access to Decision Support System data marts. This ensures interoperability among ICE systems. The ATLAS Infrastructure will also continue it's modernization effort to ultimately allow ICE IT alignment with the DHS Enterprise Architecture.

**D. Program Performance Highlights, Resources and Alignment to Strategic Goals<sup>1</sup>**

*Note: The FY 2008 Enacted level includes \$526.9 million in emergency funding provided in P.L. 110-161.*

For each major program, the performance goal, alignment to DHS goals and objectives, total dollars and FTE, and main performance measure/s are shown below. For many of the programs, more performance information may be found on the OMB web site Expectmore.gov (program names may differ slightly from those used in this document). (Note: FY 2007 dollar amounts in Section D are extracted from the Future Years Homeland Security Program (FYSHSP) and reflect revised enacted levels rather than actuals.)

<sup>1</sup> 1/ FY 2007 Performance data reflects revised enacted funding and FTE levels.

### Performance Plan Measures

|  |  |  |  |  |  |  |
|--|--|--|--|--|--|--|
| <b>Measure:</b> Effectiveness of Federal Protective Service (FPS) operations measured by the Federal Facilities Security Index.  |  |  |  |  |  |  |
| <b>Description of Measure:</b> The Federal Facilities Security Index quantifies the overall effectiveness of FPS operations in accomplishing annual performance measurement goals. The index is made up of three components: (1) how effective the FPS is in implementing security threat countermeasures (by comparing actual countermeasure implementation to planned implementation); (2) how well the countermeasures are working (by testing of countermeasures); |  |  |  |  |  |  |

and (3) how efficient FPS is in responding to incident calls for law enforcement by measuring response time. A security index of one (100%) or greater reflects accomplishment of, or exceeding, performance targets. A security index of less than one reflects failure to meet performance goals to protect government employees and the public from acts of terrorism and other illegal activities, and reduce infrastructure vulnerability from acts of terrorism or other criminal activity. FPS will undertake a review of its measures in FY 2007.

|                     |         |          |         |         |         |         |
|---------------------|---------|----------|---------|---------|---------|---------|
| <b>Fiscal Year:</b> | FY 2004 | FY 2005  | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>      | None    | baseline | 100%    | 100%    | 100%    | 100%    |
| <b>Actual:</b>      | None    | 92%      | 66.5%   | 79%     | N/A     | N/A     |

**Program: International Affairs**

**Performance Goal:** Reduce international criminal and terrorist activities by partnering with foreign and domestic counterparts.

**DHS strategic objectives supported and % allocation of activities:**

|                     |           |           |           |           |           |           |
|---------------------|-----------|-----------|-----------|-----------|-----------|-----------|
| <b>Fiscal Year:</b> | FY 2004   | FY 2005   | FY 2006   | FY 2007   | FY 2008   | FY 2009   |
| <b>\$ Thousands</b> | \$311,220 | \$415,295 | \$139,719 | \$140,791 | \$140,323 | \$159,930 |
| <b>FTE</b>          | None      | 2,343     | 391       | 441       | 441       | 445       |

<sup>1</sup> 1/ FY 2007 Performance data reflects revised enacted funding and FTE levels.

**Performance Plan Measures**

**Measure:** Number of visa application requests denied due to recommendations from the Visa Security Program.

**Description of Measure:** The Visa Security Program (VSP) has three primary mission objectives to enhance national security and public safety; 1) by extending the border of the U.S. overseas, Visa Security Officers (VSOs) work proactively to identify and counteract threats before they reach the United States; 2) through proactive law enforcement work, VSOs identify the not - yet - known threats to homeland security; 3) by utilizing all available tools and authorities, VSOs maximize the law enforcement and counterterrorism value of the visa process, taking it beyond the visa decision to address the underlying threat that the visa applicant potentially represents. This measure captures the instances in which a VSO provides input, advice, or information during adjudication that results in a consular officer's decision to deny a visa to an ineligible applicant.

|                     |         |         |         |         |         |         |
|---------------------|---------|---------|---------|---------|---------|---------|
| <b>Fiscal Year:</b> | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>      | None    | None    | None    | None    | 762     | 770     |
| <b>Actual:</b>      | None    | None    | None    | 754     | N/A     | N/A     |

**Program: Investigations**

**Performance Goal:** Prevent the exploitation of systemic vulnerabilities in trade and immigration that allow foreign terrorists, other criminals, and their organizations to endanger the American people, property, and infrastructure.

**DHS strategic objectives supported and % allocation of activities:**

|                     |             |             |             |             |             |             |
|---------------------|-------------|-------------|-------------|-------------|-------------|-------------|
| <b>Fiscal Year:</b> | FY 2004     | FY 2005     | FY 2006     | FY 2007     | FY 2008     | FY 2009     |
| <b>\$ Thousands</b> | \$1,042,462 | \$1,427,133 | \$1,528,794 | \$1,535,748 | \$1,693,606 | \$1,840,336 |
| <b>FTE</b>          | None        | 7,845       | 7,840       | 8,384       | 8,797       | 9,249       |

<sup>1</sup> 1/ FY 2007 Performance data reflects revised enacted funding and FTE levels.

**Performance Plan Measures**

|  |         |          |         |         |         |         |
|--|---------|----------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of closed investigations which have an enforcement consequence (arrest, indictment, conviction, seizure, fine or penalty).   |         |          |         |         |         |         |
| <b>Description of Measure:</b> More effective immigration and trade enforcement will contribute to enhanced homeland security as well as to greater deterrence. One method for measuring this effectiveness is to determine the extent to which criminal investigations are completed successfully, i.e., closed with an enforcement consequence. However, although many criminal cases arise that are worth pursuing, the potential of an investigation is not known at its inception; therefore, it is to be expected that many cases will be closed each year without an enforcement consequence when it is determined that the investigation is no longer viable. In addition to getting criminals off the street, successful investigations also expose and remove, or contribute to the elimination of, vulnerabilities in various aspects of trade and immigration, i.e., the ways in which criminals manage to evade safeguards that are supposed to prevent their illegal activity, and areas in which such safeguards are lax or do not exist. |         |          |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005  | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>   | None    | Baseline | 38.5%   | 36.5%   | 36.6%   | 36.7%   |
| <b>Actual:</b>   | None    | 37.9%    | 36.4%   | 35.8%   | N/A     | N/A     |

# BUDGET REQUEST AND SUPPORTING INFORMATION

## TRANSPORTATION SECURITY ADMINISTRATION AVIATION SECURITY APPROPRIATION

### I. Appropriation Overview

#### A. Mission:

The Aviation and Transportation Security Act (ATSA), Public Law 107-71, enacted on November 19, 2001, established the Transportation Security Administration (TSA) to protect the transportation system and ensure the freedom of movement for people and commerce. The Aviation Security Appropriation consists of programs whose primary focus is to secure aviation transportation. The path to achieving this mission has evolved in the years since the September 11th attacks. Enhancements in aviation security have included emphasis in explosives detection training and technology, modifications to the prohibited items list, and changes to TSA security screening protocols. The 9/11 Bill further strengthens Aviation Security through its authorization of extensive Air Cargo screening.

The FY 2009 request represents a continuation of the important initiatives commenced in FY 2007 and 2008, including annualization of FY 2007 Air Cargo programs, annualization of Visible Intermodal Protection and Response (VIPR) and Transportation Security Officer programs expanded in 2008. This includes the work of our Transportation Security Officers (TSOs) Behavior Detection Officers (BDOs), who utilize the Screening Passengers by Observation Techniques (SPOT), and Aviation Direct Access Screening Program (ADASP), that further bolsters aviation security through random and unpredictable screening of airport employees and facilities. In addition, TSA expects to make substantial progress in FY 2009 towards achieving 100 percent screening of cargo on passenger aircraft.

#### B. Budget Activities:

The Aviation Security appropriation includes two distinct components: TSO Operations and Equipment; Aviation Direction and Enforcement.

**TSO Operations and Equipment** - TSO Operations and Equipment includes the Programs, Projects and Activities (PPA's) that support the pay, training, outfitting, and operating costs for the TSO workforce. Funding is also included for checkpoint support, purchase, installation, and maintenance of screening equipment to include explosives detection systems (EDS) and explosives trace detection machines (ETD), and related operational integration activities.

**Aviation Direction and Enforcement** - Aviation Direction and Enforcement includes activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the nation's commercial airports. Funding requested under this decision unit supports air cargo and airport/airline regulation compliance through inspections, international programs, and reimbursements provided to State and local law enforcement for support provided at commercial airport checkpoints, as well as the airport management and direction staff and airport

administrative support. The FY 2009 request also eliminates the Federal Air Marshals Service (FAMS) appropriation as a separate funding entity and incorporates it as a single PPA within this decision unit.

### **C. Budget Request Summary:**

The Transportation Security Administration requests 52,244 positions, 49,697 FTE, and \$5,289,810,000 for Aviation Security in FY 2009. The total adjustment-to-base is minus 30 positions, plus 800 FTE and \$481,070,000. There is no program increase.

### **D. PPA Consolidation Proposal:**

The FY 2009 request is presented in a structure that more closely mirrors the current organization. As TSA's mission has grown, the budget structure has not been adjusted to accurately reflect the alignment of resources to functions. Putting like programs together into one PPA along with the supporting personnel will give a total picture of the cost of a program.

The FY 2009 request aligns operational program and personnel funding under the same PPA. In many cases, personnel and the supporting funds have been shifted out of the Headquarters Administration PPA and now reside with the program they support. For example, FTE associated with the training of screeners are now shown on the same line as the Screener Training and Other PPA. This provides a total picture of the cost of TSA programs and is structured much like the Transportation Threat Assessment and Credentialing (TTAC) appropriation.

Human Capital Services is a new PPA in the Transportation Security Support Appropriation that combines funding previously supporting HR Services (Aviation) and HR activities within HQ Administration (Transportation Security Support). Similarly, Information Technology activities previously funded under Airport Management, IT and Support (Aviation) have been combined with IT activities in the Support Appropriation.

TSA also proposes to consolidate two PPA's in the Aviation Security Appropriation budget – Aviation Regulation and Enforcement, and Air Cargo. This merger would recognize that the Air Cargo PPA is primarily regulatory in nature and would allow for funding the nearly 1,000 Aviation Security Inspectors (ASI) and Cargo Aviation Security Inspectors (CASI) in the same PPA and often share work space at the federal airports. Sourcing ASI and CASI payroll and operating expenses in the same PPA would give TSA a national response capability to respond to or focus on any national special security event, security incident, heightened security alerts, or natural disasters, with a cadre of trained aviation inspectors. It would also allow management the flexibility to shift the focus of these inspectors between cargo and general inspection duties while still maintaining the overall ASI-CASI workload implied in the current funding allocations. TSA would continue to provide inspection plans and capture ASI/CASI workload for display in traditional budget documents and reports. TSA will also continue to provide granularity on the specific pieces of the PPA's that were provided in past year budgets to support program accountability and external oversight of these activities.

The FY 2009 request also eliminates the Federal Air Marshals Service (FAMS) appropriation as a separate funding entity and incorporates it as a single PPA within TSA's Aviation Security

appropriation. This is an important step in fully implementing the goals, objectives and vision of the Department's Second Stage Review, and completes the integration of the FAMS into TSA's aviation security and enforcement missions. In addition, the realignment better reflects TSA's organization and management structure and will enable the agency to more rapidly apply its law enforcement and related resources to meet emerging threats.

TSA requests \$151.3 million for this activity. This \$7.9 million increase includes a \$3.4 million realignment of TSO Pay, Compensation and Benefits (PC&B) to fund the deployment of the Travel Document Checker (TDC) program to SPP airports, \$2.0 million to annualize deployment of the Screening Passengers by Observation Techniques (SPOT) and Aviation Direct Access Screening Program (ADASP), and \$2.5 million for pay and non-pay COLA.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Screening Partnership Program (SPP) allows an airport operator to have screening services performed by a private screening company. The contractor must perform under federal oversight and the contracted screeners must perform to equal or higher performance levels than federal TSOs. TSA developed the SPP based on two year operational experience with the Private Screening Pilot Program (PP5), key lessons learned from evaluation studies, and input from internal subject matter experts and external stakeholders.

The original five PP5 airports (San Francisco International, Kansas City International, Greater Rochester International, Jackson Hole Airport, and Tupelo) elected to remain in the SPP with qualified contractors performing screening functions.

These additional airports have been awarded SPP contracts:

- Sioux Falls Joe Foss Field Regional Airport, SD (FSD)
- Key West International Airport (EYW) / Marathon Key Airport, FL
- 34<sup>th</sup> Street Heliport in New York City, NY
- Charles Schulz – Sonoma County Airport, CA (STS)
- Gallup Municipal Airport in Gallup, NM (GUP)
- Roswell Industrial Airport in Roswell, NM (ROW)

Marathon airport was being transitioned to the SPP program when the carrier decided to discontinue service. It was subsequently removed from the Key West contract.

Significant accomplishments in FY 2007 include:

- Streamlined the SPP acquisition process by eliminating the closed "Qualified Vendors List," making it easier for new vendors to compete for SPP contracts;
- Implemented a new Quality Assurance and Surveillance Plan with stronger performance measures;
- Transitioned EYW, STS, GUP, ROW, and 34th Street Heliport to private screening;
- Integrated ADASP, TDC, SPOT, and VIPR programs at SPP airports;
- Established DHS Safety Act Certification process for SPP contractors; and
- Coordinated with DHS to study air cargo security at San Francisco International Airport.

FY 2008 planned accomplishments include:

- Efficiently award contracts for airports applying to join SPP and ensure contractors deliver services per Aviation and Transportation Security Act (ATSA) requirements;
- Monitor the Quality Assurance Surveillance Plan and make modifications to ensure the objectivity of the metrics;
- Implement security requirements in existing contracts as changes are made to Standard Operating Procedures (SOP) or new security programs are developed; and
- Support the Department of Homeland Security Science and Technology office as they receive Safety Act Designation and Certification applications.

In FY 2009, TSA will continue FY 2008 planned accomplishments.

The Transportation Security Administration requests \$2.7 billion for this activity. This is an increase of \$79.9 million, of which \$37.8 million is for pay cost of living adjustments (COLA), and \$42.1 million to annualize full-year cost of the expansion of the Screening Passengers by Observation Techniques (SPOT) program (330 FTE) and the Aviation Direct Access Screening Program (ADASP) (375 FTE) for positions first appropriated in FY 2008. The overall 205 FTE increase represents the net of the annualizing of SPOT and ADASP and the FTE reduction for the final year of the original TSO career progression program started in FY 2007, and other efficiencies.

## **CURRENT SERVICES PROGRAM DESCRIPTION:**

Passenger and baggage screening protects commercial air travelers by preventing dangerous or deadly objects that individuals are attempting to smuggle onto aircraft either on themselves or in their carry-on or checked baggage. In FY 2007 the TSO workforce met the challenge of facing the additional threat of liquid explosives with great efficiency while maintaining security. This PPA funds 45,643 FTE comprised of approximately 46,909 TSOs, Lead TSOs, Supervisory TSOs, and approximately 1,100 Security Managers.

The TSA screening process must strike the appropriate balance between preventing security breaches and maintaining the efficient movement of law-abiding passengers through the security checkpoints. At the time of passenger check-in, TSOs use various types of electronic detection and imaging machines for this purpose, including X-ray machines, explosives trace detection equipment, walk-through metal detectors and hand-held metal detectors. At the checkpoints, TSOs may perform physical searches of carry-on baggage and pat-down searches of airline passengers, crew and airport employees, in conjunction with the use of behavior recognition techniques and the validation of travel documents.

By law all TSOs, both private and federal, are required to be U.S. citizens, pass a background investigation, and have a high school diploma, a general equivalency diploma, or experience that TSA has determined is sufficient to perform these duties. They must pass training, be certified to use the detection machines employed in their jobs and are also subject to periodic training and testing. Failure to pass any phase of training or a certification examination is grounds for termination of employment.

### **Career Progression**

FY 2007 saw the continuation of the Career Progression Program, which adds significant additional security while enabling widespread career growth and professional development opportunities for high-performing TSOs, which will also reduce attrition. The program:

- Added a new E Band to the TSO compensation scale above the existing entry-level D Band. TSOs are eligible based on a minimum of two year's experience, performance and additional training/duties.
- Implemented specialized technical career tracks – Master and Expert Transportation Security Officers – Master and Expert TSOs are Behavior Detection Officers (BDO) or Security Training Instructors (STI) compensated at higher band levels. BDOs screen passengers by observation techniques (SPOT) to identify potentially high-risk individuals based on involuntary physical and physiological reactions. STIs perform training instruction based on national and local training programs.
- Provided other new skill sets and training to TSOs which have dramatically increased their abilities. Programs such as the Aviation Direct Access Screening Program (ADASP), Visible Intermodal Protection and Response (VIPR), SPOT and the Travel Document Checker program (TDC) have enhanced TSOs' security expertise. TSOs are also eligible to apply for positions as Bomb Appraisal Officers (BAO), although the Explosive Ordnance Disposal (EOD) or civilian-equivalent training prerequisite of the program is met by few TSOs.

In FY 2008, TSA expects the Career Progression program will continue with the establishment of Equipment Maintenance Technicians and Coordination Center Officers. The Equipment

Maintenance Technician will enable TSOs with technical expertise to progress and will generate efficiencies by allowing TSA to rely less upon maintenance contracts and more quickly resolve basic maintenance issues. The Coordination Center Officers will facilitate smooth communications and will assist with analyzing information on threats and responding to crises.

As emerging threats are identified and new technical measures are implemented, this robust and scalable career path is essential to TSA's success and our efforts to improve aviation security. The career progression structure allows TSA to distinguish and retain the more experienced, top performing and better trained TSOs. Test results have shown a distinct connection between longevity and performance, including detection ability, screening efficiency and customer service. As threats evolve and increase in complexity, the advanced skills of our workforce are necessary to stay ahead of those threats.

TSA firmly supports the notion of maintaining a smaller, more capable workforce. When a shift in security programs due to threats becomes necessary or if further efficiencies are realized, TSA will look towards appropriate security enhancements, such as training a larger proportion of the TSO workforce in behavior detection techniques.

### **Workforce Initiatives**

TSA determines and allocates FTE to the airports through a process referred to as the Staffing Allocation Model (SAM). During the SAM process for the 2008 fiscal year, TSA was able to identify operational and efficiency gains through better scheduling, the increased use of part-time employees, technology improvements and management practices. These efficiencies led to expansions of workforce initiatives, most within existing resources, which have significantly strengthened transportation security. The workforce initiatives include:

- Implemented the TDC in over 250 smaller airports in FY 2007 without adding personnel. TSA will fund the expansion of this program to all airports in FY 2008 by utilizing both the efficiencies gained internally and using funds requested in the FY 2008 Budget. Specifically, through savings accrued through adjustments in the SAM 2008, TSA was able to fund 1,033 additional FTE for TDC. This program ensures only passengers with authentic boarding passes access the sterile areas of airports and aboard aircraft, adds an additional layer of aviation security while extending the span of control of the TSA checkpoints, and allows for Sensitive Security Information regarding threats, watch lists, etc., to be made available to TSOs in the document checking process.
- Completed planned deployment of BDOs in the SPOT program. This essential program adds an important layer of security in all areas of an airport. The program provides a non-intrusive means of identifying potentially high-risk individuals who exhibit behaviors indicative of inordinate levels of stress, fear and/or deception which could possibly suggest intentions of terrorism and/or criminal activity. Through the SAM allocation process, TSA has been able to almost triple the size of the SPOT program in FY 2008 within base resources, while also adding 660 positions/ 330 FTE in the FY 2008 appropriation.
- Completed planned deployment of the Bomb Appraisal Officer (BAO) program. BAOs are highly skilled individuals which have undergone training in the disposal of explosive ordnance. This program strengthens the security of the Nation's transportation systems

by providing frequent interaction and formal training to TSOs to increase their ability to recognize potential IEDs and IED components. This provides preventative measures against Improvised Explosive Devices (IEDs) while also reducing costly airport delays and closures. The BAO Program was formally implemented to 107 airports in FY 2007.

- Launched wide deployment of Visible Intermodal Protection and Response (VIPR) Teams. These teams consist of TSOs, BDOs, Transportation Security Inspectors (TSIs) and Federal Air Marshals (FAMS). Their duty is to screen passengers, look for suspicious behavior and act as a visible deterrent in multiple transportation sectors, including buses, mass transit and airports.
- Implemented the Aviation Direct Access Screening Program (ADASP). The objective of ADASP is to establish uniform procedures and standards for TSOs, to screen individuals, their accessible property and vehicles upon entering a direct access point screening location, and conduct visual inspections of aircraft with the following goals:
  - Screen and inspect for the presence of explosives, incendiaries, weapons, and other prohibited items, improper airport ID media, and items identified through specific intelligence information
  - Conduct screening on a random and unpredictable basis varying location, type of procedures and duration

The ADASP program is measured in terms of effort, not individual positions. By examining scheduling practices and using part-time employees, TSA was able to generate FTE efficiencies through its allocation process and fund the approximately 900 ADASP FTE program within its base resources, which was further augmented by the FY 2008 appropriation that will add 750 additional FTE by FY 2009.

- Implemented the Aviation Screening Assessment Program (ASAP) nation-wide. The mission of ASAP is to measure TSO screening performance using realistic and standardized test scenarios to improve aviation security and achieve a national TSO assessment measurement. This national baseline measurement will be achieved by conducting a total of 4,800 annual tests. ASAP test results will provide critical information to TSA leadership that will help with the improvement of aviation security and the identification of vulnerabilities across screening operations. Through continuous data analysis, recommendations, courses of actions and potential impacts will be provided to various stakeholders in the organization.

### **Other Accomplishments**

TSA has also accomplished or plans on accomplishing the following:

- Conduct an airport employee screening pilot program at seven airports in accordance with the FY2008 Appropriations Bill;
- Reduce overtime usage significantly, resulting in the re-alignment of funding and FTE to specialized screening programs listed above;
- Increase over 800 FTE of work hours dedicated for training through the SAM '08 efficiencies;

- Establish a TSO Referral system to attract TSO candidates and facilitate recruitment and increase retention. This program was based on an idea from TSA's employee-driven Idea Factory;
- Increased the use of part-time employees from 14 percent in FY 2006 to 24 percent in FY 2008, which significantly increased the overall efficiency of the workforce;
- Continued TSA's innovative and successful PASS pay for performance system;
- Provided all part-time employees with full-time equivalent health benefits. TSA is one of a small number of federal agencies that offer this unique benefit;
- Reduced full-time and part-time voluntary attrition for the third straight year. Full-time attrition decreased from 13.6 percent in 2004 to 11.6 percent in 2007; part-time attrition from 57.8 percent in 2004 to 37.2 percent in 2007;
- Adjusted TSA's Payband compensation system in FY2007 to more closely parallel FAA's and indexed it to the annual federal cost of living adjustment;
- Utilized 'Split-Shifts' rotations for optimal efficiency; and
- Provided special incentives at airports in exceptional geographic or economic situations to aid with recruitment and retention.

### **Annualization of FY 2008 Initiatives**

In FY 2009, TSA will expand the recently established security programs to further enhance aviation security. TSA requests:

- The annualization 330 FTE for the 660 BDO positions appropriated in FY 2008, which will enhance security by covering every category of airport.
- The annualization of 375 FTE for the 750 ADASP positions appropriated in FY 2008, which will allow TSA to allocate ADASP FTE to every category of airport.

### **Workers Compensation**

In FY 2009 TSA will continue to pay worker's compensation payments from the TSO PC&B account, indicative that U.S. Department of Labor Office of Worker's Compensation Program (OWCP) payments are most appropriately part of the TSO compensation base. TSA continues to aggressively reduce OWCP costs through strategies of prevention, education, case management, and nurse intervention. TSA field operations are required to develop a local safety program targeted at inspections, hazard recognition and analysis, hazard abatement, and injury documentation. The Office of Occupational Safety, Health and Environment (OSHE) provided field support to assist 150 airports develop their safety programs. Eleven safety courses aimed at injury prevention are posted on TSA's Online Learning Center. TSA implemented a national nurse case management program at 21 airports which has successfully assisted TSOs in returning to employment in a shorter time.

In addition the President's Safety, Health, and Return to Employment Initiative (SHARE) requires Federal agencies to reduce the Total Case Rate (TCR) and Lost Time Case Rate (LTCR) by 3 percent each Fiscal Year from the FY 2003 baseline. TSA has exceeded this goal by reducing the total number of TSO injuries and illnesses from 8,042 in FY 2006 to 6,254 in FY 2007, resulting in a 15.36 percent reduction in TCR to 13.93 per 200,000 work hours. The TSO injuries and illnesses that resulted in lost time have decreased from 4,367 in FY 2006 to 3,228 in FY 2007, resulting in a 19.55 percent reduction in the LTCR to 7.19 per 200,000 work hours.

These initiatives have led to a \$3.3 million decrease in OWCP costs between FY 2008 and FY 2009 (from \$58.8 million for FY 2008 to \$55.5 million for FY 2009). TSA anticipates that these efforts will mitigate injuries and further reduce costs in the out-years.

The Transportation Security Administration requests \$197.3 million for this activity. These funds will support new and recurring training requirements for Transportation Security Officers including the Screening Passengers by Observation Techniques (SPOT), Aviation Direct Access Screening Program (ADASP), and Travel Document Checker (TDC) programs. The FY 2009 Request also includes funding for general operating expenses and reflects adjustments for COLA and efficiencies, a base realignment to the Checkpoint Support PPA, and a base realignment of 56 training positions from the Transportation Security Support appropriation.

**Transportation Security Officer (TSO) Training:** TSO training is comprised of a compendium of courses that includes basic training for initial hires, On-the-Job Training (OJT), Lead and Supervisor technical training, recurrent training, advanced technical skills training, remedial training, and return-to-duty training. All new hires receive a combination of instructor-lead, hands-on, and web-based training. Recurrent and specialized training courses are provided by either classroom instruction or the TSA On-Line Learning Center (OLC).

FY 2007 significant accomplishments included:

- Over 11,000 new TSO hires trained;
- Training for the initial deployment of Behavior Detection Officers (BDO);
- Certification of Bomb Appraisal Officers (BAO) for placement at 76 airports; and

- Development of a monthly recurrent training plan for all TSOs.

FY 2008 planned accomplishments include:

- Launch of new Recurrent Training Program;
- Provide Security Training Instructor (STI) training and certification;
- Certification of BAOs at remaining 31 airports;
- Develop and implement BAO Recurrent Training Program; and
- Certification of additional BDOs

New Hire Training (NHTP): The majority of TSO Training funding provides classroom instruction on checkpoint procedures, including travel document checking and/or checked baggage, for all new hires depending upon duty assignment. NHTP provides web-based training, 40 hours of instructor-led training, and hands-on equipment-specific labs at the home/hub airport.

Several NHTP lessons were deployed as part of Phase One. Phase One consisted of 8 web-based training courses: 1) airport overview, 2) alternative screenings, 3) checkpoint and checked baggage, 4) customer-focused security, 5) professional screener, 6) screener safety and awareness, 7) TSA overview and welcome, and 8) TSA introduction. The NHTP Phase One also provided an improved and highly interactive course on Persons with Disabilities. A new X-Ray lesson was also included in the NHTP Phase One. This lesson complimented the implementation of the Threat Image Projection X-Ray (TRX) simulator test utility. The new testing platform features automated adaptive learning so that as a TSO reviews X-Ray bag sets, errors made in identifying threats are recorded and additional practice is provided for similar threats to strengthen TSOs skill level.

The new NHTP curriculum includes the baseline Improvised Explosive Device (IED) training that had been previously offered as a stand-alone course, with hands-on opportunities for practice with new IED Kits. NHTP has built-in options to provide checked baggage, Explosive Detection System (EDS) and On-Screen Alarm Resolution Protocol (OSARP) as a single course. OSARP training will continuously be updated to reflect new EDS equipment procurement and upgrades to ensure the training matches operational equipment.

All operational equipment training will continue with changes and upgrades to keep up with technology and new threats. This technical training will aid in maximizing TSOs performance and ability to detect and mitigate threats.

Recurrent Training: These courses are a requirement for TSOs to maintain proficiency of skills learned during basic training. This curriculum aims to keep TSOs up-to-date with procedural changes, as well as, new technology, equipment, and new threat items and is often delivered on a weekly basis. Recurrent training is used to target the TSOs' individual training needs (e.g. X-ray Image Interpretation). Concurrent with TSO Career Progression, additional recurrent training courses were developed and implemented in FY 2007 for Behavior Detection Officers (BDO), Bomb Appraisal Officers (BAO) and the Travel Document Checker (TDC) programs.

As part of this curriculum, TSOs are provided courses aimed at improving interaction with the traveling public by achieving the right tone to put passengers at ease. This is essential to driving maximum effectiveness especially in hostile intent detection programs and to minimize disruption at the checkpoint. Training TSOs to interact with passengers in a calm, confident tone

will lead to higher throughput and better environment for hostile intent observations. TSO training includes approaches to passenger communication, managing disruptive passengers, and identifying hostile intent by reading passenger behavior, as well as, other key skills.

Behavior Detection Officers (BDO) Program: This curriculum provides training in behavior observation and analysis at the checkpoint for the purpose of identifying passengers exhibiting behaviors indicative of stress, fear and deception. This program, known as Screening Passengers by Observation Techniques (SPOT), is performed by BDOs at all major airports. The curriculum for this program will continue to be upgraded to include additional requirements in behavior detection and reflect new techniques in deception prevention.

Bomb Appraisal Officers (BAO) Program: The need for Bomb Appraisal Officers in all major airports requires specialized security training for those individuals selected to perform this duty. These in-house explosives experts provide rapid response for advanced resolution of alarms and instruction to TSOs to better identify potential Improvised Explosive Devices (IED) and IED components.

Security Training Instructor (STI): Developed and implemented in FY 2008, this training supports the creation of a permanent TSA in-house instructor certification program. In the past, TSOs performed instructor functions as a collateral duty under the TSA Approved Instructors (TAI) program. The STI program provides more stability and consistency in that these TSOs become virtually full time instructors while creating a career progression opportunity. The Security Training Instructor (STI) will perform instructional duties 80% of their time and perform security screening duties the remaining 20%.

Supervisor Technical Training: The technical and leadership competence of TSO supervisors is a critical component of workforce effectiveness and retention. TSA will develop and deploy both refresher and advanced training for experienced supervisors and managers to keep pace with the ever changing work environment, security threats, and requirements for leading a security workforce.

New Types of Training Aids/Training Tools: Due to the ever changing threat from terrorism and the terrorist adaptation to security and screening procedures, TSA is constantly developing and updating training and training aids. Additionally, many of the existing IED Training Tool Sets will be due for rotation from the field for upgrading. The Liquid Explosives Training Kit distributed in FY 2008 will be expanded in FY 2009 to include an increased number of liquid explosive stimulants as the intelligence community provides information on the terrorists' technological advancements. As the terrorists broaden their attack methodologies and capabilities much of the existing training and many of the training aids and approximately 7,500 tool sets will have to be upgraded to address the evolving threat. As a direct result of the IED checkpoint drills data, we concluded we must increase our training on Sheet explosives which has proven very difficult to detect using both technology and experience.

TSA employs a variety of automated training and testing tools to enhance TSO skills, including computer based courses, training videos, and Threat Image Projection – where new threats are flashed on the computer screen at checkpoints to test a TSO's ability to detect them. In addition, new technology is deployed like Whole Body Imager (WBI), the Explosives Trace Portal (ETP – nicknamed the "Puffer") and FIDO Handheld Explosives Detection to enhance TSO explosive detection. TSA continues to use the latest cutting edge technologies to provide sophisticated

scenario based training. TSA also provides an on-going, up-to-date “Threat in the Spotlight” training specifically for TSOs and their supervisors which describes and shows actual pictures of threats found by TSOs at airports or from other intelligence resources.

Emerging Technologies: TSA employs a variety of automated training and testing tools to enhance TSO skills, including computer based courses, training videos, etc. TSA is constantly researching and evaluating new training methodologies to better equip the TSO workforce.

In FY 2009, TSA will test new technology for passenger and baggage screening including: Whole Body Imagers, the new reduced-size EDS, millimeter wave portal technology, and advanced technology X-ray. As this new technology is tested, new training modules will be developed and related existing training will be updated to ensure TSOs are knowledgeable and prepared.

Training Evaluation: TSA uses a measurement and evaluation process to ensure that training programs meet established objectives and standards. Training effectiveness is assessed using a four-level model measuring trainee reaction, learning, behavior, and results. TSA also conducts assessments to ensure that a high level of instructional quality is maintained.

Performance Reviews: All TSOs, Lead and Supervisory TSOs must participate in an Annual Proficiency Review to ensure that they meet all of the qualifications and performance standards required to perform their duties as set forth under ATSA. TSOs will continue to be certified annually based on their overall annual performance as defined by the Performance Accountability and Standards System (PASS). In 2007, PASS Technical Proficiency testing focused on Standard Operating Procedure (SOP) knowledge, image recognition, proper screening techniques, and the ability to identify, detect, and locate prohibited items. Technical proficiency will be measured in the following ways:

- Measuring SOP/Job Knowledge - Four SOP/Job Knowledge quizzes per year administered quarterly using the test software that has been used for the past two years for Recertification.
- Measuring Image Proficiency - Four image quizzes per year administered quarterly using the Test Administration System (TAS) software that has been used for the past two years for Recertification. On Screen Alarm Resolution Protocol (OSARP) certified TSOs will take two OSARP quizzes per year.
- Measuring Practical Skills - Airport personnel will conduct three Skill Observations/Demonstrations per year. Contract assessors will conduct one Practical Skills Evaluation, including the detection of prohibited items, of all TSOs per year.

As in the past, airport personnel conducted remediation and "re-evaluation" as necessary to ensure that poor performers are able to attain the “Achieves Standard” level or higher. Employees unable to perform at or above PASS Achieves Standards level after receiving documented remediation are subject to termination.

**Transportation Security Officer (TSO) Other Costs:** In addition to compensation and benefits, TSA incurs other direct costs associated with TSO operations. These include operational support such as consumable supplies, checkpoint janitorial services, travel for the TSO National Deployment Force (NDF), a uniform allowance, hazardous materials disposal, and optimization and safety mitigation (which moves to the Checkpoint Support PPA in FY 2009).

Supplies/ Janitorial/ Uniforms: The \$45.5 million of consumable supplies are critical materials used by TSOs to ensure consistently effective checked baggage security levels. These consumable supplies include:

- Disposable gloves;
- Sample swabs or traps;
- Sample wands;
- Daily calibration tokens;
- Sticks or traps;
- Moisture removers;
- Filters, printer paper, and ribbons;
- Reactant materials;
- Special solutions;
- Label seals to identify bags inspected by TSOs;
- TSA logo inspected tape to reseal cardboard boxes and packages after inspection; and
- Baggage inserts to notify passengers that TSA has opened their bag for inspection and providing contact information in the event the passenger believes there is a problem.

In FY 2007, TSA issued bottled liquids scanning equipment to nine airports. This equipment requires a sensing element in order to detect traces of certain chemical agents. In FY 2008, TSA continued its roll out of this equipment to over 70 airports and has increased the need to keep a steady supply of sensing elements at the checkpoints.

In FY 2009, the bottled liquids scanning equipment will be rolled out to additional airports. The consumables supply sensing elements will be increased accordingly.

TSA janitorial services contracts for passenger checkpoint and baggage screening areas ensure a safe, debris free work environment for TSOs and convey a positive image of TSA work areas to the traveling public.

National Deployment Office (NDO): The FY 2009 request of \$34.3 million provides funding for operational expenses of the NDO, which provides rapid and cost-effective deployment of the National Deployment Force (NDF), formerly known as the National Screening Force (NSF). The NDF provides additional Transportation Security Officers (TSOs) to airports for screening support for crisis response and recovery, seasonal demands, special events or other activities that require higher than current staffing levels. Each request for NDO support is analyzed from a cost/benefit/risk perspective to ensure the optimal use of limited resources. The NDOs responsibilities include deploying TSOs, Transportation Security Inspectors (TSIs) and Behavior Detection Officers (BDOs) in support of Voluntary Inter-modal Protection Response (VIPR) Teams. VIPR teams deploy to enhance and augment local transportation security operations in the non-aviation modes of rail, mass transit, bus and/or ferry modes. For disaster response operations, the NDO is responsible for deploying nine Transportation Security Advance Teams (TSAT) which include 126 personnel, and 24 Transportation Security Forward Teams (TSFT) which include 600 personnel. TSA continues to review methods for reducing costs associated with the NDO program.

In FY 2007, NDO decentralized its structure by transferring administrative support for the NDF TSOs to their home airports, while retaining centralized control of NDF operations within the NDO Program Office.

In FY 2008, NDO will replace the current MS Access/flat file system of managing the NDF workforce and the NDF deployment assignment process with an end-to-end web based NDO Manpower Management Model.

In FY 2009, the program will continue to support the movement of security operations personnel in support of the Office of Inspections, the Voluntary Inter-model Protection Response Teams, the TSA Approved Evaluator Program, non-aviation security pilot programs, disaster response operations and other emerging operational requirements.

The FY 2009 request provides funding that ensures all Transportation Security Officers receive a sufficient uniform allotment to purchase and replace uniform items. TSOs are required to wear the TSA uniform in the performance of their duties. Uniforms allow TSOs to maintain a professional appearance and instill confidence, as well as serve as a deterrent to would-be-terrorists.

In FY 2007, TSA changed the Transportation Security Officer uniform based on the recommendation of the TSA's National Advisory Council. A Board was established to redesign the uniform based on input and research. Changes were made to improve fit, comfort, durability, safety, image, and add a number of other elements including a new metal shield and shoes. TSA began issuing new uniforms to TSOs the end of FY 2007 with a planned completion by the end of FY 2008.

In FY 2009, TSA will continue to provide uniforms to new hires as well as provide replacement uniforms to all TSOs through the annual allowance program

Environmental Program: The FY 2009 request for \$12.1 million provides funding for the Environmental Management Program which includes the maintenance of the environmental management system, the disposition of hazardous materials and abandoned personal property collected by TSA at airport security checkpoints. TSA has an extensive and complex effort to safely and securely identify, sort, store, protect assets, as well as remove and dispose of hazardous and voluntarily abandoned property. With over 448 airports, it is not cost effective for each airport to individually handle hazardous material disposal. TSA's national hazardous materials disposal program protects the traveling public from exposure to hazardous materials and complies with Federal, State, and Local environmental regulations and laws.

FY 2007 significant accomplishments include:

- Completed full implementation of the environmental management system at Headquarters, two facilities, and 128 airports. In February 2004, TSA leadership established the Environmental Management Program within the Office of Occupational Safety, Health and Environment (OSHE). Since then the Environment and Energy Branch has taken a proactive approach to assessing the environmental risk associated with TSA activities. To ensure environmental stewardship was integrated into TSA's mission and activities, OSHE developed and implemented an environmental management system (EMS) to satisfy regulatory requirements, ensure environmental responsibilities are carried out, and to minimize the potential for environmental incidents.
- Received the Federal Electronic Challenge Silver Award and the DHS Environmental Stewardship award for the environmentally friendly replacement, reuse, and recycle of all TSA laptop and desktop computers.

- Received the DHS environmental Stewardship Award for completing the Bio-based Alcohol Substitute pilot and making these available to airport screener operations.
- Trained 120 airport operations personnel on environmental management issues: safely handling, storing, and disposing of materials.

In FY 2008, TSA will:

- Complete and evaluate the waste minimization pilot for the disposal of aerosols at selected TSA airports.
- Participate in the Federal Electronic Challenge at the gold level incorporating all three major phases of the acquisition process, including mentoring other Federal agencies.
- Complete an environmental management review of the Federal Air Marshal training and field operations.
- In coordination with the Environmental Protection Agency, establish protocols for the inspections of airport operations by State environmental inspectors.

Model Workplace Program: The FY 2009 request of \$2.0 million provides funding for a program that supports TSA's most important resource - its employees. In order to support its employees and enable them to perform at the highest level, TSA has established the Model Workplace Program Office (MWP), which identifies supports, and accelerates implementation of the best employment ideals and practices to make TSA an employer of choice. The cornerstone of the Model Workplace Program is TSA's Integrated Conflict Management System (ICMS).

The ICMS is a national management system built for all employees. It is the foundation for a Model Workplace because it is about how agency personnel treat each other, solve problems, and make decisions. The system provides skills, structure, and support to develop a positive workplace culture through a common language and skill set, as well as a commitment to cooperative problem solving necessary for good relationships, teamwork, and organizational effectiveness. The ICMS supports better-informed and more strategic decision making by focusing on how decisions are made and communicated. Illustratively, the MWP Office is developing training that combines the principles and practices of cooperative problem solving with tools and data driven decisions based on clear analytical framework. As the ICMS matures, the MWP Office will help to promote and reinforce standards for ICMS implementation. It is also increasing capacity within TSA for conflict management beyond the basic level by including more sophisticated applications and the development of internal practitioners to facilitate addressing issues and concerns proactively.

A significant accomplishment in FY 2007 was the development, implementation, and deployment of the national ICMS Knowledge Management System to 135 sites nationwide.

In FY 2008, MWP Office plans to roll out ICMS training for TSA Headquarters staff, implement an integrated decision making process for high level decisions, and integrate ICMS competencies into all curriculum and training programs.

In FY 2009, MWP will develop internal practitioners to continue development of core competencies in conflict management, cooperative problem solving to all organizational levels, and integrate competencies into all Human Resources processes.

Tort Claims: The FY 2009 request of \$4.1 million provides funding for substantiated claims by travelers of loss or damage to their property during screening. TSA currently screens over 50 million bags per month and over 35 million passengers per month. Occasionally, during the screening process, a screener may damage or misplace passenger's property. TSA reimburses passengers that have experienced loss or damage due to the negligence of a TSA employee.

PPA: HUMAN RESOURCE SERVICES

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>    |
|------------------------------|---------------------|------------|------------------|
| <b>2007 Actual</b>           | ...                 | ...        | <b>\$170,634</b> |
| <b>2008 Enacted</b>          | ...                 | ...        | <b>182,234</b>   |

The Transportation Security Administration requests \$127.7 million for Checkpoint Support activities - this is an increase of \$127.7 million from FY 2008 discretionary levels, but an overall decrease of \$122.3 million from total FY 2008 funding, which included \$250 million in mandatory funds from the Checkpoint Support Capital Fund. The FY 2009 request also consolidates TSA's checkpoint operating and personnel funds into one PPA. The adjustments-to-base include the realignment of safety hazard and optimization funds previously in the Screener Training and Other PPA and the realignment of 31 FTE previously funded in the Headquarters Administration PPA annualizes the 10 FTE funded by the FY 2007 Checkpoint Supplemental and includes a lapse rate decrease of 1 FTE.

**PROGRAM DESCRIPTION**

TSA's activities related to checkpoint support provide the resources required to test, evaluate, integrate, and deploy passenger screening and carry-on baggage screening technologies, training, checkpoint reconfigurations, closed circuit television surveillance equipment, and provide safety and optimization services at approximately 2,100 passenger checkpoint lanes in our Nation's airports. TSA is developing a strategic plan to enhance screening through improved checkpoint technology which will refine passenger security for aviation. This initiative extends beyond the airport Checkpoint and considers the end-to-end passenger experience to improve security and increase efficiency. Focus is on three key elements: improved explosive detection, enhanced hostile intent detection and extended presence in the passenger journey.

Current technologies that have been deployed include Threat Image Protection (TIP) Ready X-Ray machines (TRX), which replaced a previously manually intensive search, allowing faster bag throughput and increased threat detection capability; enhanced walk-through metal detectors (WTMD) that screen persons for metallic weapons such as guns or knives; explosives trace detectors (ETD), which are used to test for explosive residue on selected carry-on items; explosives trace portals (ETP), which screen persons to detect trace amounts of explosives; bottled liquid scanners (BLS), which screen bottles to determine if they contain explosives or benign liquids; and advanced technology systems (AT), which are X-ray systems with advanced visual detection capabilities, using multi-view capabilities or automated explosives detection capabilities.

FY 2007 significant accomplishments include the piloting of Advanced Technology Systems (AT), Automated EDS for carry-on, BLS, and Cast and Prosthesis Imagers (CPI).

The piloting and deployment of Whole Body Imagers (WBI) and the expanded deployment of AT, BLS, and CPI are planned in FY 2008. Checkpoint elements will be piloted first in order to

develop a design template that can be applied to additional airports in FY 2009. They will be deployed in coordination with TSO training in passenger interaction.

The following table provides the components of this PPA.

(dollars in millions)

|                                 | <b>FY 2009</b> |
|---------------------------------|----------------|
| Checkpoint Technology           | \$91.7         |
| Checkpoint Reconfiguration      | 11.5           |
| Electronic Surveillance Systems | 11.0           |
| Safety Hazard and Optimization  | 13.5           |
| Total                           | \$127.7        |

Checkpoint Technology: This request includes \$91.7 million to procure and deploy advanced technology systems to further extend explosives and prohibited item detection coverage at Category X and I checkpoints. This request includes funds to test, purchase, and install new screening equipment and update existing equipment. These funds will also be used for program, engineering, technical support and travel, original equipment manufacturer training, warehousing, disposal, consumables, and refurbishing equipment, to provide functionality and performance enhancements as well as for life-cycle replacements for units reaching the end of their useful life. In addition, this component will fund 41 FTEs that were previously funded from the Headquarters PPA.

Equipment purchases may include AT, WBI, BLS, CPI, shoe scanner systems, technology integration solutions, and additional units or upgrades to legacy equipment. This equipment will enable TSA to detect a greater range of threats more quickly and with greater accuracy than existing equipment. Purchases may also include communication tools to facilitate interaction both among TSOs and between TSOs and passengers, as well as technologies that assist in recognition of anomalous behavior. The following outlines emerging technologies planned for possible deployment in FY 2009.

| <b>Emerging Technology</b>  | <b>Description</b>  | <b>Average Unit Costs</b> |
|-----------------------------|---|---------------------------|
| Advanced Technology Systems | X-ray systems with advanced visual detection capabilities, which may be multi view capabilities or some automated explosives detection capabilities.              | \$199,845                 |
| Whole Body Imagers          | Imaging capability to inspect for concealed weapons and some explosives on passengers bodies in place of a metal detection wand inspection and physical pat-down. | \$256,872                 |
| Bottled Liquids Scanners    | This is a new detection capability to discriminate explosives or flammable liquids from common benign liquids carried by passengers in their carry-on baggage.    | \$42,419                  |
| Cast and Prosthesis Imagers | Imaging capability to inspect passengers with limb casts or limb prosthesis for concealed weapons and some explosives.  | \$56,567                  |

\* The "Average unit cost" includes estimated costs for installation, integration, engineering support, and OEM training.

The chart below outlines the quantity of emerging technologies planned for deployment in FY 2009

| <b>Technology</b>                     | <b>Cumulative # of Units Deployed</b> | <b>Cumulative Coverage</b>        |
|---------------------------------------|---------------------------------------|-----------------------------------|
| Advanced Technology Systems           | 932                                   | 60% lanes at Cat X & I airports   |
| Whole Body Imagers                    | 236                                   | 15% lanes at Cat X & I airports * |
| Bottled Liquids Scanners              | 250                                   | 65% lanes at Cat X & I airports   |
| Cast and Prosthesis Screening Systems | 87                                    | 25% Cat X & I checkpoints         |

\* Systems currently being piloted in operational environment. Full cumulative coverage is dependent on final concept of operations and operational throughput.

Checkpoint Reconfiguration: The growth in passenger traffic, the evolution of the airline industry, and the need to deploy emerging technology fuels the requirement for checkpoint reconfiguration funding in FY 2009. Funding of \$11.5 million will support the optimization and reconfiguration of additional lanes to accommodate anticipated airport growth and maintain throughput at the busiest checkpoints. This effort will incorporate, as appropriate, alternative configurations that improve security and throughput while reducing congestion at "soft target" locations like airport lobbies. These enhancements may include remote screening centers, improved divestiture and reorganization zones, or special lanes for no/single carry-on baggage.

Electronic Surveillance Systems: In FY 2009, \$11 million of funding will be used to continue the installation of closed circuit television equipment and other electronic surveillance systems at

approximately 15 additional airports. The systems' cameras will detect theft or improper behavior during the screening process by TSOs or baggage handlers and provide a fast visual identification of those committing infractions. These cameras will provide an additional means of security by allowing a quick response to disruption in operations.

Safety, Hazard and Optimization: The \$13.5 million request supports critical safety projects to correct and/or mitigate existing safety hazards in public and non-public TSA screening areas that contribute to a significant number of on-the-job injuries among TSA TSOs.

A related program called Safety Optimization is also funded in this PPA. Optimization is targeted at identifying expedited improvements that simultaneously address safety issues and improve operational efficiency while maintaining or enhancing transportation security. These efforts involve both passenger checkpoints and checked baggage screening areas. Both initiatives may involve moving equipment, small scale construction, HVAC, and/or related mechanical and electrical work. Funds may also be used to purchase any ancillary equipment such as roller tables, lift carts and fatigue mats needed for a particular project. Airports receiving optimization or safety work are prioritized based on a weighted multi-metric ranking that includes overtime, head count, average peak passenger screening wait time at the airport, peak throughput for passengers and baggage, injury rates, lost time, and costs. The weighted multi-metric ranking is periodically updated as new data is collected and analyzed.

The long-term goal of optimization work is to enable airports to optimize their own operations. This will be accomplished through the development of tools and best practices on the layout and design of passenger and baggage screening areas, efficient management of screening processes, TSO staffing and scheduling, and injury reduction and injury claim management. In addition, modeling tools are being developed to allow easy visualization of the pros and cons of various screening designs and processes, and to enable the potential impact of proposed changes to be evaluated. Roll out of these tools began in November 2006.

<sup>1</sup> Combines EDS Purchase and Install for display purposes.

The Transportation Security Administration requests \$153.9 million for this activity. The FY 2009 request consolidates purchase and installation funds into one PPA, along with the FTE that support the program. This request is a decrease of \$140.1 million in discretionary funding from the FY 2008 enacted level, but an overall increase of \$285.9 million due to \$426 million in additional mandatory funds generated by a four-year \$0.50 surcharge on the passenger security fee (PSF) for a total of \$3.00 per enplanement, up to a maximum of \$6.00 one way. This surcharge would be deposited into the Aviation Security Capital Fund (ASCF) to fund the purchase, installation, and recapitalization of checked baggage explosive detection systems (EDS) and in-line systems resulting in \$676 million of mandatory funding; this will provide \$829.9 million of total purchase and installation funding in FY 2009. The adjustment-to-base also includes an increase of \$12.3 million to realign 93 FTE previously funded in the Operational Integration and Headquarters Administration PPA, offset by a reduction of \$48 million needed to accommodate higher maintenance requirements in FY 2009. This request also annualizes the 17 FTE funded by the FY 2007 EDS Supplemental.

TSA's activities related to purchasing and installing EDS and ETD systems consists of some or all of the following, depending on the equipment and specific location: 1) operational testing, 2) equipment purchase 3) site survey and design, 4) site preparation, 5) facility modification, 6) warehousing and shipping, 7) independent verification and validation testing, and 8) program support. This additional funding would address concerns regarding recapitalization of EDS machines and would accelerate implementation of the EDS Strategic Plan. The authorization request for this mandatory surcharge will be forwarded in a separate legislative proposal.

**PROGRAM DESCRIPTION:**

The following table provides the components of this PPA.

(dollars in millions)

|                                       | <b>FY 2009</b> |
|---------------------------------------|----------------|
| Purchase of Checked Baggage Equipment | \$224.35       |
| Installation                          | 605.57         |
| Total                                 | \$829.92       |

Includes mandatory funding of \$676M

TSA requests \$829.92 million to support the purchase and installation of additional in-line systems for airports selected in accordance with the EDS Strategic Plan. TSA has made steady progress in deploying systems at high priority airports in the past several years. By the end of calendar year 2009, it is projected that 61 airports will have operational in-line systems. Supplemental funds received in FY 2007 will allow TSA to initiate work at some of the highest priority airports; these projects will continue into FY 2009.

In 2006, TSA developed a Strategic Plan for achieving optimal screening solutions at the top 250 commercial airports. Implementation of these optimal solutions will provide for decreased life cycle costs for the EDS program. This plan uses a top-down prioritization model to perform a systematic, comprehensive assessment of screening alternatives at airports and prioritizes projects by balancing security and economic factors. These results feed into a deployment model that identifies the optimal schedule for deploying equipment to airports given funding, equipment availability and other key assumptions. These continuing system deployment efforts are required to maintain compliance as passenger traffic increases and circumstances at airports change.

In-line EDS screening systems provide more reliable baggage delivery, greater efficiency, and increased flexibility to accommodate traffic growth. TSA benefits from operational improvements associated with this type of automation. For instance, working conditions for screeners improve with in-line systems. Alarms can be resolved in quieter, dedicated spaces properly designed for the alarm resolution function. On-the-job injuries are reduced as a result of better-designed alarm resolution areas since fewer alarms mean fewer bags are lifted by TSOs. These are just some examples of the broad reaching benefits of in-line systems.

FY 2007 significant accomplishments include:

- 23 additional in-line systems became operational in airports
- the purchase of 92 and deployment of 44 reduced-size EDS next generation equipment. The remaining 48 will be deployed in FY 08.
- completion of LOI reimbursements
- formalized and published application process for checked baggage in-line and stand alone systems
- published planning and design guidelines for baggage handling systems associated with in-line EDS to contain cost and share best practices.

FY 2008 planned accomplishments include:

- procure 114 EDS units in support of 12 inline systems

- testing and limited deployment of high volume EDS (projected throughput of 1,000 bags per hour)
- certify reduced-size EDS that achieves more than 200 bags per hour

A total of \$224.35 million is requested in FY 2009 to support the purchase of electronic baggage screening equipment for deployment in our nation's airports. Purchases in FY 2009 are planned in support of projects begun with supplemental funds in FY 2007 as well as FY 2008 projects.

The FY 2009 request includes \$605.57 million to support the installation of electronic baggage screening equipment in our Nation's airports. Installation costs, along with purchase costs, are a component of the total cost of equipment deployment. The cost of installing EDS and ETD systems consist of some or all of the following, depending on the equipment and specific location: 1) site survey and design, 2) site preparation/ facility modification, 3) warehousing and shipping, 4) testing, and 5) program support.

### **EDS**

EDS is the main technology used in the checked baggage screening process. This equipment automates what was previously a manually-intensive baggage inspection, allowing faster bag throughput (up to 300 percent) and improved threat detection capabilities. EDS machines are the largest and most expensive security screening equipment in the TSA inventory.

Most of the currently deployed EDS technology developed prior to the Aviation and Transportation Security Act (ATSA) was based on standards set forth by Congress in the Aviation Security Improvement Act of 1990. Since large-scale deployment of EDS systems by TSA in 2002 and 2003, manufacturers have made improvements to lower alarm rates and increase throughput capacity for this equipment. The Next Generation (NexGen) EDS program saw two products in production and deployed in 2007, including improvements to the Reveal CT-80 and L-3 6600. Newly entrant EDS machines and significant upgrades to existing EDS technology are under development. These include high throughput machines that can operate at up to 1,000 bags per hour, which are scheduled for commissioning in 2009.

These technologies will offer a variety of enhancements that will improve screening capabilities, increase throughput, and reduce equipment footprint. Engineering and economic modeling of dynamic risk-based AT-EDS hybrid systems are in process. Additionally, TSA efforts to contain costs by using reduced size EDS to combine checkpoint and checked baggage operations at low efficiency/high cost airports are being explored. In 2009, TSA will procure and deploy equipment offering significant improvements to screening efficiency.

### **ETD**

ETD machines are used both as a primary screening method and a secondary screening method (i.e., resolving EDS alarms). ETDs are the second largest component of equipment cost within the program. ETDs are designed to detect explosives residue left on an item and/or bag. Since the enactment of the Aviation and Transportation Security Act (ATSA) in November 2001, TSA has implemented the 100 percent checked baggage screening requirement; however some solutions in place may not be sustainable as passenger loads increase. TSA plans to replace 100 percent ETD checked baggage screening solutions with EDS or reduced sized dual use EDS where appropriate. These changes are planned to begin in FY 2008.

PPA: SCREENING TECHNOLOGY MAINTENANCE & UTILITIES

|                                 | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>    |
|---------------------------------|---------------------|------------|------------------|

| <b>2009 Request</b>             | ...                 | ...        | <b>310,625</b>   |
| Total Change 2008-2009          | ...                 | ...        | 46,625           |

<sup>1</sup> The actual amount for FY 2007 does not include \$39.7 million for Passenger Checkpoint Equipment Maintenance. That amount is shown in the Checkpoint Support PPA.

The Transportation Security Administration requests \$310.6 million for this activity. This is a \$46.6 million increase over FY 2008 to maintain TSA’s screening technology. This increase includes an inflationary adjustment for maintenance contracts that escalate higher than standard cost-of-living adjustments.

**PROGRAM DESCRIPTION:**

The following table provides the components of this PPA.

(dollars in millions)

|                                       | <b>FY 2009</b> |
|---------------------------------------|----------------|
| Checked Baggage Equipment Maintenance | \$261.7        |
| Checkpoint Equipment Maintenance      | 43.9           |
| Utilities                             | 5.0            |
| <b>Total</b>                          | <b>\$310.6</b> |

This funding supports the maintenance and associated utilities of security technology equipment in our Nation’s airports. Investment in preventative and corrective maintenance, system sustainment, and utility costs are critical for TSA to continue in order to ensure operational capability, logistics management compliance, and supportability over the life of the equipment.

The majority of TSA’s maintenance activity is provided by contractor Field Service Technicians (FST) working for EBSP Original Equipment Manufacturers (OEM) and a 3<sup>rd</sup> party Maintenance Service Provider (MSP). FST perform monthly, quarterly, and annual preventative maintenance for equipment no longer covered under warranty. Corrective maintenance support is provided 24 hours a day, 7 days a week to perform unplanned corrective repairs in the field. Repair parts (e.g., condenser tubes, belts) required for all preventative and corrective maintenance are included in these contracts.

**Checked Baggage Equipment Maintenance:** This request includes \$261.7 million for the preventative and corrective maintenance activities that TSA must incur to maintain the operation of deployed checked baggage screening systems.

TSA’s Request in FY 2009 will support maintenance requirements of approximately 2,084 EDS and 5,864 ETD units deployed to over 448 airports nationwide.

Below is a breakout of EDS and ETD maintenance and utilities for baggage screening equipment in FY 2009. In the cases where the fiscal year spans two periods of performance, the “Unit Cost to Maintain” for EDS units in the table is a blend of the maintenance rates that will be in effect during FY 2009. Additionally, the EDS “Field Cost to Maintain” is based on a time-phased cost which incorporates planned deployment schedules.

| Equipment   | Quantity | Unit Cost to Maintain | Field Cost to Maintain |
|---|----------|-----------------------|------------------------|
| <b>EDS</b>  |          |                       |                        |
| CTX-2500  | 149      | \$67,997              | \$10,131,522           |
| CTX-5500  | 545      | \$78,995              | \$43,013,563           |
| CTX-9000  | 436      | \$102,994             | \$42,220,443           |
| e6000   | 671      | \$106,515             | \$70,606,004           |
| Reveal  | 258      | \$53,444              | \$13,254,056           |
| AN6400  | 10       | \$106,515             | \$1,065,148            |
| High Speed  | 15       | \$187,740             | \$709,812              |
| <b>ETD</b>  |          |                       |                        |
| 400B  | 3,482    | \$10,236              | \$35,641,752           |
| Itemiser-W  | 2,382    | \$9,228               | \$21,981,096           |
| <b>Other</b>  |          |                       |                        |
| Consumables per ETD                                 | 5,864    | \$700                 | \$4,104,800            |
| e6000 X-Ray Tubes                                   | 75       | \$27,500              | \$2,062,500            |
| Call Center/Environment Issues/Excepted Maintenance |          |                       | \$9,950,000            |
| <b>Checked Baggage Equipment Maintenance</b>        |          |                       | <b>\$254,740,696</b>   |
| Support   |          |                       | \$7,000,000            |
| <b>Total FY09 Maintenance Requirement</b>           |          |                       | <b>\$261,740,696</b>   |

**Checkpoint Equipment Maintenance:** This request includes \$43.9 million for the preventative and corrective maintenance activities for currently deployed passenger screening security equipment. This request funds both in warranty and out of warranty checkpoint equipment, which includes both preventative and corrective maintenance, as well as spare parts and replacement pieces (e.g., condenser tubes, monitors) for checkpoint equipment. Minor preventative maintenance is performed by TSO personnel on a daily and weekly basis. FSTs from support contractors and original equipment manufacturers perform monthly, quarterly, and annual servicing as required. Checkpoint equipment comes with a 1 year manufacturer warranty from the site acceptance date. Out of warranty equipment maintenance ranges from 12 – 22 percent of the equipment’s purchase cost.

Below is a breakout of the passenger screening systems needing maintenance in FY 2009:

| <b>Equipment</b>                                     | <b>Quantity</b> | <b>Unit Cost to Maintain</b> | <b>Field Cost to Maintain</b> |
|--|-----------------|------------------------------|-------------------------------|
| <b>ETD</b>   |                 |                              |                               |
| IonScan 400B   | 871             | \$10,236                     | \$8,915,556                   |
| Itemiser-W   | 596             | \$9,228                      | \$5,499,888                   |
| Consumables per ETD                                  | 1467            | \$700                        | \$1,026,900                   |
| <b>EMD</b>   |                 |                              |                               |
| Ceia   | 1583            | \$649                        | \$1,027,367                   |
| Metorex  | 164             | \$800                        | \$131,200                     |
| Garrett  | 237             | \$719                        | \$170,403                     |
| <b>TRX</b>   |                 |                              |                               |
| Rapiscan   | 900             | \$8,554                      | \$7,698,600                   |
| Smiths   | 950             | \$8,293                      | \$7,878,350                   |
| <b>ETP</b>   |                 |                              |                               |
| Smiths   | 30              | \$28,700                     | \$861,000                     |
| GE   | 64              | \$28,700                     | \$1,836,800                   |
| <b>AT Systems</b>                                    |                 |                              |                               |
| TBD  | 255             | \$14,000                     | \$3,570,000                   |
| <b>WBI</b>   |                 |                              |                               |
| TBD  | 36              | \$13,000                     | \$468,000                     |
| <b>Bottled Liquids Scanners</b>                      |                 |                              |                               |
| TBD  | 200             | \$3,000                      | \$600,000                     |
| <b>Cast and Prosthesis Screening Imagers</b>         |                 |                              |                               |
| TBD  | 40              | \$10,000                     | \$400,000                     |
| <b>Checkpoint Equipment Maintenance</b>              |                 |                              | <b>\$40,884,064</b>           |
| Support  |                 |                              | \$3,000,000                   |
| <b>Total FY09 Checkpoint Maintenance Requirement</b> |                 |                              | <b>\$43,884,064</b>           |

**Utilities:** This request includes \$5 million in utility payments associated with operation of the equipment and is a recurring cost borne by TSA. These costs include consumables for ETDs, transportation, sustaining engineering, data management, configuration management, safety, occupational health, environmental management functions, and disposal.

PPA: OPERATION INTEGRATION

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>   |
|------------------------------|---------------------|------------|-----------------|

| <b>2009 Request</b>          | ...                 | ...        | <b>21,481</b>   |
| Total Change 2008-2009       | (24)                | (24)       | (3,519)         |

The Transportation Security Administration requests \$21.5 million for this activity. The adjustment-to-base includes a decrease of 24 FTE and \$3.4 million that has been realigned to the EDS Purchase/Installation and Checkpoint Support PPAs in FY 2009.

**PROGRAM DESCRIPTION:**

TSA requests \$21.5 million to evaluate the impact of new security technologies, procedures, and policies. TSA analyzes integration of new technologies into existing systems to ensure operational effectiveness and suitability before full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment in the field in a variety of environmental conditions. The division conducts:

- Operational test and evaluation as part of the acquisition process for items procured by TSA
- Operational test and evaluation in support of regulatory and policy decisions in areas such as air cargo
- Pilots, demonstrations, and field experimentation in support of mission area analyses, concept of operations development and workforce characterization.

This program includes aviation security programs covering passenger, baggage, cargo, and airport infrastructure as well as a program addressing surface transportation protection. The following table provides the components of this PPA.

(dollars in millions)

|                     | <b>FY 2009</b> |
|---------------------|----------------|
| Passenger Screening | \$4.3          |
| Checked Baggage     | 4.7            |
| Cargo               | 4.6            |
| Infrastructure      | 2.2            |
| Surface             | 5.7            |
| <b>Total</b>        | <b>\$21.5</b>  |

FY 2007 significant accomplishments include:

- Passenger screening: testing and evaluation of several new technologies including bottle liquid screening equipment, cast screening equipment, Automated Carry-on Explosives Detection System (Auto EDS), Whole Body Imagers (WBI), Advanced Technology(AT) Systems, and document authentication devices.
- Checked baggage: completed testing of CTX 9400, Reveal CT-80XL EDS, and iScreen checked baggage management tool.
- Air cargo screening: evaluated EDS and Explosives Trace Detectors (ETD) systems through the Cargo Extended Field Test program; continued evaluation of Hardened Unit Load Devices (HULDs); evaluated EDS express delivery/counter to counter cargo operational utility; planned and integrated activities to conduct an operational evaluation of the concept for screening break-bulk cargo utilizing an existing in-line checked baggage screening system; and conducted a cargo composition and characterization study providing essential information on the distribution and makeup of cargo transported on both commercial and all-cargo aircraft.
- Airport Infrastructure: evaluated personal biometric devices to authenticate truck drivers on airport property.
- Surface: established and maintained a chemical/biological program; established a portal where local transit agencies can access product information regarding technologies, created best practices and procedures, developed specifications and standards for operationally effective technologies; incorporated additional sensor fusion from onboard vehicle technologies; planned for explosive testing and assessment of passenger rail car vulnerabilities; conducted hazmat rail car vulnerability assessment; and characterized the catastrophic failure of a chlorine tank car resulting from an intentional assault.

FY 2008 planned accomplishments include:

- Passenger screening: completion of test activities for existing technology systems and new technologies emerging from S&T R&D programs such as test and evaluation of ETD technology to expand current list of qualified products.
- Checked baggage screening: test several emerging EDS systems including GE CTX 9800, King Cobra, Stationary Gantry systems, dual use Auto EDS, and Analogic XLB.
- Cargo screening: continue FY 2008 projects to evaluate technologies for air cargo screening including continued characterization studies and counter-to-counter initiatives.
- Surface: Continue operational integration field testing and pilot activities to improve the Chemical/Biological program, develop technologies for use in the mass transit and passenger rail environment including Bus Communication and Control project and rail car vulnerability assessments, evaluate systems to detect/deter vehicle born improvised explosives devices, and evaluate technologies to remotely detect explosives or anomalies on passengers/carry on items in a maritime environment.

In FY 2009, assessments will continue on new technologies in support of passenger, baggage, cargo, and surface screening. TSA will also continue to evaluate technologies planned for checkpoint, improvements to existing screening technologies, and products emerging from DHS S&T R&D program.

PPA: AVIATION REGULATION

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b>   | <b>Amount</b>    |

| <b>2009 Request</b>          | <b>1,476</b>        | <b>1,407</b> | <b>209,991</b>   |
| Total Change 2008-2009       | 378                 | 369          | (45,962)         |

TSA requests \$210.0 million for this activity. The request reflects realigning enforcement functions into a law enforcement PPA and combining Air Cargo activities into this PPA resulting in a net transfer of \$46.0 million. The requested increase funds for pay and non-pay inflation, annualizes 320 FTP and operating expenses enacted in the 2007 supplemental appropriation and 2008 budget amendment, re-aligns funds to establish 3 additional TSA Representatives (TSAR) positions, 2 additional International Principle Security Inspectors (IPSI), and 4 positions to support planning and regulatory analysis.

**PROGRAM DESCRIPTION:**

Aviation Regulation is responsible for providing law enforcement and regulatory presence at airports to ensure compliance with required security measures and respond to security incidents. It also provides an international component to foster consistency in worldwide security requirements. Air Cargo activities were added to this PPA to more effectively align aviation regulatory functions. The following table provides the components of this PPA.

(dollars in millions)

|  | <b>FY 2009</b> |
|--|----------------|
| Regulatory Inspections                   | \$88.6         |
| Air Cargo                                | 86.3           |
| International Programs                   | 29.0           |
| Transportation Sector Network Management | 6.1            |
| <b>Total</b>                             | <b>\$210.0</b> |

**Regulatory Inspections -- \$88.6M:** TSA exercises regulatory authority to ensure implementation of security measures throughout the aviation domain. This inspection mission is broad and involves the evaluation of the security integrity of more than 1,000 airports (over 450 of which are located in the U.S.), more than 1,500 domestic and international carriers operating in the U.S., and over 7,500 indirect air carriers subject to periodic inspection. In FY 2008 additional canine teams will be added to the highest risk airports and mass transit systems across the nation; of which 46 of these will be led by Transportation Security Inspectors (TSIs).

TSIs monitor and enforce compliance with security regulations through inspection and outreach programs. Inspectors play a key role in formulating local risk-based annual inspection plans. TSIs review and approve industry security plans implemented in support of TSA's regulatory mandate and ensure that aviation employees and individuals with access to secured areas are

subjected to fingerprint-based criminal history records checks and other security assessments performed pursuant to Federal law and TSA direction. Transportation Security Inspectors investigate incidents related to violations of TSA regulation, security directives, and approved security programs and prepare enforcement actions for adjudication. Inspectors deliver technical briefings and assist the aviation industry in interpreting agency policies to ensure effective compliance with rules.

TSIs provide on-site evaluations of security countermeasures by checking the integrity of access control systems, gates, fences, alarms, security lighting, and biometric devices used to restrict public access and to ensure that only authorized persons are able to access passenger-carrying and cargo aircraft. Areas of emphasis for inspection and/or assessment include: automated access control systems, security identification systems, surveillance systems, law enforcement response capabilities, and physical security of aviation facilities and aircraft.

In FY 2007, TSIs completed the following accomplishments:

- Participated in 3,500 Aviation Screening Assessment Program (ASAP) tests
- Participated in multiple VIPR activities
- Successful roll-out of Aviation Direct Access Screening Program (ADASP) at all airports
- Completed over 1,800 airport inspections to ensure compliance with current requirements with a Compliance rate of over 95%
- Created and released the FY08 Regulatory Activities Plan
- Conducted the first "Airport Strikes" at Miami and Los Angeles
- Took part in 10 OIG Audits/Inspections and 6 GAO Audits/Inspections
- Conducted 20 site visits to address Compliance issues
- Deployed "Tiger Team" to Anchorage Int'l Airport (ANC) to assist FSD
- Received Behavior Recognition training
- Worked with multiple agencies to address co-mingling problems in Guam
- Led the effort to pilot and deploy new technology for aircraft screening using Sabre 4000 equipment domestically and overseas

In FY 2008, TSA received additional funding to increase the number of inspector positions. These additional positions will be allocated and deployed to high volumes airports and to those airports where aviation operations pose a higher degree of risk. This will allow for increases in the frequency of airport strikes and the number of covert tests and expand inspector participation in VIPR activities. In addition to increased inspections, the 46 proprietary canine teams will be added to the highest risk airports. Transportation Security Inspectors will also:

- Increase the frequency and number of airport/aircraft operator inspections at domestic airports
- Continue support of the ASAP, ADASP, OIG, GAO and Office of Inspections operations

TSIs will continue these efforts in FY 2009. TSA expects full year operations of the additional domestic inspectors provided in FY 2008 which will accomplish an increased number of compliance inspections. Inspectors will continue to schedule, oversee, and record the TSA ASAP program as well as actively participate in VIPR activities. Airport strikes will be expanded in order to include more testing protocols as well as 100% audit of specific airport badging offices. Additional covert testing protocols will be done for testing of all regulated entities.

While resources will continue to support participation in VIPRs, the FY 2009 Request consolidates the VIPR team funding in the Law Enforcement PPA in Aviation Security.

**Air Cargo -- \$86.3M:** This program is responsible for securing the air cargo supply chain including cargo, conveyances, and people. An estimated 23 billion pounds of air cargo is annually shipped within the United States. About three-quarters of this amount is transported via all-cargo aircraft, while the remainder travels aboard passenger aircraft. The program encompasses compliance activities, policy initiatives and technology implementation. Since safeguarding the nation's critical air cargo transportation infrastructure is a shared public and private sector responsibility, significant regulatory and outreach effort is required. TSA has implemented a threat-based risk management approach for prioritizing efforts and focusing resources. The Air Cargo Strategic Plan outlines an approach for securing the air cargo transportation system based on two threats: introduction of an explosive device on a passenger aircraft, and the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

In FY 2007, the Air Cargo program:

- Conducted over 20,000 inspections of foreign and domestic air carriers and indirect air carriers (IACs).
- Cargo Inspectors participated in monthly "cargo strike" surges at domestic, high cargo volume airports which resulted in more than 2,300 inspections of IACs and air carriers as well as more than 1,300 findings of non-compliance during the inspections.
- Expanded the frequency of the covert testing program for air cargo; more than 1,000 covert tests were conducted in FY 2007.
- Thorough and aggressive air cargo oversight program also resulted in security program revocation of four IACs who were either unwilling or unable to comply with TSA air cargo security requirements.
- Participated in nationwide VIPR activities.
- Routinely screened express parcel shipments at over 250 airports.
- Published and implemented the Air Cargo Final Rule to further strengthen security.
- Began preliminary planning for the Certified Shipper program as a method to achieve 100% screening of air cargo on passenger aircraft.
- Continued improvements in other risk-based systems including a pre-system operational test of the Freight Assessment System (FAS) initiated to target high risk freight for further screening.
- Indirect Air Carrier Management System (IACMS) became fully operational and received data to conduct 170,000 security threat assessments of employees handling air cargo.
- Launched the Known Shipper Management System to vet shippers who currently utilize the passenger air cargo supply chain.
- Completed more than 20,000 air cargo compliance inspections at domestic airports
- Conducted monthly "cargo strike" surges at the largest domestic airports
- Hired and trained 150 additional domestic cargo inspectors
- Developed and implemented the TSA proprietary canine team program

In FY 2008, TSA will complete the hiring and training of 150 additional cargo inspectors, bringing the total inspector workforce to 460. These additional inspectors will be allocated and deployed to high volumes airports and to those airports where cargo operations pose a higher

degree of risk. TSA anticipates the new cargo inspectors will conduct an additional 3,500 inspections in FY 2008. This will also enable the increase in the frequency of cargo strikes and the number of covert tests. During surge and periods of elevated threat, cargo Inspectors will also continue to participate in VIPR activities.

In addition to increased inspections, the Air Cargo program will deploy 170 canine-teams, including 85 proprietary, to screen known shipper air cargo and cargo at high volume airports. These teams will be located at 20 airports with the greatest volume of passenger air cargo. The canine will focus their efforts on screening large, bulk configurations as well as individual cargo pieces when appropriate. Canine teams will also participate in surge and high-visibility activities in and around the airport environment.

In FY 2008, the Air Cargo program will also:

- Conduct 10 vulnerability assessments of Category X airports
- Implement the Certified Shipper Program in an effort to achieve 100% screening of passenger air cargo in 2010.
- Complete pre-system operational test of the FAS system and begin full implementation.

FY 2009 will be the first full year of the expanded workforce and additional canine teams for Air Cargo inspection. With 460 fully trained and operational cargo inspectors, this program will accomplish a greater level of compliance inspections, including:

- Increased oversight of the Certified Shipper program;
- Development of additional covert testing protocols in order to include the testing of critical air cargo security measures;
- Expansion of Cargo strikes in order to evaluate of new requirements;
- Completion of the remaining 14 vulnerability assessments for the 27 Category X airports will be completed;
- Deployment of Certified Shipper to establish full supply chain security of entrants in the program; and
- Deployment of a full complement of 170 TSA canine teams, providing considerable screening capabilities for air cargo while making significant progress toward achieving 100% screening of all passenger air cargo by 2010.

**International Programs -- \$29.0M:** TSA strives to lead worldwide improvements in transportation security using a three-layered approach, which includes:

- 21 TSA representatives responsible for liaison activity and representation with over 100 foreign governments;
- On-site liaison activity and representation in 14 foreign countries;
- Non-stop assessment activity by approximately 75 International Aviation Security Inspectors verifying security measures of U.S. and foreign air carriers and compliance with International Civil Aviation Organization standards at more than 500 foreign airports;
- Assessment activity in the near future at nearly 700 foreign and 4,500 domestic repair stations; and
- Active leadership within the regional and international community that comprises the world's transportation security expertise and policy development.

TSA promotes alignment and consistency between the security requirements of the U.S. and foreign governments. TSA takes a leadership role as a permanent U.S. member in the regional and international organizations concerned with transportation security [e.g., International Civil Aviation Organization (ICAO), the Arab Civil Aviation Commission (ACAC), the European Civil Aviation Conference (ECAC), the International Multi-Modal (IMM) Transportation Security, and the Asian Pacific Economic Cooperation (APEC)]. Through interaction with foreign officials at the regional level, best practices in transportation security can be advanced to achieve TSA's vision of a secure, global transportation system.

TSA Representatives (TSARs) serve as on-site coordinators for the TSA response to terrorist incidents and threats to U.S. assets at foreign transportation modes. The TSARs serve as principal advisors on transportation security affairs to U.S. Ambassadors and other embassy officials responsible for transportation issues to ensure the safety and security of the transportation system. In FY 2007 TSA reviewed overseas positions and worked with the State Department on approval to establish additional TSAR positions in Amman, Jordan, and New Delhi, India as well as shifting the TSAR for Eastern Europe into Warsaw, Poland to enable more support to portfolio countries, and moving the TSAR for Germany from Frankfurt to Berlin to be co-located with the relevant transportation ministry.

Also during FY 2007, the TSAR Program accomplished the following:

- Maintained in-depth contact with host government transportation authorities in all countries that provide direct service to the United States. Established and continued contact with over 30% of the countries with no service, many of which had not previously received assistance from TSA.
- Established a WebBoard for disseminating information to civil aviation authorities around the world who are charged with transportation security. Through this board, TSA is able to assist over 100 countries in enhancing security for aviation, rail, mass transit, and pipelines.
- Developed and implemented a tracking tool for monitoring progress of each assessed foreign airport in implementing improvements identified during the Foreign Airport Assessment Program visits. This tool enables TSA to monitor trends and anomalies regionally and by portfolio, and ensures that progress in resolving non-compliance is carefully tracked.
- Drafted an Incident Management Protocol for events that occur in foreign location and shared the document with other responsible offices in TSA. This document establishes the chain of command for incident response, identifies logistics requirements, and notes lessons learned from previous events.
- Implemented a regime of TSAR regional conferences in which strengths and weaknesses were reported and discussed throughout the Area of Responsibility, thereby identifying opportunities for harmonization and capacity building, respectively. These quarterly meetings have resulted in identification of a better distribution of countries assigned to each TSAR, leveraging existing relationships and avoiding adversarial situations between the portfolio governments.

During FY 2008, the TSAR Program intends to implement an aggressive program of capacity building initiatives with those governments needing transportation security assistance. Through identification of threats and vulnerabilities in each country, the TSARs intend to work with regional leaders to harmonize training, assistance, and information exchange opportunities to

better capitalize on organic resources. The greatest emphasis will be placed on Africa and the Pacific, in light of the exponential increases in traffic from these regions to the United States and the concomitant concerns about security of U.S. passengers and goods. The TSAR Program will focus, too, on the expansion of Air Cargo security initiatives in the international realm, predominantly for goods carried onboard passenger aircraft but with a growing emphasis on all-cargo operations, as well. As a result of funding increase in FY09, TSA will staff three new TSAR positions – one each in Brasilia, Brazil; Pretoria, South Africa; and Nassau, The Bahamas to address the increasing air traffic, harmonization and/or capacity building efforts, and potential risks noted in each region.

TSA implements the Foreign Air Carrier Program (FACP), in accordance with 49 CFR Part 1546, which requires non-U.S. air carriers, landing or taking off in the United States, to adopt and carry out a security program for each scheduled and public operation meeting specific seating capacity and/or airport access criteria. Such non-U.S. air carriers are assigned an International Principal Security Inspector (IPSI). TSA IPSIs coordinate the sharing of aviation security related requirements, intelligence, incidents; and/or threat information affecting passengers, air carriers, the United States, and civil aviation worldwide. In FY 2009, TSA will staff two new overseas IPSI positions in Beijing and Dubai, United Arab Emirates.

The Foreign Airport Assessment Program and Air Carrier Inspection Program at foreign airports differ significantly from domestic compliance operations. During airport assessments conducted in foreign countries, International Aviation Security Inspectors (IASIs) focus on application of International Standards and Recommended Practices (SARPs) defined by the International Civil Aviation Organization, to which nearly 190 countries are signatories. TSA is congressionally mandated under 49 United States Code 44907 to assess all airports against these SARPs from which there is service to/from the United States. Because of the thoroughness of the assessment, each foreign airport assessment conducted requires approximately four weeks to complete in its entirety. IASIs also inspect the operations of both domestic and foreign air carriers with U.S. service from these airports to insure compliance with TSA security directives and emergency amendments. Carrier inspections can occur up to two times annually with airport assessments occurring at least once every three years and more frequently on risk based scheduling.

**Transportation Security Network Management (TSNM) -- \$6.1M:** This funding provides 42 positions to coordinate aviation security efforts with airlines, airports, and within the general aviation community.

TSNM serves as a “one-stop” shop for all general aviation (GA) security matters and is responsible for all matters concerning GA security. The program uses a threat based and risk management approach to develop strategies, policies, and programs to reduce the security risks and vulnerabilities associated with GA operations. Security issues include aircraft corporate operators, recreational aircraft, and charter operators; private and public use of general aviation airports; airmen; and airspace. The program works collaboratively with the stakeholders to develop creative methods to enhance security and develop, disseminate, and consistently apply a framework of appropriate Federal security standards.

In accordance with TSA/TSNM organizational goals and strategies, GA has developed specific strategies for FY 2008 and 2009. TSA will develop security action items for Fixed Based Operators (FBO) and aircraft operators and updating GA airport guidance

In an effort to build meaningful relationships with the commercial airport industry, TSA/TSNM oversees the development of policies and programs that enhance security at the Nation's commercial airports. The program works to develop national airport security programs that guide security plans by regulated entities. The program also ensures a robust communications system for relaying TSA guidance and information to transportation security stakeholders

For FY 2008 and 2009, commercial airports are planning strategies and key activities to support TSA/TSNM organizational goals. This includes encouraging officials from commercial airports to attend national/international conferences on aviation security. The program also develops new policy, as well as reviews existing policy and provides interpretations and clarifications of TSA security programs and regulations. The program also maintains a network of partners to ensure security information is shared on a regular basis.

The Commercial Airlines office includes 15 Principal Security Inspectors (PSIs) assigned to between one and 16 airlines each. They provide regulatory oversight of commercial airlines including management of the Aircraft Operator Standard Security Program, the Private Charter Program and associated security directives. PSIs provide the industry with supporting interpretations, clarification and assessments of the regulations and the level of carrier compliance. The PSI is the designated TSA representative for accepting, evaluating and coordinating amendments to the Program. The PSIs conduct over 250 comprehensive audits each fiscal year covering all mandated security requirements implemented system-wide by the airlines corporate office. Included in the audits are reviews of security training programs provided to flight deck and cabin crew and ground security coordinators.

As the number of commercial airlines increase each year, PSIs will also increase the number of comprehensive audits covering all security requirements, including the training programs during FYs 2008 and 2009.

In FY 2009, TSA will re-align base resources to support 4 additional positions for the General Aviation, commercial airports and commercial airlines functions. These will assist with increasing requirements in implementing the Aviation Security Strategy.

PPA: AIRPORT MANAGEMENT AND SUPPORT

|                              | <b>Perm</b>  |              |                  |
|------------------------------|--------------|--------------|------------------|
|                              | <b>Pos</b>   | <b>FTE</b>   | <b>Amount</b>    |
| <b>2007 Actual</b>           | <b>2,300</b> | <b>1,984</b> | <b>\$679,745</b> |
| <b>2008 Enacted</b>          | <b>2,130</b> | <b>2,045</b> | <b>651,933</b>   |
| 2009 Adjustments-to-Base     | (173)        | (167)        | (278,923)        |
| <b>2009 Current Services</b> | <b>1,957</b> | <b>1,878</b> | <b>373,010</b>   |
| 2009 Program Change          |              |              |                  |
| <b>2009 Request</b>          | <b>1,957</b> | <b>1,878</b> | <b>373,010</b>   |
| Total Change 2008-2009       | (173)        | (167)        | (278,923)        |

The Transportation Security Administration requests \$373.0 million for this activity. This is a decrease of \$279 million and 167 FTE from FY 2008. The requested level includes adjustments-to-base for pay (\$24.7 million) and non-pay (\$252 million). Other adjustments-to-base include inflationary adjustments and for pay and non-pay COLA (\$2.3 million). The adjustments are based on the realignment of FTP/FTE from Airport Management IT to combine IT in one PPA in the Transportations Security Support Appropriation.

**PROGRAM DESCRIPTION:**

(dollars in millions)

|  | <b>FY 2009</b> |
|--|----------------|
| FSD Staff and OSO HQ PC&B                  | \$216.7        |
| Airport Rent and Furniture                 | 105.1          |
| Airport Parking and Transit Benefits       | 17.5           |
| FSD Staff Non PC&B                         | 23.2           |
| Electronic Time, Attendance and Scheduling | 10.5           |
| Total                                      | \$373.0        |

**FSD Staff and OSO HQ PC&B and Non PC&B:** In FY 2009, \$216.7 million of the request supports the payroll of 1,957 positions and \$23.2 million of related operating expenses. Of these positions approximately 1,825 comprise the staff of the 122 Federal Security Directors (FSDs) and the remainder is headquarters positions that direct the policy, analysis, and administration of aviation screening. These positions are critical to supporting the front line operations of our TSOs.

This funding supports the salaries and benefits of these positions, as well as travel, training, and contract requirements to support the staff. To streamline the administrative operations and gain efficiency at the airports, larger airports have been designated as hubs. These hubs provide security direction, administrative support, and staffing/personnel as needed to smaller, lower staffed airports (spokes). For example, Boston-Logan International Airport is the hub for 7 spoke airports (Bedford-Hanscom, Barnstable, Martha’s Vineyard, Nantucket, Provincetown, Westover and Worcester airports). FSD and staff travel frequently between the hubs and spoke airports. Funding of airport management and staff will provide the proper direction, support, and staff at the spokes to ensure efficient and effective operations.

