- Develop regular engagement with Congressional staff through briefings and meetings.
- Identify opportunities for proactive engagement with Congress in collaboration with CS&C External Affairs and the Office of Legislative Affairs.
- Maintain a tracking system to monitor responses to Congress, GAO, OIG, and other constituents, and work with NCS D branches to maintain currency.

#### FY 2009 Planned Milestones – International Affairs

- Continue to collaborate strategically with key international partners toward managing global cyber risk through enhanced information sharing and situational awareness, improved incident response capabilities, and coordination on strategic policy issues.
- Continue to serve as point of contact for leveraging relevant subject matter expertise, and create and facilitate opportunities for NCS D and CS&C engagement in international activities.
- Continue to foster robust and formalized collaboration with key allies and strategic international partners, including solidifying the Group of Five Nations and International Watch and Warning Network (IWWN) through Terms of Reference, Memorandums of Agreement/Understanding, or other appropriate mechanisms.
- Continue to engage in multilateral organizations and other forums to advance U.S. cyber security objectives, including the Asia Pacific Economic Cooperation (APEC), European Union (EU), Group of 8 (G8), Organization of American States (OAS), Organization of Economic

Cooperation and Development (OECD), International Telecommunication Union (ITU), Meridian Conference, and Security and Prosperity Partnership of North America (SPP).

- Continue to provide leadership in the interagency community dialogue on cyber security to ensure robust and regular coordination from Federal agencies with cyber security equities.
- Continue to facilitate private sector participation in international activities to develop, promote, and nurture strong strategic partnerships within the international community. NCSA will continue to work with the IT Sector Coordinating Council and Cross Sector Cyber Working Group accordingly.

FY 2009 Planned Milestones – Public Policy

- Continue to ensure consistent dissemination of key messages and a strategic focus for all communications to Congress and Departmental decision makers and to build the capability to be an advocate for the equities and interests of CS&C.
- Develop into a fully functional Public Policy Program that represents NCSA in a coordinated and cohesive manner.
- Streamline internal processes to leverage previous efforts and ensure efficient and comprehensive representation of NCSA.
- Continue to address any cyber security policy issues that arise, and facilitate coordination across NCSA and with CS&C.
- Work in conjunction with CS&C to develop a strategy to take an increasingly proactive role in public policy issues of concern for cyber security.

Ensure coordination across relevant DHS components including the DHS Office of Policy, the Office of Legislative Affairs, and others as appropriate.

The NCSA Planning and Programs (P&P) Branch is responsible for supporting the leadership in setting direction to overall NCSA strategic and tactical planning; and performs organizational assessment. Planning and Programs integrates resource management; helps in policy development and implementation of the broad array of issues addressed by the NCSA Director; advises the development of national cyber security policy; acts as liaison for matters related to the Government Performance and Results Act (GPRA) and the implementation of the President’s Management Agenda (PMA); assists program managers with providing performance measurement and vital information to justify five-year resource requests through the Future Years Homeland Security Program (FYHSP); maintain a consistent strategic planning methodology to apply to its programs and assists programs to prepare

comprehensive strategic plans to address special issues and topics identified; coordinates all reporting and ensures reporting requirements are met in an appropriate manner; performs statistical analysis and performance measurement methodology; and serves as the liaison with audit groups, such as the Office of the Inspector General (OIG) and the Government Accountability Office (GAO), to coordinate responses to audit reports. Provides comprehensive responses to congressional testimony and other inquiries, as well as inform DHS internal and external stakeholders about cyber security issues and activities.

#### FY 2007 Accomplishments

- Developed the Planning, Programming, Budgeting and Execution (PPBE) for the out years.
- Conducted Performance Assessment Rating Tool (PART) Review.
- Formulated FY 2008 Advance Acquisition Plan.
- Provided Annual Exhibit 300s to OMB.
- Reconciled the financial system annual execution report.
- Developed budget documents.
- Began implementation of recommendations from the PART review.
- Synchronized and executed CS&C's Strategic Plan with DHS goals and objectives.
- Completed CS&C programmatic roadmap, and aligned resources in an integrated FY 2009-13 budget.
- Conducted quarterly reviews and evaluated CS&C budget and activities against the actions and performance targets in the CS&C Strategic Plan.

#### FY 2008 Planned Milestones

- Continue to develop the PPBE for the out years.
- Assist program managers with providing performance measurement and information to justify resource requests through the Future Years Homeland Security Program (FYHSP).
- Maintain a consistent strategic planning methodology to apply to its programs and assist programs to prepare comprehensive strategic plans to address special issues and topics identified.
- Coordinate all reporting and ensure reporting requirements are met in an appropriate manner.
- Perform statistical analysis and performance measurement methodology.
- Coordinate NCSD's budget formulation, preparation and planning.
- Prepare the Resource Allocation Plan and updates the Future Years Homeland Security Plan (FYHSP).
- Prepare NCSD's Strategic Plan and budget documentation.
- Support Acquisition Planning, Human Capital Planning, and Facilities Planning.
- Support the NCSD leadership in budget structure allocation and execution plans, and provide support to comply with the government rules and regulations.
- Develop standard business functions such as human capital, planning, budgeting, budget execution and acquisition.
- Utilize the standard DHS PPBE processes.
- Conduct strategic and tactical planning, organizational assessment, performance metrics review, and information sharing and collaboration programs.
- Re-evaluate implementation of Performance Assessment Rating Tool (PART) recommendations.

### FY 2009 Planned Milestones

- Achieve FY 2009-13 PPBE Formulation objectives in accordance with the Future Years Homeland Security Program (FYSHP) and Resources Allocation Plan (RAP) and execute the FY 2007 budget efficiently and effectively in support of NCSD programs.
- Meet timelines and deadlines required for budget submissions and budget information in accordance with the FYSHP and RAP.
- Execute NCSD's budget in accordance with fiduciary regulations.
- Provide guidance and feedback monthly to internal customers for improving the level of communications both oral and written forms.
- Proactively initiate budgetary and acquisition data to internal customers to meet milestones and objectives.
- Ensure that 90 percent of major milestones are met and all major products are delivered with excellent quality.
- Effectively provide process improvement, budgeting and management assistance, information and expertise to external and internal partners.
- Develop and implement process improvements that reduce the time required to develop and process procurement requests.
- Provide guidance in aligning programs, projects and activities requirements throughout the full cycle of budget planning and presentation.
- Develop cutting edge concepts and methodologies for strengthening individual program budget justifications and formulation and presentation processes, and resolving complex budgetary and financial problems.
- Conduct programmatic evaluation of cost, schedule, and performance relative to goals and objectives.

### Information Sharing and Collaboration

This program strengthens homeland security through research, education and outreach programs that focus on technology critical for cyber security and emergency preparedness and response. It also identifies and addresses critical research problems in information infrastructure protection, works to build a community of researchers focused on infrastructure security, serves as a trusted partner for industry and government, fosters collaborative programs that build links between constituencies, and provides a neutral forum for the exchange of ideas and information.

### FY 2007 Accomplishments

- Developed unified cyber and communications Research and Development (R&D) requirements in cooperation with the Office of Science and Technology Policy, the Department of Homeland Security (DHS) Science and Technology Directorate, and other public and private security partners.
- Conducted workshop on insider attack and cyber security.
- Conducted workshop on the economics of securing the Information Infrastructure.
- Assessed RiskMAP as a business decision support tool for making IT security investments.
- Developed Business Education for Security Professionals course (Tuck School of Business).
- Deployed METROSENSE and evaluated security protocols.
- Establish credentialing framework.

### FY 2008 Planned Milestones

- Conduct Process Control Systems security workshop.

- Conduct workshop on Securing the Information Infrastructure – Making Cyber Security Investment Decisions.
- Conduct Critical Infrastructure Protection Conference.
- Conduct Critical Infrastructure Protection Exercise.
- Identify study sectors and participants and conduct interviews.
- Create a collaborative computing decision support tool.
- Develop studies/papers that provide a better understanding of incentives, drivers, and barriers to information security investment in the private sector.
- Conduct a CISO workshop on protecting against economically motivated attacks.
- Develop a case study on cyber related business practices and lessons learned.
- Develop RiskMAP application for businesses using process control systems.
- Develop Secure Information Systems, Mentoring and Training program.
- Establish Educational Initiatives Subcommittee and Undergraduate contact program.
- Establish student travel fellowships.
- Research Scalable Secure Sensor Systems.
- Research information risk in data-oriented enterprises/financial sector.
- Study interoperability and usability for PKI management, and develop PKI library and prototype PKI Resource Query Protocol.
- Develop proof of concept demonstration that addresses gaps in credential management infrastructure.
- Demonstrate assessable credential management.

#### FY 2009 Planned Milestones

- Continue to enhance and expand research fellowship program by increasing learning opportunities for faculty and development of instruction and re-training focused on information infrastructure and solutions for government employees.
- Continue work on human behavior and threat issues multi-disciplinary project and research on SCADA/process control systems.
- Continue to refine and test of models and data model for a business rationale for cyber security.
- Continue to expand current outreach and information sharing activities to a broader constituency through an enhanced and vigorous communications initiative.

The National Protection and Programs Directorate requests \$236,600,000 for the National Communications System. This is an increase of \$100,579,000 over the FY 2008 enacted and includes adjustments to base of \$484,000 for pay inflation and \$34,500,000 for the transfer of LORAN as well as program changes of \$65,595,000.

Established in 1963 by President John F. Kennedy, the NCS assists the President, the National Security Council, the Homeland Security Council, the Office of Science and Technology Policy and the Office of Management and Budget, in the coordination of the planning for and provision of national security and emergency preparedness (NS/EP) communications for the Federal Government under all circumstances, including crisis or emergency, attack, recovery and reconstitution.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The National Communications System supports the National Protection and Programs Directorate in: (1) the exercise of homeland security-related telecommunications functions and responsibilities, and (2) the coordination of the planning for and provision of national security and emergency preparedness communications for the Federal Government under all circumstances, including crisis or emergency, attack and recovery, and reconstitution. Specifically, the National Communications System:

- Provides government priority telecommunications services;
- Administers the National Coordinating Center (NCC) for Telecommunications to facilitate the initiation, coordination, restoration and reconstitution of NS/EP telecommunications services or facilities under all circumstances;
- Develops and ensures that plans and programs are implemented that support telecommunications infrastructure hardiness, redundancy, mobility, connectivity and security; and, serves as the focal point for joint industry, government and interagency NS/EP telecommunications strategic planning and partnerships.

NPPD executes the mission of the NCS through the following major projects:

## Priority Telecommunications Service:

\* FY 2008 Enacted in P.L. 110-161 included Industry-Government and Interagency Processes (IGIP) and National Command and Coordination Capability (NCCC) and listed Next Generation Networks separately from the Priority Telecommunications Service (PTS) subtotal. The above FY 2008 Enacted is restated to exclude IGIP and NCCC and includes NGN for comparison purposes to the FY 2009

NCS Priority Telecommunications Service (PTS) is a White House directed program to provide specially designed telecommunications services to the NS/EP user community during natural or man-made disasters when conventional communications services are ineffective. In addition to enhancing critical infrastructure protection, these telecommunication services are used to coordinate response and recovery efforts and, in severe conditions, to assist with Continuity of Operations (COOP) and Continuity of Government (COG).

Specifically, PTS enhances the ability of NS/EP users to complete calls during crisis or emergency through a degraded PSN using any of the following four components: 1) Government Emergency Telecommunications Service (GETS), a nationwide landline telephone service that provides priority NS/EP telecommunications for the President, Federal, State and local governments, and industry organizations during periods of network stress by utilizing the existing public switched network (PSN) augmented by NS/EP enhancements; 2) Wireless Priority Service (WPS), a nationwide wireless telephone service that complements and interoperates with GETS and provides end-to-end priority NS/EP telecommunications via selected commercial wireless carriers, thereby enhancing the probability of call completion; 3) Special Routing Arrangement Service (SRAS), GETS service for special users that provides for the highest level of non-traceable priority telecommunications service during times of severe PSN congestion or disruption as may result from acts of war; and 4) NS/EP Next Generation Networks (NGN), a technology insertion initiative to maintain and migrate legacy priority voice telecommunications features (GETS and WPS) and to apply priority to data applications as the PSN evolves to NGN.

Presidential Executive Order (EO) 13231, dated 16 October 2001, entitled *Critical Infrastructure Protection in the Information Age*, revalidates the original NS/EP telecommunications requirements and directs the NCS to support the use of telephony, converged information, voice, wireless, and next-generation networks for the NS/EP communications functions assigned to it under EO 12472. In support of this mission, the OMNCS ensures that a national communications architecture is developed which is: (1) responsive to the NS/EP needs of the President and Federal organizations, including communications in support of national security leadership and continuity of government; (2) capable of satisfying priority communication requirements under all circumstances through use of commercial, government, and privately owned communications resources; (3) consistent, to the maximum extent

practicable, with other national communications policies; and which (4) incorporates the necessary combination of hardiness, redundancy, mobility, connectivity, interoperability, restorability, and security to ensure the survivability of NS/EP communications under all circumstances.

In response to the President's Convergence Task Force and EO 13231, the NGN component was added to PTS. NGN is the response to the gradual migration of the public, circuit-switched telephony networks to Internet protocol (IP)-based packet infrastructure. The NCS is leading the effort to develop and implement priority treatment capabilities in the packet-network environment, similar to the priority treatment capabilities currently available in the circuit-switched PSTN. These efforts extend the GETS voice telephony features into the new infrastructure and take advantage of the high bandwidths offered by the next-generation networks to define additional session-based priority telecommunications services using the IP Multimedia Subsystem (IMS) communications architecture. Current priority telecommunications features and services will disappear as circuit-based segments of the networks are phased out, so the NGN NS/EP investment is needed to maintain current priority services and to eventually add priority data services to support NS/EP user requirements.

Through NS/EP enhancements to the Nation's telecommunications infrastructure, the NCS can effectively and economically address the COOP/COG needs while also providing a significant benefit of assured communications during NS/EP incidents to the broader national, state, local, and non-government NS/EP community. The NCS successfully leverages the commercially owned PSN, an extremely robust and survivable network, to provide PTS. The PSN and its commercially owned assets is valued (2004 estimate) at \$443,000,000,000, with an annual \$52,000,000,000 investment required for technology insertion, and an annual operating cost of \$154,000,000,000. The NCS was able to design, acquire, implement, maintain and enhance its PTS program at approximately \$100,000,000 per year by leveraging the PSN. PTS, by leveraging the PSN, helps to ensure the preparedness of the Nation to prevent, respond to, and recover from, threatened and actual domestic terrorist attacks, major disasters, and other emergencies in accordance with the National Response Plan, National Infrastructure Protection Plan, and is supportive of the National Incident Management System. The White House, DHS, and Congress recognized the successful performance of GETS/WPS during Hurricane Katrina response and recovery efforts. NS/EP PTS has, and will, continue to support NS/EP user's telecommunications requirements during disasters and crises.

### **Milestone/Schedules:**

#### FY 2007 Accomplishments

- WPS - Increased total WPS users to 46,500
- GETS - Increased total GETS cards to 155,000
- WPS - Added Sprint Nextel as a WPS Code Division Multiple Access enhancement (CDMA) carrier
- WPS - Completed deployment of next phased WPS CDMA enhancement in Verizon Wireless network
- Provided outreach to qualified NS/EP personnel
- NGN - Completed development of IP Multimedia Subsystem (IMS) Core NS/EP Industry Requirements (IR) necessary to migrate GETS/WPS functionality onto carriers' Next Generation Networks
- SRAS/NGN - Completed development of AT&T GETS/SRAS IP Common Backbone FOC (Segment 3) packet priority features

- NGN - Initiated standardization of IMS Core NS/EP features in the Alliance for Telecommunications Industry Solutions (ATIS), Internet Engineering Task Force (IETF), Third Generation Partnership Project (3GPP), Third Generation Partnership Project 2 (3GPP2), and International Telecommunication Union (ITU)
- NGN - Participated in the Global MSF Interoperability (GMI 2006) multi-national demonstration
- WPS - Initiated development of WPS CDMA Nortel/Motorola Interoperability Specification (IOS)
- GETS/SRAS/WPS - Provided GETS/SRAS/WPS operations, administration, maintenance, and provisioning (OAM&P) support to ensure service readiness, availability, and performance to meet the telecommunications needs of over 155,000 GETS and over 46,000 WPS NS/EP users, including senior leaders supporting Continuity of Operations (COOP) and Continuity of Government (COG), to coordinate response to, and recovery from, natural and man-made disasters
- GETS/SRAS/WPS – Continued outreach campaign through speaking engagements and PTS display booth deployments to increase awareness of NS/EP PTS to critical infrastructure sectors potentially impacted by evolving threats (i.e. health care services and public safety to combat potential avian influenza pandemic)

#### FY 2008 Planned Milestones

- WPS - Increase total WPS users to 55,800
- GETS - Increase total GETS cards to 170,500
- Please note that above totals reflect focused efforts to target specific user groups to sign up for GETS cards to respond to changing threat scenarios. Examples of previous focus efforts are as follows: 1) Health and Public safety sectors to respond to the potential avian influenza pandemic; 2) Critical infrastructure facilities that could be potential terrorist targets i.e., nuclear power plant operations centers and National/regional airport traffic control centers; and 3) Governors and state Emergency Operations Centers (EOCs) to respond to any national and/or regional disaster and/or crisis, 4) and Federal continuity personnel.
- WPS - Complete testing of final phased WPS CDMA enhancements in Verizon Wireless and Sprint Nextel networks
- SRAS/NS/EP NGN/GETS - Test and deploy GETS/SRAS (Segment 3) packet priority enhancements in AT&T's FOC IP Common Backbone network
- GETS/WPS - Provide outreach to qualified NS/EP personnel
- GETS/WPS - Host GETS/WPS Team Forum 2008
- NS/EP NGN - Proof of Concept Priority NS/EP NGN Video Teleconferencing Demonstrations to establish priority point-to-point video and multi-point video to include priority invocation and methods for user authentication and authorization
- NS/EP NGN - Develop GMI test scripts for NS/EP feature interoperability testing in carriers' NGNs
- NS/EP NGN/WPS - Test Universal Mobile Telecommunications System (UMTS) Directed Retry Handover in cellular Global System for Mobile Communications (GSM) WPS carriers
- NS/EP NGN - Complete standardization of IMS Core NS/EP features in the ATIS, IETF, 3GPP, 3GPP2, and ITU
- SRAS/NS/EP NGN - Initiate development of IMS Core NS/EP features for GETS/SRAS (including AT&T GETS/SRAS IP Common Backbone FOC (Segment 4) path priority features as well as IP features for Verizon Business and Sprint GETS/SRAS) and WPS

- NS/EP NGN - Initiate development of IP Multimedia Subsystem (IMS) Access NS/EP Industry Requirements (IR) necessary to migrate GETS/WPS functionality onto carriers' Next Generation Networks
- NS/EP NGN - Begin standardization of IMS Access NS/EP features in the ATIS, IETF, 3GPP, 3GPP2, and ITU
- WPS - Complete development of WPS CDMA Nortel/Motorola Interoperability Specification (IOS)
- NS/EP NGN - Develop Global Multi-Service Forum (MSF) Interoperability test scripts for NS/EP feature interoperability testing in carriers' NGNs
- GETS/SRAS/WPS - Continue to provide OAM&P support
- GETS/SRAS/WPS - Continue outreach

#### FY 2009 Planned Milestones

- GETS - Increase total GETS cards to 185,000
- GETS – Insure that 90% of the Executive Departments and Agencies' have GETS cards at their HQ and alternate operating facilities in support of COOP and COG requirements
- WPS - Increase total WPS users to 60,000
- WPS - Insure that 90% of the Executive Departments and Agencies' have WPS at their HQ and alternate operating facilities in support of COOP and COG requirements
- WPS - Begin deployment of WPS CDMA Nortel/Motorola Interoperability Specification (IOS) in Verizon Wireless and Sprint Nextel (CDMA) networks to eliminate the ~20% network cellular WPS coverage gaps
- NS/EP NGN - Begin standardization of Internet Protocol Multimedia Subsystem (IMS) Wireless Access NS/EP Industry Requirements (IR) necessary to migrate GETS/WPS functionality onto carriers' Next Generation Networks
- NS/EP NGN – Complete deployment of AT&T GETS/SRAS IP Common Backbone FOC (Segment 4) path priority capability
- NS/EP NGN – Begin development of AT&T GETS/SRAS IP Common Backbone FOC (Segment 5) route priority capability
- NS/EP NGN – Continue to prototype IP multimedia services
- NS/EP NGN – Continue to work NS/EP NGN standards
- NS/EP NGN - Complete standardization of IMS Core NS/EP Industry Requirements (IR)
- WPS - Provide 4th WPS Status Report to the FCC
- GETS/SRAS/WPS/NGN - Continue to update, as required, NS/EP PTS Program Plan
- GETS/SRAS/WPS - Continue to provide OAM&P GETS/SRAS/WPS - Continue outreach

## Programs to Study and Enhance Telecommunications (PSET):

### Modeling, Analysis and Technology Assessment

Modeling, Analysis and Technology Assessment conducts technical studies and analyses of public communications infrastructures to identify approaches to fulfill NS/EP communications objectives and support priority service programs. It provides the capability to model and analyze natural and man-made disruptions to the public switched network, perform vendor independent analyses, identify other critical infrastructures' dependence on telecommunications, and identify network effectiveness solutions. It also conducts technology assessments, such as prototype development to determine the effect of new technologies on priority services within the public networks.

### Milestone/Schedules:

#### FY 2007 Accomplishments

- Maintained and enhanced cyber and communications operational and programmatic modeling and analysis capabilities in support of priority services, cyber programs, operations (e.g., ESF-2, US-CERT), and the NS/EP telecommunications requirements of other NCS customers and member agencies
- Performed cyber and communications modeling and analysis in support of emerging requirements and threats, such as the impact of a Pandemic Influenza on the communications infrastructure
- Developed communications sector risk assessment methodology
- Provided technical assistance to the IT sector in the performance of infrastructure risk assessments

#### FY 2008 Planned Milestones

- Maintain and enhance cyber and communications operational and programmatic modeling and analysis capabilities in support of priority services, cyber programs, operations (e.g., ESF-2, US-CERT), and the NS/EP telecommunications requirements of other NCS customers and member agencies
- Perform cyber and communications modeling and analysis in support of emerging requirements and threats, such as the impact of a Pandemic Influenza on the communications infrastructure
- Operate and maintain accredited facility enabling coordinated operational analyses during crisis periods
- Refine communications sector risk analysis methodology
- Develop prototype capabilities, such as voice, data, and video to determine the impact of newly introduced public network technologies on the priority services mission

- Enhance priority services prototype capability by integrating IMS infrastructure technologies and components into prototype framework
- Participate in industry-related IMS testing activities and prototype demonstrations

#### FY 2009 Planned Milestones

- Maintain and enhance cyber and communications operational and programmatic modeling and analysis capabilities in support of priority services, cyber programs, operations (e.g., ESF-2, US-CERT), and the NS/EP telecommunications requirements of other NCS customers and member agencies
- Perform cyber and communications modeling and analysis in support of emerging requirements and threats
- Operate and maintain accredited facility enabling coordinated operational analyses during crisis periods
- Incorporate DoD analysis tools and datasets within the NCS coordinated modeling and analysis capability

#### NCS Standards Branch

Presidential Executive Order 12472 directs NCS to take into consideration the development of evolving industry consensus national and international standards with respect to NS/EP communications. The Office of Management and Budget's Circular A-119 calls for the Government to adapt the products of commercial/industry consensus standards committees for Government needs, and to participate in their development. The NCS NS/EP Standards Branch personnel work with a number of international communications industry consensus standards organizations to ensure that evolving communications commercial standards address the technical requirements of NS/EP communications.

Traditional NS/EP telecommunications services were designed around the circuit-switched infrastructure of the public switched telephone network (PSTN); however, public networks are now merging with packet-switched infrastructures and evolving into converged next generation networks (NGN). As this evolution continues to mature, priority telecommunications services will be guided by commercial standards stemming from technologies based on packet-switching, such as Internet Protocol (IP) based networks. Recognizing that IP and third generation and beyond wireless public networks have become increasingly vital during NS/EP events, the NCS Standards Branch primarily focuses on these two communications media by working proactively with industry in standards development organizations. The NS/EP standards efforts involve a two-pronged approach. The first is to integrate priority service requirements within the national and international standards bodies. Following from the requirements, the effort then involves work to develop standards-based technical capabilities to support NCS programs and missions.

Ongoing priority service standards development initiatives encompass prime functionalities of: signaling, access, management, transport, interoperability, mobility, and their associated architectures. Priority service standards work in support of NS/EP communications is being done under the term **Emergency Telecommunications Services (ETS)**.

The NS/EP Standards Branch provides direct support to the U.S. Department of State by Chairing the International Telecommunications Advisory Committee Study Group 'B' along with serving as senior Government advisors and leaders (e.g., head of delegations) to a variety of international and national meetings on communications. The NS/EP Standards Branch also takes North Atlantic Treaty

Organization (NATO) communications requirements and introduces them into the international standards process. In addition, branch members actively participate in the work of various commercial/industry consensus standards development organizations including:

- **Alliance for Telecommunications Industry Solutions (ATIS)** is the North American Regional Standards Development Organizations (RSDO) for communications standards.
- **Telecommunications Industry Association (TIA)** international engineering groups develop technical communications standards on voice, data, video, and other increasingly intermingled multimedia services seamlessly over single or multiple infrastructures and platforms and make appropriate recommendations or liaisons on the national and global technical implications and capability solutions for converging NGN communications networks, devices and services.
- **International Telecommunications Union, Telecommunication Sectors (ITU-T)** ensures an efficient and on-time production of high quality standards covering all fields of telecommunications. ITU-T Study Groups and focus groups are responsible for the architecture, evolution and convergence of next generation networks (NGN) including frameworks and functional architectures, signaling requirements for NGN, NGN project management coordination across study groups, and release planning, implementation scenarios and deployment models, network and service capabilities, interoperability, impact of IPv6, NGN mobility, IPCablecom, network convergence and public data network aspects.
- **Internet Engineering Task Force (IETF)** is an international community of network designers, operators, vendors, and researchers concerned with the evolution of the Internet architecture and the smooth operation of the Internet. Technical work is accomplished in over 120 working groups, which are organized by topic into several areas (e.g., routing, transport, security, etc). An IETF standard is the specification of a protocol, system behavior or procedure that is unique, and where the IETF has agreed to its introduction into the operation of the Internet. Modifications of IETF standards and the development of new IETF standards are required to achieve NS/EP priority services in an Internet environment.
- **TeleManagement Forum (TMF)** is an international organization that addresses the issues and challenges brought about by the convergence of communication services and media and broadcasting services. Traditional Telco's are no longer a communication service provider, but rather have evolved to provide "Communication and Entertainment" services. In their place, cable, Internet service providers (ISPs) and other media broadcasting service providers are looking into various ways to provide telecom services. Technologies like IPTV and IMS are driving this convergence at rapid pace.
- **Third Generation Partnership Project (3GPP)** develops specifications that govern all Global Services for Mobility (GSM) technologies (including General Packet Radio Service (GPRS) and high speed wireless data networks (EDGE). Modifications of existing 3GPP specifications and the development of new 3GPP specifications are required to achieve NS/EP priority services in a mobile environment.
- **Third Generation Partnership Project 2 (3GPP2)** was born out of the International Telecommunication Union's International Mobile Telecommunications initiative, covering high speed, broadband, and Internet Protocol (IP)-based mobile systems featuring network-to-network

interconnection, feature/service transparency, global roaming and seamless services independent of location. This is intended to bring high-quality mobile multimedia telecommunications to a worldwide mass market by achieving the goals of increasing the speed and ease of wireless communications, responding to the problems faced by the increased demand to pass data via telecommunications, and providing "anytime, anywhere" services.

- **Multi-Service Switching Form (MSF)** is a global association of service providers, system suppliers and test equipment vendors committed to developing and promoting open-architecture, multiservice NGNs. The MSF's activities include developing Implementation Agreements, promoting worldwide compatibility and interoperability of network elements, and encouraging input to appropriate national and international standards bodies.

An example of other international industry consensus standards development organizations that we monitor and participate on an as needed basis is the Institute of Electrical and Electronic Engineers, Inc., (IEEE). The IEEE provides a standards program that serves the global needs of industry, government, and the public. They are responsible for the protocol development and maintenance of the prominent 802.11® Standards for Local and Metropolitan Area Networks, Wireless and Wired.

The NCS offers a wide range of NS/EP communications services that support qualifying federal, state, and local government, industry, and non-profit organization personnel in performing their NS/EP missions, including the Government Emergency Telecommunications Service (GETS), Wireless Priority Service (WPS), Special Routing Arrangement Service (SRAS), and the Telecommunications Service Priority (TSP). These are all international standards based services implemented in the public infrastructure. As these services migrate to convergence, their functional requirements must be carried into the NGN. Because the priority telecommunications services provided by the NCS rely heavily on the public infrastructure, the NS/EP requirements included in Voluntary Consensus Standards (VCS) play an important role in fulfilling the Department of Homeland Security (DHS) National Protection and Programs Directorate's (NPPD), Cybersecurity and Communications (CS&C) NCS mission.

### **Current Standardization Work Program**

By addressing these topics as aligned with the established functional requirements in our work program we will progress the work in meeting the mission and focus of CS&C NCS and enable several NSTAC recommendations.

### **Milestone/Schedules:**

#### FY 2007 Accomplishments

- Eleven (11) international signaling standards developed by ITU-T Study Group 11 were amended in support of the International Emergency Preference Scheme
- Draft Recommendation E.107 – “Emergency Telecommunications Service (ETS) and interconnection framework for national implementations of ETS” developed by ITU-T Study Group 2 in the approval process
- Recommendations Y.2201 – “NGN Release 1 Requirements” and Y.2701- “Security Requirements for Release 1” developed by ITU-T Study Group 13 announced for approval
- Work with industry (ITU-T Study Group 4) to identify enhancements to and subsequently modify M.3350 – “TMN service management requirements for information interchange across

the TMN X-interface to support provisioning of Emergency Telecommunications Service (ETS)”

- Head delegations to ITU-T Study Group 11 and Study Group 19, Deputy Head of delegation to Study Group 13
- Worked with NATO counterparts to ensure that their Study Group 2 initiative to work on packet network support for the International Emergency Preference Scheme was accepted
- Attend ITU-T Study Group 15 as subject matter expert and as Head of the United States delegation. Working to ensure that the standards/recommendations being developed for access and fiber optic networks and take into account NS/EP requirements and concerns
- Attend ITU-T Study Group 16 as subject matter expert and as Head of the United States delegation. Working to ensure that the planned work on next generation multimedia services continue to support our NS/EP requirements

#### FY 2008 Planned Accomplishments

- ITU Study Group 13 (Lead Study Group for NGN) approve Release 2 - NGN Requirements and progress draft Recommendation NGN-Emergency Telecommunications will be completed in Jan 2008
- ITU Study Group 19 (Mobility) Progress ETS and Partnership Projects IMS access methods in conjunction with core Integrated Multimedia Sub-Systems (IMS) industry and Government requirements in transport mechanisms.
- Coordinate with NCSO on possible NCSO comments on draft ITU-T Study Group 17 Recommendation X.1205 - "Overview of Cybersecurity" is completed
- IETF (internet protocol management) Develop Request for Comments (RFCs) for requirements developed as a result of the IMS IR Process
- TeleManagement Forum: Develop Management Protocol for Emergency Services, Email Priority; and Quality-of-service Specifications (QSPEC) for Emergency Telecommunications Service
- Chair ITAC-T Study Group B meetings based on scheduled international meetings
- ITU-T Study Group 2 (Services), complete and publish E.107 Emergency Telecommunications Service (ETS) and Interconnection Framework for National Implementations of ETS, Progress E. TDR, Telecommunications for Disaster Relief is completed
- ITU-T Study Group 11 (Signaling), complete amendments to the Q. Series Recommendations for the International Emergency Preference Scheme (IEPS) (NATO requirements) is completed
- Study Group 9 (IP-Cablecom), Progress specifications for ETS in IP-Cablecom networks is completed

#### FY 2009 Planned Accomplishments

- ITU-T Study Group 2 (Services), Progress work on E. TDR, Telecommunications for Disaster Relief and stage the document for the approval process
- ITU-T Study Group 4 (Management), Finalize enhancements to M.3350 dealing with service management requirements in support of provisioning an emergency telecommunications service. Continue to influence the definition of management plane security and the associated security management system functional
- ITU-T Study Group 11 (Signaling), Introduce additional draft Recommendations for the International Emergency Preference Scheme (IEPS) in an IP Environment (NATO requirements)

- Chair ITAC-T Study Group B meetings based on scheduled international meetings
- Attend ITU-T Study Group 16 as subject matter expert and as Head of the United States delegation. Working to ensure that the planned work on next generation multimedia services continue to support our NS/EP requirements
- Attend ITU-T Study Group 15 as subject matter expert and as Head of the United States delegation. Working to ensure that the standards/recommendations being developed for access and fiber optic networks and take into account our NS/EP requirements and concerns
- IETF (internet protocol management) Develop Request for Comments (RFCs) for: SIP Resource Priority-based ReSerVation Protocol (RSVP) for Emergency Services, Email Priority; and Quality-of-service Specifications (QSPEC) for Emergency Telecommunications Service
- ATIS PTSC (Security and Signaling); Develop baseline NGN ETS security and signaling national requirements in the ATIS technical reports and standards.
- 3GPP2 (CDMA IMS), Progress ETS IMS requirements in Stage 2 Technical Requirements and Stage 3 Technical Specifications on Wireless Priority Service in CDMA networks
- 3GPP(GSM IMS), Security and Signaling in Stage 2 Technical Requirements and Stage 3 Technical Specifications on Wireless Priority Service in CDMA networks
- TIA TR 45.2 (CDMA Cellular) Ensure ETS requirements are included in wireless CDMA technical reports
- TeleManagement Forum (Management forum that develops input into ITU-T SG 4), Provide editorship for the developments of Service Level Agreements(SLA) based applications for ETS voice and video

#### Advanced Technologies/Converged Networks:

Advanced Technologies/Converged Networks provides an ongoing vulnerability assessment of new technologies to Telecommunication Electromagnetic Disruptive Effects (TEDE) and their impact on the infrastructure. In accordance with the Code of Federal Regulations (CFR) Title 47, Part 215, the NCS is the Federal Government focal point for EMP technical data and studies concerning telecommunications. This work includes: coordination and approval of TEDE tests and studies; communicating timely information to homeland security partners and the American public; developing mitigation techniques to prevent upset of telecommunications equipment from High-Altitude Electromagnetic Pulse (HEMP) attacks.

Additional work includes: identify and assess the vulnerabilities of satellite communications systems; coordinate with commercial vendors in conducting studies on physical vulnerabilities; develop plans to mitigate interference; lead and coordinate efforts across DHS to ensure that satellite capabilities required to prevent, protect, respond to and recover from acts of terrorism, natural disasters and other emergencies are available when needed.

#### Milestone/Schedules:

##### FY 2007 Accomplishments

- Final Report on “***Wireless Handset Vulnerabilities Report,***” which examined and documented current and evolving wireless handset technology vulnerabilities and identified possible impacts to NS/EP telecommunications priority services and included a set of mitigating strategy recommendations for wireless handset devices, was submitted to the NCS Advanced Technology Group (ATG) on 22 December 2006.

- The final report on ***“Survivability, Recovery, and Restoration Studies – US Telecommunications Network Performance in the 2005 Hurricane Season,”*** which analyzed how the telecommunications networks performed during both Hurricanes Katrina and Rita and provided recommendations for improvements, was delivered to the NCS ATG on 11 January 2007.
- The final report on ***“Survivability, Recovery, and Restoration Studies – Sensor Networks,”*** which examined the status of current sensor networks and proposed procedures for installation, maintenance, calibration, and use of sensors to achieve a robust sensor network architecture to support the gathering of Chemical, Biological, Radiological, Nuclear, and Explosive (CBRNE) threat information, was delivered to the NCS ATG on 11 January 2007.
- The final report on ***“Long Term NS/EP Communications Architecture,”*** which investigated emerging technologies and communications techniques how they can be applied to NS/EP communications, was delivered to the NCS ATG on 23 January 2007.
- The final report on ***“Satellite Communications Evolution,”*** which provided the NCS Advanced Technology Group (ATG) an increased understanding of satellite network technologies and services, expected trends and evolution, and their possible relevance to NS/EP services, was delivered to the NCS ATG on 23 January 2007.
- The final report on ***“Integration of Satellite and Terrestrial Wireless,”*** which investigated methods to better integrate satellite and terrestrial wireless networks to support NS/EP voice communications and describe how NS/EP users can establish priority communications across these technologies, was delivered to the NCS ATG on 29 January 2007.
- The final report on ***“Dedicated vs. Priority Satellite Access for NS/EP Communications,”*** which outlined the considerations for employing dedicated or priority satellite access for NS/EP communications, was delivered to the NCS ATG on 31 January 2007.
- A Technical Information Bulletin (TIB), entitled ***“Broadband Over Power Lines,”*** which examined the architecture and considered the possible benefits and concerns of Broadband over Power Lines (BPL) technology with respect to the NCS and the communications requirements for NS/EP, was delivered to the NCS ATG on 28 February 2007.
- A demonstration of an Emergency Communications Balloon, deployed to analyze as a potential alternate communication architecture to be included in a rapid recovery, emergency response system, was conducted on 3 May 2007. Existing communications technologies such as the police and fireman handheld radios, cellular instruments, citizens band radios, civilian ham radios [such as those used in the SHARED RESOURCES (SHARES) High Frequency (HF) network] were analyzed.
- Continue analysis in identifying vulnerabilities of fiber-optic telecommunications links due to secondary effects associated with X-ray illumination. The NCS ATG received from Los Alamos National Laboratory (LANL) a status report, entitled ***“Disruption of Fiber-Optic Telecommunications Links Due To Secondary Effects Associated With X-Ray Illumination,”*** dated 10 May 2007.
- A report initializing the evolution and execution of NS/EP plans, goals, and objectives by providing support for the research, analysis and program planning for the integration of Nuclear/Biological/Chemical (NBC) sensor networks and emergency notification communications technologies was submitted to the NCS ATG in July 2007. This effort will provide program management support through the development of the Red Cell communications concepts and the coordination of experiments and test scenarios with the NCS and DHS organizations as required.

- The final report detailing the results and recommendations of the Emergency Communications Balloon demonstration was submitted to the NCS ATG in July 2007.

#### FY 2008 Planned Milestones

- AFRL will submit to the NCS ATG monthly status reports, a draft and a final report on its findings and recommendations on the identification of vulnerabilities of Voice over Internet Protocol (VoIP) telecommunication systems and Wireless Priority Services (WPS) to Telecommunications Electromagnetic Disruptive Effects (TEDE). The final magazine article will be submitted to the NCS ATG 45 days after the final technical report is submitted.
- A Final report on ***“Disruption of Fiber-Optic Telecommunication Links Due To Secondary Effects Associated With X-Ray Illumination”*** is expected to be submitted by LANL to the NCS ATG by December 2007.
- Final report on ***“Undersea Cable Vulnerability and Risk Analysis,”*** which will examine the current status of undersea cables, identify vulnerabilities, postulate threat scenarios and propose mitigations to reduce risk, is expected to be submitted to the NCS ATG in March 2008.
- Final report on ***“Telecom-Power Dependencis,”*** which will examine the interdependencies of the telecommunications and power infrastructures, is expected to be submitted to the NCS ATG in March 2008.
- Final report on ***“Timing and Synchronization Analysis,”*** which will cover the vulnerabilities and possible risk mitigations of Global Positioning System (GPS) and other synchronization technologies that support wireless networks, is expected to be submitted to the NCS ATG in April 2008.
- Final report on ***“WiMAX,”*** or Worldwide Interoperability for Microwave Access, which will report on key activities and developments, describe the WiMAX technology and network capabilities, evaluate performance projections, identify vulnerabilities, and examine the need for additional priority capabilities, is expected to be submitted to the NCS ATG in April 2008.
- Final report on ***“Airborne Passenger Internet Network”***, which will analyze existing airborne networks, describe the services offered and technologies utilized, assess its security and use for commercial communications and for surveillance monitoring of airplane systems, is expected to be submitted to the NCS ATG in May 2008. Airborne Passenger Internet Network offers high-speed, real-time Internet access for email and web browsing applications via satellite communications utilizing a network of Geosynchronous Earth Orbit (GEO) satellite transponders.
- Transformation Communications Architecture (TCA) Integration and Final Security Review during the months of October and November, 2007. TCA focuses on Department of Defense (DoD), Intelligence Community (IC), Commercial and Civil satellite and terrestrial communications development in a synchronized fashion. The NCS ATG will investigate the potential leveraging of IC and DoD TCA systems should civil systems become interoperable or need to be supplemented during a major crisis. The NCS ATG will analyze current and Civil Space TCA programs, to include those used routinely or during special circumstances (i.e., natural disasters) by National Air and Space Administration (NASA), Department of Homeland Security (DHS), DoD, National Oceanic and Atmospheric Administration (NOAA), other federal, state, and local government organizations, as well as those civil assets used by the IC and DoD as a primary or backup source for communications. TCA Document distribution is expected between 1 December 2007 and 14 December 2007. An update on TCA will highlight new and emerging requirements from the IC and civil service communities. A report documenting the updated TCA will be submitted in the fourth quarter.

- Technical Information Bulletin (TIB) on “*NS/EP Mobility*,” which will identify key mobility issues for access to Internet Protocol (IP)-based Emergency Preparedness information and communications networks, is expected to be submitted to the NCS ATG, as required by the Task Monitor.
- TIB on “*Private Integrated Services Network (PISN)*,” which will examine the International Standards associated with the Private Integrated Services Network, is expected to be submitted to the NCS ATG, as required by the Task Monitor.
- Technical Note on “*SMS, MMS, and EMS Traffic Saturation*,” or “*Short Message Service, Multimedia Messaging Service, and Enhanced Messaging Service Traffic Saturation*,” which will examine the traffic loads due to the increased usage of SMS, MMS, and EMS services, are expected to be submitted to the NCS ATG, as required by the Task Monitor.
- TIB on “*Mobile Wireless Interface Stability*,” which will investigate whether wireless mobile units can be modified to control a cell’s uplink power level independently from base station control, is expected to be submitted to the NCS ATG, as required by the Task Monitor.

#### FY 2009 Planned Milestones

- 2009 TEDE Analysis to Communications Systems; bring the commercial satellite infrastructure into conformance with a standard for mitigating vulnerabilities. Quarterly reports will be submitted to the NCS, addressing mitigation strategies; report on existing airborne networks, describe the services offered and technologies utilized, assess its security and use for commercial communications and for surveillance monitoring of airplane systems; IP network convergence
- Receipt of monthly status reports, a draft, and a final report of the findings and recommendations on the identification of vulnerabilities of the Blackberry wireless handheld device as a result of TEDE.
- Examining potential vulnerabilities in the commercial satellite infrastructure and develop mitigation methods. Reports submitted at the end of the second and fourth quarters to the NCS ATG will highlight analysis of vulnerabilities and provide mitigation strategies.
- Investigate using Very Small Aperture Terminal (VSAT) technology and services as a replacement to the Alerting and Coordination Network (ACN) voice network. These investigations will be communicated in the form of briefings and demonstrations conducted by potential vendors. The NCS ATG will decide by 30 March 2011 which technology configuration and vendor will support this effort.

## Critical Infrastructure Protection Programs:

The **Critical Infrastructure Protection (CIP) Programs** are executed by the CIP Division of the NCS. They ensure the continued availability of national security and emergency preparedness (NS/EP) telecommunications services under all circumstances, including crisis or emergency, attack, recovery, and reconstitution. Initiatives include: operations and maintenance of the National Coordinating Center for Telecommunications; near real-time telecommunication analyses; COOP/COG planning and operational support; training and exercise of communications emergency response personnel; production and maintenance of operational procedures, policies and support tools; and management of a structured forum for Government and telecommunication industry collaboration on NS/EP telecommunications policies, procedures and issues.

This Sub-Program includes the following Activities:

- National Coordinating Center Operations
- CIP Operations, Plans, and Policy
- Training and Exercises
- Network Security Information Exchanges
- Telecommunications Service Priority

**National Coordinating Center (NCC) Operations** is a joint industry-government body that provides a mechanism to respond to NS/EP telecommunications incidents. The mission of the NCC is to assist in the initiation, coordination, restoration, and reconstitution of NS/EP telecommunications services or facilities under all conditions, crises, or emergencies. Government membership includes 23 Federal departments and agencies with significant national emergency responsibilities or critical telecommunications requirements. Industry members compose the Communications Information Sharing and Analysis Center (ISAC) and represent the country's wireline and wireless service providers, equipment vendors, internet service providers (ISP), satellite industry, and cable industry. The strength of the NCC lies in the trusted relationship between government and industry. This relationship is critical to the NCC in its role as the primary mechanism within the NCS for executing Emergency Support Function (ESF) #2 – Communications under the National Response Plan during an incident.

The NCC is governed by Executive Order 12472, which establishes a joint industry-government NCC; Homeland Security Presidential Directive (HSPD) 5, which directs the NCC to provide support to the

National Response Plan; and Section 706 of the Communications Act of 1934, which governs NCC engagement in COOP/COG activities.

**This activity consists of the following sub-activities:**

**NCC Watch** – This sub-activity serves as the operational arm of the NCS. The NCC Watch provides 24x7 situational awareness of the health of the telecommunications infrastructure and facilitates the initiation, coordination, restoration and reconstitution of NS/EP telecommunications services or facilities during emergency events. Senior level information assurance analysts located on site in the NCC Operations Center are closely integrated with the Government NCC operations staff and industry representatives from the NCC member companies. It enhances physical and cyber security of the Nation's critical communications infrastructures by facilitating cooperation, information sharing, and system-to-system interaction among the critical infrastructures and between the Government and the private sector. On a daily basis, the NCC Watch provides 24x7:

- Monitoring, through network owners and operators, the status of all essential communications facilities
- Consultation with private industry to exchange status information and develop coordinated action plans
- Assessing threats and vulnerabilities to NS/EP communications needs of the Federal Government.

**NCC Programmatic Support** – This sub-activity covers planning and preparedness activities in support of NS/EP. This includes internally focused activities for designing, developing, and implementing plans and operating procedures and addressing policy development and implementation. External activities focus on relationship building, information sharing, and operational planning and execution under the joint government/industry Communications ISAC and Government partners of NCS.

**The NCS HF Radio Program** – This sub-activity provides technical, administrative, operational, and readiness support to four emergency DHS/NCS HF radio operational activities: SHARed RESources (SHARES) HF Radio Program, NCC HF Radio Program (NCC-HF), the NCS Regional Managers HF Radio Program (NCS RM-HF), and the NCS Auxiliary HF Radio Program (NCS AUX-HF). These programs support a nationwide radio network of approximately 1,300 HF radio stations contributed by 98 Federal, state and industry organizations to form a nationwide emergency message-handling network. SHARES has made a significant contribution to NS/EP support in over 40 emergencies since it was formally established in 1989 and serves as a backup HF communications vehicle linking key Federal entities with the major telecommunications infrastructure service providers. It proved vital for ensuring communications in the early days of the Hurricane Katrina response. The NCS HF Radio Program supports the NCS mission of executing ESF #2 under the National Response Plan and is an essential tool supporting the NCC mission. At present, there is no functional equivalent to the NCS HF Radio Program that coordinates and interfaces with key Federal and industry radio entities.

**CIP Operations, Plans, and Policy** consists of the following sub-activities:

**Continuity of Operations (COOP)** - This sub-activity provides the development, maintenance, exercise and implementation of plans, policies and procedures that ensure the continued operation of essential NCS mission functions at alternate facilities should the primary NCS facility become uninhabitable for an extended period of time.

**National Level Planning** – This sub-activity supports the White House in developing, documenting, exercising, and implementing policies, plans and procedures for ensuring the survival of the Nation’s constitutional form of government and its ability to ensure the continuity of essential Federal functions under all conditions and hazards. This activity supports the President’s Telecommunications Advisor in carrying out their NS/EP telecommunications duties and responsibilities under all conditions.

**Operational Analysis** – This sub-activity supports the development, documentation, implementation and maintenance of policies, procedures, and capabilities to ensure conduct of comprehensive and accurate analytical assessments of the communications infrastructure in a relatively quick timeframe. This activity supports all phases of ESF #2 execution – from planning and preparedness, to full recovery of the telecommunications infrastructure.

To improve the ability to quickly and accurately provide critical telecommunications assessments during emergency response operations, this sub-activity has conducted a series of in-depth regional characterizations of the telecommunications infrastructure in high-risk areas (e.g. Washington D.C., Philadelphia, etc.). These characterizations significantly reduce the preliminary research and data gathering time normally associated with any analysis in the case of an event and assists in preparedness activities. During an incident, operational analysis models provide critical information to bridge the gap from when the incident occurs to when actual data becomes available post-event. When real-time data does begin to arrive, it is fed into the models to provide increasingly detailed situational awareness of impact to the communications infrastructure. The analytical products provided by this sub-activity are critical to both government decision makers and the telecommunications service providers working to restore communications in the disaster area.

**The NCS Training and Exercise Program** ensures that the NCS has a cadre of emergency response personnel who are prepared to respond across the spectrum of crises and emergencies. These personnel are organized in accordance with the ESF #2 Annex of the National Response Plan and are tasked to provide NS/EP communications during an incident or disaster. In response to the recommendations of the Hurricane Katrina After Action Report, the NCS is enhancing its readiness for emergency response operations with an increased tempo of training and exercises for the ESF #2 Emergency Communications Teams (National and Field). This activity includes the development of a computer-based, self-instruction training program that facilitates distance learning opportunities for the nationwide teams. The NCS participates in exercises involving scenarios as varied as continuity of operations, continuity of government, natural disasters, weapons of mass destruction, critical infrastructure protection, and cyber intrusion.

**Network Security Information Exchanges (NSIE)** consists of the following sub-activities:

**NSIE** – The NSIE consists of two bodies: the Government NSIE, which represents Federal agencies that have research, standards, regulatory, law enforcement, or intelligence functions related to the public switch network, or are major telecommunications users; and the President’s National Security Telecommunications Advisory Committee (NSTAC) NSIE, which includes representatives from telecommunications service providers, equipment vendors, systems integrators, and major users. This sub-activity provides technical and administrative support to both the NSTAC and Government NSIEs. The NSIE forum provides a trusted environment in which industry and Government representatives exchange information on threats to and vulnerabilities of the public network. These bodies meet jointly on a bimonthly basis to address major technical and operational issues affecting the security of

the public network, such as unauthorized penetration or manipulation of the public network software, databases, and other infrastructures supporting NS/EP telecommunications services. The NSIEs exchange ideas on technologies and techniques for addressing and mitigating the risks to the public network and its supporting infrastructures.

**ESF #2 Contingency Planning** – The National Response Plan designates the NCS as the Primary Agency for ESF #2. The 2005 Hurricane season demonstrated that traditional ESF resources and procedures were inadequate to address the emergency response needs of a catastrophic event the magnitude of Hurricane Katrina. Consequently, this sub-activity was initiated to revise policies, plans and procedures to address these deficiencies. Operational plans were revised to align more closely with the National Response Plan and clearly outline the coordination requirements and procedures at all levels (e.g., national, regional, local ESF entities, state/local government, private companies). This sub-activity continues to develop, implementation, and maintain ESF #2 plans, policies and procedures in the face of new legislation, changing DHS organizational structure, and lessons learned from ESF #2 activations.

**The Telecommunications Service Priority (TSP) Program**, established by a Federal Communications Commission (FCC) Report and Order 88-341, November 17, 1988, is the regulatory, administrative, and operational system authorizing and providing for priority treatment of NS/EP telecommunications services. The program provides NS/EP users with priority restoration and provisioning of telecommunications services that are vital to maintaining readiness or responding to an incident. As a result of hurricanes, floods, earthquakes, and other natural or man-made incidents, telecommunications service vendors may become overwhelmed with requests for new telecommunications services and requirements to restore existing telecommunications services. The TSP Program provides service vendors with an FCC mandate for prioritizing service requests by identifying those services critical to NS/EP. A telecommunications service with a TSP assignment is assured of receiving full attention by the service vendor before a non-TSP service. The TSP Program has two components: restoration and provisioning. A restoration priority is applied to telecommunications services to ensure restoration before any other services. A provisioning priority is obtained to facilitate priority installation of new telecommunications services.

Currently, over 860 federally sponsored organizations have over 141,000 active TSP assignments in support of NS/EP communications. This service directly increases the organizations' ability to recover from an incident or a disaster. The TSP Program also plays a critical role in emergency response when new telecommunications service must be provisioned to support response operations.

### **Milestone/Schedules:**

#### **FY 2007 Accomplishments**

- Continued to support NCS mission through enhancements to the NCC membership strategy, the conduct of semi-annual meetings including Communications ISAC and NCS government members, weekly NCC conference calls for resident and non-resident members and the maintenance of the 24X7 NCC Watch.
- Performed ESF #2 duties in support of emergency events and ensure readiness through semiannual ESF #2 training exercises.
- Developed, in coordination with the National Cyber Security Division (NCS), plans and procedures to further realize synergies between the highly interdependent communications and information technology sectors. Ensured that there is significant coordination between the

Communications ISAC and the IT ISAC. Develop joint procedures for NCS and NCC operations centers.

- Hosted discussions with representatives from the U.K. and Canada to share ideas and vet appropriate procedures aimed at decreasing vulnerabilities. Coordinate next generation network application ideas and issues with Canadian counterparts.
- Conducted and documented in-depth telecommunications assessments of high profile geographical areas.
- Developed and tested a methodology to conduct risk assessments on “high interest” telecommunications assets.
- Continued the development and orchestration of cross-sector discussions with other ISACs for the purpose of identifying interdependencies and cross-sector vulnerabilities.
- Participated in internal and interagency COOP and COG planning and exercises.
- Developed and disseminated the biannual Continuity of Operations Communications Plan (CCP) for the Federal Executive Branch Department and Agencies. This multifaceted plan provided essential contact and operational information for effective interoperable communications during emergencies that require the Federal Department and Agencies to operate from Emergency Relocation Facilities.
- Conducted and chaired the quarterly Continuity of Operations (COOP) Communications Working Group (CCPG). This working group provides a forum for the discussion and exchange of ideas for development of policies and procedures for effective interoperable communications.
- Continued development and refinement of operational plans and procedures that execute the ESF #2 duties specified in the NRP.
- Provide analytical support during emergency operations.
- Served as the focal point for state and local telecommunications data and analytical requests.
- Continued to pursue enhancements to the NCS Telecommunications analytical capabilities to include greater partnership and information sharing with Telecommunications Industry representatives.
- Conducted a Telecommunications Risk Assessment Pilot to validate a draft risk assessment methodology.
- Coordinated the establishment of an NCS certified Protective Critical Infrastructure Information (PCII) program to accept, maintain and protect PCII Industry submitted data consistent with DHS PCII Program office guidance.
- Participated in the National Cyber Response Coordination Group and the Internet Disruption Working Group.
- Conducted the ESF #2 Spring Training Conference (June 19-28, 2007) to familiarize all Emergency Communication Team personnel with the current ESF #2 operating procedures and apply the knowledge in a scenario-based hurricane exercise.
- Provided personnel to perform ESF #2 operations during national and regional exercises.
- Initiated an assessment of training media that can be used for distance-learning instruction.
- In collaboration with US-CERT and the IT ISAC, supported the integration of Telecommunications issues into the Cyber Storm Exercise series.
- In coordination with Priority Services, ensured the Telecommunications Service Priority Program (TSP) was supported through outreach efforts.
- Provided continued 18X7 on call support to process TSP restoration and provisioning support to NS/EP customers.

- Provided continued support to the Government and NSTAC NSIEs, comprised of Government and NSTAC telecommunications SMEs, to include: co-chair, SME representative, technical, logistical, executive, planning and managerial support for bimonthly joint meetings, ad hoc technical discussions, and coordination.
- Coordinated US NSIEs involvement in a trilateral NSIE meeting with the UK and Canada and co-chair.

#### FY 2008 Planned Milestones

- Continue to support NCS mission through enhancements to the NCC membership strategy, the conduct of semi-annual meetings including Communications ISAC and NCS government members, weekly NCC conference calls for resident and non-resident members and the maintenance of the 18X7 NCC Watch.
- Perform ESF #2 duties in support of emergency events and ensure readiness through planning and participation in training activities.
- Develop, in coordination with the National Cyber Security Division (NCSD), plans and procedures to further realize synergies between the highly interdependent communications and information technology sectors. Ensure that there is significant coordination between the Communications ISAC and the IT ISAC. Develop joint procedures for NCSD and NCC operations centers.
- Host discussions with representatives from the U.K., Canada and Mexico to share ideas and vet appropriate procedures aimed at decreasing vulnerabilities. Coordinate next generation network application ideas and issues with Canadian counterparts.
- Conduct and document in-depth telecommunications assessments of high profile geographical areas.
- Conduct risk assessments on “high interest” telecommunications assets.
- Continue the development and orchestration of cross-sector discussions with other ISACs for the purpose of identifying interdependencies and cross-sector vulnerabilities.
- Participate in internal and interagency COOP and COG planning and exercises.
- Continue development and dissemination of the biannual Continuity of Operations Communications Plan (CCP) for the Federal Executive Branch Department and Agencies. This multifaceted plan provides essential contact and operational information for effective interoperable communications during emergencies that require the Federal Department and Agencies to operate from Emergency Relocation Facilities.
- Continue to conduct and chair the quarterly Continuity of Operations (COOP) Communications Working Group (CCPG). This working group provides a forum for the discussion and exchange of ideas for development of policies and procedures for effective interoperable communications.
- Continue development and refinement of operational plans and procedures that execute the ESF #2 duties specified in the NRP.
- Provide analytical support during emergency operations.
- Serve as the focal point for state and local telecommunication data and analytical requests.
- Continue to pursue enhancements to the NCS Telecommunication analytical capabilities to include greater partnership and information sharing with Telecommunications Industry representatives; enhancement of data sets that provide greater insight into the operational components of the telecommunications infrastructure, and enhancement of analytical tools to provide quicker and more detailed analyses.

- Establish an NCS certified Protective Critical Infrastructure Information (PCII) program to accept, maintain and protect PCII Industry submitted data consistent with DHS PCII Program office guidance.
- Participate in the National Cyber Response Coordination Group and the Internet Disruption Working Group.
- Conduct the 2007 ESF #2 Winter Training Conference and the 2008 ESF #2 Spring Training Conference to familiarize all Emergency Communication Team personnel with the current operating procedures, communications technologies, and their application in a no-notice Incident of National Significance.
- Prepare personnel to perform ESF #2 operations during national and regional exercises.
- Continue development of distance-learning training materials with assistance from Subject Matter Experts and software developers.
- Evaluate, enhance and acquire deployable emergency telecommunications systems and services that meet emergency response requirements.
- Provide 18/7 watch capability to monitor events that could potentially affect the communications infrastructure.
- Continue the development of information sharing protocols with industry partners for sharing intel information.
- Enhance information sharing capabilities with other sector ISACs.
- Incorporate DHS HSIN capabilities into NCC watch functions.
- Target TSP outreach to state and local emergency response organizations – to include 911 community.
- Expand outreach efforts for Emergency Cellular protocol.
- Provide continued support to the Government and NSTAC NSIEs, comprised of Government and NSTAC telecommunications SMEs, to include: co-chair, SME representative, technical, logistical, executive, planning and managerial support for bimonthly joint meetings, ad hoc technical discussions, and coordination.
- Outline a plan to bring TITLE GLOBE, testing for COOP communications, down to the regional level.
- Expand the ESF-2 family of plans to incorporate specific actions for notice and no-notice events.

#### FY 2009 Planned Milestones

- NCC Watch: Provide 24x7x365 operations support to identify, analyze, mitigate and respond to threats and vulnerabilities to the nation's critical communication infrastructure.
- NCC Watch: Ensure operational readiness and validate information flow through participation in exercises such as Cyberstorm, TOPOFF, Pinnacle, Forward Challenge, NRP Exercises, and other COOP/COG readiness events.
- NCC Support: Provide annual review of existing internal NCC plans to support NS/EP activities; development of new internal plans based on identified requirements; and support external organizations in updating plans, such as the National Response Plan and National Incident Management System.
- NCC Support: Expand the NCC and Communications ISAC membership to keep pace with developing technologies and new entrants into communications sector.
- NCC Support: Improve information sharing and coordination between Government and ISAC members, increase ISAC members participation in NS/EP communications activities by

providing opportunities for ISAC members to be involved in various NS/EP training and exercise opportunities such as twice yearly NCC Industry Workshops.

- NCC Support: Foster sharing of threats and intelligence through maintenance of NCS HITRAC position and increasing the number of industry members with Top Secret/SCI clearances.
- SHARES: Ensure operational readiness through weekly net checks; planning and conduction of one annual nationwide SHARES exercise; Support ad-hoc exercises as appropriate.
- SHARES: Expand Radio Over IP network participation with deployment of Radio Over IP to (3) additional SHARES Control Station (SCS) sites.
- Update and maintain the NCS portion of the integrated NCS/NCS D COOP PLAN
- Update COG Communication plans, policies and procedures, as required.
- Provide administrative and technical support for bi-weekly meetings of the COG Communications Working Group.
- Update emergency response plans, policies and procedures to reflect After Action /Lessons Learned reports from previous events.
- Develop/update plans, policies and procedures to support ESF#2 operations with regard to the 15 National Planning Scenarios.
- Conduct Telecommunications vulnerability, impact and risk assessment analyses.
- Develop and implement a quantitative methodology to measure effectiveness of telecomm mitigation strategies.
- Coordinate interagency participation to conduct ESF #2 operations in national exercises (e.g., TOPOFF-5, PINNACLE-09, ARDENT SENTRY-series, etc).
- Coordinate ESF #2 participation in the NEW MADRID SEISMIC ZONE workshops and exercises.
- Continue sponsorship of the semi-annual ESF #2 Training Conferences (Dec 2008 and June 2009).
- Refine the design and use of the ESF #2 Skills and Training Database.
- Develop computer-based training for an ESF #2 program of instruction.
- Conduct six meetings and up to six special interest topic sessions.
- Produce at least 2 technical reports, issue papers, and/or briefings from topics discussed at meetings, (e.g. laptop vulnerability report, spyware issues, NGN security, law enforcement issues, etc).
- Produce a 2009 risk assessment of the threat to and vulnerability of the Public Network
- Fully developed system security program with full time ISSO.

\* FY 2008 Enacted in P.L. 110-161 included Industry-Government and Interagency Processes (IGIP) in the Priority Telecommunications Service (PTS) subtotal. The above FY 2008 Enacted is restated to exclude IGIP from PTS for comparison purposes to the FY 2009 request.

Industry-Government and Interagency Processes (IGIP) sustain joint industry-government NS/EP and CIP communications strategic planning and coordination. Specifically, this activity supports the NCS Committee of Principals chaired by the Under Secretary of Preparedness by direction of EO 12472; the President's National Security Telecommunications Advisory Committee (NSTAC) as directed by EO 12382, and the National Infrastructure Protection Plan and implementation activities as prescribed in HSPD-7.) Additionally this activity seeks and establishes partnerships and alliances with key industry and government entities associated with homeland defense and CIP to maximize NCS support to HLS; manages a strategic outreach and communications program to raise awareness about the NCS and its programs and activities; manages the NCS Issuance System; conducts analyses of the ever-changing technological and corporate environments of the communications industry and monitors governmental, legislative, regulatory, and political climates.

### **Milestone/Schedules:**

#### FY 2007 Accomplishments

- Provided continued support to the NCS Committee of Principals, to include: technical, logistical, executive, planning and managerial support in the identification, development, and analysis of NS/EP communications issues and recommended solutions.
- Maintained strong relations with the telecommunications industry and the NCS COP to facilitate joint planning, operational activities, and coordination of assessments, information sharing, and restoration and recovery of the critical telecommunications infrastructure.
- Provided continued support to the President's National Security Telecommunications Advisory Committee (NSTAC), comprised of up to 30 chief executives, which provides policy-based recommendations to the President regarding NS/EP communications.
- Issued an NCS COP report on the Telecommunications Service Priority program.
- Collaborated with the National Infrastructure Advisory Council (NIAC) and other industry and governmental bodies involved in continuity communications, critical infrastructure protection, and homeland security.
- Provided Secretariat support for the President's National Security Telecommunications Committee (NSTAC), including quarterly NSTAC Principal conference calls, an annual full-committee meeting, monthly Industry Executive Subcommittee meetings, and over 200 task force, working group, and ad hoc meetings.
- Conducted the NSTAC/Industry Executive Subcommittee Off-site to strengthen industry-government relationships.
- Completed task force work and issued NSTAC report and recommendations to the President on Global Infrastructure Resiliency.
- Completed task force study and issue NSTAC report and recommendations to the President on telecommunications and electric power interdependencies.
- Completed short-range and long-range study and issue NSTAC report and recommendations to the President on emergency communications and interoperability.
- Completed study and issue NSTAC report and recommendations to the President on international telecommunications issues.
- Submitted NSTAC membership analysis and recommendations for committee composition to the President.
- Supported NCS COP working groups to address emerging continuity communications matters and minimum essential functions and processes under all circumstances, including crisis or emergency, attack, recovery, and reconstitution.

- Continued to assist industry in analyzing convergence issues in Next Generation Networks with regard to NS/EP functional and user requirements.
- Continued to support industry and Government preparations regarding telecommunications for National Security Special Events (NSSE).
- Assisted in the implementation of the National Response Plan, particularly the Emergency Support Functions relating to Communications and Information Technology.
- Revised or establish NCS Issuances on NS/EP policies, programs, and procedures.
- Contribute to the implementation and management of activities of the National Infrastructure Protection Plan.
- As the Communications SSA, led the implementation of the Communications Sector Specific Plan in close coordination with the CSCC and GSCC
- Led the NCS Strategic Planning activities.

#### FY 2008 Planned Milestones

- Provide continued support to the NCS Committee of Principals, to include: technical, logistical, executive, planning and managerial support in the identification, development, and analysis of NS/EP communications issues and recommended solutions.
- Maintain strong relations with the telecommunications industry and the NCS COP to facilitate joint planning, operational activities, and coordination of assessments, information sharing, and restoration and recovery of the critical telecommunications infrastructure.
- Provide continued support to the President's National Security Telecommunications Advisory Committee (NSTAC), comprised of up to 30 chief executives, which provides policy-based recommendations to the President regarding NS/EP communications.
- Collaborate with the National Infrastructure Advisory Council (NIAC) and other industry and governmental bodies involved in continuity communications, critical infrastructure protection, and homeland security.
- Provide Secretariat Support for the President's National Security Telecommunications Advisory Committee (NSTAC), including quarterly NSTAC Principal conference calls, an annual full-committee meeting, monthly Industry Executive Subcommittee meetings, task force, working group, and ad hoc meetings.
- Conduct NSTAC/IES Research and Development Exchange.
- Coordinate Analysis of Industry Trends and Emerging Technologies.
- Submit NSTAC membership analysis and recommendations for committee composition to the President.
- Hold NSTAC Next Generation Networks (NGN) Subject Matter Experts (SME) Meeting.
- Support NCS COP working groups to address emerging continuity communications matters and minimum essential functions and processes under all circumstances, including crisis or emergency, attack, recovery, and reconstitution.
- Continue to assist industry in analyzing convergence issues in NGN with regard to NS/EP functional and user requirements.
- Continue to support industry and Government preparations regarding telecommunications for National Security Special Events (NSSE).
- Assist in the implementation of the National Response Plan, particularly the Emergency Support Functions relating to Communications and Information Technology.
- Revise or establish NCS Issuances on NS/EP policies, programs, and procedures.
- Contribute to the implementation and management of activities of the National Infrastructure Protection Plan.

- Continue to serve as the Sector Specific Agency for Communications in response to Homeland Security Presidential Directive 7; revise Sector Specific Plan as necessary.
- Lead the strategic planning for the National Communications System.

#### FY 2009 Planned Milestones

- Provide support to the NCS Committee of Principals, to include: technical, logistical, executive, planning and managerial support in the identification, development, and analysis of current NS/EP communications issues and recommended solutions.
- Maintain strong relations with the telecommunications industry and the NCS COP to facilitate joint planning, operational activities, and coordination of assessments, information sharing, and restoration and recovery of the critical telecommunications infrastructure.
- Update to MOAs with each of the 23 Federal members of the National Communications System as directed by NCS Directive 1-1.
- Maintain the NCS Committee of Principals' membership at the assistant secretary or equivalent level.
- Provide support to the President's National Security Telecommunications Advisory Committee (NSTAC), comprised of up to 30 chief executives, which provides policy-based recommendations to the President regarding NS/EP communications.
- Collaborate with the National Infrastructure Advisory Council (NIAC) and other industry and governmental bodies involved in continuity communications, critical infrastructure protection, and homeland security.
- Provide Secretariat Support for the President's National Security Telecommunications Committee (NSTAC), including quarterly NSTAC Principal conference calls, an annual full-committee meeting, monthly Industry Executive Subcommittee meetings, and task force, working group, and ad hoc meetings.
- Conduct annual NSTAC/IES Research and Development Exchange.
- Coordinate Analysis of Industry Trends and Emerging Technologies
- Submit NSTAC membership analysis and recommendations for committee composition to the President.
- Hold NSTAC NGN Subject Matter Experts (SME) Meeting.
- Support NCS COP working groups to address emerging continuity communications matters and minimum essential functions and processes under all circumstances, including crisis or emergency, attack, recovery, and reconstitution.
- Continue to assist industry in analyzing convergence issues in Next Generation Networks with regard to NS/EP functional and user requirements.
- Continue to support industry and Government preparations regarding telecommunications for NSSE.
- Assist in the implementation of the National Response Framework, particularly the Emergency Support Functions relating to Communications and Information Technology.
- Revise NCS Issuances on NS/EP policies, programs, and procedures as described by NCS Directive 1-1 as appropriate.
- Contribute to the implementation and management of activities of the National Infrastructure Protection Plan.
- Continue to serve as the Sector Specific Agency for Communications in response to Homeland Security Presidential Directive 7; revise Sector Specific Plan as necessary.
- Lead the strategic planning for the National Communications System.

\* FY 2008 Enacted in P.L. 110-161 included National Command and Coordination Capability (NCCC) in the Priority Telecommunications Service (PTS) subtotal. The above FY 2008 Enacted is restated to exclude NCCC from PTS for comparison purposes to the FY 2009 request.

The National Command and Coordination Capability (NCCC) is the means to provide the President and Vice President with the ability to respond deliberately and appropriately to any crisis. NCCC provides for the concurrent, nationwide, extension and integration of complex federal classified and sensitive but unclassified information and communications subsystems into an integrated national command, control and coordination system providing unique connectivity and situation awareness to federal, state and local authorities. The Secretary of Homeland Security is the Executive Agent of the NCCC and delegated the day-to-day operation of the NCCC to the Manager, National Communications System (NCS).

The NCCC will provide the means to unimpeded and timely flows of information across multiple operational systems across the Federal government. This approach to integration and coordination of these existing and anticipated systems will enable the efficient and reliable execution of national command, control and coordination functions, while maintaining appropriate levels of independence for specific processes and systems that are necessary for security and other reasons.

### FY 2007 Accomplishments

- Appointed a Director of the National Command and Coordination Capability, and finalized a Memorandum of Agreement with the Department of Defense to obtain a detailee to serve as Deputy Director.
- Began the stand-up and staffing of the NCCC Management Coordination Office (MCO) (i.e., acquired office space for the MCO, coordinated MCO Charter and awaiting final signature).
- Acquired secure mobile communication devices for 56 governors and 35 heads of agencies.

### FY 2008 Planned Milestones

- Deploy Initial Operating Capability (IOC) National Command and Coordination Capability (NCCC) services to key leadership, DHS sites and other NCCC locations.
- Conduct gap analysis and risk assessment of the current state NCCC against the desired capabilities.
- Complete final Privacy Impact Assessment, if necessary.
- Initiate DHS Investment Review Process.
- Conduct IOC System Definition Review and Critical Design Review.

### FY 2009 Planned Milestones

- Deploy IOC NCCC services to key leadership, DHS sites and other NCCC locations
- Monitor the progress of concurrent NCS 3-10 directive communication systems deployment at Federal Departments and Agencies, which will provide connectivity capabilities to the NCCC.

- Develop a full operational capability description.
- Begin FOC requirements definition.
- Compile and integrate lessons learned from exercise into NCCC operations.

| Salaries & Benefits       |                                    |     |         |         |     | \$0      | 0      | 0   | \$0      |
| Activity Costs            |                                    |     |         |         |     | \$34,500 |        |     | \$34,500 |
| TOTAL                     |                                    |     |         |         |     | \$34,500 |        |     | \$34,500 |

The National Protection and Programs Directorate requests \$34,500,000 for the Long Range Navigation (LORAN) in FY 2009. This is an increase of \$34,500,000 over FY 2008 and includes adjustments to base of \$34,500,000 for the transfer from the United States Coast Guard.

**CURRENT SERVICES DESCRIPTION:**

In FY 2008, the Department of Homeland Security was named Executive Agent for development of a national capability to backup critical systems used in position, navigation and timing. Enhanced LORAN (eLORAN) has been identified as a primary candidate to provide this backup capability. In FY 2009, the administration of the LORAN-C program will migrate to the National Protection and Programs Directorate of the Department of Homeland Security in preparation for termination of LORAN-C operations and subsequent conversion of the system to eLORAN. The Coast Guard is expected to continue operation of the system as appropriate on a reimbursable basis in 2009.

The FY 2009 budget transfers the current budget authority of \$34,500,000 for the LORAN-C system from the Coast Guard to the National Protection and Programs Directorate of the Department of Homeland Security. Reallocation of funds includes the costs of personnel and operations of all 24 Loran stations, the Loran Support Unit, and the Loran related costs at the Navigation Center, Training Center Petaluma, Engineering Logistics Center, and Loran Station Administration Control Commands.

Determination of a back-up capability for GPS is a national priority. The Department of Homeland Security is well positioned to develop this capability. Shift of financial responsibility and budgetary authority associated with the LORAN system from the Coast Guard to the Department will permit the Department to identify and fund the necessary upgrades to the system.

The National Protection and Programs Directorate requests \$38,300,000 and 42 FTE (47 FTP) for the Office of Emergency Communications in FY 2009. This is an increase of \$2,600,000 and ten positions over FY 2008 and includes adjustments to base of \$132,000 for pay inflation and \$2,468,000 for annualization of new personnel requested in FY 2008. Program dollars will be converted to salaries and benefits for 10 positions / 5 FTE in FY 2009.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Emergency Communications supports and promotes the ability of emergency response providers and Federal officials to continue to communicate in the event of natural disasters, acts of terrorism, or other man-made disasters, and to ensure, accelerate, and attain interoperable emergency communications nation-wide.

The Office of Emergency Communications executes its mission through four major projects:

**Office of the Director:**

Policy, Planning, and Analysis (PPA): Identifies and characterizes challenges confronting the advancement of interoperable emergency communications capabilities, and targets Federal grants, assistance and capability development efforts to address these challenges. Specific responsibilities include:

- Coordinating with relevant Federal agencies and Departments, State, local and tribal governments, emergency response providers and the private sector to establish national emergency communications policies;
- Coordinating and integrating information collected by the Federal and Multi-Jurisdictional Communications Services programs to provide an integrated national assessment of existing and emerging interoperable emergency communications challenges and vulnerabilities;
- Coordinating and developing a national plan that establishes objectives and methods to address emergency communications challenges and vulnerabilities;
- Periodically assessing and reporting on progress towards achieving national objectives concerning emergency communications and the effectiveness of methods to address these challenges and vulnerabilities;
- Coordinating the development of emergency communications requirements and grant guidelines to ensure Federal grant funding is optimally targeted against national emergency communications goals and objectives; and
- Developing Departmental emergency communications grant program guidance and evaluating progress achieved through these programs to ensure that Federal assistance is optimally targeted at addressing identified existing and emerging interoperable emergency communications challenges.

Multi-Jurisdictional Communications Services (MCS): Establishes and administers services delivered to advance State, local, tribal, and multi-jurisdictional interoperable emergency communications capabilities. Specific responsibilities include:

- Conducting outreach and consensus building activities with State, local, and tribal government officials and national practitioner organizations to exchange best-practice information and build consensus for common challenges, solutions, and objectives;
- Developing tools, information, and systems to foster the distribution and exchange of policy, technical, best-practice, and lessons-learned information among key interoperable emergency communications users;
- Coordinating, at a Regional level, the delivery and integration of Federal planning, training, and technical assistance to State, local, and tribal governments;
- Delivering planning, training, and technical assistance to enhance State, local, and tribal government interoperable emergency communications capabilities; and
- Conducting exercises and evaluations to determine the extent to which Federal services and assistance have advanced State, local and tribal government interoperable emergency communications capabilities.

Federal Communications Services (FCS): Establishes and administers services delivered to advance Federal interoperable emergency communications capabilities. Specific responsibilities include:

- Providing administrative and policy support to the Emergency Communications Preparedness Center, the interdepartmental organization established by Congress to serve as the focal point and clearinghouse for interagency efforts to advance interoperable emergency communications.
- Facilitating interagency technical collaboration and cooperation to advance the development and adoption of standards and common capability specifications, and to identify opportunities to advance Federal interoperable emergency communications capabilities through joint, interagency projects; and
- Conducting pilot or demonstration projects to evaluate the effectiveness and efficiency obtained through such opportunities, and to promote their adoption.

### FY 2007 Accomplishments

#### Office of Director:

- Appointed a Director of Emergency Communications who, in turn, has begin stand-up and staffing of the OEC while providing insight, guidance, and management for the Sufficiency of Resources Plan (SRP) and National Communications Baseline Assessment activities.
- Facilitated the transition of the following programs and responsibilities - in whole or in part, in accordance with Title XVIII of the Homeland Security Appropriations Act of 2002, as amended, ensuring that services were not disrupted or broken:
  - SAFECOM program—from Directorate for Science and Technology
  - Integrated Wireless Network program—from Under Secretary for Management/Office of the Chief Information Officer
  - Interoperable Communications Technical Assistance Program—from Directorate for Preparedness, Office of Grants and Training

#### Policy, Planning, and Analysis (PPA):

- Completed the SRP which documented the initial findings of the Department of Homeland Security (DHS) on the resources and staff deemed necessary to carry out fully the responsibilities identified in the 2007 Homeland Security Appropriations Act.

#### Multi-Jurisdictional Communications Services (MCS):

- Provided guidance and technical assistance to State, local and tribal governments to advance interoperable emergency communications; with particular emphasis on the development of the required Statewide Interoperable Communications Plans (SCIP) and Public Safety Interoperable Communications (PSIC) Grant Program Investment Justifications (IJs). 42 of 56 States and territories developed and submitted preliminary SCIPs by September 30, 2007.
- Developed guidance and tools to support State/Territory interoperable communication implementation and planning efforts.
- Conducted State/local/tribal outreach to foster the exchange of information relating to challenges to improving the survivability, sustainability, and interoperability of local emergency communications system.

#### Federal Communications Services (FCS):

- Developed the charter for the Emergency Communication Preparedness Center (ECPC) and established the administrative support functions required to facilitate interagency collaboration and the development of the first national strategic assessment.
- Facilitated the technical collaboration and cooperation on P25 standards and security protocols, and conducted interagency projects transferred from the Integrated Wireless Network program in accordance with project plans.

#### FY 2008 Planned Milestones

##### Policy, Planning, and Analysis (PPA):

- Submit and Complete Phase I & II of the National Emergency Communications Baseline Assessment after integrating information obtained from the SCIPs and previously unavailable data.
- Develop the National Emergency Communications Plan (NECP) in cooperation with other Federal agencies, State, local and tribal governments, emergency response providers and the private sector. The Plan will leverage the knowledge accumulated by past governmental and stakeholder efforts to characterize existing capabilities, current requirements, and anticipated technological advancement to establish short and long-term goals for ensuring and enhancing emergency communications nationwide.
- Develop grant guidance in collaboration with Office of Interoperability and Compatibility (OIC) and FEMA, for the Interoperable Emergency Communications Grant Program and other departmental programs for emergency communications, to ensure that grant selection criteria adequately reflects national emergency communications strategic and planning objectives.
- Establish and implement mechanisms to solicit, evaluate, and integrate input and feedback from all levels of government and the private sector into national emergency communications strategy formulation, planning, and measurement processes consistent with OEC's assessment, planning, regional integration and emergency communications grant program responsibilities.

#### Multi-Jurisdictional Communications Services (MCS):

- Deliver technical assistance to regional, Statewide, and urban area grant recipients with regards to interoperable communications.
- Facilitate the integration of available Federal and commercial emergency communications services and solutions into State, local, and tribal emergency plans and exercises.
- Review, evaluate, and provide feedback on preliminary SCIPs submitted in accordance with the Homeland Security Grant Program (HSGP) and the PSIC Grant Program.
- Update and deliver the annual SAFECOM Recommended Federal Interoperable Communications Grant Guidance document to help maximize the efficiency with which public safety communications related grant dollars are allocated and spent.
- Use the Communications Asset Survey and Mapping (CASM) database tool to provide technical assistance support to State and local Homeland Security grant recipients.
- Support the 2008 Golden Phoenix event.
- Support the 2010 Olympics Communications and Interoperable Working Group Committee.

#### Federal Communications Services (FCS):

- Complete ECPC deliberations and draft the first ECPC national strategic assessment.
- Identify and promote cross-governmental resource sharing through the implementation of interoperability and integration demonstration projects.
- Continue to influence technical and operational standards development through collaborative and inter and intra-governmental forums.
- Define user requirements toward the development of the NECP.
- Identify and implement immediate interoperability solutions in applicable high-risk areas.
- Leverage existing infrastructure and resources on the Southwest Border to promote sharing and enhanced interoperability where applicable.
- Establish, in coordination with internal and external stakeholders, a national asset inventory management database that facilitates incident response at the national level.
- Publish first Annual Report on accomplishments.

#### FY 2009 Planned Milestones

##### Policy, Planning, and Analysis (PPA):

- Complete 2nd Biennial National Emergency Communications Progress report on the state of interoperable emergency communications capabilities.
- Conduct an evaluation of IP-based emergency communications systems to better understand the advantages of such systems, and to anticipate and communicate vulnerabilities to ensure that these vulnerabilities can be avoided or appropriately mitigated.

##### Multi-Jurisdictional Communications Services (MCS) :

- Deliver Statewide and tactical technical assistance to State, local and tribal governments and emergency responder organizations.
- Update and deliver the annual SAFECOM Recommended Federal Interoperable Communications Grant Guidance to help maximize the efficiency with which public safety communications related grant dollars are allocated and spent.
- Support the 2010 Olympics Communications and Interoperable Working Group Committee.

##### Federal Communications Services (FCS):

- Complete the Annual Emergency Communications Preparedness Center Strategic Assessment.
- Establish and maintain a clearinghouse and knowledge base of emergency communications information.
- Evaluate feasibility of solutions implemented in interoperability demonstration projects.
- Complete two regional integrated exercises to evaluate interoperable emergency communications capabilities under more realistic circumstances and communicate the findings to participants (and to support preparation of the national progress report).
- Continue to influence technical and operational standards development through collaborative and inter and intra-governmental forums.
- Maintain and conduct one regional exercise utilizing the national asset management database.
- Using lessons learned from interoperability demonstration projects, implement solutions nationally.
- Coordinate with stakeholders to ensure NECP utilization is feasible in real time field operations.

#### Budget Crosswalk of FY 2008 Enacted Structure to the FY 2009 Congressional Justification Structure

In FY 2009, OEC requests a change in budget structure to better align appropriated resources with the Office's proposed operational model. Previously, as represented in the FY 2008 Enacted Budget Structure, OEC resource estimates were structured against proposed functional mission elements identified in Title XVIII. The Title XVIII Steering Committee and Working Group believed aligning resources in this structure would best show the inter-related responsibilities of all Federal organizations addressed in Title XVIII. However, now that OEC has stood itself up and is now in full operation, OEC believes that optimal mission success will be reached through a "stakeholder based" operating model instead of the structure based in Title XVIII. In this "stakeholder based" model, OEC managers are responsible for servicing clients (Federal, State, local, and tribal entities), instead of focusing on functionality. The following exhibit explains how OEC would like to re-distribute resources from the previous budget structure into the proposed structure for FY 2009.

Budget Crosswalk of FY 2008 Enacted to FY 2009 Congressional Justification<sup>1</sup>

| FY 2008 Enacted - FY 2009 PB Request Crosswalk                           |            |           |                      | FY 2009 PB REQUEST   |                      |

#### Description of Item

Mitigation programs utilize measures designed to prevent, deter, and mitigate threat to CIKR, and reduce and enable timely, efficient response and restoration in a post-event situation for all hazards. Mitigation programs are projects and activities, both voluntary and regulatory, which facilitate security partners to identify and mitigate vulnerabilities, implement protective measures, and increase preparedness for facilities, systems, and surrounding communities. They also support public awareness efforts and facilitate the sharing of CIKR protection-related best practices and lessons learned. Additionally, they enable IP planning, readiness and incident management capabilities. Mitigation Programs is divided into eight budget activities: Infrastructure Coordination and Incident Management, Contingency Planning, Readiness, Infrastructure Security Compliance Division, Protective Security Advisors, Cross Sector/Cross Cutting Mitigation Implementation, SSA Management, and Bombing Prevention.

#### Justification

Additional funding of \$10,827,000 and 45 FTE (90 positions) is required to appropriately staff regulatory requirements associated with the chemical sector, as well as to provide tools and systems to collect and analyze vulnerability information, review plans, support and manage inspections activity, issue decisions, address appeals, and support compliance enforcement. Specifically, additional positions will include inspectors, adjudicators, mission support staff, and specialized legal support.

The funds will help establish a permanent adjudications capability responsible for the evaluation and handling of all requests for relief, reconsideration, and appeals under the regulation. The increase also

will assist in the development and execution of an economic model to identify and validate the economic risks, chokepoints and bottlenecks in the chemical sector. During the initial phase, Economically Critical Chemical data will be collected through the screening process, but the capability to analyze and model that data for the purpose of tiering decisions will not yet exist. The requirement to identify chemicals that are of economic significance to the nation (e.g., a material essential to the continued operation of an economically important activity, such as power generation, water treatment, durable goods manufacture, etc.) informs tiering and evaluations of facilities against the risk based performance standards that underlie the program. The increase to this mission area will also assist in the design and implementation of a comprehensive case management system that links data collection tool, Site Security Plans, and Inspection/Audit reports for trends and analysis, periodic/annual reporting, and records management purposes.

An increase of \$1,370,000 will fund 10 new Protective Security Advisor (PSA) positions, as well as the requirements associated with field support and equipment. In 2004, the Department established the PSA Program, deploying a cadre of 68 critical infrastructure security specialists to 60 metropolitan areas across the United States to represent the Department at the Federal, State, territorial, local, and tribal levels. PSAs were deployed to provide a local perspective to the national CIKR risk picture and serve as DHS' on-site critical infrastructure and vulnerability assessment specialists, and as a vital channel of communication for officials and private sector owners and operators of CIKR assets seeking to communicate with DHS.

In addition to these more significant programmatic changes, \$660,000 additional funding is requested shifts of less than a million dollars each occurred within six activities within this mission area to better align resources with the fulfillment of DHS' critical infrastructure protection mission.

#### Impact on Performance

The Infrastructure Security Compliance project will acquire a permanent adjudications capability, responsible for the evaluation and handling of all requests for relief, reconsideration, and appeals under the regulation. Secondly, this program will develop and execute an economic model of the chemical sector to identify and validate the economic risks, chokepoints and bottlenecks in the chemical sector. Thirdly, funding at this level is needed to design and implement a comprehensive case management system that links data collection tools, Site Security Plans, and Inspection and Audit reports for trends and analysis, periodic and annual reporting, and records management purposes.

During contingencies, PSAs are often the first DHS personnel to respond to incidents and, therefore, are uniquely positioned to provide early situational awareness to DHS and IP leadership. Often, PSAs also serve as the Infrastructure Liaison at the JFO in support of the Principal Federal Official (PFO) during an incident. PSAs may also provide support to Area Field Offices within the JFO and State and local Emergency Operation Centers (EOCs) upon request and as needed. With the requested funding, the nation's PSAs will have access to important equipment to assist them in completing their coordination and communication requirements.

Description of Item

The United States Computer Emergency Readiness Team (US-CERT) has primary responsibility for the National Cyberspace Security Response System to prevent, detect, and respond to cyber incidents. US-CERT is a partnership between the Department of Homeland Security and the public and private sectors to protect the Nation's critical Internet infrastructure. Its key roles are to: 1) coordinate defense and responses to cyber attacks across the Nation's critical infrastructure; 2) analyze and reduce cyber threats and vulnerabilities; 3) disseminate cyber threat warning information; and 4) coordinate incident response activities. US-CERT supports a national mission to secure cyberspace but lacks the resources to address the emerging and evolving cyber threats facing America today.

US-CERT's FY 2008 Enacted budget included an additional \$115,000,000 submitted as a budget amendment to enhance the base funds of \$44,282,000. This \$115,000,000 increase for US-CERT's Cyber Initiative features a ramped-up intrusion detection capability, supports additional staffing, and upgrades Situational Awareness capability. This will greatly increase the detection of intrusions of .gov networks, complemented by increased resources for Incident Handling and Analysis. The FY 2009 request builds on and enhances programmatic activities established in FY 2008 in the areas of:

- Incident Handling;
- Analysis;
- Strategic Operations;
- Situational Awareness; and
- Production.

The FY 2009 request will enable US-CERT to continue its mission to protect the Nation's infrastructure against cyber attacks and to strengthen its emergency response capability. The

enhancement will permit the continued development, implementation, and operation of an upgraded cyber security program. It will enable US-CERT to expand its cyber security initiatives and maintain optimal performance in the face of an environment that presents new threats.

The requested resources include a program increase of \$79,896,000 that includes: \$3,398,000 for 23 FTE and 45 positions, and \$76,498,000 for program costs. The program costs encompass the following increases:

- Incident Handling - \$6,521,000;
- Analysis - \$11,521,000;
- Strategic Operations - \$10,000,000;
- Situational Analysis - \$48,014,000; and
- Production - \$442,000.

To achieve this vision, the US-CERT will take a series of integrated actions to close gaps and provide the needed capabilities. Key actions include the continuation and enhancement of the following programs:

### **1. Incident Handling:**

The US-CERT maintains a 24x7x365 incident handling capability that receives, identifies, correlates, triages, and responds to incidents impacting the Nation's critical assets. The Incident Handling Program addresses cyber security incidents that may pose a threat at the national level, and provides US-CERT the ability to detect and mitigate targeted attacks against the Federal Government. The Incident Handling Program coordinates the dissemination of cyber threat information via the National Cyber Alert System to warn Federal, state, and local governments and associated critical infrastructure components of viruses, vulnerabilities, attacks, malicious code, impending threats, and weaknesses.

The FY 2009 program increase of \$6,521,000 will provide for additional contractor personnel and the hardware and software necessary to complement the Trusted Internet Connections and Einstein activities discussed below under Situational Awareness.

### **2. Analysis:**

US-CERT's Analysis Program's objective is to correlate cyber threat data and disseminate actionable information. The Analysis Program continually strives to maintain an in-house capability to analyze various types of data to improve overall understanding of current or emerging cyber threats and to secure critical infrastructure and the Internet through timely analysis and production of actionable information to aid incident response efforts. The program consists of four components: Network Analysis, Malware Analysis, Critical Infrastructure, Digital Media Analysis, and Information Sharing and Analysis Center (ISAC) Partnership:

- Network Analysis - correlates network data (e.g., flow data) to identify emerging threats, ongoing trends, and intrusions that have already occurred. Network analysts work in a continuous feedback loop with all US-CERT constituents to identify and respond to cyber incidents.
- Malware Analysis - focuses on analyzing malicious code and other attack tools that seek to exploit vulnerabilities, presenting a real and present danger to the security of U.S. information

systems. Analysts use hardware/software technologies to analyze malicious code and vulnerabilities.

- Digital Media Analysis - works with compromised digital media.
- Critical Infrastructure and ISAC Partnership - reaches out to critical private sector entities to enhance operational relationships between US-CERT and those entities.

The FY 2009 program increase of \$11,521,000 will provide for additional mission support and hardware and software necessary to complement the Trusted Internet Connections and Einstein activities discussed below under Situational Awareness.

### **3. Strategic Operations:**

The Strategic Operations Program's mission is to build critical interagency information sharing and incident response collaboration. It supports the US-CERT's cyber incident response planning and coordination activities. The program's planning and coordination efforts have substantially increased the need for greater outreach and information sharing among public and private cyber security stakeholders. The expanding environment of cyber security requires broader and higher level planning to facilitate interagency information sharing for cyber readiness and response efforts. Enhanced coordination capacity is needed to plan effectively and implement fully integrated US-CERT responses to cyber incidents.

The success or failure of the Strategic Operations program depends significantly on how accurately the US-CERT security analysts judge the severity as security events emerge. The Strategic Operations Program maintains active partnerships with key organizations that can provide the necessary cyber security expertise to assist US-CERT personnel, and is comprised of two sub-programs: the Government Forum for Incident Response and Security Teams (GFIRST) and the Chief Information Security Officers (CISO) Forum.

The FY 2009 program increase of \$10,000,000 will provide \$5,000,000 funding for: cyber education and supply chain risk management.

Cyber Education & Expertise - \$5,000,000: In FY 2008, the project will outline a plan to baseline current cyber educational capabilities for civilian agencies, the Department of Defense and the Intelligence Community, academia, and industry. Requirements from other cyber initiatives will be identified and incorporated, and the desired cyber education end state will be identified. Also, a collective U.S. Government (USG) plan to strengthen and expand cyber educational and training programs will be developed. In FY 2009, the project will complete a cyber education and training program gap analysis; expand and improve Federal Cyber Service Programs; develop public/private training certification standards, accreditation, and performance testing; and identify desired cyber educational curriculum concepts, including K-12.

Supply Chain Risk Management - \$5,000,000: This project will develop a broad approach to address the risks stemming from the globalization of the commercial information and communications technologies (ITC) marketplace. Globalization increases the opportunities to penetrate the U.S. Government supply chain to gain unauthorized access to data; to alter data; or to interrupt communications. Risks stemming from the global ICT supply chain must be managed in a strategic

and comprehensive way over the entire life cycle of ICT products and services. In FY 2009, the project will implement acquisition policy, develop and implement life cycle acquisition processes and guidance, and examine mechanisms for utilizing supply chain risk information within Federal acquisitions.

#### **4. Situational Awareness:**

The objective of the Situational Awareness program is to identify, analyze, and comprehend broad network activity and to support incident handling and analysis of cyber security trends for Federal agencies so that they may increase their own situational awareness and reduce cyber threats and vulnerabilities. The FY 2008 Enacted provided funding for US-CERT's Situational Awareness program. The FY 2008 funding supports Einstein sensors, hardware, software, data storage, and mission support, and enables US-CERT to lead remote access defense across the Federal network enterprise. The FY 2009 request calls for programmatic increases to further expand these critical activities.

Situational Awareness consists of the following elements:

- Mission Operating Environment (MOE) – A collection of hardware and software that provides an operating platform that is sequestered from the Internet and supports US-CERT cyber security operations. The MOE provides US-CERT with the capability to conduct incident handling, analysis, and information sharing safely and securely without infecting computing infrastructure that supports DHS operations.
- Einstein – A collection of hardware and software that supports an automated process to collect, correlate, analyze, and share cyber security information across Federal government networks. Einstein collects data flows in real time from participating Federal agency Internet connections and provides an enhanced view and analysis of the health of critical cyber networks across the U.S. Government. The program provides a knowledge base for improving network security, resulting in increased resiliency of critical electronically delivered government services. Einstein has emerged as a successful program that partners with federal agencies to collect and analyze network flows. The program has expanded to additional agencies each year, but further growth and efficiency requires increased resources. The FY 2009 budget requests a program increase of \$42,914,000 to:
  - Continue deployment of additional and upgraded Einstein equipment to future sites;
  - Enhance data center capacity;
  - Expand a facility to house additional Government and mission support; and
  - Develop a new version of Einstein for the Front End System II.
- Trusted Internet Connections (TIC) – The TIC is an Office of Management and Budget initiative to optimize the U.S. Government's (USG) network services into a common solution. The role of US-CERT in the TIC is to enhance the USG's response capability to address potential problems by comprehensively deploying the Einstein system to all Federal departments and agencies. The TIC initiative will provide oversight and compliance of .gov internet access point aggregation and implementation of sound information security measures. The FY 2008 funding provides for contractor support and in-person and remote audit tools (software). With this increased capability, US-CERT will achieve a baseline of the .gov network configuration, that is, an understanding of key network characteristics and what security measures are in place. The FY

2009 program increase will provide an additional \$5,100,000 to advance this initiative by funding additional mission support, services, and necessary hardware and software.

In FY 2009, US-CERT will expand and enhance its Situational Awareness capabilities, capacity, and outreach to close current gaps and to serve a wider range of public and private sector stakeholders. To achieve this vision, the US-CERT will undertake the following actions:

- Expand the Einstein program to support Administration-wide involvement with an increase in site installations as appropriate.
- Expand Einstein next generation programs.
- Enhance the US-CERT Internet Health Service to give a greater synoptic view of the Nation's information infrastructure. Investment in vendor software licenses and other tools and applications will supplement Einstein threat data with vendor-supplied views of backbone traffic and health.
- Enhance US-CERT outreach efforts through the creation of "account managers" for our key national and international stakeholders. These positions will fill an existing gap in client support and will provide an advanced customer service capability that will allow major cyber stakeholders to gain a comprehensive view and awareness of the global information structure.
- Collaborate on the Federal Desktop Common Configuration Project (FDDP) to set up a secure desktop image for Windows XP/Vista that may be deployed across the Federal Government.
- Hire additional contractors and fund federal FTEs to support Einstein systems engineering, deployment, future tool development, and administrative support.
- Support planning and policy including globalization vulnerability assessment, National Response Framework, cyber reconstitution, international cooperation, and professional development.

## **5. Production:**

US-CERT serves as the Federal government's cornerstone for protecting the nation's Internet infrastructure by coordinating defense against and response to cyber attacks, and is charged with publishing alerts and notices to promote awareness and the network defense. The US-CERT Production Program plays a key role in accomplishing this mission by collaborating with both public and private sectors (Federal agencies, industry, the research community, state, local, and tribal governments, private citizens, etc.) to share and disseminate reasoned and actionable cyber security information. This information spans all levels of users in an effort to protect networks, information, assets, and critical infrastructures. The Production program delivers information through a variety of distribution mechanisms.

The requested \$442,000 program increase will enable the Production program to expand its ongoing activities concurrent with the enhanced Situational Awareness effort.

### Justification

US-CERT serves as the central point for addressing cyber security incidents within the Federal Government. Statistics show that malicious cyber intrusions are increasing dramatically each year. For example, in FY 2005, the total number of incidents and events handled by the US-CERT was 4,094. This increased to 23,986 in FY 2006 and 37,213 in FY 2007. The number of incidents

expected to be handled by US-CERT in FY 2008 and FY 2009 is likely to be much higher as a result of the increased Einstein deployments and the markedly increased Internet coverage. In brief, US-CERT will be positioned to detect many more intrusions that will need to be handled and analyzed.

To ensure that it has the ability to gather threat data and respond to Federal Government computer security incident, US-CERT needs real-time collection of data. In August 2007, the White House tasked US-CERT to develop an Einstein Deployment Plan that would roll out Einstein to all Government Cabinet-level agencies, while concurrently evolving the architecture to Einstein 'Next Generation'. The following outlines the programmatic justifications.

### **1. Incident Handling:**

The FY 2008 Enacted positioned US-CERT to fulfill its leadership role for the Federal community in securing America's cyber space. A major thrust was on the installation of Einstein sensors at additional Federal agencies and the development of Trusted Internet Connections. However, these efforts will succeed only if Incident Handling is provided with the requested resources in order to respond to the expected increased number of cyber incidents and to play a role that fully complements the activities of US-CERT's Situational Awareness Program. The requested FY 2009 funding of \$6,521,000 will provide the needed resources for Federal and mission support and associated hardware and software, and will build on the momentum established in FY 2008.

### **2. Analysis:**

US-CERT's Analysis Program presents the same situation described for Incident Handling. Again, it is imperative that the resources allocated for Analysis fully complement US-CERT's Situational Awareness and Incident Handling activities. The requested funding will provide the needed resources for mission support and associated hardware and software. The additional FY 2009 funding of \$11,521,000 will leverage the investments made in FY 2008 and define the Federal role for extending cybersecurity into critical infrastructure domains.

### **3. Strategic Operations:**

The \$10,000,000 program increase for Strategic Operations includes funding for:

- Cyber Education and Expertise - Presidential councils and committees have reported the need to educate and build a technologically-skilled workforce. Current cyber training and personnel development programs, while good, are limited in focus and lack unity of effort. Educating and building a skilled workforce will require implementing the recommendations of such groups as the National Infrastructure Advisory Council (NIAC), the President's Council of Advisors on Science and Technology (PCAST), and the National Security Telecommunications Advisory Committee (NSTAC).
- Supply Chain Risk Management - The globalization of the commercial information and communications technologies (ICT) marketplace increases the opportunities to penetrate the U.S. Government supply chain for unauthorized purposes. The risks stemming from the global ICT supply chain must be managed in a strategic and comprehensive way over the entire life cycle of ICT products and services. This project will implement acquisition policy, develop and implement life cycle acquisition processes and guidance, and examine mechanisms for utilizing supply chain risk information within Federal acquisitions.

#### **4. Situational Awareness:**

The Situational Awareness Program funding increase totals \$48,014,000. These expenditures will support the activities launched in FY 2008 and will be critical to their long-term success. The funding will provide for:

- Additional Einstein installations for Front End System I, as appropriate;
- An enhanced data center capacity; and
- A new version of the Einstein system for Front End System II.

The requested funding will support the requisite mission support to analyze network flow data and support data center functions, and to implement all aspects of the US-CERT program.

#### **5. Production:**

The Production Program funding increase is \$442,000. The program increase will enable Production to expand its activities, support the enhanced Situational Awareness effort, and continue the progress established in FY 2008.

##### Impact on Performance (Relationship of Increase to Strategic Goals)

For 2008, the Secretary of Homeland Security re-emphasized the Department's five overarching goals, including:

- #3: protect critical infrastructure
- #4: build a nimble, effective emergency response system and a culture of preparedness

The Secretary also declared four major areas of focus including cyber security.

The proposed investment is designed to directly support the Secretary's priorities and DHS goals. The increased resources will significantly enhance the protection of Federal government and private sector computer systems currently vulnerable to attack and failure. The investment will preclude or reduce the impacts of actual attacks, saving considerable costs to Federal, State and local agencies and private sector organizations and firms to restore operations. The investment will also protect the US Government, including DHS, which is seeking to serve as a model and leader for sound cyber security, from the loss of credibility and embarrassment that might result from successful attacks.

The investment will also result in a next generation upgrade and a quantum expansion of the Einstein program far beyond its current deployment, including deployment across the entire Federal government, to implement another OMB directive. US-CERT's Internet Health Service will gain a requisite synoptic view of the internet's backbone and its health. The end result of this new "early warning" capability will be a greatly improved ability to deliver advance warnings across the Federal government and to all other public and private stakeholders.

The investment will also result in major upgrades to the US-CERT Portal and its Secure Portal as information dissemination mechanisms for cyber security. This capacity fosters achievement to build awareness for a well-informed public-at home, the government and private enterprise, and internationally who understand our shared responsibility.

The proposed funding will yield a considerable return on investment in the form of cost savings from prevented cyber attacks and expedited responses to actual attacks. The U.S. public and private sector infrastructures will have enhanced survivability as a result of broad awareness, protection, and incident handling.

The following are performance metrics that are relevant in determining the effectiveness and efficiencies of the US-CERT Programs:

- Total number of cyber security communication and guidance products and services provided to stakeholders. The stakeholders who receive these products and services include Federal agencies; state, local and tribal governments; non-governmental organizations such as industry and academia; international entities; and individual users. NCSA has identified a need to facilitate outreach and engagement opportunities with Federal, public, private, and international entities. The satisfactory result of these actions will improve the security, resiliency and reliability of the Nation's infrastructure by enabling the sharing and development of assets that enable working collaboratively with public, private, and international entities to secure cyberspace and America's cyber assets.
- Another measure directly addresses the National Cyber Security Division (NCSA) mission of working collaboratively with public, private, and international entities to secure cyberspace and America's cyber assets. Specifically, US-CERT is responsible for analyzing and reducing cyber threats and vulnerabilities; disseminating cyber threat warning information; and coordinating incident response activities. US-CERT interacts with Federal agencies, industry, the research community, state and local governments, and others to disseminate reasoned and actionable cyber security information to the public.
- Total number of alerts, bulletins, security tips, and vulnerability notes disseminated to stakeholders for the purpose of communicating cyber warning information in support of coordinating defenses against and responses to cyber attacks.
- Level of beneficiaries' satisfaction with NCSA collaboration events, such as symposiums, cyber exercises and major forums. After collaboration events, voluntary feedback from beneficiaries on the program's performance is collected and evaluated. The overall goal is to continually improve upon the NCSA program's performance to ensure that the products and services delivered at collaboration events are relevant and useful for the program's targeted beneficiaries.
- Total numbers of targeted beneficiaries who receive these services include Federal agencies, state and local governments, non-governmental organizations such as industry and academia, and individual users. As the vast majority of the critical infrastructures of the U.S. are held by private entities, creating partnerships, developing relationships, and engaging users are essential aspects of NCSA's program.