Airport management and staff have developed operational strategies to make the screening process more efficient for the traveling public especially during peak travel seasons. They will continue to be the central reference point on policy development, information technology, training, performance management, finance, and human resources to support the mission of TSA.

TSA will adapt to a dynamic and changing environment with industry accepted scheduling and modeling programs, such as the Sabre Streamline Suite of applications. These applications will allow TSA to efficiently determine and schedule the TSO workforce at the nation's diverse airports. By accurately predicting, executing and measuring the number of TSO's required, TSA ensures that the public has a positive experience while maintaining the proper number of TSO's at each airport.

**Electronic Time, Attendance and Scheduling:** The Electronic, Time, Attendance and Scheduling (eTAS) Program will build upon the current SABRE scheduling program to integrate and automate the TSO scheduling and time reporting process, as well as build a seamless integration with the National Finance Center (NFC) for payroll processing. \$10.5 million of base resources will continue to fund the eTAS development and deployment efforts.

**Airport Parking and Transit Benefits:** The Employee Parking Assistance Program (EPAP) provides parking, shuttle service, and fee collection for TSA employees participating in this program. The services required must be able to provide sufficient parking for TSA employees at the airport, provide parking spaces that are available on a 24 hour basis, provide shuttle service to and from the terminal and provide fee collection services from participants. Significant Employee Parking Assistance Program (EPAP) accomplishments for FY 2007 include the following:

- Change in individual employee enrollment forms from using six digit social security numbers to four digit social security numbers due to increased security requirements.
- Addition of two airports for collection of fees from employees to enable a one time payment for parking at Phoenix (PHX) and West Palm Beach (PBI)
- \$34K payment to Chicago Mini-bus contractor to cover Dept of Labor mandatory salary requirements for employees based on standard labor rates. Covered under program funding.

EPAP FY 2008 priorities include the following:

- Expansion of the requirement for full payment of parking costs for Dulles International Airport (IAD). Current TSO staffing level is 614, however the target is at minimum 725.
- Expansion of the requirement to extend full payment of parking costs to McCarran International Airport (LAS) for approximately 750 screeners.

In FY 2009 the EPAP will continue to support collections and payments for the 26 airports which currently fall under the program.

The remainder of the \$17.5 million will enable TSA to maintain a fleet of vehicles and provide transit and parking benefits for field office employees.

**Airport Rent and Furniture:** \$105.1 million is requested for rent payments and furniture for TSA’s field offices (including FSD and TSO staff locations). Significant accomplishments in FY 2007 include the following:

- Implementation of the new furniture initiative to reduce the annual cost of rental furniture through targeted furniture buy-outs and rental replacements; and
- Implementation of the real estate customer service initiative which is based on field customer feedback and surveys. This initiative earned TSA the “best-practices” agency in real estate services within DHS.

In FY 2008, TSA will conduct a thorough review and update the program of requirements for field space and furniture, involving field customers and Security Operations as prime stakeholders. Additionally, while the aviation business model changes and discount airlines continue to grow, TSA must be able to provide support as the airports expand. TSA will be a valuable partner in the planning and design of security at airports through assistance with checkpoint redesigns and perimeter security. FSD and staff will continue to build relationships with airport officials, airlines, local law enforcement, and Joint Terrorism Task Force officials.

**PPA: FEDERAL FLIGHT DECK OFFICER (FFDO) AND FLIGHT CREW TRAINING**

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>   |
|------------------------------|---------------------|------------|-----------------|
| <b>2007 Actual</b>           | <b>25</b>           | <b>19</b>  | <b>\$21,367</b> |
| <b>2008 Enacted</b>          | <b>25</b>           | <b>25</b>  | <b>25,091</b>   |
| 2009 Adjustments-to-Base     | (25)                | (25)       | (25,091)        |
| <b>2009 Current Services</b> | ...                 | ...        | ...             |
| 2009 Program Change          | ...                 | ...        | ...             |
| <b>2009 Request</b>          | ...                 | ...        | ...             |
| Total Change 2008-2009       | (25)                | (25)       | (25,091)        |

The Transportation Security Administration requests to realign the funding in this PPA into the Law Enforcement PPA in the Aviation Security appropriation, thus decreasing this PPA by \$25.091 million and 25 FTE.

PPA: AIR CARGO

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>   |
|------------------------------|---------------------|------------|-----------------|
| <b>2007 Actual</b>           | <b>335</b>          | <b>292</b> | <b>\$64,238</b> |
| <b>2008 Enacted</b>          | <b>335</b>          | <b>325</b> | <b>73,000</b>   |
| 2009 Adjustments-to-Base     | (335)               | (325)      | (73,000)        |
| <b>2009 Current Services</b> | ...                 | ...        | ...             |
| 2009 Program Change          | ...                 | ...        | ...             |
| <b>2009 Request</b>          | ...                 | ...        | ...             |
| Total Change 2008-2009       | (335)               | (325)      | (73,000)        |

The Transportation Security Administration requests to realign this PPA into the Aviation Regulation PPA, thus reducing this PPA by 335 FTP, 325 FTE and \$73.0 million.

PPA: LAW ENFORCEMENT

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>  |
|------------------------------|---------------------|------------|----------------|
| <b>2007 Actual</b>           | ...                 | ...        | ...            |
| <b>2008 Enacted</b>          | ...                 | ...        | ...            |
| 2009 Adjustments-to-Base     | 591                 | 567        | \$242,247      |
| <b>2009 Current Services</b> | <b>591</b>          | <b>567</b> | <b>242,247</b> |
| 2009 Program Change          | ...                 | ...        | ...            |
| <b>2009 Request</b>          | <b>591</b>          | <b>567</b> | <b>242,247</b> |
| Total Change 2008-2009       | 591                 | 567        | 242,247        |

The Transportation Security Administration proposes a new PPA to reflect law enforcement activities and re-aligns funds from former PPAs as noted in the table below. TSA requests \$242.2 million for this activity in FY 2009.

**PROGRAM DESCRIPTION:**

This program consolidates the responsibilities of TSA's security and cooperative law enforcement activities into one PPA. These components provide law enforcement capabilities, canine presence in multiple transportation modes, operational coordination, and ensure the internal security of TSA. The following table provides the components of this PPA:

| <b>PPA Element</b>   | <b>FY 2009</b> | <b>Prior PPA(s)</b>  |
|--|----------------|--|
| Airport Law Enforcement & Assessments  | \$79.1M        | Aviation Regulation & Enforcement                                  |
| National Explosive Detection Canine Team Program                                     | \$54.5M        | Rail Inspectors/K-9s; Aviation Regulation & Enforcement; Air Cargo |
| Federal Flight Deck Officer and Crew Member Self Defense Programs                    | \$24.9M        | FFDO   |
| Transportation Security Operations Center and Continuity of Operations and Emergency | \$23.4M        | Airport Mgmt, IT, and Other Support; Surface Ops & Staffing        |

|  |                 |  |
|--|-----------------|--|
| Preparedness Programs                    |                 |  |
| Physical and Personnel Security Programs | \$30.3M         | HQ Admin; Airport Mgmt, IT, and Other Support;           |
| Permanent VIPR Teams                     | \$30.0M         | Aviation Regulation & Enforcement ; Rail Inspectors/K-9s |
| <b>FY 2009 Program Total</b>             | <b>\$242.2M</b> |  |

**Airport Law Enforcement & Assessments -- \$79.1M:** In accordance with the Aviation and Transportation Security Act (ATSA) of 2001, TSA established reimbursable agreements with state and local law enforcement agencies to provide uniformed officers at passenger security checkpoints under the flexible response authorities granted to TSA. These agreements provide financial assistance to partially reimburse airports at screening points throughout the U.S for post 9/11 law enforcement hours. They ensure consistent law enforcement presence is always available to deter suspicious activity and respond quickly in the event of a breach of security at checkpoints. In addition to these agreements, 80 airports have Assistant Federal Security Directors (AFSDs) for Law Enforcement to coordinate TSA's security efforts with local law enforcement.

In FY 2007, TSA funded 271 reimbursable agreements (RA) that included the following LEO patrol and response hours:

**Hours of Airport LEO Services Funded in FY 2007:**

| <b>Airport Category</b> | <b>Hours</b>     |
|-------------------------|------------------|
| <b>Cat I</b>            | 452,235          |
| <b>Cat II</b>           | 259,387          |
| <b>Cat III</b>          | 353,868          |
| <b>Cat IV</b>           | 449,213          |
| <b>Cat X</b>            | 615,573          |
| <b>Total</b>            | <b>2,130,276</b> |

The program was re-structured during FY 2006/07 and transitioned to a Cooperative Agreement (CA) process, which commenced in FY 2008. The new CA process offers a number of benefits over the previous RA system in that it expanded eligibility, maximized reimbursement rates, and enhanced the local/federal relationship. Under the CAs, TSA plans to reimburse approximately \$68M to the nation's airports in FY 2008.

Through the CA process and adjusting allocations to account for prior year expenditures, TSA has been able to significantly increase the number of airports participating in the LEO program (271 in FY 2007 to 343 in FY 2008) while maintaining the existing level of base program resources. TSA has also instituted more effective program management and oversight as a more efficient means of ensuring that the resources awarded best meet the program's intended purpose of improving the level of security at the nation's airports.

In FY 2009, TSA will continue to gain program efficiencies to maximize available funds.

**National Explosives Detection Canine Team Program (NEDCTP) -- \$54.5M:** The NEDCTP exists to deter and detect the introduction of explosives devices into the transportation system. Bomb threats cause disruption of air, land, and sea commerce and pose an unacceptable danger

to the traveling public which should be resolved quickly. Explosives detection canine teams are proven and reliable resources to detect explosives and are a key component in a balanced counter-sabotage program. The use of highly trained explosives detection canine teams is also a proven deterrent to terrorism directed towards transportation systems and provides a timely and mobile response to support facilities, rail stations, airports, passenger terminals, seaports, and surface carriers. The Canine program fosters partnerships throughout the Federal government, state and local law enforcement community, and throughout the world.

In FY 2007, TSA provided partial funding for over 450 canine teams through agreements with over 80 state and local agencies. TSA also provided explosives detection canines to law enforcement agencies across the country through its National Breeding and Development Center. TSA funded canine teams screened over 2 billion pounds of air cargo in FY 2007 and screened mass transit and airport facilities for the remaining 75 percent of their operating hours.

In FY 2008, the Canine program will expand considerably. The FY 2007 supplemental appropriation will fund 170 additional teams to focus on air cargo screening, half of which will be led by TSA inspectors for the first time. TSA will establish 45 teams in mass transit systems and ferries across the country through agreements with state and local agencies. An additional 92 teams will be added to the highest risk airports and mass transit systems across the nation; of which, 46 will be TSA led teams.

The FY 2009 Request continues the program at 2008 levels.

**Federal Flight Deck Officer (FFDO) -- \$24.9M:** TSA is mandated to provide a FFDO program to deputize qualified airline pilots as Federal law enforcement officers in order to defend the flight decks of aircraft against acts of criminal violence or air piracy. This voluntary program provides law enforcement training in firearms proficiency, self-defense tactics, authority, use-of-force, and decision making to defend the flight decks of both commercial and cargo aircraft.

In FY 2007, TSA trained 1,800 new volunteer FFDOs, provided approximately 16,000 firearms re-qualifications, and established a required two-day FFDO recurrent training program at the FAMS Atlantic City Training facility. Recurrent training is required to not only maintain perishable law enforcement skills, but to fulfill a five-year FFDO deputation training requirement.

In FY 2008, TSA plans to provide basic FFDO training to approximately 2,000 new volunteers, provide approximately 18,000 firearms re-qualifications for active volunteers, and provide approximately 2,200 recurrent training opportunities for FFDOs in their fourth and fifth year of deputation. A regional recurrent training facility will be established in Dallas, TX to enable increased recurrent training requirements and to provide better access for those volunteers in the West and Midwest. The FFDO program continues to actively engage FFDOs through scheduled regional meetings and regular communication.

In FY 2009, TSA will continue to provide basic and recurrent training for FFDOs between 3-5 years of service at the Atlantic City, NJ and Dallas, TX facilities. The program will provide approximately 22,000 firearms re-qualifications and initial training to new FFDOs.

In addition, TSA conducts the Crew Member Self-Defense Training Program to familiarize crew members with basic self defense concepts and techniques. In FY 2007, TSA began exporting the training to airlines' training facilities to increase the opportunity for participation. In FY 2008, TSA intends to expand participation in exportable training. The FY 2009 request continues this training capacity, and TSA will evaluate the utility of an intermediate level course to offer more advanced self-defense techniques and scenario training.

**Transportation Security Operations Center (TSOC) -- \$23.4M:** The TSOC is located at TSA's Freedom Center in Northern Virginia. TSOC serves as TSA's 24/7 operations center (command center) for transportation security-related operations, incidents, or crises. The TSOC correlates and fuses real-time intelligence and operational information, ensuring unity of command and action in the prevention of and response to terrorist-related incidents across transportation modes. The TSOC is co-located and closely aligned with TSA's Continuity of Operations and Emergency Preparedness (COOP) activities.

In FY 2007, TSA enhanced its incident management team with an increased capability to respond to security events across all modes of transportation by coordinating with numerous aviation, surface, law enforcement, and intelligence agencies such as the Federal Aviation Administration, National Geospatial-Intelligence Agency, Highway and Rail Information Sharing Analysis Center, and USTRANSCOM (U.S. Transportation Command). Facility renovations were initiated at two alternate operating sites while maintaining a readiness level to support TSA's Continuity of Operations and incident management activities.

In FY 2008, TSA plans to field a common operating picture throughout TSA to enable information sharing and support WebEOC as TSA's primary incident management tool. Emphasis on operational outreach will continue, to include more multi-modal entities.

The FY 2009 Request continues to improve capability and capacity through the use of existing base resources.

**Physical and Personnel Security -- \$30.3M:** TSA's Office of Security is responsible for agency-wide physical, personnel, and internal security policies and procedures to ensure a safe and secure environment and administer the pre-employment suitability of TSA's workforce, to include contractors.

In FY 2007, TSA completed adjudication of over 17,000 TSO applicants, making 10,000 eligible for entry on duty. All background investigations for the screener population were processed using the Electronic Questionnaires for Investigations Processing System (e-QIP). The Office of Security established a comprehensive information security (INFOSEC) training program for all TSA employees as well as a training program for Classified Security Custodians.

In FY 2008, TSA will begin implementing a program to acquire, field and integrate the TSA Personal Identity Verification (PIV) Card agency-wide in compliance with HSPD-12 and DHS policies and procedures. TSA plans to begin issuing PIV cards in mid-2008. TSA's goal for initial completion of PIV issuance is by the end of FY 2009.

The FY 2009 Request continues these services with continued improvements expected in background investigation cycle time and security technologies aimed at reducing the risk of unauthorized access at airports and other TSA facilities.

**VIPR Teams -- \$30.0M:** In FY 2007, TSA increased its random and visible presence in aviation and other modes of transportation through the participation in Visible Intermodal Protective Response (VIPR) operations. This program was developed in response to the need for a visible security presence in other modes of transportation, outside the aviation environment. VIPR teams can be deployed as needed to work with local law enforcement departments and transportation authorities to enhance security within their transit systems. These VIPR teams typically include Surface Transportation Security Inspectors (STSIs), TSA Canine teams, Aviation Security Inspectors (ASIs), Transportation Security Officers (TSOs), FAMs (both overt and covert) as well as local law enforcement officers. To date, TSA has deployed over 100 VIPR teams in mass transit systems and airports around the country. These deployments significantly improved our awareness of security within these facilities while establishing closer relationships with transit law enforcement agencies.

The FY 2008 appropriation provided TSA \$20 million and 225 FTP to create ten permanent VIPR teams. These additional teams greatly increase TSA’s ability to protect all modes of transportation by enabling these additional resources to be funneled to the more vulnerable modes of the transportation sector. This will accelerate the program of screening passengers, looking for suspicious behavior, and acting as a visible deterrent in multiple transportation sectors, including buses, mass transit and airports.

The FY 2009 Request annualizes and consolidates the effort and program funding into the Law Enforcement PPA.

**PPA: IMPLEMENTING REQUIREMENTS OF P.L. 110-53**

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>   |

| Total Change 2008-2009       | ...                 | ...        | (30,000)        |

In FY 2008, Congress appropriated \$30.0 million to implement the provision of Public Law 110-53, the Implementing the 9/11 Commission Recommendations Act of 2007. The FY 2009 request does not include additional funding.

**PROGRAM DESCRIPTION:**

These funds will be used to support multiple programs within the Transportation Security Administration appropriations as directed by the FY 2008 appropriation language. TSA will provide a report to the Committees on Appropriations 90 days after the date of enactment of this Act on the proposed allocation of these funds at the account and PPA level.

PPA: FEDERAL AIR MARSHAL SERVICE (FAMS)

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>  |

| <b>2009 Request</b>          | ...                 | ...        | <b>786,000</b> |
| Total Change 2008-2009       | ...                 | ...        | 786,000        |

The Transportation Security Administration (TSA) requests \$786.0 million in FY 2009. This request eliminates the FAMS appropriation as a separate funding entity and incorporates it as a single PPA within TSA's Aviation Security appropriation. The overall request includes an increase of \$16.5 million over the FY 2008 FAMS appropriation. The increase includes the annualization of the FY 2008 enacted increase and adjustments for cost of living increases. \$9.5 million is re-aligned into the proposed Law Enforcement PPA to consolidate the VIPR program.

This consolidation of FAMS into Aviation Security is an important step in fully implementing the goals, objectives and vision of the Department's Second Stage Review, and completes the integration of the FAMS into TSA's aviation security and enforcement missions. In addition, the realignment better reflects TSA's organization and management structure and will enable the agency to more rapidly apply its law enforcement and related resources to meet emerging threats.

**PROGRAM DESCRIPTION:**

The FAMS promotes public confidence in our Nation's civil transportation systems through the effective, risk-based, strategic deployment of Federal Air Marshals in both air and land based mission assignments. The Service's primary focus is to detect, deter, and defeat terrorist or other criminal hostile acts targeting U.S. air carriers, airports, passengers, crew and, when necessary, other transportation modes within the Nation's general transportation systems.

Performance of the FAMS' mission demands a host of critical planning, operational and support programs to protect the public from the threat of a terrorist attack or other criminal activity. As a result, this PPA encompasses an array of vital operational, training and infrastructure components to include:

- Continuous international and domestic flight/mission coverage and surveillance detection
- Joint Terrorism Task Force (JTTF) participation and investigations
- Tactical Information Sharing and Mission Scheduling and Notification Systems
- Specialized air marshal and law enforcement training programs and a dedicated training center
- Participation and support in Visible Intermodal Protective Response (VIPR) deployments targeting potential threats to rail, mass transit and land based transportation systems while in non-mission time, which does not reduce mission flights
- Workforce sustainment

During the course of operations, Federal Air Marshals are continually deployed (24/7) using a comprehensive, risk-based strategy to protect key flights within the United States and internationally. A sophisticated flight/mission scheduling and notification system enables the assignment of Federal Air Marshals to planned flights, while enabling the Service to quickly adapt mission tempo and flight selection/coverage to meet emerging threats

In FY 2007, FAMS mission coverage on critical international flights was accelerated amid heightened concerns about potential terrorism threats originating from Britain and other areas of Europe. Increased international deployments followed a series of unsuccessful terrorist plots involving two foiled car bombs in London and an attack at the Glasgow, Scotland airport. In addition to providing a deterrent to potential terrorists, publicly increasing mission coverage reassured flight crews and the traveling public in the safety of flying during the tense days following the terrorist incidents.

In FY 2008, FAMS intends to continue assigning FAMS to targeted critical domestic and international flights using a risk-based methodology. Similarly, per Congressional direction and as authorized in the 9/11 bill, the Service will continue participation in VIPRs during non-mission hours and coordination with other TSA assets, other federal agencies, and state and local authorities as required to best protect the United States and its interests from terrorist and criminal threats. This program is expected to continue into FY 2009.

The major cost components of this program are:

(dollars in millions)

|                                    | <b>FY 2009</b> |
|------------------------------------|----------------|
| Payroll, Compensation and Benefits | \$597.5        |
| Information Technology             | 28.4           |
| Operations Infrastructure          | 68.0           |
| Travel                             | 73.9           |
| Training                           | 18.2           |
| <b>Total</b>                       | <b>\$786.0</b> |

**Payroll/OWCP -- \$597.5M:** This component, which amounts to 76 percent of the Federal Air Marshal Service budget, covers all pay, compensation and benefits costs for the Service’s Federal Air Marshal and civilian work force. The missions that Federal Air Marshals perform every day represent the Service’s core capability and effort in achieving its goal of detecting, deterring, and preventing hostile acts with the aviation and transportation domains. Funding includes resources for pay, compensation and benefits, overtime, Law Enforcement Availability Pay (LEAP), awards, workers’ compensation, and a portion of the overall resources required for Permanent Change of Station (PCS) expenses. FAMS personnel are arrayed throughout the country and provide the manpower necessary to conduct the Service’s full range of operations.

**Information Technology (IT) – \$28.4M:** The FAMS IT Systems are critical for providing the Service and individual Federal Air Marshals with the vital automated tools, systems and computer security technology to ensure accomplishment of its mission.

In addition to funding a critical IT network needed for managing the FAMS enforcement and business operations, essential program elements of this component include the Mission

Scheduling and Notification System (MSNS). MSNS is a collection of sub-systems that provide the automated means for mission planning, mission scheduling, and for notifying Federal Air Marshals (FAMs) of their mission schedules. The MSNS uses a risk-based process that selects from among over 28,000 daily U.S. commercial airline flights to prioritize deployments of thousands of FAMs worldwide. The core of the MSNS consists of SABRE Air Crews and SABRE QIKRES Reservations systems, modified for use by the FAMS, with data being stored in Oracle Databases. The MSNS is critical to the accomplishment of the FAMS' mission inasmuch as its loss, or even an extended interruption, would cause a deterioration of mission coverage noticeable to the airlines, the public and to our enemies.

In FY 2007, FAMS implemented Real Time Flight Display (RTFD), which is a real time situational decision support tool providing access to planned and actual arrival/departure times. In addition, MSNS Field Automation was also deployed which provides an integrated web suite for field users to access various types of scheduling information. In 2008, the FAM will release the next version of RTFD which will integrate and automate various Mission Operations Center (MOC) activities.

**Operations Infrastructure -- \$68.0M:** The Operations Infrastructure component funds critical operations infrastructure program areas including, but not limited to, Permanent Change of Station (PCS), rent and utilities, facility build out, telecommunications, human resource services, background investigations, and supply management.

**Travel -- \$73.9M:** This component funds all travel necessary to perform domestic and international mission coverage, mission essential training and other business related travel in support of FAMS operations and program goals. The FAMS schedules coverage of high-risk flights according to a concept of operations that incorporates threat and intelligence, consequence, and vulnerability.

**Training -- \$18.2M:** Upon entry into the FAMS Training program, Federal Air Marshal trainees undergo an intensive 15-week training program conducted by the Federal Law Enforcement Training Center (FLETC) in Artesia, New Mexico and the FAMS Training Center located in Atlantic City, New Jersey. The training program provides for all associated training requirements such as FLETC costs, role player contracts, hotel lodging contracts for Atlantic City classes, training supplies, firing range fees, training gear, equipment, and clothing. Once assigned to a field office, FAMs undergo recurrent in-service training to maintain their skills to meet law enforcement requirements and firearms certification levels on a quarterly basis.

This PPA component also provides required professional training for FAMS technical professionals and support staff. Examples of Professional/Technical training include mandated annual explosives technical training for re-qualification and re-certification, mandated annual contracts/warrant officer training, mandated FAMS instructor training, leadership/management training, and professional/career development courses.

The Aviation Security Capital Fund (ASCF) was extended by the 9/11 Bill and is authorized through 2028.

The Transportation Security Administration requests \$676.0 million, an increase of \$426.0 million in additional mandatory funds generated by a temporary, four-year \$0.50 surcharge on the passenger security fee (PSF) for a total of \$3.00 per enplanement, up to a maximum of \$6.00 one way. This surcharge would be deposited into the ASCF to fund the purchase, installation, and recapitalization of checked baggage explosive detection systems (EDS) and in-line systems.

This offsetting collection supports General Aviation flights into DCA as provided by the Vision 100 Act. TSA levies a \$15 fee for each person onboard the flight for security threat assessments and flight authorization services. In addition, a \$296 fee per roundtrip is charged to flight operators for the screening personnel and equipment used to support such flights at DCA. These fee collections cover program costs associated with the legislated mandate requiring the establishment of a security program to allow General Aviation flights into and out of DCA.

FEE: INDIRECT AIR CARGO

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b> |

| Total Change 2008-2009       | ...                 | ...        | ...           |

This program change provides for the fee collection supporting security threat assessments of security workers in the air cargo supply chain. TSA levies a \$28 per assessment fee to offset costs of the assessments and program management costs. The total annual collections from these fees are estimated to be \$200,000. This fee is collected in accordance with the Final Rule on Air Cargo Security Requirements and as authorized by the FY 2004 DHS Appropriations Act (Public Law 108-90).

**IV. Program Justification of Changes - Not applicable.**

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Transportation Security Administration  
Justification of Proposed Changes in Aviation Security  
Appropriation Language**

For necessary expenses of the Transportation Security Administration related to providing civil aviation security services pursuant to the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat. 597; 49 U.S.C. 40101 note), [\$4,808,691,000] **\$5,289,810,000**, to remain available until September 30, [2009] **2010**, of which not to exceed \$10,000 shall be for official reception and representation expenses: Provided, That of the total amount made available under this heading, not to exceed [\$3,768,489,000] **\$3,678,287,000** shall be for screening operations, of which [\$294,000,000] **\$486,000,000** shall be available [only] for [procurement and installation of checked baggage] explosive detection systems; and not to exceed [\$1,009,977,000] **\$825,248,000** shall be for aviation security direction and enforcement; **and not to exceed \$786,000,000 shall be for the Federal Air Marshals**: *Provided further*, That security service fees authorized under section 44940 of title 49, United States Code, shall be credited to this appropriation as offsetting collections and shall be available only for aviation security: *Provided further*, That any funds collected and made available from aviation security fees pursuant to section 44940(i) of title 49, United States Code, may, notwithstanding paragraph (4) of such section 44940(i), be expended for the purpose of improving screening at airport screening checkpoints, which may include the purchase and utilization of emerging technology equipment; the refurbishment and replacement of current equipment; the installation of surveillance systems to monitor checkpoint activities; the modification of checkpoint infrastructure to support checkpoint reconfigurations; and the creation of additional checkpoints to screen aviation passengers and airport personnel: [Provided further, That of the amounts provided under this heading, \$30,000,000 may be transferred to the ``Surface Transportation Security"; ``Transportation Threat Assessment And Credentialing"; and ``Transportation Security Support" appropriations in this Act for the purpose of implementing regulations and activities authorized in Implementing Recommendations of the 9/11 Commission Act of 2007 (Public Law 110-53):] *Provided further*, That the sum appropriated under this heading from the general fund shall be reduced on a dollar-for-dollar basis as such offsetting collections are received during fiscal year [2008] **2009**, so as to result in a final fiscal year appropriation from the general fund estimated at not more than [\$2,598,466,000] **\$2,960,868,000**: *Provided further*, That any security service fees collected in excess of the amount made available under this heading shall become available during fiscal year [2009] **2010**: [Provided further, That Members of the United States House of Representatives and United States Senate, including the leadership; and the heads of Federal agencies and commissions, including the Secretary, Under Secretaries, and Assistant Secretaries of the Department of Homeland Security; the United States Attorney General and Assistant Attorneys General and the United States attorneys; and senior members of the Executive Office of the President, including the Director of the Office of Management and Budget; shall not be exempt from Federal passenger and baggage screening.] **Provided further, That any security service fees collected in excess of the amount made available under this heading shall become available during fiscal year 2010: Provided further, That notwithstanding section 44923 of**

**title 49, United States Code, the share of the cost of the Federal Government for a project shall not exceed 90 percent, and all funding provided by section 44923(h) of title 49, United States Code, may be distributed in any manner deemed necessary to ensure aviation security.**  
(FY 2008 Omnibus Appropriation Act)

Explanation of Change:

No substantive changes proposed.

## B. FY 2008 to FY 2009 Budget Change

**Department of Homeland Security

| <b>Total requirements</b>                             | <b>\$4,935,215</b> | <b>\$5,308,741</b> | <b>\$5,965,809</b> | <b>\$657,068</b>   |

<sup>1</sup> A portion of the unobligated balance from the start of year for FY 2007 will be used to cover TSA's ADA and FY 2007 rescission. Since there has not been a final decision for the use of these balances to cover the ADA, the amount is shown here as a non add and the obligations presented are consistent with the President's Budget.

**INITIATIVE #1  
TSA – ELECTRONIC BAGGAGE SCREENING PROGRAM (EBSP)**

**1. Project Description, Justification and Scope**

The Electronic Baggage Screening Program (EBSP) implements a national checked-baggage screening system to protect against criminal and terrorist threats, while minimizing transportation industry and traveling public burdens. TSA provides life-cycle procurement, deployment, integration, and maintenance of security equipment at over 450 U.S. airports. This program includes: (1) maintaining first generation Explosives Detection Systems (EDS), and Explosives Trace Detection (ETD) devices deployed after 9/11; (2) improving efficiency and effectiveness by acquiring and deploying next generation inline explosive detection technology, and by relocating lobby equipment at some airports;

and (3) Efforts to establish operational, functional, performance and integration requirements for TSA security screening equipment.

While the Congressionally-mandated requirement for 100 percent screening of aviation-checked baggage by electronic or other approved means has been achieved, the program must continue to research, evaluate, and deploy refinements to EDS and ETD technology and associated systems, that allow for improvements in: (1) throughput (checked bags per hour), (2) false alarm rate, (3) system availability, and (4) total cost of ownership for baggage screening (cost per checked bag). Equipment must be also be relocated from airport lobby areas to baggage room areas.

The following programs are funded under EBSP:

a) The Air Cargo Security Program: The Air Cargo Security Program provides short, medium, and long term technology readiness information for the security and protection of screening cargo. The program generates requirements for innovative technologies for DHS (S&T) to test, and performs Operational Testing on the systems that pass DHS testing for inclusion in a Qualified Products List.

b) The Infrastructure Protection Program: The Infrastructure Protection Program supports TSA in providing public and private operators of aviation and surface transportation infrastructure the knowledge and standards to assess and reduce vulnerability to attack.

c) The Conveyance Program: The Conveyance Program focuses on enhancing the survivability of commercial transportation vehicles, (e.g. aircraft, rail cars, trucks, vessels, buses, etc.); preventing misuse of commercial vehicles as delivery systems for terrorist weapons, reducing likelihood of death or injury to passengers and bystanders, and maintaining to the maximum extent possible the normal flow of commerce and passengers.

## **2. Significant Changes**

The President's budget proposes a near doubling of TSA's baggage screening program to accelerate the implementation of optimal EDS systems.

### 3. Project Schedule

## 5. Cost Estimate Detail and Changes (Dollars in Thousands)

| Description of Milestone  | Initial Total Cost (\$mil) | Planned Total Cost (\$mil) | Actual Total Cost (\$mil) | Explanation of Difference Between Current and Previous Estimate           |
|---|----------------------------|----------------------------|---------------------------|---|
| Program initiation (MNS, draft ConOps); Deployed NEXGEN units; Deployed LOI systems; Developed Strategic Program Plan   | 1,541,130                  | 1,541,130                  | 1,541,130                 | Previous year actual was 1,558.930 but not consistent with 300 submission |
| Deployed NEXGEN to improve system detection capabilities and improve throughput; Expedited EDS deployment in accordance with Strategic Plan; Deployed LOI systems; Updated Strategic Plan, LCCE, CBA, Deployment Schedule | 706,024                    | 706,024                    | 693,428                   | Airport scheduling delays slowed deployment of equipment.                 |
| Perform program management, system deployment, operations and maintenance, and tech management in accordance with draft final deployment plan   | 774,400                    | 774,400                    | 527,943                   | Airport scheduling delays slowed deployment of equipment.                 |
| Perform program management, system deployment, operations and maintenance, and tech management utilizing final strategic plan   | 796,000                    | 796,000                    | 0.000                     |   |
| Perform program management, system deployment, operations and maintenance, and tech management utilizing final strategic plan   | 1,113,075                  | 1,113,075                  | 0.000                     |   |
| Perform program management, system deployment, operations and maintenance, and tech management utilizing final strategic plan   | 715,753                    | 715,753                    | 0.000                     |   |
| Perform program management, system deployment, operations and maintenance, and tech management utilizing final strategic plan   | 730,874                    | 730,874                    | 0.000                     |   |
| Perform program management, system deployment, operations and maintenance, and tech management utilizing final strategic plan   | 745,481                    | 745,781                    | 0.000                     |   |
| Perform program management, system deployment, operations and maintenance, and tech management utilizing final strategic plan   | 768,226                    | 768,226                    | 0.000                     |   |

## 6. Method of Performance

EBSP is a 20 year program. Expenditures are approved based on an overall strategic plan that is submitted to Congress annually.

Operational performance will be measured based on the following criteria:

- 100 percent electronic screening of checked baggage for explosives at all commercial airports nationwide.
- Number of airports with integrated in-line systems
- Cost per bag screened
- Number of false alarms on Electronic Detection Systems

| Program  | Allocated Budget (\$000) |                  |
|--|--------------------------|------------------|
|  | FY 2008                  | FY 2009          |
| EDS/ETD Purchase & Install                     | 544,000                  | 829,894          |
| Screening Technology Maintenance & Utilities** | 227,000                  | 261,700          |
| Operation Integration                          | 25,000                   | 21,481           |
| <b>Total</b>                                   | <b>796,000</b>           | <b>1,113,075</b> |

\*Screening Technology, Maintenance and Utilities are combined into one PPA in FY08.

**9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders**

This program is mandated under the Aviation and Transportation Security Act (PL No. 107-71) which requires screening of checked baggage by EDS.

**Initiative #2**

***TSA – PASSENGER SCREENING PROGRAM (PSP)***

**1. Project Description, Justification and Scope**

The Passenger Screening Program provides the resources required to deploy and maintain passenger screening and carry-on baggage screening equipment and processes at approximately 2,100 passenger checkpoint lanes at airports nationwide, in order to minimize the risk of injury or death of people, or damage of property due to acts of terrorism. The Passenger Screening Program’s role consists of the identification, evaluation, field testing, procuring, deploying, integrating, maintaining, disposing and replacing of existing and emerging technologies necessary to meet those requirements. The ever-changing threat environment necessitates investment in new and improved technology to increase threat detection capabilities needed to provide the traveling public with optimal security screening benefits.

After the attacks on 9/11 Congress directed TSA to screen all passengers and their carry-on articles for explosives and components of weapons of mass destruction, as well as other prohibited items. At the time choices in technology were limited to legacy systems, namely metal detectors and basic x-ray equipment, all of which had significant shortfalls in the detection of explosives and non-metallic threats on people and in their carry-in articles. Since then, the Passenger Screening

Program has replaced the legacy systems with Enhanced Metal Detectors and TIP Ready X-ray systems, providing an expanded level of security and threat detection at the checkpoint. Explosives Trace Detector usage was expanded to more sites and higher quantities and recently, Explosives Trace Portals, Bottled Liquids Scanners, and Advanced Technology Systems have been deployed, providing additional levels of explosives security at the checkpoints. The Passenger Screening Program continues evaluating and deploying the next generation of detection systems that address existing weaknesses in detection capabilities, detect new threats, and reduce false alarm rates.

## **2. Significant Changes**

No significant changes in these programs from the information provided in the 2009 Congressional Justification.

## 6. Method of Performance

Expenditures are approved based on an overall strategic plan that is submitted to Congress annually.

Operational performance will be measured based on the following criteria:

- Cost per passenger screened
- Availability of fielded screening systems successfully detecting threats at specified levels

**7. Related Annual Funding Requirements  
(Dollars in Thousands)**

|  | FY 2009          |                   |
|--|------------------|-------------------|
|  | Current Estimate | Previous Estimate |
| N/A (All operations and maintenance are included in program cost estimates.) | N/A              | N/A               |
| <b>Total</b>   | <b>N/A</b>       | <b>N/A</b>        |

**8. Budget Allocation to Programs**

| Program  | Allocated Budget (\$000) |                |
|--|--------------------------|----------------|
|  | FY 2008                  | FY 2009        |
| Checkpoint Support                                 | 250,000                  | 127,683        |
| Screening Technology<br>Maintenance and Utilities* | 37,000                   | 48,900         |
| <b>Total</b>                                       | <b>287,000</b>           | <b>176,583</b> |

\*Screening Technology, Maintenance and Utilities are combined into one PPA in FY08.

**9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders**

This program is mandated under the Aviation and Transportation Security Act (PL No. 107-71) which requires screening of all passengers and property including carry-on baggage and other articles that will be carried aboard a passenger aircraft.

### PPA Mission Statement

The Screening Partnership Program (SPP) allows an airport operator to submit an application to have screening carried out by a qualified private screening company. The contractor must perform under federal oversight and the contracted screeners must perform at the same or at higher performance levels as federal TSOs.

|                       | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |

**PPA Mission Statement**

Includes all Transportation Security Officer (TSO), TSO Lead, TSO Supervisor, and TSO Manager salaries, benefits and compensation, and net effects of federal pay raise assumptions, transfers out of personnel and annualizations. Includes funds to pay worker's compensation payments.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Salaries and Benefits</b> | <b>\$2,443,768</b>     | <b>\$2,636,104</b>      | <b>\$2,716,014</b>      | <b>\$79,910</b>               |

Salaries and Benefits includes an increase of \$79,910,000 over FY 2008 for pay cost of living adjustments and new security programs. TSO FTE will increase by 205 for a net of the annualization of expanded security requirements (SPOT and ADASP) and a decrease of FTE due to career progression and other efficiencies.

**PPA Mission Statement**

Provides the ATSA-mandated and discretionary training to new TSO hires and the current TSO workforce. Provides all the operational support, such as consumables, uniforms, supplies, claims, checkpoint janitorial services, and checkpoint hazardous material disposal to maintain the TSO Workforce.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Salaries and Benefits</b> | <b>\$15</b>            | <b>\$0</b>              | <b>\$7,317</b>          | <b>\$7,317</b>                |

Salaries and benefits include the costs associated with the realignment of 56 FTP and \$7,317,000 from the Transportation Security Support Appropriation to consolidate the staff of the Office Technical Training under one PPA. Costs reflect the FY 2008 annualization and FY 2009 pay increase (\$213,000).

|               | <b>2007</b>     | <b>2008</b>     | <b>2009</b>     | <b>2008 - 2009</b> |
|---------------|-----------------|-----------------|-----------------|--------------------|
|               | <b>Actual</b>   | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>      |
| <b>Travel</b> | <b>\$54,622</b> | <b>\$53,418</b> | <b>\$51,754</b> | <b>(\$1,664)</b>   |

Travel includes all costs for full accommodations and fare for TSOs for required training. This amount also reflects the cost of the travel and per diem for the National Deployment Force. The FY 2009 decrease represents the non-recur of FY 2008 screener hiring for BDOs and ADASP.

|                                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|---------------------------------|---------------|----------------|----------------|--------------------|
|                                 | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Transportation of Things</b> | <b>\$573</b>  | <b>\$560</b>   | <b>\$69</b>    | <b>(\$491)</b>     |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2009 decrease reflects the rebasing of the Optimization program to the Checkpoint Support PPA.

|   | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|---|---------------|----------------|----------------|--------------------|
|   | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Communication, Utilities, and misc charges</b> | <b>\$559</b>  | <b>\$547</b>   | <b>\$533</b>   | <b>(\$14)</b>      |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2009 decrease reflects the rebasing of the Optimization program to the Checkpoint Support PPA.

|                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|-----------------|---------------|----------------|----------------|--------------------|
|                 | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Printing</b> | <b>\$604</b>  | <b>\$590</b>   | <b>\$576</b>   | <b>(\$15)</b>      |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. This object class includes expenditures for the reproduction and distribution of TSO training materials. The FY 2009 decrease represents the non-recur of FY 2008 screener hiring for BDOs and ADASP.

|   | <b>2007</b>     | <b>2008</b>     | <b>2009</b>     | <b>2008 - 2009</b> |
|---|-----------------|-----------------|-----------------|--------------------|
|   | <b>Actual</b>   | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>      |
| <b>Advisory and Assistance Services</b> | <b>\$13,062</b> | <b>\$12,774</b> | <b>\$10,881</b> | <b>(\$1,893)</b>   |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Included within this classification are expenditures for the development and delivery of training courses as well as program management and data analysis activities required to evaluate training effectiveness. The FY 2009 decrease represents the rebasing of the Optimization program to the Checkpoint PPA.

|                       | <b>2007</b>     | <b>2008</b>     | <b>2009</b>     | <b>2008 - 2009</b> |
|-----------------------|-----------------|-----------------|-----------------|--------------------|
|                       | <b>Actual</b>   | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>      |
| <b>Other Services</b> | <b>\$93,365</b> | <b>\$91,309</b> | <b>\$77,284</b> | <b>(\$14,025)</b>  |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Base funds support the continuance of contracts that provide logistical and programmatic support for TSO training and workforce career progression programs. These funds also provide for training courses sponsored by the Model Workplace program. The FY 2009 decrease represents the non-recur of FY 2008 screener hiring for BDOs and ADASP and the rebasing of the Optimization program to the Checkpoint PPA.

|  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|--|----------------|-----------------|-----------------|-----------------------|
| <b>Purchase from Government Accounts</b> | \$3,426        | \$3,351         | \$3,265         | (\$85)                |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2009 decrease represents the non-recur of FY 2008 screener hiring for BDOs and ADASP.

|  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|--|----------------|-----------------|-----------------|-----------------------|
| <b>Operation &amp; maintenance of facilities</b> | \$9,150        | \$8,949         | \$8,721         | (\$227)               |

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2009 decrease reflects adjustments from efficiencies.

|                                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Supplies &amp; materials</b> | \$36,558       | \$35,752        | \$33,404        | (\$2,348)             |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. This object class includes Improvised Explosive Device (IED) kits used to train TSO in recognition and resolution of alarms associated with IED devices. Mannequins used for screening instruction are also funded in this object class. Consumable supplies such as disposable gloves, TSA logo inspected tape, and serialized label seals and plastic strip seals to reseal bags opened for inspection comprise the major expenditures in this category. The FY 2008 decrease represents the rebasing of the Optimization program to the Checkpoint PPA.

|                  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Equipment</b> | \$15,255       | \$14,919        | \$2,434         | (\$12,485)            |

This category is comprised primarily of training equipment used to demonstrate equipment use and to test the capabilities of TSOs. The FY 2008 decrease represents the rebasing of the Optimization program to the Checkpoint PPA and the non-recur of FY 2008 screener hiring for BDOs and ADASP.

|                                       | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------------------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Grants/Subsidies/Contributions</b> | \$0            | \$0             | \$0             | \$0                   |

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects.

|                 | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Printing</b> | \$2           | \$2            | \$0            | (\$2)              |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2009 decrease reflects the realignment of HR Services PPA to the Support Apprpriation. This PPA is being realigned to the new Human Capital Services PPA under the Transportation Security Support Appropriation.

|   | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|---|---------------|----------------|----------------|--------------------|
|   | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Advisory and Assistance Services</b> | \$6,491       | \$66,975       | \$0            | (\$66,975)         |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2009 decrease reflects the realignment of HR Services PPA to the Support Appropriation.

|                       | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|-----------------------|---------------|----------------|----------------|--------------------|
|                       | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Other Services</b> | \$147,130     | \$98,068       | \$0            | (\$98,068)         |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. This category includes contracts for recruitment and assessment of TSO and processing of all TSA personnel activity. The FY 2009 decrease reflects the realignment of HR Services PPA to the Support Appropriation.

|  | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|--|---------------|----------------|----------------|--------------------|
|  | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Purchase from Government Accounts</b> | \$1,498       | \$1,609        | \$0            | (\$1,609)          |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2009 decrease reflects the realignment of HR Services PPA to the Support Appropriation.

|                     | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|---------------------|---------------|----------------|----------------|--------------------|
|                     | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Medical Care</b> | \$4           | \$4            | \$0            | (\$4)              |

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2009 decrease reflects the realignment of HR Services PPA to the Support Appropriation.

|                                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|---------------------------------|---------------|----------------|----------------|--------------------|
|                                 | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Supplies &amp; Materials</b> | \$154         | \$165          | \$0            | (\$165)            |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2009 decrease reflects the realignment of HR Services PPA to the Support Appropriation.

**PPA Mission Statement**

The Checkpoint Support PPA provides the resources required to deploy passenger screening, carry-on baggage screening and electronic surveillance equipment. This equipment is a vital component of TSA's efforts to secure our nation's air transportation. FY 2008 enacted reflects the lack of direct budget authority in 2008, with funding having occurred in the Checkpoint Screening Security Fund. Checkpoint spending was funded by The FY 2009 request reflects an increase to support the implementation of the evolving strategy to improve detection capability for weapons and explosives, and to further develop the capability to detect hostile intent.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | <b>\$6,643</b>         | <b>\$0</b>              | <b>\$5,548</b>          | <b>\$5,548</b>                 |

Salaries and Benefits includes costs for 40 FTEs, which includes realignment of operating and personnel funds. The FY 2009 request reflects a slight increase from the activity funded in the Checkpoint Screening Security Fund PPA in 2008 due to the proposed pay increase, and decreases for lapse rate and efficiencies.

**PPA Mission Statement**

EDS/ETD Purchase and Installation is the purchase of electronic baggage screening equipment for deployment and the installation of electronic baggage screening equipment in our nations airports. The deployment of this equipment is a key component of TSA's ability to ensure the security of the air transportation system. Installation is an integral cost associated with the deployment of equipment that enhances the security of our air transportation system.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

**PPA Mission Statement**

Screening Technology Maintenance and Utilities funds the maintenance and associated utilities of passenger and baggage screening equipment in our nation's airports. This funding is essential to ensure that all security screening equipment is operationally ready and supportable over its anticipated lifetime.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | <b>\$93</b>            | <b>\$175</b>            | <b>\$206</b>            | <b>\$31</b>                    |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is a required part of program implementation allowing personnel to collect and evaluate information to develop requirements and monitor implementation of projects. The FY 2009 Request reflects an increase of \$31,000 to cover the cost of employee travel required to implement and monitor maintenance programs.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Communication, Utilities, and misc charges</b> | <b>\$5,095</b>         | <b>\$5,000</b>          | <b>\$5,883</b>          | <b>\$883</b>                   |

Communications, utilities, and miscellaneous charges includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2009 Request reflects an increase of \$883,000 for utilities for EDS/ETD checked baggage screening facilities including the cost of the base services and the cost of supplying utilities to newly installed equipment.

|                       | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |

|                       | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Other Services</b> | <b>\$3,784</b> | <b>\$2,182</b> | <b>\$2,567</b> | <b>\$385</b>        |

Other services includes report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. This included contractual support for Integrated Logistics Support program to sustain the Security Equipment deployed and utilized by TSA. The FY 2009 Request reflects an increase of \$385,000 to support costs of newly deployed equipment.

|   | <b>2007</b>      | <b>2008</b>      | <b>2009</b>      | <b>2008 to 2009</b> |
|---|------------------|------------------|------------------|---------------------|
|   | <b>Actual</b>    | <b>Enacted</b>   | <b>Request</b>   | <b>Change</b>       |
| <b>Operation &amp; Maintenance of equipment</b> | <b>\$206,671</b> | <b>\$251,406</b> | <b>\$295,807</b> | <b>\$44,401</b>     |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Maintenance cost increases from approximately 3% to about 15% of original purchase cost as equipment warranties expire. The FY 2009 Request reflects an increase of \$44,401,000 for maintenance of EDS and ETD baggage and checkpoint equipment.

|                                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------------------------|---------------|----------------|----------------|---------------------|

**PPA Mission Statement**

The purpose of Aviation Regulation and Other Enforcement is to provide activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the nation's commercial airports. Funding requested under this decision unit supports airport regulation compliance through domestic and international inspections, K-9 units, international outreach programs to ensure alignment and consistency in security requirements of the United States and those of the other nations to ensure transportation system integrity; and reimbursements provided to State and local law enforcement for support provided at commercial airport checkpoints. In FY 2009, TSA proposes a new PPA to reflect law enforcement activities by realigning funds from Aviation, Regulation and Enforcement, Rail Inspectors/K-9s, Air Cargo, and the Federal Flight Deck Officer program.

**Summary Justification and Explanation of Changes**

|                              | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|------------------------------|---------------|----------------|----------------|--------------------|
|                              | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Salaries and Benefits</b> | \$132,556     | \$115,766      | \$160,131      | \$44,365           |

Salaries and Benefits provides funding for 1476 positions including an increase of 378 positions from the realignment of the Air Cargo program into this PPA. Funding is also provided for annualization and the proposed FY 2009 pay raise.

|               | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|---------------|---------------|----------------|----------------|--------------------|
|               | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Travel</b> | \$8,596       | \$12,474       | \$15,520       | \$3,045            |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2009 increase reflects the rebasing of Air Cargo into this PPA.

|                                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |

| <b>Research and Development</b> | \$21           | \$28            | \$44            | \$16                  |

Research and Development includes costs for contracts for the conduct of basic and applied research and development. The FY 2009 increase reflects the rebasing of Air Cargo into this PPA.

|   | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|---|---------------|----------------|----------------|--------------------|
|   | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Subsistence &amp; Support of Persons</b> | <b>\$200</b>  | <b>\$270</b>   | <b>\$0</b>     | <b>(\$270)</b>     |

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. The FY 2009 decrease reflects the rebasing of law enforcement activities and canines into the new Law Enforcement PPA.

|                                 | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|---------------------------------|----------------|----------------|----------------|--------------------|
|                                 | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Supplies &amp; materials</b> | <b>\$1,585</b> | <b>\$2,139</b> | <b>\$3,781</b> | <b>\$1,642</b>     |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2009 increase reflects the rebasing of Air Cargo into this PPA.

|                  | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|------------------|---------------|----------------|----------------|--------------------|
|                  | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Equipment</b> | <b>\$963</b>  | <b>\$1,300</b> | <b>\$1,350</b> | <b>\$50</b>        |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2009 increase reflects the rebasing of Air Cargo into this PPA.

|                                       | <b>2007</b>     | <b>2008</b>     | <b>2009</b>    | <b>2008 - 2009</b> |
|---------------------------------------|-----------------|-----------------|----------------|--------------------|
|                                       | <b>Actual</b>   | <b>Enacted</b>  | <b>Request</b> | <b>Change</b>      |
| <b>Grants/Subsidies/Contributions</b> | <b>\$12,005</b> | <b>\$22,254</b> | <b>\$0</b>     | <b>(\$22,254)</b>  |

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. Funding supports reimbursable agreements for law enforcement officers as well as canine cooperative agreements. The FY 2009 decrease reflects the rebasing of law enforcement activities and canines into the new Law Enforcement PPA.

**PPA Mission Statement**

This PPA supports approximately 1,886 FTE at the airports and HQ, including the staff of the 153 Federal Security Directors (FSDs) and approximately 189 FTE that direct the policy, analysis, and administration of aviation screening. FSD staffs and Security Operations positions are critical to supporting the front line operations of our TSOs.

**Summary Justification and Explanation of Changes**

**PPA Mission Statement**

TSA is mandated to provide the Federal Flight Deck Officer (FFDO) and Flight Crew Training programs to deputize qualified airline pilots as federal law enforcement officers and to train flight crew members to defend the flight decks and cabins of aircraft against acts of criminal violence or air piracy. This voluntary program provides training in firearms proficiency, self-defense tactics, authorities, and decision making to defend the cockpit.

**PPA Mission Statement**

This program has been realigned to the Aviation Regulation and Enforcement PPA under the Aviation Security appropriation.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Salaries and Benefits</b> | \$27,964               | \$35,067                | \$0                     | (\$35,067)                    |

Salaries and Benefits FY 2009 decrease of \$35,067,000 is attributed to the realignment of this program to the Aviation Regulation and Enforcement PPA.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Travel</b> | \$2,855                | \$2,986                 | \$0                     | (\$2,986)                     |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. FY 2009 decrease of \$2,986,000 is attributed to the realignment of this program to the Aviation Regulation and Enforcement PPA.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|-----------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Printing</b> | \$0                    | \$3                     | \$0                     | (\$3)                         |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The printing provides educational materials, training aids, and regulatory guidance. FY 2009 decrease of \$3,000 is attributed to the realignment of this program to the Aviation Regulation and Enforcement PPA.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Advisory and Assistance Services</b> | \$10,644               | \$11,131                | \$0                     | (\$11,131)                    |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. These services support the Air Cargo Systems development, operation, and support Known Shipper Management System, Indirect Air Carrier Management System and Air Cargo Risk Based Targeting. FY 2009 decrease of \$11,131,000 is attributed to the realignment of this program to the Aviation Regulation and Enforcement PPA.

|                       | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|-----------------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Other Services</b> | \$14,991               | \$15,677                | \$0                     | (\$15,677)                    |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. FY 2009 decrease of 15,677,000 is attributed to the realignment of this program to the Aviation Regulation and Enforcement PPA.

|                                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---------------------------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Supplies &amp; materials</b> | \$201                  | \$210                   | \$0                     | (\$210)                       |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. FY 2009 decrease of \$210,000 is attributed to the realignment of this program to the Aviation Regulation and Enforcement PPA.

|                  | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |

<sup>1</sup> FY 2007 and FY 2008 represent the entire FAMS appropriation (Management and Administration, Travel and Training PPAs) consolidated in this PPA.

**PPA Mission Statement**

The FAMS promotes public confidence in our Nation's civil transportation systems through the effective, risk-based, strategic deployment of Federal Air Marshals in both air and land based mission assignments. The Service's primary focus is to detect, deter, and defeat terrorist or other criminal hostile acts targeting U.S. air carriers, airports, passengers, crew and, when necessary, other transportation modes within the Nation's general transportation systems.

**Summary Justification and Explanation of Changes**

|                              | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|------------------------------|---------------|----------------|----------------|--------------------|
|                              | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Salaries and Benefits</b> | \$568,502     | \$586,821      | \$597,552      | \$10,731           |

Salaries and Benefits includes an increase of \$8,126,000 to re-align funds in this PPA. It also annualizes the prior year pay raise and provides for the proposed 2009 COLA. Funding for OWCP is also included in the FY 2009 Request.

|               | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|---------------|---------------|----------------|----------------|--------------------|
|               | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Travel</b> | \$74,834      | \$79,764       | \$73,876       | (5,888)            |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2009 Request includes a decrease of \$5,888,000 to reflect the expected mission profile.

|                                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|---------------------------------|---------------|----------------|----------------|--------------------|
|                                 | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Transportation of Things</b> | \$1,504       | \$4,723        | \$6,277        | \$1,554            |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2009 Request includes an increase of \$1,554,000 for increased PCS requirements.

|                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|-----------------|---------------|----------------|----------------|--------------------|
|                 | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>GSA rent</b> | \$2,186       | \$2,675        | \$2,661        | (\$14)             |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 Request includes a decrease of \$14,000 for efficiencies.

|                   | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 - 2009</b> |
|-------------------|---------------|----------------|----------------|--------------------|
|                   | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>      |
| <b>Other Rent</b> | \$13,232      | \$14,790       | \$14,760       | (\$30)             |

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2009 Request includes a decrease of \$30,000 for efficiencies.

|  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|--|----------------|-----------------|-----------------|-----------------------|
| <b>Communication, Utilities, and Miscellaneous charges</b> | \$9,987        | \$11,848        | \$11,932        | 84                    |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FAMS uses this object class series for PDA and cell phone air time and general office utilities such as metered gas, electric, water usage, etc. The FY 2009 increase of \$84,000 realigns funding for this PPA.

|                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|-----------------|----------------|-----------------|-----------------|-----------------------|
| <b>Printing</b> | \$13           | \$10            | \$10            | \$0                   |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The printing provides educational materials, training aids, and regulatory guidance.

|   | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---|----------------|-----------------|-----------------|-----------------------|
| <b>Advisory and Assistance Services</b> | \$3,219        | \$21,292        | \$26,876        | 5,584                 |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. FAMS instructor contract costs are included in this object class. The FY 2009 Request includes an increase of \$3,387,000 to support the Air to Ground Communications System (AGCS), an increase of \$2,261,000 for IT security enhancements and a decrease of \$64,000 for efficiencies.

|                       | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|-----------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Other Services</b> | \$17,891       | 23,275          | \$26,348        | 3,073                 |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.1. The FAMS uses this series for additional support for the Mission Scheduling and Notification System, support services for other elements (including contractors supporting contracting/procurement efforts) within the Service as well as for FLETC costs, hotel lodging contracts for training and field recurring range fees for Federal Air Marshals' quarterly requalifications. The FY 2009 Request includes \$9,000 for AGCS, \$1,092,000 for increased background investigations, \$870,000 for the increased international airtime and the remainder for non-pay COLA.

|  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|--|----------------|-----------------|-----------------|-----------------------|
| <b>Purchase from Government Accounts</b> | 8,860          | 4,982           | \$4,688         | (\$294)               |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2009 decrease of \$294,000 reflects savings from one time costs in FY 2008.

|  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|--|----------------|-----------------|-----------------|-----------------------|
| <b>Operation &amp; maintenance of facilities</b> | 2,839          | 2,935           | \$2,935         | \$0                   |

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

|                                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Research and Development</b> | 5              | \$0             | \$0             | \$0                   |

Research and Development includes costs for contracts for the conduct of basic and applied research and development.

|                     | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Medical Care</b> | 29             | 1,879           | \$1,238         | (\$641)               |

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2009 Request includes a decrease of \$641,000 for object class realignments of program resources.

|   | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---|----------------|-----------------|-----------------|-----------------------|
| <b>Operation &amp; Maintenance of equipment</b> | 5,501          | 27              | \$1,423         | \$1,396               |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2009 Request includes an increase of \$1,396,000 for background investigations and IT Security enhancements.

|   | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---|----------------|-----------------|-----------------|-----------------------|
| <b>Subsistence &amp; Support of Persons</b> | 343            | \$8             | \$780           | \$772                 |

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. The FY 2009 Request includes an increase of \$772,000 due to the shifting of existing PCS base program resources.

|                                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Supplies &amp; materials</b> | \$5,025        | \$6,762         | \$6,691         | (71)                  |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FAMS uses this series for IT supplies and materials, office supplies and fuel as well as for medical supplies, ammunition, armory supplies and training supplies. The FY 2009 Request includes a decrease of \$71,000 for efficiencies.

|                  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Equipment</b> | \$5,443        | \$7,702         | \$7,952         | 250                   |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2009 increase is for non-pay COLA.

|                  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Indemnity</b> | \$45           | \$0             | \$0             | \$0                   |

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act.

**PPA Mission Statement**

This funding supports technologies that provide perimeter security capabilities or significantly enhance current technology based capabilities. Responsive projects may include perimeter sensors, intelligent camera systems, biometric devices, technologies to detect and track potential intruders, and communication capabilities to provide appropriate alarm and response notification. TSA will utilize the results of this project to continue to develop processes, procedures, technical requirements, and standards for perimeter security.

**Summary Justification and Explanation of Changes**

# BUDGET REQUEST AND SUPPORTING INFORMATION

## TRANSPORTATION SECURITY ADMINISTRATION SURFACE TRANSPORTATION SECURITY

### I. Appropriation Overview

#### A. Mission Statement for Surface Transportation Security:

TSA is mandated to protect the surface transportation system and ensure the freedom of movement for people and commerce. This mission is accomplished largely by a consortium of Federal, State, local, and private entities optimizing resources in a risk-based approach to security. In addition to coordination, TSA provides surface inspectors and other screening and detection programs.

These combined efforts play an essential role in DHS's mission to prevent terrorist acts within the U.S., to reduce vulnerability to terrorism, and to minimize the damage from potential attacks. The surface domain includes:

- Approximately 775 million passengers traveling on buses each year and over 9 billion passenger trips on mass transit per year.
- Over 140,000 miles of railroad track (of which 120,000 miles are privately owned); 3.8 million miles of roads (46,717 miles of Interstate highway and 114,700 miles of National Highway System roads); 582,000 bridges over 20 feet of span; 54 tunnels over 500 meters in length, and nearly 2.2 million miles of pipeline.
- Nearly 800,000 shipments of hazardous materials transported every day (95 percent by truck).
- The Marine Transportation System (MTS) consists of waterways, ports, and their connections. Commercial and recreational vessels, vehicles, and system users such as importers and exporters. It is geographically vast, with 95,000 miles of shoreline, 25,000 miles of rivers and canals.

There is a very real ongoing threat to transportation security, particularly involving the mass transit mode, as evidenced by the bombings in Madrid during the summer of 2004, London in July 2005 and Mumbai, India in 2006. Given this threat, TSA, its government partners, industry owners, and operators have increased their vigilance by continuing to exchange real time information and by focusing on threat detection and preparedness measures to improve security and resilience of the transportation system. In addition, TSA plays a pivotal role in the President's Executive Order to Strengthen Surface Transportation Security through identification of security gaps and development of appropriate security guidelines and requirements to mitigate these gaps.

#### B. Budget Activities:

This appropriation includes two major programs – Surface Transportation Security Operations and Staffing and Surface Transportation Security Inspectors.

**Surface Transportation Security Operations and Staffing** - Provides coordination among all surface security stakeholders to implement a regulatory framework and Administration policy,

identify best practices through pilot programs and evaluation of system assessments, and use this information to assess risk and assist with prioritization of security resources.

**Surface Transportation Security Inspectors [Formerly Rail Security Inspectors and Canines]**

- Employs a cadre of inspectors to provide compliance, outreach, and security efforts in the surface transportation system. These inspectors interact daily within the transportation network to enhance security measures and are available for surge operations during times of heightened security.

**C. Budget Request Summary:**

The Transportation Security Administration requests 240 positions, 230 FTE, and \$37,000,000 in FY 2009 for Surface Transportation Security.

| <b>2009 Request</b>          | <b>140</b>          | <b>134</b> | <b>\$25,397</b> |
| Total Change 2008-2009       | (48)                | (54)       | 912             |

The Transportation Security Administration requests \$25.4 million for this activity. This is an increase of \$912 thousand over FY 2008. The decrease of 48 FTP and 54 FTE consists of a re-alignment of \$1.5 million and 13 FTP/FTE from Transportation Security Operations Center to the Law Enforcement PPA in the Aviation Security appropriation; a technical correction of 35 FTP/FTE to align with funding levels for FY 2008 and FY 2009; and a \$747 thousand and 6 FTE decrease for lapse rate reduction.

Amounts have been shifted from pay to accurately reflect the current organization structure and program requirements. Also included in the adjustments to base are pay and non-pay cost of living adjustments; and, re-alignment of \$1.5 million of base funds from other appropriations to support an increase in awareness activities, information sharing, planning, and regulatory analysis.

**PROGRAM DESCRIPTION:**

TSA, in accordance with Aviation and Transportation Security Act (ATSA), is responsible for assessing the risk of terrorist attacks to all surface transportation modes, issuing regulations to improve these modes' security, and enforcing those regulations to ensure that each transportation mode is protected. The objective of these efforts is to establish best practices and national standards, develop security plans and regulations, better assess security vulnerabilities, and identify needed security enhancements for surface transportation modes and related infrastructure. The key strategic plans driving TSA's security efforts are the Executive Order to Strengthen Surface Transportation, the National Strategy for Transportation Security, the National Infrastructure Protection Plan and the DHS Strategic Plan. Specific personnel and activities included in this PPA are:

**Surface Personnel:** Funding for this PPA supports 140 FTP and 134 FTE to coordinate security efforts in non-aviation modes including Pipelines, Maritime, Mass Transit, Rail,

Highway and Motor Carrier and Postal and Shipping sectors to carry out transportation security activities. In FY 2006, TSA assumed the responsibility for providing subject matter expertise to the then Preparedness Directorate within DHS to evaluate and approve grant applications for bus, trucks, ports, mass transit, and passenger rail systems including ferry systems. TSA has continued to provide programmatic support to the National Preparedness Division at Federal Emergency Management Agency (FEMA) for the transportation grants program. Under TSA's leadership, the grants are awarded based on risk while working collaboratively with the transportation systems to ensure that the selected projects are focused on increasing security. Funding for 13 positions supporting the Transportation Security Operations Center (TSOC) has been re-aligned to the Law Enforcement PPA in Aviation Security.

**Corporate Security Reviews:** TSA conducts Corporate Security Reviews (CSRs) in multiple modes of transportation to establish baseline data against which to evaluate minimum-security standards and identify coverage gaps in reviewed systems. CSRs allow TSA and the system operators to develop first hand knowledge of security planning and execution at critical systems, establish communication between key security personnel, identify and share smart practices, and make recommendations for security improvements. In carrying out CSRs, teams of TSA modal experts evaluate and collect physical and operational preparedness information, critical assets, key point-of-contact lists, review emergency procedures, security plans, domain awareness training, and provide an opportunity to share security practices.

**Pipeline:** In FY 2007, TSA conducted 13 CSRs in the pipeline mode. To date, 71 CSRs have been completed. CSRs will continue in FY 2008 and FY 2009, with a goal of one major Pipeline System per month, or 12 total for each fiscal year. These on-site security reviews of transportation companies allow TSA to develop first-hand knowledge of security planning and execution at critical pipeline sites, establish communication with key pipeline security personnel, and identify and provide security best practices, and make recommendations for security improvements.

**Highway:** In addition, TSA has performed 113 CSRs on Highway transportation organizations. These include trucking companies, state Departments of Transportation (DOTs), transportation authorities, school districts (buses), and motor coach companies. CSRs will continue in FY 2008 and 2009 at both previously unvisited corporations and at critical corporations where revisits are justified by high threat or vulnerability situations.

**Freight Rail:** In FY 2007 TSA conducted CSRs on all seven Class I Railroads. Class I railroads are rail carriers with an annual operating revenue of \$319 million or more. The Freight Rail Division will use the results from the CSRs to develop standards for security plans. TSA will revisit each rail carrier every two years to ensure security levels are maintained. In FY 2008, TSA will begin CSRs on short line and regional railroads that carry materials toxic by inhalation and continue in FY 2009 and beyond.

**Cross-border Pipeline Security Assessments:** Canada is one of the world's largest producers and exporters of energy and is consistently among the top sources for U.S. oil imports, and the largest source of U.S. natural gas imports. To illustrate the magnitude of this energy trade, in 2006 Canada exported to the United States 2.3 million barrels per day (bbl/d) of oil and petroleum products (11 percent of U.S. supply) and 3.6 trillion cubic feet of natural gas (16 percent of U.S. supply). This energy is overwhelmingly moved by pipeline.

Recognizing the importance of securing the energy movement between the two countries, TSA performed an in-depth analysis on a cross-border pipeline system, as part of a team that included Natural Resources Canada, Argonne National Laboratory, and private industry. These pipeline cross-border vulnerability assessments were initiated under the provisions of the Smart Border Accord and have continued as part of the Security and Prosperity Partnership Agreement. Assessment teams of Canadian and U.S. subject matter experts in pipeline operations, control systems, infrastructure interdependencies, and assault planning visit critical cross-border pipeline infrastructure, identify security gaps, and recommend protective measures to mitigate those gaps. Pipeline companies have utilized the assessment results to target improvements to the security of their system. Six pipeline systems have been reviewed by a joint U.S./Canadian team.

**High Threat Urban Area (HTUA) Vulnerability Assessments:** TSA leads a DHS/DOT task force to conduct vulnerability assessments of High Threat Urban Area (HTUA) rail corridors. These on-site assessments consist of a detailed examination of the railroad(s) operations and procedures within the HTUA. Assessments lead to security enhancements and mitigation strategies to address the handling and protection of Toxic Inhalation Hazards (TIH) rail shipments through Huts. These assessments will continue in FY 2008 and FY 2009. TSA has completed assessments on eight rail corridors, and has scheduled one large scale assessment in FY 2008 of the Philadelphia rail corridor. TSA is currently restructuring the program to allow for compressed assessments at the remaining 34 HTUA rail corridors, which will begin in FY 2008 and continue through FY 2009.

**Security Standards Development:** Two initiatives are ongoing in this area and will continue in FY 2009. First, the Federal Government is engaging with the American Public Transportation Association (APTA) Security Standards Policy and Planning Committee to develop security standards. APTA is bringing together security professionals from the public transportation industry, business and research partner representatives, and the Federal Government (DHS, TSA, FEMA, Federal Transit Administration (FTA), and Federal Railroad Administration (FRA)) in a collaborative effort to develop consensus-based standards to enhance security in transit systems. Working groups are established to focus on specific security areas and concerns, including mass transit and passenger rail systems, facilities and operations. Working groups have also been formed and are beginning efforts to collaboratively develop standards for two additional areas: risk assessments and emergency drills and exercises. Federal participation in the consensus-based efforts is effected through the Government Coordinating Council/ Sector

Coordinating Council (GCC/SCC) framework and Critical Infrastructure Protection Advisory Council (CIPAC) process. The approved standards are then put forth as "recommended practices" and supported by the American Public Transportation Association for voluntary adoption by the transit industry. Published standards in multiple areas will occur throughout FY 2008.

The second initiative focuses on the development of standards for security technologies. The joint Federal-transit community effort aims to develop consensus-based standards for security technologies suitable for employment in mass transit and passenger rail environments. The DHS Standards Executive and the American National Standards Institute co-lead this initiative. The initial standards are anticipated for publication in FY 2008.

TSA is also developing voluntary Security Action Items (SAI) or security practices for the highway transportation of specific hazardous materials based on the results of the CSR program, review of industry security practices, and discussions with Federal agencies (DHS, DOT, Federal Motor Carrier Safety Administration (FMCSA), Pipeline and Hazardous materials Safety Administration (PHMSA), Federal Highway Administration (FHWA), Department of Defense, Department of Energy, and the Federal Bureau of Investigation). These SAIs are expected to be integrated into security plans required under 49 CFR 172.800 where a vulnerability analysis has identified a security gap.

**Consequence Analysis and Validation:** This project will identify a methodology that can be used to predict the behavior and subsequent consequences of a TIH (i.e., chlorine) release after an attack on a 90 ton rail tank car in a densely populated area. The significant result of this project will be the further validation of the identified methodology achieved through consensus among industry experts, government agencies, and academics in the field in addition to standard empirical testing. TSA intends to verify these methodologies through facilitated exercises.

### **Stakeholder Interface:**

*Transit.* In cooperation with the FTA and DHS, TSA facilitated eight Connecting Communities forums for transit operators, Federal and local first responders, and security experts to address gaps in security related emergency response capabilities. In addition, bi-annual safety and security roundtables are conducted with the security chiefs and directors of the Nation's fifty largest transit systems. These forums engage the assembled expertise in a focused working group format to address and develop solutions for current security issues and concerns. Additionally, the law enforcement chiefs and security directors of the 50 largest mass transit and passenger rail agencies join their Federal partners from TSA, DHS/FEMA, and FTA twice yearly in the semi-annual Transit Safety and Security Roundtables. Through this engagement, security professionals from the mass transit and passenger rail community and the Federal Government collaborate to advance effective programs and initiatives to enhance security. The focused effort over a 3 to 4-day period fosters the networking and information sharing, notably of smart

security practices, that is essential to elevating security posture throughout the passenger rail and mass transit mode. Finally, TSA subject matter experts in mass transit and the Transit Security Grant Program (TSGP) engage with Regional Transit Security Working Groups in eight major metropolitan areas to define security priorities and complete cooperative agreements on the most effective use of Federal grant funds to enhance public transportation security. TSA will continue this cooperative approach in these Tier 1 areas (New York, Boston, Washington, DC, Philadelphia, Chicago, Los Angeles, San Francisco, and Atlanta) throughout FY 2008 and FY 2009 with possible extension to locations at Tier 2 under the TSGP.

*Pipeline.* The International Pipeline Security Forums are an ongoing initiative conducted annually by the TSA Pipeline Security Division in conjunction with Natural Resources Canada. This international forum is a 2-day conference that enhances government and industry pipeline security domain awareness and provides opportunities for discussion of major pipeline security issues, both domestic and international. Approximately 150 - 200 people usually attend the forum, and attendees include representatives and officials from the U.S. and Canadian governments, pipeline related associations, pipeline owners and operators from the U.S. and Canada, and representatives from the security, intelligence and law enforcement communities. The first International Pipeline Security Forum was held in Calgary, Alberta, Canada in FY 2006. The second International Pipeline Security Forum was held in Chicago, Illinois in FY 2007. The third International Pipeline Security Forum was held in Ottawa, Ontario, Canada in FY 2008. The fourth International Pipeline Security Forum is scheduled to be held in Salt Lake City, Utah in FY 2009. Plans are for forum sites to continue to alternate between the U.S. and Canada in the future

*Highways.* In cooperation with the Federal Highway Administration (FHWA) and the American Association of State Highway and Transportation Officials (AASHTO), TSA is sponsoring a series of regional infrastructure protection conferences for state DOT security staff. This series will be repeated in FY 2008 and FY 2009 at the request of these stakeholders. TSA works with DHS to sponsor and manage the Highway Watch program that promotes security awareness among truckers and other professional drivers. This program also supports the Highway Information Sharing and Analysis Center (ISAC) and will be continued through FY 2009

*Security Awareness.* Security awareness training packages for operators have been developed for the pipeline, mass transit, freight rail and highway modes of transportation. Public awareness and education is also fostered through Transit Watch, Highway Watch, and other joint campaigns in transportation systems emphasizing the importance of vigilance and timely reporting of security concerns. TSA distributes security awareness information products to stakeholders through programs such as Security Training for Operational Readiness and Maritime Community Awareness Program (STORMCAP), which develops and disseminates enhanced security training, community awareness products and operational guidance to enhance maritime security. STORMCAP will develop increasingly detailed levels of security training for industry personnel and then

measure the adoption and effectiveness of this training by conducting focus group and effectiveness surveys.

*Pilot Programs.*

TSA also conducts pilots to develop technology solutions, identify best practices, and inform the standards setting process. Examples of TSA pilot programs expected to be ongoing in FY 2009 are:

**Intermodal Security Training Exercise Program (PortSTEP):** Exercise technology, services, and tools are being piloted to conduct and evaluate multi-modal transportation security training exercises. TSA and United States Coast Guard (USCG) partnered to conduct over 60 exercises in FY 06-07, and are currently collaborating on the transition of the program to a “Regional” level. The design, implementation, and evaluation of multimodal, surface transportation focused exercises, objectives, scenarios, and the continued development of information technology solutions are planned for FY 2009.

**Security Enhancement And Capability Augmentation Program (SEACAP):** This program builds upon pilots already conducted in Cape May, New Jersey, San Francisco Bay, the Jamestown River Ferry, Manhattan Cruise Terminal, and the Staten Island Ferry to provide a platform and programmatic infrastructure for improving current security screening for high capacity passenger vessel operations (ferry systems and cruise ship terminals). The continuation of this program will conduct baseline screening assessments and screening deployment exercises in high capacity passenger vessel operations in FY 2009. SEACAP will enhance the capability to deter, detect, and prevent explosives from being introduced as a weapon on ferries and in cruise line terminals.

**Bus Command and Control:** The system provides over-the-air vehicle disabling through restriction of fuel to the engine using a programmable series of steps. The system also has keyless driver authentication where operators have a unique numeric code that must be entered in order to start a bus or drive a bus already started, but idling for a designated amount of time. Alarms are sent wirelessly to a command or dispatch center if an unauthorized user attempts to operate the bus. A successful proof-of-concept took place in August 2006. The full field operational testing (FOT) of this system began in FY 2007 and will continue through FY 2008. Several systems have been identified to participate in the FOT on the East and West Coast.

**Improved Mass Transit Surveillance and Early Warning System:** This project involves the detection of human anomalous behavior through the use of advanced software with surveillance camera systems. The system works with new or legacy camera systems and provides a wide range of detection and tracking capabilities. The project is a joint effort between Technical Support Working Group, TSA, and DHS Science and Technology. Small-scale testing is currently taking place at Metro Transit in Minneapolis, MN. Large-scale testing

is projected to commence at a high passenger volume transit terminal during FY 2008. Upon completion, the system is expected to be commercially available.

**Layered Security Operational Test Bed:** This collaborative security engagement initiative tests the effectiveness of operational and technological solutions applied in a layered approach at mass transit and passenger rail facilities. The effort commenced with the Port Authority Trans Hudson (PATH) interstate rail system in FY 2007. As part of this effort, in December 2007, TSA facilitated a workshop with appropriate operating and security officials of the Port Authority and DHS S&T to assist the Authority in identifying operational and technological security requirements to drive a systems security approach, which will help the the Port Authority develop their 5 year strategic plan. TSA will partner throughout FY 2008 and FY 2009 in the testing of technological and operational solutions to prevent terrorism in mass transit and passenger rail systems. Continued development and extension to other systems and diverse public transportation environments – rail terminals and stations, system infrastructure, bus terminals and stations – will occur throughout FY 2008 and FY 2009. This information and experience derived will benefit all transit systems as they develop and implement the layered approach to security.

The Transportation Security Administration requests \$11.6 million for this activity. The funding will maintain current services for the Surface Transportation Security Inspection Program (STSIP).

**PROGRAM DESCRIPTION:**

The terrorist attacks of September 11, 2001, the March 2004 bombing of commuter trains in Madrid, Spain, the July 2005 bombings and attempted attacks against public transit in London, England, the August 2006 bombings of commuter trains in Mumbai (and continuing attacks in India against passenger rail systems), the July 2006 attempted attack on a passenger train in Germany, and the August 2007 bombing of rail tracks that derailed an intercity passenger train in Russia all demonstrate terrorist interest in public transportation systems as targets to achieve their objectives of causing high numbers of

casualties, destruction of property, economic disruption, and instilling fear. These incidents have both heightened concerns about the susceptibility of the passenger and freight rail system in the United States to terrorist attack and necessitate high levels of vigilance and preparedness. A proactive effort is essential to assess regularly the state of surface transportation security and ensure vigilance and preparedness remain high.

The Surface Transportation Security Inspection Program (STSIP) is a unique and critically important federal inspection and compliance program that is breaking new ground in U.S. surface transportation security. With initial emphasis on freight railroads and mass transit and passenger rail systems, the STSIP has set out to enhance security preparedness in an industry that is both vital to the economic well-being of America and is the largest transporter of passengers in the country.

The mission of the STSIP crosses all modes of surface transportation to include hazardous material transportation. Inspectors are deployed in a risk-based approach geared to creating the most favorable environment for engagement in security enhancement efforts with the surface transportation system(s).

In FY 2007, TSA issued a Notice of Proposed Rule Making (NPRM) for rail security that proposes and seeks comments on the clarified role of the agency's inspection authority and imposes security requirements for freight and passenger rail carriers, notably pertaining to transport of hazardous material and reporting of security concerns. The inspection force would continue efforts to elevate security posture throughout the freight and passenger rail and mass transit modes through comprehensive security assessment programs. These include:

- Conducting Baseline Assessment for Security Enhancement (BASE) reviews of mass transit and passenger rail systems.
- Inspecting for compliance of freight rail carriers with Security Action Items (SAI) in toxic inhalation hazmat (TIH) rail environments.
- Identifying security gaps through Security Analysis and Action Programs (SAAP) and other risk methodology employed in surface transportation systems.

**Baseline Assessment for Security Enhancement (BASE) Program:** In conjunction with FTA, TSA developed the BASE inspection program to integrate the range of security requirements and guidelines into a comprehensive assessment that provides an in-depth profile of the security posture of a mass transit or passenger rail system. The BASE program consists of updated Security and Emergency Management Action Items and TSA Security Directives. BASE reviews are conducted either as a stand-alone effort or in conjunction with State Safety Oversight (SSO) review of a rail systems compliance with 49 CFR Part 659, which directs transit agencies to maintain a system security plan. The Actions Items represent the core of this program, detailing 17 functional areas, including security program management and accountability, security and emergency response training, drills and exercises, public awareness, protective measures for Homeland Security Advisory System (HSAS) threat levels, physical security, personnel security, and information sharing and security.

The BASE program aims to elevate security generally, expand TSA's awareness and understanding of security posture in the passenger rail and mass transit mode, enable more effective targeting of security programs, provide technical assistance, and facilitate sharing of best security practices. This comprehensive national BASE review effort commenced in November 2006, with 53 full reviews completed in FY 2007 (45 of which were conducted on the nations' largest transit systems). In FY 2008, STSIP will continue the BASE plan initiated in FY 2007 by completing 50 additional reviews of transit systems ranked 51-100 based on passenger rider-ship data. Inspectors will follow-up on the results of the initial BASE inspections and assess compliance with the rules and regulations pending under the Rail Transportation Security NPRM, 49 CFR Parts 1520 and 1580.

Results of these security assessments are a major driver for the mass transit security programs and resource allocations, most notably Transit Security Grant Program (TSGP) funding. The comprehensive BASE results comport well with self-assessments of the top 50 transit agencies' posture in the six Transit Security Fundamentals that are priorities under the TSGP program. TSA has integrated the assessment results into the developing priorities for this funding, producing new and innovative ways to use Federal funds to elevate security posture. The BASE results have also identified a number of "smart practices" which are being packaged in products useful for sharing throughout the mass transit and passenger rail community.

**Security Action Item (SAI):** During FY 2007, STSIP initiated a four phase inspection program focused on security measures and on security awareness of toxic inhalation hazardous materials over the Nation's freight rail system. The inspection program included all major freight rail entities and all short line regional rail entities within an HTUA. Inspectors conducted over 170 inspections and interviewed over 2,600 railroad employees for Security Action Item (SAI) Phase I and Phase II. The term 'Phase' is indicative of an inspection initiative and one inspection process may encompass one or more Phases. Phase III completed the review of 155 facilities that handle TIH shipments. Phase IV addressed the Secretary's requirement of reducing the risk factor of TIH shipments by assessing rail car attendance and dwell time patterns. The STSIP completed over 1,336 Phase IV inspections, working with freight railroads to reduce TIH dwell times in High Threat Urban Areas (HTUAs). In FY 2008, STSIP will conduct follow-up inspections on the SAIs completed in FY 2007 and will ensure compliance with the rules and regulations to be finalized as part of the Rail Transportation Security NPRM, 49 CFR Parts 1520 and 1580. In FY 2009, the STSI Program will expand from 22 field offices to 57 offices, using a risk-based approach. This will result in the TSA STSIP having and maintaining a presence in all DHS-identified HTUAs and all top 100 national mass transit transportation systems.

**Surface Transportation Security Enhancement Activities:** During FY 2008, the Surface Inspectors will continue to undertake programs and initiatives aimed at enhancing security postures and improving regional collaboration and coordination to

ensure security resources are applied in the most effective manner. In addition to passenger rail and mass transit multi-modal security oversight, inspectors will provide oversight for motor carriers and freight rail lines that ship Toxic Inhalation Hazard (TIH) material. The increased focus on hazardous material security issues, as evidenced by legislation, demonstrates the need to coordinate and assist with security efforts affecting these shipments.

In FY 2009, inspectors will conduct on-site inspections to ensure compliance with security standards and guidelines, security directives, and security regulations. The STSIP will enhance information sharing; highlight best security practices; evaluate security system performance; and discover and assist in mitigating gaps and vulnerabilities in the industry's security systems.

STSI responsibilities include:

- Perform BASE and SAIs of surface transportation modes
- Perform SAAP Risk Assessments as requested
- Conduct compliance inspections and compliance investigations to prove or disprove alleged violations of security regulations, directives, or laws
- Promote information sharing through on-going outreach activities
- Prevent and reduce incidents of non-compliance
- Encourage mitigation or elimination of security gaps and weaknesses in the affected transportation systems
- Document all inspections, formal outreach activities, and information sharing efforts
- Identify, collect and share best security practices throughout the surface transportation environment
- Enhance consistent, multi-modal security coordination and communication
- Gather security-related data and conduct special emphasis inspections and evaluations
- Respond to and assist with National Special Security Events

Additionally, in FY 2009 the STSIP will continue the work begun in FY 2007 to reduce the dwell time for loaded TIH rail cars in High Threat Urban Areas by 50% by November 2008. In calendar year 2009, TSA will raise the goal another 10% from the 50% reduction off the baseline level achieved by the end of 2008. In each succeeding year TSA will raise the goal another 10% from the previous year. The Surface Inspectors will visibly survey rail yards, facilities, and storage areas within a 10-mile radius of identified HTUAs. This effort, coupled with the information from corporate security reviews, will be used to determine how effectively corporate initiatives have been implemented at field locations.

Inspectors also serve as panel members on the Transit Security Grant Program, reviewing project proposals, helping assess grant applications, and assisting in the development of the process by which the grants will be awarded.

**Visible Intermodal Protection and Response (VIPR):** Inspectors also are routinely involved in planning, coordinating, and participating in VIPR operations. VIPR

operations consist of teams of TSA personnel, to include STSIs, ASIs, TSOs and FAMs, deployed to an identified airport or transportation system. TSA has conducted more than 400 VIPR operations in mass transit and passenger rail properties since the program's inception in December 2005. The STSIP role in execution of these security augmentation deployments will continue to expand during FY 2009. In FY 2008, the STSIP received funding for an additional 75 positions to meet the increasing demands of VIPR activities while continuing to accomplish the broader (and increasing) security assessment, inspection, and enhancement mission. While these resources will continue to support STSI participation in VIPRs, the FY 2009 Request consolidates the VIPR team funding in the Law Enforcement PPA in Aviation Security.

**9/11 Commission Act:** The provisions of the *Implementing Recommendations of the 9/11 Commission Act of 2007* (P.L. 110-53) direct TSA to issue regulations that require freight rail carriers, mass transit agencies, passenger rail carriers, and over-the-road bus operators to develop and implement security plans and training programs as well as conduct security assessments.

In FY 2009, TSA will continue to coordinate with both public and private surface transportation entities to develop policies and regulations that will improve transportation security and ensure compliance with transportation security requirements.

#### **IV. Program Justification of Changes**

Not Applicable

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
Transportation Security Administration  
Justification of Proposed Changes in Surface Transportation Security  
Appropriation Language**

For necessary expenses of the Transportation Security Administration related to providing surface transportation security activities, [\$46,613,000] **\$37,000,000** to remain available until September 30, [2009] **2010**. (Department of Homeland Security Appropriations Act, 2008.)

**Explanation of Changes:**

No substantive changes proposed.