Description of Item

The NCSO Control Systems Security Program (CSSP) directly supports the DHS priority to reduce America's vulnerability to terrorism and protect critical infrastructure. The NCSO CSSP is focused on a single goal of reducing the cyber risk to our Nation's critical infrastructure control systems. In support of that goal are two interdependent objectives; developing partnerships and providing guidance. The CSSP will accomplish its goal with a focus on coordinating government, industry and international efforts in addition to developing and implementing programs aimed at reducing the likelihood of success and severity of impact of a cyber attack against our Nation's critical infrastructure Supervisory Control and Data Acquisition (SCADA) or Industrial Control Systems (ICS).

The Strategic Operations program increase for FY 2009 includes \$5,751,000 for Control Systems. This increase will fund activities to maintain and update the Control Systems Security Framework that supports the Control System Security Program (CSSP) Self Assessment Tool and other control systems security requirements; sponsor government/industry workshops and the annual Process Control Systems Forum (PCSF) meeting/symposium to increase awareness and promote culture of security; develop control systems security informational products, tools and a baseline of control systems standards to enable promulgation of control systems security best practices; and assess three (3) commonly utilized control systems and provide solutions to vulnerabilities and recommendations to protect against cyber threats.

The increased funding will also support the Control Systems Cyber Security Self Assessment Tool (CS2SAT), which provides an approach to assessing the control systems cyber security posture of facilities and control systems/assets. This assessment assists critical infrastructure and key resources

(CI/KR) sectors and Federal departments and agencies in the development and implementation of their critical cyber and communications infrastructure protection risk management initiatives. The CS2SAT is flexible and applicable at varying levels of analysis while meeting the National Infrastructure Protection Plan (NIPP) requirements for cross-sector consistency.

### Justification

The NCSD CSSP was established in May 2004 and has engaged both public and private entities in a number of significant activities since its inception. Some of the significant activities initiated by NCSD CSSP include:

- Management of the Process Control System Forum (PCSF) as a unique forum to accelerate the design, development, and deployment of more secure control systems.
- Establishment of a Federal Control Systems Working Group and the drafting of a coordinating strategy for the Federal Government.
- Development, pilot testing and deployment of a control system cyber security self-assessment tool (CS2SAT) for critical infrastructure owners and operators.
- Organization and facilitation of monthly conference calls with vendors of predominant SCADA and control systems found throughout the nation which is attended by about 90% of all control systems vendors with a U.S. market share.
- Development and presentation of training videos and classes at workshops, conferences and other venues to educate the control systems community on the risk of control system cyber attacks and mitigation solutions.
- Establishment of a national capability in the US-CERT to receive, manage and respond to incidents and vulnerabilities that affect our nation's control systems.
- The development and validation of scenarios that illustrate little known vulnerabilities to our Nation's critical infrastructure.
- Development of a standardized catalog of control systems procurement specifications that can be used by any agency or business to ensure that security is built into systems before they are purchased
- The development of requirements for the research and development of future control systems.

The total of \$18,000,000 in FY 2009 will enable Control Systems to advance these vital initiatives and expand the much needed scenario identification, vulnerability assessment and mitigation, control systems security information, awareness, training, and tools to critical infrastructure owners and operators. The additional funding would allow for significant improvements in the current CSSP.

Areas where additional funding would improve the CSSP initiatives include:

- Identification and scoping of a new class of vulnerability that can potentially cause physical damage as a result of a cyber attack.
- Rapid ramp-up to identify vulnerabilities and develop mitigation strategies for control systems and critical infrastructure that are susceptible to attacks through the infrastructure itself.
- Solidify the source of funding and a solid foundation for the continued operation of the Process Control Systems Forum (PCSF) as the primary outreach mechanism for the NCSD CSSP.
- Expand coordination with other agencies and organizations involved in the security of control systems such as InfraGard and their initiative called SCADAGard.
- Production of national-level situational awareness information on the cyber status and health of the Nation's critical infrastructure control systems.

- Vulnerability assessments of additional control systems to provide industry owners and operators of the Nation's critical infrastructure with critical information on legacy and commercial off the shelf control systems component security weaknesses. This effort also provides control system vendors with important control systems security information they can use to patch or eliminate security holes within their products, resulting in more secure products and applications.
- Improved national-level control system incident handling and response and vulnerability management capability.
- Improved outreach and awareness efforts to emphasize the important role of protecting the cyber systems that monitor and control the industrial processes within the Nation's critical Infrastructure.
- Expand the content of CSSP web pages, under US-CERT, and promote the site as the one-stop-shop for control systems cyber security information, control system vulnerability reporting and cross-sector control systems information sharing.
- Expand the control systems malware analysis capability in coordination with US-CERT.
- Develop an outreach program to educate the intelligence community of early indicators and warnings for control systems so they can feed that information back through established intelligence channels for analysis.
- Expand the venue and class size for the second (and subsequent) International Advanced SCADA Security Training conference and offer to additional countries besides just the usual five (US, Canada, United Kingdom, Australia, and New Zealand).
- Expand the development, vetting and distribution of control systems cyber security best practices, standards, and guidelines.

Impact on Performance (Relationship of Increase to Strategic Goals):

The National Infrastructure Protection Plan (NIPP) meets the requirement that the President set forth in Homeland Security Presidential Directive 7 (HSPD7), which requires critical infrastructure identification, prioritization and protection. The NIPP addresses risks from a physical, human and cyber perspective. The NCSD CSSP primarily focuses on the cyber aspects of the nation's critical infrastructures. The NCSD CSSP is currently working on several specific tasks involving the identification and prioritization of critical national assets; however, the program is providing the most value in the protection of the nation's critical assets through the identification, analysis, and remediation of cyber vulnerabilities in control systems, which monitor and manage the nation's critical infrastructure physical processes. The NCSD CSSP is working directly with Federal Sector Specific Agencies (SSA) to assist them in ensuring critical control system assets are appropriately secured. A successful cyber attack against the systems that monitor and manage critical processes, such as electricity production, transmission, and distribution; natural gas and petroleum products processing and distribution; transportation monitoring and control; dam management; nuclear plant management; and chemical processing could result in significant physical and economic consequences.

In direct support of the DHS Strategic Goal to protect against and respond to threats and hazards, the NCSD CSSP works with and supports several DHS components to include the US-CERT, S&T, and IP in addition to almost all SSAs identified in the NIPP.

The first international conference on SCADA security was held with over 400 participants including many of the Nation's owners and operators. All have acknowledged that cyber security of control

systems must be addressed immediately from a national level to provide leadership, purpose, scope, and direction. The NCSO CSSP serves as the DHS focal point for this effort.

The CSSP has many integrated tasks with many government, industry, and academia in order to provide the information, training, awareness, and tools necessary to support their efforts in facing the security challenges to our Nation's critical infrastructure. By collaborating with other federal agencies, NCSO CSSP provides critical control systems cyber security input to complement their current initiatives. Should the requested funding amounts not be received and the CSSP have to reduce the level of activity for these ongoing initiatives, the loss of this integrated support would be felt immediately - not only within various components within DHS - but throughout the control systems stakeholder communities and the Federal government.

The increase being requested will allow the NCSO CSSP to fully meet its obligation as a leader to secure the control systems of our Nation's critical infrastructure and key resources. An increase to the program will provide for the expansion of vulnerability identification, testing, mitigation, support for malware analysis and common vulnerability evaluations, implementation of a Federal Control Systems Coordinating Strategy, expansion of control systems metrics to additional sectors, and next generation systems recommendations.

NCSO CSSP is fulfilling a leadership role, and there is a growing expectation by federal agencies, private industry, and internationally that the work will not just continue, but expand, to meet the need within the control systems community.

| <b>Total Request</b>   |                 |     | <b>\$14,080</b> | <b>4</b>        | <b>4</b> | <b>\$21,100</b> | <b>4</b>        | <b>4</b> | <b>\$56,000</b> |

\* FY 2008 Enacted in P.L. 110-161 listed Next Generation Networks (NGN) separately from the Priority Telecommunications Service (PTS) subtotal. The above program change reflects NGN separately from PTS as well.

**Description of Item**

The requested increase to the NGN Priority Services program is a necessary part of sustaining Priority Telecommunications services for the National Security and Emergency Preparedness (NS/EP) community. NGN Priority Services supports National Security Leadership and emergency responders by providing equivalent GETS and WPS voice priority communications as well as priority data and video teleconferencing capabilities during natural or man-made disasters or emergencies that cause congestion or outages in the Public Switched Telephone Network's (PSTN's) IP-based NGN.

Specifically, the \$34,900,000 increase will – 1) Keep pace with industry evolution by migrating legacy priority voice telecommunications features from public circuit-switched telephony networks to NGN IP-based packet infrastructures; and 2) allow for the design and development of priority broadband data services. The requested resources will allow the National Communications System (NCS) to focus on incorporating NS/EP priority telecommunications requirements into industry's emerging IP Multimedia Subsystem (IMS) communications architecture framework. The IMS provides the foundational platform for supporting all NGN telecommunications applications.

**Justification**

The IMS NGN Priority Service investment is spread among multiple carriers (e.g., AT&T, Verizon Business, and Sprint) and their vendors to obtain a survivable, robust, and ubiquitous priority telecommunications service that assures the ability of NS/EP users, including National Leadership, to communicate in an all-hazards environment. Current PSTN circuit-switched priority

telecommunications features and services will disappear as circuit-based segments of the networks transition to IP-based NGNs. The NS/EP NGN Priority Service investment is needed to maintain current priority services and to eventually add priority data services to support NS/EP user broadband requirements.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

With the increased level of funding for NGN Priority Services, NCS will provide GETS and WPS voice priority communications and add NS/EP data priority capabilities as the PSTN carriers migrate their networks to IP-based NGNs. Thus, critical infrastructures and key assets residing in locations served by IP-based NGNs will receive priority treatment when the IP-based NGNs become damaged and/or congested due to natural or man-made events.

Description of Item

**Program Management:** NPPD is standing up the NCCC Management Coordination Office (MCO) in FY 2008 to provide overall oversight and coordination of NCCC development and deployment. NCCC provides for the concurrent, nationwide, extension and integration of complex federal classified and sensitive but unclassified information and communications subsystems into an integrated national command, control and coordination system providing unique connectivity and situation awareness to federal, state and local authorities. As a consequence of the NCCC's scope, scale and criticality, the program employs the available technology and systems from across the Federal Government.

**Infrastructure Deployment:** Funds the acquisition and fielding of integrated NCCC Initial Operational Capabilities (IOC) to nationwide locations. The capabilities include (1) SECRET-level and sensitive-but-unclassified mobile voice and data communications capabilities to state and territorial governors and the heads of key federal departments and agencies and (2) integrated sensitive-but-unclassified and SECRET-level classified voice, video and data communications capabilities to state and territorial governors, Emergency Operations Centers, and selected state fusion centers.

This initiative will be consistent with NCS Directive 3-10, which requires federal departments and agencies to deploy unclassified and classified communications in support of continuity policy. Through the implementation of the NCS 3-10 directive, Federal departments and agencies will deploy capabilities that are interoperable with the NCCC, ensuring that connectivity exists between departments and agencies and state, territorial, and local entities that have NCCC deployed capabilities. NCCC tasks include equipment acquisition (e.g., site equipment and network infrastructure components, customized gateways/multipoint control units, and operating software), site

surveys, security accreditation and certification, system component engineering, network infrastructure and site-specific equipment deployment (i.e. encryption devices, voice, video and data equipment) and installation, and user training.

#### Justification

Recent natural and man-made disasters, as well as acts of terrorism, have demonstrated the need for shared situational awareness and coordinated decision making among Federal, State, tribal, insular, and local Principals, from the President to first responders. The President and other key Principals require an enhanced interoperable ability to effectively plan for and deliberately respond to a crisis.

The NCCC program will leverage existing capabilities and systems. It will identify gaps between current and end-state capabilities, assess how these systems can better connect and interact with each other, and, when necessary, deploy new capabilities accordingly to effectively and efficiently address the identified gaps.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

The impact on performance of the increase will include a significantly enhanced ability to timely process and share situational awareness and information among various levels of government during normal and crisis operations.

Description of Item

An additional ten Positions, 5 FTE are requested to enhance OEC State and local outreach efforts. No additional funding is requested, as required resources are currently contained within base and will convert non-pay base funds to cover additional personnel costs.

Justification

Title XVIII of the Department of Homeland Security Appropriations Act of 2002, as amended, established the Office of Emergency Communications (OEC) in FY 2007. In FY 2007, funding transferred from the following initiatives, either in part or as a whole:

- a. SAFECOM program—from Directorate for Science and Technology
- b. Integrated Wireless Network program—from Under Secretary for Management/Chief Information Officer
- c. Interoperable Communications Technical Assistance Program--from Directorate for Preparedness, Office of Grants and Training

Of these transferring initiatives, minimal federal personnel or FTP billets were identified. In the FY 2008 President's Budget, OEC identified the need for 37 positions to carryout the responsibilities of the transferring initiatives such as: delivering interoperable communications technical assistance to State, local, and tribal government; updating and coordinating common grant guidance; and, implementing the Integrated Wireless Network, without breaking current services. The additional 10 positions, 5 FTE requested in FY 2009 will facilitate State and local outreach efforts in accordance with OEC mission. No additional funding is requested, as required resources are currently contained within base and will convert non-pay base funds to cover additional personnel costs.

Impact on Performance:

The ten additional positions in FY 2009 will allow OEC to build upon the mission capabilities of the original 37 positions requested in FY 2008.

| <b>Total Request</b>   |                 |     |                 | <b>73</b>       | <b>73</b> | <b>\$69,522</b> | <b>83</b>       | <b>83</b> | <b>77,326</b>   |

Identification and Analysis consists of IP projects that support the capability to identify the nation’s CIKR, assess CIKR vulnerabilities and consequences, prioritize assets and systems, and analyze and reduce risk. These activities support IP’s capabilities to provide a comprehensive inventory of the Nation’s CIKR assets, and to collect the vulnerability and consequence information required to conduct and produce comprehensive asset and system risk analyses. It also supports CIKR protection strategic and tactical risk analysis, simulation and modeling, and intelligence fusion with information from practical field assessments to enable interdependencies and cascading effects analysis. Identification and Analysis is divided into three projects: Vulnerability Assessments, Infrastructure Sector Analysis and Infrastructure Information Collection and Visualization.

Justification

This programmatic decrease reflects changes within the base funding levels of activities within Identification and Analysis. Because of other mission priorities, there is a reduction of \$4,000,000 for the National Infrastructure Simulation and Analysis Center (NISAC) efforts.

There is a \$1,550,000 increase for IP’s Homeland Infrastructure Threat and Analysis Center (HITRAC), which is an operation jointly staffed by IP and the Office of Intelligence and Analysis. This enhancement will allow IP to expand its coordination with S&T to monitor Research and Development (R&D) projects, identifying those which allow IP and the entire CIKR community to meet its core mission, and to provide the vehicle for acquisition and implementation of those projects. This program change reflects IP’s continued commitment to the partnership with DHS Science and Technology Directorate (S&T) and other DHS components.

In addition to these programmatic changes, \$1,898,000 of base funding shifts of less than a million dollars each occurred within four activities in this mission area to better align scarce resources with the

fulfillment of DHS' critical infrastructure protection mission. This includes a program increase of \$780,000 for Vulnerability Assessments and \$1,118,000 for the Infrastructure Information Collection and Visualization Program.

Impact on Performance (Relationship of decrease to Strategic Goals)

The reduction of \$4,000,000 for NISAC will delay some lower priority modeling, simulation, and analysis products. While important to the overall analysis of interrelated sector priorities and assets, delaying these products will not impact the Department's modeling and analysis capabilities. The products will eventually be used to conduct gap analyses, predict the performance of CIKR under abnormal conditions (natural and man-made incidents), effects of interdependencies, and dynamics of their interconnections. Executing this decrement still leaves adequate funding to perform maintenance necessary to maintain existing modeling tools.

| <b>Total Request</b>   |                 |     |                 | <b>93</b>       | <b>93</b> | <b>\$68,821</b> | <b>83</b>       | <b>83</b> | <b>45,644</b>   |

Coordination and information sharing includes IP projects and activities that enhance situational awareness and maximize the ability of government and private sector CIKR security partners at all levels to assess risks, coordinate programs and processes, and execute risk-mitigation programs and activities. In support of security partner coordination, IP leads, integrates, and coordinates the execution of the NIPP, in part by acting as a central clearinghouse for the information sharing and coordination activities of the individual sector governance structures and facilitates the development and ongoing support of these security partner governance and coordination structures or models. Building security partnerships represents the foundation of the coordination and information sharing efforts and is divided into four projects: CIKR Information Sharing, NIPP Management, CIKR Partnerships, and Management, Planning, and Administration.

Justification

A reduction in resources of approximately \$15,484,000 for Coordination and Information Sharing is a result of shifting priorities and movement of resources. These programmatic changes will allow IP to more efficiently employ resources in carrying out its goals and objectives related to building stable and useful partnerships and better constructing and utilizing channels of information.

Within the CIKR Information Sharing budget activity, a reduction of \$1,206,000 is for the Critical Infrastructure Warning and Information Network (CWIN). This program change reflects a reduction in CWIN's helpdesk operations and other incremental changes.

Reductions to the National Infrastructure Protection Plan (NIPP) Management project of approximately \$10,000,000 reflects the shift away from reviewing and updating the NIPP on a triennial cycle. The reduction also reflects a change in concentration from all CIKR sectors to a focus on selected high risk sectors as identified in the National Annual Report. The NIPP Base Plan is

currently in place along with the supporting Sector Specific Plans. Together these plans provide a basis for future efforts to focus on the risk mitigation activities in selected high-risk sectors. This reflects a shift in priorities due to limited resources.

The movement of \$3,700,000 for the NIPP Sector Specific Agency (NIPP SSA) Support reflect a shift of funding out of NIPP Management to provide implementation support to the SSAs for NIPP program implementation and strategic planning for the current year.

The Management, Planning, and Administration reduction of approximately \$3,465,000 represents a programmatic change due to the realization of increased efficiencies in providing oversight to the organization's three mission areas—Identification and Analysis, Coordination and Information, and Mitigation Activities.

Impact on Performance (Relationship of decrease to Strategic Goals)

These programmatic changes will affect operational performance by forcing the helpdesk to operate on a reduced hour schedule. While some customers might be better served with a 24x7 CWIN Helpdesk, there is significant diminishing returns for each hour the Desk is operational during non-business hours.

Similarly, the NIPP Base Plan is currently being adopted throughout the Nation and within the 17 CIKR sectors to build a “web” of partnerships and protective measures to secure the homeland. Accordingly, resources are being directed to other aspects of the NIPP to support implementation.

Description of Item

The purpose of these funds was for a research and development grant to Dartmouth College and its entities the Institute for Information Infrastructure Protection (I3P) and Institute for Security Technology Studies (ISTS) to strengthen homeland security through research, education and outreach programs that focus on technology critical for cyber security and emergency preparedness and response. It also identified and addressed critical research problems in information infrastructure protection, built a community of researchers focused on infrastructure security, serve as a trusted partner for industry and government, fostered collaborative programs that build links between stove-piped constituencies, and provided a neutral forum for the exchange of ideas and information.

Justification

This program spans a three-year period beginning in FY 2006 and running through FY 2008 with appropriations executed in three corresponding grant periods; the final period is concluding in March 2009. The FY 2008 Enacted of \$8,340,000, in addition to available FY 2006 carryover and FY 2007 funds is sufficient to execute the final grant period; consequently, FY 2009 reflects a reduction against FY 2008. The conclusion of this program in FY 2008 brings to fruition a step within the overarching National Cyber Security Division plan. This program's accomplishments of research and development provide equity that progresses other programs. NCS D will provide \$2.25 million to support the I3P and ISTS in FY 2009.

Impact on Performance (Relationship of Decrease to Strategic Goals)

The reprioritization of funding that reduces the request for FY 2009 has been determined as unlikely to jeopardize the development of operational cyber security systems, techniques and procedures.

\* FY 2008 Enacted in P.L. 110-161 listed Next Generation Networks (NGN) separately from the Priority Telecommunications Service (PTS) subtotal. The above program change reflects PTS, not including NGN.

Description of Item

The National Communications System (NCS) budget includes a decrease of \$18,978,000. The Priority Telecommunications Program supports national security leadership and emergency responders by providing end-to-end nationwide priority communications capability during natural or man-made disasters or emergencies that cause congestion or outages in the Public Switched Telephone Network (PSTN).

Justification

The \$18,978,000 decrease reflects the maturity of the Wireless Priority Service program, which has completed the bulk of its investments and is now primarily focused on ongoing operations, administration, and maintenance of the Global System for Mobile Communications (GSM) and Code Division Multiple Access (CDMA) WPS programs and the associated 70,000 priority service users. The budget reduces funding for the Universal Mobile Telecommunications System (UMTS) technology platform, but this will not have an immediate impact upon NS/EP users as long as Global System for Mobile Communications (GSM) wireless service providers continue to provide GSM as an overlay on the UMTS networks. Additionally, the budget continues funding deployment of WPS enhancements for the CDMA WPS carriers' Interoperability Specification (IOS) markets, representing approximately 20% of all wireless markets.

Impact on Performance (Relationship of Decrease to Strategic Goals)

This reduction will not have an immediate impact upon WPS services as long as Global System for Mobile Communications (GSM) wireless service providers continue to provide GSM as an overlay on the UMTS networks. WPS will continue to operate within the GSM and CDMA markets.

Description of Item

The Programs to Study and Enhance Telecommunications (PSET) is decreasing by \$996,000. PSET is comprised of mandated NS/EP telecommunications programs and activities to support the planning for, and provision of, NS/EP communications for the Federal government under all circumstances, including crisis or emergency, attack, recovery and reconstitution.

Justification

This decrease reflects realignments to higher priority activities. The Modeling, Analysis and Technology Assessment (MATA) will continue to support its highest priority activities including Modeling and Analysis Capability Development, Modeling Studies and Prototype Development, Cable Studies, and Internet Modeling and Analysis Capabilities.

Impact on Performance (Relationship of Decrease to Strategic Goals)

MATA operations should not be severely impacted by the decrease and will be able to maintain current activity levels.

Description of Item

The decrease of \$4,947,000 includes a reduction for CapWIN, a one-time expenditure of \$6,100,00 in FY 2008, and an increase of \$1,153,000 that will allow the NCS to restore operations of the National Coordinating Center (NCC) Watch from 18x7x365 to 24x7x365 and conduct in-depth regional characterizations of telecommunications infrastructure in four additional high-risk areas.

Justification

The NCC Watch serves as the operational arm of the NCS by providing situational awareness of the health of the telecommunications infrastructure and facilitating the initiation, coordination, restoration and reconstitution of national security and emergency preparedness (NS/EP) telecommunications services or facilities during emergency events. Senior level information assurance analysts located on site in the NCC Watch are closely integrated with the Government NCC operations staff and industry representatives from the NCC member companies. The NCC Watch enhances physical and cyber security of the Nation's critical communications infrastructures by facilitating cooperation, information sharing, and system-to-system interaction among the critical infrastructures and between the Government and the private sector. On a daily basis, the NCC Watch provides:

- Monitoring, through network owners and operators, the status of all essential communications facilities
- Consultation with private industry to exchange status information and develop coordinated action plans
- Assessing threats and vulnerabilities to NS/EP communications needs of the Federal Government.

Regional characterizations of the telecommunications infrastructure in high-risk areas significantly reduce the preliminary research and data gathering time normally associated with any analysis in the case of an event and assist in preparedness activities. During an incident, operational analysis models provide critical information to bridge the gap from when the incident occurs to when actual data becomes available post-event. When real-time data does begin to arrive, it is fed into the models to provide increasingly detailed situational awareness of impact to the communications infrastructure. These are critical to both government decision makers and the telecommunications service providers working to restore communications in the disaster area.

#### Impact on Performance (Relationship of Decrease to Strategic Goals)

The NCC Watch operations and the regional characterizations support DHS Goal #3 – *Protect Critical Infrastructure*.

Funding the NCC Watch will:

- Increase readiness posture to effectively coordinate communications critical infrastructure protection information sharing among Government and industry partners to assist in the response to any incident impacting the communications infrastructure
- Increase proactive and reactive response functionality to avert or mitigate impact on the communications infrastructure by collecting, analyzing, and sharing information on threats, vulnerabilities, intrusions, and anomalies from the communications industry, Government, and other sources

Funding the regional characterizations will decrease the research and data gathering time required during incident response in areas where these characterizations have not been conducted. This will prevent delays in critical information reaching government decision makers and telecommunications service providers restoring communications in the disaster area. Furthermore, the additional funding will provide much-needed training opportunities for the Analysis Response Team (ART) to prepare for disaster support functions.

Description of Item

Industry-Government and Interagency Processes (IGIP) sustain joint industry-government NS/EP and CIP communications strategic planning and coordination. Specifically, this activity supports the NCS Committee of Principals chaired by the Under Secretary of NPPD by direction of EO 12472; the President's National Security Telecommunications Advisory Committee (NSTAC) as directed by EO 12382, and the National Infrastructure Protection Plan and implementation activities as prescribed in HSPD-7.)

Justification

This decrease of \$1,421,000 reduces NCS contractor support for Industry-Government and Interagency Processes. Due to a reprioritization of NCS responsibilities, activities in these mission areas will decrease and resources have been directed to other higher priority activities. Funding will provide support to NCS COP interagency information sharing and collaboration through working groups and 3 COP meetings.

Impact on Performance (Relationship of Decrease to Strategic Goals)

The reduced the request for FY 2009 is unlikely to jeopardize the Inter-Government or Interagency Processes operations.

**V. Exhibits and Other Supporting Materials**

**A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
National Protection and Programs Directorate  
Justification of Proposed Changes in Infrastructure Protection and Information Security  
Appropriation Language**

For necessary expenses for infrastructure protection and information security programs and activities, as authorized by title II of Homeland Security Act of 2002 (6 U.S.C. 121 et seq.), [\$654,730,000] **\$841,200,000**, of which [\$586,960,000] **\$754,151,000** shall remain available until September 30, [2009] **2010**. (Department of Homeland Security Appropriations Act, 2008.)

**Explanation of Changes:**

None requested.

**B. FY 2008 to FY 2009 Budget Change**

<sup>1</sup> FY 2007 Actuals include expenditures incurred for Biosurveillance, the program transferred to the Office of Health Affairs effective April 1, 2007. The Office of Emergency Communications, formed as a result of Title VI of the DHS 2007 Appropriation reflects only six months of expenditures.

**PPA Mission Statement**

The Office of Emergency Communications supports and promotes the ability of emergency response providers and federal officials to continue to communicate in the event of natural disasters, acts of terrorism, or other man-made disasters, and to ensure interoperable emergency communications nation-wide.

**Summary Justification and Explanation of Changes**

|                              | 2007<br>Actuals | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|------------------------------|-----------------|-----------------|-----------------|------------------------|
| <b>Salaries and Benefits</b> | \$0             | \$4,300         | \$7,690         | \$3,390                |

The FY 2009 request includes \$7,690,000 in salaries and benefits for 42 FTE. OEC received \$2,600,000 in additional salary consisting of \$132,000 for pay inflation and \$2,648,000 for annualization of new personnel requested in FY 2009. OEC will also transfer \$790,000 of mission funding to salaries and benefits to compensate for the five additional FTE OEC is requesting.

|               | 2007<br>Actuals | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **National Protection and Programs Directorate**

### **United States Visitor and Immigrant Status Indicator Technology**

#### **I. Appropriation Overview**

##### **A. Mission Statement for Appropriation Name:**

The mission of the Department of Homeland Security (DHS) United States Visitor and Immigrant Status Indicator Technology (US-VISIT) is to collect, maintain, and share information, including biometric identifiers, on foreign visitors to assist in determining whether an individual (1) should be prohibited from entering the United States; (2) can receive, extend, change, or adjust immigration status; (3) has overstayed or otherwise violated the terms of admission; (4) should be apprehended or detained for law enforcement action; or (5) needs special protection or attention (e.g., refugees).

US-VISIT has established four goals to accomplish its mission: (1) enhance the security of our citizens and visitors; (2) facilitate legitimate travel and trade; (3) ensure the integrity of our immigration system; and (4) protect the privacy of our visitors. US-VISIT is a key component of a multi-layered, multi-agency defense that is integral to domestic security.

US-VISIT satisfies legislative and departmental mandates. It contributes to DHS immigration and border management goals and provides American citizens and visitors with a more safe and facilitative border security and immigration process.

##### **B. Budget Activities:**

In FY 2008, US-VISIT requested resources for ongoing operations, including the implementation of initiatives and deployment of previously planned capabilities. With this budget justification, US-VISIT is enhancing descriptions of the budget activities to improve visibility into capabilities and results. The US-VISIT FY 2009 budget activities consist of: (1) Identity Management and Screening Services; (2) Unique Identity; (3) Comprehensive Exit; (4) Operations and Maintenance; and (5) Enhance Program Management.

Identity Management and Screening Services (US-VISIT Program Services – Data Integrity and Biometric Support in the FY 2007 Expenditure Plan) - As the DHS central point for providing identity management and screening services, US-VISIT handles a large workload, offering diverse services and providing timely responses to DHS for immigration and border management and international, Federal, State and local stakeholders. The US-VISIT biometric and biographic matching functions improve the capabilities to manage and screen against watch list records that include known or suspected terrorists (KSTs), persons of interest and immigration violators. These capabilities strengthen national security, Federal, State, local and tribal government collaboration and meet user needs. US-VISIT focuses on positively confirming biometric identity through the operation of the Automated Biometric Identification System (IDENT) supplemented with fingerprint analyses conducted by examiners in the Biometric Screening Center (BSC); utilization of the Arrival Departure Information System (ADIS) to enhance overstay identification through analysis conducted by the Data Integrity Group (DIG); and

coordination of law enforcement and intelligence operational activities to improve the accuracy and usefulness of US-VISIT data systems. Collectively, these services uniquely identify individuals and provide reliable information to US-VISIT operational customers.

Unique Identity - The Unique Identity initiative includes integrated work streams for developing 10 fingerprint capture (10-Print initiative) and achieving interoperability between IDENT and the Federal Bureau of Investigation's (FBI) Integrated Automated Identification System (IAFIS). The use of 10 prints facilitates travel by reducing the number of travelers sent to secondary processing, since the use of 10 prints provides more matchable data, thus reduces the likelihood of misidentifying a traveler as being on a US-VISIT watch list. Additionally, the opportunities to identify persons of interest increase as 10 prints are more likely to be matched to latent fingerprints collected from crime scenes or terrorist locations and maintained in criminal and intelligence biometric data stores. Interoperability enlarges the biometric database used by border management, intelligence and law enforcement agencies. In conjunction with the 10-Print initiative, enhanced data sharing through interoperability increases the probability of identifying persons of interest and enhances law enforcement actions.

Comprehensive Biometric Exit - The Comprehensive Biometric Exit initiative includes the initiation, development and implementation of a comprehensive solution to capture biometric information from in-scope travelers as they exit the United States. This initiative supports the Intelligence Reform Act of 2004, and enhances the integrity of the immigration system. US-VISIT previously deployed capabilities to capture traveler biometric information (inkless fingerscans and digital photographs) during entry. Deployment of a comprehensive biometric exit solution enables the matching of exit records to entry records using biometric data to determine which travelers have left the country based on their biometric data. This capability provides several benefits. First, the use of biometrics confirms the identity of the person leaving the country, indicating the traveler's compliance with immigration laws and addressing the use of multiple identities, which is more probable when only biographic information is used. Second, it maximizes investigative resources by preventing searching for travelers who have already left the country. Furthermore, at a policy level, this capability provides the ability to identify overstays by country and visa category to inform decision makers on overall compliance with and effectiveness of immigration laws. Identification of overstays assists DHS in the determination of the extension or denial of Visa Waiver Program (VWP) privileges to countries.

US-VISIT has proposed an incremental deployment of biometric exit capabilities into the three port of entry (POE) environments – air, sea, and land – with an initial focus on commercial air and sea departures, since this represents the largest volume of travelers from countries of interest. This solution will leverage lessons learned from the earlier Air and Sea Exit pilot that highlighted the need to integrate the capture of biometrics into the traveler departure processes in order to maximize compliance. The earlier Air and Sea Exit pilot demonstrated improved matching of entry and exit records through the use of biometrics. The deployment of a comprehensive biometric exit solution will extend these benefits to all locations.

Operations and Maintenance (O&M) - US-VISIT provides the information technology (IT) support that enables identity verification and screening services and supports the enhancement and development of new capabilities. O&M includes systems operations and maintenance, development of IT architecture and platforms for user and program interfaces, data center operations support and services, integration and support for network and data communications, and technical IT support services.

US-VISIT O&M includes major IDENT IT components that include more than 500 services supporting 300 operating elements. Additionally, IDENT has more than 91 highly specialized fingerprint matchers and 31 terabytes of storage with a growth rate of two terabytes per month. IT support for US-VISIT spans four sites with dozens of servers, network components and related applications and services.

Enhance Program Management - US-VISIT provides mission support functions to ensure that the appropriate planning activities, human capital, budget and financial resources, technical support, acquisition policies and procedures and facilities and logistics support are in place to effectively execute its mission. These critical functions directly support overall program direction and control. In addition, the Program Management function provides staffing to all US-VISIT activities. Staffing constitutes a major expenditure, comprising all Federal staff and contractor work. These staff resources are directly involved in mission accomplishment including capability development, identity services, and operations and maintenance, as well as program management staffing.

**Legislative and Administrative Mandates** - In addition to providing numerous benefits to DHS, Department of State (DOS), and Department of Justice (DOJ), US-VISIT's budget request also provides resources to ensure DHS can meet the following legislative mandates:

*The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA)*, Pub. L. 104-208, requires the development of an automated entry and exit control system to collect records of departure and to match them with records of arrival.

*The Immigration and Naturalization Service Data Management Improvement Act of 2000 (DMIA)*, Pub. L. 106-215, amends IIRIRA to require that the entry and exit data system integrate all "authorized or required" alien arrival and departure data; use available data to match an alien's arrival and departure; assist the Attorney General (now the Secretary of Homeland Security) and the Secretary of State to identify lawfully admitted non-immigrants who have overstayed their period of admission; use available data to produce a report of arriving and departing aliens by nationality, classification as an immigrant or non-immigrant, dates of arrival in, and departure from the United States; and be implemented at all air and sea ports of entry by December 31, 2003; at all air and sea ports and the 50 land border ports serving the highest numbers of aliens by December 31, 2004; and at all POEs by December 31, 2005.

*The Visa Waiver Permanent Program Act of 2000 (VWPPA)*, Pub. L. 106-396, requires that the entry and exit data system contain records of arrival and departure of every alien admitted under VWP who arrives and departs by air or sea; contain sufficient data to permit the Attorney General (now the Secretary of Homeland Security), for each fiscal year, to calculate the percentage of each VWP country's nationals who are admitted under the VWP and for whom no departure record exists; use available data to produce a detailed annual report to Congress by December 31 of each year containing numbers of departing aliens with their nationalities, successful arrival/departure matches, classifications by immigrant or non-immigrant; VWP and other immigrants for whom no departure data is available at the end of the alien's authorized period of stay, among other specific information; and record arrivals and departures of every VWP alien transiting through air and sea ports by October 1, 2001.

*The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act*, Pub. L. 107-56, requires that the entry and exit data system be implemented with all deliberate speed and as expeditiously as practicable, particularly focus on using biometrics and tamper-resistant documents, and be able to interface with law enforcement databases for use by Federal law enforcement to identify and detain individuals who are threats to national security.

*The Enhanced Border Security and Visa Entry Reform Act of 2002 (EBSVERA)*, Pub. L. 107-173, requires that the entry and exit data system use technology and biometric standards to be developed by the National Institute of Standards and Technology (NIST), in consultation with other agencies, for alien identification and other purposes; be accessible at ports of entry and overseas consular posts; consist of equipment and software to allow biometric comparison and authentication of all U.S. visas, other travel and entry documents issued to aliens, and the machine-readable, biometric passports required to be issued to nationals of VWP countries at all ports of entry by October 26, 2004 (later extended to October 26, 2005); have database(s) containing alien arrival and departure data from machine-readable visas, passports, and other travel and entry documents; use technologies that facilitate lawful and efficient cross-border movement of commerce and persons without compromising the safety and security of the United States; and be integrated into the new and broader Immigration and Naturalization Data System that fully integrates all the former Immigration and Naturalization Service (INS) databases and data systems that process or contain alien information.

*The Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA)*, Pub. L. 108-458, Section 7208, specifically addresses biometric entry and exit and calls for the Secretary of Homeland Security to accelerate the full implementation of US-VISIT.

| <b>Initial Capability</b>                | <b>What Has Been Done?</b>   | <b>Where Are The Statutory Obligations These Capabilities Respond to?</b> |
|--|--|---|
| <i>Record Entry and Exit Information</i> | <ul style="list-style-type: none"> <li>• Implemented requirement for air and sea carriers to provide advanced passenger manifest data for all travelers.</li> <li>• Deployed system for collecting existing entry and exit information and new biometric information. (December 31, 2003)</li> <li>• Deployed system for collection of biometrics on entry at 115 air and 14 sea ports of entry. (January 5, 2004)</li> <li>• Deployed system to 50 busiest land ports for collecting existing entry and exit information and new biometric information. (December 31, 2004)</li> <li>• Expanded biometric collection population to include VWP travelers at all locations where biometric collection deployed.</li> <li>• Deployed system to remaining 104 POEs for collecting existing entry and exit information. (December 31, 2005)</li> <li>• Expanded populations from which biometrics are collected including Lawful Permanent Residents.</li> <li>• Implementing requirement for air and sea carriers to provide departure information.</li> </ul> | DMIA, EBSVERA, USA PATRIOT Act, VWPPA, and IRTPA                          |
| <i>Validate Identity</i>                 | <ul style="list-style-type: none"> <li>• Used biometric standard (facial image and fingerprints) developed by DHS and DOS (in consultation with NIST) to establish alien identity at consular offices and POEs.</li> </ul>   | EBSVERA and USA PATRIOT Act   |

|                    | compliance rates. <ul style="list-style-type: none"> <li>• Produces report on entry and exit of aliens.</li> </ul> |  |

**C. Budget Request Summary:**

Excluding emergency funding provided in Pub. L. 110-161, US-VISIT requests 150 full-time positions (FTPs), 119 full-time equivalents (FTEs), and \$390,300,000 for FY 2009 including an increase in FTPs and FTEs. Excluding emergency funding provided in Pub. L. 110-161, the total adjustments-to-base are zero FTEs and \$47,509,000. The net program change is an \$84,700,000 decrease.

**Adjustments-to-Base:**

- *Annualization of 2008 Pay Raise* – (0 positions, 0 FTEs, and \$145,000 increase). Salaries and benefits for FY 2008 include 102 FTEs.
- *2009 Pay Increase* – (0 FTPs increase, 0 FTEs increase, and \$364,000 increase). Salaries and benefits for FY 2009 include 102 FTEs.

**Program Changes:**

- *Comprehensive Biometric Exit* – (\$42,553,000 increase). The requested program change will fund necessary infrastructure upgrades and increased storage capacity to meet workload demands resulting from implementation of comprehensive biometric exit solution at air and sea POEs.

US-VISIT will build upon the initial planning activities in FY 2008 for the land portion of the biometric exit solution. In FY 2008, US-VISIT will conduct analyses to evaluate potential technologies, process changes, and data sharing in conjunction with other border management initiatives to assess their feasibility for providing an exit solution for the land POEs. US-VISIT will perform time and motion studies, surveys, and other modeling techniques to identify potential impacts to existing facilities and infrastructure, business operations and staffing. The result of this analysis will be a decision document in December 2008 that outlines the land strategy for a biometric exit. After the approval is received, US-VISIT will begin executing according to the Enterprise Life Cycle methodology to develop a concept of operations with business requirements, conduct an analysis of alternatives, develop a cost and benefit analysis, and conduct formal environmental and privacy impact assessments. These life cycle activities will serve as part of the basis for transition to the next activities of initial design. Additionally, US-VISIT will perform detailed assessment regarding technical infrastructure of associated border management systems and initiatives, including the level of expansion required to support the biometric exit processing at the POEs.

- *Identity Management and Screening Services* – (\$4,200,000 increase). The requested program change will support efforts to continue meeting service level commitments to stakeholders in the face of expanding workloads. US-VISIT will be challenged to maintain current response time agreements with user agencies (e.g. watch list searches completed in less than 10 seconds; enforcement transactions completed in less than two minutes; BioVisa initial searches completed in less than 15 minutes; Border Crossing Card (BCC) searches completed in less than 24 hours; and maintaining IDENT system up time at 99.7 percent or greater) in the face of

exponential growth in IDENT and ADIS transaction volume and fingerprint gallery size in response to the 10-Print initiative, IDENT/IAFIS Interoperability, and rising user demands. As US-VISIT seeks to obtain new sources of biometric data from additional stakeholders (such as local law enforcement through Interoperability, the 10-Print initiative, critical infrastructure, the intelligence community, and foreign partner nations), additional resources will be needed to provide analysis on confirmed biometric match. US-VISIT will establish one source of operational information and reporting, analytical support, and real-time responses to emergent queries from stakeholders.

By expanding the availability of and access to real-time biometric information and analysis, US-VISIT will expand the number of users who can identify individuals overstaying their authorized periods of admission, criminals, national security threats, and other biometric watch list candidates for subsequent action. Additionally, US-VISIT will comply with HSPD-6, whereby all information pertaining to KSTs must be shared with the National Counter Terrorism Center (NCTC) for international terrorists and the FBI for domestic terrorists.

- *Operations and Maintenance* - (\$25,327,000 increase). This program change reflects a net increase due to realignment of the working capital fund to Enhance Program Value. This change will also provide funding to commence migration of data center operations to the designated DHS facility in compliance with the DHS-mandated migration to a consolidated data center from non-DHS data centers.
- *Enhanced Program Management* - (Additional 35 FTPs, 17 FTEs in FY 2009 and remaining in FY 2010, and \$4,343,000 increase). This program change increase is a result from the transfer of the working capital fund into this area. The increase of 35 positions will support expanding program and service demands.
- *Unique Identity (10-Print and IDENT/IAFIS Interoperability)* – (\$161,632,000 decrease). The funding received in FY 2008 funded the 10-Print deployment and the IDENT/IAFIS Initial Operating Capability. These two initiatives provided the capabilities to biometrically screen foreign visitors requesting entry to the United States through the collection of 10 prints at enrollment in US-VISIT and verifications of identity using fewer than 10 prints upon subsequent encounters. The FY 2009 Unique Identity funds will allow US-VISIT to begin the design, build and test of 10-Print full operating capability. Additionally, FY 2009 funds support the “Rap Back” capability across IDENT and IAFIS allows for the searching of the fingerprint galleries using a one-time identifier as a search criteria. During this capability phase, a new service will be integrated into IAFIS that will allow authorized agencies to receive notification of criminal activities for individuals in a position of trust; complete the full 10 print matching capability within IDENT to increase accuracy and the number of fingerprint searches; and initiate the development of the Immigration Data Response capability that allows selected FBI Criminal Justice Information Systems (CJIS) stakeholders to access immigration violation information.

## II-A. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)

| <b>2008</b> | <b>Revised Enacted<sup>1</sup></b> | <b>115</b>          | <b>102</b> | <b>\$ 475,000</b> |
| 2009        | Adjustments-to-base                | 0                   | 0          | 509               |
| <b>2009</b> | <b>Current Services</b>            | <b>115</b>          | <b>102</b> | <b>\$ 475,509</b> |
| 2009        | Program Change                     | 35                  | 17         | (85,209)          |
| <b>2009</b> | <b>Request</b>                     | <b>150</b>          | <b>119</b> | <b>\$390,300</b>  |
|             | <b>Total Change 2008-2009</b>      | <b>35</b>           | <b>17</b>  | <b>(\$84,700)</b> |

US-VISIT requests \$390,300,000 in FY 2009 for ongoing operations, including the implementation of initiatives and deployment of capabilities, a decrease of \$84,700,000 from FY 2008. In FY 2008, US-VISIT will complete the initial operating capability and deployment of the 10 print readers.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

**Identity Management and Screening Services** (US-VISIT Program Services – Biometric and Data Integrity in the FY 2007 Expenditure Plan). As the DHS central point for providing identity management and screening services, US-VISIT handles a large workload, offering diverse services and providing timely responses to its DHS, immigration and border management, international, Federal, State and local stakeholders. At the same time, US-VISIT improves capabilities to manage and screen against watch list records that include terrorists, person of interest and immigration violators, thus strengthening national security, government collaboration, and meeting user needs. US-VISIT meets this mission through efforts in four areas: (1) positively confirm biometric identity through operation of the IDENT, supplemented with fingerprint analyses conducted by examiners in the Biometric Support Center (BSC); (2) enhance biometric identification through biographic, overstay, data integrity analysis through operation of ADIS and the analysts of the Data Integrity Group (DIG); (3) coordinate law enforcement and intelligence operational activities to improve the accuracy and usefulness of US-VISIT data systems; and (4) maximize the operational value of US-VISIT data assets by managing the data governance program.

Collectively, these services uniquely identify individuals, providing person-centric, actionable information to US-VISIT operational customers.

---

<sup>1</sup> The above table includes emergency funding of \$275 million provided in P.L. 110-161 for this activity. The FY 2009 Budget Request is \$390.3 million. Excluding emergency funds provided, the increase over FY 2008 is \$47.509 million for pay and non-pay inflation as well as a total increase for comprehensive biometric exit, identity management and screening services, unique identity, operations and maintenance, enhanced program management.

|   | <b>FY 2008 Enacted</b> | <b>FY 2009 Request</b> |
|---|------------------------|------------------------|
| <b>Identity Management and Screening Services</b> | <b>\$ 15,800,000</b>   | <b>\$20,000,000</b>    |

US-VISIT will use the requested funds in the following areas:

- *Project Integration and Analysis (Project Management in the FY 2007 Expenditure Plan)* – Provides for technical guidance, coordination and integration support for the Identity Management and Screening Services activities including the development and validation of business capabilities to manage and screen against watch list records. These activities further the capability to confirm biometric identity through IDENT and are supplemented with fingerprint analyses conducted by examiners. In addition, these activities improve the accuracy and usefulness of the US-VISIT data systems for enforcement and intelligence operations, immigration and border management, and international, Federal, State, and local stakeholders by enhancing overstay identification analysis.
- *Biometric Support* – Supports real-time biometric verification services, providing fingerprint identification services for all look out hits, US-VISIT verifications and latent fingerprint processing.
- *Data Integrity* – Vets and analyzes records of interest that have been generated by ADIS. These reviews provide tactical information in the form of validated overstay records that represent the most complete, accurate and current information available. This information is provided to DHS operational units (e.g., U.S. Customs and Border Protection (CBP), U.S. Immigration and Customs Enforcement (ICE)), which utilize US-VISIT entry, exit and status data. Additionally, data integrity services identity data quality issues for subsequent correction.

### **FY 2007 Accomplishments**

Based on stakeholders' operational requirements to facilitate traveler processing and ensure officer safety, IDENT provided critical services allowing the timely processing of over 120,000 transactions daily. IDENT negotiated and subsequently provided services at the following agreed upon levels on a 24/7 basis:

- Watch list searches were completed in less than 10 seconds.
- Enforcement transactions were completed in less than 2 minutes
- BioVisa initial searches were completed in less than 15 minutes.
- Border Crossing Card (BCC) searches were completed in less than 24 hours.
- IDENT system up time was 99.7 percent or greater.<sup>2</sup>

Manual fingerprint matching is also subject to service level targets. During FY 2007, more than 1.6 million manual fingerprint verifications have been completed by expert fingerprint examiners at the BSC. Some urgent verification must be completed within 10 minutes or less to ensure legitimate travel is not impeded and officer safety is maintained. The average time for the 303,980 urgent verifications completed in FY 2007 was less than four minutes, well below this 10 minute requirement. This ensures field officers and other stakeholders receive identity information quickly, along with any potential derogatory data.

---

<sup>2</sup> Actions taken to meet these negotiated rates are discussed further in the Infrastructure section.

US-VISIT merged several IDENT databases and provided users with a comprehensive view of all biometric encounters, eliminating the need to perform multiple biometric queries to gather available data. In addition, a watch list demotion capability (i.e., removing individual names from the watch list when they are no longer valid candidates) was deployed to improve watch list information. During FY 2007, more than 5,300 demotions were completed providing decision makers with more actionable and credible data.

The IDENT False Accept Rate was reduced through implementation of improved fingerprint matching algorithms. This rate is the measure of when the automated system erroneously matches a subject to a candidate fingerprint in the database. Prior to the implementation of this algorithm implementation in October 2006, the false acceptance rate was 0.093 percent of the number of individuals encountered for the first time at POEs. Post-implementation, this rate was 0.008 percent. US-VISIT estimates that this improvement provided operational benefits by reducing the number of individuals sent to secondary processing due to erroneous identifications by an estimated 700,000 travelers. In addition, the new algorithm reduced the number of gray hits (human interventions) required by the BSC fingerprint examiners by 80 percent.

Also, new requirements for an enhanced Candidate Verification Tool were developed and refined. This tool, required by expert fingerprint examiners, is used to compare fingerprints, verify matches, and provide visualization and imaging capabilities to view fingerprint images. The existing verification tool is being improved to support of the transition from 2 print to 10 print capture and will provide state of the art visualization and fingerprint image enhancement tools. The end result will be a significant improvement in fingerprint examination processes during 10-Print migration.

In addition, the BSC has met all data entry, scanning, and enrollment targets for the fiscal year to-date, completing enrollments for terrorism, fugitive, National Security Entry/Exit Registration System (NSEERS), and IDENT queries within their respective service levels. These enrollments serve to keep the data repositories current and accurate, thereby helping to maintain the integrity of the immigration system. During FY 2007, the BSC has entered 28,078 IDENT enrollments and 3,470 NSEERS enrollments into the system.

*Enhance biometric identification through biographic, overstay, and data integrity analysis.* The DIG more than tripled the FY 2006 validated in-country overstay records forwarded to the ICE Compliance Enforcement Unit (CEU) and increased more than 16 fold the FY 2006 validated out-of-country overstay look outs. During the same period, more than 724 enforcement actions (273 ICE arrests and 451 DOS/CBP actions) were taken based on overstay records validated by the DIG, more than quadruple the number of enforcement actions taken in FY 2006.

The data integrity validation of overstay records has increased quarter-by-quarter. The number of in-country overstay records validated increased from approximately 2,198 in the fourth quarter of FY 2006 to 3,294 in the same quarter of FY 2007, a 49-percent increase. While out-of-country overstay validation procedures were not fully implemented until the first quarter FY 2007, similar quarter-over-quarter increases have been realized, culminating in more than 7,355 records validated in the third quarter of FY 2007.

In the current data integrity business model, contractor analysts validate system-identified overstay records by vetting the record against up to a dozen systems containing immigration-related data. As data integrity and process improvements have been implemented, contract labor costs per validated overstay record have decreased. The average contractor labor costs per validated in-country overstay record decreased from approximately \$85 in the third quarter of FY 2006, to approximately \$37 in the same quarter of FY 2007. Although the out-of-country overstay validation process is relatively new,

the average contractor labor cost per validated record has decreased from approximately \$143 in the first quarter of FY 2007, to approximately \$58 by the third quarter of FY 2007.

US-VISIT performed an analysis by incorporating data modeling of DIG workflow data. This analysis was conducted in order to better identify achievable production metrics and optimize internal data integrity workflow. This information will be used to formulate updated contract specifications and requirements.

In FY 2007, several ADIS system changes were implemented. First, departure I-94 data was integrated into ADIS. This integrated data provided more complete information, contributed to improved departure-to-arrival matching, and more credible system identification of overstays. Second, release 2.6 provided data integrity, system performance, and user interface changes. The release improved information displayed to users, improved departure-to-arrival matching, and provided more credible system identification of overstays. Third, deployment of release 3.0 provided additional data integrity, system performance, and user interface improvements. In addition to contributing to the improvement of departure to arrival matching and more credible system identification of overstays, this release provided a foundation for account reconciliation for proactive identity management. This enabled US-VISIT to ensure transactions and accounts are associated properly, further improving the accuracy of this system.

Through the operation and maintenance of ADIS, US-VISIT incorporates continuous data integrity improvements to maximize the operational utility of the data. One outcome of the data integrity work can be seen as continually improving departure to arrival match rate, which increased from 88.1 percent in FY 2006 to 89.9 percent in FY 2007.

Another measure of improving data integrity is the percentage of validated overstay records identified through ADIS. The percentage of system-identified overstay records validated by the DIG increased nearly 15 percent in FY 2007. The rise in credible leads contributed to the increase in resulting arrests by ICE from 139 in FY 2006 to 273 in FY 2007.

The critical ADIS core capability is the biographic matching of non-U.S. citizen arrival, departure and immigration status update records. This matching provides accurate, near real-time immigration status accounting and includes information on whether non-immigrants have maintained lawful status or have remained beyond their terms of admission. This record matching is performed through system logic and algorithms. Validation of the algorithm matching in ADIS is being performed by the Department of Energy's Lawrence Livermore National Laboratory (LLNL). Although match rates are improving, the highest level of record matching accuracy possible is required to meet mission requirements, especially as these relate to identification of overstays.

In the third quarter of FY 2007, US-VISIT established an Interagency Agreement with the Department of Energy to obtain the services of LLNL. The LLNL is to independently assess, in a scientifically defensible manner, the current accuracy of record matching within ADIS. In addition, the LLNL is to establish a test bed and the associated procedures to accurately project the effect of changes made to current record matching algorithms. Finally, LLNL will compare current record matching performance to the performance of other types of record matching algorithms.

*Coordinate law enforcement and intelligence operational activities.* US-VISIT participated in the NCTC's biometric sub-working group. This interagency effort was to integrate the biometric and biographic KST watch listing process by developing standard operating policies, procedures, and mechanisms. Also, this allows the sharing of biometric information across Government agencies and allows the consistent application of the KST definition to individuals of interest.

US-VISIT devised a near real-time process to promote a U.S. Government's KST biographically-encountered person at the POE to the biometric watch list. Previously, a significant amount of time elapsed from the time a KST was encountered at a POE until that fingerprint was passed to IDENT from IAFIS. In FY 2007, more than 245 records with corresponding Terrorist Screening Center biographic lookouts were promoted to the biometric watch list due to the POE encounters.

US-VISIT ensures the watch list is accurate and actionable so that stakeholder action can be taken with the highest degree of confidence and efficiency. The US-VISIT biometric watch list is used for multiple purposes including border management, immigration services, enforcement, credentialing, and global screening. On average, US-VISIT reviews approximately 450 biometric watch list encounters per week. Removing unnecessary records from the watch list keeps the watch list accurate and actionable allowing valuable stakeholder resources to concentrate on those individuals requiring additional scrutiny.

A June 2007 analysis of the BioVisa and Border Crossing Card (BCC) issuance process against why travelers who were identified on entry to be on the watch list and their subsequent disposition at the POE, revealed that a large number of the watch list hits at entry had been given waivers of admissibility by CBP and subsequently issued visas by DOS. The majority of these travelers were later admitted at the POE. When US-VISIT reviewed the encounter after entry, they were demoted from the watch list.

In light of these findings, US-VISIT changed its review process of BioVisa and BCC encounters by concentrating only on those persons to whom CBP grants a waiver of inadmissibility and to whom DOS subsequently issues a valid visa. This much more effective and focused process has increased the ratio of records reviewed to records demoted and decreased unnecessary referrals to secondary inspection at the POE. These demotions take unnecessary travelers off the watch list, free up valuable secondary inspection resources, and minimize traveler inconvenience. For FY 2007, US-VISIT reviewed 10,000 POE hits that resulted in 922 adverse actions as well as 5,343 demotions resulting in CBP officers being more focused on more actionable referrals to secondary inspection.

US-VISIT promotes individuals to the biometric watch list when derogatory information is corroborated in coordination with stakeholders. During FY 2007, US-VISIT promoted 7,967 records in this manner. The significance of these promotions is that these individuals' identities have been captured and frozen in the system should they try to apply for a visa, enter the United States, apply for a benefit, or encounter law enforcement under any other biographical identities. Of these promotions, 872 have subsequently been encountered.

US-VISIT completed an audit from December 2003 to January 2007. This audit identified 315 individuals who were allowed to withdraw or were refused entry at the POE under Section 212 of the Immigration and Nationality Act for national security reasons. US-VISIT promoted these subjects to the watch list. Since this audit, CBP has revised their process so that all adverse actions are automatically promoted to the biometric watch list.

US-VISIT has undertaken a number of initiatives to share biometric data with other agencies and governments. The more identities frozen in IDENT, the more information, aliases, and other bio facts can be provided to stakeholders. One such effort was greater cooperation with the U.S. Citizenship and Immigration Service (USCIS) on refugee and asylum applicants. In FY 2007, US-VISIT began to receive feedback from USCIS which has allowed US-VISIT to promote persons to the biometric watch list due to USCIS determinations that the applicant had committed fraud during the application process, thereby freezing the identity of the person for future encounters so that the person cannot

fraudulently obtain a benefit, a visa, or entry into the United States. Similar progress is being made with USCIS offices such as Refugees Affairs, Fraud Detection, and the National Security offices.

US-VISIT worked closely with the National Ground Intelligence Center to obtain the Department of Defense (DOD) biometric watch list of 5,000 persons of interest from Iraq and Afghanistan. US-VISIT is working to expand the exchange and incorporation of other DOD biometrics into the US-VISIT biometric watch list. The data exchange not only provides US-VISIT stakeholders with additional identities of threats, but also can provide DOD with valuable intelligence on aliases, travel histories, and other information that can help further identify, track, and report on these persons to the rest of the Federal Government.

US-VISIT has actively supported the Four Country Conference (4CC) of the United States, United Kingdom (UK), Canada, and Australia to encourage biometric data sharing globally. To date over 10,000 records have been exchanged. Over 700 matches were discovered within IDENT, resulting in a number of individuals being promoted to the US-VISIT biometric watch list as a result of feedback from the foreign country information. Benefits to our foreign partners include the identification of specific individuals ineligible for the benefits they seek and, more importantly, identifying vulnerabilities in current systems and processes.

### **FY 2008 Planned Accomplishments**

The BSC will continue to provide fingerprint verification decisions for urgent requests in ten minutes or less and provide enrollment and verification of terrorism related prints in two hours or less. Additionally, the BSC will also work to significantly expand capability to provide latent verifications for terrorism and criminal related cases.

*Enhance biometric identification through biographic, overstay, and data integrity analysis.* IDENT will continue to support existing stakeholders at the same service levels as FY 2007, while accommodating growth in volumes of transaction processing and gallery sizes. Key drivers of growth will be expansion of Unique Identity (10-Print capture and IDENT/IAFIS Interoperability); expanded sharing of KST biometrics across the entire Federal government; expanded international biometric data sharing efforts; and support of emerging DHS credentialing initiatives like Homeland Security Presidential Directive 12 (HSPD-12) such as the Hazardous Materials Transportation and the Transportation Worker Identification Credential.

US-VISIT will maintain system availability and increase output in the face of increased demand.

- ADIS will maintain 97 percent availability, meeting system availability requirements.
- Accommodate anticipated growth in service demand. The 15 percent increase in users seen in FY 2007 is expected to continue through FY 2008.
- The DIG will review approximately 45,000 in-country overstay records for ICE CEU (16.6 percent increase over FY 2007) and approximately 37,000 out-of-country overstay records (66 percent increase over FY 2007).
- Additional categories in-country overstay records will be added by ICE to the current prioritization list, requiring the DIG to remain current on a larger population of records. Additional categories of overstay lookouts will also be created; including lookouts for in-country overstay records for which ICE agents have exhausted all leads without locating the individuals. This could add up to 3,000 records over the FY 2007 workload.

US-VISIT will maintain system and data integrity to meet stakeholder needs by:

- Integration of arrival I-94 and NSEERS data into ADIS, providing more complete information that will contribute to improved departure to arrival matching and more credible system identification of overstays.
- Providing the functionality to reconcile accounts for proactive identity management, enabling the US-VISIT program to ensure the proper transactions are associated with the proper account, improving the accuracy of this person-centric system.
- Increasing ADIS departure to arrival match rate to approximately 97 percent, driven by improved record matching algorithms, additional information (I-94, NSEERS, etc.), and improved carrier compliance with the electronic manifest regulations. The other measure of the improving level of data integrity in ADIS referenced above, the percentage of overstay records identified in ADIS that are validated through subsequent record checks performed by the DIG, will also continue to improve.
- An independent assessment, by LLNL, will enable US-VISIT to articulate the current baseline ADIS record matching accuracy and recommend additional record matching enhancements to optimize accuracy.

*Coordinate law enforcement and intelligence operational activities.* US-VISIT will:

- Continue to review all entry biometric watch list encounters occurring at POEs and to demote persons from the watch list who have overcome an inadmissibility charge or who have been granted a waiver of inadmissibility to facilitate processing at the POEs.
- Exchange biometric information and formalize process with DOD to include identities on the biometric watch list of high threat subjects encountered by the U.S. military primarily in Iraq and Afghanistan. These records could prevent subjects who have been detained, attacked U.S. troops or civilian targets, or are connected to insurgent activities in theatre from gaining entry to the United States. Additionally, US-VISIT may be able to supply identity information to DOD on previously unknown subjects of interest. Success will be measured by the number and frequency of data exchanges with DOD.
- Further support the 4CC initiative by vetting persons who are in the U.S. but who are applying for a visa to the UK, expanding a global biometric view of identities to deter fraud committed across borders and to better share identities on persons of interest who commit crimes against humanity globally.
- Progress will be made in associating every biometric record available to a corresponding KST on the watch list so that these subjects can be identified biographically and biometrically through documented standard operating procedures, tracking the number of records shared over the next year, and by continuing participation on the various U.S. government biometrics standardization and information sharing working groups.
- Formalize a process with USCIS to put all denied applicants for fraud on the biometric watch list so the subjects cannot apply for admission to the United States or for another immigration benefit under another identity. Success will be measured by the number of fraud records added to the watch list based on the USCIS process.

## FY 2009 Projected Accomplishments

FY 2009 planned accomplishments will support the combination of a growing biometric gallery size coupled with an expansion of stakeholders beyond the traditional border management context which will drive the need for:

- Advanced analysis and related tools that will support, monitor and provide actionable and verifiable enforcement leads, data monitoring, error correction, and related statistics and performance based service metrics. Additionally, enhancements will be made to the validation process of all in-country overstays identified in ADIS including verified overstay information for investigative review by ICE. With initial deployment of Unique Identity's full operating capability's enhanced exit tracking capabilities and the expansion of biometric credentialing screening for critical infrastructure, the complexity of information available will increase; optimal use of the data contained within US-VISIT's databases will require an integrated and coordinated, near real-time response to all stakeholders. To respond, US-VISIT will establish a 24/7 biometric stakeholder operational support capability that is not currently provided by any DHS organization. This capability will coordinate new or changing information with other relevant Federal, State, local and international government organizations and to provide enhanced analytic services that leverage US-VISIT's biometric and biographic capabilities.
- By expanding real-time biometric information and analysis available to State and local law enforcement, critical infrastructure and intelligence community users, US-VISIT can expand the number of users who may identify overstays' criminals, national security threats and biometric watch list candidates for subsequent action. Moreover, identity services will comply with Homeland Security Presidential Directive (HSPD-6), whereby all information pertaining to known and suspected terrorists must be shared with the National Counterterrorism Center (NCTC) for international terrorists and with the FBI for domestic terrorists. As more actionable leads are forwarded to ICE for investigation, the number of arrests based on US-VISIT data is expected to increase by 25 percent, and the number of look out records created will double the number of FY 2007 port refusals and consulate adverse actions.

**Unique Identity** - The Unique Identity initiative includes integrated work streams for national deployment of 10 print capture and achieving interoperability between IDENT and IAFIS. The use of 10 prints facilitates travel by reducing the number of travelers sent to secondary inspection since the use of 10 prints provides more data on which to match, thus reducing false positives. Further, there are greater opportunities to identify persons of interest since 10 prints are more likely to be able to be matched to latent fingerprints in criminal and intelligence biometric data stores from fingerprints collected from crime scenes or terrorist locations. Interoperability enlarges the biometric database used by both border management and law enforcement agencies. When used in conjunction with the 10-Print initiative, enhanced data sharing, increases the probability of identifying persons of interest and taking appropriate law enforcement actions.

|                        | FY 2008 Enacted       | FY 2009 Request     |
|------------------------|-----------------------|---------------------|
| <b>Unique Identity</b> | <b>\$ 228,000,000</b> | <b>\$66,368,000</b> |

US-VISIT will use the requested funds in the following areas:

- *Project Integration and Analysis (Project Management in the FY 2007 Expenditure Plan)* – Provides the technical guidance, coordination and integration support for development and validation of business requirements for Unique Identity. Also, these funds will provide for the

project-related planning resources (including configuration, acquisition and risk activities) as well as the analysis of project performance metrics and related reporting on cost, schedule, and quality management.

- *Outreach* – Conduct communications to pilot entry POEs, stakeholders, 10 print scanner industry and related industry groups and the development of a Stakeholder Readiness Plan.
- *Privacy and Systems of Records Notice* – Assess the need for a Privacy Impact Assessment, System of Records Notice and Federal Register requirements for 10-Print and the Interoperability of IDENT/IAFIS. Initiate the assessment and notices of analysis and implementation.
- *Acquisition and Procurement* – Purchase and deployment of 10 print capture devices, upgrades in network capacities (specifically regarding band-width) as well as technology refreshes at 119 airports, 9 seaports and 155 land ports.
- *Training* – Develop the training products that will be used, such as web-based training, train the trainer and provide operational training during the “go-live” launch.
- *Update DHS Border and Process Technology* – Device to client biometric interfaces and further 10-Print prototype testing and evaluation.
- *Process 10-Print Data* – Enable the long term storage and processing of 10 prints captured at POEs, other DHS components, and DOS Consulates by completing the design and development of a data model and system architecture that supports processing of 10-Print volumes. The focus will be to finalize the design, build, test, and deployment production environments. This will include the acquisition of matchers for deployment to support 10-Print volumes and operations at 119 airports, 15 seaports, and 154 land border ports.

## **FY 2007 Accomplishments**

### *10-Print Transition*

*Acquisition led to improvement of scanner technical capabilities.* US-VISIT successfully acquired 50 scanners for initial testing. This acquisition benefited from industry development of new and improved technologies that met the technical, physical and operational requirements for DHS.

*Pilot locations selected and modeling conducted to prepare for pilots.* 10-Print test locations were selected in collaboration with the law enforcement and intelligence communities to ensure that the locations provided a representative population of the visa waiver travelers. Site surveys were conducted to determine physical and technical modifications required and helped identify the optimal location for placing scanners within the CBP processing booth. This was a collaborative effort with CBP with the goal of minimizing processing delays and diverse impact on the traveler arrival/departure process.

US-VISIT conducted modeling studies to baseline existing operations and processes, as well as evaluated network capacity at the pilot locations to reduce the risk of inadequate infrastructure capacity. These activities allowed US-VISIT to evaluate pilot performance, and operational impacts prior to full deployment in support of Government Accountability Office (GAO) recommendations.

The USCIS pilot demonstrated initial benefits for 10-print. US-VISIT completed and piloted capabilities to support the USCIS Adoption pilot that provided the ability to verify applicant identities throughout the adoption process. As a result, capabilities exist to create a unique identifier established at the time of a person's biometric enrollment that links all biometric records associated with that individual.

### Interoperability

*Early results identified subjects for removal and demonstrated viability to proceed to Initial Operating Capability.* Deployment of the Interim Data Sharing Model (iDSM) capabilities allowed US-VISIT and the FBI to share limited biometric immigration information relating to expedited removals and State's BioVisa refusals. The iDSM test sites were Houston and Dallas, Texas, Boston, Massachusetts, and the Office of Personnel Management. In FY 2007, using the improved information made available by the iDSM pilots, decision makers identified more than 254 individuals subject to removal and refusal. These individuals would not have been identified without the information from the initial iDSM test. An evaluation was completed and demonstrated the viability for proceeding with an Initial Operating Capability (IOC).

*Departments of Homeland Security and Justice achieved agreement on the overarching architecture for the Composite Model with Separate Image Repository.* An agreement was reached by DHS and DOJ on requirements for sharing information on a fully supportive infrastructure to enable the exchange of data. As part of this effort, both departments reached agreement on the Composite Model with Separate Image Repository, which will serve as the overarching infrastructure for IOC. This architecture was included in the Cost Benefit Analysis (CBA) refresh completed in October 2007.

The program continued to design, build, and develop a deployment plan for IOC for Interoperability. IOC Interoperability will be implemented by late FY 2008 and will provide DHS with the capability to access criminal data in IAFIS; FBI with access to the immigration data in IDENT; and expand the population of biometrics data shared to provide immediate identification of high risk individuals resulting in improve decision making regarding both immigration and law enforcement actions.

## **FY 2008 Planned Accomplishments**

### 10-Print Transition

*Complete pilots and begin national deployment of 3,000 scanners at 292 POEs.* In FY 2008, US-VISIT will complete the 10-Print pilot and evaluate the results. These results will provide insights and lessons learned that will guide the national deployment of 10 print capability due to be completed early FY 2009. National deployment will consist of approximately 3,000 devices to the 292 POEs where 2 print scanners are currently deployed at air, sea and land environments. Through these efforts, US-VISIT will improve accuracy in matching fingerprints, enabling the immediate identification of high risk individuals, and facilitating the interaction for low-risk individuals.

### Interoperability

*Implement IOC.* US-VISIT will implement IOC to improve the DHS ability to match enrollees against latent prints; mitigate concerns about false negatives when matching against poor quality prints; ensure fast processing time to resolve false positives; and provide the ability to perform a full search of the FBI/CJIS criminal master file. In addition, interoperability will enhance identity verification capabilities by sharing biometric and biographic information collected by each department. IDENT/IAFIS Interoperability will provide more coordinated and well-informed decision making capabilities. FY 2008 investments will provide more comprehensive biographic and case data

screening, scale for transaction throughput and gallery size and provide the ability to access the FBI/CJIS criminal files.

### **FY 2009 Project Accomplishments**

In FY 2009, US-VISIT will begin to design, build and test IDENT/IAFIS Interoperability full operating capability (FOC); initiate the “Rap Back” capabilities across IDENT and IAFIS to search the fingerprint databases using a one-time identifier as search criteria within the IAFIS galleries. During the FOC phase, a new service will be integrated into IAFIS that will allow authorized agencies to receive notification of criminal activity for individuals in a position of trust; complete the full 10 print matching capability within IDENT to increase the accuracy and number of fingerprint searches; and begin development of the Immigration Data Response capability that allows selected CJIS stakeholders to access immigration violation information.

**Comprehensive Biometric Exit** - The Comprehensive Biometric Exit initiative includes the initiation, development and implementation of a comprehensive solution to capture biometric information from in-scope travelers as they exit the United States in the air, sea and land environments. This initiative supports the Intelligence Reform Act of 2004, and enhances the integrity of the immigration system.

This capability provides several benefits. The use of biometrics verifies the identity of the person leaving the country confirming the traveler’s compliance with immigration laws and eliminates the use of multiple identities if only biographic data is utilized. It also maximizes investigative resources to prevent searching for people who have already left the country. Furthermore, at a policy level, this capability provides the ability to identify overstays by country and visa category to inform decision makers on overall compliance with and effectiveness of immigration laws. Identification of overstays assists DHS in the determination of the extension or denial of Visa Waiver privileges to countries.

US-VISIT has proposed an incremental deployment of biometric exit capabilities into the three POE environments – air, sea and land – with an initial focus on commercial air and sea departures since this represents the largest volume of travelers from countries of interest. This solution will leverage lessons learned from the Air and Sea Exit pilot that highlighted the need to integrate the capture of biometrics into the traveler departure processes in order to maximize compliance. Previous Air and Sea Exit pilot demonstrated the improved matching of entry and exit records through the use of biometrics. The deployment of a comprehensive solution will extend these benefits to all locations.

|                                     | <b>FY 2008 Enacted</b> | <b>FY 2009 Request</b> |
|-------------------------------------|------------------------|------------------------|
| <b>Comprehensive Biometric Exit</b> | <b>\$13,000,000</b>    | <b>\$55,533,000</b>    |

US-VISIT will use the requested fund for the following:

- *Project Integration and Analysis (Project Management in the FY 2007 Expenditure Plan)* – Provides the technical guidance, coordination and integration support for development and validation of business requirements of Comprehensive Biometric Exit. Also, these funds will provide for the project related planning resources (including configuration, acquisition and risk activities) as well as the analysis of project performance metrics and related reporting on cost, schedule, and quality management.
- *Planning and Design* – Complete the Enterprise Life Cycle Plan and Analyze phases which will give US-VISIT the information necessary to make an informed decision regarding the development and implementation of a land border exit system. The plan will look to address all modalities of border crossing, such as ferries, rail, bus, truck, and pedestrian traffic. In FY 09 US-VISIT will develop and implement solution(s) that will address one or more of these modalities that an in-scope alien may employ to exit the United States.

- *Infrastructure Upgrades* – Deploy necessary infrastructure upgrades, along with increased storage capacity to meet workload demands resulting from implementation of air and sea biometric exit

### **FY 2007 Accomplishments**

*US-VISIT decommissioned pilots and refocused resources.* US-VISIT decommissioned operations of the existing Air and Sea pilot at the 12 airports and two seaports. Since its inception, more than six million travelers had been processed resulting in 1,061 biometrics hits, leading to nine adverse actions. Given the limited number of locations operating the pilot, this represents a potential for significantly increasing confidence in security and immigration compliance.

This early pilot identified low compliance on the part of travelers which emphasized the need to integrate biometric collection into the existing departure check-in process. This pilot closure has permitted the reallocation of resources to focus on developing and implementing the comprehensive strategy.

US-VISIT also concluded the operation of the Radio Frequency Identification Proof of Concept that was assessing the use of technology to facilitate entry and exit operations for vehicle and pedestrian traffic at selected land POEs. This effort provided valuable lessons learned on the use and effectiveness of remote sensing technology that will be used in the development of the Comprehensive Exit strategy.

### **FY 2008 Planned Accomplishments**

*Develop and complete implementation of an air and sea biometric exit system.* US-VISIT plans to finalize a biometric exit strategy and complete implementation of a biometric air and sea exit system by the end of calendar year 2008.

*Initiate the land exit phase of the Comprehensive Biometric Exit Solution.* In FY 2008, US-VISIT will conduct an evaluation of potential technologies, operational changes, and data sharing in conjunction with other DHS border management initiatives. These evaluations will require time and motion studies, surveys, and other specific modeling techniques in order to identify potential impacts to exiting facilities and infrastructure, business operations and staffing. The conclusion of these studies will be published in a decision based document that outlines the land biometric exit strategy in December 2008.

### **FY 2009 Projected Accomplishments**

US-VISIT will deploy necessary infrastructure upgrades, along with increased storage capacity to support implementation of air and sea exit.

US-VISIT will also build upon the initial land border plan and analyze activities in FY 2008. Given the challenges of a land border exit system, US-VISIT believes the development process is best started by gathering information that will assist in making informed decisions. During FY 2008, US-VISIT will accomplish this through collection of information from technological solutions that have been employed at the border by other DHS entities and researching the potential for integration or further development into those solutions. In addition, new and emerging technologies will be evaluated, continued discussion with the border countries for potential data-sharing capabilities and collection of stakeholder concepts.

US-VISIT expects to take an incremental approach to the land border. Re-using some of the technology and procedures already developed along with the information gathered in FY 08, US-VISIT will deploy in FY 09 a system to one or more specific transportation modalities. For example, an in-scope alien pedestrian walking across the border and/or in-scope aliens traveling on a ferry, bus, or a train may be required to provide exit data prior to departure. Building upon the lessons learned in

each increment and as technology develops, US-VISIT will continue to work towards a completed Comprehensive Exit solution.

**Operations and Maintenance** - US-VISIT provides IT support that enables the identity verification service and supports the enhancement and development of new capabilities. O&M includes systems operations and maintenance, development of IT architecture and platforms for user and program interfaces, data center operations support and services, integration and support for network communications, and technical IT support services.

The following a perspective of the scope of the US-VISIT O&M:

- The major IDENT IT components include approximately 500 servers in use at any given time that support over 300 operating elements using IDENT services. IDENT also has 91 matchers and 31 terabytes of storage that is growing at the rate of two terabytes per month.
- The IT support for US-VISIT spans four sites with dozens of servers, network components and applications.
- More than 950 help desk tickets are resolved during the year for access requests and account management.

The US-VISIT program office, IDENT system services and the prime contractor are supported by numerous Wide Area Network (WAN) circuits. These circuits provide data connectivity for program administration, IDENT system transactional and contractor development, prototyping, and operational communications. These WAN environments and their associated circuits are critical to the mission of US-VISIT. Support of these large capacity circuits and their requisite enterprise level network equipment (routers, firewalls, Channel Service Unit /Digital Service Unit, Intrusion Detection System, accelerators and compressors) require 24/7/365, multi-tiered support services. This support ensures on-going viability of the IDENT and ADIS systems and the administrative functionality of US-VISIT. Overall network support is comprised of high-level engineering expertise responsible for design, implementation, testing and troubleshooting of current and future initiatives. It is also comprised of base-level Help Desk functions and mid-level performance monitoring and reporting functions. Combined, these US-VISIT network services comprise the necessary support structure to serve the critical biometric vetting, storage and programmatic support needs of DHS.

|                                   | <b>FY 2008 Enacted</b> | <b>FY 2009 Request</b> |
|-----------------------------------|------------------------|------------------------|
| <b>Operations and Maintenance</b> | <b>\$103,000,000</b>   | <b>\$128,327,000</b>   |

US-VISIT will use the requested funds in the following areas:

- *Applications Operation and Maintenance* – Software for program support, break-fix resolution and remedies, software/application release management including configuration management; IT architecture and platforms for user and program interfaces. Additional IDENT matchers to improve and maintain 10 second Service Level Agreement (SLA) with CBP on primary inspection lanes.
- *Data Center Operations* – Data center software, software, platform support and services, physical data storage, hardware supporting structures, routine backup and recovery, and disaster recovery operations.

- *Network/Data Communications* – Resources for shared enterprise Help Desk support to the POEs and the US-VISIT Program Office in database administration and management services, local area network services and related services.
- *IT Services* - Help Desk support for US-VISIT capabilities and systems, which includes the US-VISIT Program Office for database administration and management, Local Area Network services and support, and technical independent verification and validation.

## **FY 2007 Accomplishments**

*Maintaining service level commitments to user agencies.* In the face of transaction and gallery growth presented above, US-VISIT continued to meet or beat its SLAs with key user agencies. For example:

- *Primary Processing* - The average time required to complete a search on the Look Out/Watch List system was 9.47 seconds which is within the 10 second response time specified in the SLA. IDENT operations delivered a sub-10 second response with 99.5 percent reliability. This performance enabled front-line CBP officers to make critical decisions in real-time.
- *BioVisa Processing* – The SLA watch list response time requirement is 15 minutes or less. The actual average was 2 minutes, 21 seconds. This performance delivered results to Department of State officials in near real time and enabled them to either approve/deny BioVisa in a single visit. Applicants no longer have to plan on making two separate visits to the consular office to get a decision on their applications.
- *ENFORCE Processing* – The SLA requirement for enforcement searches is two minutes or less. Average performance to date was 1 minute, 22 seconds. ENFORCE is the DHS enforcement case tracking system supporting alien processing, enforcement case management, and statistical reporting functions.
- *System Availability* – The SLA requirement for overall IDENT system availability is 99.7 percent of the time or better. In FY 2007, IDENT has been available 99.9 percent of the time, thus providing critical biometric information to support decisions by user agencies affecting the security of the United States.

*New technical solutions in support of business requirements for end users.* US-VISIT successfully challenged the private sector to develop new fingerprint scanner technologies. The results are making it possible to meet the growing volume with improved quality. US-VISIT technical experts led efforts to acquire more compact scanner technologies required for the 10-Print Pilot Deployment Project.

US-VISIT also created an enterprise Service Oriented Architecture platform, including the development of the IDENT Extensible Markup (IXM) language based on the Extensible Markup Language (XML) data communication standard and the new DHS–DOJ National Information Exchange Model (NIEM) standard. IXM provides a standardized format for applications from Federal agencies and potentially allied foreign governments to communicate directly with US-VISIT irrespective of the programming languages between the applications. The use of IXM across DHS, DOS, DOJ, and CBP provided efficiencies by eliminating the need for development of customized interfaces between applications. Communication with IDENT can now be achieved through the common NIEM standard. In FY 2007, iDSM piloted this new standard with DOJ.

US-VISIT maintained the new interoperability capability developed between the IDENT and IAFIS systems and a pilot program with the DOS. The new IDENT/IAFIS interoperability system, now under O&M, provides a more secure and reliable data transfer between the two agencies. In addition, the

pilot program with DOS provides US-VISIT with 10 print slap fingerprints images and is serving as a prototype for the new 10 print capability within DHS.

Also during FY 2007, US-VISIT developed and refined a consistent patch management process and a comprehensive incident response process to apply to all US-VISIT inventory systems. These processes will improve the security of operational components and protect data with privacy implications.

*US-VISIT pursues management improvements and efficiencies.* As a key biometric service provider, US-VISIT has assumed a leadership role in contributing to the design of the DHS Biometric Enterprise Architecture. The close collaboration between US-VISIT and the DHS Chief Information Officer (CIO) on Enterprise Architecture (EA) efforts lead to the designation of US-VISIT as the lead for the biometric services component of the DHS EA. In FY 2007, US-VISIT helped DHS develop a biometric EA and helped administer this EA component through efforts led by the DHS CIO.

These efforts and the successful development of an enterprise Service Oriented Architecture culminated in recognition by DHS on May 25, 2007. DHS formally designated US-VISIT as the DHS center of excellence for biometrics. The memorandum from the DHS CIO and the Director of the Screening Coordination Office established US-VISIT as the central coordination point for biometric conformity to the DHS EA. In this new role, US-VISIT will strive to reduce the total cost of biometric services by ensuring that development standards are followed by all stakeholders.

In FY 2007, US-VISIT transitioned database and systems administration contractual support from ICE thereby streamlining US-VISIT governance and management structures to replace those inherited from the legacy components of DHS.

US-VISIT also sought to achieve management efficiencies through a number of efforts in FY 2007. For example, US-VISIT reduced O&M costs for mission critical applications and key IT infrastructure components. Data storage costs under the DOJ supported infrastructure were reduced from approximately \$35 per gigabyte per month to \$2.50 per gigabyte per month. For a large-scale system such as ADIS that operates with six terabytes of data storage per month, the savings is approximately \$2.3 million per year. These savings were realized with a new efficient data storage mechanism managed by US-VISIT and consolidated with a single integrator.

During FY 2007, US-VISIT also established a single repository for all hardware and software licenses and maintenance agreements. By centralizing the administration, US-VISIT identified redundancies, eliminated unnecessary licenses, and identified future opportunities for further consolidations that will reduce costs.

US-VISIT also realized cost savings by reusing retired IT equipment. When the Air and Sea Exit pilots were decommissioned in late FY 2007, equipment that had not reached the end of its effective service life was re-deployed. Much of this equipment was placed in service on the 10-Print initiative. Principle equipment re-deployed included servers and network components for an estimated cost savings of approximately \$35,000. Further savings were realized when the Land Exit pilot (previously referred to as Increment 2C) was decommissioned. Equipment was re-deployed to establish the IT infrastructure for Public Key Directory Validation Services, saving an additional \$230,000.

### **FY 2008 Planned Accomplishments**

*Maintain service level commitments to user agencies.* US-VISIT will continue to be challenged to support expected growth from existing users at land, air and sea ports, consular offices and immigration benefits offices in addition to maintaining and supporting new capabilities deployed in FY 2007 and 2008. These capabilities include database changes designed to provide more streamlined searching of biometric repositories (“Unified IDENT”), the addition of new credentialing populations, continuation of the Mona Pass pilot program with the U.S. Coast Guard (USCG), and the new 10-Print

pilot transition to a initial operating capability at air and sea ports. With the projected growth in operations, US-VISIT will deliver the same level of service negotiated in various SLAs with our customers.

IT support will expand existing O&M capabilities to provide operations support for additional components such as ADIS, 10-Print pilot, iDSM, and Enumeration. Many of these components will require 24/7/365 support to collect and process biometric and biographic data in support of national security.

*Develop new technical solutions in support of business requirements for end users.* There will be new technologies coming online for 10-print, enumeration, and interoperability. Each new system will experience significant increases in transaction and query processing. The transition to 10-print will increase digital transmissions by 500 percent. This corresponds to a five-fold increase in transaction processing across national networks. The challenge will be to absorb these increases without impacting response times and SLAs.

*US-VISIT pursues management improvements and efficiencies.* Demand for biometric services and the DHS endorsement have brought new stakeholders to US-VISIT with requests for new functionality and requirements. New architectures and innovative solutions are required to ensure that IDENT can be scaled to meet the new demands.

**FY 2009 Projected Accomplishments**

US-VISIT will be challenged to maintain current response time agreements with user agencies (e.g. watch list searches completed in less than 10 seconds; enforcement transactions completed in less than 2 minutes; BioVisa initial searches completed in less than 15 minutes; BCC searches completed in less than 24 hours; and maintaining IDENT system up time at 99.7 percent or greater) in the face of exponential growth in IDENT and ADIS transaction volume and fingerprint gallery size in response to 10-Print pilot, Interoperability, and rising user demand. Interoperability sites will expand from 12 sites in FY 2008 to 50 sites in FY 2009. Further, US-VISIT will establish an initial 24/7 support and analytical capability that is not currently provided by any DHS organization. A program office hardware refresh of PCs and peripherals is also planned.

**Enhance Program Management** - (Program Management in the FY 2007 Expenditure Plan). US-VISIT provides mission support functions to ensure that the program has the appropriate planning activities, human capital, budget and financial resources, technical support, acquisition policies and procedures and facilities and logistics support to execute its mission. These are critical functions that directly support overall program direction and control. In addition, organization staffing provides support to all US-VISIT activities. Staffing constitutes a major expenditure area, comprising all Federal staff and contractor support. These program and project resources are applied across the full spectrum of the program. These staff resources are directly involved in mission accomplishments; including capability development, identity services, and operations and maintenance, as well as mission support staffing.

|                                   | <b>FY 2008 Enacted</b> | <b>FY 2009 Request</b> |
|-----------------------------------|------------------------|------------------------|
| <b>Enhance Program Management</b> | <b>\$115,200,000</b>   | <b>\$120,052,000</b>   |

US-VISIT will use the requested funds for:

- *Program Staffing (Program Management in the FY 2007 Expenditure Plan)* – Provides the resources for program strategic direction and control functions. This area constitutes a major

expenditure, comprised of all Federal staff (e.g., salaries, benefits and staff development), federally funded research and development services, and contractor program management support. Contractor services provide essential experience required to support US-VISIT, as well as needed staffing resources to supplement the Federal staff, enabling program and project development and deployment and delivery of US-VISIT capabilities. These resources (government and contractor) are applied across the full spectrum of the program. These resources are directly involved in mission accomplishment, including capability development, identity management and screening services and infrastructure support. Additionally, these resources provide for program activities such as strategic planning and policy, budget and financial management and program control.

- *Program Operations* - Provides for the physical facilities to maintain the program office for government personnel and on-site contractors. Expenditures cover unallocated program administration and logistics such as rent, building management services, equipment maintenance, communications support, and physical security and DHS central administrative services through the DHS working capital fund.

### **FY 2007 Accomplishments**

During FY 2007, US-VISIT developed a strategic framework document providing the basis for revising the US-VISIT strategic plan. The document, in conjunction with revised DHS investment review documents, enabled US-VISIT to comply with the DHS investment review process. Additionally, US-VISIT implemented improved requirements for new reimbursable agreements enhancing the probability of successful performance and reduced risk. The use of these refined approaches within US-VISIT was institutionalized through inclusion in the Program's Contract Administration Master Plan. Further, US-VISIT continued the implementation of contract level oversight plans for new task order and contract awards, a best practice recommended by GAO.

In compliance with OMB policy, US-VISIT extended Earned Value Management System (EVMS) reporting to its mission support contractors. Further, in conformance with the FY 2007 Expenditure Plan commitment, US-VISIT commissioned an external review of the prime integrator's EVMS by the Defense Contract Management Agency (DCMA), a recognized domain expert. The initial five day on-site engagement was completed in June 2007. The prime integrator is developing a plan of action and schedule to address significant findings from the DCMA audit. US-VISIT continues to monitor the corrective actions of the prime integrator based on DCMA's documented findings from their Preliminary Assessment Visit. DCMA is scheduled to complete their EVMS validation review of the primer integrator in the spring of 2008.

In FY 2007, US-VISIT completed major acquisitions, including: (1) the acquisition of fingerprint scanners required for enabling 10 print capture; (2) new fingerprint matchers to support the increasing identification workload; and (3) termination of the contract for O&M for the earlier Air and Sea Exit pilots.

Improvements in Budgeting and Accountability processes included:

- The use of templates in developing the FY 2008 Expenditure Plan to focus development of a plan that reported results against FY 2007 plans, reported project performance against schedule and cost estimates and explained divergences, aligned project capabilities, benefits, and indicators of results, and provided a clearer explanation of infrastructure (specifically O&M) and mission support costs as well as describing results.

- US-VISIT improved cost estimating methodologies and practices. A program-level cost estimating and analysis process was developed and implemented to adopt cost estimating best practices in the areas of program and project cost estimation, life-cycle cost model development and independent government cost estimations. These improvements yielded increased rigor and quality of cost estimations, better support during the annual budget formulation process, improved program and project cost management, and program financial accountability.
- The implementation of a GAO recommendation resolution process establishing clear roles and responsibilities for actions, establishment of mitigation plans with milestones, and a twice monthly follow up process.
- Program-wide quarterly Program Management Reviews (PMRs) are now conducted as comprehensive evaluations where project managers and functional areas present standardized reports showing progress against plans, risks and issues, accomplishments and challenges. These evaluations ensure a common understanding of approaches, issues, risks and challenges across the Program, and contribute to consistent, well-informed management decisions.
- US-VISIT increased its mission support maturity by developing the Planning, Programming, Budgeting and Execution (PPBE) process, supporting the program in systematically securing, managing and monitoring funds and resources. The PPBE process document clearly defines each phase and process of the budget cycle as well as depicts the interaction of the process with investment management, performance management, and various other US-VISIT financial management processes and activities.
- Scheduled Integrated Baseline Reviews were conducted on appropriate new US-VISIT contracts.
- Monthly Contract Performance Reporting – earned value management is considered as a requirement for new US-VISIT contracts, and is incorporated into contracts as appropriate in accordance with external guidance.
- Project teams hold regular Integrated Project Team meetings where progress is reviewed, team member’s issues and risks discussed and future plans reviewed. Roles and responsibilities for project monitoring and control activities are now more clearly defined in project plans. Both program and project level monitoring and control activities over artifacts in project repositories have been improving, ensuring program wide visibility of current status, approaches, and issues.

The FY 2004 Human Capital Plan was re-examined in light of the challenges of a maturing organization with an evolving mission. The resulting Human Capital Strategic Plan drafted in FY 2007, will provide the structure, framework, and recommendations needed to implement workforce planning and staff development in FY 2008.

US-VISIT published five Privacy Impact Assessments and three Systems of Records Notices to maintain compliance with privacy legislation and regulations. Thus, the US-VISIT goal of protecting an individual’s privacy rights is achieved.

US-VISIT led DHS efforts regarding biometric standards, coordination and research through organizing and hosting the International Biometrics and Ethics Conference; representing DHS interests and requirements for biometric standards by participating in the International Committee for Information Technology Standards; and developing, through joint effort with the National Science Technology Council's Subcommittee on Biometrics and Identity Management and the NCTC, the interagency policy guidance document for development and use of biometric standards, which furthers

interoperability of biometric systems and helps DHS meet information its sharing goals with other Federal agencies.

### **FY 2008 Planned Accomplishments**

In FY 2008, US-VISIT plans to further the progress by:

- Develop a revised strategic plan recognizing the congressional and departmental mandates on US-VISIT within the National Protection and Programs Directorate (NPPD).
- Complete at least one externally led Capability Maturity Model Integrated (CMMI) appraisal, currently scheduled for January 2008. If US-VISIT decides to adopt the new CMMI Acquisition (CMMI-ACQ) model, which is expected to become the de facto community approach for acquisition based programs, there could be some impact on future operations.
- Achieve recognition by GAO that the program has completed, or is making substantial progress toward, addressing audit recommendations
- Advance the Enterprise Life Cycle Methodology (ELCM) by developing program-specific templates across program branches and processes to ensure that the artifacts are standardized across the program. This will assist US-VISIT in meeting its strategic goals by ensuring key issues are addressed early and efficiently. The program will deploy ELCM incremental releases to expand upon the current methodology assuring appropriate artifact templates support individual phases of the lifecycle. Additionally, US-VISIT will institutionalize adherence to DHS privacy mandates by ensuring that all artifact templates will adhere to privacy requirements, further safeguarding the privacy of our citizens and visitors.
- Improve internal governance by refining the investment decision process. Establish an unfunded requirements list to align with budget execution. Augment the investment initiation process and internal governance procedures of the decision boards with criteria and reviews relative to supporting Program Assessment Rating Tool (PART), Life Cycle Cost Estimation, and software capitalization processes. Improve the capture of performance measurement, cost estimation, and capitalization information for decision-making. Continue to simplify and align US-VISIT program investment, budgeting, acquisition, and project management reporting within the internal governance structure, to include refining the investment review operations to encompass portfolio management capabilities. Integrate and align the US-VISIT Internal Governance structure with the approved external governance structure, thresholds, and program review operations within NPPD. Move toward portfolio management prioritization, tracking and assessment, including tailoring management reviews and artifacts based on risk level and reporting-level factors to provide for better categorization of projects for periodic progress reviews.
- Further reduce the prime integrator enterprise costs. Efforts will address remaining weaknesses identified in the 2007 appraisals, improved use of measures to report progress of activities, incorporating well planned out monitoring and control activities that can be tracked in project team meetings and corrective action taken when necessary.
- Work with the prime integrator to achieve full certification of its EVMS system, to include addressing the DCMA audit findings and plan of action submitted to the DCMA in September 2007.
- Improve contractor performance to stay within 10 percent range of cost and schedule variance.

- Demonstrate tangible progress to GAO in addressing open recommendations through active management of responsive mitigation plans.
- Completion of an Exit Cost Benefit Analysis (CBA).
- Complete acquisition actions in search of productivity improvements, such as re-competition of the fingerprint examiner contract for the BSC and reconsideration of the contract for DIG analytical support.
- Completion of a work force analysis to determine proper alignment of US-VISIT program staffing to tasks. Develop a plan for implementing recommendations.
- Improved vacancy-to-onboard-employee ratio measured from FY 2007 to FY 2008.
- Address privacy and policy issues to facilitate data sharing with the domestic and international immigration and border management community.
- Continue as the DHS lead in the development of biometric standards (both national and international) to facilitate technology interoperability and biometric data sharing. Monitor progress, evaluate, and prepare technical contributions to projects of interest to US-VISIT and other programs within DHS.

### **FY 2009 Projected Accomplishments**

Using the requested FY 2009 funds, US-VISIT will continue to augment and build on earlier achievements by:

- Completing acquisition actions, including development and execution of a strategy regarding the prime integrator, and contractor mission support.
- Responding to the new CMMI-ACQ model which is expected to become the accepted model for process improvement in FY 2008.
- Implementing modifications to the government guidelines on acquisition strategy as required enabling the prime integrator to achieve certification.
- Continue as the DHS lead in the development of biometric standards, with primary focus on adoption of the international standards to support current and future DHS capabilities.
- Maintaining contractor performance within the 10 percent range of Cost and Schedule variance.
- Demonstrating tangible progress to GAO in addressing open recommendations through active management of responsive mitigation plans.
- Implementing the workforce plan resulting from the FY 2008 independent analysis of US-VISIT program staffing. Improve the ratio of Federal personnel to contractor support by filling authorized government positions.
- Further refining the US-VISIT PPBE process, drawing upon the revised strategic plan and improvements in the program Life Cycle Cost Estimates.
- Incorporating the GAO Cost Assessment Guide into program cost estimating practices.
- Maintaining program management bench strength at US-VISIT at 25 program management certifications.

- Conducting an annual review of all individual performance plans in the context of the Human Capital Strategic Plan to ensure employee goals support US-VISIT requirements.
- Completing training governance for Federal partners in support of 10 fingerprint capture technology. Governance will ensure the Federal partners' compliance with training best practices, thereby supporting the operational objectives of 10 print technology.
- Completing and implementing a Continuity of Operations Plan and a Pandemic Influenza Plan.
- Completing American Indian Government-to-Government Relations Policy in the third quarter. The Policy will formalize US-VISIT's commitment to working with the American Indian Tribes in all US-VISIT environmental projects that may affect Tribal interests.
- Sending the Supplementary National Environment Protection Act (NEPA) procedures to DHS Chief of Administrative Services by the second fiscal quarter for approval accompanying a request for signatory authority for NEPA analyses and documentation. Supplementary NEPA procedures and signatory authority will allow US-VISIT to act as sole authority for its environmental analyses and documentation.

#### IV. Program Justification of Changes

**Program Increase 1:** **Comprehensive Biometric Exit**

DHS Goal(s) & Objective(s): 1.3

PPA: US-VISIT

Program Increase: Positions 0 FTE 0 Dollars \$42,553,000

Funding profile (\$ in thousands)

| <b>Total Request</b>   | <b>0</b>       | <b>0</b> | <b>\$7,300</b>  | <b>0</b>        | <b>0</b> | <b>\$13,000</b> | <b>0</b>        | <b>0</b> | <b>\$55,533</b> |

Description of Item:

DHS is committed to establishing a comprehensive biometric-based entry and exit border system that provides real benefits. US-VISIT will develop a comprehensive exit solution to be delivered through two work streams – the air/sea environment and the land environment – with the initial focus on the commercial aviation departures and vessel carriers industry.

To achieve this objective, DHS will work with Federal partners and stakeholders, the transportation industry, airport, and seaport authorities to define and develop the operational, policy and technology investment decisions for the air and sea environment. Additionally, as part of the Comprehensive Biometric Exit Solution, US-VISIT will work with partners to leverage a long-term land exit strategy.

Justification:

US-VISIT will use the requested funds to address problems proposed by the limitations of matching biographic exit records to the associated entry records. Development and delivery of a comprehensive exit solution will increase exit compliance and enable an improved matching of exit records to entry records using biometric data, as compared to the existing biographic system. This exit solution will provide a system to determine which travelers have left the country and which travelers have not.

To support development of an air and sea biometric solution, US-VISIT will use requested funds to procure necessary infrastructure, data storage, or other support services to ensure the exit system is efficient, effective, and operates with minimal impact on the international travel process.

In FY 2009, US-VISIT will begin the planning and analysis phase for the land environment portion of the Comprehensive Biometric Exit Solution. This will encompass an alternatives analysis to evaluate technologies, process changes, and data sharing in conjunction with other border management initiatives. There will also be an analysis of impacts to physical facilities as well as operations and staffing assessments at land POEs. This process will require time and motion studies, surveys, and modeling techniques for an accurate assessment of the impacts to facilities and operations. As part of the planning and analysis process, a concept of operations and business requirements will be generated

for moving into initial design activities. US-VISIT will also assess technical infrastructure of border management systems and at POEs to determine expansion required to support exit processing.

Impact on Performance (Relationship of Increase to Strategic Goals):

The Comprehensive Biometric Exit Solution supports the DHS Goal 1.3 by addressing the limitations of matching biographic exit records with entry records. This solution delivers considerable benefits for immigration and border management as well as law enforcement and intelligence communities by providing the capability to accurately document the exit of travelers including the ability to conduct trend analysis on arrivals and departures in all three environments. Accurately identifying travelers who have remained in the United States beyond their authorized Period of Admission (commonly referred to as “overstays”) will allow DHS to focus limited resources to address known (“confirmed”) overstays and thereby permitting DHS and DOS to place a greater emphasis on properly adjudicating applications for admission along with travel and immigration benefits. This initiative also supports the Intelligence Reform Act 2004, improving the integrity of the immigration system.

Quantitative measures of performance for exit include the monitoring of increases in the rate of matching exit records to entry records. This ability to match records will also increase the coverage of the traveler population as exit capabilities are expanded within the three environments.

**Program Increase 2:**

**Identity Management and Screening Services**

(US-VISIT Program Services – Biometric and Data Integrity in the FY 2007 Expenditure Plan)

DHS Goal(s) & Objective(s): 1.3

PPA: US-VISIT

Program Increase: Positions 0 FTE 0 Dollars \$4,200,000

Funding Profile (\$ in thousands)

|                        | FY 2007 Actual |          |                 | FY 2008 Enacted |          |                 | FY 2009 Request |          |                 |

| <b>Total Request</b>   | <b>0</b>       | <b>0</b> | <b>\$15,400</b> | <b>0</b>        | <b>0</b> | <b>\$15,800</b> | <b>0</b>        | <b>0</b> | <b>\$20,000</b> |

Description of Item:

DHS has created a requirement for an enhanced analytical and tactical environment. This requirement focused on providing biometric identity screening services to law enforcement, intelligence and civil stakeholders with timely, accurate, and actionable information. US-VISIT is uniquely positioned to meet this requirement as the world’s largest repository of biometric data. US-VISIT can provide an identity service to stakeholders based on a verified starting point, a “biometric,” which can be linked with all associated biographic indicators to provide full identity (actual and alias).

Justification:

*Interoperability Support.* The additional funds are needed as DHS works to complete the biometric interoperability between the US-VISIT IDENT system and the FBI IAFIS system. IDENT will return a biometrically confirmed set of information comprised of limited biographic information and a biometric record identifier to an expanded set of CJIS law enforcement users. The returned information will not include the full immigration or encounter information on each subject, resulting in a need from the expanded set of interoperability users to follow-up on the information provided by US-VISIT.

ICE operates the Law Enforcement Support Center (LESC), which responds to State and local law enforcement inquiries to determine an individual’s immigration status. As many of these interoperability-related referrals do not require a determination of immigration status, it may be more appropriate to establish response capabilities within US-VISIT, which can triage incoming referrals and reduce the impact to the LESL, allowing them to maintain their immigration investigative focus.

As a data steward, US-VISIT will have insight into biometrically verified information that results in referrals to the LESL for further action. Failure to respond in a timely manner to all users of the interoperable enterprise could have negative mission impacts including misidentifications or release of violators.

*Intelligence Community Support.* US-VISIT can provide a biometric identity service on persons of interest to the intelligence community, marrying the biometric and biographic identifiers. In order to be compliant with HSPD-6, where all information pertaining to known and suspected terrorists must be shared with the NCTC for international terrorists and the FBI for purely domestic terrorists, US-VISIT must be able to verify and validate its information in a timely manner and provide any applicable US-

VISIT information on known and suspected terrorists to both law enforcement and the intelligence community.

DHS needs to have the ability to research identities of subjects of interests derived from or linking to a biometric record and to provide a robust dossier to both law enforcement and intelligence analysts to better support investigation, missions, and threat analysis. Failure to link subjects of interest in the intelligence community to biometrics or promote them to the US-VISIT biometric watch list represents potential national security vulnerabilities.

*Overstay Analysis.* Currently, the US-VISIT ADIS identifies more than 17,000 records per week as in-country overstays based on air and sea arrivals only. The US-VISIT DIG performs additional system checks on these records to validate the status and forwards only validated, probable in-country overstay records for ICE for follow on investigative action. The DIG reviews more than 10,000 ADIS system identified in-country overstays per week (9,000 through batch processing and 1,000 through manual vetting); 7,000 records per week are not reviewed. This program change will allow for up to 25 percent of these records to be reviewed and analyzed. If a traveler overstays his/her authorized Period of Admission, and is correctly identified as an overstay in ADIS, but the record is not reviewed and validated, then that person could remain in the United States without being referred to ICE as an overstay. DIG review and validation is critical to identification of overstays.

Impact on Performance (Relationship of Increase to Strategic Goals):

The leveraging and analysis of actionable biometric hits supports DHS Objective 1.3 by expanding available biometric information to state and local law enforcement, critical infrastructure and intelligence community users. US-VISIT further supports this Objective by expanding the number of users who may identify overstays, criminals, national security threats and biometric watch list candidates for subsequent action. Additionally, US-VISIT identity services provides analysis on actionable biometric hits to refine the biometric watch list information for immigration and border management, intelligence, and biometric credentialing and access screening.

demands and transfer of the US-VISIT operations to only one DOJ site, while other US-VISIT services and applications are at the DHS consolidated data center.

In FY 2009, US-VISIT will continue the acquisitions for the required infrastructure components (networking, data communications, servers, data storage devices, along with required software licenses) to complete the first data center migration phase and subsequent disaster recovery phase at a second DHS data center (geographically redundant). The US-VISIT systems and application components that remain at the DOJ data center sites will be relocated to the second DHS data center.

As the demands (data volumes, data storage and users) for biometric and identity based services continues to increase and expand, the US-VISIT operational infrastructure must be in place and ready in the new data centers. In order for US-VISIT to continue supporting enterprise shared services and projects such as the U.S. Coast Guard Mona Pass and the Transportation Worker Credentialing, additional data storage, hardware, and data center services will be acquired for these additional users, transaction volumes, data storage in order to meet the SLAs for services.

Impact on Performance (Relationship of Increase to Strategic Goals):

This program change continues US-VISIT's support of DHS Objectives 1.3, Continuing to Protect our Nation from Dangerous People.

**Program Increase 4:****Enhance Program Management**

(Program Management in the FY 2007 Expenditure Plan)

**Description of Item:**

Mission support provides comprehensive management services to ensure that the program has the appropriate human capital, financial resources, technical and project management processes, policies, and physical plant to execute its services.