**PPA Mission Statement**

Surface Transportation Security Operations and Staffing is charged with managing TSA's efforts to mitigate the risk and provide security direction to all non-aviation transportation systems. This responsibility covers rail, mass transit, highways, buses, trucking, ferries, and pipelines. This office also works with industry, State and local governments, and other Federal agencies in developing standards and regulations to ensure the security of these vital transportation systems.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | <b>\$19,093</b>        | <b>\$22,161</b>         | <b>\$17,771</b>         | <b>(\$4,390)</b>               |

Salaries and Benefits includes costs for 134 FTEs in FY 2009. The FY 2009 decrease reflects adjustments to base realignment of FTE/FTP, associated funding as well as annualization, COLA, Lapse Rate and efficiencies.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | <b>\$450</b>           | <b>\$511</b>            | <b>\$977</b>            | <b>\$466</b>                   |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2009 increase request reflects non-pay inflation and an upward adjustment religned from pay.

|   | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---|----------------|-----------------|-----------------|------------------------|
| <b>Communication, Utilities, and Misc Charges</b> | \$0            | \$102           | \$106           | \$4                    |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. PDA and cell phone air time are the major items being charged to this object class. The FY 2009 increase request reflects non-pay inflation.

|                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|-----------------|----------------|-----------------|-----------------|------------------------|
| <b>Printing</b> | \$0            | \$10            | \$18            | \$8                    |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2009 increase request reflects non-pay inflation and an upward adjustment realigned from pay.

|                       | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|-----------------------|----------------|-----------------|-----------------|------------------------|
| <b>Other Services</b> | \$2,494        | \$1,361         | \$6,018         | \$4,657                |

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The funds will be used to support security efforts in non-aviation modes including Pipelines, Maritime, Mass Transit, rail, Highway and Motor Carrier and Postal and Shipping. The FY 2009 increase request reflects non-pay inflation, an upward adjustment realigned from pay and an adjustment to base of \$1,500,000 to support awareness & info sharing; standards, regs and plans development; and economic cost analysis.

|                                     | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |

| <b>Purchases from Govt Accounts</b> | \$0            | \$136           | \$139           | \$3                    |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The funds will be used to support partnership activities with other government agencies. The FY 2009 request reflects COLA increase over the FY 2008 level to support current services.

|                                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---------------------------------|----------------|-----------------|-----------------|------------------------|
| <b>Supplies &amp; Materials</b> | \$266          | \$204           | \$368           | \$164                  |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. This PPA will use these funds to acquire office supplies, education materials, training materials and any other supplies and materials. The FY 2009 increase request reflects non-pay inflation and an upward adjustment realigned from pay.

| <b>Salaries and Benefits</b> | <b>\$9,636</b> | <b>\$13,958</b> | <b>\$10,317</b> | <b>(\$3,641)</b>       |

Salaries and Benefits includes costs for 96 FTEs in FY 2009. The decrease in FY 2009 reflects the realignment of annualized FTE/FTP for VIPR to the Law Enforcement PPA under the Aviation Security appropriation.

|               | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---------------|----------------|-----------------|-----------------|------------------------|
| <b>Travel</b> | <b>\$1,051</b> | <b>\$859</b>    | <b>\$414</b>    | <b>(\$445)</b>         |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. This funding will be used for local and extended travel to conduct a multitude of transit inspections program management. The decrease in FY 2009 reflects the realignment of VIPR activities and mass transit canine funds to the Law Enforcement PPA under the Aviation Security appropriation.

|                                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---------------------------------|----------------|-----------------|-----------------|------------------------|
| <b>Transportation of Things</b> | \$3            | \$1             | \$1             | (\$0)                  |

Transportation of things includes shipment by common or contract carrier, courier and express mail services, postage and the transportation of household goods for permanent change of station. This funding will be used for the purposes of shipping items used to support inspection activities including: employee training, conferences and inspection reference materials.

| <b>Communication, Utilities, and Misc Charges</b> | \$0            | \$192           | \$47            | (\$144)                |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. This funding will be used for communication equipment and service cost. The decrease in FY 2009 reflects the realignment of mass transit canine funds to the Law Enforcement PPA under the Aviation Security appropriation.

| <b>Supplies &amp; Materials</b> | \$162          | \$384           | \$222           | (\$163)                |

Supplies and materials are defined as commodities that are ordinarily consumed or expended within one year after they are put into use. These include: general office and IT supplies, property of little monetary value, vehicle fuel, and publications. The decrease in FY 2009 reflects the realignment of VIPR activities and mass transit canine funds to the Law Enforcement PPA under the Aviation Security appropriation.

|                  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|------------------|----------------|-----------------|-----------------|------------------------|
| <b>Equipment</b> | \$29           | \$742           | \$0             | (\$742)                |

Equipment includes all costs for the purchase of property of a durable nature or the initial installation of equipment when performed under contract. The decrease in FY 2009 reflects the realignment of VIPR activities and mass transit canine funds to the Law Enforcement PPA under the Aviation Security appropriation.

|                                       | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---------------------------------------|----------------|-----------------|-----------------|------------------------|
| <b>Grants/Subsidies/Contributions</b> | \$1,006        | \$4,922         | \$0             | (\$4,922)              |

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The decrease in FY 2009 reflects the realignment of mass transit canine funds to the Law Enforcement PPA under the Aviation Security appropriation.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## TRANSPORTATION SECURITY ADMINISTRATION TRANSPORTATION THREAT ASSESSMENT AND CREDENTIALING

### I. Appropriation Overview

#### **A. Mission Statement for Transportation Threat Assessment and Credentialing:**

The mission statement for this program is, “To reduce the probability of a successful terrorist or other criminal attack to the transportation system through application of the threat assessment methodologies that are intended to identify known or suspected terrorist threats working or seeking access to the Nation’s transportation system.”

This appropriation supports compliance with:

- National Strategy for Homeland Security,
- USA PATRIOT ACT of 2001 (P.L. 107-56),
- Aviation Transportation Security Act of 2001 (P.L. 107-71),
- Maritime Transportation Security Act of 2002 (P.L. 107-295)
- Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-408), and
- 9/11 Commission Act of 2007 (P.L. 110-53).

These laws provide direction to the Federal Government to protect homeland security, placing special emphasis on deterrence, prevention, interdiction of threats, aggression, and unlawful acts directed toward the United States. The Homeland Security Presidential Directive-11 (HSPD 11), issued August 27, 2004, directed the Department of Homeland Security (DHS), in coordination with other Federal agencies, to “enhance terrorist-related threat assessment through comprehensive, coordinated procedures.”

The objective of HSPD-11 is to more effectively detect and interdict individuals known to engage in terrorist activities or those who are reasonably suspected to be doing so, or who have been engaged in terrorist activities. To that end, the broad range of existing government and private sector security measures and initiatives will be augmented by a comprehensive, coordinated and integrated threat assessment environment. At the same time, implementation of HSPD-11 must facilitate the efficient movement of people, cargo, and conveyances and minimize any negative impacts on related activities. The Presidential Directive requires that these goals be achieved without compromising personal or institutional privacy and with due respect for other rights and freedoms quintessential to the American way of life.

The Office of Transportation Threat Assessment and Credentialing (TTAC) within TSA supports this directive by consolidating the management of all vetting and credentialing programs within

TSA. This office consists of the following screening programs: Secure Flight, Transportation Worker Identification Credential (TWIC), Registered Traveler, Hazardous Materials Commercial Driver's License Endorsement (HazMat CDL), Alien Flight Student Program and Other Vetting Programs. The programs that comprise this appropriation are designed to enhance security for many components (air, land, sea) of the transportation sector and much of the risk-analysis being performed is scalable for use in other sectors of this dynamic network.

Through the use of passenger prescreening processes, the Secure Flight and Registered Traveler programs will improve the Federal government's ability to prevent terrorists from boarding aircraft. The Alien Flight Student program conducts background and terrorist-based checks on aliens and other individuals who seek flight training in the U.S. As part of the certification process, commercial truck drivers seeking to haul hazardous materials in the United States must be cleared through a background check conducted by the HazMat CDL program. The TWIC program provides an identity management system for transportation workers requiring unescorted access to secure areas of the Nation's transportation system. The Other Vetting/Screening Administration and Operations Program merges the Crew Vetting Program with the other smaller vetting and credentialing programs to support the program management and operational costs. The overall purpose of these programs is to provide a structured method of assessing potential threats to the safety and security of the American public through the screening of workers and travelers throughout the transportation industry.

Since TSA cannot predict specific terrorist activity, the name-based threat assessment methodologies employed by the programs within TSA are a very important tool in the fight against terrorism that could quickly be leveraged to further protect the Nation's transportation system.

## **B. Budget Activities:**

### **Secure Flight**

This program will consolidate domestic airline passenger prescreening, that is currently conducted by the airline industry, under one program managed and operated by the Federal government. This consolidation meets the provisions outlined in the Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458) and the recommendations of the 9/11 Commission. For the sole purpose of preventing terrorists from boarding aircraft, the Secure Flight program will use an automated process backed by consistent internal analytical procedures to compare specific passenger reservation information against records contained in the Terrorist Screening Center Database. The Secure Flight program will concentrate on airline passengers boarding within the U.S. and its territories. Pre-screening of passengers boarding internationally continues to be done by the U.S. Customs and Border Protection through its Advanced Passenger Information System (APIS). However, both programs are working towards the use of integrated systems to ensure that domestic and international pre-screening is consistent and uniformly effective. The program is completing systems development, focusing on the rulemaking process and testing for operational rollout.

### **Transportation Worker Identification Credential (TWIC)**

Developed in response to threats and vulnerabilities identified in the transportation system, TWIC establishes an integrated, credential-based, identity verification program through the use of biometric technology. In order to gain unescorted access to the secure areas within the Nation's transportation system, transportation workers who need access to these areas will be required to undergo a satisfactory background check before they will be issued a TWIC card. The TWIC card is intended to work as an integrated part of any existing or newly-developed access control system deployed by the transportation sectors. The Prototype Phase concluded in June 2005, with sustained Prototype operations for a limited number of sites through March 2006. TSA and USCG have considered the lessons learned during Prototype in developing the TWIC process model and in writing the Notice of Proposed Rulemaking (NPRM) and Final Rule, which was issued on January 25, 2007. TSA is now in the process of enrolling maritime workers with TWIC cards began in October, 2007. TSA will enroll more than 750,000 workers including longshoremen, truckers, port employees into the TWIC program within 18 months. Operational costs of the program will be entirely funded from fee revenue.

### **Registered Traveler**

Section 109 of the Aviation and Transportation Act of 2001 (P.L. 107-71) authorized TSA to "establish requirements to implement trusted passenger programs and use available technologies to expedite the security screening of passengers who participate in such programs." This section is the basis for the concept that has become the Registered Traveler program. The program seeks to provide these services through a public-private partnership. Individual travelers must apply for "trusted traveler" status through a simplified application process for prescreening, clearance and biometric verification. The information collected from the applicant is screened against terrorist and law enforcement databases. The first prototype phase of this program concluded in 2005 when TSA completed the initial pilot at five airports. The second pilot phase is testing the feasibility of applying a public-private partnership model for the program. During 2006, TSA and private industry worked to establish consistency and interoperability standards for the private sector. The current phase of the RT program, known as the Registered Traveler Interoperability Pilot (RTIP), introduces interoperability among participating airports/air carriers and functionality across larger populations. The RTIP will include up to 20 Sponsoring Entities and the program is currently operational at 15 airports. This program is in operational status and is entirely funded by fee revenue.

### **Hazardous Materials Commercial Drivers License Endorsement Program (HazMat CDL)**

Implemented to meet the mandate of Section 1012 of the USA PATRIOT ACT of 2001 (P.L. 107-56), the goal of this program is to support public safety by ensuring that all commercial drivers transporting hazardous materials are thoroughly checked against terrorist, immigration, and criminal databases. The Department of Transportation established regulations requiring States to issue special endorsements to drivers in order to commercially transport placarded materials defined as hazardous by motor vehicle. The PATRIOT ACT requires that no state may issue hazardous materials endorsement (HME) on a commercial drivers license (CDL) until TSA has determined that the driver is not a security threat. TSA conducts a fingerprint-based background records check on all U.S. drivers seeking to obtain, renew, or transfer a HME on a

CDL and reports the results of the check to the driver and the state. This program is in operational status and is entirely funded by fee revenue.

### **Alien Flight Student Program (AFSP)**

Established under the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176), the AFSP reviews and assesses biographic and biometric information of non-U.S. citizens or any other individual (specified by the Secretary of Homeland Security) applying for training in the operation of any aircraft (having a maximum certificated takeoff weight of more than 12,500 pounds) at FAA certified flight schools located both inside and outside the United States. These persons are subject to a security threat assessment based on background and terrorist-based checks. Since its transfer to TSA from the Federal Bureau of Investigation in July 2004, this program was expanded to conduct background checks of non-U.S citizens seeking flight training in aircraft weighing under 12,500. This action was taken to mitigate a critical security weakness in the legislation.

### **Other Vetting/Screening Administration and Operations**

This activity incorporates personnel and operational cost of vetting operations that are not a part of any of the programs described above, as well as TTAC administrative costs, such as the vetting infrastructure and other related information technology costs. These initiatives include:

- Crew Vetting Program
- Secure Identification Display Area (SIDA) checks
- Temporary Flight Restrictions Program
- Twelve-five and charter pilots checks
- DCA Access Standard Security Program
- Maryland-3 small airports checks

### **C. Budget Request Summary:**

For FY 2009, the Transportation Security Administration requests 166 positions, 139 FTE, \$133,018,000 in appropriated funding and \$37,000,000 in fee collection authority for these programs. The program increases include 44 positions, 22 FTE and \$62,000,000 to:

- Continue the expedited implementation of the Secure Flight program and the full assumption of watchlist matching by the end of CY 2009 (24 positions, 12 FTE, and \$32,000,000).
- Enhance the vetting infrastructure to more effectively and efficiently perform vetting operations on vulnerable areas of the transportation system (20 positions, 10 FTE and \$30,000,000).

II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)

| <b>2009 Current Services</b> | <b>65</b>           | <b>62</b>  | <b>\$50,211</b> |
| 2009 Program Change          | 24                  | 12         | \$32,000        |
| <b>2009 Request</b>          | <b>89</b>           | <b>74</b>  | <b>\$82,211</b> |
| Total Change 2008-2009       | 24                  | 9          | \$32,211        |

The Transportation Security Administration requests \$82.2 million for the Secure Flight program. This is an increase of \$32.2 million over FY 2008 and includes \$32.0 million to continue implementation of Secure Flight and for pay and non-pay cost of living adjustments.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

TSA's mission with Secure Flight is to enhance the security of domestic commercial air travel within the United States through the use of improved watch list matching. The program's goals are to:

- Identify known and suspected terrorists;
- Disseminate potential match information to DHS partners;
- Prevent individuals on the No Fly List from boarding an aircraft;
- Reduce the number of misidentified passengers;
- Facilitate passenger air travel; and
- Protect individuals' privacy.

The Secure Flight program is also fully committed to successfully meeting all of the recommendations from the Government Accountability Office's (GAO) March 28, 2005 report as required by the Department of Homeland Security Appropriations Act of 2006 (P.L. 109-90). TSA will continue to work with GAO in order to meet the requirements, secure the certification from the Secretary, and allow GAO to report to Congress.

To date, Secure Flight has achieved the following accomplishments:

- Completed a re-baselining of the program as directed by the TSA Administrator, defined a clear program mission, completed a concept of operations, completed an achievable technical approach, developed an integrated master schedule of activities, established a procurement and contracting schedule and ensured privacy and security were embedded in all aspects of the program;
- Issued the Secure Flight Notice of Proposed Rule Making (NPRM) and received associated comments from industry and public; and
- Completed the Secure Flight system design to include: development of system requirements and identification and mitigation of hardware and software gaps from the current system.

At the current service level of \$50.2 million, the Secure Flight program will:

- Complete Secure Flight Service Center development and testing;
- Begin aircraft operator technical support and vetting passengers concurrently with aircraft operators for system testing;
- Complete DHS certification of the Secure Flight program; and
- Operate and maintain Secure Flight IT system.

The FY 2008 appropriation allows TSA to seek a funds transfer of no more than \$24 million into this program. Congressional approval of this transfer would provide total funding of \$74 million, which would allow TSA to achieve its goal of the government beginning to assume watchlist matching from the air carriers by the second quarter of FY 2009 and complete the all air carriers in early FY 2010.

PPA: OTHER VETTING PROGRAMS

| Total Change 2008-2009         | 62                  | 50         | \$41,307        |

<sup>1</sup> The FY 2007 EOY Actual includes \$7.6M for the TWIC program and \$1.5M for the Alien Flight Student Program.

The Transportation Security Administration requests \$50.8 million to provide funding for Screening Administration and Operations. The request includes the merger of the Crew Vetting Program into the Other Vetting/Screening Administration and Operations Program as requested in the FY 2008 President's Budget; the program enhancement of \$30.0 million and 10 FTE to enhance the vetting infrastructure to more effectively and efficiently perform vetting operations; and pay and non-pay cost of living adjustments.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This program currently supports specific management and operational costs of the following vetting activities:

- Crew Vetting Program;
- Secure Identification Display Area (SIDA) checks;
- Alien Flight Student Program (AFSP) Revenue Shortfall;
- 15 Full-Time Equivalents associated with other aviation vetting such as the Temporary Flight Restrictions Program, DCA Access Standard Security Program (DASSP), Twelve-Five and Charter Program, Aviation Waivers, and the Maryland Three Airports;
- Administrative and information technology costs associated with the Office of Transportation Threat Assessment and Credentialing (TTAC).

The program accomplishments during FY 2007 include:

- Stabilization of application input and adjudication systems (the screening gateway) ;
- Definition and implementation of a refined end-to-end process for handling terrorism hits within TTAC screening programs across its TSA/DHS stakeholders; and

- Definition of future requirements for advanced analytic capabilities and identification of techniques for the reduction in security vulnerabilities and identity fraud across TTAC screening programs.

At the FY 2009 current services level of \$20.8 million, this PPA will provide funding for the administrative and operational needs of the following activities:

**Crew Vetting Program:** This program vets domestic and international airline crews entering, departing, or over-flying U.S. airspace against terrorist-related information to determine if they are a potential threat to the aviation system. The Crew Vetting program compares airline crew lists against the FBI's Violent Gang, Terrorist Organization Files (VGTOF), TSA's No-Fly List and Selectee lists, and numerous other watch lists (including U.S. Marshal's Warrant Information Network data and Department of State's lost/stolen passport lists) to assess potential threats of terrorists posing as cleared aviation personnel. The program reviews approximately 2 million crewmembers annually.

**Secure Identification Display Area (SIDA) checks:** Pursuant to the Aviation and Transportation Security Act (ATSA), TSA vets SIDA employees and other aviation workers who have access to the secure areas of the Nation's airports. The program reviews approximately 500,000 aviation workers annually.

**15 Full-Time Equivalents associated with aviation vetting operations** (Temporary Flight Restriction Program, DCA Access Standard Security Program (DASSP), Twelve-Five and Charter Pilots Program, and the Maryland-3 Airports) and the investigation, referral and follow up on these populations.

**Temporary Flight Restriction Program checks:** Pilots, crew members, and passengers on aircraft applying to fly within restricted airspace of the National Capital Regional Area or flying over major National events (Major League baseball stadiums, the Super Bowl, political conventions, etc.) must apply for waivers through the TSA Security Operations, Special Events Unit (49 USC 114). The names are received and a name-based check is conducted against various watch lists and against the National Crime Information Center database. The program reviews approximately 3,000 individuals annually.

**DCA Access Standard Security Program (DASSP) checks:** This program addresses the special aviation security needs of the National Capital Region. Security Threat Assessments (STA) consisting of both name-based and fingerprint-based reviews are conducted on pilots, Armed Security Officers (ASOs), crew, security coordinators, and passengers. TSA reviews the results of both the name-based and fingerprint-based STAs and conducts adjudication as necessary. The program reviews approximately 3,000 individuals annually.

**Twelve-Five and Private Charter Programs:** The 12/5 and Private Charter Programs authorities stem from the final rules for Security Programs for Aircraft Weighing 12,500 pounds or more (49 CFR 1540 and 49 CFR 1544) which were adopted on June 24, 2002. Under these programs, pilots flying aircraft 12,500 pounds or greater must undergo a Criminal History Records Check (CHRC). The TSA reviews the results of these CHRCs and adjudicates them

based on program criteria associated with the 28 Disqualifying Criminal Offenses and a review of the No Fly and Selectee lists. The program reviews approximately 5,000 pilots annually.

**Maryland -3 Airports Program:** Due to the proximity of three small Maryland airports to Washington, D.C., Federal Restricted Flight Zones, pilots and passengers must apply for permission to fly in and out of these airports (Aviation Transportation Security Act – P.L. 107-71). A fingerprint-based criminal history records check and checks against watch lists are conducted. TSA works directly with the pilot and/or their employer to address any issues related to the findings. The program reviews approximately 400 pilots annually.

**Airspace Waivers:** STAs consisting of name-based reviews are conducted on pilots and passengers of international inbound general aviation flights. TSA reviews the results of the name-based STAs and conducts adjudication as needed. The program is currently in pilot phase and reviews approximately 200,000 pilots annually.

<sup>1</sup>In FY 2007, 8 FTE for the Registered Traveler program were paid out of the Aviation Security appropriation.

The Transportation Security Administration estimates \$10 million in fee collection authority for the Registered Traveler program.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Registered Traveler (RT) concept is authorized under the Aviation and Transportation Security Act (P.L. 107-71) to “Establish requirements to implement trusted passenger programs and use available technologies to expedite security screening of passengers who participate in such programs.” If demand exists, the initial phase of RT (at 10-20 airports) will be followed by a national program implemented through the Federal rulemaking process.

TSA has established four guiding principles for implementation of RT:

- It will be a private sector program;
- Operational costs will be fully funded through user fees;
- It will not disadvantage non-RT travelers; and
- It will not compromise security.

The private sector will identify the marketplace and determine the level of demand for RT services. The private sector will also provide customer relations, conduct enrollment and identity verification services, as well as make capital investments. If private sector interest exists, TSA will perform limited, inherently governmental functions including physical screening at security checkpoints, security threat assessments for adjudication and standard issuance to ensure security and privacy safeguards.

In January 2006, TSA issued guidance to the private industry regarding the collection and storage of biometrics on a security card and the redress process. The Registered Traveler program framework was released by TSA in May 2006. To ensure consistency at all participating airports, TSA tasked private industry to establish stringent interoperability requirements to guarantee that participants are provided with consistent and reliable service as they travel through various airports. The interoperability standards were finalized by private industry in September 2006.

The Privacy Impact Assessment (PIA) was published in September 2006, followed by the publication of the RT Paper Reduction Act (PRA) statement. Concurrently, security, privacy and compliance standards were developed by TSA. The final standards incorporating public comment were completed in October 2006. The industry-recommended technical interoperability standards were reviewed and incorporated into the program standards as necessary.

The current RT pilot, known as the Registered Traveler Interoperability Pilot (RTIP), began in November 2006 to test business and technical interoperability among multiple service providers. As of December 2007, 14 sponsoring entities are currently providing RT services at airport locations. Approximately 63,700 participants are participating in the RT program. In addition, three (3) sponsoring entities are in agreement with a service provider but not yet operational and four (4) sponsoring entities are currently soliciting service providers.

The following airports and air carriers currently provide RT services:

- Albany
- Air France at JFK
- Air Tran Airways at LaGuardia
- British Airways at JFK
- Cincinnati
- Indianapolis
- Jacksonville
- Little Rock
- Orlando
- Reno
- San Francisco
- San Jose
- Virgin Atlantic at JFK and Newark
- Westchester

The following airports and air carriers are in agreement with a service provider but are not yet operational:

- Denver
- Gulfport-Biloxi
- Rochester

The following airports and air carriers are currently soliciting service providers:

- Atlanta
- Oakland
- Washington Dulles
- Washington National

The national program will be implemented through the Federal rulemaking process which began in late CY 2007.

The FY 2009 Request provides funding for continued operational support to airports participating in RT through FY 2008 as well as FY 2009. The fees collected and retained by the Federal government will be used to cover the operational costs of the program.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The TWIC program will enhance security by providing a tamper-resistant biometric credential to maritime workers requiring unescorted access to secure areas of port facilities and vessels regulated under the Maritime Transportation Security Act of 2002 (MTSA), (P.L. 107-295). When fully implemented, the program will ensure that the identity of each TWIC holder has been verified; that a satisfactory background check has been completed on that identity; and that each credential issued is positively linked to the rightful holder through the use of biometric technology.

The TWIC Program is being implemented in the maritime environment in accordance with the spirit and requirements of the Aviation and Transportation Security Act of 2001 (P.L. 107-71), and MTSA.

TSA conducted a prototype of the TWIC program at 28 sites primarily focused in three geographic areas (Los Angeles and Long Beach, California; Wilmington, Delaware; Philadelphia, Pennsylvania; and Florida). The Prototype Phase concluded in June 2005, with sustained Prototype operations for a limited number of sites through March 2006. TSA and USCG have considered the lessons learned during Prototype in developing the TWIC process model and in writing the Notice of Proposed Rulemaking (NPRM) and Final Rule.

TWIC’s personal identity verification (PIV) standards and credential issuance closely adhere to those of Homeland Security Presidential Directive 12 (HSPD-12), and its implementing standard, Federal Information Processing Standard (FIPS) 201. The TWIC program is on the leading edge of newly released biometric standards and was first to adopt those common biometric standards in the Federal Government. Adhering to these standards will insure interoperability among physical access control systems that may incorporate different vendor products and technologies. TWIC specifically follows biometric standards of the American National Standards Institute (ANSI) for its pattern-based fingerprint format operational biometric.

The program continues to work with the National Institute of Standards and Technology (NIST) to ensure compliance with appropriate national standards and to develop technology specifications to support the overall program. Most recently, the program worked with a federal advisory committee, the Coast Guard's, National Maritime Security Advisory Committee (NMSAC), to establish recommendations for contact-less biometric and credential readers that would enhance throughput and provide better durability. The NMSAC technology recommendations were published in the Federal Register and public comment was solicited. The program is currently finalizing the reader specifications and will publish a notice of availability in the Federal Register and will post the specification on the TSA website. With \$8.1 million in appropriated funding provided by Congress in FY 2008, TSA will implement a pilot program to test contact-less biometric technologies within the TWIC program.

A Final Rulemaking was issued on January 25, 2007 and addressed over 1900 comments from the public. The final rule includes important changes from the prototype, such as the ability to provide a discount for FAST card holders, documented merchant mariners, and truckers with Hazardous Material Endorsements. The TWIC blueprint was updated to align the system with the final rule. These key changes to the program had to be tested to ensure the TWIC technology systems met program requirements and could support nationwide deployment. Based on current testing progress, the program began TWIC cardholder enrollment in the fall of 2007.

After establishing the first enrollment site in Wilmington, Delaware in the fall of 2007, TSA continues to roll out the program across the nation. Approximately 130 fixed enrollment centers will be established during FY 2008 to complete enrollments in 18 months. Additional mobile enrollment stations will be deployed to provide greater coverage to enroll the maritime population. TSA expects to enroll approximately 810,880 workers in FY 2008. After completing the initial enrollment of all maritime workers in October 2008, the program will move into a sustainment mode in FY 2009 and will continue to support enrollment centers nationwide for new maritime workers, workers requiring a replacement card, and workers renewing their TWIC.

The TWIC Program has established applicant fees to sufficiently recover the cost of providing this security service. The standard TWIC Fee is \$132.50 per applicant. A reduced TWIC fee of \$105.25 has also been established for those applicants that have previously completed a comparable security threat assessment. The card replacement fee is \$60.00. The credential is valid for five years and revenue generated from these security fees will only be used to support the TWIC program.

PPA: HAZARDOUS MATERIALS CDL ENDORSEMENT PROGRAM (fee authority)

|                          | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>   |

The Transportation Security Administration estimates fee collection of \$18.0 million in the Hazardous Material Commercial Driver’s License Endorsement Program.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The TSA Hazardous Materials Commercial Driver’s License Endorsement (HazMat CDL) Program is an important and key component of the DHS/TSA layered approach to transportation security. The program was established to fulfill the statutory requirements of both the USA PATRIOT and Safe Explosives Acts to further protect against the threats to transportation posed by terrorists, dangerous criminals, and illegal aliens that may attempt to transport hazardous materials in commerce.

The TSA HazMat CDL Program conducts a security threat assessment on drivers applying to obtain, renew, or transfer a hazardous materials endorsement (HME) on their state-issued Commercial Driver's License (CDL). The security threat assessment includes (1) a fingerprint-based FBI criminal history records check, (2) a citizenship status check, and (3) an intelligence-related check against a variety of federal databases for ties to terrorism.

Congress directed that this program be fee-based and self-sustaining. TSA published a Final Fee Rule on January 13, 2005, and established the fee levels, which are comprised of three elements: the cost for collecting and processing fingerprint and application information; the fee the FBI cost to run the fingerprints against the criminal history records; and a TSA program fee to cover costs to administer the program, including conducting the security threat assessments.

The Rule specifies that each state could elect to perform driver biographic and biometric (fingerprint) information collection, or to have a TSA contractor perform these functions. Sixteen states are collecting biographic information and biometric data through its own established programs (one state is in the process of switching to the TSA Agent). These states established their own fees for the collection and processing of biographic and biometric information, and submitted driver fingerprints directly to the FBI while separately forwarding driver applications for the security threat assessment to TSA. The remaining 34 states and the District of Columbia have elected to have TSA perform these functions.

The current TSA program fee is \$34. This fee is charged to every applicant applying for a security threat assessment regardless of the state of issuance. In states serviced by the TSA contractor, the FBI fee for the criminal history record check is \$22 and the cost of collecting and submitting the application information and fingerprints is \$38. The total fee collected in those states is \$94.

The HazMat CDL program has processed nearly 700,000 applications, and currently processes over 95 percent of applications in five days or less. The HazMat CDL program has a robust redress process, including appeals, waivers and Administrative Law Judge review. In FY 2009, the program is expected to conduct threat assessments on approximately 300,000 applicants, a continued increase from the program’s inception that confirms the vital role of improving the safety and protection of passengers and freight traveling on our Nation’s highways. The FY 2009 request provides full funding from fee collection for operational costs.

PPA: ALIEN FLIGHT STUDENT PROGRAM (mandatory fee authority)

|                                 | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>  |

| Total Change 2007-2008          | 0                   | 0          | 0              |

<sup>1</sup> In FY 2007, the Alien Flight Student Program was funded partially by appropriated funds (\$1.5 million) from the Screening Administration and Operations (SAO) PPA. This amount is reflected in the Other Vetting/SAO section.

The Transportation Security Administration estimates \$3.0 million in fee collection authority for the Alien Flight Student Program.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Alien Flight Student Program (AFSP) conducts terrorist, immigration, and criminal-background checks on all alien flight students applying for all flight training in the U.S. or abroad at FAA certified flight training locations. Applicants include pilots/student pilots training on aircraft that are subject to a security threat assessment in accordance with Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176). Pilots identified as a “threat to aviation or national security” under this program will be denied training. Successful execution of this program will enhance the security and safety of the transportation system both domestically and internationally.

The Program reviews and assesses both biographic and biometric information to identify individuals who pose a security threat. Prior to the September 11<sup>th</sup> attacks, there were no systematic security checks performed on alien pilots who receive flight training at flight schools located either inside or outside the United States.

Section 612 of the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176) transferred the function of screening alien flight students who are applying for flight training at flight schools from the Attorney General to the Secretary of Homeland Security (and subsequently delegated to the TSA). The Act also gives the Secretary of Homeland Security the fee authority to offset costs of vetting aliens who apply for flight training. However, the same language specifically excludes recurrent training from the definition of “flight training.”

Excluding recurrent trainees creates a security weakness by which trainees could falsely claim recurrent training status. Attempts to exploit this systemic weakness have been identified. In consideration of this security loophole and the fact that alien students applying for recurrent training comprise 55-60 percent of all applications received and processed by the AFSP, TSA currently conducts checks on recurrent trainees to verify their identity and to confirm their training status. Since TSA does not have authority to charge a fee for recurrent trainees, TSA has been absorbing this \$1.5 million cost for the last two years out of Other Vetting/Screening Administration and Operations (SAO). TSA is seeking the change in the authorizing language to permit TSA to charge a fee to recurrent trainees seeking application through the AFSP. This language will be transmitted separately to the authorization committees. The proposal seeks to establish this fee through Notice in the Federal Register. The FY 2009 request level has been reduced by \$1.5 million in anticipation of approval of this authority.

AFSP processed 29,909 applications by the end of fiscal year 2007. This is an increase of over 12,909 over the expected FY 2007 application figure of 17,000. It is expected that this level of applications will be sustained in FY 2008 and FY 2009.

The program also began migrating 10-print fingerprints data to a common DHS platform, which will allow for the leveraging of program data to other DHS components. This effort is of particular interest to Immigration and Customs Enforcement’s Student and Exchange Visitor Information System and will enhance both programs’ capability to more closely monitor attendance and status of students in training.

AFSP currently collects a fee of \$130 per applicant. This fee includes \$98 for extensive TSA international and domestic threat assessments, \$22 for an FBI criminal history records check, and \$10 for fingerprint and application processing. However, as stated above, this fee is insufficient to cover the necessary program costs.

**IV. Program Justification of Changes**

**Department of Homeland Security  
 Transportation Security Administration  
 Transportation Threat Assessment and Credentialing  
 Justification of Program Changes  
 (Dollars in Thousands)**

**Program Increase 1:**                      Secure Flight

Strategic Goal(s) & Objective(s): TSA’s goal with Secure Flight is to protect our nation from dangerous people by strengthen the screening of travelers and workers in order to achieve a reduction in the risk of potential terrorists, instruments of terrorism, or other unlawful activities from threatening our transportation systems. The program’s specific goals are to:

- Identify known and suspected terrorists;
- Disseminate potential match information to DHS partners;
- Prevent individuals on the No Fly List from boarding an aircraft;
- Reduce the number of misidentified passengers
- Facilitate passenger air travel; and
- Protect individuals’ privacy.

Description of Item

This FY 2009 submission, which includes an additional 24 positions, 12 FTE and \$32 million, coupled with the Congressional approval to transfer \$24 million in FY 2008, would allow TSA to continue implementation of the Secure Flight program and the full assumption of watchlist matching for all carriers in early FY 2010. Without this funding, the program will not be able to assume full watchlist matching until FY 2012. The FY 2009 requested funding would cover costs associated with:

- 1) Staffing for parallel operations and eventual full operations,
- 2) Operations and maintenance (O&M) costs for the program service center and data center,
- 3) Systems development and maintenance, and
- 4) Annual program management costs such as administration, policy, security, leases, etc.

### Justification

As called for by the provisions of the Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458) and the recommendations of the 9/11 Commission, this program is necessary to consolidate domestic airline passenger prescreening, that is currently conducted by the airline industry, under one program managed and operated by the Federal Government.

When implemented, Secure Flight will close several critical capability gaps currently affecting U.S. air travel. Secure Flight will:

- Decrease the chance for compromised watch list data by centralizing use of comprehensive watch lists;
- Increase the speed at which threats are identified, allowing for expedited notification of law enforcement and threat management;
- Provide a fair, equitable, and consistent matching process across all aircraft operators; and
- Offer an expedited and integrated redress process for passengers misidentified as a threat.

The Secure Flight program will work closely with the Office of Screening Coordination Operations and with the U.S. Customs and Border Protection, to integrate the systems and processes in order to ensure that domestic and international pre-screening is consistent and uniformly effective.

Although this program has gone through many delays and design/development hurdles, all of the major milestones have now been met to where the program is now finishing development and is poised to begin implementation in FY 2008 and to begin the government assuming watchlist matching in FY 2009.

### Impact on Performance (Relationship of Increase to Strategic Goals)

This request will support DHS's Goal 1 Protect our Nation from Dangerous People; Objective 1.3 Strengthen Screening of Travelers and Workers. TSA's goal with Secure Flight is to strengthen screening of travelers and workers in order to achieve a reduction in the risk of potential terrorists, instruments of terrorism, or other unlawful activities from threatening our transportation systems. The program's goals are to:

- Identify known and suspected terrorists;
- Disseminate potential match information to DHS partners;
- Prevent individuals on the No Fly List from boarding an aircraft;
- Reduce the number of misidentified passengers

- Facilitate passenger air travel; and
- Protect individuals' privacy.

**Program Increase 2:**                    Vetting Infrastructure Improvements

Strategic Goal(s) & Objective(s):    TSA's goal with Other Vetting is to protect our nation from dangerous people by strengthening the screening of travelers and workers in order to achieve a reduction in the risk of potential terrorists, instruments of terrorism, or other unlawful activities from threatening our transportation systems.

PPA:    Other Vetting (formerly Crew Vetting PPA and Screening Administration and Operations PPA)

\* FY 2009 includes the merger of the Crew Vetting PPA into the Other Vetting PPA as requested in the FY 2008 President's Request.

Description of Item

TSA requests an increase of 20 positions, 10 FTE and \$30.0 million to enhance and stabilize the infrastructure necessary to perform vetting operations on populations that access the most critical infrastructure.

Justification

TSA provides STA's of individual applicants for credential, license or access privilege to the Nation's Transportation and other Critical Infrastructure. The STA is a key security layer in the counter-terrorism mission of preventing attacks on our Nation's Critical Infrastructure. The

assessment includes the comparison of applicant biographic and biometric information against terrorism, criminal, and immigration watch lists (vetting) and the subsequent referral and follow-up on individual matches.

The goal of this enhancement is to eliminate existing vulnerabilities due to 1) uncoordinated business processes, 2) disconnected and duplicative systems, 3) high system complexity, 3) ad-hoc and manual review and adjudication processes, and 4) looking at one application and one individual at a time.

The threat assessment infrastructure was not built as an integrated set of capabilities to support multiple programs. Rather, it is the aggregation of the stove-piped solutions for individual programs. For example, the vetting engine that matches names against federal watch lists was initially developed for International Crew Vetting with a target population of one million applicants. Data aggregation and minimal case management was developed for the Hazardous Materials Endorsement program with a target population of 2.5 million applicants. Individual components of the infrastructure have been leveraged to support other credentialing programs such as Transportation Worker Identity Credential, Registered Traveler, Airport sterile and Secure Identification Display Area workers.

The infrastructure is now operating a perpetual watch list check on a total population of approximately 7 million applicants. While TSA has been able to leverage this infrastructure to expand security into additional programs, the infrastructure and vetting operations are reaching capacity and require enhancement and stabilization activities. In order to address and mitigate identified security vulnerabilities in a consistent and cost effective manner, these stove-piped solutions need to be optimized in an infrastructure to provide threat assessment for current and planned future populations.

TSA requires an integrated end-to-end capability to conduct and manage identities, credentials and benefits, investigations, and STA's for a growing population. Person-centric enrollment and roll management services are needed to track individual vetting requests from receipt through the issuance/denial process, to support periodic re-certification, to respond to updated watch lists, to revoke credentials as needed, and to purge personally identifying information per the NARA records schedule. In addition, for privacy purposes, TSA must take measures to ensure the quality of personally identifiable data used in the vetting process.

The requested enhancement of 20 positions and \$30.0 million will meet mission critical objectives and stabilize the threat assessment capability.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

This request will support DHS Goal 1 Protect our Nation from Dangerous People; Objective 1.3 Strengthen Screening of Travelers and Workers. TSA's goal with Other Vetting is to strengthen screening of travelers and workers in order to achieve a reduction in the risk of potential terrorists, instruments of terrorism, or other unlawful activities from threatening our transportation systems. Specifically, this initiative increases the screening of individuals accessing the Nation's transportation systems. This stabilization and enhancement to the TSA

infrastructure will enable cross population analysis and provide fee alignment for individuals with multiple credentials. While a full Life Cycle Cost Estimate is currently under development during the FY 2008 planning activities, the ability to use the same infrastructure for all programs, rather than individual stove-piped solutions, is expected to provide significant cost savings over the life of the system.

Additional performance impacts include developing:

- A flexible and scalable set of services that uses like-business rules to access like-security threats;
- A person-centric threat assessment management systems and processes, with a common approach for information collection, vetting, verification and use, based on assessment of the risks presented;
- The technical, interoperable capability to share a person-centric and aggregate needs-specific view, crossing all encounters across the department and with other Federal Agencies, State, Local, and Tribal Governments, and private commercial entities engaged in screening and critical infrastructure protection activities; and
- Integrated Data Integrity and Information Assurance.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Transportation Security Administration  
Justification of Proposed Changes in  
Transportation Threat Assessment and Credentialing  
Appropriation Language**

For necessary expenses for the development and implementation of screening programs of the Office of Transportation Threat Assessment and Credentialing, [\$82,590,000] **\$133,018,000**, to remain available until September 30, [2009] **2010**: [Provided, That if the Assistant Secretary of Homeland Security (Transportation Security Administration) determines that the Secure Flight program does not need to check airline passenger names against the full terrorist watch list, then the Assistant Secretary shall certify to the Committees on Appropriations of the Senate and the House of Representatives that no significant security risks are raised by screening airline passenger names only against a subset of the full terrorist watch list.] (Department of Homeland Security Appropriations Act, 2008.)

#### **Explanation of Changes:**

No substantive changes proposed.

### PPA Mission Statement

The mission of the Secure Flight Program is to significantly improve the Federal Government's ability to prevent terrorists from boarding aircraft, help move passengers through airport screening more quickly, and reduce the number of individuals selected for secondary screening, while fully protecting passengers' privacy and civil liberties.

### Summary Justification and Explanation of Changes

|                              | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|------------------------------|----------------|-------------------------|-----------------|-----------------------|
| <b>Salaries and Benefits</b> | <b>\$6,851</b> | <b>\$12,635</b>         | <b>\$14,848</b> | <b>\$2,213</b>        |

The increase provides for the annualization of the 2008 pay increase, the projected 2.9% 2009 pay increase, and the additional 12 FTE.

|               | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------|----------------|-------------------------|-----------------|-----------------------|
| <b>Travel</b> | <b>\$55</b>    | <b>\$60</b>             | <b>\$62</b>     | <b>\$2</b>            |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2009 request includes an increase of \$2,000 for increased travel related to the roll out of the Secure Flight platform.

|                   | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|-------------------|----------------|-------------------------|-----------------|-----------------------|
| <b>Other Rent</b> | \$2,600        | \$2,983                 | \$2,985         | \$2                   |

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2009 request includes an increase of \$2,000 for increased rent related to the roll out of the Secure Flight platform.

|   | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---|----------------|-------------------------|-----------------|-----------------------|
| <b>Advisory and Assistance Services</b> | \$12,538       | \$5,630                 | \$5,675         | \$45                  |

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. The FY 2009 request includes an increase of \$45,000 for increased contracting related to the roll out of the Secure Flight platform.

|                       | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|-----------------------|----------------|-------------------------|-----------------|-----------------------|
| <b>Other Services</b> | \$4,884        | \$16,929                | \$46,674        | \$29,745              |

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services will be the primary vehicle by which the Secure Flight program will be implemented and operated in regard to connectivity with air carriers and the processing of security checks. The FY 2009 request includes an increase of \$29,745 million for increased contracting related to the roll out of the Secure Flight platform.

|  | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|--|----------------|-------------------------|-----------------|-----------------------|
| <b>Purchase from Government Accounts</b> | \$0            | \$2,773                 | \$2,843         | \$70                  |

Includes contracts with federal agencies such as CBP for passenger pre-screening information. The FY 2009 request includes an increase of \$70,000 for increased services related to the roll out of the Secure Flight platform.

|   | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---|----------------|-------------------------|-----------------|-----------------------|
| <b>Operation &amp; Maintenance of equipment</b> | \$5,469        | \$1,562                 | \$1,609         | \$47                  |

Provides for the operation and maintenance of information technology systems used to support the Secure Flight program. The FY 2009 request includes an increase of \$47,000 for increased O&M related to the roll out of the Secure Flight platform.

|                                 | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------------------------|----------------|-------------------------|-----------------|-----------------------|
| <b>Supplies &amp; materials</b> | \$84           | \$1,080                 | \$1,102         | \$22                  |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2009 request includes an increase of \$22,000 million for increased supplies and materials related to the roll out of the Secure Flight platform.

|                  | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|------------------|----------------|-------------------------|-----------------|-----------------------|
| <b>Equipment</b> | \$4,948        | \$6,348                 | \$6,413         | \$65                  |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. These costs include equipment that will be purchased for the Secure Flight program outside of contracts for rollout and sustainment of the program. The FY 2009 request includes an increase of \$65,000 for planned hardware, software and equipment purchases for the roll out of the Secure Flight platform.

The FY 2009 Budget Request Change is a result of the Crew Vetting Program merger into the Other Vetting/Screening Administration and Operations Program.

**PPA Mission Statement**

The mission of the Crew Vetting Program is to mitigate risk by vetting airline crews entering, departing, or overflying U.S. airspace using computerized vetting and matching analysis that will assess potential threats of terrorists posing as cleared aviation or other transportation system personnel.

**Summary Justification and Explanation of Changes**

|                              | <b>2007</b>    | <b>2008 Revised</b> | <b>2009</b>    | <b>2008 - 2009</b> |

|               | <b>Actual</b> | <b>Enacted</b>      | <b>Request</b> | <b>Change</b>      |
| <b>Travel</b> | <b>\$62</b>   | <b>\$92</b>         | <b>\$0</b>     | <b>(\$92)</b>      |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is necessary to conduct on-site reviews and meetings with the vetting center in Colorado Springs, CO. The FY 2009 decrease of \$92,000 is a result of the Crew Vetting Program merger into the Other Vetting/Screening Administration and Operations Program.

|                                 | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------------------------|----------------|-------------------------|-----------------|-----------------------|
| <b>Transportation of Things</b> | \$0            | \$2                     | \$0             | (\$2)                 |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things. The FY 2009 decrease of \$2,000 is a result of the Crew Vetting Program merger into the Other Vetting/Screening Administration and Operations Program.

|  | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|--|----------------|-------------------------|-----------------|-----------------------|
| <b>Communication, Utilities, and miscellaneous charges</b> | \$574          | \$580                   | \$0             | (\$580)               |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, and utility services. TSA is dependent upon communications lines and utilities to run the vetting systems. The FY 2009 decrease of \$580,000 is a result of the Crew Vetting Program merger into the Other Vetting/Screening Administration and Operations Program.

|   | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---|----------------|-------------------------|-----------------|-----------------------|
| <b>Advisory and Assistance Services</b> | \$5            | \$2                     | \$0             | (\$2)                 |

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. The FY 2009 decrease of \$2,000 is a result of the Crew Vetting Program merger into the Other Vetting/Screening Administration and Operations Program.

|                       | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|-----------------------|----------------|-------------------------|-----------------|-----------------------|
| <b>Other Services</b> | \$9,379        | \$6,530                 | \$0             | (\$6,530)             |

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services are critical to the maintenance and operation of vetting systems and communication systems with the air carriers. TSA also uses contracts to adjudicate hits and discrepancies in within the system. The FY 2009 decrease of \$6.53 million is a result of the Crew Vetting Program merger into the Other Vetting/Screening Administration and Operations Program.

|  | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|--|----------------|-------------------------|-----------------|-----------------------|
| <b>Operation &amp; maintenance of facilities</b> | \$32           | \$50                    | \$0             | (\$50)                |

Provides for the operation and maintenance of information technology systems used to support the Crew Vetting program. The FY 2009 decrease of \$50,000 is a result of the Crew Vetting Program merger into the Other Vetting/Screening Administration and Operations Program.

|   | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---|----------------|-------------------------|-----------------|-----------------------|
| <b>Operation &amp; Maintenance of equipment</b> | \$1,634        | \$228                   | \$0             | (\$228)               |

Provides for the operation and maintenance of information technology systems used to support the Crew Vetting program. The FY 2009 decrease of \$228,000 is a result of the Crew Vetting Program merger into the Other Vetting/Screening Administration and Operations Program.

|                                 | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------------------------|----------------|-------------------------|-----------------|-----------------------|
| <b>Supplies &amp; materials</b> | \$35           | \$30                    | \$0             | (\$30)                |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2009 decrease of \$30,000 is a result of the Crew Vetting Program merger into the Other Vetting/Screening Administration and Operations Program.

|                  | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|------------------|----------------|-------------------------|-----------------|-----------------------|
| <b>Equipment</b> | \$1,226        | \$2,584                 | \$0             | (\$2,584)             |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. TSA purchases equipment based on the Technology Refresh Plan to increase system capacity and provide optimal performance. The FY 2009 decrease of \$2.584 million is a result of the Crew Vetting Program merger into the Other Vetting/Screening Administration and Operations Program.

The FY 2009 Budget Request includes the Crew Vetting Program merger into the Other Vetting/Screening Administration and Operations (SAO) Program.

**PPA Mission Statement**

The mission of the Screening Administration and Operations is to help support the identification of individuals deemed as potential terrorists or who pose a security threat to either aviation or national security.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008 Revised<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|------------------------------|------------------------|---------------------------------|-------------------------|-------------------------------|
| <b>Salaries and Benefits</b> | <b>\$1,730</b>         | <b>\$1,999</b>                  | <b>\$8,369</b>          | <b>\$6,370</b>                |

Provides for the annualization of the 2008 pay increase, the projected 2.9% 2009 pay increase for 42 Crew Vetting positions that merged into the Other Vetting Program, and the projected pay for the additional FTE.

|               | <b>2007<br/>Actual</b> | <b>2008 Revised<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---------------|------------------------|---------------------------------|-------------------------|-------------------------------|
| <b>Travel</b> | <b>\$45</b>            | <b>\$65</b>                     | <b>\$166</b>            | <b>\$101</b>                  |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2009 increase of \$101,000 includes inflation and reflects the merger of the Crew Vetting Program and the Other Vetting/SAO Program.

|                                 | <b>2007<br/>Actual</b> | <b>2008 Revised<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---------------------------------|------------------------|---------------------------------|-------------------------|-------------------------------|
| <b>Transportation of Things</b> | <b>\$6</b>             | <b>\$4</b>                      | <b>\$11</b>             | <b>\$7</b>                    |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things. The FY 2009 increase of \$7,000 includes inflation and reflects the merger of the Crew Vetting Program and the Other Vetting/SAO Program.

|  | <b>2007<br/>Actual</b> | <b>2008 Revised<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |

| <b>Communication, Utilities, and miscellaneous charges</b> | <b>\$40</b>            | <b>\$0</b>                      | <b>\$595</b>            | <b>\$595</b>                  |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, and utility services. TSA is dependant upon communications lines and utilities to run the vetting systems. The FY 2009 increase of \$595,000 includes inflation and reflects the merger of the Crew Vetting Program and the Other Vetting/SAO program.

|  | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|--|----------------|-------------------------|-----------------|-----------------------|
| <b>Communication, Utilities, and miscellaneous charges</b> | \$40           | \$0                     | \$595           | \$595                 |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, and utility services. TSA is dependant upon communications lines and utilities to run the vetting systems. The FY 2009 increase of \$595,000 includes inflation and reflects the merger of the Crew Vetting Program and the Other Vetting/SAO program.

|   | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---|----------------|-------------------------|-----------------|-----------------------|
| <b>Advisory and Assistance Services</b> | \$1,516        | \$685                   | \$692           | \$7                   |

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these services to provide program management, technical and logistical support as well as evaluations. The FY 2009 increase of \$7,000 reflects inflation and the merger of the Crew Vetting Program and Other Vetting/SAO Program.

|                       | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|-----------------------|----------------|-------------------------|-----------------|-----------------------|
| <b>Other Services</b> | \$9,833        | \$4,454                 | \$36,368        | \$31,914              |

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services are used extensively in the systems operation and case adjudication of the Alien Flight Student program. These contracts will also support SIDA, 12/5 Charter Pilots, MD-3 Airports and the Temporary Flight Restriction programs. The FY 2009 increase of \$35.524 million includes funding for contract support for IT planning, acquisition, and rollout; funding for contract support for vetting, inflation, service increases; and it reflects the merger of the Crew Vetting Program and Other Vetting/SAO Program.

|  | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |

Supports the operation and maintenance of information technology systems used to perform name checks for SIDA, 12/5 Charter Pilots, MD-3 Airports, and the Temporary Flight Restriction program. The FY 2009 increase of \$242,000 includes inflation and the merger of the Crew Vetting Program and the Other Vetting/SAO Program.

|                                 | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------------------------|----------------|-------------------------|-----------------|-----------------------|
| <b>Supplies &amp; materials</b> | \$27           | \$49                    | \$87            | \$38                  |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2009 increase of \$38,000 includes inflation and the merger of the Crew Vetting Program and the Other Vetting/SAO Program.

|                  | 2007<br>Actual | 2008 Revised<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|------------------|----------------|-------------------------|-----------------|-----------------------|
| <b>Equipment</b> | \$678          | \$1,011                 | \$3,043         | \$2,032               |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2009 increase of \$2,032 million reflects the merger of the Crew Vetting Program and the Other Vetting/SAO Program.

**PPA Mission Statement**

The mission of the Registered Traveler pilot is to increase the efficiency with which screeners and security resources are aligned. Travelers will achieve an expedited processing through security checkpoints by providing limited personal information that assures DHS of their good faith.

**NOTE:** For FY 2008, the resources for the Registered Traveler pilot are derived entirely from fee collections.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008 Revised<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|------------------------------|------------------------|---------------------------------|-------------------------|-------------------------------|
| <b>Salaries and Benefits</b> | <b>\$0</b>             | <b>\$1,564</b>                  | <b>\$1,611</b>          | <b>\$47</b>                   |

The increase provides for the annualization of the 2008 pay increase, and the projected 2.9% 2009 pay increase.

|               | <b>2007<br/>Actual</b> | <b>2008 Revised<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---------------|------------------------|---------------------------------|-------------------------|-------------------------------|
| <b>Travel</b> | <b>\$0</b>             | <b>\$1</b>                      | <b>\$1</b>              | <b>\$0</b>                    |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is necessary to conduct on-site reviews and participate in meetings with the airports, air carriers, and other private sector interest groups.

|   | <b>2007<br/>Actual</b> | <b>2008 Revised<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---|------------------------|---------------------------------|-------------------------|-------------------------------|
| <b>Advisory and Assistance Services</b> | <b>\$65</b>            | <b>\$1,935</b>                  | <b>\$8,388</b>          | <b>\$6,453</b>                |

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these types of contracts to assist in the implementation and support of the Registered Traveler pilot. The FY 2009 increase of \$6,453 will be used to fund increased contracting services related to vetting a larger population.

**PPA Mission Statement**

The mission of the TWIC Program is to establish an integrated, credential-based, identity verification program through the use of biometric technology to grant workers unescorted access to secure areas within the nation's transportation system.

**Summary Justification and Explanation of Changes**

|               | <b>2007</b>   | <b>2008 Revised</b> | <b>2009</b>    | <b>2008 - 2009</b> |
|---------------|---------------|---------------------|----------------|--------------------|
|               | <b>Actual</b> | <b>Enacted</b>      | <b>Request</b> | <b>Change</b>      |
| <b>Travel</b> | <b>\$48</b>   | <b>\$500</b>        | <b>\$0</b>     | <b>(\$500)</b>     |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is necessary to conduct on-site reviews and participate in meetings with maritime port operators and other TWIC program stakeholders. The FY2009 decrease of \$500,000 is due to program decreases.

|   | <b>2007</b>    | <b>2008 Revised</b> | <b>2009</b>    | <b>2008 - 2009</b> |
|---|----------------|---------------------|----------------|--------------------|
|   | <b>Actual</b>  | <b>Enacted</b>      | <b>Request</b> | <b>Change</b>      |
| <b>Advisory and Assistance Services</b> | <b>\$4,018</b> | <b>\$3,000</b>      | <b>\$0</b>     | <b>(\$3,000)</b>   |

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these types of contracts to assist in the development and implementation of the TWIC program. The FY 2009 decrease of \$3,000,000 is due to a decrease of new applicants for the TWIC program.

|                                 | <b>2007</b>   | <b>2008 Revised</b> | <b>2009</b>    | <b>2008 - 2009</b> |
|---------------------------------|---------------|---------------------|----------------|--------------------|
|                                 | <b>Actual</b> | <b>Enacted</b>      | <b>Request</b> | <b>Change</b>      |
| <b>Supplies &amp; materials</b> | <b>\$22</b>   | <b>\$2,000</b>      | <b>\$0</b>     | <b>(\$2,000)</b>   |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2009 decrease of \$2,000,000 is due to a decrease of new applicants for the TWIC program.

|                  | <b>2007</b>   | <b>2008 Revised</b> | <b>2009</b>    | <b>2008 - 2009</b> |

**PPA Mission Statement**

The mission of the Alien Flight Student Program is to help identify individuals deemed as potential terrorists or who pose a security threat to either aviation or national security. This program reviews and assesses biographic and biometric information of non-U.S. citizens and other individuals who seek flight training at FAA certified flight schools located both inside and outside the United States.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008 Revised<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|------------------------------|------------------------|---------------------------------|-------------------------|-------------------------------|
| <b>Salaries and Benefits</b> | <b>\$617</b>           | <b>\$754</b>                    | <b>\$777</b>            | <b>\$23</b>                   |

Provides for the annualization of the 2008 pay increase and the projected 2.9% 2009 pay increase.

|                       | <b>2007<br/>Actual</b> | <b>2008 Revised<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|-----------------------|------------------------|---------------------------------|-------------------------|-------------------------------|
| <b>Other Services</b> | <b>\$1,217</b>         | <b>\$2,242</b>                  | <b>\$2,219</b>          | <b>(\$23)</b>                 |

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services are used extensively in the systems operation and case adjudication of the Alien Flight Student program.

|                                 | <b>2007<br/>Actual</b> | <b>2008 Revised<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---------------------------------|------------------------|---------------------------------|-------------------------|-------------------------------|
| <b>Supplies &amp; materials</b> | <b>\$2</b>             | <b>\$2</b>                      | <b>\$2</b>              | <b>\$0</b>                    |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## TRANSPORTATION SECURITY ADMINISTRATION TRANSPORTATION SECURITY SUPPORT

### I. Appropriation Overview

#### **A. Mission Statement for Transportation Security Support:**

The Transportation Security Administration is an agency of over 50,000 personnel, with approximately \$7.1 billion in budget authority, substantial regulatory and law enforcement authority, and a nationwide presence. The management and support of the organization is accomplished by a transportation security support staff in Washington, D.C. and five strategically located Mission Support Centers (MSCs). TSA has developed and will maintain a flat organizational structure that emphasizes front-line service delivery with well-trained managers who are supported by an array of services from Washington, D.C. The MSCs also provide support to field personnel within a specified geographical area.

#### **B. Budget Activities:**

**Intelligence** - The Office of Intelligence (OI) receives, assesses, and distributes intelligence information to support TSA's mission of securing the transportation system. OI also conducts strategic operational and tactical risk-based security planning. The Office utilizes the full suite of TSA intelligence capabilities.

**Human Capital Services** – The Office of Human Capital Services (OHCS) include all services that support the recruitment, assessment, servicing, and payroll of TSA's employees at headquarters, field, airports, and other locations. The Office maintains oversight of all human resources contractual activities, and provides advice and counsel to senior managers on personnel issues. In addition, OHCS administers mandated employee related programs such as, Employee Assistance Program, Drug Testing Program, and Employee Relations.

**HQ Administration** - Headquarters Administration provides all aspects of the support infrastructure required to sustain TSA's nation-wide operations. These activities include serving as the central point on policy development, corporate training, performance management, facilities management, financial management, protecting civil rights, legal advice, internal conduct and audits, and providing a safe and healthful work environment for employees.

**Information Technology** - Information Technology provides the IT infrastructure and services to maintain connectivity, provide productivity tools, and support and field corporate applications.

**C. Budget Request Summary:**

- The Transportation Security Administration requests 1,387 positions, 1,332 FTE, and \$926,000,000 for Transportation Security Support in FY 2009.

**D. PPA Consolidation Proposal:**

The FY 2009 request is presented in a structure that more closely mirrors the current organization. As TSA's mission has grown, the budget structure was not adjusted to accurately reflect the alignment of resources to functions. Putting like programs together into one PPA along with the supporting personnel will give a total picture of the cost of a program.

The FY 2009 request aligns operational program and personnel funding under the same PPA. In some cases, personnel and the supporting funds are shifted out of the Headquarters Administration PPA and now reside with the program they support.

Human Capital Services is a new PPA in Transportation Security Support that combines funding previously supporting HR Services (Aviation Security Appropriation) and HR activities and FTE within the HQ Administration PPA (Transportation Security Support Appropriation). Similarly, Information Technology activities previously funded under Airport Management, IT and Support (Aviation Security Appropriation) are combined with IT activities and FTE in the Support Appropriation.

**II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)**

| Total Change 2008-2009       | 0                   | 0          | 0             |

The Transportation Security Administration requests \$22 million for the Intelligence program. The FY 2009 request realigns \$1.2 million, 3 FTP, and 3 FTE into the Law Enforcement PPA under the Aviation Security appropriation. The adjustments-to-base include \$94 thousand for pay annualization, \$234 thousand for pay inflation, \$181 thousand for non-pay inflation, an efficiency reduction of \$354 thousand, a 4 FTE lapse rate reduction, and \$2 million to support enhanced intelligence activities.

#### **CURRENT SERVICES PROGRAM DESCRIPTION**

The Office of Intelligence (OI) is the intelligence organization for TSA. It supports the entire agency with the capability to review, synthesize, and analyze transportation specific intelligence. It is the only Federal intelligence entity focused solely on the transportation sector. OI coordinates closely and shares information with DHS, the Intelligence Community, the intelligence sections of law enforcement agencies, and the transportation industry. To facilitate collaboration and provide rapid analysis and notification of threats, this office deploys liaison officers at key Intelligence Community, law enforcement agencies, and Field Intelligence Officer (FIO) locations in vital transportation nodes.

OI is critical to TSA's overall risk-based security strategy. The products generated provide a threat framework essential to prioritize the allocation of security resources by the Federal Security Directors (FSDs), the transportation industry, and Federal Air Marshal Service. OI operates and maintains 24/7 intelligence capabilities at TSA Headquarters and the Freedom Center's Transportation Security Operations Center (TSOC) to disseminate warnings and notifications of credible and immediate threats. OI assists in coordinating intelligence activities for domestic and international civil aviation and other modal security with other government agencies and prepares threat assessments in support of foreign airport assessments.

In order to perform its mission, OI provides and maintains its Top Secret and Secret Collateral classified information technology infrastructures for interfacing via voice, video, and data with the Intelligence Community, State and local law enforcement, field sites, and industry partners. One such system is the TSA Remote Access to Classified Enclaves (TRACE) solution which provides secure access to classified and unclassified threat information in a timely manner to multiple remote locations.

In FY 2007, OI improved both the quality and quantity of the intelligence products provided by OI. The product base is now more streamlined and flexible to better meet the changing needs of transportation security. OI is also better able to support the TSA executive management staff on a daily (24/7) basis. In addition, it successfully upgraded the TSA TRACE system by replacing all 159 laptops (old-style dial-up laptops) with high-speed “Talon” systems. This new capability is not only faster, but also easier to use.

In FY 2008, OI will increase the Field Officer Program (FIO) by transferring some Headquarters intelligence officers to the field. These Officers work on the frontlines providing the FSDs and the Transportation Security Officers (TSOs) with previously unavailable resources. The objective is to continue to increase the program and enhance the level of support provided to TSA field locations. OI will also create a permanent Continuity of Operations (COOP) Special Compartmented Information Facility (SCIF) co-located with TSA executive leadership. During COOP situations, this facility will furnish a security location to provide classified information and communication between the Intelligence Community, DHS, and TSA leadership.

In FY 2009, OI will enhance the Collaborative Transportation Imagery Project (CTIP) to provide OI the ability to build a 360 degree imagery library of transportation nodes.

PPA: HEADQUARTERS ADMINISTRATION

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b>   | <b>Amount</b>  |
|------------------------------|---------------------|--------------|----------------|
| <b>2007 Actual</b>           | <b>1,351</b>        | <b>1,213</b> | <b>305,648</b> |
| <b>2008 Enacted</b>          | <b>1,377</b>        | <b>1,377</b> | <b>293,191</b> |
| 2009 Adjustments-to-Base     | (400)               | (439)        | (80,056)       |
| <b>2009 Current Services</b> | <b>977</b>          | <b>938</b>   | <b>213,135</b> |
| 2009 Program Change          | 0                   | 0            | 0              |
| <b>2009 Request</b>          | <b>977</b>          | <b>938</b>   | <b>213,135</b> |
| Total Change 2008-2009       | 0                   | 0            | 0              |

The Transportation Security Administration requests \$213.1 million for this activity. This request represents decreases of 430 FTP, 430 FTE and \$89.1 million due to the creation of a new PPA for Human Capital Services and various realignments between PPAs throughout the appropriations. The adjustments-to-base include \$200 thousand for regulation publication, 30 FTP, 29 FTE, \$5.5 million to correct material weaknesses in financial and covert testing, and \$725 thousand to support the Information Center. Additional adjustments-to-base include \$1.3 million in pay annualization, \$3.1 million in pay COLA, \$1.2 million in non-pay COLA, 38 FTE for lapse rate reduction, a \$202 thousand decrease for annualization of the FY 2008 Budget Amendment, an efficiency reduction of \$3.1 million, and a final decrease of \$295 thousand for the non-pay adjustment.

## CURRENT SERVICES PROGRAM DESCRIPTION

The following table provides the components that make up this PPA.

|   | <b>FY 2009</b> |
|---|----------------|
| Personnel                                 | \$127.4        |
| Leadership                                | 5.3            |
| Internal Management and Controls          | 29.4           |
| Workforce Support                         | 21.3           |
| Facilities Management & Physical Security | 29.7           |
| Total                                     | \$213.1        |

Headquarters Administration supports numerous functions required to provide leadership, management, and logistics support to TSA operations.

**Personnel:** \$127.4 million in personnel costs are included in this PPA for the offices of the Assistant Secretary, Business Transformation and Culture, Inspection, Chief Counsel, Finance and Administration, Legislative Affairs, Acquisition, Special Counselor, and Strategic Communications and Public Affairs.

**Leadership:** \$5.3 million in operating expenses to develop the policy and management architecture to guide overall activities, ensure compliance with laws and regulations, develop and monitor performance metrics, and manage external relationships with Congress, the Administration, other oversight entities, and private sector partners.

**Internal Management and Controls:** \$29.4 million in operating expenses supports the day-to-day management of a \$7.1 billion budget and over 50,000 personnel. Offices overseeing internal management and controls include Inspection, Chief Counsel, Chief Financial Officer, Acquisition, and Administrative Services. Inspection continuously conducts covert testing to identify vulnerabilities in the transportation security system. Testing consists of introducing inert improvised explosive devices in carry-on and checked baggage. During core enhanced testing, teams test access the Aviation Operations Area and aircraft, Security Identification Display Area, and access through the perimeter. Inspection has increased its efforts to identify employees violating Worker's Compensation provisions by referring cases for prosecution, as appropriate. Additionally, Inspection is implementing proactive initiatives to deter and prevent baggage theft and loss claims at airports throughout the country. Acquisition provides TSA with subject matter expertise in the areas of acquisition, program management, field office acquisition guidance, grants management, and program management. The goal of the Chief Financial Officer is to obtain the necessary resources to support TSA's critical mission and ensure the resources are used efficiently by providing effectual financial systems and robust internal controls over funds. Administrative Services reduces operational and financial risk by ensuring control of all sensitive and capitalized assets. This is an on-going initiative which provides policy, guidance, training, inventory support, information management, and compliance reporting.

Significant accomplishments in FY 2007 include:

- Inspection -- Conducted over 1,700 covert tests at airports; investigated and closed 24 cases of Workers' Compensation fraud and is investigating an additional 64 cases; conducted an assessment of the Workers' Compensation Program and identified systemic weaknesses in the administration and oversight of the program and made recommendations for improvements.
- Acquisition -- Completed TSA Acquisition Fellows Boot camp, which added 19 Contract Specialist trainees to the Office of Acquisition (OA); completed Contracting Officer's Technical Representative (COTR) compliance reviews; initiated a major undertaking to analyze the entire procurement process via Lean Six Sigma (LSS) methodology in order to identify process improvement opportunities.
- Chief Financial Officer -- Developed, presented, and defended TSA's annual budget request in meetings with the Department, the Office of Management and Budget, and Congress resulting in a budget of more than \$7 billion; improved critical financial management areas including late payment interest penalties, travel card delinquencies, balances held in suspense accounts, and internal controls over financial reporting.
- Administrative Services -- Issued policies and guidance on inventory controls; thus, ensuring accountability of TSA's sensitive and capitalized property.

FY 2008 planned accomplishments include:

- Inspections – Increase the number of covert test team leaders to 12; conduct 2,550 covert tests at airports; tests include core-enhanced tests, focused tests, and field tests of new advanced technology equipment, other transportation mode tests, and initiate extensive cargo testing; conduct 110 airport inspections to measure and evaluate efficiency and effectiveness of all operations and adherence to polices; and conduct 7 inspections of FAMS field offices and 8 inspections of FAMS Headquarters office to evaluate operational program, procedures, and policies.
- Acquisition -- Strengthen contract administration by emphasizing oversight of the COTR program, improve OMB Exhibit 300 submissions and ensure weakness are addressed, and enhance quality assurance and contract oversight; and implement the recommendations of the Lean Six Sigma study to improve the procurement process: Procurement Request Package Process and Proposal Evaluation Process; formalize TSA's requirements process, including drafting procedures, issuing policies, and provide guidance to vet, stabilize, and review mission needs and capabilities.
- Chief Financial Officer -- Develop, present, and defend TSA's annual budget request in meetings with the Department, the Office of Management and Budget, and Congress; strengthen fiscal policies across TSA and reduce material weaknesses; enhance management controls to ensure proper use of funds.
- Administrative Services -- Complete and reconcile the annual inventory of all capitalized and sensitive property (to include IT assets) with a loss, damage, or destruction (LDD) ratio of less than 2 percent and implement the corrective action plan for Property and Equipment Accounting.

## FY 2009 Planned Accomplishments:

- Inspections – Conduct 2,650 covert tests at airports; these tests include core-enhanced tests, focused tests, and field tests of new advanced technology equipment, other transportation modes, and continue to expand cargo testing; conduct 110 airport inspections to measure and evaluate the efficiency and effectiveness of all operations and adherence to policies; and conduct risk assessments of TSA operations and execute 20 internal reviews to address potential weaknesses.
- Acquisition -- Continue development of the Acquisition workforce through the implementation of a recruitment plan, as outlined in the OA Human Capital plan and implement a Program Manager Simulated "Boot Camp" Training program.
- Chief Financial Officer -- Present and obtain critical resources to support TSA's mission; establish policies and procedures to ensure financial integrity while providing maximum flexibility to meet emergent program needs; increase training for operational and support employees on fiscal policies and procedures; and continue to reduce material internal control weaknesses and achieve an unqualified (clean) audit opinion on the FY 2009 Financial Statement.
- Administrative Services -- Ensure accountability of TSA's sensitive and capitalized property.

**Workforce Support:** \$21.3 million all aspects of sustaining approximately 50,000 employees and ensure an excellent working climate and a safe and healthful environment while performing TSA's mission. In addition, these programs ensure fair and lawful treatment of employees and the public. Offices that provide workforce support include the Special Counselor (Equal Employment Opportunity, Ombudsman, Executive Secretariat, Sensitive Security Information Office, and Redress) and Administrative Services. Activities funded include Equal Employment Opportunity education, complaint investigation and adjudication, and alternate dispute resolution. The Ombudsman provides neutral and confidential problem resolution services to employees and the public for issues involving TSA. The Executive Secretariat operates the TSA Contact Center (TCC) which responds to traveler inquiries. Redress provides a forum for individuals identified as a threat or a potential threat to transportation security to appeal the determination. The Sensitive Security Information (SSI) Office ensures that TSA complies with all laws and regulations regarding the recognition, identification, and safeguard of SSI.

Programs under Administrative Services include the Occupational Safety and Health (OSH), Fleet Management, and Transit Benefits program. The OSH program works to bring facilities into compliance, provide a safe and healthful working environment and reduce injuries and illness. Fleet Management provides operational support by acquiring vehicles and fleet management services as well as administering the HQ parking and Executive transportation program. The Transit Benefits Program ensures that employees receive transit benefits.

Significant accomplishments in FY 2007 include:

- Special Counselor -- Initiated the "Building and Maintaining Diversity" program to address low representation rates of certain populations in mission critical positions. It was launched in September 2007 with the creation of the Diversity Advisory Council to support the implementation of the Diversity Action Plan; consolidated the TCC workforce and technology into a new protected off-site call center environment; created a new program system of redress, DHS Traveler Redress Inquiry Program (DHS TRIP), to include a multi-Department approach

to resolving traveling public issues across a broad spectrum of transportation modes; SSI developed a comprehensive group of SSI policies and procedures for sharing, handling, and protecting SSI materials.

- Administrative Services -- Launched the inspection module of the Safety Information System that documents and tracks findings and associated corrective actions from annual workplace inspections and job hazard analyses; the President's Safety, Health, and Return to Employment Initiative (SHARE) requires Federal agencies to reduce the Total Case Rate (TCR) and Lost Time Case Rate (LTCR) by 3 percent each Fiscal Year from the FY 2003 baseline. TSA reduced the total number of TSO injuries and illnesses from 8,042 in FY 2006 to 6,254 in FY 2007, resulting in a 15.36 percent reduction in TCR to 13.93 per 200,000 work hours. The TSO injuries and illnesses that resulted in lost time have decreased from 4,367 in FY 2006 to 3,228 in FY 2007, resulting in a 19.55 percent reduction in the LTCR to 7.19 per 200,000 work hours; obtained alternative fuel vehicles sufficient to meet operational requirements.

FY 2008 planned accomplishments include:

- Special Counselor -- Improve and increase information flow and ease of access to the traveling public; further integrate alternate dispute resolution methodologies and services into TSA culture; upgrade DHS TRIP technology application and improve responsiveness to the traveling public redress inquiries; enhance current TSA-wide SSI Awareness campaign to improve SSI understanding, responsibilities, and handling.
- Administrative Services -- Implement the one-step Safety-Workers' Compensation processing using the Safety Information System to streamline OSHA recordkeeping and OWCP claims processes; conduct safety training workshop for Designated Occupational Safety and Health Officials and Collateral Duty Safety Officers to train employees on safe work practices; expand OSH program elements aimed at reducing injury/illnesses, including a pilot stretching and exercise program aimed at reducing muscular-skeletal injuries; thus, continue to reduce TSO injuries, the SHARE goals are 16.63 for TCR and 7.64 for LTCR.

In FY 2009, the Special Counselor will develop and refine information sharing methods and responsiveness to ensure that programs tracking passengers are consistent with civil rights laws and policies; further integrate alternate dispute resolution methodologies and services into TSA culture; and expand program to improve SSI identification, sharing, and safeguards. Administrative Services will formalize the OSH evaluation program to include visits to field facilities to assess the effectiveness of their safety program management activities; maintain vigilance in reducing workplace injuries and illnesses through established mechanisms such as OSH training, safety awareness programs; and identification and mitigation of workplace hazard and program deficiencies; thus, the SHARE goals are 16.13 for TCR and 7.51 for LTCR. TSA currently exceeds these goals and has implemented stretch goals to reduce the TSO TCR and LTCR by at least 3 percent per year to 13.09 and 6.76, respectively.

**Facilities Management and Physical Security:** \$29.7 million in operating expenses provided by Administrative Services include facility and management support for HQ, the Freedom Center, the Franconia Warehouse, and the Mission Support Centers (MSCs). The Franconia warehouse is used to stage TSA equipment prior to deployment, store special purpose consumables, and temporary storage of property and equipment during construction projects. The MSCs are the central field service support mechanism for TSA across transportation modes; they provide TSA field personnel with support within designated areas, located in San Francisco, CA; Atlanta, GA; Dearborn, MI; Philadelphia, PA; and Coppell, TX.

In FY 2007, Administrative Services co-located TSA with FPS/ICE at the Philadelphia MSC and moved MSCs in Detroit, San Francisco, and Dallas into GSA leased space; closed out the original Freedom Center Construction Project, and completed the Freedom Center Watch Floor Mega-Pod Project.

In FY 2008, Administrative Services plans to install energy saving lighting sensors and support furniture modification requests.

Planned activities for FY 2009 include: continue to support tenant activity and mission critical requirements, support furniture modification requests, and identify the Freedom Center's electrical systems lifecycle costs.

PPA: HUMAN CAPITAL SERVICES

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>  |
|------------------------------|---------------------|------------|----------------|
| <b>2007 Actual</b>           | ...                 | ...        | ...            |
| <b>2008 Enacted</b>          | ...                 | ...        | ...            |
| 2009 Adjustments-to-Base     | 183                 | 176        | 218,105        |
| <b>2009 Current Services</b> | 183                 | <b>176</b> | <b>218,105</b> |
| 2009 Program Change          | ...                 | ...        | 0              |
| <b>2009 Request</b>          | 183                 | <b>176</b> | <b>218,105</b> |
| Total Change 2008-2009       | 183                 | 176        | 218,105        |

The Transportation Security Administration requests \$218.1 million for Human Capital (HC) services for Headquarters and field offices. This is a new PPA which consolidates the Human Resources Services PPA from the Aviation Security appropriation and Headquarters Administration PPA from the Transportation Security Support appropriation. The adjustments-to-base include \$319 thousand for pay annualization, \$794 thousand for pay inflation, \$3.8 million for non-pay inflation, a 7 FTE lapse rate reduction, a decrease of \$10.2 million for annualization of the FY 2008 Budget Amendment, and an efficiency reduction of \$4.9 million.

**CURRENT SERVICES PROGRAM DESCRIPTION**

The following table provides the components that make up this PPA.

|                                      | <b>FY 2009</b> |
|--------------------------------------|----------------|
| Personnel                            | \$23.8         |
| HR Services                          | 57.2           |
| Recruitment, Assessment, & Servicing | 125.9          |
| Leadership Training & Development    | 11.2           |
| Total                                | \$218.1        |

The Office of Human Capital (OHC) maintains oversight of all human resources contractual activities, develops policies, guidance and programs that are used to identify and promote the best and most efficient human resources (HR) practices allowing TSA to establish and administer programs necessary to create and sustain a diverse and highly skilled workforce.

**Personnel:** Approximately \$23.8 million in personnel costs are included in this PPA to support all HC activities in headquarters and field offices.

**Human Resources Services:** The request includes \$57.2 million for HR Services to employees in the field and Headquarters. OHC provides HR Services including recent and archived communications, comprehensive Human Resource Orientation documents for new field and Headquarters employees, and frequently asked questions about HR Services and how it can best meet required human resources needs. Specific activities include:

- Perform general human resource administration;
- Recruit qualified applicants;
- Extend employment offers and mails notification letters to new hires;

- Maintain Official Personnel Folders (OPFs) and electronic Official Personnel Folders (eOPFs); and
- Process all employee actions.

**Recruitment, Assessment, and Servicing:** The request includes \$125.9 million for the recruitment, assessment and servicing of TSA’s TSOs and other workforce at headquarters, field locations, and airports to ensure a qualified workforce is available to meet security requirements. The largest component of the workforce is the TSOs and local hiring practices support their recruitment and retention through the following:

- Computer Based Testing (CBT) (\$90/applicant);
- Medical exams/drug tests (\$400/test);
- HR specialists available to assist airports with local hiring assessments;
- Localized on-the-ground recruiters to attract TSO candidates;
- Airport local hiring help desk to answer airport questions and assist in resolving issues and problems;
- Recruitment Center availability for TSO applicants and candidates to contact for important information;
- Deployment and availability to all airports of a local hiring “Dashboard” to assist airports with candidate management;
- Management and maintenance of data systems and repositories to track and manage nationwide TSO candidate information (forms and fingerprints); and
- Local hiring training for airport staff in select locations.

Workers’ Compensation Program oversees the Workers’ Compensation chargeback from the Department of Labor and the Nurse Case Management Program. The Program established the Periodic Roll Initiative (PRI) in April 2007. The initiative is a joint effort with the Nurse Case Management team where all of the long term disability (Periodic Roll) cases are examined for opportunities to return employees back to work when medically feasible.

Significant Accomplishments in FY 2007 include:

The move from centralized hiring of TSOs to decentralized localized hiring has created the efficiencies that enable base adjustments. Below are examples of these efficiencies:

- Put hiring under complete airport control:
  - FSDs/staff now have ability to direct the entire process from Vacancy Announcement to Enter on Duty (EOD);
- Expanded hiring capacity (ability to hire at more airports at the same time):
  - Before: Hiring for 20 – 30 TSOs at airports per pay period;
  - Now: Hiring for 60 – 100 TSOs at airports per pay period, with capacity to hire at all airports simultaneously;
- Increased throughput (ability to hire more TSOs at the same time):
  - Before: 180 new hires per pay period;
  - Now: Demonstrated capacity for 800+ new hires per pay period;
- Improved hiring efficiency:
  - Before: Job acceptance rate = 63%;
  - Now: Job acceptance rate = 85%;

- Decreased hiring time:
  - Before: Time to Hire ~ 3 – 6 months;
  - Now: Time to Hire ~ 1 – 3 months;
- Improved hiring cost efficiency:
  - Fingerprinting by American Association of Airport Executives;
  - Staff support by Office of Personnel Management;
  - Reduced cost of Computer-Based Testing (CBT).
- Reduced the cost of the Workers' Compensation charge back by \$3.2 million or 5.5 percent. The chargeback cost in FY 2006 was \$58.7 million and \$55.5 million in FY 2007. The reduction is largely credited to the overall success of the Nurse Case Management Program's attention to early intervention and a decline in new TSO injuries over the last few years.
- Reduced the number of individuals on the periodic rolls by 275 individuals, a 28.5 percent reduction. This reduction is the result of implementing the Period Rolls initiative.
- Nominated as an agency for the Harvard/John F. Kennedy School of Government's "Innovations in American Government Award" for adapting private industry methodology and proving it was a 'best practice' to be used across the Federal Government.

FY 2008 planned accomplishments include:

- Implement an electronic version of the Orientation, which will allow candidates to receive instruction on Federal benefits and to complete forms required for on-boarding prior to EOD. This enhancement is expected to:
  - Reduce the cost of delivering required Orientation content by \$3 million or 56 percent;
  - Increase EOD paperwork compliance from 85 percent to 98 percent;
 Improve the Orientation experience for new hires and airports;
- Review and assess the remaining 690 period roll cases. Each case is reviewed to determine if the employee may return to duty (full or limited), the case is medically resolved, or the case requires continued monitoring due to long term disability.

In FY 2009, OHC will continue to engage field and headquarters personnel in recruitment activities; extend the recruitment reach to capture a wider, higher quality candidate pool; improve recruitment activities to reach targeted candidate pools; and continue to implement enhancements that will facilitate the hiring process for candidates and hiring authorities; review and assess any remaining period roll cases and all newly added periodic roll cases.

**Leadership Training and Development Program:** \$11.2 million is requested for training and development. OHC works closely with TSA Leadership to develop and administer programs to prepare for the future leadership needs of TSA by:

- Identifying current and future senior leadership requirements;
- Preparing talented and motivated leaders at senior and mid-levels who will be ready to take on new challenges;
- Demonstrating TSA values and being fully committed to inclusion by developing a diverse cadre of highly-qualified candidates, including minorities and women, to fill top and mid-level leadership positions; and
- Identifying the best external sources of recruitment when internal sources are insufficient to meet critical needs.

All TSA employees benefit from better-prepared, better-trained leaders. Such leaders ensure that TSA accomplishes its important mission and advances the goal of becoming a highly effective and agile organization, and an employer of choice. The Succession Plan provides the opportunity for current leaders to make an investment in the development of future leaders and in the long-term success of TSA. These programs ensure TSA has the leadership needed to meet both *current* and *future* mission requirements by preparing leadership development program participants for their *next* job opportunities.

Professional development training provides mission-related training that is either beneficial for an employee in his/her current job or for professional development that will increase the employee's ability to contribute to TSA's mission in another capacity.

FY 2007 accomplishments include:

- Developed and implemented the Foundations of Leadership Program for newly promoted Supervisory TSOs to provide the necessary skills and abilities to perform as a first line supervisor. Over 2,300 participants completed the course;
- Designed, developed, and deployed the Senior Leadership Development Program. This is a core program of the Agency Succession Plan to meet the future leadership needs of TSA. There were 128 participants in this first year;
- Implemented the Mid-Level Development Program designed to help candidates for mid-level leadership positions at TSA become better qualified applicants. A total of 400 individuals were selected for this new program.

FY 2008 planned accomplishments include:

- Increase the delivery of the Foundations of Leadership to 800 seat offerings;
- Pilot and deliver two new courses for managers: "Leading from the Middle" and "Leading Strategically," to provide managers with the concepts, tools and best practices for leading both people and operations more effectively;
- Develop and execute a needs analysis and complete planning for a new Executive Leadership Development Course;
- Provide Assistant Administrators and Office Directors a reference document of newly available professional development training courses on TSA's Online Learning Center (OLC).

In FY 2009, OHC will pilot and deliver the new Executive Leadership Development Course and continue the delivery of the Foundations of Leadership, Senior Leadership Development Program, and Mid-Level Development Program; link professional development training courses to TSA competencies; and the Workers' Compensation Program will continue to focus on the PRI to resolve long term disability cases.

The Transportation Security Administration requests \$472.8 million to support information technology (IT) for its headquarters and field offices. The FY 2009 request consolidates TSA’s information technology operating and personnel funds into one PPA. The adjustment to base of \$263.5 million reflects the consolidation of IT funds. Included are 90 positions previously in the Airport Management IT and Support PPA in the Aviation Security appropriation and 41 positions in the Transportation Security Support appropriation. It also includes \$152 thousand for pay Annualization, \$377 thousand for pay inflation, \$9.0 million for non-pay inflation, \$239 thousand decrease for lapse rate, \$9.6 million efficiency reduction, and \$270 thousand Annualization of FY 2008 Budget Amendment. The remaining base adjustments of \$4.7 million support enhancing TSA’s financial systems and disaster recovery capability.

**CURRENT SERVICES PROGRAM DESCRIPTION**

**Core Information Technology (IT) Program:** A total of \$353.9 million supports the core IT program and telecommunications infrastructure for all of the TSA managed enterprise-wide IT services that assist in accomplishing TSA mission responsibilities. The fundamental IT capability has been supported through an information technology managed service (ITMS) contract since the inception of TSA. The managed services model offers the prospect of long-term cost efficiencies and the provision of state-of-the-art technologies for services and equipment.

FY 2007 significant accomplishments include:

- Completion of Hi-SOC deployment and installations;
- Installation of Time and Attendance Systems at 80% of TSA sites;
- Score of 100% on the Federal Information Security Management Act (FISMA) security scorecard score for IT systems.

FY 2008 planned accomplishments include:

- Transition of all infrastructure and operating platform requirements to a competitively awarded DHS Eagle task order;
- Implementation of failover capability to capture the most critical data elements;
- Planning and limited migration of data center assets to the DHS consolidated data center;
- Maintaining balanced score card for Federal Information Security Management Act;
- Performing an in depth review of all systems security plans (SSP) to ensure compliance with all OMB mandates and FISMA;

- Performing Information Systems Security Audits of 10% of TSA systems and an additional 12 Technical Vulnerability Audits of twelve Category X and 1 airports to maintain FISMA compliance.

TSA has FY 2009 planned objectives to support and enhance the current IT environment. TSA has evaluated its network, infrastructure, IT security, information sharing, applications development, and engineering support requirements to align existing capabilities with DHS strategic objectives. To accomplish this goal, TSA has aligned the managed service model with the existing DHS EAGLE contract to further improve mission support. The alignment will help deliver enhanced business-focused IT services and a more robust telecommunications infrastructure for all employees of the TSA.

The core IT program funding request includes support for improving information sharing and data collaboration. Information sharing environment (ISE) is a holistic approach that balances technology choices with equally important organization, governance, process and architecture dimensions to ensure an enterprise-wide impact. ISE requires defining specific processes for proposed IT projects including governance reviews of existing TSA data assets to maximize discovery and reuse of existing data sources and ensure maximum integration with existing systems. TSA will engage stakeholders to identify and catalog all data assets to facilitate governance reviews of existing resources. ISE capabilities that will be supported in FY 2009 include alerts & warnings, enterprise search, directory services, collaboration tools, identity management and other technical capabilities that expand or enhance information sharing.

The FY 2009 funding request will also provide enhancements to the existing IT environment to support an integrated IT infrastructure. The funding will assist TSA in developing an IT environment sufficient for promoting the effective use of IT assets for information sharing and collaboration throughout TSA and DHS. Enhancements to IT environments include:

- Segmented refresh of network and infrastructure equipment;
- Optimizing the TSA application hosting environments;
- Consolidation and redesign of network backbone.

The TSA IT infrastructure supports the technology assets of airport, headquarters, and TSA Freedom Center personnel. The user equipment is widely dispersed throughout the continental U.S. and requires a large wide area network to support the information needs of the TSA population. The Hi-SOC program provides the connectivity to meet the demands of a dispersed user base, utilizing a variety of equipment. TSA has deployed and manages over 36,000 user assets including but not limited to:

- Land Mobile Radios (LMR) (7,400+)
- Blackberry Devices (1,600)
- Laptops and desktops (13,000+)
- Personal Data Assistants (120)
- Pagers (2,100)
- Cellular Phones (5,000)
- Copiers (800)
- Fax Machines (550)
- Printers (4,000+)
- Voice-over-IP (VOIP) Phones (3,600+).

**Hi-SOC:** By FY 2009, Hi-SOC will be fully operational and the requested funding will support operations and maintenance of the network and backbone infrastructure. The requested \$50 million in FY 2009 will support and maintain the TSA communications network providing access to all domain resources, TSA assets, system security enhancements, and redundancy in support of TSA and DHS mission objectives. Hi-SOC is a prerequisite for TSA mission critical programs and the deployment of mission critical applications, including but not limited to:

- Threat Image Protection Network (TIP)
- Indirect Air Carrier Management System (IACMS)
- Inquiry Management System (IMS)
- Known Shipper Management System (KSMS)
- Legal Integrated Knowledge System (LInKS)
- Performance & Results Information System (PARIS)
- Screening Technology Integration Program (STIP)
- Electronic Surveillance System (ESS)
- TSO Scheduling System (SABRE);
- Human Resource Capabilities- including NextGen HR;
- Integrated multi-media messaging such as Land Mobile Radio (LMR)
- electronic Time and Attendance (eTA).

The integrated IT environment requires support for robust IT engineering, infrastructure operations and enterprise application services. The IT support funding will provide TSA with the resources for ongoing operations and maintenance for the TSA data centers, operation centers, failover resources, TSA applications, operating platform management, database management, application systems, system performance monitoring, and configuration management. Contract personnel provide a majority of support for these efforts. The type of support includes IT engineers, IT specialists, system analysts, and management analysts that assist and advise the CIO function in the execution of the TSA IT resources. Support includes:

- National Help Desk; including software, licensing and software distribution support,
- Federal Security Director support,
- HQ IT support,
- Airport IT support,
- Security Incident Response,
- Checked baggage and passenger screening data,
- Performance management data analysis,
- Equipment maintenance and legacy systems support,
- Infrastructure Transformation -- TSA participation in DHS One Infrastructure,
- Technical architecture compliance and enterprise architecture-related support.

**Disaster Recovery (DR) Capability:** The FY 2009 base funding request of \$4.8 million will support continued development and implementation of limited failover capability to back up vital TSA data assets. The DR capability and Continuity of Operations Planning (COOP) is required to support the establishment, operations and maintenance of an alternate site in the event that TSA IT systems at the primary Data Center, HQ server facility, or the Freedom Center server facility are lost or become inoperable for an extended period of time. TSA will acquire hardware, software, facilities, labor and services to implement a limited failover capability to manage the near-line backup for its most mission

critical applications, data and information. The funding will be used for engineering support, server purchase (EMC DMX-3), a virtual tape system, server area network (SAN), redundant connectivity (OC-3), facility space, and power requirements. Establishment of a DR capability is mandated by OMB Circular A-130 and Federal Preparedness Circular 65, Federal Executive Branch Continuity of Operations.

The FY 2009 budget request will also support an enhanced information security environment to ensure compliance with the Federal Information Security Management Act (FISMA), using a variety of IT related resources. IT security will perform audit and assessment reviews to test the compliance of IT systems, including the physical review of sites that house TSA's IT systems. The auditing team is reliant on security tools in order to perform proper due diligence testing against systems. Software unique to the audit team will be utilized to provide multiple views of the data analysis to ensure that all vulnerabilities are exposed.

TSA IT security enhancements will allow the agency to continue to maintain full FISMA compliance. Certification and accreditation (C&A) management will develop, implement and enhance the continuous monitoring phase of the IT Security Life Cycle. Funding will support Information Systems Security Officers (ISSO's) and system owners in the creation of security remediation plans. A mandatory training program will measure compliance and report results quarterly to OMB, as required by FISMA, which includes Security Awareness and Significant Security Responsibilities (SSR).

The growing needs of the TSA communication security (COMSEC) user base requires TSA to continually enhance secure communications to stakeholders and help desk capability. The service area includes the continued modernization of secure communication units as well as infrastructure protection which includes but is not limited to:

- Firewalls
- Intrusion detection and prevention
- Antivirus
- Content monitoring
- Managed Security Services.

FY 2009 base funding will provide the necessary resources for compliance with all IT security policies to ensure agency compliance with DHS and federal mandates. Policy development includes impact and gap analysis of IT security measures. TSA will rely heavily on the development of a comprehensive security architecture to provide interoperability standards, secure deployment of technology requirements, and models of technology insertions.

The TSA IT core program is working to deliver business-focused IT services through efficient management practices. Program support provides TSA locations on-site IT contractors to service the Category X and 1 airports, FSD offices, TSA International locations, TSA headquarters, Freedom Center, and an emergency response capability for the rapid deployment of IT services in the event of an emergency situation. Business-focused solutions have been developed to support the office automation deployment and refresh of TSA assets including software management, installations, moves, adds or changes (IMACs), GFE equipment provisioning of 508 compliant IT equipment, and other direct charges (ODCs) to purchase small dollar IT items that are not conducive to a managed service (zip drives, cables, surge protectors, CD/RW, etc.). IT account managers have been organized to rapidly respond to the diverse and changing needs of the TSA IT user community. The services are provisioned to satisfy the specific needs of TSA divisions and field offices by providing customer

focused IT solutions in direct alignment with the office's mission responsibilities. Engineering and IT specialist services provide solutions for applications, infrastructure, enterprise services and operations in support of TSA programs and projects. The IT core program provides focused and efficient acquisition management, program management, technical and administrative oversight of the prime contractor, and a variety of additional support contractors, while continually seeking the achievement of contract results, not contract compliance, in meeting the IT mission solutions needs of TSA. In addition, the IT training program will continue to provide staff the resources necessary to improve the alignment of requirements in TSA business portfolios in support of the Agency mission.

**Time and Attendance (eTAS):** This project will streamline and automate the process currently utilized to support collection and data input of timecards and collection of performance metrics for the airport support staff. Current processes and available automation are legacy based, which make the continuance of the same functionality ineffective and cost prohibitive. This effort endeavors to eliminate paperwork, provide cost accounting, and provide management with the tools and resources needed to effectively evaluate cost alternatives with respect to FTE management and technological developments. In FY 2009, TSA will continue operations and maintenance of systems and leverage connectivity to expand automated processes.

**Personnel/Financial Management Systems:** This activity funds \$44.4 million of interagency agreements with Coast Guard and the U.S. Department of Agriculture for the use of their financial management, personnel, and payroll systems. This also funds reimbursements to the Department of Homeland Security for the costs of the Working Capital Fund, related to operational information management support functions.

**Performance Management Information System (PMIS):** PMIS is a \$5 million activity that converts data from front-line systems, from security processes and machines, as well as from back-office systems, such as personnel and finance systems, to real-time information on the current status of the security systems to support personnel on the front lines of operations (e.g., Federal Security Directors), as well as TSA Executives. PMIS is the best source of real-time data available for TSA leadership and operating personnel. It plays a key role in TSA's performance management system. In FY 2008, TSA will continue to develop new performance measures and dashboards and will refine the existing as needed to respond to Executives' and Federal Security Directors' needs.

**e-Government Operating Platform (e-Gov OP):** e-Gov OP is a \$3 million platform and analytical "toolbox" that facilitates the reporting and analysis of key performance data to support enterprise-wide performance reporting. This capability is enabled through a Microstrategy Business Intelligence application which processes data from multiple databases that is exposed through an information sharing environment supported by IT. This supports ad hoc and standard reports which can be automated and pushed to recipients. The TSA Monthly Objective Report and the Daily Service Performance & Safety Report are examples of key reports supported by this capability and are key elements in TSA's performance management system.

**IT Personnel:** This PPA also includes \$11.7 million to support 131 FTE previously funded in the Headquarters Administration and Airport Management IT and Support PPAs.

#### **IV. Program Justification of Changes**

**(There are no program changes)**

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

#### **Department of Homeland Security Transportation Security Administration**

#### **Justification of Proposed Changes in Transportation Security Support Appropriation Language**

For necessary expenses of the Transportation Security Administration related to providing transportation security support and intelligence pursuant to the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat. 597; 49 U.S.C. 40101 note), [\$523,515,000] ~~\$926,000,000~~, to remain available until September 30, [2009] 2010: [Provided, That of the funds appropriated under this heading, \$10,000,000 may not be obligated until the Secretary of Homeland Security submits to the Committees on Appropriations of the Senate and the House of Representatives detailed expenditure plans for checkpoint support and explosive detection systems refurbishment, procurement, and installations on an airport-by-airport basis for fiscal year 2008; and a strategic plan required for checkpoint technologies as described in the joint explanatory statement of managers accompanying the fiscal year 2007 conference report (H. Rept. 109-699): Provided further, That these plans shall be submitted no later than 60 days after the date of enactment of this Act.] (Department of Homeland Security Appropriations Act, 2008.)

#### **Explanation of Changes:**

TSA has complied with the provisions included in previous language.

**B FY 2008 to FY 2009 Budget Changes**

#### PPA Mission Statement

Provide Intelligence Analysis, Coordination, and Dissemination -- TSA will continue to provide current and strategic warning regarding threats to U.S. transportation modes and identify trends and changes in targeting. TSA intelligence unit analyzes intelligence and disseminates information through liaison with intelligence community agencies.

#### Summary Justification and Explanation of Changes

|                              | 2007<br>Actual  | 2008<br>Enacted | 2009<br>Request | 2008-2009<br>Change |
|------------------------------|-----------------|-----------------|-----------------|---------------------|
| <b>Salaries and Benefits</b> | <b>\$10,567</b> | <b>\$11,045</b> | <b>\$11,064</b> | <b>\$19</b>         |

Salaries and Benefits includes costs for 92 FTE. The FY 2009 request includes a realignment of 3 FTE and \$309,000 in salaries and benefits to the Law Enforcement PPA in the Aviation Security Appropriation. It also includes pay COLA of \$234,000, and \$94,000 for pay annualization.

|  | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>    |

**Other Services**

|            |            |                  |                  |
|------------|------------|------------------|------------------|
| <b>\$0</b> | <b>\$0</b> | <b>\$105,484</b> | <b>\$105,484</b> |
|------------|------------|------------------|------------------|

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Included under this object class are contracts for security support, EEO support, and corporate training. The FY 2009 request of \$105,484,000 reflects the realignment of the HR Services PPA in the Aviation Security Appropriation and funding of the Office of Human Capital in the HQ Administration, Transportation Security Support Appropriation into this PPA and inflation.

|  | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008-2009</b> |
|--|---------------|----------------|----------------|------------------|
|  | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>    |

**Purchase from Government Accounts**

|            |            |                |                |
|------------|------------|----------------|----------------|
| <b>\$0</b> | <b>\$0</b> | <b>\$1,731</b> | <b>\$1,731</b> |
|------------|------------|----------------|----------------|

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2009 request of \$1,731,000 reflects the realignment of the HR Services PPA in the Aviation Security Appropriation and funding of the Office of Human Capital in the HQ Administration, Transportation Security Support Appropriation into this PPA and inflation.

|  | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008-2009</b> |
|--|---------------|----------------|----------------|------------------|
|  | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>    |

**Medical Care**

|            |            |            |            |
|------------|------------|------------|------------|
| <b>\$0</b> | <b>\$0</b> | <b>\$4</b> | <b>\$4</b> |
|------------|------------|------------|------------|

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2009 request of \$4,000 reflects the realignment of the HR Services PPA in the Aviation Security Appropriation and funding of the Office of Human Capital in the HQ Administration, Transportation Security Support Appropriation into this PPA and inflation.

|  | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008-2009</b> |
|--|---------------|----------------|----------------|------------------|
|  | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>    |

**Supplies & materials**

|            |            |              |              |
|------------|------------|--------------|--------------|
| <b>\$0</b> | <b>\$0</b> | <b>\$177</b> | <b>\$177</b> |
|------------|------------|--------------|--------------|

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2009 request of \$177,000 reflects the realignment of the HR Services PPA in the Aviation Security Appropriation and funding of the Office of Human Capital in the HQ Administration, Transportation Security Support Appropriation into this PPA and inflation.

**PPA Mission Statement**

Information Technology continues to build and maintain the IT and Telecommunications Infrastructure Support and Services for all of TSA. TSA will continue to enhance the effectiveness of its entire workforce through its IT core support. The FY 2009 request consolidates TSA's information technology operating and personnel funds into one PPA.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008-2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|-----------------------------|
| <b>Salaries and Benefits</b> | <b>\$0</b>             | <b>\$0</b>              | <b>\$17,589</b>         | <b>\$17,589</b>             |

Salaries and benefits includes an increase of 126 FTE and \$17,589,000 to consolidate IT funds and IT FTE into this PPA, annualize the prior year pay raise, and fund the proposed FY 2009 pay raise.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008-2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|-----------------------------|
| <b>Travel</b> | <b>\$12</b>            | <b>\$40</b>             | <b>\$87</b>             | <b>\$47</b>                 |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The requested increase of \$47,000 supports increases in travel due to the consolidation of IT funds and IT FTE in this PPA.

|  | 2007            | 2008            | 2009            | 2008-2009       |
|--|-----------------|-----------------|-----------------|-----------------|
|  | Actual          | Enacted         | Request         | Change          |
| <b>Communication, Utilities, and Misc. Charges</b> | <b>\$28,064</b> | <b>\$28,400</b> | <b>\$61,761</b> | <b>\$33,361</b> |

Communications, utilities, and miscellaneous charges includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2009 request reflects an increase of \$33,361,000 associated with Hi-Soc and increases for utilities and custodial services at field offices and consolidation of IT funds and IT FTE in this PPA.

|   | 2007            | 2008            | 2009            | 2008-2009       |
|---|-----------------|-----------------|-----------------|-----------------|
|   | Actual          | Enacted         | Request         | Change          |
| <b>Advisory and Assistance Services</b> | <b>\$19,138</b> | <b>\$29,835</b> | <b>\$64,881</b> | <b>\$35,046</b> |

Advisory and assistance services includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The requested increase of \$35,046,000 for program management support is due to the consolidation of IT funds and IT FTE in this PPA.

|                       | 2007            | 2008            | 2009             | 2008-2009        |
|-----------------------|-----------------|-----------------|------------------|------------------|
|                       | Actual          | Enacted         | Request          | Change           |
| <b>Other Services</b> | <b>\$95,486</b> | <b>\$86,548</b> | <b>\$188,213</b> | <b>\$101,665</b> |

Other services includes report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The requested increase of \$101,665,000 is due to the consolidation of IT funds and IT FTE in this PPA.

|  | 2007            | 2008            | 2009            | 2008-2009       |
|--|-----------------|-----------------|-----------------|-----------------|
|  | Actual          | Enacted         | Request         | Change          |
| <b>Purchase from Government Accounts</b> | <b>\$48,063</b> | <b>\$41,566</b> | <b>\$90,392</b> | <b>\$48,826</b> |

Purchases from Government Accounts includes costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The requested increase of \$48,826,000 is due to the consolidation of IT funds and IT FTE in this PPA.

|   | 2007         | 2008            | 2009            | 2008-2009       |
|---|--------------|-----------------|-----------------|-----------------|
|   | Actual       | Enacted         | Request         | Change          |
| <b>Operation &amp; Maintenance of equipment</b> | <b>9,500</b> | <b>\$10,000</b> | <b>\$21,747</b> | <b>\$11,747</b> |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal Government account. The requested increase of \$11,747,000 is due to the consolidation of IT funds and IT FTE in this PPA.

|                                 | 2007       | 2008         | 2009         | 2008-2009    |
|---------------------------------|------------|--------------|--------------|--------------|
|                                 | Actual     | Enacted      | Request      | Change       |
| <b>Supplies &amp; materials</b> | <b>\$0</b> | <b>\$135</b> | <b>\$294</b> | <b>\$159</b> |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. Some software purchases and computer supplies are included in this object class. The requested increase of \$159,000 is due to the consolidation of IT funds and IT FTE in this PPA.

|                  | 2007            | 2008            | 2009            | 2008-2009       |
|------------------|-----------------|-----------------|-----------------|-----------------|
|                  | Actual          | Enacted         | Request         | Change          |
| <b>Equipment</b> | <b>\$15,174</b> | <b>\$12,800</b> | <b>\$27,836</b> | <b>\$15,036</b> |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The requested increase of \$15,036,000 for software and computer equipment is due to the consolidation of IT funds and IT FTE in this PPA.

## **A. Mission and Description of the Transportation Security Administration**

*The Transportation Security Administration protects the Nation's transportation systems to ensure freedom of movement for people and commerce.*

The terrorist acts of September 11, 2001 transformed our homeland and led to the creation of the Transportation Security Administration (TSA) as part of the Aviation and Transportation Security Act enacted on November 19, 2001. The U.S. transportation systems move billions of people and trillions of dollars worth of goods each year that are vital to the Nation's economic prosperity, global competitiveness, and national security. Terrorism risks are asymmetric and traditional linear thinking cannot address the uncertainty and complexity of risks of terrorist attacks on a large, interconnected, and adaptive network like the U.S. transportation system. As a result, TSA employs a strategy built on implementing unpredictable, flexible, and layered security measures while striking a balance between security and ensuring the flow of commerce through a threat-based, risk-managed approach. In fulfilling its mission, TSA has devoted all resources to strengthen security of the U.S. transportation network. Specific efforts since 9/11 include: installing explosive detection systems; increasing the percentage of air cargo inspections; deploying canine teams; tripling the number of cargo airport security inspectors; utilizing rail security inspectors; conducting security reviews; carrying out intelligence operations; checking passenger manifests against watch lists; deploying Federal Air Marshals (FAMs); and enhancing training for the federal flight deck officers and flight crew self-defense programs. A successful effort in protecting the Nation's transportation system requires building upon security networks with partners in other Federal agencies, state and local governments, and the private sector.

## **B. Major Activities and Key Strategic Goals:**

### **Major Activities (Appropriations):**

For fiscal year (FY) 2009, TSA is requesting \$7.1 billion in budget authority, to strengthen the security of and reduce the risk associated with the Nation's transportation systems.

The Aviation Security program allows TSA to develop and deploy systems and initiatives to ensure air passengers and air cargo traveling through and entering the U.S. are protected through a multi-layered security system. TSA improved collaborative efforts designed to provide an ever tightening security focus at our aviation nodes. Improving the ability to detect and deter the use of Improvised Explosive Devices (IED) through technology, training and operational testing is a key goal of TSA. In FY 2007 TSA increased use and innovation of canine units, Behavior Detection Officers (BDO) and Bomb Appraisal Officers (BAO). BDOs screen passengers by observation techniques, and BAOs provide consistently higher levels of IED training to the Transportation Security Officer (TSO) workforce, while reducing the time needed to investigate suspicious items at the checkpoint. Both the BDO and BAO initiatives will also greatly enhance security and deterrence efforts. FY 2007 additional accomplishments include expanding the Travel Document Checker (TDC) program at over 340 Federalized Airports covering all categories of airports. In FY 2009 TSA will provide advanced hostile intent detection training for TSOs with emphasis on creating a calm travel environment to improve security effectiveness. TSA will expand the TDC, BAO and BDO programs and invest in the Information Sharing Environment to integrate information, improve shared awareness, reduce system reliance on any single point, allowing TSA to deploy resources in a flexible, dynamic and risk-based manner adding unpredictability and randomness to the equation to provide better deterrence and defense.

In FY 2009, TSA will devote \$1.2 billion to recapitalize checked baggage screening devices and accelerate deployment of inline systems that will increase baggage throughput up to 300 percent. This will be accomplished by proposing a temporary, four-year surcharge in the Transportation Security Administration's Passenger Security Fee of \$0.50 per enplanement with a maximum increase of \$1.00 per one-way trip. The additional fee collections will be devoted to the purchase and installation of systems for the detection of explosives in checked baggage. This funding level would accelerate the deployment of optimal checked baggage screening systems and address the need to recapitalize existing equipment deployed immediately after September 11, 2001.

The Next Generation (NexGen) explosive detection system (EDS) program saw two products in production and deployed in 2007. New EDS machines and significant upgrades to existing EDS technology are under development. These includes high throughput machines that can operate at up to 1,000 bags per hour. TSA will continue to replace explosive trace detection (ETD) units with Nexgen technology while piloting additional Nexgen equipment for upgrade of EDS and replacement ETD.

At checkpoints, the TSA is currently identifying, developing and implementing technologies more capable of detecting prohibited items such as bottled liquids scanners, automated explosive sampling, and cast and prosthesis scanners. TSA will devote \$131 million to checkpoint technology. TSA will continue to optimize and reconfigure checkpoints to accommodate growth and gain efficiencies and will maintain existing systems while phasing in life-cycle upgrades as necessary.

These technologies will offer a variety of enhancements that will improve screening capabilities, increase throughput, and reduce equipment footprint.

TSA promotes public confidence in our Nation's aviation and civil transportation systems through the effective risk-based strategic deployment of highly trained Federal Air Marshalls (FAMs) and other law enforcement resources in both air and land-based mission related assignments. TSA continues to engage in an integrated global strategy to help deter terrorism worldwide, encourage the emergence of air marshal programs in other countries, and develop operational and training relationships with its international partners and its continued participation in the Crew Member Self Defense Training and the Federal Flight Deck Officer programs. In FY 2007, TSA's mission coverage on critical international flights was accelerated amid heightened concerns about potential terrorism threats originating from Britain and other areas of Europe. Increased international deployments followed a rash of unsuccessful terrorist plots involving two foiled car bombs in London and an attack at a Scottish airport. In FY 2008, TSA intends to continue assigning FAMs to targeted critical flights and international missions using a risk-based methodology.

In addition, TSA continues to enhance cargo security operations in the aviation sector and train canine teams for use in the commercial passenger aviation, air cargo and mass transit modes. TSA continues to enhance security in all modes of transportation, through initiatives such as the Visual Intermodal Protection and Response (VIPR) teams, which include FAMs, transportation security inspectors (TSI), TSOs, BDO, and explosives detection canine teams, and are used to enhance information management among Federal, state and local partners and the private sector. Different configurations of VIPR teams are used to deter criminal and terrorist activity, provide surveillance, and build regional surge capability to the response of threats. In FY09, TSA will also increase its' ability to protect all modes of transportation by enhancing VIPR and Canine Explosive Detection programs.

Surface Transportation Security efforts include resources for TSA's security operations in all non-aviation modes of transportation. In FY 2007, TSA and its partners developed best practices, standards, and regulations to protect the transportation infrastructure through the continuing process of Corporate Security Reviews and issued a Notice of Proposed Rule Making (NPRM) for rail security that clarifies the agency's inspection authority and imposes security requirements for freight and passenger rail carriers transporting of hazardous material and specifies reporting requirements for security concerns and incidents.

In FY 2008, TSA will implement the High Threat Urban Areas initiative (HTUA), which identifies urban areas where an airborne release of toxic inhalation hazard (TIH) chemicals from rail shipment could be catastrophic and will continue conducting vulnerability HTUA assessments in rail corridors. Additionally in FY08 continued inspections monitoring and enforcing compliance with standards and regulations will occur, along with designing and implementing vulnerability assessment models for all surface transportation modes.

Also funded by this appropriation is the Surface Transportation Security Inspection Program (STSIP), a unique and critically important Federal inspection and compliance program that is breaking new ground in U.S. surface transportation security. With initial emphasis on freight railroads and mass transit and passenger rail systems, the STSIP has set out to enhance security preparedness in an industry that is both vital to the economic well-being of America and is the largest transporter of passengers in the country.

In FY 2009, inspectors will conduct additional on-site inspections to ensure compliance with security standards and guidelines, security directives, and security regulations. The STSIP will enhance information sharing; highlight best security practices; evaluate security system performance; and discover and assist in mitigating gaps and vulnerabilities in the industry's security systems.

Transportation Threat Assessment and Credentialing (TTAC) serves as the lead for all name-based terrorist threat assessments, as well as background check and credentialing issues surrounding transportation industry workers and domestic passengers. Key initiatives include Secure Flight, Registered Traveler (RT), the Transportation Worker Identification Credential (TWIC), TSA Hazardous Materials Commercial Driver's License Endorsement (HazMat CDL), Alien Flight Student, and Other Vetting Programs. In FY 2009, TSA's HazMat CDL program is expected to conduct threat assessments on approximately 300,000 applicants, a continued increase from the program inception confirming the vital role of improving the safety and protection of passengers and freight traveling on the Nation's highways. In FY 2009, the TSA Secure Flight program will begin to assume the watch list matching of over two million domestic airline passengers daily with the implementation of Secure Flight. The multitude of benefits Secure Flight will provide include: early insight for potential watch list matches; earlier law enforcement notification; decreased chance of compromised watch list data because of its limited distribution; consistent watch list matching process across all aircraft operators; and an integrated redress process that clears individuals that have been improperly or unfairly delayed or prohibited from boarding an aircraft because they have been previously misidentified

Transportation Security Support provides the services that support the operational needs of TSA's extensive airport/field and headquarters personnel and infrastructure. This appropriation contains three main components: Human Resource (HR) Services, Intelligence and Headquarters

Administration. In FY 2007, as an HR initiative, TSA converted the position of the Transportation Security Screener to the TSO. This conversion allows TSA to provide a more progressive career path to better retain and strengthen the TSO workforce and is expected to increase retention, utilization and effectiveness. In FY 2008, TSA will continue its local recruitment and local hiring strategy; enhance the on-boarding process; and introduce phase three of its leadership development program.

In FY 2009, Office of Intelligence (OI) will enhance the Collaborative Transportation Imagery Project to provide OI the ability to build a 360 degree imagery library of transportation nodes.

Headquarters Administration serves as the central point on policy development for corporate training, performance management, facilities management, financial management, human resources, protecting civil rights, legal advice, and internal conduct and audit. In FY 2009, the Office of Inspections will coordinate integration of inspection efforts and programs within TSA organizational units and programs on risk-based analysis; partner with offices/agencies to assess processes throughout TSA systems with the objective of enhancing/improving security at checkpoints.

### **Key Strategic Goals:**

#### **Goal 1: Protect our Nation from Dangerous People; Objective 1.3: Strengthening Screening of Travelers and Workers**

*Transportation Threat Assessment and Credentialing (TTAC):* Through the application of threat assessment methodologies, TSA intends to identify known or suspected terrorist working or seeking access to the Nation's transportation system. TSA's TTAC Office is the transportation community's source for timely, flexible and scalable security threat assessment services for passengers and domestic workers. TTAC provides threat assessment information to law enforcement and operational security organizations to keep individuals who pose a threat from gaining access to the transportation systems.

#### **Goal 3: Protect Critical Infrastructure; Objective 3.2: Transportation Modes**

*Aviation Security:* Enhancing screening through improved checkpoint technology will refine passenger security for aviation. This initiative extends beyond the airport Checkpoint and considers the end-to-end passenger experience to improve security and increase efficiency. Focus is on three key elements: improved explosive detection, enhanced hostile intent detection and extended presence in the passenger journey.

*Surface Transportation Security:* The transportation infrastructure is extraordinary in terms of its size and complexity. In cooperation with the transportation sectors, TSA has developed sector standards and/or action items to improve the security and reduce the risks of transportation modes. Infrastructure security depends upon the establishment and enforcement of regulations across all modes of transportation. Coordination among a vast array of partners is essential – so that threats across all modes are mitigated, not just transferred

## **C. Resources Requested and Performance Impact**

### **Major Base Changes**

Aviation Security - TSA requests \$5.3B for the Aviation Security Appropriation in FY09. Changes to the FY09 base include funds to annualize the additional TSO FTE (750 for the ADASP Program and 660 for the Behavior Detection Officer Program) as well as additional VIPR and canines.

Annualization of the increase for FAMS international flight coverage is also included. In addition, TSA has realigned the FY09 Aviation Security current services funding to provide additional funding for airport privatization and increased responsibilities (BAO, SPOT) for the Screening Partnership Program as well as funding for increasing field rent and fuel costs and contract maintenance costs that increase at a rate above conventional COLA.

Also in order to enhance financial management and have PPAs more closely mirror the organizational structure, the FY09 Budget Request aligns operational and personnel funding under the same PPAs. Technology support staff previously funded under HQ Admin has been moved to EDS and Checkpoint while screener training support staff is now funded by Screener Training and Other. The FY09 request also proposes a new Law Enforcement PPA under Aviation which consolidates program initiatives in background investigations, K-9s (previously divided between Air Cargo, Aviation Regulation and Enforcement and Surface), FFDOs and TSOC/COOP. As part of the FY09 realignment, funding for the FAMS which was a separate appropriation in prior budget years is moved to Aviation Security.

Surface Transportation - TSA requests \$37M in FY09 funding for this appropriation which contains PPAs for Surface Security Operations and Staffing and Rail Inspectors and Canines. As part of base realignment, FTE associated with TSOC is moved from Surface Transportation Security Operations and Staffing to the new Law Enforcement PPA in Aviation. Canine funding is also moved from this appropriation to Law Enforcement.

Transportation Threat Assessment and Credentialing (TTAC) - For FY09, TSA requests a total of \$170M for this appropriation which includes \$133M in appropriated funding for Secure Flight, and Other Vetting and \$37M in fee funding for Registered Traveler, TWIC, Hazmat CDL and Alien Flight School. The FY09 current services level reflects the movement of \$2M in Secure Identification Display Area (SIDA) checks from the Transportation Security Support appropriation to Other Vetting. Other Vetting is proposed as a new PPA which combines the existing PPAs of Screening Administration and Crew Vetting. This new PPA will include all the smaller vetting programs such as Crew Vetting, SIDA, Temporary Flight Restriction Program, Maryland-3 Airport checks, and Twelve-five and Charter Pilot Checks within one funding source.

Transportation Security Support Appropriation- For FY09, TSA requests a total of \$926M for this appropriation. As part of the PPA realignment designed to have PPAs more closely mirror the organizational structure, the funding from Airport IT which was previously in Aviation has been consolidated with the IT (Support) and will remain as a PPA in this appropriation. Also funding for HR Services (Aviation) has been consolidated with funding previously under HQ Admin PPA and now constitutes a new Support PPA – Human Capital Services. While this appropriation had a substantial net decrease in FTE due to support personnel being aligned with operational personnel (Screener Training and Other, EDS, Operation Integration, SIDA, Law Enforcement and Checkpoint Support), several programs remaining within the appropriation received increases in current service funding. These included Intelligence support costs associated with the watch office and remote access system and HQ for additional FTE and funding to correct material weaknesses in financial and covert testing.

## Increments over Current Service Level

The FY09 TSA Budget Request reflects two program increases – both in the TTAC appropriation.

TSA requests \$32M additional funding for Secure Flight for a total of \$82M in FY09. This additional funding, coupled with execution of the transfer language provided in the FY08 appropriation will allow TSA to continue implementation of the Secure Flight program and the full assumption of watch list matching in FY 2010.

TSA also requests an additional \$30M for Other Vetting. The Vetting Operations program mission is to provide appropriate screening and credentialing of individuals requesting or requiring special access to US transportation and other critical infrastructure. To meet this mission, this program increase is targeted at enhancing and stabilizing the infrastructure necessary to perform vetting operations on populations that access the most critical infrastructure.

## D. Program Performance Highlights, Resources and Alignment of Strategic Goals

For each major program, the performance goal, alignment to DHS goals and objectives, total dollars, full time equivalent (FTE), and main performance measure(s) are shown below. For many of the programs more performance information may be found on the Office of Management and Budget's (OMB) web site Expectmore.gov (program names may differ slightly from those used in this document).

|  |         |             |             |             |             |             |

| <b>Measure:</b> Passenger security screening assessment results   |         |            |         |         |         |         |
| <b>Description of Measure:</b> This measures the percentage of the time that passenger Transportation Security Officers (TSOs) correctly identify prohibited material during covert tests, in order to reduce the probability of a successful terrorist or other criminal attack to the air transportation system. The target and actual results are classified for security reasons and are not releasable to the public at this time. Comment: change from STEA to ASAP has improved data quality, new baseline being developed in line with OMB requests (data now available semi annually only) |         |            |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005    | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | Classified | SSI     | SSI     | SSI     | SSI     |
| <b>Actual:</b>  | None    | Classified | SSI     | SSI     | N/A     | N/A     |

|  |         |         |          |         |         |         |
|--|---------|---------|----------|---------|---------|---------|
| <b>Measure:</b> Percent of air carriers in compliance with leading security indicators.  |         |         |          |         |         |         |
| <b>Description of Measure:</b> This measure identifies overall air carrier compliance with leading security indicators. A leading security indicator is a key indicator, that, when taken into account, may be predictive of the overall security posture of an air carrier (these critical indicators are derived from criteria based on factors like a single point of failure, operational vs. administrative, human factor related). The indicators are guided by security rules, regulations, and standards. Identifying compliance with the key indicators assesses air carrier vulnerabilities. Assessing air carrier vulnerabilities is part of an overall risk reduction process, as in measuring compliance with standards as a strong indicator of system security. |         |         |          |         |         |         |

### Additional Measures

|  |  |  |  |  |  |  |
|--|--|--|--|--|--|--|
| <b>Measure:</b> Percentage of screeners scoring above the national standard level of Threat Image Projection (TIP) performance   |  |  |  |  |  |  |
| <b>Description of Measure:</b> First sentence deleted. TSA established a standard level of TIP performance. The measure reflects the percentage of screeners performing above the standard. Transportation Security Officers (TSOs) receive ongoing training and performance assessments to ensure that their skills are being developed to address the variety of threats that may be presented. As threats change and evolve, the TIP program develops new images and training to address the expanded needs of the TSO workforce, allowing TSA to maintain a high level of screener performance that ensures aviation security. As threats change and evolve, the TIP program develops new images and training to address the expanded needs of the TSO workforce, allowing TSA to maintain a high level of screener performance that ensures aviation security. The target |  |  |  |  |  |  |

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| and actual data for this measure is Sensitive Security Information (SSI). |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | SSI     | SSI     | SSI     | SSI     | SSI     |
| <b>Actual:</b>  | None    | SSI     | SSI     | SSI     | N/A     | N/A     |

|   |          |         |         |         |         |         |
|---|----------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Cost per bag screened   |          |         |         |         |         |         |
| <b>Description of Measure:</b> This measure will suggest the system - wide human resources cost of screening a bag based on activity based costing information at a sample of airports. |          |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2005  | FY 2006 | FY 2007 | FY 2008 | FY 2009 | FY 2010 |
| <b>Target:</b>  | Baseline | \$1.64  | \$1.44  | \$1.64  | \$1.62  | \$1.61  |
| <b>Actual:</b>  | \$3.44   | \$1.64  | \$1.44  | N/A     | N/A     | N/A     |

|   |          |         |         |         |         |         |
|---|----------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Cost per passenger screened   |          |         |         |         |         |         |
| <b>Description of Measure:</b> This measure will suggest the system - wide human resources cost of screening a person based on the total salary and benefits costs of the TSO workforce and the number of people who pass completely through walk - through - metal - detectors at airport screening checkpoints. |          |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2005  | FY 2006 | FY 2007 | FY 2008 | FY 2009 | FY 2010 |
| <b>Target:</b>  | Baseline | \$1.89  | \$1.97  | \$1.89  | \$1.87  | \$1.85  |
| <b>Actual:</b>  | \$2.47   | \$1.89  | \$1.97  | N/A     | N/A     | N/A     |

|  |          |         |         |         |         |         |
|--|----------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Improve protection of aircraft cockpits through re-qualification certification of FFDOs.   |          |         |         |         |         |         |
| <b>Description of Measure:</b> Measures the total percentage of FFDOs who attended required bi - annual re - qualification firearm certification training. Note: Re-qualifications are measured per calendar quarter and only reported at the end of each quarter. |          |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2006  | FY 2007 | FY 2008 | FY 2009 | FY 2010 | FY 2011 |
| <b>Target:</b>   | Baseline | 90%     | 93.5%   | 94%     | 94.55%  | 95.0%   |
| <b>Actual:</b>   | 97.75%   | 93.2%   | N/A     | N/A     | N/A     | N/A     |

|  |         |         |         |         |         |         |
|--|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Level of the Customer Satisfaction Index (CSI - A) for Aviation Operations.  |         |         |         |         |         |         |
| <b>Description of Measure:</b> The CSI - A is a composite index incorporating data on security confidence, passenger surveys, and compliments/complaint data on screener performance. TSA aspires to provide effective screening operations with minimum disruption to the traveling public. CSI - A is scaled where 0 is very dissatisfied, 25 is dissatisfied, 75 is satisfied, and 100 is very satisfied. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>   | None    | None    | 81      | 82      | 83      | 83.5    |
| <b>Actual:</b>   | None    | 78      | 81      | 81      | N/A     | N/A     |

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of countries with direct flights to the U.S. who are provided aviation security.  |         |         |         |         |         |         |
| <b>Description of Measure:</b> The measure reports the amount of interaction the United States has with countries providing Last - Point - of - Departure (LPD) service to the US. An LPD country is a country with at least one port providing direct traffic to a specific destination - usually a foreign airport with direct passenger and/or cargo flights to a US destination airport. The US interacts with countries providing LPD service with the goal to share aviation security policy and practices. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2008 | FY 2009 | FY 2010 | FY 2011 | FY 2012 | FY 2013 |
| <b>Target:</b>  | 100%    | 100%    | 100%    | 100%    | 100%    | 100%    |
| <b>Actual:</b>  | N/A     | N/A     | N/A     | N/A     | N/A     | N/A     |

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of countries/territories with no direct flights to the U.S. who are provided aviation security assistance.  |         |         |         |         |         |         |
| <b>Description of Measure:</b> The measure reports the amount of interaction (output) the United States has with countries with no direct service to the US in the area of aviation security policy and practices at the national or airport level. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2008 | FY 2009 | FY 2010 | FY 2011 | FY 2012 | FY 2013 |
| <b>Target:</b>  | 45%     | 50%     | 55%     | 60%     | 65%     | 70%     |
| <b>Actual:</b>  | N/A     | N/A     | N/A     | N/A     | N/A     | N/A     |

|  |         |         |         |         |         |         |
|--|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of eligible flight crew members with Federal Flight Deck Officer (FFDO) Certification.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure pertains to the Federal Flight Deck Officer (FFDO) program, a Flight Crew Training program administered by the TSA/OLE - FAMS. The specific metric is the percentage of eligible flight crew members that have been trained and deputized as FFDOs, and who may therefore provide a final, deadly - force deterrent to an attempted hostile breach of the flight deck that could result in the military interdiction of a flight, and the loss of an aircraft, its passengers, and crew. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2006 | FY 2007 | FY 2008 | FY 2009 | FY 2010 | FY 2011 |
| <b>Target:</b>   | 9%      | 10.5%   | 12%     | 13.5%   | 15%     | 16.5%   |
| <b>Actual:</b>   | 9%      | 10.8%   | N/A     | N/A     | N/A     | N/A     |

|  |         |          |          |          |          |          |
|--|---------|----------|----------|----------|----------|----------|
| <b>Program: Surface Transportation Security</b>  |         |          |          |          |          |          |
| <b>Performance Goal:</b> Improve the protection of the surface transportation system while ensuring the freedom of movement for people and commerce. |         |          |          |          |          |          |
| <b>DHS strategic objectives supported and % allocation of activities:</b> 3.2 (100%)   |         |          |          |          |          |          |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005  | FY 2006  | FY 2007  | FY 2008  | FY 2009  |
| <b>\$ Thousands</b>  | None    | \$36,000 | \$52,226 | \$40,785 | \$46,613 | \$37,000 |
| <b>FTE</b>   | None    | 291      | 277      | 226      | 326      | 230      |

### Performance Plan Measures

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percentage of Mass Transit agencies that are in full compliance with industry agreed upon standards to improve security.  |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure is designed to elevate the security posture and readiness throughout the mode by advancing implementation and sustainment of baseline security measures tailored to the operating environment and characteristics of mass transit and passenger rail systems. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2008 | FY 2009 | FY 2010 | FY 2011 | FY 2012 | FY 2013 |
| <b>Target:</b>  | 50%     | 60%     | 75%     | 80%     | 85%     | 90%     |
| <b>Actual:</b>  | N/A     | N/A     | N/A     | N/A     | N/A     | N/A     |

|  |         |         |         |         |         |         |
|--|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent reduction in risk from toxic inhalation hazard (TIH) bulk cargoes in rail transportation.  |         |         |         |         |         |         |
| <b>Description of Measure:</b> Using risk management principles, TSA have prioritized its efforts to prevent the use of a loaded TIH railcar as a weapon of mass effect. This risk is reduced by minimizing the aggregate number of hours that loaded TIH cars are unattended in high threat urban areas (HTUA). |         |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2008 | FY 2009 | FY 2010 | FY 2011 | FY 2012 | FY 2013 |
| <b>Target:</b>   | 50%     | 55%     | 61%     | 67%     | 74%     | 81%     |
| <b>Actual:</b>   | N/A     | N/A     | N/A     | N/A     | N/A     | N/A     |

### Additional Measures

|   |          |         |         |         |         |         |
|---|----------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Number of rail inspections conducted per 1000 inspector hours.  |          |         |         |         |         |         |
| <b>Description of Measure:</b> Compliance/Surface: This measure illustrates the efficiency of inspection activities by quantifying the number of inspections conducted per inspector within a certain time frame. It is important to note that surface transportation inspection processes and requirements are continually evolving and maturing. As a result, this may require adjustments to future targets. |          |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2006  | FY 2007 | FY 2008 | FY 2009 | FY 2010 | FY 2011 |
| <b>Target:</b>  | Baseline | 53.4    | 60      | 62      | 64      | 66      |
| <b>Actual:</b>  | 14       | 53.4    | N/A     | N/A     | N/A     | N/A     |

|  |          |         |         |         |         |         |
|--|----------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percentage of applicable passenger and mass transit rail systems having undergone a Security Directive Review (rail).  |          |         |         |         |         |         |
| <b>Description of Measure:</b> A security directive review is an evaluation of a system's security posture with respect to TSA - issued security directives. As additional security directives and regulations are promulgated in other modes, it is expected that these compliance reviews will incorporate other modes as well. 100% of applicable systems will be completed by FY08. Systems reviewed in FY 06 - 08 will be revisited at a rate of 33% per year in FYs 09 - 12. |          |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2006  | FY 2007 | FY 2008 | FY 2009 | FY 2010 | FY 2011 |
| <b>Target:</b>   | Baseline | 72%     | 100%    | 100%    | 100%    | 100%    |
| <b>Actual:</b>   | 55.7%    | 72%     | N/A     | N/A     | N/A     | N/A     |

|  |                 |         |         |         |         |         |
|--|-----------------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Risk reduced by Air Cargo programs and regulations.  |                 |         |         |         |         |         |
| <b>Description of Measure:</b> The risk reduction index assesses the capabilities of air cargo programs in reducing vulnerabilities in the air cargo supply chain to multiple threat case scenarios and evaluating the effectiveness of Air Cargo's countermeasures- programs, policies and regulations – in reducing the risks posed to the air cargo supply chain. |                 |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2008         | FY 2009 | FY 2010 | FY 2011 | FY 2012 | FY 2013 |
| <b>Target:</b>   | (Baseline Year) | TBD     | TBD     | TBD     | TBD     | TBD     |
| <b>Actual:</b>   | N/A             | N/A     | N/A     | N/A     | N/A     | N/A     |

|  |         |         |           |           |           |           |
|--|---------|---------|-----------|-----------|-----------|-----------|
| <b>Program: Transportation Security Support</b>  |         |         |           |           |           |           |
| <b>Performance Goal:</b> Improve the receipt, assessment, and distribution of intelligence information related to transportation security. |         |         |           |           |           |           |

### Performance Plan Measures

|  |  |  |  |  |  |  |
|--|--|--|--|--|--|--|
| <b>Measure:</b> Level of customer satisfaction with the intelligence products provided.  |  |  |  |  |  |  |
| <b>Description of Measure:</b> This measure shows the overall level of customer satisfaction with intelligence products produced and disseminated by TSA - OI. TSA - OI sought to develop a baseline in FY 2006, but the office experienced data collection challenges. In early FY 2007 the office refined the questions and added demographic information to the survey, which is in the process of being rolled - out more widely with all production. Feedback is apt to be spotty in the near - term; over the longer term, the survey administration method may also change from the |  |  |  |  |  |  |

|---|----------|---------|---------|---------|---------|---------|
| current email/paper - based process to enhance speed of analysis and to improve response rates. |          |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2006  | FY 2007 | FY 2008 | FY 2009 | FY 2010 | FY 2011 |
| <b>Target:</b>  | Baseline | 85%     | 85%     | 90%     | 90%     | 95%     |
| <b>Actual:</b>  |          | 89.6%   | N/A     | N/A     | N/A     | N/A     |

### Additional Measures

|   |          |         |         |         |         |         |
|---|----------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Level of customer satisfaction with user support resolution.  |          |         |         |         |         |         |
| <b>Description of Measure:</b> Portions of the TSS program tracks customer satisfaction metrics through follow - up SPOC field surveys that are based on a 5.0 Likert scale. These monthly metrics are a compilation of daily follow - up calls in response to user support issues. The questions include responses based on promptness, courteousness, technical service, and problem solving. Using a response of 1 as the lowest (customer dissatisfaction) and 5 as the highest (customer satisfaction), TSA is able to identify potential areas for improvement and areas where support is satisfactory. |          |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2006  | FY 2007 | FY 2008 | FY 2009 | FY 2010 | FY 2011 |

### Plan Measures

|  |  |
|--|--|
| <b>Measure:</b> Percent of individuals undergoing a Transportation Threat Assessment and Credentialing (TTAC) security threat assessment (STA) |  |
| <b>Description of Measure:</b> This measure indicates the percentage of TTAC's total defined   |  |

population that is receiving an STA. Thorough vetting will decrease vulnerabilities of sensitive transportation systems by limiting access of potentially dangerous individuals who are identified by TTAC vetting and credentialing programs. The populations currently include international flight crews, aviation workers, hazardous material drivers, and non - US citizens receiving flight instruction at the Federal Aviation Administrations (FAA) certified flight schools in the US and abroad. In the future, TTAC programs will also cover domestic airline passengers, surface and maritime workers.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## FEDERAL LAW ENFORCEMENT TRAINING CENTER SALARIES AND EXPENSES

### I. Appropriation Overview

#### A. Mission Statement for Salaries and Expenses:

We train those who protect our homeland.

#### B. Budget Activities:

The Federal Law Enforcement Training Center (FLETC) is the leading service provider for federal law enforcement training. The FLETC serves as an interagency law enforcement training organization for over 80 Federal agencies with personnel located throughout the United States and its territories. FLETC's personnel conduct instructional programs for basic law enforcement recruits and some advanced training based on agency requests. The FLETC also provides the necessary facilities, equipment, and support services for conducting advanced, specialized and refresher training for Federal law enforcement personnel.

The FLETC provides services to State, local, international and other Federal law enforcement agencies with related law enforcement missions on a space-available basis. The FLETC also provides export training conducted at other locations when the programs being conducted do not require the use of certain specialized facilities and when a geographical concentration of personnel is identified.

Consolidation of law enforcement training permits the Federal Government to emphasize training program excellence, shared experiences in cooperative training and cost-effectiveness. Professional instruction and practical application provide students with the skills and knowledge necessary to meet the demanding challenges of a Federal law enforcement career. New Federal hires and journey level personnel learn not only the responsibilities of a law enforcement officer and agent, but through interaction with students from many other agencies, they also become acquainted with the missions and duties of their colleagues. This interaction provides the foundation for a more cooperative Federal law enforcement effort.

FLETC's Partner Organizations have input regarding training issues. Representatives from these agencies take part in curriculum review and development conferences. This relationship is characteristic of a "true partnership," which is responsive to the training mission.

### **C. Budget Request Summary:**

Excluding emergency funding provided in P.L 110-161, the Federal Law Enforcement Training Center requests 1,136 positions, 1,106 FTE and \$230,670,000. The total adjustments-to-base is -7 positions, -5 FTE and \$1,308,000. The program changes include 59 positions, 55 FTE and \$8,286,000 for:

- Improving Border Security (55 positions, 53 FTE, and \$10,000,000)
- Practical Application/Counter Terrorism Operations Training Facility (4 positions, 2 FTE, and \$1,102,000)
- TRAIN21 (-\$2,816,000)

| Total Change 2008-2009       | 52           | 50           | -7,406           |

The above table includes emergency funding of \$17.000 million provided in P.L. 110-161 for this activity. The FY 2009 Budget Request is \$230.670 million. Excluding emergency funds provided, the adjustment-to-base is an increase of \$1.308 million which includes the transfer of FLETA, elimination of FLETC's Washington Office, management efficiency savings, annualization and pay and non-pay inflation. Program changes include an increase of 55 positions, 53 FTE and \$10.000 million to improve Border Security, an increase of \$1.102 million, 4 positions and 2 FTE for the Practical Application/Counter Terrorism Operations Training Facility and a decrease of \$2.816 million for TRAIN21.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

**Law Enforcement Training:** FLETC's services to its three major client groups underscore its homeland security support mission in promoting intergovernmental cooperation in law enforcement preparedness.

*Federal* – The FLETC provides law enforcement training to over 80 Federal agencies having enforcement responsibilities. We prepare new and experienced law enforcement professionals to fulfill their responsibilities in a safe manner and at the highest level of proficiency. The average basic student spends 12 weeks training at the FLETC, and receives a combination of classroom instruction and hands-on practical exercise training in all phases of law enforcement from firearms and high-speed vehicle operations to legal case instructions and defendant interview techniques. Students must apply their classroom knowledge during exercises that simulate typical situations encountered on the job. To add realism these exercises often involve contract role players who act as victims, witnesses or suspects. Each of the basic programs provides core knowledge essential for new federal officers or agents to carry out their duties in a safe and efficient manner.

In addition to basic training, the FLETC offers advanced and specialized training for career-long law enforcement preparation in subjects that are common to two or more of its Partner Organizations. Examples include Antiterrorism Port Security Boat Operations, Cyber Counterterrorism Investigator

Training, Covert Electronics Surveillance, Critical Infrastructure Protection, Financial Forensics Techniques, Intelligence Analysts Training and Land Transportation Antiterrorism Training.

*State and local* – The National Center for State and Local Law Enforcement Training trains personnel from state and local law enforcement agencies in advanced topics designed to develop specialized law enforcement skills. The participants benefit from Federal expertise and specialized training available and receive instruction specific to their needs. Additionally, the program offerings are in subjects not generally available from state and local police academies or colleges and universities.

*International* – In the interest of combating global crime and protecting U.S. interests abroad, the FLETC offers a range of training programs to foreign law enforcement agencies. Training focuses on three main areas: the U.S. Government's Law and Democracy Program, the Antiterrorism Assistance Program, and the International Law Enforcement Academy operations in Europe, Asia, Africa and other regions in the world. In cooperation with the Department of State, the FLETC operates two International Law Enforcement Academies: Gaborone, Botswana and San Salvador, El Salvador. Additionally, the FLETC provides training and technical assistance at locations worldwide in collaboration with and support of the US Embassies located within country.

#### Description of Item

To fund additional instructor cadre and training cost for 450 additional CBP Officers, 1,700 additional CBP Border Patrol Agents, 508 additional ICE detention personnel, and 874 additional ICE investigators to improve border security.

#### Justification

FLETC's mission is to train those who protect our Homeland, which directly supports this initiative. Increases in law enforcement personnel necessitate additional resources under current shared cost arrangements with DHS customers. Under these costs arrangements, FLETC pays the basic training tuition, half of the instructor costs and overhead costs. The agencies pay the other half of the instructor costs, along with student food and lodging costs. This increase is based on tuition and instructor costs per student. Instructor requirements are based on direct contact hours and the number of programs to be conducted in support of increased training requirements. Tuition costs include the materials needed to conduct each program such as publications, role players, crime scene kits, ammunition, fuel and oil.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

This initiative supports Strategic Goal 4 – Build a Nimble, Effective Emergency Response System and Culture of Preparedness and Strategic Objective 4.2 – Preparedness: Achieves Outcome of Institutionalize a National Culture of Preparedness.

**Program Increase 2:** Practical Application/Counterterrorism Operations Training Facility (PA/CTOTF)

Strategic Goal(s) & Objective(s): Strategic Goal 4: Build a Nimble, Effective Emergency Response System and Culture of Preparedness  
Strategic Objective 4.2: Preparedness: Achieves outcome of: Institutionalize a National Culture of Preparedness.

PPA: Law Enforcement Training

Program Increase: Positions 4 FTE 2 Dollars \$1,102

Description of Item

The \$1.102 million request will provide for training instructors and maintenance for the completed portions of the PA/CTOTF. Four new instructors will develop, coordinate, facilitate and train in the Intermodal and International training sites. Projected training programs include Protective Service Operations, Tactics for Flying Armed, Weapons of Mass Destruction, Hazmat, Threat Response Driving, Urban Tactics, Emergency Response Tactics, High Risk Vehicle Stops/Patrol and interactive scenario based training.

PA/CTOTF supports new program requirements by providing realistic training facilities. The new training facility consists of a 220 acre site dedicated to providing the “hands-on” training necessary to meet the expanding needs of law enforcement in the post 9/11 environment.

PA/CTOTF is composed of five training environments: international, intermodal, urban, suburban and rural – all designed to replicate both foreign and domestic settings. It will offer a variety of training venues such as apartments, row houses, neighborhoods, Federal buildings, roadways and modes of public transportation.

Justification

The PA/CTOTF will significantly improve the FLETC training facilities which serve a multitude of Federal, state, local and international law enforcement agencies. Through their law enforcement efforts, the agencies detect, deter and mitigate acts of terrorism and criminal activity, as well as respond to other emergencies. This facility will correct limitations and deficiencies in providing adequate practical application and counterterrorism training by recreating environments where law enforcement officers are likely to encounter their enemies and increase the probability of survival and aid in their mission of guarding our homeland.

Impact on Performance (Relationship of Increase to Strategic Goals)

The PA/CTOTF will enable the FLETC and its Partner Organizations to support the Department of Homeland Security's Domestic Counterterrorism mission area and DHS Strategic Goal #4 – Build a nimble, effective emergency response system and culture of preparedness.

**Program Decrease 1:**                    TRAIN21

Strategic Goal(s) & Objective(s): Strategic Goal 4: Build a Nimble, Effective Emergency Response System and Culture of Preparedness  
Strategic Objective 4.2: Preparedness: Achieves outcome of: Institutionalize a National Culture of Preparedness.

Description of Item

TRAIN21 is an improved training system designed to enhance all FLETC training and better prepare students to manage and exploit information and technology to prevent, deter, detect and respond to criminal and terrorist activity.

Justification

The program decrease reflects the Department's focus on improving border security. The Department plans to hire additional Border Patrol agents, CBP officers, and ICE agents.

Impact on Performance (Relationship of Increase to Strategic Goals)

FLETC will still be able to effectively provide training necessary to combat the ever-changing face of criminals and terrorists.

**Program Transfer:**

Accreditation

Strategic Goal(s) & Objective(s): Strategic Goal 2: Prevention - Detect, deter and mitigate threats to our homeland  
Strategic Objective 2.4: Coordinate national and international policy, law enforcement and other actions to prepare for and prevent terrorism

Description of Item

The Office of Federal Law Enforcement Training Accreditation (FLETA) is transferred to Department of Homeland Security' Chief Human Capital Office (CHCO).

Justification

FLETA will be under CHCO for budgetary and management purposes. This transfer will improve Federal law enforcement training because it will establish independence for FLETA, and help bring autonomy for FLETA within the law enforcement training community. Furthermore, the Chief Learning Officer (CLO), under CHCO, is responsible for training the Department's workforce and by collocating FLETA's, who's main function is to set law enforcement training standards, FLETA will benefit from synergies harnessed by the CLO.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Law Enforcement Training Center  
Justification of Proposed Changes in Salaries and Expenses  
Appropriation Language**

For necessary expenses of the Federal Law Enforcement Training Center, including materials and support costs of Federal law enforcement basic training; purchase of not to exceed 117 vehicles for police-type use and hire of passenger motor vehicles; expenses for student athletic and related activities; the conduct of and participation in firearms matches and presentation of awards; public awareness and enhancement of community support of law enforcement training; room and board for student interns; a flat monthly reimbursement to employees authorized to use personal mobile phones for official duties; and services as authorized by section 3109 of title 5, United States Code; [\$238,076,000] **\$230,670,000** of which up to [\$48,111,000] **\$53,320,000** for materials and support costs of Federal law enforcement basic training shall remain available until September 30, [2009] **2010**; [of which \$300,000 shall remain available until expended for Federal law enforcement agencies participating in training accreditation, to be distributed as determined by the Federal Law Enforcement Training Center for the needs of participating agencies; and] of which not to exceed \$12,000 shall be for official reception and representation expenses: *Provided*, [That of the amount provided under this heading, \$17,000,000 is designated as described in section 5 (in the matter preceding division A of this consolidated Act): *Provided further*,] That the Center is authorized to obligate funds in anticipation of reimbursements from agencies receiving training sponsored by the Center, except that total obligations at the end of the fiscal year shall not exceed total budgetary resources available at the end of the fiscal year: *Provided further*, That section 1202(a) of Public Law 107-206 (42 U.S.C. 3771 note) as amended by Public Law 109-295 (120 Stat. 1374) is further amended by striking “December 31, 2007” and inserting “December 31, [2010] **2011**”. (Department of Homeland Security Appropriations Act [2008] **2009**)

#### **Explanation of Changes:**

The Accreditation program is being transferred to the DHS, Chief Human Capital Officer in the President’s FY 2009 budget.

A request to extend Public Law 107-206 as amended by Public Law 109-295 until December 31, 2011 is requested at this time.

### PPA Mission Statement

We train those who protect our homeland.

### Summary Justification and Explanation of Changes

|                              | FY 2007<br>Actual | FY 2008<br>Enacted | FY 2009<br>Request | 2008 to 2009<br>Change |
|------------------------------|-------------------|--------------------|--------------------|------------------------|
| <b>Salaries and Benefits</b> | \$106,861         | \$110,442          | \$123,586          | \$13,144               |

Salaries and Benefits includes costs for 1,106 FTEs. The FY 2009 request includes an increase of \$2,402,000 for pay inflation, \$1,129,000 for annualization, a decrease of \$480,000 for Washington Office salaries, a decrease of \$794,000 for transfer of FLETA, a net program increase of \$6,757,000 and an increase of \$4,130,000 due to FY 2008 carryover and non-recure

|               | FY 2007<br>Actual | FY 2008<br>Enacted | FY 2009<br>Request | 2008 to 2009<br>Change |
|---------------|-------------------|--------------------|--------------------|------------------------|
| <b>Travel</b> | \$6,096           | \$6,639            | \$7,889            | \$1,250                |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2009 request includes increases of \$133,000 in non-pay inflation, a decrease of \$143,000 for management efficiencies, a reduction of \$162,000 for transfer of FLETA, \$566,000 in net program increases and an increase of \$856,000 due to FY 2008 carryover and non-recur spending.

|                                 | FY 2007<br>Actual | FY 2008<br>Enacted | FY 2009<br>Request | 2008 to 2009<br>Change |
|---------------------------------|-------------------|--------------------|--------------------|------------------------|
| <b>Transportation of Things</b> | \$1,112           | \$1,137            | \$989              | (\$148)                |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2009 request includes increases of \$23,000 in non-pay inflation, a decrease of \$24,000 for management efficiencies, \$1,000 in net program increases and a reduction of \$148,000 due to FY 2008 carryover and non-recur spending.

|                   | FY 2007<br>Actual | FY 2008<br>Enacted | FY 2009<br>Request | 2008 to 2009<br>Change |
|-------------------|-------------------|--------------------|--------------------|------------------------|
| <b>Other Rent</b> | \$214             | \$219              | \$183              | (\$36)                 |

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2009 request includes an increase of \$4,000 in non-pay inflation, a decrease of \$5,000 for management efficiencies, a reduction of \$7,000 for transfer of FLETA and a reduction of \$28,000 due to FY 2008 carryover spending.

|  | FY 2007<br>Actual | FY 2008<br>Enacted | FY 2009<br>Request | 2008 to 2009<br>Change |
|--|-------------------|--------------------|--------------------|------------------------|
| <b>Communication, Utilities, and miscellaneous</b> | \$8,988           | \$9,490            | \$8,833            | (\$657)                |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2009 request includes increases of \$190,000 in non-pay inflation, a decrease of \$205,000 for management efficiencies, a decrease of \$250,000 for the Washington Office lease, \$218,000 in net program increases and a reduction of \$610,000 due to FY 2008 carryover and non-recur spending.

|                 | <b>FY 2007</b> | <b>FY 2008</b> | <b>FY 2009</b> | <b>2008 to 2009</b> |

|                       | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Other Services</b> | <b>\$3,863</b> | <b>\$4,668</b> | <b>\$5,825</b> | <b>\$1,157</b>      |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2009 request includes increases of \$93,000 in non-pay inflation, a decrease of \$101,000 for management efficiencies, a reduction of \$308,000 for transfer of FLETA, \$523,000 in net program increases and an increase of \$950,000 due to FY 2008 carryover and non-recur spending.

|  | <b>FY 2007</b>  | <b>FY 2008</b>  | <b>FY 2009</b>  | <b>2008 to 2009</b> |
|--|-----------------|-----------------|-----------------|---------------------|
|  | <b>Actual</b>   | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>       |
| <b>Operation &amp; maintenance of facilities</b> | <b>\$29,677</b> | <b>\$31,346</b> | <b>\$30,704</b> | <b>(\$642)</b>      |

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2009 request includes an increase of \$626,000 in non-pay inflation, a decrease of \$676,000 for management efficiencies, \$886,000 in net program increases and a reduction of \$1,478,000 due to FY 2008 carryover and non-recur spending.

|                     | <b>FY 2007</b> | <b>FY 2008</b> | <b>FY 2009</b> | <b>2008 to 2009</b> |
|---------------------|----------------|----------------|----------------|---------------------|
|                     | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Medical Care</b> | <b>\$2,884</b> | <b>\$3,180</b> | <b>\$3,454</b> | <b>\$274</b>        |

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2009 request includes an increase of \$64,000 in non-pay inflation, a decrease of \$69,000 for management efficiencies, \$173,000 in net program increases and an increase of \$106,000 due to FY 2008 carryover and non-recur spending.

|   | <b>FY 2007</b> | <b>FY 2008</b> | <b>FY 2009</b> | <b>2008 to 2009</b> |
|---|----------------|----------------|----------------|---------------------|
|   | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Operation &amp; Maintenance of equipment</b> | <b>\$5,704</b> | <b>\$5,898</b> | <b>\$5,269</b> | <b>(\$629)</b>      |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2009 request includes an increase of \$117,000 in non-pay inflation, a decrease of \$127,000 for management efficiencies, \$43,000 in net program increases and a reduction of \$662,000 due to FY 2008 carryover and non-recur spending.

|   | <b>FY 2007</b> | <b>FY 2008</b> | <b>FY 2009</b> | <b>2008 to 2009</b> |
|---|----------------|----------------|----------------|---------------------|
|   | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Subsistence &amp; Support of Persons</b> | <b>\$794</b>   | <b>\$845</b>   | <b>\$735</b>   | <b>(\$110)</b>      |

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. The FY 2009 request includes an increase of \$17,000 in non-pay inflation, a decrease of \$18,000 for management efficiencies, \$1,000 net program increase and a reduction of \$110,000 due to FY 2008 carryover spending.

|                                 | <b>FY 2007</b>  | <b>FY 2008</b>  | <b>FY 2009</b>  | <b>2008 to 2009</b> |
|---------------------------------|-----------------|-----------------|-----------------|---------------------|
|                                 | <b>Actual</b>   | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>       |
| <b>Supplies &amp; materials</b> | <b>\$19,817</b> | <b>\$21,055</b> | <b>\$23,091</b> | <b>\$2,036</b>      |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2009 request includes increases of \$420,000 in non-pay inflation, a decrease of \$454,000 for management efficiencies, a decrease of \$17,000 for transfer of FLETA, \$1,195,000 in net program increases and an increase of \$892,000 due to FY 2008 carryover and non-recur spending.

|                  | <b>FY 2007</b>  | <b>FY 2008</b>  | <b>FY 2009</b>  | <b>2008 to 2009</b> |
|------------------|-----------------|-----------------|-----------------|---------------------|
|                  | <b>Actual</b>   | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>       |
| <b>Equipment</b> | <b>\$29,551</b> | <b>\$30,216</b> | <b>\$26,042</b> | <b>(\$4,174)</b>    |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2009 request includes increases of \$603,000 in non-pay inflation, a decrease of \$651,000 for management efficiencies, a decrease of \$2,000 for transfer of FLETA, a net program reduction of \$2,156,000 and a reduction of \$1,968,000 due to FY 2008 carryover and non-recur spending.

|                              | <b>FY 2007</b> | <b>FY 2008</b> | <b>FY 2009</b> | <b>2008 to 2009</b> |
|------------------------------|----------------|----------------|----------------|---------------------|
|                              | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Land &amp; Structures</b> | <b>\$6,301</b> | <b>\$123</b>   | <b>\$107</b>   | <b>(\$16)</b>       |

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2009 request includes an increase of \$2,000 in non-pay inflation, a decrease of \$3,000 for management efficiencies, a net program increase of \$1,000 and a reduction of \$16,000 due to FY 2008 carryover.

|                  | <b>FY 2007</b> | <b>FY 2008</b> | <b>FY 2009</b> | <b>2008 to 2009</b> |
|------------------|----------------|----------------|----------------|---------------------|
|                  | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Indemnity</b> | <b>\$300</b>   | <b>\$307</b>   | <b>\$237</b>   | <b>(\$70)</b>       |

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The FY 2009 request includes an increase of \$6,000 in non-pay inflation, a decrease of \$7,000 for management efficiencies and a reduction of \$69,000 due to FY 2008 carryover.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## FEDERAL LAW ENFORCEMENT TRAINING CENTER ACQUISITION, CONSTRUCTION, IMPROVEMENTS AND RELATED EXPENSES

### I. Appropriation Overview

#### **A. Mission Statement for Appropriation Name:**

We train those who protect our homeland.

#### **B. Budget Activities:**

The Federal Law Enforcement Training Center (FLETC) is the leading service provider for federal law enforcement training. The FLETC serves as an interagency law enforcement training organization for over 80 Federal agencies with personnel located throughout the United States and its territories. FLETC's personnel conduct instructional programs for basic law enforcement recruits and some advanced training based on agency requests. The FLETC also provides the necessary facilities, equipment, and support services for conducting advanced, specialized and refresher training for Federal law enforcement personnel.

The FLETC provides services to State, local, international and other Federal law enforcement agencies with related law enforcement missions on a space-available basis. The FLETC also provides export training conducted at other locations when the programs being conducted do not require the use of certain specialized facilities and when a geographical concentration of personnel is identified.

Consolidation of law enforcement training permits the Federal Government to emphasize training program excellence, shared experiences in cooperative training and cost-effectiveness. Professional instruction and practical application provide students with the skills and knowledge necessary to meet the demanding challenges of a Federal law enforcement career. New Federal hires and journey level personnel learn not only the responsibilities of a law enforcement officer and agent, but through interaction with students from many other agencies, they also become acquainted with the missions and duties of their colleagues. This interaction provides the foundation for a more cooperative Federal law enforcement effort.

FLETC's Partner Organizations have input regarding training issues. Representatives from these agencies take part in curriculum review and development conferences. This relationship is characteristic of a "true partnership," which is responsive to the training mission.

#### **C. Budget Request Summary:**

Excluding emergency funding provided in P.L. 110-161, the Federal Law Enforcement Training Center requests \$43,456,000. Non-pay adjustment-to-base is \$3,320,000 for non-recur funding. The program change is \$186,000 for:

- Practical Application/Counter Terrorism Operations Training Facility (\$186,000)

The above table includes emergency funding of \$4.000 million provided in P.L. 110-161 for this activity. The FY 2009 budget request is \$43.456 million. Excluding emergency funds provided, the adjustment-to-base is a reduction of \$3.320 million for non-recur funding. The program change is an increase of \$0.186 million for the Practical Application/Counter Terrorism Operations Training Facility.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

**Law Enforcement Training:** FLETC's services to its three major client groups underscore its homeland security support mission in promoting intergovernmental cooperation in law enforcement preparedness.

*Federal* – The FLETC provides law enforcement training to over 80 Federal agencies having enforcement responsibilities. We prepare new and experienced law enforcement professionals to fulfill their responsibilities in a safe manner and at the highest level of proficiency. The average basic student spends 12 weeks training at the FLETC, and receives a combination of classroom instruction and hands-on practical exercise training in all phases of law enforcement from firearms and high-speed vehicle operations to legal case instructions and defendant interview techniques. Students must apply their classroom knowledge during exercises that simulate typical situations encountered on the job. To add realism these exercises often involve contract role players who act as victims, witnesses or suspects. Each of the basic programs provides core knowledge essential for new federal officers or agents to carry out their duties in a safe and efficient manner.

In addition to basic training, the FLETC offers advanced and specialized training for career-long law enforcement preparation in subjects that are common to two or more of its Partner Organizations. Examples include Antiterrorism Port Security Boat Operations, Cyber Counterterrorism Investigator Training, Covert Electronics Surveillance, Critical Infrastructure Protection, Financial Forensics Techniques, Intelligence Analysts Training and Land Transportation Antiterrorism Training.

*State and local* – The National Center for State and Local Law Enforcement Training trains personnel from state and local law enforcement agencies in advanced topics designed to develop specialized law enforcement skills. The participants benefit from Federal expertise and specialized training available and receive instruction specific to their needs. Additionally, the program offerings are in subjects generally not available from state and local police academies or colleges and universities.

*International* – In the interest of combating global crime and protecting U.S. interests abroad, the FLETC offers a range of training programs to foreign law enforcement agencies. Training focuses on three main areas: the U.S. Government's Law and Democracy Program, the Antiterrorism Assistance Program, and the International Law Enforcement Academy operations in Europe, Asia, Africa and other regions in the world. In cooperation with the Department of State, the FLETC operates two International Law Enforcement Academies: Gaborone, Botswana and San Salvador, El Salvador. Additionally, the FLETC provides training and technical assistance at locations worldwide in collaboration with and support of the U.S. Embassies located within country.

**Description of Item**

The \$0.186 million request will provide for maintenance for the completed portions of the PA/CTOTF.

PA/CTOTF supports new program requirements by providing realistic training facilities. The new training facility consists of a 220 acre site dedicated to providing the “hands-on” training necessary to meet the expanding needs of law enforcement in the post 9/11 environment.

PA/CTOTF is composed of five training environments: international, intermodal, urban, suburban and rural – all designed to replicate both foreign and domestic settings. It will offer a variety of training venues such as apartments, row houses, neighborhoods, Federal buildings, roadways and modes of public transportation.

**Justification**

The PA/CTOTF will significantly improve the FLETC training facilities which serve a multitude of Federal, state, local and international law enforcement agencies. Through their law enforcement efforts, the agencies detect, deter and mitigate acts of terrorism and criminal activity, as well as respond to other emergencies. This facility will correct limitations and deficiencies in providing adequate practical application and counterterrorism training by recreating environments where law enforcement officers are likely to encounter their enemies and increase the probability of survival and aid in their mission of guarding our homeland.

Impact on Performance (Relationship of Increase to Strategic Goals)

The PA/CTOTF will enable the FLETC and its Partner Organizations to support the Department of Homeland Security's Domestic Counterterrorism mission area and DHS Strategic Goal #4 – Build a nimble, effective emergency response system and culture of preparedness.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Law Enforcement Training Center  
Justification of Proposed Changes in Appropriation Name  
Appropriation Language**

For acquisition of necessary additional real property and facilities, construction, and ongoing maintenance, facility improvements, and related expenses of the Federal Law Enforcement Training Center, [\$50,590,000] **\$43,456,000**, to remain available until expended: *Provided*, [That of the amount provided under this heading, \$4,000,000 is designated as described in section 5 (in the matter preceding division A of this consolidated Act): *Provided further*,] That the Center is authorized to accept reimbursement to this appropriation from government agencies requesting the construction of special use facilities.

# PRACTICAL APPLICATION/COUNTERTERRORISM OPERATIONS TRAINING FACILITY

## 1. Project Description, Justification and Scope

The Practical Application/Counterterrorism Operations Training Facility (PA/CTOTF) will support new training requirements by providing realistic training facilities for many of the training programs conducted at FLETC by Federal, state, local and international law enforcement agencies. The new training facility will consist of a 220 acre site dedicated to providing the “hands-on” training necessary to meet the expanding needs of law enforcement in the post-9/11 environment.

FLETC’s partnership with over 80 Partner Organizations creates an opportunity for a consolidated training environment in which multiple agencies use a centralized location to meet their various training needs. This allows the government to benefit from economies of scale advantages available only from a consolidated law enforcement training facility. FLETC promotes cost-effective training, and will continue this trend, by allowing the government additional opportunities for cost reduction resulting from providing PA/CTOTF capabilities in a single location.

PA/CTOTF will allow trainees to experience the actual environments and confrontations that they will face in the field. The facility will be composed of five training environments: international, intermodal, urban, suburban and rural - all designed to replicate both foreign and domestic settings. It will offer a variety of training venues such as apartments, row houses, neighborhoods, Federal buildings, roadways and modes of public transportation. Scenario and reality based training is one of the most effective tools available and must be supported by realistic facilities. By creating realistic environments, trainees can learn by actually performing tasks similar to those they will encounter when administering their law enforcement duties.

## 2. Significant Changes

No Significant changes.

## 3. Project Schedule

| Other Costs (Maintenance): | \$3,684          | \$2,082           |
|                            |                  |                   |
| Project Total              | \$59,379         | \$57,777          |

## 6. Method of Performance

The Integrated Project Team (IPT) uses earned value techniques and a system driven by Microsoft Project to track planned versus actual cost, schedule, and performance. For the existing contracts, contractors are required to prepare a computerized critical path method (CPM) schedule, often using Gantt charts that include proposed engineering, procurement, construction and testing activities. The CPM schedule covers the time from Contract Award/Notice to Proceed to the Contract completion date. The baseline CPM schedule incorporates labor, equipment and quantity resource data as well as cost information. It is used by the contractor for planning, organizing, and directing the work; reporting progress; and requesting payment for work accomplished. The Contracts Management Office (CMO) works with contractors to update the schedule monthly, or weekly in some cases.

The firm-fixed price nature of PA/CTOTF contracts also serves to manage contractor performance. After 65% of the design stage, the construction manager (CMc) prepares a proposal for the unbid portion of the uncompleted documents, and the Guaranteed Maximum Price (GMP) is negotiated. The CMc agrees to pay for costs exceeding the GMP and are not a result of changes in the contract documents. This helps to minimize schedule/budget variances.

The IPT will transition to using an ANSI/EIA Standard 748 system upon DHS's selection of an Earned Value Management System (EVMS) to be used consistently throughout the agency. The EVMS will track budgeted actual costs (BAC), estimated actual costs (EAC), budgeted cost for work scheduled (BCWS), budgeted cost for work performed (BCWP), actual cost of work performed (ACWP), schedule variance (SV) and cost variance (CV).

| Fiscal Year | Strategic Goal(s) Supported   | Performance Measure  | Actual/baseline (from Previous Year) | Planned Performance Metric (Target) | Performance Metric Results (Actual) |
|-------------|---|--|--------------------------------------|-------------------------------------|-------------------------------------|
| 2008        | DHS 2.4 - Ensure national and international policy, law enforcement and other actions to prepare for and prevent terrorism are coordinated. | Results from a continuous validation survey that will be completed by federal supervisors 8-12 months after graduation will increase by 2% by 2008.  | 71%                                  | 75%                                 | 78%                                 |
| 2008        | DHS 2.4 - Ensure national and international policy, law enforcement and other actions to prepare for and prevent terrorism are coordinated. | Results from a Student Quality Training Survey that will be completed by students after course completion will increase by 4% by 2008  | 62%                                  | 68%                                 | 91%                                 |
| 2008        | DHS 2.4 - Ensure national and international policy, law enforcement and other actions to prepare for and prevent terrorism are coordinated. | The number of students attending training programs at the PA/CTOTF will increase throughout the funding years. The FLETC will 9,700 students in advanced training programs at the PA/CTOTF | TBD                                  | 9700                                | TBD                                 |

### **PPA Mission Statement**

We train those who protect our homeland.

**Summary Justification and Explanation of Changes**

|               | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|---------------------------|----------------------------|----------------------------|--------------------------------|
| <b>Travel</b> | \$70                      | \$83                       | \$83                       | \$0                            |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. There is no change for the FY 2009 request.

|                 | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------|---------------------------|----------------------------|----------------------------|--------------------------------|
| <b>GSA rent</b> | \$239                     | \$242                      | \$242                      | \$0                            |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. There is no change for the FY 2009 request.

|                   | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-------------------|---------------------------|----------------------------|----------------------------|--------------------------------|
| <b>Other Rent</b> | \$4                       | \$5                        | \$5                        | \$0                            |

Other rent includes all payments to a non-Federal source for rental space, land, and structures. There is no change for the FY 2009 request.

|                       | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------------|---------------------------|----------------------------|----------------------------|--------------------------------|
| <b>Other Services</b> | \$836                     | \$979                      | \$979                      | \$0                            |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. There is no change for the FY 2009 request.

|  | <b>FY 2007</b> | <b>FY 2008</b> | <b>FY 2009</b> | <b>2008 to 2009</b> |
|--|----------------|----------------|----------------|---------------------|
|  | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Operation &amp; maintenance of facilities</b> | <b>\$1,914</b> | <b>\$2,462</b> | <b>\$2,648</b> | <b>\$186</b>        |

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2009 request includes a program increase of \$186,000 for maintenance of the Practical Application/Counterterrorism Operations Training Facility.

|                                 | <b>FY 2007</b> | <b>FY 2008</b> | <b>FY 2009</b> | <b>2008 to 2009</b> |
|---------------------------------|----------------|----------------|----------------|---------------------|
|                                 | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Supplies &amp; materials</b> | <b>\$152</b>   | <b>\$178</b>   | <b>\$178</b>   | <b>\$0</b>          |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. There is no change for the FY 2009 request.

|                  | <b>FY 2007</b> | <b>FY 2008</b> | <b>FY 2009</b> | <b>2008 to 2009</b> |
|------------------|----------------|----------------|----------------|---------------------|
|                  | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Equipment</b> | <b>\$1,395</b> | <b>\$1,633</b> | <b>\$1,633</b> | <b>\$0</b>          |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. There is no change for the FY 2009 request.

|                              | <b>FY 2007</b>  | <b>FY 2008</b>  | <b>FY 2009</b>  | <b>2008 to 2009</b> |
|------------------------------|-----------------|-----------------|-----------------|---------------------|
|                              | <b>Actual</b>   | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>       |
| <b>Land &amp; Structures</b> | <b>\$50,952</b> | <b>\$78,912</b> | <b>\$46,688</b> | <b>(\$32,224)</b>   |

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2009 request includes an adjustment to base decrease of \$7,320,000 for non-recur emergency funding and \$24,903,634 for projects to be executed in FY 2008 with prior year funding.

## A. Mission and Description of the Federal Law Enforcement Training Center

The mission of the Federal Law Enforcement Training Center (FLETC) is to train those who protect our homeland. The FLETC is the Federal government's leader for and provider of world-class law enforcement training. The FLETC prepares new and experienced law enforcement professionals to fulfill their responsibilities in a safe manner and at the highest level of proficiency. Training consists of all phases of law enforcement instruction, from firearms and high-speed vehicle operations, to legal case instructions and defendant interview techniques. Through consolidated training the FLETC can respond quickly to emerging training needs, readily adapt to new requirements and focus exclusively on training, which is FLETC's only mission. The FLETC delivers interagency training with optimal efficiency through the government-wide sharing of facilities, equipment and expertise which produces economies of scale available only from a consolidated law enforcement training organization.

The FLETC currently operates four training sites throughout the United States for multiple agency use. FLETC's headquarters and training site in Glynco, Georgia has classrooms, dining and residence halls, and state-of-the-art facilities for firearms, physical techniques, driver, marine and computer based training activities. Two field locations that provide both basic and advanced training are located in Artesia, New Mexico, and Charleston, South Carolina. The fourth training site, Cheltenham, Maryland, provides in-service and re-qualification training for officers and agents in the Washington, DC area. In cooperation with the Department of State, the FLETC operates International Law Enforcement Academies in Gaborone, Botswana and San Salvador, El Salvador. Additionally, the FLETC provides training and technical assistance at locations worldwide in collaboration with and support from the U.S. Embassies located within country.

## B. Major Activities and Key Strategic Issues

FLETC's services to its three major law enforcement client groups underscore its homeland security support mission in promoting intergovernmental cooperation in law enforcement preparedness. The FLETC: 1) serves over 80 Federal Partner Organizations having law enforcement responsibilities; 2) provides training and technical assistance to state and local law enforcement entities; and 3) plans, develops, and presents formal training courses and practical exercise applications related to international law enforcement training in the interest of combating global crime and protecting U.S. interests abroad.

In FY 2008, the FLETC received \$288,666,000 to provide law enforcement training and re-qualification to over 63,000 students from Federal, state and local and International law enforcement agencies.

## **FY 2007 Accomplishments**

- Provided training to over 60,000 law enforcement students (194,000 student weeks).
- Provided increased training to Border Patrol and Immigration and Customs Enforcement (ICE) in support of the Secure Border Initiative (SBI).
- In support of the SBI, completed the new 608-room Dormitory Complex in Artesia, NM.
- In support of the SBI, designed/awarded contract for the Firearms Multi-Purpose Facility in Artesia, NM.

- Completed construction and began operation of a new enclosed and environmentally safe firing range at FLETC's Charleston, South Carolina site.
- Continued the construction of the multi-phased Practical Application/Counterterrorism Operational Training facility.
- The FLETC commenced operation of a new Simulation Laboratory. The facility will integrate technology and simulation into law enforcement training and features an open-bay area for simulators, and eight classrooms designed to facilitate tabletop, computer-based simulation exercises.
- The FLETC received Federal Law Enforcement Training Accreditation (FLETA) program accreditation for the following FLETC programs: the Criminal Investigator Training Program (CITP); the Physical Fitness Coordinator Instructor Training Program (PFCTP); the Inland Boat Operators Training Program (IBOT); the Law Enforcement Instructor In-Service Training Program (LEIISTP); the Driver Instructor Training Program (DITP); the Marine Law Enforcement Training Program (MLETP); and the Boat Operators Anti-Terrorism Training Program (BOAT).
- The FLETC received an unqualified opinion on its FY 2006 balance sheet audit performed by the external audit firm KPMG. Additionally, KPMG has issued an unqualified audit opinion on the FY 2007 full scope audit of FLETC's financial statements. This is FLETC's second consecutive unqualified audit opinion since transferring to DHS.
- The FLETC completed three A-76 streamlined competitions in FY 2007. The functional areas of Environmental and Safety, Property Management, and Facilities Management were all retained in-house.
- The FLETC received the 2007 DHS Environmental Achievement Award in the category of Minimizing Petroleum Use in Transportation through use of Bio Fuel.

### **Planned FY 2008 Accomplishments**

- Provide training to over 63,000 law enforcement students (263,000 student weeks).
- Continue to provide the increased training to Border Patrol and ICE in support of the SBI.
- Continue construction of the multi-phased Practical Application/Counterterrorism Operational Training facility.
- Receive program accreditation for two basic and three law enforcement instructor training programs.

### **Projected FY 2009 Accomplishments**

- Provide training to over 66,000 law enforcement students (276,000 student weeks).
- Continue to provide the increased training to Border Patrol and ICE in support of the SBI.
- Continue construction of the multi-phased Practical Application/Counterterrorism Operational Training facility.
- Receive Academy Re-Accreditation.