**Justification:**

The 35 FTPs requested will be spread across the US-VISIT organization to support the continued increase in program services and mission support functions. These requested FTPs will consist of one Senior Executive Service position, one General Schedule Grade 15 (GS-15) position, four General Schedule Grade 14 (GS-14) positions, and 29 General Schedule Grade 13 (GS-13) positions. These requested FTEs will enhance current mission support functions that are critical to overall program direction and control. These broad functions within mission support include:

- *Strategic planning, policy, and privacy* – US-VISIT is revising its strategic plan to recognize evolving mandates resulting from its move to NPPD and its designation as the center for biometric expertise within DHS. In this regard, US-VISIT represents DHS in numerous forums in efforts to advance standards of biometric identity and to coordinate biometric standards across DHS. Ensuring the privacy of foreign travelers is a fundamental US-VISIT goal, and it ensures compliance with all DHS privacy mandates.
- *Program monitoring and control* - US-VISIT is working across the program to improve its processes and practices for maintaining program control and accountability. Activities in this area include improvements in ELCM and internal governance, progressing toward a CMMI external assessment, acquisition management, and improvements in budget and accountability processes.
- *Public Education* - The US-VISIT public education program supports the achievement of the US-VISIT mission by executing a global education program that informs and engages stakeholders, including international travelers; helps ensure smooth execution of US-VISIT milestones; achieves widespread compliance of US-VISIT requirements; and maintains partnerships and promotes collaboration with public and private entities, and international, Federal, State and local governments.

- *Human Capital Management and Stakeholder Training* – Effective human capital management strategies are fundamental to program success and to support of DHS mission accomplishment. Stakeholder training is essential for effective deployment of new functionality, such as 10-Print and Interoperability.
- *Program Office Logistics* - Provides the physical facilities necessary to maintain program office operations for 115 government personnel and 100 on-site contractors. Expenditures cover unallocated program administration and logistic activities such as rent, building management services, equipment maintenance, communications support, physical security, and DHS central administrative services. Also included are the US-VISIT contributions to the DHS working capital fund and the mission support reserve to cover unforeseen risk-related project cost increases.

Impact on Performance (Relationship of Increase to Strategic Goals):

This program change continues US-VISIT's support of DHS Strategic Objectives 1.3 through effective strategic planning is essential to instituting results-oriented management and effectively participating in the DHS Planning, Programming, Budgeting and Execution process. US-VISIT is revising its strategic plan to recognize changing expectations, revising its documentation for the DHS investment review process to align with its evolving mission, and improving the program justification materials reported in budget documents, and expenditure plans.

As the center of DHS expertise on biometrics, US-VISIT has responsibilities for furthering biometric standards and ensuring that biometric capabilities across DHS components are compatible and developed and implemented efficiently. Further support of the DHS Secretary's Priorities relating to biometric policy and planning will be to: (1) further develop standards for biometric technologies for DHS that are compatible with international protocols, privacy concerns and legal restrictions; (2) work with strategic partners to develop biometrically-based identity management systems in support of their immigration and border control missions; and (3) assist strategic partners in development of biometric identity management systems through the development of biometric expertise through the participation in international, national, and agency level forums on the development of biometric standards. Through the biometric capture of identity information, US-VISIT will further enhance DHS' capability to conduct fact-based, risk-based, and predictive assessments, thus reducing the potential for individuals who pose a threat or who are intent on violating our laws from entering the United States.

Ensuring DHS privacy requirements are met is critical to ensuring continued foreign traveler acceptance of US-VISIT processing.

Improving program monitoring and control processes is fundamental to reducing program risk including regular appraisals of US-VISIT planning, implementation and management capability in vital areas of program lifecycles using reference models (e.g. CMMI) that have proven effective; working to make measured improvements in US- VISIT management practices to address identified weaknesses from appraisals; repeating improvement cycles to implement higher levels of capabilities in more advanced process areas; and resolving GAO recommendations concerning cost estimation, process improvement, program context, and privacy.

**Program Decrease 1: Unique Identity (10-Print/IDENT/IAFIS)**

DHS Goal(s) & Objective(s): 1.3

PPA: US-VISIT

Program Decrease: Positions 0 FTE 0 Dollars (\$161,632,000)

Description of Item:

The funding received in FY 2008 provided for the 10-Print deployment and the IDENT/IAFIS Initial Operating Capability. These two initiatives delivered the capabilities to biometrically screen foreign visitors requesting entry to the United States through the collection of 10 prints at enrollment in US-VISIT and less than 10 print identity verifications upon subsequent encounters. Enhanced interoperability with IDENT and IAFIS provided quicker searches and improved data sharing between the two biometric systems.

Justification:

The 10-Print implementation and IDENT/IAFIS Interoperability initiatives provided the capability to biometrically screen foreign visitors requesting entry to the United States through the collection of 10 prints at enrollment and verification of identity using less than 10 print upon subsequent encounters. This fingerprint standard improved the ability to match enrollees' fingerprints against latent prints, mitigate concerns about false positives when matching enrollees against poor quality prints, ensured faster processing time in order to resolve false positives.

IDENT/IAFIS Interoperability provided the interoperability between two biometric systems. This initiative built upon the interim data sharing capability (iDSM), achieved in FY 2006. FY 2008 provided funding for a more comprehensive biometric and case screening, scaled for transaction throughput and gallery size and provided enhancements to access the FBI/CJIS criminal files.

In FY 2009, US-VISIT will begin to design, build and test full operating capability. Additionally, these funds initiate the "Rap Back" capabilities across IDENT and IAFIS to search the fingerprint galleries using a one-time identifier as a search criteria. During this phase, a new service will be integrated into IAFIS that will allow authorized agencies to receive notification of criminal activity for individuals in a position of trust; complete the full 10 print matching capability within IDENT to increase accuracy and the number of fingerprints searched; and initiate the development of the Immigration Data Response capability that allows selected FBI/CJIS stakeholders to access immigration violation information.

Impact on Performance (Relationship of Increase to Strategic Goals):

The Unique Identity initiative continues to support the DHS Objective 1.3. Unique Identity integrates work streams for further development of 10-print capture and achievements in interoperability between IDENT and IAFIS. The use of a 10 fingerprint standard facilitates travel by reducing the number of travelers referred to secondary inspection, since the 10-prints provide more matchable data, thus reducing false positives. Also, there are greater opportunities to identify persons of interest since 10-prints are more likely to be matched with latent fingerprints maintained in criminal and intelligence biometric databases. Criminal and intelligence biometric databases are based on fingerprints collected from crime scenes or terrorist locations.

Interoperability increases the volume of biometric data available for use by border management, intelligence and law enforcement agencies. When used in conjunction with matching of 10 prints, the enhanced data sharing increases the probability of identifying persons of interest and taking appropriate law enforcement actions.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
National Protection and Programs Directorate**

**United States Visitor and Immigrant Status Indicator Technology**

**Justification of Proposed Changes in US-VISIT  
Appropriation Language**

For necessary expenses for the development of the United States Visitor and Immigrant Status Indicator Technology project, as authorized by section 110 of the Illegal Immigration Reform and Immigration Responsibility Act of 1996 (8 U.S.C. 1365a), [\$475,000,000] \$390,300,000 to remain available until expended.

**Explanation of Changes:**

No substantive changes proposed.

**B. FY 2008 to FY 2009 Budget Change**

**Department of Homeland Security  
National Protection and Programs Directorate**

**United States Visitor and Immigrant Status Indicator Technology**

## PPA Mission Statement

The United States Visitor and Immigrant Status Indicator Technology project provides immigration and travel information on the activities of foreign nationals before they enter, when they enter, and when they exit the United States. The Program has established four goals to accomplish its mission: (1) enhance the security of our citizens and visitors, (2) facilitate legitimate travel and trade, (3) ensure the integrity of our immigration system, and (4) protect the privacy of our visitors. For FY 2009, US-VISIT made changes to the object classification of activities which should provide more visibility and better comparability in the future. The object classification narratives provide explanations where re-classification resulted in 2008 to 2009 deltas.

### Summary of Justification and Explanation of Changes

|                              | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|------------------------------|----------------|-----------------|-----------------|------------------------|
| <b>Salaries and Benefits</b> | \$14,128       | \$16,591        | \$18,092        | \$1,501                |

The request includes funding for 102 FTEs, proposed cost of living allowance, medical benefits, and other mandatory personnel entitlements including the annualization of the 2008 cost of living increase of \$145,000 and the 2009 cost of living increase of \$361,000 using the pay inflation factor of three percent.

|               | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---------------|----------------|-----------------|-----------------|------------------------|
| <b>Travel</b> | \$360          | \$1,040         | \$400           | (\$640)                |

The request includes a decrease of \$640,000 for transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal Travel Regulations. These funds will be used for implementation of IDENT/IAFIS Interoperability – full operating capability, working with strategic foreign stakeholders in an information sharing and technical assistance capacity, and communications with Canada and Mexico data sharing regarding the comprehensive biometric exit.

|                                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---------------------------------|----------------|-----------------|-----------------|------------------------|
| <b>Transportation of Things</b> | \$18           | \$203           | \$22            | (\$181)                |

The request includes a decrease of \$181,000 for the transportation of US-VISIT equipment (workstations, cameras, readers, etc.).

|                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|-----------------|----------------|-----------------|-----------------|------------------------|
| <b>GSA rent</b> | \$4,906        | \$6,066         | \$4,260         | (\$1,806)              |

The request includes a decrease of \$1,806,000 for all payments to the General Services Administration for rental of office space and rent related services.

|                   | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|-------------------|----------------|-----------------|-----------------|------------------------|
| <b>Other Rent</b> | \$555          | \$0             | \$1,577         | \$1,577                |

The request includes an increase of \$1,577,000 for all payments for rental or leases (information technology equipment and services for the US-VISIT Program, and other rental related services). These expenses are correctly classified in FY 2009.

|  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|--|----------------|-----------------|-----------------|------------------------|
| <b>Communication, Utilities, and Miscellaneous Charges</b> | \$507          | \$60            | \$500           | \$440                  |

The request includes an increase of \$44,000 for information technology services of data and voice from other Federal agency providers, postal and courier services, utilities such as heat, electricity, and other program office facility type services. The majority of the FY 2009 increase is due to changes in expense classification.

|   | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---|----------------|-----------------|-----------------|------------------------|
| <b>Advisory and Assistance Services</b> | \$60,353       | \$30,979        | \$58,959        | \$27,980               |

The request includes an increase of \$27,980,000 for management and professional support services (program, studies, analyses, and evaluations that are of a engineering and technical nature, the design, development and deployment of the Comprehensive Biometric Exit capability, IDENT/IAFIS Interoperability – full operating capability, improved organization mission support, logistics, project monitoring and reporting, data collection, budgeting, accounting, performance auditing, and administrative and technical support). The majority of the object class increase is classification changes.

|                       | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|-----------------------|----------------|-----------------|-----------------|------------------------|
| <b>Other Services</b> | \$109,283      | \$353,764       | \$120,599       | (\$233,165)            |

The request include a decrease of \$233,165,000 for contractual services with non-Federal sources for program office support, interagency agreements for services (equipment staging, data center application hosting and data communications including additional services for development of software applications and operations and maintenance of delivered capability in earlier fiscal years). The majority of the decrease is due re-classification of expenses.

|  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|--|----------------|-----------------|-----------------|------------------------|
| <b>Purchase from Government Accounts</b> | \$20,639       | \$9,700         | \$20,928        | \$11,228               |

The request includes an increase of \$11,228,000 interagency agreements for contractual services (data center, applications support, network operations and integrated testing of software applications).

|  | 2007           | 2008           | 2009           | 2008 to 2009   |
|--|----------------|----------------|----------------|----------------|
|  | Actual         | Enacted        | Request        | Change         |
| <b>Operation &amp; Maintenance of Facilities</b> | <b>\$5,485</b> | <b>\$4,260</b> | <b>\$5,500</b> | <b>\$1,240</b> |

The request includes an increase of \$1,240,000 for services provide by contract (security of the building, climate control, and general service and routine repair of the facilities). The majority of the increase within this object class is due re-classification of expenses.

|   | 2007            | 2008            | 2009             | 2008 to 2009    |
|---|-----------------|-----------------|------------------|-----------------|
|   | Actual          | Enacted         | Request          | Change          |
| <b>Operation &amp; Maintenance of Equipment</b> | <b>\$83,221</b> | <b>\$17,822</b> | <b>\$105,668</b> | <b>\$87,846</b> |

The request includes an increase of \$87,846 for storage and care of information technology systems (contract based equipment maintenance and data center operations). The majority of the increase within this object class is due re-classification of expenses.

|                                 | 2007         | 2008         | 2009         | 2008 to 2009   |
|---------------------------------|--------------|--------------|--------------|----------------|
|                                 | Actual       | Enacted      | Request      | Change         |
| <b>Supplies &amp; materials</b> | <b>\$155</b> | <b>\$988</b> | <b>\$325</b> | <b>(\$663)</b> |

The request includes a decrease of \$663,000 for consumable supplies and materials.

|                  | 2007            | 2008            | 2009            | 2008 to 2009    |
|------------------|-----------------|-----------------|-----------------|-----------------|
|                  | Actual          | Enacted         | Request         | Change          |
| <b>Equipment</b> | <b>\$43,106</b> | <b>\$33,527</b> | <b>\$53,470</b> | <b>\$19,943</b> |

The request includes an increase of \$19,943,000 additional matchers for the 10-Print initiate and IDENT/IAFIS interoperability - full operating capability expansion to support anticipated users and volumes.

## **A. Mission and Description**

The National Protection and Programs Directorate (NPPD) is a diverse organization with a vital, cross-cutting, and unifying mission of risk reduction. The Directorate works to reduce risks to the Nation through five mission areas: protect the Nation's citizens and visitors against dangerous people; protect the Nation's physical infrastructure; protect the Nation's cyber and communications infrastructure; strengthen the Department's risk management platform; strengthen partnerships and foster collaboration and interoperability.

**Protecting the Nation's Citizens and Visitors against Dangerous People.** NPPD works with its Federal, State, local, and private sector partners to guard against threats posed by terrorists and other criminals intending to do harm to the United States. NPPD works with domestic and international organizations to monitor the status of known individuals or groups that pose a threat to physical and/or cyber infrastructure. NPPD provides critical biometric-based information to border officers, law enforcement and other decision-makers about persons of interest. Additionally, the Directorate helps prevent document and identity fraud that threatens the integrity of the immigration process and the safety of foreign visitors.

**Protecting the Nation's Physical Infrastructure.** NPPD leads the coordinated effort to reduce risk to the Nation's critical infrastructure and key resources (CIKR) from acts of terrorism, natural disasters, and other devastating emergencies by integrating and disseminating CIKR threat, consequence, and vulnerability information; developing risk mitigation strategies; and overseeing the national plan for protecting the Nation's infrastructure (National Infrastructure Protection Plan). These efforts help ensure that essential government missions, public services, and economic functions are maintained, and that CIKR elements are not exploited for use as weapons of mass destruction against people or institutions in the event of an act of terrorism, natural disaster, or catastrophic incident.

**Protecting the Nation's Cyber and Communications Infrastructure.** NPPD leads the Federal Government's collaboration with public, private, and international partners to ensure the security and continuity of the Nation's cyber and communications infrastructures in the event of acts of terrorism, national disasters, and other catastrophic incidents. Additionally, NPPD protects and strengthens the reliability, survivability and interoperability of the Nation's communications capabilities, including those utilized during emergencies, at the Federal, State, local, and tribal levels.

**Strengthening the Department of Homeland Security's Risk Management Platform.** NPPD leads the Department's effort to establish a common framework to address the overall management and analysis of homeland security risk with a focus on standardizing and integrating risk management approaches used across the Department. NPPD will ensure that all individual risk programs utilize common risk approaches and methodologies, lexicon, training standards, and data collection structures.

**Strengthening Partnerships and Fostering Collaboration and Interoperability.** NPPD coordinates Department-wide activities and plans with those of State, local and tribal government partners, and serves as a liaison with the Department for those partners. NPPD engages with public and private sector partners to ensure effective information exchange, collaboration, and contributes to the development of synchronized doctrines at the national and regional levels.

## **B. Major Activities and Key Strategic Goals**

The major activities for NPPD in FY 2009 are presented in the structure of the performance based budget as reflected in the DHS Future Years Homeland Security Program (FYHSP). FY 2008 activities include: *Infrastructure Protection, Cyber Security and Communications, the United States Visitor and Immigrant Status Indicator Technology (US-VISIT) Program, and Management and Administration.*

**Infrastructure Protection.** Infrastructure Protection (IP) leads the coordinated national effort to reduce the risk to critical infrastructures and key resources (CIKR) and increases the Nation's preparedness and ability to quickly respond and recover in the event of an attack, natural disaster, or other emergency. IP enhances protection, response, mitigation, and restoration activities by sharing information on threats, vulnerabilities, incidents, protective measures, and best practices with national and international security partners. Additionally, IP provides operational support to government and private entities through the National Infrastructure Protection Plan (NIPP) and mechanisms under the National Response Plan. The NIPP identifies seventeen key CIKR sectors, including agriculture and food; defense industrial base; energy; public health and health care; national monuments and icons; banking and finance; drinking water and water treatment facilities; chemical; commercial facilities; dams; emergency services; nuclear reactors, materials and waste; information technology; communications; postal and shipping; transportation systems; and government facilities. The program works directly to protect the Nation's CIKR assets by serving as the designated Sector Specific Agency (SSA) for five of the seventeen sectors – Dams, Emergency Services, Nuclear, Chemical, and Commercial Facilities. IP ensures that a governance and information-sharing framework is maintained for all seventeen sectors, as well as communicating standards to infrastructure owners, operators and key stakeholders. In 2007, IP was designated to establish and enforce a regulatory security framework for the Nation's high risk chemical facilities. IP works across all sectors to identify and prioritize CIKR based on risk and support government, private sector, and international entities in coordinating CIKR protection. As part of this responsibility, the program facilitates and conducts a variety of CIKR vulnerability assessments.

In FY 2009, NPPD requests \$272,800,000 to perform and enhance IP activities, an increase of \$204,000 over the FY 2008 enacted of \$272,596,000.

### FY 2007 Accomplishments

- Completed and released 17 Sector Specific Plans (SSPs) for infrastructure protection, which identify requirements and processes that guide the 17 CIKR sectors' protection efforts across the Nation as they look at their own unique risk landscapes.
- Established a coordinating council for State, local, tribal, and territorial governments and formed 17 critical infrastructure government and sector coordinating councils to increase collaboration and coordination among stakeholders.
- Developed national standards for chemical facility security, a comprehensive set of regulations to improve security at high-risk chemical facilities nationwide. Interim Final Regulations were published on April 9, 2007, implementing Section 550 of P.L. 195-295. Established an initial core inspection capability with Federal Protective Service employees and began initial site assistance visits of expected Tier 1 chemical facilities.

- In cooperation with the Department's Office of Health Affairs, completed a study of the impacts of pandemic influenza on the Nation's critical infrastructure, economy, and population, providing policy recommendations and risk mitigation strategies.
- Deployed eight new critical infrastructure security specialists to metropolitan areas designated as Protective Security Advisor (PSA) districts across the United States and territories. A total of 78 Protective Security Advisors conducted over 5,655 liaison visits to local jurisdictions and facilities.
- Based on the lessons learned from the 2005 Hurricane Season, IP built additional incident coordination capability and integrated its operations more closely with those of the Department to enhance protection of CIKR through close collaboration with State and local partners.
- Completed Comprehensive Reviews of 28 nuclear power plants and 5 high-risk chemical regions. Completed 200 Buffer Zone Plans that guided the award of \$50 million in Buffer Zone Protection Project grant funds to increase local law enforcement capabilities.
- Conducted 41 on-site Improvised Explosive Device awareness-level education workshops to State and municipal leadership. Assisted over 100 State and local jurisdictions in developing Underwater Terrorism Prevention Plans for 16 high risk ports.

#### FY 2008 Planned Accomplishments

- Sustain implementation of the NIPP and fully initiate implementation of all SSPs. Collaborate with the 17 Sector Specific Agencies (SSAs) to expand the CIKR measurement and analysis process and address gaps in CIKR protection programs that may be revealed as SSPs mature and National and Sector CIKR Protection Annual Reports are assessed.
- Initiate Phase 2 of the Chemical Security Assessment Tool (CSAT) program, which includes conducting inspections of Tier 1 and 2 facilities and receiving/reviewing vulnerability assessment and security plan submission packages. CSAT will provide an interactive risk management tool, allowing users to conduct "What if" evaluations of potential options and security measures for high-risk facilities. The CSAT tool serves as a system for comprehensive analysis and review of key data and documents received from chemical facilities.
- Identify resource requirements and develop pilots in coordination with other government partners that address the highest priority common risks and interdependencies. Common technology requirements will be assessed in partnership with the Department's Science & Technology Directorate and in coordination with National Infrastructure Simulation and Analysis Center (NISAC) and other national lab programs.
- Integrate ten National Guard teams into the Vulnerability Assessment Project and conduct approximately 300 vulnerability assessments on Tier 1 and 2 CIKR.
- Conduct the high-risk cluster assessment pilot on 72 assets in the Lower Manhattan Security Initiative and 24 assets in the District of Columbia Metroplex Initiative. These assessments will allow Infrastructure Protection to evaluate and enhance the methodology to conduct full scale High-Risk Infrastructure Cluster assessments in following years.
- Complete capabilities analyses of fifty percent of public safety bomb squads and ten percent of dive teams, and begin analyses of explosive detection canine teams to develop a baseline assessment of current national IED security capabilities through the National Capabilities Analysis Database (NCAD).

- Establish the initial capability for an Infrastructure Information Collection Program (IICP) system to integrate information management, assessment, and geospatial capabilities and tools.

#### FY 2009 Projected Accomplishments

- Implement CSAT version 2.0, providing chemical facilities with the ability to conduct “what if” analyses based on their risk assessments and a personnel surety capability. Transition from a detailee inspector cadre to a fully trained and equipped IP inspector cadre of over 229 inspectors located in at least 10 primary field offices around the Nation. Continue Tier 1 and 2 facility inspections as periodically required and begin devoting resources toward lower tier inspections.
- Develop a protective measures tool that will track and electronically visualize risk reduction based on empirical data gathered from protective measures and mitigation strategies implemented at Tier 1 and 2 CIKR.
- Conduct approximately 315 vulnerability assessments on Tier 1 and 2 CIKR, utilizing the National Guard in coordination and collaboration with Federal, State, local, and private sector partners. Conduct between 3-5 High-Risk Infrastructure Cluster assessments in Urban Area Security Initiative (UASI) jurisdictions to identify vulnerabilities and security gaps. A portion of the UASI grant will be used to mitigate vulnerabilities and fill security gaps through protective measures as identified in the High-Risk Infrastructure Cluster assessment.
- Assess and report progress on risk mitigation pilots common to multiple sectors and those addressing high-risk interdependencies. Perform an annual review of the Sector CIKR Protection Annual Reports to identify additional gaps within and across the 17 CIKR sectors, and incorporate identified gaps into the prioritization process for investment and mitigation—including needs for research and development and modeling and analysis.
- Deploy ten additional PSAs to States that currently do not have a PSA located within their boundaries.
- Develop a comprehensive Continuity of Operations-Pandemic Influenza training and exercise program

**Cyber Security and Communications.** Cyber Security and Communications (CS&C) improves the security, resiliency, and reliability of the Nation’s cyber and communications infrastructure in collaboration with public, private sector, and international partners. CS&C focuses on preparing for and responding to catastrophic incidents that could degrade or overwhelm the networks, systems, and assets that operate the Nation’s information technology (IT) and communications infrastructure. Additionally, CS&C supports and accelerates the ability of emergency responders and government officials at all levels of government to attain interoperable emergency communications, and functions as the Federal coordinator for cyber security, communications, and Nation-wide interoperability planning.

***National Cyber Security Division.*** The National Cyber Security Division (NCSA) executes a variety of programs intended to: (1) partner with the private sector, government, military, and intelligence stakeholders in risk assessment, and threat and vulnerability reduction to critical IT assets and activities that affect the operation of the critical infrastructures of the U.S.; and (2) provide cyber threat and vulnerability analysis, early warning, and incident response assistance for public and private sector constituents.

In FY 2009, NCSD requests \$293,500,000 to perform and enhance cyber security activities, an increase of \$83,087,000 over the FY 2008 enacted of \$210,413,000.

#### FY 2007 Accomplishments

- Increased cyber security situational awareness by deploying the Einstein Program at an additional three Federal agencies, increasing overall deployment to twelve Federal agencies. Einstein is a collection of hardware and software that supports an automated process to collect, correlate, analyze, and share cyber security information in defense of Federal Government networks.
- Responded to 37,213 cyber security incidents, an increase of more than 50 percent over the previous year. The increase is due not only to more attacks on public and private networks but also to increased situational awareness levels and reporting rates.
- Worked with Federal agency partners and industry technical experts to assess a significant control systems vulnerability and developed sector-specific mitigation plans. The jointly-developed mitigation guidance allowed owners and operators within the affected sectors to take deliberate and decisive actions to reduce significantly the risk associated with this vulnerability.
- Developed, in partnership with the IT Sector Coordinating Council (SCC) and IT Government Coordinating Council (GCC), the first joint public-private sector IT Sector Specific Plan (SSP). The IT SSP will improve the cyber security posture of the IT industrial base by identifying and managing risk, improving situational awareness and information sharing, and enhancing capabilities to protect, prevent, respond to, and recover from events.
- Collaborated with the intelligence community and the Homeland Infrastructure Threat and Risk Analysis Center (HITRAC) to develop the Strategic Homeland Infrastructure Risk Assessment (SHIRA). The SHIRA program develops a methodology for comparing and prioritizing risk across all 17 CIKR sectors, and the analysis derived from this methodology serves as the National CIKR Risk Profile in the National CIKR Protection Annual Report.
- Established the Cross-Sector Cyber Security Working Group (CSCSWG) to address cross sector cyber risk assessment and interdependencies. The CSCSWG will serve as a forum for bringing the government and the private sector together to address common cyber security challenges and opportunities across the CIKR sectors.

#### FY 2008 Planned Accomplishments

- Deploy the Einstein Program to the remaining Cabinet-level Departments. Design, initiate and test Einstein's 'Next Generation' architecture, including initiating a pilot with a participating Einstein partner agency to test the success of the architecture. Create reports and new information products as the Program expands to new agencies.
- Increase manpower to support a 24/7 United States Computer Emergency Readiness Team (US-CERT) Operation Center which will provide in-depth incident tracking, detection, and mitigation support to all US-CERT constituents.
- Complete the IT Sector risk assessment methodology. Develop a baseline IT Sector risk assessment and overall IT Sector risk profile by identifying and assessing vulnerabilities, threats, and consequences.
- Convene a threat product working group with HITRAC and IT Sector security partners to ensure the incorporation of cyber security expertise into products and briefings and

facilitate the dissemination of high quality analytical and threat/warning products to IT Sector and other CIKR Sector cyber stakeholders.

- Release the Control Systems Cyber Security Assessment Tool (CS2SAT) licensed under an agreement with a cross-sector control systems industry organization. Work with other distributors and licensees as needed to provide distribution avenues for all control systems security stakeholders.
- Plan and execute national and regional cyber exercises including Top Officials 4 (T4) and Cyber Storm II, as well as exercises with the states of Vermont and Massachusetts.

#### FY 2009 Projected Accomplishments

- Initiate migration of existing Einstein customer base to Einstein 'Next Generation' architecture and technology.
- Collaborate with the IT Sector Coordinating Council to facilitate the coordination of policy development, CIKR protection planning, and IT Sector Specific Plan implementation activities. Distribute the automated cyber security vulnerability assessment methodology across the CIKR sectors.
- Conduct joint discussions with the Communications Sector on risk and protective program effectiveness and requirements for new protective programs.
- Begin prototyping Cyber Exercise Range, which will provide the capability to execute technical level cyber exercises for departments and agencies in future exercises.
- Establish cyber incident response capabilities within the US-CERT/NCC Operations Center that routinely incorporate international information sharing and collaboration.

***National Communications System.*** The National Communications System (NCS) uses its appropriation to provide mission-critical communications for Federal, State and local governments, and private industry through the following activities: (1) The exercise of homeland security-related telecommunications functions and responsibilities, and (2) The coordination of the planning for and provision of national security and emergency preparedness communications for the Federal government under all circumstances, including crisis or emergency, attack & recovery and reconstitution.

In FY 2009, the program requests \$236,600,000 to perform and enhance NCS activities, an increase of \$100,579,000 over FY 2008 enacted of \$136,021,000. In FY 2009, the administration of the LORAN-C program will migrate to the NPPD from the United States Coast Guard (USCG) in preparation for conversion of LORAN-C operations to Enhanced Long Range Navigation (eLORAN). The FY 2009 budget transfers the budget authority of \$34,500,000 for the LORAN-C system from the USCG to the NCS.

#### FY 2007 Accomplishments

- Performed detailed analysis of telecommunications infrastructure in support of emergency response operations, national and regional exercises, and preparedness and contingency planning. Assessments supported preparations and response operations for 21 natural and man-made incidents, two national security and special events, and four major national and

regional exercises. Completed in-depth regional characterizations of telecommunications infrastructure for seven high priority metropolitan areas.

- Achieved greater than 98% call completion rate for the priority telecommunications service during periods of network congestion.
- Completed development of core National Security/Emergency Preparedness (NS/EP) industry requirements needed to migrate priority telecommunications functionality onto carriers' Next Generation Networks (NGN). The NGN is the technical response to the gradual migration of the public, circuit-switched telephony networks to Internet protocol (IP) based packet infrastructure.
- Issued National Security Telecommunications Advisory Committee (NSTAC) reports and recommendations to the President on Global Infrastructure Resiliency, telecommunications and electric power interdependencies, emergency communications and interoperability, and international telecommunications issues.
- Acquired secure mobile communication devices for 56 governors and 35 heads of agencies in support of the National Command and Coordination Capability (NCCC).

#### FY 2008 Planned Accomplishments

- Conduct Proof of Concept Demonstrations for Priority NS/EP Next Generation Networks Video Teleconferencing capability which will enable priority point-to-point video and multi-point video teleconferencing.
- Conduct the Emergency Support Function #2 (ESF #2) Winter Training Conference to familiarize all Emergency Communication Team personnel with the current operating procedures, communications technologies, and their application in a no-notice Incident of National Significance. Developing instructional materials and teaching job-specific skills to communications team members who may be deployed for emergency response..
- Conduct risk assessments of high interest telecommunications assets.
- Complete initial operating capability (IOC) System Definition Review (SDR) and Critical Design Review (CDR) that will define the requirements baseline, system design, and business process update needed to ensure a successful IOC for the NCCC.

#### FY 2009 Projected Accomplishments

- Ensure that 90% of the Executive Departments and Agencies have Government Emergency Telecommunications (GETS) cards and Wireless Priority Service (WPS) access at their headquarters facilities and alternate operating facilities in support of Continuity of Operations and Continuity of Government requirements.
- Conduct the 2009 Telecommunications Electromagnetic Disruptive Effects (TEDE) Analysis to Communications Systems. Examine potential vulnerabilities in the commercial satellite infrastructure and develop mitigation methods to bring commercial satellite infrastructure into conformance with a standard for mitigating vulnerabilities.
- Provide 24/7/365 operations support through the National Coordination Center (NCC) Watch program to identify, analyze, mitigate and respond to threats and vulnerabilities to the Nation's critical communications infrastructure.
- Conduct telecommunications vulnerability, impact and risk assessment analyses and implement a quantitative methodology to measure effectiveness of telecommunications

mitigation strategies. Produce a 2009 risk assessment of the threat to and vulnerability of the Public Network.

- Develop and update plans, policies and procedures to support ESF #2 operations relating to the 15 National Planning Scenarios. Coordinate interagency participation on ESF #2 operations in national and regional exercises.
- Deploy the National Command and Coordination Capability (NCCC) Initial Operating Capability (IOC) to select sites and define Final Operating Capability (FOC) requirements.

***Office of Emergency Communications.*** The Office of Emergency Communications (OEC) supports and promotes the adoption of capabilities that enhance interoperability or the ability of emergency response providers and Federal officials to continue to communicate in the event of natural disasters, acts of terrorism, or other man-made disasters. The mission is executed through four major subprograms: (1) National Policy, Planning, and Analysis; (2) Regional Coordination and Outreach; (3) Interoperable Communications Integration and Technical Services; (4) Emergency Communications Response and Recovery Services.

In FY 2009, OEC requests \$38,300,000 to perform and enhance OEC activities, an increase of \$3,400,000 over the FY 2008 enacted of \$35,700,000.

#### FY 2007 Accomplishments

- Developed and exercised Emergency Communications Teams that deploy to the incident and coordinate with the communications industry, Federal, State, and local partners to restore national security and emergency preparedness communications, first responder communications, and the communications infrastructure. Interagency Emergency Communications Team members and industry stakeholders convene twice annually to exercise their capabilities and train personnel on the latest technologies and procedures
- Provided guidance and technical assistance to State, local and tribal governments to advance interoperable emergency communications, with particular emphasis on the development of the required Statewide Interoperable Communications Plans (SCIP) and Public Safety Interoperable Communications (PSIC) Grant Program Investment Justifications (IJs). 42 of 56 States and territories developed and submitted preliminary SCIPs by September 30, 2007.
- Developed the charter for the Emergency Communication Preparedness Center (ECPC) and established the administrative support functions required to facilitate interagency collaboration and the development of the first national strategic assessment.

#### FY 2008 Planned Accomplishments

- Develop the National Emergency Communications Plan (NECP) in cooperation with other Federal agencies, State, local and tribal governments, emergency response providers and the private sector. The Plan will leverage the knowledge accumulated by past governmental and stakeholder efforts to characterize existing capabilities, current requirements, and anticipated technological advancement to establish short and long-term goals for ensuring and enhancing emergency communications nationwide.
- Develop grant guidance in collaboration with Office of Interoperability and Compatibility (OIC) and Federal Emergency Management Agency (FEMA), for the Interoperable Emergency Communications Grant Program and other departmental programs for

emergency communications, to ensure that grant selection criteria adequately reflects national emergency communications strategic and planning objectives.

- Support the 2010 Olympics Communications and Interoperable Working Group Committee.

#### FY 2009 Projected Accomplishments

- Complete 2nd Biennial National Emergency Communications Progress report on the state of interoperable emergency communications capabilities.
- Complete 2 regional integrated exercises to evaluate interoperable emergency communications capabilities under more realistic circumstances and communicate the findings to participants. These exercises also support preparation of the National Emergency Communications Progress report

**US-VISIT Program.** The US-VISIT program collects, maintains, and shares information, including biometric identifiers, on foreign visitors to assist in determining whether an individual should be prohibited from entering the United States; can receive, extend, change, or adjust immigration status; has overstayed or otherwise violated the terms of admission; should be apprehended or detained for law enforcement action; or needs special protection or attention (e.g., refugees).

In FY 2009, US-VISIT requests \$390,300,000 for ongoing operations, including the implementation of initiatives and deployment of previously planned capabilities, a decrease of \$84,700,000 over the FY 2008 enacted of \$475,000,000.

#### FY 2007 Accomplishments

- Identified suspected individuals through biometric matching capabilities and supported crime solving through latent print identification. During FY 2007, more than 160,000 individuals were biometrically matched against the US-VISIT watch list. Latent print identification capability identified 129 previously unidentified individuals.
- Increased overstay identification. US-VISIT more than doubled its production of validated in-country overstay records. The figures increased from approximately 4,000 in FY 2006 to more than 11,600 in FY 2007. At the same time, US-VISIT increased its production of validated out-of-country lookouts from approximately 450 in FY 2006 to almost 7,355 in FY 2007. Over 720 enforcement actions were taken in FY 2007 based on overstay validation work.
- Ensured the US-VISIT biometric watch list is accurate and actionable. US-VISIT reviewed approximately 450 biometric watch list encounters each week. Additionally, US-VISIT made more than 5,300 watch list demotions in FY 2007 that enabled the Department, DOS, intelligence, and law enforcement officers to focus on more records that are actionable, and promoted approximately 4,100 records, which resulted in 153 encounters. Based on its watch list reviews, US-VISIT decreased the number of unnecessary referrals to secondary inspection and minimized traveler inconvenience.
- Transitioned to 10-Print for enrollment and began Automated Biometric Identification System/Integrated Automated Fingerprint Identification System (IDENT/IAFIS) Interoperability. US-VISIT and the FBI also began to share limited biometric immigration information relating to expedited removals and Department of State's BioVisa refusals using the Interim Data Sharing Model (iDSM) capabilities.

- Developed unique identifier for database records. The U.S. Citizenship and Immigration Service (USCIS) Adoption Pilot demonstrated capabilities to create a unique identifier (“enumerator”). The unique identifier links all biometric records associated with an individual and is established when a person’s biometrics are enrolled in IDENT.
- Enhanced remote biometric identity verification. Working with the U.S. Coast Guard, US-VISIT enhanced security by effectively extending biometric identity verification to remote locations where no traditional fixed information technology infrastructure existed or was cost-effective to establish.

#### FY 2008 Planned Accomplishments

- Enhance the Arrival and Departure Information System (ADIS) system to include integration of arrival I-94 and National Security Entry/Exit Registration System (NSEERS) data into ADIS; incorporate continuous data integrity improvements to ADIS to maximize the operational utility so that the arrival match rate will increase to approximately 97 percent. These upgrades to system and data integrity will help meet growing stakeholder needs.
- Increase biometric data sharing with other agencies and governments. US-VISIT will enhance biometric information and formalize processes with the Department of Defense (DOD) to include identities on the biometric watch lists of high-threat subjects encountered by the US military primarily in Iraq and Afghanistan. US-VISIT will also expand the 4CC initiative to include vetting persons who are in the United States but who are applying for a visa in the United Kingdom. The 4CC is the 4 Country Conference composed of the United States, United Kingdom, Canada, and Australia established to encourage biometric data sharing globally.
- Deliver the Public Key Directory Validation Service (PKD VS). This service will be delivered in the first quarter and builds on the e-Passport reader solution by offering technology that verifies and authenticates the original of the e-Passport chip. This validation service will add a valuable, additional layer of security to the e-Passport.
- Complete 10-Print Pilot at ten locations. In partnership with Customs and Border Protection (CBP), US-VISIT will complete the 10-Print Pilot and conduct an evaluation of the results. US-VISIT will leverage the information gathered in the 10-Print Pilot and use the results to deploy 10-Print readers to all Ports of Entry (POE).

#### FY 2009 Projected Accomplishments

- Begin to design, build and test full operating capability (FOC) for interoperability; initiate the “Rap Back” capabilities across IDENT and IAFIS to search the fingerprint databases using a one-time identifier as search criteria within the IAFIS galleries. During the FOC phase, a new service will be integrated into IAFIS that will allow authorized agencies to receive notification of criminal activity for individuals in a position of trust; complete the full 10-print matching capability within IDENT to increase the accuracy and number of fingerprint searches; and begin development of the Immigration Data Response capability that allows selected CJIS stakeholders to access immigration violation information.
- Deploy necessary infrastructure upgrades, along with increased storage capacity to meet workload demands resulting from implementation of Air/Sea exit. This will ensure the traveler departure process is unencumbered with increased wait times that could result from slower system response times.
- Proceed with planning and analysis for the land portion of the Comprehensive Exit Solution. This will encompass an alternatives analysis to evaluate technologies, process changes, and

data sharing in conjunction with other border management initiatives. As part of the plan and analyze process, a concept of operations and business requirements will be generated and serve as part of the basis for moving into initial design activities. US-VISIT will also assess technical infrastructure of border management systems and at POEs to determine expansion required to support exit processing.

- Establish an initial 24/7 support and analytical capability consisting of analysts who will research biometrically verified hits against IDENT data stores. Responses to these queries submitted by contributing agencies, departmental entities, critical infrastructure facilities and others, will leverage the full capability of US-VISIT's biometric and biographic systems and data stores. This new 24/7 capability will also communicate new and changing information with other relevant Federal, State, local and tribal governments and provide enhanced analytic services leveraging US-VISIT's biometric and biographic systems.

**Management and Administration.** Management and Administration (M&A) directs and assists the programs within the Directorate to reduce the risk of attack against the nation by protecting critical physical and cyber infrastructure, guarding against threats posed by foreign travelers to the country, and by standardizing the Department's approach to the analysis and management of potential risks to the Nation. This requires concerted leadership, coordination, outreach and partnerships among multiple Homeland Security agencies, the national preparedness and response community of federal agencies, State and local governments, tribal organizations, the private sector, and the American public

*Directorate Administration.* Administration directs and assists the Directorate's programs to enhance the protection of America's critical infrastructure and key resources. This appropriation supports activities associated with the Office of the Under Secretary, NPPD Administration, Information Technology, and Information Management and Business Culture. Together these activities provide Directorate leadership, budgeting, financial execution, human capital, security, program review and evaluation, executive secretariat functions, information technology support, facilities build out, rent and security services.

In FY 2009, NPPD requests \$43,100,000 to perform these functions, an increase of \$5,066,000 over the FY 2008 level. In FY 2008, NPPD received \$37,934,000 for Administration activities.

*Intergovernmental Programs.* Intergovernmental Programs (IGP) coordinates Department-wide activities and plans with those of State, local and tribal government partners, and serves as a liaison with the Department for those partners. IGP engages with public and private sector partners to ensure effective information exchange, collaboration, and supervises the development of synchronized doctrines at the national and regional levels. In FY 2009, NPPD requests \$2,000,000 for IGP

#### FY 2007 Accomplishments

- Participated in local field conferences in an effort to discuss and address State and local issues and concerns with the Southwest Border Fence.
- Guided the establishment of the Domestic Nuclear Detection Office's External Programs Office, which has become a model of how to work with State, local, tribal and territorial governments.
- Worked with the Department of Commerce to rollout the \$1 billion Public Safety Interoperability Communication Grant Program (PSIC).

- Worked in partnership with the Department of Health and Human Services (HHS) when the President directed Pandemic Influenza summits be hosted in all states and territories to ensure the Nation is prepared for an influenza pandemic.
- Chaired a comprehensive briefing for the Mayors of Denver, Minneapolis and St. Paul regarding the role DHS plays in National Special Security Events (NSSEs).

***Risk Management and Analysis.*** Risk Management and Analysis (RMA) leads the Department's efforts to establish a common framework to address the overall management and analysis of homeland security risk. RMA supports development of a consistent, standardized, coordinated and collaborative approach to risk management, and allows RMA to direct and integrate risk expertise across Department components as well as external stakeholders.

In FY 2009, NPPD requests \$9,500,000 for RMA, and increase of \$88,000 over FY 2008 enacted of \$9,412,000.

#### FY 2007 Accomplishments

- Established a Department Risk Steering Committee (RSC) to assist in the framing of processes and procedures for the Department risk management architecture. The committee membership includes component principals, sub-component principals, and action officers. The RSC process will be the framework for enabling collaboration and Department-wide integration and agreement on risk management efforts.
- Established the process for development of a Department-wide risk comparison tool to help inform the Departmental resource allocation process – currently, this ongoing effort is known as Risk Assessment Process for Informed Decision-making (RAPID). The RAPID effort has resulted in a broader understanding of the complexities of assessing risk across multiple, unrelated, and interrelated areas spanning the breadth of the Department's mission space.
- Refined and improved the risk methodology for analyzing non-National Special Security Events (NSSE). The risk methodology informs the process for building the Special Events Awareness Report (SEAR), a comprehensive awareness tool utilized by the Department, FBI and other inter-agency partners.
- Collaborated with the Office of National Capital Region, and the State and local members of that region to assist in the development of a regional risk assessment tool.

#### FY 2008 Planned Accomplishments

- Establish Department risk management framework which threads the National strategies and policies, statutory requirements, Secretary's goals and priorities, and National plans with the components' risk methodologies.
- Develop an integrative Risk Reduction Program by identifying public and private best practices; develop risk reduction measurement techniques - to include assisting Department components; develop consequence, threat, and vulnerability analysis modules – as they pertain to risk reduction; develop a departmental inventory of cost/benefit analysis methods; analyze differences of existing methodologies.
- Prototype RAPID to inform the Future Year Homeland Security Program development process.

- Develop self-assessment tools for conducting risk management performance assessments and develop a Departmental scorecard.

#### FY 2009 Projected Accomplishments

- Prototype a regional risk assessment capability. RMA, in coordination with the Office of National Capital Region (NCR) and Washington Council of Governments, framed a process for the development of a regional risk assessment program that would identify and prioritize hazards to the regional community.
- Develop and prototype an integrative incident-driven risk analysis process to best inform the operational decision making process. Risk analysis is the process by which risks are identified and evaluated. Risk analysis during an incident is essential for addressing the variable descriptions and proxies that are used to derive threat, vulnerability, and consequence
- Further development of a “Risk Performance Report”- This will be an annual report on the progress that the Department is making towards maturing the risk management programs within DHS. The report will be an important tool for implementing and monitoring the progress of a national risk management program.

#### **Strategic Issues Facing the National Protection and Programs Directorate**

1. Expanding and strengthening relationships, both within and beyond the Directorate, to continue developing an integrated, national approach to assessing risks to and ensuring security of the homeland.
2. Reducing risks to the Nation’s critical infrastructure and key resources, both physical and virtual
  - a. Coordinating defense and responses to cyber attacks across the Nation; analyzing and reducing cyber threats and vulnerabilities; disseminating cyber threat warning information; and coordinating incident response activities to emerging and evolving cyber threats.
  - b. Implementing the Chemical Facility Anti-Terrorism Standards regulatory program.
  - c. Successfully implementing the National Infrastructure Protection Plan and 17 Sector Specific Plans to effectively manage the risks to the Nation’s CIKR.
  - d. Expanding capacity to respond to multiple simultaneous events and build additional capabilities to do vulnerability analysis, remediation, and public disclosure on severe incidents.
3. Ensuring emergency response providers and Federal officials have the ability to communicate in the event of natural disasters, acts of terrorism, or other man-made disasters.
  - a. Promote the ability of emergency response providers and Federal officials to continue to communicate in the event of natural disasters, acts of terrorism, or other man-made disasters, and to ensure, accelerate, and attain interoperable emergency communications nation-wide.
  - b. Enhance the communications infrastructure to accommodate next generation technologies and enable NS/EP users to communicate when the next generation networks are damaged and congested

- c. Providing improved crisis management capabilities that are vital for the next crisis. This will include robust situational awareness to leadership at all levels and improved collaboration capabilities for all hazards and all scenarios.
4. Executing a continuum of visitor identification and identity document security measures to enhance the security of the United States while facilitating legitimate travel and trade and protecting visitors' privacy.
  - a. Develop and implement a plan for the land portion of the Comprehensive Biometric Exit Solution.
  - b. Expand available biometric information to State and local law enforcement and intelligence community users to improve the identification of overstay, criminals, national security threats and biometric watch list candidates for subsequent action.

### **C. Resources Requested and Performance Impact**

In FY 2009, NPPD requests \$1,286M (849 FTE), an increase of \$109M and 189 FTE over FY 2008 appropriated amount of \$1,177M (664 FTE).

#### ***Major Changes within the Base Level***

- 2009 pay increase and 2008 pay inflation: 3.0% for the last quarter of calendar year 2008, and 2.9% inflation for the first three quarters of 2009.
- Annualization of 107 FY 2008 new positions: 54 FTE and \$7,713,000 (12 IP/Infrastructure Security Compliance, 23 NCS/US-CERT, 18 OEC, 1 NCCC).
- Transfer of the e-Long Range Aids to Navigation (e-LORAN) program from the United States Coast Guard to the National Communications Service (\$34.5M and 0 FTE).

#### ***Major Program Increases***

##### **Infrastructure Protection**

###### **Chemical Security Program \$10.8M (45 FTE)**

This enhancement permits continued implementation and execution of this congressionally mandated program. This funding will provide for a properly sized and trained DHS inspection cadre and ongoing operation and maintenance of the Chemical Security Assessment Tool (CSAT) system. This enhancement will provide 26 additional inspection personnel to drive compliance efforts at high-risk facilities.

###### **Protective Security Advisors \$1.4M (5 FTE)**

This enhancement will place Protective Security Advisors (PSAs) in the 10 states that currently do not have PSAs. Additional PSAs will coordinate service and resource requests from State, local, and private owners and operators in the States to include training, scheduling of Site Assistance Visits (SAVs), Buffer Zone Protection Plans (BZPs), Comprehensive Reviews (CRs), and verification and technical assistance visits.

##### **Cyber Security & Communications**

###### **United States Computer Emergency Readiness Team \$79.9M (23 FTE)**

This enhancement will enable United States Computer Emergency Readiness Team (US-CERT) to continue its mission to protect our Nation's internet infrastructure by coordinating defense against and response to cyber attacks, enhancing US-CERT's ability to analyze and

reduce cyber threats and vulnerabilities, to disseminate cyber threat warning information, and to coordinate incident response activities. Additionally, these funds will allow US-CERT to maintain optimal performance, and to expand its cyber security activities so that it keeps pace with an increasingly threatening environment.

**Control Systems Security Program** **\$6.0M (0 FTE)**

This enhancement will permit the Control Systems Security Program (CSSP) to fully meet the Department's goal of protecting critical infrastructure and key resources by securing control systems. The increase supports implementing the national strategy for securing control systems, collaborating with international stakeholders, raising awareness of control systems issues, providing training, and reducing risk by widely distributing the cross-sector, self-assessment tool. Additionally, the program will use the funds for discovering and identifying control systems specific vulnerabilities and developing corresponding mitigation plans, analyzing malicious software, developing incident response capabilities, and providing security recommendations for next generation systems.

**Next Generation Networks** **\$34.9M (0 FTE)**

This enhancement will continue the development and deployment of Next Generation Network (NGN) to support Government Emergency Telecommunications Service (GETS), Wireless Priority Service (WPS), and Special Routing and Arrangement Service (SRAS). This funding will support the vendor design, development, and testing of NGN NS/EP priority capabilities across multiple vendors and acquire service within the core Internet Protocol (IP) networks. Funding will also support vendor development and testing of NGN NS/EP wireless priority broadband services across multiple wireless vendors and wireless service providers accessing the core IP networks.

**National Command and Control Capability (NCCC)** **\$57.0M (7 FTE)**

This enhancement will permit the development, implementation, and operation of the National Command and Control Capability (NCCC). The NCCC will deploy multi-security level connectivity for voice, video and data to priority state and DHS sites for improved collaboration and coordination capability. In addition, the NCCC will field a suite of secure/non secure mobile communication services equipment to key leadership.

## US-VISIT

**US-VISIT Comprehensive Biometric Exit** **\$42.6M (0 FTE)**

The requested funds will address problems proposed by the limitations of matching biographic exit records to the associated entry records. This includes development and delivery of a comprehensive exit solution that will increase exit compliance and enable an improved matching of exit records to entry records using biometric data, as compared to the existing biographic system. This exit solution will provide a system to determine which travelers have left the country and which travelers have not. US-VISIT will begin the planning and analysis phase for the land environment portion of the Comprehensive Biometric Exit Solution. This will encompass an alternatives analysis to evaluate technologies, process changes, and data sharing in conjunction with other border management initiatives.

**US-VISIT Operations and Maintenance** **\$25.3M (0 FTE)**

The requested funds will support acquisitions for the required infrastructure components (networking, data communications, servers, data storage devices, along with required software licenses) to complete the first data center migration phase and subsequent disaster recovery phase at a second Department-mandated data center. Additionally, in order for US-VISIT to continue

supporting enterprise shared services and customers, including the U.S. Coast Guard Mona Pass and TSA TWIC programs, additional data storage, hardware, and data center services will be acquired for these additional users, transaction volumes, and data storage in order to meet the Service Level Agreements.

## **Management and Administration**

### **NPPD Directorate Administration**

**\$5.0M (12 FTE)**

The requested positions will allow NPPD and the Directorate Administration to build institutional knowledge and expertise. In many critical business operations, information technology, and information management areas, the staff consists of one Federal government employee supported by contractors. Additional Federal staff will provide a knowledgeable Federal workforce that will support the growth of the Department, ensure accurate and coordinated responses to key stakeholders, oversight agencies and Congress, and provide continuity of services, skills, and accountability.

### **Intergovernmental Programs**

**\$2.0M (17FTE)**

Intergovernmental Programs acts as an advocate for State, local, tribal, and territorial officials within the DHS, and operates as the primary liaison between those officials and DHS leadership. The office facilitates an integrated national approach to homeland security by coordinating and advancing federal interaction with State, local, tribal, and territorial governments. Intergovernmental Programs is not a new start in FY 2009.

### D. Program Performance Highlights, Resources, and Alignment to Strategic Goals

For each major program, the performance goal, alignment to DHS goals and objectives, total dollars and FTE, and main performance measure/s are shown below. For many of the programs, more performance information may be found on the OMB web site Expectmore.gov (program names may differ slightly from those used in this document).

| <b>Program: Infrastructure Protection</b>  |         |           |           |           |           |           |
|--|---------|-----------|-----------|-----------|-----------|-----------|
| <b>Performance Goal:</b> Improve the protection of the Nation's high risk and most valued critical infrastructure and key resources (CIKR) by characterizing and prioritizing assets, modeling and planning protective actions, and building partnerships. |         |           |           |           |           |           |
| <b>DHS strategic objectives supported and % allocation of activities:</b><br>Objective 3.1 - 100%  |         |           |           |           |           |           |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005   | FY 2006   | FY 2007   | FY 2008   | FY 2009   |
| <b>\$ Thousands</b>  | None    | \$311,806 | \$311,381 | \$299,460 | \$284,020 | \$284,895 |
| <b>FTE</b>   | None    | 201       | 201       | 252       | 340       | 411       |

### Performance Plan Measures

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of inspected high-risk chemical facilities in compliance with risk based performance standards.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> The program conducts onsite inspections to provide regulatory oversight of the Nation's high-risk chemical facilities and verify compliance with the Chemical Facility Anti-terrorism Standards (CFATS). Inspections are conducted in intervals commensurate with the defined risk tiering of each facility. Compliance means that chemical facilities have been inspected to validate the facility's Site Security Plan (SSP) and that the SSP is in accordance with the Risk-Based Performance Standards set forth by DHS, or that the facility is seeking/will seek remedies to identified security gaps. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | None    | None    | None    | 75%     | 85%     |
| <b>Actual:</b>  | None    | None    | None    | None    | N/A     | N/A     |

|  |         |         |         |         |         |         |
|--|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of Critical Infrastructure and Key Resource (CIKR) sector specific planning protection implementation actions on track.  |         |         |         |         |         |         |
| <b>Description of Measure:</b> The National Infrastructure Protection Plan (NIPP) defines a set of 23 core metrics applied across the 17 CIKR sectors, for a total of 391 total metrics. These metrics track the success of actions taken to further protection and partnership building activities are being conducted within each sector. Specifically the metrics track the implementation of planned sector accomplishments in Sector Partnerships, Information Sharing, Security Goals, Asset Identification, Risk Assessments, Prioritization, Implement Protective Programs, and Effectiveness. Subject matter experts score each sectors' responses to the 23 metrics; the program then employs an algorithm to determine overall scores and success for each metric. An action is initiated upon the allocation of resources toward that action or through an agreement, e.g. and MOU, MOA, etc. This measure evaluates annually the percent of the 391 total protection action metrics that were scored as being on track. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>   | None    | None    | None    | N/A     | 90%     | 90%     |
| <b>Actual:</b>   | None    | None    | None    | None    | N/A     | N/A     |

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of high priority CIKR where a vulnerability assessment has been conducted and enhancement(s) have been implemented.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure tracks the number of the Nation's high priority CIKR sites at which at least one vulnerability assessments (VA) has been conducted and a protective enhancement has been implemented. High-priority CIKR include assets categorized in Tier 1 (assets deemed to be at highest risk) and other CIKR assets IP plans to assess in the fiscal year. Vulnerability assessments are conducted to identify physical, cyber, and human-related vulnerabilities at an asset and dependencies/interdependencies on other assets and sectors. During vulnerability assessments the program's assessors identify suitable protective measures and enhancements needed to reduce or mitigate vulnerability of the asset and identify what enhancements have been implemented at the site (such as bollards, razor wire, closed-circuit television cameras, etc.). The assessments are also used to assist federal stakeholders and private sector owners in making optimal resource allocation decisions for future enhancements. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | None    | None    | N/A     | 95%     | 95%     |
| <b>Actual:</b>  | None    | None    | None    | None    | N/A     | N/A     |

|   |         |           |           |           |           |           |
|---|---------|-----------|-----------|-----------|-----------|-----------|
| <b>Program: Cyber Security and Communications</b>   |         |           |           |           |           |           |
| <b>Performance Goal:</b> Improve the security and interoperability of America's cyber and emergency preparedness communications assets by working collaboratively with public, private, and international entities. |         |           |           |           |           |           |
| <b>DHS strategic objectives supported and % allocation of activities:</b><br>Objective 3.1 - 89%<br>Objective 4.1 - 11%   |         |           |           |           |           |           |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005   | FY 2006   | FY 2007   | FY 2008   | FY 2009   |
| <b>\$ Thousands</b>   | None    | \$234,074 | \$261,317 | \$298,339 | \$398,149 | \$593,601 |
| <b>FTE</b>  | None    | 46        | 106       | 141       | 195       | 293       |

### Performance Plan Measures

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of targeted stakeholders who have implemented the Control Systems Security Self Assessment Tool (CS2SAT) to conduct vulnerability assessments   |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure evaluates the use of the CS2SAT tool to help asset owner and operators conduct assessments to identify and mitigate vulnerabilities in their control systems. This measure will require the program to track the distribution of the CS2SAT tool to the owner/operator level. Information regarding the implementation of this tool will be collected across control system owners/operators at the annual Process Control Systems Forum and the International Instrumentation Symposium. This measure will be computed as follows: number of targeted stakeholders that have implemented the CS2SAT divided by the total number of targeted stakeholders |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | None    | None    | N/A     | 25%     | 50%     |
| <b>Actual:</b>  | None    | None    | None    | None    | N/A     | N/A     |

|  |         |         |         |         |         |         |
|--|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of planned Einstein sensors deployed on-time annually throughout the Federal Government.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure assesses the number of Einstein sensors installed across the Federal government. With the full implementation of these sensors, visibility into the potentially malicious cyber activity and throughout the Federal cyberspace will dramatically increase. The sensors will provide more comprehensive situational awareness information to better understand the current environment and identify vulnerabilities, risks, and mitigation actions. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>   | None    | None    | None    | N/A     | 100%    | 100%    |
| <b>Actual:</b>   | None    | None    | None    | None    | N/A     | N/A     |

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Priority services call completion rate during emergency communications periods.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> NS/EP call completion rate is the probability an NS/EP user will be able to use the public telephone network, landline or wireless, to communicate with the intended user/location/system/etc. Call completion is the measure through which end-to-end communication is measured. Priority Services currently consists of Government Emergency Telecommunications Service (GETS) and Wireless Priority Service (WPS) components, and will eventually include a Next Generation Networks (NGN) component. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | None    | None    | N/A     | 90%     | 90%     |
| <b>Actual:</b>  | None    | None    | None    | None    | N/A     | N/A     |

|  |         |         |         |         |         |         |
|--|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of States and Urban Areas whose current interoperable communications abilities have been fully assessed.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> This performance measure is based on the percentage of States and Urban Areas (131 total) that have been fully assessed and approve of the national baseline capability "gaps" and/or the future emergency communications requirements. The National Communications Baseline Assessment capability assessment framework presents the broad range of capabilities needed by emergency response providers and relevant government officials to continue to communicate in the event of natural disasters, acts of terrorism, and other man - made disasters |         |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>   | None    | None    | None    | None    | 65%     | 80%     |
| <b>Actual:</b>   | None    | None    | None    | None    | N/A     | N/A     |

|   |         |           |           |           |           |           |
|---|---------|-----------|-----------|-----------|-----------|-----------|
| <b>Program: US - VISIT</b>  |         |           |           |           |           |           |
| <b>Performance Goal:</b> Improve the identity and document verification capabilities available to Immigration and Border Management stakeholders to enable them to make timely and accurate risk and eligibility decisions. |         |           |           |           |           |           |
| <b>DHS strategic objectives supported and % allocation of activities:</b><br>Objective 1.3 - 100%   |         |           |           |           |           |           |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005   | FY 2006   | FY 2007   | FY 2008   | FY 2009   |
| <b>\$ Thousands</b>   | None    | \$340,000 | \$236,622 | \$368,656 | \$494,907 | \$407,604 |
| <b>FTE</b>  | None    | 84        | 102       | 101       | 129       | 149       |

**Performance Plan Measures**

**Measure:** Percent of biometrically screened individuals inaccurately identified as being on a US-VISIT watch list.

**Description of Measure:** US-VISIT provides biometric identity services to other DHS entities through the Automated Biometric Identification System (IDENT) system to screen foreign visitors to determine whether those individuals are on a watch list. Accuracy of US-VISIT information is a key indicator of the quality of the information furnished to its customers. This measure attempts to assess the accuracy of data provided by the IDENT system by tracking the rate at which individuals screened against the watch list returns a false positive identification (false acceptance). In other words, the rate at which individuals that are not on the watch list are misidentified as being on a watch list.

| <b>Fiscal Year:</b> | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
|---------------------|---------|---------|---------|---------|---------|---------|
| <b>Target:</b>      | None    | None    | None    | None    | .013%   | .013%   |
| <b>Actual:</b>      | None    | None    | None    | None    | N/A     | N/A     |

**Measure:** Percent of in-country overstay leads deemed credible and forwarded to Immigration and Customs Enforcement for further investigation

**Description of Measure:** An in - country overstay is defined as non - immigrant foreign traveler whose authorized period of admission granted at arrival in the United States has expired without an apparent subsequent departure, arrival, or status update recorded in the Arrival Departure Information System (ADIS) database. The program uses ADIS to identify priority in-country overstay records for possible law enforcement action by Immigration and Customs Enforcement (ICE) and then manually validates these records. The result of this process is vetted ADIS records that are likely to represent the travelers who are overstaying their authorized period of admission and are thus subject to adverse actions. These vetted records are then sent to ICE for further investigation. An upward trend indicates that US-VISIT is increasing the number of credible law enforcement leads identified for manual review, and thus assisting ICE investigations of illegal overstays.

| <b>Fiscal Year:</b> | FY 2004 | FY 2005 | FY 2006 | FY 2007  | FY 2008 | FY 2009 |
|---------------------|---------|---------|---------|----------|---------|---------|
| <b>Target:</b>      | None    | None    | None    | Baseline | 23%     | 25%     |
| <b>Actual:</b>      | None    | None    | None    | 21.6%    | N/A     | N/A     |

**Measure:** Average biometric watch list search times for Department of State BioVisa queries

**Description of Measure:** This measure is used to determine the average amount of time required to complete an automated search processed through the US-VISIT Automated Biometric Identification System (IDENT) system in response to queries from Consular Offices worldwide where fingerprints are captured as part of the BioVISA process. The service level agreement with Department of State is less than 15 minutes to provide critical identity and watch list information in a timely manner to not impede traveler processing. In light of past performance, US-VISIT has set an internal target of processing BioVisa searches within 5 minutes.

| <b>Fiscal Year:</b> | FY 2004 | FY 2005 | FY 2006 | FY 2007   | FY 2008 | FY 2009 |
|---------------------|---------|---------|---------|-----------|---------|---------|
| <b>Target:</b>      | None    | None    | None    | 15 min.   | 5 min.  | 5 min.  |
| <b>Actual:</b>      | None    | None    | None    | 2.21 min. | N/A     | N/A     |

# BUDGET REQUEST AND SUPPORTING INFORMATION

## Office of Health Affairs Office of the Chief Medical Officer

### I. Appropriation Overview

#### A. Mission Statement for Office of Health Affairs:

The Office of Health Affairs serves as the principal medical advisor for the Secretary and FEMA Administrator by providing timely incident-specific management guidance for the medical consequences of disasters. Additionally, the OHA leads the Department's biodefense activities in coordination with other Departments and agencies across the Federal government; leads and sustains a comprehensive, integrated and collaborative framework that protects the health security of the Nation; and leads the Department's efforts in employee health and safety and provides medical oversight for health delivery throughout DHS.

In order to implement this mission, OHA has four goals:

- 1) Serve as the principal medical and health advisor to the Secretary and other Department leaders, and ensure that the Department's leaders have relevant intelligence and science-based health and medical information to guide policy decisions;
- 2) Lead the Department's biodefense activities, to include policy, strategy, requirements, metrics, and biological and chemical detection programs; and
- 3) Develop a coordinated and unified national architecture for medical preparedness, WMD planning and catastrophic consequence management in accordance with overall national incident management activities; and
- 4) Lead the development of a Department-wide plan for occupational health and worker safety protections, ensuring that all DHS employees have access to sound and scientifically-based health and medical safety information.

The OHA is led by the Chief Medical Officer, who has the title of Assistant Secretary for Health Affairs and Chief Medical Officer. The Office of Health Affairs has three main divisions: Weapons of Mass Destruction (WMD) and Biodefense; Medical Readiness; and Component Services, as well as the division of International Affairs and Global Health Security. The WMD and Biodefense division leads the Department's biological and chemical defense activities, including the Bioshield and BioWatch programs, the Rapidly Deployable Chemical Detection System (RDCDS) and the NBIC. The Medical Readiness division oversees contingency planning and policy, readiness of medical first responders, WMD incident management support, medical preparedness grant coordination and the National BioDefense Architecture strategy and planning responsibilities. The Component Services division developments and provides policy, standards, requirements and metrics for the

Department's occupational health and safety programs and provides protective and operational medical services within the Department.

OHA leads the development of a coordinated national architecture for bio-monitoring among executive branch departments that includes biosurveillance, aerosol detection, clinical syndrome detection, mail room observation, and suspicious substance management. OHA's core requirements are derived from the President's *Biodefense Strategy for the 21<sup>st</sup> Century* Homeland Security Presidential Directive (HSPD-10), which provides a comprehensive framework for our Nation's biodefense, and *Defense of the U.S. Agriculture and Food* (HSPD-9), which establishes a national policy to defend the Nation's agriculture and food systems against terrorist attacks, major disasters, and other emergencies. Accordingly, OHA leads the Department's efforts to implement relevant National Security Council (NSC) and Homeland Security Council (HSC) implementation plan items under HSPD-9 and HPSD-10.

**B. Budget Activities:**

The Office of Health Affairs budget is structured into five (5) Programs, Projects, Activities (PPAs). These PPAs contain activities under the various offices within OHA and are explained in the following:

BioWatch:. BioWatch is an early warning system that can rapidly detect trace amounts of pathogen-specific nucleic acid in the air whether intentionally released into or naturally present in the environment. This program is deployed in over thirty of the country's major metropolitan areas. This system provides public health experts with a warning of a biological agent release before exposed citizens become clinically symptomatic ("ill"). This "detect-to-treat" system provides public health officials an opportunity to respond aggressively to eliminate or substantially mitigate the potentially catastrophic impact on the population of a biological agent release. In conjunction with BioWatch, the program also operates the Biological Warning and Incident Characterization (BWIC) system, which interprets warning signals from BioWatch and public health surveillance data using incident characterization tools (e.g., plume and epidemiological models) to quickly determine the potential impacts a release may have on the population. Together these two systems provide emergency personnel with the essential information and tools they need to respond effectively and initiate life-saving medical countermeasures.

National Biosurveillance Integration Center (NBIC): The NBIC was initiated by the DHS Chief Medical officer in Spring 2007 as a logical evolution of the NBIS (National Biosurveillance Integration System) and was codified in Public Law (PL-110-53) on August 3, 2007. As clearly defined in the law, NBIC provides early detection, characterization, and situational awareness of biological events of potential national significance by establishing a biological common operating picture (BCOP) to depict a global biosurveillance environment and decision-making tools. NBIC operates by acquiring, integrating, analyzing, and disseminating biosurveillance information from human, animal, plant and environmental data harvested from

federal agency partners, including the Departments of Health and Human Services (HHS), Agriculture (USDA), Defense (DOD), Interior (DOI), State (DOS) Transportation (DOT), and various elements within the DHS. Additional partners include subordinate agencies to those federal agencies such as the Center for Disease Control (CDC), Food & Drug Administration (FDA), National Institute of Health (NIH), the U.S. Geological Survey (USGS) and the Animal Plant Health Inspection Service (APHIS). Potential partners include the Environmental Protection Agency (EPA), the U.S Postal Service, the Department of Justice Department of Commerce and the Veterans Administration. NBIC has also established close working relationships with the U.S. Intelligence Community through both DHS Intelligence and Analysis and organizations such as the DOD Armed Forces Medical Intelligence Center (AFMIC). The NBIC produces information around-the-clock to provide decision support during biological events. NBIC will ensure that near real-time biosurveillance threat awareness is provided to NBIS Member Agencies and their leadership, the Department's senior leaders, the DHS Incident Management Group (IMG) and the DHS National Operations Centers (NOC) via the Biologic Common Operating Picture (BCOP) and other substantive reports to include finished analyses, scientific and technical medical/health data exchange and analyst-to-analyst exchanges.. The resulting improved information sharing and enhanced situational awareness facilitates national decision-making to enable timely response.

Rapidly Deployable Chemical Defense System (RDCDS): RDCDS maintains and deploys an air and ground base chemical detection capability for the defense of high security interest special events such as large assemblies in sports arenas or at outdoor celebrations. The detection element consists of a network of chemical, ground-based point detectors (CGPD) and a chemical airborne surveillance platform for 24/7 stand-off-detection capability.

Planning and Coordination: This PPA fulfills the Department's role in: animal disease and agro-defense; maintains the veterinary expertise to provide the Secretary advice on zoonotic, food or agriculture related catastrophic events; participates in the Department's responsibilities for biological threat and consequence evaluation and determination for future and emerging threats; leads the Department's end to end contingency planning, policy, and consequence management for chemical, biological, radiological and nuclear hazards, including a potential outbreak of pandemic influenza, in concert with its component partners; works with interagency partners and state and local governments to establish preparedness and response requirements for the nation's emergency medical first responders; and works with federal, state and local, and private sector entities to enhance medical readiness through regional planning, exercises, and other response capabilities. This PPA will also fund the National BioDefense Architecture Project which will develop a framework for biodefense, building on existing and emerging efforts at all levels of government and the private sector.

Salaries and Expenses: This subprogram will fund the salaries and expenses of OHA as well as the activities for Component Services and International and Global Health

Security. It includes the salary of the Assistant Secretary for Health Affairs/Chief Medical Officer who serves as the principle medical advisor to DHS Leadership. The Component Services division supports development of a common set of standards, policies, and training opportunities for occupational health programs across the department. Expanding on the traditional view of workplace health and safety, these programs will integrate efforts towards workforce health protection, including wellness and prevention programs, to help ensure that workforces are physically able to support the Department's missions while minimizing health-threats and work related disability. In addition, funding will enable continued development programs to ensure world-class medical support to tactical operations.

**C. Budget Request Summary:**

The Office of Health Affairs requests 84 positions, (80 FTE), and \$161.3 million. The total adjustments-to-base is 27 FTE and \$4.2 million. The program increases include eight positions to conduct the following initiatives:

- Testing and fielding of BioWatch Next Generation Technology (Generation 3) (\$34.5 million increase);
- Design and implement the foundation for a National Biodefense Architecture to create a seamless integrated system for coordination at all levels of government and the private sector. (National BioDefense Architecture project \$2.0 million increase)
- Increase medical readiness and response systems throughout the nation by designing and promoting effective all-hazards medical response and contingency planning and policy, training, and exercise tools for medical first responders and regional preparedness. (Medical Readiness \$3.4)
- Provide Salaries and Expense funding (\$0.7 million increase) for:
  - Salaries and Expenses (8 FTP / 4 FTE increase)
  - Working Capital services for rent, procurement & IT support
  - Increase Program Management and Administrative Personnel (8 FTP / 4 FTE increase, reflected in the total S&E increase above) to strengthen the operations of OHA.

## II. Summary of FY 2009 Budget Estimates by Program / Project Activity (PPA)

### i. Summary of FY 2009 Budget Estimates by Appropriation

OHA requests \$111.6 million for BioWatch. This is a program increase of \$34.5 million to procure and initiate fielding of an automated detection capability into the BioWatch System.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

BioWatch contains two areas of activity; *BioWatch Operations* which funds the base generation I/II technology systems operating in multiple jurisdictions and the *Next Generation BioWatch Monitoring* project that contains activities to develop and deploy an autonomous detection capability into the BioWatch System. The two areas are discussed below in detail.

*BioWatch Operations*

This program area is responsible for operating the BioWatch monitoring system and the Biological Warning and Incident Characterization (BWIC) system. BioWatch is a bio-aerosol monitoring system designed to provide cities with the earliest possible detection of a biological attack. BioWatch is currently piloting the BWIC system, which is a suite of computer tools (e.g., plume and epidemiological models) that assist public health officials in interpreting signals from BioWatch and public health syndromic surveillance. These tools help: a) develop a common situational awareness; b) characterize the incident; c) determine the potential impact a release may have; and d) inform response and recovery activities. Together, the BioWatch and BWIC programs provide emergency personnel with the information they need to respond rapidly and effectively to implement life-saving medical countermeasures. BioWatch works closely with local communities to integrate response activities into ongoing public health and emergency management activities. Additionally, DHS uses BioWatch to provide biological monitoring and

surveillance support for National Special Security Events (NSSEs) and other national and local special events.

- DHS, in partnership with the Environmental Protection Agency (EPA), Centers for Disease Control and Prevention (CDC), and the Federal Bureau of Investigation (FBI) operates BioWatch. BioWatch has operated in more than 30 cities since early 2003, performing over 3 million tests to date without a false positive. In FY 2007, the program incorporated second generation enhancements (increased indoor and outdoor monitoring in the top threat cities as well as a high-throughput laboratory analysis capability) to the 30-city system; and piloted BWIC. In FY 2008, the program plans to continue operating the BioWatch system, including the three BWIC pilot cities, and better integrate BWIC into the other OHA programs such as NBIS and medical readiness.

In FY 2007 BioWatch:

- Successfully operated the BioWatch system in more than 30 of the nation's highest-risk jurisdictions without a false alarm;
- Tested and piloted new technologies –Airborne Sample Analysis Platform (ASAP) with time resolution capability;
- Initiated pilot with the DoD Guardian Program to field two ASAPs on an National Capital Region (NCR) installation;
- Assumed responsibility for bio-monitoring and analysis of the DHS mail utilizing BioWatch notification protocols and CONOPS;
- Developed an indoor monitoring program for key transportation facilities;
- Developed an improved outdoor operational guidance document;
- Drafted an inaugural indoor operational guidance document; and
- Completed the integration of BWIC into a third pilot city for continued operational evaluation

In FY 2008 BioWatch Operations plans to conduct the following:

- Increase coverage of the population in each of the current BioWatch jurisdictions population with biological collectors;
- Maintain current capability for detection of biological releases;
- Finalize the indoor and outdoor guidance documents and National BioWatch CONOPS;
- 
- Participate in a DTRA / DHS wide-area restoration pilot to include placing BioWatch collectors on a military installation;
- Develop strategy to integrate/optimize all Federal outdoor bio-monitoring capabilities within the NCR;
- Field an enhanced laboratory capability to allow quicker analysis and reduced cost; and
- Continue ongoing BWIC pilots

In FY 2009, OHA plans to maintain the integration of BWIC and BioWatch and continue BioWatch operations at the FY 2008 performance level while beginning activities for next generation technology insertion into the system.

### *Next Generation BioWatch Monitoring*

The next generation BioWatch monitoring system, Gen 3, is being developed to incorporate automated sample analysis at collection sites and remotely transmit results to a Laboratory Response Network (LRN) member laboratory for interpretation by public health professionals using approved BioWatch guidance documents. Currently, BioWatch relies on the manual retrieval of filters from air collectors and transport to LRN laboratories for subsequent analysis.

In FY 2007, OHA initiated activities to begin to understand the operational impacts and difficulties of automated technology on the BioWatch system. To achieve this objective, OHA instituted a life cycle study to determine long term cost impacts of maintenance and operation of an automated system. In addition to this study, OHA completed a pilot with six units of the Automated Pathogen Detection System (APDS) in New York City. APDS is an automated technology currently in development. This pilot has proven to be useful in CONOPS development, understanding fielding and maintenance issues, and determining how environmental conditions affect autonomous system operation.

Significant accomplishments in FY 2007 include:

- Instituted a life-cycle study to determine long term cost impacts of maintenance and operation of an automated biomonitoring system;
- Piloted Automated Pathogen Detection System (APDS) in NYC and received; official NYC acceptance to begin autonomous detection operations in Manhattan beginning in FY 2008; and
- Developed an acquisition and fielding strategy of Gen-3 for FY 2009 – FY 2013.

In FY 2008, given the maturity and high potential for near-term deployment of APDS units, OHA will begin an even more extensive performance evaluation of APDS units. Most, if not all APDS units will be equipped with Public Health Actionable (PHA) assays which allow the sensors to be quickly integrated and operational with most public health entities state and local levels.

In FY 2008, S&T, working with OHA, will continue to work on Bio-Agent Autonomous Networked Detectors (BAND). BAND is another automated technology that has been under development, and is scheduled to continue through FY 2009.

FY 2008 planned accomplishments include:

- Begin full operational capability of the APDS in NYC – the first operational BioWatch autonomous detection capability;
- Conduct more extensive field testing and evaluation of APDS BioWatch sensors;
- Work with S&T to continue to develop BAND BioWatch sensors; and
- Initiate activities to review next generation BioWatch and BWIC capabilities to improve the operational and response of the integrated system.

In FY 2009, OHA plans a six-month, multi-city Operational Test and Evaluation (OT&E) of advanced automated technologies. BAND technologies will compete in a head-to-head competition during the third and fourth quarters of FY 2009 with technology down

select in late FY 2009. This will allow OHA to advance to a Full Rate Production procurement decision for advanced technology deployment in FY 2010.

APDS advanced technology detectors will also be deployed along side the competing BAND technologies for comparison during OT&E. In addition, 150 units of APDS advanced technology detectors will be procured and deployed in high-risk jurisdictions to increase the Nation's capability to rapidly and reliably detect the presence of dangerous biological agents. Incorporating this autonomous detection capability within the National BioWatch Network will reduce the time between agent release and detection, potentially saving thousands of lives by expediting the deployment of countermeasures.

OHA requests \$8 million for NBIC. This maintains the resource base established in FY07 and continued into FY08.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The National Biosurveillance Integration Center (NBIC) is a unique capability in the nation’s biodefense arsenal. This program arose directly from a Presidential desire for this resource. It provides 24/7/365 biological attack detection and characterization intelligence to the DHS National Operations Center's (NOC) Common Operating Picture to provide situational awareness of our nation’s bioterror threats. NBIC integrates detection and characterization of information and analysis with national indications and bio-threat warnings developed across federal agencies, including DHS, HHS, USDA, DoD, State, DOI and DOT. NBIC collects, monitors and evaluates clinical and non-clinical biological threat information and reporting data streams. These data streams include surveillance of foreign and domestic sources of information and intelligence gathered in coordination with the DHS Office of Intelligence and Analysis, pest, disease outbreaks, syndromic health information, human, plant, animal, food, water, and environmental information to identify and characterize biological attacks or naturally occurring disease outbreaks that threaten National Security. Staff regularly collaborates with select federal partners and their subordinate agencies, state, local and tribal governments via established federal department protocols, the private sector in areas of critical infrastructure relevant to biosurveillance, key foreign allies and select non-governmental international organizations such as the World Health Organization, International Red Cross, Global Vetlink and the Wildlife Conservation Society.

Significant accomplishments in FY 2007 include:

- Developed the National Operation Center's National Biosurveillance Group (NBSG) from one of limited operational capability to one of a proactive, focused operational watch with Interagency/cross-domain focus, operating 24/7;
- Signed Memorandum of Understanding (MOUs) with six key federal agencies (DoD, State Department, Department of the Interior, USDA, HHS and DOT) and established necessary Interagency Agreements to meet HSPD-mandated national approach to capturing, understanding and displaying the potential threat to the nation's security posed by key health risks and diseases;
- Led the development of the Food Contamination Event National Interagency Situation Report to include leading the formation of the Interagency Analysis Group (IAG) for characterization of HHS Fusion Cell inputs;
- Improved intra-DHS cross-flow for intelligence overlay of threat and intelligence information across the biosurveillance spectrum;
- Professionalized the OHA/NBIS Watch Desk by employing U.S. Public Health Officers with professional degrees, backgrounds and field experience as watch officers and subject matter experts; and
- Coupled the OHA/NBIS Watch Desk at the Department's National Operations Center to the NBIC at the Nebraska Avenue Complex as well as NBSG participants able to receive the NBIS 2.0 information feeds and displays.

Planned significant accomplishments in FY 2008 include:

- Establish full NBIC operational capability by September 2008 as directed by PL-110-53;
- Field the operational NBIS 2.0 IT system at the SBU (Sensitive But Unclassified) level (two systems: SBU Operational and SBU COOP) providing the backbone IT system for the NBIC;
- Deploy the Biologic Common Operating Picture (BCOP) to all NBIS members via NBIS 2.0;
- Refine information sharing and analytic collaboration with the Department's Office of Intelligence and Analysis (I&A) at multiple levels of security classification;
- Establish and integrate key private sector partnerships in biosurveillance/health industries in concert with the Office of Infrastructure Protection;
- Formulate uniform policies and approaches for new technologies and integrating current biosurveillance and detection systems with the Department's Science and Technology Directorate;
- Refine the architecture for security of select agents and access to pathogens that may pose a risk of bioterrorism;
- Enhance and implement a decision management framework for environmental decontamination after a biological attack;
- Finalize the NBIC space plan to include 24x7 watch operations in the DHS National Operations Center (NOC) and the housing of scientific and biosurveillance subject matter analysts in a consolidated, multi-level security location; and
- Within resource constraints, sustained a three-part NBIC outreach and governance structure which consists of:

- A national biosurveillance integration oversight council composed of senior members of participating federal agencies and organizations, expected to convene twice annually or more often if exigencies arise.
  - An intra-departmental coordinating group within DHS composed of representatives from various organizations engaged in health monitoring and biosurveillance including OHA, Policy, Science & Technology, National Protection & Programs, General Counsel, Operations Coordination, Intelligence & Analysis, Privacy, and the operating components.
  - A customer focus group that validated NBIC requirements for research, information exchange, analysis, collaboration and production;
- Expand the number of formal federal agency partners in NBIS to include Department of Commerce, Department of Justice, the Environmental Protection Agency and the U.S. Postal System;
  - Finalize all remaining Inter Agency Agreements with all NBIS federal partners detailing particulars for data provision and exchange, analytic co-production and select emergency response actions particularly focused on those that inform and guide cabinet level decision making.

In FY2009, planned accomplishments include:

The goal is for NBIC to apply state-of-the-art IT capabilities to enhance biosurveillance and situational awareness. NBIC also plans to:

- Within affordability constraints, make modest but key improvements to the NBIS 2.0 information technology system at the Sensitive But Unclassified (SBU) level;
- Mature the requirements for and refine the use of classified data made available by the U.S. Intelligence Community to enhance biosurveillance awareness and increase the speed and depth of NBIC reporting;
- Continue to develop, train and mentor a professional workforce using a mix of FTE, federal detailees, IPAs and commercial contractors. Expand professional training of onboard personnel with tailored education and training in NBIS analysis and methodology;
- Complete implementation of the BCOP and provide greater in-depth background information and improved collaboration capabilities to all NBIS 2.0 subscribers;
- Refine information sharing and analytic collaboration with the Department's Office of Intelligence and Analysis (I&A), including co-production of products;
- Further integrate critical private sector partnerships in biosurveillance/health industries in concert with the Office of Infrastructure Protection;
- Continue to formulate uniform policies and approaches for new technologies in biosurveillance and detection systems with the Department's Science and Technology Directorate;
- Refine the existing decision management framework as needed to manage evolving changes in the biodefense community;

- Sustain key outreach and partnership governance structures and procedures to enhance interagency coordination and identify joint requirements among the NBIC stakeholders;
- The integration and analysis of All-Source biosurveillance information streams has never been attempted before NBIC. New analytical methodologies will be required, most especially to meet the mandate for Early Warning of naturally occurring and intentional bio-events. Within resource constraints, NBIC must examine and employ the modern analytical methods and data visualization techniques, pioneer and develop new methodologies in statistical analyses, embed artificial intelligence process and practice and employ analytic methods from across numerous academic disciplines. As current analysis and production continues, simultaneous development of analytic techniques to fully use increasing volumes and complexities of data will be required. To achieve any reasonable measure of success, NBIC must access an assembly of NBIC analysts and detailees from participating organizations, network them together with a common information technology set of analytic and collaborative tools, and provide a combined analytic environment to produce biosurveillance products around the clock.
- NBIC will team with biosurveillance member agencies operating from their own home stations, the Intelligence Community, and various DHS components to include the DHS National Operations Center and the Office of Infrastructure Protection and attempt to virtually network them together into an organized whole. As such, NBIC will
  - Review analytic methods to cross-analyze various medical disease domains (human, animal, plant and environmental), searching for signs for early warning, and applying threat and biosurveillance information to critical infrastructures to produce an actionable Biosurveillance Common Operating Picture and other biosurveillance analytic products.
  - Maintain open information technology architecture embodied in the NBIS 2.0 IT project hubbed in the NBIC.

| Total Change 2008-2009       | ---                 | ---        | 0                          |

The Rapidly Deployable Chemical Detection System (RDCDS) is the only non-military asset available in the country for detection of potential chemical release against our citizens. OHA requests \$2.6million for the Rapidly Deployable Chemical Detection System (RDCDS) to maintain operational capability and to enhance the network of ground-based chemical detectors to support National Special Security Events (NSSEs) and SEAR Level I and II Events. DHS currently has the capability to cover a single event due to the limitation of one airborne platform and one set of ground-based chemical detectors

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

This program has developed architecture and planning protocols to support NSSEs and DHS Special Event Assessment Rating Level I and II Events such as large assemblies in sports arenas or at outdoor celebrations. Key elements of the RDCDS are detection analysis, communications, meteorology, plume mapping, and hazard prediction. RDCDS can identify specific chemical compounds and swiftly image the impact of a downwind chemical hazard. The detection element consists of a network of chemical, ground-based point detectors (CGPD) and a chemical airborne surveillance platform for 24/7 stand-off-detection capability. RDCDS will support two National Special Security Events in 2008 and two DHS SEAR Level 1 Events, as currently planned.

Significant accomplishments in FY 2007 include:

- Reviewed and validated intelligence for additional compounds of terrorists interest for aerial surveillance;
- Enhanced the airborne communication system with a digital satellite link;

- Conducted field testing to evaluate the effectiveness and efficiency of the RDCDS system;
- Obtained U.S. Secret Service certification of RDCDS as a National Special Security Events asset;
- Supported DHS SEAR Level I and II Events;
- Continue collaborative efforts with the EPA to provide aerial surveillance and support during natural or manmade disasters.

FY 2008 planned accomplishments include:

- RDCDS program will continue to review and validate intelligence for additional compounds of terrorists interested in gaining airborne surveillance and ground detectors by conducting two primary field experiments.
- Upgrade surveillance capabilities for National Security Special Events (NSSE) and DHS SEAR Level I and II Events.
- Conduct a market survey and evaluate chlorine gas detection equipment. As seen in Iraq, chlorine gas is a potential WMD and demonstrated terrorist interest.
- Enhance detection capability through procurement and deployment of an additional four chemical ground-based detectors to bring the existing set from 8 to 12.
- Continue collaborative efforts with the EPA to provide aerial surveillance and support during natural or manmade disasters.

In FY 2009 RDCDS plans to:

- Continue to review and validate intelligence for additional compounds of terrorists interested in gaining airborne surveillance and ground detectors by conducting two primary field experiments.
- Further enhance surveillance systems to support NSSE and DHS SEAR level I and II Events.
- Continue collaborative efforts with the EPA to provide aerial surveillance and support during natural or manmade disasters.
- Continue procurement, installation, and validation of equipment for aerial surveillance and detection of chlorine gas.

OHA requests \$9.9 million for this activity. This is an increase of \$5.4 million over FY 2008 that includes increases for Medical Readiness (\$3.4 million), and National Biodefense Architecture (\$2.0 million).

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Program includes two projects: Veterinary and Agro Defense and Food Security and Medical Readiness. The Biodefense Architecture initiative is an activity within Medical Readiness. These projects will be discussed separately below.

##### *Veterinary and Agro Defense and Food Security*

The OHA Food, Agriculture and Veterinary (FAV) Defense Office is the entity within DHS vested with responsibility for leading and coordinating the various food, agricultural and veterinary DHS programs. These programs are based on specific Secretarial delegation of authorities and as assigned by Homeland Security Presidential Directive (HSPD)-9, *Defense of U.S. Agriculture and Food*. Through DHS, the Office has 17 distinct action items & 12 leads for HSPD-9. It enables the CMO to serve as principal medical advisor for all food, agricultural and veterinary defense responsibilities of the Department. This includes coordination of DHS agrodefense activities, to ensure internal/external coordination of DHS' veterinary, preparedness and response activities, and to serve as primary DHS point of contact for Federal, state, local, and tribal governments and the private sector on all food safety, agriculture, and veterinary defense issues. The Office has led in the Department's incident management during the recent contaminated pet food incident and the Foot-and-Mouth Disease (FMD) event when diseased swine were imported into Minnesota from Canadian sources.

There are four reasons DHS, Office of Health Affairs (OHA) Food, Agriculture and Veterinary Defense is needed to fulfill the DHS missions as follows:

1. Food and agriculture is a \$1.3 trillion Critical Infrastructure, one-fifth of the Nation's economic activity. Direct and cascading consequences to a food, agricultural or veterinary incident are not well understood. An event of significance to this critical infrastructure could cost upwards of \$100 billion and potentially result in tens of thousands of lives lost.
2. Critical Infrastructure, once devastated, may be primarily rebuilt OCONUS, thereby increasing U.S. vulnerability.
3. The impact upon National Security as demonstrated by exercises such as "Silent Prairie," demonstrates significant impact on military strength and the ability to operate in infected zones. Multi-state, significant mortality food events would compromise the government at all levels.
4. History demonstrates the collapse of governments and destruction of political officials following compromise to the food supply because of the resulting compromise of public trust in government.

Recent domestic and foreign incidences such as spinach and melamine contamination and the threat of foot-and-mouth disease demonstrate the essential role. DHS OHA FAV Defense is developing and managing DHS equities in a coordinated multi-agency environment with DHS components and includes other National, state and private sector stakeholders.

Significant accomplishments in FY 2007 include:

- Provided the Secretary with advice on zoonotic, food, and agriculture related catastrophic awareness, preparedness and responses. A recent example of critical response/timely advice occurred when diseased swine were imported from Canada into Minnesota;
- Improved coordination between relevant agencies as evidenced in recent testimonies regarding the melamine incident in which the adulteration of pet food had national implications upon food safety;
- Establish DHS internal structures to increase coordination and information sharing among DHS components involved in food, agriculture and veterinary defense;
- Led the DHS intra-departmental working group comprised of eleven components to develop policies for the President's Import Safety Working Group;
- Initiated external integration for federal/state/local/private food, agricultural and veterinary defense programs;
- Initiated efforts to develop and set requirements for DHS research and grants, for preparedness and response veterinary programs, and to mitigate future and emerging threats to animal health and the food supply;
- Began developing internal metrics for leading and monitoring DHS responsibilities for HSPD-9 to address DHS' 12 primary responsibilities and 5 secondary responsibilities under HSPD-9;
- Coordinated execution of DHS HSPD-9 tasks and provided HSPD-9 activity status report to Congress to begin improvement of the U.S. Food Defense System;

- Began development of a five-year strategic plan and ten-year strategic vision for Food, Agriculture and Veterinary Defense for the Nation; and
- Provided assistance as applicable to DHS/USG components for specific projects, including:
  - Development of formal process for internal coordination of the Department's programs and roles with U.S. Department of Agriculture, Department of Health and Human Services, Department of Defense, the Environmental Protection Agency, and other agencies for internal coordination, engaging public and private food sector partners
  - Providing Avian Influenza response planning input
  - Providing input and leadership in applicable sections of the NRP rewrite
  - Starting coordination of curriculum development regarding courses pertaining to the veterinary and agriculture and food defense issues
  - Participating in Plum Island Director search and managing his selection by creating a trusted solution through engagement with all stakeholders

FY 2008 planned accomplishments include:

- Continue evaluation of and improvement to plans, programs and personnel in OHA that focuses the appropriate veterinary expertise to provide the Secretary advice on zoonotic, food, or agriculture related catastrophic awareness, preparedness and responses;
- Further develop internal and external coordination with emphasis on state, local and industry sectors;
- Evaluate requirements for research and grants, for veterinary preparedness and response, and for mitigation for future and emerging threats to animal health and the food supply, and align by continuing to forge partnerships as applicable with other DHS agencies/programs;
- Finalize HSPD-9 metrics to include external and internal responsibilities.
- Formulate a more comprehensive approach to FAV Defense and continue to bridge the gaps between HSPD-9 requirements and existing DHS activities;
- Continue to develop intelligence and import safety connectivity as initiated during the Executive Order on Import Safety response;
- Finalize development of a five-year strategic plan and ten year strategic vision for Food, Agriculture and Veterinary Defense for the Nation;
- Begin drafting ten and twenty year strategic plans;
- Advance analysis of agrothreats - based upon recent IG Report – enhance a coordinated/communicated threat analysis;
- Draft recommendations for regulation and policies regarding the importation of exotic animals and pets in coordination with CDC to decrease the homeland security risk;
- Provide data recommendations for the G8 Summit 2008 Food Defense Exercise which relates to the protection of our domestic food supply and DHS influence on an international scale; and
- Continue to provide assistance as applicable to DHS/USG components for specific projects. These will include:
  - Conducting annual Avian Influenza workshops and briefs
  - Development of the National Foot Mouth Disease plan

- Beginning development of a Homeland Security state requirement program for food, agriculture and veterinary (FAV) defense requirements at the state level
- Addressing coordination issues with CBP regarding border protection and imports
- Coordination with FEMA grants and training support

FY 2009 planned accomplishments include:

Continue evaluation of and improvement to plans, programs and personnel in OHA that focuses the appropriate veterinary expertise to provide the Secretary advice on zoonotic, food, or agriculture related catastrophic awareness, preparedness and responses;

- Develop subject matter expertise for International, Education, Plant, and Wildlife arenas to integrate and provide a comprehensive program and gap analysis specific to those arenas across internal, external and state/local/private entities. Further develop internal and external coordination with emphasis on state, local and industry sectors;
- Promote and initiate HSPD-9 metrics. Execute a more comprehensive approach to FAV Defense that bridges the gaps between existing DHS activities and HSPD-9 requirements;
- Complete the integration and alignment of Food, Agriculture and Veterinary Defense Education curricula across Universities, Centers of Excellence, Federal, state, local, and private programs;
- Fund a liaison program to other agencies (DOD, CDC, FDA, USDA, State, and Private Industry) to ensure coordination and collaboration across food, agriculture and veterinary programs;
- Establish mechanisms for a state program to establish and fulfill Homeland Security state requirements, as well as fulfill GAO state food, agriculture and veterinary (FAV) defense requirements;
- Finalize development of a ten and twenty year strategic plan for Food, Agriculture and Veterinary Defense for the Nation; and
- Increase coordination with the intelligence community to assure that the threat posture remains current and that mitigating strategies are optimized;

### *Medical Readiness*

The Office of Medical Readiness is critical to the coordination of health and medical issues both within DHS and within the interagency as it relates to multidisciplinary, multi-jurisdictional planning, and coordination activities. DHS is the only agency at the federal level with the responsibility for this coordination. While focusing on the issues unique to health and medical coordination, OHA does this with close interaction with FEMA and other appropriate DHS and interagency partners. The Office is composed of five divisions: Incident Planning, Emergency Management and Medical Readiness Integration, Grants Coordination, Incident Coordination, and Medical First Responder Coordination. These divisions are responsible for several major activities that support the mission of the Office of Health Affairs. These activities include:

- serving as advisor to the Assistant Secretary through the Associate Chief Medical Officer

- developing programs and policies to support medical readiness
- integrating internal and interagency all-hazards consequence planning, exercises, medical training, and response
- promoting integration of local and regional medical response and emergency management capabilities
- aligning disaster preparedness grants programs within DHS and the interagency
- supporting the medical first responder community
- providing the Department's medical incident management during catastrophic events and
- providing guidance and direction for medical and biological consequence management of emerging threats including pandemic influenza.

Specific Division descriptions:

- *Emergency Management and Medical Response Integration (EMMRI) Division* provides a regional capability for national medical readiness, response and recovery efforts by Federal, State, local, and private sector entities. A framework for emergency management collaboration and integration will be developed. In order to bring together public and private sector stakeholders to leverage response capability and enhance community resiliency capacity, a framework for partnership building and mutual support/aid will be established. Collaborative engagement will include: identifying gaps and barriers; identifying potential solutions and viable courses of action; completing risk/cost benefit-based analysis of proposed solutions; and developing cooperative agreements with local jurisdictional authorities.

The EMMRI division provides timely, relevant subject matter expertise for decision support to senior leaders and key stakeholders and supports Departmental and interagency planning efforts. EMMRI will develop a Technical Assistance program that provides nationally recognized subject matter experts to provide support to collaborative enterprises, local jurisdictions, Federal, state and local governments in: planning; training and exercises; decision support and business intelligence tools; and analytic capacity for analysis and assessment. The EMMRI division provides the mechanism for DHS to achieve, maintain, and measure its efforts for pandemic influenza preparedness.

The EMMRI division provides a framework to unite disparate activities into a cohesive system in order to leverage efforts and actions, reduce duplication of effort, and align pandemic influenza activities to support all-hazards preparedness. EMMRI is responsible for (1) establishing and maintaining relationships with key stakeholders (e.g., FEMA, HHS Regional Health Administrators, professional associations/organizations); (2) facilitating collaborative partnerships among State/local governments and private sector entities to promote a regional structure for disaster response and capability clustering; (3) developing recommendations for grants based on State and local perspectives; and (4) serving as the OHA representative to regional and field level operations centers to maintain situational awareness, support response efforts, and coordinate biodefense elements.

- Grants Coordination Division*

The Grants Coordination program ensures the foundational and support architecture for the planning, operations, response and recovery activities of OHA and DHS, focusing on the medical and health components. There is no other entity within DHS whose responsibility specifically includes the health and medical aspects of grant activities. The goal of this program is to build a comprehensive grants coordination program that will identify foundational requirements for building capabilities through efficient incremental investment of resources in risk-informed outcomes. The program specifically addresses numerous gaps and deficiencies in the coordination of grants related to medical and health preparedness across DHS and with partner departments. The Assistant Secretary, as the principal medical advisor to FEMA as outlined in H.R. 5441, Department of Homeland Security Appropriations Act, 2007, has charged the Grants Coordination program with the identification, alignment, support and oversight of all homeland security grants as they are related to health and medical preparedness, response and recovery activities. To ensure effective guidance and align grants with gaps, the Grant Coordination Division will work in coordination with other DHS components to identify, refine and catalog DHS-relevant health and medical standards and resource types to inform performance objectives for public health and health care capability enhancement. The Grants Coordination Division supports FEMA by leading the further refinement of the health and medical target capabilities via development of performance metrics that are informed by threat, vulnerability and consequences. The Grants Coordination Division will continually integrate and utilize the work obtained from the standards and resource typing, risk assessments, capability enhancements efforts to coordinate and enhance training and exercise resources to meet the health /medical needs of DHS.
- Incident Coordination Division (ICD)*

This program is critical to the mission of OHA and DHS. This program serves as the primary link between DHS and HHS to ensure optimal coordination between the two departments before, during, and after an incident of national significance. In carrying out this mission, the Incident Coordination Division services as the representative for DHS health and medical issues throughout the federal interagency planning process and through DHS representation in the planning for all disasters, incidents of national significance, national security events (NSE), and national special security events (NSSE).

The primary mission of the ICD is the coordination of DHS goals and mandates in planning for and responding to the medical consequences of disasters, incidents of national significance, national security events, and national security special events. The effective coordination of health and medical response into the other elements of emergency management will result in improved outcomes from disasters of all scales. This coordination is accomplished by: (1) forming linkages to the Department of Health and Human Services (HHS) in their role as the lead agency for National Response Plan/Emergency Support Function (ESF)-8—Public Health and Medical; (2) ensuring accurate and appropriate inclusion of

medical issues in federal exercise planning; and (3) providing subject matter expertise to the DHS National Operations Center (NOC).

Internally, ICD works closely with all DHS planning and operations components, including those responsible for exercise and evaluation such as the Homeland Security Exercise and Evaluation Program (HSEEP), to ensure easy access to critical medical subject matter expertise. Within OHA, the Assistant Secretary for Health Affairs is the designated lead medical authority to the Secretary of Homeland Security and Administrator of FEMA; concurrently the ICD serves as lead medical advisor to DHS operational components.

- *Contingency Planning and Policy*  
The mission of the Division of Contingency Planning and Policy is to develop and maintain mechanisms for the development of strategic capabilities-based-end-to-end planning activities to identify health and medical impacts and develop courses of action to mitigate those impacts. Its primary functions include (1) developing strategic capabilities-based plans across the prevent, protect, respond, and recover taxonomy against the national planning scenarios and other identified current threats and future threats; (2) developing innovative planning systems that will accelerate and improve the process of planning by allowing the immediate incorporation of new elements based on changes in capabilities and needs.; and (3) developing a standardized approach for integration, synchronization, and coordination of strategic planning activities within the interagency to provide a coherent framework for strategic capabilities-based integrated planning for medical consequences of natural and man-made disasters and response action impacts. This program provides guidance to the Assistant Secretary, the Department, and the interagency to accomplish tasks and missions based on current federal capabilities.
- *Medical First Responder Coordination (MFRC) Division*  
The Medical First Responder Coordination Division serves as OHA's and DHS's principal representative to the medical first responder community and as the representative of first responder and EMS issues within DHS and within the interagency community. Medical first responders play a vital role in crisis management but have been underrepresented in planning and preparedness issues in comparison to law enforcement, fire services, and other similar entities. In coordination with internal DHS components, other Federal agencies and external stakeholders, this program will identify best practices and provide guidance and support for the implementation of these practices in the first responder community. This program will identify gaps in first responder disaster planning, resources and education to ensure a seamless integration of this community into disaster overall readiness and response.

Once gaps and capabilities are identified, the Medical First Responder Coordination Division will work to fill these gaps which may include ensuring seamless end-to-end medical first responder disaster planning, ensuring the augmentation of resources to the first responder and EMS communities and providing medical subject matter expertise for first responder education programs

relating to health and medical issues. The products of the Division will include guidance, protocols and evaluation methods to these communities. As a representative to the first responder and EMS communities, the Division will provide assessments of these communities' needs to further inform disaster planning.

The Office of Medical Readiness is a new division office established in 2007. The primary focus to date has been coordinating Pandemic Influenza planning and implementation for DHS. Specific accomplishments include: 1) hired division directors to lead each division, 2) developed process and system for fulfillment of Pandemic Influenza action items, 3) completion of the DHS Pandemic Influenza plan and draft Federal Strategic Plan and Border Management Plan for Pandemic, 4) operationalized the requirement for provision of medical and public health advice to the Secretary and Administrator of FEMA and exercised this operation during TOPOFF 4, 5) established a process for alignment of grants for health and medical response capability, 6) established a 24 hour a day and 7 day a week communications system to support DHS and OHA operations.

The Office of Medical Readiness plans to accomplish the following in FY 2008:

- Develop program for integrated strategic capabilities based planning, modeling and simulation for identification of capabilities required and responsible entities for management medical consequences of incidents and response to incidents;
- Develop programs to provide incident coordination including providing science based advice and consultation to senior decision-makers related to consequence management;
- Develop a program to provide science based guidance and direction for medical and biological consequence management of emerging threats including pandemic influenza;
- Develop programs including strategic planning, policy, concept, guidance, and methodology for the development and coordination of a National Biodefense Architecture;
- Develop programs for medical first responder coordination to represent DHS to the first responder community; and
- Develop program to align / coordinate existing Homeland Security Grant Programs and HHS grant programs with current and future threat analysis relating to medical and health issues.

Office of Medical Readiness plans to accomplish the following in FY 2009 with additional and base funding:

- Implement program for integrated strategic capabilities based planning, modeling and simulation for identification of capabilities required and responsible entities for management of medical and health consequences of incidents and response to incidents;
- Implement programs to provide incident coordination including providing science based advice and consultation to senior decision-makers related health care and public consequence management;

- Implement a program to provide science based guidance and direction for health care and public consequence management of emerging threats including pandemic influenza;
- Implement programs including strategic planning, policy, concept, guidance, and methodology for the development and coordination of a National Biodefense Architecture;
- Implement of Medical First Responder Coordination programs to represent DHS to the health care and public first responder community; and
- Implement a comprehensive program review and evaluation of the program to identify, define, refine and align existing (and proposed) homeland security grant programs with HHS grant programs to address current and future medical and public health threats;

| Total Change 2008-2009       | 8                   | 31         | 4,893                      |

This program includes the Office of the Assistant Secretary, including the Office of International and Global Health Security, and program funding for the Office of Component Services, which is responsible for policy, standards, requirements, and metrics relating to occupational/environmental safety and health programs throughout DHS and for medical oversight of health services provided by or on behalf of the Department. Lastly, this program encompasses the administrative operations of the agency, funds the Federal positions of the component offices, and is responsible for the Working Capital Fund payments to the Department.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

*Salaries and Expenses*-Salaries and Expenses (S&E) requests \$29.2 million. This includes adjustments to base of \$4.2 million and 27 FTE; and a program increase for Salaries and Expenses (S&E) of \$.7 million. The M&A increase will support four (4) additional FTE (eight (8) positions) to strengthen the administrative and financial reporting capability of OHA. The \$29.2 million will provide for:

- \$23.3M for base resources for Salaries and Expenses
- \$250K for the Office of International and Global Health Security
- \$750 for the Component Services Office
- \$4.2M for the annualization of positions authorized in fiscal year 2008
- \$700K for 4 additional FTE in FY 2009

During fiscal year 2007, OHA was established with funding transferred from the Chief Medical Officer and the National BioSurveillance Integration System funding from the Preparedness Directorate. In addition OHA received functional responsibility for the

BioWatch, and RDCDS accounts. Within its hiring capacity, the agency has prioritized the hiring of its core mission positions in its initial months of operation. The fundamental administrative functions of OHA are minimally staffed at the current time but are addressed in future planning. In FY 2007 and FY 2008 OHA relies on cross-servicing agreements with other elements of DHS for the provision of financial services, acquisitions and contracting and human capital services. Contractor personnel predominately staff the budget, financial and human capital functions.

In fiscal year 2008 OHA received an additional 27 full-time equivalent positions (54 positions). The majority of these positions will again be utilized to address mission-related responsibilities. These positions are essential to continue progress in meeting the mandates of the program mission as well as the requirements established by the HSPD's. OHA will continue to rely on cross-servicing agreements and contractor personnel for its core administrative functions through fiscal year 2008.

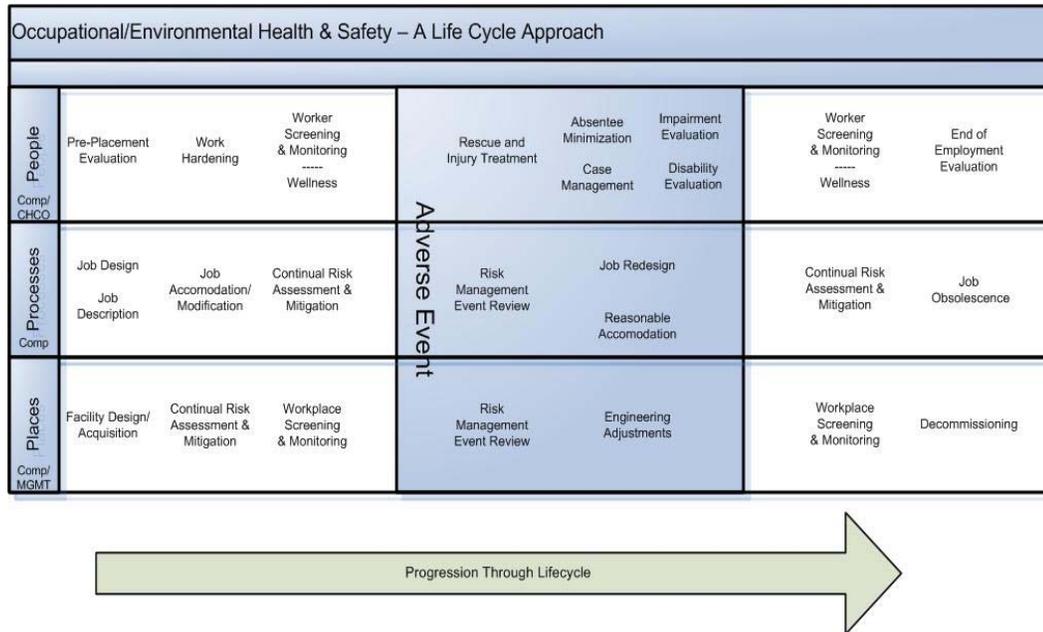

In fiscal year 2009, OHA is requesting funding for an additional four full-time equivalent positions (eight Full-Time Positions) for support personnel. Funding is also requested for the annualization of 27 positions authorized in fiscal year 2008. The requested levels will allow OHA to:

- Strengthen OHA financial and reporting activities
- Enhance Program Management expertise to assist OHA technical experts with metrics, strategic planning and program management control. This Office will strengthen the performance and reporting ability of OHA programs and will allow OHA to better track and understand progress of DHS medical programs as well as those of Federal partners whose mission success is essential to the success of DHS and the Nation.

*Component Services-* Component Services is included in the S&E PPA (\$0.8 million in FY 2008) and is comprised of the following activities:

- *Occupational Medical Services:* In partnership with the Office of Safety and Environmental Programs within the Office of the Under Secretary for Management, the Occupational Medical Services branch will add its first staff members to assist the medical director in leading the development of strategy, policy, requirements and metrics for the medical aspects of a Department-wide occupational health and safety program. Integrating the existing programs under the "one DHS" concept will be an evolutionary process as it is important not to disrupt current functionality, while still achieving the synergies that can be accomplished through integration of certain program functions (some functions will continue to be most effectively executed at the operational component level). The overall occupational medicine strategy is represented in the below diagram. The strategy recognizes that an effective occupational medicine program spans the lifecycle of federal jobs and involves not only the employee, but addresses the interaction of the employee with the job processes and with the work facility or environment. This branch will assist the Department's human capital personnel in assessing position descriptions, physical evaluation programs (pre-placement, fitness-for-duty, return-to-work, etc.), performing post incident analyses (for example, adding medical analysis to aircraft and motor-vehicle mishap investigations), and working with programs under the Federal Employee

Compensation Act to help to improve return-to-work programs and to facilitate evaluation and treatment activities within Department of Labor guidelines and limitations, thus helping to control growth of workers compensation and continuation of pay costs.

- Workforce Health Protection Activities:** As this fiscal year represents the first staff personnel to be added to this program area, the detailed explanation of additional elements were explained above in the description of the roles of the new staff. The functions of this branch are often seen as a component of occupational medicine programs. However, expanding on the traditional view of workplace health and safety, these programs will integrate efforts towards workforce health protection, including wellness and prevention programs, to help ensure that workforces are physically able to support the Department's missions while minimizing health-threats and work-related disability. The programs managed by this branch comprise discreet elements that can be developed and delivered to the employees of the Department, such a wellness newsletters, travel medicine and deployment health guidelines and policies, health protection guidelines in dangerous work environments, facilitated health screening programs, and mechanisms to support a physical fitness culture in the Department.
- Operational Medicine Support:** DHS has literally hundreds of medical personnel deployed throughout the country. They take care of remotely deployed personnel, ranging from border agents in the Southwest desert, to DHS aviation personnel engaged in counter-narcotics and counter-smuggling operations throughout the hemisphere. They are also directly engaged in humanitarian rescue of migrants who hazard dangerous conditions in attempts to enter the country. There is currently no comprehensive oversight of these personnel. Legally required medical supervisory controls are locally managed without standardization throughout the Department. There are no standardized operational protocols for the Department's medics. These factors pose significant potential risk management issues for DHS. To address these issues, this branch works with the

medics throughout the Department to ensure legally sufficient and medically appropriate policies, protocols, standards, and metrics to enable effective and efficient emergency medical services.

Significant accomplishments in FY 2007 include:

In this initial partial year of existence, the Office of Component Services had no FTEs. The major function of the assigned Detailees was to perform an environmental survey of occupational medicine, safety, and health programs of the Department. The purpose was to develop a strategy for occupational medicine services that does not duplicate, but instead enhances and supports existing programs throughout the department by adding medical concepts that are currently absent from the regulatory-compliance orientation of current programs. In addition to laying the groundwork for future programs, an additional major function of the office was providing medical consultation services to Department Components. Key areas that the Detailees participated in were:

- Leading the Department's interaction with the Division of Global Migration and Quarantine of the Department of Health and Human Services on response to communicable diseases of public health significance. The most notable example was responding to a multi-drug resistant tuberculosis case and developing inter-agency policy and procedures to facilitate these similar events in the future.
- Providing scientific and medical guidance and leading the direct interaction with the Centers for Disease Control and Prevention in supporting the Federal Emergency Management Agency on issues related to formaldehyde in emergency temporary housing.
- Leading negotiations with the United States Public Health Service on a long-term Memorandum of Understanding regarding the mechanisms to enable utilization of Commissioned Corps Public Health Service officers throughout the Department, especially within the operations-critical Division of Immigration Health Services, which provides direct medical care to detainees in facilities operated by Immigration and Customs Enforcement.

FY 2008 Planned Accomplishments:

- In conjunction with CHCO, develop a requirements and implementation plan for a comprehensive workers injury and disability management system;
- Develop comprehensive set of Occupational Safety and Health Policies beginning with existing "best practices" program existing in government;
- Identify key management level occupational health and safety metrics which can drive departmental implementation of occupational health principles. The goal is to shift occupational safety from only a compliance-oriented "cost-center" to ensuring there is a "value-add" component by ensuring a healthier and safer workforce, thus improving productivity and decreasing lost-time costs. Key mechanisms which will be used to accomplish this include:
  - Integration of occupational medicine into the functions of the Department's Occupational Safety Committee to assist in integration and promulgation of occupational medical principles and policies.
  - Standardization of occupational health and safety related forms across the Department in response to concerns expressed by the legal staff of the Office of Personnel Management regarding excess liabilities incurred by

current lack of consistency across the various components of the Department;

- Develop force health protection and wellness related materials for use throughout the Department including:
  - Model wellness newsletters
  - Policy-based health protection guidelines for situations such as disaster related deployment and international travel;
- In conjunction with the Office of Safety and Environmental Programs, develop comprehensive requirements for a risk-management information system which will track injury, illness, and safety trends in order to inform management on mechanisms to reduce injuries, occupational illness, and other factors causing lost productivity. Individual components already recognize the importance of this capability and several are initiating their own individual systems. The goal, in support of “one DHS” is to integrate these requirements to allow efficiency of scale in systems acquisition and ensure comparable datasets for use by Department Leadership in making management decisions; and
- Develop policies, protocols and medical supervisory mechanisms for the operational emergency medical services personnel of the Department.

FY 2009 Planned Accomplishments:

- This program will support continued development of a common set of standards, policies, and training opportunities for occupational medical aspects of occupational safety and health programs across the department. The limited staffing in the previous FY will have supported establishment of the basic program structure for the programs listed for FY 08; and
- In addition, depending on the success of requirements developments efforts for a departmental risk management information capability, a goal for this year will be the implementation of this system throughout the department. While the office of primary responsibility for the capability is the DHS Office of Safety and Environmental Programs, personnel from OHA will play an integral role in ensuring the success of this program.

Description

\$34.498 million is requested to conduct the Biowatch next generation head-to-head competition of qualifying vendors and to procure and deploy an interim capability of automated detection sensors.

Funding is requested to:

- Procure an additional 30 Gen 3 sensors for the head to head competition. This will be utilized in conjunction with 42 sensors procured with the \$5.8M provided to S&T in FY 2008 to support testing of up to three candidate systems for a two city, six-month operational test. These additional units will provide optimum data to serve as a basis for selection (\$4.0M),
- Provide the Test support and data reduction to down select to one Gen 3 vendor for procurement in FY 2010. (\$6.3M)
- Procure and field 150 APDS sensors. (\$20.4M)
- Operate and Maintain APDS Block I sensors procured in FY 2008, (\$3.6M).

### Justification

This procurement is critical to the Nation's capability to rapidly and reliably detect the presence of dangerous biological agents. Incorporating this autonomous detection capability into the National BioWatch network will reduce the time between release and detection, so that available countermeasures can be deployed before people become ill, potentially saving thousands of lives. This initiative will fund operational testing activities for Generation 3 BioWatch prototypes as well as the procurement and fielding of 150 automated detection sensors.

Automated detection will enhance the capabilities of the BioWatch environmental monitoring system designed for early warning of bioterrorism incidents. With automated detection, this time can be reduced to four to six hours. This is a critically important new capability, particularly in high-volume transportation facilities to identify the affected population and prevent further exposure and dispersion of that population. It is anticipated that automated system-wide detection will require fewer personnel to operate and eventually reduce the overall operations cost.

In FY 2009, S&T and OHA will conduct joint Operational Testing & Evaluation (operational testing) of candidate automated detection units. During FY 2009, OHA will determine which candidate technologies will be included in the system and will finalize the design of the components and the overall next generation system.

### Performance Impact

Once the BioWatch system is fully converted to an automated system, the time to detect and field a response to a bioterrorism incident will be reduced to less than six hours. This supports the Secretary's Strategic goal in Objective 2.2 "Biological" to achieve the outcome of reducing the risk of a biological attack in the US. Additionally, this meets the Integrated Planning Guidance (IPG) for DHS to "Detect, defend against weapons of mass destruction: deploy in all major US cities a third-generation BioWatch Detection device that is fully automated (does not require regular visits to collect samples for processing); reduces cost per site significantly; and reduces warning time to less than six hours."

The Office of Medical Readiness will provide leadership for the NBA, but will depend heavily on the OHA Office of WMD and Biodefense, along with federal, regional, state, local, and private sector partners in order to develop and effect the implementation of this project. The NBA represents a model for the analysis and coordination functions that are key to the overall role of DHS in national preparedness.

#### National Biodefense Architecture (NBA) Activities:

The initial activities are planned for FY 2008 and will involve concept development. The requirements for the development of the NBA concept will include those identified in the Homeland Security Presidential Directive – 10 “Bio-Defense for the 21<sup>st</sup> Century.” The concept proposal will include:

- Linkages to the essential four pillars identified in HSPD-10 (Threat Awareness, Prevention and Protection, Surveillance and Detection, and Response and Recovery)
- Timeline and plan for moving from concept to operational within 5 years
- Science-based. supported with professional literature
- Identification of both public and private sector partnerships required
- All-hazards approach to support health care and public health issues
- Demonstration of the mechanism to move beyond bio to include chemical and radiological and nuclear defense.

The NBA concept and strategic planning will begin in FY2008 to enable accelerated progress in FY 2009, during which additional funding is requested. In FY 2008, OHA personnel will develop strategic planning, policy, concept, guidance, and methodology for the development and coordination of a National Bio-defense Architecture.

#### Justification

The National Biodefense Architecture (NBA) is designed to define and communicate to all public and private stakeholders the common elements, framework, and connectivity necessary for an integrated National Biodefense system. This framework is necessary to provide for identification and standardization of the generic components and their interactions for the planning, protocols and platforms associated with the four pillars of bio-defense for HSPD-10. This will occur through competitive solicitation for a concept proposal to accomplish this task.

The architecture is not intended to establish a federally run system, but will describe a comprehensive system comprised of various governmental and private sector entities with appropriate responsibilities and duties. The architecture will indicate to all stakeholders, where the federal and state governments will function, where the responsibility lies with individuals and the private sector, and how the emergency response system in this country will react and respond to various signals/threats/alarms. A clearly defined system will allow the private sector to clearly understand the requirements for system design, interface, implementation, and response as appropriate and allow risk and market factors to function for optimum local and private sector involvement.

It is the ultimate goal of the U.S. Government to provide the mechanisms to prevent, protect from, respond to, and recover from biological threats, whether they are intentional or unintentional. However, no single initiative exists or has been proposed to weave together the multiple, broad-ranging elements of biodefense into a cohesive long-range strategy with set goals, defined deliverables, and measurable benchmarks. *It is the ultimate goal of the NBA to satisfy mandates under HSPD-5, HSPD-10, and other authorities for DHS, through OHA, to accomplish a coherent overall biodefense methodology that drives preparedness and response in a way that utilizes the best and most logical features of federal, regional, state, and local preparedness.*

### Impact on Performance

Homeland Security Presidential Directive-10 establishes requirements for the development of a national biodefense architecture (NBA). H.R. 5441 (2007 DHS appropriation legislation) tasks the Office of Health Affairs (OHA) with the coordination of biodefense activities. OHA, as the Secretary's medical advisor, develops end-to-end plans for the five biological national planning scenarios, provides medical incident management during disasters, and ensures that the nation is ready for the health care and public health consequences of all-hazard events of national significance. The Assistant Secretary of Health affairs has designated the Office of Medical Readiness as the lead for the development of this project. The Office of Medical Readiness will work with other OHA programs (e.g. Office of WMD and Biodefense) and DHS agencies to develop and implement all of the pillars of the National Biodefense Architecture.

The execution of this program will lead to a seamless, coordinated Federal, state, local, and international response to biological attacks. The architecture will be applicable for other WMD threats and hazards threatening our nation.

This effort supports the accomplishment of: the Secretary's Goals 4, 10, and 11; Homeland Security Presidential Directives 5, 7, 8 and 10; and H.R. 5441, Department of Homeland Security Appropriations Act, 2007.

### External Mandates, Authorities for NBA Mission and Activities

- H.R. 5441, Department of Homeland Security Appropriations Act, 2007. House of Representatives, September 28, 2006, Title V General Provision, Section 516 Chief Medical Officer:
  - (2) coordinating the biodefense activities of the Department;
  - (3) ensuring internal and external coordination of all medical preparedness and response activities of the Department, (5) serving as the Department's primary point of contact for State, local, and tribal governments, the medical community, and others within and outside the Department, with respect to medical and public health matters.
  
- H.R. 1684, Department of Homeland Security Appropriations Act, 2008, March 26, 2007 (as passed by House and Senate, in conference), Title VI—Biopreparedness Improvements, Sec. 601 Chief Medical Officer and Office of Health Affairs (amendment to Homeland Security Act of 2002)
  - (3) administering the Department's responsibilities for medical readiness

- (5) serving as the Department's primary point of contact for State, local, tribal, and territorial governments, the medical community, and the private sector, to ensure that medical readiness and response activities are coordinated and consistent with the NRP and the Secretary's incident management requirements
- Homeland Security Presidential Directive/HSPD-10, Biodefense for the 21<sup>st</sup> Century, April 28, 2004.
  - Pillars of Our Biodefense Program
  - Response Planning: The Department of Homeland Security, in coordination with other appropriate Federal departments and agencies, is developing comprehensive plans that provide for seamless, coordinated Federal, state, local, and international responses to a biological attack.
  - For those mass casualty incidents that require parallel deployment of Federal assets in other functional areas such as transportation or law enforcement, the Department of Homeland Security will coordinate the overall Federal response in accordance with its statutory authorities for domestic incident management.
- DHS Secretary's Strategic Objectives Supported:
  - 3.7 - Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies
  - 4.1 - Reduce the loss of life and property by strengthening nationwide response readiness
- Homeland Security Presidential Directive/HSPD-10  
Biodefense for the 21<sup>st</sup> Century, April 28, 2004
- Homeland Security Presidential Directive/HSPD-5 Management of Domestic Incidents, White House, February 28, 2003
- Homeland Security Presidential Directive/HSPD – 7 Critical Infrastructure Identification, Prioritization, and Protection, December 17, 2003
- Homeland Security Presidential Directive/HSPD 8 National Preparedness, December 17, 2003
- Secretary's Strategic Objective 3.7 - Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies

**IV. Program Justification of Changes**

Description

The Office of Medical Readiness is requesting \$3.5 million above FY 2008 base levels.

This funding is requested to implement or strengthen five initiatives:

- 1) Knowledge Development and Dissemination Program (\$1.5M)
- 2) Biodefense Response and Recovery Demonstration Project (\$1.1M)
- 3) Medical First Responder Best Practices Program (\$300K)
- 4) Medical Readiness Modeling and Simulation (\$500K)

These programs are explained below:

*1. Knowledge Development and Dissemination Program*

Description

This initiative is to further the application of knowledge developed by interagency science and technology development programs and to support the application and communication of response and recovery concepts.

### Justification

Throughout government, private industry, and academia, research programs are examining basic science, technologies, social science, and other factors that all potentially contribute to overall readiness for response to all-hazards. The OHA will utilize the resources available from this initiative to work with HHS, DoD and other agencies to apply existing research to real-world preparedness, and to refine future research agendas. Through this initiative science-based evidence will inform planning and policy making of OHA and DHS. While other agencies and programs inside and outside of DHS develop new knowledge in basic science and technology, the purpose of the Knowledge Development and Dissemination Initiative is to further the application of knowledge developed by interagency science and technology development programs and to support the scientific study of response and recovery concepts.

### Impact on Performance

The development of evidence and new knowledge in medical readiness and the application of that knowledge to real-world situations will improve the quality of the planning process and its output which in turn will improve response and recovery efforts. The final outcome of these improvements is maximizing lives saved and critical infrastructures recovered. The ability to focus on science-based strategies for overall biodefense will allow for the effective performance of OHA's overall duties within this existing threat scenario.

This effort meets the requirements of HSPD-5, 8 and 10 and the Secretary's strategic objective 3.7.

## 2. *Biodefense Response and Recovery Demonstration Project*

### Description of Item

The goal is to build a network of integrated local response and recoveries capability that meet the needs of the communities or jurisdictions. This collaborative framework will demonstrate the possibility of a regionalized system for an integrated emergency response consistent with the principles of the National Incident Management System.

### Justification

The program will allow the Emergency Management and Medical Response division (EMMRI) to develop a demonstration project to establish a framework for the response and recovery pillar of the National Biodefense Architecture required in HSPD 10 through an emergency management collaboration and integration framework to promote and support efforts by State, local, and private sector entities to leverage resources and cluster capabilities for efficient and effective all-hazards preparedness and response. This collaborative framework will create a regionalized system for an integrated emergency response consistent with the principles of the National Incident Management System. This collaborative framework will leverage existing state and local capabilities creating coalitions and integrating functional entities to provide a response system with seamless functioning across local, state, regional, and federal entities. This

demonstration project will support the National Preparedness System and National Preparedness Goal through requirements development and analysis to support the integration of all elements of emergency management and response.

#### Impact on Performance

Planning and preparedness at the Federal level will ultimately be ineffective unless state, local, and regional entities are involved in a proactive and interactive way. This program will extend the readiness activities of the office in a tangible and measurable way throughout a regional construct. The integration of health and medical response with other aspects of emergency management will improve coordination and enhance the effectiveness and efficiency of overall event response and recovery functions. An integrated and regionalized response approach will optimize the leveraging of health care and public health capabilities across state, local, and jurisdictional lines to ensure regional and national interoperability.

This effort meets the requirements of: the Secretary's Goals 4, 10, and 11; Homeland Security Presidential Directives 5, 7, 8 and 10; and H.R. 5441, Department of Homeland Security Appropriations Act, 2007.

### 3. *Medical First Responder Best Practices Program*

#### Description

The Medical First Responder Division of the Office of Medical Readiness serves as the Department's representative to the medical first responder community, to other governmental departments and agencies as well as to the private sector. This division will work in a coordinated fashion with the Office of Emergency Medical Services (EMS) at the National Highway Traffic Safety Agency (in DOT), HHS and other partners to ensure fully prepared first responder and EMS communities. This will be done through the development of best practices and protocol development, NIMS integration, integration of threat assessments into medical first responder planning and education, and implementation of Federal Interagency Committee on Emergency Medical Services (FICEMS) recommendations that address disaster preparedness issues. The EMS community, and ultimately, the nation, will benefit from improved integration of EMS into all Homeland Security activities.

#### Justification

Activities of the Medical First Responder All-Hazards Best Practices program will include ensuring the incorporation of medical first responders in all levels of planning in local, State, regional, territorial and the private sector by working with the EMMRI program; ensuring that the medical first responder and EMS communities are fully NIMS compliant; ensuring bilateral communications of biological attacks/hazards between the medical first responder / EMS communities and the incident command structure by working with the incident management division; ensuring that the medical first responder and EMS communities are appropriately integrated into exercises at all levels—local, State, regional, territorial and private sectors by working with the exercise branch of the

incident management division; providing guidance on all-hazards disaster education to the medical first responder communities by forming linkages with other DHS components and the interagency; and providing guidance on all-hazards disaster planning and response.

#### Impact on Performance

The development of best practices and standards into medical first responder planning will ensure that the medical consequences of disasters of all hazards will be mitigated. Further development of best practices and standards will ensure seamless end-to-end medical first responder disaster preparation, ensuring the increasing of resources to the first responder and EMS communities and providing medical subject matter expertise for first responder education programs.

This effort meets the requirements of: the Secretary's Goals 3.7, 10.2, and 11; Homeland Security Presidential Directives 5, and 8; and H.R. 5441, Department of Homeland Security Appropriations Act, 2007.

#### *4. Medical Readiness Modeling and Simulation*

##### Description

This new program will explore innovative methods of planning as well as the use of innovative and new methods to simulate tests. These new methods will support exercising in a real time environment and allow for planning to accommodate realities identified within the exercise. Within the Office of Medical Readiness, the Innovative Planning, Modeling and Simulation Program is being developed to explore and support innovative and improved methods of disaster planning. Modeling is an emerging scientific process that is currently being used within DHS and across the Federal Government to provide the evidence needed to inform planning and preparation for disaster events (e.g. Pandemic Influenza planning). This new program will not only explore innovative methods of planning, but also support the development of innovative and new methods of simulation to test draft plans.

##### Justification

The Office of Health Affairs is charged with the end-to-end planning of the biological National Planning Scenarios, with subject matter expertise input into the medical aspects of the other scenarios. Determining the best methods for use of disaster plans during an incident is part of the goal of the planning program. Development of innovative methods of planning has the potential to accelerate and improve the process of planning by allowing the immediate incorporation of elements based on changes in capabilities and needs. Further, these new methods have the potential to support integration of resources and response on local, regional and the national level. In addition these new methods can support exercising in a real-time environment that allows for planning to accommodate realities identified within the exercise. The initial funding of this program in FY 2009 will allow for the development of the program.

##### Impact on Performance

This program will have a tremendous effect on the OHA and DHS planning programs and has the potential to change how planning is done across the interagency. This effort meets the requirements of: Homeland Security Presidential Directives 5, and 8; H.R. 5441, Department of Homeland Security Appropriations Act, 2007 and the Secretary's Strategic Objective 10.4.

### Justification

The administrative personnel being requested include personnel to enhance the internal control function of the Office of Health Affairs. In FY 2008, these activities are extremely limited due to lack of personnel and in FY 2009 we hope to correct these shortfalls. It is imperative that the positions are funded in order to meet GAO standards and Federal regulations and policies associated with contracting, budget formulation, budget execution, and internal controls.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Office of Health Affairs  
Justification of Proposed Changes in OHA  
Appropriation Language**

For the necessary expenses of the Office of Health Affairs, [\$116,500,000] *\$161,339,000* of which [\$24,317,000] *\$29,210,000* is for salaries and expenses; and of which [\$92,183,000] *\$132,129,000* is for biosurveillance, biowatch, chemical response, and related activities for the Department of Homeland Security, to remain available until [September 30, 2009] *September 30, 2010*: *Provided*, That not to exceed \$3,000 shall be for official reception and representation expenses.

**Explanations of Changes:**

OHA was created to effectively carry out the Congressionally mandated duties as authorized in Section 516 of the Homeland Security Act of 2002, as amended (6 U.S.C 321e).

**B. FY 2008 to FY 2009 Budget Change**

\* FY07 actuals are reported in the S&T appropriations.

#### BioWatch Mission Statement

The Office of Health Affairs is the Department of Homeland Security's principal authority for all medical and public health matters. Working across all levels of government, and with the private sector, the Office leads the Department's role in developing, supporting, measuring and refining a scientifically rigorous, intelligence-based medical and biodefense architecture that ensures the public health and medical security of our nation.

**Summary Justification and Explanation of Changes**

|                            | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|----------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Special Service Pay</b> | ---                    | 200                     | 200                     | ---                            |

Special Service Pay is for PHS detailees and does not change from FY 2008 to FY2009 because OHA will maintain the same level of support for the BioWatch program.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | ---                    | 84                      | 100                     | 16                             |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental expenses in accordance with Federal travel regulations. The FY 2009 request includes an increase of \$16,000 in program increases associated with testing, fielding and initial maintenance of next generation detectors in BioWatch jurisdictions

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Advisory and assistance services</b> | ---                    | 15,140                  | 18,732                  | 3,592                          |

Advisory and assistance services include services acquired by contract from non-Federal sources for advisory services. The FY 2009 request includes an increase of \$3,592,000 to allow OHA to engage industry experts for next generation detector support.

|                       | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Other services</b> | ---                    | 14,990                  | 15,770                  | 780                            |

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2009 request includes program increases of \$780,000 to meet the requirements for full-rate production and procurement of 670 next generation detectors.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Purchases of goods &amp; svcs. from Gov't accounts</b> | ---                    | 23,740                  | 26,805                  | 3,065                          |

Purchases from Government Accounts include the costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2009 requests an increase of \$3,065,000 for fulfilling next generation requirements.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Operation and maintenance of equipment</b> | ---                    | ---                     | ---                     | ---                            |

The FY 2009 request includes an increase of \$21,665,000 for operations and maintenance of equipment for next generation BioWatch detectors.

|                  | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Equipment</b> | ---                    | ---                     | 23,000                  | 23,000                         |

The FY 2009 request includes an increase of 23,000,000 for purchase of equipment for BioWatch next generation detectors.

|                                       | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Grants/Subsidies/Contributions</b> | ---                    | 22,955                  | 27,000                  | 4,045                          |

Grants/Subsidies/Contributions includes cooperative agreements to jurisdictions. The FY 2009 request includes an increase of \$4,045,000 for next generation related cooperative agreements.

**Salary and Expenses Mission Statement**

The Office of Health Affairs is the Department of Homeland Security's principal authority for all medical and public health matters. Working across all levels of government, and with the private sector, the Office leads the Department's role in developing, supporting, measuring and refining a scientifically rigorous, intelligence-based medical and biodefense architecture that ensures the public health and medical security of our nation.

**Summary Justification and Explanation of Changes**

|                              | <b>2007</b>    | <b>2008</b>    | <b>2009</b>     | <b>2008 to 2009</b> |
|------------------------------|----------------|----------------|-----------------|---------------------|
|                              | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b>  | <b>Change</b>       |
| <b>Salaries and Benefits</b> | <b>\$3,660</b> | <b>\$9,395</b> | <b>\$13,352</b> | <b>\$3,957</b>      |

Salaries and benefits includes and increase of \$3,925,000 for a total of 80 FTEs.

|               | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **OFFICE OF HEALTH AFFAIRS** **BIODEFENSE COUNTERMEASURES**

### **I. Appropriation Overview**

#### **A. Mission Statement for Biodefense Countermeasures:**

The Biodefense Countermeasures program procures medical countermeasures to strengthen the Nation's preparedness against chemical, biological, radiological, and nuclear (CBRN) attacks, including promoting the removal of barriers to development and production processes that the Government undergoes to pre-purchase critically needed vaccines or medications for biodefense. The Project Bioshield Act of 2004 authorized the 10-year program to encourage the development and production of new medical countermeasures for chemical, biological, radiological, and nuclear (CBRN) agents. Provisions of this Act were designed to provide incentive for private companies, which might otherwise be discouraged due to inherent risks in product development and lengthy timelines to licensure, to develop these countermeasures by guaranteeing a government market for successfully developed countermeasures. Biodefense Countermeasures is thus a procurement program, allowing the Federal Government to enter into contracts to acquire countermeasures while they are still in development. Successful countermeasures are delivered to the Strategic National Stockpile (SNS) at an agreed upon price and quantity, as well as at a development stage demonstrating sufficient safety and efficacy. The Biodefense Countermeasures program strengthens the Nation's preparedness against CBRN attacks through acquiring civilian medical countermeasures to CBRN agents for the SNS.

#### **B. Budget Activities:**

In FY09 the Biodefense Countermeasures funding will continue to support coordinated efforts to remove barriers to development and production processes and will enable the government to pre-purchase critically needed vaccines or medication for biodefense once production of licensable products that will be safe and effective enough to place in the SNS is judged scientifically feasible. HHS will be the procuring authority.

The Biodefense Countermeasures procurement process requires actions by DHS, the Department of Health and Human Services (HHS), and the President, and relies on interagency working groups. Specifically, the Office of Health Affairs (OHA) coordinates with HHS through interagency working groups to determine program requirements, priorities and acquisitions. DHS is instrumental in the very first stage of this process – identifying and prioritizing programs for the development and acquisition of medical countermeasures – by establishing a relative hierarchy of CBRN threat classes. Each of the threat classes and agents within a given threat class are distinct in their likelihood of use and in their potential medical and public health consequences. DHS' Directorate of Science & Technology (S&T), in conjunction with the Office of Health Affairs, has the lead in considering the best available intelligence, law-enforcement, scientific, and public-health information to identify and prioritize CBRN threats. DHS uses this as the basis for issuing Material Threat Determinations (MTDs) which identify agents presenting a material threat sufficient to affect national security (an MTD issued by the Secretary of DHS is required for procurement using Biodefense Countermeasures funds and authorities.) DHS then conducts a Population Threat Assessment (PTA) (formerly referred to as Material Threat Assessments (MTAs)) to estimate the

size of the population exposed to the agents identified in the MTDs and gauge the impact on the population and national infrastructure if that particular agent was released for a given plausible, high consequence scenario. Once the MTDs are issued and PTAs are completed for any given threat, the results are provided to HHS to inform subsequent medical and public health consequence assessments. These inputs are used to inform medical countermeasure requirements which are developed by interagency working groups as part of the Public Health Emergency Medical Countermeasures Enterprise (PHEMCE), a coordinated interagency effort which HHS created in July 2006 to take a more integrated, systematic end-to-end approach to the medical countermeasure mission – including research, development, acquisition, storage, maintenance, deployment, and guidance for utilization. Upon identification of countermeasures that meet the eligibility requirements to warrant use of the Special Reserve Fund (SRF), the Secretary of DHS and the Secretary of HHS jointly request that OMB release funds to HHS from the SRF to acquire the countermeasures. Under section 319F-2(c) (7) (C) of the Public Health Service Act, as amended, HHS is ultimately responsible for managing the countermeasure procurement process including the negotiation of terms and entering into contracts for research, development, acquisition, procurement, storage and distribution of countermeasures. The PHEMCE process is the vehicle by which DHS provides input on the medical countermeasure continuum ranging from research and development to storage, maintenance, and deployment.

### **C. Budget Request Summary:**

The Biodefense Countermeasures program was transferred to the OHA from FEMA under the Department's Second Stage Review (2SR) and received no program enhancements. The program will continue to operate using \$5.6 billion advance appropriations provided by the 2004 Department of Homeland Security Appropriations Act, (P.L. 108-90) to procure civilian medical countermeasures for a 10-year period (FY04-FY13). The appropriations act established the "Biodefense Countermeasures" account for "necessary expenses for securing medical countermeasures against biological terror attacks."

Although all the funds for this account were provided in the 2004 Department of Homeland Security Appropriations Act, only a portion became available for obligation upon enactment. The act specified that no more than \$890 million could be obligated in FY04, and no more than \$3.4 billion could be obligated from FY04 through FY08. Any money not obligated within these defined periods would remain available through FY13. Thus, before rescissions were enacted, DHS had \$890 million available as budget authority for this account in FY04. In FY05, an additional \$2.5 billion would have become available. The remaining \$2.2 billion is scheduled to become available in FY09.

In FY09, OHA will work with HHS and other agencies through the PHEMCE process to determine appropriate countermeasures to pursue in the interest of national security. Funding is requested in the DHS S&T appropriation as well as the OHA appropriation to determine CBRN agents that pose a material threat to national security and conduct PTAs (MTAs) which will inform future acquisitions using the Biodefense Countermeasures account. The \$2.2 billion scheduled to become available from the Biodefense Countermeasures account will be coordinated with the HHS and used to manage and procure safe and effective civilian medical countermeasures for the SNS.

## II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Biodefense Countermeasures program, provided through advanced appropriations, will support the Government’s efforts to secure medical countermeasures to strengthen the Nation’s preparedness against CBRN attacks, including promoting the removal of barriers to development and production processes and pre-purchasing critically needed vaccines or medication for biodefense.

To date, ten contracts have been awarded through the Project BioShield program using the Strategic Reserve Fund (SRF). Delivery to the SNS has begun (or been completed) for three of the seven following products:

- Pediatric liquid formulation of potassium iodide (radionuclide blocking agent): \$5.7 million for 1.7 million one-ounce bottles; delivery to the SNS was completed in September 2005. In FY06, contract was modified to provide \$11.8 million for 3.1 million additional bottles; delivery to the SNS is on-going;
- Anthrax Vaccine Adsorbed (AVA): \$122.7 million for 5 million doses; delivery to the SNS has been completed. In FY06 contract modified to provide \$120 million for 5 million additional doses of AVA; delivery to the SNS is on-going. In FY 07, another contract was issued to supply 18.75 million doses of AVA for placement into the SNS \$448 million.
- Calcium and Zinc Diethylenetriaminepentaacetate (DTPA) (chelating agents that remove radioactive particulates from the body): \$21.9 million for 474,739 doses; delivery to the SNS was completed in April 2006.
- Contracts were issued in FY06 for two different anthrax therapeutics (\$309 million) and for botulinum antitoxins \$415 million.
- A contract was awarded in June 2007 for \$500 million to manufacture and deliver 20 million doses of a next generation modified vaccinia Ankara (MVA) smallpox vaccine.

In FY07 the Program to completed delivery of second 5 million doses of AVA; completed delivery of second 2.3 million bottles of pediatric potassium iodide (KI) to SNS; began delivery of anthrax

immune globulin to the SNS; delivered additional botulinum antitoxin to the SNS; and awarded a contract for modified vaccinia Ankara smallpox vaccine.

In FY08, the Program plans to issue Requests for Proposals (RFPs) for anthrax recombinant Protective Antigen (rPA) vaccine and treatments for Acute Radiation Syndrome; begin delivery of the modified vaccinia Ankara (MVA) smallpox vaccine to the SNS; and continue delivery of botulinum antitoxin and anthrax immune globulin to the SNS.

The FY 2007 accomplishments

Contracts awarded in FY 2007 include:

- \$448 million for manufacture and delivery of 18.75 million doses of AVA; and
- \$500 million to manufacture and deliver 20 million doses of a next generation modified vaccinia Ankara (MVA) smallpox vaccine.

FY 2008 Planned Accomplishments

Planned RFPs and acquisition contracts in FY 2008 include:

- anthrax recombinant Protective Antigen (rPA) vaccine; and
- medical countermeasure(s) for Acute Radiation Syndrome.

FY 2009 initiatives coordinated with HHS

Mid-term (FY 2009-2013) planned acquisitions using the SRF include:

- diagnostics;
- broad spectrum antibiotic(s);
- anthrax antitoxin(s);
- medical countermeasure(s) for Filoviruses;
- smallpox antiviral(s);
- medical countermeasure(s) for Acute Radiation Syndrome;
- radiological biodosimetry/bioassay(s); and
- radionuclide-specific agent(s).

In addition, Project BioShield material threat determinations (MTDs) and population (material) threat assessments (PTAs) for all traditional biological agents posing a threat sufficient to affect national security were completed in FY 2007. In FY 2008 and 2009, DHS will continue to evaluate biological agents, as well as chemical, and issue MTDs and conduct PTAs as appropriate. These determinations and assessments are required to inform medical countermeasure requirement setting and support the use of the Biodefense Countermeasures account for the acquisition and stockpiling of medical countermeasures against the designated agents.

### Biodefense Countermeasures Mission Statement

The Biodefense Countermeasures program provides secure medical countermeasures to strengthen the Nation's preparedness against bioterrorism attacks, including promoting the removal of barriers to development and production processes that the Government undergoes to pre-purchase critically needed vaccines or medication for biodefense.

### Summary Justification and Explanation of Changes

|  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|--|----------------|-----------------|-----------------|------------------------|
| <b>Advisory and assistance services</b>  | ---            | ---             | ---             | ---                    |
| Advisory and assistance services will not change from FY 2008 to FY 2009 because the level of program management support will be consistent. |                |                 |                 |                        |
|  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
| <b>Purchases of goods &amp; svcs. from Gov't accounts</b>  | ---            | ---             | 2,175,000       | 2,175,000              |

Purchases from Government Accounts include the costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Per the appropriation, FY 2009 requests an increase of \$2,175,000 to HHS for obligation in securing the medical countermeasures against biological terror attacks.

## A. Mission and Description of Component

The Office of Health Affairs (OHA) was formally established on April 1, 2007 to manage and to serve as the Department of Homeland Security's principal advisor on all public health and medical issues. In accordance with Homeland Security Presidential Directive (HSPD)-5, *Management of Domestic Incidents*, OHA leads the Department's role in developing, supporting, measuring and refining scientifically rigorous and intelligence-based medical and national biodefense architecture to ensure the public health and medical security of the nation. In working alongside its Federal partners, state and local governments and the private sector, OHA maintains a coordinated and effective emergency preparedness and response structure. The main areas of focus for OHA are Biodefense programs such as the National Biosurveillance Integration Center and BioWatch, veterinary and agricultural defense, medical readiness for catastrophic incidents, deployable chemical detection systems, and DHS workforce safety and occupational health.

OHA's main program, BioWatch, is strategically located in over 30 of the largest metropolitan areas in the U.S. to provide early detection capabilities against aerosolized biological attacks. BioWatch personnel are located throughout the country and work closely with the jurisdictions, lab response network staff, and local emergency operations centers.

## B. Major Activities and Key Strategic Issues

In fiscal year 2009, the Office of Health Affairs (OHA) is requesting 161.3 million to define and strengthen the nation's biodefense architecture, deploy improved detection equipment for intentional release of a biological hazard/substance, double the chemical detection capability of DHS, enhance the security of the nation's food supply, initiate activities and models to increase coordination of medical readiness of our nation's first-responders, and initiate programs to protect the health and safety of the DHS workforce.

BioWatch provides 24/7/365 biological weapons threat detection and characterization of biodefense intelligence. The core requirements for the BioWatch program are derived from HSPD-10, *Biodefense Strategy for the 21<sup>st</sup> Century*, which provides a comprehensive framework for our Nation's biodefense infrastructure.

- BioWatch provides a capability for early detection and warning against biological attacks on our high-risk urban areas, covering over 30 of our Nation's largest jurisdictions. This will, in turn, allow for a rapid response by our first responders. BioWatch has formed vital partnerships with state and local public health agencies and labs and has conducted over 3 million air samples to date without a false alarm. An indoor monitoring program for key transportation facilities was developed and critical updates were made to outdoor monitoring guidance documents. A pilot study was initiated to test and evaluate the Automated Pathogen Detection System (APDS) in an effort to reduce the detection and ultimately the response time for medical countermeasures to reach the population during an emergency. Capacity of

the Biological Warning and Incident Characterization (BWIC) system was upgraded to include a third jurisdiction.

In FY 2008, BioWatch will deploy/employ additional detectors in the top threat cities with a plan to increase coverage of the population. BioWatch will integrate its early detection capabilities into the National Biosurveillance Integration Center (NBIC) to enhance situational awareness for bio-detection.

Next generation (Generation 3) BioWatch prototypes will be tested beginning in April 2008 with applications planned for 2009. Full-rate production and procurement of 670 next generation BioWatch detectors is planned for FY 2009 to allow for a seamless integration of the planned next generation BioWatch technologies into the existing jurisdictions. In addition, funding is requested to prepare BioWatch jurisdictions for the next generation automated detectors and to integrate the BWIC system into fourteen additional jurisdictions. This plan for the next generation is dependent upon a technology study that will start in FY 2008.

National Biosurveillance Integration Center (NBIC) is an integrated biosurveillance system partnering with Federal agencies, state and local governments and the private sector. In FY 2007, NBIC was placed under the authority of OHA and was reestablished as one of the nation's top bio-detection and threat characterization mechanisms. Mutual agreements with six interagency partners were established to allow an integration of intelligence from various federal resources into NBIC. Five additional informal agreements were made with federal partners as a second phase of federal coordination. NBIC also led in the formation of the Interagency Analysis Group (IAG) for characterization of the Department of Health and Human Services (HHS) Fusion Cell inputs, which is a part of the Food Contamination Event National Interagency Situation Report.

In FY 2008, NBIC will be fully operational. The NBIS 2.0 IT project will continue to make progress on integrating the remaining classified segments. NBIC will also provide a decision management framework for environmental decontamination resulting from a biological attack. In FY 2009, NBIC will continue to improve the common operating picture for biosurveillance through intelligence sharing and analysis. It plans to collaborate with the private sector, especially with biological and health industries, to establish critical partnerships for better infrastructure protection.

The Office of Food, Agriculture and Veterinary Defense enables OHA to serve as the Department's principal agent for all issues related to food, agriculture and veterinary defense. The Office of Food, Agriculture and Veterinary Defense carries out its responsibilities as laid out in HSPD-9, *Defense of U.S. Agriculture and Food*.

In FY 2007, the Office of Food, Agriculture and Veterinary Defense led the Department's incident management efforts during the pet food contamination recall and the recent Foot-and-Mouth Disease (FMD) scare involving imported swine. The Office is also leading the Department's eleven components involved in the President's

Executive Order 13439 on Import Safety. Interagency and intra-agency coordination channels for food, agriculture and veterinary defense have been established through the leadership of the Office.

In FY 2008, the Office of Food, Agriculture and Veterinary Defense will develop intelligence and import safety collaboration among federal agencies through agreements based on recommendations from the President's Import Safety Working Group. Interaction and reach-out initiatives will take place with the private sector and state and local programs to establish requirements for research and grant awards, veterinary preparedness and response guidance, mitigation of future and emerging food, and agriculture and veterinary threats.

In FY 2009, The Office of Food, Agriculture and Veterinary Defense will strengthen DHS subject matter experts in international, education and plant/wildlife issue areas to improve incident support and response coordination at the Headquarter DHS level. OHA also plans to expand coordination with the intelligence community to improve early warning and to initiate/expand private sector outreach efforts to create sub-sector specific round tables. These round tables will build food and agriculture resilience to ensure survival in the face of a major sector calamity or bioterrorism event. In addition, the Office will complete the alignment of food, agriculture and veterinary defense education curricula in Centers of Excellence, university programs and other state and local programs.

Medical Readiness develops policies and programs to enhance all hazards planning, exercises and training, promote integration of state and local medical response capabilities, align DHS emergency preparedness grants and support the medical first responder community.

In FY 2007, the primary accomplishments of the Office of Medical Readiness includes completing the pandemic influenza planning and implementation guidance for the Department, providing the medical guidance to the Department during catastrophic event exercises, and developing top level plans for the five bio-medical incident scenarios.

In FY 2008, the Medical Readiness Office will develop multiple medical contingency planning programs for the management of medical and biological situations during an incident, including the latest scientifically-based information on emerging biological threats like pandemic influenza. The Office will also coordinate DHS and HHS bioterrorism-related grants to create a more unified mission for medical readiness. Development of a medical first-responder interface with the entire DHS community is also slated for FY 2008.

In FY 2009, the Office of Medical Readiness will implement many of the programs set for development in FY 2008, including identification of capabilities and responsibilities required for management of medical and biological events (including pandemic influenza) and medical management tools for decision-makers during catastrophic

incidents. The Office will also implement programs designed to develop and implement a National Biodefense Architecture.

The Office of Component Services provides workforce protection guidance to the Secretary and Under Secretary for Management. The Office leads the development of strategy, policy, requirements and metrics for the medical elements of the Department-wide occupational health and safety program.

In FY 2007, the Office of Component Services was in its initial phase of surveying occupational medicine services, safety and health programs throughout the Department. The Office led the Department's interactions with the Centers for Disease Control and Prevention (CDC) and its Division of Global Migration and Quarantine during the recent multi-drug resistant tuberculosis case and developed interagency coordination policies to facilitate responses to similar events in the future. The Office has also led the Department's interaction with CDC in supporting the Federal Emergency Management Agency (FEMA) on actions and policies involving formaldehyde in emergency temporary housing units in the Gulf Coast region. A long-term Memorandum of Understanding was developed and negotiated by the Office to allow U.S. Public Health Service officers to work alongside Immigration and Customs Enforcement (ICE) officers to provide direct medical care to detainees in ICE facilities.

The Office plans to develop a comprehensive set of guidelines for Occupational Safety and Health Policies to integrate into the existing federal "best practices" program in FY 2008.

In FY 2009, the Office will build off of accomplishments made in the development of a common set of standards, policies, and training opportunities for occupational medical and health safety programs across the Department.

### **Key Strategic Issues**

OHA faces four key strategic issues and major challenges in FY 2009.

- 1.) *Coordination and integration of our nation's biodefense activities.* A comprehensive understanding of how biodefense initiatives are coordinated at various levels of government and the private sector does not exist. The mission of OHA is to establish a robust and interoperable National Biodefense Architecture to create a seamless integration of federal, state, local and private sector capabilities to defend against biological threats.
- 2.) *Enhancing security of our nation's food and agriculture supply.* Strengthening DHS' role in food, agriculture and veterinary defense will require a high level of planning and coordination among DHS components, as well as other federal, state and local entities involved in working with the Office of Food, Agriculture and Veterinary Defense to protect the nation's food and agriculture supply. Improving import safety is a particular challenge as highlighted by recent events.

3.) *Improving DHS occupational health and safety.* Implementation of DHS occupational health and safety programs and “best practices” guidelines will be challenging due to the breadth of the coordination efforts and scope of the mission assignments among the various components. These programs and guidelines must be understandable, robust and truly beneficial to gain the trust of the DHS community.

4.) *Integrating all-hazards medical readiness for first-responders.* Integrating all-hazards medical readiness standards and guidelines for the nation’s first responders will require intensive efforts by the Office of Medical Readiness, especially in light of new and emerging biological threats, such as pandemic influenza. These efforts will require developing a robust system of planning and guidance at the state and local levels. Another challenge will be aligning DHS and HHS emergency preparedness grants for the medical first-responder community to avoid duplicative and uncoordinated grant guidance.

### C. Resources Requested and Performance Impact

#### **Major Changes within the Base level**

The Office of Health Affairs requests 84 positions, (80 FTE), and \$161.3 million. The total adjustments-to-base is 27 FTE and \$4.2 million.

#### **Increments over current service level**

In FY2009 OHA is requesting an additional 8 positions, 4 FTE and \$45 million to further enhance an intelligence-based medical and biodefense architecture. The requested changes will support OHA’s ability to implement its mission through supporting OHA’s four goals. The requested changes are detailed below.

#### **Next Generation BioWatch**

- Procure and implement fielding of BioWatch Next Generation Technology (\$34.5 million increase).

Performance Impact - Once the BioWatch system is fully converted to an automated system, the time to detect and field a response to a bioterrorism incident will be reduced to less than 6 hours.

#### **National Biodefense Architecture**

- Design and implement the foundation for a National Biodefense Architecture to create a seamless integrated system for coordination at all levels of government and the private sector. (\$2.0 million increase)

Performance Impact - The execution of this program will ensure coordinated Federal, state, local, and international responses to biological attacks. This architecture could then be applicable for other WMD threats and hazards threatening our nation.

## **Medical Readiness**

- Increase medical readiness and response systems throughout the nation by designing and promoting effective all-hazards medical response and contingency planning, training, and exercise tools for medical first responders and regional preparedness. (Medical Readiness \$3.4 increase)

Performance Impact - This program will have a tremendous effect on the OHA and DHS planning programs and has the potential to change how planning is done across the interagency. This effort meets the requirements of: Homeland Security Presidential Directives 5, and 8; H.R. 5441, Department of Homeland Security Appropriations Act, 2007, the Secretary's Strategic Objective 10.4, and S. 3678 Pandemic All-Hazards Preparedness Act, December 2006, Title II Public Health Security Preparedness. The development of evidence and new knowledge in medical readiness will improve the quality of the planning process and its output which in turn will improve response and recovery efforts. The development of best practices and standards into medical first responder planning will ensure that the consequences of disasters of all hazards will be mitigated. Development of innovative methods of planning has the potential to accelerate and improve the process of planning by allowing the immediate incorporation of elements based on changes in capabilities and needs.

## **Management & Administration**

- Provide Salaries and Expense funding (\$.6 million increase)

Performance Impact - The OHA is a start-up agency which has been operating with skeletal staff since its inception. In order to meet stakeholder expectations related to its core mission as well as the requirements associated with several HSPD's, adequate staffing is required. Failure to fund the requested positions will severely impact the ability of OHA to implement its programs, curtail activities associated with HSPD's, and prevent implementation of an internal controls program.

## D. How OHA Programs and Their Performance Goals Align to and Support the DHS Goals and Objectives.

The following list of programs with their performance goals are followed by the DHS goals and objective they support.

Medical and Biodefense program performance goal - Bolster the Nation's biodefense readiness by enhancing the strategy, policy, requirements, metrics and operations of a national architecture to rapidly detect, characterize and respond effectively to a large-scale biological event.

Goal 2- Continue to Protect our Nation from Dangerous Goods  
Objective 2.2

E. Performance Based Budget Highlights by Program

|   |         |         |         |         |           |             |
|---|---------|---------|---------|---------|-----------|-------------|
| <b>Program: Medical and Biodefense Programs</b>   |         |         |         |         |           |             |
| <b>Performance Goal:</b> Bolster the Nations biodefense readiness by enhancing the strategy, policy, requirements, metrics and operations of a national architecture to rapidly detect, characterize and respond effectively to a large - scale biological event. |         |         |         |         |           |             |
| <b>Goal 2 – Continue to Protect our Nation from Dangerous Goods</b>   |         |         |         |         |           |             |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008   | FY 2009     |
| <b>\$ Thousands</b>   | None    | None    | None    | 12,980  | \$116,500 | \$2,336,339 |
| <b>FTE</b>  | None    | None    | None    | 22      | 49        | 80          |

|   |         |         |          |         |         |         |
|---|---------|---------|----------|---------|---------|---------|
| <b>Measure:</b> Number of agencies who have agreed to provide information to the National Biosurveillance Integration System (NBIC).  |         |         |          |         |         |         |
| <b>Description of Measure:</b> This measure will determine how many Federal agencies are participating in NBIS by determining the number of information sharing and access agreements (ISAA) that are in place. An ISAA is a tool that facilitates and formalizes information access or exchange between two or more parties, and can take many forms. NBIS will begin work with participation of 5 core agencies. Agency participation and information exchange must be paced to allow adequate consideration of major issues and documentation of the exchange details. Currently, details pertaining to privacy rights, system compatibility issues, and information security are being negotiated. This year, NBIS will enter agreements and secure the participation of 5 of the core agencies. In FY 2008, an additional five agencies will sign ISAA's in order to make NBIS a more robust and effective network. After FY2008 NBIS will continue to add additional agencies to improve the effectiveness of the system. |         |         |          |         |         |         |

|---|--|--|--|--|--|--|
| <b>Measure:</b> Percent of the population in BioWatch jurisdictions covered by outdoor biological monitoring units.   |  |  |  |  |  |  |
| <b>Description of Measure:</b> This performance measure calculates the percentage of the population in the BioWatch jurisdictions that is covered by outdoor biological monitoring units. Population covered by these units can be warned and identified for treatment prior to becoming symptomatic as a consequence of an outdoor release of biological agent. A BioWatch jurisdiction includes the largest metropolitan areas in the U.S. This measure is an estimate based on performance (i.e., probability of detection) and range (i.e., protection area) of the monitoring units. |  |  |  |  |  |  |

**Measure:** Time between an indoor monitoring unit exposure to a biological agent and the determination/declaration of a confirmed positive sample result.

**Description of Measure:** This performance measure calculates the maximum time between an indoor release of a biological agent and a declaration of a confirmed positive sample result by the local laboratory official. The higher the number of autonomous indoor biological monitoring units employed, the shorter the time will be between the release of a biological agent and the declaration of a confirmed positive sample result. An autonomous indoor biological monitoring unit is a type of sensor that collects airborne particles and performs sample analysis. By performing the sample analysis at the monitoring site, automated detection systems significantly reduce the time between a biological release and detecting confirming that an event has occurred.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## Departmental Management and Operations Office of the Secretary and Executive Management

### I. Appropriation Overview

#### **A. Mission Statement for the Office of the Secretary and Executive Management:**

The Department of Homeland Security (DHS) Office of the Secretary and Executive Management (OSEM) supports the Department and all of its components by providing leadership, direction, and management to the Department. OSEM establishes and implements policy and provides various support functions and oversight to all entities within the Department. The Department continues to work toward integration and consolidation of its resources and operations to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

#### **B. Budget Activities**

OSEM is a separate appropriation within Departmental Management and Operations that provides resources for 12 separate offices that individually report to the Secretary. These offices are: Immediate Office of the Secretary, Immediate Office of the Deputy Secretary, Office of the Chief of Staff, Office of Policy, Office of the Executive Secretary, Office of Public Affairs, Office of Legislative Affairs, Office of the General Counsel, Office for Civil Rights and Civil Liberties, Office of the Citizenship and Immigration Ombudsman, Privacy Officer, and the Office of Counternarcotics Enforcement. A brief summary of each office is described below.

*Immediate Office of the Secretary:* The Office of the Secretary's role is to provide leadership, management and direction, and oversight for all the Department's components. The Secretary serves as the top representative of the Department of Homeland Security to the President, to Congress, and to the general public.

*Immediate Office of the Deputy Secretary:* The Office of the Deputy Secretary supports the Secretary by providing leadership to the Department by focusing on internal management and direction. This role ensures the Department will operate efficiently and effectively when carrying out its mission. The Deputy Secretary's role provides internal oversight to all Department operations, which allows the Secretary to focus his attention on more external matters concerning the Department of Homeland Security.

*Chief of Staff:* The Chief of Staff is responsible for the coordination of all Department agencies, directorates, and offices. This office is tasked to streamline, coordinate, and deliver initiatives and policies that will ensure our safety, response capacity, and our freedoms.

*Office of Policy:* The Office of Policy's responsibilities include the coordination of Department-wide policies, programs, and planning to ensure consistency and integration of missions throughout the Department. This Office strengthens the Department's ability to maintain policy and operational readiness needed to protect the Homeland by providing a centralized coordination point for developing and communicating policies across the multiple internal and external components of the Homeland Security network. In addition to DHS, the Office of Policy also interacts with other government entities, international counterparts, academics and private stakeholders.

*Office of the Executive Secretary:* The Office of the Executive Secretary's mission is to support the Office of the Secretary in the Homeland Security mission of leading a unified national effort to secure America. By providing the Secretary with accurate and timely dissemination of information and written communications throughout DHS and with our homeland security partners, the Executive Secretary supports DHS's strategic goals of awareness, prevention, protection, response, recovery, service and organizational excellence. The Executive Secretary supports the Office of the Secretary by developing, implementing, and managing business processes for written communications, briefing book materials for the Secretary and Deputy Secretary, Authorization Questions for the Record, White House/interagency actions, and others as identified by the Chief of Staff. Most importantly, the Executive Secretary facilitates communications among all the DHS components, thereby encouraging a unified national effort to secure America.

*Office of Public Affairs:* The Office of Public Affairs is responsible for managing external and internal communications. The Office of Public Affairs respond to national media inquiries, maintain and update the Department's web site, write speeches for principals and coordinate speaking events for Department officials. The Office of Public Affairs also develops and manages various public education programs including the Ready Campaign to increase citizen preparedness. The Office fosters strategic communication throughout the Department and with external stakeholders. It manages the Department's organizational identity program, which includes usage of the DHS seal and related guidelines. It oversees the Department's employee communication activities, which include an all employee newsletter, town hall meetings between management and employees, and an intranet site. Finally, its incident communications program guides overall Federal incident communication activity and coordinates with state, local, and international partners to ensure accurate and timely information to the public during a crisis.

*Office of Legislative Affairs:* The Office of Legislative Affairs serves as the Secretary's principal liaison with Capital Hill and other governmental entities by fostering relationships with Members of Congress and staff to precipitate legislative support for the Departmental programs, policies and initiatives that promote a more secure nation.

*Office of the General Counsel:* The General Counsel is responsible for ensuring implementation of the Department's statutory responsibilities and policies as set forth by the Administration, the Secretary, and other senior officials within the Department. The General Counsel is the Department's chief legal officer and principal legal advisor to the Secretary of Homeland Security and, as such, has final authority and responsibility for legal policy determinations within the Department and its components. The General Counsel, and the attorneys engaged in the practice of law on behalf of DHS who report to him from throughout the Department, are responsible for ensuring that legal compliance is achieved in every aspect of the Department's work. The Office provides legal counsel for all Departmental offices, (other than those specifically excluded by regulation or directive), determines the Department's position to provide effective legal services

involving claims, protests, litigation, and alternative dispute resolution, and represents the Department in all legal forums.

*Office for Civil Rights and Civil Liberties:* The responsibility of the Office for Civil Rights and Civil Liberties is to protect civil rights and civil liberties by providing policy advice on civil rights and civil liberties issues, and serving as an information and communication channel to the public on these issues. This office is tasked with investigating complaints alleging abuses of civil rights, civil liberties, and racial and ethnic profiling by employees and by officials of the Department. The Office is responsible for overseeing the Departmental Equal Employment Opportunity programs.

*Citizenship and Immigration Services Ombudsman:* The statutory mission of the Citizenship and Immigration Services (CIS) Ombudsman is to assist individuals and employers in resolving problems with United States Citizenship and Immigration Services (USCIS), to identify individual and employee problem areas within USCIS and propose changes to mitigate identified problems.

*Privacy Officer:* The DHS Privacy Officer is the first statutorily mandated Privacy Officer within the Federal government. The Privacy Office protects the collection, use, and disclosure of personally identifiable information (PII) and Departmental information. It ensures that appropriate access to information is consistent with the vision, strategic mission, and core values of the Department, and implements the policies of the Department to defend and protect the individual rights, liberties, and information interests of our citizens. The Privacy Office has oversight of all privacy policy matters, including compliance with the Privacy Act of 1974, the Freedom of Information Act, and the completion of privacy impact statements on all new programs, as required by the E-Government Act of 2002 and Section 222 of the Homeland Security Act.

*Office of Counternarcotics Enforcement (CNE):* As the principal advisor to the Secretary on counterdrug matters, the CNE Director reviews and evaluates the effectiveness of DHS counterdrug activities. The Office of Counternarcotics Enforcement coordinates Departmental policy and operations within the Department, other Federal departments and agencies, and State and local agencies with respect to stopping the entry of illegal drugs into the United States. The Office ensures the adequacy of resources within the Department and recommends the appropriate financial and personnel resources necessary to help the Department fulfill its responsibilities to stop the entry of illegal drugs into the United States. The Office of Counternarcotics Enforcement also works closely with DHS intelligence and law enforcement entities to assist in tracking and severing connections between drugs and terrorism (known as the DTX Project). DTX activities to track and sever the connections between drug trafficking and terrorism are conducted within the Joint Terrorism Task Force construct.

### **C. Budget Request Summary:**

The Office of the Secretary and Executive Management requests 625 positions, 599 FTE, and \$127,229,000 for the FY 2009 request. This represents an increase of 52 positions, 57 FTE, and \$29,876,000 over the FY 2008 Enacted budget of 573 positions, 542 FTE, and \$97,353,000. The FY 2009 request includes adjustments-to-base of \$22,591,000 and program increases of \$7,285,000. Requested program increases in FY 2009 include:

- 18 positions, 9 FTE and \$3,093,000 for the Office of Policy;
- 20 positions, 10 FTE and \$2,475,000 for the Office of the General Counsel;
- 10 positions, 5 FTE and \$708,000 for the Office for Civil Rights and Civil Liberties;
- 4 positions, 2 FTE and \$509,000 for the Privacy Officer;
- 0 positions, 0 FTE and \$500,000 for the Office of Public Affairs.

### **D. PPA Consolidation:**

The FY 2009 Budget Request is being submitted as one single appropriation, instead of in the program/project activity (PPA) format provided in prior years. DHS is requesting funding under the auspices of a single appropriation without PPA's to allow the Secretary to maximize the use of resources within this appropriation and to address emerging requirements.

## II. Summary of FY 2009 Budget Estimates by Office

**Department of Homeland Security**

The Office of the Secretary and Executive Management requests \$1.505 million for this office. This is an increase of \$383,000 over the FY 2008 Enacted level for adjustments to base.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Immediate Office of the Deputy Secretary supports the Office of the Secretary by providing leadership to the Department. This office focuses on internal management and direction, which ensures efficient and effective operation of the Department. The Deputy Secretary’s role is to provide internal oversight to all Departmental operations which allows the Secretary to focus on external matters concerning the Department of Homeland Security.

CHIEF OF STAFF

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b> |

| Total Change 2008-2009       | 18                  | 25         | 10,693        |

The Office of the Secretary and Executive Management requests \$43.693 million for this office. This request is an increase of \$7.600 million over the FY 2008 Enacted level for adjustments to base, as well as program increases of \$3.093 million to produce the Quadrennial Homeland Security Review and fund critical office staffing for the Office of

International Affairs, Screening Coordination Office, Office of Strategic Plans, and Office of Policy Development.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Policy was created in FY 2006 and has since been responsible for strengthening homeland security by developing and coordinating Department-wide policies, planning, and programs in order to better coordinate/integrate the Department’s prevention, protection, and response and recovery missions. The Office of Policy acts as lead coordinator of Department-wide policies, programs, and planning which will ensure consistency and integration of missions throughout the entire Department. The Policy Office provides a central office to develop and communicate policies across multiple components of the homeland security network and strengthens the Department’s ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities. The Office of Policy is tasked with bridging multiple headquarters’ components and operating agencies to improve communication among DHS entities, eliminate duplication of effort, and translate policies into timely action. The Office of Policy will create a single point of contact for internal and external stakeholders that will allow for streamlined policy management for the Department.

**SECURE BORDER COORDINATION OFFICE**

|                    | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b> |
|--------------------|---------------------|------------|---------------|
| <b>2007 Actual</b> | <b>2</b>            | <b>2</b>   | <b>1,865</b>  |

The Office of the Secretary and Executive Management requests no funding for the Secure Border Coordination Office. The U.S. Customs and Border Protection (CBP) assumed responsibility for the Secure Border Coordination Office in FY 2008.

**EXECUTIVE SECRETARY**

The Office of the Secretary and Executive Management requests \$5.848 million for this office. This request is an increase of \$1.126 million over the FY 2008 Enacted level for adjustments to base.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of the Executive Secretary has established effective and proficient protocols in the processing of all internal communication, decision management, briefings, liaison activities between the Department and its components, and external correspondence for the Immediate Office of the Secretary and all directorates. The Department-wide scope of this office facilitates achievement of the Department's goals by developing channels of internal communication and of correspondence to be implemented by all offices and by establishing policies for the approval and dissemination of internal and external communication.

The Office of the Secretary and Executive Management requests \$8.291 million for this office. This request is an increase of \$1.141 million over the FY 2008 Enacted level for adjustments to base, as well as a program increase of \$500,000 to restore prior year funding levels for the Ready Campaign.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The DHS Office of Public Affairs is comprised of 11 major functional areas. They are, the Ready Campaign, media relations, incident communications, intelligence and operations communications, strategic communications, employee communications, public liaison, finance and administration, planning and technical operations, web content, and multimedia liaison.

The Office of the Secretary and Executive Management requests \$5.697 million for this office. This request is an increase of \$797,000 over the FY 2008 Enacted level for adjustments to base.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Legislative Affairs serves as the Secretary’s principal liaison with Capitol Hill and other government entities. The Office fosters working relationships with Members of Congress and staff to engender legislative support for the Department of Homeland Security programs, policies and initiatives that will facilitate the unified national effort to secure America.

OFFICE OF THE GENERAL COUNSEL

The Office of the Secretary and Executive Management requests \$20.914 million for this office. This request is an increase of \$4.939 million over the FY 2008 Enacted level for adjustments to base, as well as program increases of \$2.475 million.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of the General Counsel is responsible for all legal activities within the Department to ensure full implementation of the Department’s statutory responsibilities and all policies set forth by the Secretary and all officials of the Department. The Office of the General Counsel provides legal counsel for all DHS offices (except those specifically excluded by regulation or directive), determines the Department’s position in order to provide effective legal services dealing with claims, protests, litigation, and alternative dispute resolution, and represents the Department in all legal forums.

The Office of the Secretary and Executive Management requests \$17.917 million for this office. This request is an increase of \$3.009 million over the FY 2008 Enacted level for adjustments to base, as well as program increases of \$708,000.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The mission of the Office for Civil Rights and Civil Liberties is to review and assess information regarding abuses of civil rights, civil liberties, and profiling on the basis of race, ethnicity, or religion by employees and officials of the Department; to make available to the public information on the responsibilities and functions of, and how to contact the Officer for Civil Rights and Civil Liberties; to assist the Secretary, directorates, and offices of the Department to develop, implement, and periodically review Department policies and procedures to ensure that protection of civil rights and civil liberties is appropriately incorporated into Department programs and activities; to oversee compliance with constitutional, statutory, regulatory, policy, and other requirements relating to the civil rights and civil liberties of individuals affected by the programs and activities of the Department; to coordinate with the Department Privacy Officer and ensure that programs, policies, and procedures involving civil rights, civil liberties, and privacy considerations are addressed in an integrated and comprehensive manner, and that Congress receives appropriate reports regarding such programs, policies, and procedures; and to investigate complaints and information indicating possible abuses of civil rights or civil liberties. The Office for Civil Rights and Civil Liberties is also responsible for overseeing the Department’s equal employment opportunity programs, and for bringing all civil rights-related issues under the jurisdiction of one Headquarters office.

The Office of the Secretary and Executive Management requests \$6.804 million for this office. This request is an increase of \$795,000 over the FY 2008 Enacted level for adjustments to base, as well as program increases of \$509,000.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Privacy Officer is responsible for protecting the Department’s collection, use, and disclosure of personally identifiable information (PII). The Office mission ensures that appropriate access to information is consistent with the vision, strategic mission, and core values of the Department, and implements the policies of the Department to defend and protect the individual rights, liberties, and information interests of our citizens. The Privacy Office has primary responsibility for privacy policy, including:

1. Assuring that the use of technologies sustains, and does not erode, privacy protections relating to the use, collection, and disclosure of personal information;
2. Assuring that personal information contained in Privacy Act systems of records is handled in full compliance with fair information practices as set out in the Privacy Act of 1974;
3. Evaluating legislative and regulatory proposals involving collection, use, and disclosure of personal information by the Federal government;
4. Conducting a privacy impact assessment of proposed rules of the Department or that of the Department on the privacy of personal information, including the type of personal information collected and the number of people affected; and
5. Preparing a report to Congress on an annual basis on activities of the Department that affect privacy including complaints of privacy violations, implementation of the Privacy Act of 1974, internal controls, and other matters.

The Office of the Secretary and Executive Management requests \$4.018 million for this office. This request is an increase of \$1.338 million over the FY 2008 Enacted level for adjustments to base.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Counternarcotics Enforcement (CNE) has two statutorily established primary missions (6 U.S.C §458) that support the Nation's drug control program and the statutory mission of the Department of Homeland Security:

- To stop the entry of illegal drugs into the United States
- To track and sever the connections between drug trafficking and terrorism

The Office of Counternarcotics Enforcement coordinates policy and operations within DHS and between the Department and other Federal departments and agencies, and between the Department and State and local agencies with respect to stopping the entry of illegal drugs into the United States. It ensures the adequacy of resources within the Department and recommends the appropriate financial and personnel resources necessary to help the Department better fulfill its responsibility to stop the entry of illegal drugs into the United States. The Office of Counternarcotics Enforcement also works closely with DHS intelligence and law enforcement entities to assist in tracking and severing connections between drugs and terrorism (known as the DTX Project). DTX activities to track and sever the connections between drug trafficking and terrorism are conducted within the Joint Terrorism Task Force construct.

Description of Item

The Office of Policy is requesting an increase of \$1.500 million and 0 FTE to produce the Quadrennial Homeland Security Review (QHSR). The Office of Policy is also requesting an increase of \$1.593 million and 9 FTE to fund critical office staffing for the Office of International Affairs, Screening Coordination Office, Office of Strategic Plans, and Office of Policy Development.

Justification

The Office of Policy requests \$1,500,000 to support the Quadrennial Homeland Security Review (QHSR). A QHSR sets the long-term direction of the Department. This is the first QHSR for DHS and will serve as a strategic capstone construct for broad Homeland Security policy within the Federal government. The QHSR will be principally conducted during FY 2009. Contractor support will be necessary to research, organize, analyze, facilitate workshops, and draft the document.

The Screening Coordination Office (SCO) is requesting \$293,000 and 2 FTE to support the Credentialing and Vetting roadmap efforts. These two programmatic areas represent significant opportunities for enhancing screening processes across DHS, rationalizing and prioritizing investments in screening technologies and systems, developing metrics for evaluating and improving screening processes and establishing standards for biometrics use in screening. The SCO is responsible for developing service models, as appropriate, for these areas to improve DHS screening operations.

The Office of International Affairs is requesting \$300,000 and 2 FTE for the DHS Attaché program. With DHS Attachés fielded in Iraq, USEU, Canada, Mexico, and Singapore, the next critical

regions for deployment are Beijing and Berlin. The DHS Attaché program affords the Department the ability to promote overarching DHS goals and objectives that strategically guide the operational responsibilities of our myriad component representatives abroad. As the Secretary's personal representatives, and often with broad regional responsibilities, the DHS Attachés actively engage our international partners on the full breadth of the DHS mission, to include immigration policy, transportation security, traveler screening, border management, and cargo security. As the eyes and ears of the Office of International Affairs around the globe, these senior-level attachés dramatically increase the Office's ability to provide DHS leadership with real-time information exchange, negotiating strategies and expert advice on international security policy.

The Office of Strategic Plans is requesting \$500,000 and 2 FTE to assist in support of systematically reviewing all Department strategic plans and ensuring integration across the Department.

The Office of Policy Development is requesting \$500,000 and 3 FTE. The Office of Policy Development is currently relying on contract and detailee support to meet 40 percent of its mission functions. As the lead coordinator of Department-wide policies, programs, and planning, it is critical that appropriate full time staff levels coincide with current and anticipated workload. The additions of several Offices to the Policy Development mission, such as Weapons of Mass Destruction, Bioterrorism, Border Security, and Cyber Security have created a staff shortage which limits the ability to meet each Office's mission. Funding will also be used to continue the Committee on Foreign Owned Investments in the United States.

**Program Increase 2:** Office of the General Counsel

Strategic Goal(s) & Objective(s): Continually improve the manner in which we conduct our business

Program Increase: Positions 20 FTE 10 Dollars \$2,475

Description of Item

The Office of the General Counsel (OGC) is requesting an increase of \$2,475,000, 20 positions, and 10 FTE to effectively assist the Department in meeting the growing need for legal counsel across numerous mission areas.

Justification

The Department has ever-increasing responsibilities related to immigration and border security, emergency preparedness and response, chemical security, port security, cyber security and other mission-critical priorities that are stretching currently available legal resources past the limit. Additional staff is required to provide efficient and effective response to legal needs arising in the context of existing and newly-mandated programs and initiatives.

Impact on Performance

OGC continues to provide high-quality legal advice in a timely manner to the Secretary and other Department decision makers; however additional resources are needed to maintain this level of service. If OGC does not receive the requested funding for FY 2009, legal services for growing programs and new initiatives in the following areas may be severely impacted:

- *Immigration and Border Security:* The Department continues to prioritize efforts to strengthen border security, increase interior enforcement, reform immigration processes, and enhance immigration screening coordination. These initiatives require three positions for legal support and coordination from OGC.
- *Regulatory Affairs:* OGC manages a complex and growing regulatory workload. Drafting and overseeing the development of these rules, which in many cases are driven by aggressive statutory deadlines, requires a tremendous dedication of staff resources, including in many cases the assistance of economists to conduct required analyses. OGC requests three positions for Regulatory Affairs.
- *Chemical Security and Infrastructure Protection:* Section 550 of the Department's FY 2007 appropriations bill gave the Department the authority to regulate security at high-risk

chemical facilities. OGC requests one position to increase legal staffing in this area to handle emerging workloads associated with newly issued chemical facility security regulations.

- *National Protection and Programs:* OGC requests one position to provide enhanced support to the recently-created National Protection and Programs Directorate, including needs associated with new cyber security initiatives designed to protect federal information technology networks.
- *Legislative Affairs:* OGC requests one position in order to meet the aggressive timelines of Congress and the Department's leadership on legislative matters.
- *Information sharing programs:* OGC desires one position to develop legal expertise on information sharing programs currently underway and being developed by the Department and its components.
- *International cooperative mechanisms:* OGC requests one position to develop legal expertise in the international arena, including in the exchange of traveler information with foreign governments, particularly biometrics.
- *Screening and credentialing programs:* OGC requests one position to provide stronger support to new screening and credentialing programs being developed by the Department and its components, and to provide legal support to a redress process for individuals and cargo shippers impacted by these programs.
- *Fiscal/Appropriations Law:* OGC currently has only two fiscal law experts. A Senate committee report to the appropriations bill criticized OGC's efforts to ensure that Departmental activities fully comply with appropriations law as insufficient. OGC requests one position to address this need.
- *Incident management:* OGC requests one position to provide enhanced expertise to support the Secretary's incident management responsibilities and in support of efforts to prevent, protect against, and respond to threats and incidents involving WMD, catastrophic consequences, and natural disasters.
- *Claims and litigation:* OGC requests two positions to provide more robust legal support to clients dealing with employment disputes, environmental litigation, procurement protests and litigation, and Freedom of Information Act litigation.
- *Environmental Law:* OGC has been doing the best possible job with the resources available to address environmental issues as they arise in the myriad legal matters handled at the headquarters level. OGC requests one position to bring dedicated expertise to this key area.
- *Procurement:* OGC procurement attorneys provide advice and counsel on general procurement matters for all headquarters offices. It is imperative, given the financial scope of these procurement operations that one position is provided for the necessary legal review, oversight, and support.

- *Recruitment program:* OGC requests two positions to establish a more robust Departmental entry-level Honors Attorney recruitment program for third-year law students, full-time graduate law students, and Judicial Law Clerks, as well as a Summer Law Intern Program.

**Program Increase 3:** Office for Civil Rights and Civil Liberties

Strategic Goal(s) & Objective(s): Continually improve the manner in which we conduct our business

Description of Item

The Office for Civil Rights and Civil Liberties (CRCL) is requesting \$708,000 and 5 FTE to fund critical staffing for the CRCL Programs Directorate.

Justification

The CRCL Programs Directorate enables the Office for Civil Rights and Civil Liberties to (1) provide proactive legal and policy advice on a wide range of issues, helping the DHS Secretary and the DHS Components to shape policy in ways that are mindful of civil rights and civil liberties, and (2) serve as an information and communications channel with the public regarding these issues. Because of the high profile nature of Department programs and activities, this support can be critical to the successful launch of initiatives and operations.

The CRCL Programs Directorate requires five management and program analysts to help fulfill the following objectives: (1) conduct Civil Rights and Civil Liberties Impact Assessments (CRCLIA) and provide support to and oversight of DHS programs and initiatives such as the National Applications Office, Secure Flight, REAL ID, DHS-TRIP; (2) administer training initiatives and programs designed to bring awareness of civil rights and civil liberties to Department personnel within headquarters and in the field including critical areas such as state and local fusion centers; and (3) oversee information sharing, technology, and general civil liberties issues, and perform a wide variety of legislative and regulatory reviews.

In order to ensure that the Department can successfully achieve its mission while adequately protecting the civil rights and civil liberties of our citizens, CRCL will develop a Civil Rights and Civil Liberties Impact Assessment for DHS programs that can be used to assess how Departmental programs and operations can potentially impact the CRCL of U.S. Persons and how they will be prevented from doing so inappropriately.

The CRCL Programs Community Engagement Unit requires two policy advisors to help the Office fulfill the following objectives: (1) develop regular communications with American Arab, Muslim, Sikh and South Asian community leaders in key cities throughout the United States; (2) continue collaborative efforts with colleagues in the Executive Branch engaged in similar work; and (3) continue communications with allied countries to improve our knowledge of the Arab and Muslim world. Demands on the Office for public speaking, intra agency briefings, and review of related work produced by other Departments and agencies has considerably increased in recent years and is expected to continue for the foreseeable future.

The CRCL Programs Immigration Unit requires two policy advisors to help the Office fulfill the following objectives: (1) provide analysis of civil rights statutes affecting workforce and worksite enforcement; (2) help with responses required by Human and Civil Rights treaties; and (3) coordinate with the Department of Justice on immigration issues. With immigration initiatives and regulations underway, CRCL expects an increase in demand for analysis on civil rights and civil liberties relating to immigration and assimilation issues.

The CRCL Programs Special Needs Unit requires one policy advisor to help the Office fulfill the following objectives: (1) ensure that special needs issues are fully considered within the formation and implementation of Departmental policy; and (2) build the capacity of DHS preparedness and emergency management functions to address these issues within the conduct of agency operations. Special Needs takes into account individuals with disabilities, Limited English Proficiency, the elderly and others.

#### Impact on Performance

Absent this funding, the CRCL Programs Directorate would remain at its current staffing level resulting in a shortage of resources and tools needed to advise and oversee Department programs and initiatives impacting the civil rights, civil liberties, and security of the American public. Likewise, a lack in funding would result in a considerable inventory of matters retained by the Review and Compliance Directorate for investigation and recommendation, a significant inventory of matters referred to components for appropriate action, and a diminished ability to quickly investigate matters important to the Department and public. CRCL will also be unable to meet regulatory time frames for adjudicating employment discrimination complaints. More important is the impact on DHS employees who rely on the EEO process for an examination of employment policies and elimination of barriers to an equitable workplace. Employee productivity is reduced and turnover increased in organizations where issues in conflict are not resolved quickly.

**Program Increase 4:** Privacy Officer

Strategic Goal(s) & Objective(s): Continually improve the manner in which we conduct our business

Description of Item

The Privacy Officer is requesting program funding of \$509,000 and 2 FTE for program increase requirements involving the processing of all privacy documentation for the Department, including Privacy Impact Assessments, System Records Notices, and OMB privacy reporting.

Justification

The Privacy Office accomplishes the critical mission of developing, reviewing and delivering System of Records Notices (SORNs), Privacy Impact Assessments (PIAs) and Privacy Threat Assessments (PTAs) for the Department of Homeland Security. The Privacy Office has multiple commitments that mandate review and approval on privacy and data protection and compliance oversight for agreements such as the U.S. – EU Passenger Name Record (PNR) Agreement and the U.S. - Europol Data Protection Agreement and the Lost and Stolen Passport arrangements with an International forum.

Funding is included for a Privacy Compliance Analyst. This individual will meet with component specific programs and privacy points of contacts in the components, at headquarters in the Metro DC area and in field offices to review the list of programs and systems that collect, use, maintain and disseminate PII to determine if they are properly covered with appropriate PIAs and SORNs. This person will coordinate with CRCL, SCO, OCIO, and OGC to identify programs early in the development process to ensure that privacy is incorporated into the programs at the beginning and throughout the lifecycle of the program.

Impact on Performance

With these resources, DHS will complete all required PIAs on time. The inability to access resources necessary to complete the review and approval processes will impact the Department’s ability to ensure continued funding for operational programs as these programs will not receive passing privacy scores for the investment risk reviews (OMB Exhibit 300) of the supporting information technology systems. It is incumbent on the DHS Privacy Office to provide sound, reasonable, and prompt leadership to these significant programs while developing, implementing, and conducting a sequential internal Privacy training program for more than 180,000 DHS Federal employees and an equal number of contractors.

**Program Increase 5:**

Office of Public Affairs: Ready Campaign

Strategic Goal(s) & Objective(s): *Ready* is a national campaign to educate and empower Americans to prepare for emergencies. The objective is to get citizens who can prepare to do so now, thereby freeing up valuable response resources during an emergency and making our nation better prepared and more resilient.

Program Increase: Positions 0 FTE 0 Dollars \$500

| <b>Total Request</b>   | <b>34</b>      | <b>34</b> | <b>\$5,649</b>  | <b>43</b>       | <b>39</b> | <b>\$6,650</b>  | <b>43</b>       | <b>43</b> | <b>\$8,291</b>  |

Description of Item

The Office of Public Affairs is requesting an increase of \$500,000 to support the Ready Campaign.

Justification

This will restore funding that the Ready Campaign lost during a reorganization at DHS, and will allow the Office of Public Affairs to provide much needed preparedness education and advertising to our citizens. These funds are critical to the program’s ability to promote public awareness, which is a goal the Campaign has been able to achieve since its inception.

With \$500,000, the Ready Campaign will help support the Office’s continuing efforts to educate the public on emergency preparedness and fulfill the Homeland Security Presidential Directive 8 on Citizen Preparedness. Specifically, the Ready Campaign will use these funds to develop new advertising and public service announcements to engage the public - especially our Spanish Campaign known as Listo. This is one of the Campaign's main outreach efforts and is something that has to be updated every two years in order to keep them relevant and current.

In addition, these funds will continue to help the Campaign support it's efforts to get citizens involved nationwide during National Preparedness Month in September. The Campaign continues to grow this effort by engaging the participation of more organizations and businesses as well as citizens through outreach and publicity. These funds will allow us to sustain our effort in engaging the participation of the public through outreach and publicity. We will also be able to provide our partners with resources, such as a toolkit, web materials, and other resources.

Partnerships are another key component of the Campaign and these funds will allow the Campaign to continue those efforts. For example, for the past two years the Ready Campaign through its partnership with the Ad Council has joined the Radio Disney Mall Tour in the summer. This effort allows the Campaign to take its message across the country and reach a core audience - parents.

This initiative funding will not be new money for the Campaign but will restore funding that was lost to the Campaign during a reorganization at DHS. These funds are critical to the program's ability to promote public awareness, which is a goal the Campaign has been able to achieve since its inception.

Impact on Performance (Relationship of Increase to Strategic Goals)

Without the increase in funding for FY 2009, which was historically provided by other parts of the Department, the Campaign's ability to build a culture of preparedness in this country would be severely hampered. If these resources are not provided in FY 2009, the Ready Campaign will not be able to develop, produce and distribute specific emergency preparedness messages and information to several segments of the population including older and disabled Americans, families with young children, owners and managers of small and medium-sized businesses and non-English speaking citizens. The forms of emergency preparedness messages affected include public service advertisements, brochures, and web site content as well as public and media outreach efforts.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Departmental Management and Operations  
Office of the Secretary and Executive Management  
Justification of Proposed Changes  
Appropriation Language**

For necessary expenses of the Office of the Secretary of Homeland Security, as authorized by section 102 of the Homeland Security Act of 2002 (6 U.S.C. 112), and executive management of the Department of Homeland Security, as authorized by law, [\$97,353,000]**\$127,229,000**: *Provided*, That not to exceed \$40,000 shall be for official reception and representation expenses[*Provided* further, That \$15,000,000 shall not be available for obligation until the Secretary (1) certifies and reports to the Committees on Appropriations of the Senate and the House of Representatives that the Department has revised Departmental guidance with respect to relations with the Government Accountability Office to specifically provide for: (a) expedited timeframes for providing the Government Accountability Office with access to records within 20 days from the date of request; (b) expedited timeframes for interviews of program officials by the Government Accountability Office; and (c) a significant streamlining of the review process for documents and interview requests by liaisons, counsel, and program officials, consistent with the objective that the Government Accountability Office be given timely and complete access to documents and agency officials; and (2) defines in a memorandum to all Department employees the roles and responsibilities of the Department of Homeland Security Inspector General; *Provided* further, That the Secretary shall make the revisions to Departmental guidance with respect to relations with the Government Accountability Office in consultation with the Comptroller General of the United States and issue departmental guidance with respect to relations with the Department of Homeland Security Inspector General: *Provided* further, That not more than seventy-five percent of the funds provided under this heading shall be obligated prior to the submission of the first quarterly report on progress to improve and modernize efforts to remove criminal aliens judged deportable from the United States. (Consolidated Appropriations Act, 2008)].

**Summary Justification and Explanation of Changes**

|                              | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|------------------------------|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Salaries and Benefits</b> | \$50,539                  | \$64,067                   | \$76,688                   | \$12,621                      |

Salaries and Benefits includes costs for 599 FTE in FY 2009. The FY 2009 request includes an increase of \$2.995 million for the proposed January 2009 increase in personnel compensation, \$4.450 million for the annualization of prior year funding and of the 2008 pay raise.

|   | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Travel and transportation of persons</b> | \$3,606                   | \$4,292                    | \$4,371                    | \$79                          |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel for the Office of the Secretary also includes the costs to reimburse other government entities, such as the USCG, FAA, and USAF for the use of their plane for travel by the Secretary and Secretary related travel. The FY 2009 request includes an increase of \$79,000 requested as part of the Office of Policy's requested program increase.

|                                 | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---------------------------------|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Transportation of Things</b> | \$91                      | \$148                      | \$148                      | \$0                           |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2009 request includes no additional request for funding.

|                               | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|-------------------------------|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Rental Payments to GSA</b> | \$0                       | \$1,672                    | \$9,319                    | \$7,647                       |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The funding for rent in FY 2007 is shown within object class 25.3 for OSEM along with other WCF charges. The FY 2009 request includes a permanent transfer of \$3.733 million in base funding from the Office of the Chief Administrative Officer appropriation. In prior years, the Office of the Chief Administrative Officer received funding for the rent at DHS start-up as the Department acquired additional space, the cost was budgeted in the appropriation of the occupying organization. This transfer of CAO base funding aligns the rent funding request with the organization occupying the space and more accurately reflects their costs. The FY 2009 request also includes an increase of \$3.914 million to enable OSEM to pay the increased rent bill associated with the FY 2007 rent reprogramming approved by the House and Senate in August 2007. The rent reprogramming was primarily due to recertification and corrections to the GSA Occupancy Agreements resulting in more accurate allocations of the GSA rent bill to users. Beginning in FY 2008, GSA rent paid by OSEM through the WCF will be obligated against object class 23.1.

|                   | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|-------------------|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Other Rent</b> | \$37                      | \$41                       | \$41                       | \$0                           |

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2009 request includes no additional request for funding.

|  | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|--|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Communication, Utilities, and Miscellaneous charges</b> | \$100                     | \$41                       | \$42                       | \$1                           |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2009 request includes a program increase of \$1,000 for the Office of Policy.

|                 | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|-----------------|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Printing</b> | \$167                     | \$233                      | \$233                      | \$0                           |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2009 request includes no additional request for funding.

|   | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Advisory and Assistance Services</b> | <b>\$9,939</b>            | <b>\$8,334</b>             | <b>\$7,796</b>             | <b>(\$538)</b>                |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2009 request includes a decrease of \$538,000 as a result of management efficiencies from Offices conversion of contractors to Federal employees.

|                       | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|-----------------------|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Other Services</b> | <b>\$6,736</b>            | <b>\$4,463</b>             | <b>\$5,918</b>             | <b>\$1,455</b>                |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2009 request includes no additional request in funding. Funding increases are included for the Office of Policy and the Office of Public Affairs in the amount of \$2.0 million. A few offices have converted personnel from contractors to federal employees for management efficiencies of \$545,000.

|  | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|--|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Purchases of Goods and Services from Gov't Accts.</b> | <b>\$12,102</b>           | <b>\$11,509</b>            | <b>\$20,091</b>            | <b>\$8,582</b>                |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2009 request includes an increase of \$8.582 million to cover the Working Capital Fund and shared services increase from FY 2008 to FY 2009.

|  | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|--|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Operation &amp; maintenance of facilities</b> | <b>\$100</b>              | <b>\$0</b>                 | <b>\$0</b>                 | <b>\$0</b>                    |

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2009 request includes no additional request in funding.

|                                 | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---------------------------------|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Research and Development</b> | <b>\$0</b>                | <b>\$868</b>               | <b>\$868</b>               | <b>\$0</b>                    |

Research and Development includes costs for contracts for the conduct of basic and applied research and development. The FY 2009 request includes no additional request in funding.

|                     | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---------------------|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Medical Care</b> | <b>\$215</b>              | <b>\$21</b>                | <b>\$21</b>                | <b>\$0</b>                    |

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2009 request includes no additional request in funding.

|                                 | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---------------------------------|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Supplies &amp; Materials</b> | <b>\$985</b>              | <b>\$901</b>               | <b>\$918</b>               | <b>\$17</b>                   |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2009 request includes an additional \$17,000 as part of the program increases for the Office of Policy.

|                  | <b>FY 2007<br/>Actual</b> | <b>FY 2008<br/>Enacted</b> | <b>FY 2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|------------------|---------------------------|----------------------------|----------------------------|-------------------------------|
| <b>Equipment</b> | <b>\$667</b>              | <b>\$763</b>               | <b>\$775</b>               | <b>\$12</b>                   |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2009 request includes an additional \$12,000 as part of the program increases for the Office of Policy.

## A. Mission and Description of the Office of the Secretary and Executive Management

The Office of the Secretary and Executive Management (OSEM) supports the Department of Homeland Security (DHS) and all of its components by bolstering core management and policy and by facilitating operational integration. This enables the Department to prevent and deter terrorist attacks, protect against and respond to threats and hazards to our nation, ensure safe and secure borders, welcome lawful immigrants and visitors, and promote the free-flow of commerce. OSEM establishes and implements policy, obtains resources, and provides oversight to all entities within the Department to meet these missions. It is the responsibility of the OSEM to deliver quality customer support services while eliminating redundancies and reducing support costs. The Department continues to work toward integration and consolidation of its resources and operations to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

## B. Major Activities and Key Strategic Issues

OSEM includes 12 separate offices that individually report to the Secretary. These offices include: the Immediate Office of the Secretary; the Office of the Deputy Secretary; the Office of the Chief of Staff; the Office of Policy; the Office of the Executive Secretary; the Office of Public Affairs; the Office of Legislative Affairs; the Office of the General Counsel; the Office for Civil Rights and Civil Liberties; the Office of Citizenship and Immigration Ombudsman; the Privacy Office, and the Office of Counternarcotics Enforcement.

*Immediate Office of the Secretary:* The Office of the Secretary is requesting \$3,378,000 (12 FTE) in FY 2009 to continue to provide leadership, management and direction, and oversight for all of the Department's components. The Secretary serves as the top representative of the Department of Homeland Security to the President, to the Congress, and to the general public.

*Immediate Office of the Deputy Secretary:* The Office of the Deputy Secretary supports the Secretary by providing leadership to the Department by focusing on internal management and direction. This role ensures that the Department will operate efficiently and effectively when carrying out its mission. In FY 2009, the Office is requesting \$1,505,000 (6 FTE) to continue to provide internal oversight to all Department operations, allowing the Secretary to focus his attention on more external matters concerning the Department of Homeland Security.

*Chief of Staff:* The Chief of Staff is responsible for the coordination of all Department agencies, directorates, and offices. This office is responsible for the budget, information technology, and personnel functions, as well as COOP (Continuity of Operations), as they relate to the Immediate Office of the Secretary. In FY 2009, the Office is requesting \$2,693,000 (12 FTE) to continue to streamline, coordinate, and deliver initiatives and policies that will ensure our safety, response capacity, and our freedoms.

*Office of Policy:* The Office of Policy is responsible for the coordination of Department-wide policies, programs, and planning to ensure consistency and integration of missions throughout the Department. The Office includes the Screening Coordination Office, which works to improve DHS screening operations. In FY 2009, the Office of Policy is requesting \$43,693,000 (185 FTE) to continue its efforts, which strengthen the Department's ability to maintain policy and operational readiness necessary to protect the Homeland by providing a centralized coordination point for developing and

communicating policies across the multiple internal and external components of the Homeland Security network. The Office of Policy also interacts with other government entities, international counterparts, academics and private stakeholders.

*Office of Executive Secretary:* The Office of the Executive Secretary's mission is to support the Office of the Secretary in the Homeland Security mission of leading a unified national effort to secure America. Through the accurate and timely dissemination of information and written communications throughout DHS and with homeland security partners, the Executive Secretary supports all of DHS' strategic goals. In FY 2007, the Office assumed additional management responsibilities, including management of the Policy Coordination Committee, a robust and responsive Secretary Tasker process, and Congressional Authorization Questions for the Record (QFR). In FY 2009, the Executive Secretary is requesting \$5,848,000 (41 FTE) to continue to assist the Office of the Secretary by developing, implementing, and managing business processes for written communications, briefing book materials for the Secretary and Deputy Secretary, and all White House and interagency actions. The funding requested will enable the Office to meet the Department's increasing requirements and facilitates communications among all the DHS components, thereby encouraging a unified national effort to secure America.

*Office of Public Affairs:* The Office of Public Affairs is responsible for oversight and management of all external and internal communications for the Department of Homeland Security. On a daily basis, the Office responds to national media inquiries, maintains and updates the Department's website, writes speeches for principals, and coordinates speaking events for Department officials across the country. Public Affairs also develops and manages various public education programs including the Ready Campaign to increase citizen preparedness. In FY 2009, the Office of Public Affairs is requesting \$8,291,000 (43 FTE) to continue to: foster strategic communication throughout the department and with external stakeholders; manage the Department's organizational identity program, which includes usage of the DHS seal and related guidelines; oversee the Department's employee communication activities; and guide overall Federal incident communication activity and coordinate with state, local, and international partners to ensure accurate and timely information to the public during a crisis

*Office of Legislative Affairs:* The Office of Legislative Affairs serves as the primary liaison to members of Congress and their staffs, the White House and Executive Branch, and to other Federal agencies and governmental entities that have roles in assuring national security. The Office responds to inquiries from Congress and the White House; notifies Congress about Department initiatives, policies, and programs; and keeps other governmental bodies informed concerning Homeland Security measures that affect their operations and Department actions in jointly undertaken security endeavors. In FY 2009, the Office of Legislative Affairs is requesting \$5,697,000 (48 FTE) to continue to provide timely information about Homeland Security and national security issues to members of Congress, the White House and Executive Branch, and to other Federal agencies and governmental entities. The Office will also continue to precipitate legislative support for the Departmental programs, policies and initiatives that promote a more secure nation.

*Office of the General Counsel:* The Office of the General Counsel is responsible for ensuring the implementation of the Department's statutory responsibilities and policies as set forth by the Administration, the Secretary, and all officials within the Department. The Office also provides legal counsel for all Departmental offices (other than those specifically excluded by regulation or directive), determines the Department's position to provide effective legal services involving claims, protests,

litigation, and alternative dispute resolution, and represents the Department in all legal forums. In FY 2009, General Counsel is requesting \$20,914,000 (91 FTE) to continue to: serve as chief legal advisor to the Secretary and as chief legal officer for the Department; ensure that the Department's efforts to secure the Nation are consistent with civil rights and liberties of all citizen; integrate approximately 1,700 lawyers into an effective, client-oriented, full-service legal team; assist in policy and operational initiative planning; coordinate with Homeland Security Council and counterparts throughout the Executive Branch; and communicate and coordinate with each component of DHS on legal matters that affect the DHS mission.

*Office for Civil Rights and Civil Liberties:* The Office for Civil Rights and Civil Liberties is responsible for protecting civil rights and civil liberties, providing policy advice to Departmental leadership on civil rights and civil liberties issues, and serving as an information and communication channel to the public on these issues. The Office is also responsible for overseeing the Departmental Equal Employment Opportunity (EEO) programs and, in FY 2007, it implemented a more effective processing mechanism for EEO complaints. In FY 2008, the Office plans to continue engagement with American Arab, Muslim, Sikh, South Asian, and other ethnic and religious communities. The Office also plans to implement new training products. In FY 2009, Civil Rights and Civil Liberties is requesting \$17,917,000 (80 FTE) to fund critical staffing for the CRCL Programs Directorate.

*Citizenship and Immigration Services Ombudsman:* The Citizenship and Immigration Services Ombudsman assists individuals and employers in resolving problems with United States Citizenship and Immigration Services (USCIS), identifies individual and employee problems areas within USCIS, and proposes changes to mitigate identified problems. In FY 2007, the Office completed the fourth Annual Report to Congress, which addressed 15 pervasive and serious problems and included 25 recommendations for change. In FY 2008 Ombudsman plans to gather information and feedback from USCIS customers and stakeholders in an effort to improve the process for resolving problems individuals and employers face with USCIS. In FY 2009, the Office is requesting \$6,471,000 (30 FTE) to continue to initiate and expand activities to promote interagency cooperation and holistic approaches to immigration. With this in mind, Ombudsman plans to establish a Virtual Ombudsman's Office to provide for online case problem submission, improved analysis and reporting capabilities, and an electronic interface with customers and stakeholders as another avenue to share concerns and solutions.

*Privacy Officer:* The DHS Privacy Officer is the first statutorily mandated Privacy Officer within the Federal government. The Office ensures that appropriate access to information is consistent with the vision, strategic mission, and core values of the Department, and implements the policies of the Department to defend and protect the individual rights, liberties, and information interests of U.S. citizens. The Privacy Office has oversight of all privacy policy matters, including compliance with the Privacy Act of 1974, the Freedom of Information Act, and the completion of privacy impact statements on all new programs, as required by the E-Government Act of 2002 and Section 222 of the Homeland Security Act. In FY 2009, the Privacy Office is requesting \$6,804,000 (34 FTE) to continue to protect the collection, use, and disclosure of personally identifiable information (PII) and Departmental information.

*Office of Counternarcotics Enforcement:* The Office of Counternarcotics Enforcement coordinates policy within the Department, and with other Federal, state, and local agencies with respect to stopping the entry of illegal drugs into the United States. The Office ensures the adequacy of resources within

the Department and recommends the appropriate financial and personnel resources necessary to help the Department fulfill its responsibilities to stop the entry of illegal drugs into the United States. In FY 2007, Counternarcotics Enforcement worked with other components in the Department to develop a comprehensive package of policy initiatives, including the Southwest Border Counternarcotics Strategy, a Northern Border and Maritime border strategy, and an international bulk cash smuggling report. In FY 2008, the Office will continue the Drug-Terror Nexus Project by reaching out to intelligence agencies and operators to ensure the rapid gathering and dissemination of intelligence. In FY 2009, Counternarcotics Enforcement is requesting \$4,018,000 (17 FTE) to continue to expand outreach to the counterdrug law enforcement community and facilitate information sharing through departmental and inter-agency working groups. The Office will also work to increase involvement in counterdrug issues related to Afghanistan and Southwest Asia. Additionally, Counternarcotics Enforcement will continue to be involved in the performance measurement system of DHS counterdrug agencies.

### C. Resources Requested and Performance Impact

For the Office of the Secretary and Executive Management, the Department is requesting a total of \$127,229,000 for 625 positions and 599 FTE in FY 2009, representing an increase of \$29,876,000, 57 FTE, and 52 positions over the FY 2008 Enacted budget of \$97,353,000. The FY 2009 request includes adjustments to base of \$22,591,000 and program increases of \$7,285,000.

Program increases include:

- 18 positions, 9 FTE and \$3,093,000 for the Office of Policy;
- 20 positions, 10 FTE and \$2,475,000 for the Office of the General Counsel;
- 10 positions, 5 FTE and \$708,000 for the Office for Civil Rights and Civil Liberties;
- 4 positions, 2 FTE and \$509,000 for the Privacy Office;
- 0 positions, 0 FTE and \$500,000 for the Office of Public Affairs.

### D. How OSEM Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.

The Office of the Secretary and Executive Management (OSEM) provides leadership, direction, and management to the Department. The Office establishes and implements policy, obtains resources, and provides oversight to all entities within the Department. It is the responsibility of OSEM to deliver quality customer support services while eliminating redundancies and reducing support costs. OSEM programs support the following DHS goal:

**Goal Five:** Strengthen and Unify DHS Operations and Management.

E. Performance Based Budget Highlights by Program <sup>1</sup>

| <b>Measure:</b> Percent of DHS strategic objectives with programs that meet their associated performance targets.  |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure is defined as the total number of Department of Homeland Security (DHS) strategic objectives with programs that meet their associated performance targets. Performance data is tabulated against the 33 strategic objectives of the DHS Strategic Plan. DHS gauges its success in meeting its mission through implementation of the DHS Strategic Plan. The Strategic Plan includes strategic goals and objectives as well as strategies and programs that describe what the Department does and what the Department will accomplish. Each program is linked to the DHS strategic goals and objectives and has specific performance measures. DHS demonstrates the value and outcomes of its services through the results of program performance metrics. The performance outcomes of DHS programs essentially tell how the Department is impacting citizens, stakeholders, and customers and meeting its mission. |         |         |         |         |         |         |

# BUDGET REQUEST AND SUPPORTING INFORMATION

## DEPARTMENTAL MANAGEMENT AND OPERATIONS UNDER SECRETARY FOR MANAGEMENT

### I. Appropriation Overview

#### **A. Mission Statement for Under Secretary of Management**

The Management Directorate ensures delivery of effective and efficient business and management services throughout the Department, to enable the Department of Homeland Security to lead the unified national effort to secure America.

The DHS Management Directorate provides the business framework that enables the Department of Homeland Security to achieve its mission. It does so by providing policy, guidance, operational oversight and support, and innovative solutions for the management needs of the entire Department.

#### **B. Under Secretary for Management Offices:**

##### Immediate Office of Under Secretary of Management (OUSM)

The Immediate Office of the Under Secretary for Management's primary mission is to deliver quality administrative support services providing leadership and oversight for all departmental management functions which include information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services.

##### Office of the Chief Administrative Officer (OCAO)

The Office of the Chief Administrative Officer establishes policy and procedures as well as provides both departmental leadership and oversight for all functional areas managed by the DHS Chief Administrative Officer (CAO) and Component Chief Administrative Officers. Functional areas include asset management (logistics, real estate, personal property, aviation, transportation, fleet, marine vessels), mail screening and delivery, business continuity and emergency preparedness, occupational safety and health, environmental planning and management, historic preservation, energy management, records, directives, forms, library services, printing and graphics. In addition, OCAO also provides the day to day operational support for departmental headquarters and the start up components (I&A, Preparedness, Operations and S&T).

##### DHS Consolidated Headquarters Project

The DHS Consolidated Headquarters Project is in accordance with the DHS National Capital Region Housing Master Plan signed by the Secretary and submitted to the Congress on October 25, 2006 as required by Public Law 109-295 (FY-07 Homeland Security Appropriations Act). Our mission demands an integrated approach, yet our legacy facilities and dispersed locations

throughout the National Capital Region causes non-integration of our agencies. This project will consolidate executive program leadership of the Department in a secure setting for policy, management and operational coordination to facilitate the incident management functions and command and control capabilities. It will foster a “one-DHS culture” and enhance the flow/fusion of information while optimizing our prevention and response capabilities across the spectrum of operations. The project consolidates the DHS requirements and centrally funds the consolidation of other DHS Components on the St. Elizabeths West Campus and throughout the NCR. The consolidation includes up to 4.5 million gross square feet of office space at the St. Elizabeths West Campus. The consolidation effort will also examine the leases/occupancies for off campus functions/elements with a vision of consolidating/ realigning leases where appropriate with consideration for functional integration.