The key strategic issues and priorities of the FLETC for the next five years will focus on expanding training programs through partnerships, emerging state-of-the-art training technology, sharing increased capacity in the most cost-effective manner using the consolidated law enforcement concept of training, and providing accredited law enforcement training for all law enforcement personnel. The law enforcement officers trained at FLETC are the primary resources used to fight

the war on terrorism and to make the homeland more secure. In particular, during FY 2009 through FY 2013, at the FLETC we will concentrate our efforts on:

- *Ensuring state of the art technology:* The FLETC continues its partnership with Naval Air Warfare to integrate modeling and simulation technology to support driver and firearms training. This technology can improve the training curriculum and provide more comprehensive training in environments that cannot be replicated on the traditional driver and firearms ranges. The simulation technology emulates highly dangerous law enforcement scenarios while enabling student learning in a safe and controlled environment.
- *Partnering with state and local law enforcement entities:* The FLETC continues to revise and develop training programs for export delivery to state, local, tribal and campus law enforcement agencies. This partnership fosters cooperation, provides technology, improves response coordination and maximizes recovery between these agencies and Federal law enforcement agencies in emergency-related situations in the United States. Emerging programs for this area of training include domestic violence training and anti-terrorism intelligence training. Special emphasis is placed on training law enforcement officers from small town and rural agencies, which comprise 95% of the state, local, tribal and campus law enforcement population.
- *Law enforcement training capacity:* The FLETC evaluates facilities requirements based on Partner Organization training requests and the facilities needed to provide the training. The FLETC has recently modified its Strategic Master Plan for Facilities to provide for capacity associated with the long term training increase of the Secure Border Initiative (SBI). The FLETC continues to explore and apply training alternatives such as the use of technology-based solutions, including computer modeling and simulation, Web-based training and computer based training in order to provide the most up-to-date and cost effective consolidated training.

### C. Resources Requested and Performance Impact

#### Major Changes within the Base Level

The resources required to provide the necessary training by the FLETC are driven by the amount of training requested by our Partner Organizations. FLETC's FY 2009 request is \$274,126,000. Adjustments to base include a decrease of \$24,320,000 for one-time non-recur funding, a decrease of \$730,000 for elimination of FLETC's Washington Office, a decrease of \$1,290,000 and 7 FTE for transfer of the Office of Federal Law Enforcement Training Accreditation (FLETA), a decrease of \$2,741,000 for management efficiencies, an increase of \$1,129,000 and 2 FTE for annualization, an increase of \$2,402,000 for pay inflation and an increase of \$2,538,000 for non-pay inflation.

#### Increments Over Current Service Levels

- \$10,000,000 and 53 FTE increase to provide training related to improved border security.

- \$1,288,000 increase provides 2 FTE and facility maintenance to support increased training using the Practical Application Counter Terrorism Operations Training Facility.

D. How FLETC Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.

Law Enforcement Training program performance goal – Provide law enforcement agents and officers, skilled in the latest techniques, to enforce laws and regulations, protect the Nation, and interact with the public with respect for individuals and civil liberty.

Goal 4 – Build a Nimble, Effective Emergency Response System and Culture of Preparedness.  
Objective 4.2 – Preparedness

E. Performance Based Budget Highlights by Program 1

For each Future Years Homeland Security Program (FYHSP), the performance goal, performance measure/s, indicators, budget including allocation of non-programmatic overhead, and FTE are shown below. A complete listing of performance measures may be found on the OMB web site Expectmore.gov. In a few instances program names in PARTweb may differ slightly from those used in the Performance Budget.

|   |         |           |           |           |           |           |

iii. Status of Congressionally Requested Studies, Reports, and Evaluation

**Department of Homeland Security  
Federal Emergency Management Agency**

| <b>Fiscal Year</b> | <b>Due Date</b> | <b>Reference/Citation</b>  | <b>Requirement</b>  | <b>Status</b>  |
|--------------------|-----------------|--|---|--|
| 2007               | 2/5/07          | House Report   | Catastrophic Incident Capabilities: The Administrator shall develop and submit to the appropriate committees of Congress annually an estimate of the resources of the Agency and other Federal agencies needed for and devoted specifically to developing the capabilities of Federal, State, local, and tribal governments necessary to respond to a catastrophic incident.  | Anticipate DHS submission in May 2008                                  |
| 2007               | 8/9/07          | Conference Report 109-699<br><br>HR 4939 Conf Report 109-494 (Katrina supplement)  | Aug 07 - The report required by Public Law 109-62 and Public Law 109-90 detailing the allocation and obligation of funds for "Disaster Relief" shall hereafter be submitted monthly and include: (1) status of the Disaster Relief Fund (DRF) including obligations, allocations, and amounts undistributed/unallocated; (2) allocations, obligations, and expenditures for Hurricanes Katrina, Rita, and Wilma; (3) information on national flood insurance claims; (4) information on manufactured housing data; (5) information on hotel/motel data; (6) obligations, allocations and expenditures by State for unemployment, crisis counseling, inspections, housing assistance, manufactured housing, public assistance and individual assistance; (7) mission assignment obligations by agency. | Submitted to Hill on time 8/9/07                                       |
| 2007               | 1/30/07         | Sec. 691 (d) and Title III<br>Conference Report 109-699  | 1st Quarter Report on All Non-Competitive Disaster Assistance Contracts and Quarterly Report on all contracts issued during any disaster, including detailed justification for any contract entered into using procedures based upon unusual and compelling urgency exception to competitive procedures.  | Submitted to Hill on 1/8/08  |
| 2007               | 2/8/07          | Public Law 107-273, section 5002. (S. Rpt. 109-243 at 69, restated in Conference Report H. Rpt. 109-699 at 156, accompanying the Department's FY 2007 Appropriations Bill) | National Domestic Preparedness Consortium [NDPC]- The Committee directs ODP to prepare a long-range strategic plan for NDPC. This plan should incorporate the input of each of the existing Consortium members and shall be submitted to the Committee on February 8, 2007. The plan shall include, but not be limited to, projected future training demand, capacity, and performance measures for each Consortium member and the Consortium as a whole. The report shall also include recommendations, if any, for the possible expansion of the program. The Committee is aware of proposals to expand the program to include emergency preparedness within the railroad and mass transit environment and to reduce the risks associated with natural disasters.                                   | Final clearance pending. Anticipate Hill submission end of January 08. |

|      |         |  |  |                             |
|------|---------|--|--|-----------------------------|
| 2007 | 2/8/07  | Conference Report 109-699                          | <b>FPCs:</b> The Committee is concerned NPIP has proposed to duplicate the efforts of the FEMA Regional Offices by creating Federal Preparedness Coordinators [FPCs] positions. The Department is directed to delay this program until the submission, by February 8, 2007, to the Committee of a strategic plan for the FPCs. The plan should include: a definition of the role of the FPCs within the Department; their role before, during, and after a disaster and how the role will not conflict with positions and responsibilities already in the Department, or with positions dictated by the National Response Plan; a description of the expected expertise /and background of individuals who will be appointed as FPCs; and an expenditure plan for the resources to be devoted to FPCs. | Still in FEMA development.  |
| 2007 | 2/15/07 | Conference Report 109-699                          | Briefing - 2nd quarter - Preparedness Directorate and the Federal Emergency Management Agency are directed to brief the Committees on Appropriations 45 days after the date of enactment of this Act and quarterly thereafter, on the progress made to implement each of the conclusions of the June 16, 2006, Nationwide Plan Review Phase 2 Report. The first briefing shall include a detailed timeline for the completion of implementing each conclusion with major milestones and how the implementation of the conclusions are being coordinated with the guidelines developed by the Department for state and local governments as required in Public Law 109-90.  | Briefing took place 1/24/08 |
| 2007 | 10/4/06 | Conference Report 109-699<br>Senate Report 109-273 | Briefing- 1st Quarter - The Preparedness Directorate and FEMA are directed to brief the Committees on Appropriations 45 days after the date of enactment of this Act and quarterly thereafter, on the progress made to implement each of the conclusions of the June 16, 2006, <b>Nationwide Plan Review Phase 2 Report</b> . The first briefing shall include a detailed timeline for the completion of implementing each conclusion with major milestones and how the implementation of the conclusions are being coordinated with the guidelines developed by the Department for state and local governments as required in Public Law 109-90.  | Briefing took place 1/24/08 |
| 2007 | 7/15/07 | Conference Report 109-699                          | Briefing - 3rd & 4th Quarter - The Preparedness Directorate and the Federal Emergency Management Agency are directed to brief the Committees on Appropriations 45 days after the date of enactment of this Act and quarterly thereafter, on the progress made to implement each of the conclusions of the June 16, 2006, Nationwide Plan Review Phase 2 Report. The first briefing shall include a detailed timeline for the completion of implementing each conclusion with major milestones and how the implementation of the conclusions are being coordinated with the guidelines developed by the Department for state and local governments as required in Public Law 109-90.  | Briefing took place 1/24/08 |

|      |         |  |  |  |
|------|---------|--|--|--|
| 2007 | 6/23/07 | Conference Report 109-699                  | The conferees are disturbed by the delay in issuing the final <b>National Preparedness Goal</b> (Goal). In the FY 2006 statement of managers accompanying the conference report (H. Report 109–241), the conferees directed DHS to issue the final Goal, including the final Universal Task List and Target Capabilities List, no later than December 31, 2005. To date, the final Goal and its component pieces have not been published. The conferees direct DHS to publish the final Goal, without further unnecessary delay. In addition, the Secretary shall provide a report to the Committees on Appropriations explaining what substantive improvements have been made to the Goal as a result of the delay.   | Completed and published in September 2007 - National Preparedness Guidelines |
| 2007 | 4/4/07  | Sec. 689g; Conf Rpt 109-699; p.101         | Report detailing the extent to which Disaster Declaration Regulations meet the needs for Less Populated States   | Final clearance pending. Anticipate Hill submission end of January 08.       |
| 2007 | 8/4/07  | Conference Report 109-699                  | 3rd & 4th Quarterly Report - The conferees are concerned that planning for evacuation of the National Capital Region during a disaster has not incorporated all of the pertinent officials from the appropriate states. Despite requests by Congress and affected states, no such joint planning efforts have occurred. Therefore, the conferees include bill language requiring the Preparedness Directorate to include the Governors of the State of West Virginia and the Commonwealth of Pennsylvania in the NCR planning process for mass evacuations. Further, the conferees direct the Preparedness Directorate to include officials from the counties and municipalities that contain the evacuation routes and their tributaries in the planning process. The Secretary shall provide a report to the Committees on Appropriations on the implementation of the planning process, including a list of participants, no later than January 23, 2007, and quarterly thereafter, on the progress made to implement such plans. | Submitted to the Hill in mid-January 2008                                    |
| 2007 | 4/4/07  | Sec. 691 (d) Conference Report 109-699     | 2nd quarter - Report on Contracts Not Using Competitive Procedures.— At the end of each fiscal quarter, beginning with the first fiscal quarter occurring at least 90 days after the date of enactment of this Act, the Administrator shall submit a report on each disaster assistance contract entered into by the Agency by other than competitive procedures to the appropriate committees of Congress.  | Submitted to Hill on 1/8/08  |
| 2007 | 4/4/07  | Sec. 691 (a) (2) Conference Report 109-699 | Report identifying recurring disaster response requirements for which Agency is capable of, and which is not capable of, contracting for in advance. In addition, a contracting strategy for advance cost effective contracting.   | Submitted to Hill on 1/8/08  |
| 2007 | 7/4/07  | Conference Report 109-699                  | 3rd Quarter: Quarterly report on vacancy rate in employee positions. Not later than 3 months after submission of the initial report, and every 3 months thereafter until 5 years after the date of enactment of this chapter, the Administrator shall submit to the appropriate committees of Congress an update of the report under subsection. This requirement refers to report requirement in Section 621 of the Bill.   | Final clearance pending. Anticipate Hill submission in February.             |

|------|---------|---|--|--|
| 2007 | 4/4/07  | Conference Report 109-699   | Develop Surge Capacity Force Plan  | To be determined.  |
| 2007 | 7/31/07 | Title III Conference Report 109-699   | 3rd Quarter - FEMA shall provide a quarterly report to the Committees on Appropriations regarding all contracts issued during any disaster. The report shall include a detailed justification for any contract entered into using procedures based upon the unusual and compelling urgency exception to competitive procedures requirements under section 303(c)(2) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(c)(2)) or section 2304(c)(2) of title 10, United States Code.   | Final clearance pending. Anticipate Hill submission in February.   |
| 2007 | 7/12/07 | Conference Report 109-699<br>HR 4939 Conf Report 109-494 (Katrina supplement) | July 07 - The report required by Public Law 109-62 and Public Law 109-90 detailing the allocation and obligation of funds for "Disaster Relief" shall hereafter be submitted monthly and include: (1) status of the Disaster Relief Fund (DRF) including obligations, allocations, and amounts undistributed/unallocated; (2) allocations, obligations, and expenditures for Hurricanes Katrina, Rita, and Wilma; (3) information on national flood insurance claims; (4) information on manufactured housing data; (5) information on hotel/motel data; (6) obligations, allocations and expenditures by State for unemployment, crisis counseling, inspections, housing assistance, manufactured housing, public assistance and individual assistance; (7) mission assignment obligations by agency. | Submitted to Hill on time 7/12/07  |
| 2007 | 4/30/07 | Title III Conference Report 109-699   | 2nd Quarter - Quarterly Report on all contracts issued during any disaster, including detailed justification for any contract entered into using procedures based upon unusual and compelling urgency exception to competitive procedures.   | Combined with initial report. Submitted to Hill 1/8/08   |
| 2007 | 7/4/07  | Sec. 640  | Report describing the measures taken to update and improve the IT systems  | Submitted to Hill 1/2/08.  |
| 2007 | 7/4/07  | Conference Report 109-699   | Detailed Status Report on National Emergency Child Locator Center including any difficulties and funding issues in establishing the Center or completing the cooperative agreements.   | Submitted to Hill 9/20/07.   |
| 2007 | 4/4/07  | Senate Report 109-273   | Brief on actions being taken to improve FEMA's internal controls to combat fraud, waste, and abuse with implementation schedule for each action and description of the performance measures utilized in each corrective action.  | Submitted congressional report on instituting revisions to identity validation process to combat waste, fraud and abuse. |
| 2007 | 12/4/06 | Conference Report 109-699   | Develop a 5-year comprehensive workforce strategy including hiring goals for vacant positions and retention initiatives for maintaining current staffing level with brief. (Overlaps 180 Requirement from Title VI; Congress directs FEMA to submit the Human Capital Plan developed in response to this requirement.)   | In FEMA development.   |
| 2007 | 10/4/07 | Sec. 621 § 10104(f)<br>Conference Report 109-699                              | Annual Report regarding recruitment bonuses (requirement terminates in 5 years)  | Final clearance pending. Anticipate Hill submission in February.   |

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA) OPERATIONS, MANAGEMENT AND ADMINISTRATION**

### **I. Appropriation Overview**

#### **A. Mission Statement for FEMA Operations, Management and Administration (OMA):**

The FEMA Operations, Management and Administration (OMA) appropriation provides core mission funding for the development and maintenance of an integrated, nationwide capability to prepare for, mitigate against, respond to, and recover from the consequences of major disasters and emergencies, regardless of cause, in partnership with other federal agencies, state, local and tribal governments, volunteer organizations, and the private sector. The account supports core operations for all FEMA organizations, providing resources for mission activities and administrative support. OMA resources are directed to both regional and headquarters operations.

#### **B. Budget Activities:**

Activities are organized according to the following PPA structure:

- Operations Activities
- Management and Administration
- United States Fire Administration
- National Capitol Region Coordination
- Urban Search and Rescue

This structure reflects the realignment in Fiscal Year (FY) 2009 of core management and administration functions and resources from appropriations for the United States Fire Administration, the Disaster Assistance Direct Loan Program, and the Disaster Relief Fund. The proposed realignment will further FEMA's ability to improve management efficiency and accountability of its resources, simplify accounting, and consolidate personnel functions into one appropriation.

#### **1) Operations Activities**

Operations Activities includes the essential functions for all of FEMA's major mission organizations and directly supports FEMA's primary mission to reduce the loss of life and property and to protect the Nation from all hazards including natural disasters, acts of terrorism, and other man-made disasters. Operations Activities leads and supports the Nation through a risk-based, comprehensive emergency management system of preparedness, protection, response, recovery, and mitigation.

In FY 2009, OMA will support FEMA's continued achievement of requirements set forth within the Post-Katrina Emergency Management Reform Act (PKEMRA) of 2006 and provide a more complete service to the American people and our federal, state, local, and tribal counterparts. FEMA will continue to integrate and support operational and preparedness missions that transferred to FEMA in FY 2007/FY 2008 and aligned all activities with the "Vision for a New FEMA." FEMA will continue

to unify strategic planning efforts, build robust disaster operations, disaster assistance, and logistics capabilities, and integrate our grants, training, exercise, technical assistance, and communications platforms.

***(A) National Preparedness Directorate (NPD)***

The National Preparedness Directorate works to ensure that the Nation is prepared for disasters of all kinds. The organization's activities reflect FEMA's expanded role in preparedness established by PKEMRA (2006). NPD houses management and administrative support functions associated with training and national exercise programs funded through the State and Local Programs account. It also implements Homeland Security Presidential Directive #8 (HSPD-8) by establishing policies that strengthen national preparedness for terrorist attacks, major disasters, and other emergencies.

NPD coordinates and brokers agency and interagency planning initiatives in support of operational response and recovery objectives for the National Response Framework (NRF) and for the National Incident Management System (NIMS). The organization includes the National Integration Center, which is the Executive Agent for the NRF. Planning and systems aspects of NPD are complemented by its Emergency Management Institute, which provides direct training to federal, state, local, tribal, public and private sector officials to strengthen core emergency management competencies.

***(B) Grant Programs Directorate (GPD)***

Established in FY 2007, GPD houses a centralized suite of grant management functions including: full-life cycle grants management operations; compliance monitoring; audit resolution; and data analysis. GPD serves as the executive agent for development of grant guidance for the annual Homeland Security grant programs; provides programmatic oversight and technical assistance for grant administration, monitoring, and reporting; and is a principal liaison for interagency programmatic collaboration and coordination.

***(C) Logistics Management Directorate***

Logistics Management Directorate provides the structure to manage and execute Disaster Logistics and moves the agency beyond simply providing commodities (i.e. ice, water, tarps, and MREs) toward a holistic management approach. FEMA's Logistics Management capabilities are based on the Department of Defense's well-recognized logistics (J4) system and organization, including management of the all-source range of assets, teams, equipment, and supplies that may be needed in response to an all-hazards event. The Logistics Management program involves coordination across all federal departments and agencies, state partners, and those in the private sector who plan for and respond to all-hazard disaster events.

***(D) Disaster Operations Directorate***

Disaster Operations Directorate provides core federal response capabilities to save lives and to protect property in communities throughout the Nation that have been overwhelmed by the impact of a major disaster or an emergency, regardless of cause. The Disaster Operations Directorate executes its mission through three primary program areas: Operational Direction, Command, and Control; Operational Teams; and Operational Planning. Disaster Operations houses several activities that were formerly part of FEMA's Response Program, such as sustained situational awareness; a command, communication and coordination system comprised of a national and regional command and coordination centers; national and regional rapid support and response

teams; and a collection of competency-based and technically-oriented operational teams. Disaster Operations is also home to the Incident Management Assistance Teams mandated by PKEMRA.

***(E) National Continuity Programs***

National Continuity Programs provides Executive leadership for Federal Government Continuity and National Contingency Programs that support enduring Constitutional government. National Continuity administers several activities to ensure and improve emergency communications with the public, including development and implementation of the Integrated Public Alert Warning System.

***(F) Disaster Assistance Directorate***

Disaster Assistance Directorate (DAD), formerly the Recovery Program, works to ensure that individuals and communities affected by disasters of all sizes, including catastrophic and terrorist events, are able to return to normal with minimal suffering and disruption of services. Program activities focus on improving efficiency and expediting delivery of disaster assistance to eligible individuals, to state, local, and tribal governments, and to eligible private nonprofit organizations, through a commitment to streamline procedures to improve program policy, to minimize error, and to modernize service delivery technology. Key programs include, but are not limited to: the Individual and Households Program, the Public Assistance Program, Other Needs Assistance, the Crisis Counseling Assistance and Training Program, Disaster Unemployment Assistance, Disaster Legal Services, Emergency Housing, and voluntary agency coordination. DAD is FEMA’s agent in the implementation of provisions of the National Disaster Recovery Strategy and the elements of the National Disaster Housing Strategy.

***(G) Mitigation Directorate***

The mission of the Mitigation Directorate is to protect lives and prevent property loss from natural hazard events. Activities are designed to further sound risk management decisions by individuals, private and public sector entities, state, local and tribal governments, and federal agencies. The Mitigation Directorate’s objectives are accomplished through three categories of core activities: risk identification and assessment, risk reduction, and insurance against flood risk. Among the Mitigation programs supported by OMA are: Environmental and Historic Preservation, National Dam Safety, National Earthquake Hazards Reduction, and the National Hurricane Program. OMA resources also provide base funds to the Mitigation Disaster Operations and Management function.

**2) Management & Administration Activities**

Management and Administration Activities incorporates the Office of the Administrator and the Administrative Management Staff who coordinate between Headquarters and Regional Offices all policy and strategic planning, managerial, resource, and administrative actions; maintains programs to address public information issues; and builds partnerships with and among state and local governments, nongovernmental organizations, business, and industry. Management and Administration Activities also provide the corporate infrastructure (IT, finance, HR, procurement, facilities) which is essential in FEMA’s pursuit of an enhanced business approach to achieving results and providing support capabilities designed and scaled to enhance FEMA’s mission success. FEMA will continue to integrate management and administration missions that transferred to FEMA in FY 2008 and aligned all activities with the “Vision for a New FEMA.” The following FEMA offices define Management and Administration:

- Office of the Administrator, which includes:
  - Law Enforcement Advisor
  - Disability Coordinator
- Office of Policy and Program Analysis
- Office of the Executive Secretariat
- Office of the Associate Deputy Administrator, which includes:
  - Regional Offices
  - Office of Regional Operations
- Office of the Chief Financial Officer
- Office of Management, which includes:
  - Information Technology
  - Human Capital
  - Acquisition
  - Facilities Management
  - Security
- Office of External Affairs, which includes:
  - Legislative Affairs
  - Public Affairs
  - International Affairs
- Office of Equal Rights
- Office of Chief Counsel

### **3) National Capital Region Coordination (NCRC)**

National Capital Region Coordination (NCRC) program advances homeland security, including all hazards preparedness, in the National Capital Region (NCR). The program serves as a model for other regions of the country. NCRC focuses on developing and refining a common regional approach to homeland security that result in integrated strategies and interoperability among federal, state, local, regional and private/nonprofit stakeholders. NCRC's primary responsibilities include coordinating and participating in programs and initiatives aimed at enhancing the homeland security posture of the region. NCRC also plays valuable roles in events, drills, and exercises that occur annually in the NCR. NCRC also serves as a principal in the NCR's regional governance structure and coordinates with the NCR's Regional Emergency Support Functions (R-ESFs) to improve preparedness in the NCR.

### **4) United States Fire Administration (USFA)**

The U.S. Fire Administration works to reduce life and economic losses due to fire and fire-related emergencies through leadership, coordination, and support. USFA prepares the Nation's fire responders through ongoing and, when necessary, expedited training, regarding how to evaluate and minimize community risk, improve protection to critical infrastructure, and be better prepared to react to hazard and terrorism emergencies of all kinds. USFA budget activities include operation of the National Fire Academy and the National Fire Data Center (NFDC), and providing facilities and support services for the National Emergency Training Center (NETC).

### **5) Urban Search and Rescue**

The Urban Search and Rescue Task Forces provide coordinated, national, and all-risk capability for locating, extricating, and stabilizing victims of structural collapse resulting from natural and human causes, including those involving terrorism and weapons of mass destruction. (The Urban Search and

Rescue Task Forces are among the many specialized teams managed by the Disaster Operations Directorate.)

**C. Budget Request Summary:**

**FEMA Operations, Management and Administration:** FEMA requests \$957,405,000, 3,517 positions and 3,458 FTE, as compared to FY 2008. The change from FY 2008 is explained by a series of adjustments for inflation, annualizations, transfers and program increases as described below.

**(1) PPA – Operations Activities:** FEMA requests \$522,980,000, 2,047 positions and 2,006 FTE. This represents a net increase of \$110,756,000, 570 positions and 638 FTE as compared to FY 2008.

**(2) PPA – Management & Administration Activities:** FEMA requests \$362,170,000, 1,327 positions and 1,309 FTE. This represents a net increase of \$88,894,000, 239 positions and 235 FTE as compared to FY 2008.

**(3) PPA – National Capital Region Coordination:** FEMA requests \$6,342,000, 20 positions and 20 FTE. This represents an increase of \$342,000, 0 positions and 6 FTE, as compared to FY 2008.

**(4) PPA – United States Fire Administration:** FEMA requests \$40,913,000, 115 positions and 115 FTE. This represents a decrease of \$2,387,000, as compared to FY 2008. *Note: In FY 2008, USFA was a separate appropriation.*

**(5) PPA – Urban Search and Rescue:** FEMA requests \$25,000,000, 8 positions and 8 FTE. This represents a decrease of \$7,500,000, as compared to FY 2008.

| <b>Subtotal, Enacted Appropriations and Budget Estimates</b> | <b>2,321</b>    | <b>\$557,917</b> | <b>2,464</b>    | <b>\$724,000</b> | <b>3,458</b>    | <b>\$957,405</b> | <b>994</b>                               | <b>\$233,405</b> | <b>357</b>      | <b>\$216,413</b> | <b>637</b>          | <b>\$16,992</b> |
| <b>Less: Adjustments for Other Funding Sources:</b>          |                 |                  |                 |                  |                 |                  |  |                  |                 |                  |                     |                 |
| Rescission per P.L. 110-161                                  |                 |                  |                 | (\$2,791)        |                 |                  |  |                  |                 |                  |                     |                 |
| <b>Net, Enacted Appropriations and Budget Estimates</b>      | <b>2,321</b>    | <b>\$557,917</b> | <b>2,464</b>    | <b>\$721,209</b> | <b>3,458</b>    | <b>\$957,405</b> | <b>994</b>                               | <b>\$233,405</b> | <b>357</b>      | <b>\$216,413</b> | <b>637</b>          | <b>\$16,992</b> |

Note: FY 2008 Enacted reflects the \$60 million transfer from the Disaster Relief Fund per P.L. 110-161.

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**Federal Emergency Management Agency**  
**Operations, Management, and Administration**  
**Program Performance Justification**

(Dollars in thousands)

#### PPA: OPERATIONS ACTIVITIES

|                              | <b>Perm</b>  |              |                  |
|------------------------------|--------------|--------------|------------------|
|                              | <b>Pos</b>   | <b>FTE</b>   | <b>Amount</b>    |
| <b>2007 Actual</b>           | <b>1,256</b> | <b>1,247</b> | <b>\$260,053</b> |
| <b>2008 Enacted</b>          | <b>1,477</b> | <b>1,368</b> | <b>412,224</b>   |
| 2009 Adjustments to Base     | 190          | 299          | 31,137           |
| <b>2009 Current Services</b> | <b>1,667</b> | <b>1,667</b> | <b>\$443,361</b> |
| 2009 Program Change          | 380          | 339          | 79,619           |
| <b>2009 Request</b>          | <b>2,047</b> | <b>2,006</b> | <b>\$522,980</b> |
| Total Change 2008-2009       | 570          | 638          | 110,756          |

FEMA requests \$522.98 million for this activity. This is an increase of \$110.756 million over FY 2008.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The following activities directly support FEMA's primary mission to reduce the loss of life and property and protect the Nation from all hazards, including natural disasters, acts of terrorism, and other man-made disasters, by leading and supporting the Nation in a risk-based, comprehensive emergency management system of preparedness, protection, response, recovery, and mitigation. Activities reflect the continuing implementation of FEMA Vision initiatives launched in FY 2007 and FY 2008, including a focus on developing core competencies and the integration of expanded preparedness functions. FEMA Operations activities will continue to build on FY 2007 successes in the areas of:

- Creating "engaged partnerships" with state and local governments.
- Facilitating and supplying an effective unified command across all levels of government.
- Engaging hurricane-prone states to gain a better understanding of their vulnerabilities.
- Improving logistics and communications capabilities to improve response.
- Enhancing disaster assistance capabilities for recovery efforts.

OMA provides FEMA with basic mission funding, which is complemented by disaster-specific and readiness resources from Disaster Relief Fund, Disaster Readiness and Support Activity, and other program-specific appropriations.

#### **A) National Preparedness Directorate**

The National Preparedness Directorate works to ensure that the Nation is prepared for disasters of all kinds, regardless of cause. Much of the NPD organization is supported with funds from the State and Local Programs appropriations.

Within NPD, OMA resources support the following elements:

- **Incident Management Systems (IMS)**

IMS is the Executive Agent for the National Response Framework (NRF). IMS coordinates and brokers agency and interagency planning initiatives in support of operational response and recovery objectives for the NRF and the National Incident Management System (NIMS). The IMS plays a critical role in coordinating the various components of the NRF to ensure that the NRF remains linked to and based upon the NIMS.

- **Emergency Management Institute (EMI)**

The planning and systems aspects of the National Preparedness Directorate are complemented by the EMI which provides training to federal, state, local, tribal, public and private sector officials to strengthen emergency management core competencies, including incident management, operational planning, disaster logistics, emergency communications, disaster assistance, continuity programs, public disaster communications, integrated preparedness, and hazard mitigation. EMI directly supports the implementation of NIMS, the NRF, and the National Preparedness Guidelines (NPG) by conveying necessary knowledge and skills to practitioners. EMI uses a diverse training delivery system that includes residential onsite training; offsite delivery in partnership with emergency management training systems, colleges, and universities; and technology-based mediums to conduct individual training courses for emergency response personnel across the Nation.

- **Expanding National Preparedness Initiatives to the Regions**

The broader preparedness mission charged to FEMA will necessitate the Regions playing an integral role in program implementation and coordination with a broad spectrum of security partners and stakeholders. This goal will only be as successful as our ability to build upon FEMA's new and existing preparedness functions, both at headquarters and at the Regions.

An essential element of integrating preparedness is for FEMA components to be aligned and act as catalysts in developing a preparedness network inclusive of other federal, state, local, private sector, and civilian stakeholders. The Federal Government's preparedness efforts must reflect a level of alignment that is similar to what is necessary for successful operational performance. Therefore, the Regions will need to perform an expanded role to facilitate, and help integrate, their regional communities as the Nation's 'centers of gravity' for national preparedness through expanded networking to include "bridging" plans and capabilities, facilitating information sharing, and encouraging joint preparedness investments. Regions will also be expected to adopt a wide sophisticated view of preparedness, and advocate that view to our homeland security partners to effectively build the capabilities needed to meet requirements to prevent, protect against, respond to, and recover from all hazards.

A key prerequisite in strengthening the delivery of comprehensive preparedness services through FEMA Regions is building upon our personnel to include Federal Preparedness Coordinators (FPCs) and other personnel at the Regions engaged in planning, capability analysis, training, exercise, and grants management. Together, they will better enhance regional capabilities to prevent, protect against, respond to, and recover from all hazards based upon measurable readiness priorities and goals consistent with the National Preparedness Guidelines, National Response Framework, and other national initiatives. In FY 2007, FEMA began the process of hiring FPCs and some other preparedness personnel at the Regions and we will use additional funds in FY 2008 to further build upon our Regional and Headquarters capabilities to work in concert with each other, conduct assessments, and

deliver comprehensive preparedness assistance activities. The FY 2009 budget request will sustain these efforts.

## **NPD Recent and Planned Accomplishments**

### **FY 2007**

- EMI continued to develop and deliver its national-level training program and evaluate the effectiveness and the impact on federal, state, local, tribal, public and private sector officials to ensure that individuals and groups having key emergency management responsibilities at all levels of government, including FEMA employees, possess the requisite competencies to perform their jobs effectively.
- Twenty-seven offerings of EMI's flagship course—the exercise-based Integrated Emergency Management Course (IEMC)—were delivered to test an integrated response by key emergency management officials to a variety of simulated disasters or emergencies, nine of which were designed for a specific community or jurisdiction, including New Orleans, Louisiana.
- FEMA promoted implementation of the National Incident Management System to expand and strengthen knowledge, education, compliance and capabilities; and revised the NRF to align coordination structures, capabilities and resources at the federal, state and local levels. Specific highlights of this effort include:
  - Issued criteria for 99 NIMS Credentialed positions for Interstate Mutual Aid along with Core Competencies for 62 Incident Command System Positions and criteria to type resources for Interstate Mutual Aid.
  - Conducted NIMS-related table-top and full scale exercises at the Simulated Emergency Operations Center located in Somerset, Kentucky, with NIMS Support Center services provided by Eastern Kentucky University.
  - 279,334 state students and 1,222,726 local students have been trained in IS700 National Incident Management System (NIMS), an introduction independent study course.
  - Developed a Memorandum of Understanding with the Emergency Management Assistance Compact (EMAC) to establish professional qualifications, certifications, training and educational requirements for specific emergency response functional positions to assist state, local and tribal governments with the NIMS.
  - Revised the NRF based on results of lessons learned from the FY 2005 Hurricane Season, including Hurricane Katrina.

### **FY 2008**

- EMI will continue to develop and deliver its national-level training program and evaluate the effectiveness and the impact on federal, state, local, tribal, public, and private sector officials, including revision of existing curricula to incorporate recent changes to the NRF and NIMS. EMI will develop and begin conducting several exercise-based NRF IEMCs for regions and states to test an integrated approach to the revised NRF framework which is based on NIMS and the Incident Command System (ICS).
- Objectives for the Incident Management Systems include:
  - Continue to expand the emergency management body of knowledge and strengthen emergency management training and education through coordinated training programs.

- Continue to promote the integration and synchronization of preparedness across jurisdictions and all levels of government through NIMS education and outreach.
- Continue efforts to sustain national doctrine and policy, and actively administer the national response doctrine.
- Continue efforts to sustain NIMS Support Center services at Eastern Kentucky University.
- Strengthen FEMA's Incident Management Capability at the national and regional level through training and exercising of incident management assistance teams.
- Update the NRF training and education programs to become more operations-oriented by providing task specificity for local governments based on the changes to the NRF.
- Enhance regional capabilities through outreach and training programs delivered through the IMS Division and EMI to begin serving as the direct link to States in the NIMS and NRF implementation and planning process.
- Assess the readiness of FEMA to accomplish its mission through evaluation of the effectiveness of NIMS, ICS and NRF training via the Remedial Action Management Program (RAMP) Program.
- Expand NIMS/ICS and NRF training programs with DHS training partners (Coast Guard, FLETC, Center for Domestic Preparedness, etc.) and other federal agencies.
- Strengthen partnerships in the region and provide staffing to begin overseeing the outreach and education program with FEMA, DHS and other federal components, state, local, tribal, hospital and healthcare and private sector partners.
- Monitor NIMS implementation and compliance at all levels of government.

#### **FY 2009**

- EMI will continue to develop and deliver its national-level training program and evaluate the effectiveness and the impact on federal, state, local, tribal, public, and private sector officials. To assure efficacy of effort and parallel alignment with DHS and FEMA goals and activities, EMI will employ assessment tools and peer reviews to measure program outcomes and alignment. EMI will continue to design and deliver exercise-based NRF IEMCs for additional regions and states.
- Objectives for the Incident Management Systems Division include:
  - Continue development and implementation of national mutual aid system to include supporting the creation of formalized, comprehensive, exercised, intrastate mutual aid systems in all 50 U.S. states, territories, possessions and the District of Columbia (DC).
  - Continue to strengthen partnerships in the region and provide adequate staffing to oversee the outreach and education program with FEMA, DHS and other federal components, state, local, tribal, hospital and healthcare partners.
  - Continue support for the development and implementation of National Incident Management Systems (NIMS) resource management standards, typing and credentialing.
  - Support and facilitate the enhancement of existing and new incident management programmatic and operational standards for consistency with NIMS principles and doctrine.
  - Continue to test and evaluate incident management related software against identified NIMS technical standards, principles and doctrine using established test and evaluation plans and protocols.
  - Work with federal, state, local, tribal, private sector, and nongovernmental partners to exercise the NRF and revise as necessary based on lessons learned.
  - Continue to engage and strengthen relationships with FEMA Regions and state, tribal and local authorities and the nongovernmental and private sector.

- Conduct NRF field visits and training and education programs, exercises, and other opportunities with other DHS components, to promote joint all-hazard preparedness.
- Serve as the executive agent to coordinate NRF activities, including National Response Steering Committee (NRPSC) at the regional level.
- Enhance regional capabilities to serve as the direct link to states in the NIMS and NRF implementation and planning process.
- Develop and implement an enhanced education and awareness program for the NIMS and NRF in the regions.
- Continue efforts to sustain NIMS Support Center services at Eastern Kentucky University.
- Continue to monitor NIMS implementation and compliance; release a robust 3-year implementation program for use by federal, state, territory, tribal local, private sector and nonprofit organizations with specific target values and performance measures.
- Administer a more robust RAMP capability assessment, exercise design and coordination at the regional level.

## **B) Grant Programs Directorate**

The Grant Programs Directorate (GPD) provides a unified and proactive, centralized a suite of grant management functions, including full-life cycle grants management operations; compliance monitoring; audit resolution; and data analysis. GPD awards and administers funds to thousands of grant recipients annually. GPD ensures and maintains internal controls and accountability over billions of taxpayer funds provided in the form of disaster assistance, as well as federal resources awarded for non-disaster programs such as the Pre-Disaster Mitigation Grant Program, and the collection of Homeland Security resources awarded to states and transportation sectors are appropriately awarded, administered, and monitored.

The Grant Programs Directorate has three primary divisions: 1) Financial Accountability and Oversight; 2) Business Support and Data Analysis; and 3) Program Development and Administration. The majority of GPD activities are funded from management and administrative set-asides in the State and Local Program and Assistance to Firefighter Grants appropriations, with a small portion of funds coming from OMA. OMA resources provide some support for activities within all three GPD divisions.

### **• Financial Accountability and Oversight**

This division manages the business processes necessary for all pre-award activities including the announcing of funding opportunities, accepting and reviewing applications, determining award eligibility, and providing quality control over grant award documents and processing award packages. This division manages all post-award activities, such as monitoring grantees, processing modifications, generating amendments, reviewing grantee financial status reports, and coordinating grant closeout. The division also assists in the coordination and monitoring of key grant-related audit activities, i.e. OIG, GAO, Single Audit Act, and the independent financial auditor. The consolidation of these functions within a single division will provide more visibility into the infrastructure responsible for the management of all FEMA grants.

### **• Business Support and Data Analysis**

This division provides FEMA with a single mechanism to analyze, synthesize, and present grant-related financial data. Responding to increasingly intense scrutiny of FEMA's stewardship of grant

and assistance resources, this division will provide Congress and the White House with information demonstrating FEMA's accountability and oversight of billions of dollars.

- **Program Development and Administration**

This Division serves as the executive agent for development of grant guidance for the annual Homeland Security grant programs; provides programmatic oversight and technical assistance for grant administration, monitoring, and reporting; and is a principal liaison for interagency programmatic collaboration and coordination.

## **GPD Recent and Planned Accomplishments**

### **FY 2007**

- Established the merger of resources from the legacy Office of Grants and Training and legacy FEMA Grants Management office.
- Continuously tracked state and local grant administration and spending at the state and local level and add additional grant programs to the Grants Reporting Tool as necessary.
- Released Homeland Security grant and Infrastructure Protection Program guidance.

### **FY2008**

- Continue to track state and local grant administration and spending at the state and local level and add additional grant programs as necessary. Update the Grants Reporting system based on new federal requirements and state and local user feedback per fiscal year.
- Through the Centralized Scheduling and Information Desk, collect requested scheduling or point of contact information of available training dates, dates for exercise and conduct and points of contact for preparedness activities.

### **FY 2009**

- Continue to track state and local grant administration and spending at the state and local level and add additional grant programs to the Grants Reporting Tool as necessary.
- Through the Centralized Scheduling and Information Desk, develop and update of master point of contact database that includes federal, state and local points of contact for NP and other preparedness program activities.

## **C) National Continuity Programs**

FEMA's National Continuity Programs is the Executive Branch's lead agent for Continuity Programs, including continuity of government, continuity of operations, and National Contingency Programs.

- **Continuity**

Inherent in FEMA's role as the Executive Agent for the Continuity Program is the responsibility to formulate guidance for agencies to use in developing viable, executable continuity plans; facilitate interagency coordination as appropriate; and oversee and assess the status of continuity capability across the Executive Branch. Additionally, each agency is responsible for appointing a senior Federal Government executive as an Emergency Coordinator to serve as program manager and agency point of contact for coordinating agency continuity activities.

Today's changing threat environments and recent emergencies, including localized acts of nature, accidents, technological emergencies, and military and/or terrorist attacks-related incidents, have

increased the need for COOP capabilities and plans that enable agencies to continue their essential functions across a broad spectrum of emergencies. This, coupled with the potential for terrorist use of weapons of mass destruction (WMD), has emphasized the importance of continuity programs that ensure continuity of mission essential functions across the Federal Executive Branch.

FEMA leads a coordinated effort within the Federal Government's Executive Branch to ensure that National Essential Functions continue to be performed during a Catastrophic Emergency. The Continuity program provides procedures, guidance, training and evaluation resources to ensure the continuation of the essential functions of the Department of Homeland Security (DHS), Federal Emergency Management Agency (FEMA), and Federal Executive Branch departments and agencies in the event key facilities are threatened or become unusable, requiring the relocation of selected personnel and functions. By ensuring these essential government functions continue under all hazard conditions, the program preserves the American way of life.

- **Emergency Alert and Communication Functions**

In addition to FEMA's responsibilities as Executive Agent for federal continuity activities, more specific national continuity activities consist of the following:

- Digital Emergency Alerting System (DEAS) provides Geo-targeting, text/voice/video data to messaging radios, TV, cell phones, etc., to first responders, officials, and the public (to include those with disabilities and non-English speakers) during emergencies.
- Legacy Emergency Alerting System (EAS) provides the capability to alert and warn the public. Activated at the President's discretion, the EAS will preempt all other TV and radio operations or commercial programming within 10 minutes until the President terminates the national-level EAS operation.
- E-NAWAS (Enhanced National Warning System) upgrades NAWAS with 21<sup>st</sup> century voice, video, and data collaboration technologies, as well as including a geo-targeted alert and warning message dissemination capability.
- The National Warning System (NAWAS)/Washington Area System (WAWAS), consist of 24-hour continuous private line telephone systems.
- FEMA National Radio System (FNARS) provides the President and other federal officials with resilient and assured voice + data networks with connectivity to FEMA Regions, State Emergency Operations Centers (EOCs), key IPAWS facilities, and other locations to help meet information sharing requirements at any time, across the full threat spectrum.
- Geo- Targeting Alert System (GTAS) will use NOAA's advanced weather input, particle modeling, and collaboration tools to predict how an incident will affect an area and to share that information with FEMA.
- Switch on Wheels (SOWS), mobile stations that can connect to local terrestrial phone lines.
- Web Alert Relay Network (WARN) provides an Opt-in Internet-based public warning capability which allows the public to receive alerts and warning at the WARN website.

- **IPAWS Initiative**

In June 2006, the President signed Executive Order 13407 requiring "an effective, reliable, integrated, flexible, and comprehensive system to alert and warn the American people in situations of war, terrorist attack, natural disaster or other hazards to public safety and well being." DHS designated FEMA to lead the executive order implementation. The Integrated Public Alert and Warning System (IPAWS) fulfill the goal of the executive order. The program's scope is summarized by the phrase "one message over more channels to more people at all times and places."

IPAWS leverages advanced communication technologies and existing federal, state, and local systems to communicate essential and accurate information to the public prior to, during, and after a catastrophe. This requires the implementation of a Digital Emergency Alert System (DEAS) providing secure, targeted, alerting capability via text, audio, and video disseminated via public television (PBS) and radio networks; implementation of a Geo-targeted Alerting System (GTAS), that provides geo-targeted alert and warning messages via telephones, cell phones, digital FM receivers and other media devices the public has access to on a regular basis; and a DHS Web Alert Relay Network (WARN) in association with a All-Hazard Web Alert Portal (AWAP), that will provide the capability for DHS to directly alert the public of natural or man-made disasters and emergencies based on appropriate geographic regions. Other key elements of the IPAWS program include:

- Inventory and evaluation of existing capabilities.
- Maintenance, protection, and, if necessary, restoration of communications facilities and capabilities necessary for the public alert and warning system.
- Conducting training, tests, and exercises for the public alert and warning system.

## **National Continuity Recent and Planned Accomplishments**

### **FY 2007**

- Conducted Quiet Sentinel 07 in conjunction with Pinnacle 07 and utilized a scenario that was a continuation of Pinnacle 05. The 18 FEMA Regional Offices, Administrations and Directorates participated to review essential functions and Continuity of Operations Relocation Site Plans to determine secondary Continuity of Operations site locations should the need arise for the dispersion or social distancing of Emergency Relocation Members.
- Conducted 50 COOP tabletop exercises, 44 of which were designed to assist Federal Continuity program managers with preparing for Continuity of Operations in a pandemic influenza environment.
- Delivered an additional 15 Continuity manager's train-the-trainers courses, resulting in 452 additional individuals trained and certified, reaching all 30 major departments and agencies.
- For the first time, 100 percent of Federal departments and agencies will have fully operational Continuity of Operations capabilities by the end of FY 2007.

### **FY 2008**

- Sustain continuity programs that are well-developed and operational; enhance interagency communications to support national-level command and control systems; and develop and deploy new technologies to improve contingency system programs.
- Increased funding for the Integrated Public Alert and Warning System (IPAWS) will continue work in the categories of protocols, standards and procedures; architecture for delivery over many paths; related test, training and exercises; public education, conferences, and web based opt-in alerts to computers, pagers, etc.; and mobile assets.

### **FY 2009**

- Continue to enhance interagency communications to support national-level command and control systems; and continue to develop and deploy new technologies to improve contingency system programs.
- Work to complete capability demonstration of the IPAWS program. The objective of IPAWS program is to warn and alert the American people in situations of war, terrorist attack, natural

disaster or other hazards to public safety and well being with threshold of 85% within 10 minutes and target of 95% within 10 minutes.

- Update protocol to communicate essential and accurate information to the public prior to, during and after a catastrophe.

#### **D) Logistics Management Directorate**

FEMA's Logistics Management Directorate's capabilities include the management of resources such as the logistics cadre, supplies, services, and equipment needed to respond to an all-hazards event. Much of the commodities purchased for a disaster as well as the contracts which help FEMA stand ready to support disaster are funded in the Disaster Relief Fund and the Disaster Readiness and Support Activities appropriations. OMA provides resources for the following Logistics Management activities and elements:

- **Logistics Distribution Management** consists of warehouse facilities and systems used to store, maintain, transport, and track supplies, services, material and equipment in emergencies and disasters. FEMA will also develop a plan that outlines a national logistics strategy that streamlines duplicative disaster response assets, warehouses, operating procedures, and associated management structures.
- **Logistics Operations** manages and executes command and coordination, and tracking and reporting for all hazards operations. Logistics operations serve as the central reporting element for the National Response Coordination Center on all logistics actions and operational activities.
- **Property Management** provides management and technical services for accountability, reutilization and disposal of the agency's personal property assets.
- **Logistics Office of Transformation and Initiative** coordinates and manages emerging transformation initiatives and concepts such as the Total Asset Visibility initiative, and exploration of 3rd Party Logistics (3PL) concepts. The Total Asset Visibility initiative is a system of information that provides the visibility of assets and commodities through their entire lifetime, from initial purchase through disposal.
- **Logistics Plans and Exercises** will continue to develop and to provide cohesive and synchronized logistics plans and exercises to achieve both short- and long-term requirements. It will develop and build upon the capacity to respond to diverse requirements in no-notice and short-notice environments effectively and efficiently to meet operational needs. These functions directly support both deliberate and crisis operations planning.

OMA funds for Disaster Logistics are complemented by disaster readiness support through the Disaster Readiness and Support Activities appropriation and disaster-specific resources from the Disaster Relief Fund.

#### **Logistics Management Directorate Recent and Planned Accomplishments**

##### **FY 2007**

- Elevated the logistics branch within the former Response Division to a directorate level organization and appointed a Chief Logistics Officer. Additional staff resources were added as part of an overall effort to increase technical skills, and institute sound business processes.

- Began developing the structures needed to re-define disaster logistics and move beyond simply providing commodities (i.e. ice, water, tarps, and Meals Ready to Eat (MREs)) to a holistic approach.

#### **FY 2008**

- Continue Logistics Management transformation efforts by recruiting and hiring a permanent workforce to better support current and expanded functions. Logistics Management will gain 25 additional PFT positions as a result of FEMA Vision initiatives.
- Develop and implement new internal management controls.

#### **FY 2009**

- Will transform logistics management of supplies and services by engaging the private sector and incorporating industry best practices. This includes incorporating a Third Party Logistics (3PL) structure into the Logistics Management Directorate.

#### **E) Disaster Operations Program**

FEMA's Disaster Operations Program provides core federal operational capabilities needed to save lives, minimize suffering, and protect property in a timely and effective manner in communities overwhelmed by acts of terrorism, natural disaster, or other emergencies. Disaster Operations (formerly FEMA's Response Program, absent the Logistics element) encompasses the following program activities and elements. NOTE: When a disaster threatens or occurs, many costs associated with program functions are supported through the Disaster Relief Fund.

- **Operational Direction, Command, and Control**

The Operational Direction, Command and Control program area manages and coordinates capabilities in support of emergency and disaster response operations, exercises, and special events to ensure appropriate readiness for response.

- **Operations Centers**

*National Response Coordination Center (NRCC).* The NRCC is a multi-agency center that functions as the operational component of the DHS National Operations Center (NOC) to provide federal coordination of disaster response operations and emergency management program implementation for natural and manmade disasters, including Incidents of National Significance. The NRCC maintains situational awareness links with State Emergency Operations Centers (EOC), selected local EOCs, regional DHS components, regional Emergency Support Functions (ESFs), State Fusion Centers, Joint Terrorism Task Forces, regional Department of Defense Operations Centers, and other key operational nodes. The NRCC supports disaster response and resource planning; monitors potential or developing Incidents of National Significance; supports regional and field component operations; and coordinates national-level disaster response activities and resource allocations for DHS and FEMA. In addition to maintaining a 24/7 Watch Team, the NRCC is augmented by the ESFs during disaster operations.

*Regional Response Coordination Centers (RRCC).* The RRCCs are regionally-based multi-agency coordination centers that perform a complementary role to the NRCC at the regional level. Operating in the ten FEMA Regions, each RRCC provides situational awareness information, identifies and coordinates response requirements, supports response operations,

performs capabilities analysis, and reports on the status of federal disaster response operations. The RRCCs deploy liaison officers and the Emergency Response Team-Advanced (ERT-A) to initiate federal support, facilitate initial delivery of goods and services to save lives and property and stabilize local infrastructures, and facilitate prioritizing “in theater” interagency resource allocation and coordination, and support multiple concurrent disaster operations within the region.

**FEMA Operations Center (FOC).** The FOC supports the NRCC with a 24/7 watch. The FOC implements myriad notifications to all Federal Executive Branch departments and agencies that support the NRCC, as well as activating emergency management staff. The FOC receives, analyzes, and disseminates all-hazards information within FEMA and DHS and to departments, agencies, and disaster response team members. The FOC, in coordination with the National Operations Center, facilitates distribution of warnings, alerts, and bulletins to the emergency management community using a wide variety of communications systems such the National Warning System (NAWAS), the Washington Area Warning System (WAWAS), and the National-level Emergency Alert System (EAS).

- **Disaster Workforce Management**

Disaster Workforce Management coordinates the deployment, tracking and credentialing of all disaster responders and develops overarching policies and procedures governing all Stafford Act employees. All responders sent into the field to respond to a disaster under the Stafford Act or other authorities are “rostered,” deployed, and tracked in order to maintain their visibility. This element will be improved through continued consolidation and upgrading of activities, systems, and resources of all response teams that are now part of the federal response.

- **Disaster Emergency Communications**

Provides integrated, interoperable emergency communications architecture that can provide immediate restoration of critical command and control platforms within states affected by disaster and real-time “reach-back” connectivity from incident commanders to JFOs, the NRCC, RRCCs, and other operations centers. The following state-of-the-art capabilities are provided: Tactical land mobile radios and repeater systems; Tactical cellular phones; Space-based satellite systems; High frequency and microwave line-of-sight systems interconnected by fiber optic cables to voice and data switches; Local area networks; and Desktop devices such as PCs and telephones.

- **Operational Teams**

The Operational Teams program area supports field response to disasters and special events, and participates in exercises.

- **Incident Management Assist Teams (IMAT)**

In accordance with the Post-Katrina Emergency Management Reform Act of 2006 (PKEMRA), FEMA is developing a next generation of rapidly deployable interagency national and regional emergency response teams, identified as Incident Management Assist Teams (IMAT). These teams will be designed to provide a forward federal presence to better manage and coordinate the national response for catastrophic incidents. The primary mission of an IMAT is to rapidly deploy to an incident or incident-threatened venue, provide leadership in the identification and provision

of federal assistance, and coordinate and integrate inter-jurisdictional response in support of the affected state(s) or U.S. territory(s). The IMATs support efforts to meet the emergent needs of state and local jurisdictions; possess the capability to provide initial situational awareness for federal decision-makers; and support the initial establishment of a unified command. IMATs will meet the multi-disciplinary needs of emergency management and may include members from the inter-agency community as needed.

The national teams will have the capability to establish an effective federal presence within 12-hours of notification, to support the state, coordinate federal activities, provide initial situational awareness, and to be self sufficient for a minimum of 48-hours to augment potentially scarce local resources. Ultimately, three national-level IMATs and ten regional-level IMATs will be built and will subsume the roles and responsibilities of the Federal Incident Response Support Teams (FIRSTs), the National Emergency Response Teams (ERT-N) and Emergency Response Teams-Advanced (ERT-A). When not responding to disasters, IMATs will engage in a range of training exercises and other activities strengthening FEMA's critical relationships with state and local partners.

- ***Urban Search and Rescue (USAR) Task Forces***

USAR teams provide the coordinated, national, all-risk capability for locating, extricating, and stabilizing victims of structural collapse resulting from natural and human causes, including those involving terrorism and WMD. See the Urban Search and Rescue PPA for more detail.

- ***Incident Support Teams (IST)***

ISTs are pre-existing elements that make up the management cells for USAR.

- ***Mobile Emergency Response System (MERS)***

MERS detachments are mobile, self-sufficient emergency response units designed to support federal all-hazards response operations by providing integrated and interoperable communications and life support to meet the needs for disaster response activities, as well as the needs for planned special events. MERS detachments are managed centrally and are dispersed throughout the U.S. to improve the efficiency and cost-effectiveness of the NRF and to allow staff at the Joint Field Offices (JFOs) to focus on immediate response and recovery activities. Additionally, MERS operates the five MERS Operations Centers as an integral part of the FEMA network of operations centers.

- ***Hurricane Liaison Team***

This team operates at the National Hurricane Center to provide the liaison between the National Hurricane Center and the federal, state, tribal, and local governments' response system components, and provides an additional access point for critical interagency technology transfer to enhance all-hazards response capability.

- ***National Emergency Response Teams (ERT-N) and Emergency Response Teams-Advanced (ERT-A)***

These teams will ultimately be subsumed by the IMATs, but some will continue to exist in FY 2009 during the transition to IMATs. ERT-N and ERT-A teams are made up of individuals from FEMA Headquarters and Regions who have additional day-to-day responsibilities beyond their team assignments.

ERT-N teams are deployed by FEMA Headquarters in response to significant major disasters. Their purpose is to coordinate disaster response activities, coordinate and deploy key national response assets and resources, provide situational awareness, and maintain connectivity with key Department of Homeland Security operations centers and components. ERT-N members typically provide the initial staffing cadre for a JFO supporting a major disaster.

ERT-As are located in each of the ten FEMA Regions and can be deployed in the early phases of an incident to work directly with states to assess disaster impact, gain situational awareness, help coordinate the disaster response, and respond to specific state requests for assistance. The ERT-A initially establishes its presence in a State Emergency Operations Center and later staffs the JFO to support the disaster response. The ERT-As deploy with basic communications capabilities including cell phones, wireless laptop computers, and a limited number of satellite cell phones. As needed, they can also be supported by the MERS detachments and their capabilities.

- **Specialized Federal Teams**

- ***The Nuclear Incident Response Teams (NIRT)***

- NIRT teams are specialized teams managed day-to-day by the Department of Energy (DOE) / National Nuclear Security Administration (NNSA) and the Environmental Protection Agency (EPA). They are operationally controlled by DHS/FEMA when activated to provide expert technical advice and support in disaster response operations and other needs involving nuclear weapons accidents, radiological accidents, lost or stolen radioactive material incidents, and acts of nuclear terrorism.

- ***The Domestic Emergency Support Team (DEST)***

- The DEST is a specialized interagency U.S. Government team designed to expeditiously provide expert advice, guidance and support to the FBI On-Scene Commander (OSC) during a Weapons of Mass Effect (WME) incident or credible threat. The DEST is comprised of crisis and consequence management components and augments the FBI's Joint Operations Center with tailored expertise, assessment and analysis capabilities.

- **Operational Planning**

In depth operational planning, led by Disaster Operation's current Operational Planning Unit, is a core competency of the agency. This planning includes detailed and critical disaster response operational analyses, preparation of operational plans, and crisis action planning to ensure that the agency can lead and improve national all-hazard disaster responses. More specifically, the Operational Planning Unit will:

- Provide national and regional operational planning guidance and coordination.
  - Coordinate at the operational level the execution of all hazard contingency plans.
  - Provide forecasting and analysis of potential events.
  - Assist FEMA Regions in operational planning at the regional level.
  - Lead the development of DHS and FEMA hazard-specific contingency plans.

Operational response planning efforts are closely coordinated with FEMA's National Preparedness Program, Disaster Assistance Directorate, Mitigation Directorate, and DHS components, including the DHS Incident Management Planning Team (IMPT). FEMA will lead the coordinated planning for the Federal Government consistent with the intent of PKEMRA.

○ ***Catastrophic Disaster Response Planning***

Disaster Operations will continue to develop federal-level catastrophic disaster response plans, in partnership with states and local communities, that take into account the need for a significantly higher level of response assets, the possibility of little or no advance notice or warning, and the need for rapid response times with massive support. A catastrophic incident is defined by a sudden event which results in thousands of casualties and tens of thousands of evacuees, overwhelming the resources of the state and local governments and requiring life saving support from outside the area. Years of successful experience with disaster response operations have clearly demonstrated that positive results are achieved when federal response efforts are fully integrated with state, tribal, local, private sector and critical infrastructure. These same levels of integration will be continued in the catastrophic disaster response planning initiative in accordance with the principles of the NRF – Catastrophic Incident Annex.

○ ***Special Events Operations***

This division supports the readiness capabilities and planning for designated National Special Security Events to ensure an effective response to possible emergencies, to ensure public health and safety, and to protect property against threats or acts of terrorism. Support generally consists of activating operations centers and liaisons and is dependent upon the needs identified for each event.

○ ***Exercise Support***

Resources will contribute to exercise development and improved disaster response operations and capabilities. Exercises will be coordinated with other agencies and within FEMA to provide interaction and participation in national-level response exercises. This support is dependent upon the needs identified for each exercise, and is closely coordinated with the National Preparedness Program's Homeland Security Exercise and Evaluation Program (HSEEP).

## **Disaster Operations Recent and Planned Accomplishments**

### **FY 2007**

- Utilizing the results/recommendations of the FY 2007 FEMA Organizational Assessments in the areas of Disaster Emergency Communications and the Disaster Workforce, FEMA is taking appropriate steps to improve and implement business processes that will refine the Disaster Operations Program as we move toward the New FEMA.
- Communications and situational awareness – Real time information sharing occurred at all levels including federal, state, and local. Advances in technology were utilized – satellite imagery, upgraded radios and frequency management are the new standard.
- Operational planning – Initiated hiring of operational planners at FEMA Headquarters to supplement planning in support of 24-hour operations in the National Response Coordination Center; life saving and protection of property decision making by FEMA management during disaster operations; situational awareness; and tactical-level operational contingency planning for present and potential disasters based upon the 15 National Planning Scenarios.
- Catastrophic disaster response planning – Site-specific planning catastrophic disaster response planning was initiated.
  - 8 state planners, 4 regional planners, and 2 planners for FEMA Headquarters began work under contract to support New Madrid Seismic Zone planning.

- 7 state and local planners, 1 regional planner, and 1 planner for FEMA Headquarters began work under contract to support planning for a Category 5 hurricane potentially impacting the southern part of Florida.
- Contract support for catastrophic disaster response planning for California was initiated to support regional response planning.
- Federal Incident Response Support Teams
  - Improved Operational Readiness, including establishing funding sources to enable teams to immediately deploy.
  - Established additional satellite links for data transmission, to include video.
  - Continued participation in regionally-based meetings and national conferences.
  - Successfully deployed to two no-notice events thus far in FY 2007. Successfully met 12-hour arrival time for requirement.
  - Developed and implemented FY 2007 program goals documents.
  - Developed and implemented position-specific training matrix document for each member.
- ERT-N
  - Conducted cover-to-cover review, and updated, ERT-N Operations Plan.
  - Provided training to 75% of Red and Blue ERT-N Team members.
  - Successfully deployed and provided essential support to Region I during in New England hurricane exercise.
  - Improved operational readiness, including providing personal ERT-N related equipment to individual team members.
- FEMA tested new systems and processes for Hurricane Ernesto.
  - Upgraded National Response Coordination Center at FEMA became functional.
  - Video teleconferences included U.S. Northern Command and the National Guard Bureau.
  - Mobile Registration Intake Centers were exercised.
  - Logistics supply system and Total Asset Visibility programs were tested.

## **FY 2008**

- Operational Planners – Realize full staffing of operational planners at FEMA Headquarters and each FEMA Region.
- Disaster Workforce Management – Continue to work with EMI on the standardization of recruitment, hiring, training and credentialing of all disaster responders. Develop website for communication of policies and procedures to all disaster responders, including site information on all cadres.
- Catastrophic Disaster Response Planning – Conduct catastrophic scenario driven workshops for the following site specific areas:
  - New Madrid Seismic Zone – Alabama, Arkansas, Illinois, Indiana, Kentucky, Mississippi, Missouri, and Tennessee.
  - State of Florida for a Category 5 Hurricane impacting Southern Florida.
- National Response Coordination Center (NRCC) – Enhance disaster operation capabilities of the NRCC to support 24 hour watch operations, situational awareness, development of the common operating picture during disaster operations, and coordination of interagency response to all type of hazards and Presidentially declared disasters. Also, enhance geospatial imaging capabilities of the NRCC, RRCCs and the operational response teams.

## **FY 2009**

- Incident Management

- Professionalize the National Network of Emergency Managers.
- Expand the emergency management body of knowledge and strengthen emergency management education.
- Promote the integration and synchronization of preparedness across jurisdictions and all levels of government.
- Sustain national doctrine and policy, and actively administer national response doctrine.
- Strengthen FEMA's Incident Management Capability through 24/7 operational awareness.
- Strengthen FEMA's Regional operations and partnerships.
- Continue development of next generation of rapidly deployable interagency national and regional emergency response teams.
- Catastrophic Disaster Planning
  - Continue to increase national readiness for site-specific catastrophic events with federal, regional, state, local, tribal governments and the private sector (and the critical infrastructure sectors), utilizing scenario-driven response plan development process.
  - Support development of vertically and horizontally integrated Catastrophic Response Plans compliant with NIMS and the NRF.
- Operational Planning
  - Work within FEMA and with state partners to develop local, state, and regional operational plans, including incident-specific catastrophic plans.
  - Support the development of operational planning capabilities at all levels of emergency management.
  - Support tactical-level operational planning for the 15 National Planning Scenarios.
- National Response Coordination Center
  - Continue enhancement of disaster operation capabilities of the NRCC to support 24-hour watch operations, increased situational awareness, and support development of the common operating picture during disaster operations.
  - Coordination of interagency response to disasters and emergencies, regardless of cause.
- Emergency Communications
  - Solidify FEMA's role in Emergency Communications – before, during and after an incident.
  - Work with States to develop state and regional emergency communications plans.
  - Establish a template of essential emergency communications capabilities and plan for temporary communications to fill the gaps.
  - Provide support to Joint Field Office (JFOs) and enable Federal Command and Control.
  - Assist state offices of emergency communications and ensure the integrity of first responder networks.
  - Work with the National Communications System to ensure a smooth transition to long-term restoration.
  - Serve as a leading national advocate for disaster emergency communications issues and play a major supporting role in policy-making.

#### **F) Disaster Assistance Directorate**

The Disaster Assistance Directorate (DAD), formerly the Recovery Division, ensures individuals and communities affected by disasters of all sizes, including catastrophic and terrorist events, are able to return to normal functions with minimal suffering and disruption of services. Program activities focus on improving efficiency and expediting delivery of disaster assistance to eligible individuals; to state, local, and tribal governments; and to eligible nonprofit organizations, through a commitment to

streamline procedures to improve program policy, to minimize error, and to modernize service delivery technology.

The following DAD programs receive core staffing and operating expense support from the OMA appropriation. Disaster readiness and direct victim assistance requirements are funded from appropriations for the Disaster Readiness and Support Activities account, the Disaster Relief Fund, the Disaster Assistance Direct Loan Program, and Emergency Food and Shelter.

- **Individuals and Households Program (IHP)**

IHP includes several program elements offering various types of support for families and individual disaster victims. These include assistance for housing needs, other non-housing needs, crisis counseling and training, unemployment assistance, and legal services.

- **Public Assistance Program (PA)**

The PA Grant Program provides assistance to states, local governments, and certain nonprofit organizations to alleviate suffering and hardship resulting from major disasters or emergencies declared by the President. It provides supplemental federal disaster grant assistance for the repair, replacement, or restoration of disaster-damaged, publicly owned facilities and the facilities of certain private non-profit organizations.

- **Fire Management Assistance Grant Program (OMAGP)**

FEMA fire management assistance grants are made available to state and local governments, including tribal nations, to minimize immediate adverse effects, and to manage and control wildland fires that threaten to cause major disasters. OMAGP provides a 75% federal cost-share reimbursement to states for actual costs.

OMA resources also provide some support for other DAD activities related to implementation of the National Response Framework's Emergency Support Function #3 – Public Works and Engineering, Emergency Support Function #6 – Mass Care, Emergency Assistance, Housing, and Human Services, and Emergency Support Function # 14 – Long Term Community Recovery; voluntary agency coordination; donations management; cadre management and training; and the purchase and replacement of equipment on our life cycle schedule for HQ and regional employees.

The following DAD activities are funded primary or exclusively from OMA:

- **Catastrophic Planning**

FEMA has been actively engaged in Catastrophic Disaster Planning for its Disaster Assistance programs since September 2001, when it began developing the Catastrophic Disaster Housing Strategy. The Catastrophic Disaster Housing Strategy provided the principles and concepts that establish the framework for disaster housing recovery planning and capacity building being done today. FEMA has made significant progress in the last six years in increasing its capability to provide assistance to individuals, particularly in the areas of registration, applicant processing, and coordination with other agencies. During this time, we have also made strides in streamlining the Public Assistance Program for very large events through planning, training, and technology improvements. FEMA's experience with the 2005 and 2006 Hurricane Seasons highlighted a number of critical planning and capability requirements for Disaster Assistance, which are the focus of current and planned catastrophic disaster planning initiatives.

- **Collaboration with Stakeholders**

Because the delivery of disaster assistance programs depends on a seamless working relationship with state and local governments, consistent interaction with these stakeholders is essential. To that end, DAD staff participates in a number annual conferences, meetings, and workshops with internal and external partners on a wide range of initiatives. Additionally, OMA funding is used to host a variety of conferences, meetings, and workshops to ensure that we are working with our stakeholders as critical decisions are being made.

## **Disaster Assistance Directorate Recent and Planned Accomplishments**

### **FY 2007**

- DAD has continued work on Hurricane Katrina related activities as well as new disasters. In FY 2007, 68 major disasters and 11 emergencies were declared in 31 states. 54 Fire Management Assistance Grants have been approved in 13 states.
- Focused its catastrophic disaster assistance planning and capability enhancement efforts on supporting displaced populations, identifying alternative forms of temporary housing, and contaminated debris management planning.
- Developed FEMA evacuee hosting guidance and provided direct planning assistance to five potential host states and communities to initiate state hosting plans.
- Developed and implemented a software package (AIDMATRIX) that will enable government entities, voluntary agencies, and faith-based partners to coordinate offers of donated goods and services following disasters.
- Through the Joint Housing Solutions Group, FEMA has developed a tool to evaluate innovative and practical strategies and solutions for providing temporary housing in situations where large numbers of households are impacted for extended periods of time.
- The FEMA-led Interagency Work Group on Contaminated Debris Management completed a final working draft of its Contaminated Debris Task Force Concept of Operations (CONOPS).
- In April 2007, new software was built into NEMIS that maintains data on applicants in mobile homes and communicates real-time data to caseworkers and the auto-determination system in order to prevent duplicate housing payments to applicants receiving direct housing. In June 2007, address checks were implemented in NEMIS that flag “high risk” addresses such as check cashing stores, mail drops, cemeteries, and jails. Applications with “high risk” addresses require an intensive review prior to the delivery of assistance and prevent fraud on the part of disaster applicants. Additional enhancements to the NEMIS client in June 2007 include the implementation of a block on duplicative rental assistance payments for overlapping months. Edit checks have been built into NEMIS that require a processor to enter the period of assistance, and therefore, disallow payments for overlapping periods.

### **FY 2008**

- Refine evacuee hosting guidance and complete five state hosting plans for large numbers of evacuees. Complete enhancements to the National Shelter System and AIDMATRIX system to improve system security and user interface, and continue to provide technical assistance and training to users nationwide.
- Complete a compendium of potential alternative housing solutions with ratings and guidelines for best application of particular units given disaster conditions through the Joint Housing Solutions Group.

- Continue to refine the CONOPS and test it to the extent possible during actual disaster events and relevant exercises throughout FY 2008.
- Lead the development of a new methodology that uses the best available resources to produce accurate estimates for debris volumes following a large-scale disaster.
- Improve FEMA's planning capability for long-term recovery operations after major disasters through development of a standard protocol and trained staff to identify significant upcoming recovery issues and plan out the future operational needs of regional and field offices.
- Continue to develop plans and procedures for managing disaster assistance operations under the varying conditions of different catastrophic and extraordinary disaster scenarios.
- Continue to allocate targeted resources to improve the effectiveness and efficiency of recovery programs as delivered in the numerous disasters occurring annually, and to ensure that individual and public assistance can be provided to victims of the larger and more complex disasters that could occur as the result of terrorism or catastrophic natural events.

#### **FY 2009**

- Continue to improve FEMA's plans and capabilities for managing mass evacuations and the resulting displaced populations, including additional state and local plans and development and expansion of evacuee tracking systems.
- Continue to improve and test/exercise FEMA's capabilities for all of its Individual Assistance functions (mass care, emergency assistance, housing, and human services).
- Continue to improve and test FEMA's plans and capabilities for managing large amounts of debris, including contaminated debris.
- Continue to develop plans and procedures for managing disaster assistance operations under the varying conditions of different catastrophic and extraordinary disaster scenarios.
- Continue to allocate targeted resources to improve the effectiveness and efficiency of disaster assistance programs as delivered in the numerous disasters occurring annually, and to ensure that individual and public assistance can be provided to victims of the larger and more complex disasters that could occur as the result of terrorism or catastrophic natural events.

#### **G) Mitigation Directorate**

The Mitigation Directorate creates safer communities by reducing loss of life and property and preventing potential disaster losses. This is accomplished through three core strategies: Risk identification and assessment; Risk reduction; and Provision of flood insurance. These core activities work jointly to create safer communities by reducing the likelihood of future losses, enabling individuals to recover more rapidly from floods and other disasters, and minimizing the financial impact on the U.S. Treasury, states, and local and tribal communities in the event of a disaster. OMA resources for Mitigation activities are complemented by specific appropriations for the National Flood Insurance Fund, Pre-Disaster Mitigation, and Flood Map Modernization. The following Mitigation activities are supported by OMA:

- **Mitigation Disaster Operations and Management**

In FY 2006 Mitigation prioritized its disaster related efforts, reassigning personnel resources to a newly formed "Regional & Disaster Support Section" that fulfills the Mitigation disaster operations and management function. The main goals of the Regional & Disaster Support Section are to:

- Maintain an operational disaster response capability to effectively respond to mitigation needs.
- Act as the coordination point for Mitigation disaster operations/activities.

- Develop and integrate disaster operations policies, procedures, training, and cadre development consistent with the National Response Framework.
- Manage the Mitigation Disaster Workforce.
- Develop training and job aides to promote workforce capability to use disaster recovery as an opportunity to build communities stronger and safer.

The Regional and Disaster Support Section of Mitigation uses OMA funds to incorporate mitigation and insurance opportunities into catastrophic disaster planning, strengthen regions, standardize what tasks will be carried out in the JFO, clearly develop performance indicators, develop qualifying plans for persons holding disaster positions, and develop job aides, curriculum plans and training to ensure a prepared disaster workforce. Systems integration, information sharing across JFOs, and disaster planning for mitigation operations will increase standardization and maximize the potential of rebuilding stronger and safer communities.

- **National Dam Safety Program (NDSP)**

As the lead federal agency for the National Dam Safety Program, FEMA is responsible for coordinating efforts to secure the safety of dams throughout the United States. The program makes federal funds available to states, which are primarily responsible for protecting the public from dam failures of non-federal dams, and pursuing initiatives that enhance the safety and security of dams posing the greatest risk to people and property. Congress' passage of the Dam Safety Act of 2006 strengthened and reauthorized the program through FY 2011.

- **National Earthquake Hazards Reduction Program (NEHRP)**

Established by Congress in 1977, the National Earthquake Hazards Reduction Program (NEHRP) works to reduce risks to life and property resulting from earthquakes. Focusing on research, building code standards, technical guidance, and education, NEHRP is a collaborative effort among the Federal Emergency Management Agency (FEMA), the National Institute of Standards and Technology (NIST), the National Science Foundation (NSF), and the United States Geological Survey (USGS). The NEHRP agencies work together to reduce the Nation's vulnerability to earthquakes. The agencies research the causes and effects of earthquakes and produce technical guidance to develop earthquake resistant design, construction standards, and techniques and educate the public about earthquake hazards and mitigation. FEMA manages initiatives that increase the chances that people will survive earthquakes, including the following activities: (1) Translates research into technical guidance publications and best practices on seismic safety, building design and construction, building codes and standards, and reducing economic losses; (2) Assists state and local governments in building capabilities for determining potential damage and reducing the effects of earthquakes before they occur; and (3) Works with national codes and standards organizations to develop and improve seismic building standards.

- **National Hurricane Program (NHP)**

Established in 1985, the National Hurricane Program (NHP) provides the technical information, tools, and products that assist state and local governments in developing effective hurricane evacuation plans. The program is a multi-agency partnership, involving the Federal Emergency Management Agency (FEMA), the National Oceanic & Atmospheric Association (NOAA), the National Weather Service (NWS), the U.S. Department of Transportation (DOT), the U.S. Army Corps of Engineers (USACE), and numerous other federal agencies. The NHP conducts hurricane evacuation studies that guide the decision-making process for protecting the public when a hurricane threatens an area. These studies

help state and local communities establish evacuation plans by determining the probable effects of a hurricane, analyzing transportation systems, predicting public response to the threat and advisories, identifying appropriate shelters, and providing clearance times for safely evacuating the threatened public.

## **Mitigation Directorate Recent and Planned Accomplishments**

### **FY 2007**

- NEHRP provided training and technical assistance for state and local officials and provided technical assistance to state and local planners with the implementation of approved performance metrics for the program.
- NEHRP continued the development of tools and data to document losses avoided through successful mitigation activities.
- The National Hurricane Program completed 4 hurricane evacuation studies in coastal counties in the States of New York, New Jersey, Maryland's Western Shore, and Virginia by providing technical information in order to safely evacuate those coastal populations that may be impacted by potential storm surge inundation from Category 1-5 hurricanes.
- States participating in the Dam Safety Program were able to increase their inspections of high-and-significant-hazard potential dams, increase the number of Emergency Action plans (EAPs) for high-and significant hazards potential dams and exercise of the EAPs. This priority coupled with the inspections of dams helped to reduce the risk from dam failure in the United States.
- Regional and Disaster Support developed, field tested and finalized position task books for disaster workforce, developed disaster workforce training for mitigation staff, and compiled and tested standard operating procedures for both headquarters and JFO staff in support of mitigation and insurance disaster operations. The section also initiated development and Beta tested an automated system to provide mitigation information to disaster applicants.

### **FY 2008**

- The National Hurricane Program will complete two hurricane evacuation studies in FY 2008 that effect coastal counties in the States of Texas and Southeast Louisiana, plus two additional updated studies (to be determined) in two hurricane-prone states by providing technical information in order to safely evacuate those coastal populations that may be impacted by potential storm surge inundation from Category 1-5 hurricanes.
- NEHRP will continue to meet the statutory requirements and improve NEHRP metrics. It will also continue to develop tools and data to document losses avoided through successful earthquake mitigation activities.
- The National Dam Safety Program will meet projected performance increases established for reducing loss of life and damage to property from dam failure from any cause, including natural and man-made events.
- Regional and Disaster Support will continue workforce management improvements including development and pilot test training for mitigation and insurance staff serving disaster applicants; development and initiation of mitigation disaster operations leadership and management mentoring program; development of training and job aides to standardize use of automated system in providing mitigation information to disaster applicants; and development of qualifying plans for mitigation & insurance disaster workforce positions which will standardize qualifications of employees serving in the disaster workforce.

- The Mitigation Directorate will continue to identify and to implement requirements to fulfill the vision of FEMA as the Nation's Preeminent Emergency Management Agency, including implementation of PKEMRA.

### **FY 2009 Accomplishments**

- The National Hurricane Program will complete four hurricane evacuation studies in FY 2009 that effect coastal counties in four states (to be determined) by providing technical information in order to safely evacuate those coastal populations that may be impacted by potential storm surge inundation from Category 1-5 hurricanes.
- The National Dam Safety Program will continue the development and implementation of technologies and tools for the identification and prioritization of the risk associated with state-regulated high- and significant-hazard potential dams. Risk assessment and risk prioritization of our Nation's aging dam infrastructure is a clear priority.
- Regional and Disaster Support will develop a system to track and maintain relevancy of disaster field operations training; quantify best practices of mitigation and insurance disaster operations and provide mechanisms to standardize practices across JFOs; develop customer service feedback; and measure the impact of public mitigation information in increasing mitigation measures taken.

PPA: MANAGEMENT & ADMINISTRATION ACTIVITIES

|                              | <b>Perm</b>  |              |                  |
|------------------------------|--------------|--------------|------------------|

| <b>2009 Request</b>          | <b>1,327</b> | <b>1,309</b> | <b>\$362,170</b> |
| Total Change 2008-2009       | 239          | 235          | 88,894           |

FEMA requests \$362.2 million for this activity. This is an increase of \$88.894 million over FY 2008.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Management and Administrative activities incorporate the Office of the Administrator and FEMA-wide Administrative Management who coordinate between Headquarters and Regional Offices all policy, managerial, resource, and administrative actions; maintain programs to address public information issues; and build partnerships with and among State and local governments, nongovernmental organizations, businesses, and industries. Operations, Management and Administrative activities also include the programs and functions that provide the infrastructure without which FEMA’s Mission Programs would fail; i.e. information technology services, financial, human capital, acquisition and facilities management.

**A) Office of the Administrator**

FEMA’s mission is to undertake a broad range of activities involving prevention, protection, response, recovery and mitigation both before and after terrorist events, natural and man-made disasters. The Administrator has the ultimate responsibility for providing the leadership and direction that enables FEMA to accomplish this mission. The Deputy Administrator and Chief Operating Officer are tasked with the overall operational responsibilities at FEMA. To this end, the Office of the Administrator encompasses those resources required to provide a cohesive administrative structure whereby the decisions and mandates of the executive leadership are carried out.

- Law Enforcement Advisor is a newly created function, mandated in the Post-Katrina Emergency Management Reform Act of 2006. The Law Enforcement Advisor function was created to nationally enhance communication and coordination between the FEMA and State, local and tribal law enforcement. The Law Enforcement Advisor is a part of FEMA’s senior leadership team—participating in our planning meetings and on-hand during times of crisis.
- Disability Coordinator is a new initiative, mandated in the Post-Katrina Emergency Management Reform Act of 2006. The Disability Coordinator integrates consideration for persons with disabilities into all FEMA disaster program applications. The position coordinates with government agencies, and nonprofit disability advocacy groups to insure equal access to FEMA services and benefits for survivors with disabilities. The Disability Coordinator provides guidance and coordination on matters related to individuals with disabilities in emergency planning requirements and relief efforts.

## **Office of the Administrator Recent and Planned Accomplishments**

### **FY 2007**

- Instituted a reorganization of FEMA that is more inclusive and incorporates many of the lessons learned from Hurricane Katrina.
- Created the new positions of Law Enforcement Advisor and Disability Coordinator.
- Filled all 10 Regional Administrator positions with experienced emergency management personnel.

### **FY 2008**

- Implement the first phase of the “Vision for a New FEMA” that will institute emergency management core competencies, implement new business approaches for managing risk and significantly increase the permanent workforce.

### **FY 2009**

- Implement the second phase of the “Vision for a New FEMA” that will continue the institutionalization of emergency management core competencies, the implementation of new business approaches for managing risk and the continued increase of FEMA’s permanent workforce.

## **B) Office of Policy and Program Analysis**

Formed in October 2006, the Office of Policy and Program Analysis is responsible for providing leadership, analysis, coordination and decision-making support on agency policies, plans, programs and key initiatives. Office of Policy and Program Analysis encompasses the following activities and elements:

- Defense Production Act (DPA) Program provides guidance and coordination for the use of DPA authorities by Federal and State governments and the private sector on the use of DPA authorities to expedite the procurement of critical supplies for national defense and homeland security purposes.
- Policy provides guidance and coordination for the agency’s policy system and represents the agency on department-level policy matters.
- Program Analysis & Evaluation (PA&E) provides the agency’s leadership with objective, comprehensive analyses of current and proposed FEMA programs and provides recommendations concerning program operations and alignment of objectives and resources with strategic priorities.
- Strategic Planning provides guidance and coordination in order to help the agency make innovative and informed decisions about FEMA’s long term direction, and to facilitate integrated strategic planning and decision-making.
- Transformation Management provides centralized organizational change management across the agency by providing the expertise and structure to execute agency-level projects and the continuity to ensure that change efforts lead to cumulative agency improvements that make FEMA better, stronger, and faster.

## **Office of Policy and Program Analysis Recent and Planned Accomplishments**

### **FY 2007**

- Managed and supported transition planning and implementation for the Post Katrina Emergency Management Reform Act of 2006, including the tactical and operational activities needed to complete administrative transfer of staff and programs.
- Established a Program Analysis and Evaluation Division.
- Updated FEMA's Strategic Plan to ensure consistency with the Secretary's goals, Administrator's Vision and the "Post-Katrina Emergency Management Reform Act of 2006," to provide clear strategic direction that guides agency programs, priorities, and resource allocation decisions.
- Developed the requirements for, and implemented, an Executive Management System to improve how FEMA manages information, saving significant staff time in searching, organizing and formatting information.

### **FY 2008**

- Complete the full integration of Preparedness and FEMA missions and functions, including the three major functions: Grants, Training and Regional activities into FEMA, as well as the development of plans for the upcoming Administration transition in 2009.
- Employ a business approach to the way we do business by establishing program analysis that provides a basis for institutionalizing a results oriented, return-on-investment management culture. This will help improve FEMA's ability to connect program budgets to strategy and policy, providing the FEMA Administrator with sound program analyses to help determine priorities among FEMA's many competing resource needs.
- Establish a standardized policy system that helps identify potential conflicts across policies and that allows quick and easy retrieval of FEMA policies for all users, internal and external.
- Fully implement the Executive Management System (EMS) to manage a concurrence clearance process, collecting feedback in a central location for thousands of documents. EMS will also become a data repository for FEMA documents and information, with built-in search functions and the ability to report on the status of documents.

### **FY 2009**

- Coordinate full implementation of the transition to a New FEMA including allocating staff resources in FEMA headquarters and the regions.
- Conduct additional rigorous and objective risk-based analyses of current FEMA programs, ensuring that agency resources are aligned with strategic priorities.
- Refine current FEMA data and performance measures, resulting in data and measures that better validate FEMA's success. Quantitative performance measures are a requirement for justifying FEMA's programs throughout the planning, programming, budget and execution (PPBE) process, and this effort will support the Department's FYHSP process.
- Manage and support transition planning and implementation for Post Katrina Emergency Management Reform Act of 2006 and the upcoming Administration transition in 2009.

### **C) Office of the Executive Secretariat**

The Office of the Executive Secretariat (OES) serves as the primary point of contact for FEMA's Office of the Administrator for coordinating and providing information on departmental taskings, briefing materials and official correspondence. The OES is the central coordination point within

FEMA responsible for ensuring proper and expeditious action on all taskers and correspondence addressed to and from FEMA.

#### **D) Office of the Associate Deputy Administrator**

The Office of the Associate Deputy Administrator serves as the agency's office through which all policy, managerial, resource and administrative actions that affect or impact the regions receive effective coordination between headquarters and regional offices. The Associate Deputy Administrator also ensures that FEMA policies, programs, administrative and management guidance are implemented in the regions in a manner consistent with the agency's overall goals. The Associate Deputy Administrator encompasses the following activities and elements:

- Regional Offices establish a regional, all-hazards, emergency management system of preparedness, mitigation, response, and recovery through close working relationships with Federal agencies, State, tribal and local governments, business and industry, and volunteer organizations in implementing FEMA's policies and programs. The 10 Regional Offices are the primary vehicle by which the agency's policies and programs are delivered and accomplished at the State and local levels of government. The Regional Offices serve as the implementation arm for the full range of the agency's programs. The Regional Offices, which are augmented by Area Offices in the Caribbean, Hawaii and Alaska, serve all 50 states and U.S. territories. Regional staff work directly with the States to help develop disaster preparedness plans, develop mitigation programs and respond to disasters when events exceed the capability of the State to effectively meet residents' needs.
- Office of Regional Operations serves as the agency's office through which all policy, managerial, resource and administrative actions that affect or impact the regions receive effective coordination between headquarters and the regional office. Regional Operations also ensures that FEMA policies, programs, administrative and management guidance are implemented in the regions in a manner consistent with the agency's overall goals.