#### Office of the Chief Human Capital Officer (OCHCO)

The Office of the Chief Human Capital Officer provides overall management and administration of the Department’s human resources-related operations, including Federal Law Enforcement Training Accreditation (FLETA). OCHCO is organized around four major areas (Talent Management & Accountability; Workforce Relations & Performance Culture; Learning & Development; and Recruiting, Staffing and Services) and is responsible for establishing policy and procedures for these areas, as well as providing oversight, guidance and leadership within the Department. OCHCO has rolled out its Human Capital Operational Plan (HCOP) as a means of providing the Department with a modern human resources management system expanded to improve the Department’s capacity to build and sustain a high performing workforce. OCHCO is responsible for ensuring that DHS recruits, hires, trains and retains the very best workforce; provides the highest quality leadership development; and creates a performance culture in the workforce to ensure DHS succeeds in its mission.

#### Office of the Chief Procurement Officer (OCPO)

The Office of the Chief Procurement Officer is responsible for the overall management, administration, and oversight of Department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. The OCPO activities include:

##### Acquisition Support and Oversight

- **Acquisition Workforce:** Responsible for strategic acquisition workforce planning to ensure accession, development, and retention of a professional workforce.
- **Operations Support:** Principal liaison for the acquisition community and assist Components to accomplish their varied missions.
- **Acquisition Oversight:** Responsible for developing and implementing a DHS acquisition oversight strategy.
- **Program Management:** Responsible for providing support to program managers DHS-wide and assisting in the development of a DHS-wide acquisition management system.

##### Strategic Initiatives

- **Acquisition Policy and Legislation:** Responsible for development of the DHS acquisition regulations and policies.

- **Competitive Sourcing and Privatization:** Responsible for the Department's implementation of the Federal Activities Inventory Reform (FAIR) Act of 1998, the Revised OMB Circular A-76 and the President's Management Agenda (PMA) Competitive Sourcing Initiative.
- **Strategic Sourcing and Acquisition Systems:** Responsible for managing the DHS strategic sourcing program; developing corporate strategies for the acquisition of shared commodities to achieve efficiencies and economies of scale.

Office of Small and Disadvantaged Business Utilization (OSDBU)

- In support of the Small Business Act to maximize small business procurement opportunities, the OSDBU assists, counsels, and advises small businesses of all types on procedures for contracting with the DHS. Additionally, the OSDBU works closely with each Departmental organizational element to implement the Department's small business procurement assistance program. While this office works closely with the Chief Procurement Officer, it reports directly to the Deputy Secretary.

Office the Chief Security Officer (OCSO)

The mission of the Office of the Chief Security Officer is to secure the Department so the Department can secure the homeland. The OCSO implements security programs that safeguard DHS personnel, property, facilities, and information. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and provides security support to DHS Components. Additionally, the office investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

**C. Budget Request Summary:**

The Under Secretary for Management requests 518 positions, 473 FTE, and \$321,469,000 for the FY 2009 Request. The total adjustments-to-base is 28 positions, 74 FTE, and \$37,405,000. The program increases include 92 positions, 47 FTE, and \$138,826,000 to:

- Sustain the position of the (career) Deputy Under Secretary for Management to provide continuity throughout the transition process. (1 position, 1 FTE, and \$250,000)
- Support the St. Elizabeths Campus portion of the DHS National Capital Region (NCR) Housing Master Plan. (21 positions, 11 FTE, and \$120,000,000)
- Support the Learning and Development initiatives and programs. (6 positions, 3 FTE, \$5,500,000)
- Continue the Human Capital Operational Initiatives and the Human Resource Management System. (0 positions, 0 FTE, \$5,000,000)
- Establish Department Wide Program Management Teams to support program offices in achieving their mission to deliver timely and effective acquisitions. (18 positions, 9 FTE, \$3,648,000)
- Continue the Department-wide Acquisition Intern Program. (34 positions, 17 FTE, \$3,142,000)
- Meet increased counterintelligence and security needs of the Department by effectively structuring and integrating security services into all DHS operations. (12 positions, 6 FTE, and \$1,286,000)

| Total Change 2008-2009       | 0           | 8          | 297             |

Under Secretary for Management requests \$41.727 million and 62 FTE for this activity. This is an increase of \$0.297 million and an increase of 8 FTE over the FY 2008 enacted level.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Chief Administrative Officer (OCAO) is responsible for asset management (logistics, real estate, personal property, aviation, transportation, fleet, marine vessels), mail screening and delivery, occupational safety and health, environmental planning and management, historic preservation, energy management, records, directives, forms, library services, printing and graphics for the Department as well as consolidating and optimizing the same; and the Executive Service Center to support the Office of the Secretary and Executive Offices. The OCAO also manages and implements the Department’s Continuity of Operations Plan (COOP) and Emergency Preparedness program.

**DHS HEADQUARTERS PROJECT**

Under Secretary for Management requests \$6 million for this activity. There is no change over the FY 2008 enacted level.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Nebraska Avenue Complex (NAC) is the headquarters facility for DHS, and presence at the Complex continues to expand as well as at other locations. Continued relocation and realignment of as much of the Department Headquarters as possible at the NAC will enable better communication and more efficient operations.

**CONSOLIDATED HQ PROJECT**

Under Secretary for Management requests \$120 million and 11 FTE for this activity. This is a new activity in FY 2009.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The DHS Consolidated Headquarters Project will consolidate executive program leadership of the Department in a secure setting for policy, management and operational coordination. It will foster a “one-DHS culture” and enhance the flow of information while optimizing our prevention and response capabilities across the spectrum of operations.

**OFFICE OF THE CHIEF HUMAN CAPITAL OFFICER**

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>   |

| 2009 Adjustments-to-Base     | 30                  | 30         | 18,806          |
| <b>2009 Current Services</b> | <b>83</b>           | <b>83</b>  | <b>37,617</b>   |
| 2009 Program Change          | 6                   | 3          | 10,500          |
| <b>2009 Request</b>          | <b>89</b>           | <b>86</b>  | <b>48,117</b>   |
| Total Change 2008-2009       | 36                  | 33         | 29,306          |

Under Secretary for Management requests \$48.117 million and 86 FTE for this activity. This is an increase of \$29.306 million and 33 FTE over the FY 2008 enacted level. The current services level converts 23 contractors that support the Office of Human Capital to governmental full time positions.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of the Chief Human Capital Officer provides overall management and administration for the Department’s human capital. This office establishes policy and procedures and also provides oversight, guidance, and leadership for human resources functions, including learning and development, within the Department of Homeland Security. The Office of Human Capital (OHC) is responsible for designing and implementing DHS human resources programs, including the human resources strategy and technology components necessary for its successful deployment. A primary focus of OHC is the Department’s response to issues that surfaced in the Federal Human Capital Survey.

Under OHC’s leadership, DHS will continue its investment in recruitment and retention programs to ensure the Department has the workforce it needs to achieve its mission. DHS will continue to provide support for DHS’ transparent performance management system that clearly articulates expectations and holds managers and employees accountable for results. OHC will monitor and evaluate the implementation of the performance system to ensure that components are in compliance with guiding directives and employees are well informed on the progress being made. Furthermore, DHS will continue to invest in diversity initiatives by leading efforts to finalize and implement the diversity strategy, conduct outreach in colleges and universities and minority serving organizations, and increase partnerships with diversity-focused professional associations, develop and deploy appropriate diversity training, and enhance diversity within the executive cadre. Veteran’s outreach programs will be enhanced to improve communications with the Veteran community regarding career opportunities at DHS.

OHC intends to convert contractor positions to Federal positions in FY 2009. Conversion savings will be applied to other needed services, such as DHS’s response to the Federal Human Capital Survey and conducting and responding to the DHS employee morale survey. OHC will refocus its contract needs

on short term projects to meet surge requirements, one –time infrastructure costs, and areas where expertise is not easily obtained in the Federal workspace or would be more cost effective if provided by contractors. Converted contractor positions will provide OHC a stable, cost effective Federal workforce replacement to perform ongoing initiatives and provide depth in areas where OHC is currently “one deep” in bench strength. In addition, OHC will be able to broaden and sustain its knowledge base and capacity to meet the challenges associated workforce and succession planning, diversity, veteran outreach, recruiting and retention, employee morale, service delivery, as well as its strategic leadership of HR lines of business throughout DHS. A special challenge for FY 2009 will be the transition of key executive positions during the change of administration.

**OFFICE OF THE CHIEF PROCUREMENT OFFICER**

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>   |

Under Secretary for Management requests \$42.003 million and 184 FTE for this activity. This is an increase of \$13.508 million and 55 FTE over the FY 2008 enacted level. The current services level transfers the grants management function to the Office of the Chief Financial Officer.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Procurement is responsible for the overall management, administration, and oversight of Department-wide acquisitions, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. The Office is responsible for developing DHS acquisition regulations and policies; workforce planning; and oversight and performance management of the CPO infrastructure.

Under Secretary for Management requests \$60.968 million and 117 FTE for this activity. This is an increase of \$7.478 million and 9 FTE over the FY 2008 enacted level.

## **CURRENT SERVICES PROGRAM DESCRIPTION:**

The mission of the Office of Security (OS) is to lead a collaborative security program to safeguard the Department's personnel, information, and property so the Department may secure the Homeland. Today's complex security environment demands that security operations be effectively structured and integrated into all DHS operations. OS implements Department-wide security programs, policies and standards to safeguard DHS personnel, property, facilities, and information. Priority initiatives include expediting background investigations and granting security clearances; conducting facility security risk assessments; providing security education and awareness training; and issuing guidance on topics ranging from installing physical security equipment to handling classified information. Additionally, the OS investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

The OS integrates all security disciplines in a manner that increases efficiency and enhances the overall security of the Department. The Office is broken into seven divisions that work together to create an environment that promotes best practices and shares accountability. These divisions are:

- The Administrative Security Division - develops, implements, and oversees policies, programs and standards necessary to safeguard classified and sensitive but unclassified information;
- The Counterintelligence and Investigations Division - protects DHS personnel, information and property from foreign intelligence services, terrorists, and criminals. This division also identifies, analyzes, and defends against espionage directed at DHS and conducts investigations of crimes committed against DHS personnel, property and facilities;
- The Special Security Programs Division - manages the DHS Sensitive Compartmented Information (SCI) and Special Access Programs;
- The Physical Security Division protects DHS personnel, controls access to DHS Headquarters facilities, and safeguards against damage and theft;
- The Personnel Security Division - ensures the highest levels of confidence in DHS employee and contractor trustworthiness, loyalty, integrity, and reliability. The division conducts background investigations, makes suitability and security clearance eligibility determinations and provides oversight of personnel security policy throughout the Department;
- The Training and Operations Security Division - ensures that all DHS employees are trained to recognize and defend against threats of the Department's personnel, information, and property;
- The Operations Division - provides an accurate account of the budget, both classified and non-classified. This division ensures coordination of security-related budget issues with the DHS Budget Office (Office of the Chief Financial Officer), the Office of the Director of National Intelligence (ODNI), the Office of Management and Budget (OMB), the House Appropriations Committee (HAC), and the Senate Appropriations Committee (SAC). The Operations Division also completes procurement actions, which require market research and evaluations so that the government can achieve the best value and executes reimbursable agreements with other government agencies.

Description of Item

This program increase is needed to handle the increased workload with the management integration and transformation process, as well as the transition process to ensure an efficient and orderly consolidation of functions and personnel in the Department.

Justification

The Under Secretary for Management serves as the Chief Management Officer and principal advisor to the Secretary on matters related to the management integration and transformation in support of homeland security operations and programs. One of the Chief Management Officer's primary responsibilities is the development of a transition and succession plan to guide the transition of management to a new administration. The increase sustains the position of the (career) Deputy Under Secretary that provides continuity throughout the transition.

Impact on Performance (Relationship of Increase to Strategic Goals)

Funding the program increase allows the Under Secretary for Management to continue to ensure the impending transition between administrations is well-planned and smoothly implemented.

**Program Increase 2: DHS Consolidated Headquarters Project**

Strategic Goal(s) & Objective(s): **Goal 5: Strengthen and Unify DHS Operations and Management**

Description of Item

This request consolidates the DHS requirements and centrally funds the DHS project costs and support. This item combines the non-recurring DHS tenant improvement costs and the recurring Special Projects Team personnel costs for management of the relocation of the USCG Headquarters and consolidation of other DHS Components on the St. Elizabeths West Campus and throughout the NCR.

The \$120 million provides the base level funding to support the DHS Consolidated HQ Campus at St. Elizabeths and will fund the following items:

- USCG Headquarters Building Tenant Improvement construction costs for FY 2009 including the main headquarters facility (Phase 1a only). USCG shared operational and support spaces (Phase 1b) will be requested in a future year.
- Staffing to manage the project (21 FTE)
- Operational Security Site Survey Requirements for Construction

Justification

The DHS mission is to lead a unified national effort to secure America. The lessons learned from Hurricane Katrina and Secretary Chertoff’s Second Stage Review reinforced the critical requirement that DHS operate with increased integration to prepare for and respond to natural disasters or terrorist attacks. Our mission demands this approach to all hazards. Yet the Department’s legacy facilities are dispersed in about 40 locations and 70 buildings throughout the National Capital Region (NCR), sometimes with sub-optimal security protections and routinely impacting adversely critical communication, coordination, and cooperation across DHS components. To support the incident management and command-and-control requirements of our mission, the Department clearly needs to consolidate executive leadership, operations coordination, and policy and program management functions in a secure setting.

This will foster a “one-DHS” culture and optimize our prevention and response capabilities across the spectrum of operations. The Department also needs to reduce significantly the total number of locations that house DHS components to as few as possible to lower overall costs. The Headquarters

Consolidation will provide opportunities for improved organizational efficiency through functional integration and sharing of like services and enhanced component working relationships:

- At full potential development capacity, the Department anticipates St. Elizabeths will satisfy up to 4.5 million gross square feet (GSF) of office space out of a current total need (FY 2008) of about 7 million GSF. Specific details are dependent on final GSA Master Plan approval. Consolidation of shared campus services will reduce duplication.
- Mission Support functions that do not relocate to St. Elizabeths will be consolidated/collocated where possible to enhance functional integration, cooperation and coordination among all components.
- A phasing plan will mitigate the impacts of lease expirations, totaling approximate 4.8 million GSF over the next 10 years.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

Funding the St. Elizabeths Consolidated DHS Headquarters Campus directly supports the Department's Organizational Excellence Strategic Goal and facilitates the Awareness, Prevention, Protection, Response and Recovery Strategic Goals through the creation of a consolidated headquarters campus focused on mission execution. The collocation of the National Operations Center (NOC) with the individual component operations centers at St. Elizabeths will directly enhance mission execution capabilities and coordination of Federal, State and local assets in the preparations for, response to and recovery from, natural disasters or terrorist attacks. The Secretary has identified Priority 12.1; Implementation of the DHS National Capital Region Housing Master Plan and creation of a unified Departmental headquarters as one of the top initiatives critical to mission performance, establishing a common identity, supporting teamwork and a unified culture.

GSA determined that consolidation of 4.5 million GSF of office space at St. Elizabeths will result in a revised estimate of approximately \$743 million Present Value (NPV) savings over a thirty year period as compared to individually replacing leases without any consolidation. This projected savings includes DHS specific tenant costs. In addition to the direct real estate savings, DHS will achieve further savings/cost avoidances at the consolidated headquarters campus through reduction of administrative overhead, elimination of redundancies and sharing of common campus services.

This project will impact most, if not all, of DHS components in the Washington, DC metropolitan area totaling approximately 26,000 employees/contractors/detailees and over 7 million GSF of real property. The project staff is required to manage all aspects of the planning, design/construction coordination with GSA and individual tenants, lease administration, outfitting and moves of the various offices to St. Elizabeths and other consolidation locations. This requires broad based expertise in project management, engineering, real property, environmental management, personal property, outfitting, and logistics support.

The St. Elizabeths campus offers a tremendous opportunity to create a secure, state-of-the-art-headquarters focused on achieving our core mission to protect the homeland.

Description of Item

In October 2007, the Deputy Secretary approved and signed the DHS Learning and Development Strategy (Strategy) developed by the DHS Chief Learning Officer (CLO). The Strategy calls for the centralization of several DHS employee learning and professional development opportunities—to include design, development, delivery and evaluation--in order to enhance consistency of training content, foster a DHS mission-focused culture, and promote cost savings. The overall goal of the Strategy, and of the Office of the Chief Learning Officer, is to offer programs that cultivate awareness and understanding of the Department and the various missions and organizations that function together to accomplish the DHS mission.

The Office of the Chief Learning Officer will fund DHS headquarters training and functions as a policy making and data coordination office for the Department. For FY 2009, the programs offered will include legislative mandatory training, the DHS fellows program, and the Scholarship and Internship Program. Also, DHS will also establish coordinated efforts across the enterprise focused on integrating the various existing instructional technology approaches in existence while also standing up a collaborative Research and Development Office to explore new opportunities designed to enhance human performance in support of DHS missions. Leveraging advanced instructional technologies is an integral part of an overall Federal government and DHS-specific strategy to improve mission performance within the workforce.

FY 2009 will be the first year that DHS headquarters and enterprise-wide Learning and Development programs, courses, and streamlined data collection will have an appropriated budget line. The FY09 Learning and Development budget will continue progress toward integration and coordination among the many DHS Component organizations and help move the Department toward a culture of “Team DHS.”

Justification

The Strategy was written in response to the Secretary’s Second Stage Review, the DHS/FEMA Appropriations Act, the Katrina Lessons Learned Report, the Homeland Security Advisory Council, academia, and numerous studies. While several DHS Directorates and Components have well established and proven mission specific Learning and Development programs, there has been no

unified effort to design, develop, and deploy a DHS enterprise-wide Learning and Development strategy to date. The goal of the Learning and Development initiatives in the Strategy is to not only foster a culture of a “Team DHS,” but also to increase the efficiency and effectiveness of training and education programs across the Enterprise through integration and consolidation.

Part of the DHS Learning and Development Strategy is the DHS University System, which will not only provide an enterprise-wide learning management system, but also close knowledge and skill gaps in the DHS workforce, integrate learning and development across the Department, and serve as a key element in a robust Department-wide succession plan.

Justification for the Learning and Development Budget is provided by Title 5 USC Part 410, Subpart C §410.308; Executive Order 13434 for National Security Professional Education; Section 623 of H.R. Appropriations Act 2007; Katrina Lessons Learned Report Recommendation #116; Goal 4.3 of the DHS Strategic Plan; Goal 12 of the Secretary’s Priority Goals for 2007; the FEMA Appropriations Act Section 845; the Chief Human Capital Officer Operational Plan.

Leadership courses funded by this budget directly address the Secretary’s Near Term Objectives #4 and #5; the DHS Strategic Plan, the Katrina Lessons Learned Report, the Homeland Security Advisory Council (HSAC) 2006 Tasking from the Secretary to “Create a Culture of a Team DHS”, the DHS Chief Human Capital Officer Strategic Plan, the DHS Chief Human Capital Officer Operational Plan, the DHS Training Leaders Council Strategic Plan for Learning and Development; the DHS Management Directive 3210 (Training, Education and Professional Development), and the Presidential Management Agenda. These courses are fundamental to the Department’s transitions efforts and the Secretary’s request for a leadership rotational program.

Preparedness courses, such as the DHS 101/201 courses, directly address HSPD #5, paragraph 15, the Secretary’s Near Term Priority Goal #4 and #5, Katrina Lessons Learned #2, #114, #117, and the Homeland Security Act of 2002 Title XIII closing organizational and occupational competencies gaps.

Scholarship and Internship programs directly address Title 5 USC Part 410, Subpart C §410.308, the DHS Strategic Plan Goal 4.3 and the Secretary’s Priority Goals for 2007-Goal 12.

Instructional Technology Management will centralize management of training and professional development capabilities, realize economies of scale, and alleviate duplicative acquisition efforts in addition to supporting the DHS Information Technology Portfolio Management Initiative.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

The programs and initiatives described above and outlined in the Strategy are essential to the sustained, long-term success of many DHS Human Capital Operational Plan (HCOP) led programs implemented during FY 2007 and FY 2008. The DHS Office of the Chief Human Capital Officer has also highlighted learning and development efforts within the HCOP by specifically identifying such programs as one of five key priorities – Create High-Quality Learning and Development Programs for DHS employees. Finally, the five near-term objectives for DHS as outlined by Secretary Chertoff depends upon “...building a Department that will meet future challenges, preserve freedom and privacy, and protect the American people.” A skilled and competent workforce that is ready and can deliver on important, high visibility programs is consistent with the Secretary’s strategic statement for the Department.

As outlined above, all of the Learning and Development initiatives and programs are supported by Congressional Mandates, DHS Secretary's Priorities, DHS Strategic Goals and/or other rules, regulations, or Presidential Directives. The DHS Learning and Development Strategy attempts to leverage and integrate existing Departmental training programs that are currently available. Funding requested for the initiatives outlined above provides the basis for a Department that is functionally integrated and effective in its mission. Without funding, leadership and preparedness response capability will decrease across the Department, and we will have less capability to foster collaborative efforts across DHS and the interagency and provide programs that have been congressionally mandated to us.

Description of Item

Improving DHS results to the Federal Human Capital Survey (FHCS) remains a priority of DHS for FY 2009. During FY 2009, OHC will work with components to craft policies and programs to improve employees' working environment and their perceptions of DHS. Programs and policies identified in FY 2008 to respond to the FY 2007 internal DHS employee survey and FY 2006 and FY 2008 FHCS will need to be evaluated and adjusted. In addition, OHC will need to monitor compliance. In FY 2009 OHC will conduct another internal DHS employee census survey, analyze the results, and develop strategies and plans to address weaknesses identified in the results. In concert with the FHCS, OHC will continue with corporate workforce planning and analysis for mission critical occupations to determine current and future staffing needs, analyze turnover and attrition, examine reasons for employee attrition through such methods as exit interviews/surveys, and link the results to training and other recruiting and retention strategies, including improving performance evaluation.

Justification

The National Defense Authorization Act of 2004 mandated that each federal agency survey its workforce on an annual basis. The Federal Human Capital Survey fulfills this requirement every other year. The results are widely published in national newspapers and have an impact on DHS retention and recruitment efforts. In FY 2009, OHC will continue Workforce Engagement activities, including the implementation and monitoring of Component action plans and initiatives developed in response to the 2007 Annual Employee Survey results and the 2008 FHCS. DHS will continue to provide support for DHS' transparent performance management system that clearly articulates expectations and holds managers and employees accountable for results. FY 2006 FHCS findings showed only 30% of employees answered positively to the question, "[E]mployees are rewarded for providing high quality products and services to customers." Similarly, of DHS employees who took the FHCS, only 23% felt that steps were taken to deal with poor performers.

OHC will monitor and evaluate the implementation of the performance system to ensure that components are in compliance with guiding directives and employees are well informed on the progress being made. OHC will closely monitor progression in closing the competency gaps in mission critical occupations. Activities which are improving results will continue and include such areas as workforce planning, quality of life programs, communication, performance culture, enterprise-

wide recruitment and retention, workforce diversity, continuity of executive leadership during transition, and communication.

Furthermore, DHS will continue to invest in diversity initiatives by leading efforts to finalize and implement the diversity strategy, conduct outreach in colleges and universities and minority serving organizations, and increase diversity awareness. In addition, DHS will expand outreach to Veterans by establishing the DHS Veterans Outreach Advisory Council and conducting various Veterans outreach efforts.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

Successful recruitment and retention of high performing, talented employees is key to the Department's success in accomplishing its mission. Current and future employees' perceptions of the Department will impact how successfully internal human resources capacity is grown and maintained. The Federal Human Capital Survey results provide insight into our employees perceptions and color what others might think of DHS as future employees. In addition, FY 2009 will pose additional challenges related to the transition of key executive positions during the change Presidential appointees. A smooth transition of executives is paramount to continuity of DHS operations.

Description of Item

This increased funding establishes Department Wide Program Management Teams to support program offices in achieving their mission to deliver timely and effective acquisitions.

Justification

Program Management Teams are essential to establish an acquisition system where each requirement has a well-defined mission and management team staffed by professionals with the necessary skills to achieve mission results.

For every major acquisition, there's a program office that owns the mission. The program office is responsible for doing the budgeting and ensuring that the mission is delivered. It is necessary to have a good program management office and good contracting office to support that program and to deliver truly effective acquisitions.

Impact on Performance (Relationship of Increase to Strategic Goals)

The DHS Chief Procurement Officer maintains the responsibility to be effective stewards of taxpayer dollars. All of DHS's strategic goals are achieved through its acquisition programs. Program management determines whether the program achieves its performance goals and spends the taxpayer dollars efficiently. Without program initiation, review, assistance and support DHS will fail to meet all of its strategic goals. Programs such as cargo and passenger screening, Coast Guard revitalization and communications, disaster preparation, response and recovery, or border control fail without good program management. This office ensures DHS selects appropriate programs to meet its goals and provides the programs tools they need to be effective.

Description of Item

Department-wide Acquisition Intern Program was established in FY 2008 as a three year program; the FY 2009 budget requests funding for the second year of this program.

In an effort to combat staffing shortages, the Department requested a centrally funded Department-wide DHS Intern Program in FY 2008; this allows for the recruitment of college graduates who will receive an appropriate amount of training over three years.

Justification

The Acquisition Workforce directorate is tasked with recruiting, training, certifying, and retaining an appropriate workforce of acquisition professionals. While ideally qualified contracting professionals, ranging from journeyman to expert level, would be readily available, an analysis of the current job market confirms demand outweighs supply of contracting professionals. In addition to this shortage, new labor numbers show that 30 percent of the Federal professional staff will be eligible for retirement in the next three to five years. To address these concerns, DHS is expanding the Acquisition Intern Program to one hundred annually and adding the Student Career Experience Program positions as these two sources in other agencies have traditionally formed the core of the procurement workforce. In order to attract a highly motivated workforce DHS continues to examine options such as Department-wide training and other incentives including relocation expenses, recruitment bonuses, educational loan repayment, and/or payment for graduate classes.

Impact on Performance (Relationship of Increase to Strategic Goals)

The DHS acquisition workforce maintains the responsibility to be effective stewards of taxpayer dollars. The potential for negligence may result without the ability to appropriately staff, train, and certify members of the acquisition workforce. These requested dollars are required in order to recruit and retain staff in a professional field which is critically short staffed government wide.

Description of Item

The Office of Security requests an increase of \$1.286 million to expand its Counterintelligence and Investigative Division to significantly enhance the Department’s counterintelligence (CI) program in conjunction with the Office of Intelligence and Analysis to address emerging intelligence collection threats to the Department.

Justification

Today’s complex security environment demands that security operations be effectively structured and integrated into all Department of Homeland Security (DHS) operations. The DHS Office of Security (OS) implements department-wide security programs, policies and standards to safeguard DHS personnel, property, facilities, and information. As DHS expands the numbers of employees, contractors and facilities security resources must increase proportionally to ensure Department safety.

Counterintelligence and Investigations Division requests 12 additional positions (6 FTE) to better defend the Department, its personnel, information, and property, from foreign and domestic threats and to ensure a secure workplace environment. These individuals are needed to assist in the continuing effort with identifying, analyzing, deterring, exploiting, and defending against espionage, foreign intelligence, and terrorist activities directed against DHS. Working closely with the Office of Intelligence and Analysis through a joint DHS program office of counterintelligence and the CI community, these individuals will work to deter crimes against the Department or its employees. If a credible threat or incident is identified, DHS will pass along all investigations to the Federal Bureau of Investigations.

Impact on Performance (Relationship of Increase to Strategic Goals)

The current complex security environment demands that counterintelligence and security operations be effectively structured and integrated into all Department of Homeland Security (DHS) operations. The Department must have the ability to protect itself to it can protect the country. If this initiative is not funded, Security will be unable to keep up with the security measures and monitoring needed to secure DHS, which will have two main effects: (1) DHS will become more vulnerable to foreign intelligence entities committing espionage or cyber attacks against DHS, and (2) the entire federal government could be put at greater risks because DHS is extensively connected to other federal departments and

agencies in defense, intelligence, homeland security and the law enforcement communities and thus, DHS' vulnerabilities could serve as entry points for foreign threats wanting to penetrate these other communities.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security**  
**Departmental Management and Operations**  
**Justification of Proposed Changes in Appropriation Name**  
**Appropriation Language**

For necessary expenses of the Office of the Under Secretary for Management, as authorized by sections 701 through 705 of the Homeland Security Act of 2002 (6 U.S.C. 341 through 345), [\$278,350,000: *Provided*, That] **\$320,093,000, of which** not to exceed \$3,000 shall be for official reception and representation expenses: **Provided further**, That of the total amount provided, [\$6,000,000]; **\$126,000,000** shall remain available until expended solely for the consolidated headquarters project, alteration and improvement of facilities, **and** tenant improvements[, and relocation costs to consolidate Department headquarters operations] **for the DHS headquarters project**.

#### **Explanation of Changes:**

Of the \$126,000,000 that shall remain available until expended, the appropriation total includes \$120,000,000 for the Consolidated Headquarters Project at St. Elizabeths and \$6,000,000 for the DHS Headquarters Project.

**PPA Mission Statement**

The Immediate Office of the Under Secretary of Management ensures the "front office" of our Directorate functions effectively and efficiently in support of both the Department as a whole, and the Directorate itself. The requested funding will allow the Immediate Office of US/M to manage the Directorate's workload; respond quickly to queries from within, and outside, the Department; and further our efforts for functional integration.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Salaries and Benefits</b> | \$1,042                | \$1,196                 | \$1,489                 | \$293                         |

The FY 2009 request includes an additional 5 FTEs and an increase of salaries and benefits of \$293,000 to handle the increased workload with the management integration and transformation process, as well as the transition process to ensure an efficient consolidation of functions and personnel in the Department. Most of the contractor positions will be converted to government full-time equivalent positions.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Travel</b> | \$4                    | \$4                     | \$4                     | \$0                           |

Travel includes all costs of transportation of persons, subsistence of travelers and incidental travel expenses in accordance with Federal travel regulations.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|-----------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>GSA rent</b> | \$0                    | \$0                     | \$262                   | \$262                         |

GSA Rent is estimated at \$262,000 and includes all payments to General Services Administration (GSA) for rental of space and rent related services.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|-----------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Printing</b> | \$1                    | \$1                     | \$1                     | \$0                           |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Advisory and Assistance Services</b> | \$365                  | \$418                   | \$456                   | \$38                          |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The increase for FY 2009 reflects the increase workload with the management integration and transformation process, as well as the transition process.

|  | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|--|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Purchase from Government Accounts</b> | \$376                  | \$384                   | \$431                   | \$47                          |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified, as well as cost reimbursements for the Working Capital Fund (WCF). The FY 2009 request includes an increase of \$47,000.

|                                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 - 2009<br/>Change</b> |
|---------------------------------|------------------------|-------------------------|-------------------------|-------------------------------|
| <b>Supplies &amp; materials</b> | \$9                    | \$9                     | \$11                    | \$2                           |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

**PPA Mission Statement**

To streamline departmental administrative functions and create a unified Department of Homeland Security, we will continue to find, design, renovate, improve, and secure a minimum number of DHS Headquarters facilities. The St. Elizabeth's project will consolidate executive program leadership of the Department in a secure setting for policy, management and operational coordination to facilitate the incident management functions and command and control capabilities. It will foster a "one-DHS" culture and enhance the flow/fusion of information while optimizing our prevention and response capabilities across the spectrum of operations.

**Summary Justification and Explanation of Changes**

**PPA Mission Statement**

The mission of the Office of Security is to secure the Department so the Department can secure the homeland. The Office of Security implements security programs that safeguard DHS personnel, property, facilities, and information. The Office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and provides security support to DHS Components. Additionally, the Office investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

### Summary Justification and Explanation of Changes

|                              | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|------------------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Salaries and Benefits</b> | \$11,032       | \$13,516        | \$15,136        | \$1,620               |

Salaries and Benefits includes costs for 117 FTE. The increase of 9 FTE include the annualization of 3 FTE and 6 new FTE to support the Security Services Expansion Program.

|               | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------|----------------|-----------------|-----------------|-----------------------|
| <b>Travel</b> | \$133          | \$409           | \$421           | \$12                  |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal Travel Regulations.

|                                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |

## A. Mission and Description of the Under Secretary for Management (USM)

The Office of the Under Secretary for Management delivers quality administrative support services and provides both leadership and oversight for all departmental management functions: information technology; budget and financial management; procurement and acquisition; human capital; and administrative services. The USM delivers departmental customer services, while eliminating redundancies and reducing support costs, with the objective of improving the effective and efficient delivery of business and management services throughout the Department.

The Under Secretary for Management includes the following offices: the Immediate Office for Under Secretary for Management (USM), the Office of the Chief Administrative Officer (CAO), the DHS Consolidated Headquarters Project, the Office of the Chief Human Capital Officer (OHC), the Office of the Chief Procurement Officer (CPO), and the Office of the Chief Security Officer (OS).

## B. Major Activities and Key Strategic Issues

In FY 2007, the Under Secretary for Management expended \$148,648 (283 FTE). This funding supports the necessary functions of leading, directing, and managing the Department. In addition to providing leadership to the Department, the Under Secretary for Management is responsible for the major activities associated with budgeting, appropriations, expenditure of funds, accounting and finance, procurement, human resources and personnel, information technology systems, facilities, property, equipment and other material resources, and the identification and tracking of performance measures aligned with the mission and goals of the Department.

**Immediate Office of the Under Secretary for Management:** This office received \$1,870,000 (8 FTE) in FY 2007 and \$2,012,000 (8 FTE) in FY 2008 to enable continued management and oversight of Directorate operations and activities. The office requests \$2,654,000 (13 FTE) in FY 2009 to focus on continued functional integration in numerous areas across the Department, and the effort to respond as a Directorate to internal requirements.

**Office of the Chief Administrative Officer (OCAO):** The Chief Administrative Officer is responsible for a wide variety of activities such as mail screening and delivery, courier services, shuttle and sedan drivers, personal property internal controls, facilities and space planning, occupational health and safety, environmental programs, records and forms management, directives and printing, as well as the Executive Service Center. While these activities work to coordinate and direct these functions across the Department, the office is also responsible for providing operating support for these functions at the headquarters (HQ), where most of the current resources are used.

Historically, the CAO has assigned any increases in staffing into the program areas. As a result, the existing program offices are strained in performing their functions by attempting to perform various administrative and program support duties that provide internal support and coordination. The staff requested will cover a broad range of programs and activities to support overall accountability and performance.

**FY 2007 Accomplishments:** Funding for FY 2007 is \$40,218,000 (46 FTE). These resources enabled CAO to support HQ operations and start up Organizational Elements, as well as maintain the DHS HQ emergency preparedness program.

**FY 2008 Planned Accomplishments:** Funding for FY 2008 is \$41,430,000 (54 FTE). Administrative Services will bolster the Headquarters Administrative Operation Support Services in order to better align CAO's organizational structure with DHS Headquarters operations and start up components. CAO will also measure performance for all Administrative Services functions for all components and maintain DHS business continuity and emergency preparedness programs.

**FY 2009 Projected Accomplishments:** The FY 2009 request is for \$41,727,000 (62 FTE). This will fund current services, including support for shared services, mail screening and delivery for DHS Headquarters, occupational health and safety, and environmental programs. This funding also supports an enhanced Continuity of Operations Program for the entire Department.

**DHS Headquarters Project:** The Headquarters Project supports continued operations at all DHS Headquarters locations, including the Nebraska Avenue Complex.

**FY 2007 Accomplishments:** Funding for FY 2007 is \$8,206,000. These resources supported Headquarters facilities requirements at multiple locations, including the completion of occupancy plans for the Nebraska Avenue Complex (NAC) and remaining work on security upgrades. This included: security improvements and minor alterations at DHS HQ facilities; planning and initial cost for consolidation of back office functions and organizations; and planning and initial costs for establishing a permanent HQ facility.

**FY 2008 Planned Accomplishments:** Funding for FY 2008 is \$6,000,000. CAO will continue to work with GSA to maintain all Headquarters facilities, including the Nebraska Avenue Complex (NAC). Maintaining the NAC will enable the Department to relocate and consolidate those functions that are not scheduled to relocate to St. Elizabeths, ultimately achieving cost savings and further integrating operations.

**FY 2009 Projected Accomplishments:** The FY 2009 request is for \$6,000,000. This will support continued maintenance for all Headquarters facilities, including the Nebraska Avenue Complex (NAC). CAO plans to make necessary upgrades to mechanical systems, complete necessary building renovations, and make other system improvements.

**DHS Consolidated Headquarters Project:** Although the Department will maintain a presence at the Nebraska Avenue Complex, the facility is not sufficient to support all of the Department's needs. For this reason, the Department plans to secure and strengthen operations by unifying core headquarters facilities with those of operating components. GSA has identified the St. Elizabeths West Campus as the only site available in the National Capital Region to meet the Department's minimum consolidation needs and time requirements. Consolidating will achieve the following objectives: improve mission effectiveness; promote a unified DHS organization; increase organizational efficiency; size the real estate portfolio to accurately fit the mission of DHS; reduce real estate occupancy costs.

**FY 2007 Accomplishments:** Funding for FY 2007 and FY2008 is \$0. CAO worked with GSA to rebaseline the construction profile and provided timely information regarding the project to

Department and Congressional leadership. CAO also continued design of the first phase of the St. Elizabeths project.

**FY 2009 Projected Accomplishments:** The FY 2009 request is for \$120,000,000 (11 FTE). CAO will begin the first phase of construction and begin design of the second phase.

**Office of Human Capital:** The Office of Human Capital (OHC) provides overall management and administration of the Department's human resources-related operations. OHC is organized around four major areas (Talent Management & Accountability; Workforce Relations & Performance Culture; Learning & Development; and Recruiting, Staffing and Services) and is responsible for establishing policy and procedures for these areas, as well as providing oversight, guidance and leadership within the Department.

**FY 2007 Accomplishments:** Funding for FY 2007 is \$29,711,000 (53 FTE). These funds supported activities that began in FY 2006 and enabled OHC to begin implementing the FY 2007-2008 Human Capital Operational Plan (HC Plan), which focuses on five key priorities designed to improve the Department's ability to hire and retain the talent needed to achieve its vital mission. In support of the HC Plan, OHC accomplished much in FY 2007, including: adopting a Department-wide hiring model to increase hiring efficiencies; developing a DHS corporate recruitment strategy; and working with the Partnership for Public Service to create consistent and effective job postings, a corporate brand and tailored marketing language; completed training for over 14,500 supervisors, managers and executives on performance leadership; implementing plans to aggressively address weaknesses indicated by the Federal Human Capital Survey; and deploying the DHS Performance Management Program to approximately 16,000 supervisors, managers and employees.

**FY 2008 Planned Accomplishments:** Funding for FY 2008 is \$18,811,000 (53 FTE). These funds will allow OHC to continue ongoing policy and program requirements in each of its four major areas (Talent Management & Accountability; Workforce Relations & Performance Culture; Learning & Development; and Recruiting, Staffing and Services), including the continued implementation of critical HC Plan initiatives. Specifically, OHC will be able to: deploy an enterprise-wide e-Recruitment solution, streamline hiring procedures and implement approved action steps; assess the skill level of employees in mission critical occupations, determine gaps, and institute hiring and retention initiatives; conduct robust diversity outreach activities; provide training for managers and HR professionals on hiring and retention flexibilities; continue leadership succession planning and transition planning efforts; establish targeted DHS recruitment initiatives to attract students, mid-career professionals, senior professionals and veterans; assist the remaining 92,500 non-bargaining (NBU) employees with their transition to the DHS Performance Management Program; continue to respond to organizational weaknesses identified through employee surveys and focus groups; continue building a DHS University system; continue promoting improvements in service excellence, process improvement, metrics and analysis, etc. in order to pursue organizational efficiency and cost avoidance; and assess weaknesses in HR programs across DHS and identify violations through Human Resource Operational Audit and Delegated Examining reviews Department-wide.

**FY 2009 Projected Accomplishments:** In FY 2009, OHC requests \$48,117,000 (86 FTE). OHC will use this funding to continue to support the Learning and Development Strategy, which seeks to train the workforce through the Preparedness Center, the Leadership Institute, the Homeland Security Academy, and the Center for Academic and Interagency Outreach. OHC will also use requested funding to continue to modernize HR systems, including EmpowHR (core personnel),

eRecruitment and ePerformance. Additionally, OHC plans to implement a prototype pay for performance plan for a limited number of DHS employees. Furthermore, DHS will invest in diversity, recruitment, and retention programs to ensure the Department has the workforce it needs to achieve its mission.

**Chief Procurement Office:** The Office of Procurement (CPO) is responsible for the overall management, administration, and oversight of department-wide acquisitions, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. The office is responsible for developing DHS acquisition regulations and policies; workforce planning; and oversight and performance management of the CPO infrastructure.

**FY 2007 Accomplishments:** Funding for FY 2007 is \$16,895,000 (71 FTE). With these resources, CPO implemented the DHS Acquisition Oversight Program and increased support to procurement operations to implement more efficient procurement operations and strategic sourcing teams.

**FY 2008 Planned Accomplishments:** Funding for FY 2008 is \$28,495,000 (129 FTE). CPO will build the DHS acquisition workforce, including the DHS Acquisition Workforce Intern Program, and establish an acquisition system whereby each requirement has a well defined mission and a management team.

**FY 2009 Projected Accomplishments:** CPO requests \$42,003,000 (184 FTE) in FY 2009. CPO plans to continue the Acquisition Workforce Intern Program, implement Program Management teams, and assume responsibility for Investment Review across the Department.

**Office of Security:** The mission of the Office of Security (OS) is to lead a collaborative security program to safeguard the Department's personnel, information, and property so the Department may secure the Homeland. Today's complex security environment demands that security operations be effectively structured and integrated into all DHS operations. OS implements department-wide security programs, policies and standards to safeguard DHS personnel, property, facilities, and information. Priority initiatives include expediting background investigations and granting security clearances; conducting facility security risk assessments; providing security education and awareness training; and issuing guidance on topics ranging from installing physical security equipment to handling classified information. Additionally, the OS investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

**FY 2007 Accomplishments:** FY 2007 funding is \$52,640,000 (105 FTE). With these resources, OS continued to streamline the personnel security process significantly reducing the average turnaround time for background investigations. OS also implemented Computer Based Training (CBT) covering several security areas, and provided security awareness training to state and local officials.

**FY 2008 Planned Accomplishments:** FY 2008 funding is \$53,490,000 (108 FTE). OS will provide security support at State and Local Fusion Centers to ensure that data shared with state and local partners remains secure. OS will also continue to fully implement HSPD-12, to initiate a transition from a startup to operational mode, and identify and establish minimum security requirements for Federal facilities.

FY 2009 Projected Accomplishments: OS requests \$60,968,000 (117 FTE) for FY 2009. OS plans to bolster its adjudication and Counter Intelligence programs, in addition to continuing current services.

### C. Resources Requested and Performance Impact

In FY 2009, the Under Secretary for Management requests 518 positions, 473 FTE, and \$321,469,000 for the FY 2009 Request. The total adjustments-to-base is 28 positions, 74 FTE, and \$37,405,000. The program increases include 92 positions, 47 FTE, and \$138,826,000.

#### Major Changes within the Base level

CPO is transferring \$900,000 to CFO to support Grants Management Oversight.

#### Increments over current service level

**Immediate Office of the Under Secretary for Management:** The FY 2009 request includes an additional \$250,000 (1 FTE) to sustain the position of the (career) Deputy Undersecretary for Management that provides continuity throughout the transition process.

**DHS Consolidated Headquarters Project:** The FY 2009 request of \$120,000 (11 FTE) provides the base level funding to support the DHS Consolidated HQ campus at St. Elizabeth's.

**Office of Human Capital:** The FY 2009 request includes an additional \$5,500,000 (3 FTE) to fund the Learning and Development Initiative and \$5,000,000 to support Operational Initiatives and HR Management System.

**Chief Procurement Office:** The FY 2009 request includes an additional \$3,648,000 (9 FTE) to staff Program Management Teams to review every major acquisition and \$3,142,000 (17 FTE) to continue the DHS Acquisition Workforce Intern Program to recruit, train, certify, and retain an appropriate workforce of acquisition professionals.

**Office of Security (OS):** The FY 2009 request includes an additional \$1,286,000 (6 FTE) to meet the Department's increased security needs through enhanced Department-wide security programs, policies, and standards to safeguard DHS personnel, property, facilities, and information.

### D. How USM and Its Performance Goals Align to and Support the DHS Goals and Objectives.

The Under Secretary for Management and its performance goal is followed by the DHS goal it supports.

Under Secretary for Management – Consolidate support services under the control of the Department of Homeland Security in order to maximize management efficiencies and ensure continuity of services in the near term.

**Goal 5** – Strengthen and Unify DHS Operations and Management

E. Performance Based Budget Highlights by Program<sup>1</sup>

For each major program, the performance goal, main performance measure/s, indicators, budget including allocation of non-programmatic overhead, and FTE are shown below.

| <b>Program: Departmental Management and Operations</b>   |          |           |           |           |           |           |
|--|----------|-----------|-----------|-----------|-----------|-----------|
| <b>Performance Goal:</b> Provide comprehensive leadership, oversight, and support to all components and improve the efficiency and effectiveness of the Department and its business and management services. |          |           |           |           |           |           |
| <b>Goal 5 – Strengthen and Unify DHS Operations and Management</b>   |          |           |           |           |           |           |
| <b>Fiscal Year:</b>  | FY 2004  | FY 2005   | FY 2006   | FY 2007   | FY 2008   | FY 2009   |

|  |         |         |         |         |         |         |
|--|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of favorable responses by DHS employees on the Federal Human Capital Survey  |         |         |         |         |         |         |
| <b>Description of Measure:</b> Every two years, the U.S. Office of Personnel Management (OPM) conducts a survey to gauge employees' perceptions on whether they are effectively led and managed, if they have opportunities to grow professionally and advance in their careers, and if their contributions are truly valued and recognized. This measure reflects the responses of DHS employees on the 39 questions that the OPM has determined make up the four Human Capital Assessment and Accountability Framework (HCAAF) Indices: Leadership and Knowledge Management; Results - Oriented Performance Culture; Talent Management; and Job Satisfaction. OPM created the HCAAF to guide agencies in addressing human capital management issues and to measure their performance in these areas. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>   | None    | None    | None    | N/A     | 52%     | N/A     |

# BUDGET REQUEST AND SUPPORTING INFORMATION

## DEPARTMENTAL MANAGEMENT AND OPERATIONS OFFICE OF THE CHIEF FINANCIAL OFFICER (OCFO)

### I. Appropriation Overview

#### **A. Mission Statement for the Office of the Chief Financial Officer (OCFO):**

The mission of the Office of Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, and resource management systems to ensure funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies.

The DHS CFO goals are:

1. To provide greater visibility into DHS' financial activity, through timely, accurate, and useful financial related data
2. To improve systems and processes eventually leading to sustainable clean audit opinions
3. To provide reasonable assurance about our internal controls over financial reporting
4. To provide efficient financial management services
5. To integrate the budget process with the policy and planning process
6. To support the Under Secretary for Management and business line chiefs by supporting integration and standardization of our resource management systems.

#### **B. Budget Activities:**

Under the OCFO, the following divisions fulfill these functions:

##### Program Analysis and Evaluation (PA&E):

- Analyzes and evaluates plans, programs, and alternatives in relation to homeland security objectives and strategy, threats, vulnerabilities, estimated costs, resource constraints;
- Develops policies and provides guidance and oversight on matters pertaining to program analysis and evaluation;
- Meets the performance-based budget requirements set by OMB;
- Develops analytic tools, data, and methods for analyzing DHS planning and resource allocation;
- Establishes policies for, and oversees the integration of, the planning, programming, and budgeting system of the Department;
- Provides guidance for, and oversees the development of, the DHS Future Years Homeland Security Program (FYHSP);
- Ensures that the costs of Department programs are accurate and complete;
- Assists Budget with the preparation of the OMB and Congressional Justifications;
- Reviews Component execution of planned milestones and performance targets; and
- Coordinates with and supports the Office of Policy on DHS long-term strategic planning.

### Budget:

- Responsible for the Departmental budget, appropriations, and expenditures of funds;
- Coordinates with PA&E to formulate annual budget submissions, assures these properly reflect the requirements of DHS, and assists in the presentation and defense of submissions to OMB and the Congress;
- Assists PA&E with preparation of the FYHSP;
- Coordinates and reviews budget execution for each component and appropriation, at the macro level; conducts spend plan and execution reviews; and acts on requests for modifications;
- Conducts special studies and analyses of execution of financial plans and recommends reprogramming necessary for effective funds utilization;
- Prepares budgetary reports as necessary or as required by OMB and the Congress;
- Administers funds not specifically allotted to other component of DHS, such as the Pandemic Influenza Supplemental;
- Coordinates with the Office of Legislative Affairs in preparing for Congressional hearings;
- Tracks status of reports to Congress required by appropriations bills;
- Ensures technical accuracy and consistency of budget-related materials among the components and in accordance with OMB or Congressional guidance;
- Manages and coordinates components entering their budgets into the President's electronic on-line MAX (budget preparation) data system;
- Analyzes and reviews pending legislation, reports to Congress, testimony, and other documents for budgetary impact;
- Coordinates and reviews apportionments, reappropriations, and allotments for all appropriations across all components; and
- Operates the Department's Working Capital Fund.

### Financial Management and Policy:

- Develops and oversees the Departmental financial management policy; coordinates the government-wide financial management initiatives in the Department;
- Prepares the Department's consolidated financial statements and other required financial information included in the Annual Financial Report; and
- Administers the DHS Bankcard (purchase, travel, and fleet) Program, develops and documents bankcard policy, provides training and establishes and maintains internal control to provide reasonable assurance that the goals and objectives of the Bankcard Program are met and safeguards against fraudulent, improper, abuse, untimely payment, etc. are identified on a timely basis and appropriate corrective action is taken.

### Resource Management Transformation Office (RMTO):

- Responsible for the oversight, administration, and maintenance of DHS business and financial systems across the enterprise; RMTO is focused on improving resource management and enabling DHS components to improve the efficiency and effectiveness of their core support functions;
- Leads transformation efforts to implement DHS-wide enterprise solutions and to merge, improve, integrate and leverage on-going component initiatives and capabilities to create a world-class best value environment in which they can operate; and
- Implements the Department's eTravel solution across all components.

#### GAO and OIG Audit Liaison:

- Coordinates the Department's engagement in Government Accountability Office (GAO) and Office of the Inspector General (OIG) audits, including entrance and exit conferences, and the Department's response to audit reports and findings;
- Tracks audit recommendations and the Department's implementation of those recommendations; and
- Provides oversight and guidance to component-level GAO and OIG audit liaison offices and to DHS employees involved in audit investigations.

#### Internal Controls:

- Implements the *Federal Managers' Financial Integrity Act*, *CFO Act*, and the *Federal Financial Management Improvement Act*;
- Ensures effective internal control over Departmental resources and consistency of internal control across components;
- Monitors and ensures compliance and proper accomplishment of DHS-wide financial corrective action plan milestones;
- Oversees DHS's implementation of OMB Circular A-123, including assessment of the design and operating effectiveness of the Department's internal controls over financial reporting;
- Conducts spot checks of key financial processes to ensure internal controls are operating effectively (DHS OCFO's goal is to identify weaknesses so that they can be corrected before they become problems.); and
- Coordinates the Financial Management Improvement Initiative of the President's Management Agenda.

#### Grants Management Division (Proposed, FY 2009):

- Would represent DHS on government-wide OMB A-133 audit initiatives, ensure compliance, and track implementation of corrective actions for audit findings and recommendations for the thousands of audits submitted annually;
- Would draft, communicate, and implement DHS grant policy, management directives, and procedures, and maintain DHS grants management manuals;
- Would establish standards for terms and conditions of DHS assistance awards and provide guidance for and oversight of the use of special assistance award terms and conditions;
- Would collect and maintain grants and assistance award data, monitor their status and close-out, and assist DHS component grants program offices in closing out delinquent assistance awards;
- Would analyze requirements, research, and draft responses to OMB and Congressional inquires, Questions for the Record, and reports related to DHS grants;
- Would assist DHS component grants management staff through guidance, instruction, or direction on appropriate action to address customer service inquires and requests;
- Would develop and maintain training for DHS component grants management staffs and ensure DHS component-developed training is compliant with government-wide and DHS requirements;
- Would represent DHS on the government-wide CFO Council Grants Policy Committee and other government-wide committees and task forces;
- Would manage the DHS participation in the Grants.gov eGov initiative;
- Would ensure integrity of public information on DHS grants and assistance awards; and
- Would advise senior DHS leadership on grants management activities, DHS and government-wide statutes, regulations, OMB circulars, Executive Orders, etc.

### **C. Budget Request Summary:**

The Office of the Chief Financial Officer (OCFO) requests 163 positions, 139 FTE, and \$56.235 Million for FY 2009. The total adjustments-to-base is 4 positions, 4 FTE and \$5.935 Million. The program increases include 30 positions, 15 FTE, and \$19.000 Million to:

- Transform, consolidate, and integrate legacy resource management systems. (8 positions, 4 FTE, and \$15.500 Million)
- Increase oversight of and accountability for DHS grants and assistance awards. (20 positions, 10 FTE, and \$3.350 Million)
- Support the Quadrennial Homeland Security Review (QHSR) resource analysis and long-range budget planning. (2 positions, 1 FTE, and \$0.150 Million)

## II. Summary of FY 2009 Budget Estimates

### III. Current Services Program Description

**Department of Homeland Security**  
**Departmental Management and Operations**  
**Office of the Chief Financial Officer**  
**Program Performance Justification**

(Dollars in thousands)

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>   |
|------------------------------|---------------------|------------|-----------------|
| <b>2007 Actual</b>           | <b>116</b>          | <b>97</b>  | <b>\$25,239</b> |
| <b>2008 Enacted</b>          | <b>129</b>          | <b>120</b> | <b>31,300</b>   |
| 2009 Adjustments-to-Base     | 4                   | 4          | 5,935           |
| <b>2009 Current Services</b> | <b>133</b>          | <b>124</b> | <b>37,235</b>   |
| 2009 Program Change          | 30                  | 15         | 19,000          |
| <b>2009 Request</b>          | <b>163</b>          | <b>139</b> | <b>56,235</b>   |
| Total Change 2008-2009       | 34                  | 19         | 24,935          |

The Office of the Chief Financial Officer (OCFO) requests \$56.235 million. This is an increase of \$24.935 million over FY 2008 for pay and non-pay inflation, adjustments to base, as well as program increases for Transformation and Systems Consolidation (TASC), Grants Management, and the Quadrennial Homeland Security Review (QHSR).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of the Chief Financial Officer (OCFO) has made significant progress leading improvement to financial management at DHS.

In FY 2007, the OCFO:

- Launched human capital initiatives such as the DHS CFO New Hire Orientation Program and the CFO Mentorship Program
- Developed and published many new DHS-wide financial policies and developed a plan to develop, publish, and communicate a DHS financial management policy manual by the end of FY 2008
- Developed and published the DHS Internal Controls Over Financial Reporting (ICOFR) Playbook identifying the tasks and milestones that DHS must meet to resolve underlying root causes of DHS’s financial management material weaknesses and established a Program Management Office (PMO) to track and monitor progress in achieving the milestones of the ICOFR Playbook. As a result of this effort, DHS reduced from 26 to 16 the number of component conditions that contributed to the Department’s material weaknesses.
- Remediated DHS OCFO Financial Management and Policy Division audit material weaknesses
- Established an assurance team to conduct internal reviews of key financial management processes and initiated internal reviews on purchase card and travel card controls
- Delivered 1,464 Questions for the Record (QFRs) to Congress within 30 days
- Continued to oversee the initiative to migrate DHS components to a shared baseline of resource management systems model

In FY 2008, the OCFO is:

- Institutionalizing the DHS CFO New Hire Orientation and the CFO Mentorship Program across the DHS financial management community
- Launching a DHS Financial Management Fellowship Program for recent graduates motivated to pursue careers in Federal financial management jobs with DHS and hire the first cohort of fellows from the 2008 graduating class
- Developing, publishing, and communicating a comprehensive DHS financial management policy manual
- Establishing regular, thorough internal assurance reviews to identify and remediate problems before they become audit findings
- Issuing a second edition of the DHS ICOFR Playbook that presents refined corrective action plans with measurable, achievable milestones.
- Implementing a plan to eliminate DHS OCFO Financial Management and Policy Division audit material weaknesses
- Implementing corrective actions related to Department-wide material weakness focus areas of: Fund Balance With Treasury, Actuarial Liabilities, Legal and Other Liabilities, and Budgetary Accounting.
- Deploying eTravel and enhanced business intelligence tools to the DHS financial management community
- Continuing to oversee the initiative to migrate DHS components to a shared baseline of resource management systems, and begin the migration of the Office of Health Affairs (OHA), Departmental Operations, and Science & Technology

In FY 2009, the OCFO plans to:

- Continue refining and expanding DHS financial management community human capital initiatives (New Hire Orientation, CFO Mentorship Program, Financial Management Fellowship) to improve human capital capabilities and build a common culture
- Expand and refine the DHS financial management policy manual
- Continue regular internal assurance audits to identify vulnerabilities to waste, fraud, and abuse, and develop and strengthen internal controls to prevent waste, fraud, and abuse
- Begin migration of ICE and USCIS to new financial systems, including performing gap analysis, planning, training, etc.
- Build the Department's grants management and oversight function to issue policy, conduct audits mandated by the *Single Audit Act*, and monitor DHS grants and assistance awards of approximately \$20 Billion.
- Provide leadership and analytical support for the Quadrennial Homeland Security Review (QHSR)

### **TRANSFER REQUEST:**

The Department of Homeland Security requests the transfer of its grants management, policy, and oversight function from the Under Secretary for Management (USM), Office of the Chief Procurement Officer (OCPO) to the OCFO. The transfer will bring greater integration and development of *Single Audit Act* corrective action oversight within the Department's larger internal control program managed by the OCFO. The Department has identified many opportunities for the OCFO to integrate grants oversight and audit with its efforts to implement stronger internal controls, to identify and remediate improper payments, and to respond to audit findings and implement corrective actions. Transferring the function to the OCFO as a recurring fiduciary responsibility will provide a separation of duties between awarding grants and assistance awards and the review and monitoring of internal controls associated

with administering them. This request transfers 4 positions, 4 FTE, and \$900,000 from the Under Secretary for Management (USM) account, OCPO PPA to the OCFO appropriation. The net effect on the overall DHS budget request is zero.

#### IV. Program Justification of Changes

**Department of Homeland Security  
Departmental Management and Operations  
Office of the Chief Financial Officer (OCFO)  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Increase 1: Transformation and Systems Consolidation (TASC)**

Strategic Goal(s) & Objective(s): 5.1 Strengthen and Unify DHS Operations and Management.

Program Increase: Positions 8 FTE 4 Dollars \$15,500

| <b>Budget Request</b>  | <b>7</b>       | <b>7</b> | <b>\$855</b>    | <b>12</b>       | <b>12</b> | <b>\$3,601</b>  | <b>20</b>       | <b>16</b> | <b>\$19,189</b> |

Description of Item

One of the main objectives of DHS at its formation was to consolidate the support systems of the component agencies to realize cost savings and operational efficiencies. Similarly, the OCFO’s objectives include reducing the number of DHS financial systems and ensuring that manual processes for internal controls are integrated and automated with these financial systems. This request is to continue implementation of an initiative known as *Transformation and Systems Consolidation (TASC)*. The goal of this initiative is to improve Department-wide financial management information through consolidation of the multiple, legacy, obsolete and expensive financial systems to fewer systems able to meet the needs and missions of multiple components. Consolidating the Department’s financial systems is a means of not only meeting long-standing Departmental objectives but also facilitating audit success by ensuring that internal control processes are integrated with foundational financial systems. This initiative is also consistent with the DHS CIO’s objectives.

The \$15.500 is comprised of the following cost estimates:

- ICE migration - \$7.400 Million
- USCIS migration - \$4.600 Million
- Resource Management Transformation Office (RMTO) operating expenses to directly support the migrations and planning for future migrations, \$3.500 Million

Justification

The Department’s TASC effort involves moving from multiple, outdated financial systems to fewer, modern financial and resource management systems (hereinafter referred to as **Shared Baselines**). DHS uses the term “baseline” because it determined there is a minimum resource management system standard, (i.e., compliant with Federal guidelines and best practices,) that all DHS systems should meet.

The term “shared” means that DHS components will not only share the systems and cross-service other components, but that DHS will ensure that all components work with the same versions of the software, and that all configuration changes are vetted and agreed to by the CFO and CIO, the components, and other stakeholders.

The TASC Oracle Shared Baseline offers a suite of industry-recognized tools including Oracle Federal Financials, Compusearch PRISM (Procurement), Sunflower Asset Management, Informatica (Business Intelligence) and 170 Systems’ MarkView (Workflow Routing). Currently, Oracle is widely and successfully implemented across the Federal environment, notably within the Departments of Education, Energy, and Transportation. In FY 2008, the Department plans to migrate several smaller components to the TASC Oracle Shared Baseline, and then begin migrating USCIS and ICE’s financial systems to the Shared Baseline in FY 2009.

Impact on Performance (Relationship of Increase to Strategic Goals)

This DHS initiative promotes DHS Strategic Goal 5.1, Strengthen and Unify DHS Operations and Management. It provides the underlying capability for the Department to pursue all of its missions. The TASC initiative is an investment that combines systems improvements and adoption of financial management best practices to ensure a strong internal financial control environment that will lead to clean audits on a consistent basis. It will also result in operational efficiencies to the Department and individual components. This enhances the components’ ability to carry out their critical missions of protecting the homeland and responding to emergencies, and achieves key missions while *properly managing resources*. Further, this initiative facilitates robust, accurate, and actionable financial information for decision-makers and reporting.

**Program Increase 2: Grants Management**

Strategic Goal(s) & Objective(s): 5.1 Strengthen and Unify DHS Operations and Management

Program Increase: Positions 20 FTE 10 Dollars \$3,350

Funding Profile

Description of Item

This request funds 20 positions (10 FTE) and \$3.350 Million for the oversight and guidance for DHS grants and assistance awards. In addition to staff, this initiative funds improvements to grants management and administration systems to improve the administration and management of DHS grants and assistance awards, and to improve data quality for reporting.

Justification

There are extremely limited FY 2007 and FY 2008 resources dedicated to address the fiscal stewardship and oversight of approximately \$20 billion in DHS assistance awards that provide grants, cooperative agreements and other types of assistance awards to non-Federal entities to address preparedness, protection against, response to, and recovery from major disasters, terrorist attacks, and other emergencies as well as research, development educational and training programs. This request will provide the resources necessary for oversight to assure that the award and expenditure of funding is being administered under standard business practices and fiscal stewardship in compliance with statutory, regulatory, Executive Order and other mandated requirements.

In addition, this funding will provide the resources to establish a central process function to review and resolve thousands of audits submitted by recipients of assistance awards in compliance with the *Single Audit Act*. Currently, the audit process is fragmented between the Office of Inspector General, the Office of the Chief Procurement Officer and DHS component program offices; there is no single office assigned the over-arching responsibility for tracking and processing the thousands of Single Audits received to assure that the audits are resolved, and to identify negative finding trends that could eliminate waste, fraud or abuse of DHS assistance funds. Neither do any of the DHS organizations involved have sufficient staff to handle the workload. The Department proposes to move this function to OCFO and staff it appropriately.

Twenty positions are needed to provide oversight capability for pre-award reviews of new programs, post award monitoring and processing of the thousands of audits received annually. The OCFO will have primary oversight on all policies, procedures, processes and written documents generated by program offices in relationship to grant, cooperative agreements and other types of assistance awards to assure that the funding or property awarded is in compliance with statute, regulation and other mandated requirements.

Impact on Performance (Relationship of Increase to Strategic Goals)

This DHS initiative promotes DHS Strategic Goal 5.1, Strengthen and Unify DHS Operations and Management. Increased accountability for DHS grants and assistance awards is crucial to improving our way of doing business. With the high visibility and dollar amount of DHS grants, preventing and detecting negligence, waste, fraud, and abuse is critical.

**Program Increase 3: Quadrennial Homeland Security Review (QHSR)**

Strategic Goal(s) & Objective(s): 5.1 Strengthen and Unify DHS Operations and Management

Program Increase: Positions 2 FTE 1 Dollars \$150

Funding Profile

|                        | FY 2007 Actual |          |                 | FY 2008 Enacted |          |                 | FY 2009 Request |          |                 |

| Program Increase       |                |          |                 |                 |          |                 | 2               | 1        | 150             |
| <b>Budget Request</b>  | <b>0</b>       | <b>0</b> | <b>\$0</b>      | <b>0</b>        | <b>0</b> | <b>\$0</b>      | <b>2</b>        | <b>1</b> | <b>\$150</b>    |

Description of Item

This request for \$150,000 funds two additional positions to provide analysis and support for the Quadrennial Homeland Security Review.

Justification

*Implementing Recommendations of the 9/11 Commission Act of 2007* (P.L. 110-53) directs the Secretary to conduct a comprehensive review of the homeland security of the Nation, referred to as the Quadrennial Homeland Security Review (QHSR), every four years. The first QHSR must be provided to Congress by December 31, 2009. To produce the QHSR, DHS must examine the homeland security strategy, include recommendations regarding the long-term strategy and priorities, and provide guidance on the programs, assets, capabilities, resources, budget, policies, and authorities of the Department.

Conducting an effective QHSR will require a substantial effort with commensurate resources and expertise in all the elements of the QHSR analysis and homeland security. Recognizing the importance of the review and the need to explicitly ensure resource plans are a part of the QHSR review, the OCFO Program Analysis and Evaluation Division (PA&E) will provide analytical support for and closely coordinate with the Office of Policy in conducting the QHSR. PA&E will continue to perform its responsibilities overseeing the integration of the planning, programming, and budgeting process, conducting the internal DHS program review and producing the FYHSP, and meeting performance-based budget and management requirements. However, additional staff will be required to meet the demands of conducting and coordinating the analysis to support the QHSR and ensuring the results adequately address resource requirements and are fully integrated into the FYHSP plan.

Impact on Performance (Relationship of Increase to Strategic Goals)

This DHS initiative promotes DHS Strategic Goal 5.1, Strengthen and Unify DHS Operations and Management. The QHSR will be a long-range, strategic planning and implementation document, providing meaningful insight into the Nation’s homeland security strategy, mission areas, and supporting activities. The QHSR will not only enhance the Nation’s long-term homeland security strategic decision-making and help prioritize policy initiatives; it will assess resource needs and guide budget decisions. These resources will enhance the depth and breadth of the QHSR; and through its conclusions help improve and streamline processes, reduce duplication, and make the Department more effective and efficient.

Departmental Management and Operations  
Justification of Proposed Changes in Office of the Chief Financial Officer  
Appropriation Language**

For necessary expenses for enforcement of the Office of the Chief Financial Officer as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113), [\$31,300,000] **\$56,235,000, of which \$12,000,000 is available until expended for financial systems consolidation.**

#### **Explanation of Changes:**

The financial systems consolidation project, now known as TASC, was always funded out of a no-year Chief Information Officer account. However, since those funds will be fully obligated soon, the OCFO will need a new no-year account to continue TASC. This language is proposed to allow \$12 million (which is the total amount of systems integration and data migration contracting costs) to be available until expended in the OCFO's account starting in 2009 to continue to provide the Department with the flexibility it had in previous years for this effort.

**OCFO Mission Statement**

The mission of the Office of Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, investment review, and resource management systems to ensure funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies.

### Summary Justification and Explanation of Changes

|                              | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|------------------------------|----------------|-----------------|-----------------|------------------------|
| <b>Salaries and Benefits</b> | \$11,185       | \$14,273        | \$17,611        | \$3,338                |

Salaries and Benefits includes costs for 139 FTEs. The FY 2009 request includes a transfer in of \$700,000 for the Grants Management function, an increase of \$116,000 in annualization of the 2008 increase in personnel compensation, and an increase of \$349,000 for the proposed January 2009 increase in personnel compensation. There are also program increases of \$1,443,000 to fund 20 new positions for Grants Management, \$589,000 to fund 8 new positions for the Resource Management Transformation Office (RMTO) Transformation and Systems Consolidation (TASC), and \$141,000 to fund 2 new positions for the Quadrennial Homeland Security Review (QHSR).

| <b>Purchase from Government Accounts</b> | \$2,037       | \$3,565        | \$6,835        | \$3,270             |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2009 request includes a transfer in of \$200,000 from the Under Secretary for Management account to reflect the transfer of the Grants Management function to OCFO and an adjustment-to-base of \$2,968,000 for shared services through the DHS Working Capital Fund. This increase reflects efforts by DHS to refine the DHS Working Capital Fund algorithms and activity-based-cost models to capture the full cost of shared services. There is also an increase of \$102,000 in non-pay inflation.

|                                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------------------------|---------------|----------------|----------------|---------------------|
|                                 | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Supplies &amp; materials</b> | \$104         | \$128          | \$152          | \$24                |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2009 request includes increases of \$3,000 in non-pay inflation, and program increases of \$15,000 for Grants Management and \$6,000 for Transformation and Systems Consolidation to support staffing increases in these areas.

## A. Mission and Description of the Office of the Chief Financial Officer (OCFO)

The mission of the Office of Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, and resource management systems to ensure funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies.

The OCFO has seven divisions: Budget; Program Analysis and Evaluation; Financial Management and Policy; Resource Management Transformation (Systems); Internal Controls Program Management Office; and GAO and OIG Audit Liaison. In FY 2009, DHS proposes to add a new Grants Management division to the OCFO. The FY 2009 budget request has resources for 163 positions, primarily in the following occupational series: budget analyst, management and program analyst, staff accountant, systems accountant; financial analyst; and auditor.

## B. Major Activities and Key Strategic Goals

The Office of the Chief Financial Officer (OCFO) received an appropriation of \$31.300 Million for FY 2008. The OCFO is using these funds to ensure that resources needed to accomplish the DHS missions are obtained and expended in accordance with law, OMB guidance, and Congressional intent. Further, the OCFO is improving DHS financial management practices and strengthening internal controls to ensure that DHS is an effective steward of public resources.

In FY 2008 the OCFO is expanding human capital improvement initiatives for the DHS financial management community (e.g., New Hire Orientation, Financial Management Fellows Program, CFO Mentorship Program); developing and publishing a comprehensive DHS financial management policy manual; providing assurance through regular internal audits of key financial management processes, implementing actions to remediate financial statement audit and internal control material weaknesses; and continuing to lead the Department's resource management systems transformation by migrating DHS components to robust, integrated systems that produce useful management information.

In FY 2009, the OCFO will further these efforts and will refine and expand DHS financial management community human capital initiatives that strengthen our organizational culture and identity; update the financial management policy manual and improve consistency of handling financial transactions and processes across the DHS enterprise; eliminate many internal control and financial audit weaknesses; migrate more DHS components to modern resource management systems, enable improved decisionmaking through business intelligence tools; and continue identifying vulnerabilities to fraud, waste, and abuse through internal assurance reviews and developing and strengthening internal controls to prevent fraud, waste, and abuse. With resources requested to create the Grants Management division, the OCFO would build the Department's grants management and oversight function to issue policy, conduct audits mandated by the *Single Audit Act*, and monitor DHS grants and assistance awards of approximately \$20 Billion; and provide leadership and analytical support for the Quadrennial Homeland Security Review (QHSR).

## C. Resources Requested and Performance Impact

**Major changes within the base level:** The budget request for FY 2009 for the Office of the Chief Financial Officer contains the following major changes within base level:

- A permanent transfer in from the Under Secretary for Management (USM) appropriation, Chief Administrative Officer (CAO) PPA of \$0.786 Million. In prior years, USM/CAO obligated these funds to offset the OCFO GSA rent bill. This transfer of base funding aligns the rent funding request with the organization occupying the space and more accurately reflects their costs.
- A permanent transfer in from the Under Secretary for Management (USM) appropriation, Chief Procurement Officer (CPO) PPA of 4 positions (4 FTE) and \$0.900 Million for the Department's grants management function.
- Pay and non-pay inflation, and annualization of the January 2008 pay increase of \$1.627 Million.
- An increase of \$2.968 Million for shared services through the DHS Working Capital Fund.
- A decrease of \$0.346 Million for management and technology efficiencies.

**Increments over current service level:** The budget request for FY 2009 for the Office of the Chief Financial Officer contains the following increments over current services level:

- An increase of 8 positions (4 FTE) and \$15.500 Million for Transformation and Systems Consolidation (TASC). TASC will consolidate multiple legacy and obsolete systems that are expensive for DHS to maintain, and that are inadequate to meet DHS's, OMB's and Congress's needs for useful management information. Reduction of the number of resource management systems in the Department and integration of systems will improve internal controls. DHS will use the funds to implement integrated resource management systems at ICE and USCIS and to migrate existing financial data. Additionally, grants management system modules will be integrated into financial systems. The TASC initiative is an investment that will ensure a strong financial accountability environment and result in increased efficiency in the Department. Ultimately, all DHS components will benefit by being able to carry out their critical homeland security missions while properly managing resources.
- An increase of 20 positions (10 FTE) and \$3.350 Million for Grants Management. The increase for grants management will enable the OCFO to build a grants management oversight and guidance division within the OCFO. In FY 2007 and FY 2008, there are only 4 government FTE devoted to overseeing and coordinating grant activities for the approximately \$20 Billion in DHS assistance awards, grants, and cooperative agreements to non-Federal entities for preparedness, protection against, response to, and recovery from major disasters, terrorist attacks, and other emergencies, as well as research, development, educational, and training programs. The grants management staff will draft, communicate, and implement policy and procedures to ensure compliance with statutory and DHS grants requirements. Additionally, the staff will be the central unit to review and resolve the thousands of audits submitted annually by recipients of assistance awards in compliance with the *Single Audit Act*. This will ensure audits are resolved and negative finding trends are identified to reduce waste, fraud, and abuse of DHS assistance funds. Achieving the DHS mission is dependent on ensuring that the approximately \$20 billion in grants and assistance awards is used effectively.
- An increase of 2 positions (1 FTE) and \$0.150 Million for the Quadrennial Homeland Security Review (QHSR). The increase for the QHSR will enable the OCFO to support the DHS Office of Policy in *Implementing Recommendations of the 9/11 Commission Act of 2007* (P.L. 110-53), which directs the Secretary of DHS to conduct a comprehensive review of the homeland security of the Nation every four years. To produce the QHSR, DHS must examine homeland security strategy, make recommendations regarding the long-term strategy and priorities, and provide guidance on the programs, assets, capabilities, resources, budget, policies, and authorities of the Department. The two positions for the OCFO Program Analysis and

Evaluation Division (PA&E) funded through this increase will provide analytical support to the Office of Policy to produce the QHSR and ensure that it adequately addresses resource requirements. PA&E will also integrate the QHSR process with the Future Years' Homeland Security Program (FYSHP) and the planning, programming, and budgeting process.

D. Program Performance Highlights, Resources, and Alignment to Strategic Goals

Office of the Chief Financial Officer performance goal – Develop and maintain a Department-wide financial system that produces financial data that is timely, reliable, and useful to decision makers; strengthen accountability by ensuring that internal controls are in place across the Department and oversight reviews are conducted. OCFO supports the following DHS goal:

**Goal 5 – Strengthen and Unify DHS Operations and Management**

E. Performance Based Budget Highlights by Program<sup>1</sup>

The CFO FYHSP performance goal, performance measure, budget, and FTE are:

| <b>Program: Office of the Chief Financial Officer</b>   |         |          |          |          |          |          |
|---|---------|----------|----------|----------|----------|----------|
| <b>Performance Goal:</b> Develop and maintain a Department - wide financial system that produces financial data that is timely, reliable, and useful to decision makers; strengthen accountability by ensuring that internal controls are in place across the Department and oversight reviews are conducted. |         |          |          |          |          |          |

# BUDGET REQUEST AND SUPPORTING INFORMATION

## Departmental Management and Operations Office of the Chief Information Officer

### I. Appropriation Overview

#### **A. Mission Statement for the Office of the Chief Information Officer:**

The Department of Homeland Security (DHS) Office of the Chief Information Officer (CIO), in collaboration with the DHS Chief Information Officer Council, is responsible for implementing the necessary programs to align the Information Technology (IT) organization, including all of the systems and infrastructure, to support the missions and activities across the Department.

Under the leadership of the CIO, IT will enable the transformation of the Department into a performance based and integrated organization by providing effective technologies and systems. This transformation will align information-delivery resources into appropriate functions to achieve DHS' missions. To that end, the CIO and the CIO Council are committed to providing the following:

- A secure means of sharing appropriate information to all internal and external stakeholders
- A set of advanced tools that enables the DHS workforce to rapidly and efficiently communicate, process, retrieve, deliver, and share information
- A single, DHS-wide IT infrastructure environment that is reliable, scalable, flexible, maintainable, and secure
- A clear set of performance metrics and efficient business processes
- IT standards and frameworks that provide for integration
- A single, consistent IT governance model
- Continued improvements in cyber security
- A mature and fully detailed Enterprise Architecture
- The alignment of acquisition for IT and IT services to the Department's goals

#### **B. Budget Activities:**

The Office of the Chief Information Officer provides a myriad of Information Technology related services and support throughout the Department of Homeland Security. The CIO program is divided into four major subprograms as follows:

##### **Salaries and Expenses**

Salaries and Expenses is a crosscutting program that provides technology management, shared services, acquisition strategy and executive leadership support to all offices within the CIO.

##### **Department-wide Technology Investments**

**Information Technology Services** – A program that supports development, implementation, and maintenance of a comprehensive and integrated Enterprise Architecture, and the integration of the

following: the Department's financial management system activities; the information technology framework for the Department's Human Resources System; geospatial technologies; and information sharing.

**Security Activities** – A set of programs that provide for the integration and protection of sensitive and collateral DHS information.

**Homeland Secure Data Network (HSDN)** – HSDN provides the primary means for data and information exchange, messaging, and collaboration with specific and controlled interconnections to the intelligence community and federal law enforcement resources at a SECRET-classified level within the civilian side of the Federal Government and State and Local Government.

### **C. Budget Request Summary:**

The CIO requests 94 positions, 94 FTE and \$247.369 million for the FY 2009 Budget. The total adjustment-to-base is a decrease of \$60.431 million and 0 FTEs. This adjustment-to-base includes a pay and non-pay inflationary increase of \$2.828 million for Salaries and Expense and \$0.573 million for HSDN. A net decrease of \$16.255 million for Information Technology Services; due in large part to the transfer of the Human Resources IT program to the Office of the Chief Human Capital. A current services reduction of \$47.577 million in Security Activities associated with one-time construction costs for NCCIPS and a reduction in base funding for the Data Center Development program. CIO requests a net increase of \$12.600 million for the following program changes in the FY 2009 Budget:

- A decrease of \$7.000 million in base funding for the Watchlist Technical Integration program
- An increase of \$0.500 million in recurring base funding for Enterprise Architecture
- The creation of a new program, Enterprise Data Management, with a base funding of \$2.000 million for FY 2009
- The consolidation of base funding and existing programs, Solutions Engineering and Enterprise Portal, into the Enterprise Application Delivery program to maximize efficiencies and cost savings
- An increase of \$3.100 million for the Information Security Program to improve IT configuration management monitoring, improve financial system security, upgrade information security operations and support full FISMA compliance for all DHS systems. These funds will also provide financial audit and remediation support efforts, as well as transition costs to relocate the FISMA compliance tool suite.
- An increase of \$14.000 million for the Homeland Secure Data Network for system-wide core infrastructure and site-specific equipment and software refreshments.

**II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)**

| <b>2009 Request</b>          | <b>94</b>           | <b>94</b>  | <b>86,928</b> |
| Total Change 2008-2009       | ...                 | 3          | 5,928         |

The Office of the Chief Information Officer requests \$86.928 million for this activity, an increase of \$5.928 million over FY 2008. The adjustments-to-base are due to pay and non-pay inflation and the annualization of three (3) FTEs to more effectively oversee the management of major Department-wide IT acquisitions and E-Gov initiatives. The FY 2009 program change will be used to support the Information Security Program in its efforts to improve financial system security and provide full FISMA compliance for all DHS systems.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

##### **DHS Information Security Program**

The DHS Information Security Program provides oversight to ensure a secure and trusted computing environment that enables the Department to effectively share information in support of its mission. It also works to ensure compliance with the Federal Information Security Management Act (FISMA) and National Institute of Standards and Technology (NIST) security policies and requirements. The services of the program are to develop and document Departmental information security requirements, develop enterprise security management tools, and oversee the implementation of information security for the information and systems that support the operations of the Department. Specifically, the program provides:

**Security Policy** – Establishes and implements DHS information security policies and guidance to ensure the protection of DHS information resources, and incorporate new information security requirements and best practices promulgated by Congress, the Office of Management and Budget (OMB), Homeland Security Presidential Directives (HSPDs), and NIST.

**Security Architecture** - Supports information sharing and interoperability by integrating information security architecture with DHS Enterprise Architecture (EA), System Life Cycle, Capital Planning Investment Control (CPIC), and acquisition processes. Security Architecture works to develop enterprise procedures for dealing with cyber attacks, incidents, and newly discovered vulnerabilities (including patch management). Additionally, Security Architecture assesses technologies that show the greatest promise for enhancing information sharing and security and that can be scaled for enterprise application.

**Compliance and Oversight** – Comprises the management and oversight of the IT system inventory, the certification and accreditation (C&A) process, Plans of Action and Milestones (POA&M), FISMA reporting, the implementation of security management tools, and visits to assist with component compliance. The program also includes oversight of weakness remediation to resolve IT security weaknesses. This activity supports security metrics verification and enhancements to security tools to integrate functionality to improve FISMA compliance management and reporting.

**DHS IT Security Awareness, Training, and Education** - Ensures that all Federal regulations, OMB, and NIST guidance relating to IT Security Training are complied with. It supports the standardization of security content development within the Department. The IT Security Training Program provides IT Security Awareness, role-based IT security training for personnel with significant security responsibilities, and provides role-based training to improve reporting for FISMA and related metrics.

#### **FY 2007 Accomplishments**

- 88% of FISMA systems received valid Authority to Operate (ATO) letters
- Closed 363 of 438 “Core Financial Systems” audit findings
- Implemented Department-wide Security Ops Capability; since then DHS has responded to 731 potential security events

#### **FY 2008 Planned Accomplishments**

- Maintain full FISMA compliance for each of 700+ systems in the Department’s inventory
- Complete the implementation of the plan to retire all financial systems’ security weaknesses
- Develop security templates and technical security compliance checklists to support the review and compliance checks for SDLC/Centers of Excellence (COE)/technical reference model (TRM) insertions.
- Update Security Policy and Architecture Guidance to address new operational requirements, advancing technology, and identify, report, and remediate known and new cyber threats, as well as, adapting new information security best practices
- Complete a rigorous review and analysis of the standards, products and services contained in the Technical Reference Model to ensure they comply with the Security Architecture

#### **FY 2009 Projected Accomplishments**

- Maintain full FISMA compliance for each of 700+ systems in the Department’s inventory
- Implement a standardized operational review methodology to ensure compliance with network and technical guidance
- Standardize the Department’s security operations activities
- Monitor and report DHS Components’ progress completing system accreditations and resolving weaknesses identified in the Components’ respective POA&Ms
- Complete a rigorous review of the Enterprise Infrastructure and Architecture to ensure compliance with the Security Architecture Guidance

#### **Infrastructure Operations and Applications Operations & Maintenance**

**Infrastructure Operations (IO):** IO program capabilities provide network, e-mail, internet, intranet, telecommunications infrastructure and end-user services including desktop computing, telecommunications, cell phones, Blackberry devices, printers, and peripheral equipment to users in the DHS Headquarters Offices.

IO responds to changes that include increases in Headquarters personnel, moves and consolidations of office space, renovations of facilities, and the expansion of mission applications. IO also responds to

infrastructure changes during periods of emergency, infrastructure disruption, and disasters by performing IT Contingency, IT Disaster, and business continuity planning as well as IT/communications support to those situations requiring a FEMA response. In addition, IO also provides two alternate sites with necessary IT/communications capabilities to support emergency operations during periods of activation by the President or Secretary for Continuity of Operations.

DHS' mission requires high performance standards for multiple data, voice and video network environments (sensitive but unclassified (SBU), Secret, and TS/SCI) with higher than normal levels of redundancy and continuous support. The IT infrastructure is comparable to the Department of Defense (DOD) in its scope, complexity and need for uninterrupted service. In the event of a national security emergency, the infrastructure must have the resiliency and capacity to provide uninterrupted operations to ensure that DHS maintains the ability to coordinate actions to protect the homeland.

This program also provides IT Continuity Management which includes: performing periodic risk, interdependency and business impact assessments; developing recovery strategies, writing business resumption, incident response and escalation, and network/system specific contingency plans; and conducting test, training, and exercise of plans and capabilities to ensure the continuation of services and capabilities. Continuity of Operations (COOP) responsibilities include the IT/communications services and support of the components, preparation of exercises with more than 60 departments and agencies participating in efforts to test and improve their ability to perform essential government functions during threats and emergencies, and developing supporting capabilities and plans within the Office of the Chief Information Officer.

**Applications Operations & Maintenance (AO&M):** Plans, builds, maintains, and ensures continuity of support for the web hosting environment so that it remains immediately available. AO&M supports the ongoing maintenance and operations of these critical applications, and optimizes the cost effective delivery of these services. These funds include the operation and maintenance of systems and applications that support the DHS Headquarters and other DHS Components, including DHS.gov, Ready/List.gov, DHSOnline, and DHSInteractive.

Infrastructure efforts support the design and implementation of reliable IT infrastructure to maintain mission critical functions.

#### **FY 2007 Accomplishments**

- Consolidate IT support for unclassified, Secret, and Top Secret LANs into a single vendor to improve service delivery and cost efficiency
- Leverage delivery of infrastructure operations and management (O&M) to capture additional cost reductions and efficiencies as the population continues to grow

#### **FY 2008 Planned Accomplishments**

- Begin to replace all IT hardware assets per National Capital Area (NCA)-developed replacement periods (e.g., wireless devices – 18 to 24 months, personal equipment – 36 months, and server/network equipment – 48 to 60 months)

#### **FY 2009 Projected Accomplishments**

- Enhance the web-hosting environment to optimize delivery of critical services by utilizing distributed content/application delivery capabilities
- Fully deploy an Internet Protocol Version 6.0 (IPv6)-compliant network infrastructure

- Maintain and exercise CIO COOP Implementation Plan; maintain and test operational plans; and focus on enterprise-wide continuous process improvement of IT Disaster Recovery

**Infrastructure Transformation Program (ITP) Operations:** The Infrastructure Transformation Program (ITP) was established in FY 2004 as part of ongoing efforts to optimize DHS' IT infrastructure and increase the Department's effectiveness and efficiency. The ITP Operations funding offsets operations and maintenance expenses related to previously funded ITP investments.

ITP is led by the Office of Chief Information Officer and each project ("Domain") is led by a Component acting as a Steward. The ITP Operations funding will offset increased operations and maintenance charges incurred while transforming and migrating seven wide area networks, consolidating component legacy data centers, and centralizing email, video, and help desk services.

ITP Operations funding pays for the cost of data center capabilities not recovered from Component chargebacks to off-set the gap in funding during the period of initial operating capability (IOC) for data center services. Any funds remaining at the end of the fiscal year not expended on O&M will be used to support data center migration efforts.

#### **FY 2007 Accomplishments**

- Supported the migration of CBP ACE SR/SAT, and CBP Disaster Recovery systems into Stennis Data Center

#### **FY 2008 Planned Accomplishments:**

- Ensure capability readiness and migrate legacy data center systems to the two (2) DHS Data Centers

#### **FY 2009 Projected Accomplishments:**

- Ensure capability readiness and migrate legacy data center systems to the DHS Data Centers

#### **Applied Technology & Research Services**

Under this program, DHS utilizes two IT research and advisory services contracts to support IT management decisions, standards, and practices. Through this program, CIO will also coordinate with and support the efforts of the DHS Science and Technology component to develop and implement information technology test facilities.

#### **FY 2007 Accomplishments**

- Increased the usage of research services by DHS personnel by 50% of the prior year usage
- Developed and initiated a plan to establish test facilities at the DHS enterprise data center

#### **FY 2008 Planned Accomplishments**

- Implement testing of information technologies at the DHS enterprise data center
- Implement the usage of these service contracts by DHS personnel by 50% of the prior year usage

#### **FY 2009 Projected Accomplishments**

- Increase the usage of these service contracts by DHS personnel by 50% of the prior year usage
- Continue testing of information technologies at the DHS enterprise data center

**PPA: Information Technology Services**

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b> |
|------------------------------|---------------------|------------|---------------|
| <b>2007 Actual</b>           | ...                 | ...        | <b>72,067</b> |
| <b>2008 Enacted</b>          | ...                 | ...        | <b>56,200</b> |
| 2009 Adjustments-to-Base     | ...                 | ...        | (16,255)      |
| <b>2009 Current Services</b> | ...                 | ...        | <b>39,945</b> |
| 2009 Program Change          | ...                 | ...        | <b>2,500</b>  |
| <b>2009 Request</b>          | ...                 | ...        | <b>42,445</b> |
| Total Change 2008-2009       | ...                 | ...        | (13,755)      |

The Office of the Chief Information Officer requests \$42.445 million for this activity, a decrease of \$13.755 million from the enacted FY 2008 amount. The net decrease of \$13.755 is composed of a downward adjustment to base of \$16.255 million; due in large part to the transfer of the Human Resources IT program to the office of the Chief Human Capital and program increases of \$0.500 million for Enterprise Architecture and \$2.000 million for Enterprise Data Management.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Information Technology Services supports geospatial technologies, the development, implementation and maintenance of a comprehensive and integrated Enterprise Architecture (EA), and information sharing.

**The Geospatial Management Office (GMO)**

The Geospatial Management Office (GMO) provides oversight and guidance to DHS component organizations for geospatial policy and technology matters. The GMO executes a comprehensive program that enables the effective, collaborative, and coordinated application of geospatial capabilities. DHS requires coordinated, and in some cases consolidated, enterprise geospatial solutions for emergency management, law enforcement, and other homeland security mission objectives, to assure efficient and shared use of geospatial assets. The GMO is also responsible for the coordination of the OMB Geospatial Line of Business initiative within the Department.

**FY 2007 Accomplishments**

- Continued the enterprise implementation of the Department-wide Smart Buy enterprise license agreement for access to Geographic Information System (GIS) software/training, saving DHS approximately \$8.26M, or 66%, over General Services Administration (GSA) list pricing. This exceeded the plan target of 55% savings over GSA Schedule.
- Coordinated the migration of the National Operations Center Common Operating Picture (NOC COP) from a proprietary solution to a solution based on the NPPD integrated Common Asset Viewer (iCAV) infrastructure, realizing a recurring cost savings of \$3M per yr.

**FY 2008 Planned Accomplishments**

- Migrate 85% of DHS enterprise to Environmental Systems Research Institute (ESRI) SmartBuy investment, realizing cost savings for the Department of over \$4M
- Stand up initial geospatial data warehouse capability at the DHS Enterprise Architecture and DHS' National Center for Critical Information Processing and Storage (NCCIPS) Data Center at Stennis, Mississippi; supporting mission critical programs including the Infrastructure Information Collection Program, the National Biological Integration System, the National Operations Center Common Operating Picture, and the FEMA National Response Coordinating Council, avoiding costs through sharing of a common geospatial infrastructure

- Deploy standardized and interoperable common operating picture (COP) technology, support NOC, the National Infrastructure Coordination Center (NICC), and the National Response Coordination Center (NRCC), and formalize this architecture as part of the DHS Enterprise Architecture through the technology insertion process
- Continue migration of DHS Common Operating Data (COD) to non-licensed geospatial products saving at least \$2.0M over FY 2007 costs
- Enhance existing geospatial grant guidance and implement quality assurance program

### **FY 2009 Projected Accomplishments**

- Migrate 95% of DHS enterprise to Environmental Systems Research Institute (ESRI) SmartBuy investment, realizing cost savings for the Department of over \$4.25M
- Build upon FY 2008 accomplishments in establishing the DHS geospatial data warehouse capability at the NCCIPS, integrating and supporting geospatial activities of USVISIT, DNDO, and other geospatially-based DHS mission systems, such as SBInet
- Continue quality assurance of geospatial data developed through the DHS grants program and implement mechanisms for the inclusion and sharing of these data through the DHS geospatial data warehouse
- Enhance COP capability to support mission needs. Expand COP access to FEMA, State, Local and Tribal Partners
- Coordination with Preparedness (integrated Critical Asset Viewer (iCAV)) to migrate enterprise common operating data for DHS missions to NCCIPS

### **Enterprise Architecture (EA)**

Enterprise Architecture supports a "blueprint" for systematically and completely defining DHS' baseline environment, target environment, and the transition plan. This program establishes a Department-wide roadmap to improve mission effectiveness and efficiency, eliminate existing stovepipe systems, and increase interoperability and information sharing. It ensures the essential evolution of information systems and the development of a common Information Technology environment.

### **FY 2007 Accomplishments**

- Target Architecture completed or being set through EA reviewed procurements for 91% of the potential DHS Enterprise Architecture, including setting targets for 14 of 22 critical areas designated by the DHS CIO, in all 169 TRM categories had target standards or products set during FY 2007.
- DHS EA Transition strategy was recognized by OMB as an example of Federal Best Practice
- Improved operational data sharing effectiveness within the Department by increasing to eight the number of active users of the National Information Exchange Model, including NPPD, CBP, US-VISIT, S&T (DM) and GMO.
- The Enterprise Architecture COE completed 18 program alignments, including seven level one investments (USCIS Transformation, US-Visit, HSDN, ATLAS, SBInet, Secure Flight, and ACE), 29 technology insertions, and insertions of SOA methodology, Date Reference Model, and TRM Products Analysis
- Demonstrated benefits from the DHS EA process for costs savings, avoidance and/or efficiency increases of \$44M per year

### **FY 2008 Planned Accomplishments**

- Establish Target Architectures for 20 mission critical areas.
- Update DHS EA Transition strategy to include enterprise migration to new targets established.

- Update of Enterprise Information Repository to include the EA Data Reference Model and increase support of IT security, portfolio management, program oversight, and Enterprise Architecture governance
- Develop the Performance Reference Model (PRM) and implement its governance process
- Continue to demonstrate benefits from the DHS EA process for costs savings, avoidance and/or efficiency increases of more than \$40M per year.

### **FY 2009 Projected Accomplishments**

Reduce the number of unique products and services in the TRM by 10%

- Complete, by the end of FY 2009, 25% of the transition to the DHS target architecture
- Conduct four (4) critical design or production readiness reviews of major IT programs
- Complete Service Reference Model (SRM) and associated governance process implementation.
- Continue to demonstrate benefits from the DHS EA process for costs savings, avoidance and/or efficiency increases of more than \$40M per year.

### **Enterprise Application Delivery (EAD)**

EAD is an initiative that leverages the capabilities and resources of three distinct IT operations: Application Delivery (AD); Enterprise Portal (EP); and Solutions Engineering (SE). These services establish a Department-wide roadmap to improve mission effectiveness and efficiency, eliminate existing stovepipe systems, and increase interoperability and information sharing. EAD engineers and oversees implementation of the DHS Enterprise Application Architecture Roadmap for systematically and completely defining DHS' baseline environment, target environment, and the transition plan in accordance with Management Directive (MD) 0007.1.

The Enterprise Portal is the Department's primary gateway for DHS employees, stakeholders, and citizens to share information in compliance with the expectations established in the President's Management Agenda. Through this initiative, DHS will be positioned to offer an innovative, customer-focused, and interoperable web infrastructure enabling secure access to information, services, and applications. The standards-based web environment will be deployed in the DHS common infrastructure environment, leveraging DHS OneNet and the DHS Data Center services, and will be fully integrated with the Department's Single Sign-on (SSO) solution.

### **FY 2007 Accomplishments**

- Established Single Sign On (SSO) project under ICE stewardship to provide DHS users ease of authentication for access to multiple DHS online environments
- Deployed an integrated enterprise toolset similar to the Rice/Chertoff Dashboard that includes program management, capital planning, enterprise architecture, hosting, engineering, and security services

### **FY 2008 Planned Accomplishments**

- Develop and manage the consolidation of web services
- Oversee the consolidation of identified Internets onto the FEMA Interwoven platform
- Oversee the Single Sign-On integration with the DHS Portal Environment
- Transition departmental portals to the next generation in order to improve performance and integrate Single Sign On for user authentication
- Upgrade ECT/IQ software release to incorporate web services to facilitate service integration with other DHS systems

## **FY 2009 Projected Accomplishments**

- Upgrade the ECT hardware/software to improve system performance and deploy new capabilities to HDS users
- Provide system enhancement to the project management tool to provide a centralized view of tracking cost, schedule, performance, risk/issues and provide accurate and timely reporting

## **Program Management Support**

This initiative plans and executes an effective resource allocation program to support the Department's IT investments. Its activities include:

- Establish and maintain an integrated IT Portfolio Management across the Department to directly support sound IT investment management processes. Under this initiative DHS will augment existing IT budget, acquisition and investment review processes and decision forums with a portfolio-based view of IT investments. This effort will include collaborating with the Enterprise Architecture Office and Business managers to establish architectural targets and transition plans for each portfolio, measuring the performance of each portfolio and continuously improving the balance of investments within each portfolio to more effectively and efficiently meet departmental goals and objectives.
- Execute an IT portfolio management governance process, ensuring data and business case analyses are available to the CIO to make critical decisions regarding IT investment trade-offs and prioritization
- Align Budget dollars to eliminate duplication and execute portfolio transitions to the DHS target Enterprise Architecture
- Develop and execute an IT acquisition strategy to achieve the transition of legacy technologies to the DHS target Enterprise Architecture
- Align investment performance objectives with budget program performance objectives, measure compliance, and enforce remediation plans
- Formulate and execute IT policy, including the IT Strategic Plan, System Life Cycle management, Paperwork Reduction Act (PRA) monitoring and implementation, IT workforce development, and Congressional, Government Accountability Office (GAO), and OMB liaison requirements

## **FY 2007 Accomplishments**

### **IT Acquisition Review**

- Implemented MD 0007.1 for DHS IT Acquisitions by establishing a process and a checklist of questions for component submission. Established a review team to analyze acquisition plans, SOWs, and the checklist for each acquisition. Ensured that OCIO Direct Reports were direct participants in the analyses.
  - \$3.2B of Eagle purchase requests was reviewed achieving an improvement of 72% in alignment with the DHS Enterprise Architecture and portfolios.
  - The IT Acquisition review process re-directed \$500M of Department IT acquisitions into the Eagle contracting vehicles.

### **IT Budget Review**

- Improved overall OMB score of DHS investments from 29 to 34 (15 %) for the 53 investments given pass-back scores
- Increased the percent of investments with passing scores of 31 or more from 30 % to 80%, a 50 % improvement.
- Established IT Budget Review framework and process. Implemented MD 0007.1 for the DHS IT Budget by providing IT instructions for the FY 2009-13 DHS Resource Allocation Plan (RAP)

Integrated Planning Guidance, implementing modifications to the Investment Management System (IMS) to collect portfolio and system cost information, and providing IT Budget instructions to components.

- Conducted analysis of portfolio views of the budget by investment, by component, and for portfolios as a whole. Recommendations were provided to the CIO for use in the Resource Allocation Determination (RAD) process.
- Published all IT and Non-IT Exhibit 300s were published on our Public Facing Website on time (2<sup>nd</sup> Quarter)

### **IT Portfolio Management**

- Successfully transitioned the Disaster Management Program and its technical components from S&T to FEMA, saving \$2.5M or 20% of the budget during the transition phase with no loss in service
- Executed portfolio reviews across more than 300 IT Investments. This resulted in a CBP and ICE joint submission of a FY 2009 Exhibit 300 Business Case for TECS Modernization and alignment of other investments to portfolio targets. Established policy and guidance for IT Portfolio Management at DHS
- Achieved implementation of the e-Authentication and app-Authentication components of the Single Sign-On portfolio
- Developed successful business cases for the Financial Services, Asset Management, Procurement, Portal, and Geospatial portfolios
- Worked with FEMA and CPO to develop the business case and consolidation strategy for the Grants portfolio and achieved a designated target architecture
- Worked with Disaster Management and HSIN PMO to develop a transition plan for the Disaster Management portfolio.
- Assist in establishing target architectures for components of the Human Resources and Infrastructure portfolios for alignment with the e-Gov Human Resources Line of Business and standard network, data center, and e-mail services
- Facilitated deployment of the Secretary's Priority Tracker (SPT) through coordination and management across DHS and component achieving compliance with security and VIP requirements
- Established policy and guidance for IT portfolio management across DHS
- Facilitated the establishment of 11 portfolios with 12 target architectures across DHS by providing business cases, metrics, and insertion packages for CIO approval. The portfolios are: 1) Financial Services, 2) Infrastructure, 3) Document Management, 4) Asset Management, 5) Procurement, 6) Training, 7) Screening/Watchlist/Credentialing, 8) Human Resources, 9) Telecom/Radio/Systems/Wireless, 10) Geospatial, and 11) Security/Clearance Management. Another 7 portfolios were initiated as well.

### **IT Program Management**

- Issued revised DHS Earned Value Management (EVM) guidance (version 1.1) based on OMB feedback on version 1.0 of DHS EVM Guidance
- Supported achieving a "green" rating for Enterprise Architecture for FY 2007
- Supported efforts to achieve a FISMA Certification and Accreditation rating of 80 percent for FY 2007
- Provided periodic reporting to the CFO that identified breach programs for remediation and improved program performance
- 77% of our FY 2008 Exhibit 300s are removed from the OMB Management Watch List (3<sup>rd</sup> Quarter)

## **FY 2008 Planned Accomplishments**

### **IT Acquisition Review**

- Through the ITAR process develop, measure, and improve target architecture compliance by 20 percent and portfolio alignment according to the DHS Enterprise Architecture.
- Reduce pre-approval conditions by 7 percent
- Reduce overall post-approval conditions by 30 percent.
- Enforce compliance for reviews of acquisitions under \$2.5 million by component CIOs.
- Refine the IT Acquisition Review process based on lessons learned from the first year (FY 2007) to continuously improve alignment with DHS Portfolio, Enterprise Architecture, Investment and priority programs. This will be accomplished by designing and developing an ITAR web based system. .
- Ensure contracts contain appropriate Earned Value Management (EVM) clauses and are performance based
- Transition from program to project level tracking in the budget process and enforce through the ITAR process

### **IT Budget Review**

- Achieve a 10% improvement in the compliance of IT programs with cost/schedule/performance requirements
- Solicit, review, and score DHS FY 2010 Exhibits 300 and 53 while meeting all OMB and Congressional submission deadlines
- Perform analyses and provide Resources Allocation Plan (RAP) recommendations to the Investment Review Board (IRB) with the goal of eliminating all duplicate investments
- Support the IT Budget Review process by refining the annual Investment Planning Guidance (IPG), communication of target architectures, refining data requirements for reviews, refining the review process, and elimination of systemic issues through implementation of lessons learned
- Improve Capitol Planning and Investment Control (CPIC) using the OMB Exhibit 300 and Exhibit 53 processes to achieve more effective investment performance and compliance with DHS objectives
- Integrate Resource Allocation Plan (RAP) more closely with CFO to ensure IT investments are funded in accordance with OMB directives and legislative mandates. Provide comprehensive guidance to Components

### **IT Portfolio Management**

- Establish targets and transition plans for 100 percent of DHS priority Portfolios
- Accomplish 100 percent of IRB, IT Acquisition and Budget reviews for all priority portfolios
- Develop IT portfolio requirements for DHS and embed them in the overarching program management acquisition
- Manage the establishment of 5 more portfolios for 1) DHS Portal, 2) Grants, 3) Alerts and Warnings, 4) Single Sign-On (Internal and External), and 5) Infrastructure (MS Vista OS) during FY 2008 and continue the initiation process for other components of the Telecommunications portfolio.
- Meet transition milestones for all active components in the portfolio transition process

### **IT Program Management**

- Reduce by 50 percent the number of IT investments exceeding the 10% deviation limit for cost, schedule, and performance requirements
- Reduce number of investments on the Watch List by 50%
- Implement a pilot of 5 DHS investments to improve performance and compliance with OMB guidelines for Level 1, 2, and 3 investments to remove investments from the OMB "Watch List".

- Develop and test an initial implementation of the Next Generation Periodic Reporting and Probability of Project Success capability
- Use portfolio management methodology to allocate funding to enterprise architecture targets.
- Develop requirements in collaboration with OCPO, OCFO, and PLCY for the department's new program management solution and execute an acquisition to acquire the target PM platform
- Incorporate IT acquisition data into the CIO IT Budget and Investment Performance Reporting tools for greater visibility into portfolio performance and alignment to the DHS Enterprise Architecture
- Implement an interface between the IT Acquisition automated tool (PRISM) and the Investment Management System (IMS) to ensure that current IT Acquisition information is used in the FY10 IT Budget review process

## **FY 2009 Projected Accomplishments**

### **IT Acquisition Review**

- Continuously upgrade the IT Acquisition Review process based on lessons learned from prior years to improve alignment with DHS Portfolio, Enterprise Architecture, Investment and priority programs
  - Report accomplishments against performance baselines
- Reduce pre-approval conditions by 10 percent
- Reduce overall post-approval conditions by another 30 percent
- Through the ITAR process develop, measure, and improve alignment with the DHS Enterprise Architecture and with appropriate mapping to DHS portfolios by 20 percent
- Continue to enforce compliance for reviews of acquisitions under \$2.5 million by component CIOs

### **IT Budget Review**

- Achieve a 10% improvement in the compliance of IT programs with cost/schedule/performance requirements
- Solicit, review, and score DHS FY11 Exhibits 300 and 53 while meeting all OMB and Congressional submission deadlines

### **IT Portfolio Management**

- Align 100% of IT investments within priority portfolios to targets
- Achieve a 10 percent reduction of investment levels in legacy systems through their retirement.
- Accomplish 100% of IRB, IT Acquisition and Budget reviews for all priority portfolios
- Continue to develop IT portfolio requirements for DHS and embed them in the overarching program management

### **IT Program Management**

- Reduce by 50 percent the number of IT investments exceeding the 10% deviation limit for cost, schedule, and performance requirements
- Reduce number of investments on the Watch List by 50%
- Acquire and pilot the program management and periodic reporting solution for DHS
- Link all source data collection systems to the program management and periodic reporting system

### **Human Resources Information Technology (HR IT)**

\$17.1 million is being transferred from the CIO's account for HRIT, to the Office of the Chief Human Capital Officer (OCHCO) in FY 2009.

## **E-Gov Initiatives**

DHS is performing a comprehensive analysis of all of its information systems in relation to E-Gov initiatives and LoBs. A transition strategy is being developed, in compliance with the Enterprise Architecture, for those services that can be delivered as a shared service by E-Gov initiatives. Specific E-Gov integration opportunities that have been identified include the integration of GSA's eAuthentication capability with the DHS core identity management solution, coordination with the Consolidated Health Informatics including Enterprise Architecture (EA) alignment review, reporting and coordination with USA Services by conducting an inventory of DHS call centers and analyzing their procedures.

### **FY 2007 Accomplishments**

- Achieved an overall "yellow" on the E-Gov PMA Scorecard for Progress and Status
- Enterprise Architecture at "green" on the E-Gov PMA Scorecard for the year
- Removed 77% of the 87 Investments OMB placed on the FY 2008 Watch List
- Achieved 100 percent compliance with Paperwork Reduction Act (PRA) requirements.
- Completed 100% of Q1 eGov milestones (13)
- Completed 88% of Q2 eGov milestones (14 out of 16) – 2 missed milestones were due to WCF reprogramming
- Completed 93% of Q3 eGov milestones (13 out of 14) – 1 missed milestone due to WCF reprogramming
- Completed 100% of Q4 eGov milestones (12) – tentative awaiting final scores from OMB
- Executed 13 MOUs and IAAs for eGov initiatives
- Renewed 133 Information Collection Requests
- Achieved green in progress (Q1 and Q4)
- Deployed an E-Gov website off of the CIO's website
- Implemented the following E-Gov applications across DHS: 1) eQPF, 2) Grants.gov, 3) e-Rulemaking, 4) e-Authentication, 5) e-Payroll, 6) WebTA, and 7) Federal Assets Sales (except National Security Reason)
- Drafted Information Quality Act Guidelines
- Implemented e-Gov communications plan and process

### **FY 2008 Planned Accomplishments**

- Provide Program Management Support and Guidance for Information Quality and ensure that the Department remains compliant
- Provide Program Management Support for Government Paperwork Elimination Act (GPEA) and ensure that the Department remains compliant
- Implement the following e-gov applications: 1) E-Travel, 2) E-Training, 3) Empower, 4) E-Recruitment, and 5) FMLOB (FY 2008 migrations only)
- Implement a Privacy Requirements Act (PRA) and Information Quality Guidance and website.
- Move to Yellow/Green for entire E-Gov scorecard

### **FY 2009 Projected Accomplishments**

- Move to and Maintain "green" on the PMA Scorecard for Status and Progress
- Provide Program Management Support for PRA compliance throughout the department and ensure the department maintains "zero violations"
- Maintain and improve E-Gov applications.

### **Cyber Identity and Credentialing (Smartcard)**

This program is described in Homeland Security Presidential Directive (HSPD-12) which requires that all Federal employees and internal contractors be issued “secure and reliable forms of identification.” This is a high-security token implemented as a Federal Information Processing Standards-201 (FIPS-201) standard Smartcard. The Smartcard must be used to provide access to “Federally controlled facilities and logical access to federally controlled information systems.” Smartcard technology provides high-security cyber-identity management as the basis for logical access to Departmental Information Technology systems and supports enablement of Single Sign On (SSO) solutions. Combined, Smartcard and SSO technologies offer both high-security and efficient user access to the Department’s information systems.

#### **FY 2007 Accomplishments**

- Issued initial HSPD-12 compliant Smart Card in advance of OMB October 2006 deadline
- Developed HSPD-12 implementation plan for DHS Headquarters and all components.
- Based on prototype, developed requirements for BPA to provide HSPD-12 enterprise solutions; acquisitions to be completed in December 2007.

#### **FY 2008 Planned Accomplishments**

- Complete award of contracts required to support enterprise implementation of HSPD-12
- Establish central Identity Management System (IDMS), Card Management System and Certificate Authority (CA) to support DHS enterprise needs for the Smartcard
- Issue Smartcards to DHS employees in the National Capitol Region (approximately 5,500)
- Implement use of SmartCards for physical access.
- Develop standards for two and three factor authentication for logical access based on SmartCard technology.
- Set DHS enterprise technology architecture for Single Sign On (SSO).

#### **FY 2009 Projected Accomplishments**

- Continue issuance of Smartcards for all new employees and contractors, completing issuance to at least 80% of all DHS staff.
- Deploy the DHS enterprise solution for SSO for six (6) major applications.
- Implement the use of SmartCards to enable two and three-factor logical access

### **Enterprise Data Management**

The Enterprise Data Management program provides the Enterprise Architecture a Data Reference Model for the understanding of data assets within and across the Department. The Enterprise Data Management Office (EDMO) establishes the guidance and oversight to DHS for data policy, data management, and data stewardship. This program supports the development of the Department-wide roadmap for data to improve mission effectiveness and efficiency, eliminating existing stovepipe data systems, and increasing interoperability and information sharing. The Data Reference Model (DRM) is a key governance tool to assure that mission needs drive technology investments. Additionally, through the use of the DRM, the EDMO is expected to recommend realignment of IT Investments or Acquisitions through the identification of targets at an estimated reduction of \$10 million in annual IT costs by reducing the systems under maintenance, or driving common requirements for the development of central services.

The EDMO’s program plans integrate information sharing requirements and enable access across all levels of government, first responders, and stakeholders in the private sector. The EDMO program is a new proposal for FY 2009 and only has planned accomplishments for this fiscal year.

## **FY 2009 Projected Accomplishments**

- Develop the initial data asset inventory baseline, using segment architectures, to allow for use of this baseline in the IT Investment Review process. This allows data to drive the alignment of the systems that support the mission within the Enterprise Architecture. Milestones and deliverables include:
  - Demonstrate cost savings of \$4.5M
  - Continued development of the DRM portion of the Enterprise Architecture. The deliverable is the Data Reference Model 3.0 (to be completed by September 2009), which includes:
    - completing the as-is data inventory base line with a minimum of 90% of all DHS enterprise data assets described in the EA,
    - developing the to-be target data architecture including the development of 2 to 3 mission based Logical Data Models identified by the EA Transition Strategy, and
    - identifying and adopting international or industry data standards into EA, with an expected volume of 20 data standard insertions as part of the target data architecture
    - support an anticipated 800 IT investment acquisition reviews as part of the Enterprise Architecture oversight processThe DRM 3.0 will be used to evaluate the expected 2,000 IT investment reviews as part of the Enterprise Architecture review process.
- Continued development and support of the National Information Exchange Model (NIEM) as a standard for information exchange for the Department, including specific DHS information exchanges such as (but not limited to):
  - Counter Terrorism Information Sharing Standards (CTISS) in support of the DHS Intelligence and Analysis (I&A)
  - Cargo Conveyance and International Trade in support of DHS Customs and Border Protection
  - Person Screening in support of the DHS Screening Coordination Office (SCO)
  - Infrastructure Protection in support of the DHS National Preparedness and Program Directorate (NPPD)
  - Biometric Information in support of the DHS US-VISIT Program

## **Communications Security (COMSEC)**

The Homeland Security Central Office of Record (COR) was established to meet the national security policies associated with providing accounting, safeguarding and management control over classified communications security keying material and equipment.

The DHS COR provides COMSEC accounting services in accordance with established National Security Agency (NSA) policies and directives. This process includes processing incoming and out going transactions, destruction reports, and maintaining a consolidated database detailing the location and quantity of COMSEC material and key, updates DHS COMSEC accounting policies and COMSEC training.

The COMSEC program provides keying material and technical support to the Transportation Security Agency (TSA) Trace system, the DHS NOC, and Intelligence and Analysis (I&A) to protect classified communications. The COMSEC program provides a variety of COMSEC equipment and technical support to secure all the classified communications within the Department to protect the dissemination of intelligence information.

**FY 2007 Accomplishments**

- Upgraded, configured and shipped 65 KG-175 TACLANES to all State Emergency Operation Centers (EOCs) and Fusion centers to meet new NSA High Assurance Internet Protocol Encryptor (HAIPE) requirements.
- Established contract to field 10 Electronic Key Management Systems (EKMS) to the components to provide an electronic key management capability that will allow a more unified IT infrastructure through the ability to order and move key quickly from NSA to users in the field.
- Implemented EKMS (Electronic Key Management System) for DHS HQ to manage, generate, and distribute cryptographic keying material and equipment to over 70 State and local civilian and military National Guard units nationwide.
- Procured 100 Simple Key Loaders and 300 Data Transfer Devices to improve key management at the 100 Component COMSEC accounts.
- Introduce new Simple Key Loaders as a replacement for the Data Transfer Device and provide user training

**FY 2008 Planned Accomplishments**

- Procure new COMSEC equipment to replace obsolete COMSEC equipment six months before the decertification dates
- Provide updated COMSEC security policies and procedures annually for use by the Components and perform 80 Audits of COMSEC accounts per year

**FY 2009 Projected Accomplishments**

- Transition all current voice communications using secure telephone unit (STU) IIIs and secure telecommunication equipment (STEs) to the new and enhanced cryptographic systems; this entails over 10,000 secure phones
- Procure new COMSEC equipment to replace obsolete COMSEC equipment six months before the decertification dates

## PPA: Security Activities

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>  |
|------------------------------|---------------------|------------|----------------|
| <b>2007 Actual</b>           | ...                 | ...        | <b>69,684</b>  |
| <b>2008 Enacted</b>          | ...                 | ...        | <b>124,900</b> |
| 2009 Adjustments-to-Base     | ...                 | ...        | (47,577)       |
| <b>2009 Current Services</b> | ...                 | ...        | <b>77,323</b>  |
| 2009 Program Change          | ...                 | ...        | <b>(7,000)</b> |
| <b>2009 Request</b>          | ...                 | ...        | <b>70,323</b>  |
| Total Change 2008-2009       | ...                 | ...        | (54,577)       |

The Office of the Chief Information Officer requests \$70.323 million for this activity, a decrease of \$54.577 million from enacted FY 2008 amount. The net decrease in funding is due mainly to the termination of a one time cost for NCCIPS buildout (\$35.500), a reduction in the data center development program (\$12.987), and a reduction in base funding associated with the Watchlist Integration program (\$7.000 million).

### **CURRENT SERVICES PROGRAM DESCRIPTION**

Security Activities provides for the integration and protection of sensitive DHS information and supports the integration of the terrorist Watch List, which establishes operational system interfaces for DHS organizations that receive data from the Terrorist Screening Center (TSC). This activity supports Homeland Security Presidential Directives (HSPDs) 6 and 11, and conforms to Executive Order 13356 (Terrorism Information Sharing Environment). It supports the Infrastructure Transformation Program (ITP), which will transform DHS' IT infrastructure from a decentralized delivery model to centralized governance with a distributed execution IT infrastructure services model for all DHS Components.

#### **Watch List Technical Integration**

The Watch List program supports the sharing of information included within the Watch List database and accomplishes the technical integration required to interoperably share these data in a secure manner with key DHS and other entities. The Watch List Technical Integration program will accomplish its intended goals by the end of FY 2008.

#### **Information Security and Infrastructure**

The Information Security & Infrastructure (ISI) appropriation supports investment and investment-related operations and maintenance (O&M) for the capabilities developed in the Enterprise Services Division (ESD) of the IT Services Office (ITSO). Specifically, the ISI appropriation funds development of capabilities in Network Services, ADEX/Email Services, and supports the management and oversight of the ITP.

#### **Network Services**

The Steward for the Network Services project is Customs and Border Protection (CBP). Network Services will provide a reliable, resilient and secure DHS-wide data network that streamlines appropriate sharing and discovery of information within the Department and associated organizations. The core of the unified environment will be the DHS Wide Area Network (WAN), called "OneNet." Major services provided by Network Services include:

- DHS OneNet - Wide Area Network Services
- Network and Security Operations Centers

- Traffic Modeling and Data Analysis
- IP Address Administration
- Network Management
- Access Controls

OneNet will be comprised of two independent Multi-Protocol Label Switching (MPLS) networks, each provided by a separate vendor. Through physical line redundancy and first-tier vendor carrier delivery, the WAN systematically provides continuity and network availability. DHS sites will be connected to the WAN via two physical connections, each terminating at a different vendor's MPLS network. Key features of the MPLS-based network employed by OneNet include increased flexibility, scalability and security, as well as a lower total cost of ownership.

The Network Operations Centers/Security Operations Centers (NOC/SOC) will centrally oversee DHS' infrastructure systems and network components. Incident response and detection is coordinated and escalated by the NOC/SOC within the network security and computing services groups depending on the nature of the breach or failure. This aids in availability management and capacity management by providing respective service groups with collected monitoring data.

#### **ADEX/Email Services**

The Steward for ADEX/Email Services is the US Coast Guard (USCG). Email and active directory services will provide more effective communication between and within DHS. ADEX/Email Services will provide flexibility to accommodate dynamic requirements for quicker and easier communications. ADEX/Email Services will allow personnel to gain access to critical business communications and are designed to deliver greater security, availability, and reliability.

Major services provided by the ADEX/Email Services program include:

- Consolidated DHS-wide Global Address List (GAL)
- Standard email naming convention
- Delivery and management of a DHS-wide active directory
- Delivery of a DHS-wide email platform

#### **FY 2007 Accomplishments:**

- Converted 58% of the Department's networks to DHS standards technology and fully migrated 53% to DHS OneNet; including the full transition of 317 sites for ICE, 129 sites for CIS, and 1,330 sites for CBP
- Completed Video Operations Center requirements analysis and design to provide enterprise-level video services to DHS
- Established a primary NOC and SOC to Full Operating Capability (FOC)
- Achieved all goals for consolidation of email operations

#### **FY 2008 Planned Accomplishments:**

- All remaining Components are planned to move to OneNet with centrally managed Network Services with enterprise-wide NOC/SOC services
- Establish a secondary NOC/SOC
- Complete Component migrations to MS Exchange

#### **FY 2009 Projected Accomplishments:**

- Maintain existing NOC/SOC capability
- Maintain Internet and Extranet Gateways

- Update and maintain Infrastructure Information Repository (IIR)
- Support transition to IPv6

### **Data Center**

Two (2) enterprise-wide data centers will consolidate the Department's legacy data center environments. Data Center Services will provide management and control of data center hardware, operating systems software, and environmental systems. To promote operational availability, DHS will establish a data center environment that is redundant and secure. The DHS Data Center capabilities will provide the personnel and tools to manage service delivery and support activities.

Major services provided by Data Center Services include:

- Capacity management
- Availability management
- System management and administration
- Hardware/software maintenance
- Facility monitoring, management, and security
- Disaster recovery management and testing

The Data Center Development appropriation provides funding to consolidate and assist migrating data center environments to two enterprise-wide DHS Data Centers. The program will focus on continuing to build capabilities at the first DHS Data Center (Stennis) and at the second DHS Data Center. This funding will provide support services for migration to the DHS Data Centers.

### **FY 2007 Accomplishments**

- Completed construction of Stennis Phase II space comprising approximately 26,000 square feet of additional raised floor space, including an area designed to physical security standards required for classified processing.
- Achieved migration of CBP ACE SR/SAT, and CBP Disaster Recovery systems into Stennis Data Center Phase I space occupying approximately 24,000 square feet
- Installed and configured the Stennis Internet/Extranet Gateway.
- Awarded contract for Second DHS Data Center capability

### **FY 2008 Planned Accomplishments**

- Establish disaster recovery capability between the two (2) DHS Data Centers
- Expand capabilities/services at the Stennis data center
- The Stennis Data Center operations contract will be re-competed
- Migrate Component data centers to the two (2) DHS Data Centers

### **FY 2009 Projected Accomplishments**

- Continue migrating component data centers to the two (2) DHS Data Centers

## PPA: Wireless Program

|                              | Perm<br>Pos | FTE | Amount          |
|------------------------------|-------------|-----|-----------------|
| <b>2007 Actual</b>           | ...         | ... | <b>\$56,258</b> |
| <b>2008 Enacted</b>          | ...         | ... | <b>\$0</b>      |
| 2009 Adjustments-to-Base     | ...         | ... | \$0             |
| <b>2009 Current Services</b> | ...         | ... | <b>\$0</b>      |
| 2009 Program Change          | ...         | ... | \$0             |
| <b>2009 Request</b>          | ...         | ... | <b>\$0</b>      |
| Total Change 2008-2009       | ...         | ... | \$0             |

The Office of the Chief Information Officer requests \$0 for this activity. This section is provided to show the accomplishments attained through the execution of current FY 2007 funding. The program was transferred to the Office of Emergency Communications within the National Protection and Programs Directorate (NPPD) in FY 2007.

### FY 2007 Accomplishments

- Processed 3,795 frequency assignment records in support of DHS operations including coordination of 410 assignment proposals and spectrum support for CBP Project-25 upgrade and modernization efforts in Arizona
- Achieved NTIA agreement to sponsor and conduct centralized joint government/industry interference testing for Advanced Wireless Services (AWS) spectrum relocation. These tests verified the risk of interference to ICE technical surveillance operations and established an objective, authoritative basis for DHS to impose limits on vendor testing
- Acquired and deployed upgraded technical investigative equipment to support ICE and USSS (e.g., body wires, transmitters, and receivers) and completed first article acceptance testing, supporting Department-wide procurement.

## PPA: Homeland Secure Data Network

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b> |
|------------------------------|---------------------|------------|---------------|
| <b>2007 Actual</b>           | ...                 | ...        | <b>32,681</b> |
| <b>2008 Enacted</b>          | ...                 | ...        | <b>33,100</b> |
| 2009 Adjustments-to-Base     | ...                 | ...        | 573           |
| <b>2009 Current Services</b> | ...                 | ...        | <b>33,673</b> |
| 2009 Program Change          | ...                 | ...        | <b>14,000</b> |
| <b>2009 Request</b>          | ...                 | ...        | <b>47,673</b> |
| Total Change 2008-2009       | ...                 | ...        | 14,573        |

The Office of the Chief Information Officer requests \$47.673 million for this activity, an increase of \$14.573 million over the enacted FY 2008 amount. The increase in funding is due to a \$0.573 million increase for non pay inflation and a program increase of \$14.000 million for system-wide core infrastructure and site-specific equipment and software refreshments.

### **CURRENT SERVICES PROGRAM DESCRIPTION**

Homeland Secure Data Network (HSDN) is the single program within DHS that enables agencies to collaborate and communicate effectively at a SECRET-classified level among Federal and State government and supporting entities. With HSDN capabilities, DHS has the ability to collect, disseminate and exchange both tactical and strategic intelligence information throughout DHS and DHS partners.

- HSDN has established 95 sites composed of some 1,830 seats
- HSDN has 2,898 established end user accounts who currently logon and exchange information across HSDN in performing their daily mission requirements
- HSDN currently operates its system-wide core capabilities and infrastructure consisting of its Network Operating Center (NOC), Secure Operating Center (SOC), four-tiered helpdesk, first data center, and system-wide telecommunications backbone on 24-hour operations in support of the mission requirements of its established end users

#### **FY 2007 Accomplishments**

- Implemented the capability to bridge both HSIN-S and HSDN networks together for IP secure video teleconferencing purposes
- Finalized the Homeland Security Data Center Services Migration Strategy and migrated the disaster recovery HSDN data center to the Stennis Data Center
- Developed and deployed an HSDN Secure Video Teleconferencing (SVTC) capability
- Established the Fair Lakes Homeland Secure Data Network (HSDN) as the first Trust Zone customer

#### **FY 2008 Planned Accomplishments**

- Establish and maintain periodic HSDN program self-assessment and evaluation through the DHS established Operational Analysis periodic review and reporting process, for identifying areas for improvements in costs and operational efficiencies and effectiveness
- Establish support to the mission requirements of DHS component organizations and its homeland security partners staying abreast of and identifying applicable advancing information and applied technologies capable of improving data gathering, fusion, analysis, intelligence gathering and dissemination at a SECRET-classified level.

**FY 2009 Projected Accomplishments**

- Complete critical refreshment of one third of the established system-wide core infrastructure and site-specific aging HSDN equipment
- Complete annual Operational Analysis periodic review and reporting process, for identifying areas for improvements in costs and operational efficiencies and effectiveness

**IV. Program Justification of Changes**

**Department of Homeland Security  
 Departmental Management and Operations  
 Office of the Chief Information Officer  
 Justification of Program Changes  
 (Dollars in Thousands)**

**Program Increase 1:                    Information Security Program**

Strategic Goal(s) & Objective(s): Goal 5- Strengthen and Unify DHS Operations and Management  
Objective 5.1 Strengthen and Unify DHS Operations and  
Management

PPA: Salaries and Expenses

Program Increase:     Positions   0      FTE   0      Dollars \$3,100

|                        | FY 2007 Actual |     |                 | FY 2008 Enacted |     |                 | FY 2009 Request |     |                 |
|------------------------|----------------|-----|-----------------|-----------------|-----|-----------------|-----------------|-----|-----------------|
|                        | Pos            | FTE | Dollars (\$000) | Pos             | FTE | Dollars (\$000) | Pos             | FTE | Dollars (\$000) |
| Current Services Level |                |     |                 |                 |     |                 | ...             | ... | \$15,260        |
| Program Increase       |                |     |                 |                 |     |                 | ...             | ... | \$3,100         |
| <b>Total Request</b>   | ...            | ... | <b>\$15,000</b> | ...             | ... | <b>\$15,000</b> | ...             | ... | <b>\$18,360</b> |

**Description and justification for program changes:**

- DHS NOC/SOC: Fully implement the DHS NOC/SOC security architecture to provide continuous monitoring and managed services for components, to ensure operational security compliance for DHS network and managed systems. Develop capabilities to support initial situational awareness based on aggregating operational data gathered by the DHS NOC/SOC and the Computer Security Incident Response Center (CSIRC).
- Improved Financial System Security: This request is for the development of DHS financial system security capabilities in support of the Federal Financial Management Improvement Act of 1996 (FFMIA). FFMIA identifies IT general controls as outlined in OMB Circular A-123 Appendix A. The mandate to become fully compliant with Financial Systems IT General Controls has continued to identify additional program requirements for the Information Security Office and the Chief Information Security Officer (CISO) including the need for increased support to address and validate the FY 2009-FY13 Financial Audit Assurance Statement. The additional funding and support will assist CISO to update Information Security Policy and work with the DHS Office of the Chief Financial Officer (OCFO) to address A-123 Internal Controls for financial system security. The Compliance Office will augment existing tools and staff to support additional control procedures and provide Component support for financial system security audit preparation, execution, response, and remediation.
- In order to achieve these goals, the following funds are needed:
  - \$800K - Financial audit and remediation support efforts. Will ensure compliance with Federal Financial Management Improvement Act of 1996 (FFMIA) and OMB Circular A-123

#### Appendix A

- \$750 K – Transition costs to relocate FISMA compliance tool suite to one of the two DHS Data Centers
- \$400K – Security Policy & Architecture support. Required to support publishing DHS policy updates on a quarterly basis. Current funding limits updates to key security program documents to one per year
- \$250K – Classified Security Architecture. Required to provide policy and architecture guidance to transition HSIN-S to the HSDN environment.
- \$500K – IT Security Lab for evaluating new and existing technologies in support of information sharing. Will allow us to evaluate new technology insertions to significantly reduce the number of information security products in the DHS Technical Reference Model (TRM)
- \$400K - Automated compliance tools Concept of Operations (CONOP) development. Will allow NOC/SOC to remotely monitor system-level technical controls for FISMA compliance, POA&M mitigation and IT penetration testing

#### **Impact on Performance (Relationship of Increase to Strategic Goals)**

Eliminating the DHS Material Weakness for FISMA and Financial System Security as identified in the DHS CFO's FY06 Financial Systems Internal Control Audit supports the DHS Strategic Goal to achieve Organizational Excellence. Improving DHS systems and network configurations, testing and compliance monitoring will reduce operational vulnerabilities in support of DHS. Achieving a high assurance information security program will strengthen DHS Operational Integration by enabling a community of trust among DHS' components and eventually partner agencies with joint mission support.

**Program Increase 2: Homeland Secure Data Network**

Strategic Goal(s) & Objective(s): Goal 5- Strengthen and Unify DHS Operations and Management  
Objective 5.1 Strengthen and Unify DHS Operations and Management

PPA: Homeland Secure Data Network

Program Increase: Positions 0 FTE 0 Dollars \$14,000

|                        | FY 2007 Actual |     |                 | FY 2008 Enacted |     |                 | FY 2009 Request |     |                 |
|------------------------|----------------|-----|-----------------|-----------------|-----|-----------------|-----------------|-----|-----------------|
|                        | Pos            | FTE | Dollars (\$000) | Pos             | FTE | Dollars (\$000) | Pos             | FTE | Dollars (\$000) |
| Current Services Level |                |     |                 |                 |     |                 | ...             | ... | \$33,673        |
| Program Increase       |                |     |                 |                 |     |                 | ...             | ... | \$14,000        |
| <b>Total Request</b>   | ...            | ... | <b>\$31,662</b> | ...             | ... | <b>\$33,100</b> | ...             | ... | <b>\$47,673</b> |

**Description and justification for program changes:**

This funding will be used to re-capitalize HSDN. Requested funding will pay for the deferred costs of system-wide core infrastructure, site specific equipment refreshment, and software refreshment of one third of the baseline capabilities established in FY06 (first Data Center and 60 baseline HSDN sites):

- a. System-wide core infrastructure and site-specific equipment and software refreshment: \$12.811M
- b. The “Risk of Deferment” associated with “deferred” system-wide core infrastructure and site-specific equipment and software refreshment. The risk is associated with older, end-of-useful-life, end-of-sale equipment potentially breaking down and which cannot be repaired due to the lack of established maintenance agreements, repair parts, or replacement equipment. This includes the cost for extending existing warranties or the cost associated with having to repair or replace this aging equipment beyond its warranties: \$1.189M

**Impact on Performance (Relationship of Increase to Strategic Goals):**

A level of customer dependency was created, as HSDN became the alternative of choice for collection, aggregations, analysis and dissemination of data and information at the SECRET-classified level for the civilian side of government (some 2,898 existing HSDN end user accounts have been established at some 95 established HSDN sites at the Federal and State levels.)

This level of customer dependency increases as reliance upon SIPRNet diminishes. The Department of Defense (DoD) expressed a need for moving users on the civil side of the Federal government off primary dependence on SIPRNet.

This dependency necessitates DHS’ and HSDN’s action to sustain HSDN through established redundant capabilities and assets for disaster management and recovery, as well as continuity of operations (COOP). Currently, the second Data Center plays a critical role in this necessary redundancy, and the crucial need for sustaining both the first and second Data Centers becomes even more critical.

The potential for prolonged interruption or prevention of services provided by HSDN increases as established critical HSDN infrastructure and assets reach the end of useful life (some infrastructure was placed into operations in FY04 and FY05 and will be five to seven years old at the time of final replacement in FY 2009 – FY11).

**Program Increase 3: Enterprise Architecture**

Strategic Goal(s) & Objective(s): Goal 5- Strengthen and Unify DHS Operations and Management  
Objective 5.1 Strengthen and Unify DHS Operations and  
Management

PPA: Information Technology Services

Program Increase: Positions 0 FTE 0 Dollars \$500

|                        | FY 2007 Actual |     |                 | FY 2008 Enacted |     |                 | FY 2009 Request |     |                 |

| Current Services Level |                |     |                 |                 |     |                 | ...             | ... | \$7,432         |
| Program Increase       |                |     |                 |                 |     |                 | ...             | ... | \$500           |
| <b>Total Request</b>   | ...            | ... | <b>\$7,606</b>  | ...             | ... | <b>\$7,305</b>  | ...             | ... | <b>\$7,932</b>  |

**Description and justification for program changes:**

Enterprise Architecture supports a "blueprint" for systematically and completely defining DHS' baseline environment, target environment, and the transition plan. This program establishes a Department-wide roadmap to improve mission effectiveness and efficiency, eliminate existing stovepipe systems, and increase interoperability and information sharing. It ensures the essential evolution of information systems and the development of a common Information Technology environment.

Congressionally mandated reviews of all procurements over \$2.5M must be in alignment with the Homeland Security Enterprise Architecture and in-depth reviews of major IT projects at the critical design and production readiness points require additional technical support. Without these reviews IT spending would continue on fragmented and duplicative paths driving up long term O&M costs that are not affordable. An additional \$500,000 will allow the program to handle an increasing volume of IT investments to review for alignment to the Department's architecture.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

- 1) Directly aligns spending with business driven technology goals.
- 2) Reduces unnecessary duplication in technology spending.
- 3) Reduces the technology O&M tail in the budget.
- 4) Through critical design and production reviews reduces the number of major IT programs that fail.

**Program Increase 4: Enterprise Data Management**

Strategic Goal(s) & Objective(s): Goal 5- Strengthen and Unify DHS Operations and Management  
Objective 5.1 Strengthen and Unify DHS Operations and Management

**Description and justification for program changes:**

The Enterprise Data Management program provides the Enterprise Architecture a Data Reference Model for defining the data assets. The Enterprise Data Management Office (EDMO) establishes the guidance and oversight to DHS for data policy, data management, and data stewardship. This program supports the development of a Department-wide roadmap for data to improve mission effectiveness and efficiency, eliminating existing stovepipe data systems, and increasing interoperability and information sharing. The Data Reference Model (DRM) is a key governance tool to assure that mission needs drive technology investments.

The EDMO’s program plans integrate information sharing requirements and enable access across all levels of government, first responders, and stakeholders in the private sector. The EDMO program is a new proposal for FY 2009 and only has planned accomplishments for this fiscal year.

Without the Enterprise Data Management program, the Enterprise Architecture will be a blueprint for systems without content that can be widely understood and shared. The Data Reference Model provides a means to consistently describe data architectures, data standards and information exchanges to bridge the information sharing environment, and provides the governance framework for data policy, data management and data stewardship initiatives to protect the significant investment in data across the DHS components.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The development of the Data Reference Model by the EDMO builds the foundation by which data is understood within and outside of the department. The importance of creating a DRM that enables the data description of data assets, and the information sharing between and across the assets, is fundamental to the long term goal of developing the Information Sharing Environment for DHS.

The EDMO achieves the DHS priorities by developing the framework by which data is understood within the Department, and thereby also providing the capability to share data across all levels of government. It is the contextual definition of the data to be shared, accurately captured in the Data Reference Model that

will ensure that data is understood within and outside of the Department. Without this understanding at all levels of Government, the mission of Homeland Security will be impaired.

Without an Enterprise Data Management Office to address the significant task of building the Data Reference Model for the Homeland Security Enterprise Architecture, the Department will not be able to establish the foundation for the Information Sharing Environment across all levels of Government. For example, without an understanding of the data within the Department concerning the Terrorist Watchlist, providing viable systems to assist in securing the borders against foreign enemies will become increasingly prohibitive. Without a DRM that describes data in mission critical systems at the level for which new services can be quickly stood up, the DHS will be unable to meet the ongoing and evolving needs of securing the borders, screening for terrorists, protecting critical infrastructure and adapting to changing requirements.

**Program Decrease 1: Federal Watchlist Technical Integration**

Strategic Goal(s) & Objective(s): Goal 5- Strengthen and Unify DHS Operations and Management  
Objective 5.1 Strengthen and Unify DHS Operations and  
Management

PPA: Security Activities

Program Decrease: Positions 0 FTE 0 Dollars (\$7,000)

**Description and justification for program changes:**

The Watch List program is intended to support the sharing of information included within the Watch List data base and accomplish the technical integration information required to interoperably share these data in a secure manner with key DHS and other entities responsible for assuring the safety of our Nation from dangerous people.

The Watch List program will accomplish its intended goals by the end of FY 2008. The FY 2009 funds will be used for operations and maintenance of current system.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The funds remaining in the Watchlist program account will be utilized to cover costs associated with the operations and maintenance of the database. This should continue to strengthen the sharing of Watchlist data throughout DHS.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Office of the Chief Information Officer  
Justification of Proposed Changes in Appropriation Name  
Appropriation Language**

For necessary expenses of the Office of the Chief Information Officer, as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113), and Department-wide technology investments, [\$295,200,000] \$247,369,000; of which [\$81,000,000] \$86,928,000 shall be available for salaries and expenses; and of which [\$214,200,000] \$160,441,000 shall be available for development and acquisition of information technology equipment, software, services, and related activities for the Department of Homeland Security, to remain available until expended: *Provided*, That none of the funds appropriated shall be used to support or supplement the appropriations provided for the United States Visitor and Immigrant Status Indicator Technology project or the Automated Commercial Environment[: *Provided further*, That the Chief Information Officer shall submit to the Committees on Appropriations of the Senate and the House of Representatives, not more than 60 days after the date of enactment of this Act, an expenditure plan for all information technology projects that: (1) are funded under this heading; or (2) are funded by multiple components of the Department of Homeland Security through reimbursable agreements: *Provided further*, That such expenditure plan shall include each specific project funded, key milestones, all funding sources for each project, details of annual and lifecycle costs, and projected cost savings or cost avoidance to be achieved by the project]. (*Consolidated Appropriations Act, 2008.*)

Note: \$464K and (3) FTEs were transferred to the Office of Emergency Communications in FY2007

**PPA Mission Statement**

A crosscutting program that provides technology-management, shared services, acquisition strategy, executive leadership support, process development, and business transformation to several offices within the DHS Office of the CIO.

**Summary Justification and Explanation of Changes**

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted Budget</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|--------------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | \$21                   | \$6                            | \$6                     | \$0                            |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. There is no change from FY2008 to FY2009.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted Budget</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------|------------------------|--------------------------------|-------------------------|--------------------------------|
| <b>GSA rent</b> | \$0                    | \$1,141                        | \$1,163                 | \$22                           |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 request includes an increase of \$22,000 for non-pay inflation.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted Budget</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|--------------------------------|-------------------------|--------------------------------|
| <b>Communication, Utilities, and miscellaneous char</b> | \$0                    | \$16                           | \$17                    | \$1                            |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2009 request includes an increase of \$1,000 in non-pay inflation.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted Budget</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|--------------------------------|-------------------------|--------------------------------|
| <b>Advisory and Assistance Services</b> | \$48,707               | \$15,554                       | \$17,792                | \$2,238                        |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY2009 increase is for non-pay inflation and contractual obligations.

|                       | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted Budget</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------------|------------------------|--------------------------------|-------------------------|--------------------------------|
| <b>Other Services</b> | \$6                    | \$19,615                       | \$2,876                 | (\$16,739)                     |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2009 change is due to an inflationary increase, and the transfer of HRIT program and funding to the Chief Human Capital Office.

**PPA Mission Statement**

A program which supports development, implementation, and maintenance of a comprehensive and integrated Enterprise Architecture, the information technology framework for the Department's Human Resources System (including MaxHR), geospatial technologies, and information sharing.

**Summary Justification and Explanation of Changes**

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | \$21                   | \$6                     | \$6                     | \$0                            |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. There is no change from FY2008 to FY2009.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>GSA rent</b> | \$0                    | \$1,141                 | \$1,163                 | \$22                           |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 request includes an increase of \$22,000 for non-pay inflation.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Communication, Utilities, and miscellaneous char</b> | \$0                    | \$16                    | \$17                    | \$1                            |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2009 request includes an increase of \$1,000 in non-pay inflation.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Advisory and Assistance Services</b> | \$48,707               | \$15,554                | \$17,792                | \$2,238                        |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY2009 increase is for non-pay inflation and contractual obligations.

|                       | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Other Services</b> | \$6                    | \$19,615                | \$2,876                 | (\$16,739)                     |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2009 change is due to an inflationary increase, and the transfer of HRIT program and funding to the Chief Human Capital Office.

|  | <b>2007</b>     | <b>2008</b>     | <b>2009</b>     | <b>2008 to 2009</b> |
|--|-----------------|-----------------|-----------------|---------------------|
|  | <b>Actual</b>   | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>       |
| <b>Purchase from Government Accounts</b> | <b>\$11,326</b> | <b>\$52,097</b> | <b>\$13,769</b> | <b>(\$38,328)</b>   |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2009 decrease is due to the use of carryover funding in FY2008 for the Transformation and Systems Consolidation Program (TASC, formerly eMerge), PMO support for various programs, HRIT technical support, and COMSEC DIAS support

|   | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---|----------------|----------------|----------------|---------------------|
|   | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Operation &amp; Maintenance of equipment</b> | <b>\$1,663</b> | <b>\$639</b>   | <b>\$977</b>   | <b>\$338</b>        |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The change from FY08 to FY09 is due to an inflationary increase and operations and maintenance of legacy equipment.

|                  | <b>2007</b>     | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |

**PPA Mission Statement**

A set of programs that provides for the integration and protection of sensitive DHS information.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$0                    | \$0                     | \$0                     | \$0                            |

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | \$0                    | \$90                    | \$90                    | \$0                            |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. There is no change from FY2008 to FY2009.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>GSA rent</b> | \$0                    | \$1,199                 | \$1,199                 | \$0                            |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. There is no change from FY2008 to FY2009.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Communication, Utilities, and miscellaneous char</b> | \$0                    | \$4,168                 | \$3,443                 | (\$725)                        |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Decrease in FY 09 is due to the phasing out of the Watchlist program.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Advisory and Assistance Services</b> | \$53,287               | \$104,544               | \$53,164                | (\$51,380)                     |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The decrease of \$51,380 million in FY 09 is due to Management and Technology efficiencies, one time termination cost for NCCIPS build out, and the phasing out of the Watchlist program.

|                       | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Other Services</b> | \$0                    | \$75                    | \$75                    | \$0                            |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. There is no change from FY2008 to FY2009.

|  | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|--|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Purchase from Government Accounts</b> | \$15,981               | \$32,674                | \$9,820                 | (\$22,854)                     |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY decrease in FY 2009 is due to the phasing out of the Watchlist program, OneNet connectivity to the EDS Data Center, support to Data Center migrations, OneNet Primary NOC, Single Sign-On domain standup, and Adex hosting services

|                  | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Equipment</b> | \$0                    | \$2,532                 | \$2,532                 | \$0                            |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. There is no change from FY2008 to FY2009.

| <b>Total, Wireless Activities</b> |  | <b>\$56,258</b>        | <b>\$38,128</b>         | <b>\$0</b>              | <b>(\$38,128)</b>              |
| Full Time Equivalents             |  | ---                    | ---                     | ---                     | ---                            |

**Note:** \$18 million transferred to the Office of Emergency Communications in FY2007. Beginning in FY2008, the Wireless Program activities will be transferred to the Office of Emergency Communications along with \$18 million; the remaining \$68.4 million will be transferred to CBP in support of SBInet in FY2008.

**PPA Mission Statement**

A program whose mission it is to ensure the effective operation, management, budgeting, and procurement of all wireless technology department-wide, and the development of policy and wireless program performance metrics and standards for DHS.

|   | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---|---------------|----------------|----------------|---------------------|
|   | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Communication, Utilities, and miscellaneous char</b> | <b>\$3</b>    | <b>\$0</b>     | <b>\$0</b>     | <b>\$0</b>          |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

|   | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---|----------------|----------------|----------------|---------------------|
|   | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Advisory and Assistance Services</b> | <b>\$2,718</b> | <b>\$0</b>     | <b>\$0</b>     | <b>\$0</b>          |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

|  | <b>2007</b>     | <b>2008</b>     | <b>2009</b>    | <b>2008 to 2009</b> |
|--|-----------------|-----------------|----------------|---------------------|
|  | <b>Actual</b>   | <b>Enacted</b>  | <b>Request</b> | <b>Change</b>       |
| <b>Purchase from Government Accounts</b> | <b>\$49,169</b> | <b>\$38,128</b> | <b>\$0</b>     | <b>(\$38,128)</b>   |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. There is no Wireless program in FY2009, the decrease is associated with carryover funding provided in FY2008 for Spectrum Relocation, legacy O&M for CBP/ICE, NTIA fees, and spectrum management.

**PPA Mission Statement**

A classified wide area network for DHS and its components, with specific and controlled interconnections to the intelligence community and federal law enforcement resources.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$0                    | \$1,042                 | \$1,062                 | \$20                           |

Regular salaries and wages paid directly to persons whose work-years are not reportable to OPM as Federal civilian employees. Payments made for personal services do not represent salaries or wages paid directly to Federal employees. The change for FY 09 represents a 2% increase for compensation.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | \$0                    | \$34                    | \$35                    | \$1                            |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 09 increase is for non-pay inflation.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>GSA rent</b> | \$0                    | \$623                   | \$635                   | \$12                           |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 request includes an increase of \$12,000 for non-pay inflation.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Communication, Utilities, and miscellaneous char</b> | \$72                   | \$293                   | \$299                   | \$6                            |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The increase for FY 09 is for non-pay inflation.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Printing</b> | \$0                    | \$15                    | \$15                    | \$0                            |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Advisory and Assistance Services</b> | \$2,004                | \$4,056                 | \$4,137                 | \$81                           |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 09 request includes an increase of \$81,000 for non-pay inflation.

|  | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|--|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Purchase from Government Accounts</b> | \$30,605               | \$2,639                 | \$1,680                 | (\$959)                        |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The decrease in FY2009 is due to carryover funding in FY2008 which will be used for O&M

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Operation &amp; Maintenance of equipment</b> | \$0                    | \$25,366                | \$25,785                | \$419                          |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 09 request includes an increase for non-pay inflation.

|   | <b>2007</b>   | <b>2008</b>           | <b>2009</b>     | <b>2008 to 2009</b> |
|---|---------------|-----------------------|-----------------|---------------------|
|   | <b>Actual</b> | <b>Enacted Budget</b> | <b>Request</b>  | <b>Change</b>       |
| <b>Operation &amp; Maintenance of equipment</b> | <b>\$0</b>    | <b>\$25,366</b>       | <b>\$25,785</b> | <b>\$419</b>        |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 09 request includes an increase for non-pay inflation.

|                                 | <b>2007</b>   | <b>2008</b>           | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------------------------|---------------|-----------------------|----------------|---------------------|
|                                 | <b>Actual</b> | <b>Enacted Budget</b> | <b>Request</b> | <b>Change</b>       |
| <b>Supplies &amp; materials</b> | <b>\$0</b>    | <b>\$25</b>           | <b>\$25</b>    | <b>\$0</b>          |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. There is no change from FY2008 to FY2009.

|                  | <b>2007</b>   | <b>2008</b>           | <b>2009</b>     | <b>2008 to 2009</b> |
|------------------|---------------|-----------------------|-----------------|---------------------|
|                  | <b>Actual</b> | <b>Enacted Budget</b> | <b>Request</b>  | <b>Change</b>       |
| <b>Equipment</b> | <b>\$0</b>    | <b>\$0</b>            | <b>\$14,000</b> | <b>\$14,000</b>     |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 09 request includes \$12,811,000 for system-wide core infrastructure and site-specific equipment and software refreshment as well as \$1,189,000 for the repair and replacement of aging equipment beyond warranties.

## I. Changes In FTE

**Department of Homeland Security  
Departmental Management and Operations  
Office of the Chief Information Officer  
Changes in Full-Time Equivalents**

|   | FY 2007 | FY 2008 | FY 2009 |
|---|---------|---------|---------|
| Base: Year-end Actual from Prior Year   | 63      | 65      | 91      |
| <b>INCREASES</b>  |         |         |         |
| Increase #1:  |         |         |         |
| Hired staff for Front Office  | 4       |         |         |
| Increase #2:  |         |         |         |
| Hired Business Services Director for ITSO   | 1       |         |         |
| Increase #3:  |         |         |         |
| Additional 7 FTEs needed to augment its Enterprise Business Management Office to increase the CIO's capability to more effectively oversee the management of major Departmental IT acquisitions and E-Gov implementation. |         | 7       |         |
| Increase #4:  |         |         |         |
| Objective to hire additional FTEs to fully staff all approved positions within OCIO   |         | 19      |         |
| Increase #5:  |         |         |         |
| Remaining 3 FTEs from prior year request for 10 FTPs  |         |         | 3       |
| Sub-Total Increases   | 5       | 26      | 3       |
| <b>DECREASES</b>  |         |         |         |
| Decrease #1:  |         |         |         |
| Description:  |         |         |         |
| Transfer of 3 FTP/FTE from Wireless Management Office   | 3       |         |         |
| Decrease #2:  |         |         |         |
| Description:  |         |         |         |
| Decrease #3:  |         |         |         |
| Description:  |         |         |         |
| Sub-Total Decreases   | 3       | 0       | 0       |
| Year-end Actual/Estimated FTEs  | 65      | 91      | 94      |
| Net Change from prior year base to Budget Year Estimate:  | 2       | 26      | 3       |

**J. FY 2009 Schedule of Working Capital Fund by Program/Project Activity**

## **VI. Department Wide Information Technology & E-Gov Initiatives**

### **Department-wide Information Technology Investments**

**DHS Exhibits 300 will be made available to the public at:**  
[http://www.dhs.gov/xabout/budget/gc\\_1172003898016.shtm](http://www.dhs.gov/xabout/budget/gc_1172003898016.shtm)

### **Government-Wide Service Activities**

Expanding E-Government is a major part of the President's objective to use technology to improve how the Federal Government serves you, citizens, businesses, and agencies alike. Government should be citizen-centered, results-oriented, and market-based. These principles have been woven into the five Government-wide reform goals outlined in the President's Management Agenda (PMA): strategic management of human capital, budget and performance integration, competitive sourcing, expanded use of the Internet, and computer resources to provide Government services (Electronic Government, or E-Government) and improved financial management. Effective implementation of E-Government is important in making Government more responsive and cost-effective.

DHS' participation in E-Gov and Lines of Business are as follows:

### **A. Human Resources E-Gov Initiatives**

DHS has an established Human Resources Information Technology (HRIT) program that is managed from the DHS Chief Human Capital Directorate, with oversight and governance coming from the Chief Information Officer (CIO). It is through this program that DHS is coordinating its participation in Government-wide Human Resources E-Gov initiatives and migrating toward E-Gov solutions—where possible. The primary goal of the program is to “reduce the amount of moving parts” centered on supporting Human Resources or “Human Capital,” and where needed, replace some of the moving parts with newer, more flexible parts that work seamlessly together. The mission is focused on streamlining both the technology and the business processes as opposed to just buying more systems. The HRIT program is large and complex, encompassing more than 144 personnel/payroll systems. However, it is successfully tracking on-budget and on-schedule by using some of the following strategies toward operating more *effectively and efficiently*:

- Business Focus and Collaboration
- Leveraged Approach
- Centralized Approach
- Modular Repeatable Processes and Staff Augmentation
- Technology/Enterprise Architecture Collaboration

While this program is far from complete, it already has made excellent progress towards its overall mission of consolidating and modernizing payroll/personnel systems and processes. Eliminating funds for this program will bring a halt to one of the more successful programs that are laying the foundation for the “One DHS” concept. In the end, the disapproval of funds for this program will cost DHS significantly more in terms of time, effort, and money as DHS will continue to struggle with dysfunctional and disjointed systems and processes. By not improving upon these basic workforce management systems and processes, the overall DHS mission will continue to be hindered.

DHS participates in the following Human Resources E-Gov Initiatives. These activities are funded through the DHS Working Capital Fund. Funding algorithms that pull funding from the appropriate DHS Components are described below. As mentioned above, these activities are all coordinated through the DHS HRIT Program.

### **Recruitment One-Stop (USA Jobs)**

**Description of Service:** The Recruitment One-Stop (ROS) initiative is a Government-wide initiative led by the Office of Personnel Management (OPM). All agencies fund their portion of this program, based on employment levels. Regulations contained in 5 CFR Parts 330, 333, and 335 implement section 4 of Public Law 1054-52 and authorizes OPM to charge fees to agencies to pay the cost of providing federal employment information and services.

This program seeks to simplify the process of locating and applying for federal jobs. It delivers a number of new features, including intuitive job searching; concise, understandable, and visually-appealing job announcements; online resume submission; applicant data-mining; and on-line feedback on status and eligibility. USAJOBS Federal Employment Information System delivers state-of-the-art online recruitment services to job seekers, including intuitive job searching, online resume submission, applicant data-mining, and on-line feedback on status and eligibility.

**Managing Partner:** Office of Personnel Management (OPM)

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Civilian Equivalent (FTE) divided by total DHS civilian FTE, multiplied by the total estimated cost of the activity. This activity only services civilian personnel, which is why military FTE is not included in the cost allocation methodology.

**FY 2009 Service Fees:** \$503,786

### **E-Training**

**Description of Service:** Creating an E-Training environment that supports development of the federal workforce—currently 1.8 million workers in size—through simplified and one-stop access to high-quality E-Training products and services enhances agency missions. E-Training is working to improve the ability of the Federal Government to attract, retain, manage, and continually educate the highly-skilled professionals needed for a flexible and high-performing government workforce.

#### ***Planned Accomplishments:***

##### **FY 2008 Planned Accomplishments**

- Deploy Stage II

##### **FY 2009 Planned Accomplishments**

- Deploy Stage III

**Managing Partner:** Office of Personnel Management (OPM)

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Equivalent (FTE), divided by DHS' total FTE and multiplied by total estimated cost of the activity.

**FY 2009 Service Fees:** \$1,813,598

### **Enterprise HR Integration**

**Description of Service:** Enterprise Human Resources Integration (EHRI) is a collaborative E-Gov initiative designed to transform the way federal HR Specialists and Managers access human resource information, as well as the way federal employees access their personnel file information. When fully implemented, EHRI will replace the paper-based Official Personnel Folder (OPF) with an electronic employee record for all Executive Branch employees, resulting in a comprehensive electronic personnel data repository covering the entire lifecycle of federal employment. In addition to streamlining personnel management actions, EHRI will provide HR managers and specialists with powerful workforce analytic and planning capabilities. Progress to date includes:

- Conversion of USSS, FLETC, and FEMA records is tentatively scheduled for FY 2007
- FY 2007 and beyond will be in a steady state

### ***Planned Accomplishments:***

#### **FY 2008 Planned Accomplishments**

- Complete 4.0 upgrade to all DHS eOPF customers by FY 2008Q1
- Complete USSS migration to eOPF by FY 2008Q2

#### **FY 2009 Planned Accomplishments**

- The project will be completed in FY 2008.

**Managing Partner:** Office of Personnel Management (OPM)

**Cost Allocation Methodology:** Costs for EHRI's products and services will be recovered by EHRI from all agencies on an equitable basis related to the size and usage of each participating agency. Charges to each agency will be established by distributing total EHRI costs to all clients on the basis of the number of OPFs or on the basis of actual cost, depending on the service. Usage audits will occur at OPM's discretion—but will occur at least annually—and will be used to make adjustments to cost recovery through the Interagency Agreement (IAA). EHRI will notify DHS of their revised annual costs within DHS' annual cycle *at least* 90 days prior to completion of the cycle. Billing will be done annually, in advance, using DHS' Agency Location Code (ALC) via the Department of Treasury's Inter-Governmental Payment and Collection system (IPAC). Any optional services provided to DHS will be billed on a cost-recovery basis at the time the service request is signed by both EHRI and DHS.

**FY 2009 Service Fees:** \$3,780,400

## **Human Resources Line of Business**

**Description of Service:** Human Resources Line of Business (HRLoB) is one of nine lines of business supporting the PMA. Its aim is to identify opportunities to reduce the cost of government and improve services to citizens through business performance improvements. This initiative directly supports the mission of consolidation and modernization of the DHS-wide HRIT systems through standardization and consolidation of common business functions as supported by the IT systems. By reducing the number of duplicate systems and processes, DHS will greatly reduce future costs. Future cost avoidance will be associated with error corrections and rework related to non-integrated data exchanges and duplicate work across redundant systems.

In April 2005, OPM established the Multi-Agency Executive Strategy Committee (MAESC) and its subcommittees to continue the efforts of the interagency task force of the previous year. Since then, the MAESC has led the HRLoB initiative through the following achievements:

- Development of the first-ever end-to-end depiction of federal HR business processes, as reflected in the HRLoB Business Reference Model (BRM) (December 2004)
- Validation of the first-ever Government-wide set of detailed business, technical, and data requirements as outlined in the HRLoB Core Requirements for Shared Service Centers (November 2005)
- Evaluation, selection and announcement of the five Shared Service Centers (SSCs) (August 2005)
- Development of the HRLoB Data Model (DM) (February 2006)
- Revised and updated the HRLoB business processes and published the HRLoB Business Reference Model (BRM) version 2 (January 2006)
- Development of the HRLoB Performance Model (PM) (June 2006)
- Development of the HRLoB Target Requirements for the Shared Service Centers (November 2005)

The HRLoB is a cross-agency initiative that will have a marked impact on every federal employee. The collaborative nature of the HRLoB effort has been reflected in the achievement of each accomplishment. OPM recognizes the importance of continuing to reach out to MAESC partner agencies and the Federal Government in the interest of achieving the vision of the HRLoB.

The HRLoB initiative has developed a comprehensive concept of operations and service delivery model to guide this transformational effort. The graphic below depicts, at a high level, the HRLoB Shared Services Delivery Model with the core and non-core processes, their placement relative to the agencies and shared service centers, and the supporting architectural artifacts.

### ***Planned Accomplishments:***

#### **FY 2008 and FY 2009 Planned Accomplishments**

- Execute all necessary MOU/IAs and complete funding transfers as required.
- Improve strategic management of human capital
- Achieve operational efficiencies
- Increase cost savings/avoidance
- Improve customer service

**Managing Partner:** Office of Personnel Management (OPM)

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Civilian Equivalent (FTE), divided by DHS' total Civilian FTE and multiplied by the total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

**FY 2009 Agency Contribution:** \$260,870

## **E-Payroll**

**Description of Service:** The E-Payroll Initiative is consolidating 26 Executive Branch federal payroll providers, standardizing payroll policies and procedures, and simplifying and integrating payroll, human resources, and finance functions.

Moreover, the E-Payroll effort is transforming the current federal payroll service delivery environment into one that achieves the President's five management agenda initiatives:

- Strategic management of human capital
- Competitive sourcing
- Improved financial management
- Expanded electronic Government
- Budget and performance integration

E-Payroll is part of a larger integrated approach to human capital management. This initiative is leading efforts to establish payroll policies and procedures that will be uniform and both easy to understand and easy to administer. Government-wide E-Payroll system solutions are "best in class" in terms of overall costs and ease of administration while delivering high-quality service. The E-Payroll Initiative advanced the E-Government agenda by creating greater efficiencies in federal payroll processing.

Payroll has been identified as one of the core business processes within the Human Resources Line of Business (HRLoB), and as such E-Payroll is now part of that larger initiative. The E-Payroll Providers furnish core payroll services to the HRLoB Shared Service Centers identified on the HRLoB Partners page.

**Managing Partner:** Office of Personnel Management (OPM)

**Cost Allocation Methodology:** Allocation methodology assumes the total cost times the transaction percentage, which is the components percentage of the population serviced. For FY 2008, the PeopleSoft modernization, (EmpowHR) is assumed rolled out to all DHS. Total NFC costs assume Legacy costs: payroll/ reporting system (\$133/person for all DHS), Epic ((\$2/person) only for USSS and OIG,) and T&A (\$1/person) only for USSS and OIG. It also assumes EmpowHR O&M, rolled out to all DHS except USSS and OIG (\$75/person).

**FY 2009 Service Fees:** \$19,617,328

## **B. Financial Management E-Gov Initiatives**

DHS has an established Resource Management Transformation Office (RMTO) that is managed from the DHS Chief Financial Officer Directorate, with oversight and governance from the CIO. It is through this program that DHS is coordinating its participation in Government-wide Financial Management E-Gov initiatives and migrating toward E-Gov solutions, where possible. DHS' Resource Management Transformation Office (RMTO) plans, develops, and coordinates the appropriate budgetary, contractual, and policy activities necessary to transform DHS resource management infrastructures, systems, and resources into a cohesive system. RMTO is responsible for DHS Representation on the FMLoB and overseeing the implementation of E-Travel Initiative within the department. RMTO's strategic goals are centered on the implementation of a DHS-wide CFO Act-compliant environment and the migration toward a fully-integrated resource management infrastructure that utilizes the services provided by our E-Travel Partner.

RMTO activities will focus on transforming organizations, services, business processes, systems, and people so that distinctions among service providers will be erased in steps, resulting in a single environment focused on services and processes rather than organizations and systems. This includes conducting efforts to align services, processes, data, skills, and performance measures of individual service providers with the standards being established by the FMLoB.

DHS participates in the following Financial Management e-Gov Initiatives. These activities may be funded through the DHS Chief Financial Officer Directorate, or through the DHS Working Capital Fund. Where the Working Capital fund is utilized, funding algorithms that pull funding from the appropriate components of DHS are described below. As previously mentioned, all of these activities are coordinated through the Resource Management Transformation Office (RMTO).

### **Financial Management Line of Business**

*Description of Service:* The Financial Management Line of Business (FMLoB) task force has set goals out to define, analyze, and implement options that will enhance cost savings in the financial management systems, provide for standardization of business processes and data models, promote seamless data exchange between federal agencies, and strengthen internal controls through integration of core financial and subsidiary systems. The FMLoB task group's current objective is to improve the cost, quality, and performance of financial management (FM) reducing the number of noncompliant systems by leveraging common standards, shared service solutions, and implementing other Government-wide reforms that foster efficiencies in federal financial operations.

#### ***Planned Accomplishments:***

##### **FY 2008 Planned Accomplishments**

- Phase III - Complete target performance measures
- Phase III - Update migration Planning Guidance
- Phase III - Develop standard business processes, business objects/rules and data objects for select core FM functions

### **FY 2009 Planned Accomplishments**

- PMO Studies, for example, concept of operations etc.
- Continue Migration Planning and Migration of agency systems to SSPs
- Continue to develop standard business processes, interfaces, objects/rules and data objects for select core FM functions
- Review and update Service Assessment Guide, Monitor agency metrics reports
- Continue to Monitor and update Common Government Wide Accounting Codes

**Managing Partner:** Office of Management and Budget (OMB)

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each participating Component's adjusted total budget, divided by DHS' adjusted total budget (excluding grant funding) and multiplied by total estimated cost of the activity.

**FY 2009 Agency Contribution:** \$142,857

### **E-Travel**

**Description of Service:** This activity provides a Government-wide, web-based service that applies world-class travel management practices to consolidate federal travel, minimize cost, and produce superior customer satisfaction. From travel planning and authorization to reimbursement, the E-Travel Initiative will leverage administrative, financial, and information technology best practices to realize significant cost savings and improved employee productivity.

### ***Planned Accomplishments:***

#### **FY 2008 Planned Accomplishments**

- Begin deployment of ICE-DRO CENTIX & CBP (Q1 2008)
- Execute successful transition to new Travel Management Center for I&A, OPS, DNDO, DHS HQ, S&T, NPPD and OHA
- Fully deploy OHA, I&A and OPS
- Begin deployment of TSA
- Fully deploy ICE-DRO CENTIX on schedule, May 2008
- Begin deployment of USCG, NPP and DHS HQ
- Fully deploy TSA/FAMS/DNDO and CBP on schedule; all travel transactions for components (reservations and voucher processing) processed through ETS

#### **FY 2009 Planned Accomplishments**

- Fully deploy S&T, NPP and DHS HQ on schedule
- Begin deployments of FEMA & USCIS
- Fully deploy USCG

**Managing Partner:** General Services Administration

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Equivalent (FTE), divided by DHS' total FTE and multiplied by total estimated cost of the activity.

**FY 2009 Service Fees:** \$2,876,070

## **Budget Formulation and Execution LoB**

**Description of Service:** The Budget Formulation and Execution LoB will focus on building a “budget of the future,” employing standards and technologies for electronic information exchange to link budget, execution, performance, and financial information throughout all phases of the annual budget formulation and execution cycle. This LoB will identify opportunities for common solutions and automated tools to enhance agency and central budget processes; provide the Federal Government with enhanced capabilities for analyzing budget, performance, and financial information; and promote integration and standardize the exchange of information between budget formulation, execution, financial management, and performance measurement systems and activities across Government. The programmatic goals of Budget Formulation and Execution LoB are as follows:

- Improve the efficiency and effectiveness of agency and central processes for formulating and executing the Federal Budget.
- Improve the integration and standardized exchange of budget formulation, execution, planning, performance measurement, and financial management information and activities across Government.
- Improve capabilities for analyzing budget, execution, planning, performance, and financial information in support of decision making.
- Enhance capabilities for aligning programs and their outputs and outcomes with budget levels and actual costs to institutionalize budget and performance integration.
- Enhance the effectiveness of the federal budgeting workforce.

### ***Planned Accomplishments:***

#### **FY 2008 Planned Accomplishments**

- Test-pilot BFEM using three components for 2010 CJ submission (Large, Fee-Based, and Small)

#### **FY 2009 Planned Accomplishments**

- Implement BFEM DHS-wide by 2011 CJ submission – October FY 2009

**Managing Partner:** Department of Education

**Cost Allocation Methodology:** Funded by Department of Homeland Security Chief Financial Officer

**FY 2009 Agency Contribution:** \$95,000

## **C. E-Gov Services**

E-Gov services are focused on supporting the Government-to-Business initiative. These initiatives are committed to help businesses interact efficiently and effectively with the Federal Government. Each helps reduce burden on businesses, provide one-stop access to information, and enable digital communication using the language of E-Business (XML). Businesses have the ability to access information about laws and regulations and relevant forms needed to comply with federal requirements for their business.

Aligned with the President’s 2004 National Health Information Technology Strategy, the Consolidated Health Informatics (CHI) Initiative has adopted health data standards to allow health information to be shared securely across government agencies and healthcare organizations. E-Gov has become a single vendor registration area

that makes it easier to do business with the Federal Government and a community platform for the Intra-Governmental Transfers—the latter of which poses a significant governmental accounting challenge.

E-Gov allows citizens to easily access and participate in the rulemaking process. It also has improved the accessibility to—and quality of—the rulemaking process for individuals, businesses, and other government entities while streamlining and increasing the efficiency of internal agency processes.

### **Business Gateway**

***Description of Service:*** Business Gateway reduces the burden on businesses by making it easy to find, understand, and comply with relevant laws and regulations at all levels of government. The Business Gateway is the cross-agency portal for businesses that integrate the content and functionality of multiple federal business websites (e.g. Business.gov, Businesslaw.gov, SBA.gov). Business values derived from Business Gateway are necessary to support the integration of 22 Agencies for our business stakeholders by providing a centralized service to consolidate regulatory and compliance information. The one-stop portal supports the DHS mission by making compliance information easily-accessible to the DHS business community. One example of this initiative’s success came in a recent customer satisfaction report, showing DHS customers in need of compliance information found each visit to Business.gov saved them 12 labor hours, on average.

Business.gov helps DHS support the “One DHS” approach and functions as a key interface to our business stakeholders in the areas of transportation, immigration, cyber-security, cargo, emergency management, screening, law enforcement and border protection. Due to the value-based service provided by SBA, DHS will continue to look to Business.gov to provide business compliance and regulatory information to businesses supporting the DHS mission. The goals of Business Gateway are as follows:

- Develop a catalog of federal forms for Business.gov
- Expand harmonized miner reporting (Mine.gov) to include additional federal agencies and additional states
- Transition the Business Gateway portal into the federal cross-agency portal for businesses, integrating the content and functionality of SBA.gov, BusinessLaw.gov, Business.gov, and related sites into the comprehensive site Business.gov

### ***Planned Accomplishments:***

#### **FY 2008 Planned Accomplishments**

- The Business Gateway Team is focused on continual improvement to the business.gov site. During FY 2008, three updates (or releases) are planned.
- Q1 release will focus on stronger ties to state and local government compliance resources.
- Q3 release will focus on “Green” governmental resources for businesses.
- Q4 release is in the planning stages and will be determined later.
- In addition, with the implementation of the Content Management System, Business.gov will evolve throughout the year with rebuilt and improved site layout and content based on user feedback and new content partnerships. With three usability tests planned for the year, there will be several opportunities for users to help shape the “look and feel” of Business.gov and provide feedback on the usefulness of the content. Also during FY 2008, the initiative will develop a Web 2.0 strategy and begin implementing features and concepts consistent with this shift in user interaction.

- The Business Gateway team will continue to conduct maintenance and operations activities for Business.gov to:
  - Implement appropriate security patches
  - Complete the migration to open source software (e.g. JBoss and Alfresco, etc.) and continue implementing upgrades as appropriate
  - Implement new search tools
  - Test disaster recovery plans
  - Update certification and accreditation documentation for the site and resolve identified vulnerabilities
- During FY 2008, the Program Management Office (PMO) will continue day-to-day operations that support the Advisory Group and Governance Boards. The PMO staff will ensure a timely response to all regular and periodic reporting requirements imposed by SBA, OMB, Congress, and other stakeholders.
- The PMO will focus on managing several acquisitions during FY 2008:
  - Hosting provider – Through FY 2008, the Business Gateway Initiative will continue relying on in-house hosting services within SBA. As SBA evaluates long term hosting requirements, there is a possibility SBA will pursue an enterprise hosting contract that might involve both Business.gov and Forms.gov. The Business Gateway Team will continue to participate in SBA’s efforts and revise acquisition plan accordingly to obtain the best service at the lowest cost.
  - PMO support – The contract for PMO support (including product strategy, content development, and data harmonization support) is in its second option year, and there will be a decision in Q4 on the level of support needed for the third option year of the contract.
  - Development/Maintenance – The contract for development/ maintenance is in its first year, and there will be a decision in Q4 on the level of support needed for the second option year of the contract.
  - Marketing and Outreach – The contract for marketing and outreach is in its first year, and there will be a decision in Q4 on the level of support needed for the second option year of the contract.
  - Customer Service – The Business Gateway Initiative currently leverages customer service email support from the USA Services Initiative. During FY 2008, the PMO will evaluate if this arrangement continues to meet the initiative’s needs, or if different services are needed.
- Ongoing financial management activities aimed at acquiring funding from partner agencies (e.g. processing Memoranda of Understanding) will begin within the first quarter of the fiscal year and continue until all funds are received.
- Data harmonization activities involve reducing burden on businesses. This effort is integrated closely with the principles of the Paperwork Reduction Act and the general requirement to reduce burden on the public. For Business Gateway, this means partnering with federal agencies to identify and facilitate process streamlining that will result in fewer burdens on businesses. During FY 2008, data harmonization efforts will include:
  - Continuing to work with the Department of Interior on the Single Source Coal Reporting project
  - Continuing to work with NASA to identify burden reduction opportunities
  - Working to identify other agencies to partner with to reduce burden on businesses
- The Business Gateway team is working to build on recent public relations and press successes by:
  - Increasing awareness of Business.gov as the official link of the Federal Government through the use of proven, cutting-edge communication vehicles accessed by the small business community
  - Increasing new and returning visitors by implementing strategic Web marketing techniques
  - Supporting content and promotional partnerships with federal agencies
  - Establishing partnerships with state and local governments to develop content for Business.gov and communicate benefits of site
  - Improving internal stakeholder relationships and obtaining buy-in at SBA

- Forms.gov is planning four updates—one per quarter during FY 2008—that will complement the functionality of Business.gov.
  - Q1 Release: Citizen facing portion of the Forms.gov website will convert to JBoss, an open-source application server software package
  - Q2 Release: Administrative (back end) side of the website will convert to JBoss
  - Q3 Release: Enhancements resulting from customer service scores and comments
  - Q4 Release: Modifications to public-facing capabilities of Forms.gov will reflect input from the usability research

### **FY 2009 Planned Accomplishments**

- By FY 2009, the Business Gateway Initiative will complete several significant improvements to Business.gov, enhancing both content and functionality. The Business Gateway team will have completed a series of infrastructure changes to bring the operations and maintenance costs of Business.gov and Forms.gov down dramatically. These steps will position Business Gateway to transition from a development initiative to an operational program. Using the new Content Management System developed in FY 2008, Business Gateway will continue to bring new content and features to Business.gov in response to our continual research into user feedback and website utilization.

***Managing Partner:*** Small Business Administration (SBA)

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is pro-rata share based on the percent of each participating Component's adjusted total budget divided by DHS' adjusted total budget (excluding grant funding), multiplied by total estimated cost of the activity.

***FY 2009 Agency Contribution:*** \$108,146

### **E-Rulemaking**

***Description of Service:*** E-Rulemaking is a collaborative, interagency initiative designed to establish a common, automated, and integrated approach to managing the Federal Government's rulemaking function. The activity consolidates rulemaking systems at the various departments and agencies, and is centrally managed through a Web-based environment offering such features as one-stop access, search capabilities, and public commenting. E-Rulemaking activities include:

- Expanding public understanding of the rulemaking process
- Improving the quality of federal rulemaking decisions
- Increasing the amount, breadth, and ease of citizen and intergovernmental participation in rulemaking
- Administering *Regulations.gov*, a cross-agency, front-end Web application that posts and allows comments on proposed federal agency rules
- Writing memoranda to the President's Management Council (PMC), directing agencies to include a link to *Regulations.gov* on agency homepages and in the synopsis of the notice of any regulatory action requesting public comment
- Posting the dockets for the Department of Housing and Urban Development, USDA Animal and Plant Health Inspection Service, a portion of the Department of Homeland Security, and Office of Personnel Management rulemaking on EPA's on-line system as a proof-of-concept.

### ***Planned Accomplishments:***

#### **FY 2008 and FY 2009 Planned Accomplishments**

- Consolidate existing agency e-docket systems with EPA's system, including USDA and HUD
- Post HUD and USDA/APHIS dockets on EPA's on-line system as a proof-of-concept
- Develop and deploy the federal-wide docket management system
- Initiate Business Process Reengineering of rulemaking process

***Managing Partner:*** Environmental Protection Agency (EPA)

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is a pro-rata share based on the percent of each participating Component's adjusted total budget, divided by DHS' adjusted total budget (excluding grant funding) and multiplied by total estimated cost of the activity.

***FY 2009 Service Fees:*** \$636,017

#### **GovBenefits.gov**

***Description of Service:*** The GovBenefits.gov website provides a single point of access for citizens to locate and determine eligibility for government benefits and services. The site now offers links to 234 benefits programs, representing \$1.3 trillion in annual benefits. The benefits are as follows:

- Identify the services provided by the GovBenefits.gov site and the PMO for agencies and citizens. GovBenefits.gov assists agencies in communicating value of initiative to internal stakeholders.
- GovBenefits.gov allows people to make choices for themselves and their families by providing a one-stop website – [www.GovBenefits.gov](http://www.GovBenefits.gov) – for access to information on more than 1,000 government benefit and assistance programs. GovBenefits.gov was launched in April 2002 and features an easy-to-use online screening tool to help individuals or caseworkers promptly determine potential eligibility for benefit programs. In addition, users are guided to a list of benefits they may be eligible to receive. For convenience, program descriptions and contact information are provided for each benefit program.
- More than 80 million people receive government benefits through hundreds of federal domestic assistance programs and federally-funded programs managed by state and local governments.

### ***Planned Accomplishments:***

#### **FY 2008 Planned Accomplishments**

- **Improve service to citizens:** Continue to define and provide increased ease-of-use of the site for citizens and partner constituents.
  - To improve the usability of GovBenefits.gov, as well as implementing research/data-based enhancements gathered from:
- Visitor feedback and site metrics
- "Foresee" customer satisfaction results and recommendations
- Usability testing and/or expert studies
  - Implement Customized Connection(s) with partners or affiliates to expand site content and ensure easier access for citizens to government benefit information.
  - Ensure that benefit program information includes a logical "next step" for potential applicants.

- **Expand content on GovBenefits.gov:** Seek out new programs that fit within the mission of GovBenefits.gov to provide more information to citizens and ensure that the set of benefit programs on GovBenefits.gov is as thorough as possible.
  - Add programs for U.S. territories
  - Identify state-administered programs funded through federal grants, where feasible
  - Further enable states and federal partners to use CMS to manage content
- **Gain additional awareness and utilization of the site:** Increase awareness and utilization of GovBenefits.gov among the public, beneficiary community, and government agencies to more effectively accomplish the mission of the program.
  - Actively promote GovBenefits.gov to the general public through the use of direct outreach campaigns.
  - Implement targeted outreach programs to benefit advocates to expand promotion of the site, and its use, to their communities of interest.
- **Maintain compliance with government and IT policies, standards, and best practices**
  - Maintain full compliance with relevant federal capital planning and IT management polices, security and privacy policies, regulations, and appropriate industry best practices.
  - Ensure that all applications, hardware, and software are kept updated to adhere to all security and system performance best practices.
- **Reduce program administrative costs, where feasible**
  - Review budget line items with the partnership to identify areas for potential cost reductions, where such cost reductions will not decrease or adversely affect the services provided to citizens as described in the mission of GovBenefits.gov.
- **Develop a new funding model for FY 2010**
  - Identify metrics to quantify value of the initiative to citizens and agencies.
  - Based on the results of 6.1, develop a new funding strategy for FY 2010.

**FY 2009 Planned Accomplishments:**

- In FY 2009, GovBenefits.gov will continue to meet its goal of improving service to citizens by conducting a benefit program review and benefit audit. The milestones, measures and metrics will be discussed in detail and finalized by the GovBenefits.gov Governance Board in FY 2008.
- In FY 2009, GovBenefits.gov will establish the funding levels of participating agencies for 2011. The milestones, measures and metrics will be discussed in detail and finalized by the GovBenefits.gov Governance Board in FY 2008.

**Managing Partner:** Department of Labor

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Civilian Equivalent (FTE), divided by DHS' total Civilian FTE and multiplied by total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

**FY 2009 Service Fees:** \$138,789

## **E-Gov Integrated Acquisition Environment**

**Description of Service:** The Integrated Acquisition Environment activity is a secure business environment that facilitates and supports cost-effective acquisition of goods and services in support of mission performance. The goals for the Integrated Acquisition Environment activity are as follows:

- Create a simpler, common, integrated business process for buyers and sellers that promote competition, transparency and integrity
- Increase data sharing to enable better business decisions in procurement, logistics, and payment and performance assessment
- Take a unified approach to obtaining modern tools to leverage investment costs for business related processes
- Deploy a single point of registration and validation of supplier data accessed by all agencies
- Implement a central point for consolidated collection and access of statistical and management information related to Government acquisitions
- Implement a directory of contracts to simplify selection and facilitate leverage of Government buying
- Develop a standard glossary and vocabulary to facilitate exchange of data between (and within) agencies
- Transform intra-governmental ordering and billing to enable universal electronic processes, reduce payment and collection problems, and enable swift and accurate revenue and expense elimination processes for preparing consolidated financial statements

### ***Planned Accomplishments:***

#### **FY 2008 Planned Accomplishments**

- Deploy a single point of registration and validation of supplier data accessed by all agencies via the Business Partner Network (BPN) and its related applications.
- Implement a central point for consolidated collection and access of statistical and management information related to government acquisitions via the Federal Procurement Data System (FPDS) and other Acquisition Information Reporting (AIR) tools.
- Implement a directory of Government-wide Acquisition Contracts (GWAC) and Multiple Agency Contracts (MAC) to simplify selection and facilitate leverage of Government buying.

#### **FY 2009 Planned Accomplishments**

- Develop a standard glossary and vocabulary to facilitate the exchange of data between (and within) agencies.
- Transform intra-governmental ordering and billing to enable universal electronic processes, reduce payment and collection problems, and enable swift and accurate revenue and expense elimination processes for preparing consolidated financial statements via the Intra-Governmental Transaction Exchange (IGTE).

**Managing Partner:** General Service Administration

**Cost Allocation Methodology:** The cost allocation methodology is a pro-rata share based on the percent of each component's measurement of three contract acquisition variables, divided by the total sum of all component measurements of the same three variables and multiplied by total estimated cost of the activity. The three contract acquisition variables measured for each component is as follows: (1) The number of

personnel providing contractor support, (2) The number of contracts processed, and (3) The dollar volume of contracts processed.

*FY 2009 Service Fees:* \$2,270,519

#### **D. Other E-Gov Initiatives and Lines of Business**

The goal of E-Gov Initiatives and Lines of Business (LoB) is to build new partnerships among levels of government. In turn, these partnerships help to empower state and local governments to deliver citizen services more effectively. One of the E-Gov initiatives allows federal grant customers who can find and apply for grants through a single, online portal—thus making it easier for potential recipients not only to obtain information about federal grants, but also to submit applications for those grants. E-Gov initiatives also help citizens and members of the emergency management community at the local, tribal, state, and federal levels by improving public safety response through more effective and efficient interoperable data communications. E-Gov initiatives also serve as a unified point of access to disaster preparedness, mitigation, response, and recovery information.

These initiatives provide federal and state agencies with single a point of access to map-related data enabling the sharing of existing data to maximize geospatial investments to leverage resources and reduce redundancies. They have also minimized the burden for obtaining services online for businesses, the public and the Government by providing a secure infrastructure for online transactions and eliminating the need for separate processes to verify identity and electronic signatures.

Lines of Business help to identify the opportunities for IT infrastructure consolidation and optimization and help to develop Government-wide common solutions. The Federal Government's information systems security program improves agency mission objectives through a comprehensive set of risk-based, cost-effective controls and measures that adequately protect information contained in Federal Government information systems.

#### **Grants Management Line of Business**

*Description of Service:* The Grants Management Line of Business (GMLoB) is a Government-wide solution to support end-to-end grants management activities that promote citizen access, customer service, and agency financial and technical stewardship.

The objective of this initiative is to establish common target architecture approaches, best practices, and business process and system solutions in grants management. GMLoB plans to support consortiums as points of consolidation for Grants Management.

The scope of the GMLoB is to be a full-circle business process for grants, from application intake through closeout of the award and financial payout. Also, GMLoB will provide federal assistance funding for competitive and non-competitive awards. Those eligible for awards include state and local governments, members of the academic community, private and non-profit organizations, and individuals.

GMLoB seeks to improve the grants decision-making process by making it more efficient and clear. The system will improve access to grants-related programs and financial information and enhance the ability to report on award-related accomplishments. GMLoB will also improve the monitoring and tracking process of grants, post-award.

Expected constituent and citizen benefits include improved service and time, cost, and resource savings. GMLoB will improve service to constituents and citizens by standardizing and streamlining Government-wide grants business processes. GMLoB will reduce grantee administrative burden by providing grantees with online forms and filing of post-award reports. Grantees will save time through online filing and save costs through paper reduction and reduced postage costs. Project objectives include:

- Improving customer access and efficiency of submission process
- Improving decision-making
- Integrating with Financial Management processes
- Improving efficiency of reporting procedures in order to increase usable information content
- Optimizing post-award and closeout actions

***Planned Accomplishments:***

**FY 2008 and FY 2009 Planned Accomplishments**

- Execute all necessary MOU/IAs and complete funding transfers as required
- Submit FIT GAP cost analysis
- Maintain the PMO and ensure effective management by project manager(s)
- Secure contractor services to support PMO activities
- Support GMLoB activities through communications, development of reporting and analytic tools, and information gathering and analyses

***Managing Partners:***

- National Science Foundation (NSF)
- Department of Health and Human Services (HHS)

***Cost Allocation Methodology:*** The cost allocation methodology is a pro-rata share based on the percent of each organization element grant funding, divided by DHS' total grant funding and multiplied by total estimated cost of the activity.

***FY 2009 Agency Contribution:*** \$59,316

**Grants.gov**

***Description of Service:*** Grants.gov creates a single portal for all federal grant customers to find, apply, and manage grants online. The Grants.gov “storefront” provides electronic functionality for applicant’s grantees, and reduces the paper-based processes that currently hamper the federal grants environment. The initiative is designed to reduce existing inefficiencies, meet E-Gov goals, and provide benefits to both citizens and the Government. Specifically, the initiative enables the government to meet many of the streamlining activities required by Public Law (PL) 106-107, Federal Financial Assistance Management Improvement Act, and called for in the PMA—such as deploying a unified search/find capability for grant opportunities, standard data sets, and a common mechanism and processes for applying for federal grants funds.

The benefits of this program will include, but not be limited to:

- Standardizing grant information, application packages, and processes for finding and applying for federal grants
- Simplifying and streamlining the federal grants process by eliminating the need to navigate complex processes to find and apply for federal grants
- Creating an easy-to-use process by registering once to apply for as many federal agencies and grant programs as needed with just one secure login
- Enhancing the grant application process to save applicants costs, time and hassle; thereby eliminating the need to expend resources, time, postage and reproduction costs associated with traditional paper-based grant applications
- Reduced training costs related to learning multiple, disparate grant application systems and processes resulting in a more-intuitive approach to research and find federal grant opportunities
- Providing a secure and reliable source to apply for federal grants. This will include validating grant applicants via a three-step registration process which authenticates every user through a Credential Provider

### ***Planned Accomplishments:***

#### **FY 2008 Planned Accomplishments**

- Establish and strengthen grant community communications with Grants.gov.
- Ensure quality of technical system conversion, development, and deployment.
- Implement data standardization, conversion, development and clearance of forms with OMB, GPC and GEB.
- Maintain continuous and improved processing times via systems operations and maintenance.
- Enhance Grants.gov program operations through standard operating procedures, communication management, earned value management and return on investment.
- Execute all necessary MOU/IAs and complete funding transfers as required.

#### **FY 2009 Planned Accomplishments**

- Continue outreach, training and ramp-up activities with agencies and applicants.
- Continue rollout of system-to-system functionality with the applicant community.
- Merge the back-end of Grants.gov Find and Apply into one system.
- Post all competitive discretionary grant application packages quarterly on Grants.gov to match posted opportunities.
- Execute all necessary MOU/IAs and complete funding transfers as required.

***Managing Partner:*** Department of Health and Human Services (HHS)

***Cost Allocation Methodology:*** The cost allocation methodology is a pro-rata share based on the percent of each organization element grant funding, divided by DHS' total grant funding and multiplied by total estimated cost of the activity.

***FY 2009 Agency Contribution:*** \$517,763

## **E-Authentication**

**Description of Service:** The E-Authentication activity was implemented to minimize the burden on obtaining services online for businesses, the public and government by providing a secure infrastructure for online transactions and eliminating the need for separate processes to verify identity and electronic signatures. (Another goal of the E-Authentication Initiative is to provide trusted and secure standards-based authentication architecture to support the 24 Government-wide E-Gov initiatives.) E-Authentication's distributed architecture will also allow citizens and businesses to use non-government issued credentials to conduct transactions with the government.

Successful implementation of E-Authentication will produce numerous benefits for the public and the Federal Government. Citizens and businesses will have a secure, easy-to-use, and consistent method of proving identity to the government and will be spared the burden of having to keep track of multiple sets of registration information. Federal agencies will be able to reduce authentication system development and acquisition costs and reallocate labor resources previously used to develop such systems.

### ***Planned Accomplishments:***

#### **FY 2008 and FY 2009 Planned Accomplishments**

- E-Authentication Solutions and HSPD-12 MSO are both merging under the new GSA Office for Identity Solutions (OIS) as of January 1, 2008. As part of this merger, E-Authentication Solutions will continue to manage the U.S. E-Authentication Identity Federation.
- E-Authentication Solutions expects to have successfully transferred to a fee-for-service business model in FY 2008.
- E-Authentication Solutions is issuing a solicitation for Federated Identity Credential Services (FIDCS) and a separate solicitation for Integration Services to expand the E-Authentication services available to federal agencies in FY 2008.
- After merging into the Office for Identity Solutions (OIS), E-Authentication Solutions will focus on the continued provision of e-authentication services to Agency customers and the management of the U.S. E-Authentication Identity Federation.

**Managing Partner:** General Service Administration (GSA)

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Equivalent (FTE), divided by DHS' total FTE and multiplied by total estimated cost of the activity.

**FY 2009 Service Fees:** \$583,100

## **E-Gov Disaster Management**

*Description of Service:* The Disaster Management (DM) E-Gov Initiative was selected for implementation under the E-Government program as part of the President's Management Council Agenda. It is subject to OMB direction that these E-Gov programs are developed in the context of recent management reforms, including revisions to the Paperwork Reduction Act (PRA), the Clinger-Cohen Act, the Government Performance and Results Act (GPRA), the Chief Financial Officers (CFO) Act, and OMB Circulars A-130 and A-11 and A-76. These legislative and policy mandates emphasize the need for federal agencies to significantly improve their business and management processes.

The extension of existing DM E-Gov services and capabilities will flow through existing DHS capabilities for the ongoing delivery of services to similar stakeholders requiring comparable services. The goal throughout this project is to provide a seamless transition of service and mitigate risk of interruption of that service. In providing a unified and integrated system, the Disaster Management stakeholder community will see:

- Enhanced information sharing
- Improved access to shared services
- Reduction of message conflict
- Advanced security access via cooperation with the E-Authentication initiative

This program is currently in a very mature state and is categorized as being Operations & Maintenance. The program has already made excellent progress towards its overall mission for improving the nation's information sharing capabilities within the emergency management community—including first responders. The foundation and pillar of the mission has been to establish and maintain a seamless channel of knowledge and information for disaster-related services pre-, mid-, and post-disaster—either man-made or natural. This has been accomplished by the program's information portal DisasterHelp.gov.

The DM Program will continue to coordinate with practitioner communities providing and supporting Emergency/Disaster Preparedness, Response, and Management services that have identified the critical need for information sharing standards. These information sharing standards will govern or support interoperable communications between personnel and systems across the local, tribal, state, federal, and non-governmental organizations of different disciplines which provide these services.

It is imperative that information-sharing standards be expanded for use during incidents, based on the variety of emergency responders who need to communicate and share data through fax, phone, or the Internet. These methods of communication often cause redundancies in management activities due to unintended cross-over of communication and misunderstanding and do not support one-to-many communications (multiple addressing). Current communication processes are time-consuming and inefficient; however, systems supporting these activities are also diverse and often proprietary.

Within the context of the Disaster Management E-Gov Initiative, support will be provided to define, perform, and apply a process. This process will identify, research, define, and facilitate the development of data standards that will lead to a set of public standards. It is expected that these standards will be authenticated, published, and used for improved governance surrounding incident response and other data communications between personnel and systems across the local, tribal, state, federal, and non-governmental organizations of different disciplines providing incident response and emergency management services.

The intent here is to provide practitioner-driven messaging standards which users may adopt and implement. The implemented standards will allow users to rapidly and efficiently share emergency response information between diverse and proprietary systems and organizations supporting large-scale (as well as every day) incidents and events. Wherever possible, standards definitions will leverage and build upon other existing efforts such as Global Justice XML Data Model (GJXDM) and National Incident Management System (NIMS).

It is imperative that the standards work continues as it aligns to the DHS mission for the continued development of the DHS Data Reference Model (DRM) in alignment with the OMB FEA. Simultaneously, integration with HLS EA must be coordinated to advance the management of enterprise data as a valued asset for improving performance and supporting decision-making. This involves the continued liaison with the Federal CIO Council, Data Architecture Subcommittee (DAS), and the HLS EA development team and EAB/EACOE governance process. Through this work, continued support will enable information data reuse and sharing across the enterprise via standard description and discovery of common and reusable data to achieve cost avoidance.

This work will support consensus building across the enterprise, which is facilitated through the Enterprise Data Management Office/Data Management Working Group, the DRM Focus Group for Component representation, and subject matter experts (SMEs) in coordination with the HLS EA team. Support will be provided to ensure Critical Data Assets and Data Standards are cataloged for visibility and alignment within the HLS EA, as well as working through the National Information Exchange Model (NIEM) as an integral part of the DHS DRM to support specific information exchange opportunities.

Eliminating all funds for this program will bring a halt to one of the more successful programs that are laying the foundation for the continuous improvement toward information-sharing within DHS and with both private and public external partners. In the end, disapproval will cost DHS and its federal, state and local stakeholders significantly more in terms of effort and money as it will continue to struggle with its dysfunctional and disjointed systems and processes for sharing information. Without these basic communication capabilities and interoperable systems and processes, the overall DHS mission will continue to be hindered.

Through this work, continued support will enable information data reuse and information sharing across the enterprise via standard description and discovery of common (and reusable) data to achieve cost avoidance.

### ***Planned Accomplishments:***

#### **FY 2008 and FY 2009 Planned Accomplishments**

- Develop an FY 2008 Program Management Plan and Spend Plan to comply with FY 2008 First Quarter OMB Milestones.
- Integration of Federal Government disaster assistance services through the DAIP that will enable state and local governments as well as individuals to better access the broad scope of recovery assistance information.
- Consolidate homeland security coordination and information sharing portals utilized jointly by state and local governments, the private sector, and citizen stakeholders and federal partners.
- Consolidate Web content to more easily access information on cross-cutting national initiatives that FEMA manages for the benefit of federal departments and agencies and the American people such as the National Exercise Program, National Training Program, lessons learned and corrective action platforms,

grant programs, and FEMA's role in coordinating the federal response and recovery efforts during disasters.

- Improve FEMA's capability to quickly and consistently provide counsel to field operations concerning federal disaster response and recovery services.
- Develop a plan to provide an enterprise alerts and warning capability to DHS components in FY 2008.
- Document FEMA requirements for emergency management data messaging standards and provide to S&T.
- Provide continuing support for initiatives that have achieved full operational capability.
- Identify cost savings and perform analysis to evaluate the costs of alternative ways to accomplish functional objectives of Disaster Management Interoperability Services (DMIS) and Open Platform for Emergency Networks (OPEN).
- Host public discussion groups, forums, panels, lectures, and workshops to support and enhance the effectiveness of individuals engaged in emergency or disaster management.
- Facilitate development of practitioner-driven standards for exchanging data messages within the emergency response community. This initiative will also support standards development for both FEMA's NIMS and IPAWS programs.
- Provide a unified point of access to disaster preparedness, mitigation, response, and recovery information for citizens and members of the emergency management community at the local, tribal, state, and federal levels.
- Leverage the FEMA.gov site to further serve consumers of disaster preparedness, mitigation, response, and recovery information.
- Provide citizens and members of the emergency management community at various levels with specific disaster-related information including situation reports, emergency and disaster declarations, and related news.
- Host "other language" equivalents of disaster preparedness, response and recovery portions of FEMA sites.
- Coordinate with partners and cross-referencing their websites will increase awareness and understanding of the roles dozens of other agencies have in disaster response and management. This will extend the concepts of the National Response Framework to the level of the general public and help correct misconceptions of FEMA's roles and responsibilities.
- Align initiatives with the Disaster Assistance Improvement Plan (DAIP) through the information it disseminates on its websites and through integration of its websites with FEMA's disaster assistance call centers.
- Provide a multi-channel, self-service portal populated with real-time information from FEMA's and partner agency call centers and help desks to provide citizens with superb customer service while freeing-up staff to focus on core tasks and responsibilities.

***Managing Partner:*** Department of Homeland Security (DHS)

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's level of participation in Disaster Management, divided by the total sum of all Component levels of participation in Disaster Management and multiplied by total estimated cost of the activity. Levels of participation include measuring the active participation of 16 elements of Disaster Management defined by Disaster Management E-Gov Initiative Program Office, EP&R/FEMA. The 16 elements of Disaster Management are:

1. Transportation
2. Communications
3. Public works and engineering
4. Firefighting/incident command system
5. Information and planning
6. Mass care
7. Resource support
8. Health and medical services
9. Search and rescue
10. Hazardous materials
11. Food
12. Energy
13. Warnings and alerts
14. Research and development
15. Emergency/domestic preparedness
16. Disaster relief

The 16 elements are the cost drivers for each Component's assessment. Because many Components are involved in various activities at different levels of participation, the cost for this activity is fairly uniform across the Components.

**FY 2009 Agency Contribution:** \$12,270,000

## **SAFECOM**

Description of Service: SAFECOM is a communications program within DHS' Office for Interoperability and Compatibility (OIC). With its federal partners, SAFECOM provides research, development, testing and evaluation, guidance, tools, and templates on communications-related issues to local, tribal, state, and federal emergency response agencies. OIC is managed by the Science and Technology Directorate.

As an emergency responder-driven program, SAFECOM is working with existing federal communications initiatives and key emergency response stakeholders to address the need to develop better technologies and processes for the multi-jurisdictional and cross-disciplinary coordination of existing systems and future networks. SAFECOM harnesses diverse federal resources in service of the emergency response community.

The tragic events of 9/11 underscored the critical importance of effective emergency responder communication systems. The lack of emergency response interoperability is a long-standing, complex, and

costly problem, with many impediments to overcome. (Interoperability is the ability of emergency response agencies to communicate via radio communication systems or exchange data on demand in real time—when needed and when authorized.)

While several government programs have made great strides in this area, much of this work has been disconnected and fragmented. In an effort to coordinate the various federal initiatives, the SAFECOM program was established by the Office of Management and Budget (OMB) and approved by the President's Management Council (PMC) as a high priority E-Gov initiative.

SAFECOM functions as the key federal coordinator for promoting and providing support to local, tribal, state, and federal public safety agencies for the improvement of public safety response through more effective and efficient interoperable wireless communications. As a public safety practitioner-driven program, SAFECOM is working with existing federal communications initiatives and key public safety stakeholders to improve processes for the cross-jurisdictional and cross-disciplinary coordination of existing systems and future networks. Through the development of the Public Safety Communications Statement of Requirements (SoR) and the Public Safety Architecture Framework (PSAF), SAFECOM is providing the public safety community and federal agencies guidance on new technologies to achieve communications interoperability. Program objectives include:

- **Baseline National Assessment:** SAFECOM is currently developing a National Interoperability Baseline to quantify the current state of public safety communications interoperability across the nation. This baseline will measure future improvements made through local, state, and federal public safety communications initiatives.
- **Public Safety Architecture Framework:** A Public Safety Architecture Framework will be published which will function as a living document that will be updated as required.
- **Wireless Investments:** SAFECOM will develop a federal process for reporting wireless investments to SAFECOM.
- **Interoperability Standards:** SAFECOM will continue to support and accelerate development of standards enabling multi-jurisdictional and multi-disciplinary interoperability.
- **Test and Evaluation:** SAFECOM will test and evaluate existing communications equipment and bridging technologies to ensure that public safety investments match vendor statements and user needs. These efforts will result in short-term and long-term cost saving among all levels of government and industry by coordinating existing test and evaluation efforts and promoting standard methodologies that yield consistent and comparable results.

### *Planned Accomplishments:*

#### **FY 2008 Planned Accomplishments**

- Review, evaluate, and provide feedback on preliminary Statewide Interoperable Communications Plans (SCIPs) submitted in accordance with the Homeland Security Grant Program (HSGP) and the Public Safety Interoperable Communications (PSIC) Grant Program.
- Assist states and territories in developing and submitting final SCIPs submitted in accordance with the HSGP and the PSIC Grant Program.
- Complete the review and approval of SCIPs submitted in accordance with the HSGP and the PSIC Grant Program.
- Complete the National Communications Baseline Assessment, which is designed to evaluate interoperable emergency communications needs and existing capabilities of local, state, tribal, and

federal government agencies, as well as non-governmental and private sector organizations with emergency response missions.

- Update and deliver the annual SAFECOM grant guidance document to help maximize the efficiency in which public safety communications-related funds are allocated and spent.

#### **FY 2009 Planned Accomplishments**

- Update and deliver the annual SAFECOM grant guidance document to help maximize the efficiency in which public safety communications-related funds are allocated and spent.
- Provide guidance and support to the Office of Emergency Communications as it conducts follow-up Statewide planning evaluation activities.
- Provide guidance and support to the Office of Emergency Communications in its delivery of statewide and tactical technical assistance to state, local and tribal governments and first responder organizations.

**Managing Partner:** Department of Homeland Security (DHS)

**Cost Allocation Methodology:** Funded by the Office for Interoperability and Compatibility (OIC) in the Science and Technology Directorate of DHS.

**FY 2009 Agency Contribution:** \$5,179,112

#### **Information Systems Security LoB**

**Description of Service:** The Federal Government's information systems security program enables agency mission objectives through a comprehensive and consistently implemented set of risk-based, cost-effective controls and measures that adequately protect information contained in Federal Government information systems.

OMB designated DHS/NCSD as program manager for Information Systems Security (ISS LoB). This initiative will hire contract personnel for the management office, establish an Implementation Governing Board, and disseminate migration guidelines to customer agencies. The ISS LOB promotes more-consistent security management processes across federal agencies. It also identifies opportunities and solutions to strengthen the ability of all agencies to identify and defend against threats, correct vulnerabilities, and manage risk. This program supports the PMA for improved management/performance of federal agencies, FISMA mandates, National Strategy to Secure Cyber Space and HSPD-7. The following are key program objectives of ISS LoB:

- Identify problems and propose solutions to strengthen the ability of all agencies to identify and manage information security risks.
- Create improved, consistent, and measurable information security processes and controls across Government.
- Achieve savings or cost-avoidance through reduced duplication and economies of scale.

## *Planned Accomplishments*

### **FY 2008 Planned Accomplishments:**

- Establish a multi-vendor contract vehicle for information systems security tools or capabilities.
- Review and evaluate agencies as Certified Internet Access Providers in support of the Trusted Internet Connection (TIC) initiative. (OMB M-08-05).
- Fully implement Shared Service Centers for FISMA Reporting and Security Awareness Training.
- Evaluate and recommend agencies as Shared Service Centers for Certification & Accreditation (C&A) providers.

### **FY 2009 Planned Accomplishments:**

- Review and evaluate agencies as Shared Service Centers for role-based training.
- Establish Shared Service Centers for Tier 2 Situational Awareness/Incident Response (SAIR) capabilities.
- Fully implement Shared Service Centers for C&A.
- Establish a multi-vendor contract vehicle for C&A capability.

**Managing Partner:** Department of Homeland Security (DHS)

**Cost Allocation Methodology:** Funded by Program Office within the Preparedness Directorate of DHS.

**FY 2009 Agency Contribution:** \$2,000,000

## **IT Infrastructure LoB**

**Description of Service:** This Line of Business (LoB) is in the planning stages, as it was just established. The first goal of the IT Infrastructure LoB is to establish a contract for developing infrastructure best practices. DHS has an established enterprise program—the Infrastructure Transformation Program (ITP)—that manages the transformation, consolidation and optimization of infrastructure services across DHS.

The ITP is a Level 1 Program (greater than \$50 million and critical to the Department), established in FY 2004 as part of ongoing efforts to optimize DHS' infrastructure and increase the Department's effectiveness and efficiency. The initiative is led by the Office of Chief Information Officer (OCIO), with each project led by a Component acting as a Steward. The ITP Operations Fund will offset increased operations and maintenance charges incurred while transforming and migrating six major sensitive-but-unclassified data networks; consolidating component legacy data centers; and centralizing email, video, and help desk services.

Key components of the "One Infrastructure" vision include establishing a single DHS network and email system, consolidating data and operations centers and help desks, and increasing collaborative capabilities in support of mission goals and objectives. The DHS IT infrastructure will serve as the technical platform from which classified and unclassified IT services are provided to the mission components and end-user communities. The DHS IT infrastructure will be standards-based, scalable, maintainable, robust, secure, and reliable.

FY 2006 and FY 2007 ITP investments resulted in new network and video service operational costs that will run concurrently with the operational costs of legacy IT infrastructures. This funding will partially support full-time operations and maintenance of the Department's enterprise-wide IT infrastructure and video operation services.

The approach aims to achieve an enterprise-wide IT infrastructure by leveraging existing capabilities within the Components. Projects were selected on the basis for achieving greater efficiency and improving the overall effectiveness of DHS programs supported by this infrastructure.

Optimization of IT infrastructure represents a significant opportunity to realize future cost savings by taking a more coordinated approach to spending on commodity IT infrastructure. IT infrastructure optimization case studies also demonstrate agencies could improve IT service levels and, when relieved of the burden of managing these non-core functions, can concentrate more on mission priorities and results. The project objectives are as follows:

- Create an infrastructure that enables interoperability of functions across agencies and programs
- Optimize the infrastructure to enable collaboration within and across agencies, sectors, and government levels
- Recapitalize efficiencies realized from infrastructure investments to support the agency mission

### ***Planned Accomplishments***

#### **FY 2008 and FY 2009 Planned Accomplishments**

- Define DHS Enterprise Architecture technical targets for portals, MS Vista OS and Networks (LAN). Continue network consolidation to OneNet in the WAN environment.
  - Award the Networx task order.
  - Continue transitioning sites under network operations control by the DHS network services steward, and integrate five Component entities to the OneNet network service nodes.
- Continue data center consolidation.
  - Establish DHS Component legacy data center migration plans to the Department's two consolidated data center capabilities.
  - Complete the data center migrations from four legacy data center locations.
- Further implement DHS Management Directive MD 0007.1, Information Technology Integration and Management, with respect to IT infrastructure portfolio management acquisition review for alignment with Administration, Congressional and agency priorities.
- Establish governance around enterprise configuration management
- The Department will take advantage of opportunities to incorporate cost-savings and efficiencies as the operating construct continues to mature and stabilize.

***Managing Partner:*** General Services Administration (GSA)

***Cost Allocation Methodology:*** Funded by the DHS CIO

***FY 2009 Agency Contribution:*** \$0

***FY 2009 Service Fees:*** \$0

## **Geospatial LoB**

**Description of Service:** The Geospatial LoB (GLOB) was designed to identify opportunities for optimizing and consolidating federal geospatial-related investments to reduce the cost of government and improve services to citizens. Cross-agency coordination of geospatial activities is still lacking in some areas and is needed to help identify, consolidate, or eliminate redundant investments that may exist. Establishing the GLOB is likely to result in a more coordinated approach to producing, maintaining, and using geospatial data, and will ensure sustainable participation from federal partners to establish a collaborative model for geospatial-related activities and investments. The project objectives are as follows:

- Facilitate intergovernmental collaboration for geospatial-related activities and investments across all sectors and levels of government.
  - To improve governance processes and results in alignment with common geospatial solutions
  - To identify, evaluate and implement common geospatial services, processes and best practices
  - To enhance coordination across geospatial community stakeholders
- Create optimized and standardized common geospatial functions, services, and processes that are responsive to customers.
  - To implement guidance provided through the FEA Geospatial Profile
  - To adopt, deploy and promote effective use of geospatial interoperability standards
  - To establish an LoB-wide business architecture for common functions associated with geospatial information
- Enable cost-efficient acquisition, processing, and access to geospatial data and information.

### ***Planned Accomplishments***

To date, the GLOB effort lacks tangible accomplishments that support DHS' mission. Current GLOB plans for FY 2008 and FY 2009 are unlikely to result in outcomes that will make a significant contribution to the homeland security geospatial mission, either. Consequently, the only FY 2008 and FY 2009 accomplishments that DHS anticipates are for GLOB to complete the transfer of funds required by OMB Passback guidance to the managing partner.

#### **FY 2008 Planned Accomplishment:**

- Complete transfer of funding to managing partner
  - Scheduled Date: June 1, 2008
  - Amount: \$63,860

#### **FY 2009 Planned Accomplishment:**

- Complete transfer of funding to managing partner
  - Scheduled Date: June 1, 2009
  - Amount: \$62,000

**Managing Partner:** Department of Interior (DOI)

**Cost Allocation Methodology:** Funded by DHS CIO

**FY 2009 Agency Contribution:** \$62,000

## **Integrated Acquisition Environment – Loans and Grants**

**Description of Service:** The Federal Funding Accountability and Transparency Act of 2006 (FFATA) requires OMB to “ensure the existence and operation of a single searchable website, accessible by the public at no cost to access” that includes information on each federal award. The law specifically requires a unique identifier for the entity receiving the award and of the parent entity of the recipient, should the entity be owned by another entity. Since contracts (and some grants) already require Data Universal Numbering System (DUNS) numbers, a decision was made to leverage this to cover loans and the remainder of the grants. This will allow those areas to feed information into the FFATA portal. The Integrated Acquisition Environment (IAE) currently has a contract with Dun and Bradstreet (D&B) that has been expanded for this purpose. OMB initiated funding requests for each agency to reimburse IAE for this additional cost.

The IAE – Loans and Grants funding line is in support of the FFATA for the relationship with D&B and DUNS support services. In addition to provision of DUNS numbers, D&B is now providing business and linkage data seamlessly, and the business arrangement supports the quality of data by real-time updates. Agencies will leverage linkages to corporate organizations based on parental and subsidiary relationships.

Each Contributing Agency shall obligate and provide funding in the amount determined for that agency’s share of the project as identified by OMB. Meanwhile, the IAE Program Management Office shall execute any interagency funding agreements necessary to cover the cost of participating in the initiative, and ensure administration of the D&B contract.

### ***Planned Accomplishments:***

#### **FY 2008 Planned Accomplishments**

- Deploy a single point of registration and validation of supplier data accessed by all agencies via the Business Partner Network (BPN) and its related applications.
- Implement a central point for consolidated collection and access of statistical and management information related to government acquisitions via the Federal Procurement Data System (FPDS) and other Acquisition Information Reporting (AIR) tools.
- Implement a directory of Government-wide Acquisition Contracts (GWAC) and Multiple Agency Contracts (MAC) to simplify selection and facilitate leverage of Government buying.

#### **FY 2009 Planned Accomplishments**

- Develop a standard glossary and vocabulary to facilitate exchange of data between and within agencies.
- Transform intra-governmental ordering and billing to enable universal electronic processes, reduce payment and collection problems, and enable swift and accurate revenue and expense elimination processes for preparing consolidated financial statements via the Intra-Governmental Transaction Exchange (IGTE).

**Managing Partner:** General Services Administration (GSA)

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component’s Full Time Equivalent (FTE), divided by DHS’ total FTE and multiplied by total estimated cost of the activity.

**FY 2009 Agency Contribution:** \$189,973

## **Disaster Assistance Improvement Plan**

**Description of Service:** Disaster Assistance Improvement Plan (DAIP) is a Government-wide single portal for disaster victims to submit electronic applications for assistance, as directed by *Executive Order: Improving Assistance for Disaster Victims* (August 29, 2006). This FEMA-led initiative is currently referred to as the “Disaster Assistance Improvement Plan” and includes 14 other federal agencies and departments. The focus of the current plan is to provide application services following major disaster declarations to homeowners and renters, most of which are typically referred to SBA for a loan.