#### **Office of the Associate Deputy Administrator Recent and Planned Accomplishments**

##### **FY 2007**

- Provided leadership, direction and program coordination.
- Continued to build State and local capability as measured against their annual plans.
- Increased effectiveness of regions and headquarters by implementing better communications management.
- Ensured that regions effectively carried out FEMA's emergency management mission.
- Developed performance measures and metrics for FEMA's core competencies.
- Developed regional organization and functions for the "New FEMA."

##### **FY 2008**

- Establish Regional Advisory Councils on emergency management issues specific to regions.
- Establish Regional Emergency Communication Coordination Working Groups to advise on all aspects of emergency communication.
- Expand FEMA's capability to work with State partners on operational planning capabilities.
- Continue policy and regulatory review and implementation.
- Continue professional staff development.

- Continue to provide support, coordination and communication between headquarters program offices and the regions.

### **FY 2009**

- Develop efficient and effective regional and State partnerships to facilitate a seamless end-to-end logistical system.
- Establish a proactive internal and external outreach program.
- Increase operational awareness with 24/7 Regional Response Coordination Centers.
- Continue to expand FEMA's capability to work with State partners on operational planning capabilities.
- Continue to strengthen core capabilities, competencies and capacities.
- Continue to provide support, coordination and communication between headquarters program offices and the regions.

### **E) Office of the Chief Financial Officer**

The Office of the Chief Financial Officer (OCFO) supports the FEMA mission by providing financial management information, fiscal services and policy support to FEMA's management and oversight organizations. The OCFO encompasses the following activities and elements: Budget, Accounting, Financial Policy, and Internal Controls.

- Budget performs an ongoing role in the planning, formulation, justification, analysis, and execution of FEMA's operating, mitigation and disaster budgets. Budget has the primary responsibility for making recommendations to the Administrator and presenting the FEMA's budget proposal to the Department, OMB, and Congress. After budgets are approved by the Congress and signed into law by the President, Budget monitors the agency's execution activities for conformance with executive and legislative intent.
- Accounting has the primary responsibility for maintaining FEMA's accounting system, central books of accounts and financial databases while also providing accounting services to the agency.
- Financial Policy develops agency-wide policies, procedures and standards for all financial areas and promulgates these and related government-wide financial management requirements throughout the agency.
- Internal controls are responsible for developing and implementing the Agency's Internal Controls program as defined by OMB Circular A-123.

### **Office of the Chief Financial Officer Recent and Planned Accomplishments**

In FY 2007, besides continuing to provide day-to-day fiscal services and financial operations, the OCFO:

- Conducted an organizational assessment to define the most efficient financial organization required to meet the mission of FEMA. The results of the organizational assessment and the subsequent strategic planning off-site for OCFO leadership produced a plan of action for a new OCFO structure to be instituted in FY 2008.
- Implemented the reorganization of resources from the Directorate of Preparedness to FEMA and a reorganization of FEMA resources to the Office of Health Affairs.

- Initiated FEMA's Internal Control program. In accordance with A-123, conducted assessment of internal controls for Financial Reporting, Fund Balance with Treasury, Budgetary Resource Management and others. Began implementing corrective action plans to address specific issues and root causes in these plans.
- Conducted testing of controls over improper payments for the Individual Housing Program and Vendor Payments. Also conducted a risk assessment of all FEMA payments.
- Conducted a system review to define the requirements and propose a system to replace FEMA's financial management (accounting) system (IFMIS).
- In conjunction with the Office of Policy and Program Analysis, instituted a financial/investment review process (the Investment Working Group) to provide FEMA-wide transparent review and recommendations of resources to support the senior leadership decision making process.

In FY 2008 and FY 2009, the OCFO will continue the implementation of a more efficient financial organization which will include OCFO budget resources imbedded in program offices and regions to assist in the interpretation and application of program/organizational requirements to the budget process. The OCFO will stand up the new automated financial management system and will institutionalize FEMA's internal control process, to include the regions.

#### **F) Office of Management**

The Office of Management (OM) provides operational services and leadership oversight to FEMA's mission for Human Capital Planning, Acquisition Management, Records and Document Management, Facilities Management, Security Services and Information Technology Services.

- Human Capital Management (OM-HC) plays a critical role in managing the agency's most important asset, its people. As "Vision for a New FEMA" states, the quality and performance of our people is what will enable FEMA to become the Pre-eminent Emergency Management Agency. Human Capital Management is responsible for a broad range of activities, including identifying and recruiting the best available talent, and partnering with managers to retain, develop and motivate FEMA's people to reach their fullest potential. Human Capital Management encompasses workforce planning, employment and recruitment, pay and performance, training, organizational development, employee and labor relations, awards, leave, workplace programs, employee grievances and appeals.
- Acquisition Management (OM-AM) is designed to provide a full range of acquisition services and business solutions to FEMA's programs, partners and stakeholders. Acquisition Management is responsible for all contracting and related activities to fulfill the agency's mission. As one of the business organization of the agency, Acquisition Management supports the procurement and contract management program's policies, procedures, operations, contract planning, awards, administration and closeouts. Acquisition Management also manages FEMA's Competitive Sourcing Program (FAIR Act – A-76).
- Facilities Management and Support Services role is to ensure that everything is available and operating properly for building occupants to do their work. Facilities Management and Support Services encompasses the following activities and elements: Customer Service (building emergencies, utility shutdowns, job tickets, help and referral); Building Care (custodial services, routine & project work, and furniture rental/purchase); Maintenance Management (routine and

capital maintenance, and renewal of facilities leases); Mechanical Maintenance (preventive maintenance and emergency call response); Printing and reprographics; Mail operations; and Occupational safety and health.

- Security Services provides a comprehensive set of security functions, services, programs and activities designed to protect FEMA personnel, facilities, information and equipment, including national security requirements. Security Services encompasses the following elements: Physical security, and Personnel security - background investigations. These security services support all fixed facilities and disaster operations nationwide.
- Information Technology Services (OM-IT) The Office of the CIO (OCIO) and the Information Technology Services Division (ITSD) provides IT services in support of FEMA's missions. These IT services are provided before, during, and after disasters. OCIO/ITSD offers services such as an internet web-page – [www.FEMA.gov](http://www.FEMA.gov) – which provides information to prepare for disasters; and conducts extensive planning to restore communications in the event they fail during a disaster. OCIO also provides communications networks to keep key decision makers apprised of unfolding events during disasters. In the aftermath of a disaster, OCIO teams continue to provide these networks until local authorities can restore communications. Additionally, all grants to States and individuals, as well as public assistance monies are processed through ITSD systems. The OCIO also provides IT service to FEMA employees, including a helpdesk, e-mail, internet access, computers, and telephones.

Through its program and activities, OCIO provides the following services: Tier 2 restoration support (Mt. Weather activities to repair FEMA's nationwide voice and data network); Timely and efficient governance, research, engineering, design, testing, and deployment of the enterprise IT infrastructure; Installation, integration and maintenance of FEMA IT applications, including the National Emergency Management Information System (NEMIS), reducing the likelihood of losses of life or property; FEMA COMSEC asset and key management support, nationwide; Coordination of IT requirements of FEMA programs and offices through a continuity of information technology services; and Ensures FISMA compliance.

## **Office of Management Recent and Planned Accomplishments**

### **FY 2007**

#### Acquisition Management:

- Provided technical support and training for the ProTrac and ProDoc systems, which contains a contract management and tracking module (ProTrac), a document generation module (ProDoc), funds and items manager (ProFund), a regulatory search engine (RegSearch), a vendor repository (VVR), and an electronic bid manager (BidView).
- Developed the implementation strategy for the migration to PRISM, which will replace ProTrac/ProDoc as the primary contract management and tracking system.
- Provided project management and subject matter expertise to plan, manage and facilitate a pilot restructuring of the current NIMS manual and ICS structure to include the procurement function as a potential seventh functional area.

#### Human Capital:

- Concentrated on improving core operational competencies, such as overall services and support to the Agency organizations.
- Hired additional staff to ramp up services and support agency-wide, this helped FEMA achieved and maintained a 95% staffing rate for funded base allocated positions for the first time in recent history, expanding the agency's ability to meet mission.
- Provided services for the hiring of approximately 14,000 disaster workforce employees.
- Revised and reinstated the agency's Federal Career Intern Program, hiring 19 interns and providing a feeder pool of talent for development.
- Streamlined and automated the agency's Voluntary Leave Transfer Program.
- Successfully completed the transfer of 10,000 National Disaster Medical System employees from FEMA to the Department of Health and Human Services.

#### Information Technology:

- Conducted reviews to define the agency's IT budget baseline.
- Redesigned and implemented the Information Technology Services web-site and established procedures for content management.
- Completed several initiatives, such as digitization of agency forms; the deployment of the Advanced Contact Center Network Phase II; consolidation of the help desk structures for both Tier I and Tier II levels; the establishment of a DHS steward Video Operations Center (VOC) to keep pace with growing requirements; and the establishment of a standardized, repeatable process and guidance for project and software management which will bring FEMA closer to a level 2 of the Government's Maturity Model.
- Completed mission/disaster initiatives, such as developing a new mobile home/travel trailer tracking capability; supporting a mandated extension to corporate (hotel/motel) program; and improved response to Individual Assistance Program, in response to the court decree resulting from the Association of Communities Reform Now (ACORN) law suit.

#### Facilities Management and Support Services:

- Completed such initiatives as the continued renovations at HQ's facilities to maximize space utilization; and conducted Management Evaluation Technical Assist Reviews (METARs) at 27 FEMA fixed facilities and 10 percent of disaster facilities nationwide to assess compliance with Federal, State and local regulatory requirements.

#### Security Services:

- Initiated the Electronic Questionnaire for Investigation Processing (eQIP).
- Continued work on the integration of the electronic fingerprint system (EFS) into FEMA LAN with Joint Field Offices (JFOs), HQ and MWEOC, along with connectivity of FEMA employees, particularly during disaster operations. As of June, approximately 7,000 sets of fingerprints were submitted to the FBI for processing.

### **FY 2008**

#### Acquisition Management:

- Use base resources to refine the acquisition functions to make it a more customer focused organization. These refinements will build on the changes started in FY 2007.
- Continue to identify and to implement requirements to fulfill the vision of a New FEMA; to implement the Post-Katrina Emergency Management Reform Act of 2006.

#### Human Capital:

- Continue the successful operations for staffing and customer service that resulted in accomplishment of a 95% staffing level.
- Implement new technology for staffing and recruitment and improve FEMA's performance in comparison to the Office of Personnel Management's 45 day hiring model.
- Expand existing Human Capital Information Systems Helpdesk capabilities, increase the use of employee self-service options, and establish Division Data Store for centralized access to shared Division data.

#### Information Technology:

- Develop and implement an IT Plan to centrally manage all FEMA IT investments.
- Develop and implement new systems/functionally such as a fully compliant electronic records management system to quickly identify, store, and preserve records; a compliance monitoring automation tool to assist project and program managers to comply with all Federal, DHS and FEMA software regulations; and migrate completely to the DHS One Net and the DHS IPv4 address space.
- Continue to upgrade security controls and improve on the protection of Personally Identifiable Information (PII).

#### Facilities Management, Support Services, and Security:

- Develop system requirements for a facilities management system.
- Continue to assess conditions of FEMA owned properties and make capital improvements; continue renovations at HQ; increase the number of METARs to all FEMA fixed facilities.

### **FY 2009**

#### Acquisition Management:

- Further refine services and functions, building on changes that began in FY 2007 and FY 2008.

#### Human Capital:

- Continue the successful operations of the Division staffing and customer service initiatives.
- Convene career development panels to identify the optimum learning and experience paths in critical occupational specialties to ensure continued availability of leaders and technical experts to support succession driven need.

#### Information Technology:

- Initiate the transition of IT systems and financial resources to the OCIO.
- Continue initiatives such as deployment of a fully compliant electronic records management system; improve help desk efficiency by monitoring both workflow and management escalation; begin Advanced Computer Technology Integration (CTI) system deployment for the Advanced Contact Center Network; and improve the Disaster Housing Inspection Management System security to overcome the vulnerability and risks of using tablet computers in the field that carry personal identification information.

#### Facilities Management, Support Services, and Security:

- Continue to implement the requirements identified in FY 2008.

### **G) Office of External Affairs**

The Office of External Affairs provides operational services and leadership oversight to FEMA's mission for Legislative Affairs, Public Affairs, Intergovernmental Affairs and International Affairs.

- Legislative Affairs serves as FEMA's primary liaison to members of Congress and their staff. The office responds to congressional committee oversight and other inquiries from individual Members and their congressional staff; notifies Congress about agency initiatives, policies, and programs; and has the responsibility for the development and implementation of strategies to advance the agency's legislative initiatives and other interests relating to Congress. Legislative Affairs also articulates the agency's position on legislation proposed by Congress, facilitates the appearance of agency witnesses at congressional hearings, and manages the DHS and OMB clearance process for all legislative queries. Legislative Affairs participates in the Senate confirmation process for all agency nominees requiring Senate confirmation. These functions are important to the agency's cooperative and productive relationship with Congress.
- Public Affairs coordinates FEMA's public message and serves as the primary point of contact with the media and the American public to communicate FEMA's actions, activities, responsibilities, and initiatives. Public Affairs coordinates with all FEMA offices to maintain a central pool of information; tracks and manages all contacts with the media; maintains FEMA's public communications, such as press releases and the FEMA web page; and educates FEMA employees through internal communications and meetings.
- Intergovernmental Affairs serves as FEMA's primary national level liaison for tribal, State, and local officials and the associations that represent their interests. The office supports senior FEMA leadership by coordinating meetings with intergovernmental partners and providing briefings and background materials. Intergovernmental Affairs also facilitates partner participation in the FEMA policy development process by circulating draft policies for comment and providing other opportunities for input. The office articulates the agency's positions and educates customers on FEMA policies and programs by participating in national conferences, sending e-mail notifications, and through regular correspondence. Intergovernmental Affairs is also developing a cadre of disaster assistance employees to serve as primary liaisons to tribal, State, and local officials during FEMA disaster field operations.
- International Affairs works toward developing cross border agreements with international partners in order to support U.S. domestic all-hazards preparedness, response, recovery, and mitigation. The office's work is currently focused on Canada, Mexico, and NATO countries. International Affairs is also responsible for managing the International Assistance System. This system is a set of plans, policies, and procedures for managing international assistance following a disaster.

## **Office of External Affairs Recent and Planned Accomplishments**

### **FY 2007 – FY 2009**

The Office of External Affairs plans to accomplish the following on an annual basis:

#### Intergovernmental Affairs:

- Develop and deploy a cadre of disaster assistance employees to serve as primary liaisons to tribal, State, and local officials during FEMA disaster field operations.

#### International Affairs:

- Identify and coordinate the exchange of technical expertise and emergency management experience with international partners in order to enhance FEMA's all-hazards capabilities. For example, in FY 2007, International Affairs coordinated a video teleconference (VTC) between FEMA and officials in the United Kingdom involved in the subway bombing as one way to ensure FEMA staff have access to the UK's critical experiences in dealing with a major incident underground.

Public Affairs:

- Continue to provide information to the American public that will help them prepare for, prevent, respond to, and recovery from disasters.
- Establish and maintain effective, on-going relationships with the media to promote the agency's programs, goals, and core values.

Legislative Affairs:

- Continue to provide timely information about FEMA and national security issues to members of Congress and will continue the development and implementation of strategies to advance the Agency's legislative initiatives and other interests relating to Congress.

**H) Office of Equal Rights**

The Office of Equal Rights (OER) serves the agency and the Nation by promoting affirmative employment, and a discrimination-free workplace, and equal access to FEMA programs and benefits. OER encompasses the following activities and elements:

- Civil Rights Program entitles any person eligible to receive disaster aid or other services from FEMA to those benefits without discrimination. The Civil Rights Program provides the following services: Technical Assistance, and Complaints Resolution. Technical assistance is provided through policy guidance to the agency in meeting Civil Rights mandates, to include Title VI of the Civil Rights Act of 1964, Section 504 and 508 of the Rehabilitation Act of 1973, and Section 308 of the Robert T. Stafford Emergency Management and Disaster Assistance Act. In disaster operations, staff work closely with community organizations to resolve tensions and eliminate potential complaints. The office also provides assistance to FEMA and the national emergency management community in the effort to make publications, programs, and facilities accessible to people with disabilities. Complaints resolution is provided for anyone who believes they have been discriminated against in receiving services or benefits from FEMA. Disaster applicants can obtain help from an Equal Rights Officer (ERO) through the FEMA Helpline. If the ERO cannot resolve the issue, a formal written complaint may be filed with OER. OER is responsible for processing complaints and ensuring issuing final decisions.
- Equal Employment Opportunity (EEO) Program enforces Federal discrimination laws that cover all FEMA personnel, including DAEs and applicants for employment. This includes Title VII of the Civil Rights Act of 1964, Section 501 of the Rehabilitation Act of 1973 and the Age Discrimination in Employment Act of 1967, as amended. Through the EEO program, OER provides a variety of services, including equal rights training for managers, supervisors, and employees; developing and maintaining an informal and formal EEO discrimination complaint process; providing required training for discrimination complaint investigators and collateral duty EEO Counselors; implementing compliance requirements, and conducting barrier analysis and follow-up for developing a model EEO program as required by DHS Management Directive 715;

increasing resolution of complaints through Alternative Dispute Resolution (ADR); and, proactively recruiting employees and Special Emphasis programs.

## **Office of Equal Rights Recent and Planned Accomplishments**

### **FY 2007**

- Initiated a web-based EEO training program covering the complaint filing process, alternative dispute resolution process, and an overview of FEMA employee rights and responsibilities.
- Maintained capabilities and skills of all EEO investigators, EEO counselors and Equal Rights Officers through annual training.
- Developed agency guidelines to address Limited English Proficiency problems in emergency assistance and civil rights.
- Developed a disability awareness training to ensure managers and supervisors are aware of methods/process of procuring goods and services related to reasonable accommodations.
- Maintained reporting requirements for quarterly and annual reports.
- Developed a plan of action to conduct a compliance review focusing on the Katrina disaster. This plan includes team selection, gathering background information, scope of review, and outline of how the team proposes to conduct the review.

### **FY 2008**

- Continue the development of web-based EEO training programs.
- Maintain capabilities and skills of all EEO investigators, EEO counselors and Equal Rights Officers through annual training.
- Continue agency guidelines to address Limited English Proficiency problems in emergency assistance and civil rights.
- Maintain reporting requirements for quarterly and annual reports.
- Continue with plan of action to conduct compliance review focusing on the Katrina disaster.

### **FY 2009**

- Maintain capabilities and skills of all EEO investigators, EEO counselors and Equal Rights Officers through annual training.
- Continue management training at all FEMA facilities to help in understanding civil rights laws, the application of the laws in the Federal sector and their responsibilities as managers.
- Develop disability awareness training to ensure managers and supervisors are aware of methods/process of procuring goods and services related to reasonable accommodations.
- Develop a plan of action to conduct a FY 2009 compliance review focusing on a disaster from the previous year.
- Maintain reporting requirements for quarterly and annual reports.

### **I) Office of Chief Counsel**

The Office of Chief Counsel (OCC) provides professional legal services to the Administrator, FEMA senior leadership, and the DHS General Counsel on all legal and policy matters before the agency and its organizational elements to support and facilitate the mission and reducing obstacles to the achievement of DHS and FEMA goals. The OCC provides legal assistance to the agency's diverse mission elements, including services related to acquisition, grants, and property management; alternative dispute resolution; budgetary and fiscal law; ethics and contractor integrity; human capital management, labor relations, and equal opportunity; information, intellectual property and privacy

matters; legislation and regulations; litigation and claims; and policy coordination. OCC also provides legal assistance through Field Attorneys, who are located across the United States.

PPA: URBAN SEARCH AND RESCUE

| <b>2009 Current Services</b> | <b>8</b>            | <b>8</b>   | <b>\$32,500</b> |
| 2009 Program Change          | 0                   | 0          | (7,500)         |
| <b>2009 Request</b>          | <b>8</b>            | <b>8</b>   | <b>\$25,000</b> |
| Total Change 2008-2009       | 0                   | 0          | (7,500)         |

FEMA requests \$25.0 million for this activity. This is a decrease of \$7.5 million over FY 2008.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The National Urban Search and Rescue (US&R) system is comprised of 28 task forces that provide a coordinated, national, all-risk capability to assist State and local governments in responding to structural collapse incidents when the President declares a major disaster emergency under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act). These task forces are highly trained and possess the necessary expertise to extricate and medically treat victims in heavy rescue situations.

Each task force consists of two 31-person teams, four canines, and a comprehensive equipment cache. US&R task force members work in four areas of specialization: Search, to find victims trapped after a disaster; Rescue, which includes safely digging victims out of tons of collapsed concrete and metal; Technical, made up of structural specialists who make rescues safe for the rescuers; and Medical, which cares for the victims before and after a rescue.

In addition to search-and-rescue support, FEMA provides hands-on training in search-and-rescue techniques and equipment, technical assistance to local communities, and in some cases Federal grants to help communities better prepare for urban search-and-rescue operations.

**Recent and Planned Accomplishments**

**FY 2007 and FY 2008**

FEMA will use funding to operate and train the existing task forces, maintain the equipment caches, and replace/repair equipment that has been used in training and actual disasters.

**FY 2009**

The US&R program will continue the Operational Readiness Evaluations (ORE) to ensure Task Force readiness capabilities. Performing OREs will ensure that the task forces meet the standardized operational requirements. Because training is an essential part of maintaining operational readiness of the teams, a continual training program will provide a more experienced and robust capability. Additionally, Cooperative Agreement funding to the Task Forces will enable the teams to maintain their operational readiness.

PPA: NATIONAL CAPITAL REGION COORDINATION

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>  |

FEMA requests \$6.3 million for this activity. This is an increase of \$0.342 million over FY 2008.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2009, NCRC will continue its aggressive efforts to advance homeland security and all hazards preparedness in the National Capital Region (NCR), serving as a model for other parts of the country. NCRC will focus on developing a common regional approach to homeland security that results in integrated strategies and interoperability among Federal, State, regional, local and private/nonprofit stakeholders.

As Congress intended in creating NCRC (Homeland Security Act of 2002, Section 882), NCRC is uniquely positioned to bring together the numerous and diverse stakeholders (Federal, State, regional, local, private and nonprofit sectors) of the National Capital Region to proactively address inter-agency, multi-jurisdictional issues that would be difficult for any one stakeholder to complete. Many of these challenges (e.g. interoperability, identity management, and strategic and catastrophic planning) have surfaced in the region because of actual events, including 9/11, anthrax attacks and natural disasters such as Hurricane Isabel. Subsequent events of national scope, including Hurricane Katrina, have once again underscored the need for multi-jurisdictional coordination to proactively address such challenges.

Additionally, NCRC’s daily responsibilities include coordinating and participating in the implementation of national programs and priorities (e.g. the National Response Plan), and numerous major incidents, events, drills and exercises that occur annually in the NCR. NCRC also serves on behalf of the Secretary and the FEMA Administrator as a principal in the NCR’s unique regional governance structure and coordinates regularly with NCR’s Regional Emergency Support functions to improve preparedness in the NCR.

**Examples of NCRC’s Multi-Jurisdictional Coordination Activities**

- **Interoperability and Information Sharing**  
 NCRC will continue prior efforts to ensure integration and interoperability between key Federal, State, regional and local authorities and stakeholders. The focus of NCRC and its homeland security partners is (1) situational awareness - voice and data interoperability, and (2) identity management processes via the landmark NCR First Responder Partnership Initiative (FRPI). NCRC will continue working in collaboration with numerous Federal, State and local partners,

including the region's Interoperability Committee, the National Operations Center (formerly HSOC), DHS and FEMA Chief Information Officers, and other appropriate stakeholders.

- **Strategic Planning and Coordination**

Per Secretarial and Congressional direction, NCRC initiated and facilitated the development of the NCR Homeland Security Strategic Plan, the first regional homeland security strategic planning effort in the Nation. In FY 2009, NCRC will continue coordination of Federal elements of this plan, and will continue supporting State and local implementation. The strategic plan establishes coordinated regional goals and priorities for the enhancement of homeland security and first responder capabilities in the NCR.

- **Catastrophic Planning**

NCRC will continue efforts to address the long-standing need for catastrophic event planning. NCRC will support State and local efforts to integrate jurisdictional plans related to catastrophic events (e.g. evacuation, and shelter-in-place) and with surrounding areas, per the FY 2007 Appropriations Conference Report. Additionally, NCRC will build on its efforts with regard to the coordination of Federal protective measures and protocols (e.g. alert and notification, CBRNE). The uniquely large presence of the Federal Government in the NCR makes the coordination of Federal protective measures and protocols in advance of an incident especially important. In past incidents, unilateral and uncoordinated actions on the part of some Federal agencies have caused confusion and hampered State and local response efforts. As a result, this area is a top priority in the NCR Homeland Security Strategic Plan.

- **Roll Out of National Plans and Priorities**

NCRC will initiate a more sustained effort, working with its regional homeland security partners, to coordinate the implementation of national plans and priorities in the National Capital Region, including the National Response Framework (NRF); National Incident Management System (NIMS); and National Strategy on Pandemic Influenza.

- **Events, Exercises and Drills**

NCRC is called upon to help prepare for, coordinate, lead and/or participate in several dozen events, incidents and drills of mass scale each year, including changes in alert status (e.g. Yellow to Orange), state funerals, Nationally Significant Security Events (NSSEs), July 4<sup>th</sup> Celebrations, demonstrations (e.g. IMF/World Bank) and actual incidents resulting after action reviews (e.g. March 2005 Pentagon/Skyline anthrax scare). Additionally, NCRC will continue facilitating joint (rather than disparate) Federal, State, and local exercise participation in the NCR, home to more exercises than any other area of the country, and integrating lessons learned into future events and exercises, to avoid "recreating the wheel."

- **Regional Governance Participation and Coordination**

The NCRC Director actively participates in the region's unique governance structures and processes. Of special note, the NCRC Director represents the DHS Secretary and FEMA Administrator as a principal member of the Senior Policy Group (SPG), the senior regional decision-making body for homeland security. The SPG is comprised of the Homeland Security Advisors and Directors of Emergency Management from Virginia, Maryland and the District of Columbia (DC) – each of whom represent their respective Governor or, in the case of DC, the Mayor.

The NCRC Director also represents DHS to the Metropolitan Washington Council of Governments and its related committees, including the NCR Emergency Preparedness Committee (private and nonprofit sectors); the Chief Administrative Officers Committee; and the Region's various Emergency Support Functions (R-ESFs), among many others.

On the Federal level, the NCRC Director chairs the Joint Federal Committee (JFC), which represents the Legislative, Judicial and Executive Branches and serves as an important means to develop, coordinate, and implement inter-agency and departmental activities and plans for the NCR. This is just one example of many decision-making and advisory bodies in which NCRC participates to bolster coordination of Federal activities in the NCR.

- **Regional Emergency Support Function Coordination**

NCRC is the Federal homeland security portal to the region's 15 Emergency Support Functions (R-ESFs), as outlined in the National Response Framework (e.g. emergency management; law enforcement; fire, emergency response services and hazardous materials; mass care and medical surge). With additional staff, added in FY 2008, NCRC will be able to work more closely and consistently with selected major ESFs to support and facilitate implementation of regional homeland security priorities, and will continue these efforts in FY 2009.

- **Test Bed for National Ideas and to Solve National Problems**

The NCR is an ideal test bed and, in FY 2009, NCRC anticipates increased pilot programs to test national ideas and initiatives. NCRC will ensure that homeland security pilot programs are adequately coordinated in advance and, where possible, integrated with the plans and operations of affected State, regional and local stakeholders. NCRC, working with its NCR homeland security partners, will assemble a sound knowledge base from which other multi-jurisdictional efforts can draw to improve coordination methods and processes. A portion of this funding will sustain a core component of improving preparedness -- a system for documenting lessons-learned and maintaining the focus to follow-through to correct systemic inadequacies. The unique nature of the NCR and its responsibilities position this office as a model for multi-jurisdictional efforts nationwide.

## **Recent and Planned Accomplishments**

### **FY 2007**

- Supported initial implementation of the NCR Strategic Plan for Homeland Security by State and local partners and coordinated more full Federal integration.
- Demonstrated and coordinated the fielding of a functional First Responder Partnership Initiative credential on a limited basis to achieve multi-jurisdictional physical and logical access at all hazards incidents.
- Conducted extensive coordination and advisory work with the Transportation Worker Identification Credential (TWIC) program and US-VISIT, at their request, to speed adoption of a FIPS 201 technology-compliant approach for all-hazards multi-jurisdictional interoperability of credentialing.
- Coordinated education and outreach sessions on FIPS 201 technology for all hazards multi-jurisdictional interoperability with NRF Emergency Support Functions (ESFs) and NIPP Sector

personnel as Virginia and Maryland move toward state-wide implementation of the First Responder Access Credential.

- Established an operable, secure, communications network using STE, secure cell phones, and secure video conferencing between DHS and State and local jurisdictions and regional authorities.
- Initiated efforts to integrate the DHS HSIN and the NCR's web-based Emergency Operations Center Network (WEBEOC), and to provide NCR stakeholders with early access to other DHS systems.
- Conducted baseline assessment of NCR Operations Centers' capabilities.
- Reviewed occupancy and emergency plans and identified protective measures at selected Federal agencies, along with possible impacts on the community.
- Initiated efforts with State, regional and local partners to align the existing Regional Emergency Coordination Plan (RECP) and other regional plans with the NRF.
- Facilitated and coordinated the NCR's initial implementation of national policy guidance on avian influenza.
- Identified the top ten anticipated problem areas in the event of a pandemic flu outbreak, working with regional partners; facilitated working groups to address selected issue areas (e.g. medical surge and mass care; security; public communications).
- Led, coordinated and/or participated in events, drills, preparation, response, and after actions for several dozen events and exercises.
- Produced an annual report to Congress, per the Homeland Security Act of 2002, and annual reports on NCR/West Virginia/Pennsylvania evacuation planning, per the FY 2007 Appropriations Conference Report.

### **FY 2008**

- Build on catastrophic event planning efforts, utilizing new FTE and resources to support State, local and regional partners in integrating jurisdictional plans, and to coordinate Federal protective measures and protocols, mass care and medical surge planning, and other related activities.
- Support State, local and regional homeland security partners' efforts to implement the NCR Homeland Security Strategic Plan, and conducted initial coordinated initial first stage of Federal protective measures, continue coordination of Federal elements of the plan.
- Coordinate demonstrations with public health, medical, transportation and other stakeholders for all-hazards preparedness, response and surge capacity using First Responder Partnership FIPS 201 technology-compliant credentials for multi-jurisdictional interoperability.
- Strengthen coordination and synchronization of exercises in the NCR, with the new Exercise and Training FTEs actively participating with DOD and State and local officials in the NCR Exercise and Training Operations Panel (ETOP) and exercise and training synchronizing meetings.
- Develop a report identifying all current information sharing protocols and best practices with regard to CBRNE sensors.
- Strengthen interoperability by coordinating agreements between DHS and the NCR for sharing the DHS Critical infrastructure Warning Network and the NCR Interconnection Network.
- Form a Joint Common Operational Picture Committee, JCOP, with Federal, State and local officials to ensure unity of effort to enhance operational situational awareness.
- Assist NCR partners in developing requirements to ensure robust and interoperable telecommuting networks across all levels of government.

- Advanced implementation of the National Response Framework, NIMS and pandemic flu policy guidance; new FTE permit NCRC to more adequately coordinate with the Regional Emergency Support Functions (R-ESFs) and other stakeholders.
- Lead, coordinate and/or participate in planning, preparation, response, and after action reviews for several dozen events, drills and exercises.
- Produce Annual Report to Congress, per Homeland Security Act of 2002, Section 882, and quarterly reports on the status of NCR / WV / PA evacuation planning.

### **FY 2009**

- Coordinate the development of a common emergency notification and response mechanism, working with homeland security partners, to enhance public safety and security operations and emergency notifications within the NCR.
- Further leverage First Responder Partnership Initiative to speed NIMS implementation by expanding the definition of attributes beyond NCRC's pilot work in previous years with the U.S. Fire Administration.
- Strengthen interoperability by integrating additional Federal (DHS) situational awareness and information sharing systems across the NCR, including additional iCAV / HSIN Communities of Interest and also Federal tactical communications systems with NCR Public Safety Communications systems.
- Obtain Concept Plan approval of the Virtual Workplace program which focuses on interoperability of disparate telecommuting systems in place across all levels of government in the NCR.
- Build on FY 2008 efforts to fully field a capability to capture "lessons learned" from incidents and exercises, and integrate them into future activities to ensure continued improvement in preparedness and to minimize "recreating the wheel" with each exercise.
- Build on previous efforts to strengthen operations center coordination, including integration of functional guidelines and best practices; outline a common certification program for Ops Center Technicians; and draft and submit MSEL and exercise injects into ETOP regional-level exercise schedules.
- Introduce all the identified Special Security Areas within the NCR to the Protective Measures Program, building on prior efforts.
- Facilitate a CBRNE stakeholder workshop for Sensor data CONOPS, and develop an action plan for building an integrated information sharing protocol among NCR stakeholders.
- Advanced implementation of the National Response Framework, NIMS and pandemic flu policy guidance; new FTE permit NCRC more adequately to coordinate with the Regional Emergency Support Functions (R-ESFs) and other stakeholders.
- Lead, coordinate and/or participate in planning, preparation, response, and after action reviews for several dozen events, drills and exercises.
- Produce Annual Report to Congress, per Homeland Security Act of 2002, Section 882, and quarterly reports on the status of NCR / WV / PA evacuation planning.

| Total Change 2008-2009       | 0                   | 0          | (2,387)         |

FEMA requests \$40.913 million for this activity. This is a decrease of \$2.387 million over the amount requested in FY 2008 via a separate USFA appropriation.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

USFA prepares the Nation’s fire responder through on-going and, when necessary, expedited training, regarding how to evaluate and minimize community risk, improve protection to critical infrastructure, and be better prepared to react to all hazard and terrorism emergencies. USFA coordinates with other Federal, State, and local emergency service agencies, the private sector, and with colleges, universities and other DHS educational consortium participants. In fulfilling its mission, USFA utilizes the assets of the National Fire Academy (NFA), the National Emergency Training Center (NETC) Facilities and Support Services, the National Fire Data Center (NFDC), and USFA’s National Fire Programs (NFP) Division.

**A) National Fire Academy (NFA)**

NFA promotes the professional development of the fire and the emergency response community and its allied professionals. To supplement and support State and local fire service training programs, NFA delivers educational and training courses having a national focus.

**Recent and Planned Accomplishments**

**FY 2007**

- Delivered 3,010 training programs to 75,675 fire and emergency response personnel.
- Launched NFA OnLine, the USFA’s new web-based learning management system for distance learning training.
- Began development of new preparedness curriculum; 6-day courses and designated 2-week resident courses.

**FY 2008**

- Increase the number of students receiving NFA training programs through USFA’s technology-based distance learning program. The program includes internet course delivery, blended learning courses, web-based graphic simulations, and other online formats such as web casts.

- Plan and initial implementation of the Preparedness Leadership Institute training and education programs.
- Update hand-off courses to include NIMS/NRF, expand modeling in Arson & Prevention curricula, and continue conversion of remaining 2-week to 6-day courses.

#### **FY 2009**

- Continue to expand fire and emergency response training programs through the use of online distance learning program, through the expansion of its fire and emergency services higher education partnership agreements.
- Increase the delivery of NFA courses at the State and local level through the use of State fire training assistance partnership agreements.
- Deliver newly developed training and education programs through the Preparedness Leadership Institute.

### **B) National Emergency Training Center (NETC) Facilities and Support Services**

The NETC Facilities and Support Services manage, operate and maintain the NETC in the most efficient and effective manner providing administrative, operational and emergency services in support of the program activities and special groups at NETC.

#### **Recent and Planned Accomplishments**

##### **FY 2007**

- Managed, operated, and maintained the NETC, providing administrative, operational, and emergency services in support of the program activities and special groups; student admission, registration, ground transportation, and housekeeping services; and scheduled maintenance, repairs, and replacement of capital assets.
- PREPnet continued to provide DHS/FEMA/USFA a television broadcast network capable of reaching large portions of the public in a disaster affected area with critical survival and recovery information before, during, and after catastrophic events.
- Provided administrative support to the Assistance to Firefighter Grant Program peer review and criteria development sessions held at NETC.

##### **FY 2008**

- Manage, operate, and maintain the NETC, providing administrative, operational, and emergency services in support of the program activities and special groups; student admission, registration, ground transportation, and housekeeping services; and scheduled maintenance, repairs, and replacement of capital assets.
- Expand PrepNet's training, education and informational distribution systems to support efforts to reduce community risks and help first responders and the public prepare for, respond to, and recover from natural and man made disasters.
- Provide administrative support to the Assistance to Firefighter Grant Program peer review and criteria development sessions held at NETC.

##### **FY 2009**

- Continue to manage, operate, and maintain the National Emergency Training Center (NETC) in the most efficient and effective manner providing administrative, operational and emergency services in support of the program activities and special groups held at NETC.

### **C) National Fire Data Center (NFDC)**

The NFDC is responsible for the collection, analysis, publication, dissemination and marketing of information related to the Nation's fire problem and USFA programs. It manages USFA research efforts in fire detection, prevention, suppression and first responder health, safety and effectiveness.

#### **Recent and Planned Accomplishments**

##### **FY 2007**

- Disseminated preparedness, prevention, response, and recovery information via printed publications, multimedia kits, website hits, and documented loans to libraries and information centers across America. Updated media for greater ease and speed in access and distribution.
- Completed research studies of responder safety, department communications, residential sprinklers, and cooking fires.
- Enhanced NFIRS data collection and analysis with revised output tool and framework for reporting; new methodologies for coding fire causes and preparing preliminary estimates; and geocoding of database in order to integrate location-based methodologies into analysis.

##### **FY 2008**

- Disseminate preparedness, prevention, response, and recovery information in a variety of formats to reach both professional audiences and the American public.
- Implement revised output tool and framework for National Fire Incident Reporting System (NFIRS) reporting.
- Conduct studies of technologies and operations to improve and enhance responder performance and public safety.

##### **FY 2009**

- Manage the collection, analysis, publication, and dissemination of information related to the Nation's fire problem and USFA programs.
- Enhance first responder performance and public safety by conducting studies of emergency response technologies and operations.

### **D) National Fire Programs (NFP) Division**

NFP is responsible for the development and management of programs that increase the capacity of the Nation's fire and emergency services and the public to prevent, mitigate, prepare for, and respond to local, regional and national emergencies.

#### **Recent and Planned Accomplishments**

##### **FY 2007**

- Developed and disseminated new resident and distance learning response, planning, prevention, public education and preparedness courses and programs.
- Developed and delivered new National Integration Center (NIC), National Incident Management System (NIMS), All Hazards Incident Management Team (AHIMT) Technical Assistance Program,

and Incident Command System (ICS) curricula supporting Department of Homeland Security (DHS), NIC/NIMS/ICS and Urban Area Security Initiative (UASI) priorities.

- Deployed staff and program work to support the rebuilding of the New Orleans fire department post-Katrina, including significant program work in support of the DHS/Katrina response and a tabletop all-hazards exercise. USFA funded staff payroll costs. FEMA funded contract costs with disaster funds.

#### **FY 2008**

- Develop a new one-week resident curriculum; refine NIMS ICS command staff training; develop and disseminate new prevention, public education and preparedness program information and modify existing courses to support emergency preparedness information; develop and pilot experimental distance learning methodologies and related programs addressing reducing the Nation's risk and vulnerabilities to technological hazards.
- Develop, manage, and maintain activities related to USFA's responsibilities in the National Response Framework, Emergency Support Function – 4 (ESF-4: Firefighting).
- Conduct Type 3 State/UASI and Type 4 team developments under the All-Hazards Incident Management Team Technical Assistance Program.

#### **FY 2009**

- Modify existing courses to support emergency preparedness information and develop experimental distance learning methodologies addressing the Nation's risk and vulnerabilities to technological hazards.
- Conduct comprehensive training supporting the NIC and nationwide implementation of NIMS. The training will include new courses in ICS, crisis communications management, and multi-agency coordination.
- Continue activities related to USFA's responsibilities in the National Response Framework, Emergency Support Function – 4 (ESF-4: Firefighting).

#### IV. Program Justification of Changes

**Department of Homeland Security  
Federal Emergency Management Agency (FEMA)  
Management and Administration  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Change 1:** Modernize and Integrate FEMA IT Systems

**Strategic Goal(s) & Objective(s):** Goal 4 - Build a nimble, effective emergency response system and a culture of preparedness, Objective 4.1 and 4.2

**PPA:** Management and Administration Activities

**Program Increase:** Positions: 0 FTE: 0 Dollars: \$20,750

|                        | FY 2007 Actuals |     |                 | FY 2008 Enacted Budget |     |                 | FY 2009 Request |          |                 |

#### Description of Item

FEMA requests \$20,750,000 to develop and implement a multi-year Information Technology Plan that will guide the agency's capital IT investments and the requirements needed to sustain IT at all levels of FEMA. Employing technology as a strategic tool is crucial to FEMA's success in meeting the challenge of becoming the preeminent emergency management agency. In FY 2009, FEMA's Office of the Chief Information Officer (OCIO) requests resources to make investments in four major areas: Enhancement of Current Mission Systems; Enhancement of Current Business Systems; IT Infrastructure and Cyber Security; and Systems Engineering and Applications Development. Requested funding increases reflect implementation of FEMA's Five-Year IT Master Plan, which has been briefed in detail to the DHS CIO. The investment items described in the sections below were developed to be interdependent, maximizing the efficacy of each investment dollar.

#### Justification

##### **A) Enhance Current Mission Systems (\$2,477,000)**

To meet operational needs, FEMA must achieve information technical superiority in its core mission areas. Technical superiority can only be achieved through careful planning, investment, and management of FEMA's IT processes and systems. FEMA can achieve this goal by devoting resources to three key areas:

- **Implement an improved capital planning and investment control (CPIC) process:** In 2009, the FEMA OCIO will implement a rigorous capital planning and investment control process that complements the Investment Working Group (IWG) chaired by FEMA's head of Program Analysis and Evaluation. The process will use automated tools and yield investment

recommendations based on three measures: Interoperability and information sharing; Security; and Cost efficiency. The improved CPIC process will ensure that FEMA makes IT investments that are best able to support its core mission.

- **Establish and Implement Procedures for Technical Support (\$316,000):** The CIO will establish and implement well-documented procedures to provide cost-efficient, state-of-the-art technical support. The agency will be able to resolve all technical issues on par with industry standards.

### **B) Enhancement of Current FEMA Business Systems (\$3,000,000)**

FEMA's current IT business systems cannot meet the needs of a 21<sup>st</sup> century Federal agency. The agency's current systems are not "best in class" technologies, nor do they provide managers with real-time decision-making information. FEMA needs to enhance its current IT business systems, integrating and streamlining its financial management and workforce management processes. These enhancements will provide an efficient means of budgeting, bill paying, receipt management, asset management, and cash management. Resources will be used for the following:

- **Integrate FEMA's Acquisition, Human Resource, and Financial Management Systems:** In FY 2009, OCIO will design the interface that will allow FEMA's new acquisition system (PRISM) to share information with FEMA's next generation Human Resources and Financial Management systems. Integrating FEMA's Acquisition, Human Resource, and Financial Management Systems ensure that FEMA operate seamlessly with IT solutions used in the DHS and national security enterprise. These improvements will provide managers with real-time decision making information.
- **Enhance FEMA's Financial Management System (IFMIS):** FEMA will replace IFMIS with a new financial management system that interfaces with the acquisition and human resource systems. The new system will strengthen FEMA's financial monitoring capabilities through better tracking of resource levels and spending patterns. The increased functionality of the new system will ensure that FEMA's financial business function provides the best support possible to disaster victims, grant recipients, State, tribal, and local entities, DHS, and its components.

### **C) IT Infrastructure and Cyber Security (\$9,136,000)**

As FEMA enhances its mission and business systems, the agency must invest in leading edge infrastructure technology that meets established security requirements. In FY 2009, FEMA will use additional resources to accomplish the following:

- **Invest in Leading Edge IT Security:** In 2009 the OCIO will continue to acquire and implement software that provides Disk Encryption for all FEMA desktops and laptops. Acquiring and implementing IT security software ensures that the FEMA's IT environment is protected, its data is secure, and that the agency complies with all DHS and Federal security guidelines. These funds will significantly reduce FEMA's vulnerability to cyber attack and security breaches.
- **Implement IT Infrastructure Solutions:** In conjunction with implementing IT security software solutions, the OCIO will replace outdated document imaging and client server technologies throughout the agency. Replacing outdated technologies with state-of-the-art hardware will dramatically increase performance and reduce vulnerabilities by lessening the number of servers and leveraging advanced security features inherent in the modern hardware.
- **Begin FEMA Upgrade to Oracle 10g:** In FY 2009, the OCIO will upgrade the agency to Oracle 10g. The upgrade will ensure that FEMA's IT data is available to all authorized users and that the agency's critical mission and business systems share data seamlessly with DHS and outside agencies. Without this upgrade, FEMA's systems will require multiple inefficient

and costly interfaces to share information.

#### **D) Systems Engineering and Applications Development (\$6,137,000)**

FEMA will begin implementing a Five-Year IT Master Plan that will enable faster change, eliminate legacy systems, provide the capability to recover mission and business critical systems, and reduce IT maintenance cost. The increase in funding supports initiating the plan and implementing the first year of the plan. Specifically, financial resources will be allocated to the following initiatives:

- **Implement Phase I of the IT Master Plan:** The initial phase of the IT Master Plan includes a comprehensive assessment and review of all mission critical and support systems (including NEMIS and the Logistics system) and services against the Agency Enterprise Architecture target architecture. This phase includes a review of mission alignment, support of data sharing, security and the maturity of the supporting technologies. This analysis will identify the systems that will be eliminated or transformed to support critical functions. An EA assessment and analysis ensures that FEMA's IT environment interoperates and shares information in the DHS enterprise. It will also evaluate system security and cost-efficiency.
- **Eliminate Legacy Systems and Transition Remaining Systems:** Legacy systems identified for elimination will be phased out of FEMA's inventory and the remaining systems will transitioned to consolidated computing service environments. The transition ensures that FEMA's IT environment is stable, its data assured and available to all authorized users within the agency, DHS, and the larger National Security enterprise. It also will reduce and harden the network entry points against cyber attack with state-of-the-art security technologies. Without these funds, FEMA will continue to pay for a multitude of infrastructure configurations spread across the country, and IT assets will not be used to their full capabilities.
- **Transition to DHS OneNet:** The transition to DHS's OneNet complements the transition to the consolidated computing services center. The consolidation of FEMA's network onto a centrally managed and defended department-wide network will significantly reduce the costs to lease circuits used by each DHS agency accessing the Internet. The transition to OneNet ensures that FEMA obtains cost efficiencies by leveraging the department's IT enterprise environment, which is stable, assured and available to all authorized users within the agency.
- **Implement Agency-wide Enterprise Data Solution:** To fully realize the savings derived from consolidated computing and data centers and the physical network infrastructure of OneNet, FEMA will implement an enterprise data management solution to support service management, data access, and data sharing requirements for all authorized users. This data solution ensures that FEMA's IT environment is stable, its data assured and available to all authorized users within the agency. Storage Area Networks and Operational Data Stores will be used to their full capabilities.
- **Upgrade COOP Capability for Mission Critical and Business Systems:** Supporting the FEMA mission relies on the availability of critical systems in the event of catastrophic failure of primary systems. FEMA's current technology and operations infrastructure does not effectively support a comprehensive Continuity of Operations (COOP) capability. In 2009, FEMA will implement storage, application, and support solutions in a consolidated computing services environment, where the information, applications, and other services used by mission critical and business systems will be stored and replicated. Upgrading FEMA's COOP capability ensures that the agency's systems can recover from outages and continue to support the mission.
- **Implement Web-Based Grants Management Function:** FEMA plans to retire the legacy approach to achieving the functionality of the Grants Management application and begin implementing a web-based, electronic Grants Management Program. Implementing a web-

based grants management function ensures that grant applicants have access to an easy-to-use application that shares information with all entities involved in the grants process. This investment will increase the efficacy of the application, reduce hardware needed to support the legacy application, and save funds.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

Significant improvements and upgrades to FEMA's IT systems, hardware, and processes, are critical to the agency's ability to support emergency preparedness and response. FEMA's mission requires numerous IT systems that should be able to communicate with each other, providing a seamless interface that supports faster, better-informed decision making. FEMA needs an IT infrastructure with security protections equal to the agency's role in homeland security. Without these enhancements, FEMA will be working to address 21<sup>st</sup> century problems with 20<sup>th</sup> century technology, and jeopardize attainment of DHS's strategic goal to "build a nimble, effective emergency response system and a culture of preparedness."

| <b>Total Request</b>   |                |     |                 |                        |     |                 | <b>0</b>        | <b>0</b> | <b>\$10,000</b> |

**Description of Item**

FEMA requests \$10,000,000 for infrastructure improvements (capital, repairs and maintenance). From space requirements on expiring leases to the expansion of new and current facilities these funds will significantly help close the funding gap currently realized. Health and safety improvements will also be made FEMA-wide.

**Justification**

FEMA’s headquarters and most of FEMA’s Regional Offices are located in leased facilities. In FY 2009, the headquarter lease and five of the nine regional office leases will expire. FEMA requests \$10,000,000 in preparation and anticipation of a move for any of these locations. In addition to the expirations expected in FY 2009, there are two leases expiring in FY 2010 and two in FY 2013.

All leases entered into by the Federal government have a termination clause and an expiration date. As the Nation’s landlord, the General Services Administration (GSA) will determine whether FEMA will remain in these current locations or move to other sites. However, Federal agencies are required to acquire the funding necessary for relocation, to include the costs of new leases, security, IT infrastructure, furniture installation, electricity at the new space, common space fit out, and move costs.

Each of the FEMA Regional Offices accommodates between 75 and 90 occupants. The estimate for each regional office is \$2 million per office. The five regions scheduled for lease renewal and/or relocation costs for FY 2009 are: Region I (Boston), Region II (New York), Region III (Philadelphia), Region V (Chicago) and Region VIII (Denver).

The FY 2009 funding request does not include an estimate for the relocation and new lease costs for the headquarters facility. DHS has undertaken a long-range plan to relocate many of the Washington,

DC agencies into one secure facility. FEMA will make every effort to extend its current headquarters lease in anticipation of the outcome of the DHS plan.

**Description**

In FY 2007 and 2008, FEMA initiated Phase I of transforming FEMA into the *Nation's Preeminent Emergency Management Agency*. Through our vision for a New FEMA, we are strengthening core capabilities, competencies, and capacities; building strong Regions; strengthening our partnerships with States; and professionalizing the national emergency management system. By focusing on core capabilities and the partnerships and people that comprise the Nation's preparedness and emergency management system, we are able to marshal an effective national response; deliver service of value to the public; reduce vulnerability to life and property; and instill public confidence. Following these guiding principles, we will continue with Phase II to build FEMA's operational core competencies and use requested resources as follows:

| Initiative                                   | FEMA Program        | Funds    | Pos | FTE |
|--|---------------------|----------|-----|-----|
| • Incident Management – IMATs                | Disaster Operations | \$5,046  | 15  | 8   |
| • Incident Management – NRCC/RRCC 24/7 Watch | Disaster Operations | \$1,898  | 15  | 7   |
| • Operational Planning                       | Disaster Operations | \$1,265  | 10  | 5   |
| • Emergency Communications – MERS            | Disaster Operations | \$2,200  | 0   | 0   |
| • Transform Logistics Management             | Logistic Management | \$10,295 | 30  | 15  |
| • Service to Disaster Victims                | Disaster Assistance | \$1,012  | 8   | 4   |
| • Hazard Mitigation – Risk Reduction         | Mitigation          | \$4,006  | 4   | 2   |

**Justification**

- **Disaster Operations.** The additional funding request for Disaster Operations is \$10,409,000, 26 positions and 20 FTE

FEMA's ability to marshal an effective response to disasters must be based on a professional, national network of emergency managers skilled in incident management, operational planning, and emergency communications. At all levels of government, emergency management personnel must be trained and certified experts who operate well together across the full spectrum of emergency management planning and operations. FEMA must be more than a facilitator and standard bearer for the profession of emergency management. FEMA must be a leader and model of effective implementation of disaster operations. The following provides a further breakdown of how the requested funding for Disaster Operations will be used.

❖ *Incident Management – IMATs – \$5,046,000, 15 Positions, and 8 FTE.*

Incident Management is more than a process as it has inherent operational aspects in the form of sustained situational awareness; a command, control, communications and coordination system comprised of a national and regional command and coordination centers; national and regional incident management assist teams; and it promotes the integration and synchronization of preparedness across jurisdictions and at all levels of government.

Incident Management Assessment Teams (IMATs) are a critical element in the development FEMA's incident management competency, and fulfill the 2006 Post-Katrina Emergency Management Reform Act (PKEMRA) mandate to establish national and regional dedicated response teams. The primary mission of a FEMA IMAT is to rapidly deploy to an incident or incident-threatened venue, provide leadership in the identification and provision of Federal assistance, improve situational awareness, and coordinate the integrated inter-jurisdictional response in support of the affected State(s) or US territories. The national teams are envisioned to have the capability to establish an effective Federal presence within 12-hours of notification, to support the State, coordinate Federal activities, provide initial situational awareness, and to be self-sufficient for a minimum of 48 hours to augment potentially scarce local resources.

In FY 2009, the requested increase will support the stand-up of one additional Regional Incident Management teams. This IMAT will join regional teams established in FY 2007 in Regions 4, 5, and 6 and projected for Region 2 in FY 2008, along with the national IMATs to be stood-up in the National Capitol Region (FY 2007) and Western section of the United States (FY 2008). As envisioned, the full complement of 10 regional and three national teams would be in place by FY 2010, contingent on availability of the necessary budget resources. In addition to staff IMAT funding will:

- Maintain recurring costs for teams established in FY 2007 and FY 2008.
- Enable procurement of equipment (laptops, cellular phones, blackberry, personal gear).
- Purchase 2 SUV-type & 2 IRV situational awareness and communications support vehicles.

In addition to fulfilling a Congressional Mandate, the IMAT program is a vital element of FEMA's plan to more effectively establish a forward Federal presence. The teams will aid significantly in facilitating the delivery of Federal support to meet the emergent needs of the State and local jurisdictions. This program will be negatively impacted in several ways if this program increase is not funded:

- FEMA will continue to lack a full time trained and dedicated staff to rapidly respond to and provide immediate assistance to State and local officials.

- Lack of full funding will impact the implementation timeline, which will result in disparity between the regions' ability to meet their disaster response responsibilities.
  - This capability gap is mission critical to FEMA and will directly affect its success during future catastrophic events. If not addressed, expect a significant loss in command and coordination support capabilities, required by FEMA to manage large scale disaster operations.
- ❖ *Incident Management – NRCC and RRCC 24/7 Watch Capabilities – \$1,898,000, 15 positions, and 7 FTE.*

The National Response Coordination Center (NRCC) is the operational arm of the Department of Homeland security (DHS) National Operations Center (NOC) for all hazards response and recovery operations. FEMA will move towards 24/7 operational awareness capability at both the NRCC at headquarters and the agency's ten Regional Response Coordination Centers (RRCCs) by adding 15 positions and making needed upgrades to equipment and facilities. Combined with existing resources, the additional positions will allow for achievement of the significant goal of establishing a sustainable 24/7 watch in hurricane prone regions. The additional staff will help establish and maintain a steady watch operation capable of providing senior leadership with decision making information; activating, deploying and coordinating the initial Federal response; and providing accurate and timely status updates. This increase further enhances FEMA's ability to act swiftly and decisively in both notice and no-notice all-hazard events to activate and coordinate Federal response actions.

Funds will also be used to upgrade the NRCC to function at classified level, which may require SCIF modifications, and to establish duplicate capabilities at the NRCC COOP site at the Mt. Weather Emergency Operations Center. The NRCC currently operates at an unclassified level which limits options when incidents need to be discussed at the classified level. Many of our Federal partners operate at the SECRET level in everyday operations. Until the NRCC has that capability, it can only operate at the unclassified level. This does not support FEMA's strategic vision for the future.

- ❖ *Operational Planning – \$1,265,000, 10 positions, and 5 FTE.*

FEMA Operational Planners assist State and local jurisdictions in developing specific operational plans that guide their response activities. Through our regional offices, FEMA works with States to ensure the development of coordinated and integrated State-Federal plans. As an example, FEMA Operational Planners provide technical planning assistance to States in developing evacuation plans, assessing storm surge estimates, evacuation zones, evacuation clearance times, transportation capacities, and shelter capacities. The increase in resources in Phase II will allow us to expand our capability in working with our State partners in developing operational planning capabilities.

The funding increase will also augment newly-assigned operational planners with contract planning support to address critical planning shortfalls both FEMA-wide and in the regions.

If this initiative is not funded, FEMA HQ and Regional Offices will be unable to meet the requirements to develop and maintain operational plans in support of the 15 National Planning scenarios. During FY 2008, FEMA intends to implement a national comprehensive, integrated planning capability in concert with DHS that will ensure consistent direction, clear roles and responsibilities, and adequate resources to directly support State and local planning efforts.

Operational planners will build off the Gap Analysis Tool products to ensure Federal plans directly support State and local plans. Reduced funding will significantly hamper this effort.

❖ *Emergency Communications – MERS – \$2,200,000, 0 positions, and 0 FTE.*

Mobile Emergency Response Support (MERS) is one of DHS/FEMA's most valuable disaster emergency communications mission support assets. It must be maintained as a highly capable organization to ensure effective catastrophic disaster interoperable communications response support consistent FEMA's Vision for emergency communications. During an event, FEMA employs its MERS and the Mobile Air Transportable Telecommunications System (MATTS) capability to support the Joint Field Office (JFO) and to assist State offices of emergency communications. The MERS and MATTS teams deploy tactical command, control, and communications (C3) vehicles designed to provide voice, data, and video to FEMA's national and regional Incident Management Assistance Teams (IMATs).

Measures are required now to strengthen the MERS program with additional personnel and state-of-the-art emergency communications capabilities to meet demonstrated command, control, and communications requirements with Federal, State, tribal, and local response organizations across the full spectrum of natural and manmade all-crisis events. The funding increase will primarily fund new equipment purchases in each of the 10 regions to maintain and support communications systems. More specifically, funds will increase FEMA's large capacity communications systems with the ability to deliver T-1 carrier links to first responders. Investments will include a combination of Tactical Incident Response Vehicles, Tactical Network Switch Vehicles and Power Generation Equipment units.

The MERS enhancements funded by this increase will support the ability to rapidly deploy emergency response support anywhere in the United States and its insular area. Effective communications brought by MERS will enhance command and control to IMATs and other specialized teams. Critical communications during the initial phases of the disaster can be the decisive variable in an effective response.

MERS will address issues documented in the GAO Report to Congressional Committees, "*Catastrophic Disasters*" dated September 2006; "*Hurricane Katrina Lessons Learned Status for the President's Management Agenda*," specifically Critical Action #3 for rapid deployable communications; and DHS OIG Report "*A Performance Review of FEMA's Disaster Management Activities in Response to Hurricane Katrina*."

Without the program increase, FEMA's development of core competencies in disaster emergency communications will be negatively affected. FEMA will continue to lack an in-depth rapid emergency communications response capability. This threat, if not addressed, will likely cost lives and increase victim suffering as demonstrated during 9/11 and Hurricane Katrina. Filling the current capability gap is mission critical to FEMA and will directly affect its success during future catastrophic events. If not addressed, a significant loss in operational support capabilities, agility, and interoperable disaster emergency communications, required by FEMA to manage large scale disaster operations, can be expected.

- **Logistics Management.** The funding request for Logistics Management is \$10,295,000, 30 positions, and 15 FTE.

FEMA has an important dual role to play in disaster logistics. FEMA is, first and foremost, the overall national leader for coordinating and activating the all-source availability, arrival, deployment and mobilization of assets, teams and other Federal capabilities in support of State requirements. FEMA is also a recognized direct provider to States of core logistics support, including disaster commodities, when ne. To meet its dual responsibility as both national coordinator and direct provider, FEMA adopted a new approach to disaster logistics management that required an innovative balance of manpower, processes, strategic partnerships, and technology. To establish this competency, FEMA identified resources – in terms of dollars and permanent full time positions – for redefining Logistics Management, establishing a Logistics Directorate, and employing an inclusive methodology to establish strategic partnerships, and new paradigms for State-FEMA relationships.

The FY 2008 President’s Budget request set-out Phase I, which directed resources toward foundational elements of the Logistics Management Directorate. This request increases funding for Phase II, provides further resources to fully constitute the Logistics Management Directorate, and institutes an efficient and effective regional and State partnership to facilitate a seamless end-to-end logistical system.

The 30 additional positions will help to institutionalize command and control of strategic logistics planning, operations, and management while pushing operational control down to the most effective level of execution. Positions are currently envisioned to include:

- *Logistics Planners (Regions 20 positions)* – To enhance regional logistics planning capabilities.
- *Logistics Planners (HQ 2 positions)* – To develop effective, coherent, executable logistics plans and exercises.
- *Logistics Operations Specialists (HQ 2 positions)* – To assist in management and execution command and control, tracking and reporting for all hazards logistics operations.
- *National Emergency Housing Unit Site Managers (6 positions)* – To ensure accountability at the emergency housing units.

These positions are critical to ensure better internal management controls, accountability as well as the development of FEMA’s logistics capabilities.

Increased funding will support:

- *Transformation to & maintenance of a robust logistics capability.* Based on the outcome of Logistics Management Transformation Initiative’s Consultant Inventory (Phase I), FEMA will transition and incorporate a comprehensive Third Party Logistics environment into the logistics structure. A third-party logistics provider (3PL) is being considered that would provide outsourced logistics services for some or all supply chain management functions – this could include, for example, warehousing and transportation services. As of 4<sup>th</sup> quarter FY 2007, the Logistics Management Directorate is working to hire a consultant to conduct an inventory of existing practices and capabilities to determine what, if any, elements of the Logistics Management Directorate should be and/or could be considered for privatization.
- *Effective management the national transportation mission (to be transferred from DOT December 31, 2007).*

- *Implementation & maintenance of a modernized enterprise logistics property management system.* Acquire new systems, upgrades, enhancements, and inter-faces.
  - *Development & maintenance of a logistics management certification program.* Establish a certification program for agency logisticians to ensure a pool of technically qualified personnel and a robust logistics community.
- **Disaster Assistance.** The funding request for Disaster Assistance is \$1,012,000, 8 positions, and 5 FTE

The Disaster Assistance Directorate is responsible for delivering high-impact Individual and Public Assistance Programs in the aftermath of a Presidentially-declared major disaster or emergency. Following Hurricane Katrina, operational lessons learned highlighted the following issues in support of expanded staffing:

- Identified a critically insufficient number of personnel with Individual Assistance expertise, especially at the management level, to support Hurricanes Katrina/Rita.
- Compromised regional ability to support program/disaster activities due to staff drainage in support of Gulf Coast requirements.
- Impact of new legislation, White House, and internal requirements have produced an immense increase in the scope of and expectations for the disaster assistance mission, associated programs, and processes.
- Expanded responsibilities, such as the assignment of FEMA as the primary agency for ESF#6, Mass Care, Emergency Assistance, Housing, and Human Services, requires additional support to effectively manage.

Additionally, during FY 2007, FEMA underwent a major reorganization guided by the New Vision for FEMA that resulted in major changes for the Disaster Assistance Directorate at Headquarters and in the regions. In order to address the issues outlined above and appropriately staff our new organizational structure, the Disaster Assistance Directorate (DAD) identified leadership and Subject Matter Expert gaps and used FTE provided in FY 2007 to address them at Headquarters (focused on Individual Assistance management requirements), Regional Offices (focus on Individual Assistance), and the National Processing Service Centers (NPSCs). In FY 2008, DAD plans to use anticipated FTEs to further bolster regional capabilities, specifically division management and the Individual and Public Assistance Programs, as well as address remaining leadership gaps at Headquarters.

**Mitigation.** The funding request for Mitigation is \$4,006,000, 4 positions, and 2 FTE.

The requested FY 2009 increase in FEMA mitigation is for Risk Reduction. Risk Reduction creates safer communities by proactively reducing risk and enhancing the capability of States and local communities to reduce their risk from natural hazards. After disasters, delivery of hazard mitigation assistance encourages future resilience. The requested funding supports enhancements to the National Earthquake Hazards Reduction Program (NEHRP) and Building Science programs.

The requested funding and positions support the implementation of the “Ramp-Up Initiatives” identified over the last year. These “Ramp-Up Initiatives” (the name given to this initiative by the cooperating agencies is “NEHRP Ramp-Up Program Plan”) have been briefed to Administration representatives within the four agencies [National Institute of Standards and Technology (NIST), U.S.

Geological Survey (USGS), National Science Foundation (NSF), and FEMA] for consideration for increases in FY 2009 and beyond.

This investment directly advances the DHS priority of renewing emphasis on earthquake risk reduction and designing and implementing new strategies for reducing catastrophic earthquake risk. The largest portion of this request is for an increase to State grants. These grants enable States to implement earthquake mitigation activities they cannot implement without NEHRP funding. The grants mainly focus on State capability to conduct earthquake assessments for existing buildings and critical infrastructure, planning, and public education regarding seismic risk. These seismic readiness and risk reduction initiatives, similar to the New Madrid catastrophic planning effort currently underway, cannot be implemented without FEMA NEHRP funding. The additional positions will possess the necessary technical skills and knowledge to staff the ramp-up effort, as well as the critical technical capacity for planning and assessment. Funding the Ramp-Up initiative is critical to implementing the overall Federal NEHRP strategic plan.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

The requested funding increase will enhance FEMA's ability to successfully achieve DHS Strategic Goal 4: Build a nimble, effective emergency response system and a culture of preparedness. Funding increases will strengthen FEMA's core competencies and move the agency towards its vision of being the Nation's Preeminent Emergency Management agency.

*DHS Response and Recovery Mission* – The follow initiatives support achievement of DHS Objective 4.1 - Response and Recovery: Incident Management – IMATs, Incident Management – NRCC/RRCC 24/7 Watch, Operational Planning, Emergency Communications – MERS, Transform Logistics Management, and Service to Disaster Victims.

*DHS Preparedness Mission* – The following initiatives support achievement of DHS Objective 4.2 Preparedness: Hazard Mitigation, Integrated Preparedness and IPAWS.

Activities under each of these initiatives contribute in critical ways to the attainment of DHS's strategic vision for its Response, Recovery and Preparedness missions, and specific performance targets established in FHYSPP. The increases provide essential resources as FEMA's continues its development into a more robust emergency management agency. While great progress was made in FY 2007 and is anticipated for FY 2008, the transformation of FEMA is a multi-year project requiring a solid and sufficiently funded annual budget. All of the initiatives outlined here will make a difference, but they must happen together. Proficiency in Incident Management cannot happen without successful Operational Planning and reliable Emergency Communications – and proficiency within any of the core competencies will not be possible if we do not adopt a business approach for achieving results, as outlined in the requests under the Operations, Management and Administration PPA.

**Department of Homeland Security  
Federal Emergency Management Agency (FEMA)

| <b>Total Request</b>   |                |     |                 |                        |     |                 | <b>1327</b>     | <b>1309</b> | <b>\$258,060</b> |

**Description of Item**

A critical component of realizing the vision for a new FEMA is building the management capacity, administrative processes, and staff levels necessary to manage and support changes to FEMA’s programs. Stronger business processes will ensure that FEMA’s emergency preparedness and response programs can focus on their core missions rather than administrative tasks and challenges. The funding requested for capacity building will support the offices and activities described below:

| <b>FEMA Office</b>                    | <b>Funds</b>    | <b>Pos</b> | <b>FTE</b> |
|---------------------------------------|-----------------|------------|------------|
| Regional Administration               | \$ 1,263        | 4          | 2          |
| Office of Policy and Program Analysis | \$ 1,498        | 5          | 3          |
| Office of the Chief Financial Officer | \$ 3,070        | 20         | 10         |
| Office of Chief Counsel               | \$ 347          | 2          | 1          |
| Office of Management                  | \$ 1,851        | 5          | 3          |
| <b>Total</b>                          | <b>\$ 8,029</b> | <b>36</b>  | <b>18</b>  |

**Justification**

- **Regional Administration.** The funding request for Regional Administration is \$1,263,000, 4 positions, and 2 FTE.

This increase will help support the management of FEMA’s Regional Offices through an increase in the Office of Regional Operations (ORO). Additional staff will provide stronger management, guidance, and support services from headquarters to the regions. The new positions will help Regional Administrators strengthen collaboration and cooperation with their State counterparts and support

Administration and Resource Planning Division (ARP) activities related to human resources, acquisition, grants management, IT, budgeting, and financial management. The four positions will increase the current ORO staff level by 50%, doubling the office's ability to provide planning guidance, management support, and technical assistance to FEMA regions. Regional communication and coordination will become stronger, the Regional Administrators and Regional Offices will have an increased ability to manage and direct response and recovery from disasters, emergencies, and terrorist attacks. Without these additional positions, ORO will be unable to meet the growing needs and demands of the Regional Offices or to provide the offices with the resources necessary to fully support the regions' role in emergency response.

Specifically, the Office of Regional Operations requests the following new positions:

- Executive Officer (1 position) to serve as Policy Advisor to the Associate Deputy Administrator (ADA) and perform liaison functions between Regional Administrators (RAs) and the ADA.
- Program Analysts (2 positions) to provide IT support, human resources guidance, preparedness expertise and guidance to the regions and to execute special initiatives for the ADA. The positions will strengthen the core competencies and capabilities of the regions by delivering specific expertise to guide and support regional functions and duties specified by Homeland Security Presidential Directives.
- Administrative Assistant (1 position) to perform travel management, event coordination, and human resources functions for the Associate Administrator and ORO.

In addition to new positions, the Regional Administration funding request will provide equipment and IT resources for ORO staff and will support the added operating costs for new staff members. Funds will also be used for staff development and professional development training for ORO and Regional Office personnel, as well as to support planning efforts for expanding the role and authority of Regional Offices.

- **Office of Policy & Program Analysis.** The funding request for the Office of Policy and Program Analysis is \$1,498,000, 5 positions, and 3 FTE.

In October 2006, FEMA created the Office of Policy and Program Analysis (OPPA). OPPA provides leadership, analysis, coordination and decision-making support on agency policies, plans, programs, and key initiatives. The requested funding will support positions in the Policy, Program Analysis and Evaluation, and Transition/Transformation components of the office. Funding will continue the planned growth of this organization and the professional development of both current and future employees. Additional staff will bolster FEMA's efforts to conduct further analysis and evaluate existing FEMA policies, plans, programs, and key initiatives. The staffing increase will provide enhanced capability to connect program budgets to strategy and policy, providing the Administrator with sound analyses to determine priorities among FEMA's competing resource needs. This capability is critical to advancing FEMA's strategic vision of capacity building for its business activities by institutionalizing a results-oriented, return-on-investment management culture. The requested funds will support OPPA's efforts to develop guidance on FEMA's policy development process and to establish an agency-wide policy system. Additional OPPA staff will also be used to conduct more evaluations of current FEMA data and performance measures, resulting in refined data and measures that better evaluate FEMA's success. Quantitative performance measures are a requirement for

justifying FEMA's programs throughout the budget process, and this effort will support DHS's FYHSP process.

OPPA's work is essential to providing the data and analysis necessary for FEMA's Administrator to implement the agency's new strategic vision. The office's stronger analytical capacity will ensure the objective prioritization of funding across FEMA's programs, directly advancing the department's strategic priorities.

- **Office of the Chief Financial Officer.** The funding request for the Office of the Chief Financial Officer is \$3,070,000, 20 positions, and 10 FTE.

In FY 2009, the Office of the Chief Financial Officer (OCFO) requests 20 new positions to continue the implementation of a more efficient financial management organization. The additional staff will augment FEMA's current budget personnel so that the OCFO can provide stronger analysis and oversight of agency resource needs and provide better and more comprehensive support to FEMA customers for budget execution support and reporting. The new positions will provide greater support to the budget offices in the program offices and regions. These staff will assist in interpreting and applying program/organizational requirements to the budget process. In addition, six of the new positions would be used to strengthen and expand internal control and financial management policies. These positions would allow FEMA to implement and manage policies and processes for internal controls over financial management and would provide an increased capacity for development and interpretation of financial policy. The funding increase will also be used for professional development/certifications, and the development of tools for budget data analysis.

- **Office of Chief Counsel.** The funding request for the Office of Chief Counsel is \$347,000, 2 positions, and 1 FTE.

The additional positions requested for the Office of Chief Counsel (OCC) will support the department and the agency's regulatory and policy program. With the Post Katrina Emergency Management Reform Act, the 9/11 Act, and other Congressional legislation, FEMA must continually add new regulations, revise existing regulations, and issue guidance. The current regulatory team is overburdened and struggling to meet the demands placed upon them by DHS and agency needs. Faced with the newly implemented requirements on the issuance of significant guidance documents, current staff have been stretched to achieve new goals and have not been able to afford sufficient attention to improving the agency's regulations.

The requested attorneys will draft new regulations, aid in the removal or revision of obsolete and/or inconsistent regulations that often pre-date DHS's creation, assist in issuing guidance to the private sector on homeland security-related matters, and support compliance with new Presidential mandates concerning legal review and processing of significant guidance documents. Without these assets, the agency may continue to be restricted by outdated and obsolete regulations that limit its action. It could fail to meet legislative mandates and may not meet Presidentially mandated requirements with respect to significant guidance documents. Additional attorneys are necessary to ensure that the new FEMA will have the regulatory framework essential to achieving its mission.

The post-Katrina environment has demonstrated that new regulations are critical to effectuating optimal delivery of disaster assistance and customer service. The creation of clear, consistent and

organized regulations and policies would not only allow FEMA and the Department of Homeland Security to run smoothly before, during, and after a disaster, but would allow other agencies within and outside DHS, as well as the general public, to rely upon FEMA regulations with confidence.

- **Office of Management.** The funding request for the Office of Management is \$1,851,000, 5 positions, and 3 FTE.

During FY 2007, the Office of Management (OM) was created as part of the “New FEMA” to better align the agency with lines of business of the department. FEMA’s Office of Management provides oversight and leadership to five service organizations:

- Office of Human Capital (OHC).
- Office of Facilities Management and Support Services (OFM).
- Office of Information Technology Services (OIT).
- Office of Acquisition Management (OAM).
- Office of Security (OS).

The consolidation of these support units under one organization head promotes the integration and synchronization of service across jurisdictions and at all levels of FEMA.

FEMA requests an increase of five positions to be used in the OM Executive Office and Office of Acquisition Management (OAM). These positions will allow the executive level of OM to strengthen its oversight of the service organizations and their ability to support the agency-wide mission. The resources will also help OAM manage the emerging acquisition requirements in an efficient and timely manner. This program increase addresses the lack of staff needed to manage FEMA’s emerging acquisition requirements in an efficient and timely manner and to support managing those acquisitions through their entire lifecycle. Also, this request aids in building an efficient acquisition process that incorporates the right policies, systems, and procedures, supported by the appropriate workload distribution, and establishes contract management as a key skill set within the agency. These resources are crucial to accomplishing as much pre-event procurement as possible, ensuring that when an event occurs all that remains is the order to activate the necessary assets and resources. In addition to staff increases, this request provides funds for the Office of Human Capital to increase FEMA-wide staff and professional development opportunities. Among the items to be included are professional certifications, tuition assistance, and leadership training.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

The requested funding increases support the DHS Strategic Goal of building an effective, nimble emergency response system and a culture of preparedness. The initiatives outlined above are essential as FEMA continues implementation of an improved business approach. These management and administrative activities provide critical support infrastructure without which FEMA’s Mission Programs would fail to achieve their goals. By strengthening FEMA’s capacity to manage its operations and business processes, the agency will be prepared to respond when called to action.

**Description of Item**

FEMA requests \$10,413,000 to continue upgrading the Mt. Weather Emergency Operations Center (MWEOC) critical and essential infrastructure. These upgrades include mechanical infrastructure improvements, safety enhancements, information technology site improvements, and utility distribution systems. Increased funding will also ensure compliance with environmental laws and regulations.

**Justification**

The infrastructure of Mt. Weather, constructed in the 1950s by President Eisenhower, has exceeded its service life. The Mt. Weather mission is growing as the entire facility requires additional support. This mission provides active support to Federal programs critical to national security, homeland security, and the safety of the American people. The Mt. Weather Steering Committee, which consists of the Executive Office of the President, DHS, FEMA, and other Federal departments and agencies, has requested that Mt. Weather be brought back from 30 years of neglect.

The MWEOC infrastructure upgrades cannot be completed utilizing funds earned solely through the Working Capital Fund, without drastically increasing the fees charged to customers.

Funding from the Mt. Weather tenants generates only enough revenue to maintain current operations. These funds cannot be increased through the tenant's budgetary process in a timely manner to ensure the facility's immediate readiness. Requested funding will also allow FEMA to begin to transition to a tiered structure for tenant revenue, based on prioritized space requirements.

New funding is necessary to ensure the immediate readiness of facilities that house FEMA disaster response support activities, 24-hour watch centers, centralized Automated Data Processing (ADP), protected telecommunications infrastructure as well as essential national security missions and capabilities.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The MWEOC provides a critically important venue to FEMA, DHS, and many other departments and agencies. It allows these entities to maintain critical capability and functionality during catastrophic events. Without continuing to upgrade the critical infrastructure of this government-wide asset, the performance of entities utilizing the MWEOC would be adversely impacted or inoperable if, for example, there were problems with utilities (such as the loss of the East Coast Power Grid). In addition to FEMA, the upgrades to Mt. Weather will impact many DHS components and other agencies outside DHS.

**Description of Item**

FEMA requests \$43,485,000 to complete the conversion of 4-year CORE employees to permanent Operating Activities positions and resources for activities that are not disaster specific or disaster readiness and support activities.

**Justification**

When the Disaster Support Account of the DRF was administratively created and implemented in 1996, FEMA expected that although the workload associated with disaster recovery and closeout would fluctuate, certain fixed costs and facilities would remain and need to be maintained in order to meet the mission and sustain a ready state. As FEMA’s mission has evolved, the distinction between activities funded through the DSA and through the Operations, Management and Administration appropriation has blurred. Today, both accounts fund similar types of activities/items and provide funds to support the administration of preparedness, mitigation, response, recovery, administrative, and support functions. Funds also are used for line items such as salaries, benefits, travel, rents, purchase of equipment, necessary upgrades, maintenance of information technology systems, maintenance of property, and many other common object classes. For FY 2009, FEMA is requesting to fund these activities in the FEMA Operations, Management and Administration (OMA) account to allow for more efficient administration and increase budgetary discipline and accountability.

Over the past ten years, FEMA has relied on temporary employees hired under the authority of the Stafford Act to staff positions at fixed facilities, headquarters, and regional offices. The current workforce structure has not kept pace with the changing demands and organizational transitions within FEMA and DHS. The level of preparedness and response capability required of FEMA demands a restructuring of its workforce to include a transition of 4-year CORE personnel from temporary employees to permanent full-time employees (PFT). As FEMA’s workload has increased and the

mission has evolved, the Agency has come to rely heavily on workers hired under the temporary authority whose workload remains constant and whose duties are no different from those of Title 5 employees. The only difference between PFT and CORE personnel is that the Stafford Act employees may only work on DRF-funded activities and programs. This has led to inequity issues, and in some cases, inefficiencies because functions and operations that support both DRF-funded and non-DRF funded programs are often identical in nature.

The FY 2007 Homeland Security Appropriations Act, P.L. 109-295, Section 682, provided \$30,000,000 to fund up to 250 permanent staff to replace existing temporary Stafford Act workforce. The FY 2008 Omnibus Bill permitted the transfer of \$60,000,000 from the DRF to OMA to provide FEMA with additional personnel resources to more efficiently and effectively manage both DRF and non-DRF funded operations by establishing a core cadre of full-time, deployable subject matter experts to provide continuity, supervision, and leadership during disaster response and recovery operations. This requested funding will establish permanent base funds to permanently support these positions, thereby completing the transfers initiated in FY 2007 and FY 2008.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

The requested funding increases support the DHS Strategic Goal of building an effective, nimble emergency response system and a culture of preparedness. The initiatives outlined above are essential as FEMA continues implementation of an improved business approach. These management and administrative activities provide critical support infrastructure without which FEMA's Mission Programs would fail to achieve their goals. By strengthening FEMA's capacity to manage its operations and business processes, the agency will be prepared to respond when called to action.

**Description of Item**

FEMA requests an additional \$105,515,000 to complete the transfer of Fixed Disaster Support activities to Management and Administration Activities that are not disaster specific or disaster readiness and support activities.

**Justification**

When the Disaster Support Account of the DRF was administratively created and implemented in 1996, FEMA expected that although the workload associated with disaster recovery and closeout would fluctuate, certain fixed costs and facilities would remain and need to be maintained in order to meet the mission and sustain a ready state. As FEMA’s mission has evolved, the distinction between activities funded through the DSA and through the Operations, Management and Administration appropriation has blurred. Today, both accounts fund similar types of activities/items and provide funds to support the administration of preparedness, mitigation, response, recovery, administrative, and support functions. Funds also are used for line items such as salaries, benefits, travel, rents, purchase of equipment, necessary upgrades, maintenance of information technology systems, maintenance of property, and many other common object classes. For FY 2009, FEMA is requesting to transfer the final resources for these activities into the FEMA Operations, Management and Administration (OMA) account to allow for more efficient administration and increase budgetary discipline and accountability.

Over the past ten years, FEMA has relied on temporary employees hired under the authority of the Stafford Act to staff positions at fixed facilities, headquarters, and regional offices. The current workforce structure has not kept pace with the changing demands and organizational transitions within FEMA and DHS. The level of preparedness and response capability required of FEMA demands a restructuring of its workforce to include a transition of 4-year CORE personnel from temporary

employees to permanent full-time employees (PFT). As FEMA's workload has increased and the mission has evolved, the Agency has come to rely heavily on workers hired under the temporary authority whose workload remains constant and whose duties are no different from those of Title 5 employees. The only difference between PFT and CORE personnel is that the Stafford Act employees may only work on DRF-funded activities and programs. This has led to inequity issues, and in some cases, inefficiencies because functions and operations that support both DRF-funded and non-DRF funded programs are often identical in nature.

The FY 2007 Homeland Security Appropriations Act, P.L. 109-295, Section 682, provided \$30,000,000 to fund up to 250 permanent staff to replace existing temporary Stafford Act workforce. The FY 2008 Omnibus Bill permitted the transfer of \$60,000,000 from the DRF to OMA to provide FEMA with additional personnel resources to more efficiently and effectively manage both DRF and non-DRF funded operations by establishing a core cadre of full-time, deployable subject matter experts to provide continuity, supervision, and leadership during disaster response and recovery operations. This requested funding will enable the transfer of all remaining CORE positions and associated support costs and ensure that the Disaster Relief Fund can be fully utilized for direct disaster costs.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

The requested funding increases support the DHS Strategic Goal of building an effective, nimble emergency response system and a culture of preparedness. The initiatives outlined above are essential as FEMA continues implementation of an improved business approach. These management and administrative activities provide critical support infrastructure without which FEMA's Mission Programs would fail to achieve their goals. By strengthening FEMA's capacity to manage its operations and business processes, the agency will be prepared to respond when called to action.

**Description**

The Urban Search and Rescue is reduced by (\$7,500,000) programmatically in FY 2009 from FY 2008. The total decrease equals (\$7,500,000) from the FY 2008 enacted level.

**Justification**

The reduction in the Urban Search and Rescue Program is based on several factors including the substantial level of funds awarded over the past five years and a reprioritization of FEMA resources. Even at the reduced level, FEMA will continue to improve the programs' effectiveness as a national program to enhance overall preparedness.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The Urban Search and Rescue Program currently supports the strategic goal to build a nimble, effective emergency response system and a culture of preparedness. The reduction in funding will result in a minimal impact on the overall Urban Search and Rescue Program performance.

**Description**

The U.S. Fire Administration FY 2009 funding request contains a \$2,387,000 net decrease from FY 2008 enacted level.

**Justification**

The reduction in the U.S. Fire Administration Program is based on several factors including the substantial level of funding over the past five years and a reprioritization of FEMA resources. Even at the reduced level, FEMA will continue to improve the programs' effectiveness as a national program to enhance overall preparedness.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The U.S. Fire Administration currently supports the strategic goal to build a nimble, effective emergency response system and a culture of preparedness. The reduction in funding will result in a minimal impact on the overall U.S. Fire Administration Program performance.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Emergency Management Agency  
Operations, Management and Administration  
Appropriation Language**

For necessary expenses for *operations*, management, and administration of the Federal Emergency Management Agency, [\$664,000,000] \$957,405,000, including activities authorized by the National Flood Insurance Act of 1968, (42 U.S.C. 4001 et seq.) *as amended*, the Robert T. Stafford Disaster Relief and Emergency Assistance Act, (42 U.S.C. 5121 et seq.) *as amended*, the Earthquake Hazards Reduction Act of 1977, (42 U.S.C. 7701 et seq.) *as amended*, the Defense Production Act of 1950, (50 U.S.C. App. 2061 et seq.) *as amended*, sections 107 and 303 of the National Security Act of 1947 (50 U.S.C. 404, 405), Reorganization Plan No. 3 of 1978 (5 U.S.C. App.), *and* the Homeland Security Act of 2002 (6 U.S.C. 101 et seq.), *as amended* [, and the Post-Katrina Emergency Management Reform Act of 2006 (Public Law 109-295; 120 Stat. 1394)]: *Provided*, That not to exceed \$3,000 shall be for official reception and representation expenses: [*Provided further*, That the President’s budget submitted under section 1105 (a) of title 31, United States Code, shall be detailed by the office for the Federal Emergency Management Agency:] *Provided further*, That of the total amount made available under this heading, [\$32,500,000] \$25,000,000 shall be for the Urban Search and Rescue Response System, of which not to exceed \$1,600,000 may be made available for administrative costs; [and \$6,000,000]: *Provided further*, *That of the total amount made available under this heading no less than \$6,342,000 shall be for the Office of the National Capital Region Coordination: [Provided further*, That for purposes of planning, coordination, execution, and decision-making related to mass evacuation during a disaster, the Governors of the State of West Virginia and the Commonwealth of Pennsylvania, or their designees, shall be incorporated into efforts to integrate the activities of Federal, State and local governments in the National Capital Region, as defined in section 882 of Public Law 107-296, the Homeland Security Act of 2002] *Provided further*, *That of the total amount made available under this heading \$40,913,000 shall be for necessary expenses of the United States Fire Administration and for other purposes, as authorized by the Federal Fire Prevention and Control Act of 1974 and the Homeland Security Act of 2002, as amended. (Department of Homeland Security Appropriations Act, 2008.)*

#### **Explanation of Changes:**

Language to include the United States Fire Administration in the appropriation has been added.