### ***Planned Accomplishments:***

#### **FY 2008 Planned Accomplishments**

- **Phase 1 - Systems Information and Analysis Milestones:**
  - Establish weekly Working Group Meeting
  - Initial Partnering Agency TIM and Survey
- **Phase 2 - Requirements and Technical Design Milestones:**
  - Each Agency will provide DAIP their Funding Plan
- **Phase 3 - Design and Development Milestones:**
  - Have each agency conduct a project kick-off meeting
  - Complete Inter-Agency Agreements (IAA) and Memoranda of Understandings (MOU) between FEMA and partnering agencies
  - Complete the initial security assessment
  - Agency transfer of DAIP Funds to FEMA
  - Complete Agency Program Business Rules
  - Develop the Interface Control Document (ICD)
  - Complete prototype data exchange
  - Update agency content on GovBenefits

#### **FY 2009 Planned Accomplishments**

- **Phase 3 - Design and Development Milestones:**
  - Complete system testing
  - Complete disaster recovery testing
  - Complete Inter-Agency Security Agreement (ISA) and Certification and Accreditation (C&A)
  - Ensure the full deployment to partnering agencies with qualified, federally-administered programs
- **Phase 4 - Operations and Maintenance Milestones:**
  - Create GovBenefits Link on Agency’s Website
  - Manage Findings Report from agencies that have programs administered at the state and local

**Managing Partner:** Department of Homeland Security (DHS) - Federal Emergency Management Agency (FEMA)

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component’s Full Time Civilian Equivalent (FTE), divided by total DHS civilian FTE and multiplied by the total estimated cost of the activity.

**FY 2009 Agency Contribution:** \$204,160

## **Federal Health Architecture LoB**

**Description of Service:** The Federal Health Architecture (FHA) was established as an eGov Line of Business in response to *The President's Management Agenda* calling for increased efficiency and effectiveness in government operations. The FHA is responsible for:

- Leveraging federal expertise in creating a federal framework that would be derived from a national health IT infrastructure.
- Supporting federal activities in the development and adoption of health IT standards.
- Ensuring that federal agencies can seamlessly exchange health data between and among themselves, with state, local and tribal governments, and with private sector healthcare organizations.

FHA contributes to the President's health IT plan through:

- **Input:** A coordinated federal voice and collaboration on national health IT solutions
- **Implementation:** Providing implementation and planning guidance to federal agencies for standards-compliant health IT investments in support of interoperability
- **Accountability:** Ensure accountability for health IT activities in the federal space to advance interoperability

### ***Planned Accomplishments:***

#### **FY 2008 and FY 2009 Planned Accomplishments**

- To facilitate federal cross-agency participation in the development of a nationwide health information network.
- To develop a use case for the deployment of EHRs for usage in emergency response situations.
- To coordinate standards adoption activities between HITPC and FHA.
- To facilitate adoption of HITSP standards by agencies.

**Managing Partner:** Health and Human Services

**Cost Allocation Methodology:** N\A

**FY 2009 Agency Contribution:** \$0

**FY 2009 Service Fees:** \$0

## **A. Mission and Description of the Office of the Chief Information Officer**

The Department of Homeland Security (DHS) Office of the Chief Information Officer (CIO), in collaboration with the DHS Chief Information Officer Council, is responsible for implementing the necessary programs to align the Information Technology (IT) organization, including all of the systems and infrastructure, to support the missions and activities across the Department.

Under the leadership of the CIO, IT will enable the transformation of the Department into a performance based and integrated organization by providing effective technologies and systems. This transformation will align information-delivery resources into appropriate functions to achieve DHS' missions. To that end, the CIO and the CIO Council are committed to providing the following:

- A secure means of sharing appropriate information to all internal and external stakeholders
- A set of advanced tools that enables the DHS workforce to rapidly and efficiently communicate, process, retrieve, deliver, and share information
- A single, DHS-wide IT infrastructure environment that is reliable, scalable, flexible, maintainable, and secure
- A clear set of performance metrics and efficient business processes
- IT standards and frameworks that provide for integration
- A single, consistent IT governance model
- Continued Improvements in cyber security
- A mature and fully detailed Enterprise Architecture
- The alignment of acquisition for IT and IT services to the department's goals

## **B. Major Activities and Key Strategic Goals**

### **Major Activities**

The Office of the Chief Information Officer provides a myriad of Information Technology related services and support throughout the Department of Homeland Security. The CIO program is divided into five major subprograms as follows:

#### **Salaries and Expenses**

Salaries and Expenses is a crosscutting program that provides technology management, shared services, acquisition strategy and executive leadership support to all offices within the CIO.

#### **Department-wide Technology Investments**

**Information Technology Services** – A program that supports development, implementation, and maintenance of a comprehensive and integrated Enterprise Architecture, and the integration of the following: the information technology framework for the Department's Human Resources System; geospatial technologies; and information sharing.

**Security Activities** – A set of programs that provide for the integration and protection of sensitive and collateral DHS information.

**Homeland Secure Data Network (HSDN)** – HSDN provides the primary means for data and information exchange, messaging, and collaboration with specific and controlled interconnections to the intelligence community and federal law enforcement resources at a SECRET-classified level within the civil side of Federal government for DHS Component Organizations, Federal, and State and Local Government.

The following is a list of FY2007 Accomplishments, FY2008 Planned Accomplishments and FY2009 Projected Accomplishments:

### **FY2007 Accomplishments:**

#### **Salaries and Expenses**

- 88% of FISMA systems received valid Authority to Operate (ATO) letters
- Closed 363 of 438 “Core Financial Systems” audit findings
- Implemented Department Wide Security Ops Capability; since then DHS has responded to 731 potential security events
- Consolidated IT support for unclassified, Secret, and Top Secret LANs into a single vendor to improve service delivery and cost efficiency.
- Supported the migration of CBP ACE SR/SAT, DHS Enterprise Service Bus, and CBP Disaster Recovery systems into Stennis Data Center

#### **Information Technology Services**

- Implemented MD 0007.1 for DHS IT Acquisitions, by establishing a process and a checklist of questions for component submission. Established a review team to analyze acquisition plans, SOWs, and the checklist for each acquisition. Ensured that OCIO Direct Reports were direct participants in the analyses
  - \$3.2B of Eagle purchase requests were reviewed, achieving an improvement of 72% in alignment with the DHS Enterprise Architecture and portfolios
  - The IT Acquisition review process re-directed \$500M of acquisitions into the Eagle contracting vehicles.
- Continued the enterprise implementation of the Department-wide Smart Buy enterprise license agreement for access to Geographic Information System (GIS) software/training, saving DHS approximately \$8.26M, or 66%, over General Services Administration (GSA) list pricing. This exceeded the plan target of 55% savings over GSA Schedule.
- Target Architecture completed or being set through EA reviewed procurements for 91% of the potential DHS Enterprise Architecture, including setting targets for 14 of 22 critical areas designated by the DHS CIO, in all 169 TRM categories had target standards or products set during FY07.
- Improved operational data sharing effectiveness within the Department by increasing to eight; the number of active users of the National Information Exchange Model, including NPPD, CBP, US-VISIT, S&T (DM) and GMO.
- Deployed an integrated enterprise toolset similar to the Rice/Chertoff Dashboard that includes: program management, capital planning, enterprise architecture, hosting, engineering, and security services
- Established IT Budget Review framework and process. Implemented MD 0007.1 for the DHS IT Budget by providing IT instructions for the FY09-13 DHS Resource Allocation Plan (RAP)

Integrated Planning Guidance, implementing modifications to the Investment Management System (IMS) to collect portfolio and system cost information, and providing IT Budget instructions to components.

- Implemented Application Authentication for: the Secretary's Priority Tracker; the Homeland Secure Information Network (HSIN), DHS' primary authentication service enabling E-authentication; and for the FedBridge capability for the Department. Disaster Management transition from Stafford to Mount Weather complete. Successfully implement Disasterhelp.gov integration with E-authentication, meeting the OMB milestone
- Removed 67 of the 87 Investments OMB placed on the FY08 Watch List

### **Wireless Activities/Security Activities**

- Converted 58% of the Department's networks to DHS standards technology and fully migrated 53% to DHS OneNet; including the full transition of 317 sites for ICE, 129 sites for CIS, and 1,330 sites for CBP
- Established a primary NOC and brought the SOC to Full Operating Capability (FOC)
- Completed construction of Stennis Phase II space comprising approximately 26,000 square feet of additional raised floor space; including an area designed to physical security standards required for classified processing.
- Achieved migration of CBP ACE SR/SAT, and CBP Disaster Recovery systems into Stennis Data Center Phase I space occupying approximately 24,000 square feet
- Installed and configured the Stennis Internet/Extranet Gateway

### **Homeland Secure Data Network**

- Implemented a solution to bridge both HSIN-S and HSDN networks together for IP secure video teleconferencing purposes
- Finalized the Homeland Security Data Center Services Migration Strategy and migrated the disaster recovery HSDN data center to the Stennis Data Center
- Established the Fair Lakes Homeland Secure Data Network (HSDN) as the first Trust Zone customer
- Developed and deployed an HSDN Secure Video Teleconferencing (SVTC) capability

### **FY2008 Planned Accomplishments:**

#### **Salaries and Expenses**

- Maintain full FISMA compliance for each of 700+ systems in the Department's inventory
- Retire all financial systems security weaknesses
- Complete a rigorous review and analysis of the standards, products and services contained in the Technical Reference Model to ensure they comply with the Security Architecture
- Ensure capability readiness and migrate legacy data center systems to the two (2) DHS Data Centers

#### **Information Technology Services**

- Migrate 85% of DHS enterprise to Environmental Systems Research Institute (ESRI) SmartBuy investment, realizing cost savings for the Department of over \$4M
- Stand up initial geospatial data warehouse capability at the DHS Enterprise Architecture and DHS' National Center for Critical Information Processing and Storage (NCCIPS) Data Center at Stennis, Mississippi; supporting mission critical programs including the Infrastructure Information Collection Program, the National Biological Integration System, the National

Operations Center Common Operating Picture, and the FEMA National Response Coordinating Council, avoiding costs through sharing of a common geospatial infrastructure

- Establish Target Architectures for 20 mission critical areas
- Transition departmental portals to the next generation in order to improve performance and integrate Single Sign On for user authentication
- Issue Smartcards to DHS employees in the National Capitol Region (approximately 5,500)
- Set DHS enterprise technology architecture for Single Sign On (SSO)
- 100% of IT Portfolios Managers will directly contribute Portfolio analysis to the budget, acquisition, and investment review process
- 100% of DHS Portfolios have Identified IT EA targets, justification, and policy crafted supporting position

### **Security Activities**

- Move all remaining Components to OneNet with centrally managed Network Services with enterprise-wide NOC/SOC services
- Establish a secondary NOC/SOC
- Complete Component migrations to MS Exchange
- Establish disaster recovery capability between the two (2) DHS Data Centers

### **Homeland Secure Data Network**

- Establish and maintain periodic HSDN program self-assessment and evaluation through the DHS established Operational Analysis periodic review and reporting process, for identifying areas for improvements in costs and operational efficiencies and effectiveness
- Establish support for the mission requirements of DHS component organizations and its homeland security partners staying abreast of and identifying applicable advancing information and applied technologies capable of improving data gathering, fusion, analysis, intelligence gathering and dissemination at a SECRET-classified level

### **FY2009 Projected Accomplishments:**

#### **Salaries and Expenses**

- Maintain full FISMA compliance for each of 700+ systems in the Department's inventory
- Implement a standardized operational review methodology to ensure compliance with network and technical guidance
- Enhance the web-hosting environment to optimize delivery of critical services by utilizing distributed content/application delivery capabilities
- Fully deploy an Internet Protocol Version 6.0 (IPv6)-compliant network infrastructure

#### **Information Technology Services**

- Migrate 95% of DHS enterprise to Environmental Systems Research Institute (ESRI) SmartBuy investment, realizing cost savings for the Department of over \$4.25M
- Build upon FY2008 accomplishments in establishing the DHS geospatial data warehouse capability at the NCCIPS, integrating and supporting geospatial activities of USVISIT, DNDO, and other geospatially-based DHS mission systems, such as SBInet.
- Enhance COP capability to support mission needs. Expand COP access to FEMA, State, Local and Tribal Partners
- Reduce the number of unique products and services in the TRM by 10%
- Complete, by the end of FY2009, 25% of the transition to the DHS target architecture
- Deploy the DHS enterprise solution for SSO for six (6) major applications.

- Implement the use of SmartCards to enable two and three-factor logical access
- Align 100% of IT investments within priority portfolios to targets
- Develop the initial data asset inventory baseline, using segment architectures, to allow for use of this baseline in the IT Investment Review process. This allows data to drive the alignment of the systems that support the mission within the Enterprise Architecture.
- Continued development of the DRM portion of the Enterprise Architecture. The deliverable is the Data Reference Model 3.0 (to be completed by September 2009).
- Continued development and support of the National Information Exchange Model (NIEM) as a standard for information exchange for the Department, including specific DHS information exchanges. .
- Transition all current voice communications using secure telephone unit (STU) IIIs and secure telecommunication equipment (STEs) to the new and enhanced cryptographic systems; this entails over 10,000 secure phones

### **Security Activities**

- Maintain existing NOC/SOC capability
- Maintain Internet and Extranet Gateways
- Update and maintain Infrastructure Information Repository (IIR)
- Support transition to IPv6
- Migrate legacy data centers to the two (2) DHS Data Centers

### **Homeland Secure Data Network**

- Complete critical refreshment of one third of the established system-wide core infrastructure and site-specific aging HSDN equipment
- Complete annual Operational Analysis periodic review and reporting process, for identifying areas for improvements in costs and operational efficiencies and effectiveness

### **Key Strategic Goals**

To ensure the right people have the necessary information at the correct time, the Chief Information Officer has established the following five (5) strategic objectives:

1. Improve project management and alignment of budget and Enterprise Architecture;
2. Improve infrastructure and consolidation;
3. Continue cyber security improvements;
4. Continue to align acquisitions for IT and IT services to the department's goals
5. Transition projects into actions and operations; and
6. Improve information sharing and data collaboration/integration

### **C. Resources Requested and Performance Impact**

The CIO requests 94 positions, 94 FTE and \$247.369 million for the FY 2009 Budget. The total adjustment-to-base is a decrease of \$60.431 million and 0 FTEs. This adjustment-to-base includes a pay and non-pay inflationary increase of \$2.828 million for Salaries and Expenses and \$.573 million for HSDN. A net decrease of \$16.255 million for Information Technology Services; due in large part to the transfer of the Human Resources IT program to the office of the Chief Human Capital. A current services reduction of \$47.577 million in Security Activities secondary to the termination of a one time construction cost for NCCIPS and a reduction in base funding for the Data Center Development program. CIO requests a net increase of \$12.600 million for the following program changes in the FY2009 Budget:

- A decrease of \$7.000 million in base funding for the Watchlist Technical Integration program
- An increase of \$.500 million in recurring base funding for Enterprise Architecture
- The creation of a new program, Enterprise Data Management, with a base funding of \$2.000 million for FY2009
- The consolidation of base funding and existing programs, Solutions Engineering and Enterprise Portal, into the Enterprise Application Delivery program to maximize efficiencies and cost savings
- An increase of \$3.100 million for the Information Security Program to improve IT configuration management monitoring, improve financial system security, upgrade information security operations and support full FISMA compliance for all DHS systems. These funds will also provide financial audit and remediation support efforts, as well as transition costs to relocate the FISMA compliance tool suite
- An increase of \$14.000 million for the Homeland Secure Data Network for system-wide core infrastructure and site-specific equipment and software refreshments

### **D. How the Office of the Chief Information Officer Programs and Their Performance Goals Align to and Support the DHS Goals and Objectives.**

The following list of programs with their performance goals are followed by the DHS goals and objective they support.

Offices of the Chief Information Officer – The Department of Homeland Security components and stakeholders have information technology leadership and guidance enabling them to efficiently and effectively achieve their vision, mission, and goals.

Goal 5- Strengthen and Unify DHS Operations and Management

Objective 5.1 Strengthen and Unify DHS Operations and Management

**E. Performance Based Budget Highlights by Program 1**

For each major program, the performance goal, alignment to DHS goals and objectives, total dollars and FTE, and main performance measure/s are shown below. For many of the programs, more performance information may be found on the OMB web site [Expectmore.gov](http://Expectmore.gov) (program names may differ slightly from those used in this document).

|  |           |           |           |           |           |           |
|--|-----------|-----------|-----------|-----------|-----------|-----------|
| <b>Program: Office of the Chief Information Officer</b>  |           |           |           |           |           |           |
| <b>Performance Goal:</b> The Department of Homeland Security components and stakeholders have world class information technology leadership and guidance enabling them to efficiently and effectively achieve their vision, mission and goals. |           |           |           |           |           |           |
| Objective 3.1 Fixed Critical Infrastructure and Key Assets– 28.5% allocation   |           |           |           |           |           |           |
| Objective 5.1 Strengthen and Unify DHS Operations and Management- 71.5% allocation   |           |           |           |           |           |           |
| <b>Fiscal Year:</b>  | FY 2004   | FY 2005   | FY 2006   | FY 2007   | FY 2008   | FY 2009   |
| <b>\$ Thousands</b>  | \$265,047 | \$275,270 | \$254,740 | \$330,549 | \$295,200 | \$247,369 |

# Budget Request and Supporting Information

## Departmental Management and Operations Office of the Federal Coordinator for Gulf Coast Rebuilding

### I. Appropriation Overview

#### **A. Mission Statement for the Gulf Coast Rebuilding Office:**

The President created the Gulf Coast Rebuilding Office and designated a Coordinator of Federal support for the recovery and rebuilding of the Gulf Coast Region by Executive Order 13390 on November 1, 2005. The Coordinator is responsible for working with Federal, State and local officials to identify the priority needs for long-term rebuilding; communicating those needs to the decision makers in Washington, DC; and advising the President on the most effective, integrated and fiscally responsible Federal strategies for support of Gulf Coast recovery.

#### **B. Budget Activities:**

The Office of the Federal Coordinator for Gulf Coast Rebuilding coordinates the long-term Federal rebuilding efforts by working with State and local officials to focus on a set of prioritized, integrated and long-term initiatives to rebuild the region, such as: restoring long-term safety and security, renewing economic activity, and revitalizing communities.

#### **C. Budget Request Summary:**

For the Office of the Federal Coordinator for Gulf Coast Rebuilding, the Department is requesting \$291,000. This is a decrease of \$2.409 million from the FY 2008 Enacted level of \$2.700 million.

The Office of the Federal Coordinator for Gulf Coast Rebuilding requests \$291,000 for this activity. This is a decrease of \$2.409 million from the FY 2008 Enacted appropriation of \$2.700 million. This office was established by Executive Order 13390 on November 1, 2005 consistent with applicable law, and shall terminate three years from the date of this order on October 31, 2008.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of the Federal Coordinator for Gulf Coast Rebuilding (OFC) coordinates the long-term Federal rebuilding efforts by working with Federal, State and local officials to focus on a set of prioritized, integrated and long-term initiatives to rebuild the region, such as: restoring long-term safety and security, renewing economic activity, and revitalizing communities.

The Coordinator is responsible for working with the Federal, State and local officials to identify the priority needs for long-term rebuilding; communicating those needs to the decision makers in Washington, DC; and advising the President on the most effective integrated and fiscally responsible Federal strategies for support of Gulf Coast recovery.

The President created the Gulf Coast Rebuilding Office and designated a Coordinator of Federal support for the recovery and rebuilding of the Gulf Coast Region by Executive Order 13390 on November 1, 2005. Since the 2005 hurricanes, Louisiana has stressed that its top priority is rebuilding and strengthening its hurricane protection system. OFC has worked with all partners, including the Corps of Engineers, to ensure that this is accomplished. To date, the President has worked with Congress to secure more than \$7.0 billion for repair and restoration of floodwalls and levees and has committed to seeking up to \$5.8 billion in additional funding in the FY 2009 President's Budget for greater New Orleans hurricane protection. In addition, OFC worked with the Louisiana delegation and other members of Congress, consistent with Administration policy priorities, to ensure that Louisiana

and other Gulf States received a share of oil and gas drilling royalties, which are, in Louisiana, dedicated to hurricane protection.

Description of Item

The Office of the Federal Coordinator for Gulf Coast Rebuilding will be terminated effective October 31, 2008, consistent with Executive Order 13390. This office is requesting a reduction of \$2.409 million in FY 2009.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
Departmental Management and Operations  
Office of the Federal Coordinator for Gulf Coast Rebuilding  
Justification of Proposed Changes  
Appropriation Language**

For necessary expenses of the Office of the Federal Coordinator for Gulf Coast Rebuilding, ~~[\$2,700,000]~~**\$291,000**[:Provided, That \$1,000,000 shall not be available for obligation until the Committees on Appropriations of the Senate and the House of Representatives receive an expenditure plan for fiscal year 2008. (Consolidated Appropriations Act, 2008)].

**Explanation:**

The proposed change to this legislative language reflects the termination of this office by Executive Order 13390 on October 31, 2008.

**Mission Statement**

The Office of the Federal Coordinator for Gulf Coast Rebuilding coordinates the long-term Federal rebuilding efforts by working with Federal, State, and local officials to focus on a set of prioritized, integrated and long-term initiatives to rebuild the region such as restoring long-term safety and security, renewing economic activity and revitalizing communities.

Liasse between Federal, State, and local officials and advise the President and his senior leadership on the most effective, integrated, and fiscally responsible Federal strategies for supporting a full and vibrant recovery.

This office was established by Executive Order 13390 on November 1, 2005, consistent with applicable law, and shall terminate three years from the date of this order on October 31, 2008.

**Summary Justification and Explanation of Changes**

|                           | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>All Object Classes</b> | <b>\$2,317</b>         | <b>\$2,700</b>          | <b>\$291</b>            | <b>(\$2,409)</b>               |

The Office of the Federal Coordinator for Gulf Coast Rebuilding has requested \$291,000 for FY 2009, a decrease of \$2.409M from the FY 2008 Enacted level of \$2.700M. This office will be closed at the end of the first month in FY 2009.

#### A. Mission and Description of the Office of the Federal Coordinator for Gulf Coast Rebuilding

The Office of the Federal Coordinator for Gulf Coast Rebuilding (OFCGCR) supports the Department of Homeland Security (DHS) by facilitating the development of a long-term plan for rebuilding the region devastated by Hurricanes Katrina and Rita. The President created the Gulf Coast Rebuilding Office and designated a Coordinator of Federal support for the recovery and rebuilding of the Gulf Coast Region by Executive Order 13390 on November 1, 2005.

The overarching mission of the Federal Coordinator is to identify the priority of needs for long-term rebuilding by working with the people on the ground, including State and local officials; communicate those realities to the decision makers in Washington; and advise the President and his senior leadership on the most effective, integrated, and fiscally responsible Federal strategies for supporting a full and vibrant recovery. In particular, OFCGCR is responsible for managing information flows, requests for actions, and discussions regarding the Federal response with Congress, state and local governments, the private sector and community leaders.

#### B. Major Activities and Key Strategic Issues

In FY 2007, the Office of the Federal Coordinator for Gulf Coast Rebuilding worked with other government agencies, including the Department of Housing and Urban Development, the Federal Emergency Management Agency, the Small Business Administration, and the Department of Commerce to coordinate assistance to individuals affected by Hurricanes Katrina and Rita. In FY 2008 and 2009, the OFCGCR will continue to advocate for long-term Federal rebuilding efforts in the affected areas. OFCGCR will continue to work with state and local officials to focus on a set of prioritized, integrated and long-term initiatives to rebuild the region, including the restoration of long-term safety and security, the renewal of economic activity, and the revitalization of communities.

#### C. Resources Requested and Performance Impact

For the Office of the Federal Coordinator for Gulf Coast Rebuilding, the Department is requesting \$291,000. This is a decrease of \$2.409 million from the FY 2008 Enacted level of \$2.700 million. This office will be closed at the end of the first month in FY 2009.

#### D. How OFCGCR Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.

The Office of the Federal Coordinator for Gulf Coast Rebuilding (OFCGCR) coordinates Federal, state, and local efforts to rebuild the region devastated by Hurricanes Katrina and Rita. OFCGCR supports the following DHS goal.

**Goal Five:** Strengthen and Unify DHS Operations and Management.

E. Performance Based Budget Highlights by Program <sup>1</sup>

Because it is part of Departmental Management and Operations, the OFCGCR FYHSP performance goal, performance measures, budget, and FTE are:

|  |         |         |         |         |         |         |

# BUDGET REQUEST AND SUPPORTING INFORMATION

## ANALYSIS AND OPERATIONS

### I. Appropriation Overview

#### **A. Mission Statement for Analysis and Operations:**

The Analysis and Operations appropriation provides the resources for the Office of Intelligence and Analysis and the Office of Operations Coordination that enable the critical support necessary to ensure the protection of American lives, economy and property by improving the analysis and sharing of threat information. Specific protective measures and countermeasures necessary to support this mission are developed with input from Federal, State, local and private partners.

#### **B. Budget Activities:**

*Office of Intelligence and Analysis (I&A)* – I&A is responsible for the Department’s intelligence and information gathering and sharing capabilities for and among all components of DHS. As a member of the U.S. Intelligence Community (IC), I&A is the nexus between the nation’s intelligence apparatus and DHS components. I&A ensures that information is gathered from all relevant DHS field operations and that this information is shared with the IC to produce accurate, timely and actionable analytical intelligence products and services for DHS stakeholders. The Under Secretary for Intelligence and Analysis (USIA) leads I&A, and is also the Department’s Chief Intelligence Officer (CINT) responsible for managing the entire DHS Intelligence Enterprise.

*Office of Operations Coordination (OPS)* – The mission of the Office of Operations Coordination is to integrate DHS and interagency operations and planning to prevent, protect, respond to and recover from terrorist threats attacks or threats from other man-made/natural disasters. OPS disseminates threat information, maintains and disseminates domestic situational awareness, performs incident management and operational coordination among all DHS components, Federal, state, local, tribal, private sector and international partners’ to facilitate a coordinated and efficient effort to secure the Homeland against all threats and hazards.

#### **C. Budget Request Summary:**

Analysis and Operations requests 621 positions, 594 FTE, and \$333,521,000 for FY 2009. The total adjustments-to-base is 38 FTE and \$6,326,000. The program increases include 65 positions, 38 FTE, and \$21,195,000.

iii. Status of Congressionally Requested Studies, Reports, and Evaluation

**Department of Homeland Security  
Office of Inspector General**

| Fiscal Year | Due Date  | Reference/Citation                     | Requirement   | Status |
|-------------|-----------|--|---|--------|
| 2008        | 4/1/2008  | P.L. 110-161                           | <p>Requires the IG to investigate Coast Guard's (CG) role in the M/V Cosco Busan oil spill in San Francisco Bay on November 7,2007, including the difficulties faced when ships transit ports in heavy fog; proper standard operating procedures watchstanders at the vessel traffic services San Francisco control center should follow when observing a ship to be on a course that may lead to a collision or allision; whether the Unified Command effectively managed the resources available to CG related to containment and remediation of the spill; whether the rapid response plan for the treatment of marine resources, wildlife and fisheries required by the Oil Pollution Act of 1990 was followed and was adequate to guide this aspect of the response; and whether the Area Response Plan contains provisions adequate to guide the response to a spill of the type encountered in this allision, and whether these provisions were followed during the response to this incident. The investigation should specifically address unacceptable delays in the reporting of information to local authorities the day of the incident, the impact of those delays on the response</p> <p>and the adequacy of CG's initial investigation of the allision. In addition, the investigation should review CG's initial investigation of the allision. In addition, the investigation should review CG's existing emergency response capabilities in San Francisco Bay and make recommendations regarding needed improvements and should include whether recent reorganizations at CG contributed to any response delays. The conferees direct the IG to submit a report no later than April 1,2008, setting forth the conclusions of this investigation.</p> |        |
| 2008        | 5/26/2008 | Senate Report 110-84                   | <p>In fiscal year 2007, the Committee received a Government Accountability Office [GAO] Report (GAO-07-529) which reviewed U.S. Customs and Border Protection [CBP] revenue oversight. The Committee learned CBP needs to improve workforce planning and accountability. The Committee includes \$1,200,000 for the Inspector General to conduct CBP revenue oversight.</p>   |        |
| 2008        | 5/26/2008 | P.L. 110-161                           | <p>Requires the IG to investigate Federal Management Agency's (FEMA) policies and processes regarding formaldehyde in trailers purchased by the agency to house disaster victims. The IG shall investigate the process used by FEMA to collect and respond to health and safety concerns of trailer occupants; whether FEMA adequately notified occupants of potential health and safety concerns; and whether FEMA has proper controls in and processes in place to deal with health and safety concerns of those living in trailers following disasters. The IG is to report its findings to the Committees on Appropriations, including any recommendations.</p>   |        |
| 2008        | 5/26/2008 | P.L. 110-161 (originated as SR 110-84) | <p>The Senate Report 110-84 directs the IG to evaluate the Department's FOIA program, staffing levels, and the adequacy of resources to determine if the program can be operated in a more efficient and cost effective manner at the department and component level. The Senate report requested that the IG conduct the FOIA evaluation, but the Committees on Appropriations believe a GAO evaluation is more appropriate to allow DHS' FOIA program to be compared with other executive branch agency FOIA programs.</p>  |        |
| 2008        | 5/26/2008 | P.L. 110-161                           | <p>The 2007 Continuing Resolution continued the government-wide provision prohibiting an executive branch agency from producing any prepackaged news story intended for broadcast or distribution in the United States, unless the prepackaged news story contains clear notification that the story was produced and funded by the Federal government. Given the recent revelation of a staged press conference in FEMA, the Inspector General is directed to audit DHS' compliance with this provision.</p>   |        |

|      |           |              |  |  |
|------|-----------|--------------|--|--|
| 2008 | 5/26/2008 | P.L. 110-161 | Requires the IG to report on the vulnerabilities that exist to our aviation system if the Secure Flight program does not screen against the full terrorism watch list. The Committees on Appropriations are concerned that, even with the Secure Flight program, the Transportation Security Administration plans to continue to screen passenger names against only a subset of the full terrorist watch list.  |  |
| 2008 | 5/26/2008 | P.L. 110-161 | Requires the IG to review departmental contracts awarded thorough other than full and open competition. Also, the appropriations bill includes a new provision proposed by the House prohibiting the obligation of funds to the Office of Secretary and Executive Management, the Office of the Under Secretary for Management, and the Office of the Chief Financial Officer for grants or contracts awarded by any means other than full and open competition. Certain exceptions apply. The amended bill requires the IG to review Departmental contracts awarded noncompetitively and report on the results. |  |

# BUDGET REQUEST AND SUPPORTING INFORMATION

## OFFICE OF INSPECTOR GENERAL AUDIT, INSPECTIONS AND INVESTIGATIONS PROGRAM

### I. Appropriation Overview

The DHS Office of Inspector General (OIG) was established by the *Homeland Security Act 2002* (P.L. 107-296), by amendment to the *Inspector General Act of 1978*. The Inspector General (IG) has a dual reporting responsibility, to the Secretary of Homeland Security and to the Congress. The OIG serves as an independent and objective inspection, audit, and investigative body to promote economy, efficiency, and effectiveness in DHS programs and operations, and to prevent and detect fraud, waste, and abuse in such programs and operations. For FY 2009, the OIG is requesting, 602 positions, 577 full time equivalent (FTE) and \$101.0 million. The request includes 1 FTE and \$1.9 million for adjustments-to-base, and a program increase of 25 FTE and \$6.4 million.

### A. Mission Statement for the Office of Inspector General:

The IG is responsible for conducting and supervising audits, investigations, and inspections relating to the programs and operations of the Department. The OIG examines, evaluates and, where necessary, critiques these operations and activities, recommending ways for the Department to carry out its responsibilities in the most economical, efficient, and effective manner possible.

In addition, the OIG is responsible for the oversight of the management and expenditures of all contracts, grants, and governmental operations related to the on-going hurricane relief efforts. This oversight is to be accomplished through internal control reviews and contract audits to ensure appropriate control and use of disaster assistance funding. The OIG will ensure this oversight encompasses an aggressive and on-going audit and investigative effort designed to identify and address fraud, waste, and abuse as early as possible. The OIG will also coordinate audit activities of other inspector generals, who oversee funds transferred to their respective departments and agencies by FEMA to aid in disaster relief assistance.

### B. Budget Activities:

**Audit, Inspections and Investigations Program** - The OIG has one budget activity which consists of the following components:

*Executive Office:* This office consists of the IG, the Deputy IG, a congressional liaison and media affairs officer, an executive assistant, and support staff. It provides executive leadership to the OIG with 6 FTE employees.

*Office of Counsel to the Inspector General:* The Office of Counsel to the IG provides legal advice to the IG; supports audits, inspections, and investigations by ensuring that applicable laws and regulations

are followed; is the OIG's designated ethics office; manages the OIG's *Freedom of Information Act* and *Privacy Act* responsibilities; and furnishes attorney services for the issuance and enforcement of OIG subpoenas, *False Claims Act* and *Civil Monetary Penalty Act* claims, as well as suspension and debarment actions. The office has 12 FTEs.

*Office of Audits:* The Office of Audits conducts and coordinates audits and program evaluations of the management and financial operations of DHS. Auditors examine the methods employed by agencies, bureaus, grantees, and contractors in carrying out essential programs or activities. Audits evaluate whether established goals and objectives are achieved and resources are used economically and efficiently; whether intended and realized results are consistent with laws, regulations, and good business practice; and whether financial accountability and the reliability of financial statements are ensured. The office has 146 FTEs.

*Office of Emergency Management:* The Office of Emergency Management (formerly the Office Disaster Assistance Oversight) provides an aggressive and ongoing audit and investigative effort designed to ensure that disaster relief funds are being spent appropriately, while identifying fraud, waste, and abuse as early as possible. There are 40 to 60 Presidential disaster declarations each year and hundreds of open disasters. The office will continue its proactive and aggressive disaster oversight activities working with DHS/FEMA to ensure accountability and identify and resolve potential problems before they occur. The office will focus on internal controls, grant and contract audits, performance reviews, congressional requests, and special projects covering all FEMA programs and operations. The office coordinates with other Federal Inspector General Offices, meets with state and local officials on audit and investigative matters, and advises contractors and grantees on compliance requirements. The office has 75 FTEs supplemented by temporary and term employees as needed to cover disaster surges, including a continued presence in the gulf coast area.

*Office of Inspections:* The Office of Inspections compliments the work of the OIG by providing quick reviews of those DHS programs and operations that are of pressing interest to Department managers, the Congress, or the IG. The Office of Inspections' reviews crosscut all DHS programs and operations. This office has 41 FTEs.

*Office of Information Technology:* The Office of Information Technology conducts audits and evaluations of DHS' information management, cyber infrastructure, and systems integration activities. The office reviews the cost effectiveness of acquisitions, implementation, and management of major systems, and telecommunications networks across DHS. In addition, it evaluates the systems and related architectures of DHS to ensure they are effective, efficient, and implemented according to applicable policies, standards, and procedures. The office also assesses DHS' information security program as mandated by the *Federal Information Security Management Act (FISMA)*. This office has 42 FTEs.

*Office of Investigations:* The Office of Investigations conducts investigations into allegations of criminal, civil, and administrative misconduct involving DHS employees, contractors, and grantees. This office examines specific allegations, reports, or other information indicating possible violations of laws or regulations. Additionally, it monitors the investigative activity of the Department's various internal affairs offices. This office has 188 FTEs, of which approximately 25 are currently dedicated to the work generated by Hurricanes Katrina and Rita. This office also has 19 temporary employees dedicated to Gulf Coast hurricane recovery operations.

*Office of Administration:* The Office of Administration provides critical administrative support functions, including OIG strategic planning; development and implementation of administrative directives; the OIG's information and office automation systems; budget formulation and execution; correspondence; printing, and distribution of OIG reports; and oversight of the personnel, procurement, travel, and accounting services provided to the OIG, on a reimbursable basis, by the Bureau of Public Debt. The office also prepares the OIG's annual performance plans and the Semiannual Reports to the Congress. This office has 41 FTEs.

**C. Budget Request Summary:**

The OIG is requesting 602 positions, 577 FTE and \$101.023 million for FY 2009. The program increases include 50 positions, 25 FTE and \$6.4 million. The adjustments-to-base are for 1 FTE and \$1.9 million.

| 2009 Program Change                   | 50   | 25  | 6,400     |
| 2009 Request                          | 602  | 577 | 101,023   |
| Total Change 2008-2009                | 50   | 26  | (7,688)   |

1 Includes actual obligations associated with the transfer and the supplemental transfers from the Disaster Relief Fund.

2 Includes the \$16.0 million transfer from the Disaster Relief Fund. Technical correction for number of positions.

3 Includes an adjustment for the \$16.0 million transfer from the Disaster Relief Fund for FY 2008. Technical correction for number of positions.

For FY 2009, the Office of Inspector General requests \$101.0 million for this activity. This is a decrease of \$7.656 million over FY 2008 for pay and non-pay inflation, adjustments-to-base, an adjustment for a non-recurring transfer from the Disaster Relief Fund (\$16.0M), as well as a program increase. The requested resources, \$6.4 million, will provide additional staff: to increase OIG oversight of DHS preparedness programs, through audits of preparedness grant programs, science and technology programs, and department-wide programs that establish the Department's baseline preparedness efforts; and to strengthen OIG oversight of DHS border security and enforcement programs through a proactive program of audits and on-going oversight of the policies, and initiatives and funds to secure the nation's borders.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The OIG's key legislated responsibilities are to:

- Promote economy, efficiency, and effectiveness in the management of the Department's programs and supporting operations;
- Conduct and supervise audits, investigations, and reviews relating to the Agency's programs and support operations;
- Detect and prevent fraud, waste, and abuse;
- Review existing and proposed legislation and regulations and make appropriate recommendations;
- Maintain effective working relationships with other federal, state, and local governmental agencies, and non-governmental entities regarding the mandated duties of the IG;

- Inform the Secretary of the DHS and the Congress of serious problems and recommend corrective actions and implementation measures;
- Comply with the audit standards of the Comptroller General of the Government Accountability Office (GAO); avoid duplication of GAO activities; and
- Report violations of federal criminal law to the U.S. Attorney General.

Anticipated FY 2009 performance is described below.

- Audit - Barring any increases in our current services level, Office of Audits' plans include issuing 42 program and financial audits during FY 2008. OIG anticipates that this will include a carryover of 12 program audits into FY 2009. The OIG will continue to work closely with DHS management and congressional oversight committees to identify potential audit work that will promote the economy, efficiency, and effectiveness of departmental programs and operations.
- Office of Emergency Management Oversight (EMO) – The Office of Emergency Management Oversight (formerly the Office of Disaster Assistance Oversight) provides an aggressive and ongoing audit and investigative effort designed to ensure that disaster relief funds are being spent appropriately, while identifying fraud, waste, and abuse as early as possible. There are 40 to 60 Presidential disaster declarations each year and hundreds of open disasters. The office will continue its proactive and aggressive disaster oversight activities working with DHS/FEMA to ensure accountability, and identify and resolve potential problems before they occur. The office will focus on internal controls, grant and contract audits, performance reviews, congressional requests, and special projects covering all FEMA programs and operations. The office coordinates with other Federal Inspector General Offices, meets with state and local officials on audit and investigative matters, and advises contractors and grantees on compliance requirements.
- Information Technology (IT) - In FY 2009, OIG's IT office will continue to evaluate the Department's progress in establishing a cost-effective and secure information technology infrastructure. Specifically, IT will assess the progress DHS is making in consolidating its myriad networks and implementing a standard IT platform across the Department. In addition, IT will evaluate the effectiveness of DHS' strategies and tools for sharing intelligence information with key stakeholders in the intelligence community; DHS' programs to protect privacy; and, DHS' efforts to implement a border security system and modernize its disaster management and its maritime command and control systems. Furthermore, IT will conduct a series of reviews addressing the security aspects of wireless networks and devices, consolidated data centers, and the US-Visit and Secure Flight programs. Finally, the IT office will assess DHS efforts to address significant deficiencies identified in the IT security program by ensuring that progress is made in developing components' plans of action and milestones; ensuring that security policies and procedures are implemented Department-wide; and ensuring that all systems are adequately certified and accredited.
- Office of Inspections (ISP) - ISP emphasizes reviews of DHS operations involving intelligence information management, science and technology, and overseas operations. In addition, ISP oversees DHS compliance with E.O. 12333 (intelligence on U.S. persons) and reports quarterly to the President's Intelligence Oversight Board. With respect to

intelligence information management, ISP will review the Homeland Security Infrastructure Threat and Risk Analysis Center and state and local intelligence fusion centers. Regarding science and technology, ISP will examine the Science and Technology Directorate programs that relate to the Homeland Security Policy Institute, advanced research projects, and research and development in aviation. ISP's overseas efforts will include an assessment of visa security issues and a detailed examination of the extent that DHS' overseas operations are coordinated. In addition to these specialty areas ISP will coordinate with other federal agencies having cognizance for public sectors under the Emergency Support Functions of the National Response Plan; for example, DHS' work with the Department of Energy regarding the petroleum and national gas sub-sector. ISP will review DHS' efforts to coordinate preparedness grants, assess DHS' grant oversight capacity, and examine the effectiveness of the pre-disaster mitigation grant program. In addition, ISP will continue to monitor the Port Security, Urban Area Security Initiative, Critical Infrastructure, and Buffer Zone Protection Plan grant programs.

- Investigations – Investigations will continue to work to protect the integrity of the U.S. Department of Homeland Security (DHS) by vigorously investigating the most serious criminal, civil, and administrative allegations involving DHS personnel, programs, and operations.

In FY 2009, the DHS OIG Office of Investigations, Inspection Division will conduct internal inspections of the following OIG offices: the Tucson Field Office including the Yuma sub-office, the Dallas Field Office, the Houston Field Office including the McAllen RAC office and the Del Rio and Laredo sub offices, the Washington DC Field Office, and the Special Investigations Division.

In addition to maintaining effective liaison with the various internal affairs components within DHS, the OIG Office of Investigations, Inspection Division will continue to exercise our authorized oversight function by reviewing the inspection divisions of the following DHS components: the United States Secret Service, Inspection Division; the Transportation Security Division, Office of Internal Affairs and Program Review; and the U.S. Customs and Border Protection, Office of Internal Affairs.

The office will continue to support the Hurricane Katrina Task Force (HKTF) by increasing the FEMA investigative caseloads of our recently established offices in Baton Rouge, LA, Biloxi, MS, and Hattiesburg, MS, which are staffed primarily by temporary investigators.

#### IV. Program Justification of Changes

**Department of Homeland Security  
Office of Inspector General (OIG)  
Audit, Inspections and Investigations Program  
Justification of Program Changes**

Program Increase: Personnel Support

Strategic Goal(s) & Objective(s): 5.0 - Strengthen and Unify DHS Operations and Management  
PPA: Audit, Inspections and Investigations

Program Increase: Positions 50 FTE 25 Dollars \$6,400,000

<sup>1</sup> Includes actual obligations associated with the transfer and supplemental transfers from the Disaster Relief Fund.

<sup>2</sup> Includes the \$16.0 million transfer from the Disaster Relief Fund. Technical correction for number of positions.

#### Description of Item

The OIG focus initially shifted from the disaster programs to other priority areas when DHS was created. In the wake of Hurricane Katrina, and other subsequent natural disasters, OIG needed to redirect resources from the Office of Audits to create an Office of Emergency Management Oversight. The requested resources will provide additional staff to increase OIG oversight of DHS preparedness programs, through audits of preparedness grant programs, science and technology programs, and department-wide programs that establish the Department's baseline preparedness efforts; and to strengthen OIG oversight of DHS border security and enforcement programs through a proactive program of audits and on-going oversight of the policies, and initiatives and funds to secure the nation's borders.

#### Justification

**Audit** - The Nation's preparedness lies in its ability to have in place sufficient personnel and equipment to organize and manage the Nation's capability to prevent, protect against, respond to, and recover from significant threats or events. By answering fundamental questions within each of the Department's components, programs, and functional areas, the OIG will try to determine how well the Department is performing; and will be able to recommend ways to improve the efficiency and effectiveness of the Department's operations.

The OIG's role to assist the Department in its efforts to implement effective preparedness programs and to ensure adequate systems and controls are in place is most critical in the Department overcoming the challenge that it has in obtaining an opinion on its financial statements. There are

numerous material weaknesses and to move forward, OIG will work with the Department to prepare well-developed and comprehensive corrective action plans to address these known internal control weaknesses.

The Department's ability to control the Nation's borders and counter the illegal immigration operations requires OIG oversight. As policies and initiatives are approved and funded, the OIG will examine the efficiency and effectiveness of the program controls and systems. We have monitored the initiation of the SBInet program and provided a risk advisory with recommendations to address observed weaknesses in the program. Other components share border security responsibilities and are necessarily part of a comprehensive solution to border and immigration control. Our borders need to become less porous, and our policy and practice of managing immigration need to comply with established standards.

As for the numerous border security efforts, ICE leads plans to improve the apprehension, detention and removal of illegal aliens – which requires coordination efforts across DHS, as well as collaboration with the Department of Justice and other agencies that share responsibility for this function. USCIS has plans for streamlining benefits processes and expanding the E-Verify program. OIG plans to use the requested resources to review the plans, practices, and outcomes related to these efforts to ensure that they are effective in securing our borders and enforcing border control laws and regulations. The OIG also plans to measure the Department's progress in meeting these initiatives and their impact on border control. Without a full complement of staff working on the Department's overall border control initiatives and related procurement policies, the Department could easily lose control of these key national programs.

As the Secretary and Congress develop policies to tighten the borders, the Department must also have an acquisition management infrastructure in place that allows effective oversight of the complex, large dollar procurements critical to its mission. OIG has identified significant risks and vulnerabilities that might threaten the integrity of DHS operations. In general, DHS needs to have more comprehensive acquisition guidance and oversight for the components. Three specific vulnerable areas are the adherence to ethical conduct, overall contract program management, and general procurement management (e.g., many components reported that their lack of staffing prevents proper planning and limits their ability to monitor contractor performance). There is a critical need for the OIG's independent reviews of the Department's management of acquisition programs, as well as its contractor administration processes.

Also, as the Department has been given authority to deviate from normal acquisition processes and take advantage of legislated funding for a wide-range of research and development initiatives, the OIG will verify where and how these funds are being expended, what is being delivered for the amounts expended, and whether program managers are complying with established guidelines.

Additional staff will enable OIG to provide oversight of the Department's major acquisition programs related to border control; enforcement of immigration laws and regulations; the contracts assisting in the management of detained or apprehended illegal immigrants; and the money appropriated to affect immigration control, border security, and port surveillance. Programs and initiatives like the SBI, US-VISIT, the equipping and training of the 3,000 additional border agents, to counter narcotics and smuggling operations, as well as to control immigration, and to secure the borders need immediate and constant oversight and scrutiny.

The OIG also needs to enhance its financial management and assurance audit groups to ensure that the Department is taking necessary corrective actions to improve its financial reporting and other identified weaknesses related to its preparedness and border control and enforcement programs.

The Department awards billions of dollars to state and local governments, as well as research institutes to improve the Nation's preparedness posture and understand the threats facing us. The OIG's role is to assist the Department in its efforts to implement effective preparedness programs by ensuring adequate systems and controls are in place to assess the performance of these programs and that funds are spent as intended. To that end, we have identified several federal assistance programs that have the potential for duplicating DHS grant programs. Our reports state that some states lack the ability to effectively manage and monitor grants funds, or demonstrate the ability to measure improvements in preparedness. The OIG needs to further report on the performance of the Department's preparedness and science and technology grant programs and the expenditures of program funds by the Department and its grantees. The Department awarded over \$2.6 billion for preparedness, which included funds for grants to states and local governments for equipment, training, exercises, and various other measures designed to increase the level of security across the Nation and that amount will likely continue to grow. As grant funds are expended, it is imperative that the Department and its stakeholders are assured that the funds were expended as intended on the preparedness of our Nation's first responders and others.

The Department also manages science and technology preparedness programs that are intended to provide the next generation of detection devices and counter measurers through the Department's work with and funding of university and industry based researchers. In FY 2007, the Department deployed over 880 radiation portal monitors at land and seaports; inspected over 442 million visitors, and removed a record of 189,670 illegal aliens from our country. However, further audit coverage is needed in this area to provide independent assessment of the Department's progress and the effectiveness of these cooperative relationships, and oversight of the funds spent.

The requested resources will ensure that Department-wide programs and initiatives like the National Response Plan, cyber-security, intelligence sharing, networking with state and local governments, and the connectivity and communications capability of DHS operations centers will proceed with external validation and scrutiny.

### **Impact on Performance**

As mentioned above, the additional staff in the financial management and assurance groups will enable OIG to provide oversight of the Department's efforts to improve its financial reporting and correct other program weaknesses identified in our reports that is sufficient to meet requirements. The OIG will also be able to fully review the Department's systems and internal controls over financial reporting and follow-up on over 1,000 open recommendations that our office and others have issued to the Department concerning these and other programs.

The additional staff will conduct several new audits (of varying complexity), covering several aspects of immigration and border control. OIG needs to continue review of CBP's SBInet and Coast Guard's Deepwater acquisition processes. These audits will include review of: our national infrastructure protection and transportation security programs; the funding and eventual implementation plans for 3,000 more Border Patrol agents, the Western Hemisphere Travel Initiative, and USCIS' employment Eligibility Verification program.

In addition to this, the application and security of biometric data obtained through US-VISIT and how the components and intelligence elements use this data needs critical analysis. Plus, continued review and evaluation of the policies and procedures associated with the apprehension, detention, and removal of illegal immigrants will increase as these policies change, are legislated, or become controversial through implementation.

The Department and its components will need to think globally about the impact of policy changes on funding, material, and personnel requirements across the organization. The requested staffing level will enable OIG to review the policies, track the money, and critically review the implementation of the immigration and border operations. In turn, this facilitates an independent assessment of these programs to provide assurance that the Department's resources are being used efficiently and effectively.

The OIG will conduct audits of cross component initiatives such as, interoperable commoditization and intelligence sharing, and a follow-on audit to our audit of the National Response Plan.

The audit coverage that the OIG provides helps first-responders to get the money needed to prepare their equipment and facilities, urban areas to get the assistance to prepare for accidents or incidents and enables state homeland security offices to support their communities.

The requested staffing level will also enable OIG to assess whether by 2011 the Department's work in the science and technology area will result in the development and deployment of a fully integrated decision making tool to support surveillance, detection, and incident characterization and decision support system as outlined in the Secretary's FY 2008 – 2012 planning guidance.

Because OIG is able to audit Department-wide programs and review the Department's cross-component initiatives and policies such as intelligence sharing, networking with state and local governments, and science and technology initiatives, OIG ensures the effectiveness and integrity of the Department's ability to deal with the day-to-day issue of cyber-security, the detection of explosives and narcotics, and general ability to secure the Nation's borders, as well as the critical facilities making up our Nation's infrastructure.

Overall, in the Audit area, the additional personnel will allow the IG to better assess the Department's ability to prevent, respond, and recover from terrorist attacks and to prepare, respond, and recover from disasters by:

- Providing oversight and timely recommendations for improving DHS management and operations in a greater number of acquisition programs;
- Getting involved and influencing management direction and positive change in the early phases of new DHS programs and initiatives;
- Providing continuous monitoring and evaluation of programs;
- Providing a more timely response to requests for reviews on issues brought forth from Congress, and reducing the impact these requests have on the planned audits;
- Developing more in-depth research and background into the audit areas, developing more effective recommendations for the auditees and management;
- Monitoring recommendations to audit findings, reporting auditee achievements, and ensuring adequate response to needed program internal controls;
- Ensuring more comprehensive audit follow-up for high-risk programs.

With respect to the impact of our reports, we have been able to document a significant level of success in developing recommendations that are accepted by Departmental management.

### **Emergency Management Oversight**

In FY 2005, and shortly after Hurricane Katrina, the Congress passed legislation that provided over \$63 billion to DHS for disaster relief, including \$15 million for the DHS-OIG to oversee the management and expenditure of those funds. The circumstances created by Hurricanes Katrina and Rita, provided an unprecedented opportunity for fraud and mismanagement, and some estimate that the cost to recover from the storm and rebuilding of the affected areas could reach \$200 billion or more. It is our mission to prevent fraud, waste and abuse in this and other unforeseen recovery efforts.

In the face of these unprecedented disasters, and to address any future disasters and/or acts of terrorism, we have established an Office of Emergency Management Oversight (EMO) within the OIG. We have reallocated 75 permanent positions to that office. While it is true that our work on Katrina recovery will diminish after the next couple of years, it is critical we maintain sufficient staff and funding to manage and investigate fraud of future disasters. OIG now has an office that will be prepared to respond to the next catastrophic disaster, whether it is an earthquake or terrorist attack. In addition, we are reviewing FEMA programs and operations. We are overseeing the closeout of hundreds of open disasters, and will review the 40 to 60 disasters that the President declares each year. We also review FEMA's efforts to prepare for the next catastrophic disaster, its reform efforts, and its assimilation of preparedness functions.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Office of Inspector General  
Justification of Proposed Changes in Salaries and Expenses  
Appropriation Language**

For necessary expenses of the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978 (5 U.S.C. App.), [\$92,711,000] *\$101,023,000*, of which not to exceed \$150,000 may be used for certain confidential operational expenses, including the payment of informants, to be expended at the direction of the Inspector General [.] **of which not to exceed \$1,000 shall be for official reception and representation expenses.** (*Department of Homeland Security Appropriations Act, [2008] 2009.*)

#### **Explanation of Changes:**

Changes allow up to \$1,000 to be used for official reception and representation expenses.

<sup>1</sup> Excludes actual obligations associated with the transfer and supplemental transfers from the Disaster Relief Fund.

<sup>2</sup> Excludes the \$16.0M transfer from the Disaster Relief Fund.

**Audit, Inspections & Investigations Program Mission Statement**

The IG is responsible for conducting and supervising audits, investigations, and inspections relating to the programs and operations of the Department. The OIG examines, evaluates and, where necessary, critiques these operations and activities, recommending ways for the department to carry out its responsibilities in the most economical, efficient, and effective manner possible.

| <b>Communication, Utilities, and Misc. Charges</b> | \$2,690        | \$2,477         | \$2,629         | \$152                  |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2009 request includes increases of \$52,000 in non-pay inflation, \$1,000 in annualization, and \$99,000 in program increases.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Printing</b> | \$6                    | \$194                   | \$204                   | \$10                           |

Printing includes all costs for printing and reproduction obtained from the private sector or from other federal entities. The FY 2009 request includes increases of \$4,000 in non-pay inflation and \$6,000 in program increases.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Advisory and Assistance Services</b> | \$2,727                | \$5,023                 | \$5,277                 | \$254                          |

Advisory and assistance services include services acquired by contract from non-federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the federal government. The FY 2009 request includes increases of \$103,000 in non-pay inflation and \$151,000 in program increases.

|                       | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Other Services</b> | \$358                  | \$989                   | \$1,044                 | \$55                           |

Other services include contractual services with non-federal sources that are not otherwise classified under Object Class 25. The FY 2009 request includes increases of \$20,000 in non-pay inflation, \$5,000 in annualization, and \$30,000 in program increases.

|  | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|--|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Purchase from Government Accounts</b> | \$5,722                | \$7,431                 | \$7,089                 | (\$342)                        |

Purchases from Government Accounts include costs for purchases from other federal government agencies or accounts that are not otherwise classified. The FY 2009 request includes increases of \$154,000 in non-pay inflation and \$250,000 in program increases. The FY 2009 request includes \$746,000 in management efficiencies.

|  | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|--|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Operation &amp; maintenance of facilities</b> | \$ 240                 | \$ 128                  | \$ 135                  | \$7                            |

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another federal government account. The FY 2009 request increases of \$3,000 in non-pay inflation and \$4,000 in program increases.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Operation &amp; Maintenance of equipment</b> | \$312                  | \$309                   | \$324                   | \$15                           |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another federal government account. The FY 2009 request includes increases of \$6,000 in non-pay inflation and \$9,000 in program increases.

|                                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Supplies &amp; materials</b> | \$534                  | \$439                   | \$479                   | \$40                           |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2009 request includes increases of \$9,000 in non-pay inflation, \$3,000 in annualization, and \$28,000 in program increases.

|                  | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Equipment</b> | \$2,290                | \$3,227                 | \$3,655                 | \$428                          |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2009 request includes increases of \$72,000 in non-pay inflation, \$6,000 in annualization, and \$350,000 in program increases.

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Land &amp; Structures</b> | \$137                  | \$0                     | \$0                     | \$0                            |

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2009 request does not include an increase of over the FY 2008 level.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Insurance Claims and Indemnities</b> | \$ 4                   | \$0                     | \$0                     | \$0                            |

Insurance claims and indemnities includes benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The FY 2009 request does not include an increase over the FY 2008 level.

|                               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Interest and Dividends</b> | \$ 26                  | \$ -                    | \$ -                    | \$ -                           |

Interest and dividends includes payments to creditors for the use of moneys loaned, deposited, overpaid, or otherwise made available. Includes payment for interest charges associated with payroll adjustments, to include Thrift Savings Plan interest payments. The FY 2009 request does not include an increase over the FY 2008 level.

|                    | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|--------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Unvouchered</b> | \$70                   | \$150                   | \$150                   | \$0                            |

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement personnel to informants, which are not subject to detailed vouchering or reporting. The FY 2009 request does not include an increase of over the FY 2008 level.

## A. Mission and Description of the Office of Inspector General

*The Homeland Security Act of 2002* provided for the establishment of the Office of Inspector General (OIG) to ensure independent and objective audits, inspections, and investigations of the operations of the Department of Homeland Security (DHS).

An Inspector General (IG), who is appointed by the President and confirmed by the Senate, reports directly to both the Secretary of DHS and the Congress. Barring narrow and exceptional circumstances, the IG may inspect, audit, or investigate anyone in the Department, or any program or operation of the Department. To ensure the IG's independence and objectivity, the OIG has its own budget, contracting, and personnel authority, separate from that of the Department. Such authority enhances the OIG's ability to promote economy, efficiency, and effectiveness within the Department, and to prevent and detect fraud, waste, and abuse in the Department's programs and operations.

Specifically, the OIG's key legislated responsibilities are to:

- Promote economy, efficiency, and effectiveness in the management of the Department's programs and supporting operations;
- Conduct and supervise audits, investigations, and inspections relating to the Department's programs and support operations;
- Detect and prevent fraud, waste, and abuse;
- Review existing and proposed legislation and regulations and make appropriate recommendations;
- Maintain effective working relationships with other federal, state, and local governmental agencies, and non-governmental entities regarding the mandated duties of the OIG's;
- Inform the Secretary of the DHS and the Congress of serious problems and recommend corrective actions and implementation strategies;
- Comply with the audit standards of the Comptroller General of the Government Accountability Office (GAO); avoid duplication of GAO activities; and
- Report violations of federal criminal law to the U.S. Attorney General.

For FY 2009, the OIG is requesting 577 full-time equivalents (FTEs). Of these FTEs, approximately 47% will be located in the Washington, D.C. headquarters office. The remainder will be located in 26 field offices in the following locations: Atlanta, Boston, Buffalo, Jersey City/New York, Marlton/Philadelphia, Northern Virginia (Washington Field Office), Orlando, Miami, San Juan, St. Thomas, Chicago, Detroit, Denton/Dallas, Houston, McAllen, El Paso, Del Rio, Laredo, Yuma, Tucson, El Centro, San Diego, El Segundo/Los Angeles, Oakland/San Francisco, Seattle and Bellingham. In addition, we have temporary field offices dedicated to Gulf Coast hurricane recovery oversight operations.

Approximately 63% of OIG employees in FY 2009 will be policy or program professional staff, including auditors, management and program analysts, and information technology experts; approximately 28% of OIG employees are criminal investigators. The remaining employees are senior executives, attorneys, management and administrative staff, and clerical employees.

## B. Major Activities and Key Strategic Issues

In the FY 2007 report of management challenges, the OIG identified the following as the most serious management challenges facing DHS:

- Catastrophic disaster response and recovery;
- Acquisition and contract management;
- Grants management;
- Financial management;
- Information technology management;
- Infrastructure protection;
- Border security;
- Transportation security;
- Trade operations and security.

Keeping with the priorities of both the Secretary and the Congress, the OIG will also focus attention on DHS' "non-homeland" missions. Particular attention will be given to the Coast Guard's "non-homeland" mission, as mandated by the *Homeland Security Act*, and to disaster response and recovery activities.

These programs and functions are not an all-inclusive inventory of the Department's activities. Rather, they represent those activities that are the core of the Department's mission and strategic objectives. By answering certain fundamental questions within each of these program and functional areas, the OIG will determine how well the Department is performing and will be able to recommend ways to improve the efficacy of the Department's programs and operations.

During FY 2007, the OIG completed significant audit, inspection, and investigative work to promote the economy, efficiency, and effectiveness of DHS programs and operations. Similar accomplishments are anticipated through FY 2009. (Additional information regarding planned accomplishments for FY 2008 is available in the FY 2008 Annual Performance Plan, located at [http://www.dhs.gov/xoig/assets/OIG\\_APP\\_FY08.pdf](http://www.dhs.gov/xoig/assets/OIG_APP_FY08.pdf). Some of our accomplishments for FY 2007 are listed below:

- The OIG issued 79 management reports (audits and inspections) and 22 financial assistance grant reports. The OIG processed 206 reports on DHS programs that were issued by other organizations. As a result of these efforts, \$86 million of questioned costs were identified, of which \$18 million were determined to be unsupported. In addition, \$28 million of funds that could be put to better use were identified.
- The OIG is most pleased with the positive response our reports have received from Departmental management. This is demonstrated by the fact that through the end of FY 2007, DHS management has concurred with 91% of the recommendations we made.
- In the investigative area, the OIG closed 1,052 investigations and issued 1,006 reports. OIG investigations resulted in 598 arrests, 596 indictments, 393 convictions, and 35 personnel actions. OIG investigators closed 1,052 investigations and 14,161 complaints. Additionally, investigative recoveries, fines, restitutions, and cost savings totaled \$45 million.

OIG has a dual reporting responsibility, to the Congress as well as to the Secretary. During the reporting period, OIG continued its active engagement with Congress through numerous meetings, briefings, and dialogues with members and staff of the Department's authorizing and appropriations committees and subcommittees on a range of issues relating to our work and that of the DHS. The IG's statements for the record and the reports cited in the congressional testimony are available on the OIG website at [www.dhs.gov](http://www.dhs.gov).

### C. Resources Requested and Performance Impact

*Current Services* – Anticipated FY 2009 performance is described below.

- Office of Audits - Barring any increases in our current services level, Office of Audits' plans include issuing 42 program and financial audits during FY 2008. We anticipate that this will include a carryover of 12 program audits into FY 2009. The OIG will continue to work closely with DHS management and congressional oversight committees to identify potential audit work that will promote the economy, efficiency, and effectiveness of departmental programs and operations.
- Office of Emergency Management Oversight (EMO) – The Office of Emergency Management Oversight (formerly the Office of Disaster Assistance Oversight) provides an aggressive and ongoing audit and investigative effort designed to ensure that disaster relief funds are being spent appropriately, while identifying fraud, waste, and abuse as early as possible. There are 40 to 60 Presidential disaster declarations each year and hundreds of open disasters. The office will continue its proactive and aggressive disaster oversight activities working with DHS/FEMA to ensure accountability, and identify and resolve potential problems before they occur. The office will focus on internal controls, grant and contract audits, performance reviews, congressional requests, and special projects covering all FEMA programs and operations. The office coordinates with other Federal Inspector General Offices, meets with state and local officials on audit and investigative matters, and advises contractors and grantees on compliance requirements.
- Information Technology (IT) - In FY 2009, OIG's IT office will continue to evaluate the Department's progress in establishing a cost-effective and secure information technology infrastructure. Specifically, IT will assess the progress DHS is making in consolidating its myriad networks and implementing a standard IT platform across the Department. In addition, IT will evaluate the effectiveness of DHS' strategies and tools for sharing intelligence information with key stakeholders in the intelligence community; DHS' programs to protect privacy; and, DHS' efforts to implement a border security system and modernize its disaster management and its maritime command and control systems. Furthermore, IT will conduct a series of reviews addressing the security aspects of wireless networks and devices, consolidated data centers, and the US-VISIT and Secure Flight programs. Finally, the IT office will assess DHS efforts to address significant deficiencies identified in the IT security program by ensuring that progress is made in developing components' plans of action and milestones; ensuring that security policies and procedures are implemented Department-wide; and ensuring that all systems are adequately certified and accredited.

- Office of Inspections (ISP) - ISP emphasizes reviews of DHS operations involving intelligence information management, science and technology, and overseas operations. In addition, ISP oversees DHS compliance with E.O. 12333 (intelligence on US persons) and reports quarterly to the President's Intelligence Oversight Board. With respect to intelligence information management, ISP will review the Homeland Security Infrastructure Threat and Risk Analysis Center and state and local intelligence fusion centers. Regarding science and technology, ISP will examine the Science and Technology Directorate programs that relate to the Homeland Security Policy Institute, advanced research projects, and research and development in aviation. ISP's overseas efforts will include an assessment of visa security issues and a detailed examination of the extent that DHS' overseas operations are coordinated. In addition to these specialty areas, ISP will coordinate with other federal agencies having cognizance for public sectors under the Emergency Support Functions of the National Response Plan; for example, DHS' work with the Department of Energy regarding the petroleum and national gas sub-sector. ISP will review DHS' efforts to coordinate preparedness grants, assess DHS' grant oversight capacity, and examine the effectiveness of the pre-disaster mitigation grant program. In addition, ISP will continue to monitor the Port Security, Urban Area Security Initiative, Critical Infrastructure, and Buffer Zone Protection Plan grant programs.
- Investigations – Investigations will continue to work to protect the integrity of the U.S. Department of Homeland Security (DHS) by vigorously investigating the most serious criminal, civil, and administrative allegations involving DHS personnel, programs, and operations.

In FY 2009, the DHS OIG Office of Investigations, Inspection Division will conduct internal inspections of the following OIG offices: the Tucson Field Office including the Yuma sub-office, the Dallas Field Office, the Houston Field Office including the McAllen RAC office and the Del Rio and Laredo sub offices, the Washington DC Field Office, and the Special Investigations Division.

In addition to maintaining effective liaison with the various internal affairs components within DHS, the OIG Inspection Division will continue to exercise our authorized oversight function by reviewing the inspection divisions of the following DHS components: the United States Secret Service, Inspection Division; the Transportation Security Division, Office of Internal Affairs and Program Review; and the U.S. Customs and Border Protection, Office of Internal Affairs.

The office will continue to support the Hurricane Katrina Task Force (HKTF) by increasing the FEMA investigative caseloads of our recently established offices in Baton Rouge, LA, Biloxi, MS, and Hattiesburg, MS, which are staffed primarily by temporary investigators.

***Increments over current service level*** – When DHS was created, the OIG focus initially shifted from the disaster programs to other priority areas. In the wake of Hurricane Katrina, and other subsequent natural disasters, OIG redirected resources to create an Office of Emergency Management Oversight. Because of this shift, the OIG needs additional funding to continue to provide program oversight for Preparedness, Science and Technology, and Border Security and Enforcement programs. The requested increase of 50 positions, 25 FTE, and \$6.4 million will provide additional staff to support OIG audit oversight over both DHS preparedness programs and DHS border security and enforcement

programs, through audits of preparedness grant programs, science and technology programs, department-wide programs that establish the Department's baseline preparedness efforts, as well as audits and on-going oversight of the policies, and initiatives and funds to secure the Nation's borders.

### *Justification*

**Audit** - The Nation's preparedness lies in its ability to have in place sufficient personnel and equipment to organize and manage the Nation's capability to prevent, protect against, respond to, and recover from significant threats or events. By answering fundamental questions within each of the Department's components, programs, and functional areas, the OIG will try to determine how well the Department is performing; and will be able to recommend ways to improve the efficiency and effectiveness of the Department's operations.

The OIG's role to assist the Department in its efforts to implement effective preparedness programs and to ensure adequate systems and controls are in place is most critical in the Department overcoming the challenge that it has in obtaining an opinion on its financial statements. There are numerous material weaknesses and to move forward, OIG will work with the Department to prepare well-developed and comprehensive corrective action plans to address these known internal control weaknesses.

The Department's ability to control the Nation's borders and counter the illegal immigration operations requires OIG oversight. As policies and initiatives are approved and funded, the OIG will examine the efficiency and effectiveness of the program controls and systems. We have monitored the initiation of the SBInet program and provided a risk advisory with recommendations to address observed weaknesses in the program. Other components share border security responsibilities and are necessarily part of a comprehensive solution to border and immigration control. Our borders need to become less porous, and our policy and practice of managing immigration need to comply with established standards.

As for the numerous border security efforts, ICE leads plans to improve the apprehension, detention and removal of illegal aliens – which requires coordination efforts across DHS, as well as collaboration with the Department of Justice and other agencies that share responsibility for this function. USCIS has plans for streamlining benefits processes and expanding the E-Verify program. OIG plans to use the requested resources to review the plans, practices, and outcomes related to these efforts to ensure that they are effective in securing our borders and enforcing border control laws and regulations. The OIG also plans to measure the Department's progress in meeting these initiatives and their impact on border control. Without a full complement of staff working on the Department's overall border control initiatives and related procurement policies, the Department could easily lose control of these key national programs.

As the Secretary and Congress develop policies to tighten the borders, the Department must also have an acquisition management infrastructure in place that allows effective oversight of the complex, large dollar procurements critical to its mission. OIG has identified significant risks and vulnerabilities that might threaten the integrity of DHS operations. In general, DHS needs to have more comprehensive acquisition guidance and oversight for the components. Three specific vulnerable areas are the adherence to ethical conduct, overall contract program management, and general procurement management (e.g., many components reported that their lack of staffing prevents proper planning and

limits their ability to monitor contractor performance). There is a critical need for the OIG's independent reviews of the Department's management of acquisition programs, as well as its contractor administration processes.

Also, as the Department has been given authority to deviate from normal acquisition processes and take advantage of legislated funding for a wide-range of research and development initiatives, the OIG will verify where and how these funds are being expended, what is being delivered for the amounts expended, and whether program managers are complying with established guidelines.

Additional staff will enable OIG to provide oversight of the Department's major acquisition programs related to border control; enforcement of immigration laws and regulations; the contracts assisting in the management of detained or apprehended illegal immigrants; and the money appropriated to affect immigration control, border security, and port surveillance. Programs and initiatives like the SBI, US-VISIT, the equipping and training of the 3,000 additional border agents, to counter narcotics and smuggling operations, as well as to control immigration, and to secure the borders need immediate and constant oversight and scrutiny.

The OIG also needs to enhance its financial management and assurance audit groups to ensure that the Department is taking necessary corrective actions to improve its financial reporting and other identified weaknesses related to its preparedness and border control and enforcement programs.

The Department awards billions of dollars to state and local governments, as well as research institutes to improve the Nation's preparedness posture and understand the threats facing us. The OIG's role is to assist the Department in its efforts to implement effective preparedness programs by ensuring adequate systems and controls are in place to assess the performance of these programs and that funds are spent as intended. To that end, we have identified several federal assistance programs that have the potential for duplicating DHS grant programs. Our reports state that some states lack the ability to effectively manage and monitor grants funds, or demonstrate the ability to measure improvements in preparedness. The OIG needs to further report on the performance of the Department's preparedness and science and technology grant programs and the expenditures of program funds by the Department and its grantees. The Department awarded over \$2.6 billion for preparedness, which included funds for grants to states and local governments for equipment, training, exercises, and various other measures designed to increase the level of security across the Nation and that amount will likely continue to grow. As grant funds are expended, it is imperative that the Department and its stakeholders are assured that the funds were expended as intended on the preparedness of our Nation's first responders and others.

The Department also manages science and technology preparedness programs that are intended to provide the next generation of detection devices and counter measurers through the Department's work with and funding of university and industry based researchers. In FY 2007, the Department deployed over 880 radiation portal monitors at land and seaports; inspected over 442 million visitors, and removed a record of 189,670 illegal aliens from our country. However, further audit coverage is needed in this area to provide independent assessment of the Department's progress and the effectiveness of these cooperative relationships, and oversight of the funds spent.

The requested resources will ensure that Department-wide programs and initiatives like the National Response Plan, cyber-security, intelligence sharing, networking with state and local governments, and the connectivity and communications capability of DHS operations centers will proceed with external validation and scrutiny.

## **Impact on Performance (Relationship of Increase to Strategic Goals)**

As mentioned above, the additional staff in the financial management and assurance groups will enable OIG to provide oversight of the Department's efforts to improve its financial reporting and correct other program weaknesses identified in our reports that is sufficient to meet requirements. The OIG will also be able to fully review the Department's systems and internal controls over financial reporting and follow-up on over 1,000 open recommendations that our office and others have issued to the Department concerning these and other programs.

The additional staff will conduct several new audits (of varying complexity), covering several aspects of immigration and border control. OIG needs to continue review of CBP's SBInet and Coast Guard's Deepwater acquisition processes. These audits will include review of: our national infrastructure protection and transportation security programs; the funding and eventual implementation plans for 3,000 more Border Patrol agents, the Western Hemisphere Travel Initiative, and USCIS' employment Eligibility Verification program.

In addition to this, the application and security of biometric data obtained through US-VISIT and how the components and intelligence elements use this data needs critical analysis. Plus, continued review and evaluation of the policies and procedures associated with the apprehension, detention, and removal of illegal immigrants will increase as these policies change, are legislated, or become controversial through implementation.

The Department and its components will need to think globally about the impact of policy changes on funding, material, and personnel requirements across the organization. The requested staffing level will enable OIG to review the policies, track the money, and critically review the implementation of the immigration and border operations. In turn, this facilitates an independent assessment of these programs to provide assurance that the Department's resources are being used efficiently and effectively.

The OIG will conduct audits of cross component initiatives such as, interoperable commoditization and intelligence sharing, and a follow-on audit to our audit of the National Response Plan.

The audit coverage that the OIG provides helps first-responders to get the money needed to prepare their equipment and facilities, urban areas to get the assistance to prepare for accidents or incidents and enables state homeland security offices to support their communities.

The requested staffing level will also enable OIG to assess whether by 2011 the Department's work in the science and technology area will result in the development and deployment of a fully integrated decision making tool to support surveillance, detection, and incident characterization and decision support system as outlined in the Secretary's FY 2008 – 2012 planning guidance.

Because OIG is able to audit Department-wide programs and review the Department's cross-component initiatives and policies such as intelligence sharing, networking with state and local governments, and science and technology initiatives, OIG ensures the effectiveness and integrity of the Department's ability to deal with the day-to-day issue of cyber-security, the detection of explosives and narcotics, and general ability to secure the Nation's borders, as well as the critical facilities making up our Nation's infrastructure.

Overall, in the Audit area, the additional personnel will allow the IG to better assess the Department's ability to prevent, respond, and recover from terrorist attacks and to prepare, respond, and recover from disasters by:

- Providing oversight and timely recommendations for improving DHS management and operations in a greater number of acquisition programs;
- Getting involved and influencing management direction and positive change in the early phases of new DHS programs and initiatives;
- Providing continuous monitoring and evaluation of programs;
- Providing a more timely response to requests for reviews on issues brought forth from Congress, and reducing the impact these requests have on the planned audits;
- Developing more in-depth research and background into the audit areas, developing more effective recommendations for the auditees and management;
- Monitoring recommendations to audit findings, reporting auditee achievements, and ensuring adequate response to needed program internal controls;
- Ensuring more comprehensive audit follow-up for high-risk programs.

With respect to the impact of our reports, we have been able to document a significant level of success in developing recommendations that are accepted by Departmental management.

#### D. How OIG Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives

The OIG program, and its performance goals are reflected below, followed by the DHS strategic goal and objective that the OIG program supports.

Audit, Inspections and Investigations Program – Add value to the DHS programs and operations; ensure integrity of the DHS programs and operations; and enable the OIG to deliver quality products and services.

#### **Goal 5 – Strengthen and Unify DHS Operations and Management**

E. Performance Based Budget Highlights by Program

For the FYHSP program, the performance goal, performance measure, budget including allocation of non-programmatic overhead, and FTE are:

| <b>Program: Audit, Inspections and Investigations Program</b>  |          |          |          |           |                      |           |
|--|----------|----------|----------|-----------|----------------------|-----------|
| <b>Performance Goal:</b> Add value to the DHS programs and operations; ensure integrity of the DHS programs and operations; and enable the OIG to deliver quality products and services. |          |          |          |           |                      |           |
| <b>Fiscal Year:</b>  | FY 2004  | FY 2005  | FY 2006  | FY 2007   | FY 2008 <sup>1</sup> | FY 2009   |
| <b>\$ Thousands</b>  | \$80,318 | \$97,317 | \$84,187 | \$102,685 | \$108,679            | \$101,023 |
| <b>FTE</b>   | 457      | 502      | 540      | 545       | 551                  | 577       |

<sup>1</sup> Includes rescission of prior year unobligated balance per P.L. 110-61.

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Number of management reports (audits and inspections) issued during the reporting period.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> The IG Act requires the OIG to audit programs for fraud, waste, and abuse. The Act also requires the review of programs for activities designed to promote economy, efficiency, and effectiveness. The criteria used to select programs for audit include: statutory and regulatory requirements; adequacy of internal control systems; newness; changed conditions; potential dollar magnitude; etc. Where appropriate, OIG audit and inspection reports include recommendations which if accepted and implemented, will improve the respective program. The OIG tracks all draft audit or inspection reports and the recommendations that are issued in those reports. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | None    | 58      | 60      | 60      | 71      |

## I. WORKING CAPITAL FUND FY 2009 BUDGET

### **A. Mission and Description of the Working Capital Fund (WCF)**

To provide cost-effective support services throughout DHS, the WCF provides a mechanism for shared service costs to be distributed and recouped, and facilitates the delivery and oversight of shared services.

The WCF supports selected services, activities, and programs that benefit more than one DHS organizational component. Furthermore, the WCF supports the funding for government-wide initiatives as well as DHS crosscutting initiatives approved by OMB and Congress. The goal of the Under Secretary for Management is to maintain and operate a fund that promotes economy, efficiency, and accountability and to apply best practices from the public and private sectors for improving organizational performance, operational efficiencies, and ensure full cost recovery of goods and services for selected DHS agency-wide programs, activities, and services.

The current structure and operation of the WCF are not fully aligned with these goals.

In late FY 2007, the Department of Homeland Security initiated a comprehensive review of the WCF with the intention of improving the operation of the fund and delivery of administrative services. The first phase of this process is a study conducted by the Department's Chief Financial Officer. This study reviewed the WCF's current authority governance, functions, organization and staffing, business processes, activity portfolio and cost allocation methodologies. Comparable funds in several other Departments were also examined. Based on the recommendations of this study, the Department is proposing a new General Provision to make the WCF permanent, to permit maintenance of reasonable operating reserves, and to establish reprogramming thresholds. The study also recommends other improvements in a number of areas, including governance of the Fund, to achieve greater transparency, effectiveness, and efficiency. While the Department is pursuing implementation of some of these improvements consistent with existing authority, the proposed General Provision is critical to reengineer the WCF as an effective financial management tool and implement all of the recommendations.

### **B. Major Activities and Key Strategic Issues**

The key WCF activities are organized under the five activity categories listed below:

#### **Fee for Service Activity**

DHS WCF activity managers provide or coordinate delivery of a specific service or benefit to DHS components. The benefit/cost for providing the WCF activity is tangible and is directly linked to a component's use of services or products. These activities may include subscription-type services such as providing access to electronic services, for example the Library of Congress' FEDLINK. These WCF activities earn revenue from the provision of services, and have characteristics typical of a business enterprise. The costs for operating the "business" are reimbursed by billing customers for the provision of goods and services, through rates that are pre-approved by the CFO and reviewed by component customers. Each fee for service activity is expected to recover its operational costs, usually at a much lower cost as the components benefit from economies of scale. Examples include IT services, human resource services, procurement operations, and financial management services.

### **Tri-Bureau Service Activity**

The WCF Tri-Bureau Service activity supports selected administrative services provided by and to Immigration and Customs Enforcement (ICE), U.S. Citizenship and Immigration Services (USCIS), and Customs and Border Protection (CBP). These services include human resources, and IT services supplied by DOJ.

### **Government-Wide Service Activity**

Government-wide activities are Administration sponsored initiatives that are managed by a designated Federal department. Other departments are assessed for the cost of supporting the activity. The activities should also provide a direct benefit to participating components. Examples include the government-wide E-Government initiatives related to the President's Management Agenda.

### **DHS Crosscutting Activity**

The DHS crosscutting activities are department-wide programs managed by a single office that yield some benefit, such as accounting and bankcard services, to all DHS components. The actual costs of the programs are recouped by redistributing the costs to the components based on their share of the discretionary budget, staffing or some other fair and equitable pro-rata basis. Examples are the Ready Campaign and CPO Shared Reporting.

### **WCF Management Activity**

The WCF Management Activity includes funding for the staff that develops WCF policy and procedures, formulates and executes the WCF budget and resolves disputes between activity managers and customers.

## **C. Resources Requested and Performance Impact Summary**

The DHS WCF operating requirements for FY 2009 are estimated to be 342 FTEs and \$523,372,708 in reimbursable authority. This is an increase of \$47,878,505 and 19 FTEs over the FY 2008 Congressional Justification level. The total adjustments-to-base in FY 2009 is \$6,248,400 for pay raises and non-pay inflation.

In FY 2009, the WCF will continue most services and activities from FY 2008 and add three e-Government initiatives. The FY 2009 increase is attributable to program increases of \$28,805,020 approved for Fee for Services Activities; \$10,014,242 for Government-wide Activities; \$2,601,537 for Tri-Bureau Activities; \$262,196 for DHS Cross-Cutting Activities; \$209,305 for WCF Management and a \$6,248,400 base adjustment.

- **Fee for Service Activity; Base Adjustments: \$4,547,141 and Program Changes: \$28,805,020 and 11 additional FTEs over 2008**
  - GSA Rent; \$26,756,609 – The additional requested resources will provide DHS with the additional space needed for Gulf Coast Recovery Office, Science and Technology,

Operations Coordination and Intelligence Analysis and National Protection and Preparedness Directorate.

- Fedlink (Consolidated Subscription); The 1 additional FTE provides support for the expansion of the Libraries and Information Services.
- Financial Statement Audit; \$605,222 – The FY2009 amount includes an increase in contract costs and OIG travel oversight cost for audit services.
- Financial Management - Headquarters; \$128,135 and 9 additional FTEs – The requested increase supports the expansion of financial management support services to the Office of Health Affairs (OHA) and the conversion of key contractor positions to FTE.
- NFC Payroll and Reporting; \$1,019,538 - The FY2009 request includes O&M costs for NFC payroll and EmpowHR personnel systems. The funding increase will support of deployment of EmpowHR to additional DHS components (FEMA, PLETC, ICE, and CIS) in FY 2009.
- HQ Human Capital Services; \$342,311- The HQ Service center will continue to provide the full range of personnel operational support to DHS HQ components (excluding the OIG) and eventually expand that service through functional integration to other DHS components. In FY 2009, the estimated HQ population is 3,500-4,000.
- DHS Executive Leadership Development; \$41,400 – The increase includes support services cost for one (1) additional FTE to assist the Program Manager in conducting three concurrent SES Candidate Development Program (CDP) classes.
- Flexible Spending Plan; \$376,000 - The FY2009 The FY2009 request reflects the funding required to support the administrative fees associated with increased employee participation in flexible spending account programs
- DHS HQ Employee Assistance Program; \$12,264 - The increase in funding will allow DHS to provide an increased level of services to employees and their families, enabling them to achieve and maintain balance in their lives, thereby maximizing work performance, job satisfaction and morale
- NCR IT Services; \$7,368,282 - The requested funding is needed to provide for 500 new additional seats approved for the USM for managed IT services (e.g., desktop PCs, LAN service, telephone, E-mail, etc.). The offices under the USM requesting additional personnel will bear the increase in cost assessments. The increase in funding will adequately provide IT services to the offices and ensure continuity in operations.
- Program Offsets - \$7,725,454 in Fee for Service Activities are due to work load reduction.
  - -\$2,156,895 Financial Management (Finance and Accounting Shared Services)
  - -\$4,564,138 Internal Control Audit
  - -\$851,721 Software Enterprise Licenses – Microsoft
  - -\$152,700 Board of Contract Appeals
  - -\$119,287 Procurement Operations

- **Tri-Bureau Service Activity; Base Adjustments: \$1,129,165 and Program Changes: \$2,601,537 over 2008**
  - Tri-Bureau HR Services; \$989,899 - In FY 2009, a program increase is requested to support increased ICE staffing requirements for interior enforcement. The increased funding in FY 2009 will allow CBP to provide the required human resources support to ICE.
  - IT Services DOJ Data Center Services; \$1,611,638 - In FY 2009, an increase will help coordinate and oversee the delivery of IT data center services to DHS Components (ICE, US Visit, CIS, CBP, and HQ/CIO) currently using DOJ facilities.
- **Government-Wide Mandated Service Activity; Base Adjustments: \$276,409 and Program Changes: \$10,014,242 and 3 additional FTEs over 2008**
  - USAJOBS (Recruitment One-Stop); \$677,608 – The increase includes USAJOBS DHS-wide access cost. Beginning in FY 2009, OPM intends to charge for processing announcements for civilian competitive service, excepted service, and Executive Resource Service vacancies.
  - E-Training; \$6,217,841 and 3 additional FTEs – In FY 2009, the increase is due to the costs associated with the identification and implementation of a Learning Management System (LMS) to support DHS on-line learning and planned migration of legacy systems to the DHS LMS. DHS completed an Advanced Distributed Learning (ADL) Study identifying current e-learning, video-teleconferencing and satellite delivered training capability within the Department. DHS has also developed an architecture and implementation plan for improving ADL within DHS and for developing a DHS Headquarters Learning Management System (LMS).
  - Enterprise HR Integration; \$1,307,293- The increase includes the cost for consolidation efforts and implementation of modern HR systems with new functionality that will ultimately reduce operational costs.
  - e-Travel, \$566,657 - This activity provides a government-wide web based service that applies travel management best practices, and minimizes cost. From travel planning and authorization to reimbursement, the e-Travel will leverage administrative, financial and information technology best practices to realize significant cost savings and improved employee productivity
  - Case Management Line of Business \$515,000 – OMB restated this activity in FY 2009. The Case Management Line of Business (CM LoB) defines case management as activities associated with the collections, qualification, analysis, and use of information either for law enforcement purposes, to protect against acts of terrorism, or to defend the government (including its officers and agents) against legal challenges. A case represents the collection of information coalescing around one or more subjects of official interest to a case manager (e.g. an intelligence analyst, an investigative agent, or a Federal attorney). Automated case management systems are employed to facilitate the identification, organization, storage, workflow, and communication of case-related information. The CM LoB is working to

standardize case management solutions used in the Federal Government. Specific goals of the CM LoB include:

- Developing a common solutions architecture enabling case management data to be shared efficiently within and across agencies;
  - Improving effectiveness and efficiency of investigation and litigation case management business processes;
  - Identifying common case management processes across components and agencies to drive process standardization and system consolidation;
  - Addressing immediate and long-term case management needs and opportunities in the Federal case management community; and
  - Provide guidance for future case management investments across the Federal Government.
- E-Gov Integrated Acquisition Environment; \$503,299 – The FY 2009 request includes an increase related to the increase in DHS procurement activity.
  - e-Gov Benefits, \$238,885 - The GovBenefits.gov activity provides a single point of access for citizens to locate and determine eligibility for government benefits and services. The site now offers links to 234 benefits programs, representing \$1.3 trillion in annual benefits.
  - Geospatial LoB; \$63,860 – Geospatial LoB will further refine the opportunities for optimizing and consolidating Federal geospatial-related investments to reduce the cost of government and, at the same time, improve services to citizens. Cross-agency coordination of geospatial activities can identify, consolidate, and reduce or eliminate redundant geospatial investments. Developing the Geospatial Line of Business (LoB) will result in a more coordinated approach to producing, maintaining, and using geospatial data, and will ensure sustainable participation from Federal partners to establish a collaborative model for geospatial-related activities and investments.
  - IT Infrastructure Line of Business (ITLOB); \$160,000 - The IT Infrastructure LoB will identify the opportunities for IT infrastructure consolidation and optimization, and develop government-wide common solutions. This LoB will define specific common performance measures for service levels and costs, identify best practices, and develop guidance for transition plans within agencies and/or across agencies. Consolidation and optimization of IT infrastructure represents a significant opportunity to realize future cost savings by taking a more coordinated approach to spending on commodity IT infrastructure. IT infrastructure consolidation and optimization case studies also demonstrate agencies could improve IT service levels and, when relieved of the burden of managing these non-core functions, can concentrate more on mission priorities and results.
  - Budget Formulation and Execution (BFELoB); \$95,000 - The focus of the Budget Formulation and Execution Line of Business (BFE LoB) is to build a “budget of the future” by promoting information sharing across government agency budget offices and building a “community of practice.” With this collaboration, the budget community can start to identify best practices for all aspects of budget formulation and execution. The BFE LoB strives to find solutions that link budget formulation, execution, planning, performance, and financial information. Areas of particular interest include technology, budget performance

integration, data collection and tracking, financial management integration, and human capital.

- Program Offsets - \$331,201 in Government-Wide Mandated Activities are due to reductions by OMB in the e-government amounts:
  - -\$326,854 Business Gateway
  - -\$4,130 Human Resources Line of Business
  - -\$217 e-Authentication
- **DHS Crosscutting Activity; \$262,196 and Program Changes of 3 additional FTEs over 2008**
  - DHS Crosscutting Activities are requesting \$262,196 in adjustments and 3 additional FTE for CPO Shared Reporting for FY 2009.
- **WCF Management Activity; Base Adjustments: \$33,489 and Program Changes: \$209,305 and 2 additional FTEs over 2008**

The increase includes \$209,305 in support of 2 additional FTEs and \$33,489 in inflation. DHS WCF requests additional funding for the WCF operations for technical support of the new IT Revolving fund, existing and expanding WCF activities. This will enable the WCF to provide ensure compliance with Congressional guidance and provide oversight to the increased number of WCF activities approved for the WCF. The WCF will continue to improve cost methodologies in determining customer assessments for products and services received.

#### **Program Assessment Rating Tool (PART) Results:**

**Not applicabile to the Working Capital Fund.**

#### **D. How Working Capital Fund Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.**

Strategic Plan Objective 7.4: Improve the efficiency and effectiveness of the Department, ensuring taxpayers get value for their tax dollar.

The WCF supports this objective through business processes designed to provide centralized administrative services at a fair and equitable cost to organizations within DHS, as well as to maximize customer satisfaction, utilization of resources and the benefits derived from the WCF.

#### **E. Performance Based Budget Highlights by Program**

One of the major deficiencies identified in the recent WCF Study is the lack of meaningful performance measures. During the 2010 Planning and Budgeting process, OCFO will work with the activity managers to develop a performance management system to align WCF operations with overall Fund objectives, This would include: 1) establishing goals/objectives, 2) defining “the critical few” metrics that drive operations to achieve these goals/objectives, 3) developing a process to capture and analyze performance data (based on existing systems initially), and 4)

establishing a formal performance review and corrective action process in conjunction with the enhanced WCF governance procedures.

The resultant performance management system will capture two broad perspectives on Fund performance: service performance and administrative performance. Service performance data will capture metrics such as return on investment and other economic or qualitative ratios specific to the provision of an individual service. Administrative performance will track measures such as timeliness of assessments and reports, accuracy of reporting, consistency of methodology. Dual perspectives on the performance of Fund will significantly improve transparency and accountability and re-establish credibility with customers and stakeholders.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## Working Capital Fund

### I. Working Capital Fund Overview

#### A. Mission Statement for the Working Capital Fund (WCF):

To provide cost-effective support services throughout DHS, the WCF provides a mechanism for shared service costs to be distributed and recouped, and facilitates the delivery and oversight of shared services.

The WCF supports selected services, activities, and programs that benefit more than one DHS organizational component. Furthermore, the WCF supports the funding for government-wide initiatives as well as DHS crosscutting initiatives approved by OMB and Congress. The goal of the Under Secretary for Management is to maintain and operate a fund that promotes economy, efficiency, and accountability and to apply best practices from the public and private sectors for improving organizational performance, operational efficiencies, and ensure full cost recovery of goods and services for selected DHS agency-wide programs, activities, and services.

The current structure and operation of the WCF are not fully aligned with these goals.

In late FY 2007, the Department of Homeland Security initiated a comprehensive review of the WCF with the intention of improving the operation of the fund and delivery of administrative services. The first phase of this process is a study conducted by the Department's Chief Financial Officer. This study reviewed the WCF's current authority governance, functions, organization and staffing, business processes, activity portfolio and cost allocation methodologies. Comparable funds in several other Departments were also examined. Based on the recommendations of this study, the Department is proposing a new General Provision to make the WCF permanent, to permit maintenance of reasonable operating reserves, and to establish reprogramming thresholds. The study also recommends other improvements in a number of areas, including governance of the Fund, to achieve greater transparency, effectiveness, and efficiency. While the Department is pursuing implementation of some of these improvements consistent with existing authority, the proposed General Provision is critical to reengineer the WCF as an effective financial management tool and implement all of the recommendations.

#### B. Budget Activities:

The key WCF activities are organized under the five activity categories listed below:

##### Fee for Service Activity

DHS WCF activity managers provide or coordinate delivery of a specific service or benefit to DHS components. The benefit/cost for providing the WCF activity is tangible and is directly linked to a

component's use of services or products. These activities may include subscription-type services such as providing access to electronic services, for example the Library of Congress' FEDLINK. These WCF activities earn revenue from the provision of services, and have characteristics typical of a business enterprise. The costs for operating the "business" are reimbursed by billing customers for the provision of goods and services, through rates that are pre-approved by the CFO and reviewed by component customers. Each fee for service activity is expected to recover its operational costs, usually at a much lower cost as the components benefit from economies of scale. Examples include: IT services, human resource services, procurement operations, and financial management services.

### **Tri-Bureau Service Activity**

The WCF Tri-Bureau Service activity supports selected administrative services provided by and to Immigration and Customs Enforcement (ICE), U.S. Citizenship and Immigration Services (USCIS), and Customs and Border Protection (CBP). These services include human resources, and IT services supplied by DOJ.

### **Government-Wide Service Activity**

Government-wide activities are Administration sponsored initiatives that are managed by a designated Federal department, to improve overall government performance. Other departments are assessed for the cost of supporting the activity. The activities should also provide a direct benefit to participating components. Examples include the government-wide E-Government initiatives related to the President's Management Agenda.

### **DHS Crosscutting Activity**

The DHS crosscutting activities are department-wide programs managed by a single office that yield some benefit, such as Strategic Sourcing, to all DHS components. The actual costs of the programs are recouped by redistributing the costs to the components based on their share of the discretionary budget, staffing or some other fair and equitable pro-rata basis.

### **WCF Management Activity**

The WCF Management Activity includes funding for the staff that develops WCF policy and procedures, formulates and executes the WCF budget and negotiates issues between activity managers and customers.

## **C. Budget Request Summary:**

The DHS WCF operating requirements for FY 2009 are estimated to be 342 FTEs and \$523,372,708 in reimbursable authority. This is an increase of \$47,878,505 and 19 FTEs over the FY 2008 Congressional Justification level. The total adjustments-to-base in FY 2009 is \$6,248,400 for pay raises and non-pay inflation.

In FY 2009, the WCF will continue most services and activities from FY 2008 and add three e-Government initiatives. The FY 2009 increase is attributable to program increases of \$28,805,020 approved for Fee for Services Activities; \$10,014,242 for Government-wide Activities; \$2,601,537 for Tri-Bureau Activities; \$262,196 for DHS Cross-Cutting Activities; \$209,305 for WCF Management and a \$6,248,400 base adjustment.

- **Fee for Service Activity; Base Adjustments: \$4,547,141 and Program Changes: \$28,805,020 and 11 additional FTE over 2008**
  - GSA Rent; \$26,756,609 – The additional requested resources will provide DHS with the additional space needed for Science and Technology, Operations Coordination and Intelligence Analysis and National Protection and Preparedness Directorate.
  - Fedlink (Consolidated Subscription); 1 additional FTE – The 1 additional FTE is required to support the expansion of the Libraries and Information Services.
  - Financial Statement Audit; \$605,222 – The FY2009 amount includes an increase in contract costs and OIG travel oversight cost for audit services.
  - Financial Management - Headquarters; \$128,135 and 9 additional FTEs – The requested increase supports the expansion of financial management support services to the Office of Health Affairs (OHA) and the conversion of key contractor positions to FTE.
  - NFC Payroll and Reporting; \$1,019,538 - The FY2009 request includes O&M costs for NFC payroll and EmpowHR personnel systems. The funding increase will support deployment of EmpowHR to additional DHS components (FEMA, FLETC, ICE, and CIS) in FY 2009.
  - HQ Human Capital Services; \$342,311- The HQ Service center will continue to provide the full range of personnel operational support to DHS HQ components (excluding the OIG) and eventually expand that service through functional integration to other DHS components. In FY 2009, the estimated HQ population is 3,500-4,000.
  - DHS Executive Leadership Development; \$41,400 – The increase includes support services cost for one (1) additional FTE to assist the Program Manager in conducting three concurrent SES Candidate Development Program (CDP) classes.
  - Flexible Spending Plan; \$376,000 - The FY2009 request reflects the funding required to support the administrative fees associated with increased employee participation in flexible spending account programs.
  - DHS HQ Employee Assistance Program; \$12,264 - The increase in funding will allow DHS to provide an increased level of services to employees and their families, enabling them to achieve and maintain balance in their lives, thereby maximizing work performance, job satisfaction and morale.
  - NCR IT Services; \$7,368,282 - The requested funding is needed to provide for 500 new additional seats approved for the USM in FY08 for managed IT services (e.g., desktop PCs, LAN service, telephone, E-mail, etc.). The offices under the USM requesting additional personnel will bear the increase in cost assessments. The increase in funding will adequately provide IT services to the offices and ensure continuity in operations.
  - Program Offsets - \$7,725,454 in Fee for Service Activities are due to work load reduction.
    - -\$2,156,895 Financial Management (Finance and Accounting Shared Services)
    - -\$4,564,138 Internal Control Audit
    - -\$851,721 Software Enterprise Licenses – Microsoft

- -\$152,700 Board of Contract Appeals

- **Tri-Bureau Service Activity; Base Adjustments: \$1,129,165 and Program Changes: \$2,601,537 over 2008**

- Tri-Bureau HR Services; \$989,899 - In FY 2009, a program increase is requested due to increased ICE staffing requirements for interior enforcement. The increased funding in FY 2009 will allow CBP to provide the required human resources support to ICE.
- IT Services DOJ Data Center Services; \$1,611,638 - The FY 2009 increase will help coordinate and oversee the delivery of IT data center services to DHS Components (ICE, US Visit, CIS, CBP, and HQ/CIO) currently using DOJ facilities.

- **Government-Wide Mandated Service Activity; Base Adjustments: \$276,409 and Program Changes: \$10,014,242 and 3 additional FTE over 2008**

- USAJOBS (Recruitment One-Stop); \$677,608 – The increase includes USAJOBS DHS-wide access cost. Beginning in FY 2009, OPM intends to charge for processing announcements for civilian competitive service, excepted service, and Executive Resource Service vacancies.
- E-Training; \$6,217,841 and 3 additional FTE – The increase in FY 2009 is due to the costs associated with the identification and implementation of a Learning Management System (LMS) to support DHS on-line learning and planned migration of legacy systems to the DHS LMS. DHS completed an Advanced Distributed Learning (ADL) Study identifying current e-learning, video-conferencing and satellite delivered training capability within the Department. DHS has also developed an architecture and implementation plan for improving ADL within DHS and for developing a DHS Headquarters Learning Management System (LMS).
- Enterprise HR Integration; \$1,307,293- The increase includes the cost for consolidation efforts and implementation of modern HR systems with new functionality that will ultimately reduce operational costs.
- e-Travel; \$566,657 - This activity provides a government-wide web based service that applies travel management best practices and minimizes cost. From travel planning and authorization to reimbursement, the e-Travel will leverage administrative, financial and information technology best practices to realize significant cost savings and improved employee productivity.
- Case Management Line of Business; \$515,000 – OMB reinstated this activity in FY 2009. The Case Management Line of Business (CM LoB) defines case management as activities associated with the collections, qualification, analysis, and use of information either for law enforcement purposes, to protect against acts of terrorism, or to defend the government (including its officers and agents) against legal challenges. A case represents the collection of information coalescing around one or more subjects of official interest to a case manager (e.g. an intelligence analyst, an investigative agent, or a Federal attorney). Automated case management systems are employed to facilitate the identification, organization, storage, workflow, and communication of case-related information. The CM LoB is working to

standardize case management solutions used in the Federal Government.

Specific goals of the CM LoB include:

- Developing a common solutions architecture enabling case management data to be shared efficiently within and across agencies;
- Improving effectiveness and efficiency of investigation and litigation case management business processes;
- Identifying common case management processes across components and agencies to drive process standardization and system consolidation;
- Addressing immediate and long-term case management needs and opportunities in the Federal case management community; and
- Provide guidance for future case management investments across the Federal Government.
  - E-Gov Integrated Acquisition Environment; \$503,299 – The FY 2009 request includes an increase related to the increase in DHS procurement activity.
  - e-Gov Benefits; \$238,885 – e-GovBenefits.gov activity provides a single point of access for citizens to locate and determine eligibility for government benefits and services. The site now offers links to 234 benefits programs, representing \$1.3 trillion in annual benefits.
  - Geospatial LoB; \$63,860 – Geospatial LoB will further refine the opportunities for optimizing and consolidating Federal geospatial-related investments to reduce the cost to the government and, at the same time, improve services to citizens. Cross-agency coordination of geospatial activities can identify, consolidate, and reduce or eliminate redundant geospatial investments. Developing the Geospatial Line of Business (LoB) will result in a more coordinated approach to producing, maintaining, and using geospatial data, and will ensure sustainable participation from Federal partners to establish a collaborative model for geospatial-related activities and investments.
  - IT Infrastructure Line of Business (IT LoB); \$160,000 -The IT Infrastructure LoB will identify the opportunities for IT infrastructure consolidation and optimization, and develop government-wide common solutions. This LoB will define specific common performance measures for service levels and costs, identify best practices, and develop guidance for transition plans within agencies and/or across agencies. Consolidation and optimization of IT infrastructure represents a significant opportunity to realize future cost savings by taking a more coordinated approach to spending on commodity IT infrastructure. IT infrastructure consolidation and optimization case studies also demonstrate how agencies could improve IT service levels and, when relieved of the burden of managing these non-core functions, can concentrate more on mission priorities and results.

- Budget Formulation and Execution (BFELoB); \$95,000 - The focus of the Budget Formulation and Execution Line of Business (BFE LoB) is to build a “budget of the future” by promoting information sharing across government agency budget offices and building a “community of practice.” With this collaboration, the budget community can start to identify best practices for all aspects of budget formulation and execution. The BFE LoB strives to find solutions that link budget formulation, execution, planning, performance, and financial information. Areas of particular interest include technology, budget performance integration, data collection and tracking, financial management integration, and human capital.
- Program Offsets; - \$331,201 in Government-Wide Mandated Activities are due to reductions by OMB in the e-government amounts:
  - -\$326,854 Business Gateway
  - -\$ 4,130 Human Resources Line of Business
  - -\$ 217 e-Authentication
- **DHS Crosscutting Activity; \$262,196 and Program Changes of 3 additional FTEs over 2008**

DHS Crosscutting Activities are requesting \$262,196 in adjustments and 3 additional FTEs for CPO Shared Reporting for FY 2009.

- **WCF Management Activity; Base Adjustments: \$33,489 and Program Changes: \$209,305 and 2 additional FTE over 2008**

The increase includes \$209,305 in support of 2 additional FTE. DHS WCF requests additional funding for the WCF operations for existing and expanding WCF activities. This will enable the WCF to ensure compliance with Congressional guidance and provide oversight to the increased number of WCF activities approved for the WCF. The WCF will continue to improve cost methodologies in determining customer assessments for products and services received.

## II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)

### i. Summary of FY 2009 Budget Estimates by Appropriation

**Department of Homeland Security**  
**Working Capital Fund**  
 Summary of FY 2009 Budget Estimates by WCF Activity  
 (Dollars in Thousands)

| Budget Activity  | FY 2007 Actual |                  | FY 2008 Enacted |                  | FY 2009 Request |                  | Increase (+) or Decrease (-) For FY 2009 |                 |                 |                 |                     |                |
|--|----------------|------------------|-----------------|------------------|-----------------|------------------|--|-----------------|-----------------|-----------------|---------------------|----------------|
|  |                |                  |                 |                  |                 |                  | Total Changes                            |                 | Program Changes |                 | Adjustments-to-Base |                |
|  | FTE            | AMOUNT           | FTE             | AMOUNT           | FTE             | AMOUNT           | FTE                                      | AMOUNT          | FTE             | AMOUNT          | FTE                 | AMOUNT         |
| Fee for Service Activity                                     | 270            | \$345,965        | 311             | \$378,208        | 322             | 411,560          | 11                                       | \$33,352        | 11              | \$28,805        | 0                   | \$4,547        |

Working Capital Fund requests \$411.56 million for Fee for Service activities. This is an increase of \$33.4 million and 11 FTE over FY 2008.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

***FEE FOR SERVICE ACTIVITY***

**GSA Rent – Fee for Service Activity**

**Description of Service:** The Office of the Chief Administrative Officer (CAO) is responsible for the determination and allocation of rent for DHS entities in the National Capital Region. Specifically, this applies to those offices occupying space under CAO managed Occupancy Agreements (OAs) with GSA. CAO primarily serves Departmental Management, NPPD, OHA, A & O, and S & T in this capacity.

All CAO managed OAs and rent are typically formalized through GSA. Whenever possible, client agencies are located in existing government-owned space. If suitable space in the government inventory is not available, GSA acquires leased space in privately owned buildings. GSA charges rent to over 100 federal agencies, which is deposited into the Federal Buildings Fund and used to operate the government's buildings and pay rent to the private sector for leased space.

The GSA OAs cite rent and space data for each site and will include, where applicable, fees for Federal Protective Services, overtime utilities, antenna charges and other rent related fees.

CAO tracks and manages space and charges each DHS organization rent for the space they occupy and a share of the common spaces.

***Cost Allocation Methodology:*** Annual rent bills are derived by determining the aggregate rent for all CAO managed spaces, knowing the total square footage of all space and dividing that into the total aggregate rent to come up with an aggregate rent rate. This rent rate is then applied to an organization's occupied and shared space to determine that organization's annual rent. All non-rent costs (mainly salaries and benefits for FTEs, CAFM software and related IT) are included in the aggregate rent and are therefore shared by all customers according to their occupied space. Space measurements are accomplished by using floor plan drawings and outlining each occupied area.

***Full Time Equivalent (FTE):*** This activity requires 5 FTEs.

### **FEDLINK (Library of Congress) – Fee for Service Activity**

***Description of Service:*** FEDLINK is an "Ask a Librarian" initiative which is a cooperative federal library project implemented and funded by the DHS Management Directorate. The project expands library services to workforce desktops using interactive chat, email or phone. Librarians from 25 federal agencies (including DHS staff librarians) answer questions, search databases and send materials directly to DHS staff, detailees, and contractors.

***Cost Allocation Methodology:*** The cost allocation methodology is the unit contract costs multiplied by the number of users each component requested.

***Full Time Equivalent (FTE):*** This activity requires 4 FTEs.

### **Financial Management (Finance & Accounting Shared Services) – Fee for Service Activity**

***Description of Service:*** The Office of the DHS Chief Financial Officer (CFO) gives authorization for financial systems in the Department of Homeland Security and sponsors, sets policy, and manages the development, implementation, operation and maintenance of the departmental financial management systems and related business processes. The CFO has determined that it is in the best interest of the Department to obtain selected financial management services from the Office of Financial Management, U.S. Immigration and Customs Enforcement, hereafter referred to as ICE OFM and FLETC, on a reimbursable basis. ICE OFM and FLETC will provide financial management services in support of the following components:

- ICE OFM
  - Departmental Operations, including the immediate offices of the Secretary, the Directorate for Management, etc.
  - Directorate for Science and Technology
  - NPPD
  - U.S. Citizenship and Immigration Services
- FLETC OFM
  - Directorate for Operations Coordination and Intelligence and Analysis

ICE OFM will formulate and disseminate financial management policies, procedures, standards and maintain overarching internal controls in conjunction with the DHS CFO. The DHS CFO and ICE OFM will assist DHS HQ components in the implementation, if needed. The activities with respect to this function include:

- Oversee the development and maintenance of OFM policies, standards, and procedures for serviced groups to ensure compliance, uniformity, and consistency with Federal Financial and Accounting regulations, guidelines, rules, and standards.
- Create and submit updates to be posted on the OFM intranet website.
- Ensure necessary continuation of operations plans are prepared, viable, and in place in the event of required use.
- Monitor, adjust, and execute shared services agreements including the development/refinement of cost methodologies.
- Channel customer service requirements to service owners through formalized meetings, memorandums, issues papers, and other communication mechanisms.
- Establish points-of-contacts to support customer liaison and service requirements, and participate in customer meetings.
- Conduct periodic reviews of internal business practices to identify means in order to improve operations in terms of effectiveness and efficiency.
- Create new Federal Financial Management System transaction codes and process changes to the general ledger.
- Manage travel card services by processing new travel card applications; establishing hierarchies, maintaining user profiles, handling disputes, increasing limits, replacing cards, and contacting delinquent card holders.

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is based on the historical cost of providing seven categories of financial support to each participating component. The seven categories of financial support services include the following: (1) financial reports, (2) obligations and payment processing, (3) system usage, (4) receipts, (5) payroll, (6) overhead, and (7) travel and cash management services.

***Full Time Equivalent (FTE):*** This activity requires no FTE.

### **Financial Statement Audit – Fee for Service Activity**

***Description of Service:*** The DHS IG awards a contract to an independent CPA firm to perform a financial statement audit functions. The costs include travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by the Office of the Inspector General (OIG) as the Contracting Officer’s Technical Representative (COTR). Award will be made under a GSA schedule contract.

The Financial Statement Auditor is selected through contracting procedures by the OIG (with the Bureau of Public Debt (BPD) acting as the procurement office) and must stay independent from the DHS components that are being audited. The auditor selected commences work immediately and entrance conferences are held within a short time after award of the financial statement audit contract.

The Office of the Chief Financial Officer (CFO) coordinates and prepares the DHS consolidated financial statements and in this role acts as primary liaison for the auditors. All DHS departmental CFOs coordinate with the Director of Financial Management in the preparation of financial statements and completion of the audit.

The Office of the Inspector General became the COTR in FY 2005. The WCF funds will be used to support the departmental financial statement audits with the OIG having the following responsibilities:

- Contracting with an independent public accounting firm to perform the FY 2008 DHS financial statement audit.
- Providing oversight of the contract auditor
- Providing estimated cost information that allows the OCFO to properly budget for audit costs
- Notify the OCFO of any potential cost overruns and the related reasons
- Review and approve invoices for payment. The OIG charges no fee to the WCF for these services.

***Cost Allocation Methodology:*** The cost allocation methodology is the sum of the estimated auditor's billable hours multiplied by the hourly rate plus travel and incidental costs.

***Full Time Equivalent (FTE):*** This activity requires no FTE.

### **Internal Audit - Fee for Service Activity**

***Description of Service:*** The contract includes time and materials for internal control audit services with the auditor providing the services and billing for hours worked at billing rates commensurate with the audit position being billed. The costs include travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by the OIG as the COTR. Award will be made under a GSA schedule contract.

The Internal Control Auditor is selected through contracting procedures by the OIG (with the Bureau of Public Debt (BPD) acting as the procurement office) and must stay independent from the DHS components that are being audited. The auditor selected commences work immediately and entrance conferences are held within a short time after award of the financial statement audit contract.

The Office of the Chief Financial Officer (CFO) coordinates the assessment process to support management's assertion and in this role acts as primary liaison for the auditors. All DHS departmental CFOs coordinate with the Director of Financial Management in the preparation of and completion of the internal audit.

***Cost Allocation Methodology:*** The cost allocation methodology is the estimated auditor's billable hours per component multiplied by the hourly rate plus travel and incidental costs.

***Full Time Equivalent (FTE):*** This activity requires no FTE.

## **Financial Management – Fee for Service Activity**

**Description of Service:** The Department of Homeland Security, Under Secretary for Management (US/M) provides financial management support to Departmental Management and Operations. Services include budget formulation and execution of the Departmental Management and Operations appropriation, which is comprised of four separate appropriations including: the Offices of the Secretary and Executive Management Offices (OSEM); the Under Secretary for Management (US/M); the Chief Financial Officer and the Chief Information Officer. The Executive Management Offices are independent offices that report directly to the Secretary and operate without financial management personnel. These offices rely on the Department Operations Branch (DOB) for financial management and budget support. It is estimated that the DOB processes approximately 100 to 150 procurement requests per month. Procurement requests may vary in complexity and dollar value, ranging from \$25 to over \$1 million for one request. This funding provides the personnel and materials to perform the following budget execution activities:

- Processing of Procurement Requests
- Commitment and Obligation of Funds
- Processing of Travel Authorizations and Vouchers
- Reconciling a Centrally Billed Travel Account
- Set up and Coordination of Purchase Cards
- Periodic Purchase Card reporting and review
- Invoice Processing and Certification
- Review and Accuracy of Financial Data
- Reconciliation of accounting records and financial data in FFMS
- Development of Status of Funds Reporting
- Financial Reporting as required or needed for special requests
- Periodic review of Payroll data to ensure accurate reporting

**Cost Allocation Methodology:** The cost allocation methodology is a pro-rata share based on the percent of each office within Departmental Operations' adjusted total budget divided by the total Departmental Operations' adjusted total budget multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 13 FTE.

## **Bankcard Program - Fee for Service Activity**

**Description of Service:** As part of the GSA SmartPay contract, DHS entered into a tailored task order with US Bank on June 25, 2003, for purchase card services. Under this task order, US Bank will be the sole provider of purchase cards for all organization elements within DHS. The inherent nature of purchase cards under the GSA SmartPay contract is issued to individual employees of an organization but are billed and paid centrally, or at the corporate level using each independent agency's funding string(s). Individual cardholders are not responsible for payment to the bank.

DHS has selected the U. S. Coast Guard (USCG) as the servicing agent to provide for a centralized invoicing and payment system for components within DHS. The Finance Center (FINCEN) has developed and implemented a system that supports the receipt of daily invoices for all of DHS from

US Bank. This system assures payment of those invoices within one business day of receipt, and provides transmission of an electronic file containing transaction data to each component's accounting system.

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is based on the percent of each component's number of Bankcard transactions processed divided by the total number of Bankcard transactions processed for all participating components multiplied by total estimated cost of the activity.

***Full Time Equivalent (FTE):*** This activity requires no FTE.

### **Treasury Information Executive Repository (TIER) – Fee for Service Activity**

***Description of Service:*** The DHS CFO's office is responsible for creating the Department-wide financial statements. As part of this process, two software packages are used to process the work. These two products are the Treasury Information Executive Repository (TIER) and CFO Vision Software. The CFO's office has established procedures and guidance for the components to use. The DHS use of TIER and CFO Vision has benefited the entire Department by the cost and time savings involved in being able to produce financial statements in a timely manner. This has been a huge benefit especially with the accelerated timeframes for producing the Performance and Accountability Report (PAR).

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is average cost equally distributed to the organization element.

***Full Time Equivalent (FTE):*** This activity requires no FTE.

### **National Finance Center (NFC) Payroll/Services and Reporting – Fee for Service Activity**

***Description of Service:*** The NFC Payroll provides DHS with payroll/processing and reporting support. In addition, NFC provides the components specific services. The components are already paying into the WCF for these services. Therefore, administering the costs of these services through the WCF will provide for greater efficiencies through centralized management. In addition, any changes in payroll requirements would be coordinated directly between Human Capital Business Systems (HCBS) staff and the NFC, on behalf of the components.

| <b>COST AREA</b>  | <b>COST DRIVER</b>      |
|---|-------------------------|
| Postage-Earnings and Leave and Personal Benefits Statements | Pieces of mail          |
| Treasury FMS Postage Charges for Single Address Checks      | Checks mailed           |
| USDA OIG Oversight of Non-USDA Payroll Processing           | Avg # of employees paid |
| Payroll Operations Branch Support                           | Avg # of employees paid |
| Tax Reporting   | Avg # of employees paid |
| Payroll Policy Support                                      | Avg # of employees paid |
| e-Pay Policy Support  | Avg # of employees paid |
| Benefits Reconciliation and Liaison Area                    | Avg # of employees paid |
| Payroll Accounting  | Avg # of employees paid |
| Certification   | Avg # of employees paid |
| Debt Management   | Receivables established |
| Data Center Operations (Other than FOCUS)                   | Avg # of employees paid |
| Payroll/Personnel Baseline Services                         | Avg # of employees paid |
| Ad-Hoc reporting (based on CPU Minutes used)                | CPU Minutes             |

*Note: The last 4 items are the most expensive “unit cost” items.*

**Cost Allocation Methodology:** The cost allocation methodology is based on the component’s average number of employees paid.

**Full Time Equivalent (FTE):** This activity requires no FTE.

### **HQ Human Capital Services -Fee for Service Activity**

**Description of Service:** Recruitment and hiring services have been provided to HQ through Customs and Border Protection (CBP) via a contract with Booz, Allen, Hamilton (BAH). The purpose of this contract and the HTRT was to assist HQ in “ramping up” staff to meet business requirements. Since the formation of the DHS structure, the bulk of HQ personnel needs have been in-sourced to CBP’s Human Resources Management Division. The vast majority of these services were, in turn, outsourced to a private firm tasked with assisting in the heavy workload associated with the ramp-up of HQ organizations. Over this past year, for example, the prior contractor received and reviewed over 15,000 applications for employment with DHS HQ organizations. In the last year alone, the contractor managed over 1300 staffing and classification request, resulting in over 600 DHS HQ positions being

filled within the established 45-day timeline established by OPM. HC Operations will continue its emphasis on “ramping up” and responding to staffing/hiring needs and filling service gaps; however, the goal in FY 2009 is the continuing expansion of the service strategy from its current primary emphasis on hiring to a more robust, full-service human capital organization (which includes providing more personnel staffing support).

The HC Services team provides coordination and oversight support for outsourced services supporting HQ Human Capital operational needs. The team ensures that the personnel processes for HQ’s managers/employees and service providers (excluding the OIG), runs efficiently and effectively. Examples of services provided include: Staffing and Recruitment; Position Classification/Position Management; Performance Management; Payroll and Personnel Action Processing; Employee and Labor Relations Support; Retirements and Benefits Support; Time and Attendance Support.

The HC Services Team will provide: *coordinated and prioritized services* to all DHS customers; will ensure timely and effective recruitment of staff; effectively manage the “on-board” staffing process (which includes security clearances and collaboration with the Personnel Security Office), quality personnel staffing services; and, efficient and effective facilitation of staff exiting out of DHS HQ. Performance measures of effectiveness and customer satisfaction surveys will be developed and utilized to gauge our ability to service DHS customers.

***Cost Allocation Methodology:*** The cost allocation methodology is a pro-rata share based on the percent of each component’s number of FTE divided by the total number of participating component’s FTE multiplied by total estimated cost of the activity.

***Full Time Equivalent:*** This activity requires 4 FTEs.

### **Human Capital Business Systems (HCBS) – Fee for Service Activity**

***Description of Service:*** The mission of the HCBS is to design, develop, acquire, implement, maintain and support DHS enterprise-wide HC business systems. The system capabilities meet the requirements specified by the user-community and provide services in a timely, user-sensitive and cost-effective manner.

As an example of the HCBS enterprise approach, two enterprise systems have been acquired; a PeopleSoft HRMS and a web based Time and Attendance system. Both systems are hosted at the National Finance Center (NFC) which already supports the DHS payroll system.<sup>1</sup> This yields a DHS leveraged cost effective approach where three integrated systems are supported by one service provider. The HCBS unit managed the acquisition process utilizing component participation through requirements gathering and vendor negotiations. In the past, several individual government entities purchased these systems “on their own”, but none have been able to match the competitive pricing that DHS secured via the HCBS enterprise approach.

---

<sup>1</sup> Please note that O&M costs for the PeopleSoft HRMS are included in the NFC Payroll/Reporting section and are charged only to TSA and Coast Guard in FY 2008. It has not yet been determined which additional Component’s will wish to participate in and fund this NFC modernized system.

HCBS continues its enterprise acquisition strategies on behalf of all of DHS components, avoiding considerable duplicative costs if DHS components proceed independently. In addition to the T&A system mentioned above, this includes additional enterprise HR services and applications; web-based Performance Management (or “e-Performance”); Employee/Labor Relations Case tracking; the Reward

system for market-based pay analysis; Pay Tools/Utilities to assist with new pay cluster and band determinations; and an e-Classification/e-Recruitment enterprise system, to name a few. In each case the components are supported by the HCBS unit in a collaborative and leveraged approach.

As this program focuses on reengineering human capital management and implementing information technology and associated business processes for the HC community, the composition of the HCBS team reflects the need for expertise in several areas, including: strategic planning; human capital business reengineering; business planning and requirements and integrated product development; system integration; data management; system security; and software development. Specifically, the HCBS will provide services and support such as: payroll conversion; personnel/payroll liaison; advocacy for the component business interests and system changes; management of e-Gov initiatives such as e-OPF and e-Training; supplemental training and end-user support; reporting and analysis; and NFC reimbursable process. In addition, the office will administer other CHCO programs, such as Worker’s and Unemployment Compensation, Flexible Spending Accounts, and Employee Express<sup>2</sup>, that will benefit all of the DHS organization or a group of specific components, such as HQ.

In addition, HCBS will also provide oversight of the DHS e-Training initiative. One Program manager was hired in FY 2005 to oversee the DHS Headquarters (HQ) Learning Management System (LMS) – which, (in addition to the Government-wide “e-Gov” initiative), is included in the CIO’s WCF budget, and ensures that Learning Management training objectives are met. Oversight responsibility includes LMS, ensuring courses align with strategic goals, and working with components to align their e-learning activities.

***Benefit to the Customer:*** HCBS’ services provide a strong value proposition for components. Instead of each component taking an individual approach, challenged by limited resources and competing initiatives, the HCBS offers a leveraged approach where it shares its resources and expertise towards deploying and managing enterprise solutions in collaboration and to the benefit of the components. The role of the HCBS unit supports the enterprise perspective by capitalizing on lessons learned and industry best-practices to benefit the entire department. This type of centralized and collaborative approach with components has proven to be successful and cost-effective for other Federal agencies.

HCBS is able to assist components by providing an efficient means of acquiring technical services, contractual support, and subject matter experts (SME) with rare skills that are difficult to obtain through hiring. Specifically, the HCBS Team helps with: requirements development; system design; market surveys; software demonstrations; contract sourcing, evaluation, vendor negotiation, and administration; hosting selection and management; application software maintenance; security and Privacy Act compliance; user application training; and project management. Components can leverage

---

<sup>2</sup> We understand that functionality in NFC’s Personal Page is duplicated in Employee Express, however, Employee Express has interactive voice response functionality required by employees who have no access to computers. We are working with our Components to determine a shutdown schedule for Employee Express, where possible.

this HCBS' expertise and departmental buying power benefiting from competitive pricing that DHS has been able to negotiate through its enterprise acquisition strategies. The HCBS unit further supports the components by taking all enterprise solutions through the entire DHS approval process including Certification and Accreditation, Privacy Impact Assessment, Enterprise Architecture Review, Technology Insertion and Investment Review Processes required of all applications under a given program. This saves the components precious time and expense as the HCBS team will complete all needed approval processes at the department level.

A specific example of HCBS services benefiting a component is being done for the U.S. Coast Guard (USCG). USCG converted to the NFC Payroll/Reporting System at the end of FY 2006, as did the Transportation Security Administration (TSA). HCBS staff will be assisting with configuration, deployment and maintenance support for EmpowHR (the new modernized front-end system) and their conversion for WebTA (the new modernized time and attendance system). HCBS staff will also be leading the development and implementation of NFC required business changes to support new Human Capital Operational Plan (HCOP) pay and performance programs and, ultimately, planning for the within-grade buyout process. In essence, HCBS will be the largest source of NFC knowledge supporting these two components post conversion.

HCBS has prioritized and coordinated services from NFC, including direct HCBS interface with NFC for faster and more efficient customer service. NFC is required to deal with one point of contact for each customer – and DHS is now one customer. It is to our (business) advantage to help NFC help us by providing a centralized customer service center.

Below is a more detailed description of enterprise HR applications and services that will help to answer some of the “What are we getting for our money?” and “What does this do for me?” questions that we have received.

- e-Performance: To support the new performance management process, a Web-based tool powered by SoftScape, Inc. has been selected by DHS to assist employees and managers in their enhanced performance management responsibilities. SoftScape, which will be integrated into overall HCOP program changes, is a commercial performance management application that is used by 1.7 million customers in 42 countries, including several big name corporate, state, and local clients. Among its many features, the system offers the advantage of Web-based workflow to facilitate performance management processes such as:
  - Interactive Goal Planning and Communication, allowing both employees and their supervisors to participate in the goal development process and to automatically link organizational goals to individual or team/unit performance plans.
  - On-Line Journaling, facilitating better record keeping of employee accomplishments throughout the performance year. Both the supervisor and the employee will have access to this feature.
  - Self Assessment, providing an opportunity for employees to complete an assessment of their own accomplishments for consideration by their supervisor at year's end.
  - Peer review and manager feedback, accommodating subordinate input to supervisory performance reviews and facilitating the selection of peer review teams (i.e., customers, coworkers) as additional input sources for both employee and supervisor performance reviews.

- Embedded Competencies, facilitating development and coaching discussions throughout the performance year.

Use of an automated performance management tool will provide significant advantages in the department's efforts to monitor the administration of the new performance management system. For example, the automated system will provide real time status information on supervisory completion of goal planning and assessment activities.

- WebTA: The new Web-based time and attendance system, called WebTA, was recently selected as the DHS enterprise standard and will eventually be used across the department. Some of the planned features of the time and attendance tool—and their benefits to employees and supervisors—will include:
  - A Web-based system replacing workstation-based systems that are currently only accessible to designated timekeepers. Employees will be able to input time themselves, from any location with Internet access.
  - Paperless leave requests eliminating the need for paper-based leave request/authorization forms. Automated workflow will assist in routing and processing employee leave requests.
  - Built-in calendaring functions allowing supervisors to view requested and approved leave time at a glance and to assist in leave planning for peak holiday periods.
  - Automated leave transfer capability.
- e-Payroll: At the time of the department's formation, payroll services for DHS employees were handled by eight different payroll providers. During the past three years and working in conjunction with an Office of Personnel Management sponsored e-Payroll initiative, DHS has made significant progress in consolidating payroll operations. Currently, there are only two remaining payroll providers for DHS: The National Finance Center (our target end state payroll provider) and the department of Transportation (which currently services TSA and Coast Guard). Through this conversion, TSA and Coast Guard are also availing themselves to new human resources processing capabilities, which are based on PeopleSoft commercial software. PeopleSoft commercial software was also chosen as a new DHS standard and will eventually be phased to all DHS components.

The benefits of these payroll and HR processing changes, while largely transparent to employees, provides the department with an important single source of payroll and HR information. Payroll consolidation is also an imperative precursor for the HCOP program, as many of our policy changes, like new occupational clusters and new pay bands, will have profound impact on the HR and payroll processing systems. It is highly preferable to work these system changes with one payroll provider, rather than many.

- e-Recruitment: A variety of recruitment systems are currently in use by DHS components. As part of the effort to consolidate and modernize the HR systems, the DHS HCBS unit will lead an effort to consolidate towards an automated DHS enterprise solution that can contribute to material improvements in the overall hiring process. Automated and paperless hiring systems are excellent tools that can support:
  - Human Capital Management and Workforce Planning

- Maximizing the size and quality of candidate pools for positions at all levels of the Department
- Providing selecting officials with the best-qualified candidates in the minimum time
- Applicant tracking
- Evaluating candidate characteristics and diversity
- Entry on Duty processing
- Meeting or exceeding the 45-day hiring model under the President's Management Agenda
- Dramatically decreasing the time and effort of the applicant and selection process
- Achieving these outcomes with overall efficiency and the least expenditure of resources
- Applicant database mining
- Seamless movement of job seekers to agency automated recruitment system

The use of an automated recruitment solution is necessary to meet mission critical needs of the Department. Technology-enabled recruitment can deliver both time savings and improved results. E-Recruitment is a broad term that encompasses the five major components of the hiring/recruitment process:

1. Workforce Planning: Demand planning; supply planning
  2. Requisitioning: Job descriptions; approval workflow; job posting
  3. Candidate Acquisition: Referral management; candidate application; candidate screening/assessment; candidate marketing; candidate scoring/search
  4. Applicant Tracking: Applicant workflow; communications/correspondence management; interview management; background checking/drug screening; "on-boarding"
  5. Reporting/Analytics: Regulatory reporting; standard reporting/analytics; advanced analytics
- REWARD<sup>™</sup> : A suite of globally accessible compensation management applications that automates all aspects of compensation administration and pay delivery. Hosted by Watson Wyatt, REWARD is used in managing compensation programs. The Reward Suite is used to build and maintain compensation structures and broad bands, determine job levels by assessing internal job values and the competitive market, price jobs from REWARD's survey data warehouse, manage compensation survey data, market-price jobs and evaluate pay practices and link pay to performance.
  - HSLRB Tracking System: Web-based system used to track the status of labor relations cases that are presented before Homeland Security Labor Relations Board (HSLRB).
  - Pay Tools/Utilities: Web-based custom applications that are designed to provide support for HR specialists in setting pay, determining eligibility for pay, and other pay-related transactions. These tools will be based on the new pay rules and regulations.
  - e-OPF: Replaces the paper Official Personnel Folder (OPF) with an electronic Official Personnel Folder (e-OPF). Like the current paper folder, the e-OPF will encompass employees' entire Federal work histories. The e-OPF will comply with all OPM record-keeping guidelines and protections. In addition, employees will realize significant benefits with the e-OPF, including:
    - Secure online access via the Internet. Official records will be electronically protected and backed up, and security controls will far exceed current manual paper handling processes. Strict adherence to privacy rules via a multi-level user security structure. The system provides an audit trail of who accessed and when.

- Immediate access to the folder and the information it contains. Employees will be able to view or print their e-OPF online, at home, or at work to check their personnel file information or verify its accuracy. Employees will receive automatic email notification when documents are added or changes are made to their e-OPF.

***Cost Allocation Methodology:*** DHS population serviced assumes billing based on the "average number of employees paid" - which is consistent with NFC billing).

It is important to note that for HRIT Systems; only those components that are benefiting from specific systems are being charged in the year that they benefit – i.e., some components systems may be rolled out in FY 2008.

***Full Time Equivalent:*** This activity requires 24 FTE.

### **Flexible Spending Accounts (FSA) Administrative Costs – Fee for Service Activity**

***Description of Service:*** FSAs are employee-funded accounts that used by the employee account holder to pay for medical expenses that are tax deductible, but not reimbursed by any other source, as well as eligible dependent care costs. Contributions to the accounts come from an employee's pre-taxed salary; the Government does not make a contribution. There is a fee that is paid to the administrator of these accounts. The law now requires that agencies pay these fees on behalf of their employees.

The costs for this program are charged back based on actual invoices received in October and March of each calendar year. The March bill assesses a fee for employees of record as of January 1 of the calendar year. The October bill makes an adjustment for any new employees who have entered the program since January 1. The October bill is generally small, but it is not received in time to be paid out of the appropriation for the year in which the cost was incurred. The Human Capital Business Office will manage the invoicing process with the FSA provider and charge the direct cost of the fees to the component based upon actual invoices received from the vendor.

Generally, the Department saves enough money in reduced payroll tax to cover administrative fees. We believe administering the costs of these services through the WCF will provide for greater efficiencies through centralized management.

***Cost Allocation Methodology:*** The allocation methodology for the component assumes the total cost times the transaction % - which is the component's percentage of the population serviced (FTEs).

***Full Time Equivalent (FTE):*** This activity requires no FTE.

### **DHS Executive Leadership Development – Fee for Service Activity**

***Description of Service:*** A well executed Executive Leadership Program is a key element in sustaining a "One DHS" culture. Developing and delivering the leadership curriculum in FY 2008 supported both the DHS Strategic Plan -- Goal 7: Organizational Excellence; Objective 7.3, and the Human Capital Strategic Plan. These efforts were addressed in Congressional testimony. For FY 2009, at a minimum the Executive Leadership Curriculum will consist of two DHS-wide leadership development activities:

- **Secretary’s Senior Leadership Conference;**
- **Senior Executive Service Candidate Development Program (SES-CDP).**

**The Secretary’s Senior Leadership Conference** is important as change management starts with top leadership. The purpose of this conference is to:

- Provide an opportunity for the Secretary to meet with DHS executives and for those executives to interact with each other;
- Broaden the perspective of DHS leadership by actively creating a forum for in-depth dialogue and discussion for cross-cutting Departmental issues;
- Allow executives to learn about both key DHS-wide and component-specific strategic and tactical initiatives for the coming year, which is predicated on strategic linkage of resources, performance and results;
- Provide perspective from the White House, Congress, and others on issues important to DHS.

**The DHS Senior Executive Service Candidate Development Program** serves as a corner stone for sustaining a corporate leadership identity (i.e., creating a “One DHS” culture) – as directed in the DHS Strategic Plan; contributes to meeting our succession planning goals; and creates a high-quality, SES leadership cadre. It is also a critical element in sustaining a “Green” under the President’s Management Agenda’s Human Capital Scorecard. Most cabinet level agencies have a corporate level succession planning program.

Recent workforce analysis focusing on DHS’ top leadership positions, indicates that over a third of this leadership cadre is eligible to retire or will be within two years. A formal succession planning program ensures that emerging leadership needs and critical competency gaps are adequately addressed.

This centralized program is intended to complement and enhance the strengths of existing component Leadership development initiatives across the Department and further facilitate **succession planning** opportunities. The SES CDP will use the DHS Leadership Competency Framework to guide the competency development process. The staff person implementing the SES CDP will collaborate with components to identify participant competency gaps and to identify courses and development opportunities to address those gaps. An independent contractor will provide a formal assessment process for selecting participants, an assessment instrument for identifying participant development needs, and program consultation.

A key component of this program is the opportunity for participants to take advantage of developmental/rotational opportunities in other DHS components, thereby increasing participant’s “corporate” DHS knowledge and experience. In addition, components benefit from these rotational assignments by having a senior staff person working with them on real issues and offering different perspectives and/or business experiences. One of the goals of this program is for these candidates to be selected by OPM into the DHS SES corps. We ultimately seek to foster the development of a senior executive corps that operates with a DHS perspective in addition to a component perspective on critical issues.

***Cost Allocation Methodology:*** The costs are allocated based on the percentage of SES slots a component has relative to the total DHS SES (or SES equivalent) population excluding military. Allocation methodology for the components, assume the total cost times the transaction percentage -

which is the component's percentage of the population serviced.

**Full Time Equivalent:** This activity requires 2 FTE.

### **HQ Executive Leadership Development/General Workforce Training — Fee for Service Activity**

**Description of Service:** The HQ ELDP provides executive level training to close potential competency gaps in our DHS Headquarters leadership. It supports both the DHS Strategic Plan – Goal 7: “Organizational Excellence”; Objective 7.3, and the Human Capital Plan Goal: Exhibit Human Capital Excellence by fostering a “One DHS” organizational climate. Programs to support Executive Leadership are provided through the following programs: The Treasury Executive Institute (TEI); the SES Forum; and, the Individual Executive Development Training and General HQ Workforce training. In addition to TEI and the SES forum, training opportunities could include attending courses in the Management Development Center (Shepardstown, WVA) or the Federal Executive Institute.

**Cost Allocation Methodology:** The allocation methodology for the components is the total cost divided by the population serviced.

**Full Time Equivalent (FTE):** This activity requires no FTE.

### **HQ Employee Assistance Program (EAP) — Fee for Service Activity**

**Description of Service:** The EAP program includes short term counseling for employees and family members, critical incident stress debriefing, peer support programs, short term counseling, management consultations, information and referral to community resources for mental health providers, mental health education training, and peer trauma team support. Early interventions may prevent or minimize long term emotional stress reactions of trauma victims and their families/colleagues. EAP assistance enables employees to achieve and maintain balance in their lives, increasing job performance, satisfaction, and morale. The development of a Peer Support Program will enhance management's ability to provide assistance in traumatic and critical incidents – both on the local level to our employees and on the national level to our employees and the public.

The EAP program is in support of DHS' Guiding Principle to Develop Human Capital and Strategic Objective 7.3: To ensure effective recruitment, development, compensation, succession management and leadership of a diverse workforce to provide optimal service at a reasonable cost. The EAP is mandated under 5 U.S.C. 7904, 42 U.S.C. 290dd-1(a), and 42 U.S.C. 290ee-1(a).

The EAP deals with a wide range of personal problems of employees that can adversely affect job performance, conduct or attendance. The EAP offers confidential, professional, short-term counseling to employees and their families who are experiencing, or are affected by, personal or behavioral problems including but not limited to alcoholism, drug abuse, job stress, family problems and mental health problems. EAP services include but are not limited to short term counseling, consultations with management, information concerning community resources and referral to such resources, health education, training, and response to traumatic incidents such as shootings, line of duty deaths and terrorist attacks. The EAP is designed to provide assistance to employees to enable them to achieve

and maintain balance in their lives, thereby maximizing work performance, job satisfaction and morale. A Peer Support Program conducted under the auspices of the EAP will provide management with an additional resource for critical incident response.

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is the total cost of the EAP program divided by the population serviced – HQ – 3,244 FTE, which includes the Office of Inspector General. Allocation methodology for the components assumes the total cost times the transaction percentage - which is the components percentage of the population serviced.

***Full Time Equivalent (FTE):*** This activity requires no FTE.

### **CIO/DHS Infrastructure Transformation Program – Fee for Service Activity**

***Description of Service:*** The DHS Consolidated IT Infrastructure serves the majority of the 180,000 employees who transferred into the new Department on March 1, 2003. Since the IT infrastructure provides the foundation for effective operations of DHS systems and applications, including information sharing across components, a reliable and robust infrastructure is critical to the success of the DHS mission. From a business perspective, the goal of the IT infrastructure transformation is for the Department to be able to share data from any point in DHS to any decision maker.

The program seeks to create a robust platform on which to quickly launch new capabilities. For example, the newly combined component supports 15 separate targeting systems, 14 alerts and warnings systems, and a handful of identification and credentialing systems. Moreover, DHS runs 15 data centers, six wide area networks, and multiple local area networks with overlapping system circuitry. The data centers contain over 12,000 servers. Contrasting acquisition strategies and IT infrastructure policies among components further complicate the DHS environment.

The Infrastructure Transformation Office (ITO) has been chartered by the CIO Council and resides within the Office of the CIO. The office is led by a Director and a CIO Council member executive sponsor and is supported by a senior executive steering group of CIOs, which is staffed by a team of technical experts hired by the Department HQ from the components, several components working group members, and contractor support. The project is broken down into the following four “areas”:

**Operations Center:** Each component currently employs its own helpdesk, network operations centers and security operations centers. The objective of this project team is to establish and implement one centrally managed, collocated DHS Integrated Help Desk/Network Operations Center/Security Operations Center that supports the entire DHS IT Infrastructure. These functions will ensure that user problems are identified, tracked and solved expeditiously, that the network is continuously monitored and maintained in an operational status, and that the IT infrastructure remains secure.

**Data Center:** DHS runs 15 data centers in the current environment. The objective of this team is to reduce the number of data centers down to no more than a handful as appropriate. The project team seeks to increase the efficiency and cost effectiveness of DHS data centers through first co-locating data centers and centralizing data center services, and then consolidating systems onto fewer platforms. DHS data centers will be implemented with the same standard configuration and will be mirrored for redundancy, fail over, and load balancing.

**Network:** DHS has identified six wide area networks and a multitude of local area networks. DHS must move toward a single, reliable, scalable, secure, and survivable data communications network (wide and local area networks) to support IT users as they employ mission and business-critical systems and applications to gather, transmit, store, secure, query, and retrieve the data required for them to do their jobs. The project team is in the process of streamlining and standardizing the network environment, minimizing the amount of redundant infrastructure and will develop a department-wide network topology with centralized processes and procedures. The network infrastructure will provide a transport mechanism allowing full interoperability within DHS to be accomplished in alignment with existing requirements.

**Desktop & Collaboration:** DHS supports various operating systems, desktops, and collaborative tools in its current desktop environments. Through this investment, DHS will deploy and manage a common desktop and collaborative environment. Users will conduct business using standard terminal devices and collaboration tools within a centrally managed infrastructure based on the foundation of one network. The standardized desktop and collaboration environment will provide interoperability as well as a stable foundation for incorporating new requirements and for providing regular upgrades and technology refreshments. The collaboration tools will provide DHS with a capability that will allow any DHS employee to communicate with any other DHS employee from any workstation or telephone that is part of the enterprise.

**Cost Allocation Methodology:** The cost allocation methodology is based on the direct contribution percentage of each component to the FY2009 OMB-300 Consolidated Infrastructure investment.

**Full Time Equivalent (FTE):** This activity requires 10 FTE to oversee the design, operations and deployment of the new desktop, operations centers and data center functions.

### **National Capital Region Infrastructure Operations (NCRIO) – Fee for Service Activity**

**Description of Service:** The NCRIO will serve the majority of DHS Headquarters users for network, email, internet, intranet, and telecom infrastructure, as well as all end user desktop computing, telecom, and wireless services. NCRIO's Program Management Office (PMO) coordinates management and deployment of infrastructure resources along with build-out of new facilities and provides continuous operations, help desk, vendor management, financial management, and technology evaluation. Working with Directorate CIOs, NCRIO will ensure effective customer service, performance management and measurement for continuous availability of all critical infrastructure services along with vendor effectiveness and accountability. The WCF for the NCA IT Infrastructure includes expenditures for data (network), voice (phone) and video (VTC) support for users in DHS HQ, BTS Office of the Under Secretary and the Office of the Inspector General.

**Cost Allocation Methodology:** The FY09 WCF submission is allocated among the four participating organizational components, USM, Under Secretary for Preparedness, S&T, and Operations Coordination. & Intel and Analysis as agreed upon in the Memorandum of Understanding for Shared Services Allocations. The MOU separates the NCAIO costs into service categories, which further allocate the costs by specifically agreed upon algorithms. For the purposes of meeting budget submission timelines some proxies to the MOU were made, i.e. seat counts were based on personnel projections as opposed to the count of end-user desktops and laptops. These proxies will be replaced

by actual costing information throughout 9FY09 on a quarterly basis and each participating organizational component's costs will be adjusted.

**Full Time Equivalent (FTE):** This activity requires 9 FTE.

### **Software Enterprise Licenses – Fee for Service Activity**

**Description of Service:** A standard and consistent DHS process provided by a centralized tool will facilitate compliance and oversight responsibilities of the Chief Information Security Officer (CISO) and the Office of Inspector General. The Department continues to pursue opportunities to benefit from economies of scale, moving from component or office specific software licenses to larger enterprise licenses for common services.

**Microsoft:** The account provides for the funding and management of the Microsoft Enterprise Agreement awarded June 2003, which provides enterprise access to the Microsoft suite of products. The products include the software needed for both the individual desktop, laptop, and server platforms, such MSOffice, MSProject, MSViso, MS Advanced Server, etc. This agreement is utilized by all of DHS. The request reflects the contractual obligations of each of the components.

**Cost Allocation Methodology:** The cost allocation methodology is the unit contract costs multiplied by the number of sites or licenses each component requested.

**Full Time Equivalent (FTE):** This activity requires 1 FTE to facilitate compliance and oversight responsibilities of the various software licenses.

### **Procurement Operations – Fee for Service Activity**

**Description of Service:** The DHS Office of Procurement Operations (OPO) provides full service acquisition support to the Office of the Secretary, the Undersecretary for Management, Science and Technology, U.S. Citizenship and Immigration Services, and the US Visit Program Office. In addition, the OPO provides acquisition services for department-wide acquisition initiatives identified by both the Chief Information Officer and the various commodity councils within DHS. Services provided include acquisition planning, training, execution, and administrative services.

**Cost Allocation Methodology:** The cost allocation methodology for this WCF activity is based on 1.86% of the obligated dollars of contracts under \$50,000.

**Full Time Equivalent (FTE):** This activity requires 250 FTE in FY 2009.

### **Board of Contract Appeals - Fee for Service Activity**

**Description of Service:** The Federal Acquisition Regulation (FAR) requires that DHS establish a venue to hear and resolve contractor disputes, protests, and other issues within its jurisdiction related to DHS contractual matters. After analyzing the pros and cons to establishing a DHS Board of Contract Appeals, DHS determined establishing an interagency agreement with the Department of Transportation was the most cost effective way to provide these services.

The customer is provided a professional venue that provides both the contractor and the neutral forum to resolve contractor disputes and protests. Standards for timeliness and quality of services are defined in the FAR. This activity is an established venue with a long track record of professional services. The component does not have to establish an interagency agreement for these services and DHS provides the initial good faith outlay.

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component’s FTE divided by the total FTE multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requests no FTE or funding in FY 2009.

---

PPA: Tri-Bureau Services Activities

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b> |

Working Capital Fund requests \$60.06 million for Tri-Bureau Services which is an increase of \$3.7 million from FY 2008.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

*Tri-Bureau Services Activities*

**Tri-Bureau Human Resources Shared Services – Tri-Bureau Service Activity**

**Description of Service:** Customs and Border Protection provides human capital operations services to two additional DHS offices: Immigration and Customs Enforcement (ICE) and U.S. Citizenship and Immigration Services (USCIS). This shared service agreement is also known as "Tri-Bureau HR Services" and has as an underlying objective of shared services to ensure the most efficient and effective use of HR management resources through process improvement and automation. CBP is providing services related to hiring, staffing and classification of positions. In addition they maintain and support records management.

CHCO will ensure coordination, collaboration and communication among and between all Tri-Bureau customers and service providers.

Keeping this activity in the CHCO WCF moves DHS another step closer to “functional integration” and further promotes a “One DHS” corporate culture.

***Cost Allocation Methodology:*** The cost allocation is based on the FTE population serviced and the amount of work provided to each agency serviced. The cost allocation methodology is a pro-rata share based on the percent of each component’s FTE divided by the total number of participating components’ FTE multiplied by total estimated cost of the activity.

***Full Time Equivalent (FTE):*** This activity requires no FTE.

### **IT Services from Department of Justice (DOJ) – Tri-Bureau Service Activity**

***Description of Service:*** The Department of Justice (DOJ) MOU Working Group was formed to perform an analysis that will clarify IT services that DHS requires from DOJ and the associated costs. The working group assists in defining the specific IT service requirements of each component currently using DOJ as the provider ICE, CBP, USCIS, and HQ. The Tri-Bureau components are legacy DOJ agencies. The working group is also preparing migration plans to transfer services to DHS over time.

DOJ provides the following IT services:

- **Data Center Services** - provide application hosting OS/390 platform for over 40 applications; application hosting on AIX Unix platform for over 25 applications; housing of DHS servers; and separate raised-floor computer room space and utilities.
- **Data Networks Wan Services** – provide Justice consolidated Network and FTS-2001 data services including long-distance voice and calling card services; Metropolitan Area Network; Data circuit ordering services; and secure messaging services.
- **Voice Networks WASP Services** - provide the Washington Area Switch Program that provides voice services to the Washington Metropolitan area.
- **JUST Message Switch** - provide the Justice Telecommunications Communications System (JUST) access to the National Crime Information Center (NCIC) and state and local law enforcement data for Federal Law Enforcement Agencies.
- **Web/Internet Services** – provide Internal and External Communications.

***Cost Allocation Methodology:*** The cost allocation methodology is based on the actual usage as determined by Department of Justice.

***Full Time Equivalent (FTE):*** This activity requires 2 FTE.

PPA: Government-Wide Mandated Services Activities

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b> |

| 2009 Program Change          | 3                   | 3          | 10,014        |
| <b>2009 Request</b>          | <b>6</b>            | <b>6</b>   | <b>37,093</b> |
| Total Change 2008-2009       | 3                   | 3          | 10,291        |

Working Capital Fund requests \$37.09 million for Government-Wide Mandated Services. This is an increase of \$10.3 million and 3 FTE over FY 2008.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

***GOVERNMENT-WIDE MANDATED SERVICE ACTIVITY***

**Interagency Council Funding - Government-wide Service activity**

**Description of Service:** GSA provides oversight and administers the Interagency Council funds in consultation with the Chief Financial Officers Council, the Chief Information Officers Council, the Federal Acquisition Council and the Chief Human Capital Officers Council.

- **Chief Financial Officers (CFO) Council Funding Supports the Following Activities:**
  - Federal Audit Clearing House (FAC)
  - Grants Streamlining
- **Chief Information Officers (CIO) Council Funding Supports the Following Activities:**
  - A \$2 million contract to support the Portfolio Management Office for the ongoing E-government initiatives efforts.
  - Federal Enterprise Architecture (FEA) — the FEA PMO will continue their efforts to identify and develop collaboration and consolidation opportunities across Federal agencies in support of the President’s Management Agenda initiatives.
- **Federal Acquisition Council (FAC) Funding Request Supports the Following Activities:**
  - The Federal Competitive Sourcing Database (FCSD) is intended to facilitate comprehensive, consistent, and timely reporting of government actions related to competitive sourcing.
  - Acquisition Workforce Competency Development and Training - Agencies use the Acquisition Career Management Information System (ACMIS) database which provides workforce training data and OPM data to make strategic workforce decisions affect the agency training and certification requirements.
  - Government-wide Performance Measures for Socio-Economic Goals - Small business success is currently measured by meeting established statutory goals.
  - Procurement Center Representatives (PCRs) Online - In order to obtain the appropriate level of contributory review, and move the procurement along in a timely fashion, it would facilitate the

requirement if the agencies and SBA used an online workload tool.

- The Service Acquisition Reform Act (SARA), Acquisition Advisory Panel and Report to Congress - Section 1423 of SARA requires the Administrator of OMB/OFPP to establish an advisory panel of recognized experts in acquisition law and policy to review laws and regulations regarding the use of commercial practices, performance-based contracting, the performance of acquisition functions across agency lines of responsibility, and the use of Government-wide contracts.
- Acquisition Center of Excellence - SARA mandates the development and maintenance of a Center of Excellence in Contracting for Services.

- **Chief Human Capital Officers Council (CHCO) Funding Request Supports the Following Activities:**

- CHCO Website - A critical component in advancing the government-wide goals of this management innovation will be the development and maintenance of a high-quality, component rich Web content delivery system. The creation of this site will establish the World Wide Web identity of the CHCO Council and provide a vehicle for sharing and exchanging information of interest to the Federal human resource management community. The system also will provide a forum for the exchange of information among members of the Council in both a public and private manner.

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is pro-rata share based on the percent of each participating component's adjusted total budget divided by DHS's total adjusted budget (excluding grant funding) multiplied by the total estimated cost of the activity.

***Full Time Equivalent (FTE):*** This activity requires no FTE.

### **Recruitment One-Stop-Government-wide Service activity**

***Description of Service:*** The Recruitment One-Stop (ROS) initiative is a Government-wide initiative led by the Office of Personnel Management (OPM). All agencies fund their portion of this program (based on employment levels). Regulations contained in 5 CFR Parts 330, 333, and 335 implement section 4 of Public Law 1054-52 and authorizes OPM to charge fees to agencies to pay the cost of providing Federal employment information and services.

This program seeks to simplify the process of locating and applying for Federal jobs. It delivers a number of new job seeker focused features including intuitive job searching; clean, concise, understandable and attractive job announcements; on-line resume submission; applicant data-mining; and on-line feedback on status and eligibility. USAJOBS Federal Employment Information System delivers state-of-the-art on-line recruitment services to job seekers including intuitive job searching, on-line resume submission, applicant data-mining, and on-line feedback on status and eligibility.

***Managing Partner:*** OPM

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Full Time Civilian Equivalent (FTE) divided by total DHS

civilian FTE multiplied by the total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

**Full Time Equivalent (FTE):** This activity requires no FTE.

### **e-Training – Government-Wide Service Activity**

**Description of Service:** Creating a premier e-Training environment that supports development of the federal workforce through simplified and one-stop access to high quality e-training products and services advances the accomplishment of agency missions. Government-wide accomplishments derived from this activity are:

- Over 220,000 registered users and over 195,000 course completions to date
- Variable training costs have been reduced to less than a penny per student
- Launched IT security courses mapped to GISRA and NIST requirements
- Launched Module 3 which includes initial establishment of IT Communities of Practice (COP)/Knowledge Domain through the IT Workforce Development Roadmap; e- mentoring; upgraded performance support tools; and initial standardized reports.

**Managing Partner:** OPM

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Full Time Equivalent (FTE) divided by DHS's total FTE multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 6 FTEs.

### **Enterprise HR Integration – Government-Wide Service Activity**

**Description of Service:** EHRI is a collaborative e-Government initiative designed to transform the way Federal HR Specialists and Managers access human resource information and the way all Federal employees access their personnel file information. When fully implemented, EHRI will replace the current paper based Official Personnel Folder (OPF) with an electronic employee record for all Executive Branch employees, resulting in a comprehensive electronic personnel data repository covering the entire life cycle of Federal employment. In addition to streamlining personnel management actions, EHRI will provide HR managers and specialists with powerful workforce analytic and planning capabilities. Progress to date includes:

- Conversion of USSS, FLETC, and FEMA records was scheduled for FY 2007.
- FY 2007 and beyond will be in a steady state.

**Managing Partner:** OPM

**Cost Allocation Methodology** Costs for EHRI's products and services will be recovered by EHRI from all agencies on an equitable basis related to the size and usage of each participating agency. Charges to each agency will be established by distributing total EHRI costs to all clients on the basis of

the number of OPFs or on the basis of actual cost, depending on the service. Usage audits will occur at OPM's discretion, but at least annually, and will be used to make adjustments to cost recovery through the Interagency Agreement (IAA). EHRI will notify DHS of their revised annual costs within DHS's annual cycle, at least 90 days prior to completion of the cycle. Billing will be done annually, in advance, using DHS' Agency Location Code (ALC) via the Department of Treasury's Inter-Governmental Payment and Collection system (IPAC). Any optional services provided to DHS will be billed on a cost recovery basis at the time the service request is signed by both EHRI and DHS.

**Full Time Equivalent (FTE):** This activity requires no FTE.

### **Business Gateway - Government Wide Service Activity**

**Description of Service:** Business Gateway reduces the burden on businesses by making it easy to find, understand, and comply with relevant laws and regulations at all levels of government. The Business Gateway will be the cross agency portal for businesses that integrates the content and functionality of number of federal business web sites (e.g., business.gov, businesslaw.gov, sba.gov). The goals of Business Gateway are as follows:

- Develop a catalog of federal forms for Business.gov.
- Expand harmonized miner reporting (Mine.gov) to include additional federal agencies and additional states.
- Develop the Business Gateway portal into the Federal cross-agency portal for businesses, integrating the content and functionality of SBA.gov, BusinessLaw.gov, Business.gov and related sites into one comprehensive site: business.gov.

**Managing Partner:** Small Business Administration (SBA)

**Cost Allocation Methodology:** The cost allocation methodology for this activity is pro-rata share based on the percent of each participating component's adjusted total budget divided by DHS's total adjusted budget (excluding grant funding) multiplied by the total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires no FTE.

### **e-Rulemaking - Government Wide Service Activity**

**Description of Service:** e-rulemaking is a collaborative, inter-agency activity whose purpose is to establish a common, automated and integrated approach to managing the federal government's rulemaking function. The activity consolidates rulemaking systems at the various departments and agencies and is centrally managed through a web-based environment offering such as one-stop access, search capabilities, and public commenting. e-rulemaking activities include:

- Establish and staff an e-Rulemaking Program Office to implement the Initiative, participate on an inter-agency advisory board comprised of federal agencies, and establish work groups to address projects and tasks essential to the successful execution of the initiative.
- Conduct meetings for the purpose of collaborating with other federal agencies to enhance the Initiative.

- Facilitate an effort under the Advisory Board to develop a cost reimbursement formula for Agencies to support, migrate, and operate and maintain the Module 2 system.
- Coordinate and ensure participating and partner members have an opportunity to review project management documentation, including Exhibit 300 of OMB Circular A-11, work breakdown structure, project plans, and statements of work.
- Execute interagency agreements to affect DHS' transfer of funds.

**Managing Partner:** Environmental Protection Agency

**Cost Allocation Methodology:** The cost allocation methodology for this activity is pro-rata share based on the percent of each participating component's adjusted total budget divided by DHS's total adjusted budget (excluding grant funding) multiplied by the total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires no FTE.

### **Case Management Line of Business – Government Wide Service Activity**

**Description of Service:** Case Management Line of Business is one of the lines of business supporting the President's Management Agenda goal to expand Electronic Government. The goal of the effort is to identify opportunities to reduce the cost of government and improve services to citizens through business performance improvements.

**Managing Partner:** Department of Justice

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Law Enforcement Full Time Equivalent (FTE) divided by DHS's total Law Enforcement FTE multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires no FTE.

### **e-Grants – Government Wide Service Activity**

**Description of Service:** e-Grants create a single portal for all federal grant customers to find, apply and manage grants on-line. The Grants.gov Storefront provides electronic functionality for applicant's grantees, and reduces the paper-based processes that currently challenge the Federal grants environment. The initiative is designed to reduce existing inefficiencies, meet e-Gov goals, and provide benefits to both citizens and the government. Specifically, the initiative enables the government to meet many of the streamlining activities required by Public Law (PL) 106-107, Federal Financial Assistance Management Improvement Act, and called in the President's Management Agenda, such as deploying a unified search/find capability for grant opportunities, standard data sets, and a common mechanism and processes for applying for Federal grants funds.

**Managing Partner:** Department of Health and Human Services

**Cost Allocation Methodology:** The cost allocation methodology is a pro-rata share based on the percent of each organization element grant funding divided by DHS' total grant funding multiplied by

total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires no FTE.

### **e-Authentication – Government-Wide Service Activity**

**Description of Service:** The e-Authentication activity was implemented to minimize the burden on businesses, the public and government when obtaining services on-line by providing a secure infrastructure for on-line transactions, eliminating the need for separate processes for the verification of identity and electronic signatures. The goal of the e-Authentication Initiative is to provide trusted and secure standards-based authentication architecture to support the 24 government-wide e-government initiatives. This approach will provide a uniform process for establishing electronic identity and eliminate the need for each initiative to develop a redundant solution for the verification of identity and electronic signatures. e-Authentication's distributed architecture will also allow citizens and businesses to use non-government issued credentials to conduct transactions with the government.

Successful implementation of e-Authentication will produce numerous benefits for the public and the federal government. Citizens and businesses will have a secure, easy-to-use and consistent method of proving identity to the government and will be spared the burden of having to keep track of multiple sets of registration information. Federal agencies will be able to reduce authentication system development and acquisition costs and reallocate labor resources previously used to develop such systems.

**Managing Partner:** General Service Administration

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Full Time Equivalent (FTE) divided by DHS' total FTE multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires no FTE.

### **Human Resources Line of Business (HRLOB) – Government-Wide Service Activity**

**Description of Service:** HRLOB is one of the lines of business supporting the President's Management Agenda. Interagency teams will examine business and information technology data and best practices for each line of business – financial, human resources, grants, health, and case management systems. The goal of the effort is to identify opportunities to reduce the cost of government and improve services to citizens through business performance improvements.

**Managing Partner:** Office of Personnel Management

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Full Time Civilian Equivalent (FTE) divided by DHS's total Civilian FTE multiplied by the total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

**Full Time Equivalent (FTE):** This activity requires no FTE.

## **e-Gov Benefits – Government Wide Service Activity**

**Description of Service:** The GovBenefits.gov activity provides a single point of access for citizens to locate and determine eligibility for government benefits and services. The site now offers links to 234 benefits programs, representing \$1.3 trillion in annual benefits. Program benefits are as follows:

- A partner room, with instructions on how to become a partner of e-GovBenefits and presentations about the project available to download.
- A press room, with general information, press releases and biographies of the management team.
- These enhancement goals to GovBenefits.gov are a direct response to citizen feedback that has been received about the site.

**Managing Partner:** Department of Labor

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Full Time Civilian Equivalent (FTE) divided by DHS' total Civilian FTE multiplied by total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

**Full Time Equivalent (FTE):** This activity requires no FTE.

## **Financial Management Line of Business (FMLOB) – Government-Wide Service Activity**

**Description of Service:** The FMLOB task force has set goals out to define, analyze, and implement options that will enhance cost savings in the financial management systems; provide for standardization of business processes and data models; promote seamless data exchange between Federal agencies; and strengthen internal controls through integration of core financial and subsidiary systems. The FMLOB task group's current objective is to evaluate alternatives and recommend overall strategy for: financial management enterprise architecture, standardization of business processes and data models, and business efficiencies in acquisition and delivery.

**Managing Partner:** Office of Management and Budget

**Cost Allocation Methodology:** The cost allocation methodology for this activity is pro-rata share based on the percent of each participating component's adjusted total budget divided by DHS's total adjusted budget (excluding grant funding) multiplied by the total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires no FTE.

## **e-Gov Integrated Acquisition Environment – Government Wide Service Activity**

**Description of Service:** The Integrated Acquisition Environment activity is a secure business environment that facilitates and supports cost-effective acquisition of goods and services in support of mission performance. The goals for the Integrated Acquisition Environment activity are as follows:

- Create a simpler, common, integrated business process for buyers and sellers that promote competition, transparency and integrity.

- Increase data sharing to enable better business decisions in procurement, logistics, and payment and performance assessment.
- Take a unified approach to obtaining modern tools to leverage investment costs for business related processes.

### **Program Objectives**

- Deploy a single point of registration and validation of supplier data accessed by all agencies.
- Implement a central point for consolidated collection and access of statistical and management information related to government acquisitions.
- Implement a directory of contracts to simplify selection and facilitate leverage of Government buying.
- Develop a standard glossary and vocabulary to facilitate exchange of data between and within agencies.
- Transform intra-governmental ordering and billing to enable universal electronic processes, reduce payment and collection problems, and enable swift and accurate revenue and expense elimination processes for preparing consolidated financial statements.

***Managing Partner:*** General Service Administration

***Cost Allocation Methodology:*** The cost allocation methodology is a pro-rata share based on the percent of each component's measurement of three contract acquisition variables divided by the total sum of all component measurements of the same three variables multiplied by total estimated cost of the activity. The three contract acquisition variables measured for each component's is as follows: (1) the number of personnel providing contractor support, (2) number of contracts processed and (3) the dollar volume of contracts processed.

***Full Time Equivalent (FTE):*** This activity requires no FTE.

### **e-Gov Disaster Management – Government Wide Service Activity**

***Description of Service:*** Disaster Management is part of the e-Gov Act of 2002, Title II, and Section 214 "Enhancing Crisis Management Through Advanced Information Technology" and is described in OMB M-03-18, "Implementation Guidance for the e-Government Act of 2002." This initiative, which will support disaster assistance and "all hazards" response, is a joint effort involving 10 other federal agencies that support disaster management. This initiative also supports many of the goals of the Initial National Response Plan dated October 2003.

The scope of the project covers all federal agencies that are involved in disaster recovery, as well as state, local and tribal disaster recovery organizations and individuals. The value of this program is its contribution to improving disaster preparedness and its potential to reduce property damage and loss of life. The initiative has the following goals:

- Goal 1: An easy to use, unified point of access to Disaster Management knowledge and services.
- Goal 2: Accelerated and improved quality of disaster mitigation and response.

**Scope:** The result of the initiative is a set of disaster services and information exchange delivery mechanisms that meet the nation’s disaster planning and response needs. The three pillars of the Disaster Management initiative are:

- DisasterHelp.gov – A consolidated portal that provides disaster-related information and collaboration tools for the emergency management community.
- DMIS – A core incident management tool set and shared services for information exchange.
- Interoperability Standards –Interoperability standards to reduce costs and operational complexity to simplify the software interfaces needed to interact with many sources and dissemination systems.

**Managing Partner:** DHS / Chief Information Officer (CIO) / Science & Technology (S&T).

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component’s level of participation in Disaster Management divided by the total sum of all component levels of participation in Disaster Management multiplied by total estimated cost of the activity. Levels of participation include measuring the active participation of sixteen elements of Disaster Management defined by Disaster Management e-Government Initiative Program Office, EP&R/FEMA. The sixteen elements of Disaster Management include the following: (1) transportation, (2) communications, (3) public works and engineering, (4) firefighting/incident command system, (5)information and planning, (6) mass care, (7) resource support, (8) health and medical services, (9) search and rescue, (10) hazardous materials, (11) food, (12) energy, (13) warnings and alerts, (14) research and development, (15) emergency/domestic preparedness, and (16) disaster relief. The sixteen elements are the cost drivers for each component’s assessment and because many components are involved in various activities at different levels of participation, the cost for this activity is fairly uniform across the components.

**Full Time Equivalent (FTE):** This activity requires no FTE.

Working Capital Fund requests \$13.38 million for DHS Cross-Cutting activities. This is an increase of \$.03 million and 3 FTEs over FY 2008.

## **CURRENT SERVICES PROGRAM DESCRIPTION:**

### ***DEPARTMENT OF HOMELAND SECURITY CROSSCUTTING ACTIVITY***

#### **Capital Planning & Investment Control (CPIC) – DHS Crosscutting Activity**

**Description of Service:** A CPIC process is required to comply with the budget preparation guidance provided by OMB Circular A-11, preparation, submission and execution of the budget, and the management guidance provided by OMB Circular A-130, Management of Federal Information Resources, under the legislative authorities and requirements in the Clinger-Cohen Act and the Homeland Security Act. Project management offices throughout the components prepare business cases to demonstrate to the Department and OMB that they are on-track and ready to effectively use the additional funding requested. These CPIC services include automated tools to assist with document preparation, document review and scoring, and formal training, informational briefings, and remedial coaching to improve document quality, as well as support to Program Management Offices (PMOs) in the review and feedback on briefings for DHS oversight.

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each participating component's Exhibits 300 total divided by the total DHS Exhibit 300's multiplied by the total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires no FTE.

#### **Ready Campaign – DHS Crosscutting Activity**

**Description of Service:** The DHS "Be Ready" campaign and Ready.gov web site helps citizens make a kit of emergency supplies; make a plan of what to do in an emergency, and be informed of biological, chemical, explosion, nuclear blast and radiation threats.

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each participating component's adjusted total budget divided by DHS's adjusted total budget (excluding grant funding) multiplied by the total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires no FTE

#### **Strategic Sourcing – DHS Crosscutting Activity**

**Description of Service:** DHS has established Strategic Sourcing Group (SSG) to implement a department-wide approach to acquiring goods and services. The SSG has established commodity councils that are working to identify the department's needs for each commodity and developing more efficient purchasing mechanisms to address those needs. The total number of commodity councils established thus far is 16 covering such commodities as weapons and ammunition, uniforms, electricity, office supplies, airport services, and copiers.

**Cost Allocation Methodology:** The cost allocation methodology is a pro-rata share based on the percent of each component’s measurement of three contract acquisition variables divided by the total sum of all component measurements of the same three variables multiplied by total estimated cost of the activity. The three contract acquisition variables measured for each component is as follows: (1) the number of personnel providing contractor support, (2) number of contracts processed and (3) the dollar volume of contracts processed.

**Full Time Equivalent (FTE):** This activity requires no FTE.

**CPO Shared Reporting – DHS Crosscutting Activity**

**Description of Services:** The DHS Shared Reporting - CPO system, known otherwise as the Homeland Security Contract Information System (HSCIS), is the acquisition data feeder system to the Federal Procurement Data System - Next Generation (FPDS-NG) that is required by statute. This data source is the primary source of all acquisition data for the federal government, used by U.S. agencies, governments around the world, the public, and the commercial world for planning marketing opportunities with the American government related to its \$310 trillion annual acquisition budget. DHS uses HSCIS to provide data to FPDS-NG and to monitor acquisition data.

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each participating component’s adjusted total budget by DHS’ adjusted total budget (excluding grant funding) multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requests 4 FTE.

Working Capital Fund requests \$1.3 million for this activity. This is an increase of \$0.24 million over FY 2008.

## **CURRENT SERVICES PROGRAM DESCRIPTION:**

### ***WCF MANAGEMENT ACTIVITY***

#### **Working Capital Fund Operations – WCF Management Activity**

***Description of Service:*** The Working Capital Fund Operations provides policy, procedures, budget formulation, execution and customer resolution services in managing the WCF. Services are provided to the activity managers as well as customer components across DHS.

#### **Activity Managers Budget Formulation Services:**

- Oversee all budgets, make recommendations to the General Manager on all aspects of the WCF, and perform or direct all duties and responsibilities of financial management not reserved by the General Manager.
- Provide direction and assistance to program managers in the development of operating plans, budgets, and supporting documents relating to use of the WCF.
- In coordination with the Director, Budget Staff, make recommendations to the General Manager of the WCF on operating plans, rate structures and activities to be supported by the fund.

#### **Activity Managers Budget Execution Services**

- Review financial reports for conformance with program and financial plans, and inform the General Manager and other program management officials of trends and changes required in the financial plan. Conduct Quarterly Status of Fund Reviews and a Year-end Close of the Fiscal Year.

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's WCF assessment amount divided by the total WCF assessment multiplied by total estimated cost of the activity.

***Full Time Equivalent (FTE):*** This activity requires 8 FTE to oversee all budgetary functions of the Working Capital Fund.

Description of Item

The General Services Administration (GSA) charges rent to over 100 federal agencies, which is deposited into the federal building fund and used to operate the government’s buildings and pay rent to private sector for lease space.

GSA provides workspace and related services for over 100 federal client agencies serving more than one million workers through the Public Building Service (PBS). GSA also provides related real estate services including the operation and maintenance of buildings and out-leasing programs. GSA’s Computer Integrated Facility Management program uses cutting edge technology to look at the buildings life cycle. Real estate services provided to clients appear in federal agencies monthly electronic rent bills.

The Department has established a clearing account to expedite the payment of GSA rent billings for the Department of Homeland Security, excluding the major components. The monthly bills include all GSA-controlled space that the Department occupies throughout the United States, including parking spaces allotted to the Department

Justification

The FY09 budget increase includes GSA occupancy agreement updates, Federal Protective Service (FPS) rate increases, and rent from other sites not previously in the WCF such as the Science and Technology location, Office of the Inspector General's site, and the National Protection and Preparedness Directorate. These locations total an additional 406,274 rentable square feet. In addition to these rent mergers, CAO/WCF is working with GSA to acquire approximately 140,000 additional square feet that result from new component space requirements and the completion of renovations at the Nebraska Avenue Complex.

Impact on Performance (Relationship of Increase to Strategic Goals)

These facilities improve the delivery of support services to each DHS component while reducing the cost of operations. The DHS CAO provides common administrative support services to component customer who can be provided most economically and efficiently through centralized coordination, direction and supervision. The centralization of GSA Rent services for the Departmental Management and Operations is critical to the mission of DHS.

Description of Item

Library/Information Services initiatives provide desktop access to a myriad of mission essential open source, licensed, commercial electronic resources such as LexisNexis/Accurint, Westlaw, Jane’s Terrorism Intelligence, ChoicePoint/AutoTrack, Congressional Quarterly, Dun & Bradstreet, etc., that is central to the intellectual capital of DHS. The Library and Information Services program office manages the DHS enterprise-wide consolidated subscriptions activity through the Working Capital Fund which provides components with cost effective and efficient acquisition and access to mission essential open source information content. The DHS Library and Information Services program goal is to be the center of excellence for dissemination of licensed information content, desktop access, and life cycle management of information assets essential for decision support and intelligence gathering research activities. In support of this goal, the DHS libraries provide timely access to relevant information and virtual reference and referral services to support research and data collection requests from knowledge workers dealing with congressional staff, General Counsels, researchers, scientists and intelligence professionals.

Justification

The Consortium of Department of Homeland Security (DHS) Libraries and Information Services was established in 2004 to implement the functional integration of DHS-wide information assets supporting decision making, enforcement, investigation, research and academic information gathering activities of the DHS workforce. The Libraries and Information Services requires one (1) additional FTE to support the expansion of the Libraries and Information Services. The savings from the consolidated subscriptions will be used to support the one (1) additional FTE, no funding dollars are needed. The additional FTE will perform the following:

- Respond to DHS consolidated subscription customers, provide information in response to inquiries about products or services and to handle and resolve issues.

- Perform miscellaneous tasks as needed. These may include clerical tasks, Web research, editing, or other tasks. -Provide assistance to the librarians, acquire, prepare, organize material and assist in finding information.
- Conduct research to determine the level of demand for products or services and to assess the need for new products or services.

Impact on Performance (Relationship of Increase to Strategic Goals)

The expansion of the Libraries and Information Services across the DHS components has led to the requirement of one (1) FTE to administer the services to the participating components. The success of the DHS-wide program has led to an increased workload for the existing three (3) FTE. Not funding the additional FTE will increase the customer response time required to deliver the Libraries and Information Services. The one additional FTE will support administrative and research requirements for the Libraries and Information Services.

Description of Item

DHS awards a contract to an independent CPA firm to perform financial statement audit functions. The contract includes time and material for hours audit services with the auditor providing the services and billing the hours worked at billing rates commensurate with the audit position being billed. The cost include travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by the Office of the Inspector General (OIG) as the Contracting Officer Technical Representative (COTR).

Justification

In FY09, the Financial Statement Audit activity requests a funding increase of \$605,222 for contractor cost. The amount includes an increase for time and material costs for audit services. These services includes a Full Scope audit cost for Custom Boarder Protection (CBP), Federal Law Enforcement Training Center (FLETC ) and Transportation Security Administration (TSA) as well as additional funding for travel oversight costs for the OIG staff.

Impact on Performance (Relationship of Increase to Strategic Goals)

Not funding the enhancement of \$605,222 will impact the number of DHS components requesting Stand-Alone Full Scope audits in FY09. The components include CBP, FLETC and TSA.

Description of Item

The Department of Homeland Security, Under Secretary for Management (USM) provides financial management support to Departmental Management and Operations. Services include budget formulation and execution of the Departmental Management and Operations of the Secretary and Executive Management Offices (OS&EM); the Under Secretary for Management; the Chief Financial Officer and the Chief of the Information Officer. The Executive Management Offices are independent offices that report directly to the Secretary and operate without financial management personnel. These offices rely on the Financial Management Support Activity for financial management and budget support. The services include the following:

- Processing of Procurement Request
- Commitment and Obligation of Funds
- Processing of Travel Authorizations and Voucher
- Reconciling and Centrally Billed Travel Account
- Set up and coordination of Purchase Cards
- Periodic Purchase Card reporting and review
- Invoice Processing and Certification
- Review and Accuracy of Financial Data
- Reconciling of accounting records and financial data in FFMS

Justification

In FY 2009, the Financial Management Support Activity requests a net increase of \$128,000 and 9 additional FTE. The funding level provides \$329,000 and 2 additional FTE to perform budget execution and financial management support due to the expansion of financial management support

services to the office of Health Affairs (OHA). The activity also requires 7 FTE to support the conversion of contractor positions to Government positions. This conversion of these positions will result in a net savings of \$201, 000.

Currently, 17 of the 21 individuals performing the functions of the financial management activity are contractors. The increase is necessary to staff inherently governmental functions with Federal Government individuals since these functions involve decision-making. These functions include but are not limited to: 1) certifying availability of funds, 2) determine if proposed actions are compliant with fiscal law, budget authority, Congressional intent, etc., 3) enforce Federal Travel Regulations, etc.

Impact on Performance (Relationship of Increase to Strategic Goals)

Currently, 80% of the financial management support functions are performed by contractors. In FY09, DHS seeks to convert these positions to FTE in order to build continuity within the Financial Management function. Not fully funding the contractor conversion to FTE plan will result in an increase workload on existing staff, due to the growth of the DHS Executive and Departmental Offices.

Description of Item

The Department of Agriculture / National Finance Center [NFC] is the servicing agency that delivers Payroll/Personnel service provisioning systems to include the Legacy NFC Systems and EmpowHR for over 180,000 DHS federal full-time and part-time employees. In addition, NFC provides Payroll/Personnel (EmpowHR) companion activities, which would include Payroll/Personnel policy support, Payroll/Personnel benefits reconciliation, tax reporting, and payroll problem resolution.

All NFC issues are handled by DHS OCHCO/HCBS on behalf of the components. The plan calls for all DHS components to implement the new EmpowHR (PeopleSoft Human Resources Management System) by FY 2010.

NFC Services that DHS components are billed for include:

| COST AREA   | COST DRIVER             |
|---|-------------------------|
| Postage-Earnings and Leave and Personal Benefits Statements | Pieces of mail          |
| Treasury FMS Postage Charges for Single Address Checks      | Checks mailed           |
| USDA OIG Oversight of Non-USDA Payroll Processing           | Avg # of employees paid |
| Payroll Operations Branch Support                           | Avg # of employees paid |
| Tax Reporting   | Avg # of employees paid |
| Payroll Policy Support                                      | Avg # of employees paid |
| e-Pay Policy Support  | Avg # of employees paid |
| Benefits Reconciliation and Liaison Area                    | Avg # of employees paid |
| Debt Management   | Receivables established |
| Claims  | Claims processed        |
| Payroll Accounting  | Avg # of employees paid |

|  |                         |
|--|-------------------------|
| Certification                                | Avg # of employees paid |
| Ad-Hoc reporting (based on CPU Minutes used) | CPU Minutes             |
| Data Center Operations (Other than FOCUS)    | Avg # of employees paid |
| Payroll/Personnel Baseline Services          | Avg # of employees paid |

In addition to Payroll costs, EmpowHR personnel systems and related additional maintenance costs assume an estimate of \$90 per employee paid for those using the new EmpowHR PeopleSoft personnel system. The \$90 unit cost is conservative and does not account for more NFC non-DHS customers scheduled for EmpowHR. In other words, as NFC gains a larger customer base for EmpowHR, the DHS unit cost will come down.

Justification

Fundamental to the HCBS mission is reducing costs by consolidating the number and variety of DHS Human Resource systems maintained. Specifically, costs are reduced by centralizing and simplifying training, licensing fees; reducing errors associated with complex interfaces due to redundant and disparate systems; and by retiring older less productive/efficient systems with modern and more flexible systems. This enterprise approach directly supports the DHS Secretary’s priority to strengthen DHS Core Management, Policy and Operational Agenda; the President’s Management Agenda (PMA); and the Human Resources Line of Business (HRLOB) and other “good government” practices.

There are several authorities that support the HCBS mission such as: 1) The Homeland Security Act of 2002 calling for the establishment of a new HR system for DHS that is flexible and contemporary; and 2) The E-Government Act of 2003 calling for the use by the Government of web-based Internet applications and other information technologies, combined with processes that implement these technologies, to bring about improvements in Government operations that may include effectiveness, efficiency, service quality, or transformation. It also calls for the adoption of innovative information technology, including the appropriate use of commercial best practices, as well as the use of electronic signatures.

In addition to the mandated Acts, the business case that resulted from the DHS HRIT Council research provides authority to Human Capital Business Systems to consolidate and modernize the 144+ disparate systems. Furthermore, OPM and OMB mandated other enterprise programs such as the e-Gov initiatives (i.e. e-Payroll, EHRI) and the Human Resources Line of Business (HRLOB), all centered on consolidating and modernizing Payroll and HR systems government wide.

In 2001, OPM was directed by OMB to coordinate the government-wide consolidation of payroll/personnel processing systems on September 30, 2004. In a lengthy process described below, four federal service providers were eventually chosen. The USDA/NFC was assigned as the payroll/personnel service provider to the Department of Homeland Security. This was a logical choice, as the majority of the organizations merged to form the new DHS were already serviced by USDA’s NFC. DHS’ conversion to the USDA NFC system was completed in 2006, and the e-Gov e-Payroll program has been “retired” since all organizations have completed conversion to one of the four mandated government service providers.

This request includes O&M costs for NFC payroll and EmpowHR personnel systems. The funding request increase is a direct result of deploying EmpowHR to additional DHS components (FEMA, FLETC, ICE and CIS) in FY 2009.

Impact on Performance (Relationship of Increase to Strategic Goals)

The activity directly supports the Human Capital Operational Plan, specifically in the areas of Talent Management, Culture of Performance, Learning and Development and Service Excellence. The Government is looking at increasing effectiveness from a business perspective and with an enterprise-wide view. Based on the e-Payroll Business Case, the best decision for the Government is to achieve savings and economies associated with rapid consolidation of Providers while leveraging key technology investment. The goal is to interface payroll systems with customer administrative systems, while increasing interoperability and reducing overall cost. This decision, made from a Government-wide rather than agency perspective, will move us toward the objective of a standard architecture and final Shared Service Provider solution.

Description of Item

The HQ Service Center provides coordination and oversight support for outsourced services supporting HQ Human Capital operational needs. The team ensures that the personnel processes for HQ’s managers/employees and service providers runs efficiently and effectively. Examples of services: Staffing and Recruitment; Position Classification/Position Management; Performance Management; Payroll and Personnel Action Processing; Employee and Labor Relations Support; Retirements and Benefits Support; Time and Attendance Support. It is imperative that we continue providing full-time, Federal employee oversight of these services.

Justification

In FY 2009, the estimated HQ population is 3,500-4,000 and assumes “full-service” capacity and the increased funding request will support the continuation of four (4) FTEs, which will improve operational oversight of all contracted services as well as provide more effective focus on customer support.

The HQ Service center will continue to provide the full range of personnel operational support to DHS HQ components (excluding the OIG) and eventually expand that service through functional integration to other DHS components.

Impact on Performance (Relationship of Increase to Strategic Goals)

The HC Service Center will not be able to provide coordinated and prioritized services; ensures timely and effective recruitment of staff; effectively manages the “on-board” staffing process (which includes security clearances and collaboration with the Personnel Security Office), quality personnel staffing services; and, facilitates staff exiting out of DHS HQ.

Description of Item

The purpose of DHS Executive Leadership Development (ELD) Programs is to initiate and execute learning and development initiatives that foster a “Team DHS” organizational climate. In addition, and most importantly, these programs are designed to help mitigate some of the challenges faced during the Federal response to the Gulf Coast tragedies, particularly Hurricane Katrina – e.g., DHS-enterprise approach to communications and problem resolution.

Justification

In FY 2006, DHS established a Chief Learning Officer (CLO) function in the Chief Human Capital Office to follow through on Second Stage Review (2SR) future state vision objectives related to DHS becoming a learning organization with common elements of DHS culture. As this new function is stood-up, Human Capital Operational Plan (HCOP) Performance Leadership training will continue, the DHS enterprise level succession planning interventions (ESPI’s) will be continued and a gap analysis of DHS-wide training plans will be conducted. In FY 07/08, new CLO policies and structures were implemented that focused on designing, developing and piloting new cross-agency/enterprise-level training programs that bridged gaps.

In FY 2009, a total of 75 DHS employees will be participating in three separate and overlapping SES 18-month-long CDP sessions. The FY 2009 increase cost and request for one additional FTE supports service costs related to running these three separate concurrent SES CDP classes. The Executive Leadership Curriculum consists of three DHS-wide leadership development activities:

- 1 Secretary’s Senior Leadership Conference;
- 2 Enterprise-level Succession Planning Interventions (ESPIs), which includes a CDP; and Department Leadership Assessment (DLA).

Impact on Performance (Relationship of Increase to Strategic Goals)

A well-executed Executive Leadership Program is a key element in sustaining a leadership community

that shares information and implements processes with a common DHS focus. OPM is requiring that agencies have succession planning and management initiatives. Leadership development is one of DHS' areas of focus as per the results of the Workforce Plan.

Description of Item

Flexible Spending Accounts are employee-funded accounts that are used by the employee account holder to pay for medical expenses that are tax deductible, but not reimbursed by any other source, as well as eligible dependent care costs. Contributions to the accounts come from an employee's pre-taxed salary; the Government does not make a contribution. There is a fee that is paid to the administrator of these accounts.

The FY 2009 and out-year requests are based on a projected increase in the DHS-wide participation rate. DHS is currently participating at a 6% rate. OPM records indicate that mature organizations participate at a minimum 20% rate across the board. The projected growth shown above is predicated on reaching a 20% DHS-wide participation rate in FY 2013.

Justification

The costs for this program are charged back based on actual invoices received in October and March of each calendar year. The March bill assesses a fee for employees of record as of January 1 of the calendar year. The October's bill makes an adjustment for any new employees who have entered the program since January 1. The October bill is generally small, but it is not received in time to be paid out of the appropriation for the year in which the cost was incurred. The Human Capital Business Office will manage the invoicing process with the FSA provider and charge the direct cost of the fees to the component based upon actual invoices received from the vendor.

Impact on Performance (Relationship of Increase to Strategic Goals)

The law now requires that agencies pay these fees on behalf of their employees. In July 2004, SHPS, Inc. was selected by the Office of Personnel Management (OPM) to administer FSAFEDS on behalf of the Executive Branch and those entities of the Judicial and Legislative Branches that elect to participate in the FSAFEDS Program. Agencies must pay SHPS directly (and centrally) for the fees;

there is not an interagency agreement with each component. The increased cost estimate is based on an anticipated increase in enrollment in FY 2008 and beyond.

Description of Item

Employee Assistance and Work-life programs are an important partner in the creation of a mentally and emotionally healthy workplace. These programs provide support services related to life and work issues. Additionally, they provide for quality services for managers or work groups that are dealing with stressful or potentially stressful organizational issues.

The DHS intends to utilize an integrated Employee Assistance and Work-life Referral Service Program for all DHS HQ employees and their immediate family members. “Immediate Family Members” is defined as members of the immediate household who are dependents, which may include children, elderly parents, and/or spouses/partners who share financial and family caretaking responsibilities.

These services are to be provided to all DHS HQ employees regardless of their function or post of duty. There is no cost to employees and eligible family members for EAP and Work-life services. EAP and WorkLife services will employ both unlimited telephonic access via a toll-free dedicated DHS telephone number and a website and will be available seven days a week, twenty-four hours a day. When services are required that are outside the scope of telephonic counseling services, DHS HQ personnel have access to six (6) face-to-face counseling at no charge to the DHS HQ personnel or their family members.

Justification

Employee Assistance Programs and the Work Life referral services are provided for under these authorities:

- Management Directive 3060.2 establishes the policy, procedures and objectives for the Department of Homeland Security (DHS) Employee Assistance Program (EAP).

- Federal agencies are authorized by 5 U.S.C. § 7901 to establish health services for the promotion and maintenance of the physical and mental fitness of employees in the Federal Government.

The Department of Homeland Security, Headquarters (DHS HQ) recognizes the importance of its employees and realizes its employees may experience a wide range of personal and professional issues from time to time, and that, usually, employees are able to cope successfully with these situations as they occur. In some cases, however, there may be instances when employees may desire assistance with personal and/or family issues, especially if these issues are persistent and/or if job performance is affected. Mental, emotional, professional and family wellness is vital for individual employees and their families, as well as, for the well being of the organization.

EAP and Work-Life are important partners in the creation of a mentally and emotionally healthy workplace and provides support services related to life and work issues. Additionally, the program provides for quality services for managers or work groups that are dealing with stressful or potentially stressful organizational issues.

It is DHS HQ's policy to enhance the Department's work environment and improve job performance by providing its employees and their family members with access to an EAP that ensures that its employees have the resources to address: work-related problems, traumatic incidents, substance abuse, mental illness, and marital, financial or other family problems. It is the Department's policy to provide consultation and training to managers and supervisors seeking guidance in enhancing the work environment; improving employee job performance; and providing problem solving strategies to employees.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

The EAP and WorkLife program relates to the Core Value of "Integrity: Service before Self", of the Strategic Plan that states, "Each of us serves something far greater than ourselves. To our nation, we represent the President and Congress. To the world, seeking to visit or do business with us, we are often the first Americans they meet. We will faithfully execute the duties and responsibilities entrusted to us, and we will maintain the highest ethical and professional standards". In the same token, the EAP and WorkLife program support DHS Strategic Goal 7: Organizational Excellence, Objective 7.7: Provide excellent customer service to support the mission of the Department. This objective states that DHS will "Provide seamless, transparent and dedicated customer support services.....human resources and personnel...to enable the people in frontline programs to accomplish the mission of the department effectively". One of the most effective ways to accomplish this objective is through a well-integrated and fully-functional EAP and WorkLife program which allows for DHS personnel to have available resources to cope with personal and work stresses, thereby allowing for their ability to effectively and efficiently perform their Departmental duties.

Description of Item

The National Capital Area Information Office (NCAIO) will serve the majority of DHS Headquarters users for network, email, internet, intranet, and telecom infrastructure, as well as all end user desktop computing, telecom, and wireless services. NCAIO’s Program Management Office (PMO) coordinates management and deployment of infrastructure resources along with build-out of new facilities and provides continuous operations, help desk, vendor management, financial management, and technology evaluation. Working with Directorate CIOs, NCAIO will ensure effective customer service, performance management and measurement for continuous availability of all critical infrastructure services along with vendor effectiveness and accountability.

Justification

The requested funding is needed to provide for 500 new additional seats approved for the USM in FY08 for managed IT services (e.g., desktop PCs, LAN service, telephone, E-mail, etc.). The offices under the USM requesting additional personnel will bear the increase in cost assessments. The increase in funding will adequately provide IT services to the offices and ensure continuity in operations.

Impact on Performance (Relationship of Increase to Strategic Goals)

The NCR IT services that will be improved by an additional \$7.368M in funding for OCIO are:

**VTC, Bridge, TV**

This will allow for enhanced video and audio teleconferencing capabilities for DHS HQ and associated Components. This budget would result in the continuation of both unclassified and secure video teleconferencing services as well as Cable TV services.

**Wireless Devices**

This funding will continue all wireless capabilities for DHS HQ and associated Components. There are currently 7500 cell phones, blackberries and pagers used by DHS HQ staff. All wireless services

used by DHS HQ staff with these devices, including the Secretary's Office and Preparedness, would use wireless devices for critical communication method as DHS must be able to respond quickly to identified threats, disasters, and terrorist attacks. The removal of this service guarantees that rapid communications, when critical, will be difficult if not impossible. If not fully funded, this termination would not impact COMSEC devices, Land Mobile Radio or Satellite cell phones.

#### **LAN A Services**

The FTE positions are funded for new equipment consisting of a desktop, phone and blackberries. Funding for this would provide for O&M support services such as repair, replacement or augmenting of IT networks. Funding for this activity is important as Personnel in critical DHS roles need to be able to fulfill their duties in support of the DHS mission.

Description of Item

In October 2004, the Security of the Department of Homeland Security signed a series of functional integration management directives that formalized oversight of the support services by the Line of Business Chiefs, under the direction of the Under Secretary for Management. Pursuant to DHS Management Directive (MD) 00006, Human Capital Line of Business Integration and Management, the Under Secretary re-delegated additional Human Capital authorities not already delegated by law to the Chief Human Capital Officer (CHCO).

In December 2003, Customs and Border Protection (CBP), Immigration and Customs Enforcement (ICE), and Citizenship and Immigration Services (CIS) formed a “shared services” arrangement under the “TriBureau” Governance Operations Charter for human resource services. Each fiscal year, CBP, ICE, and CIS, under the management of DHS OCHCO (as delegated under MD 0006) set a formal service level agreement that defines customer service expectations and responsibilities between CBP (the provider) and ICE and CIS (the customer). CHCO and CBP have a Memorandum of Understanding for clarifying the financial/oversight relationship through the Working Capital Fund, which transmits funding from ICE and CIS to CBP each fiscal year.

Justification

ICE has additional legislatively-mandated border staffing support requirements beginning in FY 2007 and ongoing through the next several fiscal years. The increased funding in FY 2009 will allow CBP to provide the required human resources support to ICE.

Impact to Performance (Relationship of Increase to Strategic Goals)

This supports three of the Secretary's Goals: to protect our Nation from dangerous people, Protect our Nation from dangerous goods, and Strengthen and unify DHS Operations and Management.

Description of Item

The Data Center Services provide application hosting OS/390 platform for over 40 applications; application hosting on AIX Unix platform for over 25 applications; housing of DHS servers; disk storage and enterprise tape backup capacity, local printing services, management and operation of component owned equipment, transition support for de-installing, packing, and shipping systems, and separate raised-floor computer room space and utilities.

The increase will fund two positions to provide two individuals whose full time responsibility would be management, oversight, and support for funding, invoicing, negotiations and agreements with the DHS service center at DOJ and to provide the primary point for similar work at future DHS service centers. They would perform a multitude of tasks including but not limited to the following.

- (1) Prepare required supporting documentation for interaction with the DHS Service Centers
- (2) Host and coordinate quarterly review meetings with component to discuss requirements and fiscal issues associated with DHS Service Centers.
- (3) Perform Service Center invoice oversight and allocate/distribute portions to 22+ component organizations and multiple DHS Service Centers.
- (4) Transfer funds to the service centers in response to approved invoices and negotiate discrepancies.
- (5) Prepare budget estimates for out years
- (6) Distribute component invoices

### Justification

The positions are required to help coordinate and oversee the delivery of IT data center services to DHS components (ICE, US Visit, CIS, CBP, and HQ/CIO) currently using DOJ facilities, help oversee the DHS Working Capital Fund (WCF) budget for DOJ Data Center services (DOJ DCS) and prepare budget submissions and forecasts, update the data center cost allocation methodology, and help update and define the DOJ Memorandum of Understanding (MOU).

### Impact on Performance (Relationship of Increase to Strategic Goals)

The systems hosted by DOJ DCS support the investigative and enforcement responsibilities required by federal immigration laws, customs laws, and air security laws. These systems are part of a continuum of security measures that begin overseas and continue through a visitor's arrival in and departure from the United States. They incorporate eligibility determinations made by the Departments of Homeland Security and State and implement policy that permits this nation to remain secure while demonstrating that we remain a welcoming nation. The responsibility for management, oversight, and support for funding, invoicing, negotiations and agreements with the DHS service center at DOJ which serves as the primary point for similar work at future DHS service centers would be severely impacted if funding were cut.

Description of Item

In FY 2006, OPM’s Recruitment One-Stop Program graduated from the e-Gov Program, became a Government-wide Mandated Fee For Service Activity, and was renamed “USAJOBS”. The USAJOBS Program Office has increased the content and navigation of Veterans-focused resources; incorporated a new one-stop information center; successfully implemented e-Authentication for Federal HR users; provided a more robust and meaningful online application status tracking mechanism for job seekers; added graphics to announcements and incorporated an applicant survey to provide feedback to agencies about the application process.

In the past, a federal access fee was only assessed based on the number of Competitive Service employees within a given agency. Effective October 1, 2007, in accordance with CFR Title 5, Volume 1, Part 317.501(b)(2), those organizations with Executive Resource Service/Senior Executive Service positions which are required to be posted on USAJOBS must now pay a USAJOBS fee. In addition, similar per-capita staff and SES fees will be charged to excepted-service agencies which voluntarily elect to use USAJOBS. The DHS fee was calculated based upon the Department’s total “on-board” employment levels for competitive, excepted service, and ERS positions as of March 31, 2007.

Justification

The USAJOBS Federal Employment Information System seeks to simplify the process of locating and applying for Federal jobs. Its mission is to deliver a number of new job-seeker focused features including intuitive job searching; clean, concise, understandable and attractive job announcements; online resume submission; applicant data-mining; and on-line feedback on status and eligibility. USAJOBS Federal Employment Information System delivers state-of-the-art on-line recruitment services to job seekers including intuitive job searching, on-line resume submission, applicant data-mining, and on-line feedback on status and eligibility. Since nearly all federal government job announcements are posted via USAJOBS, and most job-seekers are aware of this tool, DHS will continue to be a user of this system.

DHS has no involvement in overseeing the USAJOBS program, other than paying the required amount to OPM. All agencies are required to fund their portion of this program (based on CPDF employment levels). Pursuant to OMB guidance, USAJOBS must operate on a fully reimbursable basis. Regulations contained in 5 CFR Parts 330, 333, and 335 that implement section 4 of Public Law 104-52 authorize the Office of Personnel Management to charge fees to agencies to pay the cost of providing Federal employment information and services.

Impact on Performance (Relationship of Increase to Strategic Goals)

Access to USAJOBS supports the DHS Strategic Goal to Strengthen and unify operations and management, as well as the DHS Human Capital Operations Plan goal to “Hire and Retain a Talented and Diverse Workforce.” USAJOB is a well-known tool for federal job seekers, and continued use of this valuable system will support DHS’ efforts to promote DHS as the workplace of choice.

Description of Item

The mission of e-Training is to create a premier e-Training environment that supports development of the federal workforce through simplified and “one-stop access” to the highest quality e-Training products and services.

Justification

The increase in FY 2009 reflects the expansion of dependency on technology to reach a distributed DHS audience with the learning and development and work performance support that our workforce will increasingly depend upon to fulfill the missions and objectives of the Department for the identification and implementation of a Learning Management System (LMS) to support DHS “enterprise” on-line learning and planned migration of legacy systems to the DHS LMS by FY 2010.

The Chief Human Capital Officer currently has an MOU with OPM for developing and implementing a learning management system for HQ. The goal of this MOU is to ultimately provide opportunities for aligning and possibly merging this LMS with other DHS components. This project is in support of the Presidential Management Agenda (PMA) e-Learning initiative and the Department of Homeland Security Learning and Development Strategic Plan for Fiscal Years 2006 to 2010 (Goal 4, Strategy 2, Tactic 1 to implement the recommendations of the Advanced Distributed Learning (ADL) Study).

Impact on Performance (Relationship of Increase to Strategic Goals)

Benefits from the new LMS will be increased functionality through automation of the SF-182 process, automatic Enterprise Human Resources Integration (EHRI) reporting of training, enterprise web conferencing capability, integrated support of the enterprise e-Performance Management System (e-Performance), integration with the EmpowHR personnel system, enterprise leveraged course procurement (i.e., increase buying power), enterprise leveraged course development, and enterprise leveraged course management. Preliminary analysis showed an approximately 75% cost savings through enterprise licensing of Commercial off the Shelf (COTS) courseware versus contracting by individual components.

Description of Item

EHRI is a collaborative e-Government initiative designed to transform the way Federal HR Specialists and Managers access human resource information and the way all Federal employees access their personnel file information. When fully implemented, EHRI will replace the current paper based Official Personnel Folder (OPF) with an electronic employee record (e-OPF) for all Executive Branch employees, resulting in a comprehensive electronic personnel data repository covering the entire life cycle of Federal employment.

DHS will have converted all of its components to e-OPF by FY 2008. The budget levels requested through FY2007 have been maintained; however, OPM under-estimated the maintenance cost of this project and has significantly increased its O&M cost projections. Starting in FY 2009 OPM will raise the maintenance rates to DHS depending on how many customers OPM has on its e-OPF system. FY 2008 rates will be offset by savings in the program up to that point; however starting in FY 2009, the rate increases will impact all components. After FY 2009, there will be a slight increase in costs above inflation through FY 2011.

Justification

The Enterprise HR Integration (EHRI) initiative was a Government-wide mandated fee-for-service activity operated by the Office of Personnel Management (OPM). DHS has no involvement in this program, other than paying the required amount to OPM. All agencies are required to fund their portion of this program.

Costs for EHRI's products and services will be recovered by EHRI from all agencies on an equitable basis related to the size and usage of each participating agency. Charges to each agency will be established by distributing total EHRI costs to all clients on the basis of the number of OPFs or on the basis of actual cost, depending on the service. Usage audits will occur at OPM's discretion, but at least annually, and will be used to make adjustments to cost recovery through the Interagency Agreement (IAA). EHRI will notify DHS of their revised annual costs within DHS's annual cycle, at least 90 days

prior to completion of the cycle. Any optional services provided to DHS will be billed on a cost recovery basis at the time the service request is signed by both EHRI and DHS.

Impact on Performance (Relationship of Increase to Strategic Goals) The mission of achieving the consolidated modernized approach for HR systems does impact other programs. The Government is looking at increasing effectiveness from a business perspective and with an enterprise-wide view. The goal is to increase interoperability and reduce overall costs. This decision, made from a Government-wide rather than agency perspective, will move us toward the objective of a standard architecture and final Shared Service Provider solution.

Description of Item

This activity provides a government-wide web based service that applies world class travel management practices to consolidate federal travel, minimize cost and produce superior customer satisfaction. From travel planning and authorization to reimbursement, the e-Travel program will leverage administrative, financial and information technology best practices to realize significant cost savings and improved employee productivity.

Justification

The e-Travel program is part of the President’s Management Agenda goal to expand electronic government through the promotion the cost effectiveness and improvement in services to citizens.

Impact on Performance (Relationship of Increase to Strategic Goals)

The program promotes the use of electronic government for improving services to citizens and reducing the cost of doing business. The program also increases the goal of unifying and strengthening DHS management and operations through the use of electronic government. The program change offsets listed below are due to a work load reduction or reductions in the e-government amounts.

Description of Item

Case Management Line of Business is one of the lines of business supporting the President's Management Agenda goal to expand Electronic Government. The goal of the effort is to identify opportunities to reduce the cost of government and improve services to citizens through business performance improvements.

Justification

The Case Management Line of Business is part of the President's Management Agenda goal to expand electronic government through the promotion of cost effectiveness and improvement in services to citizens.

Impact on Performance (Relationship of Increase to Strategic Goals)

The program promotes the use of electronic government for improving services to citizens and reducing the cost of doing business. The program also increases the goal of unifying and strengthening DHS management and operations through the use of electronic government. The program change offsets listed below are due to a work load reduction or reductions in the e-government amounts.

Description of Item

The Integrated Acquisition Environment (IAE) activity is a secure business environment that facilitates and supports cost-effective acquisition of goods and services in support of mission performance.

Justification

The FY 2009 request includes funding for the Integrated Acquisition Environment (IAE) as the Presidential-mandated e-Gov initiative charged with creating a government-wide "environment" of acquisition related systems that support federal acquisition throughout all federal agencies. For FY06 and beyond, it constitutes approximately 17 operational systems supporting federal buyers and their own contract writing system, which is PRISM for DHS. PRISM is directly dependent on the IAE, and interfaces with more than one of the IAE systems. The FY09 increase is due to significant DHS procurement activity, which translates as IAE budget share increases by the OMB formula to apportion expenses across the federal users.

Impact on Performance (Relationship of Increase to Strategic Goals)

IAE is mandated by OMB and funding is mandatory.

Description of Item

The GovBenefits.gov activity provides a single point of access for citizens to locate and determine eligibility for government benefits and services. The site now offers links to 234 benefits programs, representing \$1.3 trillion in annual benefits. Program benefits are as follows:

- A partner room, with instructions on how to become a partner of GovBenefits and presentations about the project available to download.
- A press room, with general information, press releases and biographies of the management team.

These enhancement goals to GovBenefits.gov are a direct response to citizen feedback that has been received about the site.

Justification

The increase in funding will go toward supporting the implementation of Executive Order 13411, “Improving Assistance for Disaster Victims” and the expansion of the Dunn and Bradstreet contract.

Impact on Performance (Relationship of Increase to Strategic Goals)

The increase in funding will allow the e-Gov Benefits program to comply with the strategic goal of unifying and strengthening DHS management and operations through the execution of Executive Order 13411.

Description of Item

The Nation’s interests are served, and the core missions of Federal agencies and their partners are met, through the effective and efficient development, provision, and interoperability of geospatial data and services.

This program will further refine the opportunities for optimizing and consolidating Federal geospatial-related investments to reduce the cost of government and, at the same time, improve services to citizens. Cross-agency coordination of geospatial activities can identify, consolidate, and reduce or eliminate redundant geospatial investments. Developing the Geospatial Line of Business (LoB) will result in a more coordinated approach to producing, maintaining, and using geospatial data, and will ensure sustainable participation from Federal partners to establish a collaborative model for geospatial-related activities and investments.

Justification

Funding is needed to promote a consolidated approach to maintaining and using geospatial data in order to establish a collaborative model for geospatial-related activities and investments.

Impact on Performance (Relationship of Increase to Strategic Goals)

The increase in funding will allow DHS to effectively pursue the ability to create a collaborative model for maintaining and using geospatial data and capabilities across the department and further enhance the unification and management of DHS operations.

Description of Item

The IT Infrastructure LoB will identify the opportunities for IT infrastructure consolidation and optimization, and develop government-wide common solutions. This LoB will define specific common performance measures for service levels and costs, identify best practices, and develop guidance for transition plans within agencies and/or across agencies. Consolidation and optimization of IT infrastructure represents a significant opportunity to realize future cost savings by taking a more coordinated approach to spending on commodity IT infrastructure. IT infrastructure consolidation and optimization case studies also demonstrate where agencies could improve IT service levels and, when relieved of the burden of managing these non-core functions, can concentrate more on mission priorities and results.

Justification

The funding requested is needed to identify opportunities across DHS for IT Infrastructure consolidation and optimization, while developing government wide common solutions. The LoB will assist in identifying common service levels, costs, and best practices for the development of transition plans as the department continues its consolidation of legacy infrastructure.

Impact on Performance (Relationship of Increase to Strategic Goals)

The increase in funding will allow the department to meet its strategic goal of unifying and strengthening the management and operations of DHS. The initiative will allow DHS to develop a framework for its ongoing consolidation of legacy infrastructure and the impending future of 'One Infrastructure' environment.

Description of Item

The focus of the Budget Formulation and Execution Line of Business (BFE LoB) is to build a “budget of the future” by promoting information sharing across government agency budget offices and building a “community of practice.” With this collaboration, the budget community can start to identify best practices for all aspects of budget formulation and execution. The BFE LoB strives to find solutions that link budget formulation, execution, planning, performance, and financial information. Areas of particular interest include technology, budget performance integration, data collection and tracking, financial management integration, and human capital.

Justification

The increase in funding is needed to promote information sharing across government agencies for the promotion of identifying a “community of practice” for formulating and executing the budget life cycle. Through the formation of a “community of practice”, best practices can be created and implemented for the purpose of combining technology, budget performance integration, data collection and tracking, and human capital for the effective and efficient formulation and execution of a fiscal budget.

Impact on Performance (Relationship of Increase to Strategic Goals)

The increase in funding will allow DHS to effectively pursue the ability to create an effective and efficient “community of practice” for the identification of best business practices in formulating and executing budgets. The activity will allow DHS to unify and strengthen budget formulation operations and management.

Description of Item

The DHS Shared Reporting - CPO system is the acquisition data feeder system to the Federal Procurement Data System that is required by statute. This data source is the primary source of all acquisition data for the federal government, used by U.S. agencies, governments around the world, the public, and the commercial world for planning marketing opportunities with the American government related to its annual acquisition budget. Without CPO Shared Reporting, DHS would not be postured to efficiently and effectively provide data, nor secure extensive reports from DHS acquisition data for Congress, the IG, GAO, and DHS management.

Justification

The increase in funding and 3 FTE are needed to provide support of the Acquisition Systems Branch (ASB) due to greatly expanded workload and responsibilities as it directly supports the Enterprise PRISM Instance hosted service providing a comprehensive contract management system for thousands of acquisition workforce members and their customers. In FY 09, the ASB strategic plan calls for more robust security and hosting, with support of the first three component financial system interfaces, and Enterprise Services Bus (ESB), and EPI Advanced Acquisition Plan adoption.

Impact on Performance (Relationship of Increase to Strategic Goals)

The increase in funding will enable the ASB to effectively continue to provide the wide-ranging contract management system support for increased workload and responsibilities, as well as expanded scope of the system support will be unable to provide the needed support services.

Description of Item

The Working Capital Fund Activity develops WCF policy and procedures, formulates and executes the WCF budget and negotiates issues between activity managers and customers.

Justification

DHS established the Working Capital Fund Office in FY 2004. The WCF requires two (2) additional FTE and \$209K to support the expansion of the working capital fund. The two additional FTE will perform the following:

- Incorporate the WCF program into the DHS budget and FYHSP cycle
- Develop a robust review and oversight process to ensure activities funded by the fund are in compliance with applicable laws and regulations
- Develop and conduct training to DHS staff, activity managers and customers on revolving fund principles and procedures.

Impact on Performance (Relationship of Increase to Strategic Goals)

The additional two (2) FTE and \$209K requested in FY09 will directly support the operation and continued development of the fund.

**Program Offsets** listed below are due to a work load reduction or reductions in the e-government amounts:

**Fee for Service Activities (dollars in thousands)**

- -\$2,157 Financial Management (Finance and Accounting Shared Services)
- -\$4,373 Internal Control Audit
- -\$153 Board of Contract Appeals
- -\$852 Software Enterprise Licenses – Microsoft

**Total - \$7.534 million**

**Government-Wide Mandated Activities (dollars in thousands)**

- -\$327 Business Gateway
- -\$4 Human Resources Line of Business
- -\$0.2 e-Authentication

**Total -\$0.331 million**

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

[SEC. 504. None of the funds appropriated or otherwise made available to the Department of Homeland Security may be used to make payments to the 'Department of Homeland Security Working Capital Fund', except for the activities and amounts allowed in the President's fiscal year 2008 budget, excluding sedan service, shuttle service, transit subsidy, mail operations, parking, and competitive sourcing: *Provided*, That any additional activities and amounts shall be approved by the Committees on Appropriations of the Senate and the House of Representatives 30 days in advance of obligation.]

[SEC. 524. The Department of Homeland Security Working Capital Fund, established pursuant to section 403 of Public Law 103-356 (31 U.S.C. 501 note), shall continue operations during fiscal year 2008.]

***Sec. 528:** The Department of Homeland Security Working Capital Fund, established pursuant to section 403 of Public Law 103-356 (31 U.S.C. 501 note), shall continue operations as a permanent working capital fund for fiscal year 2009 and thereafter: *Provided*, That funds provided to the Working Capital Fund shall be available for obligation until expended: *Provided further*, That such fund shall be paid in advance or reimbursed at rates which will return the full cost of each service, and an amount necessary to maintain a reasonable operating reserve: *Provided further*, That funds not to exceed 10 percent of the funding for any program, project or activity within the Working Capital Fund may be transferred to another program, project or activity within the Working Capital Fund: *Provided further*, That any such transfer in excess of 10 percent shall be treated as a reprogramming of funds under section 503(b) of this Act and shall not be available for obligation unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such transfer.*

#### **Explanation of Change:**

The DHS working capital fund used to be a true revolving fund with retained earnings collected to form working capital. In 2005, the Department lost many of its authorities for the working capital fund (i.e. the ability to carry funds across years and collect more than the direct usage costs) and since then, the working capital fund account has been hampered by a rigid structure that prevents the DHS Chief Financial Officer from delivering much economies of scale and efficiencies to participating users.

The Department needs a real and effective working capital fund through which it can better integrate disparate component agencies into a single department through building and maintaining department-wide infrastructure for critical management and administrative functions. Also, the procedural obstacles created by current legal restrictions prevent DHS from being good financial managers that result in a lot of waste. Hence, the Department seeks the following authorities outlined in the proposed legislation above:

- Ability to carry over funds in a no-year revolving fund account
- Ability to retain a modest level of earnings to develop operating reserves for each service offered through the working capital fund.

Ability to reprogram only reasonably small sums of funding across PPAs within the working capital fund account without Congressional approval to cut down on processing times, while still having to report to Congress for reprogramming funding levels greater than 10% of the total collection amount of a given PPA.