**PPA Mission Statement**

Operations Activities include the basic functions of all FEMA’s major mission organizations. The programs funded through this PPA include: the National Preparedness Directorate, the Grant Programs Directorate, the Mitigation Directorate, the Disaster Assistance Directorate, the Disaster Operations Directorate, the Logistics Management Directorate, and National Continuity Programs. These programs directly support FEMA’s primary mission to reduce the loss of life and property and protect the Nation from all hazards, including natural disasters, acts of terrorism, and other man-made disasters, by leading and supporting the Nation in a risk-based, comprehensive emergency management system of preparedness, protection, response, recovery, and mitigation.

**Summary Justification and Explanation of Changes**

|                              | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|------------------------------|---------------|----------------|----------------|---------------------|
|                              | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Salaries and Benefits</b> | \$99,494      | \$168,328      | \$236,467      | \$68,139            |

Salaries and Benefits includes costs for 2,006 FTEs. The FY 2009 request includes an increase of \$68,139,045 for inflation, the proposed FY 2009 3 percent salary increase, and 638 additional FTE for annualizations and new budget initiatives.

|               | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------|---------------|----------------|----------------|---------------------|
|               | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Travel</b> | \$5,903       | \$8,294        | \$7,962        | (\$332)             |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2009 request includes a decrease of \$332,000 due to the absence of carryover resources under this classification.

|                                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |

**PPA Mission Statement**

The Management & Administrative Activities PPA includes the full range of mission-critical administrative support functions. This PPA funds the full-range of FEMA's administrative offices, including the Office of the Administrator, the Office of Management, the Office of External Affairs, the Office of the Chief Financial Officer, the Office of Policy and Program Analysis, and the Office of Regional Operations. The activities of these organizations are essential in FEMA's pursuit of an enhanced business approach to achieving results. These organizations provide the finance, budget, human resource, and information systems support capabilities designed and scaled to enhance FEMA's mission success.

**Summary Justification and Explanation of Changes**

|                              | <b>2007</b>      | <b>2008</b>      | <b>2009</b>      | <b>2008 to 2009</b> |
|------------------------------|------------------|------------------|------------------|---------------------|
|                              | <b>Actual</b>    | <b>Enacted</b>   | <b>Request</b>   | <b>Change</b>       |
| <b>Salaries and Benefits</b> | <b>\$104,159</b> | <b>\$119,758</b> | <b>\$140,414</b> | <b>\$20,656</b>     |

Salaries and Benefits includes costs for 1,309 FTEs. The FY 2009 request includes an increase of \$20,656,000 for inflation, the proposed FY 2009 3 percent salary increase, annualization of FY08 positions and new budget initiatives, and an increase of 235 FTE.

|               | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------|----------------|----------------|----------------|---------------------|
|               | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Travel</b> | <b>\$2,021</b> | <b>\$3,436</b> | <b>\$8,552</b> | <b>\$5,116</b>      |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2009 request includes an increase of \$5,116,000 due to inflation, new budget initiatives, and a reduction in carryover resources.

|                                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |

**PPA Mission Statement**

The mission of the United States Fire Administration (USFA) is to reduce life and economic losses due to fire and related emergencies through leadership, coordination, and support. USFA prepares the Nation’s fire responders through on-going and, when necessary, expedited training, regarding how to evaluate and minimize community risk, improve protection to critical infrastructure, and be better prepared to react to all-hazard and terrorism emergencies of all kinds.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$0                    | \$0                     | \$12,137                | \$12,137                       |

Salaries and Benefits includes costs for 115 FTEs. The FY 2009 request includes an increase of \$12,137,000 due to both the realignment of the USFA appropriation to the FEMA Operations, Management and Administration appropriation plus inflation.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|

**PPA Mission Statement**

National Capital Region Coordination (NCRC) program advances homeland security, including all hazards preparedness, in the National Capital Region. The program serves as a model for other regions of the country. NCRC focuses on developing and refining a common regional approach to homeland security that results in integrated strategies and interoperability among Federal, State, local, regional and private/non-profit stakeholders. NCRC’s primary responsibilities include coordinating and participating in programs and initiatives aimed at enhancing the homeland security posture of the region. NCRC also plays valuable roles in events, drills, and exercises that occur annually in the NCR. NCRC also serves as a principal in the NCR’s regional governance structure and coordinates with the NCR’s Regional Emergency Support Functions (R-ESFs) to improve preparedness in the NCR.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$946                  | \$1,951                 | \$2,251                 | \$300                          |

Salaries and Benefits includes costs for 20 FTEs. The FY 2009 request includes an increase of \$300,000 for the 3 percent salary increase.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | \$8                    | \$34                    | \$34                    | \$0                            |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2009 request reflects no changes from FY 2008.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Advisory and Assistance Services</b> | \$156                  | \$3,822                 | \$3,822                 | \$0                            |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2009 request reflects no change from FY 2008.

|                       | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

**PPA Mission Statement**

The National US&R Response System is comprised of 28 task forces that provide a coordinated, national, all-risk capability to assist State and local governments in responding to structural collapse incidents when the President declares a major disaster or emergency under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act). These task forces are highly trained and possess the necessary expertise to extricate and medically treat victims in heavy rescue situations. In FY 2009, FEMA will use funding to operate and train the existing task forces, maintain the equipment caches, and replace/repair equipment that has been used in training and actual disasters. In addition, FEMA will enhance the teams' operational capabilities for responding to incidents involving weapons of mass destruction (WMDs).

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$814                  | \$828                   | \$828                   | \$0                            |

Salaries and Benefits include costs for 8 FTEs and 8 positions. The FY 2009 request reflects no change from FY 2008.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | \$120                  | \$210                   | \$210                   | \$0                            |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2009 request reflects no change from FY 2008.

|                                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Transportation of Things</b> | \$28                   | \$100                   | \$100                   | \$0                            |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2009 request reflects no change from FY 2008.

|  | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|--|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Communication, Utilities, and Misc. Changes</b> | \$296                  | \$35                    | \$35                    | \$0                            |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2009 request reflects no change from FY 2008.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Printing</b> | \$0                    | \$30                    | \$30                    | \$0                            |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2009 request reflects no change from FY 2008.

|   | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---|---------------|----------------|----------------|---------------------|
|   | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Advisory and Assistance Services</b> | <b>\$0</b>    | <b>\$60</b>    | <b>\$60</b>    | <b>\$0</b>          |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2009 request reflects no change from FY 2008.

|                       | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|-----------------------|----------------|----------------|----------------|---------------------|
|                       | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Other Services</b> | <b>\$2,785</b> | <b>\$3,364</b> | <b>\$3,364</b> | <b>\$0</b>          |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2009 request reflects no change from FY 2008.

|  | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|--|---------------|----------------|----------------|---------------------|
|  | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Purchase from Government Accounts</b> | <b>\$0</b>    | <b>\$200</b>   | <b>\$200</b>   | <b>\$0</b>          |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2009 request reflects no change from FY 2008.

|                                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------------------------|---------------|----------------|----------------|---------------------|
|                                 | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Supplies &amp; materials</b> | <b>\$53</b>   | <b>\$85</b>    | <b>\$85</b>    | <b>\$0</b>          |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2009 request reflects no change from FY 2008.

|                  | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|------------------|---------------|----------------|----------------|---------------------|
|                  | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Equipment</b> | <b>\$30</b>   | <b>\$5</b>     | <b>\$5</b>     | <b>\$0</b>          |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2009 request reflects no change from FY 2008.

|                                       | <b>2007</b>     | <b>2008</b>     | <b>2009</b>     | <b>2008 to 2009</b> |
|---------------------------------------|-----------------|-----------------|-----------------|---------------------|
|                                       | <b>Actual</b>   | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>       |
| <b>Grants/Subsidies/Contributions</b> | <b>\$22,225</b> | <b>\$27,583</b> | <b>\$20,083</b> | <b>(\$7,500)</b>    |

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2009 request reflects a decrease of \$7,500,000 for grants.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)** **STATE AND LOCAL PROGRAMS**

### **I. Appropriation Overview**

#### **A. Mission Statement for Appropriation:**

Through the appropriation for State and Local Programs, FEMA fulfills its role as the principal component of the Department of Homeland Security (DHS) responsible for preparing state and local governments to prevent, protect against, respond to and recover from incidents of terrorism and other catastrophic events. The appropriation provides for grants, training, exercises and other support to assist federal agencies, states, territories, tribal, and local jurisdictions to prepare for terrorism and major disasters. State and Local Program funds are administered by two different organizations within FEMA, both created in 2007 – the Grant Programs Directorate (GPD) and the National Preparedness Directorate (NPD).

#### **B. Budget Activities:**

##### Management and Administration

Management and Administration (M&A) requirements for State and Local Programs (SLP) are funded from a percentage of grants and training funds. Up to three percent of the M&A will be transferred to the FEMA Operations, Management and Administration (OMA) appropriation. Those resources are distributed to the National Preparedness and Grant Programs Directorates to support the full range SLP administrative activities, including contributions to the Departmental working capital contributions.

##### Grant Programs Directorate

In support of the National Preparedness Guidelines and the National Strategy for Homeland Security of 2007, FEMA's Fiscal Year (FY) 2009 budget for State and Local Programs divides a portfolio of nine homeland security grant programs into two focus areas: Prevention and Protection Programs; and Response and Recovery Programs. A third category, Other State and Local Support Programs, covers exercises, training, technical assistance and evaluations.

#### **Prevention & Protection Programs:**

Prevention & Protection Programs include seven grant programs which provide resources to support preparedness projects that build state and local capabilities to support the Prevention and Protection mission areas as outlined in the National Preparedness Guidelines, the Target Capabilities List, and National Strategy for Homeland Security of 2007. The first of these programs is the State Homeland Security Program (SHSP). This program awards grants to all 50 states, the District of Columbia, Puerto Rico and four U.S. territories on the basis of risk and need. A second state program, the National Security and Terrorism Prevention Grant Program, provides competitive grants to state and local agencies to fund specific projects which address national vulnerabilities identified by the

Secretary. In FY 2009, this program will include support for REAL ID implementation initiatives as well as buffer zone protection projects for select critical infrastructure.

Prevention & Protection Programs also includes the Urban Area Security Initiative (UASI) which provides funding to support regional collaboration on enhanced security and terrorism readiness in the Nation's highest risk urban areas. In support of these efforts, there is also a suite of four targeted grant programs which support Transportation Infrastructure Protection. These programs are designed to enhance prevention and protection capabilities at the Nation's critical economic and transportation assets. Funding is allocated on the basis of DHS' assessment of the risk of terrorist attacks at key mass transit systems, port assets, and other key transportation infrastructure sites.

### **Response & Recovery Programs:**

Response & Recovery Programs include two additional grant programs which provide resources to support preparedness projects that build state and local capabilities to support the Response and Recovery mission area as outlined in the National Preparedness Guidelines, the Target Capabilities List, and National Strategy for Homeland Security of 2007. The first of these programs is the Emergency Management and Performance Grants (EMPG) Program. The EMPG Program provides funds to support emergency management initiatives at the state and local level, and improve mitigation, preparedness, response, and recovery capabilities for all hazards. The second program, the Citizen Corps Grant Program (CCP), is the Department's grass-roots initiative to actively involve all citizens in hometown preparedness through personal readiness, training, and volunteer service.

In addition to these two programs, the Grant Programs Directorate also supports state and local response and recovery capabilities by administering direct grants to the Nation's fire departments for equipment, training, and fire prevention activities through the Assistance to Firefighters Grant Program (AFG). AFG is detailed separately under the Assistance to Firefighters Grants request justification.

### **Other State and Local Support Programs:**

#### National Exercise Programs (NEP)

The National Exercise Program oversees the Department's federal, state and local exercise programs, which includes the Top Officials (TOPOFF) exercise series. It is responsible for testing the capacity, at all levels of government, to effectively implement best practices, take corrective action on lessons learned, and deploy response plans and assets efficiently and effectively.

#### State and Local Training Programs

The State and Local Training Program manages the development of, and approves training to prepare emergency responders for a Weapon of Mass Destruction (WMD) terrorism event. This program identifies and addresses training needs of state and local communities and prioritizes those needs to facilitate the identification of existing and new funding for course development. This program also includes the Center for Domestic Preparedness—the only WMD training facility that provides hands-on training to civilian emergency responders in a toxic chemical agent environment—and the National Domestic Preparedness Consortium, which includes four training institutions which specialize in delivering CBRNE-related training to America's first responders.

### Technical Assistance (TA) Program

The TA program provides direct assistance to state, regional, local, and tribal jurisdictions to improve their ability to enhance their capabilities to prevent, protect against, respond to, and recover from major events, including threats or acts of terrorism. A primary objective of the program is to enhance the capacity of state and local jurisdictions, as well as special needs jurisdictions (e.g., port authorities and mass transit agencies) to develop, plan, and implement effective preparedness strategies for chemical, biological, radiological, nuclear, and explosive (CBRNE) incidents and other major events.

### Evaluations and National Assessments

Through Evaluations and Assessments, FEMA is working to implement a comprehensive system to measure the effectiveness of DHS programs, including HSPD-8 and the impact on our national readiness. Many of the measures in the National Preparedness Guidelines (NPG) will gauge the accomplishment of key milestones and events that will contribute to improved performance. The measures in the NPG all contribute to critical outcomes, and are most appropriately described as indicator measures of national preparedness. This program gathers, analyzes, and interprets national and program specific data. As the focal point for information collection and evaluation, this program reviews and assesses the execution of State Strategies against the supporting threat, vulnerability, and needs assessment data.

### **C. Budget Request Summary:**

In FY 2009, FEMA requests 278 positions, 278 FTE, and \$1,900,000,000 for State and Local Programs. The total adjustments-to-base, excluding emergency funding provided in P.L. 110-161, is 0 FTE and a decrease of \$1,467,800,000 from the FY 2008 enacted level. The FY 2009 request proposes a new PPA structure and includes \$1.9 billion to fund the following:

**(1) PPA – Homeland Security Prevention and Protection Programs (\$1,540,000,000):** In FY 2009, FEMA requests \$1,540 million for Homeland Security Prevention and Protection Programs, which includes Urban Area Security Initiative (UASI) Grants, the State Homeland Security Program (SHSP), the National Security and Terrorism Prevention Grant Program, and a suite of Transportation and Port Security Grants. Due to efficiencies in the grant programs and limited budgetary resources, FEMA requests a decrease of \$1,157,500,000 from FY 2008. The decrease is partially offset by a request for new funding for a national competitive grant program and increases for UASI and the Over-the-Road Bus Security Grants.

**(2) PPA – Homeland Security Response and Recovery Programs (\$215,000,000):** In FY 2009, FEMA requests \$215 million for Homeland Security Response and Recovery Programs, which includes Emergency Management Performance Grants (EMPG), and the Citizen Corps Program (CCP). Due to efficiencies in the grant programs and limited budgetary resources, FEMA requests a decrease of \$261,000,000 from FY 2008.

**(3) PPA – Other State and Local Support Programs (\$145,000,000):** In FY 2009, FEMA requests \$145 million for Other State and Local Support Programs, which includes the National Exercise Programs, Technical Assistance Program, Evaluations and Assessments, and State and Local Training Programs. Due to efficiencies and overlap across all FEMA programs and limited budgetary resources, FEMA requests a decrease of \$179,300,000 from FY 2008.

| <b>Total enacted appropriations and budget estimates</b>      | <b>204</b>      | <b>3,021,500</b> | <b>278</b> | <b>3,497,800</b> | <b>278</b>     | <b>1,900,000</b> | <b>0</b>                                 | <b>(1,597,800)</b> | <b>0</b>        | <b>(1,597,800)</b> | <b>0</b>      | <b>0</b> |

\* Note: FY 2007 includes funding from emergency supplemental (P.L 110-28); FY 2008 includes emergency funding (P.L 110-161)

\* Note: Amounts and FTE in the Congressional Justification and Budget Appendix may differ.

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**Federal Emergency Management Agency (FEMA)**  
**State and Local Programs**  
**Program Performance Justification**  
 (Dollars in thousands)

**PPA: HOMELAND SECURITY PREVENTION AND PROTECTION PROGRAMS**

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>      |
|------------------------------|---------------------|------------|--------------------|
| <b>2007 Revised Enacted</b>  | <b>58</b>           | <b>58</b>  | <b>\$2,339,000</b> |
| <b>2008 Enacted</b>          | <b>72</b>           | <b>72</b>  | <b>\$2,697,500</b> |
| 2009 Adjustments to Base     | 0                   | 0          | 0                  |
| <b>2009 Current Services</b> | <b>72</b>           | <b>72</b>  | <b>\$2,697,500</b> |
| 2009 Program Changes         | 0                   | 0          | (\$1,157,500)      |
| <b>2009 Request</b>          | <b>72</b>           | <b>72</b>  | <b>\$1,540,000</b> |
| Total Changes 2008-2009      | 0                   | 0          | (\$1,157,500)      |

FEMA requests \$1,540,000,000 for this activity. This is a decrease of \$1,157,500,000 from FY 2008 enacted level.

The above table includes emergency funding of \$110 million provided in P.L. 110-161 for this activity. The FY 2009 Budget Request is \$1,540,000,000. Excluding emergency funds provided, the decrease from FY 2008 is \$1,047,500,000.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Homeland Security Prevention and Protection Programs suite includes seven grant programs: the Urban Area Security Initiative (UASI), State Homeland Security Grant Program (SHSP), the National Security and Terrorism Prevention Grant Program, the Port Security Grant Program (PSGP), the Public Transportation Security Grant Program (TSGP), the Over-the-Road Bus Security Grant Program, and the Trucking Industry Security Program (TSP).

**Urban Area Security Initiative Grants (UASI) - \$825 million**

The Urban Area Security Initiative (UASI) addresses the unique multi-disciplinary planning, operations, equipment, training, and exercise needs of high-threat, high-density urban areas, and assists them in building and sustaining capabilities to prevent, protect against, respond to, and recover from threats or acts of terrorism. This program provides funding to high-risk urban areas based on risk and effectiveness.

In FY 2008, program participants may use UASI funding to achieve or enhance all of the 37 capabilities outlined in National Preparedness Guidelines and Target Capabilities List, as long as they enhance the capability to prevent, protect against, respond to, or recover from acts of terrorism. Proposed Investments under the UASI program should focus on the National Priorities and the most urgent state/local priorities.

### **State Homeland Security Program (SHSP) - \$200 million**

The State Homeland Security Program (SHSP) is a primary funding source for building homeland security capabilities that align with the National Preparedness Guidelines (NPG) at the state and local levels. States and localities use SHSP funds to build a wide range of homeland security capabilities. Most capabilities specific to terrorism are also applicable to large-scale natural disasters and public health emergencies. Grant allocations are based on an analysis of risk and effectiveness but each state is assured a minimum allocation. Projects funded under SHSP support building and sustaining capabilities at the state and local levels through planning, equipment, training, and exercise activities and helps states to implement the strategic goals and objectives included in state homeland security strategies. The SHSP supports activities within all four homeland security mission areas, as well as the National Priorities identified in the National Preparedness Guidelines. SHSP funding remains primarily focused on enhancing capabilities to prevent, protect against, respond to, or recover from CBRNE incidents. However, the allowable scope of SHSP activities includes catastrophic events, provided that these activities also build capabilities that relate to terrorism.

The accelerated funding cycle, under which guidance and applications must be developed and released in a matter of weeks, has impeded the program's ability to require grantees to develop a coordinated grant allocation strategy that can be used to track program resources. This methodology establishes a more deliberate and up-front planning process. As such, greater time is allotted for state application development and application review; DHS anticipates making grant awards by the 3rd quarter of FY 2008, similar to FY 2007.

### **National Security and Terrorism Prevention Grants (NSTPG) - \$110 million**

The National Security and Terrorism Prevention program provides \$110 million for competitive grants that will support both capital projects and operational staffing proposals. Rather than rely on formulaic allocation and pass-through mechanisms, this program provides competitive grants to specific state and local agencies to support proposals which address national vulnerabilities identified by the Secretary as priorities. In 2009, the Secretary will invite states to submit project proposals to support REAL ID implementation and buffer zone protection for critical infrastructure. Final grant allocations will be determined competitively by the Secretary on the basis of how well proposals address these identified national vulnerabilities.

### **Transportation Infrastructure Protection Programs (IPP)**

Together, the IPP grants fund a range of preparedness activities, including strengthening infrastructure against explosive attacks, preparedness, planning, equipment purchase, training, exercises, security management, and administration costs. IPP programs support objectives outlined in the National Preparedness Guidelines and related national preparedness doctrine, such as the National Incident Management System (NIMS), National Response Framework (NRF), and the National Infrastructure Protection Plan (NIPP) and include:

- **Port Security Grant Program (\$210 million)**

The Port Security Grant Program (PSGP) provides grant funding to port areas for the protection of critical port infrastructure from terrorism. PSGP funds are primarily

intended to assist ports in enhancing port-wide risk management capabilities, enhanced domain awareness, capabilities to prevent, detect, respond to and recover from attacks involving improvised explosive devices (IEDs) and other non-conventional weapons, as well as training and exercises.

PSGP funds are allocated to the Nation's highest risk port areas to address priorities identified in NPG, the NIPP and the National Strategy for Maritime Security. The pool of eligible port applicants has been expanded to reflect the changes required by the SAFE Port Act, which states that all entities covered by an Area Maritime Security Plan may submit an application for consideration. PSGP funds support the development of an integrated risk-based decision-making process for each port area patterned after the risk management framework articulated in the NIPP. At the recommendation of the U.S. Coast Guard, in several cases, multiple port areas have been grouped together to reflect geographic proximity, shared risk and a common waterway.

- **Public Transportation Security Grants Program (\$175 million)**  
The Public Transportation Security Grants Program (TSGP) provides grant funding to support mass transit agencies within the Nation's key high-threat urban areas in their efforts to enhance security measures for critical transit infrastructure including bus, rail and ferry systems. This program also provides funding to Amtrak for continued security enhancements for intercity rail operations between key, high-risk urban areas throughout the United States. A risk-based approach is used to allocate TSGP funding to eligible mass transit and intra-city bus systems on a regional basis to address priorities identified in the National Preparedness Guidelines, the NIPP and the National Strategy for Transportation Security (NSTS), with particular focus on high-risk and high consequence transit systems.
- **Over-the-Road Bus Security Grant Program (\$12 million)**  
The purpose of this program is to create a sustainable program for the protection of intercity bus systems and the traveling public from terrorism, especially explosives and non-conventional threats that would cause major loss of life and severe disruption. Grants awarded under this program go directly to the owners and operators of fixed route intercity and/or charter bus services using over-the-road buses to address priorities identified in the NPG, NIPP, and NSTS. Grants are used to improve facility security in defined UASI jurisdictions, passenger and baggage screening, driver and vehicle security along with enhancing emergency communication technology, coordination with local police and emergency responders, and training and exercises. Each of these funding priorities seek to further enhance prevention and protection against terrorist activities and will greatly serve to assist with response and recovery efforts in the event of an attack.
- **Trucking Security Program (\$8 million)**  
The Trucking Security Program (TSP) continues the Highway Watch® Program as a sustainable national program to enhance security and overall preparedness on the Nation's highways. TSP provides competitive grant funds for continued operations of Highway Watch® Program activities which include identifying and recruiting program

participants; delivering training to highway professionals to identify and report security and safety situations on the Nation's highways; maintaining a Highway Watch® call center; and operating a Highway Information and Sharing Analysis Center located at the Transportation Security Operations Center (TSOC) in Herndon, VA.

## **Recent and Planned Accomplishments**

### **FY 2007 Accomplishments**

- In FY 2007, the following number of grants were made within Homeland Security Prevention and Protection Programs PPA:
  - Twenty-nine (29) UASI grant awards, totaling \$746,900,000.
  - Two-hundred fifty-eight (258) Port Security grant awards, totaling \$202,247,293.
  - Thirty-five (35) Public Transportation Security grant awards, totaling \$171,180,207.
  - Thirty-nine (39) Over-the-Road Bus Security grant awards, totaling \$11,640,000.
  - Forty-six (46) Buffer Zone Protection grant awards, totaling \$48,500,000.
  - One Trucking Industry Security grant award, totaling \$11,640,000.
  - Fifty-six (56) State Homeland Security awards, totaling \$509,250,000.
  - Fifty-six (56) Law Enforcement Terrorism Prevention Program grant awards, totaling \$363,750,000.
  - Four (4) Stonegarden grant awards, totaling \$2,996,487.
- Included a tier structure for FY 2007 UASI grant participants, which reflects recognition of the highest risk areas. There are seven cities in Tier 1, and 39 cities in Tier 2. Each city only competes for funding against the other cities in its tier.
- Aligned transportation infrastructure components with SHSP and UASI grants to ensure a holistic approach to preparedness in states and high-risk urban areas.
- Instituted a new 36-month period of performance for IPP grants, based on stakeholder input.
- Issued Tactical Interoperable Communication Scorecards for 75 Urban and Metropolitan Areas in January 2007.
- Instituted a more transparent SHSP grant application process that involves more interaction with external partners and stakeholders ensuring that the projects submitted offer the best potential for reducing risk.
- Brought together more than 100 state and local homeland security experts to evaluate State and Urban Area applications.

### **FY 2008 Planned Accomplishments**

- Update the existing Homeland Security State/Urban Area Strategies as necessary.
- Institutionalize the program alignment, metrics/reporting system and capabilities based planning accomplishments from FY 2007.
- Continue monitoring and enhancement of internal evaluation capabilities to further guide program planning and targeting of technical assistance efforts.
- Provide additional feedback to state and local partners on the outcome of the above analysis through customized risk and effectiveness profiles.

- Issue final awards in a timely manner.
- Provide \$81.8 million to states for REAL ID implementation. The FY 2008 REAL ID Systems Integration and Data Verification Grant Program represents a second round of funding for state drivers' licensing authorities and is one of four REAL ID grant initiatives offered by DHS. These funding initiatives include: 1) the FY 2008 REAL ID Systems Integration and Data Verification Grant Program; 2) a REAL ID Pilot Project already underway with the Commonwealth of Kentucky to test a birth records verification software tool; 3) the FY 2008 Vital Events Verifications State Project Grant, that will provide all states with web access to the birth records verification software Kentucky is testing, and 4) the FY 2008 REAL ID Demonstration Grant Program.
- In response to the Post-Katrina Emergency Management Reform Act of 2006 Preparedness transitioned into FEMA, resulting in the establishment of two new directorates, the Grant Programs Directorate (GPD) and the National Preparedness Directorate (NPD).
- Building a new FEMA Directorate from multiple legacy grant management organizations: FEMA Grants Management Branch, and DHS Office of Grants and Training (Office of Grant Operations and Capabilities Division).
- Transitioning key grant programs and functions to the regions to establish the FEMA regions as primary liaisons to state and local partners.
- Managing the financial and programmatic grant management functions for 49 grant programs constituting over 20 billion dollars in total grant funds.
- Support states/territories in creating more informative State Preparedness Reports with a focus on increased specificity in reporting enhanced levels of preparedness.
- Develop an Integrated Planning System and associated deliverables with NPD.

#### **FY 2009 Planned Accomplishments**

- Update the existing Homeland Security State/Urban Area Strategies as necessary.
- Continue monitoring and enhancement of internal evaluation capabilities to further guide program planning and targeting of technical assistance efforts.
- Provide additional feedback to state and local partners on the outcome of the above analysis through customized risk and effectiveness profiles.
- Issue final awards in a timely manner.

PPA: HOMELAND SECURITY RESPONSE AND RECOVERY PROGRAMS

|                              | Perm<br>Pos | FTE       | Amount           |
|------------------------------|-------------|-----------|------------------|
| <b>2007 Revised Enacted</b>  | <b>36</b>   | <b>36</b> | <b>\$333,000</b> |
| <b>2008 Enacted</b>          | <b>72</b>   | <b>72</b> | <b>\$476,000</b> |
| 2009 Adjustments to Base     | 0           | 0         | 0                |
| <b>2009 Current Services</b> | <b>72</b>   | <b>72</b> | <b>\$476,000</b> |
| 2009 Program Changes         | 0           | 0         | (\$261,000)      |
| <b>2009 Request</b>          | <b>72</b>   | <b>72</b> | <b>\$215,000</b> |
| Total Changes 2008-2009      | 0           | 0         | (\$261,000)      |

FEMA requests \$215,000,000 for this activity. This is a decrease of \$261,000,000 from the FY 2008 enacted level.

The above table includes emergency funding of \$20 million provided in P.L. 110-161 for an interoperable communication grant. The FY 2009 Budget Request is \$215,000,000. Excluding emergency funds provided, the decrease from FY 2008 is \$241,000,000.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This PPA is made up of a portfolio of grant programs that address emergency response and recovery activities and includes funding for the Emergency Management Performance Grants (EMPG), and the Citizen Corps Program (CCP).

**Emergency Management Performance Grants (EMPG) - \$200 million**

EMPG helps states and urban areas achieve target levels of capability to sustain and enhance the effectiveness of their emergency management programs. The EMPG Program provides critical planning and staffing assistance to sustain and enhance state and local emergency management capabilities.

**The Citizen Corps Program (CCP) - \$15 million**

Citizen Corps supports Citizen Corps Councils with efforts to engage citizens in personal preparedness, exercises, ongoing volunteer programs, and surge capacity response, in order to better prepare citizens to be fully aware, trained, and practiced on how to prevent, protect/mitigate, prepare for, and respond to all threats and hazards. This program provides funding by formula basis to all 50 states and 6 territories. CCP was established post-9/11 to empower American citizens to take responsibility for their own safety and security against all types of threats and disasters. The CCP works to raise awareness about basic steps individuals can take in their own homes, as well as to provide information, training and volunteer opportunities to save lives and property. Five years after 9/11, there are over 2,000 Citizen Corps Councils reaching 73 percent of the population and operating in all 50 states and six U.S. territories.

**Recent and Planned Accomplishments**

**FY 2007 Accomplishments**

- In FY 2007, the following number of grants were made within Homeland Security Response and Recovery Programs PPA:

- Forty-one (41) Metropolitan Medical Response System grant awards, totaling \$32,009,993
- Fifty-five (55) Citizen Corps Program grant awards, totaling \$14,550,000
- Fifty-eight (58) Emergency Management Performance Grants, totaling \$194,000,000.

#### **FY 2008 Planned Accomplishments**

- Require states to develop and adopt a Statewide Interoperable Communications Plan (SICP). The Public Safety Interoperable Communication (PSIC) Grant Program will utilize the SICP in developing grant program plans and focus areas.
- PSIC will complete its peer review of Investment Justifications in February 2008 and begin releasing funding for approved Investments by March 2008. For Investments that are not approved in the first round, robust technical assistance will be provided to the states to assist with Investment Justification revisions with a goal of releasing all remaining funds by July 2008. Ongoing programmatic assistance and post-award monitoring will ramp up in 3rd and 4th quarters of 2008. These outreach services are designed to support grantees and ensure that programmatic goals are achieved.
- Institutionalize the program alignment, metrics/reporting system and capabilities based planning accomplishments from FY 2007.
- Continue monitoring and enhancement of internal evaluation capabilities to further guide program planning and targeting of technical assistance efforts.
- Provide additional feedback to state and local partners on the outcome of the above analysis through customized risk and effectiveness profiles.
- Issue final awards in a timely manner.

#### **FY 2009 Planned Accomplishments**

- Continue monitoring and enhancement of internal evaluation capabilities to further guide program planning and targeting of technical assistance efforts.
- Provide additional feedback to state and local partners on the outcome of the above analysis through customized risk and effectiveness profiles.
- Issue final awards in a timely manner.

PPA: OTHER STATE AND LOCAL SUPPORT PROGRAMS

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>    |
|------------------------------|---------------------|------------|------------------|
| <b>2007 Revised Enacted</b>  | <b>110</b>          | <b>110</b> | <b>\$349,500</b> |
| <b>2008 Enacted</b>          | <b>134</b>          | <b>134</b> | <b>\$324,300</b> |
| 2009 Adjustments to Base     | 0                   | 0          | 0                |
| <b>2009 Current Services</b> | <b>134</b>          | <b>134</b> | <b>\$324,300</b> |
| 2009 Program Changes         | 0                   | 0          | (179,300)        |
| <b>2009 Request</b>          | <b>134</b>          | <b>134</b> | <b>\$145,000</b> |
| Total Changes 2008-2009      | 0                   | 0          | (179,300)        |

FEMA requests \$145,000,000 for this activity. This is a decrease of \$179,300,000 from FY 2008 enacted level.

**CURRENT SERVICES DESCRIPTION**

This PPA is made up of a portfolio of grant, exercise, assistance and training programs and includes: the National Exercise Programs, State and Local Training Programs, Technical Assistance Program, and the Evaluation and Assessment Program.

**National Exercise Programs (NEP) - \$40 million**

The National Exercise Programs (NEP) meets the Homeland Security Presidential Directive (HSPD-8) and Homeland Security Act of 2002 requirement to establish a national, interagency-wide program to coordinate homeland security preparedness-related exercise activities. The NEP provides an organized approach to set priorities for exercises, reflect those priorities in a multi-year schedule of exercises that serves the strategic and policy goals of the U.S. Government, and to address findings from those exercises in a disciplined interagency process. The White House Homeland Security Council maintains the purview of the NEP, while subcomponent programs within the NEP are managed by the National Exercise Division (NED).

The September 11 attacks and Hurricane Katrina reinforced the importance of timely integrated planning, decision-making, strategic coordination, and operational awareness of federal, state, local, and private sector officials for domestic incidents. HSPD-8 required the Secretary of the Department of Homeland Security (DHS) to establish a national program to conduct homeland security preparedness-related exercises; however, requirements for interagency crisis coordination under other multiple Presidential directives and strategies extend beyond homeland security concerns. On January 26, 2007, the Homeland Security Council’s Deputies Committee, along with the Assistant to the President for Homeland Security and Counterterrorism and the Assistant to the President for National Security Affairs reached unanimous concurrence to establish the National Exercise Program to enhance the capabilities of the Nation’s leaders to fulfill their responsibilities under any combination of emergencies and crises that may occur. Furthermore, on April 11, 2007, the President signed into action the NEP Implementation Plan, planting an official imprimatur to realize the NEP.

The NEP is based on the following:

- *National Level Exercises*: Cabinet officers and other key officials will be required to participate in five exercise events annually. One of these will be an operations-based exercise (i.e., full scale or functional/command post), the National Level Exercise (NLE).

NLEs will test existing policies, plans, and capabilities in concert with intergovernmental, private sector, and international partners where appropriate.

- *Proposed National Level Exercises:*
  - *FY 09 - International Terrorism – Prevention Focus*
  - *FY 10 - Domestic Non-Terrorism – Major Earthquake*
  - *FY 11 – Domestic Terrorism – Improvised Nuclear Device*
  - *FY 12 – International / Defense Crisis – Cyber Attack*
  - *FY 13 – Domestic Non-Terrorism – Major Hurricane*

In addition, four discussion-based exercises (i.e., tabletops or seminars), known as Principle Level Exercises (PLE), will be conducted each year to address emerging issues.

- *Interagency Ownership:* The Domestic Readiness Group (DRG) Exercise and Evaluation Sub-Policy Coordination Committee (E&E Sub-PCC) will recommend priorities, schedules, and corrective action issues to the Deputies Committee. A multi-agency NEP Executive Steering Committee, chaired by DHS, will provide day-to-day coordination of the program and frame issues for the full E&E Sub-PCC (and the DRG as appropriate).
- *Five Year Exercise Schedule:* A multi-year schedule of exercises and exercise topics will be presented to the Deputies no later than June 30 of each year, in advance of the budget call. Existing DHS and Department of Defense (DOD) exercise scheduling conferences will be used. The schedule will be driven by U.S. Government-wide strategic priorities.
- *Corrective Action Program (CAP):* To ensure meaningful exercise outcomes, a NEP CAP process will identify, analyze, prioritize, assign, and track progress on issues identified in NEP exercises.
- *Loose Alignment of Other Exercises:* The NEP does not replace other exercise programs, although some individual Department and Agency exercises may be incorporated into NEP exercises where they align closely with the goals and objectives. With only one NLE (rather than two), more schedule time is available for Department and Agency internal preparatory activities, which may be used to prepare for future NEP events (given the Five Year Schedule) or to address other organizational priorities.

### **State and Local Training Programs - \$79 million**

The State and Local Training Program provides first responders with a comprehensive Weapons of Mass Destruction (WMD) training program that improves their capacity to prevent, protect against, respond to, and recover from acts of terrorism. In administering this program, the Training and Exercise Integration (TEI) Division oversees, coordinates, and strives to institutionalize the development and delivery of comprehensive training that targets members of the responder community, providing WMD knowledge to enhance their skills and abilities. Ensuring the quality and consistency of training of first responders is a key element in FEMA's preparedness mission.

- **Center for Domestic Preparedness (\$47 million)**

Funds for the Center for Domestic Preparedness (CDP), now a component of FEMA's National Integration Center (NIC), will be allocated to provide specialized terrorism preparedness training for state, local, and tribal emergency responders on capacity-building skills tied to national priorities especially those related to WMD. CDP is the only federally chartered WMD training facility. In addition to developing and delivering emergency responder training at various levels, for a broad range of disciplines, the CDP also participates in efforts to standardize and decentralize training for state, local and tribal responders while maintaining training quality and gathering meaningful evaluation data for continuous program improvement and effective program management. The CDP also performs response-focused test and evaluation of emergency response equipment. The CDP

provides a unique training facility and environment for emergency responders to conduct specialized, advanced hands-on training in a toxic agent training venue that is not available at the state and local level.

- **National Domestic Preparedness Consortium (NDPC) (\$32 million)**

Funds for the NDPC are administered and managed by the Training and Exercise Integration (TEI) Division, a component of the NIC. The NDPC works with other NIC training branches to identify training needs for all emergency response disciplines responsible for terrorism and other catastrophic event prevention, deterrence, and incident response. Current NDPC membership is a partnership between university and government:

- The Energetic Materials Research and Testing Center (EMRTC), New Mexico Institute of Mining and Technology (New Mexico Tech), Socorro, NM.
- The National Center for Bio-Medical Research and Training (NCBRT), Louisiana State University (LSU), Baton Rouge, LA.
- The National Emergency Response and Rescue Training Center (NERRTC) at Texas A&M University, College Station, TX.
- The U.S. Department of Energy's (DOE) Nevada Test Site (NTS)/Counter Terrorism Operations Support (CTOS).

Each of the institutions focus on development and delivery of products and services according to their institutional basis of expertise. Under this arrangement, the NDPC demonstrated results in the Nation's unified effort to bring all levels of government, business, and the emergency response community to enhanced levels of preparedness. Initially, the courses were focused on (WMD), but Homeland Security Presidential Directive 8 (HSPD-8) expanded the course portfolio of the NDPC to encompass all hazards.

### **Technical Assistance Programs - \$10 million**

The Technical Assistance (TA) program is a capabilities-based program that is structured to build and sustain state and local capacity in priority preparedness activities. Under this vision, the TA services developed and delivered to state and local homeland security personnel address the full spectrum of the goals, priorities, and capabilities outlined in the National Preparedness Guidelines. As capability gaps are identified, the TA program develops services that can address those needs and build priority capabilities in the most critical areas. The TA program is designed to be an agile program that addresses present day areas of greatest state and local need, is committed to transferring and institutionalizing knowledge at the state and local level, provides a dynamic menu of services that is responsive to National priorities, is performance-based, and effectively leverages limited resources.

Additionally we are requesting that a separate budget line item for Grants Management Technical Assistance be added. The *Grants Management Technical Assistance Program* facilitates grants management through focused technical assistance for all FEMA's grantees on pressing issues and concerns faced in the management of FEMA grants. The main objectives of the Grants Management Technical Assistance are to: (1) help participants in developing/revising effective policies, procedures, and practices in critical areas of grants management; (2) facilitate problem-solving in addressing specific grants management issues; (3) apply proven business practices that will create greater efficiency in use of human capital to meet grants management priorities (i.e., monitoring, strategic planning, organization, program implementation, staff training, auditing, performance measurement); (4) improve participants' ability to conduct successful federal and state

programmatic and financial monitoring; (4) prepare participants for performance and financial audits; (5) improve participants' decision-making skills by focusing on more performance-oriented solutions which are consistent with state strategies and priorities; and (6) improve collaboration among policy, program, and financial staff as an effective means to integrate grants management operations.

### **Evaluation and Assessment Programs - \$16 million**

Through Evaluations and Assessments, DHS is working to implement a comprehensive system to measure the effectiveness of DHS programs, including HSPD-8 and the impact on our national readiness. Many of the measures in the National Preparedness Guidelines (NPG) will gauge the accomplishment of key milestones and events that will contribute to improved performance. The measures in the NPG all contribute to critical outcomes, and are more appropriately described as indicator measures of preparedness. This program gathers, analyzes, and interprets national and program specific data. As the focal point for information collection and evaluation, this program reviews and assesses the execution of State Strategies against the supporting threat, vulnerability, and needs assessment data.

- **Homeland Security Presidential Directive 8 (HSPD-8).** HSPD-8 requires the development of the NPG, to include measurable readiness priorities and targets, readiness metrics, standards for preparedness assessments and strategies, and a system for assessing the Nation's overall preparedness. Recent legislation, including the Post Katrina Emergency Management Reform Act of 2006 (PKEMRA) and the Implementing the 9/11 Commission Recommendations Act of 2007, reaffirmed and emphasized the need to develop measurable performance objectives that can serve as the basis of an objective system to assess DHS's progress and tie decisions to measurable national priorities for preparedness. This effort has resulted in the National Preparedness Guidelines and associated Target Capabilities List (TCL) which was published in September, 2007. The National Preparedness Guidelines establishes a vision for preparedness, national priorities, and an approach for organizing and synchronizing resources and capabilities.

This program is used to gather, analyze, and interpret national and program specific data that will directly measure the Nation's overall preparedness. The Evaluation and Assessment program results will directly contribute to the Annual Report to the President, and to key national evaluations of readiness, such as the TOPOFF 4 exercise series, by providing the analysis and assessment that supports achieving HSPD-8 initiatives.

- **Prevention and Deterrence Activities.** It is a critical priority for the Nation to help states, local jurisdictions, and our federal partners in achieving prevention related national priorities identified in the National Preparedness Guidelines. The Prevention and Deterrence Program is designed to meet this critical priority by integrating all state and local prevention-related activities, including technical assistance, training, and exercises, into a single, comprehensive prevention preparedness program. The goal is to design and build state and local prevention programs, appropriately allocate prevention resources, and create prevention capabilities. To achieve this goal, the program will identify the major planning tasks, deliverables, priorities and milestones, as well as provide policy oversight for Prevention and Deterrence technical assistance, training, exercises, and evaluations and assessments. The activities within this program also include serving as an executive agent managing and maintaining the National Planning Scenarios (NPS) and the NPS Universal

Adversary (UA) (prevention) Prequels for DHS on behalf of the interagency/intergovernmental clients.

- **National Preparedness System.** The goal of the National Preparedness System (NPS) is to provide a comprehensive overview of national preparedness. It will be designed to help policy-makers and practitioners at all levels to identify their capability requirements; define who will provide what capability resources for a major event (mutual aid partners, state, federal, private, etc.); identify gaps; track and improve readiness; locate additional resources, as needed; and make informed decisions to manage risk. NPS will be used fundamentally as a planning and assessment tool. Regular reports on preparedness will be produced using the System. HSPD-8 requires the development of system for assessing the Nation's overall preparedness to respond to major events, especially those involving acts of terrorism.
- **Program Management Activities.** The goal of Program Management activities is to create a performance management culture among National Preparedness program managers and deliver more successful projects. To achieve this goal, the program will help align the organization's investments with its strategic goals; develop and track performance measures in support of the organization's goals and objectives; develop project management processes and tools; build project management professionalism; and oversee training and certification of project managers and contracting officers' technical representatives.

**Commercial Equipment Direct Assistance Program (CEDAP) – No funds requested in FY09**

The Commercial Equipment Direct Assistance Program (CEDAP) transfers technologies directly to smaller jurisdictions and eligible metropolitan areas to prevent, deter, and respond to terrorist attacks, as identified in state homeland security strategies. CEDAP offers equipment with training in the following categories: Personal Protective Equipment, Rescue Tools, Detection and Sensor Devices, Information Sharing Software, Risk Assessment Software, and Communications Interoperability Systems. This competitive program is a direct assistance program, not a grant program, and provides the equipment and technical assistance directly to the selected jurisdictions.

The System Assessment and Validation for Emergency Responders (SAVER) Program provides high quality, impartial, operationally relevant evaluations and validations of critical emergency responder related equipment, and provides those results to the community in a useful form. SAVER provides decision makers and responders with information to better select, procure, use, and maintain emergency response equipment. The SAVER website has a total of 47,715 registered users and 271 reports. This sharing of information is a life-saving and cost-saving asset to the U.S. Department of Homeland Security, as well as to federal, state, local, and tribal users of emergency response equipment.

## **Recent and Planned Accomplishments**

### National Exercise Programs

#### **FY 2007 Accomplishments:**

- Completed the majority of TOPOFF 4 mid-term and final planning conferences and the National-level and Venue Seminars for the full-scale exercise conducted in October 2007.
- Conducted two principal-level exercises related to IEDs and RDDs..
- Revised and released the HSEEP methodology to support the NEP.
- Finalized and established the NEP I-Plan.
- Conducted four prevention exercises throughout various regions in the United States to include pre-full scale prevention component of TOPOFF 4.
- Provided 100 Direct Exercise Support deliveries to state and local governments.
- Released the Homeland Security Exercise and Evaluation Program (HSEEP) Toolkit, a web-based system which provides Federal, state and local exercise planners with automated tools to schedule, plan, conduct, and evaluate exercises in accordance with the HSEEP Policy and Guidance.

#### **FY 2008 Planned Accomplishments:**

- Conduct T4 TOPOFF full-scale exercise and Long-Term Recovery Tabletop Exercise and produce after action documentation and conduct After Action Conference to include National After Action Conference.
- Implement the Corrective Action Program (CAP) to identify areas for improvement and assign and track to completion. Identify lessons learned and best practices to be disseminated via Lessons Learned Information Sharing (LLIS.gov). Review the programs and identify best practices for a fully integrated system.
- Conduct Tier 1 National-Level Exercise.
- Implement Regional Exercise Support Program (to promote Regional collaboration and replace the former Direct Support Program)
- Support FEMA international exercise planning initiatives.
- Conduct Principal-level exercises.
- Continue to refine and improve the HSEEP Toolkit.
- Release prevention-specific HSEEP guidance.
- Initiate development of a National SIMCELL capability. Conduct research and analysis of existing capabilities and submit proposal for future funding.

#### **FY 2009 Planned Accomplishments:**

- Continue development of a National Simulation Cell capability (dependent on available funds and interagency objectives).
- Conduct Tier 1 National-Level Exercise.
- Develop Transition Training to support administration change.
- Continue to refine NEP and HSEEP Policies and guidance.
- Use the exercise design, development, conduct and evaluation process to develop doctrine and a prototype System.

## State and Local Training Programs

### **FY 2007 Accomplishments**

- Administered the funding for the FY 2007 Competitive Training Grant Program (CTGP), and the FY 2007 Homeland Security National Training Program (HSNTP) which includes the NDPC, Rural Domestic Preparedness Consortium (RDPC) and the Continuing and Emerging Grant Program.
- Through the HSNTP and CTGP, TEI trained over 180,000 responders in resident, non-resident, and Train-the-Trainer programs, and reached out to more than 360,000 with preparedness information through satellite broadcasts.
- Continued the support of the Level 1 Evaluation system that reaches 100% of course participants in DHS approved courses. The system was designed to gauge student perception of instructor preparedness, course effectiveness, and applicability of material to participant's job.
- Trained 60,000 responders in resident, non-resident, and Train-the-Trainer programs through 2,605 course iterations at the Center for Domestic Preparedness.
- Completed course certification process for 14 of the 22 courses offered by the Center for Domestic Preparedness
- Integrated the Noble Training Center facility, a transfer from the US Fire Administration, including 150,000 square feet of additional training space and 240 additional dormitory rooms.

### **FY 2008 Planned Accomplishments**

- Continue implementing a Level 1 Evaluation system that reaches 100% of course participants in TEI approved courses. The system is designed to gauge student perception of instructor preparedness, course effectiveness, and the applicability of the material to the participant's job.
- Continue to map all courses to a minimum of three target capabilities and reconfigure courses to align.
- Train 70,000 responders in resident, non-resident, Train-the-Trainer and blended learning programs through 2,865 course iterations.
- Continue clean-up and renovation of Noble facilities; conduct 120 hands-on training courses in this new space.
- Develop and implement three new courses based on training needs assessments.

### **FY 2009 Planned Accomplishments**

- **Level 2 Evaluation System:** Continue to refine the Level 2 System that standardizes the form used to scan course participants' knowledge and skills acquired during courses.
- **Instructor Audit:** Continue conducting course audits in ten percent of TED approved classes. The course audit process is designed to monitor instructor effectiveness.
- **Course Review:** Continue conducting course review and certification of 100% of courses developed by TEI Training Partners. To ensure the highest standard of quality, the course review process requires that subject matter experts review both the content and flow of all courses prior to offering them to the public.
- **TCL Course Alignment Project:** Continue to map all courses to a minimum of three target capabilities and reconfigure courses to align.
- Provide communication and outreach to the training partners, internal and external customers (TRADE, IAB).

## Technical Assistance

### **FY 2007 Accomplishments**

- Provided TA to 75 cities for the development of evacuation and catastrophic plans per the Nationwide Plan Review. Developed analysis and scorecards.
- Developed and delivered investment planning TA to 45 states and territories.
- Developed and delivered program management TA to 27 states and territories.
- Partnered with the Department of Justice (DOJ) to provide 22 TA services to facilitate the development of state and local intelligence fusion centers.

### **FY 2008 Planned Accomplishments**

- Each individual technical assistance service developed and delivered by the TA program has short- and long-term objectives. Similarly, the overall TA program also has specific objectives that guide it.
- Short-term objective: Ensure that technical assistance services are oriented to support the alignment with the NPG and specifically address National Priorities and target capabilities.
- Long-term objective: Develop sustainable solutions and effective tools to assist state and local jurisdictions in building capabilities that address their areas of greatest need and support overall alignment with the NPG.
- Develop a program structure that is built around national priority elements that include intelligence sharing, information sharing, interoperable communications and catastrophic planning.
- Provide further TA on catastrophic planning based on results of Nationwide Plan Review and TICP scorecards.
- Continue to deliver a suite of 11 fusion process TA services to facilitate the development of a baseline level of capability in fusion centers nationwide.

### **FY 2009 Planned Accomplishments**

- Institutionalize program structure that is built around national priority elements that include intelligence sharing, information sharing, interoperable communications, and catastrophic planning. Incorporate new priorities into structure as appropriate.
- Continue to expand design, development, and delivery of TA on catastrophic planning based on results of Nationwide Plan Review and TICP scorecards.
- Design, develop, and deliver new chapter of fusion process TA services to facilitate the development of advanced fusion process capabilities in fusion centers nationwide
- Design, develop and deliver new TA services (preparedness and program management) as necessary and appropriate.

## Evaluations and Assessments

### **FY 2007 Accomplishments**

- Published annual report detailing performance and accomplishments of state and local programs.
  - Identify, assess, evaluate, and develop risk based-earned value preparedness plans which will strategically allocate and position limited assets and resources.
  - Analyze catastrophic planning gaps and identify requirements shortfalls. Define capability structure that serves as the basis for grant guidance
  - Evaluate all hazard preparedness planning for the most vulnerable segment of the population. FY 2007 activities to include a baseline definition and initial segment evaluation.
- Completed comprehensive plan for each of 15 major catastrophe scenarios in National Response Framework (NRF).
- Augmented the National Preparedness Assessment and Reporting system including system development and establishment of the management processes. Established a dedicated program executive staff to oversee contractual efforts, support readiness management processes, and compile required readiness reports. This supports the requirement in HSPD-8 to provide an annual status report on the preparedness of the United States.
- Monitored program improvement actions developed as a result of the Program Assessment Rating Tool (PART) findings and implement required changes.
- Supported Program Assessment Rating Tool (PART) review of the Assistance to Firefighter Grants (AFG).
- Developed, monitored, and reported program performance measures quarterly for state and local grant programs, and training and exercise programs for Future Years Homeland Security Program.
- Established and shared a disciplined, collaborative, and integrated system for homeland security planning at all levels of government as outlined in the National Preparedness Guidelines.

### **FY 2008 Planned Accomplishments**

- Complete comprehensive plan for each of 15 major catastrophe scenarios in National Response Framework (NRF).
- Ensure each state has implemented a statewide interoperable communications plan.
- Establish program and project manager training and certification in accordance with applicable DHS management directives
- Implement project management processes and quarterly reviews for projects across the organization.
- Leverage existing and developmental data systems to provide program status summary reports and dashboard for management team reflecting alignment to performance management goals.
- As directed by Annex 1 of Homeland Security Presidential Directive 8, issued in December 2007, DHS has taken the lead in developing an Integrated Planning System (IPS) to provide an all-hazards planning process across all levels of government.
- Develop an Integrated Planning System and associated deliverables (NPD's area not GPD's)

### **FY 2009 Planned Accomplishments**

- Establish and share a disciplined, collaborative, and integrated system for homeland security planning at all levels of government as outlined in the National Preparedness Guidelines.
- Develop national doctrine for homeland security operational planning through the exercise design, development, performance and evaluation process.
- Establish of nationwide performance measurement system for levels of preparedness and readiness.
- Provide grant recipients with method to conduct baseline resource inventories.

### Commercial Equipment Direct Assistance Program (CEDAP)

#### **FY 2007 Accomplishments**

- FEMA provided 1,853 awards totaling \$33.7 million in equipment and training directly to first responder agencies of smaller communities further strengthening the Nation's unified capability to prevent, protect against, respond to, and recover from incidents of terrorism and other catastrophic events.
- Of the 1,853 awards, 56 were interoperable communications equipment awards totaling \$710,597 in equipment and training
- CEDAP equipment and training was provided in five categories: personal protective equipment (PPE); thermal imaging, night vision, and video surveillance tools; chemical and biological detection tools; information technology and risk management tools; and interoperable communications equipment.
- Since the program's inception in FY 2005, the Department has provided over \$103 million in CEDAP equipment and training.
- 518 SAVER projects/reports were posted to the SAVER website.

#### **FY 2008 Planned Accomplishments**

- FEMA estimates awarding over \$16 million in equipment and training directly to first responder agencies of smaller communities further strengthening the Nation's unified capability to prevent, protect against, respond to, and recover from incidents of terrorism and other catastrophic events.
- SAVER anticipates completing and posting 250 SAVER projects/reports to the SAVER website.

**IV. Program Justification of Changes**

**Department of Homeland Security  
Federal Emergency Management Agency (FEMA)  
State and Local Programs  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Change 1:** Reduction to Homeland Security Prevention and Protection Programs

**Strategic Goal(s) & Objective(s):** DHS Goal 4 - Build a nimble, effective emergency response system and a culture of preparedness, Objective 4. 2

**PPA:** Homeland Security Prevention and Protection Programs

Program Decrease: Positions: 0 FTE: 0 Dollars: (\$1,157,500)

|                        | FY 2007 Actual |          |                 | FY 2008 Enacted Budget |          |                 | FY 2009 Request |     |                    |
|------------------------|----------------|----------|-----------------|------------------------|----------|-----------------|-----------------|-----|--------------------|
|                        | Pos            | FTE      | Dollars (\$000) | Pos                    | FTE      | Dollars (\$000) | Pos             | FTE | Dollars (\$000)    |
| Current Services Level |                |          |                 |                        |          |                 |                 |     | \$2,697,500        |
| Program Decrease       |                |          |                 |                        |          |                 | 0               | 0   | (\$1,157,500)      |
| <b>Total Request</b>   | <b>0</b>       | <b>0</b> | <b>0</b>        | <b>0</b>               | <b>0</b> | <b>0</b>        |                 |     | <b>\$1,540,000</b> |

**Description**

The FY 2009 request for the grant programs that comprise the Homeland Security Prevention and Protection Program PPA reflects a \$1,157,500 decrease from FY 2008 enacted level for these programs.

**Justification**

The reduction in the Homeland Security Prevention and Protection Grant Programs is based on several factors including the substantial level of funding over the past six years and a reprioritization of DHS resources. Even at the reduced level, FEMA will continue to improve the programs' effectiveness as a national grant program to enhance state and local preparedness.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The Homeland Security Prevention and Protection Program currently supports the strategic goal to build a nimble, effective emergency response system and a culture of preparedness.

**Description**

The FY 2009 request for the programs that comprise the Other State and Local Support Programs PPA reflects a \$179,300,000 decrease from FY 2008 enacted level for these activities.

**Justification**

The reduction in the Other State and Local Support Programs is based on several factors including the substantial level of funding over the past five years and a reprioritization of FEMA resources. Even at the reduced level, FEMA will continue to improve the programs' effectiveness as a national grant program to enhance state and local preparedness.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The Other State and Local Support Programs currently supports the strategic goal to build a nimble, effective emergency response system and a culture of preparedness.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Emergency Management Agency  
Justification of Proposed Changes in Appropriation Name  
Appropriation Language**

State and Local Programs  
(including transfer of funds)

For grants, contracts, cooperative agreements, and other activities, [\$3,177,800,000] \$1,900,000,000 shall be allocated as follows:

(1) [\$950,000,000] \$200,000,000 shall be for the State Homeland Security Grant Program under section 2004 of the Homeland Security Act of 2002 (6 U.S.C. 605) as amended by Implementing Recommendations of the 9/11 Commission Act of 2007 (Public Law 110-53): [Provided, That of the amount provided by this paragraph, \$60,000,000 shall be for Operation Stonegarden and is designated as described in section 5 (in the matter preceding division A of this consolidated Act):] *Provided further*, That notwithstanding subsection (c)(4) of such section 2004, for fiscal year [2008]2009, the Commonwealth of Puerto Rico shall make available to local and tribal governments amounts provided to the Commonwealth of Puerto Rico under this paragraph in accordance with subsection (c)(1) of such section 2004.

(2) [\$820,000,000] \$825,000,000 shall be for the Urban Area Security Initiative under section 2003 of the Homeland Security Act of 2002 (6 U.S.C. 604) as amended by Implementing Recommendations of the 9/11 Commission Act of 2007 (Public Law 110-53).[, of which, notwithstanding subsection (c)(1) of such section, \$15,000,000 shall be for grants to organizations (as described under section 501(c)(3) of the Internal Revenue Code of 1986 and exempt from tax section 501(a) of such code) determined by the Secretary to be at high-risk of a terrorist attack.]

[ (3) \$35,000,000 shall be for Regional Catastrophic Preparedness Grants.]

[ (4) \$41,000,000 shall be for the Metropolitan Medical Response System under section 635 of the Post-Katrina Emergency Management Reform Act of 2006 (6 U.S.C. 723)].

[ (5) ](3) \$15,000,000 shall be for the Citizens Corps Program;

[ (6) ](4) \$200,000,000 shall be for emergency management performance grants, as authorized by the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.), the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701 et seq.), and Reorganization Plan No. 3 of 1978 (5 U.S.C. App.).

(5) [\$400,000,000] \$175,000,000 shall be for Public Transportation Security Assistance [and Railroad Security Assistance] under section[s] 1406 [and 1513] of the Implementing

Recommendations of the 9/11 Commission Act of 2007 (Public Law 110-53; 6 U.S.C. 1135 [and 1163), of which not less than \$25,000,000 shall be for Amtrak security].

[(7)](6) [\$400,000,000] \$210,000,000 shall be for Port Security Grants in accordance with 46 U.S.C. 70107.

[(8)](7) [\$11,500,000] \$12,000,000 shall be for Over-the-Road Bus Security Assistance under section 1532 of the Implementing Recommendations of the 9/11 Commission Act of 2007 (Public Law 110-53; 6 U.S.C. 1182).

[(9)](8) [\$16,000,000] \$8,000,000 shall be for Trucking Industry Security Grants.

[(10)](9) \$110,000,000 shall be for the National Security and Terrorism Prevention Grant Program to provide competitive grant awards for projects which address national risks and vulnerabilities identified by the Secretary;

[ \$50,000,000 shall be for Buffer Zone Protection Program Grants.]

[(11) \$50,000,000 shall be for grants under section 204 of the REAL ID Act of 2005 (Public Law 109-13; 49 U.S.C. 30301 note): *Provided*, That the amount provided under this paragraph shall be designated as described in section 5 (in the matter preceding division A of this consolidated Act).(12) \$25,000,000 shall be for the Commercial Equipment Direct Assistance Program.]

[(13) \$50,000,000 shall be for the Interoperable Emergency Communications Grant Program under section 1809 of the Homeland Security Act of 2002 (6 U.S.C. 579) as amended by Implementing Recommendations of the 9/11 Commission Act of 2007 (Public Law 110-53).]

[(14) \$15,000,000 shall be for grants for construction of Emergency Operations Centers under section 614 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5196c) as amended by Implementing Recommendations of the 9/11 Commission Act of 2007 (Public Law 110-53).] *and*

[(15)] (10)[\$299,300,000] \$145,000,000 shall be for training, exercises, technical assistance, and other programs:

*Provided*, That not to exceed [3]three percent of the amounts provided under this heading may be transferred to the Federal Emergency Management Agency "Management and Administration" account for program administration: *Provided further*, That for grants under paragraphs (1) through ([5]3), the applications for grants shall be made available to eligible applicants not later than [25]45 days after the date of enactment of this Act, that eligible applicants shall submit applications not later than 90 days after the grant announcement, and that the Administrator of the Federal Emergency Management Agency shall act within 90 days after receipt of an application: *Provided further*, That for grants under paragraphs ([6]4) through ([11]7), the applications for grants shall be made available to eligible applicants not later than [30]75 days after the date of enactment of this Act, that eligible applicants shall submit applications within 45 days after the grant announcement, and that the Federal Emergency Management Agency shall act not later than 60 days after receipt of an application: *Provided further, for grants under paragraphs (1) and (2), the installation of communications towers as determined necessary by the Secretary of*

*Homeland Security, shall not be subject to any limitation in 6 U.S.C. 609(b)(3)(B)(ii)(III): Provided further, That grantees shall provide additional reports on their use of funds, as determined necessary by the Secretary of Homeland Security: Provided further, That (a) the Center for Domestic Preparedness may provide training to emergency response providers from the Federal Government, foreign governments, or private entities, if the Center for Domestic Preparedness is reimbursed for the cost of such training, and any reimbursement under this subsection shall be credited to the account from which the expenditure being reimbursed was made and shall be available, without fiscal year limitation, for the purposes for which amounts in the account may be expended, (b) the head of the Center for Domestic Preparedness shall ensure that any training provided under (a) does not interfere with the primary mission of the Center to train state and local emergency response providers: [Provided further, That the Government Accountability Office shall report to the Committees on Appropriations of the Senate and the House of Representatives regarding the data, assumptions, and methodology that the Department uses to assess risk and allocate Urban Area Security Initiative and State Homeland Security Grants not later than 45 days after the date of enactment of this Act: Provided further, That the report shall include the reliability and validity of the data used, the basis for the assumptions used, how the methodology is applied to determine the risk scores for individual locations, an analysis of the usefulness of placing states and cities into tier groups, and the allocation of grants to eligible locations: Provided further, That the Department provide the Government Accountability Office with the actual data that the Department used for its risk assessment and grant allocation for at least two locations at the discretion of the Government Accountability Office for the 2007 grant allocation process: Provided further, That the Department provide the Government Accountability Office with access to all data needed for its analysis and report, including specifics on all changes for the fiscal year 2008 process, including, but not limited to, all changes in data, assumptions, and weights used in methodology within seven days after the date of enactment of this Act: Provided further, That any subsequent changes made regarding the risk methodology after the initial information is provided to the Government Accountability Office shall be provided within seven days after the change is made.] (Department of Homeland Security Appropriations Act, 2008.)*

**Explanation of Changes:**

Resource amounts were updated to reflect changes in enacted levels and requested levels. Emergency Management Performance Grant funding language was added. The new National Security and Terrorism Prevention Program language was added.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)** **ASSISTANCE TO FIREFIGHTER GRANTS**

### **I. Appropriation Overview**

#### **A. Mission Statement for Assistance to Firefighter Grants (AFG):**

The Assistance to Firefighter Grants (AFG) Program provides support to fire departments and non-affiliated emergency medical services (EMS) to improve the readiness and capability of local first-responders during all-hazards emergencies including firefighting and EMS operations. Assistance to Firefighter Grants are an integral part of the Department of Homeland Security's grant programs that assist federal agencies, states, territories, tribal, and local jurisdictions protect against, prevent, plan for, and respond to acts of terrorism and other catastrophic events. The Assistance to Firefighter Grants program is administered through FEMA's Grant Programs Directorate.

#### **B. Budget Activities:**

The AFG Program awards one-year grants directly to fire departments and non-affiliated emergency medical services (EMS) organizations throughout the United States to support the Nation's first-responders in improving the effectiveness of firefighting and EMS operations.

#### **C. Budget Request Summary:**

For the AFG Program, FEMA requests 54 positions, 54 FTE, and \$300,000,000 for FY 2009. This request represents a program reduction of \$450,000,000 from the FY 2008 enacted level.

| 2009 Program Change          | 0                   | 0          | (235,500)        |
| <b>2009 Request</b>          | <b>0</b>            | <b>0</b>   | <b>287,000</b>   |
| Total Change 2008-2009       | 0                   | 0          | (235,500)        |

FEMA requests \$287,000,000 for this activity in FY 2009. This is a decrease of \$235,500,000 from the FY 2008 enacted level.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Assistance to Firefighters Grant (AFG) Program awards grants directly to fire departments and non-affiliated emergency medical services (EMS) organizations throughout the United States to support one-year projects improving the effectiveness of the Nation's first-responders in homeland security, firefighting, and EMS operations.

FEMA's Grant Programs Directorate administers the program, in cooperation with the U.S. Fire Administration. The entire AFG process is fully automated in an e-grant system. Applicants apply on-line; grants are awarded electronically; grantees manage their grants (payment requests, amendments, etc.) on-line; and grants are monitored and closed out electronically.

For FY 2008, grantees will again be invited to submit an application for assistance in the following two program areas most critical to enhancing the capabilities of the fire and EMS services:

- Operations and Safety Program, which includes training, equipment, and personal protective equipment;
- Firefighting Vehicles Acquisition Program, which includes pumpers, brush trucks, tankers/tenders, rescue vehicles, ambulances, quints, aerials, foam units, and fireboats.

The FY 2008 and FY 2009 invitation to apply will not include wellness/fitness activities or modifications to facilities for firefighter safety. As long as some of our Nation's first-responders lack personal protective gear, training, and critical response equipment, federal preparedness funds should be used for those activities, not for personal health or facility alterations. As in past years, a percentage of funds will be reserved for the Fire Prevention and Safety grants, which include public education and awareness activities, fire code enforcement activities, fire inspector certifications and inspection activities, purchase and installation of smoke alarms and/or fire suppression systems, wild land mitigation awareness, and arson prevention and detection activities.

In FY 2007, the Department received approximately 23,000 applications under the AFG program. Funding priorities for each of the funding activities are announced by DHS, based on the Department's National Preparedness Guidelines as well as recommendations from the Nation's fire service, as represented by nine major fire service organizations. The applications that most closely relate to these announced priorities are reviewed by peer panels. The peer review panels typically take three weeks to complete and commence within two weeks of the end of the grant application period. The grant awards are based primarily on the results of the peer review panels.

In their applications, applicants have to demonstrate financial need, articulate the benefits to be derived from the grant funds, and provide details regarding the effect the grant would have on the applicant's daily operations. The grants are intended to supplement a fire department's or EMS organization's current budget rather than supplant it. To this end, grantees must agree to maintain expenditures in the selected grant category at the organization's average spending rate as determined by the previous two years.

Volunteer and combination departments must receive a proportion of the total grant funding that is at least equal to the proportion of the Nation's population that those fire departments protect. In preparation for the FY 2008 and 2009 grant cycles, the Grant Programs Directorate will use the most current information available to estimate the proportion of the Nation's population protected by volunteer and combination fire departments.

Other legislated restrictions include a ceiling on the cumulative value of vehicle awards set at 25 percent of the total appropriation. Beginning in FY 2005, DHS was directed by Congress to award no less than three and one-half (3.5) percent of the appropriation for EMS activities, with no more than two (2) percent of the total appropriation going to non-affiliated EMS organizations.

The maximum size of each grant is based on the grantee's population protection. The grantees generally must also share in the cost of the funded project the percentage based on the population of their respective jurisdictions. Those limits and cost-sharing requirements are listed below.

These tables show the respective population-based requirements under grants awarded for *Operations and Safety or Vehicle Acquisition*:

Maximum Grant Per Fiscal Year:

| <u>Jurisdiction Size</u> | <u>Maximum Grants per FY</u>                      |
|--------------------------|---|
| Up to 500,000            | Lesser of \$1,000,000, or 0.5% of available funds |
| 500,000 – 1,000,000      | Lesser of \$1,750,000, or 0.5% of available funds |
| Over 1,000,000           | Lesser of \$2,750,000, or 0.5% of available funds |

Grant cost-sharing requirements for the Assistance to Firefighters Grant Program:

| <u>Jurisdiction Size</u> | <u>Local Cost-Share</u> |
|--------------------------|-------------------------|
| Below 20,000             | 5%                      |
| 20,000 and 50,000        | 10%                     |
| Above 50,000             | 20%                     |

Fire Prevention and Safety grants have a \$1,000,000 limit with no cost sharing requirements for non-fire department applicants. Fire departments, however, are subject to the same population-based cost sharing requirements detailed above.

## **Recent and Planned Accomplishments**

### **FY 2007**

- Received approximately 23,000 applications and issued approximately 5,000 grant awards. Of these, 20,739 were applications for AFG including 1,276 (6.2%) from urban jurisdictions, 3,436 (16.6%) from suburban jurisdictions, and 16,027 (77.2%) from rural jurisdictions. Grants awards began at the end of July 2007 and continued throughout the 2007 calendar year.
- Utilized results of National Academy of Public Administration (NAPA) project to begin establishing a strategic planning process and evaluating the AFG program's future direction.
- Initiated outreach efforts to improve application quality and responsiveness to applicant needs.

### **FY 2008**

- Complete the first stage of strategic planning and redirection of the AFG program.
- Establish enhanced performance measures and performance measure reporting as recommended by NAPA in its 2007 report to AFG.

### **FY 2009**

- Collect performance measure data per recommendations from the 2007 NAPA report and initiate the evaluation thereof.
- Initiate planning for the use and application of the performance data gathered during the previous year.
- Initiate the first phase of the redirection of the AFG program as recommended by NAPA.

FEMA requests 54 positions, 54 FTE and \$13 million for this activity. This request represents a decrease of \$24,500,000 from the FY 2008 enacted level.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

FEMA requests \$13 million and 54 FTEs for the management and administration of the Assistance to Firefighter Grants program. Management and administration includes traditional operations and program management resources. The AFG program is administered by FEMA’s Grant Programs Directorate (GPD). GPD awards and manages the AFG grants, providing support and oversight to the thousands of AFG grant awards each year. These funds support the salary and benefit costs for GPD staff working on the AFG program.

The program administration PPA also funds the support contracts necessary for the full and complete implementation of the AFG program. The major support contractor provides staff and information data support for the panel review process, web management, grants administration, payment/amendment processing, closeout, and logistical support for the panel review process. The staff provided range from clerks to subject matter specialists, as the task dictates. This PPA also funds formal audits of AFG grants by a qualified third party.

Description of Item

The Assistance to Firefighter Grants program is reduced by \$235,500,000 in FY 2009 from FY 2008.

Justification

A funding level of \$287,000,000 is requested to fund applications that enhance the most critical capabilities of local response to fire-related hazards in the event of a terrorist attack or major disaster. The Administration believes that \$287 million is an appropriate level of funding given the availability of significant amounts of funding for first responder preparedness missions from other DHS grant programs which are coordinated with state and local homeland security strategies and, unlike AFG, are allocated on the basis of risk.

**Program Decrease 2:**                      Reduction to Program Administration

Description of Item

The Assistance to Firefighter Grants Program Administration is increased by \$386,000 for inflation and reduced by (\$24,886,000) programmatically in FY 2009 from FY 2008. The net reduction totals (\$24,500,000).

Justification

This reduction is a result of the lower requested amount in AFG grant funding and the elimination of the SAFER grant program. A reduction in the number and types of grants awarded lowers the amount of administrative resources required to effectively run the program.

**Program Decrease 3:** Elimination of SAFER Grants

Strategic Goal(s) & Objective(s): Increase Preparedness  
 PPA: Assistance to Firefighter Grants

Program Decrease: Positions 0 FTE 0 Dollars \$ (190,000)

Funding Profile (\$ in thousands)

Description of Item

No funds are requested for the SAFER grant program in FY 2009. This request represents a decrease of \$190,000,000 from the FY 2008 enacted level.

Justification

The Administration provides billions of dollars in annual support to train, exercise, and equip state and local public safety personnel, including firefighters, so that they are adequately prepared to respond to a terrorist attack or other major incident. Federal support has been directed in order to better focus scarce resources on enhancing target capabilities, and to avoid supplanting basic public safety investments at the state and local level. A federally funded hiring program for firefighters risks replacing state and local funding for general purpose public safety staffing with federal resources, and therefore does not forward the common goal of enhancing national preparedness capabilities.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security**  
**Federal Emergency Management Agency (FEMA)**  
**Assistance to Firefighter Grants**  
**Appropriation Language**

For necessary expenses for programs authorized by the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2201 et seq.), [\$750,000,000 of which \$560,000,000] \$300,000,000 shall be available to carry out *subsections 33 (b)(3)(B), (H), and (I) of section 33* of that Act (15 U.S.C. 2229) [and \$190,000,000 shall be available to carry out section 34 of that Act (15 U.S.C. 2229a), \$300,000,000] to remain available until September 30, [2009]2010: *Provided*, That not to exceed five percent of this amount shall be available for program administration. (*Department of Homeland Security Appropriation Act, 2008.*)

#### **Justification of Changes**

The proposed legislative language limits the allowable uses for fire department grants to training, equipment, and personal protective gear needed to respond to a terrorist incident or the use of a weapon of mass destruction.

### PPA Mission Statement

Assistance to Firefighter Grants plays a vital role in providing fire departments and non-affiliated emergency medical services (EMS) support to improve the readiness and capability of local first-responders during all-hazards emergencies including firefighting and EMS operations. Assistance to Firefighter Grants are an integral part of the Department of Homeland Security's grant programs that assist federal agencies, states, territories, tribal, and local jurisdictions to prepare, prevent, plan for, and respond to acts of terrorism and other catastrophic events.

### Summary Justification and Explanation of Changes

|                                       | <b>2007</b>      | <b>2008</b>      | <b>2009</b>      | <b>2008 to 2009</b> |
|---------------------------------------|------------------|------------------|------------------|---------------------|
|                                       | <b>Actual</b>    | <b>Enacted</b>   | <b>Request</b>   | <b>Change</b>       |
| <b>Grants/Subsidies/Contributions</b> | <b>\$191,107</b> | <b>\$522,500</b> | <b>\$287,000</b> | <b>(\$235,500)</b>  |

The FY 2009 request includes a program decrease of \$235,500,000 for award of all firefighter grants. The Administration believes that \$287 million is an appropriate level of funding given the significant amount of funding available for similar purposes from other programs such as the State Homeland Security and Urban Area Security Initiative grant programs.

### PPA Mission Statement

The Program Administration PPA includes funding for traditional operations and program management resources. The AFG program is administered by FEMA's Grant Programs Directorate (GPD). GPD awards and manages the AFG grants, providing support and oversight to the thousands of AFG grant awards each year. This PPA supports the salary and benefit costs for GPD staff working on the AFG program as well as contractor support.

### Summary Justification and Explanation of Changes

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | <b>\$1,253</b>         | <b>\$5,508</b>          | <b>\$5,673</b>          | <b>\$165</b>                   |

Salaries and Benefits includes costs for 54 FTEs. The FY 2009 request includes an increase of \$145,000 for the proposed January 2009 increase in personnel compensation and annualization of the FY 2008 pay increase.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | <b>\$81</b>            | <b>\$1,350</b>          | <b>\$84</b>             | <b>(\$1,266)</b>               |

The FY 2009 request includes a decrease of \$1,266,000 due to the lower requested amount in overall AFG grant funding.

|                       | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Other Services</b> | <b>\$20,171</b>        | <b>\$30,544</b>         | <b>\$7,145</b>          | <b>(\$23,399)</b>              |

The FY 2009 request includes a decrease of \$23,399,000 due to the lower requested amount in overall AFG grant funding.

|                                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Supplies &amp; materials</b> | <b>\$0</b>             | <b>\$98</b>             | <b>\$98</b>             | <b>\$0</b>                     |

The FY 2009 request of \$98,000 remains consistent with the FY 2008 funding level.

**PPA Mission Statement**

SAFER grants are competitive grants for: 1) hiring of (paid) firefighters, and 2) recruitment and retention of volunteer firefighters.

**Summary Justification and Explanation of Changes**

|                                       | <b>2007</b>   | <b>2008</b>      | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------------------------------|---------------|------------------|----------------|---------------------|
|                                       | <b>Actual</b> | <b>Enacted</b>   | <b>Request</b> | <b>Change</b>       |
| <b>Grants/Subsidies/Contributions</b> | <b>\$0</b>    | <b>\$190,000</b> | <b>\$0</b>     | <b>(\$190,000)</b>  |

There are no requested funds in FY 2009. The Administration has requested significant funds over the several years to support public safety preparedness at the state and local level. Congress has appropriated and the Administration has granted billions of dollars to support training, exercising, and equipping public safety personnel, including firefighters, across the Nation. The Administration believes that federal support should be focused on enhancing, not replacing, local preparedness efforts. Furthermore, the Administration does not believe that a federally-funded hiring program is consistent with the enhancement of existing, local preparedness capabilities.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA) RADIOLOGICAL EMERGENCY PREPAREDNESS PROGRAM

### **I. Appropriation Overview**

#### **A. Mission Statement for Radiological Emergency Preparedness Program (REPP):**

The Radiological Emergency Preparedness Program (REPP) assists state, local, and tribal governments in the development of offsite radiological emergency preparedness plans within the emergency planning zones of Nuclear Regulatory Commission (NRC) licensees of commercial nuclear power facilities. The REPP fund is financed from user fees assessed and collected from the NRC licensees to cover budgeted costs for radiological emergency planning, preparedness, and response activities in the following year.

#### **B. Budget Activities:**

REPP estimates the Fiscal Year (FY) 2009 offsetting collection authority to be \$25,919,000. The proposed budget represents a four percent inflationary increase over the FY 2008 Enacted level.

#### **C. Budget Request Summary:**

FEMA requests budget authority of \$25,919,000 in FY 2009 to:

- Conduct and evaluate REPP exercises.
- Support the NRC and nuclear industry with offsite planning activities related to new reactor license applications.
- Perform routine annual reviews of offsite radiological emergency response plans and related preparedness activities.
- Conduct radiological courses for federal, state, tribal and local emergency response personnel.
- Review alert and notification systems installed around nuclear power facilities.

## II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)

| <b>2009 Budget Authority Request</b> | <b>170</b>  | <b>170</b> | <b>\$25,919</b> |
| Total Change 2008-2009               | 0           | 0          | \$997           |

FEMA requests \$25,919,000 representing a \$997,000 increase over FY 2008. The requested budget represents a four percent inflationary increase from FY 2008.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

REPP plans and executes nationally coordinated, locally executed radiological emergency preparedness and response activities. The program assists state and local governments in the development of off-site radiological emergency preparedness plans within the emergency planning zones of NRC licensed commercial nuclear power facilities. REPP's success lies in its ability to integrate and enhance federal, tribal nation, state, and local governments' planning preparedness, and response capabilities for all types of peacetime radiological emergencies.

Funds for REPP activities are generated through licensing fees charged to each participating reactor. Amounts available for obligation in a given year rely on the level of collections received in the prior fiscal year. In FY 2008, fees are currently projected to increase by four percent over the FY 2007 level, generating a four percent increase in funds available for obligation in FY 2009.

#### **Terrorism-based Initiatives**

Since September 11, 2001, REPP has received requests to participate in exercises, drills, roundtable discussions, issue committees and working groups associated with nuclear power plant security as well as emergency preparedness planning for incidents involving a radiological dispersal device or improvised nuclear device. REPP does not have the capacity to support all of these activities and so it provides support to those activities given the highest priority.

In addition, REPP has received a significant number of requests from our federal department/agency partners and state, local, tribal, and private sector stakeholders to conduct a comprehensive revision and update of the current REPP policies, guidance and regulations. Many of these operative program documents are 10-20 years old and some of the information is outdated.

FY 2007 terrorism-based initiatives increased the program's nuclear and radiological responsibilities in the Nuclear/Radiological Annex of the National Response Framework and Radiological Dispersal Device/Improvised Nuclear Device (RDD/IND) activities. An additional 40 FTE were authorized in FY 2007 (30 FTE for FEMA Headquarters and 10 FTE allocated regionally) to help support these initiatives.

In the regional offices, REPP is working to establish a 1:1 ratio of site specialist to each plant in order to handle and address the increase in site-specific issues that have surfaced since the 9/11 terrorist attacks. REPP has also noticed that as these plants begin to seek operating license extensions, the number of issues involving opposition from local citizens and intervenor/public interest groups increases dramatically.

### **New Reactor License Applications**

In FY 2009, REPP anticipates continuing work on at least 25 new reactor license applications generated since the enactment of the Energy Policy Act of 2005. Each application requires an offsite emergency preparedness review, preparation of documents that will be contained in the Safety Evaluation Reports, delivery of expert testimony if necessary, and the production of reasonable assurance findings for the NRC. To support the increased workload associated with these new applications, REPP has requested an additional 40 FTEs for FY 2008 and supporting resources such as contractor support, travel, etc.

### **Federal Radiological Preparedness Coordinating Committee**

On an ongoing basis, REPP coordinates the activities of federal agencies with responsibilities in the radiological emergency planning and preparedness process. As the Chair of the Federal Radiological Preparedness Coordinating Committee (FRPCC), HQ REPP management provides policy direction with respect to federal assistance to state, local and tribal governments in their radiological emergency planning and preparedness activities; coordinates research and study efforts of its member agencies relative to state, local and tribal government radiological emergency preparedness to ensure minimum duplication and maximum benefits to state, local and tribal governments; and establishes subcommittees to aid in carrying out its functions.

### **FY 2007 Accomplishments**

- Provided support and oversight to conduct, evaluate, and report findings to the NRC on 28 joint exercises (utility, state, and local) and any necessary remedial exercises of offsite plans to resolve deficiencies identified during the joint exercises.
- Addressed the issue of three site-specific, formal Rule 44 CFR 350 determinations on the adequacy of offsite REPP plans and preparedness activities.
- Conducted routine annual reviews of offsite plans and related preparedness activities at all 64 nuclear sites; reviewed annual certifications of state and local governments; and completed periodic reviews of public information materials for all sites.
- Conducted 17 REPP courses to train federal, state, local and tribal emergency response personnel in the detection, reporting, assessment, protection against, and reduction of effects of radioactive materials introduced into the environment in the event of nuclear power plant accidents; and provided training on the REPP Evaluation Methodology procedures.
- Embarked on an effort to revise REPP policy and guidance documents.

- Analyzed REPP exercises to identify and address problem areas in offsite REPP response planning and preparedness activities.
- Participated in 32 DHS-led, interagency “Comprehensive Reviews” of the nuclear power plants to identify potential vulnerabilities, gaps and enhancements in onsite and offsite emergency planning beyond design basis threats.
- Reviewed and approved eleven modifications to Alert & Notification System design reports in accordance with FEMA-REP-10 guidance.

### **FY 2008 Planned Accomplishments**

- Support the NRC with emergency preparedness activities and plan reviews associated with 19 Early Site Permits and combined operating licenses applications anticipated for submission in FY 2008.
- Provide support and oversight to conduct, evaluate, and report findings to the NRC on 31 joint exercises and any associated remedial exercises.
- Conduct 15 training courses for federal, state, local and tribal emergency response personnel (as discussed under FY 2007 accomplishments) and provide training on REPP evaluation methodology.
- Continue to share program lessons learned to homeland security initiatives at the federal, state, local and tribal levels. The states and counties participating in REPP have been recognized as having developed robust emergency response capabilities that are models across the Nation for response to all hazards.
- Print new or revised guidance and policy documents in support of REPP.

### **FY 2009 Planned Accomplishments**

- Provide support and oversight to conduct, evaluate, and report findings to the NRC on 33 joint exercises and any associated remedial exercises.
- Conduct 15 training courses for federal, state, local and tribal emergency response personnel (as discussed under FY 2007 accomplishments) and provide training on REPP evaluation methodology.
- Continue to revise REPP policy and guidance documents; analyze REPP exercises to identify and address problem areas in offsite REPP response planning and preparedness activities. Print and distribute new documents as appropriate.
- Continue working to transfer program lessons learned to homeland security initiatives at the federal, state, local and tribal levels.
- Participate in activities associated with the 19 reactor licensing applications anticipated for FY 2008 and 6 additional applications anticipated in FY 2009 (conduct offsite emergency preparedness reviews, prepare Emergency Preparedness documents that will be contained in the Safety Evaluation Reports, deliver expert testimony if necessary, and provide the NRC with reasonable assurance findings for each of these applications).

#### **IV. Program Justification of Changes**

Not applicable.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
Federal Emergency Management Agency (FEMA)  
Justification of Proposed Changes in Radiological Emergency Preparedness Program  
Appropriation Language**

The aggregate charges assessed during fiscal year [2008] 2009, as authorized in title III of the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1999 (42 U.S.C. 5196e), shall not be less than 100 percent of the amounts anticipated by the Department of Homeland Security necessary for its Radiological Emergency Preparedness Program for the next fiscal year: *Provided*, That the methodology for assessment and collection of fees shall be fair and equitable and shall reflect costs of providing such services, including administrative costs of collecting such fees: *Provided further*, That fees received under this heading shall be deposited in this account as offsetting collections and will become available for authorized purposes on October 1, [2008]2009, and remain available until expended. (*Department of Homeland Security Appropriations Act, 2008.*)

#### **Explanation of Changes:**

There are no substantive changes for REPP.

## PPA Mission Statement

The Radiological Emergency Preparedness Program (REPP) assists state, local and tribal governments in the development of offsite radiological emergency preparedness plans within the emergency zones of Nuclear Regulatory Commission (NRC) licensees of commercial nuclear power facilities. The REPP fund is financed from user fees assessed and collected from the NRC licensees to cover budgeted costs for radiological emergency planning, preparedness, and response activities in the following year.

### Summary Justification and Explanation of Changes

|                              | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|------------------------------|----------------|-----------------|-----------------|------------------------|
| <b>Salaries and Benefits</b> | \$8,851        | \$9,117         | \$9,390         | \$273                  |

Salaries and Benefits supports 170 FTE, for FY 2009. The FY 2008 salary and benefit is \$8,151,000 and benefits is \$965,000. The FY2009 salary and benefit is \$8,396,000 and benefit is \$994,000. FY 2009 has a slight increase from the FY2008, reflecting inflation.

|               | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---------------|----------------|-----------------|-----------------|------------------------|
| <b>Travel</b> | \$781          | \$1,416         | \$1,040         | (\$376)                |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. FY 2009 is a decrease from FY 2008.

|                                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---------------------------------|----------------|-----------------|-----------------|------------------------|
| <b>Transportation of Things</b> | \$15           | \$27            | \$20            | (\$7)                  |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. FY 2009 is reflects a slight decrease from FY 2008.

|                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|-----------------|----------------|-----------------|-----------------|------------------------|
| <b>GSA rent</b> | \$1,409        | \$1,437         | \$1,466         | \$29                   |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. FY 2009 includes a minor inflationary increase from FY2008.

|   | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---|----------------|-----------------|-----------------|------------------------|
| <b>Communication, Utilities, and miscellaneous char</b> | \$31           | \$56            | \$41            | (\$15)                 |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

|   | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---|----------------|-----------------|-----------------|------------------------|
| <b>Advisory and Assistance Services</b> | \$395          | \$716           | \$526           | (\$190)                |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. FY 2009 reflects a slight decrease from FY 2008 due to the absence of carryover.

|                       | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|-----------------------|----------------|-----------------|-----------------|------------------------|
| <b>Other Services</b> | \$9,566        | \$17,338        | \$12,741        | (\$4,597)              |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2009 requests reflects a decrease from FY 2008 due to the absence of carryover.

|  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|--|----------------|-----------------|-----------------|------------------------|
| <b>Purchase from Government Accounts</b> | \$47           | \$85            | \$63            | (\$22)                 |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2009 request reflects a slight decrease from FY 2008.

|   | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---|----------------|-----------------|-----------------|------------------------|
| <b>Operation &amp; Maintenance of equipment</b> | \$1            | \$2             | \$1             | (\$1)                  |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2009 request reflects a decrease of

|                                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---------------------------------|----------------|-----------------|-----------------|------------------------|
| <b>Supplies &amp; materials</b> | \$297          | \$538           | \$396           | (\$142)                |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

|                  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|------------------|----------------|-----------------|-----------------|------------------------|
| <b>Equipment</b> | \$176          | \$319           | \$234           | (\$85)                 |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. FY 2009 includes an inflationary increase of \$85,000 from the FY 2008

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)** **UNITED STATES FIRE ADMINISTRATION**

### **I. Appropriation Overview**

#### **A. Mission Statement for Appropriation Name:**

The mission of the United States Fire Administration (USFA) is to reduce life and economic losses due to fire and related emergencies through leadership, coordination, and support. USFA prepares the Nation's fire responders through ongoing and, when necessary, expedited training, regarding how to evaluate and minimize community risk, improve protection to critical infrastructure, and be better prepared to react to all-hazard and terrorism emergencies of all kinds.

#### **B. Budget Activities:**

USFA coordinates with other federal, state, and local emergency service agencies, the private sector, colleges, universities, and other DHS educational consortium participants. In fulfilling its mission, USFA utilizes the assets of the National Fire Academy (NFA), the National Emergency Training Center (NETC) Facilities and Support Services, the National Fire Data Center (NFDC), and USFA's National Fire Programs (NFP) Division.

#### **National Fire Academy (NFA)**

NFA promotes the professional development of the fire and the emergency response community and its allied professionals. To supplement and support state and local fire service training programs, NFA delivers educational and training courses with a national focus.

#### **National Emergency Training Center (NETC) Facilities and Support Services**

The NETC Facilities and Support Services manage, operate, and maintain the NETC in the most efficient and effective manner, providing administrative, operational and emergency services in support of the program activities and special groups at NETC.

#### **National Fire Data Center (NFDC)**

The NFDC is responsible for the collection, analysis, publication, dissemination and marketing of information related to the Nation's fire problems and USFA programs. It manages USFA research efforts in fire detection, prevention, suppression, and first responder health, safety, and effectiveness.

#### **National Fire Programs (NFP) Division**

NFP is responsible for developing and managing programs that increase the capacity of the Nation's fire and emergency services and the public to prevent, mitigate, prepare for, and respond to local, regional, and national emergencies.

#### **C. Budget Request Summary:**

For the U.S. Fire Administration appropriation, FEMA requests 0 positions/FTE and \$0 for FY 2009. The adjustments-to-base reflect a decrease of \$43,300,000 and 115 FTE, resources which have been realigned to FEMA's Operations, Management and Administration appropriation. This shift of administrative functions and resources improves management efficiency by consolidating funding streams for core FEMA operations.

**II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)**

| <b>2009 Request</b>          | <b>0</b>            | <b>0</b>   | <b>0</b>        |
| Total Change 2008-2009       | (115)               | (114)      | (43,300)        |

USFA requests \$0 million for this activity. This is a decrease of \$43.3 million due to the realignment of all funds and activities to the Operations, Management and Administration appropriation.

#### **IV. Program Justification of Changes**

Not applicable.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
Federal Emergency Management Agency  
Justification of Proposed Changes in Appropriation Name  
Appropriation Language**

[For necessary expenses of the United States Fire Administration and for other purposes, as authorized by 15 U.S.C. 2201 et seq. and 6 U.S.C. 101 et seq., \$43,300,000.]

#### **Explanation of Changes:**

No legislative language is required due to the transfer of the USFA appropriation into the Operations, Management and Administration (OMA) appropriation. FY 2009 USFA legislative language appears in the OMA appropriation.

**B. FY 2008 to FY 2009 Budget Change**

**PPA Mission Statement**

The mission of the United States Fire Administration (USFA) is to reduce life and economic losses due to fire and related emergencies through leadership, coordination, and support. USFA prepares the Nation's fire responders through ongoing and, when necessary, expedited training, regarding how to evaluate and minimize community risk, improve protection to critical infrastructure, and be better prepared to react to all-hazard and terrorism emergencies of all kinds.

**Summary Justification and Explanation of Changes**

|                              | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|------------------------------|---------------|----------------|----------------|---------------------|
|                              | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Salaries and Benefits</b> | \$11,460      | \$11,782       | \$0            | (\$11,782)          |

The FY 2009 request includes a decrease of \$11,782,000 reflecting the realignment of all funds to the Operations, Management, and Administration appropriation.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)** **DISASTER RELIEF FUND**

### **I. Appropriation Overview**

#### **A. Mission Statement for Disaster Relief:**

Through the Disaster Relief Fund (DRF), FEMA/DHS provides a significant portion of the total federal response to Presidentially declared major disasters and emergencies.

#### **B. Budget Activities:**

The President may declare major disasters or emergencies when a state requests federal assistance and certifies that a given event is beyond the state's capacity to respond. FEMA's primary federal assistance programs -- assistance to individuals and households; public assistance, which includes the repair and reconstruction of state, local, and nonprofit infrastructure; and hazard mitigation to reduce damage from future disasters -- are funded through the DRF. In addition, the DRF is used to fund fire management declaration activities and relief and reconstruction activities in the Federal States of Micronesia and the Republic of the Marshall Islands through the Compact of Free Association.

#### **C. Budget Request Summary:**

FEMA requests 41 positions, 2,555 FTE, and \$1,900,000,000 for the Disaster Relief Fund in Fiscal Year (FY) 2009. Excluding emergency funding provided in P.L. 110-116, the total adjustments-to-base is \$500,000,000. Coupled with funding from recoveries of prior year obligations and unobligated funds carried forward, the appropriation request will fund the five-year average obligation level for direct disaster activity (excluding extraordinary events, such as the terrorist attack of September 11, 2001, the 2004 hurricanes in Florida and other states, and Hurricanes Katrina, Rita, and Wilma in 2005 and 2006 and excluding disaster readiness and support functions).

As part of FEMA's efforts to develop the operating budget for fixed costs and improve administrative efficiency, activities previously funded under the Disaster Relief Fund for certain infrastructure costs will be funded through the Operations, Management and Administration account. This will enable the conversion of all remaining 4-year Cadre of On-Call Response Employees (COREs) to permanent positions, and shift non-direct-disaster fixed costs to the annual operating appropriation.

In addition, non-declaration-specific readiness and support activities that provide support across FEMA for all Presidentially declared disasters and emergencies will be funded through a new appropriation, Disaster Readiness and Support Activities (DRSA).

**II-A. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA) Excluding Emergency Funding**

| Less: Adjustments for Other Funding Sources:                 |                   |                    |                    |                    |                    |                    |  |                      |                 |            |                     |                      |
| <b>Net, Enacted Appropriations and Budget Estimates</b>      | <b>7,892</b>      | <b>\$9,758,622</b> | <b>3,243</b>       | <b>\$4,224,000</b> | <b>2,555</b>       | <b>\$1,900,000</b> | <b>(688)</b>                             | <b>(\$2,324,000)</b> | <b>---</b>      | <b>---</b> | <b>(688)</b>        | <b>(\$2,324,000)</b> |

Note: FY 2008 Enacted reflects the \$60 million transfer to OMA and the \$16 million transfer to OIG per P.L. 110-161

Note: FY 2008 includes emergency funding of \$2.9 billion per P.L. 110-116

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**Federal Emergency Management Agency (FEMA)**  
**Disaster Relief Fund**  
**Program Performance Justification**  
 (Dollars in thousands)

PPA: DISASTER RELIEF

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b>   | <b>Amount</b>      |
|------------------------------|---------------------|--------------|--------------------|
| <b>2007 Actual</b>           | <b>37</b>           | <b>7,892</b> | <b>\$9,758,622</b> |
| <b>2008 Enacted</b>          | <b>41</b>           | <b>3,243</b> | <b>4,224,000</b>   |
| 2009 Adjustments to Base     | 0                   | (688)        | (2,324,000)        |
| <b>2009 Current Services</b> | <b>41</b>           | <b>2,555</b> | <b>1,900,000</b>   |
| 2009 Program Change          | 0                   | 0            | 0                  |
| <b>2009 Request</b>          | <b>41</b>           | <b>2,555</b> | <b>1,900,000</b>   |
| Total Change 2008-2009       | 0                   | (688)        | (2,324,000)        |

The above table includes emergency funding of \$2.9 billion provided in P.L. 110-116 for this activity. The FY 2008 level also reflects enacted transfers of \$60 million to the OMA appropriation and \$16 million to the OIG. The FY 2009 Budget Request is \$1.9 billion. Excluding emergency funds provided, the increase over FY 2008 is \$576 million.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The *Robert T. Stafford Disaster Relief and Emergency Assistance Act* (Stafford Act), 42 U.S.C. 5121-5206 (Public Law 93-288, as amended), authorizes the President to provide Federal assistance to supplement state and local governments' disaster response, recovery, readiness, and mitigation efforts. Under Executive Order 12148, as amended by Executive Order 13286, FEMA's Administrator, formerly DHS' Under Secretary for Emergency Preparedness and Response, has been delegated the responsibility for administering the Stafford Act's federal assistance programs. The Disaster Relief Fund (DRF) funds the following Stafford Act declarations or activities: (1) major disaster; (2) emergency; (3) fire management assistance; and (4) pre-declaration activities.

In FY 2009, the Disaster Relief Fund will fund activities that supplement state and local efforts to respond to, recover from, and mitigate the results of specific disasters and emergencies.

#### **Direct Disaster Programs <sup>1</sup>**

The Individual Assistance (IA), Public Assistance (PA), and Hazard Mitigation Grant (HMGP) programs are FEMA's major Direct Disaster programs and are supported by FEMA's pre-declaration and emergency response activities. These programs are managed and administered by the Disaster Assistance and Mitigation Directorates within FEMA.

---

<sup>1</sup> "Direct Disaster" is used to describe assistance available regardless of type of declaration.

These programs constitute the majority of the resources provided by the Federal Government (through FEMA) to directly address the short-, medium-, and long-term consequences of a disaster on individuals and communities. Disaster assistance under the authorities of the Stafford Act can be provided to states (and further provided to local or tribal governments), the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

In FY 2009, FEMA proposes \$1,900 million for Direct Disaster Programs within the Disaster Relief Fund.

- **Disaster Assistance - Individual Assistance**

The DRF provides funding for the following Individual Assistance Programs:

**Individual and Households Programs (IHP)**

- Temporary Housing: Financial assistance to rent alternate housing or direct assistance when rental properties are not available.
- Repair: Financial assistance for the repair of owner-occupied private residences to a safe and sanitary living condition. A flood insurance purchase and maintenance requirement is placed on the home if the home is in a Special Flood Hazard Area.
- Replacement: Financial assistance for the replacement of owner-occupied private residences.
- Permanent or Semi-permanent Housing Construction: Financial or direct assistance for the construction of permanent or semi-permanent housing. This type of assistance is available in insular areas outside of the continental U.S. or in other locations in which no other type of housing assistance is available, feasible, or cost-effective.
- Other Needs Assistance (ONA): Other Needs Assistance is available for necessary expenses and serious needs of victims of the declared disaster. This includes medical, dental, funeral, personal property, transportation, moving and storage, and other expenses that are authorized by law. Assistance provided by the ONA program is cost-shared, between FEMA (75 percent) and the state (25 percent).

Certain Individual and Households Program assistance is provided contingent on an individual's inability to secure a loan from the U.S. Small Business Administration (SBA). If SBA determines that an applicant is not credit-worthy, the applicant is automatically referred to FEMA for assistance.

**Crisis Counseling Assistance and Training Program (CCATP)**

The Crisis Counseling Program provides counseling services to victims of major disasters in order to relieve mental health problems caused or aggravated by the disaster. Supplemental funding for crisis counseling is available to State Mental Health Authorities through two grant

mechanisms: (1) the Immediate Services Program (ISP) and (2) the Regular Services Program (RSP) which provide funds for up to nine months following a disaster declaration.

### **Disaster Unemployment Assistance (DUA)**

Disaster Unemployment Assistance (DUA) may be provided to individuals who have become unemployed because of a disaster and are unable to secure regular unemployment benefits.

### **Legal Services**

Legal services may be provided to low-income individuals unable to secure such services adequate to meet their needs as a consequence of a major disaster.

- **Disaster Assistance - Public Assistance**

The Public Assistance (PA) program offers assistance to state, local, and tribal governments after a declared disaster or emergency. In addition, certain private non-profit organizations that operate facilities and provide service to the public typically provided by a government agency may receive public assistance. PA is a cost-shared (75% Federal, 25% non-Federal) grant program. States may request a higher Federal cost share in situations in which the disaster has had a significant economic impact on the state.

Public Assistance provides funding to grantees for the repair and rebuilding of damaged public and private non-profit (subject to eligibility determinations in accordance with Section 406(a) of the Stafford Act) facilities and for emergency measures taken to protect lives and property. Under a Public Assistance declaration, assistance may be provided under one or more of the following seven categories:

- Category A – Debris Removal
- Category B – Emergency Protective Measures
- Category C – Repair of Roads and Bridges
- Category D – Water Control Facilities
- Category E – Public Buildings
- Category F – Public Utilities
- Category G – Other Facilities

- **Disaster Assistance - Hazard Mitigation**

The Hazard Mitigation Grant Program (HMGP) provides state, local, and tribal governments with cost-shared grants (75% Federal, 25% non-Federal) to reduce the risk of potential damage, hardship, loss, and suffering in an area affected by a major disaster. Ultimately, the HMGP reduces future need for Federal disaster assistance by reducing the impact of and increasing the resistance to natural hazards.

HMGP funding is made available to states based on 15% of the total Federal funds spent in the Public and Individual Assistance programs (minus administrative expenses) for each disaster costing up to \$2

billion, 10% for disasters between \$2 billion and \$10 billion, and 7.5% for disasters between \$10 billion and \$35.33 billion.

HMGP projects vary and may include the retrofit of structures to resist flood, wind and earthquake; elevations of structures above base flood levels; property acquisition and demolition or relocation for open space, and minor flood reduction and drainage measures.

HMGP grants are required to be cost effective. In 2005, the Multi-hazard Mitigation Council (MMC), a part of National Institute of Building Sciences, published a report that analyzed the overall impact of FEMA's Hazard Mitigation Programs. The findings show that money spent on reducing the potential damages of natural hazards is a sound investment and is cost effective. On average, a dollar spent on hazard mitigation activities will save the Nation approximately \$4 in future payouts for damages caused by natural hazards.

- **Fire Management Assistance**

FEMA provides assistance from the DRF to eligible states, territories, tribal or local governments for the mitigation, management, and control of any fire on public or private forest or grassland that threatens such destruction as would constitute a major disaster. Items eligible for funding under Fire Management Assistance Grant Program (FMAGP) include equipment, labor costs, emergency work, and temporary repair work directly related to firefighting activities associated with the declared fire.

- **Compact of Free Association**

The DRF funds disaster relief and reconstruction activities in the Federated States of Micronesia and the Republic of the Marshall Islands pursuant to the Compact of Free Association.

## **Direct Disaster Programs Recent and Planned Accomplishments**

### **FY 2007**

Assisting Disaster Victims: FEMA continues to work on Hurricane Katrina related activities, as well as new disasters. In FY 2007, 68 major disasters and 11 emergencies were declared in 36 states. Fifty-four (54) Fire Management Assistance Grants were approved for award in 17 states as of September 30, 2007. FEMA's Regional Offices have deployed assets to states and territories affected by declared emergencies to provide overall coordination of the Federal response and to support emergency management program implementation.

- FEMA has successfully operated the Individual Assistance and Public Assistance Programs. For Katrina alone, \$607 million has been provided for Housing and Other Needs Assistance in FY 2007, and \$2.6 billion has been obligated to continue to provide reimbursement to clear debris and rebuild roads, schools, libraries, and other public facilities. The agency is working aggressively to be more responsive to disaster victims.
- Increased Accountability: FEMA continues to go to great lengths to be good stewards of the taxpayer funds by deterring fraud, while still allowing applicants in serious need of assistance to receive it quickly and appropriately. An identity proofing and occupancy verification process that checks an applicant's name, social security number, and address against commercially available data was added to all disaster assistance registrations. These verification checks allow FEMA to

restrict certain types of non-traditional assistance such as Expedited Assistance (EA) to only those applicants that have verified identity and occupancy. Additionally, FEMA has implemented enhanced processes related to real-time interaction between FEMA service representatives and applicants during registration intake to ensure data is entered correctly.

- New software was built into the National Emergency Management Information System (NEMIS) that maintains data on applicants in mobile homes and communicates real-time data to caseworkers and the auto-determination system. This software helps prevent duplicate housing payments to applicants receiving direct housing assistance. Additionally, address checks were implemented in NEMIS that flag “high risk” addresses such as check cashing stores, mail drops, cemeteries, and jails. Applications with “high risk” addresses require an intensive review prior to the delivery of assistance and prevent fraud on the part of disaster applicants. Additional enhancements to the NEMIS client included implementing a block on duplicative rental assistance payments for overlapping months. Edit checks have been built into NEMIS that require a processor to enter the period of assistance, and therefore disallow payments for overlapping periods.

### **FY 2008**

- Supplement state and local efforts to respond to, recover from, and mitigate the results of specific disasters and emergencies.
- Fund fire management declaration activities.
- Fund relief and reconstruction activities in the Federal States of Micronesia and the Republic of the Marshall Islands through the Compact of Free Association.
- Continue to allocate targeted resources to improve the effectiveness and efficiency of recovery programs as delivered in the numerous disasters occurring annually, and to ensure that individual and public assistance can be provided to victims of the larger and more complex disasters that could occur as the result of terrorism or catastrophic natural events.

### **FY 2009**

- Supplement state and local efforts to respond to, recover from, and mitigate the results of specific disasters and emergencies.
- Fund fire management declaration activities.
- Fund relief and reconstruction activities in the Federal States of Micronesia and the Republic of the Marshall Islands through the Compact of Free Association.

### ***Disaster Support Activities***

Historically, FEMA maintains a critical, ongoing disaster operations and support infrastructure that enables the timely delivery of all of FEMA’s disaster assistance programs. The Disaster Support Account (DSA) within the DRF has been used for support services, activities, and functions necessary to carry out activities related to and in support of emergency and disaster operations but that are not direct costs of or readily attributable to a specific declaration. Many of these costs are annual predictable costs that allow FEMA to support a variety of disasters. In addition the DSA has included certain costs to help FEMA prepare or be ready for a disaster including the establishment of large commodity and service contracts that can be activated in the event of a disaster.

In order to provide clarity between appropriations, and to allow for more efficient administration and increased budgetary discipline and accountability, FEMA requests to fund certain on-going infrastructure costs from OMA and to create a new annual appropriation (DRSA) for all disaster-related readiness and support costs:

- The DRF will fund activities that supplement state and local efforts to respond to, recover from, and mitigate the results of specific disasters and emergencies.
- OMA will provide resources for the fixed infrastructure costs to FEMA which enable FEMA to respond to, recover from, and mitigate against disasters. These resources include annualization costs for CORE positions anticipated for conversion to permanent positions in FY 2008, funds for conversion of all remaining 4-year CORE personnel from temporary employees to permanent full-time employees (298 PFT) in FY 2009.
- The DRSA will fund current readiness and support requirements for disasters including strategic pre-positioning and management of critical disaster commodities, improved inventory of specialized assets, contract support to enhance the provision of grant assistance to disaster applicants, and standby support to enable FEMA to increase capacity quickly as needed.

## **Disaster Support Activities Recent and Planned Accomplishments**

### **FY 2007**

- Awarded a new Housing Inspection Services (HIS) contract that requires the contractor to perform criminal background checks on each employee. These background checks prevent individuals with a history of criminal activity from being involved in any part of the disaster assistance process.
- Hired approximately 14,000 disaster workforce employees, expanding FEMA's capability to respond to disasters and sustain recovery operations.
- Established disciplinary/adverse actions protocol for Stafford Act Employees and conducted briefings for affected staff with highest incidence of issues.
- Awarded the Mount Weather Operations Support section of the Nationwide Vehicle Maintenance Contract.
- Continued to develop/revise and deliver curriculum for FEMA's disaster workforce to address changes in FEMA policy and standard operating procedures (SOPs) resulting from Hurricane Katrina lessons learned and to support implementation of the revised National Information Management System (NIMS) and the National Response Framework (NRF) doctrines.

### **FY 2008**

- Improve logistics capacity through system enhancements, an expanded permanent workforce, and leveraging public-private partnerships.
- Restructure Disaster Reservist Workforce.
- Maintain a trained Generalist workforce of 3,000 reservists to be used in surge capacity.
- Maintain the workforce through improved retention and continued recruitment of new reservists.
- Develop a website for communicating policies and procedures to all disaster responders, including specific information on all cadres.
- Expand the scope of Total Asset Visibility, ensuring the strategic dispersal of assets throughout the country.
- Continue to develop/revise and deliver training for FEMA's disaster workforce that provides them requisite competencies for performing their jobs when deployed, access to information about advanced technical proficiency, and leadership skills. In addition, the Emergency Management Institute (EMI) will coordinate with other Federal agencies involved in disaster response and recovery, especially those agencies that provide staff and resources via Emergency Support Functions to develop and deliver training required for an effective multi-agency response to disasters. EMI will also develop and conduct training at Joint Field Offices and other off-site

locations through the Disaster Field Training Operation (DFTO) and manage and direct activities of the DFTO cadre.

- Identify areas of expertise in which additional staff and training are needed. Fill positions with generalists who can in turn be provided the specialized training required.
- Standardize recruitment, hiring, training, and credentialing procedures for all disaster responders.
- Maintain staffing stability of FEMA's disaster workforce.
- Award new major contract for Hazard Mitigation Technical Assistance Program (HMTAP).
- Develop and pilot test training for mitigation and insurance staff serving disaster applicants.
- Develop training and job aides to standardize use of automated system in providing mitigation information to disaster applicants.
- Develop qualifying plans for mitigation and insurance disaster workforce positions which will standardize qualifications of employees serving in the disaster workforce. Develop prioritized training development for out-years based on qualifying plans.
- Initiate development of HMGP module within EMMIE.

**FY 2009**

See Operations, Management and Administration and Disaster Readiness and Support Activities.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Emergency Management Agency (FEMA)  
Justification of Proposed Changes in Disaster Relief Fund  
Appropriation Language**

For necessary expenses in carrying out the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), [~~\$1,400,000,000~~] *\$1,900,000,000*, to remain available until expended. [ Provided, That of the total amount provided, \$16,000,000 shall be transferred to the Department of Homeland Security Office of Inspector General for audits and investigations related to natural disasters subject to section 503 of this Act. Provided further, That up to \$60,000,000 may be transferred to “Management and Administration”, Federal Emergency Management Agency, of which \$48,000,000 and 250 positions are for management and administration functions and \$12,000,000 is for activities related to the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.): Provided further, That of the amount provided in the previous proviso, \$30,000,000 shall not be available for transfer for management and administration functions until the Federal Emergency Management Agency submits an expenditure plan to the Committees on Appropriations of the Senate and the House of Representatives regarding the 250 positions: Provided further, That the Federal Emergency Management Agency shall hereafter submit a monthly “Disaster Relief” report to the Committees on Appropriations of the Senate and the House of Representatives to include:

- (1) status of the Disaster Relief fund including obligations, allocations, and amounts undistributed/unallocated;
- (2) allocations, obligations, and expenditures for Hurricanes Katrina, Rita, and Wilma and all open disasters;
- (3) information on national flood insurance claims
- (4) obligations, allocations, and expenditures by state for unemployment, crisis counseling, inspections, housing assistance, manufactured housing, public assistance, and individual assistance;
- (5) missions assignment obligations by agency, including:
  - (A) the amounts to other agencies that are in suspense because the Federal Emergency Management Agency has not yet reviewed and approved the documentation supporting the expenditure or for which an agency has been mission assigned but has not submitted necessary documentation for reimbursement;
  - (B) an explanation if the amounts of reported obligations and expenditures do not reflect the status of such obligations and expenditures from a government-wide perspective; and
  - (C) each such agency’s actual obligation and expenditure data
- (6) the amount of credit card purchases by agency and mission assignment;
- (7) specific reasons for all waivers granted and a description of each waiver;
- (8) a list of all contracts that were awarded on a sole source or limited competition basis, including the dollar amount, the purpose of the contract, and the reason for the lack of competitive award; and
- (9) an estimate of when available appropriations will be exhausted, assuming an average disaster season:

Provided further, That for any request for reimbursement from a Federal agency to the Department to cover expenditures under the Robert T. Stafford Disaster Relief and Emergency Act (42 U.S.C. 5121 et seq.), or any mission assignment order issued by the Department for such purposes, the Secretary of Homeland Security shall take appropriate steps to ensure that each agency is periodically reminded of Department policies on –

- (1) the detailed information required in supporting documentation for reimbursements, and
- (2) the necessity for timeliness of agency billings]. (*Department of Homeland Security Appropriations Bill, FY 2008.*)

**Explanation of Changes:**

The proposed FY 2009 language simplifies the language and provides funding for direct disasters. The costs for readiness and disaster support activities previously funded out of this account are requested in a new appropriation, the Disaster Readiness and Support Activities in order to separate annual costs from costs related to direct disasters. The proposed structure increases the efficiencies of these appropriations while providing increased accountability for readiness and support functions.

Note: Obligation Requirements in the Congressional Justifications and Budget Appendix may differ due to rounding.

FY 2008 Enacted level includes \$2.9 billion in emergency funding provided in P.L. 110-161.

## PPA Mission Statement

Through the Disaster Relief Fund (DRF), DHS provides a significant portion of the total Federal response to Presidentially-declared major disasters and emergencies. The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), 42 U.S.C 5121-5206 (Public Law 93-288, as amended), authorizes the President to provide Federal assistance to supplement State and local governments' disaster response, recovery, readiness and mitigation efforts. Under Executive Order 12148, as amended by Executive Order 13286, FEMA's Director, formerly DHS' Under Secretary for the Emergency Preparedness and Response Directorate, has been delegated the responsibility for administering the Stafford Act's Federal Assistance Programs. The Disaster Relief Fund (DRF) funds the following Stafford Act declarations and activities (1) major disaster, (2) emergency, (3) fire management assistance, and (4) predeclaration activities.

Coupled with funding from recoveries of prior year obligations, unobligated funds carried forward, the appropriation request will fund the five-year average obligational level for direct disaster activity (excluding disaster readiness and support functions and extraordinary events such as terrorist attack of September 11, 2001, the 2004 hurricanes in Florida and other States, and Hurricane Katrina and Rita in 2005 and 2006.

### Summary Justification and Explanation of Changes

|                              | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|------------------------------|----------------|-----------------|-----------------|------------------------|
| <b>Salaries and Benefits</b> | \$559,312      | \$525,202       | \$155,736       | (\$369,466)            |

Salaries and Benefits includes costs for 2,555 FTEs. The FY 2009 includes a decrease of \$369,466,000 due to the transfer of funding for CORE conversions positions to the OMA appropriation.

|               | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)** **DISASTER READINESS AND SUPPORT ACTIVITIES**

### **I. Appropriation Overview**

#### **A. Mission Statement for Disaster Readiness and Support Activities:**

Through the Disaster Readiness and Support Activities account, FEMA funds disaster readiness and support activities that are not disaster specific, but are critical readiness initiatives and administrative functions supporting disaster response and recovery.

#### **B. Budget Activities:**

Beginning in 2009, FEMA requests funding advanced readiness contracts and disaster-related support functions through a separate Disaster Readiness and Support Activities (DRSA) appropriation rather than out of the Disaster Relief Fund (DRF). DRSA will fund advanced readiness initiatives that prepare and equip FEMA to provide federal support, as well as critical administrative functions that support the timely delivery of services during disasters. DRSA resources are not disaster specific, but rather provide support for all Presidentially declared disasters and emergencies. These efforts will improve the quality of support to disaster victims, including better communications, a more efficient intake process, more efficient delivery systems for disaster commodities, and improved oversight of disaster aid through technical assistance contractors.

#### **C. Budget Request Summary:**

For FY 2009, FEMA requests \$200,000,000 for Disaster Readiness and Support Activities previously funded out of the Disaster Relief Fund. FEMA's all-hazards mission requires the use of funds to improve capacity and to maintain a readiness posture for today's changing environment. FEMA has determined that non-specific disaster resources are necessary to address changing demands. FEMA will increase efficiencies and accountability in managing the DRF by separating ongoing disaster readiness and support functions that are not specific to one disaster from direct disaster costs. Funding the continual disaster expenses that are required to prepare for, respond to, and recover from all disasters in an annual account allows for greater ease in budgeting these annual costs and increased visibility into ongoing disaster costs. Under the proposed appropriation structure, the disaster specific costs, which are of a more unpredictable nature, remain in the DRF, separate from the more predictable annual costs of emergency management.

FEMA requests \$200 million in Disaster Readiness and Support Activities, a new appropriation to fund ongoing activities that were formerly funded from the Disaster Relief Fund.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The extraordinary events of the past six years (including the terrorist attack of September 11, 2001, the 2004 hurricanes in Florida and other states, and Hurricanes Katrina, Rita and Wilma in 2005 and 2006) have compelled FEMA to reassess its ability to handle large-scale and more complex disaster situations. FEMA's all-hazards mission requires the use of funds to improve capacity and to maintain a readiness posture for today's changing environment. FEMA has determined that non-specific disaster resources are necessary to address changing demands.

The Department requests establishing a Disaster Readiness and Support Activity (DRSA) account for those things necessary to maintain the readiness of the agency's all-hazard capability throughout the year. DRSA will fund activities that directly support FEMA's disaster response readiness capability and critical administrative functions. The account will include some activities formerly funded from the Disaster Relief Fund's long-standing Disaster Support Account, as well as post-Katrina readiness contracts.

The capability of FEMA to effectively prepare for, respond to, and recover from disasters regardless of their size or cause will be greatly enhanced by funding activities through the DRSA such as (but not limited to):

- Strategic pre-positioning and management of critical disaster commodities.
- Improved inventory of specialized assets.
- Standby support to enable FEMA to increase capacity quickly as needed.

These efforts will improve the quality of support to disaster victims, including better communications, a more efficient intake process, more efficient delivery systems for disaster commodities, and improved oversight of disaster aid through technical assistance contractors. For FY 2009, FEMA requests \$200 million for Disaster Readiness and Support Activities.

DRSA supports the following activities and programs:

- **Disaster Assistance Programs**

- *Advanced Readiness Initiatives*

To improve FEMA's ability to deliver assistance and maintain the readiness to do so throughout the year, annual costs for the following contracts will be funded through the DRSA appropriation (actual deployment costs in response to a disaster declaration will continue to be funded through the DRF):

- Individual Assistance (IA) Technical Assistance
- Public Assistance (PA) Technical Assistance
- Housing Inspection Services
- Mail Operations
- Mobile Disaster Recovery Center/Mobile Registration Intake Maintenance
- Management, Organizational and Business Improvement Services (MOBIS)

- *National Processing Service Centers (NPSCs)*

The DRSA supports base costs, including rents and security, for FEMA's four NPSCs located in Maryland, Puerto Rico, Texas, and Virginia. The NPSC facilities provide FEMA call center and benefits processing capabilities to register and process disaster victims' applications.

- The NPSCs house internet and telephone based registration services through which disaster victims can apply for assistance through the Individual and Households Program.
- NPSC employees also answer FEMA's Disaster Assistance Helpline through which applicants can follow-up on their registrations with skilled caseworkers trained to resolve a wide range of applicant concerns.
- NPSC caseworkers make eligibility determinations on registrations that cannot be processed through the NEMIS auto-determination function.

Two NPSC facilities have the following areas of expertise that provide leadership and ongoing support for the NPSC enterprise:

- The Contact Center Telecommunications Section provides technical telecommunications support to all NPSC sites and forecasts workload and staffing requirements for each facility.
- The Performance Information Management Section performs the duties related to Quality Control and Performance Standards and Analysis.
- The Customer Satisfaction Analysis Section conducts internal and external customer satisfaction surveys and focus groups, provides analyses, and develops strategies for improved NPSC services.
- The Process Design and Improvement Section is responsible for mapping and analyzing the business practices of the NPSCs and recommending improvements in processing, technology, and policy.
- The National Coordination Team serves as an information conduit between Headquarters, Regions, Joint Field Offices (JFOs) and the NPSCs.

- The NPSCs house two Contract Management sections in Texas and Virginia that oversee the Housing Inspection Services, Call Center, and Mail Operations contracts.

Total staffing across the Enterprise can reach 2,600 employees working two shifts at full capacity. The centers generally operate with a total staff of 1,600.

- *Interagency Agreements*

- *Crisis Counseling Assistance and Training Program (CCATP)*. Beginning in FY 2009, annual costs for the interagency agreement with the Department of Health and Human Services' Center for Mental Health Services to support this program (described in the DRF justification) will be funded through the DRSA account. When the program is actually "turned on" pursuant to a disaster declaration, program funding will then be directly charged to the declaration's costs under the DRF.

- *Disaster Unemployment Assistance (DUA)*. Beginning in FY 2009, annual costs for the interagency agreement with the Department of Labor to support this program (described in the DRF justification) will be funded through the DRSA account. When the program is actually "turned on" pursuant to a disaster declaration, funding will be charged to the declaration's costs under the DRF.

- **Disaster Logistics Management**

- *Advanced Readiness Initiatives*

FEMA must adopt new approaches to disaster logistics management in order to meet its dual responsibility as both the national coordinator and direct provider of these services. To support this endeavor FEMA must put contracts in place that will allow the capability to provide tracking of commodities and ensure the most efficient and effective distribution of supplies and materials. The following readiness contracts will be funded through the DRSA:

- Logistics Management Systems, such as Total Asset Visibility (TAV)
- Pre-positioned Disaster Assets
- Transportation Stand-by Contracts

- *Logistics Centers (LC)*

The DRSA account supports base costs, including rent and security, for FEMA's eight Logistics Centers (located near Atlanta, GA; Berryville, VA; Ft. Worth, TX; Frederick, MD; San Jose, CA (Moffett Field); Hawaii; Guam; and Puerto Rico). Additionally, FEMA stocks commodities in the Emergency Housing Distribution and Logistics Center (LC) located in Cumberland, MD. The LCs support FEMA disaster responders with critical equipment and supplies and also provide life-saving and life-sustaining resources to states during disaster operations.

During a disaster operation, the LCs provide a variety of resources including: Meals Ready-to-Eat (MREs)/Emergency Meals, bottled water, generators, cots, blankets, tarps, blue roof sheeting, and other disaster commodities. These resources can be distributed through state and county distribution points in time of need. Also, a portion of these supplies have been pre-positioned in the hurricane-prone states in Regions I, II, III, IV and VI. The LCs also stock pre-positioned medical caches in support of HHS's National Disaster Medical Systems (NDMS). FEMA and HHS work collaboratively to issue the caches when requested.

- **Disaster Information Technology Services**

The DRSA account supports operations and maintenance of the National Emergency Management Information System (NEMIS) and other IT services imperative to disaster readiness and support, such as LANS for the NSPCs and Logistics Centers.

DRSA will also fund charges for unemployment and workers' compensation for disaster assistance employees (DAEs), as well as salaries for DAEs while in training (while deployed to a Presidentially declared disaster site, DAE salaries are funded out of the Disaster Relief Fund).

### **DRSA Recent and Planned Accomplishments**

#### **FY 2007**

See Disaster Relief Fund.

#### **FY 2008**

See Disaster Relief Fund.

#### **FY 2009**

- Continue efforts to improve logistics management.
- Continue to ensure available evacuation transportation through the use of standby transportation contracts, as required by Emergency Support Function (ESF) #1.
- Continue to maintain and make available required disaster commodities through pre-positioning.
- Continue to have disaster assistance readiness contracts in place to provide technical assistance for public assistance and individual assistance grants.
- Continue to provide the means, through its mail operations, to process large quantities of incoming and outgoing applicant correspondence in a short timeframe while maintaining and ensuring privacy, accuracy and timely delivery of services.
- Continue to provide a rapidly deployable voice/data communications capability through the use of its mobile disaster recovery centers (MDRC) and mobile registration intake centers (MRIC).
- Continue to provide tactical disaster emergency communications capability to support all Presidentially declared disasters and emergencies.

#### **IV. Program Justification of Changes**

*Note: The personnel costs reflected above cover the salaries of the DAEs while in training.*

**PPA Mission Statement**

Through the Disaster Readiness and Support Activities account, FEMA funds advanced readiness initiatives that prepare and equip FEMA to provide Federal support during disasters, as well as critical administrative functions that support the timely delivery of services during disasters. DRSA resources are not disaster specific, but rather provide support across FEMA for all Presidentially-declared disasters and emergencies. These efforts will improve the quality of support to disaster victims, including better communications, a more efficient intake process, more efficient delivery systems for disaster commodities, and improved oversight of disaster aid through technical assistance contractors.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$0                     | \$0                     | \$10,000                | \$10,000                       |

Salaries and Benefits includes costs for DAEs while they are in training. No FTEs are requested in the DRSA appropriation. The increase from FY 2008 to FY 2009 reflects the establishment of a new appropriation.

|                                 | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Transportation of Things</b> | \$0                     | \$0                     | \$20,600                | \$20,600                       |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The costs for this object class were funded out of the DRF prior to FY 2009.

|                   | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-------------------|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Other Rent</b> | \$0                     | \$0                     | \$29,400                | \$29,400                       |

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The costs for this object class were funded out of the DRF prior to FY 2009. The increase from FY 2008 to FY 2009 reflects the establishment of a new appropriation.

|   | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Communication, Utilities, and miscellaneous char</b> | \$0                     | \$0                     | \$3,000                 | \$3,000                        |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The costs for this object class were funded out of the DRF prior to FY 2009. The increase from FY 2008 to FY 2009 reflects the establishment of a new appropriation.

|                       | <b>2007</b>    | <b>2008</b>    | <b>2009</b>     | <b>2008 to 2009</b> |
|-----------------------|----------------|----------------|-----------------|---------------------|
|                       | <b>Actuals</b> | <b>Enacted</b> | <b>Request</b>  | <b>Change</b>       |
| <b>Other Services</b> | <b>\$0</b>     | <b>\$0</b>     | <b>\$75,750</b> | <b>\$75,750</b>     |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The costs for this object class were funded out of the DRF prior to FY 2009. The increase from FY 2008 to FY 2009 reflects the establishment of a new appropriation.

|                                 | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------------------------|----------------|----------------|----------------|---------------------|
|                                 | <b>Actuals</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Supplies &amp; materials</b> | <b>\$0</b>     | <b>\$0</b>     | <b>\$4,250</b> | <b>\$4,250</b>      |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The costs for this object class were funded out of the DRF prior to FY 2009. The increase from FY 2008 to FY 2009 reflects the establishment of a new appropriation.

|                  | <b>2007</b>    | <b>2008</b>    | <b>2009</b>     | <b>2008 to 2009</b> |
|------------------|----------------|----------------|-----------------|---------------------|
|                  | <b>Actuals</b> | <b>Enacted</b> | <b>Request</b>  | <b>Change</b>       |
| <b>Equipment</b> | <b>\$0</b>     | <b>\$0</b>     | <b>\$57,000</b> | <b>\$57,000</b>     |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The costs for this object class were funded out of the DRF prior to FY 2009. The increase from FY 2008 to FY 2009 reflects the establishment of a new appropriation.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA) DISASTER ASSISTANCE DIRECT LOAN PROGRAM ACCOUNT**

### **I. Appropriation Overview**

#### **A. Mission Statement for Disaster Assistance Direct Loan Appropriation Account:**

This account provides loan authority and subsidy budget authority for disaster assistance direct loans.

#### **B. Budget Activities:**

The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act) authorizes two types of direct loans: 1) Section 319 (State Share) loans to states for the non-federal portion of cost-shared Stafford Act programs and 2) Section 417 (Community Disaster) loans to local governments that incurred substantial losses of tax and other revenues as a result of a major disaster and require financial assistance in order to perform governmental functions. In accordance with the Federal Credit Reform Act of 1990, this account supports subsidy budget authority and authorizes loan levels for the direct loan programs; however, in FY 2009, no funds are requested for section 417 (Community Disaster) loan subsidy. Administrative expenses related to section 319 (State Share) loans are included in the Operations, Management and Administration appropriation beginning in FY 2009.

#### **C. Budget Request Summary:**

Loan subsidy of \$295,000 and a direct loan limitation of \$25 million for section 319 (State Share) loans are requested for FY 2009. However, no FTEs or administrative expenses are requested for FY 2009 in this account, as these resources have been realigned to the base budget for FEMA's Operations, Management, and Administration (OMA) appropriation. This represents a reduction of \$580,000 and 3 FTE. No funds are requested for section 417 (Community Disaster Loans) loan subsidy in FY 2009.

*Note: The Loan Limitation amount above does not reflect the loan limitation carryover associated with the supplemental appropriation for Section 419 Special Community Disaster Loans.*

FEMA requests \$25 million in loan authority and \$295,000 in subsidy budget authority for section 319 loans for FY 2009. This represents no change from FY 2008.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

Under the Stafford Act, FEMA may make two types of direct loans:

State Share Loans: Under section 319 of the Stafford Act, FEMA may lend or advance to a state or an eligible applicant the portion of assistance for which the applicant is responsible under cost-sharing provisions of the Stafford Act. To be deemed eligible for a loan, the governor of the affected state must demonstrate, where damage is overwhelming and severe, that the state is unable to assume immediately its financial responsibility to meet the cost-share because (1) the state is responding to concurrent, multiple disasters/emergencies or has incurred extraordinary costs as a result of a particular disaster or emergency; and (2) the damages caused by such disaster or disasters are so overwhelming and severe it is not possible for the state to assume immediately its financial responsibility. \$217

million in State Share loans have been approved, with the last loan issued in 1996. There are no outstanding State Share loans.

Community Disaster Loans (CDLs): Under section 417 of the Stafford Act, loans may be authorized to local governments that have suffered a substantial loss of tax and other revenues as a result of a major disaster, and have demonstrated a need for financial assistance in order to perform their municipal operating functions. The loans, not to exceed 25 percent of the annual operating budget of that local government for the fiscal year in which the major disaster occurred, are made at the current Treasury rate for a term of 5 years and may not exceed \$5 million. All or part of such loans may be canceled to the extent that revenues of the local government during the full 3 post-disaster fiscal years are insufficient to meet its operating budget as the result of the disaster. A local government is not eligible for further CDLs during any period in which the jurisdiction is in arrears with respect to required repayment of an existing loan. \$233 million in Community Disaster loans have been approved, with the last loan issued in 2001.

Special Community Disaster Loans (SCDLs): The Community Disaster Loan Act of 2005 (PL 109-88) authorized FEMA to transfer \$750 million from the Disaster Relief Fund to provide up to \$1 billion in loan authority to assist communities impacted by Hurricanes Katrina and Rita. For these Special Community Disaster Loans, three elements were added to the traditional program under section 417: 1) It removed the \$5 million limit on individual loans; 2) the loans were restricted “to assist local governments in providing essential services;” and 3) the loan cancellation provision of section 417(c)(1) of the Stafford Act was inapplicable.

The Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery, 2006 (PL 109-234) appropriated an additional \$278,800,000 to support \$371,733,000 in SCDLs. However, certain eligibility criteria were different from those in the 2005 Act: 1) the maximum loan amount was increased to 50 percent of the applicant’s operating budget the fiscal year of the disaster; 2) the loan analysis could only consider “tax revenue” loss and not “other revenues” as allowed for in the 2005 Act; and 3) applicants were required to demonstrate actual loss in tax revenues of 25 percent or greater. The loan cancellation provision continued to be inapplicable.

The U.S. Troop Readiness, Veterans’ Care, Katrina Recovery, and Iraq Accountability Appropriations Act, 2007 (PL 110-28) removed the loan cancellation prohibitions contained in the 2005 and 2006 Acts. This statutory change now gives FEMA discretionary authority, limited by the language in section 417(c)(1) of the Stafford Act, to cancel SCDLs issued pursuant to either the 2005 or 2006 Acts.

FEMA approved 152 SCDLs totaling \$1,270,501,241 to 109 eligible applicants in Mississippi and Louisiana.

In accordance with the Federal Credit Reform Act of 1990, three accounts are used to record cash flow data for direct loans:

- Disaster Assistance Direct Loan Program Account. This is the budget account into which an appropriation is made to cover the subsidy costs of a direct loan, and from which such costs are disbursed into the financing account.

- Disaster Assistance Loan Liquidating Account. This budget account records all cash flows to and from FEMA for pre-1992 direct loans made under the State Share and Community Disaster loan programs. There is no longer any activity in this account.
- Disaster Assistance Direct Loan Financing Account. The loan financing account is a non-budgetary account records all cash flows to and from FEMA resulting from CDLs and State Share direct loans obligated in 1992 and beyond. This account holds balances, receives the subsidy cost payment from the program account, and includes all other cash flows resulting from post-1991 direct loans. The funds in this account are a means of financing and are not included in the budget totals. Loans are obligated from this account, using the subsidy budget authority from the Disaster Assistance Direct Loan Program Account and borrowing authority from the Department of the Treasury.

PPA: ADMINISTRATIVE EXPENSES

| 2008 Adjustments to Base     | (3)                 | (3)        | (580)         |
| <b>2009 Current Services</b> | <b>0</b>            | <b>0</b>   | <b>0</b>      |
| 2009 Program Changes         | 0                   | 0          | 0             |
| <b>2009 Request</b>          | <b>0</b>            | <b>0</b>   | <b>0</b>      |
| Total Change 2008-2009       | (3)                 | (3)        | (580)         |

FEMA requests no funds or FTE for this activity in FY 2009 in DADLP; these activities will be funded in Operations, Management, and Administration.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2009, \$580,000 for administrative expenses for the section 319 (State Share) loan program funded in DADLP are included in Operations, Management, and Administration. This realignment enables FEMA to improve management efficiency by consolidating funding streams for basic operations.

#### **IV. Program Justification of Changes**

Not applicable.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
Federal Emergency Management Agency (FEMA)  
Justification of Proposed Changes in Disaster Assistance Direct Loan Program Account  
Appropriation Language**

For activities under section 319 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5162), [\$875,000 of which \$580,000 is for administrative expenses to carry out the direct loan program and] \$295,000 is for the cost of direct loans: *Provided*, That gross obligations for the principal amount of direct loans shall not exceed \$25,000,000: *Provided further*, That the cost of modifying such loans shall be as defined in section 502 of the Congressional Budget Act of 1974 (2 U.S.C. 661a). (*Department of Homeland Security Appropriations Act, 2008*).

#### **Explanation of Changes:**

Funds for administrative expenses have been realigned to the OMA appropriation.

### PPA Mission Statement

The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act) authorizes two types of direct loans: 1) Section 319 (State Share) loans to States for the non-Federal portion of cost-shared Stafford Act Programs and 2) Section 417 (Community Disaster) loans to local governments that incurred substantial losses of tax and other revenues as a result of a major disaster and require financial assistance in order to perform governmental functions. In accordance with the Federal Credit Reform Act of 1990, this account supports subsidy budget authority and authorizes loan levels for the direct loan programs.

### PPA Mission Statement

This account provides administrative funds that support direct disaster assistance loans.

During FY 2006, FEMA received \$3,500,000 in supplemental administrative funds to process \$1.372 billion in Community Disaster Loans (CDLs) to local governments in the Gulf Region affected by the 2005 hurricanes. For FY 2009, FEMA is requesting that administrative expenses of \$580,000 be realigned to the OMA appropriation, which will eliminate all funding in this PPA.

#### Summary Justification and Explanation of Changes

|                              | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|------------------------------|---------------|----------------|----------------|---------------------|
|                              | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Salaries and Benefits</b> | <b>\$371</b>  | <b>\$384</b>   | <b>\$0</b>     | <b>(\$384)</b>      |

The FY 2009 request does not include any funding for salaries and benefits as resources for this activity have been realigned to the OMA appropriation.

|   | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---|---------------|----------------|----------------|---------------------|
|   | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Advisory and Assistance Services</b> | <b>\$1</b>    | <b>\$261</b>   | <b>\$0</b>     | <b>(\$261)</b>      |

The FY 2009 request does not include any funding for Advisory and Assistance Services as resources for this activity have been realigned to the OMA appropriation.

|                       | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|-----------------------|---------------|----------------|----------------|---------------------|
|                       | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Other Services</b> | <b>\$61</b>   | <b>\$61</b>    | <b>\$0</b>     | <b>(\$61)</b>       |

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Resources for this activity have been realigned to the OMA Appropriation.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)** **FLOOD MAP MODERNIZATION FUND**

### **I. Appropriation Overview**

#### **A. Mission Statement for the Flood Map Modernization Fund:**

The Flood Map Modernization Fund (FMMF) is used to update, modernize and maintain the inventory of over 100,000 flood maps and modernize the Nation's flood hazard data inventory. The flood maps are used to determine appropriate risk-based premium rates for the National Flood Insurance Program (NFIP), to complete flood hazard determinations required of the Nation's lending institutions, and to develop appropriate disaster response plans for federal, state, and local emergency management personnel.

#### **B. Budget Activities:**

The Flood Map Modernization Fund will produce flood maps in geographic information system format for a majority of areas where there is flood risk. In addition, the modernization effort is incorporating the latest technology in order to provide the flood hazard data in the most usable format and also to provide modern tools and techniques that will enable FEMA and its state and local partners to produce high-quality data while managing cost and schedule constraints. FEMA's current approach for Flood Map Modernization is to update maps during the digitization process so they reflect physical changes that have occurred since the original mapping and bring updated maps into compliance with the Floodplain Boundary Standard. FEMA is also partnering with state and local governments to help develop their capability for managing and maintaining their flood hazard data.

#### **C. Budget Request Summary:**

The FEMA FY 2009 request for the Flood Map Modernization Fund is \$150,000,000, 43 positions, and 43 FTE. This reflects a decrease of \$70 million from FY 2008.

FEMA requests \$150 million for this activity. This is a net decrease of \$70 million from FY 2008.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

Floods inflict more damage than any other natural hazard in the United States. In 2004, Congress appropriated the President's request for the first of five years of funding at approximately \$200 million annually for the Federal Emergency Management Agency (FEMA) to modernize the flood maps in the National Flood Insurance Program (NFIP). FEMA is requesting \$150 million in FY 2009 to ensure the Map Modernization investment is preserved and makes progress toward addressing flood hazard data needs for communities who rely heavily on structural flood control defenses as well as those communities along the Nation's open coasts. Further, the requested FY 2009 funding will allow FEMA to smoothly transition to a future multi-year mapping endeavor.

Investments in flood hazard mapping ultimately results in reducing the risks to life and property from flooding, supporting the fiscal soundness of the NFIP, and lessening the financial impact on the Treasury following natural disasters. The FY 2009 funding request will be combined with increased funding from National Flood Insurance Fund's (NFIF) program fees, growing from \$50 million to \$98.2 million effective in FY 2009. The increase in NFIF fees includes \$12.5 million generated through increasing flood insurance policy fees by \$5 per policy and \$35.7 million through internal reallocation of funding within the NFIF; these increased fee dollars will only be used for targeted mapping and map maintenance activities. The added fee generated income will bring the total estimated available resources requested in FY 2009 to a level on par with those provided for the past five years. Additionally, over the last 5 years FEMA has increased the number of Cooperating Technical Partners (CTPs) by more than 50%. CTPs are state and local partners that have formalized their contributions and commitments to help ensure better overall floodplain management and flood risk identification through reliable, up-to-date flood maps. CTPs bring cost-share and also leveraged contributions of resources and data that add to the quality of flood maps.

With the strong foundation of Map Modernization in place, FEMA's Mitigation Directorate is implementing a fairly significant philosophical and tactical shift in how it delivers information necessary for flood hazard reduction. FY 2009 will mark the beginning of a significantly improved integrated flood risk management approach by weaving county-level flood hazard data developed in support of the NFIP into watershed-based risk assessments that serve as the foundation for local Hazard Mitigation Plans and targeted risk communication activities. FEMA will focus on filling flood hazard data needs and expanding and improving utility and accessibility of the flood hazard and risk data. FEMA will build on the benefits of digital flood hazard data, allowing easy access through FEMA's web-based portal and enabling powerful data analysis that quantifies flood risk in ways that facilitate improved mitigation planning and measure flood risk reduction.

### **The Flood Map Modernization Investment**

The Flood Map Modernization Program will have accomplished the following, based on appropriations through FY 2008:

- Built a digital Geospatial Information System (GIS) platform for map production and accessibility.
- Developed maps for 92% of the Nation's population available through the new platform.
- Ensured 75% of the flood hazard boundaries meet the standards for horizontal accuracy.
- Refreshed 30% of the detailed flood hazard data, ensuring that the maps represent current conditions.

The initial Map Modernization program vision focused on creating a robust, modernized platform of digital flood maps for the NFIP and restoring confidence in the accuracy of the floodplain boundaries. As FEMA executed the initial program, it became clear there was a much larger unmet need for new engineering analyses, improving the quality of the data and level of detail beyond fixing the boundaries. Based on this insight, direction from Congress, and other experience gained in the first half of the program, FEMA provided the "Flood Map Modernization Mid-Course Adjustment" report to Congress in March 2006. This report shifted the priorities for the program, reducing the emphasis on providing digital floodplain information in some low risk areas and increasing the emphasis on improving flood map quality.

The Mid-Course Adjustment report also established clear performance measures for the Flood Map Modernization Program. The first performance goal is to create a digital flood data platform covering 92% of the U.S. population and 65% of the land area. The second performance goal, the floodplain boundary standard, established a clear standard, aligned with flood risk, for the improvement of the floodplain boundaries. The target is for 75% of the digital floodplain boundaries to meet this new standard. The third performance goal was added to begin addressing the unmet needs for new or updated flood hazard analyses. The target for this measure is to have 30% of the new floodplain boundaries based on new engineering analyses, updated engineering analyses, or based on older engineering analyses that have been formally validated as still accurate. FEMA is on target to meet all of these program goals. The new, updated, or validated engineering analyses have been accomplished within the original budget, leveraging the cost efficiencies of the program gained through technology.

FEMA has created a premier digital flood data platform for the NFIP with floodplain boundaries that are reliable and trusted by stakeholders. This success is the result of effective program management and strong, meaningful partnerships with federal, state and local partners. The new digital maps are easier to use and provide increased capabilities for automation and analysis. They include updated

base map information to make it easier to locate properties on the map. The maps are used an estimated 30 million times or more each year in making critical decisions by local community officials, emergency managers, homeowners, and financial institutions. FEMA estimates this improved usability results in overall efficiencies of more than \$175 million each year.

State and local CTPs have also made a great investment in the Map Modernization program. At the close of FY 2007, FEMA estimates the CTP contributions have totaled approximately \$170 million with approximately \$25 million of that in FY 2007 alone. FEMA expects to continue to capitalize on these contributions in the future.

### **FY 2007 Accomplishments**

At the close of FY 2007, Flood Map Modernization achieved the following performance objectives:

- Developed modernized maps for over 60% of the Nation's population.
- Ensured 75% of the flood hazard boundaries on those maps meet the standards for horizontal accuracy.
- Refreshed 30% of the detailed flood hazard data on those maps, ensuring it represents current conditions.

### **FY 2008 Planned Accomplishments**

In FY 2008, Flood Map Modernization plans to achieve the following performance objectives:

- Increase the coverage of modernized maps to 70% of the Nation's population.
- Ensure 75% of the flood hazard boundaries on those maps meet the standards for horizontal accuracy.
- Refresh 30% of the detailed flood hazard data on those maps, ensuring it represents current conditions.

### **Fiscal Year 2009 NFIP Mapping Efforts**

The changes FEMA made implementing the Flood Map Modernization Mid-Course Adjustment began to address the unmet need for better analysis of the flood hazard in many places. However, as FEMA worked through the Map Modernization program a better understanding of critical needs was developed beyond those originally identified. The Map Modernization program will achieve its performance goals, but will not address all of the unmet needs.

Over the past 5 years, the program has been focused on covering areas of significant population with digital maps and in a limited manner updating and improving flood depth accuracy (flood data updates) for areas of especially high-risk. Hurricane Katrina highlighted the fact that providing updated flood data along the Nation's coasts and behind levees is critical.

All U.S. coastal communities are subject to flooding and many face huge risks. During the process of modernizing maps over the past 5 years, FEMA updated the methodology for determining coastal flood hazards in recognition of the flood hazard data need for these high population, high flood risk areas. Additionally, through Map Modernization the Nation's coasts will be provided modernized geospatial maps. However, the flood data for many of these maps is out of date. FEMA estimates that as much as 85% may no longer reflect current conditions.

Although all were studied using proven coastal methodologies approved by FEMA, and therefore provide some degree of accuracy, the average age of these coastal analyses is more 25 years old. The

Nation's coastlines are changing due to erosion, sea-level rise, 25 years of additional records, and other environmental factors. At the same time, coastal engineering methodologies are being refined and improved. By focusing mapping efforts on the coastal areas, FEMA's goal is to better reflect today's conditions in these vulnerable communities.

The Nation faces flood risk in communities partially protected by levee systems. To gain a better understanding of these risks FEMA is leveraging work performed by the U.S. Army Corps of Engineers' (USACE) National Levee Safety Program. Working hand-and-hand with USACE, FEMA is providing data for inclusion into the National Levee Database as this information is collected through FEMA mapping efforts.

Other gaps in flood hazard data exist for areas where the landscape has been altered, where rainfall data or storm surge has been statistically different in the last decade from averages in previous decades, or methods for estimating flood heights have advanced since original studies were done.

These significant needs can be addressed effectively and efficiently within the modernized digital platform, program management infrastructure, and partnerships built as part of the Map Modernization program.

### **Coastal Flood Studies**

Over the past five years, FEMA has completed a full evaluation and update of Guidelines and Specifications for analysis and mapping of coastal flood hazards along the Gulf, Atlantic, Pacific, and Great Lakes. In addition, FEMA leveraged resources from states, USACE, U.S. Geological Survey (USGS), and National Oceanic and Atmospheric Administration (NOAA), as well as data collected for disaster recovery to prepare new coastal flood maps for Louisiana, Mississippi, and Texas.

A coastal flood study consists of the following components:

- Topographic and bathymetric data collection where unavailable through other sources
- Analysis of offshore surge effects through detailed modeling
- Wave height analysis
- Delineation of the coastal flood hazard
- Processing and issuance of an updated Flood Insurance Rate Map

In FY 2009, FEMA will use at least \$30 million to perform updated basin-wide storm surge modeling for those areas determined to be in most need. More detailed studies of wave heights would be performed in follow-up to the storm surge modeling. It has been estimated that this funding would result in more than 20 counties—representing approximately 1,800 miles of open coast—receiving fully updated Flood Insurance Rate Maps.

Future coastal study analyses and mapping needs will be selected based on risk, community and state cost share, and cost efficiencies using a basin-wide study approach.

### **Mapping of Levee Areas**

The identification of current flood hazards in and around the Nation's levee systems is an important element of the Flood Map Modernization Program. Levees are located in over one-quarter of the counties for which FEMA is providing new, digital flood mapping as part of Map Modernization.

As part of the Map Modernization initiative, FEMA realized the importance of accurately addressing levee risks, issuing policy direction through Procedure Memorandum 34, "Interim Guidance for Studies of Levees," prior to the landfall of Hurricane Katrina in August 2005. That event heightened national attention and raised expectations of FEMA related to assessing the status of levee systems nationwide to ensure the flood risk in areas impacted by levees is accurately reflected on the Flood Insurance Rate Maps and in compliance with NFIP regulatory requirements.

In coordination with USACE's National Levee Database activities, FEMA is populating a nationwide levee inventory. FEMA is on track to identify and inventory one-third of the Nation's levees reflected on Flood Insurance Rate Maps within the Mid-Term Levee Inventory.

To minimize the impact of the levee recognition and certification process on Flood Map Modernization Program goals, FEMA implemented an improved process for addressing levee certification requirements (issuance and implementation of Procedure Memorandum 43). The process provided communities and levee owners additional time to meet the regulatory requirement while allowing the flood mapping process in those communities to move forward.

In FY 2009, FEMA will utilize approximately \$30 million to continue the assessment of the status of levee systems, ensuring the accurate reflection of flood risk in areas impacted by levees on Flood Insurance Rate Maps and in compliance with NFIP regulatory requirements. The funding will also allow FEMA to complete the remaining Mid-Term Levee Inventory and link this data to USACE's National Levee Database. FEMA will also assess and initiate the update of the levee-related flood hazard data for maps in more than 110 counties where levees exist. The assessment and update will include counties impacted by the expiration of Provisionally Accredited Levee status as well as counties facing significant flood risks.

The funding utilized in FY 2009 will not be used to perform activities related to certification of levee systems such as structural and geotechnical analyses. Rather, the funding will be used to update the flood maps once the levee owners provide the technical data needed to determine if they can be accredited. To update the maps affected by levees, FEMA will perform hydraulic modeling of with- and without-levee conditions and issue updated Flood Insurance Rate Maps. Where necessary, funding will be used to analyze and map interior drainage within the levee systems.

Coordination efforts with USACE have intensified and will continue to be important in the future as USACE establishes the National Levee Safety Program.

### **Addressing Other Significant Flood Hazard Engineering Needs**

Flood Map Modernization focused on producing a solid digital platform for the flood mapping program, moving the map inventory to current technology, and restoring stakeholder confidence in the reliability of floodplain boundaries. Even though the program will achieve these goals, it is clear the national need for updated analysis of flood hazards will not be fully met.

As FEMA has worked through the Map Modernization Program, a better understanding of additional critical needs has been developed. In FY 2009, FEMA expects to invest \$90 million on updated engineering analyses, beyond the engineering investments related to levees and coastal areas.

There are three principal factors that drive the need for updated flood hazard analyses:

1. Physical changes, such as manmade influence which may include new bridges, culverts, levees, development in the floodplain.
2. Climate changes, such as recent flood disasters or additional stream gage data.
3. Engineering methodology changes, such as improved computer models and better understandings of the physics of water flow.

Investments in these engineering needs will be evaluated and sequenced based on the three factors above, along with priority for states and communities that bring significant cost-share and areas where the greatest flood insurance policies exist.

Keeping pace with these changes is important. Failing to do so can ultimately lead to unwise land use decisions and construction standards, thereby putting homeowners at increased risk while providing a false sense of security. Conversely, overstated hazards can result in potentially unnecessary construction costs and incorrect insurance rating decisions. Sound reliable flood hazard information is a necessary component of ensuring the fiscal soundness of the National Flood Insurance Program.

### **Other Program Investments**

Beyond the above described appropriated funding, the additional funds from the National Flood Insurance Fund (NFIF) will fund further flood hazard engineering, coastal modeling, program operations, and administrative expenses. Specifically, an additional \$15 million from the NFIF would be used for two purposes. First, FEMA will assess all coastal maps that are considered outdated. This assessment will help FEMA better understand the adequacy of the currently-mapped coastal hazard and if portions of the current analyses remain valid. Second, FEMA will develop and implement a plan to equitably prioritize and sequence the remaining coastal mapping needs. FEMA will engage stakeholders and assess what resources state and local partners are willing to leverage. FEMA will initiate additional coastal studies based on the results of the nationwide coastal assessment.

### **Future Multi-Year NFIP Mapping Effort**

FEMA is on track to accomplish the goals set out for Map Modernization, yet significant needs remain. FEMA will begin to make progress toward addressing these issues in FY 2009. Further, FEMA will develop a robust multi-year plan to address the full scope of the remaining needs.

The multi-year plan will ensure that FEMA fulfills its statutory mandate (42 U.S.C. 4101) to assess and review all of the flood maps on a five-year cycle and address new needs that arise from physical changes, climate changes, or engineering methodology changes. FEMA expects to better target flood map updates by focusing on areas where there are properties insured by the NFIP, establishing standards that identify areas that are adequately mapped (unless the community demonstrates the need for an update), and identifying areas where FEMA will initiate updates based on unacceptable risks to the NFIP or the community. Additionally, priority consideration will be given to those CTPs who fund a share of the mapping cost.

The multi-year plan will build on the strong foundation of Map Modernization that is in place. The plan will articulate a fairly significant philosophical and tactical shift in how it delivers information necessary for flood hazard reduction. This significantly improved integrated flood risk management approach will weave county-level flood hazard data developed in support of the NFIP into watershed-based risk assessments that serve as the foundation for local Hazard Mitigation Plans and targeted risk communication activities. FEMA will focus on filling flood hazard data needs and expanding and improving utility and accessibility of the flood hazard and risk data. FEMA will build on the benefits

of digital flood hazard data, allowing easy access through FEMA's web-based portal and enabling powerful data analysis that quantifies flood risk in ways that facilitate improved mitigation planning and measures flood risk reduction.

The maps and the engagement of local governments and citizens both facilitates the reduction of flood losses through local and individual action and provides a sound footing for other Mitigation programs and the NFIP to be successful. As FEMA develops and rolls out updated flood hazard data, provides the public information they need to make informed risk reduction decisions, and improves the actuarial soundness of the NFIP, the public is reminded of the flood threat before the next disaster and can take action to reduce risk.

**IV. Program Justification of Changes**

**Department of Homeland Security  
Federal Emergency Management Agency (FEMA)  
Flood Map Modernization Fund  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Increase 1: Map Modernization**

Strategic Goal(s) & Objective(s):

Strategic Goal 4: Build a nimble, effective emergency response system and a culture of preparedness.  
Objective 4.2: Preparedness. Achieves outcome of: Ensuring Americans are prepared, capable, and ready to respond to adverse incidents.

PPA: Flood Map Modernization

Program Increase/Decrease: Positions 0 FTE 0 Dollars (\$70,569,000)

**Funding Profile**

**Description of Item:**

Reduction in Map Modernization within the Flood Map Modernization Fund.

**Justification:**

FEMA is requesting funding of \$150 million to support the continued improvement of NFIP maps to reduce the risk to life and property from flooding and support the fiscal soundness of the NFIP. This funding level will be combined with an increased investment from the National Flood Insurance Fund’s program fees to \$98.5 million in FY 2009 and stronger cost-share from state and local partners. The combined funding will allow FEMA to preserve the Flood Map Modernization investment at a level comparable to the past 5 years, advance and make progress towards meeting needs in levee and coastal arenas, and allow FEMA to transition to a future multi-year mapping endeavor.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
Federal Emergency Management Agency  
Justification of Proposed Changes in Flood Map Modernization Fund  
Appropriation Language**

For necessary expenses pursuant to section 1360 of the National Flood Insurance Act of 1968, *as amended* (42 U.S.C. 4101, et. seq.), [~~\$220,000,000~~] *\$150,000,000* and such additional sums as may be provided by state and local governments or other political subdivisions for cost-shared mapping activities under section 1360(f)(2) of such Act (*42 U.S.C. for 4101 (f)(2)*), to remain available until expended: *Provided*, That total administrative costs shall not exceed 3 percent of the total [amount appropriated under this heading] *appropriation. (Department of Homeland Security Appropriations Act, 2008)*

#### **Explanation of Changes:**

No substantive changes are proposed.

**PPA Mission Statement**

The Flood Map Modernization Fund supports the effort to update and modernize the Nation’s flood hazard data inventory. Map Modernization will produce flood maps in geographic information system format for every area where there is flood risk. In addition, the modernization effort is incorporating the latest technology in order to provide the flood hazard data in the most usable format and also to provide modern tools and techniques that will enable FEMA and its State and local partners to produce high-quality data while managing cost and schedule constraints. FEMA’s current approach for Flood Map Modernization assumes that a large percentage of the existing flood hazard data is still valid and that revising map information and boundary adjustments are the necessary changes needed to update the flood hazard maps.

Floods inflict more damage and economic losses upon the United States than does any other natural disaster. During the 10 years from fiscal year 1992 through fiscal year 2001, flooding caused more than 900 deaths and resulted in approximately \$55 billion in damages. Since 1968, the National Flood Insurance Program (NFIP) has combined the development of flood maps to identify areas at greatest risk of flooding with mitigation efforts to reduce or eliminate flood risks to people and to property and with the availability of affordable flood insurance that property owners can purchase to protect themselves from flood losses.

**Summary Justification and Explanation of Changes**

|                              | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|------------------------------|----------------|----------------|----------------|---------------------|
|                              | <b>Actuals</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Salaries and Benefits</b> | \$3,058        | \$6,450        | \$6,643        | \$193               |

Salaries and Benefits funds the salaries and expenses of 43 FTEs. The slight increase from FY 2008 to FY 2009 is due to inflation.

|               | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------|----------------|----------------|----------------|---------------------|
|               | <b>Actuals</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Travel</b> | \$406          | \$444          | \$295          | (\$149)             |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The slight decrease from FY 2008 to FY 2009 is due to the decreased travel expenses that correlate with a reduction to in flood map modernization funding.

|                 | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|-----------------|----------------|----------------|----------------|---------------------|
|                 | <b>Actuals</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>GSA rent</b> | \$693          | \$707          | \$721          | \$14                |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The \$14,000 increase from FY 2008 to FY 2009 is due to inflation.

|   | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---|----------------|----------------|----------------|---------------------|
|   | <b>Actuals</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Communication, Utilities, and miscellaneous charge</b> | \$12           | \$13           | \$9            | (\$4)               |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The slight decrease from FY 2008 to FY 2009 correlates to the permanent reduction to funding in flood map modernization.

|                 | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|-----------------|----------------|----------------|----------------|---------------------|
|                 | <b>Actuals</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Printing</b> | <b>\$1,257</b> | <b>\$1,374</b> | <b>\$915</b>   | <b>(\$459)</b>      |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The \$459,000 decrease from FY 2008 to FY 2009 correlates to the permanent reduction in map modernization and the technology advances of digital maps.

|   | <b>2007</b>     | <b>2008</b>     | <b>2009</b>     | <b>2008 to 2009</b> |
|---|-----------------|-----------------|-----------------|---------------------|
|   | <b>Actuals</b>  | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>       |
| <b>Advisory and Assistance Services</b> | <b>\$60,438</b> | <b>\$66,043</b> | <b>\$43,258</b> | <b>(\$22,785)</b>   |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The \$22,785,000 decrease from FY 2008 to FY 2009 correlates to the permanent reduction in map modernization.

|                       | <b>2007</b>     | <b>2008</b>     | <b>2009</b>     | <b>2008 to 2009</b> |
|-----------------------|-----------------|-----------------|-----------------|---------------------|
|                       | <b>Actuals</b>  | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>       |
| <b>Other Services</b> | <b>\$76,128</b> | <b>\$83,188</b> | <b>\$55,405</b> | <b>(\$27,783)</b>   |

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The \$27,783,000 decrease from FY 2008 to FY 2009 correlates to the permanent reduction in map modernization.

|  | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|--|----------------|----------------|----------------|---------------------|
|  | <b>Actuals</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Purchase from Government Accounts</b> | <b>\$868</b>   | <b>\$949</b>   | <b>\$633</b>   | <b>(\$316)</b>      |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The \$316,000 decrease from FY 2008 to FY 2009 correlates to the permanent reduction in map modernization.

|                                 | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------------------------|----------------|----------------|----------------|---------------------|
|                                 | <b>Actuals</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Supplies &amp; materials</b> | <b>\$4</b>     | <b>\$4</b>     | <b>\$3</b>     | <b>(\$1)</b>        |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The \$1,000 decrease from FY 2008 to FY 2009 correlates to the permanent reduction in map modernization.

|                  | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|------------------|----------------|----------------|----------------|---------------------|
|                  | <b>Actuals</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Equipment</b> | <b>\$128</b>   | <b>\$140</b>   | <b>\$93</b>    | <b>(\$47)</b>       |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The \$47,000 decrease from FY 2008 to FY 2009 correlates to the permanent reduction in map modernization.

|                                       | <b>2007</b>     | <b>2008</b>     | <b>2009</b>     | <b>2008 to 2009</b> |
|---------------------------------------|-----------------|-----------------|-----------------|---------------------|
|                                       | <b>Actuals</b>  | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>       |
| <b>Grants/Subsidies/Contributions</b> | <b>\$59,114</b> | <b>\$64,596</b> | <b>\$43,022</b> | <b>(\$21,574)</b>   |

Grants/Subsidies/Contribution include cash payments to States, other political subdivisions, corporations, associations, and individuals. The \$21,574,000 decrease from FY 2008 to FY 2009 correlates to the permanent reduction in map modernization.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA) NATIONAL FLOOD INSURANCE FUND

### **I. Appropriation Overview**

**A. Mission Statement for the National Flood Insurance Fund (NFIF):** The NFIF, which was established in the Treasury by the National Flood Insurance Act of 1968, is a fee-generated fund and is the funding mechanism for the National Flood Insurance Program (NFIP). The Act, as amended, authorizes the Federal Government to provide flood insurance on a national basis.

### **B. Budget Activities:**

Flood insurance premiums collected are deposited into the NFIF; claims and operating and administrative costs are paid out of the fund.

In return for the availability of flood insurance, communities agree to adopt and to enforce floodplain management measures to reduce losses from future flooding. Flood insurance may be sold or continued in force only in communities that enact and enforce appropriate floodplain management measures. Communities must participate in the program within one year of the time they are identified as flood-prone in order to be eligible for flood insurance and for some forms of Federal financial assistance for acquisition or construction purposes. Under the regular program, engineering studies are conducted of different flood risks in flood-prone areas to establish actuarial premium rates. In addition, federally regulated lending institutions cannot provide loans to nonparticipating communities for properties within an identified special flood hazard area. Certain forms of disaster assistance also are restricted in these nonparticipating communities.

### **C. Budget Request Summary:**

The NFIF FY 2009 discretionary funding request for salaries, expenses, and floodplain management is 330 positions, 330 FTE, and \$156,599,000. These funds are offset from collections of policy fees. This is an increase of \$45,599,000 over FY 2008. The \$156,599,000 includes \$49,418,000 for salaries and expenses (S&E) and \$107,181,000 for floodplain management.

FEMA estimates mandatory premium collections of \$3,037,000,000. These funds will be used to pay claims and other operating expenses of the National Flood Insurance Program (NFIP), to fund \$85,000,000 in operating expenses, \$90,000,000 for the repetitive and severe repetitive loss programs, and \$35,700,000 for Flood Mitigation Assistance Grants. Program changes include an additional \$15,000,000 for NFIP marketing activities operating expenses, an increase of 7 additional FTE to administer the repetitive loss programs, an expense covered by the authorized administrative costs, and an increase of \$35,700,000 from premium collections for Flood Mitigation Assistance. The adjustment to base is \$204,000,000, reflecting additional revenue based on the estimated increase in the number of flood insurance policies.

## II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**Federal Emergency Management Agency**  
**National Flood Insurance Fund**  
**Program Performance Justification**

(Dollars in thousands)

#### INTRODUCTION

The National Flood Insurance Fund (NFIF) supports numerous functions, programs, and activities, including the salaries and expenses of program management and implementation staff at FEMA's 10 regional offices and the national office, through the collection of flood insurance premiums and administrative fees. All of these activities are directly related to the National Flood Insurance Program (NFIP). Implementation activities include the Severe Repetitive Loss and Repetitive Flood Claims grant programs described below, as well as the Flood Mitigation Assistance grant program. Additional funded activities include technical assistance to states and communities regarding local implementation of the NFIP; flood hazard map maintenance and distribution activities that complement the Flood Map Modernization Fund activities; and support for various aspects of the flood insurance business, including underwriting, operations, and claims payments.

The descriptions by PPA cover greater detail within each of these activities.

#### PPA: SALARIES AND EXPENSES

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>   |
|------------------------------|---------------------|------------|-----------------|
| <b>2007 Actual</b>           | <b>270</b>          | <b>234</b> | <b>\$36,539</b> |
| <b>2008 Enacted</b>          | <b>330</b>          | <b>300</b> | <b>45,642</b>   |
| 2009 Adjustments to Base     | 0                   | 0          | 3,776           |

| 2009 Program Change          | 0                   | 30         | 0               |
| <b>2009 Request</b>          | <b>330</b>          | <b>330</b> | <b>49,418</b>   |
| Total Change 2008-2009       | 0                   | 30         | 3,776           |

FEMA requests \$49,418,000 and 330 FTE for this activity. This is an increase of \$3.78 million and 30 FTE over FY 2008.

In FY 2007, FEMA:

- Reduced potential annual flood losses by more than \$1 billion through NFIP insurance and floodplain management activities.
- Increased the number of NFIP policies by more than three percent through program partnerships.
- Reduced subsidies to pre-Flood Insurance Rate Map (FIRM) properties, and modernized program operations to incorporate state-of-the-art business practices and technologies, assuring that operating integrity, cost efficiency, and customer service standards were met or exceeded.

In FY 2008, FEMA will:

- Reduce potential annual flood losses by more than \$1 billion through NFIP insurance and floodplain management activities.
- Increase the number of NFIP policies by five percent through program partnerships.
- Reduce subsidies to pre-Flood Insurance Rate Map (FIRM) properties, and modernize program operations including NFIP NextGen system to incorporate state-of-the-art business practices and technologies, assuring that operating integrity, cost efficiency, and customer service standards are met or exceeded.
- Manage the implementation of the Severe Repetitive Loss and the Flood Mitigation Assistance.
- Improve oversight of the over 85 Write-Your Own insurance companies that sell and service NFIP policies.
- Develop and manage initiatives to reduce program subsidies in order to charge fair and actuarially sound premiums.
- Increase FEMA's management and support for floodplain management that is necessary for Flood Insurance Rate Map adoption by communities as well as ensuring the continued compliance of the 20,300 participating communities.

In FY 2009, FEMA will:

- Reduce potential annual flood losses by nearly \$2 billion through NFIP insurance and floodplain management activities.
- Increase the number of NFIP policies by five percent through program partnerships.
- Reduce subsidies to pre-FIRM properties and the cost of repetitive loss properties.
- Modernize program operations to incorporate state-of-the-art business practices and technologies to assure that operating integrity, cost efficiency, and customer service standards are met or exceeded.
- Assure flood claims processing standards are met or exceeded, regardless of the size and severity of the flood event.
- Develop and manage programs for increasing program participation incentives and improving enforcement where mandatory participation is warranted.
- Assess coastal maps that are considered outdated in order to develop and implement a plan to equitably prioritize and sequence the remaining coastal mapping needs.

In addition, these resources will also be used to address specific risks identified by the GAO (Comptroller Walker's testimony, "GAO's High Risk Program," GAO-06-794T). FEMA has already taken several actions, such as authoring a handbook, to address specific risks identified by GAO. To continue to proactively address identified risk, FEMA will:

- Expand program management and oversight of the 85 insurance companies and the thousands of insurance agents and claims adjusters who deliver the insurance program to individual customers.
- Continue to implement the appeals and mediation provisions of the National Flood Insurance Reform Act of 2004.

### **CURRENT SERVICES PROGRAM DESCRIPTION:**

Resources under this activity support the salaries and expenses of FTE at FEMA's 10 regional offices and the national office responsible for managing the NFIP flood insurance activities, the floodplain management programs that provide technical assistance and map maintenance activities, and the grant programs supporting flood hazard reduction efforts.

Flood insurance activities include:

- Actuarial management to analyze insurance risks, claims data, and financial models in order to evaluate and communicate all aspects of the financial solvency of the program and to set the appropriate premium rates.
- Flood insurance operations management for more than 5.4 million NFIP flood policies with over \$1 trillion of insurance in force, including issuance, renewal, claims, and resolution of claims appeals.
- Underwriting management to set policy and develop regulations regarding insurance coverage eligibility and the classification of risks.
- Claims management to set policy and develop regulations regarding the adjusting and payment of claims.
- Management of the private insurance companies (the Write-Your Own companies) that write flood insurance policies and adjust claims for the NFIP, including conducting periodic operational reviews.
- Education, training, and technical assistance for private insurance company agents and adjusters.
- Management of the vendors that supply services to the NFIP, such as the Bureau and Statistical Agent and the Direct Servicing Agent.
- Management of flood insurance marketing and public communications, including advertising, community outreach programs and publicity.
- Partnering with stakeholders in the private sector and other government agencies, including lenders who must require the purchase of flood insurance for certain loans.

FEMA will continue to support the NFIP and provide operational and administrative support for the Community Rating System.

The Community Rating System (CRS) is a voluntary program implemented in 1990 as an incentive-based program designed to recognize and encourage community floodplain management activities that exceed the minimum NFIP standards. Under the CRS, flood insurance premium rates are adjusted to reflect the reduced flood risk resulting from community activities that meet CRS goals including reduction of flood losses, accurate insurance rating, and promotion of flood insurance awareness. Participating communities are rated by Class (1 to 10) with Class 1 communities receiving the greatest premium rate reductions. Non-participating communities are rated as Class 10. Credits can be applied toward a community's CRS classification for various activities under the following floodplain management headings:

- Public Information
- Mapping Regulations
- Flood Damage Reduction
- Flood Preparedness

| 2009 Program Change          | 0                   | 0          | 0               |
| <b>2009 Request</b>          | <b>0</b>            | <b>0</b>   | <b>107,181</b>  |
| Total Change 2008-2009       | 0                   | 0          | 41,823          |

FEMA requests \$107.18 million for this activity. There is an increase of \$41.82 million over FY 2008.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Through Floodplain Management programs, FEMA encourages communities and their citizens to take informed and effective mitigation actions before a flood in order to reduce the long-term risk to people and property. Structures built to NFIP standards experience 80 percent less damage than structures not built to these standards and have resulted in over \$1 billion every year in reduced flood losses.

Through the delivery of the Floodplain Management programs in FY 2007 and FY 2008, FEMA continues to lead a national effort to:

- Review over 100 floodplain management related recommendations from the NFIP Evaluation, prepared responses, and developed a plan to implement many of the recommendations.
- Enroll, reinstate or convert 237 communities into the NFIP.
- Increase CRS Participation and Class Improvements. Total CRS community participation increased from 1,038 communities at the end of FY 2006 to 1,055 at the end of FY 2007, an increase of 17 communities. Additionally there was an increase from 38 to 39, CRS Class 5 and better communities, which are often considered the premier CRS Classes.
- Identify and improve the understanding of communities' flood hazards and their risks by providing flood hazard maps.
- Develop and improve techniques and planning processes which mitigate those flood risks.
- Provide technical assistance and an environment at the state and local levels that is conducive to applying those techniques and processes.
- Provide financial assistance to states to support state National Flood Insurance Program (NFIP) implementation and compliance activities.
- Support development of incentives and disincentives that make application of those techniques and processes a social, political and/or economic priority.

In FY 2009, FEMA will:

- Continue to develop a variety of outreach materials to assist all entities of Federal, State, and local governments to effectively maintain sound floodplain management practice, and educate the general public on mitigation actions that may be taken in a pre-disaster environment.
- Provide ongoing map maintenance activities, issue map revisions, and enhance distribution services, including provisions for digital products, subscription services, and links to other hazard data. Provide funding to States for the development of the capability and capacity to manage the

production of and to maintain flood hazard data. These efforts complement and support the Flood Map Modernization Fund activities.

- Provide technical assistance to the 20,300 communities participating in the NFIP and monitor the compliance with program requirements; provide grant funds to States and Territories to help furnish this technical assistance and monitoring; develop policy, guidance, and regulations to improve implementation of floodplain management at the State and community levels, and to enhance compliance by communities with NFIP requirements.
- Use an additional \$35.7 million for targeted mapping and map maintenance activities to maintain the investment made through the Flood Map Modernization effort.

The FY 2009 funding request reflects an increase and reallocation from National Flood Insurance Fund's (NFIF) program fees for flood hazard mapping activities, growing from approximately \$50 million to \$98.2 million effective in FY 2009. The increase in NFIF fees includes \$12.5 million generated through a growth in the number of policies and an increase in flood insurance policy fees by \$5 per policy as well as \$35.7 million through internal reallocation of funding within the NFIF; these increased fee dollars will only be used for targeted mapping and map maintenance activities.
